Health & Medical Humanities is an interdisciplinary field that uses humanistic perspectives to understand health and healthcare. The humanities have the potential to teach us about the embodied human experience, including suffering, healing, well-being, and flourishing. The Minor in Health & Medical Humanities complements the movement toward primary and patient-centered care in healthcare and provides an interdisciplinary approach to understanding the effects of health, wellness, and illness on patients, health professionals, and on the social worlds in which they live and work. The program explores the experience of illness, mortality, fragility, health, and healthcare settings through literature, the arts, and the social sciences. The minor supports the University's health and medical-related programs by offering a cross-disciplinary approach that promises to enhance observation, empathy, communication, cultural understanding, human compassion and sensitivity, and creativity, among future healthcare providers. In short, the minor immerses students in the human side of medicine and health and leads to greater enhanced interpersonal relationships between patients and practitioners. The minor supports the concept of "person-centered medicine," and thus leads to an enhanced appreciation of the personhood and inherent humanness of patients and clients. The minor also intends to enhance personal reflection, critical thinking skills, and the understanding of health, illness, and medical care's personal, social, historical, and cultural contexts. The minor is supported by faculty and courses across the College of Humanities & Earth and Social Sciences, including from departments of and majors in Africana Studies, Anthropology, Chemistry, Communication Studies, Criminal Justice, History, Language and Cultural Studies, and Philosophy.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

The Minor in Health & Medical Humanities requires 18 credit hours. Students take two required courses. Between these two courses, students take four (4) approved elective courses from various departments from the social sciences, humanities, arts, and natural sciences. Throughout, students investigate questions of health, healing, and disease from multiple disciplinary perspectives and integrate their insights into an interdisciplinary portfolio as a capstone project. Because this is designated to be an interdisciplinary minor, no more than three courses in the student's major may count toward the minor.

Introductory Course (3 credit hours)

HHUM 2100 - Introduction to Health & Medical Humanities (3)

Elective Courses (12 credit hours)

Select from the following. If selecting a Topics Course from the list of electives below (e.g., AFRS 2050, AMST 3050), prior approval for the topic is required by the director of the HHUM minor.

AFRS 2050 - Topics in Africana Studies (3) (*Topics: Religion and Racism*)

AFRS 2170 - Introduction to Health and Environmental Issues in the Africana World (3)

AFRS 2172 - Black Sexuality and Health (3)

- AFRS 3155 - Health and Healing in Africa (3)
or HIST 3155 - Health and Healing in Africa (3)
- AFRS 3218 - Racial Violence, Colonial Times to Present (3)
- AFRS 3250 - African Americans and Health Communication (3)
- AFRS 3260 - Slavery, Racism, and Colonialism in the African Diaspora (3)
- AFRS 4050 - Topics in Africana Studies (3)
- AFRS 4652 - Race, Health, and the African Diaspora (3)
- AMST 2050 - Topics in American Studies (3) (*Topics: Race in the U.S. and Latin America*)
- AMST 3050 - Topics in American Studies (3)
- ANTH 2020 - Topics in Cultural Anthropology (3) (*Topics: Religion and Food*)
- ANTH 2126 - World Population Problems (3)
- ANTH 2127 - Environmental Anthropology (3)
- ANTH 2141 - Our Place in Nature: Introduction to Biological Anthropology (4)
- ANTH 3090 - Topics in Anthropology (1 to 3) (*Topics: Anthropology of Childhood, Anthropology of Violence, Cemetery Studies*)
- ANTH 3125 - Food and Globalization (3)
- ANTH 3143 - Race and Anthropology (3)
- ANTH 3144 - Evolutionary Anthropology (3)
- ANTH 3222 - Culture, Health, and Disease (3)
- ANTH 4090 - Topics in Anthropology (1 to 3)
- ANTH 4141 - Forensic Anthropology (3)
- CJUS 3366 - Domestic Violence (3)
- CJUS 4351 - Violence and the Violent Offender (3)
- CJUS 4360 - Drugs, Crime, and the Criminal Justice System (3)
- CJUS 4363 - Gender, Race, and Justice (3)
- CJUS 4372 - Drug Analytics (3)
- COMM 2107 - Interpersonal Communication (3)
- COMM 3051 - Topics in Health Communication (3) (*Topics: Healthcare Narratives; End of Life Communication; Gender and Health; Media and Health; Health, Communication, and Marginal Communities; The Social Construction of Health and Illness*)
- GRNT 3267 - Sociology of Dying, Death, and Bereavement (3)
or SOCY 3267 - Sociology of Dying, Death, and Bereavement (3)
- GRNT 4260 - Women: Middle Age and Beyond (3)
or WGST 4260 - Women: Middle Age and Beyond (3)
- HHUM 3020 - Topics in Health & Medical Humanities (3)
- HHUM 3030 - Health & Medical Humanities Study Abroad (3)
- HIST 2002 - Topics in Non-Western History (3) (*Topics: Gender and Sexuality in Latin American History*)
- HIST 2140 - Disease and Medicine in History (3)
- HIST 2170 - Latino/as in the United States, 1846 to Present (3)
- LTAM 2002 - Topics in Latin American Studies (3) (*Topics: Gender and Sexuality in Latin American History*)
- PHIL 2220 - Healthcare Ethics (3)
- PHIL 3272 - Philosophy of Technology (3)
- RELS 3300 Religion and Healing (3)
- RELS 4300 – Religion and the Body (3)
- SOCY 2100 - Aging and the Lifecourse (3) (SL)
- SOCY 2169 - Sociology of Health and Illness (3)
- SOCY 3261 - Human Sexuality (3)
- SPAN 3222 - Spanish for Medical and Healthcare (3)
- WGST 3050 - Topics in Women's Studies (3)
- WGST 3102 - Changing Realities of Women's Lives (3)
- WGST 3140 - Domestic Violence (3)
- WGST 3310 - Gender and Sexuality (3)

Capstone Course (3 credit hours)

HHUM 4800 - Health & Medical Humanities Portfolio Capstone (3)

Minor Total = 18 Credit Hours**Progression Requirements**

Students must attain an overall GPA of 2.0 in all coursework within the minor. No courses counted toward the minor may be taken Pass/No Credit.

Interdisciplinary Studies

Bachelor of Arts in Interdisciplinary Studies *with Concentration in Capitalism Studies*

The B.A. in Interdisciplinary Studies has concentrations in the following areas: Capitalism Studies, Film & Media Production, Gerontology, Health & Medical Humanities, and Women's and Gender Studies. The program allows students to combine an interdisciplinary concentration in one of these areas with in-depth coursework in a disciplinary field to create an individually designed major reflecting their own interests. Through the combination of interdisciplinary and disciplinary coursework, students gain a deeper understanding of these areas of study from multiple perspectives and develop competencies in oral and written communication, critical thinking, data analysis, teamwork, and leadership.

Admission Requirements**Freshmen and Transfers**

All students must meet UNC Charlotte requirements for admission for undergraduate students. General advising for prospective and newly declared majors will introduce students to the curriculum and degree requirements so as not to delay graduation or result in higher costs to students.

See University Admission Requirements

Currently Enrolled Students

- Students must have a 2.0 cumulative GPA unless it is their first semester at UNC Charlotte and a cumulative GPA has not been established.
- *Declaration of Major.* Students who want to declare a major in Interdisciplinary Studies with a Concentration in Capitalism Studies should first meet with the Capitalism Studies program director, then complete the "Add IDST Major" form located on the Interdisciplinary Studies department website.

Degree Requirements**General Education (37-43 credit hours)**

For details on required General Education courses, refer to the General Education Program.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirement.

Major Courses (36 credit hours)**Capitalism Studies Minor Courses (18 credit hours)****Introductory Courses (6 credit hours)**

CAPI 1501 - Global Social Science: Capitalism in Global Context (3)

or CAPI 1575 - Capitalism and Democracy (3)

ECON 1501 - Global Social Science: Economics of Global Issues (3)

or ECON 2101 Principles of Economics Macro (3)

Research Methods Course (3 credit hours)

IDST 3100 - Interdisciplinary Research Methods (3)

Capstone/Practicum Course (3 credit hours)

CAPI 4050 - Capstone in Capitalism Studies (3)

Elective Courses (6 credit hours)

Select from the following approved elective courses. Other courses not on this list, such as topics courses directly related to the minor, courses cross-listed with those on the list, and independent study courses, may be approved by the Program Director. In addition, students cannot take more than 6 credit hours from any one major area, such as AFRS, ANTH, ECON, GEOG, INTL, HIST, POLS, and SOCY.

AFRS 3190 - Political Economy of the Caribbean (3)

AFRS 3264 - Business Culture and Entrepreneurship in Africa (3)

AFRS 3265 - African Economic Development (3)

ANTH 3113 - Economic Anthropology (3)

ANTH 3125 - Food and Globalization (3)

CAPI 2050 - Topics in Capitalism Studies (3)

CAPI 3050 - Topics in Capitalism Studies (3)

CAPI 3400 - Capitalism Studies Internship (3)

CAPI 4050 - Capstone in Capitalism Studies (3)

ECON 1501 - Global Social Science: Economics of Global Issues (3)

ECON 2101 - Principles of Economics - Macro (3)

ECON 2102 - Principles of Economics - Micro (3)

ECON 3171 - International Business Economics (3)

GEOG 2105 - Introduction to Economic Geography (3)

GEOG 3105 - Geography of the Global Economy (3)

GERM 3670 - Seminar: German-American Culture for Business and Engineering I (English) (3)

GERM 3680 - Seminar: German-American Culture for Business and Engineering II (English) (3)

HIST 2101 - American Business History (3)

HIST 2105 - American Slavery and Emancipation (3)

HIST 3154 - Globalization in African History (3)

HIST 3270 - History of Capitalism in the U.S. (3)

INTL 3135 - Origins of Globalization (3)

JAPN 3130 - Business and Culture in Japan (3)

LTAM 3154 - Political Economy of Latin America (3)

PHIL 3271 - Social and Political Philosophy (3)

POL 3151 - International Political Economy (3)

PSYC 2320 - Introduction to Industrial/Organizational Psychology (3)

PSYC 3121 - Organizational Psychology (3)

SOCY 4112 - Sociology of Work (3)

SOCY 4115 - Organizational Sociology (3)

SOCY 4116 - Sociology of Economic Life (3)

SOCY 4121 - Globalization and Development (3)

SPAN 3030 - Business and Culture in the Hispanic Caribbean Region (3)

WGST 3230 - Gender, Work, and Money (3)

Disciplinary Depth Coursework (18 credit hours)

Select 18 credit hours in a disciplinary field of study that complements your concentration. This may be a minor in a disciplinary department, or an alternative course of study approved by the Director of Interdisciplinary Studies. A maximum of two courses (6 hours) from a student's disciplinary depth coursework can count toward the electives in their Interdisciplinary Studies concentration, allowing completion of the major in 30 credit hours with proper planning. No more than two courses (6 hours) from another declared major can count toward the student's Interdisciplinary Studies major.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Students must maintain a minimum GPA of 2.0 to continue in the major.

Bachelor of Arts in Interdisciplinary Studies with Concentration in Film & Media Production

The B.A. in Interdisciplinary Studies has concentrations in the following areas: Capitalism Studies, Film & Media Production, Gerontology, Health & Medical Humanities, and Women's and Gender Studies. The program allows students to combine an interdisciplinary concentration in one of these areas with in-depth coursework in a disciplinary field to create an individually designed major reflecting their own interests. Through the combination of interdisciplinary and disciplinary coursework, students gain a deeper understanding of these areas of study from multiple perspectives and develop competencies in oral and written communication, critical thinking, data analysis, teamwork, and leadership.

General Education (37-43 credit hours)

For details on required General Education courses, refer to the General Education Program.

Foreign Language Requirement (0-8 credit hours)

For details on required General Education courses, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirement.

Major Courses (39 credit hours)

Film & Media Production Concentration Courses (21 credit hours)

Film & Media Foundations (3 credit hours)

An introduction to the terminologies, significant movements, figures and works associated with the history, theory and production of film beginning in the late 1800s to present. Students gain an understanding of oscillating relationships between media and culture and discover patterns of technological, social, economic and cultural developments through viewings, discussions and patterning.

FILM 1502 – Global Arts/Humanities: Introduction to Film and Media Art (3)

Interdisciplinary Research Methods Course (3 credit hours)

This course provides an overview of qualitative and quantitative methods that are commonly used across academic disciplines and in interdisciplinary research. It examines epistemological considerations that go into crafting an original research question, developing an appropriate research design, and critically analyzing evidence. These include exploring philosophical worldviews, reviewing relevant literature, understanding the relationship between theory and methods, considering ethical issues, and assessing the reliability of data. By studying methods across academic fields, students will learn to engage with a broad range of existing scholarship and build a foundation for conducting their own interdisciplinary research.

IDST 3100 - Interdisciplinary Research Methods (3)

Production Fundamentals (6 credit hours)

These courses focuses on introducing best practices for all production phases (concept development, pre-production, production, post-production and marketing/impact production), as well as key scriptwriting elements and core tenets of modern storytelling for various media applications. Students must successfully complete FILM 3120 before enrolling in advanced production-based courses, and must successfully complete FILM 3220 before enrolling in advanced screenwriting courses.

FILM 3120 - Fundamentals of Film & Media Production

FILM 3220 - Introduction to Screenwriting

Production Electives (6 credit hours)

Students must take two secondary electives which may be chosen from the following list of approved courses related to Film & Media Production. Additional Film & Media Production primary elective courses may also count toward this requirement. Other appropriate courses may

be chosen as electives in consultation with the Program Director.

- FILM 3051 - Topics in Film (3)
- FILM 3121 - Cinematic Storytelling (3)
- FILM 3221 - Advanced Screenwriting (3)
- FILM 3800 - Directed Project in Film or Video (1 to 3)
- FILM 4120 - Production and Directing (3)
- FILM 4121 - Creative Nonfiction Production (3)
- FILM 4122 - Music Video Production (3)
- FILM 4220 - Film Festivals: Production and Theory (3)
- FILM 4221 - Community-Based Film Production (3)
- FILM 4320 - Acting & Directing for Film (3)
- FILM 4410 - Professional Internship in Film Studies (1 to 6)

Capstone in Film & Media Production (3 credit hours)

Participation in a preliminary orientation session a semester in advance is required to receive a permit for this course. Students must be in the Film & Media Production concentration and should take this course as close to graduation as possible. Students must have completed all or the large majority of Film & Media Production major concentration courses to receive a permit for this course. Transfer credit is not accepted for this course. This course is designed as a pre-professional launching pad and exploratory survey of career options for Film & Media Production students through the development of a concentrated thesis project and ancillary materials to complete a professional portfolio package.

- FILM 4690 - Capstone in Film & Media Production (3)

Disciplinary Depth Coursework (18 credit hours)

Select 18 credit hours in a disciplinary field of study that complements your concentration. This may be a minor in a disciplinary department, or an alternative course of study approved by the Director of Interdisciplinary Studies. A maximum of two courses (6 hours) from a student's disciplinary depth coursework can count toward the electives in their Interdisciplinary Studies concentration, allowing completion of the major in 33 credit hours with proper planning. No more than two courses (6 hours) from another declared major can count toward the student's Interdisciplinary Studies major.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Students must maintain a minimum GPA of 2.0 to continue in the major.

Bachelor of Arts in Interdisciplinary Studies with Concentration in Gerontology

The B.A. in Interdisciplinary Studies has concentrations in the following areas: Capitalism Studies, Film & Media Production, Gerontology, Health & Medical Humanities, and Women's and Gender Studies. The program allows students to combine an interdisciplinary concentration in one of these areas with in-depth coursework in a disciplinary field to create an individually designed major reflecting their own interests. Through the combination of interdisciplinary and disciplinary coursework, students gain a deeper understanding of these areas of study from multiple

perspectives and develop competencies in oral and written communication, critical thinking, data analysis, teamwork, and leadership.

Currently Enrolled Students

- Students must have a 2.0 cumulative GPA unless it is their first semester at UNC Charlotte and a cumulative GPA has not been established.
- *Declaration of Major.* Students who want to declare a major in Interdisciplinary Studies with a Concentration in Gerontology should first meet with the Gerontology Program Director, then complete the "Add IDST Major" form located on the Interdisciplinary Studies department website.

Degree Requirements

General Education (37-43 credit hours)

For details on required General Education courses, refer to the General Education Program.

Foreign Language Requirement (0-8 credit hours)

For details on required General Education courses, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirement.

Major Courses (39 credit hours)

Gerontology Concentration Courses (21 credit hours)

Introductory Course (SL) (3 credit hours)

An interdisciplinary course that examines the phenomenon of aging and its consequences for society from a variety of perspectives. Students participate in lectures, discussions and service-learning projects designed to give them a broad overview of the field of gerontology. Emphasis on the wide variation in the aging process and approaches to meeting the needs of the aging population. Transfer credit is not accepted for this course.

- GRNT 2100 - Aging and the Lifecourse (3)

or SOCY 2100 - Aging and the Lifecourse (3)

Interdisciplinary Research Methods Course (3 credit hours)

This course provides an overview of qualitative and quantitative methods that are commonly used across academic disciplines and in interdisciplinary research. It examines epistemological considerations that go into crafting an original research question, developing an appropriate research design, and critically analyzing evidence. These include exploring philosophical worldviews, reviewing relevant literature, understanding the relationship between theory and methods, considering ethical issues, and assessing the reliability of data. By studying methods across academic fields, students will learn to engage with a broad range of existing scholarship and build a foundation for

conducting their own interdisciplinary research.

IDST 3100 - Interdisciplinary Research Methods (3)

Primary Electives (6 credit hours)

Students must take two of the following:

- GRNT 2124 - Psychology of Adult Development and Aging (3)
or PSYC 2372 - Psychology of Adult Development and Aging (3)
- GRNT 3115 - Health and the Aging Process (3)
or HLTH 3115 - Health and the Aging Process (3)
- GRNT 4110 - Sociology of Aging (3)
or SOCY 4110 - Sociology of Aging (3)
- GRNT 4250 - Aging Programs and Services (3)
- GRNT 4366 - Minorities and Aging (3)
or SOCY 4366 - Minorities and Aging (3)

Secondary Electives (6 credit hours)

Students must take two secondary electives which may be chosen from the following list of approved courses related to gerontology. Additional gerontology primary elective courses may also count toward this requirement. Other appropriate courses may be chosen as electives in consultation with the program director.

- GRNT 3125 - Older Worker and Retirement (3)
or PSYC 3125 - Older Worker and Retirement (3)
or SOCY 3125 - Older Worker and Retirement (3)
- GRNT 3134 - Families and Aging (3)
or SOCY 3134 - Families and Aging (3)
- GRNT 3267 - Sociology of Dying, Death, and Bereavement (3)
or SOCY 3267 - Sociology of Dying, Death, and Bereavement (3)
- GRN 4260 - Women: Middle Age and Beyond (3)
or HLTH 4260 - Women: Middle Age and Beyond (3)
or WGST 4260 - Women: Middle Age and Beyond (3)
- GRNT 4280 - The Experience of Dementia (3)
or SOWK 4280 - The Experience of Dementia (3)
- GRNT 4290 - The Experience of Loneliness (3)
or SOCY 4290 - The Experience of Loneliness (3)
- GRNT 4353 - Environments for Aging (3)
or SOWK 4353 - Environments for Aging (3)
- GRNT 4364 - Aging and Criminal Justice: An Interdisciplinary Understanding (3)
or CJUS 4364 - Aging and Criminal Justice: An Interdisciplinary Understanding (3)
- GRNT 4365 - Grief and Loss Across the Lifespan (3)
or SOWK 4365 - Grief and Loss Across the Lifespan (3)
- GRNT 3800 - Independent Study in Gerontology (1 to 8)
- GRNT 4250 - Topics in Gerontology (3)
- PHIL 2220 - Healthcare Ethics (3)
- POLS 3125 - Healthcare Policy (3)
- SOCY 2169 - Sociology of Health and Illness (3)
- SOWK 4101 - Social Work Practice with Older Adults (3)

Capstone/Practicum Course (3 credit hours)

Participation in a preliminary orientation session a semester in advance is required to receive a permit for this course. Students must be in the gerontology concentration and have completed GRNT 2100, two primary elective courses, and one secondary elective courses (preferably two), and should take this course as close to graduation as possible. Transfer credit is not accepted for this course.

GRNT 3600 - Senior Seminar and Field Experience in Aging (3)

Disciplinary Depth Coursework (18 credit hours)

Select 18 credit hours in a disciplinary field of study that complements your concentration. This may be a minor in a disciplinary department, or an alternative course of study approved by the Director of Interdisciplinary Studies. A maximum of two courses (6 hours) from a student's disciplinary depth coursework can count toward the electives in their Interdisciplinary Studies concentration, allowing completion of the major in 33 credit hours with proper planning. No more than two courses (6 hours) from another declared major can count toward the student's Interdisciplinary Studies major.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Students must maintain a minimum GPA of 2.0 to continue in the major. A cumulative GPA of 2.5 in concentration (gerontology) courses and C or above in concentration (gerontology) courses is required to successfully graduate with this concentration.

Bachelor of Arts in Interdisciplinary Studies with Concentration in Health & Medical Humanities

The B.A. in Interdisciplinary Studies has concentrations in the following areas: Capitalism Studies, Film & Media Production, Gerontology, Health & Medical Humanities, and Women's and Gender Studies. The program allows students to combine an interdisciplinary concentration in one of these areas with in-depth coursework in a disciplinary field to create an individually designed major reflecting their own interests. Through the combination of interdisciplinary and disciplinary coursework, students gain a deeper understanding of these areas of study from multiple perspectives and develop competencies in oral and written communication, critical thinking, data analysis, teamwork, and leadership.

SPAN 3222 - Spanish for Medical and Healthcare (3)

SPAN 4050 - Selected Topics in Spanish (1 to 3) (*Topic: Medical Interpreting*)

WGST 2130 - Masculinity and Manhood (3)

WGST 2160 - Introduction to LGBTQ+ Studies (3)

WGST 3050 - Topics in Women's Studies (3)

WGST 3102 - Changing Realities of Women's Lives (3)

WGST 3140 - Domestic Violence (3)

WGST 3310 - Gender and Sexuality (3)

Disciplinary Depth Coursework (18 credit hours)

Select 18 credit hours in a disciplinary field of study that complements your concentration. This may be a minor in a disciplinary department or an alternative course of study approved by the Director of Interdisciplinary Studies. A maximum of two courses (6 hours) from a student's disciplinary depth coursework can count toward the electives in their Interdisciplinary Studies concentration, allowing completion of the major in 30 credit hours with proper planning. No more than two courses (6 hours) from another declared major can count toward the student's Interdisciplinary Studies major.

Culminating Experience (3 credit hours)

HHUM 4800 - Health & Medical Humanities Portfolio Capstone (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Students must maintain a minimum GPA of 2.0 to continue in the major.

Bachelor of Arts in Interdisciplinary Studies with Concentration in Women's and Gender Studies

The B.A. in Interdisciplinary Studies has concentrations in the following areas: Capitalism Studies, Film & Media Production, Gerontology, Health & Medical Humanities, and Women's and Gender Studies. The program allows students to combine an interdisciplinary concentration in one of these areas with in-depth coursework in a disciplinary field to create an individually designed major reflecting their own interests. Through the combination of interdisciplinary and disciplinary coursework, students gain a deeper understanding of these areas of study from multiple perspectives and develop competencies in oral and written communication, critical thinking, data analysis, teamwork, and leadership.

Admission Requirements

Freshmen and Transfers

All students must meet UNC Charlotte requirements for admission for undergraduate students. General advising for prospective and newly declared majors will introduce students to the curriculum and degree requirements so as not to delay graduation or result in higher costs to students.

See University Admission Requirements

Currently Enrolled Students

- Students must have a 2.0 cumulative GPA unless it is their first semester at UNC Charlotte and a cumulative GPA has not been established.
- *Declaration of Major.* Students who want to declare a major in Interdisciplinary Studies with a Concentration in Women's and Gender Studies should first meet with the Women's and Gender Studies program director, then complete the "Add IDST Major" form located on the Interdisciplinary Studies department website.

Degree Requirements

General Education (37-43 credit hours)

For details on required General Education courses, refer to the General Education Program.

Foreign Language Requirement (0-8 credit hours)

For details on required General Education courses, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirement.

Major Courses (36 credit hours)

Women's and Gender Studies Minor Courses (18 credit hours)

Introductory Courses (6 credit hours)

WGST 1502 Global Arts/Humanities: Introduction to Gender Studies

Around the World (3)

or WGST 1512 - Local Arts/Humanities: Introduction to Gender Studies in the U.S. (3)

WGST 3220 - Feminist Thought (3)

Research Methods Course (3 credit hours)

IDST 3100 - Interdisciplinary Research Methods (3)

Capstone/Practicum Course (3 credit hours)

Select one of the following:

WGST 4401 - Internship in Women's Studies (3)

WGST 4601 - Senior Colloquium (3)

Elective Courses (6 credit hours)

Elective courses can be chosen from any WGST prefix course or any other department's or program's offerings, as long as (a) the course deals substantially with gender, women, feminism, sexuality, or related social movements and (b) the courses are approved by the Director of Women's and Gender Studies. Students concentrating in Women's and Gender Studies should check their choices of electives with the Director of Women's and Gender Studies, both when they are planning their schedule and when they are reviewing it in preparation for graduation.

Examples of regularly taught courses in other departments that count as Women's and Gender Studies elective courses include, but are not limited to:

AFRS 2215 - Black Families in the United States (3)

AFRS 3050 - Topics in Africana Studies (3) (*Gender in a Transforming Africa*)

ENGL 3158 - Gender and African American Literature (3) or

ANTH 2090 - Topics in Anthropology (1 to 3) (*Gender, Culture, and Communication; or Gender in a Transforming Africa*)

ANTH 2123 - Women in Cross-Cultural Perspective (3)

ANTH 4131 - Culture, Pregnancy, and Birth (3)

CJUS 4363 - Gender, Race, and Justice (3)

COMM 2110 - Women and the Media (3)

COMM 3110 - Gender and Communication (3)

ENGL 4002 - Women and Literature (3)

ENGL 4050 - Topics in English (3) (*Native American Women; or Gender and Shakespeare*)

GRNT 4260 - Women: Middle Age and Beyond (3)

HIST 2150 - U.S. Women's History to 1877 (3)

HIST 2151 - U.S. Women's History Since 1877 (3)

HIST 2152 - European Women's and Gender History (3)

HIST 2155 - Southern Women's History (3)
or AMST 3050 - Topics in American Studies (3) (*Southern Women's History*)
PHIL 3261 - Feminist Philosophy (3)
PSYC 3356 - Psychology of Women and Gender (3)
RELS 3000 - Special Topics in Religious Studies (3) (*Religion and Gender*)
RELS 3215 - Religion and Sexuality (3)
SOCY 2132 - Sociology of Marriage and the Family (3)
SOCY 2163 - Sociology of Gender (3)
SOCY 3261 - Human Sexuality (3)
SOCY 4090 - Topics in Sociology (1 to 3) (*New Theoretical Approaches to Gender*)
SOCY 4165 - Sociology of Women (3)
SPAN 3019 - Hispanic Women Writers in English Translation (3)
THEA 4001 - Topics in Theatre (1 to 6) (*Women's Writings Onscreen; or Violent Film Females*)

Disciplinary Depth Coursework (18 credit hours)

Select 18 credit hours in a disciplinary field of study that complements your concentration. This may be a minor in a disciplinary department, or an alternative course of study approved by the Director of Interdisciplinary Studies. A maximum of two courses (6 hours) from a student's disciplinary depth coursework can count toward the electives in their Interdisciplinary Studies concentration, allowing completion of the major in 30 credit hours with proper planning. No more than two courses (6 hours) from another declared major can count toward the student's Interdisciplinary Studies major.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Students must maintain a minimum GPA of 2.0 to continue in the major.

Latin American Studies

Latin American Studies is an interdisciplinary program which involves a variety of fields, including African American studies, anthropology, Spanish and Portuguese language, literature and culture, history, philosophy, and political science. It also includes substantial training and education in Spanish and/or Portuguese. Students may either earn a Major (Bachelor of Arts) or a Minor in Latin American Studies.

Graduates of Latin American Studies (1) pursue graduate study in the humanities, social sciences, and law; (2) work for companies and agencies serving the growing Hispanic population of our region; and (3) find careers in the Foreign Service, the military, and other governmental agencies; in non-governmental organizations with an international or cross-cultural orientation; and in

international business.

Bachelor of Arts in Latin American Studies

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- Minimum GPA: 2.0
- Students who do not meet requirements for admission to the program because of special circumstances may petition the coordinator for acceptance into the program
- Transferable Credit Hours: 24

Degree Requirements

The program leading to the Bachelor of Arts degree in Latin American Studies is a 120 credit hour program, including completion of all General Education Requirements and at least 30 credit hours in courses approved for Latin American Studies credit.

Students may earn LTAM credit in a course section with a non-LTAM prefix so long as it is cross-listed with a LTAM section.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Courses (3 credit hours)

Students are expected to demonstrate competency in either Spanish (SPAN), French (FREN) or Portuguese (PORT). They can do this by completing one course at the 3000 level for Spanish or French or by completing Portuguese 2202. The program director may waive this requirement for native and heritage speakers following a determination of equivalent foreign language proficiency.

FREN 3201 - French Grammar and Conversation (3)

or FREN 3202 - French Grammar and Composition (3)

or PORT 2202 - Intermediate Portuguese II (3)

or SPAN 3201 - Advanced Spanish Grammar and Composition I (3)

or SPAN 3202 - Advanced Spanish Conversation and Composition (3)

or SPAN 3203 - Spanish for Heritage Speakers (3)

Foundation Course (3 credit hours)

LTAM 1501 - Global Social Science: Introduction to Latin American

Politics and Society (3)

or LTAM 1502 - Global Arts/Humanities: Introduction to Latin American History and Culture (3)

Major Courses (minimum 24 credit hours)

Select two to three courses from each of the following three perspectives:

Economy and Society Courses (6-9 credit hours)

Courses in this perspective emphasize social science approaches to the study of contemporary Latin America such as anthropology, political science, and business language.

Select 2-3 of the following:

- LTAM 2001 - Topics in Latin American Studies (3)
- LTAM 2116 - Contemporary Latin America (3)
- LTAM 2117 - Cultures of the Caribbean (3)
- LTAM 3001 - Advanced Topics in Latin American Studies (3)
- LTAM 3120 - Spanish for Business and International Trade (3)
- LTAM 3129 - Cultural Dimension of Doing Business with Spanish-Speaking Countries (3)
- LTAM 3144 - Latin American Politics (3)
- LTAM 3154 - Political Economy of Latin America (3)
- LTAM 3164 - U.S.-Latin American Relations (3)
- LTAM 3190 - Political Economy of the Caribbean (3)
- LTAM 3220 - The Caribbean from Slavery to Independence (3)
- LTAM 4116 - Culture and Conflict in the Amazon (3)
- LTAM 4120 - Advanced Business Spanish I (3)
- LTAM 4121 - Advanced Business Spanish II (3)

Historical Context Courses (6-9 credit hours)

Courses in this perspective focus on the historical development of Latin America since Pre-Columbian times, and they include courses in History and Archaeology. -

Select 2-3 courses from the following. At least one course must focus on the pre-colonial and/or colonial periods. -

- LTAM 2002 - Topics in Latin American Studies (3)
- LTAM 2206 - Colonial Latin America (3)
- LTAM 2207 - Modern Latin America (3)
- LTAM 2252 - New World Archaeology (3)
- LTAM 2270 - Latino/as in the United States, 1846 to Present (3)
- LTAM 3002 - Advanced Topics in Latin American Studies (3)
- LTAM 3220 - The Caribbean from Slavery to Independence (3)
- LTAM 3255 - Ancient Latin America (3)
- LTAM 3257 - South American Prehistory (3)
- LTAM 3260 - Slavery, Racism, and Colonialism in the African Diaspora (3)
- LTAM 3270 - Afro-Latin American History (3)
- LTAM 3274 - Resistance and Adaptation: Indian Peoples Under Spanish Rule (3)
- LTAM 3275 - Reform, Riots, and Rebellions in Colonial Spanish America, 1692-1825 (3)
- LTAM 3276 - History of Mexico (3)
- LTAM 3277 - The Cuban Revolution (3)
- LTAM 3278 - History of Brazil (3)
- LTAM 3279 - Authoritarianism in Latin America (3)

Literature and the Arts Courses (6-9 credit hours)

Courses in this perspective study the cultural production of Latin American peoples such as the arts, literature and film, and they include courses in Art History, Spanish, and Film Studies. -

Select 2-3 of the following:

- LTAM 2003 - Topics in Latin American Studies (3)
- LTAM 3003 - Advanced Topics in Latin American Studies (3)
- LTAM 3301 - Mexica (Aztec) Art (3)
- LTAM 3309 - Masterpieces of Hispanic Literature in English Translation (3)
- LTAM 3310 - Spanish American Civilization and Culture (3)
- LTAM 3313 - Pre-Columbian Art (3)
- LTAM 3319 - Hispanic Women Writers in English Translation (3)
- LTAM 3360 - Studies in Hispanic Film (3)

- LTAM 4302 - Caribbean Literature in English (3)
- LTAM 4309 - Introduction to Spanish American Literature (3)
- LTAM 4310 - Studies in Spanish American Poetry (3)
- LTAM 4311 - Studies in Spanish American Prose Fiction (3)
- LTAM 4312 - Studies in Spanish American Theater (3)
- LTAM 4314 - Studies in Hispanic Children's Literature (3)
- LTAM 4315 - Studies in Regional Literature of the Americas (3)
- LTAM 4316 - Social, Political, Cultural, Economic Issues in Hispanic Literature (3)
- LTAM 4317 - Topics in Hispanic Culture and Civilization (3)
- LTAM 4318 - Cuban Literature (3)
- LTAM 4350 - Studies in Latin American Literature (3)

Note: Students may take LTAM 2001, LTAM 2002, or LTAM 2003 (Topics in Latin American Studies); or LTAM 3001, LTAM 3002, or LTAM 3003 (Advanced Topics in Latin American Studies) to help fulfill these requirements. As the topics of these courses vary, students may repeat them for credit. An advisor will determine which perspective(s) a given section of LTAM 2001, LTAM 2002, LTAM 2003, LTAM 3001, LTAM 3002, or LTAM 3003 fulfills. With the approval of an advisor, students may also apply up to three credit hours of LTAM 3800 (Independent Study) toward these requirements.

Senior Seminar Course (3 credit hours)

- LTAM 4600 - Seminar in Latin American Studies (3)

This seminar may only be taken after completion of at least 18 hours in the major, including LTAM 1501 or 1502, and fulfillment of the language requirement. As the topic of this course varies, it may be taken more than once to fulfill an elective requirement. In that case, the first LTAM 4600 will fulfill a thematic requirement, and the second course will fulfill the capstone requirement.

Second Major (up to 9 credit hours)

Students with a second major may count up to 9 credit hours from courses fulfilling requirements in that major towards requirements for the Latin American Studies degree. Students doing a major/minor combination may count up to 6 hours credit from courses used in the minor towards the requirements for the Major in Latin American Studies. These stipulations include cross-listed courses regardless of program designation under which the course was taken. Exceptions may be approved by an advisor upon consultation with the other program or department. *Note: Students exercising this option should be aware that the accuracy of the online degree audit may be affected.*

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Transfer Credit (up to 64 credit hours)

Up to 64 credit hours may be accepted from a two-year institution. There is no limit on the number of hours that may be accepted from four-year institutions. All students must complete their last 30 credit hours in residence at UNC Charlotte, including the last 12 hours of the major. At the discretion of an advisor, prior life, study, or work experience may be considered in exempting a student from this requirement.

Degree Total = 120 Credit Hours

Progression Requirements

To graduate, students majoring in Latin American Studies must have an overall GPA of at least 2.0, including a GPA of at least 2.0 in the major.

Honors Program in Latin American Studies

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- This optional credential may be awarded to students with a minimum overall GPA of 3.25 and a GPA of at least 3.25 in Latin American Studies courses. To receive honors in Latin American Studies, a student must be approved by the Latin American Studies Honors Committee.

Progression Requirements

Students who plan to graduate with "Honors in Latin American Studies" must complete the Application to Candidacy process for graduating with honors, as directed by the Honors College, beginning the semester prior to the semester they plan to graduate. They must register for 3 credit hours of LTAM 4700 during their Senior year and present an honors thesis based on in-depth research in primary sources to a committee composed of three members of the Latin American Studies faculty. One of these faculty members will serve as the student's primary honors thesis adviser. Following an oral defense of the thesis, the committee shall award a grade. A thesis awarded a grade of A is acceptable for curricular honors. Students may also obtain honors through the University Honors Program.

Minor in Latin American Studies

A Minor in Latin American Studies consists of 18 credit hours.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

Foundation Course (3 credit hours)

LTAM 1501 - Global Social Science: Introduction to Latin American Politics and Society (3)
or LTAM 1502 - Global Arts/Humanities: Introduction to Latin American History and Culture (3)

One Course at 3000- or 4000-Level (3 credit hours)

Students must take at least one course at the 3000 level to complete the minor.

LTAM 3001 - Advanced Topics in Latin American Studies (3)
LTAM 3002 - Advanced Topics in Latin American Studies (3)
LTAM 3003 - Advanced Topics in Latin American Studies (3)
LTAM 3120 - Spanish for Business and International Trade (3)
LTAM 3129 - Cultural Dimension of Doing Business with Spanish-Speaking Countries (3)
LTAM 3144 - Latin American Politics (3)
LTAM 3154 - Political Economy of Latin America (3)
LTAM 3164 - U.S.-Latin American Relations (3)
LTAM 3190 - Political Economy of the Caribbean (3)

LTAM 3313 - Pre-Columbian Art (3)
LTAM 3319 - Hispanic Women Writers in English Translation (3)
LTAM 3360 - Studies in Hispanic Film (3)
LTAM 3361 - Studies in Latin American Film (3)
LTAM 3362 - Studies in US Latino/a Cinema (3)
LTAM 3400 - Latin American Studies Internship (1 to 3)
LTAM 3800 - Independent Study (1 to 3)
LTAM 4010 - Special Topics in Latin American Social Science (3)
LTAM 4020 - Topics in Latin American Historiography (3)
LTAM 4030 - Topics in Latin American Humanities (3)
LTAM 4116 - Culture and Conflict in the Amazon (3)
LTAM 4120 - Advanced Business Spanish I (3)
LTAM 4121 - Advanced Business Spanish II (3)
LTAM 4302 - Caribbean Literature in English (3)
LTAM 4309 - Introduction to Spanish American Literature (3)
LTAM 4310 - Studies in Spanish American Poetry (3)
LTAM 4311 - Studies in Spanish American Prose Fiction (3)
LTAM 4312 - Studies in Spanish American Theater (3)
LTAM 4314 - Studies in Hispanic Children's Literature (3)
LTAM 4315 - Studies in Regional Literature of the Americas (3)
LTAM 4316 - Social, Political, Cultural, Economic Issues in Hispanic Literature (3)
LTAM 4317 - Topics in Hispanic Culture and Civilization (3)
LTAM 4318 - Cuban Literature (3)
LTAM 4350 - Studies in Latin American Literature (3)
LTAM 4600 - Seminar in Latin American Studies (3)
LTAM 4700 - Senior Honors Thesis (3 to 6)

Electives (12 credit hours)

Among the credit hours required for the minor, not more than 6 credit hours may be double counted with another major or minor. This stipulation includes cross-listed courses, regardless of program designation under which the course was taken. Exceptions may be approved by an advisor upon consultation with the other program or department. Students exercising this option should be aware that the accuracy of the online degree audit may be affected.

Students may take FREN 2201, FREN 2202, PORT 2201, PORT 2202, SPAN 2201, or SPAN 2202 to fulfill these requirements.

Students may take LTAM 2001, LTAM 2002, or LTAM 2003 (Topics in Latin American Studies); or LTAM 3001, LTAM 3002, LTAM 3003 (Advanced Topics in Latin American Studies) to help fulfill these requirements. As the topics of these courses vary, students may repeat

them for credit. An advisor will determine which perspective(s) a given section of LTAM 2001, LTAM 2002, LTAM 2003, LTAM 3001, LTAM 3002, or LTAM 3003 fulfills. With the approval of an advisor, students may also apply up to three credit hours of LTAM 3800 toward these requirements.

- FREN 2201 - Intermediate French I (3)
FREN 2202 - Intermediate French II (3)

Minor Total = 18 Credit Hours

Special Policies or Requirements

Among the credit hours required for the minor, not more than 6 credit hours may be double counted with another major or minor. This stipulation includes cross-listed courses, regardless of program designation under which the course was taken. Exceptions may be approved by an advisor upon consultation with the other program or department. Students exercising this option should be aware that the accuracy of the online degree audit may be affected.

Students may take LTAM 2001, LTAM 2002, or LTAM 2003 (Topics in Latin American Studies); or LTAM 3001, LTAM 3002, or LTAM 3003 (Advanced Topics in Latin American Studies) to help fulfill these requirements. As the topics of these courses vary, students may repeat them for credit. An advisor will determine which perspective(s) a given section of LTAM 2001, LTAM 2002, LTAM 2003, LTAM 3001, LTAM 3002, or LTAM 3003 fulfills. With the approval of an advisor, students may also apply up to three credit hours of LTAM 3800 (Independent Study) toward these requirements.

Early Entry: Master of Arts in Latin American Studies

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Note: GRE scores are not required.

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Accelerated Master's Program

(for High School Seniors and UNC Charlotte Undergraduate Freshmen)

Academically talented high school seniors and UNC Charlotte undergraduate freshmen are encouraged to apply to an Accelerated Master's Program to begin work toward both undergraduate and graduate degrees in their Freshman year.

Admission Requirements

- See University Admission Requirements
- Minimum high school GPA of 3.75 (on a 4.0 scale)
- Minimum score of 1220 on SAT

Progression Requirements

Students must maintain a strong academic record at both the undergraduate and graduate levels with a cumulative GPA of 3.0 or above.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on the Accelerated Master's Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/accelerated-masters.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Legal Studies

Legal Studies is an interdisciplinary approach to the study of law and society and business.

Minor in Legal Studies

The Minor in Legal Studies enhances a liberal arts education across traditional disciplines, focusing on the theory and operation of law and legal institutions. The courses in the Minor in Legal Studies expose students to the many facets of law as a social phenomenon - its evolution, function, motivating ideas, and effects. In addition to fostering critical thinking and other transferable skills, the broad base of knowledge about law-related topics that students acquire in this minor better positions them for employment in governmental and nonprofit agencies, as well as business, in which legal knowledge is beneficial.

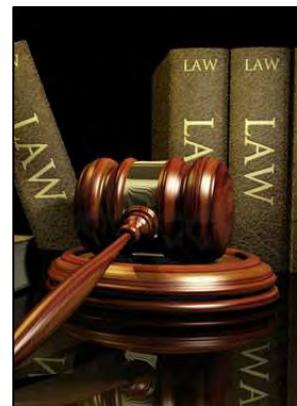

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- To be accepted into the Minor in Legal Studies, students are required to complete LEGL 1100 with a grade of C or above and have a declared major at UNC Charlotte.

Minor Requirements

The minor consists of 18 credit hours. Students must take at least 3 credit hours in a Legal Skills course and the remaining 12 credit hours may consist of additional Legal Studies substance courses. A maximum of 6 of these credit hours may be in the student's major. In addition, students may not take more than 6 credit hours from any one major area.

Foundation Course (3 credit hours)

LEGL 1100 - Introduction to Law and the Legal System (3)

Substantive Area Courses (12 credit hours)

Select 12 credit hours from the following for a maximum of 6 credit hours from each major area:

Africana Studies

LEGL 3241 - Race and the Law (3)

Communication Studies

LEGL 2103 - Argumentation and Debate (3)
LEGL 3141 - Organizational Communication (3)
LEGL 4101 - Media and the Law (3)

Criminal Justice and Criminology

LEGL 2320 - Introduction to Courts (3)
LEGL 3320 - Criminal Justice and the Law (3)
LEGL 3321 - Criminal Procedure (3)
LEGL 3354 - Punishment and Freedom (3)
LEGL 3363 - Mediation and Conflict Resolution (3)
LEGL 4320 - Evidence (3)

Legal Studies

LEGL 3000 - Topics in Legal Studies (3)
LEGL 3100 - Topics in Legal Skills (3)

Philosophy

LEGL 1105 - Critical Thinking (3)
LEGL 1106 - Critical Thinking (3)
LEGL 2105 - Deductive Logic (3)
LEGL 3810 - Social and Political Philosophy (3)

Political Science and Public Administration

LEGL 3113 - Constitutional Law and Policy (3)
LEGL 3115 - Civil Rights and Liberties (3)
LEGL 3116 - Judicial Process (3)
LEGL 3117 - Gender and the Law (3)
LEGL 3137 - International Human Rights (3)
LEGL 3162 - International Law (3)
LEGL 3175 - Philosophy of Law (3)
LEGL 3810 - Social and Political Philosophy (3)
LEGL 4110 - North Carolina Student Legislature (3)

Psychology

LEGL 2131 - Introduction to Forensic Psychology (3)

Sociology

LEGL 4265 - Social Psychology of Law (3)

Skills Area Courses (3 credit hours)

Select one of the following not already taken to fulfill the Substantive Area Course requirement above:

LEGL 1105 - Critical Thinking (3)
LEGL 1106 - Critical Thinking (3)
LEGL 2103 - Argumentation and Debate (3)
LEGL 2105 - Deductive Logic (3)
LEGL 3100 - Topics in Legal Skills (3)
LEGL 3363 - Mediation and Conflict Resolution (3)
LEGL 4110 - North Carolina Student Legislature (3)
LEGL 4320 - Evidence (3)

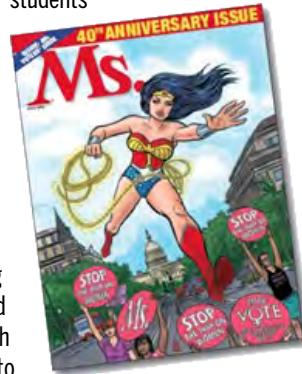

Minor Total = 18 Credit Hours

Progression Requirements

Students are required to earn a C or above in all courses that are counted toward the minor. No courses counted toward the minor may be taken with Pass/No Credit grading.

Women's and Gender Studies

The Women's and Gender Studies interdisciplinary program offers undergraduate and graduate opportunities to learn about issues relating to gender, women, and feminism. Students may choose to take individual courses, a cluster of related courses, or a full Minor in Women's and Gender Studies. The Women's and Gender Studies program is committed to fostering personal growth by challenging gender stereotypes of women and men and equipping individuals with the knowledge and skills necessary to empower women and improve gender relations in an ever changing society. Most students find Women's and Gender Studies courses personally interesting, as well as helpful preparation for careers in health and human services, education, law, human resources, art, and business.

Minor in Women's and Gender Studies

The goal of the Minor in Women's and Gender Studies is to develop students' understanding of the ways gender has shaped lived experience in the past, present, and around the world. As such, it complements a wide variety of majors. The knowledge and skills that Women's and Gender Studies minors develop help them find employment in business, healthcare, education, government, and the non-profit sector.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

The Minor in Women's and Gender Studies is open to all students regardless of gender and requires completion of at least 18 credit hours in approved courses. Women's and Gender Studies minors can take courses in a wide variety of fields (e.g., History, Sociology, English, Psychology, Public Health, Anthropology). With proper planning, the minor can be integrated with most majors. A maximum of 9 credit hours

may be earned from any one department or program outside of Women's and Gender Studies.

Required Courses (6 credit hours)

WGST 1502 Global Arts/Humanities: Introduction to Gender Studies Around the World (3)
or WGST 1512 - Local Arts/Humanities: Introduction to Gender Studies in the U.S. (3)
WGST 3220 - Feminist Thought (3)

Elective Courses (12 credit hours)

Any WGST 4xxx course (3)
Related elective courses (9)

Elective courses can be chosen from any WGST prefix course or any other department's or program's offerings, as long as (a) the course deals substantially with gender, women, feminism, sexuality, or related social movements and (b) the courses are approved by the Director of Women's and Gender Studies. Students minoring in Women's and Gender Studies should check their choices of electives with the Director of Women's and Gender Studies, both when they are planning their minor and when they are reviewing it in preparation for graduation.

Examples of courses in other departments that count as Women's and Gender Studies electives include, *but are not limited to*:

AFRS 2215 - Black Families in the United States (3)
ENGL 3158 - Gender in African American Literature (3)
ANTH 2090 - Gender in a Transforming Africa (3)
or AFRS 3050 - Gender in a Transforming Africa (3)
ANTH 2090 - Gender, Culture, and Communication (3)
ANTH 2123 - Women in Cross-Cultural Perspective (3)
ANTH 4131 - Culture, Pregnancy, and Birth (3)
CJUS 4363 - Gender, Race, and Justice (3)
COMM 2110 - Women and the Media (3)
COMM 3110 - Gender and Communication (3)
ENGL 4002 - Women and Literature (3)
ENGL 4050 - Gender and Shakespeare (3)
ENGL 4050 - Native American Women (3)
GRNT 4260 - Women: Middle Age and Beyond (3)
HIST 2150 - U.S. Women's History to 1877 (3)
HIST 2151 - U.S. Women's History Since 1877 (3)
HIST 2152 - European Women's History (3)
HIST 2155 - Southern Women's History (3)
or AMST 3050 - Southern Women's History (3)
PHIL 3261 - Feminist Philosophy (3)
PSYC 3356 - Psychology of Women and Gender (3)
RELS 3000 - Religion and Gender (3)
RELS 3215 - Religion and Sexuality (3)
SOCY 2132 - Sociology of Marriage and the Family (3)
SOCY 2163 - Sociology of Gender (3)
SOCY 3261 - Human Sexuality (3)
SOCY 4090 - New Theoretical Approaches to Gender (3)
SOCY 4165 - Sociology of Women (3)
SPAN 3019 - Hispanic Women Writers in English Translation (3)
THEA 4001 - Violent Film Females (3)
THEA 4001 - Women's Writings Onscreen (3)

Note: A complete list of courses approved for the Minor in Women's and Gender Studies is available in the Office of Interdisciplinary Studies.

Minor Total = 18 Credit Hours

Progression Requirements

Students must receive a grade of C or above in WGST 1502 or WGST 1512 and WGST 3220 for these courses to count toward the minor requirements.

Early Entry: Graduate Certificate in Gender, Sexuality, and Women's Studies

Exceptional undergraduate students at UNC Charlotte may apply to either of these Early Entry Programs to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 70 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.0 overall undergraduate GPA
- Minimum 2.0 GPA in WGST 1502 or WGST 1512 and WGST 3220
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents (i.e., transcripts and a brief personal statement)
- Recommendation by the Graduate Program Director and approved by the Graduate School (no additional external recommendation letters required for application)

Note: Standardized test scores (e.g., GRE, MAT) are not required.

Progression Requirements

- Completion of Early Entry Program Form, with signatures indicating approval by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

These courses include, but are not limited to:

WGST 4160 - Race, Sexuality, and the Body (3) / WGST 5160 - Race, Sexuality, and the Body (3)
WGST 4170 - Queer Theory (3) / WGST 5170 - Queer Theory (3)
WGST 4050 - Topics in Women's Studies (1 to 3) / WGST 5050 - Topics in Women's Studies (1 to 3)
WGST 6000-level courses

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

The Department of Languages, Cultures, and Translation offers study in strategically selected languages, literatures, and film to develop students' language skills, cultural knowledge, literacy, and critical thinking in order to prepare its graduates for participation and leadership in an increasingly global, multicultural, and multilingual society. In addition to the Majors and Minors in French, German, Japanese and Spanish, the department offers Minors in Arabic Studies, Chinese, Francophone Studies, Italian, and Russian. It also offers undergraduate certificates in Translating, and Business Language in several languages, as well as German for Engineering and Hispanic Literary Studies. Languages not taught at UNC Charlotte can be studied through the NC Language Exchange.

Students interested in foreign language study are encouraged to explore the following options:

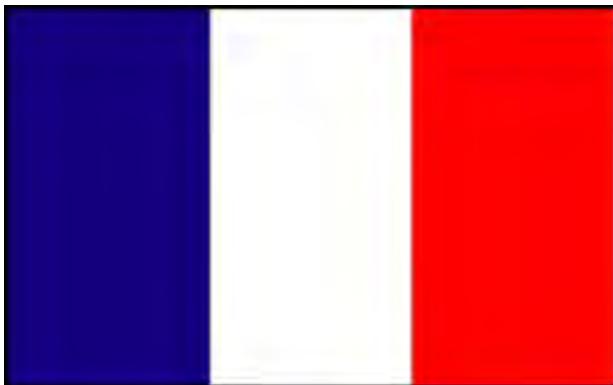

- A single major in French, German, Japanese, or Spanish, based on the standard liberal arts model, with or without teaching licensure
- A double major in a foreign language and another discipline or in two languages
- A foreign language minor in Arabic, Chinese, Francophone Studies, French, German, Italian, Japanese, Russian, or Spanish
- A concentration in one or more languages to complement a major in another academic area
- A concentration of courses leading to a certificate

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Study Abroad, Scholarships, Awards

The department strongly encourages all students to participate in a study abroad program and sponsors exchange programs with universities across Europe, Asia, Central and South America. The department offers various scholarships and awards to support study abroad and reward academic excellence. For detailed information on these opportunities,

consult the website of the Department of Languages, Cultures, and Translation.

French

Bachelor of Arts in French

A Major in French requires 31 credit hours, after elementary courses are completed.

Admission Requirements

Freshmen and Transfers

- *Minimum GPA:* 2.0
- Students should consult the Guidance on Language Placement and Exemption on the department's web page for more specific guidelines regarding placement.
- *Transferable Credit Hours:* 24

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Major Courses (31 credit hours)

Core Courses (15 credit hours)

- FREN 2201 - Intermediate French I (3)
FREN 2202 - Intermediate French II (3)
FREN 3201 - French Grammar and Conversation (3)
FREN 3202 - French Grammar and Composition (3)
FREN 3209 - France Today (3)

3000-level Courses (6 credit hours)

Choose two:

- FREN 3203 - Introduction to French Literature (3)
FREN 3210 - Introduction to Business French (3)
FREN 3220 - Introduction to the Francophone World (3)

4000-level Courses (6 credit hours)

Choose two:

- FREN 4003 - Studies in French Literature (3)
FREN 4005 - Studies in the French Language (3)
FREN 4007 - Studies in French Culture and Civilization (3)
FREN 4120 - Advanced Business French I (3)

- FREN 4121 - Advanced Business French II (3)
FREN 4201 - Survey of French Literature I (3)
FREN 4202 - Survey of French Literature II (3)
TRAN 4402 - Practicum in Translating I - French (3)
TRAN 4403 - Practicum in Translating II - French (3)
TRAN 4404 - Practicum in Translating III - French (3)

Electives (3 credit hours)

Choose one:

- FREN 1502 - Global Arts/Humanities: French and Francophone Cultures (3)
FREN 3050 - Topics in French (1 to 3)
FREN 3203 - Introduction to French Literature (3)
FREN 3207 - French Phonetics (3)
FREN 3210 - Introduction to Business French (3)
FREN 3220 - Introduction to the Francophone World (3)
FREN 3225 - Short-Term Abroad (3)
FREN 4003 - Studies in French Literature (3)
FREN 4050 - Topics in French (1 to 3)
FREN 4005 - Studies in the French Language (3)
FREN 4120 - Advanced Business French I (3)
FREN 4007 - Studies in French Culture and Civilization (3)
FREN 4121 - Advanced Business French II (3)
FREN 4201 - Survey of French Literature I (3)
FREN 4202 - Survey of French Literature II (3)
FREN 4410 - Professional Internship in French (1 to 6)
TRAN 4402 - Practicum in Translating I - French (3)
TRAN 4403 - Practicum in Translating II - French (3)
TRAN 4404 - Practicum in Translating III - French (3)

Notes:

Students exempted from FREN 2201, FREN 2202, FREN 3201, and FREN 3202 must take the equivalent number of credit hours in elective courses.

Senior Seminar (1 credit hour)

- LANG 4690 - Senior Seminar (1)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

GPA of 2.0 is required. Introductory language courses may not be taken on a *Pass/No Credit Basis* if they are being used to fulfill a college or departmental foreign language requirement. Students with a Foreign Language major or minor may not take required courses in the department on a *Pass/No Credit Basis*.

Teacher Licensure

The Department of Languages, Cultures, and Translation, in collaboration with the Department of Middle, Secondary, and K-12 Education, offers a program to prepare students for K-12 teacher licensure in North Carolina. Students seeking licensure to teach a foreign language must fulfill the General Education requirements, the foreign language major, two foreign language teaching methods courses, and satisfy all other requirements specified by the College of Education.

Students planning to specialize in foreign language education should apply through the Coordinator for Foreign Language Education during the first semester of the Sophomore year to obtain appropriate advising. Licensure applications are the responsibility of the student and the Office of Teacher Education Advising and Licensure (TEAL) in the College of Education.

Minor in Francophone Studies

The Minor in Francophone Studies allows students interested in topics related to the French-speaking world the opportunity to acquire a basic level of cultural competency by taking courses taught in English and offered across a range of disciplines; including, but not limited to: Africana Studies, Film, History, Latin American Studies, Languages and Culture Studies, Philosophy, and Women's Studies. In addition to fostering critical thinking and other transferable skills, the broad base of knowledge about Francophone-related topics that students acquire in this minor positions them to work for companies and agencies that serve the growing Francophone population in our region and worldwide. Career possibilities include: 1) the foreign service, the military, and other governmental agencies; 2) non-governmental organizations with an emphasis on international or cross-cultural orientations; and 3) international business.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

Students must complete a minimum of 15 credit hours in courses approved for Francophone Studies credit.

Core Course (3 credit hours)

FRAN/FREN 1502 Global Arts/Humanities - French & Francophone Cultures (3)
or FREN 3220 Introduction to the Francophone World (3)

Elective Courses (12 credit hours)

Students must choose four of the following electives, three of which must be taken at the 3000-level or above. Courses may be repeated with a change of topic.

- FRAN 1502 - Global Arts/Humanities: French and Francophone Cultures (3)
- FRAN 1512 - Local Arts/Humanities: French and Francophone Cultures in the U.S. (3)
- FRAN 2050 - Topics in Francophone Studies (3)
- FRAN 2200 French Civilization (3)
- FRAN 3001 - Advanced Topics in Francophone Studies (Economy and Society) (3)
- FRAN 3002 - Advanced Topics in Francophone Studies (Historical Context) (3)
- FRAN 3003 - Advanced Topics in Francophone Studies (Arts and Literature) (3)
- FRAN 3004 - Advanced Topics in Francophone Studies (Film) (3)
- FRAN 3005 - Advanced Topics in Francophone Studies (Philosophy and Intellectual History) (3)
- FREN 3225 Short-Term Abroad (3)

French Courses

With their advisor's approval, Francophone Studies Minors who wish to complete their coursework in French may count up to 3 of the following courses. Courses that count toward the Francophone Studies Minor cannot simultaneously count toward the French major or minor.

- FREN 2201 Intermediate French I (3)
- FREN 2202 Intermediate French II (3)
- FREN 3201 French Grammar and Conversation (3)
- FREN 3202 French Grammar and Composition (3)
- FREN 3203 Introduction to French Literature (3)
- FREN 3207 French Phonetics (3)
- FREN 3209 France Today (3)
- FREN 3210 Introduction to Business French (3)
- FREN 3220 Introduction to the Francophone World (3)
- FREN 3225 Short-Term Abroad (3)
- FREN 4003 Studies in French Literature (3)
- FREN 4005 Studies in the French Language (3)
- FREN 4007 Studies in French Culture and Civilization (3)
- FREN 4050 Topics in French (3)
- FREN 4120 Advanced Business French I (3)
- FREN 4121 Advanced Business French II (3)
- FREN 4201 Survey of French Literature I (3)
- FREN 4202 Survey of French Literature II (3)
- FREN 4410 Professional Internship in French (1 to 6)
- FREN 4800 Directed Internship in French (1 to 3)
- TRAN 4402 Practicum in Translating I - French (3)
- TRAN 4403 Practicum in Translating II - French (3)
- TRAN 4404 Practicum in Translating III - French (3)

Minor Total = 15 Credit Hours

Foreign Language Requirement

Students must demonstrate linguistic competency equivalent to two semesters of French language (FREN 1202 or equivalent) prior to completion of the minor.

Study Abroad Experience

Courses taken while studying abroad may count toward the Minor in Francophone Studies. To learn more about study abroad programs, contact the Program Director.

Minor in French

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

A Minor in French requires 21 credit hours (7 courses) above the FREN 1202 level.

Core Courses (15 credit hours)

- FREN 2201 - Intermediate French I (3)
- FREN 2202 - Intermediate French II (3)
- FREN 3201 - French Grammar and Conversation (3)
- FREN 3202 - French Grammar and Composition (3)
- FREN 3209 - France Today (3)

3000- and 4000-level Courses (3 Credit Hours)

Select one:

- FREN 3203 - Introduction to French Literature (3)
- FREN 3207 - French Phonetics (3)
- FREN 3210 - Introduction to Business French (3)
- FREN 3220 - Introduction to the Francophone World (3)
- FREN 4003 - Studies in French Literature (3)
- FREN 4005 - Studies in the French Language (3)
- FREN 4007 - Studies in French Culture and Civilization (3)
- FREN 4120 - Advanced Business French I (3)
- FREN 4121 - Advanced Business French II (3)
- FREN 4201 - Survey of French Literature I (3)
- FREN 4202 - Survey of French Literature II (3)
- TRAN 4402 - Practicum in Translating I - French (3)
- TRAN 4403 - Practicum in Translating II - French (3)

Elective Courses (3 credit hours)

Select one:

- FREN 1502 - Global Arts/Humanities: French and Francophone Cultures (3)
- FREN 3050 - Topics in French (1 to 3)
- FREN 3203 - Introduction to French Literature (3)
- FREN 3207 - French Phonetics (3)
- FREN 3210 - Introduction to Business French (3)
- FREN 3220 - Introduction to the Francophone World (3)
- FREN 3225 - Short-Term Abroad (3)
- FREN 4003 - Studies in French Literature (3)
- FREN 4005 - Studies in the French Language (3)
- FREN 4007 - Studies in French Culture and Civilization (3)
- FREN 4050 - Topics in French (1 to 3)
- FREN 4120 - Advanced Business French I (3)
- FREN 4121 - Advanced Business French II (3)
- FREN 4201 - Survey of French Literature I (3)
- FREN 4202 - Survey of French Literature II (3)
- TRAN 4402 - Practicum in Translating I - French (3)
- TRAN 4403 - Practicum in Translating II - French (3)
- TRAN 4404 - Practicum in Translating III - French (3)

Elective Courses

One of the following may be substituted for one required course:

- FREN 1502 Global Arts/Humanities - French & Francophone Cultures (3) or FREN 1512 Local Arts /Humanities - French & Francophone Cultures in the U.S. (3)
- FREN 2209 - French Civilization (3)
- FREN 3050 - Topics in French (1 to 3)
- FREN 3225 Short-Term Abroad (3)
- FREN 4050 - Topics in French (1 to 3)
- FREN 4120 - Advanced Business French I (3)
- FREN 4121 - Advanced Business French II (3)
- FREN 4410 - Professional Internship in French (1 to 6)
- TRAN 4402 - Practicum in Translating I - French (3)
- TRAN 4403 - Practicum in Translating II - French (3)
- TRAN 4404 - Practicum in Translating III - French (3)

* Notes: Students waived from FREN 2201, 2202, 3201 and 3202 must take the equivalent number of credit hours in elective courses.

Minor Total = 21 Credit Hours

Undergraduate Certificate in LANG: Business French

The Certificate in LANG: Business Languages program (CBL) provides classroom, overseas (optional), and practical training in French for international business, which may also be recognized by international examinations. The certificate requires 15 credit hours. Beginning with an alternative fourth-semester course, the sequence continues with advanced-level coursework that includes a two-semester component in advanced business French. Majors in any field are welcome.

Admission Requirements

Current UNC Charlotte Undergraduate Students:

See University Admission Requirements

Certificate Requirements

Required Courses (6 credit hours)

- FREN 4120 - Advanced Business French I (3)
- FREN 4121 - Advanced Business French II (3)

Elective Courses (9 credit hours)

Select any three FREN courses at the 3000 level or above. FREN 4410 will also be accepted.

Certificate Total = 15 Credit Hours

Progression Requirements

In order to be awarded the CBL, each course that counts for the certificate must be completed with a grade of B or above.

Undergraduate Certificate in LANG: Translating French-English

An Undergraduate Certificate in LANG: Translating (CT) is not equivalent to a major in a foreign language; rather it represents a theory-based skill developed at the Bachelor's degree level. The CT may complement a major in any field, and is especially recommended for Majors and Minors in French, Global Studies, or International Business. All courses for the CT involve, but are not limited to, translating into English from the source text. A CT in French-English may be earned by completing 12 credit hours.

Admission Requirements

Current UNC Charlotte Undergraduate Students:

See University Admission Requirements

Certificate Requirements

- TRAN 3601 - Introduction to Translation and Interpreting Studies (3)
- TRAN 4402 - Practicum in Translating I - French (3)
- TRAN 4403 - Practicum in Translating II - French (3)
- TRAN 4404 - Practicum in Translating III - French (3)

Certificate Total = 12 Credit Hours

Progression Requirements

All courses must be completed with a grade of B or above.

German

Bachelor of Arts in German

A Major in German leading to a B.A. degree requires 31 credit hours of German coursework above GERM 1202.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.0
- Students should consult the Guidance on Language Placement and Exemption on the department's web page for more specific guidelines regarding placement.

Elective 4000-Level Courses (9 credit hours)

Select three of the following:

GERM 4051 - Topics in German Culture (1 to 3)

GERM 4061 - Topics in German Language (1 to 3)

GERM 4410 - Professional Internship in German (3) (*up to 6 credit hours*)

GERM 4661 - Advanced Seminar in Business German I (3)

GERM 4671 - Advanced Seminar in Business German II (3)

GERM 4800 - Directed Individual Study (1 to 3)

TRAN 4412 - Practicum in Translating I - German (3)

TRAN 4413 - Practicum in Translating II - German (3)

TRAN 4414 - Practicum in Translating III - German (3)

Senior Seminar (1 credit hour)

LANG 4690 - Senior Seminar (1)

Add-On Certificates

Students with a Major in German may choose to add three undergraduate certificates to their major. Up to 9 credit hours may be double-counted for the major and certificate.

- Undergraduate Certificate in LANG: German for Engineering (12 credit hours)
- Undergraduate Certificate in LANG: Business German (12 credit hours)
- Undergraduate Certificate in LANG: Translating German-English (12 credit hours)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

GPA of 2.0 is required. Introductory language courses may not be taken on a *Pass/No Credit Basis* if they are being used to fulfill a college or departmental foreign language requirement. Students with a Foreign Language major or minor may not take required courses in the department on a *Pass/No Credit Basis*.

Teacher Licensure

The Department of Languages, Cultures, and Translation, in collaboration with the Department of Middle, Secondary, and K-12 Education, offers a program to prepare students for K-12 teacher licensure in North Carolina. Students seeking licensure to teach a foreign language must fulfill the General Education requirements, the foreign language major, two foreign language teaching methods courses, and satisfy all other requirements specified by the College of Education. Students planning to specialize in foreign language education should apply through the Coordinator for Foreign Language Education during the

first semester of the Sophomore year to obtain appropriate advising. Licensure applications are the responsibility of the student and the Office of Teacher Education Advising and Licensure (TEAL) in the College of Education.

Minor in German

A Minor in German requires six courses (18 credit hours) above GERM 1202.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

Core Courses (12 credit hours)

GERM 2201 - Intermediate German I (3)*

GERM 2202 - Intermediate German II (3)*

GERM 3201 - Advanced German Language and Culture I (3)

GERM 3202 - Advanced German Language and Culture II (3)

**Students waived from GERM 2201 and/or GERM 2202 must take the equivalent number of credit hours in 3000- or 4000-level courses.*

Elective Courses (6 credit hours)

GERM 3xxx-4xxx - German Elective (3)

GERM 3xxx-4xxx - German Elective (3)

Minor Total = 18 Credit Hours

Undergraduate Certificate in LANG: Business German

The Undergraduate Certificate in LANG: Business Languages program (CBL) provides classroom, overseas (optional), and practical training in German for international business, which may also be recognized by international examinations. The certificate requires 12 credit hours. The sequence contains a two-semester component in advanced business German. Majors in any field are welcome.

Admission Requirements

Current UNC Charlotte Undergraduate Students:

Certificate Requirements

Courses Taught in German (6 credit hours)

GERM 4661 - Advanced Seminar in Business German I (3)

GERM 4671 - Advanced Seminar in Business German II (3)

Courses Taught in English (6 credit hours)

Select two of the following:

GERM 3670 - Seminar: German-American Culture for Business and Engineering I (English) (3)

GERM 3680 - Seminar: German-American Culture for Business and Engineering II (English) (3)

GERM 3690 - Seminar: Career Planning for the German-American Business World (3)

Total = 12 Credit Hours

Progression Requirements

In order to be awarded the CBL, each course that counts for the certificate must be completed with a grade of B or above.

Special Policies or Requirements

GERM 3670, GERM 3680, and GERM 3690, which are taught in English, may double count toward the German Major and Minor.

Undergraduate Certificate in LANG: German for Engineering

The Undergraduate Certificate in LANG: German for Engineering (UCGE) provides classroom, overseas (optional), and practical training in German for Engineering. The certificate requires 12 credit hours.

Admission Requirements

Students may begin the certificate as freshmen. There are no prerequisites. Majors in any field are welcome. See University Admission Requirements.

Certificate Requirements

Courses Taught in German (6 credit hours)

GERM 2201 - Intermediate German I (3)

GERM 2202 - Intermediate German II (3)

Courses Taught in English (6 credit hours)

Select two of the following:

GERM 3670 - Seminar: German-American Culture for Business and Engineering I (English) (3)

GERM 3680 - Seminar: German-American Culture for Business and Engineering II (English) (3)

GERM 3690 - Seminar: Career Planning for the German-American Business World (3)

Progression Requirements

- Beginning with two courses in the German language at the 2000-level, the sequence continues with a selection of two out of three 3000-level seminars on German-American culture for Business and Engineering taught in English.
- A grade of C or above is required for all courses in the certificate.

Certificate Total = 12 Credit Hours

Special Policies or Requirements

GERM 3670, GERM 3680, and GERM 3690 can double count toward the German Major and Minor.

Undergraduate Certificate in LANG: Translating German-English

An Undergraduate Certificate in LANG: Translating (CT) is not equivalent to a major in a foreign language; rather it represents a theory-based skill developed at the Bachelor's degree level. The CT may complement a major in any field, and is especially recommended for Majors and Minors in German, Global Studies, or International Business. All courses for the CT involve, but are not limited to, translating into English from the source text. A CT in German-English may be earned by completing 12 credit hours.

Certificate Requirements

TRAN 3601 - Introduction to Translation and Interpreting Studies (3)
TRAN 4412 - Practicum in Translating I - German (3)
TRAN 4413 - Practicum in Translating II - German (3)
TRAN 4414 - Practicum in Translating III - German (3)

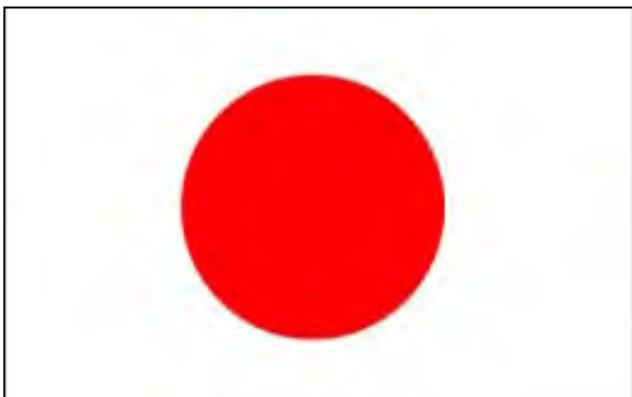

Certificate Total = 12 Credit Hours

Progression Requirements

All courses must be completed with a grade of B or above.

Special Policies or Requirements

TRAN 4412, TRAN 4413, and TRAN 4414 may be double-counted toward the German major or minor.

Japanese

Bachelor of Arts in Japanese Studies

A Major in Japanese Studies leading to a B.A. degree requires 34 hours of coursework above JAPN 1202.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- Minimum GPA: 2.0
- Students should consult the Guidance on Language Placement and Exemption on the department's web page for more specific guidelines regarding placement.
- Transferable Credit Hours: 24

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Major Courses (34 credit hours)

Core Major Courses (15 credit hours)

JAPN 2201 - Intermediate Japanese I (3)
JAPN 2202 - Intermediate Japanese II (3)
JAPN 3201 - Upper Intermediate Japanese I (3)
JAPN 3202 - Upper Intermediate Japanese II (3)
JAPN 3203 - Upper Intermediate Japanese III (3)

Elective Courses up to 3000-Level (9 credit hours)

Select 3 of the following:

HIST 3165 - History of Modern Japan (3)
JAPN 2050 - Topics in Japanese (1 to 3)
JAPN 2208 - Japanese Culture and Society (3)
JAPN 3040 - Topics in Japanese Culture (1 to 3)
JAPN 3050 - Topics in the Japanese Language (1 to 3)
JAPN 3060 - Topics in Japanese Film (3)
JAPN 3101 - Kanji through Reading (3)
JAPN 3130 - Business and Culture in Japan (3)
JAPN 3140 - Anime: Genres, Themes and History (3)
JAPN 3225 - Short-Term Abroad (3)
JAPN 3400 - Teaching Practicum (3)
JAPN 3800 - Directed Individual Study (1 to 3)

4000-Level Elective Courses (9 credit hours)

Select three of the following:

JAPN 4040 - Advanced Topics in Japanese Media and Culture (3)
JAPN 4050 - Topics in Japanese (1 to 3)
JAPN 4206 - Advanced Spoken Business Japanese (3)
JAPN 4207 - Business Japanese Writing (3)
JAPN 4410 - Professional Internship in Japanese (1 to 6)

TRAN 4423 - Practicum in Translating II - Japanese (3)
TRAN 4424 - Practicum in Translating III - Japanese (3)

Senior Seminar (1 credit hour)

LANG 4690 - Senior Seminar

Exam

An oral exam is administered by a staff member and based on the proficiency standards of the American Council on the Teaching of Foreign Language (ACTFL). Reading, writing, and listening competencies, as well as Japanese grammatical knowledge, will be assessed by an internally created test based on the internationally accredited Japanese Proficiency Language Test (JLPT).

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Undergraduate Certificate Courses

Credit from courses taken for the Undergraduate Certificate in LANG:

Translating Japanese-English may count toward the B.A. in Japanese Studies but are limited to two courses (6 credit hours).

Degree Total = 120 Credit Hours

Progression Requirements

An overall GPA of 2.0 is required. All courses for the Major in Japanese must be passed with a grade of C or above. Introductory language courses may not be taken on a *Pass/No Credit Basis* if they are being used to fulfill a college or departmental foreign language requirement. Students with a Foreign Language major or minor may not take required courses in the department on a *Pass/No Credit Basis*.

Teacher Licensure

The Department of Languages, Cultures, and Translation, in collaboration with the Department of Middle, Secondary, and K-12 Education, offers a program to prepare students for K-12 foreign language teacher licensure in North Carolina. Students seeking licensure to teach a foreign language (i.e., French, German, Japanese, or Spanish) must fulfill the General Education requirements, the foreign language major, and satisfy all teacher licensure requirements specified by the College of Education. Students planning to specialize in foreign language education should apply through the Coordinator for Foreign Language Education during the first semester of the Sophomore year to obtain appropriate advising. Licensure applications are the responsibility of the student and the Office of Teacher Education Advising and Licensure (TEAL) in the College of Education.

Minor in Japanese

The Minor in Japanese requires a total of 21 credit hours of coursework. 15 credit hours come from five core courses. The remaining 6 credit hours come from two elective courses.

Admission Requirements

Current UNC Charlotte Undergraduate Students

Undergraduate Certificate in LANG: Hispanic Literary Studies

The Undergraduate Certificate in LANG: Hispanic Literary Studies emphasizes the study of literatures written in Spanish from Latin America and Spain within the broader context of the language and culture studied in the major. Literature courses in Spanish enrich students' perspectives by engaging them in the study of history, culture, and philosophy, enabling them to understand other people as well as encouraging introspection and a better understanding of the self and their place in the world. The certificate adds an additional credential to any major concentration and may be added to the existing Certificates in LANG: Business Spanish and Translating Spanish-English.

Admission Requirements

- See University Admission Requirements
- To be admitted into this certificate program, students must meet the general University requirements for admission into undergraduate certificate programs.
- In addition, the program expects students to have taken SPAN 3201 and SPAN 3202, or SPAN 3203, or show that they have advanced level proficiency in reading Spanish.

Certificate Requirements

Required Courses (9 credit hours)

Early Entry: Master of Arts in Spanish

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Minimum 3.0 GPA in the Department of Languages, Cultures, and Translation
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Note: Standardized test scores (e.g., GRE, MAT) are not required.

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 2.75 overall undergraduate GPA and minimum 3.0 GPA for their Junior/Senior years
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Early Entry: Graduate Certificate in LANG: Translation and Interpreting Studies, Spanish-English

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and

graduate degrees). LACS, SPAN, TRAN, and INTE 5000- and 6000-level courses can be double-counted for the specific concentration of the B.A. in Spanish and the Graduate Certificate program/M.A. program for students enrolled in undergraduate and graduate programs simultaneously.

The following table outlines the courses that may be double-counted.

Translation and Interpreting Spanish-English

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Other Languages and Cultures

Minor in Arabic Studies

The Minor in Arabic Studies consists of 20 credit hours (6 courses) above the 1202 level.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Students must be in good academic standing with a minimum GPA of 2.0.

Minor Requirements

The Minor in Arabic Studies consists of a minimum of 21 credit hours above the ARBC 1202 level (i.e., above beginning language instruction).

Required Courses (15 credit hours)

- ARBC 2201 - Intermediate Arabic I (3)
ARBC 2202 - Intermediate Arabic II (3)
ARBC 3201 - Advanced Arabic I (3)
ARBC 3202 - Advanced Arabic II (3)
ARBC 3203 - Advanced Arabic III (3)

Elective Courses (6 credit hours)

Select two of the following:

- ARBC 1502 - Global Arts/Humanities: Modern Arab Culture
ARBC 1512 - Local Arts/Humanities: Islamic Culture in the United States (3)
ARBC 3050 - Topics in Arabic Language and Culture (3)
ARBC 3051 - Topics in Arabic Language and Culture (1 to 3)
ARBC 3211 - Understanding Millennials of the Middle East Through Literature, Culture, and Mass Media (3)
ARBC 3225 - Short-Term Abroad (3)
HIST 2215 - A History of Muslim Societies (3)
HIST 2216 - The Modern Middle East (3)
RELS 2000 - Topics in Religious Studies (1 to 3) (*Islam in America*)
RELS 2131 - Islam (3)
RELS 3000 - Special Topics in Religious Studies (3) (*Islam: History, Traditions, and Politics*)

Minor Total = 21 Credit Hours

Progression Requirements

A grade of C or above must be received in all courses applied toward the minor.

Minor in Chinese

The Minor in Chinese consists of a minimum of 21 credit hours (7 courses) above the CHNS 1202 level (i.e., above beginning language instruction).

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

Required Courses (15 credit hours)

- CHNS 2201 - Intermediate Chinese I (3)
CHNS 2202 - Intermediate Chinese II (3)
CHNS 3201 - Chinese Grammar and Conversation (3)
CHNS 3202 - Chinese Grammar and Conversation (3)
CHNS 3203 - Advanced Chinese Grammar and Conversation (3)

Elective Courses (6 credit hours)

Select two of the following:

- CHNS 1502 - Global Arts/Humanities: Chinese Culture in the World (3)
CHNS 3050 - Topics in Chinese (3)
CHNS 3051 - Topics in Chinese (1 to 3)
POLS 3148 - Chinese Politics (3)
POLS 3165 - East Asia in World Affairs (3)
CHNS 3225 - Short-Term Abroad (3)
RELS 3238 - Asians in the Americas (3)
CHNS 3400 - Chinese Teaching Practicum (3)
CHNS 4050 - Topics in Chinese (3)

Minor Total = 21 Credit Hours

Minor in Italian

A Minor in Italian consists of 18 credit hours (six 3-credit hour courses) above the ITLN 1202 level.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

Required Courses (12 credit hours)

- ITLN 2201 - Intermediate Italian I (3)
ITLN 2202 - Intermediate Italian II (3)
ITLN 3201 - Italian Grammar and Conversation (3)
ITLN 3202 - Italian Grammar and Composition (3)

Elective Courses (6 credit hours)

Select two of the following:

- ITLN 1502 - Global Arts/Humanities: Italian Culture in the World (3)
ITLN 1512 - Local Arts/Humanities: Italian Culture in the U.S. (3)
ITLN 3050 - Topics in Italian (3)
ITLN 3051 - Topics in Italian (1 to 3)

- ITLN 3225 - Short-Term Abroad (3)
 ITLN 3226 - Rome Virtually! (3)
 ITLN 3650 - History of Italian Film (3)
 ITLN 3651 - Italian Mafia through Film (3)
 ITLN 3660 - Italian Culture and Business (3)
 ITLN 3661 - Migrations Across the Mediterranean Sea through Film (3)
 TRAN 4452 - Practicum in Translation I - Italian (3)

Minor Total = 18 Credit Hours

Honors Program

Honors Program in Languages, Cultures and Translation Studies

The Honors Program in the Department of Languages, Cultures, and Translation provides a unique opportunity to majors and minors in any of its language and culture disciplines to conduct field research through study abroad or applied internships. After taking a course that prepares them to do and write up research, students will have the opportunity to share their findings either through an honors project or thesis. This is the highest distinction that the department bestows on its majors and minors; honors in Languages, Cultures, and Translation is an excellent preparation for graduate school, and it is a great addition to student resumes.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

To be admitted to the Languages, Cultures and Translation honors program, students must have:

- 3.0 overall GPA
- Completed the 2201 course level in their language of choice with a grade of B or above
- Permission of the Honors Director

Progression Requirements

Honors candidates must participate in at least 3 credit hours of either study abroad or a department-approved internship or experiential learning opportunity.

In order to graduate with departmental honors, students must:

- Complete the Application to Candidacy through the Honors College
 - Complete LANG 3700 with a grade of A or a grade of B with approval of the Honors Director
 - Complete a study abroad or program-approved internship and/or experiential learning opportunity of at least 3 credit hours
 - Complete LANG 4700 with a grade of A to receive honors (*Students earning a lower grade can still earn elective credit*)
 - Maintain an overall GPA of 3.5 in the Languages, Cultures and Translation major or minor

Department of **Philosophy**

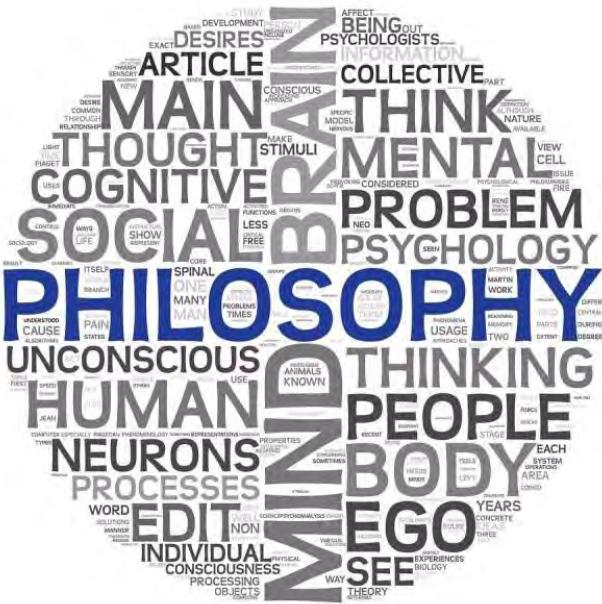

philosophy.charlotte.edu

Undergraduate Programs

- B.A. in Philosophy
 - Honors Program
 - Minor in Philosophy
 - Early Entry: M.A. in Ethics and Applied Philosophy

Philosophy is reasoned inquiry about the nature of persons, reality, thought, knowledge, values, and beauty. It seeks to establish standards of evidence, to provide rational methods of resolving conflicts, and to create techniques for evaluating fundamental ideas, principles and arguments in all areas of human existence and knowledge. Equally concerned with human endeavor in both the arts and the sciences, philosophy continues to reside at the core of a liberal education.

Students major or minor in philosophy because of their desire to pursue fundamental ideas, principles, and arguments in general or in relation to other disciplines. Philosophy helps students develop strong skills in writing, critical thinking, reading, and understanding complex texts. These skills are indispensable for any committed and concerned citizen. The study of philosophy also provides a deeper understanding and enjoyment of the challenges and issues people face throughout their personal and professional lives.

Students may choose to major solely in philosophy, or to pursue it as a second major or as a minor. As several members of the department teach regularly within interdisciplinary studies, many philosophy courses introduce a wide range of ethical, political, scientific, technological, literary, and aesthetic ideas into discussions of philosophical issues. Courses in critical thinking and logic are a benefit to students in all their coursework and can be especially useful to students who plan to enter graduate school, law school, or other professional school. Given the Department of Philosophy's association with the Center for Professional and Applied Ethics, many philosophy courses give students a deeper understanding of contemporary issues in business, law, medicine, public policy, information technology, and environmental studies.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Arts in Philosophy

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
 - *Minimum GPA:* 2.0
 - *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Declaration of Major:* Change of Major form accepted year-found; orientation/advising session required in order to declare

Degree Requirements

A Major in Philosophy leading to a B.A. degree consists of a minimum of 33 credit hours in philosophy, at least 18 of which are earned at UNC Charlotte with a grade of C or above, with no more than 12 credit hours below the 3000-level counting toward the major.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirement.

Foundation Courses (6 credit hours)

PHIL 1502 - Global Arts/Humanities: Global and Comparative Philosophy (3)
or PHIL 1512 - Local Arts/Humanities: Philosophy and Community (3)
PHIL 2100 - Critical Thinking in Philosophy (3)

Major Courses (24 credit hours)

Required Major Courses (12 credit hours)

Select one course from each of the following four categories:

History/Genealogy Courses

PHIL 3009 - Major Figure in Philosophy (3)
PHIL 3019 - Topics in History/Genealogy (3)
PHIL 3201 - Ancient Philosophy (3)
PHIL 3202 - Modern Philosophy (3)
PHIL 3203 - Nineteenth-Century Philosophy (3)
PHIL 3204 - Twentieth-Century Philosophy (3)
PHIL 3211 - Latin American Philosophy (3)
PHIL 3212 - American Philosophy (3)
PHIL 3213 - Existentialism (3)
PHIL 4009 - Major Figure in Philosophy (3)
PHIL 4019 - Advanced Topics in History/Genealogy (3)

Ethics/Aesthetics Courses

PHIL 3039 - Topics in Ethics/Aesthetics (3)
PHIL 3221 - Ethical Theory (3)
PHIL 3222 - Environmental Ethics (3)
PHIL 3223 - Foundations of Ethics (3)
PHIL 3231 - Aesthetics (3)
PHIL 4039 - Advanced Topics in Ethics/Aesthetics (3)
PHIL 4220 - Data Ethics (3)
PHIL 4230 - After Auschwitz (3)

Knowledge/Language Courses

PHIL 3059 - Topics in Knowledge/Language (3)
PHIL 3241 - Knowledge and Reality (3)
PHIL 3242 - Philosophy of Mind (3)
PHIL 3243 - Philosophy of Religion (3)
PHIL 3251 - Advanced Logic (3)
PHIL 3252 - Philosophy of Language (3)
PHIL 3253 - Science, Knowledge, and Values (3)
PHIL 3254 - History and Philosophy of Biology (3)
PHIL 4059 - Advanced Topics in Knowledge/Language (3)

Identity/Society Courses

PHIL 3079 - Topics in Identity/Society (3)
PHIL 3261 - Feminist Philosophy (3)
PHIL 3262 - Philosophy and Race (3)
PHIL 3263 - Philosophy and Disability (3)

PHIL 3271 - Social and Political Philosophy (3)
PHIL 3272 - Philosophy of Technology (3)
PHIL 3273 - Philosophy and the Body (3)
PHIL 3274 - Philosophy of Education (3)
PHIL 3275 - Hip Hop as Redescription (3)
PHIL 4079 - Advanced Topics in Identity/Society (3)
PHIL 4170 - Queer Theory (3)
PHIL 4270 - Indigenous Feminisms (3)

Elective Major Courses (12 credit hours)

The final 12 credit hours of major courses may be from any combination of the four categories listed above and/or include courses from the following:

PHIL 1502 - Global Arts/Humanities: Global and Comparative Philosophy (3)
PHIL 1512 - Local Arts/Humanities: Philosophy and Community (3)
PHIL 2105 - Deductive Logic (3)
PHIL 2220 - Healthcare Ethics (3)
PHIL 3400 - Internship in Ethics and Philosophy (3)
PHIL 3800 - Independent Study (1 to 3)

Note: Students with multiple majors may double-count one 3-credit hour, 3000 or 4000 level course from another major as part of the final 12 credit hours in the Major in Philosophy, with approval of the Philosophy Undergraduate Program Director.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Senior Seminar (3 credit hours)

PHIL 4600 - Senior Seminar (3)
PHIL 4700 - Honors Senior Seminar (3)

Degree Total = 120 Credit Hours

Progression Requirements

A GPA of 2.0 is required for all philosophy courses applied to the major.

Bachelor of Arts in Philosophy, Pre-Law Concentration

The Pre-Law concentration provides students with a thorough education in philosophy while at the same time introducing them to the study of law, focused on both theory and policy. The concentration emphasizes the central role of logical and philosophical argumentation in legal reasoning and in the development of law. Students who complete this concentration will simultaneously earn a minor in Legal Studies.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- Minimum GPA: 2.0
- Transferable Credit Hours: 24

Currently Enrolled Students

- *Declaration of Major:* Change of Major form accepted year-found; orientation/advising session required in order to declare

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirement.

Introduction to Philosophy (3 credit hours)

PHIL 1502 - Global Arts/Humanities: Global and Comparative Philosophy (3)
or PHIL 1512 - Local Arts/Humanities: Philosophy and Community (3)

Concentration Courses (18 credit hours)

LEGL 1100 - Introduction to Law and the Legal System (3)

Reasoning Skills (9 credit hours)

PHIL 2100 - Critical Thinking in Philosophy (3)
PHIL 2105 - Deductive Logic (3)

Plus select one of the following:

LEGL 2103 - Argumentation and Debate (3)
LEGL 3100 - Topics in Legal Skills (3)
LEGL 3363 - Mediation and Conflict Resolution (3)
LEGL 4110 - North Carolina Student Legislature (3)
LEGL 4320 - Evidence (3)

Philosophy, Law, and Policy (6 credit hours)

Select two of the following (other LEGL courses will be considered upon request):

LEGL 3117 - Gender and the Law (3)
LEGL 3175 - Philosophy of Law (3)
LEGL 3810 - Social and Political Philosophy (3)

Major Courses (9 credit hours)

You must take one course each from any three of the following four categories:

History/Genealogy Courses

PHIL 3009 - Major Figure in Philosophy (3)
PHIL 3019 - Topics in History/Genealogy (3)
PHIL 3201 - Ancient Philosophy (3)
PHIL 3202 - Modern Philosophy (3)
PHIL 3203 - Nineteenth-Century Philosophy (3)
PHIL 3204 - Twentieth-Century Philosophy (3)
PHIL 3211 - Latin American Philosophy (3)
PHIL 3212 - American Philosophy (3)
PHIL 3213 - Existentialism (3)
PHIL 4009 - Major Figure in Philosophy (3)
PHIL 4019 - Advanced Topics in History/Genealogy (3)

PHIL 4039 - Advanced Topics in Ethics/Aesthetics (3)
PHIL 4220 - Data Ethics (3)
PHIL 4230 - After Auschwitz (3)

Knowledge/Language Courses

- PHIL 3059 - Topics in Knowledge/Language (3)
PHIL 3241 - Knowledge and Reality (3)
PHIL 3242 - Philosophy of Mind (3)
PHIL 3243 - Philosophy of Religion (3)
PHIL 3251 - Advanced Logic (3)
PHIL 3252 - Philosophy of Language (3)
PHIL 3253 - Science, Knowledge, and Values (3)
PHIL 3254 - History and Philosophy of Biology (3)
PHIL 4059 - Advanced Topics in Knowledge/Language (3)

Identity/Society Courses

- PHIL 3079 - Topics in Identity/Society (3)
PHIL 3261 - Feminist Philosophy (3)
PHIL 3262 - Philosophy and Race (3)
PHIL 3263 - Philosophy and Disability (3)
PHIL 3271 - Social and Political Philosophy (3)
PHIL 3272 - Philosophy of Technology (3)
PHIL 3273 - Philosophy of the Body (3)
PHIL 3274 - Philosophy of Education (3)
PHIL 3275 - Hip Hop as Redescription (3)
PHIL 4079 - Advanced Topics in Identity/Society (3)

- PHIL 4170 - Queer Theory (3)
PHIL 4270 - Indigenous Feminisms (3)

Elective Courses (6 credit hours)

The final 6 credit hours of courses may be from any combination of the four categories listed above and/or include courses from the following:

- PHIL 1502 - Global Arts/Humanities: Global and Comparative Philosophy (3)
PHIL 1512 - Local Arts/Humanities: Philosophy and Community (3)
PHIL 2105 - Deductive Logic (3)
PHIL 2220 - Healthcare Ethics (3)
PHIL 3400 - Internship in Ethics and Philosophy (3)
PHIL 3800 - Independent Study (1 to 3)

Minor Total = 18 Credit Hours

Progression Requirements

At least 12 credit hours from the Minor in Philosophy must be earned at UNC Charlotte with grades of C or above.

Honors Program in Philosophy

What is Honors in Philosophy?

Philosophy majors may pursue Honors in Philosophy either in addition to or instead of University Honors. Honors in Philosophy includes a combination of GPA requirements, coursework, independent study, and a thesis project. Only students whose projects have been approved by both the department honors committee and the Honors College may graduate with honors.

Why do Honors in Philosophy?

There are two main benefits: (1) credentials on one's official transcript ("Graduation with Honors"), and (2) the more important benefit of scholarly growth. Honors projects are basically practice for the more intensively researched, extensively written type of work students will need to do in graduate programs in philosophy and other humanities disciplines (such as literature, cultural studies, etc.). They are also excellent opportunities to develop a stellar writing sample for graduate school applications. Moreover, through intensive work with faculty, students will have the opportunity to both receive one-on-one mentorship (which often helps faculty write extra-detailed letters of recommendation).

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- A declared Major in Philosophy
- Minimum GPA of 3.5 in all philosophy courses counting toward the major is preferred, but exceptions will be granted on a case-by-case basis for students with extenuating circumstances
- Minimum GPA of 3.5 for all departmental and Honors College courses submitted towards graduation with honors

Course Requirements

- PHIL 4700 - Honors Senior Seminar (3)
- Students must also take one 3-hour HONR 37xx seminar on a topic of their choice (ideally in philosophy or in a topic related to their research paper).

Progression Requirements

- Students must compose a research paper committee consisting of three UNC Charlotte faculty. At least two of the members must be in the Department of Philosophy. One is the PHIL 4700 - Honors Senior Seminar instructor; the other is the Subject Matter Expert with whom the student develops their Application to Candidacy form and research paper proposal. The third may be from any relevant department or program (e.g., WGST if writing on gender, CHHS if writing on bioethics, etc.).
- One member of the committee must be affiliated with the Honors College if and only if a student is also submitting the thesis to University Honors.
- Students should select one member of the committee as the Subject Matter Expert whose research expertise is related to the student's research paper topic. The Subject Matter Expert must be a member of the Department of Philosophy.
- Complete the Application to Candidacy process for graduating with honors, as directed by the Honors College. There are two stages to this:
 - Part one must completed no later than the semester before the student registers for PHIL 4700 – Honors Senior Seminar.
 - Part two must completed when the student successfully completes PHIL 4700.
- Oral presentation of research to committee
- Submission of the written research paper to the committee at the end of PHIL 4700

The honors notation will appear on a student's official transcript.

Early Entry: Master of Arts in Ethics and Applied Philosophy

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements

- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director in Philosophy and approval by the Graduate School
- At least 5 courses in philosophy completed or in progress at the time of application, 3 of which must be at the 3xxx/4xxx level

Progression Requirements

- Completion of Early Entry Program Form, and approval by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Students must maintain a minimum 3.0 overall undergraduate GPA,
- Students must complete the BA degree before (a) enrolling in more than 15 hours of graduate work and (b) registering for more than 2 graduate courses per semester.

Special Policies or Requirements

Up to 9 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 9 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Department of Political Science and Public Administration

politicalscience.charlotte.edu

Undergraduate Programs

- **B.A. in Political Science**
 - Security and Intelligence Systems
 - Comprehensive Social Studies Teacher Licensure
 - Honors Program
- **Minor in Political Science**
- **Minor in Public Administration**
- **Minor in Security and Intelligence Studies**
- **Early Entry: Master of Public Administration (MPA)**

Political science is the study of politics: government, law, political behavior, public policy, and political philosophy. The political science curriculum is designed primarily to afford broad and modern training in the study of political institutions and political behavior for students in the liberal arts and majors planning graduate work. It also affords career-oriented or pre-professional training for teaching, law, business, public relations, or work in the mass media, domestic and foreign government service, the military, teaching, and a variety of active roles in politics.

The B.A. in Political Science offers a concentration and minor in Security and Intelligence Studies. The B.A. in Political Science with Concentration in Security and Intelligence Studies encourages students to gain a broad, well-rounded understanding of the ethics, processes, priorities, and outcomes of national security policy, with a focus on the role of information and intelligence in the policymaking process. The concentration is designed to prepare students to work in a wide range of occupations in the government, private, non-profit sectors that deal with national security broadly understood, and for the obligations of state, national, and global citizenship in the 21st century.

The Minor in Security and Intelligence Studies encourages students to gain a broad, well-rounded understanding of the ethics, processes, priorities, and outcomes of national security policy, with a focus on the role of information and intelligence in the policymaking process. The minor's interdisciplinary approach enables students to select courses across a wide range of disciplines. It is designed to prepare students to work in a wide range of occupations in the government, private, non-profit sectors that deal with national security broadly understood, and for the obligations of state, national, and global citizenship in the 21st century.

The Department, in collaboration with the College of Education, offers the B.A. in Political Science with Comprehensive Social Studies Teacher Licensure. The coursework for this licensure includes nearly equal numbers of courses in political science and affiliated social studies supervised by the Department of Political Science and Public Administration, and education courses supervised by the Department of Middle, Secondary, and K-12 Education. Students interested in the teacher licensure should declare their intent with the Department of Political Science and Public Administration to seek advising and academic progression.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Careers with Political Science

Political science majors gain analytical skills and communication abilities that are valued in a wide spectrum of potential career areas. An undergraduate degree in political science can lead to interesting careers in local, state, or federal government; law; private businesses; international organizations; the military; nonprofit organizations; political campaigns; journalism; teaching; public office; research and teaching at universities.

Graduate Programs

On the graduate level, the Department of Political Science and Public Administration offers the Master of Public Administration, a professional degree for persons seeking training in public administration with specialization in local government and non-profit management. Students in the Gerald G. Fox MPA Program have the option to concentrate their studies in several specialized areas: Nonprofit Management, Urban Management & Policy, Arts Administration, Emergency Management, and Public Budgeting and Finance. (For more information, see the *Graduate Catalog*.) The department is also one of the social science departments that offers an interdisciplinary Ph.D. in Public Policy. (For more information, see the *Graduate Catalog*.)

Bachelor of Arts in Political Science

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- Minimum GPA: 2.0
- Transferable Credit Hours: 24

Currently Enrolled Students

Admission Requirements

- See University Admission Requirements
- *Minimum GPA:* 2.0 in POLS courses
- *Other Requirements:* Political Science major

Currently Enrolled Students

- *Declaration of Major:* Change of Major form accepted year-round. Students declaring the major should meet with the assigned academic advisor before registering for the next semester.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirement.

Major Courses (30 credit hours)

Major Core Courses (12-13 credit hours)

Required Core Courses (9 credit hours)

- POLS 1150 - International Politics (3)
POLS 1501 - Global Social Science: Introduction to Comparative Politics (3)**
POLS 1575 - American Politics (3)*

Elective Core Course (3-4 credit hours)

Select one of the following:

- POLS 2220 - Political Science Methods (4)
CJUS 2370 - Research Methods in Criminal Justice (3)
COMM 3100 - Communication Research Methods (3)
PSYC 3292 - Research Methodology II (3)
SOCY 3155 - Sociological Research Methods (4)

Notes:

* Students who receive an evaluation of Qualified (3) or above on the Advanced Placement examination in American Politics will receive credit for POLS 1575.

** Students who receive an evaluation of Qualified (3) or above on the Advanced Placement examination in Comparative Politics will receive credit for POLS 1501.

Major Concentration Courses (9 credit hours)

- POLS 3380 – Security and Intelligence in a Democratic Society (3)
POLS 3381 - Critical Thinking Skills for Security and Intelligence (3)
POLS 3382 - Analytic Writing and Briefing (3)

Major Elective Courses (9 credit hours)

Political and Legal Philosophy Elective Course (3 credit hours)

Select one of the following:

- POLS 1170 - Introduction to Political Philosophy (3)
POLS 3070 - Topics in Political or Legal Philosophy (3)
POLS 3171 - History of Classical Political Philosophy (3)

- POLS 3172 - African American Political Philosophy (3)
POLS 3173 - History of Modern Political Philosophy (3)
POLS 3175 - Philosophy of Law (3)
POLS 3176 - Fascism and Communism (3)
POLS 3177 - Social and Political Philosophy (3)

Political Science Elective Course (3 credit hours)

Select any 3 credit hour POLS course to achieve a total of 30 credit hours in POLS courses. No more than 9 credit hours of POLS 3400, POLS 3800, POLS 4110, and POLS 4163 may be used to fulfill major requirements.

Capstone Course (3 credit hours)

Select one of the following:

- POLS 4110 - North Carolina Student Legislature (3)
POLS 4163 - Advanced Model United Nations (3)
POLS 4600 - Senior Seminar (3)
POLS 4700 - Honors Thesis (3)
POLS 4990 - Senior Thesis (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

A minimum GPA of 2.0 in concentration courses is required.

Bachelor of Arts in Political Science with Comprehensive Social Studies Teacher Licensure

The Department of Political Science and Public Administration, in collaboration with the College of Education, offers a concentration to a North Carolina Teaching License in Social Studies. The coursework for this program includes 30 credit hours of coursework in political science (which is close to the 32 credit hours in education supervised by the Department of Middle, Secondary, and K-12 Education), and up to 21 credit hours of content in other social science disciplines. Students interested in teacher licensure should declare their intent with the Department of Political Science and Public Administration as soon as possible to prevent unnecessary delays.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.0
- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Declaration of Major:* Teaching license orientation/advising session required upon declaration of major

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some

general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirement.

Foundation Courses (9 credit hours)

- POLS 1150 - International Politics (3)
- POLS 1501 - Global Social Science: Introduction to Comparative Politics (3)
- POLS 1575 - American Politics (3)

Restricted Elective Courses (9-10 credit hours)

Select at least one course from each list.

Methods Course (3-4 credit hours)

Select one of the following. POLS 2220 should be taken unless there is a double major, as indicated.

- POLS 2220 - Political Science Methods (4)
- CJUS 2370 - Research Methods in Criminal Justice (3) (*for double major in Political Science and Criminal Justice*)
- COMM 3100 - Communication Research Methods (3) (*for double major in Political Science and Communication Studies*)
- PSYC 3292 - Research Methodology II (3) (*for double major in Political Science and Psychological Science*)
- SOCY 3155 - Sociological Research Methods (4) (*for double major in Political Science and Sociology*)

Political Philosophy Course (3 credit hours)

Select a minimum of one of the following:

- POLS 1170 - Introduction to Political Philosophy (3)
- POLS 3070 - Topics in Political or Legal Philosophy (3)
- POLS 3171 - History of Classical Political Philosophy (3)
- POLS 3172 - African American Political Philosophy (3)
- POLS 3173 - History of Modern Political Philosophy (3)
- POLS 3175 - Philosophy of Law (3)
- POLS 3176 - Fascism and Communism (3)
- POLS 3177 - Social and Political Philosophy (3)

Non-Western Political Science Course (3 credit hours)

Select a minimum of one of the following:

- POLS 3133 - Middle East Politics (3)
- POLS 3143 - African Politics (3)
- POLS 3144 - Latin American Politics (3)
- POLS 3148 - Chinese Politics (3)

Capstone Course (3 credit hours)

Select one of the following:

- POLS 4110 - North Carolina Student Legislature (3)
- POLS 4163 - Advanced Model United Nations (3)
- POLS 4600 - Senior Seminar (3)
- POLS 4700 - Honors Thesis (3)
- POLS 4990 - Senior Thesis (3)

Unrestricted Political Science Elective Courses (8-9 credit hours)

Select any POLS courses to achieve a total of 30 credit hours in POLS courses. No more than 9 credit hours from POLS 3400, POLS 3800, POLS 4110, and POLS 4163 may be used to fulfill major requirements.

Social Studies Courses (18 credit hours)

- ECON xxxx - Economics Course (3) (ECON 1101 is recommended)
- GEOG 1501 - Global Social Science: Global Geography (3)
- HIST 1502 - Global Arts/Humanities: Issues in Global History (3)
- HIST 1575 - American Democracy's Past and Promise (3)
- HIST 2050 - Themes in United States History (3)
- HIST 2051 - Themes in European History (3)

Minor in Secondary Education (32 credit hours)

Students must have a Minor in Secondary Education to obtain teaching licensure. See the College of Education section of this Catalog for details on the requirements for the minor.

Licensure applications are the responsibility of the student and the Office of Teacher Education Advising and Licensure (TEAL) in the College of Education.

Degree Total = 120 Credit Hours

Progression Requirements

Students must obtain a cumulative GPA of 2.7 for admission to the College of Education. To complete the program, students must earn a grade of C or above in all Political Science, Social Studies background, and Education courses; earn a GPA of 2.75 or better in Political Science and Social Studies background courses; and earn a GPA of 2.75 or above in all Education courses.

Minor in Political Science

The Minor in Political Science requires 18 credit hours of political science with a combined GPA of at least 2.0 for all POLS courses.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

Required Courses (9 credit hours)

- POLS 1150 - International Politics (3)
- POLS 1501 - Global Social Science: Introduction to Comparative Politics (3)
- POLS 1575 - American Politics (3)

Elective Courses (9 credit hours)

Select at least three POLS elective courses. Although students may repeat POLS 3400, POLS 3800, POLS 4110, or POLS 4163 for credit, no more than three hours of credit from any one of these courses may be used to fulfill the requirements for the Minor in Political Science.

Minor Total = 18 Credit Hours

Minor in Public Administration

Admission Requirements

- Admission to the university as an undergraduate student
- See University Admission Requirements

Minor Requirements

The Minor in Public Administration consists of 15 credit hours.

Required Courses (9-15 credit hours)

A minimum of 9 credit hours must come from the following courses:

- POLS 2120 - Introduction to Public Policy (3)
POLS 3119 - State and Local Government (3)
POLS 3121 - Urban Politics and Policy (3)
POLS 3126 - Introduction to Public Administration (3)
POLS 3127 - Public Service in Nonprofit Organizations (3)

Elective Courses (0-6 credit hours)

The following courses can be used to fulfill any remaining hours needed of the 15-credit hour requirement. Note: Although students may repeat POLS 3010 and POLS 3400 for credit, no more than three hours of credit from any one of these courses may be used to fulfill the requirements for the Minor in Public Administration.

- CJUS 2350 - Introduction to Corrections (3)
CJUS 2380 - Introduction to Law Enforcement (3)
COMM 2145 - Principles of Public Relations (3)
COMM 3115 - Health Communication (3)
COMM 3121 - Mass Communication and Society (3)
COMM 3125 - New Media for Communications (3)
COMM 3135 - Leadership, Communication, and Group Dynamics (3)
COMM 3141 - Organizational Communication (3)
GEOG 1103 - Spatial Thinking (4)
GEOG 1511 - Local Social Science: Urban and Regional Planning (3)
GEOG 2105 - Introduction to Economic Geography (3)
GEOG 2111 - Social Inequality and Planning (3) (SL)
GEOG 2200 - Introduction to Urban Studies (3)
GEOG 3106 - Sustainable Cities (3)
GEOG 3115 - Urban Transportation Problems (3)
GEOG 3200 - Land Use Planning (3)
GEOG 3210 - Regional Planning (3)
HLTH 2102 - Foundations of Public Health (3)
HLTH 3102 - Comparative Healthcare Systems (3)
POL 3010 - Topics in American Politics or Public Administration (1 to 4)
POL 3108 - Social Movements and Interest Groups (3)
POL 3114 - Constitutional Law and Policy (3)
POL 3115 - Civil Rights and Liberties (3)
POL 3116 - Judicial Process (3)
POL 3123 - Urban Political Geography (3)
POL 3125 - Healthcare Policy (3)
POL 3132 - Comparative Public Policy (3)
POL 3135 - Terrorism (3)
POL 3151 - International Political Economy (3)
POL 3153 - European Union (3)
POL 3154 - Cyberspace and Politics (3)
POL 3382 - Analytic Writing and Briefing (3)
POL 3400 - Internship in Political Science (3 to 6)
SOCY 2115 - Introduction to Organizations (3)

- SOCY 2171 - Social Problems (3)
SOCY 4115 - Organizational Sociology (3)

Minor Total = 15 Credit Hours

Special Policies or Requirements

No more than 6 credit hours counted towards another major or minor may be used to fulfill the requirements for the Minor in Public Administration.

Minor in Security and Intelligence Studies

Security and Intelligence Studies is an interdisciplinary approach to the study of national security policy. The Minor in Security and Intelligence Studies encourages students to gain a broad, well-rounded understanding of the ethics, processes, priorities, and outcomes of national security policy, with a focus on the role of information and intelligence in the policymaking process. The minor's interdisciplinary approach enables students to select courses across a wide range of disciplines. It is designed to prepare students to work in a wide range of occupations in the government, private, non-profit sectors that deal with national security broadly understood, and for the obligations of state, national, and global citizenship in the 21st century.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

Required Courses (9 credit hours)

- POLS 3380 - Security and Intelligence in a Democratic Society (3)
POLS 3381 - Critical Thinking Skills for Security and Intelligence (3)
POLS 3382 - Analytic Writing and Briefing (3)

Elective Courses (9 credit hours)

Select courses from the following topics:

Terrorism and Political Violence

- POLS 3030 - Topics in Comparative or International Politics (1 to 4)
POLS 3135 - Terrorism (3)
POLS 3137 - International Human Rights (3)

CJUS 4375 - Community-Oriented Policing, Problem-Solving, and Crime Analysis (3)
CJUS 4378 - Causes and Consequences of Crime (3)

Minor Total = 18 Credit Hours

Progression Requirements

Minimum GPA of 2.0 in all courses taken toward the minor.

Honors Program in Political Science

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

To be admitted into the Political Science Honors Program, a student must:

- Complete POLS 2220 with a grade of A
- Have an overall GPA at UNC Charlotte of at least 3.25
- Have a GPA of at least 3.5 in all Political Science classes taken at UNC Charlotte

Students may seek admission to the Political Science Honors Program upon fulfilling these requirements.

Course Requirements

The Political Science Honors Program consists of a two-course sequence:

- 1) POLS 3700 in which the student does a literature review and develops a research design
- 2) POLS 4700 in which the student completes the research and finalizes the thesis. The student must do an oral defense of the thesis in front of a committee that includes the topic advisor and two other faculty members.

Progression Requirements

To be awarded honors in Political Science, a student must:

- Complete the Honors Thesis (POLS 4700) with a grade of A, including certification by the student's honors committee that the thesis is of honors quality and deserves that grade.
- Earn a minimum GPA of 3.5 in Political Science courses
- Earn a minimum overall GPA of 3.25 at UNC Charlotte
- Complete the Application to Candidacy process for graduating with honors, as directed by the Honors College

Following successful completion of these requirements, the honors notation will appear on the student's official transcript.

Early Entry: Master of Public Administration

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Department of Psychological Science

psych.charlotte.edu

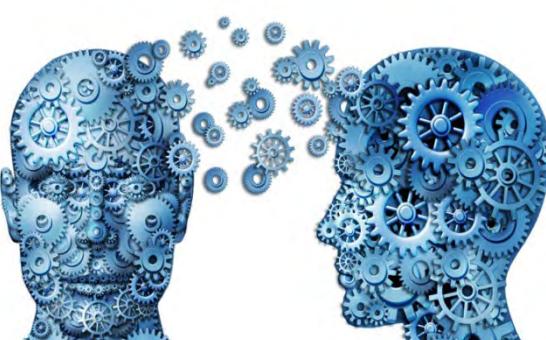

Undergraduate Programs

- **B.S. in Psychology**
 - Honors Program
- **Minor in Psychology**
- **Minor in Cognitive Science**
- **Early Entry: Ph.D. in Organizational Science**

Relevant to all aspects of the human experience, psychology is the scientific study of human thoughts, feelings, and behavior. A broad field of study, psychologists seek to provide answers to a wide array of questions, such as:

- How do we learn and remember information?
- How do we make decisions and what influences those decisions?
- Why do people develop behavior disorders?
- What treatments are most effective for what problems?
- What are the changes involved in moving from infancy to old age?
- How do we form attitudes and attributions about other people and groups?
- How is behavior regulated by the brain?
- What are emotions and how do they influence behavior?
- How do people work best in groups and teams?
- How do we build and maintain relationships with others?
- How do psychological factors affect physical health?
- How do we assess human potential?

In addition to gaining knowledge of psychological theories, perspectives, and research findings from across the broad field of psychology, students who major (or minor) in psychology will also develop skills that will lead to success outside of the classroom, including how to read and think critically, how to communicate scientific findings effectively, how to evaluate research articles, and how to use data to make decisions. The degree in psychology should also help to achieve an understanding of ethical principles related to practice and research, and an appreciation for psychology's relationship to diversity, equity, and inclusiveness.

The Department of Psychological Science offers a Bachelor of Science (B.S.), an undergraduate Minor in Psychology, and Master of Arts (M.A.)

degree programs in General Psychology and Industrial and Organizational Psychology (see the *Graduate Catalog* for information on the M.A. programs).

The B.S. in Psychology prepares graduates for careers and/or graduate study in the areas of business, healthcare, medicine, counseling, criminal justice, education, and law.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Science in Psychology

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- *Declaration of Major:* Incoming freshmen may enter UNC Charlotte as declared Psychology majors without additional admissions requirements.

Currently Enrolled Students

- See University Admission Requirements
- *Minimum Overall GPA:* 2.0
- *Pre-Major/Prerequisite Courses:* Completion of the following with grades of C or above:
 - PSYC 1101 (within 2 attempts)
 - A Statistics (STAT 1220/STAT 1221*/STAT 1222) course (within 2 attempts)
 - A General Education science course with a lab outside the subject of Psychology

* STAT 1221 or STAT 1222 is preferred because the course is designed for life or social and behavioral sciences, respectively.

- *Declaration of Major:* Applications to declare the major are accepted during approximately the 2nd month of classes each Fall and Spring term, as stated on the Department of Psychological Science's website (psych.charlotte.edu).

Degree Requirements

A minimum of 120 total earned credit hours is required for the degree. The Major in Psychology requires 39 credit hours of coursework in the major, plus completion of a minor or second major, and other requirements as listed below. Psychology coursework in four areas is required: Research Methods/Critical Thinking Skills, Knowledge Base, Psychology Elective courses, and a Capstone course. No more than 13 credit hours (four courses) may be double-counted with another major, minor, or General Education requirements. General Psychology Lab may not be counted towards the major.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirement.

Major Courses (49 credit hours)

Natural Sciences Courses (7 credit hours)

Select two courses, one of which must be taken with its corresponding laboratory (L) course. Natural Sciences courses may also be used to satisfy General Education requirements. For a list of acceptable courses, see the General Education Program.

Knowledge Base Area Courses (15 credit hours)

Note: All courses must be completed with grades of C or better AND within 2 attempts to remain in the major.

- PSYC 1101 - General Psychology (3)
- PSYC 2113 - Introduction to Brain, Behavior, and Mental Processes (3)
- PSYC 2115 - Introduction to Self in Context (3)
- PSYC 2117 - Introduction to Lifespan Development (3)
- PSYC 2390 - Life Beyond the Psychology Bachelor of Science (3)

Research Methods and Critical Thinking Area Courses (9 credit hours)

This core is designed to foster understanding of research methodological approaches in Psychology as well as to help students consume and critically think about psychological research. Students must complete a STAT 122X course prior to taking PSYC 2391. Following the larger, lecture based PSYC 2391, students will take a deep dive into psychological research by completing either PSYC 3291 or PSYC 3292 where students should expect to learn and develop APA style research writing skills.

PSYC 3291 and PSYC 3292 meet the same requirement toward the major; thus, students can only complete one without petitioning the department for a permit. To determine which course (PSYC 3291 or PSYC 3292), students can work with their professional advisor and review material from PSYC 2390.

Note: All courses must be completed with a grade of C or better AND within 2 attempts to remain in the major.

PSYC 2391 - Research Methodology I (3)

PSYC 3292 - Research Methodology II (3)

or PSYC 3291 - Critical Thinking About Research (3)

STAT 1220 - Elements of Statistics I (BUSN) (3)

or STAT 1221 - Elements of Statistics I (3)

or STAT 1222 - Introduction to Statistics (3)

Psychology Electives (15 credit hours)

Students have the opportunity to chart a unique trajectory of elective courses at the 2300-, 3000- and 4000- level. Students will begin this process of reflection and navigation during PSYC 2390 and expected to continue by meeting with their professional advisor.

2300-level Electives (3-6 credit hours)

Students can chose to take 3-6 credit hours at the PSYC 23XX-level that are in alignment with their interests and trajectory following the completion of their undergraduate degree.

NOTE: PSYC 2390 and PSYC 2391 do NOT count as elective courses given they are core PSYC required courses for all PSYC majors.

3000-level or 4000-level Non-Capstone Electives (9-12 credit hours)

Students can chose to take 9-12 credit hours at the PSYC 3000- or PSYC 4000- (non-Capstone) level that are in alignment with their interests and

trajectory following the completion of their undergraduate degree.
NOTE: PSYC 3291 and PSYC 3292 do NOT count as elective courses given they meet core PSYC required courses for all PSYC majors. PSYC 4099, PSYC 43XX, PSYC 46XX, and PSYC 4702 do NOT count as elective courses given they meet the Capstone course requirement for all PSYC majors.

Capstone Course (3 credit hours)

Capstone courses serve as a culminating experience for the undergraduate program. Selection of a Capstone course should be made with future career and educational goals in mind. Enrollment in a Capstone course requires the student to have completed 90 or more credit hours of coursework, have a grade of C or above in PSYC 3291 or PSYC 3292, and any additional prerequisites as required by the individual course. A Capstone course may not be taken during the same term as PSYC 3291 or PSYC 3292. Only one Senior Seminar may be taken.

The capstone must be completed with a grade of C or better AND within 2 attempts to remain a major.

Students may select their Capstone from the following list of courses:

PSYC 4099 - Advanced Topics in Psychological Research (3)

PSYC 4702 - Honors Thesis II (3)

Any PSYC 43XX or PSYC 46XX

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation. Students in the Psychology major are strongly encouraged to combine their Psychology major with a minor or second major. UNC Charlotte offers a wide range of minors to complement and otherwise enrich student readiness for workplace settings that demand effective communication, critical thinking and problem solving skills, digital literacy, and effective teamwork. Coursework outside of Psychology will broaden skills and create a more well-rounded graduate.

Degree Total = 120 Credit Hours

Academic Advising

Students should seek advising from the Psychology Advising for Student Success (PASS) Center about courses most beneficial to their career and educational goals. In addition, the Department of Psychological Science actively participates in several interdisciplinary areas of study, including Gerontology, Women's and Gender Studies, and Cognitive Science.

Progression Requirements

- A GPA (overall and PSYC-specific) of 2.0 or above must be maintained for the major. A grade of C or above in PSYC 1101, PSYC 2113, PSYC 2115, PSYC 2117, PSYC 2390, PSYC 2391, PSYC 3291 or PSYC 3292, a statistics course, the two Natural Science courses and one with corresponding lab, and the Capstone course within 2 attempts* is required to progress and remain in the major.

*Each of the following is considered an attempt: Withdrawing from the course after the drop deadline (may be appealed); grade replacement; audits; Pass/No Credit; Incompletes that convert to grades of F; and grades of A, B, C, D, or F.

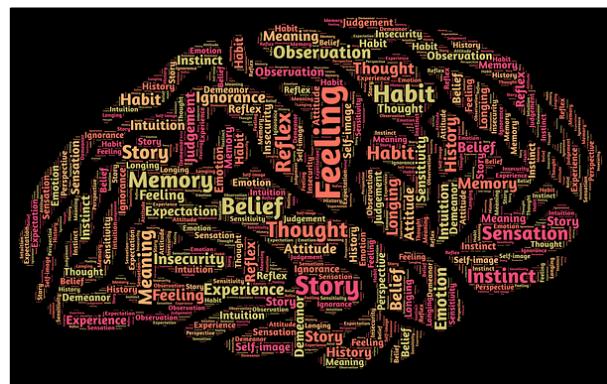

- **Suggested/Ideal Major Specific Progression**

- **Freshman Year:** PSYC 1101, STAT 1220/STAT 1221**/STAT

1222, ** PSYC 2117

- **Sophomore Year:** PSYC 2113, PSYC 2115, PSYC 2390, PSYC 2391, PSYC 3291 or PSYC 3292
- **Junior Year:** Electives
- **Senior Year:** Electives, Capstone

** STAT 1221 or STAT 1222 is preferred because the course is designed for life or social and behavioral sciences, respectively.

Honors Program in Psychology

Admission Requirements

Current UNC Charlotte Undergraduate Students

To enroll in the first course of the Honors Thesis Sequence, students must have:

- See University Admission Requirements
- At least two semesters remaining before graduating
- Achieved Junior standing
- Completed PSYC 3292 with a grade of B or above (a grade of A is preferred)
- A minimum overall GPA of 3.2 (or be close enough to a 3.2 to be reasonably confident of achieving it by graduation)
- A minimum Psychological Science GPA of 3.5 (or be close enough to a 3.5 to be reasonably confident of achieving it by graduation)
- Identified a faculty member to supervise the Honors Thesis project BEFORE enrolling in PSYC 4701

For additional information and to complete the Psychological Science Departmental Honors application, see the Department of Psychological Science website.

Course Requirements

The Honors Program in Psychology involves a two-semester thesis project. This thesis project provides students with an opportunity to do research and comprehensive projects that are similar to what students may encounter in graduate school, industry, non-profit organizations, and other careers of choice. Over the course of two semesters, students will: 1) identify an area of inquiry involving systematic investigation into a problem, issue, topic or idea, 2) develop a product outcome of discipline specific or interdisciplinary inquiry, and 3) dissemination, involving the sharing of inquiry process and product with project stakeholders and target audience. conduct a literature search around a topic, develop a research proposal, design a study and collect data, conduct data analyses, and write up the findings and their implications in

a research thesis.

During the first semester (PSYC 4701), students conduct a literature review and design a study to form a research proposal. At the end of the first semester, there is a formal defense of the research proposal before a committee of faculty members and peers.

During the second semester (PSYC 4702), students conduct the research proposed in their research proposal—they collect and analyze their data, write up the findings and their implications, and combine this information with their research proposal to create their final research thesis. At the end of the second semester, there is a formal defense of the research thesis before a committee of faculty members and peers.

PSYC 4701 - Honors Thesis I (3)
PSYC 4702 - Honors Thesis II (3)

Progression Requirements

To graduate with departmental honors, students must complete all of the following:

- Receive a grade of A in PSYC 4701
- Receive a grade of A in PSYC 4702
- Obtain a minimum GPA of 3.5 in all Psychological Science (PSYC) courses
- Obtain a minimum overall GPA of 3.2
- Complete the Application to Candidacy process for graduating with honors, as directed by the Honors College

Upon meeting these requirements, an Honors notation will appear on the student's official transcript.

Minor in Psychology

A Minor in Psychology consists of 22 credit hours, including a minimum of 18 credit hours of PSYC courses and 4 credit hours of Natural Science coursework outside of Psychology.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

Introductory Course (3 credit hours)

PSYC 1101 - General Psychology (3)

Knowledge Base Area Courses (9 credit hours)

Select three courses from three different Knowledge Base Areas:

Learning and Cognition

PSYC 2316 - Introduction to Cognitive Processes (3)
PSYC 3131 - Psychology of Learning and Memory (3)
PSYC 3132 - Sensation and Perception (3)
PSYC 3216 - Introduction to Cognitive Science (3)

Sociocultural Approaches

PSYC 2350 - Introduction to Social Psychology (3)
PSYC 3201 - Motivation (3)

Biological Basis of Behavior

PSYC 2113 - Introduction to Brain, Behavior, and Mental Processes (3)
PSYC 2333 - Introduction to Comparative Psychology (3)
PSYC 3333 - Behavioral Neuroscience (3)

Developmental Changes

PSYC 2370 - Child Development (3)
PSYC 2371 - Adolescent Development (3)
PSYC 2372 - Psychology of Adult Development and Aging (3)

Elective Courses (6 credit hours)

Select two of the following:

AFRS 3261 - Psychology of the Black Experience (3)
PSYC 1000 - The Science and Practice of Psychology (3)
PSYC 2113 - Introduction to Brain, Behavior, and Mental Processes (3)
PSYC 2301 - Introduction to Forensic Psychology (3)
PSYC 2302 - Introduction to Positive Psychology (3)
PSYC 2316 - Introduction to Cognitive Processes (3)
PSYC 2320 - Introduction to Industrial/Organizational Psychology (3)
PSYC 2333 - Introduction to Comparative Psychology (3)
PSYC 2340 - Psychology of Adjustment (3)
PSYC 2341 - Psychopathology (3)
PSYC 2350 - Introduction to Social Psychology (3)
PSYC 2360 - Introduction to Health Psychology (3)
PSYC 2370 - Child Development (3)
PSYC 2371 - Adolescent Development (3)
PSYC 2372 - Psychology of Adult Development and Aging (3)
PSYC 3001 - Topics in Psychology (1 to 3)
PSYC 3099 - Topics in Psychological Research (3)
PSYC 3101 - Sexual Behavior (3)
PSYC 3121 - Organizational Psychology (3)
PSYC 3123 - Social and Personality Development (3)
PSYC 3125 - Older Worker and Retirement (3)
PSYC 3131 - Psychology of Learning and Memory (3)
PSYC 3132 - Sensation and Perception (3)
PSYC 3141 - Introduction to Clinical Psychology (3)
PSYC 3201 - Motivation (3)
PSYC 3216 - Introduction to Cognitive Science (3)
PSYC 3301 - Basic Processes in Psychological Assessment (3)
PSYC 3316 - Language and Cognition (3)
PSYC 3333 - Behavioral Neuroscience (3)
PSYC 3347 - Child Psychopathology (3)
PSYC 3355 - Psychological Approaches to Diversity (3)
PSYC 3357 - Introduction to Community Psychology (3)
PSYC 3806 - Undergraduate Research Assistantship (1 to 4)
PSYC 4151 - Psychology of Personality (3)

Natural Science Courses (4 credit hours)

- Select any General Education Natural Science course, excluding PSYC 1101
- Select the General Education Natural Science corresponding lab course

Notes:

- *A minimum of 3 credit hours of coursework at the 3000-level or above is required.*
- *No more than three credit hours of PSYC 3806 may be counted toward the minor.*

Minor Total = 22 Credit Hours

Progression Requirements

A grade of C or above is required for PSYC 1101 (within two attempts) and the Natural Science courses, with a GPA of 2.0 for all courses used to satisfy the minor requirement.

Minor in Cognitive Science

Cognitive science is the interdisciplinary study of the processes and representations of the mind that enable intelligent thought and behavior in humans, animals, and machines. Of central concern are cognitive abilities such as perception and action, attention and cognitive control, memory, knowledge, language, problem solving, and emotion.

The interdisciplinary minor in Cognitive Science is designed to provide students with an introduction to the questions of cognitive science and the variety of approaches used to answer those questions, including approaches drawn from Psychology, Computing, Philosophy, Linguistics, and Cognitive Neuroscience. Students completing a minor will add an interdisciplinary perspective to the training received in their major, better preparing them for employment or further study in a variety of behavioral and computational sciences. For additional details, visit the Cognitive Science program at cogsci.charlotte.edu.

The Minor in Cognitive Science is awarded only to students completing an undergraduate major at UNC Charlotte. A Minor in Cognitive Science consists of 18 credit hours: 3 credit hours of required coursework, 9 credit hours of restricted elective courses outside of the student's primary major, and the remaining 6 credit hours of unrestricted elective courses. Because course substitutions may be made based on current University offerings, students are encouraged to consult with the Director as they plan their schedules.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

Prerequisite Courses

It is recommended that students take the following prerequisite courses. However, these courses are not part of the minor and they do not count toward the Minor in Cognitive Science.

PSYC 1101 - General Psychology (3)

ITSC 1212 - Introduction to Computer Science I (4)

ITSC 1212L - Programming Lab I (0)

Required Core Course (3 credit hours)

Select one of the following:

PSYC 3216 - Introduction to Cognitive Science (3)

ITCS 3216 - Introduction to Cognitive Science (3)

Restricted Elective Courses (9 credit hours minimum)

Students must take courses from 3 of the following 4 options of courses outside of their major. [Students with a Major in Computer Science must fulfill the restricted elective courses in Psychology, Linguistics, and Philosophy. Students with a Major in Psychology must fulfill the restricted elective courses in Computing, Linguistics, and Philosophy.]

Option 1 (Computing)

Select one of the following:

ITCS 1213 or above (excluding ITCS 1610) (3)

ITSC 1213 or above (3)

ITIS 2300 Web-Based Application Development (3)

Option 2 (Linguistics)

Select one of the following:

ENGL 4167 - The Mind and Language (3)

Option 3 (Philosophy)

Select one of the following:

PHIL 3242 - Philosophy of Mind (3)

PHIL 3251 - Advanced Logic (3)

PHIL 3252 - Philosophy of Language (3)

Option 4 (Psychology)

Select one of the following:

PSYC 2316 - Introduction to Cognitive Processes (3)

PSYC 3131 - Psychology of Learning and Memory (3)

PSYC 3132 - Sensation and Perception (3)

Unrestricted Elective Courses (6 credit hours minimum)

ENGL 4161 - Modern English Grammar (3)

ENGL 4167 - Mind and Language (3)

ITCS 3152 - Symbolic Programming (3)

ITCS 3153 - Introduction to Artificial Intelligence (3)

ITIS 3130 - Human Computer Interaction (3)

PHIL 3242 - Philosophy of Mind (3)

PHIL 3251 - Advanced Logic (3)

PHIL 3252 - Philosophy of Language (3)

PSYC 2316 - Introduction to Cognitive Processes (3)

PSYC 3131 - Psychology of Learning and Memory (3)

PSYC 3132 - Sensation and Perception (3)

PSYC 3316 - Language and Cognition (3)

PSYC 4116 - Cognitive Neuroscience (3)

Minor Total = 18 Credit Hours

Progression Requirements

To qualify for the Minor in Cognitive Science, students must have a GPA of at least 2.0 in courses applied to the minor.

Department of Religious Studies

religiousstudies.charlotte.edu

Undergraduate Programs

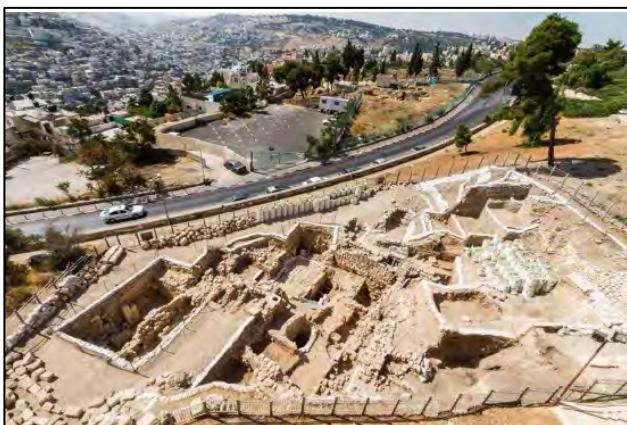

- **B.A. in Religious Studies**
 - Honors Program
- **Minor in Religious Studies**
- **Early Entry: M.A. in Religious Studies**

Religious studies is the academic inquiry into the fundamental stories, symbols, and practices that human beings construct to make sense of themselves and the worlds in which they live. The Department of Religious Studies pursues this inquiry across a range of religious traditions by examining their textual, historical, and cultural dimensions. This inquiry does not seek to determine which religious views are "right" or "true," but rather attempts to gain insight into how religious systems of meaning-making have shaped the cultural orders in which we live—with particular attention to how religious discourses have shaped understandings of race, gender, sexuality, nation, and class. The department is explicitly committed to the liberal arts tradition with a commitment to fostering both global and pluralistic perspectives, as well as excellence in close reading, critical thinking, and effective communication.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Degree Programs

The Department of Religious Studies offers a B.A. in Religious Studies, an undergraduate Minor in Religious Studies, an Honors program, and a M.A. in Religious Studies with an early entry program for undergraduates. Most students who choose to major or minor in Religious Studies do so to benefit from a broad liberal arts education focused on one of the most fascinating aspects of shared human life: religion. With the flexibility of the program and its relationship to other areas of the University, students can meet the specific objectives of religious studies while taking a wide range of courses in other departments. Many of our students successfully and easily double major in other programs.

Undergraduate Scholarships

The department gives two scholarship awards to outstanding undergraduate majors: the Lambda Chi Alpha Loy T. Witherspoon Scholarship and the Underwood Scholarship. They are awarded each year to recipients whose academic performance demonstrates a serious commitment to the field of religious studies. The department also houses a chapter of Theta Alpha Kappa, the national honor society for students focusing on religious studies at the undergraduate and graduate levels.

Careers

Religious Studies majors are often asked, "What can you do with that?" While some graduates do go on to careers in ministry or social work, Religious Studies majors pursue a wide range of careers that demand strong writing, thinking, intercultural, and communication skills. Students can choose to go on to graduate school, law school, or other professional schools, or to careers in the non-profit sector, law, healthcare, public policy, education, and many other fields that value agile thinking and an understanding of diverse cultures.

Bachelor of Arts in Religious Studies

Admission Requirements

Freshmen

- See University Admission Requirements
- *Minimum GPA:* 2.0. Students with a GPA below 2.0 should consult with the Undergraduate Program Director.
- *Declaration of Major:* Online Change of Major form accepted year-round; appointment with the Undergraduate Program Director required prior to declaration for students already attending UNC Charlotte, freshmen who declare when applying, appointment at SOAR, or within first week of classes at UNC Charlotte

Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.0
- *Declaration of Major:* Transfer students declare when applying, appointment at SOAR, or within first week of classes at UNC Charlotte.
- *Transferable Credit Hours:* 24

Currently Enrolled Students

Online Change of Major form accepted year-round. Form found on the Religious Studies website.

Degree Requirements

A Major in Religious Studies leading to the B.A. degree requires 30 credit hours in RELS courses. At least five (5) courses, including RELS 4600, must be at the 3000-level or above.

Two 3-credit hour courses that are cross-listed with Religious Studies courses but taught in another department or program (e.g., History, Anthropology, Africana Studies, Women and Gender Studies, etc.) may count toward the Major in Religious Studies. These courses may have the designation of the cross-listed department. For these courses to be counted toward the Religious Studies major, students must request from

their advisor a "Request for Cross-Listed Courses in Another Department to Count Toward The Major in Religious Studies" form and submit it to their advisor who will include it in their advising file. The form must be submitted no later than October 1 for graduation in December; March 1 for graduation in May; and June 1 for graduation in summer.

One general education course (RELS 1502, RELS 1512, or CTCM) taught by a faculty member in Religious Studies also may count toward the Major in Religious Studies.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirement.

Major Courses (27 credit hours)

Academic Study of Religion Courses (9 credit hours)

Three courses to orient the student to the academic study of religion: RELS 1502; RELS 2600; and 1 RELS 4000 level course

RELS 1502 - Global Arts/Humanities: Other Worlds (3)

RELS 2600 - Orientation to the Study of Religion (3)

RELS 4xxx (3)

Note: RELS 2600 is a prerequisite for RELS 4600. Students are encouraged to take RELS 2600 as early as possible in their program; students typically take RELS 4600 during their final year.

Textual Analysis Courses (6 credit hours)

Courses designated as *Textual Analysis [TJ]** focus on reading texts closely and carefully, examine methods and histories of textual interpretation, and consider how religious groups and cultures have composed, transmitted, and been shaped by texts. Select from two of the following:

RELS 1120 - The Bible and Its Interpreters (3)

RELS 1201 - Introduction to Religion (3)

RELS 2000 - Topics in Religious Studies (1 to 3)

- RELS 2101 - Introduction to Western Religions (3)
- RELS 2102 - Introduction to Asian Religions (3)
- RELS 2104 - Hebrew Scriptures/Old Testament (3)
- RELS 2105 - Introduction to the New Testament (3)
- RELS 2110 - Judaism (3)
- RELS 2120 - Christianity (3)
- RELS 2131 - Islam (3)
- RELS 2154 - Hinduism (3)
- RELS 2157 - South Asian Buddhism (3)
- RELS 2166 - Daoism (3)
- RELS 2169 - Mahāyāna Buddhism in East Asia (3)
- RELS 3000 - Special Topics in Religious Studies (3)
- RELS 3001 - Special Topics in Religious Studies - Writing Intensive (3)
- RELS 3090 - Readings in Primary Texts (3)
- RELS 3104 - Prophecy and Prophetic Literature in Ancient Israel (3)
- RELS 3113 - Jesus (3)
- RELS 3115 - Early Christianity (3)
- RELS 3116 - Paul (3)
- RELS 3122 - Esoteric Traditions (3)
- RELS 3129 - Christian Controversies (3)
- RELS 3134 - Religion in the Contemporary United States (3)
- RELS 3210 - Religion and Popular Culture (3)
- RELS 3212 - Religion, Media, and Film (3)
- RELS 3215 - Religion and Sexuality (3)
- RELS 3220 - Religion and Gender (3)
- RELS 3230 - Race, Religion and Murder (3)
- RELS 3242 - Philosophy of Religion (3)
- RELS 3300 - Religion and Healing (3)
- RELS 3400 - Internships (3)
- RELS 3450 - Study Abroad for Religious Studies Majors (36)
- RELS 4000 - Advanced Topics in Religious Studies (3)
- RELS 4010 - Major Figure in Religious Studies (3)
- RELS 4040 - Major Approach to the Study of Religion (3)
- RELS 4107 - Early Judaism (3)
- RELS 4121 - Medieval and Reformation Christianity (3)
- RELS 4701 - Method and Theory in the Study of Religion (3)

Historical Analysis Courses (6 credit hours)

Courses designated as *Historical Analysis [H]** focus on a particular historical period or figure; consider a movement, idea, or institution across several historical periods; and examine questions of historiography more generally. Select from two of the following:

RELS 1120 - The Bible and Its Interpreters (3)

RELS 2101 - Introduction to Western Religions (3)

RELS 2104 - Hebrew Scriptures/Old Testament (3)

RELS 2105 - Introduction to the New Testament (3)

RELS 2107 - American Indian Lifeways (3)

RELS 2110 - Judaism (3)

RELS 2120 - Christianity (3)

RELS 2131 - Islam (3)

RELS 2154 - Hinduism (3)

RELS 2157 - South Asian Buddhism (3)

RELS 2166 - Daoism (3)

RELS 2169 - Mahāyāna Buddhism in East Asia (3)

RELS 2216 - The Modern Middle East (3)

RELS 3000 - Special Topics in Religious Studies (3)

RELS 3001 - Special Topics in Religious Studies - Writing Intensive (3)

RELS 3104 - Prophecy and Prophetic Literature in Ancient Israel (3)

RELS 3113 - Jesus (3)

- RELS 3115 - Early Christianity (3)
 RELS 3116 - Paul (3)
 RELS 3129 - Christian Controversies (3)
 RELS 3137 - Religion in the African American Experience (3)
 RELS 3150 - African American Church and Civil Rights (3)
 RELS 3232 - Islam in the African American Experience (3)
 RELS 3400 - Internships (3)
 RELS 3450 - Study Abroad for Religious Studies Majors (3 to 6)
 RELS 4000 - Advanced Topics in Religious Studies (3)
 RELS 4010 - Major Figure in Religious Studies (3)
 RELS 4107 - Early Judaism (3)
 RELS 4121 - Medieval and Reformation Christianity (3)

Cultural Analysis Courses (6 credit hours)

Courses designated as *Cultural Analysis [C]** focus on how religious discourses, practices, institutions, and communities interact with, influence, and are influenced by the larger culture of which they are a part. Select from two of the following:

- RELS 1201 - Introduction to Religion (3)
 RELS 2000 - Topics in Religious Studies (1 to 3)
 RELS 2102 - Introduction to Asian Religions (3)
 RELS 2107 - American Indian Lifeways (3)
 RELS 2108 - Religion in American Culture (3)
 RELS 2216 - The Modern Middle East (3)
 RELS 3000 - Special Topics in Religious Studies (3)
 RELS 3001 - Special Topics in Religious Studies - Writing Intensive (3)
 RELS 3122 - Esoteric Traditions (3)
 RELS 3134 - Religion in the Contemporary United States (3)
 RELS 3137 - Religion in the African American Experience (3)
 RELS 3150 - African American Church and Civil Rights (3)
 RELS 3210 - Religion and Popular Culture (3)
 RELS 3212 - Religion, Media, and Film (3)
 RELS 3215 - Religion and Sexuality (3)
 RELS 3220 - Religion and Gender (3)
 RELS 3230 - Race, Religion and Murder (3)
 RELS 3232 - Islam in the African American Experience (3)
 RELS 3242 - Philosophy of Religion (3)
 RELS 3300 - Religion and Healing (3)
 RELS 3400 - Internships (3)
 RELS 3450 - Study Abroad for Religious Studies Majors (3 to 6)
 RELS 4000 - Advanced Topics in Religious Studies (3)
 RELS 4040 - Major Approach to the Study of Religion (3)
 RELS 4701 - Method and Theory in the Study of Religion (3)

*Depending on how respective sections are taught, a course could fulfill the requirement for *Cultural Analysis [C]*, *Historical Analysis [H]*, or *Textual Analysis [T]*. Students **must** consult the course descriptions circulated each semester to determine which designations have been assigned to a particular course.

Restricted Elective Course (3 credit hours)

Select a RELS elective course in consultation with the academic advisor.
 RELS xxxx - Religious Studies Elective (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

A GPA of 2.0 is required for the major.

Minor in Religious Studies

A Minor in Religious Studies consists of a minimum of 15 credit hours.

Admission Requirements

Current UNC Charlotte Undergraduate Students
 See University Admission Requirements

New Transfer

See University Admission Requirements

Minor Requirements

Select any RELS courses that total 15 credit hours to complete the Minor in Religious Studies. At least two of the RELS courses must be at the 3000-level or above.

- RELS 1xxx-4xxx - Religious Studies Elective (3)
 RELS 1xxx-4xxx - Religious Studies Elective (3)
 RELS 1xxx-4xxx - Religious Studies Elective (3)
 RELS 3xxx-4xxx - Religious Studies Elective (3)
 RELS 3xxx-4xxx - Religious Studies Elective (3)

One general education course (RELS 1502, RELS 1512, or CTCM) taught by a faculty member in Religious Studies also may count toward the Major in Religious Studies.

Minor Total = 15 Credit Hours

Progression Requirements

A GPA of 2.0 is required for the minor.

Honors Program in Religious Studies

The Department of Religious Studies offers an Honors Program that allows students to deepen their consideration of approaches to the study of religion and to explore a well-articulated question in a written thesis. The thesis research must be presented orally to the faculty as a whole. Additionally, students must demonstrate, in writing, evidence of a concentration in their course of study, to the satisfaction of the Religious Studies Honors Undergraduate Studies Committee.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

New Transfer

See University Admission Requirements

Course Requirements

RELS 4790 - Honors Thesis Proposal and Candidacy (3)

RELS 4791 - Honors Thesis (3)

Progression Requirements

To be awarded honors in Religious Studies, candidates must:

- Write an honors thesis of A grade quality, as judged by their thesis director
- Complete RELS 4790 and RELS 4791 with grades of A
- Achieve a minimum GPA of 3.25 in RELS courses
- Achieve a minimum overall GPA of 3.0
- Complete all requirements of the B.A. in Religious Studies degree
- Complete the Application to Candidacy process for graduating with honors, as directed by the Honors College

The honors notation will appear on a student's official transcript.

Early Entry: Master of Arts in Religious Studies

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Acceptable scores on the appropriate graduate standardized test (e.g., GRE)
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

ROTC: Air Force/ Space Force Department of Aerospace Studies

afrtcs.unc.edu

Undergraduate Programs

- Minor in Aerospace Studies

The Air Force ROTC program is designed to be a four year program resulting in a commission into the United States Air Force or Space Force as a second lieutenant. With an approved education plan, the program can be completed in three years through concurrent enrollment in Freshman- and Sophomore-level courses (students should contact an Air Force ROTC advisor if they have less than four years remaining until graduation to determine the best plan for their situation).

Cadets spend the first two years in the General Military Course (GMC). During their final semester in the GMC, cadets compete nationally for an enrollment allocation into the Professional Officer Course (POC). If selected, cadets attend a 4-week field training encampment during the summer and enter the POC upon completion. Cadets must complete a minimum of two years in the POC.

All cadets are required to complete 16 credit hours of Aerospace Studies coursework along with eight semesters of leadership laboratory and attend two hours of physical training each week to earn a commission. The Minor in Aerospace Studies has the same requirements. Note: With the department chair's approval, 3 to 6 credit hours may be waived for prior service or time spent in JROTC.

For more information about program requirements, visit afrtcs.unc.edu. This website also includes contact information for students to reach an Air Force ROTC advisor to discuss their particular situation.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Minor in Aerospace Studies

All cadets are required to complete 16 credit hours of Aerospace Studies coursework, plus lab courses, for the award of the Minor in Aerospace Studies.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Progression Requirements

The cumulative GPA for all courses used toward the minor must be 2.0 or greater, with no course grade lower than a C.

General Military Courses (4 credit hours)

Total = 16 Credit Hours

ROTC: Army / Department of Military Science

arotc.charlotte.edu

Undergraduate Programs

- Minor in Military Science

The Department of Military Science is also known as the Army ROTC (Reserve Officers' Training Corps). Participation in Army ROTC enhances the education of both men and women by providing world class leadership training opportunities applicable in corporate, executive, and government leadership positions, along with practical hands-on expertise in these areas. Students participate in the Basic Course to develop leadership skills, then may be eligible to continue in the Advanced Course in order to pursue a commission as an officer in the United States Army, Army Reserves, or Army National Guard.

The Army ROTC program is designed to complement students' major area of study. Participants are also eligible to obtain a Minor in Military Science through the courses taken in the UNC Charlotte Army ROTC program. Students not interested in Active Duty can be guaranteed a commission in the Army Reserve or National Guard through the Guaranteed Reserve Forces Duty (GRFD) Program and eligible to participate in the Partnership for Youth Success (PaYS) Program. The PaYS Program guarantees an interview with partnering Fortune 500 companies.

The Basic Course and the Advanced Course comprise the Military Science curriculum.

Basic Course Curriculum

The Basic Course is usually taken during the first and second years, and covers such subjects as basic military techniques, management principles, national defense, military history, and leadership development. Enrollment in the Basic Course can begin in any term in the first and second years, and does not require prior JROTC experience. No military commitment is incurred for participation in the Basic Course. After completing the Basic Course, students who have demonstrated the potential to become officers and who have met the physical and scholastic standards for commissioning are eligible to enroll in the Advanced Course. Students pursuing a military commission receive Basic Course credit by completing MSCI 1000- and 2000-level courses and

leadership labs; attending the Cadet Initial Entry Training (CIET) at Fort Knox, Kentucky, during the summer between a student's Sophomore and Junior years; or by completing Basic Combat Training (BCT).

Two-Year Commissioning Program

The Two-Year Commissioning Program is designed for upcoming Juniors who did not take ROTC during the first two years of college and want to pursue a military commission. To enter the two-year program, students must attend a fully-paid, four-week, Cadet Initial Entry Training (CIET) at Fort Knox, Kentucky, during the summer between their Sophomore and Junior years. After successfully completing the CIET, students who meet scholastic requirements may enroll in the Advanced Course. Students who complete Basic Combat Training (BCT) may also be eligible to enroll in the Advanced Course, with approval from the Department Chair.

Advanced Course Curriculum

The Advanced Course is taken during a student's last four semesters. It includes instruction in organization and management, principles of training management, tactics, ethics and professionalism, further leadership development, and physical fitness training. During the summer between their Junior and Senior years, Advanced Course students pursuing a military commission will attend a fully-paid, four-week Cadet Leader Course at Fort Knox, Kentucky. This course gives students the chance to put into practice the leadership theories and principles, and military skills learned in the classroom, and introduces them to how the Army functions in a field environment. Advanced Course students must complete MSCI 3000- and 4000-level courses, leadership labs, and one 3-credit hour approved American military history class. The MSCI 3000-level courses must be taken in sequence. Students not pursuing a military commission would receive the same credited class and lab hours but would not participate in the following: physical fitness program, field training exercises, the Cadet Leader Course, or other incentive programs. Completion of the Advanced Course results in a Minor in Military Science.

Minor in Military Science

The Minor in Military Science is open to all UNC Charlotte students, regardless if they are willing to contract with the United States Army. A Minor in Military Science provides expertise in leadership, ethics, professionalism, briefing techniques, national security issues, American history, team-building, and military law, as well as written and oral communication skills. Experience gained through this minor would be an advantage to any student interested in future government employment. Applications to request this minor must be processed by the Department of Military Science.

The minor provides students with an opportunity to study leadership in a contemporary operational environment with a focus on military involvement in political decisions, while also recognizing that the academic study of Military Science is intrinsically linked to political and international relations with focus on particular aspects of leadership. In

addition to taking courses in Military Science, students participating in this minor would select a course pertaining to military history-related topics that impact the social, economic, and political environment.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

New Transfer

See University Admission Requirements

Minor Requirements

A Minor in Military Science consists of a minimum of 19 credit hours, including 16 credit hours at the 3000-level and above within the department and one American military history-related course.

Required Core Courses (16 credit hours)

- MSCI 3101 - Adaptive Team Leadership (3)
- MSCI 3101L - Adaptive Team Leadership Lab (1)
- MSCI 3102 - Applied Team Leadership (3)
- MSCI 3102L - Applied Team Leadership Lab (1)
- MSCI 4101 - Developing Adaptive Leaders (3)
- MSCI 4101L - Developing Adaptive Leaders (1)
- MSCI 4102 - Leadership in a Complex World (3)
- MSCI 4102L - Leadership in a Complex World Lab (1)

Elective American Military History-Related Courses (3 credit hours)*

Select one of the following:

- HIST 2120 - American Military History (3)
- HIST 2284 - World War II: The European Theatre (3)
- HIST 2285 - World War II: The Pacific Theatre (3)
- HIST 3141 - World War I (3)
- HIST 3202 - American Revolution, 1750-1815 (3)
- HIST 3211 - Civil War and Reconstruction, 1860-1877 (3)
- MSCI 3000 - Evolution of American Warfare (3)

**Other courses that do not appear on this list may be approved by the department chair if they pertain to military history.*

Minor Total = 19 Credit Hours

Progression Requirements

The cumulative GPA for all courses used toward the minor must be 2.0 or greater, with no individual course grade lower than a C.

Scholarship Program

On-campus 2-, 2 ½-, 3-, 3 ½-, and 4- year scholarships are available and awarded on a competitive basis, providing either full tuition and mandatory fees or room and board. Scholarships also provide \$600 per semester for books and supplies, and a tax-free tiered stipend of \$420 per academic month, based on academic year. Four-year scholarships are available online at www.goarmy.com/rotc to students who apply while a Junior or Senior in high school. Four-year applicants do not have to be enrolled in high school JROTC to apply and incur no military obligation by applying. The application period starts on June 1 and ends on January 10 of a student's high school senior year. Guaranteed Reserve Forces Duty Scholarships are also available to students that are currently serving in the Army National Guard or Army Reserves and desire no active duty

commitment. All scholarships are based on merit, not financial need. Priority goes to STEM (Science, Technology, Engineering, and Mathematics) majors. All scholarship incentives are subject to change due to legislation and funding.

Department of Sociology

sociology.charlotte.edu

Undergraduate Programs

- **B.A. in Sociology**
 - Medical Sociology
 - Organizations, Occupations, and Work
 - Social Problems and Policy
 - Sociological Social Psychology
 - Honors Program
- **Minor in Sociology**
- **Early Entry: M.A. in Sociology**

Sociology is the scientific study of human social life. It focuses upon the forces that organize and structure societies and smaller groups, as well as the forces that disorganize and threaten to dissolve them. As a science, sociology applies an objective and systematic method of investigation to identify the patterns and forms of social life and to understand the processes by which they are established and changed.

The study of sociology is attractive to students seeking a liberal education and immediate employment, as well as to those preparing for further study and professional careers. As a liberal arts program, it enables students to understand the social contexts in which they find themselves and the social forces that shape personality, actions, and interactions with others. As a pre-professional program it provides an excellent background for people entering social work, law, teaching, the ministry, journalism, planning, public relations and personnel services. It also provides analytical skills related to market research and program evaluation in human services, sales, management, and other business activities.

The Department of Sociology offers an academic major leading to a Bachelor of Arts degree, as well as opportunities to pursue concentrations in Medical Sociology; Organizations, Occupations, and Work; Social Problems and Policy; and Sociological Social Psychology. There is also a departmental honors program for undergraduate students. On the graduate level, the department offers the M.A. degree in Sociology. For details, see the *Graduate Catalog*.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Arts in Sociology

Students may complete the general B.A. in Sociology degree program or, if desired, complete a concentration in one of four substantive areas as part of the B.A. in Sociology degree. The concentration is optional. The concentration requires a total of 4 courses, in which one is a required course for the specific concentration and the other three courses are selected from an approved list of electives for the specific concentration. These courses will not add to the total number of hours required for the

major, but will count toward the elective hours already required for the major.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- Minimum GPA: 2.0
- Transferable Credit Hours: 24

Currently Enrolled Students

- *Declaration of Major:* Change of Major form accepted year-round. See the Sociology Department website for more information.

Degree Requirements

A Major in Sociology leading to the B.A. degree consists of a minimum of 32 credit hours of sociology courses with a minimum of 120 total credit hours, and completion of General Education requirements. All Sociological Theory Core courses, Sociological Research Methods, Quantitative Analysis, and Senior Seminar courses are restricted to majors and minors only. Some double majors may only have 31 credit hours of approved sociology courses with substitution of Research Methods courses: Psychology, Criminal Justice, and Political Science.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

The Sociology Department offers the SOCY 1501 (Global Theme-Sociological Approaches to Global Issues) and SOCY 1511 (Local Theme-Sociological Approaches to Local Issues) general education courses. These are open to all students within and outside the department.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirement.

Foundation Course (3 credit hours)

SOCY 1101 - Introduction to Sociology (3)

Sociological Theory Course (3 credit hours)

Select one of the following:

SOCY 3153 - Sociological Theory (3)

SOCY 4153 - Contemporary Sociological Theory (3)

Sociological Research Core Courses (8 credit hours)

SOCY 3155 - Sociological Research Methods (4)

SOCY 4156 - Quantitative Analysis (4)

SOCY 4156L - Quantitative Analysis Lab (0)

Restricted Elective Courses (15 credit hours)

9 of the 15 credit hours must be SOCY courses at the 3000 level or above. No more than 6 credit hours of sociology electives at the 2000 level will be calculated in the completion of the major.

SOCY 2xxx-4xxx - Sociology Elective (3)

SOCY 2xxx-4xxx - Sociology Elective (3)

SOCY 3xxx-4xxx - Sociology Elective (3)

SOCY 3xxx-4xxx - Sociology Elective (3)
SOCY 3xxx-4xxx - Sociology Elective (3)

Senior Seminar (3 credit hours)

All Sociology majors, except for those students enrolled as Sociology Honors students, must complete a Senior Seminar course. Sociology Honors students are exempt from this requirement pending successful completion of SOCY 3799.

SOCY 4699 - Senior Seminar in Sociology (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation. Students in the Sociology major are strongly encouraged to pursue a minor or a second major, which will broaden their skillset and complement coursework in Sociology.

Degree Total = 120 Credit Hours

Progression Requirements

All Major Courses above must be completed with a grade of C or above. Majors are allowed a maximum of three attempts, which include any grade of D, F, or W, of any of the courses to fulfill their major requirements.

Bachelor of Arts in Sociology with Concentration in Medical Sociology

Students may complete the general B.A. in Sociology degree program or, if desired, complete a concentration in one of four substantive areas as part of the B.A. in Sociology degree. The concentration is optional. The concentration requires a total of 4 courses, in which one is a required course for the specific concentration and the other three courses are selected from an approved list of electives for the specific concentration. These courses will not add to the total number of hours required for the major, but will count toward the elective hours already required for the major.

All Sociological Theory Core courses, Sociological Research Methods, Quantitative Analysis, and Senior Seminar courses

are restricted to majors and minors only. Some double majors may only have 31 credit hours of approved sociology courses with substitution of Research Methods courses: Psychology, Criminal Justice, and Political Science.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

The Sociology Department offers the SOCY 1501 (Global Theme-Sociological Approaches to Global Issues) and SOCY 1511 (Local Theme-Sociological Approaches to Local Issues) general education courses. These are open to all students within and outside the department.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirement.

Foundation Course (3 credit hours)

SOCY 1101 - Introduction to Sociology (3)

Sociological Theory Course (3 credit hours)

Select one of the following:

SOCY 3153 - Sociological Theory (3)

SOCY 4153 - Contemporary Sociological Theory (3)

Sociological Research Core Courses (8 credit hours)

SOCY 3155 - Sociological Research Methods (4)

SOCY 4156 - Quantitative Analysis (4)

SOCY 4156L - Quantitative Analysis Lab (0)

Concentration Courses (12 credit hours)

Note: 9 out of 15 credit hours from the Restricted Elective Courses (3 credit hours) below and Concentration Courses (12 credit hours) combined must be SOCY courses at the 3000 level or above. No more than 6 credit hours of sociology elective and concentration courses at the 2000 level will be calculated in the completion of the major and concentration.

Required Concentration Course (3 credit hours)

SOCY 2171 - Social Problems (3)

Elective Concentration Courses (9 credit hours)

Select 3 of the following:

SOCY 2100 - Aging and the Lifecourse (3) (SL)

SOCY 2169 - Sociology of Health and Illness (3)

SOCY 3110 - American Minority Groups (3)

SOCY 3143 - Social Movements (3)

SOCY 3173 - Criminology (3)

SOCY 3250 - Political Sociology (3)

SOCY 4111 - Social Inequality (3)

SOCY 4112 - Sociology of Work (3)

SOCY 4122 - Immigration Policy (3)

SOCY 4125 - Urban Sociology (3)

SOCY 4135 - Sociology of Education (3)

SOCY 4168 - Sociology of Mental Health and Illness (3)

SOCY 4172 - Sociology of Deviant Behavior (3)

SOCY 4480 - Internship in Sociology (3 to 6)
Other SOCY courses with advisor approval

Restricted Elective Course (3 credit hours)

Select one of the following:

SOCY 2xxx-4xxx - Sociology Elective (3)

Senior Seminar (3 credit hours)

All Sociology majors, except for those students enrolled as Sociology Honors students, must complete a Senior Seminar course. Sociology Honors students are exempt from this requirement pending successful completion of SOCY 3799.

SOCY 4699 - Senior Seminar in Sociology (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation. Students in the Sociology major are strongly encouraged to pursue a minor or a second major, which will broaden their skillset and complement coursework in Sociology.

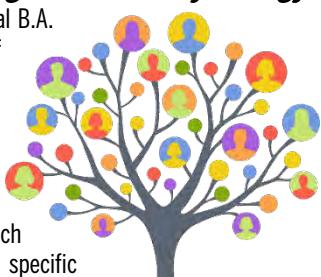

Degree Total = 120 Credit Hours

Progression Requirements

All Major Courses and the required Concentration Course above must be completed with a grade of C or above. Majors are allowed a maximum of three attempts, which include any grade of D, F, or W, of any of the courses to fulfill their major requirements.

Bachelor of Arts in Sociology with Concentration in Sociological Social Psychology

Students may complete the general B.A. in Sociology degree program or, if desired, complete a concentration in one of four substantive areas as part of the B.A. in Sociology degree. The concentration is optional. The concentration requires a total of 4 courses, in which one is a required course for the specific concentration and the other three courses are selected from an approved list of electives for the specific concentration. These courses will not add to the total number of hours required for the major, but will count toward the elective hours already required for the major.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- Minimum GPA: 2.0
- Transferable Credit Hours: 24

Currently Enrolled Students

- Declaration of Major: Change of Major form accepted year-round. See the Sociology Department website for more information.

Degree Requirements

A Major in Sociology leading to the B.A. degree consists of a minimum of 32 credit hours of sociology courses with a minimum of 120 total credit hours, completion of general education requirements, and a minor or double major. All Sociological Theory Core courses, Sociological Research Methods, Quantitative Analysis, and Senior Seminar courses are restricted to majors and minors only. Some double majors may only have 31 credit hours of approved sociology courses with substitution of Research Methods courses: Psychology, Criminal Justice, and Political Science.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

The Sociology Department offers the SOCY 1501 (Global Theme-Sociological Approaches to Global Issues) and SOCY 1511 (Local Theme-Sociological Approaches to Local Issues) general education courses. These are open to all students within and outside the department.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirement.

Foundation Course (3 credit hours)

SOCY 1101 - Introduction to Sociology (3)

Sociological Theory Course (3 credit hours)

Select one of the following:

SOCY 3153 - Sociological Theory (3)

SOCY 4153 - Contemporary Sociological Theory (3)

Sociological Research Core Courses (8 credit hours)

SOCY 3155 - Sociological Research Methods (4)

SOCY 4156 - Quantitative Analysis (4)

SOCY 4156L - Quantitative Analysis Lab (0)

Concentration Courses (12 credit hours)

Note: 9 out of 15 credit hours from the Restricted Elective Courses (3 credit hours) below and Concentration Courses (12 credit hours) combined must be SOCY courses at the 3000 level or above. No more than 6 credit hours of sociology elective and concentration courses at the 2000 level will be calculated in the completion of the major and concentration.

Required Concentration Course (3 credit hours)

SOCY 2161 - Sociological Social Psychology (3)

Elective Concentration Courses (9 credit hours)

Select 3 of the following:

SOCY 2112 - Popular Culture (3)

SOCY 3261 - Human Sexuality (3)

SOCY 3267 - Sociology of Dying, Death, and Bereavement (3)

SOCY 4172 - Sociology of Deviant Behavior (3)

SOCY 4263 - Group Processes (3)

SOCY 4265 - Social Psychology of Law (3)

Other SOCY courses with advisor approval

Restricted Elective Course (3 credit hours)

Select one of the following:

SOCY 2xxx-4xxx - Sociology Elective (3)

Senior Seminar (3 credit hours)

All Sociology majors, except for those students enrolled as Sociology Honors students, must complete a Senior Seminar course. Sociology Honors students are exempt from this requirement pending successful completion of SOCY 3799.

SOCY 4699 - Senior Seminar in Sociology (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation. Students in the Sociology major are strongly encouraged to pursue a minor or a second major, which will broaden their skillset and complement coursework in Sociology.

Degree Total = 120 Credit Hours

Progression Requirements

All Major Courses and the required Concentration Course above must be completed with a grade of C or above. Majors are allowed a maximum of three attempts, which include any grade of D, F, or W, of any of the courses to fulfill their major requirements. A GPA of 2.5 must be earned in the concentration.

Minor in Sociology

The Minor in Sociology requires the completion of 18 credit hours in sociology. The Department of Sociology will accept no more than 9 credit hours of courses counted toward another major or minor to also fulfill requirements for the Minor in Sociology.

Admission Requirements

Current UNC Charlotte Undergraduate Students

SOCY 3xxx-4xxx - Sociology Elective (3)

SOCY 3xxx-4xxx - Sociology Elective (3)

Minor Total = 18 Credit Hours

Progression Requirements

All courses above must be passed with a grade of C or above. Students are allowed a maximum of three attempts, which include any grade of D, F, or W of any of the courses taken to fulfill their minor requirements.

Honors Program in Sociology

The B.A. in Sociology with Honors is the highest accolade UNC Charlotte Sociology undergraduates can receive. The Honors Program aims to identify, encourage, nurture, and recognize students with exceptional analytical, creative, and communicative skills. The program stresses guided, but self-directed, independent study and each Honors student is assisted and evaluated by a faculty committee. The Sociology Honors program is great preparation for post baccalaureate/graduate training, and a stellar addition to a student's resume. This distinction attests to a candidate's exemplary grade point average in their major, the completion of honors coursework, as well as the successful defense of a substantial undergraduate thesis. Following successful completion, the honors notation will appear on a student's official transcript. For further information, interested students should consult with the Department Chair or Undergraduate Coordinator.

Admission Requirements

Current UNC Charlotte Undergraduate Students

Admission to the Honors Program may be initiated by the student or by any faculty member of the Department of Sociology on behalf of the student. Minimum eligibility criteria include:

- See University Admission Requirements
- An overall GPA of 3.2 or above; this standard must be maintained throughout the period of participation in the Honors Program
- A GPA of 3.5 or above in all Sociology courses; this standard must be maintained throughout the period of participation in the Honors Program
- Completion of at least 30, but not more than 90, credit hours at the time participation in the Honors Program begins (determined by the start date of the student's first Honors Program regularly scheduled course or independent study)
- Completion and submission of the Honors Program application form to the Undergraduate Coordinator

Progression Requirements

Successful Honors Program candidates will complete at least 9 credit hours of Honors coursework (which count toward the 120 credit hours required for graduation). Specific requirements are:

- Complete at least one Honors course (3 credit hours), in addition to SOCY 3798 and SOCY 3799 (described below)
- Courses may be SOCY Honors courses or HONR courses that are open to departmental honors students
- Students must take SOCY 3798 (Preliminary Honors Research) to conduct preliminary research and writing
 - Students must submit a comprehensive report of their progress in the preliminary research and must take SOCY 3799 the following semester to complete and defend their thesis
- Complete SOCY 3799 (Honors Thesis) based on a proposal approved by the student's Honors Committee; the thesis must meet the following criteria:
 - An original research project examining a sociological issue
 - Include both secondary and primary research
 - Follow traditional scholarly research structure with chapters appropriate to the research method and context

- At least 25 and not more than 75 pages; double-spaced, 12-point font, 1-inch margins
- Compliant with an appropriate scholarly writing style
- Orally defended
- In accordance with the policies of the Honors College, A is the required grade for the Honors Thesis Research Course
- Student grades in Honors coursework must be 3.5 or above.
- Complete the Application to Candidacy process for graduating with honors, as directed by the Honors College

Students in the Honors Program are not required to complete the Senior Seminar in Sociology (SOCY 4699).

Early Entry: Master of Arts in Sociology

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree. The Early Entry Program for the M.A. in Sociology leads to completion of all requirements for the B.A. and M.A. degrees in only five academic years and one or two summers. In this program, students complete requirements for the B.A. degree and begin graduate coursework and research for the M.A. degree in their Senior, or fourth, year.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Minimum 3.5 GPA in SOCY courses
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Department of Sociology and approved by the Graduate School

Note: Standardized test scores (e.g., GRE, GMAT, MAT) are optional, but not required.

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA to remain in the program; minimum 3.0 Junior/Senior GPA at the end of the B.A. degree
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 6 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 6 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Department of Writing, Rhetoric, and Digital Studies

writing.charlotte.edu

Undergraduate Programs

- **B.A. in Writing, Rhetoric, and Digital Studies**
- **Minor in Writing, Rhetoric, and Digital Studies**

Using print and digital technologies to create, design, and produce texts now requires new ways of thinking about writing as a concept and practice. The Department of Writing, Rhetoric, and Digital Studies teaches 21st century strategies for reading, analyzing, and composing in multiple media and contexts. By building their critical thinking, audience awareness, design and problem-solving abilities, students learn to communicate effectively across academic disciplines, workplaces, and in public spheres. By learning to evaluate the implications of print, digital, and social media compositions in both local and global contexts, students are prepared to navigate known, new, and emerging writing situations and media. Students have opportunities to engage in real-world research, tutor in the Writing Resources Center, and work with faculty on problems where communication matters.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Degrees and Programs

The Department of Writing, Rhetoric, and Digital Studies offers a minor and major, both of which serve students who want jobs that demand expertise and flexibility in digital communication; in moving texts from print to online and visual forms; in understanding data-driven analyses; in the design of multimodal as well as digital-born texts; in universal design that provides access; in global, rhetorical competency. These abilities consistently top the list of job sector demands across the board. With such a major, students have been hired by tech companies, website and social media developers, community service organizations, banking, customer service, historical societies, Human Resources, food and restaurant businesses, advertising, marketing museums and arts organizations, educational organizations: any job that requires communicating with targeted audiences through a variety of media are well-served by a writing major. The B.A. in Writing, Rhetoric, and Digital Studies also serves as qualification for graduate school degrees in interdisciplinary areas, computing, law, and others that require complex analysis, composing and informational literacy skills.

The department includes the First-Year Writing Program, the foundational course in Writing Studies and part of the University's General Education requirement. Students write extensively as they engage in critical reading and research to develop an extended inquiry project that integrates materials from varied sources; write in multiple genres for various purposes and audiences; revise, edit and reflect on their writing with the support of the teacher and peers; adopt digital

technologies to network, compose, and/or critique and disseminate their work. Grades are derived primarily from portfolios comprised of work generated throughout the term.

Students engage in directed self-placement to select the introductory course for which they are best prepared:

WRDS 1103 - Writing and Inquiry in Academic Contexts I and II (3)

WRDS 1104 - Writing and Inquiry in Academic Contexts I and II with Studio (4)

The Writing Resources Center (WRC) provides one-on-one and group consultations on writing projects to students in all disciplines, whether a first-year or graduate-level student, as well as to faculty and staff. Students can bring in any writing task—assignments, personal statements, applications, research, digital compositions—for assistance in an active, collaborative learning environment. Consultations are held through face-to-face meetings, asynchronous e-tutoring, or synchronous web conferencing formats.

Staffed by trained undergraduate and graduate students from a variety of disciplines, the WRC offers not only writing assistance to others, but also teaching experience and leadership opportunities to tutors as they develop their own writing abilities and interpersonal skills. All tutors participate in ongoing professional development in theory, research, and practice of writing and tutoring pedagogy.

The WRC staff also give presentations and host workshops across the University on topics such as avoiding plagiarism, documenting sources, peer response, and revision strategies.

To learn more, visit wrc.charlotte.edu, and to schedule an appointment, visit uncc.myconline.com.

Bachelor of Arts in Writing, Rhetoric, and Digital Studies

Using print and digital technologies to create, design, and produce texts now requires new ways of thinking about writing as a concept and practice. As an interdisciplinary examination and application of rhetoric and writing technologies, the Major in Writing, Rhetoric, and Digital Studies prepares students to read, analyze, and compose across academic, workplace, and public spheres. Interactive courses improve reading, critical thinking, argumentation, narrative, and problem-solving abilities as students evaluate the implications of print, digital, and social

media compositions in both local and global contexts. With these skills, students can navigate known, new, and emerging writing situations and media; they learn how to be flexible composers who can apply rhetorical strategies and digital skills to their current environments, as well as adapt emerging technologies to new contexts.

Admission Requirements

- See University Admission Requirements
- Minimum GPA: 2.0
- Transferable Credit Hours: 24

Currently Enrolled Students

- *Declaration of Major:* Change of Major forms accepted year-round. Students must make an advising appointment during SOAR and when declaring the major.

Degree Requirements

The program leading to the Bachelor of Arts degree in Writing, Rhetoric, and Digital Studies requires 120 credit hours. Students in the major must complete a minimum of 36 credit hours in Writing, Rhetoric, and Digital Studies (WRDS) courses, including 12 credit hours at the 4000-level.

General Education (28-37 credit hours)

For details on required General Education courses, refer to the General Education Program.

Foreign Language Course (0-8 credit hours)

For details on required courses, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirement.

Foundation Course (3-4 credit hours)

Select one of the following:

- WRDS 1103 - Writing and Inquiry in Academic Contexts I and II (3)
WRDS 1104 - Writing and Inquiry in Academic Contexts I and II with Studio (4)

Major Courses (36 credit hours)

Majors must complete at least 36 credit hours in Writing, Rhetoric, and Digital Studies, including 12 credit hours at the 4000-level. The Major Courses are designed to provide a thorough understanding of fundamental Writing, Rhetoric, and Digital Studies principles and are structured into four categories:

Core Courses (9 credit hours)

- WRDS 3220 - Current Theories and Applications of Writing (3)
WRDS 3211 - Online Writing: Ethics, Appropriation, and Social Media (3)
or WRDS 3215 - Information Literacy and Digital Composing (3)
WRDS 4400 - Writing, Rhetoric, and Digital Studies Internship Practicum (3)
or WRDS 4900 - Senior Research Capstone (3)

Application of Writing and Rhetoric in Print and Digital Environments Courses (9 credit hours)

Select three of the following:

- WRDS 2101 - Advanced Writing: Research and Critical Analysis (3)
WRDS 3102 - The Effective Sentence: A Writing Course for All Majors (3)
WRDS 3140 - Arguing With Images (3)
WRDS 4011 - Topics in Writing Technologies (3)
WRDS 4210 - Contemporary Rhetorical Theory (3)

- ENGL 3180 - Language and Digital Technology (3)
ENGL 4168 - Multimodality and Text Description (3)
ENGL 4181 - Writing and Designing User Documents (3)
ENGL 4182 - Information Design and Digital Publishing (3)
ENGL 4183 - Editing with Digital Technologies (3)

Community and Culture Courses (9 credit hours)

Select three of the following:

- WRDS 4021 - Topics in Writing and Reading (3)
WRDS 4201 - Composing Across Borders: Transnational Digital Composition (3)
WRDS 4225 - Writing Research Methods (3)
WRDS 4330 - Reading, Writing, and Archiving: Charlotte (3)
COMM 3050 - Topics in Communication Studies (1 to 3) (Topics: Gender/Culture and Communication)
COMM 3110 - Gender and Communication (3)
COMM 3126 - Globalization and Digital Media (3)

Major Elective Courses (9 credit hours)

Select three of the following:

- WRDS 3xxx - Writing, Rhetoric, and Digital Studies Elective (3)
(excluding courses already applied toward the major)
WRDS 4xxx - Writing, Rhetoric, and Digital Studies Elective (3)
(excluding courses already applied toward the major)
COMM 3050 - Topics in Communication Studies (1 to 3)
COMM 3110 - Gender and Communication (3)
COMM 3125 - New Media for Communications (3)
COMM 3126 - Globalization and Digital Media (3)
ENGL 3162 - Language and the Virtual World (3)
ENGL 3180 - Language and Digital Technology (3)
ENGL 4168 - Multimodality and Text Description (3)
ENGL 4181 - Writing and Designing User Documents (3)
ENGL 4182 - Information Design and Digital Publishing (3)
ENGL 4183 - Editing with Digital Technologies (3)
ITIS 3130 - Human-Centered Design (3)
ITIS 3200 - Introduction to Information Security and Privacy (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Students must earn a grade of C or above in all required courses.

Internship

Majors have the option to complete an internship as part of their degree requirements, and should see a Writing, Rhetoric, and Digital Studies advisor for details.

Minor in Writing, Rhetoric, and Digital Studies

Using print and digital technologies to create, design, and produce texts now requires new ways of thinking about writing as a concept and practice. As an interdisciplinary examination and application of rhetoric and writing technologies, the Minor in Writing, Rhetoric, and Digital Studies prepares students to read, analyze, and compose.

These skills serve across academic, workplace, and public spheres. The interactive courses are designed to improve reading, critical thinking, argumentation, narrative, and problem-solving abilities. Students

learn to evaluate the implications of print, digital, and social media compositions in both local and global contexts. As a result, students are able to navigate known, new, and emerging writing situations and media. Students learn how to be flexible composers who can apply rhetorical strategies and digital skills to their current environments, as well as adapt emerging technologies to new contexts.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Students matriculated at UNC Charlotte and planning to declare Writing, Rhetoric, and Digital Studies as their minor must have an overall GPA of at least 2.0.

Minor Requirements

Required Courses (9 credit hours)

- WRDS 2101 - Advanced Writing: Research and Critical Analysis (3)
or WRDS 3102 - The Effective Sentence: A Writing Course for All Majors (3)
- WRDS 3211 - Online Writing: Ethics, Appropriation, and Social Media (3)
or WRDS 3215 - Information Literacy and Digital Composing (3)
- WRDS 4201 - Composing Across Borders: Transnational Digital Composition (3)

Elective Courses (9 credit hours)

Select three of the following not already taken in the Required Courses section above:

- WRDS 3102 - The Effective Sentence: A Writing Course for All Majors (3)
WRDS 3140 - Arguing With Images (3)
WRDS 3211 - Online Writing: Ethics, Appropriation, and Social Media (3)
WRDS 3215 - Information Literacy and Digital Composing (3)
WRDS 3220 - Current Theories and Applications of Writing (3)
WRDS 4011 - Topics in Writing Technologies (3)
WRDS 4021 - Topics in Writing and Reading (3)
WRDS 4210 - Contemporary Rhetorical Theory (3)
WRDS 4330 - Reading, Writing, and Archiving: Charlotte (3)
COMM 3050 - Topics in Communication Studies (1 to 3) (Topic:
Gender/Culture in Communication)
COMM 3110 - Gender and Communication (3)

- COMM 3125 - New Media for Communications (3)
COMM 3126 - Globalization and Digital Media (3)
ENGL 3162 - Language and the Virtual World (3)
ENGL 3180 - Language and Digital Technology (3)
ENGL 4168 - Multimodality and Text Description (3)
ENGL 4181 - Writing and Designing User Documents (3)
ENGL 4182 - Information Design and Digital Publishing (3)
ENGL 4183 - Editing with Digital Technologies (3)

Minor Total = 18 Credit Hours

Progression Requirements

An overall GPA of 2.0 in all coursework within the minor is required.

The Klein *College of* Science

The Klein College of Science

science.charlotte.edu

The Klein College of Science (KCOS) was established in 2023, with Founding Dean Bernadette Donovan-Merkert, as part of a strategic reorganization to enhance the focus on scientific disciplines at UNC Charlotte. It is a community of faculty, staff, and students who are shaping the future through science. Science is at the heart of everything we do, including innovative research, inclusive teaching and mentoring, engagement with both local and global communities, leadership in professional organizations, entrepreneurship, and developing the leaders of tomorrow.

The college encompasses the departments of Biological Sciences, Chemistry, Mathematics and Statistics, and Physics and Optical Science, as well as the Botanical Gardens and McMillan Greenhouse. The college is committed to fostering a collaborative community that supports student success in science and mathematics, even for those whose majors lie outside these fields. The Klein College of Science is home to more than 2,000 undergraduate and graduate majors and also plays a crucial role in providing general education requirements for all UNC Charlotte students with specialized science and mathematics training.

Although faculty within the College are committed to departmentally based programs, increased emphasis is being placed on providing strong interdisciplinary programs. The College also strives to promote intercultural understanding through student exchanges and travel opportunities.

Departments

The Klein College of Science consists of these departments/offices:

- | | |
|---|--|
| <ul style="list-style-type: none">• Department of Biological Sciences• Department of Chemistry | <ul style="list-style-type: none">• Department of Mathematics and Statistics• Department of Physics and Optical Science |

- Bachelor of Science in Mathematics
- Bachelor of Arts in Mathematics for Business
- Bachelor of Science in Mathematics for Business
- Bachelor of Arts in Physics
- Bachelor of Science in Physics

Minors

- Actuarial Mathematics
- Biology
- Biotechnology
- Chemistry
- Mathematics
- Physics
- Statistics

Undergraduate Certificates

- Actuarial Studies
- Innovative Thinking and Problem Solving

Degree Requirements

General Education Requirements

Since all students entering the University must meet the same General Education requirements regardless of major, it is appropriate to concentrate on the completion of those requirements before committing to a specific major. Undeclared students have time to enroll in courses in several disciplines, which allows them to make a more informed judgment about future career decisions. Academic advisors have a broad working experience with the requirements for majors and offer assistance as students search for the education choice best suited to their individual needs.

Degree Programs/Majors and Minors Requirements

Students in the Klein College of Science must satisfy the requirements for the degree program(s) in which they are enrolled. Students should consult with their chosen department to make certain they fully understand all degree requirements. Many students also pursue a second degree or even a minor(s) in

conjunction with their major degree program. Students should be familiar with the requirements of any minor program of study they attempt to complete.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Foreign Language Requirement

All students who earn a degree within the Klein College of Science are required to demonstrate proficiency in the language of their choice through the 1202 level. Proficiency can be demonstrated in one of the following ways:

- Completing the required coursework at UNC Charlotte
- Completing three years of the same foreign language in high school through level three
- Achieving a satisfactory score on the foreign languages placement test (in Spanish, French, or German)
- Through approved transfer or transient credit earned at a college or university accredited by an accepted accrediting body
- A combination of the above methods (e.g., placing out of or earning transfer or transient credit for 1201 and completing the 1202 course, completing 1201 and placing out of or earning transfer or transient credit for 1202)

NOTE: By transferring in with an A.A., A.S. or A.F.A. degree, the requirement is waived.

The following courses meet the Klein College of Science's foreign language requirement. *Please note that the courses below also have prerequisites that students must meet prior to enrolling in the courses.*

ARBC 1202 - Elementary Arabic II (3)

CHNS 1202 - Elementary Chinese II (3)

FREN 1202 - Elementary French II (3)

GERM 1202 - Elementary German II (3)

ITLN 1202 - Elementary Italian II (3)

JAPN 1202 - Elementary Japanese II (3)

RUSS 1202 - Elementary Russian II (3)

SPAN 1202 - Elementary Spanish II (4)

If students wish to fulfill their requirement with a language not taught at UNC Charlotte they must follow the guidelines for Certification of Proficiency by contacting the Department of Languages, Cultures and Translation.

This requirement applies to all students entering any degree program within the Klein College of Science except those students whose primary major is in the College of Engineering and are enrolled in one of the Dual Degree Programs with Physics.

Advising

The Klein College of Science offers academic advising for students who have enrolled in a major or pre-major within the college. Professional advisors are available to provide guidance on both major and/or pre-major requirements, as well as General Education requirements. Faculty mentors are available to provide guidance on a variety of other areas including undergraduate research and post-graduation preparation and planning.

The professional advising team is dedicated to establishing relationships with all KCOS majors and pre-majors to help them achieve their academic, personal, and professional goals. The advisors are also dedicated to connecting students to enrichment opportunities within the departments as well as across campus and beyond.

Experiential Learning and Service Opportunities

The college aims to inspire innovative thinking in undergraduate students and contribute to the development of creative problem solvers, innovative leaders, and engaged citizens through an initiative called LEADS. Students are also encouraged to participate in undergraduate research and/or professional work experiences in support of their academic and career development through cooperative education, departmental undergraduate research, community-engaged research and service, and internship programs offered to them. The partnership with the University Career Center expands experiential learning offerings so more students graduate with career-related experience. The Office of Undergraduate Research provides support to assist students with finding undergraduate research opportunities both on and off campus as well as provides professional development sessions on a variety of areas related to research.

leads.charlotte.edu

LEADS is an innovative, transdisciplinary program designed to help students in the College of Science grow into critical thinkers, imaginative leaders, and engaged citizens who are well-prepared for their future careers.

With the opportunities provided through LEADS, students have access to unique classes that complement their major, enhance their personal and professional development, and encourage the development of an entrepreneurial mindset. LEADS classes focus on applied, experiential, and interdisciplinary learning, providing the opportunity to gain meaningful experience and develop competencies transferable to any setting. There are multiple points of entry for LEADS, and students have the flexibility to choose from the LEADS options that best meet their needs and interests. Participation in LEADS positions students to be well prepared for wherever their next steps take them.

LEADS provides programming that:

- fosters learning across disciplines
- embeds experiential learning opportunities into academic courses, allowing students to gain valuable experience
- encourages students to develop new lenses through which to view complex problems
- cultivates development of critical competencies and an entrepreneurial mindset
- supports personal and professional development
- prepares students for their next step after UNC Charlotte

LEADS is open to new freshmen, continuing students, and transfer students.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Undergraduate Certificate in Innovative Thinking and Problem Solving

The Undergraduate Certificate in Innovative Thinking and Problem Solving is offered by the LEADS program within the Klein College of Science. It provides students with an additional layer of experiential learning and individualized support to supplement their major curriculum. Students who complete the LEADS certificate in Innovative Thinking and Problem Solving develop and execute a professional plan of action and are well prepared to translate their experiences and abilities as they enter their career or graduate/professional studies. The certificate may be pursued concurrently with any undergraduate degree programs at UNC Charlotte.

Admission Requirements

Current UNC Charlotte Undergraduate Students

To be admitted into the LEADS Certificate in Innovative Thinking and Problem Solving, students must meet the general University requirements for admission into Undergraduate Certificate Programs.

These University level requirements include:

- See University Admission Requirements
- An undergraduate degree or admission to an undergraduate degree program at UNC Charlotte
- An application submitted to the Registrar if applicant already holds an undergraduate degree, or to the department offering the program if applicant does not hold an undergraduate degree
- Official transcripts for previous degree(s) and coursework
- A Declaration of Program form (Change of Major/Minor form) listing the certificate program

In addition, students should have successfully completed COSC 2600 or CHES 2600 with a grade of C or above.

Certificate Requirements

LEADS Foundation Course (1 credit hours)

CHES 2600 - LEADS Colloquium (1)
or COSC 2600 – LEADS Colloquium (1)

LEADS Elective Courses (3 credit hours)

Select a combination of the following for a total of 6 credit hours.

CHES 3000 - Topics in Humanities & Earth and Social Sciences (3)
or COSC 3000 – Topics in Science (3)

CHES 3400 - Non-Residential Studies (1 to 15)
or COSC 3400 - Non-Residential Studies (1 to 15)

CTCM 2530 - Interdisciplinary Critical Thinking and Communication (3)

Notes:

- *CTCM 2530 credit should be through LEADS specific sections. Students who have received credit for a non-LEADS section of CTCM 2530 may substitute an additional LEADS elective course.*
- *CHES 3000 and COSC 3000 may be repeated for credit with change in topics.*
- *LEADS elective credit may also be earned through departmental credits for LEADS approved courses.*

LEADS Capstone Course (3 credit hours)

Students should complete their capstone experience during their Senior year, following completion of all other requirements.

CHES 4800 - LEADS Capstone Project (3)

or COSC 4800 – LEADS Capstone Project (3)

Certificate Total = 10 Credit Hours

Progression Requirements

Students must earn grades of C or above in all LEADS courses. Students must earn a grade of B or above in CHES 4800 or COSC 4800.

Department of Biological Sciences

biology.charlotte.edu

Undergraduate Programs

- **B.A. in Biology**
 - Honors Program
- **B.S. in Biology**
 - Honors Program
- **Minor in Biology**
- **Minor in Biotechnology**
- **Early Entry: M.S. in Biology**

We are in what has been called the “Century of Biology,” and Biological Sciences is one of the largest majors at UNC Charlotte. The program prepares students for a growing number of careers and professional and graduate programs in medicine and other allied health professions, dental and veterinary medicine, biotechnology, environmental management, conservation, research, science journalism, education, and more.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Undergraduate Programs

The Department of Biological Sciences' B.A. and B.S. programs provide all students with a broad introduction to cell biology, ecology, evolution, genetics, and physiology. Both B.A. and B.S. programs require the same core curriculum of biology courses. The B.A. degree provides a foundation in the basic principles of biology with more flexibility to study other areas of interest as preparation for many careers, such as teaching, natural resource management, science journalism, law, and business. The B.S. degree provides more in-depth focus in science for more opportunity in academic or professional science programs, such as academic or government research or medical school. For elective courses, students collaborate with their advisor to choose topics that interest them and provide a broad range of knowledge and skills to serve in the future. Throughout the curriculum, faculty provide hands-on research opportunities through the core labs, individualized research courses, internships, and the honors program.

The Minor in Biology is offered for students who desire some experience in biology as an adjunct to their major. The Minor in Biotechnology provides an interdisciplinary curriculum with an internship for students

interested in this emerging field.

Graduate Programs

The department offers two Graduate Certificate programs; early entry Master's, non-thesis-based Master's and thesis-based Master's programs; and an interdisciplinary Ph.D. program in Biological Sciences. For details, see the department website and the *Graduate Catalog*.

Bachelor of Arts in Biology

The B.A. in Biology is a science degree intended to provide a comprehensive biological background but with flexibility in the curriculum to permit students to take more courses in areas of interest other than biology. This is especially good for students interested in teaching in secondary education (junior high and high school), or whose careers may be other than in an area of biology.

Admission Requirements

Freshmen

- See University Admission Requirements
- *Minimum GPA:* 2.0. Students with GPA below 2.0 should consult with departmental advisor. Students with prior credit earned at UNC Charlotte must have a minimum overall and a Biology GPA of 2.0.
- *Pre-Major/Prerequisite Courses:* Complete the following with minimum grades of C:
 - BIOL 2120 and BIOL 2120L or BIOL 2130 and BIOL 2130L
 - CHEM 1251
 - CHEM 1251L

Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.0
- *Pre-Major/Prerequisite Courses:* All incoming students begin as Pre-Biology and declare upper-division once requirements are met.
- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Declaration of Major:* Students are eligible to declare a Major in Biology when the above courses are completed with a minimum grade of C.

Degree Requirements

A Major in Biology leading to the B.A. degree requires a total of 120 credit hours, including 32 credit hours of BIOL courses. At least 12 credit hours of BIOL courses must be taken at UNC Charlotte. Biology courses at the 1000-level do not count toward major-level credit.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. All Biology majors must take three hours of Writing Intensive coursework in Biology at UNC Charlotte.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the Klein College of Science Foreign Language Requirement.

Major Courses (32 credit hours)

Foundation Courses (18 credit hours)

- BIOL 2120 - General Biology I (3)
- BIOL 2130 - General Biology II (3)
- BIOL 2120L - General Biology I Laboratory (1)
and BIOL 2130L - General Biology II Laboratory (1)
- BIOL 3111 - Cell Biology (3)
- BIOL 3111L - Cell Biology Laboratory (1)
- BIOL 3144 - Ecology (3)
- BIOL 3166 - Genetics (3)

Physiology Course (3 credit hours)

Select one of the following:

- BIOL 3272 - Plant Physiology (3)
- BIOL 3273 - Animal Physiology (3)
- BIOL 4272 - Comparative Animal Physiology (3)

Evolution-Oriented Course (3-4 credit hours)

Select one of the following:

- BIOL 3000 - Special Topics in Biology (3) (*may include evolution-oriented topics*)

- BIOL 3222 - General Botany (3)
- BIOL 3231 - Invertebrate Zoology (4)
- BIOL 3233 - Vertebrate Zoology (4)
- BIOL 3235 - Biology of Insects (3)
- BIOL 3236 - General Zoology (3)
- BIOL 4000 - Special Topics in Biology (3) (*may include evolution-oriented topics*)
- BIOL 4040 - Stem Cells (3)
- BIOL 4111 - Evolution (3)
- BIOL 4235 - Mammalogy (4)
- BIOL 4242 - Biology of Birds (3)
- BIOL 4243 - Animal Behavior (3)
- BIOL 4244 - Conservation Biology (3)
- BIOL 4260 - Population Genetics (3)
- BIOL 4272 - Comparative Animal Physiology (3)
- BIOL 4283 - Developmental Biology (3)
- BIOL 4284 - Eukaryotic Microbiology (4)
- BIOL 4293 - Comparative Vertebrate Anatomy (4)

Laboratory Courses (minimum 2 credit hours)

Select two of the following:

- BIOL 2274L - Human Anatomy and Physiology II Laboratory (1)
- BIOL 3144L - Ecology Laboratory (1)
- BIOL 3166L - Genetics Laboratory (1)
- BIOL 3202L - Horticulture Laboratory (1)
- BIOL 3222L - General Botany Laboratory (1)
- BIOL 3229 - Field Botany (3)
- BIOL 3231 - Invertebrate Zoology (4)
- BIOL 3233 - Vertebrate Zoology (4)
- BIOL 3234 - Field Entomology (3)
- BIOL 3236L - General Zoology Laboratory (1)
- BIOL 3244 - Field Ecology (3)
- BIOL 3273L - Animal Physiology Laboratory (1)
- BIOL 3900 - Undergraduate Research (1 to 3)

BIOL 4121 - Biometry (4)

BIOL 4144 - Advanced Ecology (4)

BIOL 4168 - Recombinant DNA Techniques (4)

BIOL 4235 - Mammalogy (4)

BIOL 4242L - Biology of Birds Laboratory (1)

BIOL 4244L - Conservation Biology Laboratory (1)

BIOL 4250L - Microbiology Laboratory (1)

BIOL 4256L - Pathogenic Bacteriology Laboratory (1)

BIOL 4257L - Microbial Physiology and Metabolism Lab (1)

BIOL 4279L - Neurobiology Laboratory (1)

BIOL 4284 - Eukaryotic Microbiology (4)

BIOL 4293 - Comparative Vertebrate Anatomy (4)

BIOL 4700 - Honors Research I (3)

BIOL 4701 - Honors Research II (3)

BINF 3201 - Genomic Methods (4)

Additional Biology Courses (5-6 credit hours)

Select additional credit hours of Biology courses to reach 32 credit hours, excluding BIOL 1110, BIOL 1110L, BIOL 1115, BIOL 2259, BIOL 2259L, BIOL 2273, BIOL 2273L, and BIOL 3271. Either CHEM 3165 or CHEM 4165 (but not both) may also count toward this requirement.

Related Courses (14 credit hours)

CHEM 1251 - General Chemistry I (3)

CHEM 1251L - General Chemistry I Laboratory (1)

CHEM 1252 - General Chemistry II (3)

CHEM 1252L - General Chemistry II Laboratory (1)

MATH 1101 - College Algebra with Workshop (4)

or MATH 1103 - Precalculus Mathematics for Science and Engineering (3)

or MATH 1120 - Calculus (3)

or MATH 1241 - Calculus I (3)

STAT 1220 - Elements of Statistics I (BUSN) (3)

or STAT 1221 - Elements of Statistics I (3)

or STAT 1222 - Introduction to Statistics (3)

or BINF 3121 - Statistics for Bioinformatics (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Majors must earn a C or above in BIOL 2120 and BIOL 2130 before taking other Biology courses. Any student who earns less than a C may retake the course once, for a total of two attempts. After twice receiving a grade below C in BIOL 2120, BIOL 2130, or BIOL 2140L, students may not enroll in the course again and are ineligible for continuation in bachelor degree programs in Biology. Additionally, students who have two successive semesters with a cumulative GPA in Biology of less than 2.0 are ineligible for continuation in bachelor degree programs in Biology.

Bachelor of Science in Biology

The B.S. in Biology is recommended for students planning a career in biology and for those planning to attend graduate school for a Master's or Ph.D. degree. B.S. students have the option of designing their course of study to emphasize an area they are interested in by selecting

specific additional biology courses. Planning should be done in consultation with an academic advisor.

Admission Requirements

Freshmen

- See University Admission Requirements
- *Minimum GPA:* 2.0. Students with GPA below 2.0 should consult with departmental advisor. Students with prior credit earned at UNC Charlotte must have a minimum overall and a Biology GPA of 2.0.
- *Pre-Major/Prerequisite Courses:* Complete the following with minimum grades of C:
 - BIOL 2120 and BIOL 2120L or BIOL 2130 and BIOL 2130L
 - CHEM 1251
 - CHEM 1251L

Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.0
- *Pre-Major/Prerequisite Courses:* All incoming students begin as Pre Biology and declare upper-division once requirements are met.
- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Declaration of Major:* Students are eligible to declare a Major in Biology when the above courses are completed with minimum grades of C.

Degree Requirements

The B.S. in Biology requires a total of 120 credit hours. In addition to the 32 credit hours of BIOL courses required for the B.A. in Biology degree, students working toward the B.S. degree are required to take additional credit hours in BIOL courses to reach a minimum of 44 credit hours.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the Klein College of Science Foreign Language Requirement.

Major Courses (44 credit hours)

Foundation Courses (18 credit hours)

- BIOL 2120 - General Biology I (3)
- BIOL 2130 - General Biology II (3)
- BIOL 2120L - General Biology I Laboratory (1) and BIOL 2130L - General Biology II Laboratory (1)
- BIOL 3111 - Cell Biology (3)
- BIOL 3111L - Cell Biology Laboratory (1)
- BIOL 3144 - Ecology (3)
- BIOL 3166 - Genetics (3)

Physiology Course (3 credit hours)

Select one of the following:

- BIOL 3272 - Plant Physiology (3)
- BIOL 3273 - Animal Physiology (3)
- BIOL 4272 - Comparative Animal Physiology (3)

Evolution-Oriented Course (3-4 credit hours)

Select one of the following:

- BIOL 3000 - Special Topics in Biology (3) (*may include evolution-oriented topics*)
- BIOL 3222 - General Botany (3)
- BIOL 3231 - Invertebrate Zoology (4)
- BIOL 3233 - Vertebrate Zoology (4)
- BIOL 3235 - Biology of Insects (3)
- BIOL 3236 - General Zoology (3)
- BIOL 4000 - Special Topics in Biology (3) (*may include evolution-oriented topics*)
- BIOL 4040 - Stem Cells (3)
- BIOL 4111 - Evolution (3)
- BIOL 4235 - Mammalogy (4)
- BIOL 4242 - Biology of Birds (3)
- BIOL 4243 - Animal Behavior (3)
- BIOL 4244 - Conservation Biology (3)
- BIOL 4260 - Population Genetics (3)
- BIOL 4272 - Comparative Animal Physiology (3)
- BIOL 4283 - Developmental Biology (3)
- BIOL 4284 - Eukaryotic Microbiology (4)
- BIOL 4293 - Comparative Vertebrate Anatomy (4)

Laboratory Courses (minimum 3 credit hours)

Select three of the following:

- BIOL 2274L - Human Anatomy and Physiology II Laboratory (1)
- BIOL 3144L - Ecology Laboratory (1)
- BIOL 3166L - Genetics Laboratory (1)
- BINF 3201 - Genomic Methods (4)
- BIOL 3202L - Horticulture Laboratory (1)
- BIOL 3222L - General Botany Laboratory (1)
- BIOL 3229 - Field Botany (3)
- BIOL 3231 - Invertebrate Zoology (4)
- BIOL 3233 - Vertebrate Zoology (4)
- BIOL 3234 - Field Entomology (3)
- BIOL 3236L - General Zoology Laboratory (1)
- BIOL 3244 - Field Ecology (3)
- BIOL 3272L - Plant Physiology Laboratory (1)
- BIOL 3273L - Animal Physiology Laboratory (1)
- BIOL 3900 - Undergraduate Research (1 to 3)
- BIOL 4121 - Biometry (4)
- BIOL 4144 - Advanced Ecology (4)
- BIOL 4168 - Recombinant DNA Techniques (4)
- BIOL 4235 - Mammalogy (4)
- BIOL 4242L - Biology of Birds Laboratory (1)
- BIOL 4244L - Conservation Biology Laboratory (1)
- BIOL 4250L - Microbiology Laboratory (1)
- BIOL 4256L - Pathogenic Bacteriology Laboratory (1)
- BIOL 4257L - Microbial Physiology and Metabolism Lab (1)
- BIOL 4279L - Neurobiology Laboratory (1)
- BIOL 4284 - Eukaryotic Microbiology (4)
- BIOL 4293 - Comparative Vertebrate Anatomy (4)
- BIOL 4700 - Honors Research I (3)
- BIOL 4701 - Honors Research II (3)

Additional Biology Courses

Select additional credit hours of Biology courses to reach 44 credit hours, excluding BIOL 1110, BIOL 1110L, BIOL 1115, BIOL 2259, BIOL 2259L, BIOL 2273, BIOL 2273L, and BIOL 3271. Either CHEM 3165 or CHEM 4165 (but not both) may also count toward this requirement.

Related Courses (18 credit hours)

- CHEM 2131 - Organic Chemistry I (3)
- CHEM 2131L - Organic Chemistry I Lab (1)
- PHYS 1101 - Introductory Physics I (3)
 - or PHYS 2101 Physics for Science and Engineering I (3)
- PHYS 1101L - Introductory Physics I Laboratory (1)
 - or PHYS 2101L - Physics for Science and Engineering I Laboratory (1)
- PHYS 1102 - Introductory Physics II (3)
 - or PHYS 2102 - Physics for Science and Engineering II (3)
- PHYS 1102L - Introductory Physics II Laboratory (1)
 - or PHYS 2102L - Physics for Science and Engineering II Laboratory (1)
- MATH 1120 - Calculus (3)
 - or MATH 1241 - Calculus I (3)
 - or equivalent Calculus course
- STAT 1220 - Elements of Statistics I (BUSN) (3)
 - or STAT 1221 - Elements of Statistics I (3)
 - or STAT 1222 - Introduction to Statistics (3)
 - or BINF 3121 - Statistics for Bioinformatics (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Majors must earn a C or above in BIOL 2120 and BIOL 2130 before taking other Biology courses. Any student who earns less than a C may retake the course once, for a total of two attempts. After twice receiving a grade below C in BIOL 2120, BIOL 2130, or BIOL 2140L, students may not enroll in the course again and are ineligible for continuation in bachelor degree programs in Biology. Additionally, students who have two successive semesters with a cumulative GPA in Biology of less than 2.0 are ineligible for continuation in bachelor degree programs in Biology.

Minor in Biology

A Minor in Biology requires 18 credit hours in biology courses. Students are responsible for meeting all Biology course prerequisites and corequisites. At least 6 credit hours of BIOL courses must be taken at UNC Charlotte.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

Select one of the two options to complete the Minor in Biology.

Option 1

Foundation Courses (8 credit hours)

- BIOL 2120 - General Biology I (3)

- BIOL 2130 - General Biology II (3)
- BIOL 2140L - General Biology Lab (2)
- or BIOL 2120L - General Biology I Laboratory (1)
- and BIOL 2130L - General Biology II Laboratory (1)

Restricted Elective Courses (4-8 credit hours)

Lab Courses

Select at least one of the following:

- BIOL 2259L - Fundamentals of Microbiology Laboratory (1)
- BIOL 2273L - Human Anatomy and Physiology Laboratory (1)
- BIOL 2274L - Human Anatomy and Physiology II Laboratory (1)
- BIOL 3111L - Cell Biology Laboratory (1)
- BIOL 3144L - Ecology Laboratory (1)
- BIOL 3166L - Genetics Laboratory (1)
- BIOL 3202L - Horticulture Laboratory (1)
- BIOL 3222L - General Botany Laboratory (1)
- BIOL 3229 - Field Botany (3)
- BIOL 3233 - Vertebrate Zoology (4)
- BIOL 3234 - Field Entomology (3)
- BIOL 3236L - General Zoology Laboratory (1)
- BIOL 3244 - Field Ecology (3)
- BIOL 3272L - Plant Physiology Laboratory (1)
- BIOL 3273L - Animal Physiology Laboratory (1)
- BIOL 4121 - Biometry (4)
- BIOL 4144 - Advanced Ecology (4)
- BIOL 4168 - Recombinant DNA Techniques (4)
- BIOL 4235 - Mammalogy (4)
- BIOL 4242L - Biology of Birds Laboratory (1)
- BIOL 4244L - Conservation Biology Laboratory (1)
- BIOL 4250L - Microbiology Laboratory (1)
- BIOL 4256L - Pathogenic Bacteriology Laboratory (1)
- BIOL 4257L - Microbial Physiology and Metabolism Lab (1)
- BIOL 4279L - Neurobiology Laboratory (1)
- BIOL 4293 - Comparative Vertebrate Anatomy (4)

Lecture Course Above 3000-Level

Select at least one of the following:

- BIOL 3000 - Special Topics in Biology (1 to 4)
- BIOL 3144 - Ecology (3)
- BIOL 3202 - Horticulture (3)
- BIOL 3111 - Cell Biology (3)
- BIOL 3161 - Introduction to Biotechnology (3)
- BIOL 3166 - Genetics (3)
- BIOL 3215 - Economic Botany (3)
- BIOL 3222 - General Botany (3)
- BIOL 3229 - Field Botany (3)
- BIOL 3231 - Invertebrate Zoology (4)
- BIOL 3233 - Vertebrate Zoology (4)
- BIOL 3234 - Field Entomology (3)
- BIOL 3235 - Biology of Insects (3)
- BIOL 3236 - General Zoology (3)
- BIOL 3271 - Human Body in Health and Disease (3)
- BIOL 3272 - Plant Physiology (3)
- BIOL 3273 - Animal Physiology (3)
- BIOL 4000 - Special Topics in Biology (1 to 4)
- BIOL 4121 - Biometry (4)
- BIOL 4144 - Advanced Ecology (4)
- BIOL 4168 - Recombinant DNA Techniques (4)
- BIOL 4233 - Parasitology (3)
- BIOL 4235 - Mammalogy (4)

- BIOL 4242 - Biology of Birds (3)
- BIOL 4243 - Animal Behavior (3)
- BIOL 4244 - Conservation Biology (3)
- BIOL 4245 - Marine Biology (3)
- BIOL 4250 - Microbiology (3)
- BIOL 4255 - Bacterial Genetics (3)
- BIOL 4256 - Pathogenic Bacteriology (3)
- BIOL 4257 - Microbial Physiology and Metabolism (3)
- BIOL 4279 - Neurobiology (3)
- BIOL 4293 - Comparative Vertebrate Anatomy (4)

Unrestricted Elective Courses (2-6 credit hours)

Select any additional BIOL courses, excluding BIOL 1110, BIOL 1110L, and BIOL 1115, to meet the credit hour requirements for the Minor in Biology. Either CHEM 3165 or CHEM 4165 (but not both) may also count toward the Minor in Biology.

Option 2

Foundation Courses (7 credit hours)

- BIOL 1110 - Principles of Biology I (3)
- BIOL 1115 - Principles of Biology II (3)
- BIOL 1110L - Principles of Biology I Lab (1)

Restricted Elective Courses (4-8 credit hours)

Lab Courses

Select at least one of the following:

- BIOL 2259L - Fundamentals of Microbiology Laboratory (1)
- BIOL 2273L - Human Anatomy and Physiology Laboratory (1)
- BIOL 2274L - Human Anatomy and Physiology II Laboratory (1)
- BIOL 3111L - Cell Biology Laboratory (1)
- BIOL 3144L - Ecology Laboratory (1)
- BIOL 3166L - Genetics Laboratory (1)
- BIOL 3202L - Horticulture Laboratory (1)
- BIOL 3222L - General Botany Laboratory (1)
- BIOL 3229 - Field Botany (3)
- BIOL 3233 - Vertebrate Zoology (4)
- BIOL 3234 - Field Entomology (3)
- BIOL 3236L - General Zoology Laboratory (1)
- BIOL 3244 - Field Ecology (3)
- BIOL 3272L - Plant Physiology Laboratory (1)
- BIOL 3273L - Animal Physiology Laboratory (1)
- BIOL 4121 - Biometry (4)
- BIOL 4144 - Advanced Ecology (4)
- BIOL 4168 - Recombinant DNA Techniques (4)
- BIOL 4235 - Mammalogy (4)
- BIOL 4242L - Biology of Birds Laboratory (1)
- BIOL 4244L - Conservation Biology Laboratory (1)
- BIOL 4250L - Microbiology Laboratory (1)
- BIOL 4256L - Pathogenic Bacteriology Laboratory (1)
- BIOL 4257L - Microbial Physiology and Metabolism Lab (1)
- BIOL 4279L - Neurobiology Laboratory (1)
- BIOL 4293 - Comparative Vertebrate Anatomy (4)

Lecture Course Above 3000-Level

Select at least one of the following:

- BIOL 3000 - Special Topics in Biology (1 to 4)
- BIOL 3111 - Cell Biology (3)
- BIOL 3144 - Ecology (3)
- BIOL 3161 - Introduction to Biotechnology (3)

- BIOL 3166 - Genetics (3)
- BIOL 3202 - Horticulture (3)
- BIOL 3215 - Economic Botany (3)
- BIOL 3222 - General Botany (3)
- BIOL 3229 - Field Botany (3)
- BIOL 3231 - Invertebrate Zoology (4)
- BIOL 3233 - Vertebrate Zoology (4)
- BIOL 3234 - Field Entomology (3)
- BIOL 3235 - Biology of Insects (3)
- BIOL 3236 - General Zoology (3)
- BIOL 3271 - Human Body in Health and Disease (3)
- BIOL 3272 - Plant Physiology (3)
- BIOL 3273 - Animal Physiology (3)
- BIOL 4000 - Special Topics in Biology (1 to 4)
- BIOL 4121 - Biometry (4)
- BIOL 4144 - Advanced Ecology (4)
- BIOL 4168 - Recombinant DNA Techniques (4)
- BIOL 4233 - Parasitology (3)
- BIOL 4235 - Mammalogy (4)
- BIOL 4242 - Biology of Birds (3)
- BIOL 4243 - Animal Behavior (3)
- BIOL 4244 - Conservation Biology (3)
- BIOL 4245 - Marine Biology (3)
- BIOL 4250 - Microbiology (3)
- BIOL 4255 - Bacterial Genetics (3)
- BIOL 4256 - Pathogenic Bacteriology (3)
- BIOL 4257 - Microbial Physiology and Metabolism (3)
- BIOL 4279 - Neurobiology (3)
- BIOL 4293 - Comparative Vertebrate Anatomy (4)

Unrestricted Elective Courses (3-7 credit hours)

Select any additional BIOL courses, excluding BIOL 2120, BIOL 2130, and BIOL 2140L, to meet the credit hour requirements for the Minor in Biology. Either CHEM 3165 or CHEM 4165 (but not both) may also count toward the Minor in Biology.

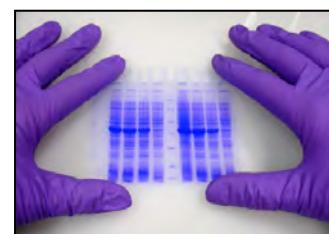

Minor Total = 18 Credit Hours

Progression Requirements

A GPA of at least 2.0 in the minor is required.

Minor in Biotechnology

The Minor in Biotechnology program is an interdisciplinary program housed within the Klein College of Science and is designed for students interested in careers in the biotechnology field. To obtain a Minor in Biotechnology, students complete a series of required and optional interdisciplinary courses offered in the Departments of Biological Sciences, Chemistry, and Bioinformatics and Genomics, as well as complete a biotechnology-based internship in a regional government, industry, or academic laboratory. Students have some flexibility to choose courses that reflect their specific area of emphasis within the biotechnology field.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Students declare their intention to obtain this minor by meeting with the Biotechnology Minor Program Coordinator, typically at the beginning of their Junior year. A maximum of 9 credit hours applied towards a major degree program can also be applied towards the Minor in Biotechnology. The number of participating students is determined by the number of available internship positions.

Minor Requirements (for Biology majors)

The Minor in Biotechnology requires the completion of a minimum of 18 credit hours.

Required Courses

BIOL 4405 Internship/Laboratory Research (1 to 3)
or BIOL 4701 - Honors Research II (3)

BIOL 4162 - Advanced Biotechnology I (3)
or BIOL 4171 - Cell Physiology (3)
or BIOL 4199 - Molecular Biology (3)

Elective Courses

Group 1

Select two or more of the following:

BIOL 3161 - Introduction to Biotechnology (3)
BIOL 4000 - Special Topics in Biology (3) (*Advanced Immunology Technology*)
BIOL 4000 - Special Topics in Biology (3) (*Advanced Physiology*)
BIOL 4000 - Special Topics in Biology (3) (*Ecotoxicology*)
BIOL 4162 - Advanced Biotechnology I (3)
BIOL 4163 - Advanced Biotechnology II (3)
BIOL 4168 - Recombinant DNA Techniques (4)
BIOL 4171 - Cell Physiology (3)
BIOL 4199 - Molecular Biology (3)
BIOL 4244 - Conservation Biology (3)
BIOL 4250 - Microbiology (3)
BIOL 4251 - Immunology (3)
BIOL 4255 - Bacterial Genetics (3)
BIOL 4256 - Pathogenic Bacteriology (3)
BIOL 4257 - Microbial Physiology and Metabolism (3)
BIOL 4259 - Virology (3)
CHEM 4165 - Principles of Biochemistry I (3)

Group 2

Select at least one of the following:

BINF 1101 - Introduction to Bioinformatics and Genomics (4)
BINF 4171 - Business of Biotechnology (3)
BINF 4191 - Life Sciences and the Law (3)
CHEM 4166 - Principles of Biochemistry II (3)
CHEM 4171 - Biochemical Instrumentation (4)

Minor Requirements (for all other majors)

The Minor in Biotechnology requires the completion of a minimum of 18 credit hours.

Required Courses

BIOL 3161 - Introduction to Biotechnology (3)

BIOL 4405 - Internship/Laboratory Research (1 to 3)

Elective Courses

Group 1

Select three of the following:

BIOL 4000 - Special Topics in Biology (1 to 4) (*DNA Profiling*)
BIOL 4162 - Advanced Biotechnology I (3)
BIOL 4163 - Advanced Biotechnology II (3)
BIOL 4168 - Recombinant DNA Techniques (4)
BIOL 4199 - Molecular Biology (3)
BIOL 4244 - Conservation Biology (3)
BIOL 4250 - Microbiology (3)
BIOL 4251 - Immunology (3)
BIOL 4255 - Bacterial Genetics (3)
BIOL 4259 - Virology (3)
CHEM 4165 - Principles of Biochemistry I (3)
and CHEM 4165L - Principles of Biochemistry I Laboratory (1)

Group 2

Select one of the following:

BINF 1101 - Introduction to Bioinformatics and Genomics (4)
BINF 4171 - Business of Biotechnology (3)
BINF 4191 - Life Sciences and the Law (3)
CHEM 4166 - Principles of Biochemistry II (3)
CHEM 4171 - Biochemical Instrumentation (4)

Minor Total = 18 Credit Hours

Progression Requirements

Students must have at least an overall GPA of 2.0 and a 2.0 GPA in their major to participate in the program.

Honors Program in Biology

The Honors Program is a research program for students majoring in Biology. Students interested in this program and who meet the admissions requirements should contact the Honors Coordinator in the Department of Biological Sciences.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

High potential students are invited to participate in the program generally during the Junior year by the Department Honors Committee. High potential students with a 3.2 overall GPA, a 3.4 GPA in BIOL courses and who are completing or have completed BIOL 3111 with a grade of B or above are preferred. Enrolled students will select their Honors advisor and compose a supervisory committee.

Currently Enrolled Students

To graduate with Honors, students must complete the following courses with grades of A:

BIOL 4601 Honors Seminar (2)
BIOL 4700 Honors Research I (3)
BIOL 4701 Honors Research II (3)

Progression Requirements

A cumulative GPA of 3.2 and a GPA of 3.4 or above in BIOL courses must be maintained. An Honors thesis is required, and the student must present the results of their project in an appropriate forum. The honors notation will appear on a student's official transcript.

Cooperative Education Program

Students majoring in Biology may obtain practical work experience while pursuing their degrees. The Cooperative Education Program allows qualified students either to alternate semesters of academic study with semesters of full-time work experience or to combine part-time academic study and part-time work during the same semester. Students who are in good standing with the University, have a minimum overall GPA of 2.5, and have completed 30 credit hours are eligible to apply. Transfer students are required to complete 12 credit hours at the University prior to application. The work experience is arranged by the University Career Center and must be approved by the Department of Biological Sciences. Placements are based on a student's academic interests and on the availability of appropriate positions and are carried out under the supervision of a Biology faculty member who serves as co-op advisor. Work semesters are followed by participation in the Biology Cooperative Education Seminar.

Early Entry: Master of Science in Biology

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate

See University Admission Requirements

- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Department of Chemistry

chemistry.charlotte.edu

Undergraduate Programs

- **B.A. in Chemistry**
 - Honors Program
 - Teacher Licensure
- **B.S. in Chemistry**
 - Biochemistry
 - Honors Program
- **Minor in Chemistry**
- **Early Entry: M.S. in Chemistry**

Chemistry is a discipline fundamental to a wide variety of careers in industry, research, and the allied health fields. A strong foundation in chemistry is necessary for careers in medicine, molecular biology, biochemistry, industrial or government research, pharmacy, high school teaching, and chemical engineering. A background in chemistry may also be useful for careers in chemical sales, industrial management, business administration, and environmental management.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Degree Programs

The Department of Chemistry offers two B.S. in Chemistry degree programs approved by the American Chemical Society (ACS), two non-ACS-certified B.S. degree programs and a research-based M.S. degree, which provide the background necessary for a career in industry or for further graduate studies in chemistry and related fields. In addition, a B.A. in Chemistry degree program is available for students who plan to pursue a career in chemical industry, secondary education, or professional studies in areas such as medicine, dentistry, veterinary medicine, and optometry. The Minor in Chemistry is offered for students who desire some experience in chemistry as an adjunct to their major. Programs leading to careers in pharmacy and chemical engineering are available in cooperation with other institutions. Please see the "Preparation for Professional Schools" section in this Catalog for details.

Academic Advising

Students are urged to consult with their academic advisors every semester. Students should work with their academic advisors to develop a long-range plan for academic progress rather than merely selecting courses on a semester-by-semester basis.

Bachelor of Arts in Chemistry

The B.A. in Chemistry is recommended for students preparing for professional schools, a career in chemistry, and secondary teaching licensure.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.0. Students with prior credit earned at UNC Charlotte must have a minimum overall and Chemistry GPA of 2.0.
- Declaration of Major: Students are eligible to declare a B.A. in Chemistry major upon admission to UNC Charlotte
- *Transferable Credit Hours:* 24

Currently Enrolled Students

- Minimum GPA: 2.0
- Complete the Change of Major Form and meet with the Chemistry Advising Coordinator

Degree Requirements

A Major in Chemistry leading to the B.A. degree consists of a minimum of 32 credit hours of chemistry courses, 6 credit hours of mathematics courses, and 8 credit hours of physics courses.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. Students with a Major in Chemistry should plan on taking the following courses that meet both general education and major requirements:

- MATH 1241 - Calculus I (3)
- MATH 1242 - Calculus II (3)
- CHEM 1251 - General Chemistry I (3)
- CHEM 1251L - General Chemistry I Laboratory (1)
- CHEM 1252 - General Chemistry II (3)
- CHEM 1252L - General Chemistry II Laboratory (1)
- CHEM 4695 - Chemistry Seminar II (1)
- CHEM 4696 - Chemistry Seminar (1)

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the Klein College of Science Foreign Language Requirement.

Major Courses (32 credit hours)

- CHEM 1251 - General Chemistry I (3)
- CHEM 1251L - General Chemistry I Lab (1)
- CHEM 1252 - General Chemistry II (3)
- CHEM 1252L - General Chemistry II Lab (1)

CHEM 2131 - Organic Chemistry I (3)
CHEM 2131L - Organic Chemistry I Lab (1)
CHEM 2132 - Organic Chemistry II (3)
CHEM 2132L - Organic Chemistry II Lab (1)
or CHEM 2136L - Organic Chemistry Lab (1)
CHEM 2141 - Survey of Physical Chemistry (3)
CHEM 3111 - Quantitative Analysis (4)
CHEM 3121 - Inorganic Chemistry (3)
CHEM 3695 - Chemistry Seminar (1)
CHEM 4695 - Chemistry Seminar (1)
CHEM 4696 - Chemistry Seminar (1)

Restricted Elective Courses (3 credit hours)

Select from the following:

CHEM 3141 - Physical Chemistry I (3)
CHEM 3141L - Physical Chemistry I Laboratory (1)
CHEM 3142 - Physical Chemistry II (3)
CHEM 3142L - Physical Chemistry II Laboratory (1)
CHEM 3165 - Survey of Biochemistry (3)
CHEM 4111 - Instrumental Analysis (4)
CHEM 4121 - Advanced Inorganic Chemistry (4)
CHEM 4133 - Methods of Organic Structure Determination (2)
CHEM 4134 - Organic Reaction Mechanisms (2)
CHEM 4165 - Principles of Biochemistry I (3)
CHEM 4165L - Principles of Biochemistry I Laboratory (1)
CHEM 4166 - Principles of Biochemistry II (3)
CHEM 4171 - Biochemical Instrumentation (4)
CHEM 4200 - Computational Chemistry (4)

Elective Course Notes:

Pre-Professional Studies

Students majoring in Chemistry who are planning future studies in medicine, dentistry, or other allied health professions should choose CHEM 4165 and take as electives BIOL 2120 and BIOL 2130. At least one additional BIOL course at the 3000- or 4000-level is recommended.

Careers in Chemical Industry

Students planning to pursue employment in chemical industry or other careers requiring a background in chemistry should choose CHEM 4111 as a chemistry elective.

Related Courses (14 credit hours)

Mathematics Courses (6 hours)

MATH 1241 - Calculus I (3)
MATH 1242 - Calculus II (3)

Physics Courses (8 hours)

Select a sequence of four courses from one of the following options:

Option 1

PYHS 1101 - Introductory Physics I (3)
PYHS 1101L - Introductory Physics I Lab (1)
PYHS 1102 - Introductory Physics II (3)
PYHS 1102L - Introductory Physics II Lab (1)

Option 2

PYHS 2101 - Physics for Science and Engineering I (3)
PYHS 2101L - Physics for Science and Engineering I Lab (1)
PYHS 2102 - Physics for Science and Engineering II (3)
PYHS 2102L - Physics for Science and Engineering II Lab (1)

Option 3

PYHS 2101 - Physics for Science and Engineering I (3)
PYHS 2101L - Physics for Science and Engineering I Lab (1)
PYHS 1102 - Introductory Physics II (3)
PYHS 1102L - Introductory Physics II Lab (1)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Students who have declared a major in Chemistry remain in good academic standing within the department if the following criteria are met:

- The Chemistry GPA remains at or above 2.0
- Progression through CHEM 1251, CHEM 1251L, CHEM 1252, CHEM 1252L, CHEM 2131, CHEM 2131L, CHEM 2132, CHEM 2132L and CHEM 3111 occurs in no more than two attempts per course

A student whose Chemistry GPA is below 2.0 is placed on provisional continuation status. Should the Chemistry GPA remain below the required level after three successive semesters, the student is ineligible for continuation in bachelor degree programs in Chemistry. Students may declare the Chemistry major again if their Chemistry GPA rises to the requisite level if they were previously dropped from the major.

Students attempting CHEM 1251, CHEM 1251L, CHEM 1252, CHEM 1252L, CHEM 2131, CHEM 2131L, CHEM 2132, CHEM 2132L and CHEM 3111 for the third time are placed on provisional continuation status. Students who earn a grade of D, F or W in the third attempt are ineligible for continuation in bachelor degree programs in Chemistry.

Additionally, students must earn a C or above in all required chemistry courses for the major, including the chemistry elective course required for the B.A. degree. A student may petition for a one-time exemption to this requirement.

A minimum chemistry GPA of 2.0 is required to graduate.

Bachelor of Arts in Chemistry *with Teacher Licensure*

To meet North Carolina requirements to teach Chemistry at the secondary level (grades 9-12), students must complete a Major in Chemistry and a Minor in Secondary Education. The Major in Chemistry leading to the B.A. degree consists of 32 credit hours in chemistry courses.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- Minimum GPA: 2.0. Students with prior credit earned at UNC Charlotte must have a minimum overall and Chemistry GPA of 2.0.

- Students interested in pursuing teaching licensure should consult an undergraduate advisor in the College of Education's Office of Teacher Education Advising and Licensure (TEAL) for admission requirements and a detailed planning sheet of their professional education coursework. Licensure applications also are the responsibility of TEAL.
- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Declaration of Major:* Students are eligible to declare a B.A. in Chemistry major upon admission to UNC Charlotte.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. Students with a Major in Chemistry should plan on taking the following courses that meet both general education and major requirements:

MATH 1241 - Calculus I (3)
 MATH 1242 - Calculus II (3)
 CHEM 1251 - General Chemistry I (3)
 CHEM 1251L - General Chemistry I Laboratory (1)
 CHEM 1252 - General Chemistry II (3)
 CHEM 1252L - General Chemistry II Laboratory (1)
 CHEM 4695 - Chemistry Seminar II (1)
 CHEM 4696 - Chemistry Seminar (1)

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the Klein College of Science Foreign Language Requirement.

Major Courses (29 credit hours)

CHEM 1251 - General Chemistry I (3)
 CHEM 1251L General Chemistry I Lab (1)
 CHEM 1252 - General Chemistry II (3)
 CHEM 1252L - General Chemistry II Lab (1)
 CHEM 2131 - Organic Chemistry I (3)
 CHEM 2131L - Organic Chemistry I Lab (1)
 CHEM 2132 - Organic Chemistry II (3)
 CHEM 2132L - Organic Chemistry II Lab (1)
 CHEM 2141 - Survey of Physical Chemistry (3)
 CHEM 3111 - Quantitative Analysis (4)
 CHEM 3121 - Inorganic Chemistry (3)
 CHEM 3695 - Chemistry Seminar (1)
 CHEM 4695 - Chemistry Seminar (1)
 CHEM 4696 - Chemistry Seminar (1)

Restricted Elective Courses (3 credit hours)

Select one of the following:

CHEM 3141 - Physical Chemistry I (3)
 CHEM 3141L - Physical Chemistry I Laboratory (1) -
 CHEM 3142 - Physical Chemistry II (3)
 CHEM 3142L - Physical Chemistry II Laboratory (1) -
 CHEM 4111 - Instrumental Analysis (4)

CHEM 4121 - Advanced Inorganic Chemistry (4)
 CHEM 4133 - Methods of Organic Structure Determination (2)
 CHEM 4134 - Organic Reaction Mechanisms (2) -
 CHEM 4165 - Principles of Biochemistry I (3) -
 CHEM 4165L - Principles of Biochemistry I Laboratory (1)
 CHEM 4166 - Principles of Biochemistry II (3)
 CHEM 4171 - Biochemical Instrumentation (4)
 CHEM 4200 - Computational Chemistry (4) -

Related Courses (22 credit hours)

Biology Courses (4 credit hours)
 BIOL 1110 - Principles of Biology I (3)
 BIOL 1110L - Principles of Biology I Lab (1)

Mathematics Courses (6 credit hours)

MATH 1241 - Calculus I (3)
 MATH 1242 - Calculus II (3)

Physics Courses (8 credit hours)

Select one of the following options:

Option 1

PHYS 1101 - Introductory Physics I (3)
 PHYS 1101L - Introductory Physics I Lab (1)
 PHYS 1102 - Introductory Physics II (3)
 PHYS 1102L - Introductory Physics II Lab (1)

Option 2

PHYS 2101 - Physics for Science and Engineering I (3)
 PHYS 2101L - Physics for Science and Engineering I Lab (1)
 PHYS 2102 - Physics for Science and Engineering II (3)
 PHYS 2102L - Physics for Science and Engineering II Lab (1)

Option 3

PHYS 2101 - Physics for Science and Engineering I (3)
 PHYS 2101L - Physics for Science and Engineering I Lab (1)
 PHYS 1102 - Introductory Physics II (3)
 PHYS 1102L - Introductory Physics II Lab (1)

Geography and Earth Sciences Courses (4 credit hours)

Select one of the following courses and its corequisite laboratory:

ESCI 1101 - Earth Sciences-Geography (3)
 ESCI 1101L - Earth Sciences-Geography Lab (1)
 or
 GEOL 1200 - Physical Geology (3)
 GEOL 1200L - Physical Geology Lab (1)

Minor in Secondary Education (33 credit hours)

For details on required General Education courses, refer to Minor in Secondary Education program.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120-128 Credit Hours

Progression Requirements

Students who have declared a major in Chemistry remain in good academic standing within the department if the following criteria are met:

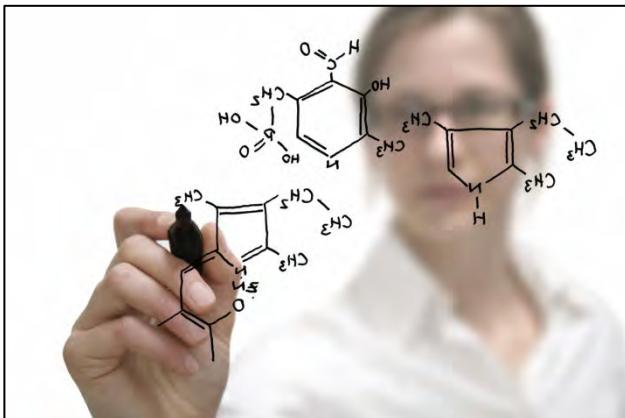

- The Chemistry GPA remains at or above 2.0
- Progression through CHEM 1251, CHEM 1251L, CHEM 1252, CHEM 1252L, CHEM 2131, CHEM 2131L, CHEM 2132, CHEM 2132L and CHEM 3111 occurs in no more than two attempts per course

A student whose Chemistry GPA is below 2.0 is placed on provisional continuation status. Should the Chemistry GPA remain below the required level after three successive semesters, the student is ineligible for continuation in bachelor degree programs in Chemistry. Students may declare the Chemistry major again if their Chemistry GPA rises to the requisite level if they were previously dropped from the major.

Students attempting CHEM 1251, CHEM 1251L, CHEM 1252, CHEM 1252L, CHEM 2131, CHEM 2131L, CHEM 2132, CHEM 2132L and CHEM 3111 for the third time are placed on provisional continuation status. Students who earn a grade of D, F or W in the third attempt are ineligible for continuation in bachelor degree programs in Chemistry.

Additionally, students must earn a C or above in all required chemistry courses for the major, including the chemistry elective required for the B.A. degree. A student may petition for a one-time exemption to this requirement.

A minimum chemistry GPA of 2.0 is required to graduate.

Bachelor of Science in Chemistry

The B.S. degree is recommended for students planning to begin careers as chemists with the baccalaureate degree and those preparing for graduate study in chemistry.

Admission Requirements

Freshmen

- See University Admission Requirements
- *Minimum GPA:* 2.0. Students with prior credit earned at UNC Charlotte must have a minimum overall and Chemistry GPA of 2.0.
- *Prerequisite Courses:* Complete the following with minimum grades of C:
 - CHEM 2132 or CHEM 3111
 - MATH 1242
 - PHYS 2102
 - PHYS 2102L

- CHEM 2132 or CHEM 3111
- MATH 1242
- PHYS 2102
- PHYS 2102L

Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.0
- *Pre-Major/Prerequisite Courses:* Complete the following with minimum grades of C:
 - CHEM 2132 or CHEM 3111
 - MATH 1242
 - PHYS 2102
 - PHYS 2102L
- *Declaration of Major:* Transfer students may declare the major if the above requirements were met at their previous institution(s).
- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Declaration of Major:* Students are eligible to declare a Major in Chemistry upon passing MATH 1242, PHYS 2102, and PHYS 2102L; and earning a grade of C or above in CHEM 2132 or CHEM 3111.

Degree Requirements

A B.S. in Chemistry requires a total of 120 credit hours. Students may choose from the ACS-certified B.S. degree or the non-certified degree. The ACS-certified B.S. in Chemistry degree consists of a minimum of 46 credit hours of chemistry courses, 12 credit hours of mathematics courses, and 8 credit hours of physics courses. The non-certified B.S. in Chemistry degree consists of a minimum of 45 credit hours of chemistry courses, 12 credit hours of mathematics courses, and 8 credit hours of physics courses.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. Students with a Major in Chemistry should plan on taking the following courses that meet both general education and major requirements:

- MATH 1241 - Calculus I (3)
- MATH 1242 - Calculus II (3)
- CHEM 1251 - General Chemistry I (3)
- CHEM 1251L - General Chemistry I Laboratory (1)
- CHEM 1252 - General Chemistry II (3)
- CHEM 1252L - General Chemistry II Laboratory (1)
- CHEM 4695 - Chemistry Seminar II (1)
- CHEM 4696 - Chemistry Seminar (1)

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the Klein College of Science Foreign Language Requirement.

Major Courses (46 credit hours)

- CHEM 1251 - General Chemistry I (3)
- CHEM 1251L General Chemistry I Lab (1)
- CHEM 1252 - General Chemistry II (3)

CHEM 1252L - General Chemistry II Lab (1)
CHEM 2131 - Organic Chemistry I (3)
CHEM 2131L - Organic Chemistry I Lab (1)
CHEM 2132 - Organic Chemistry II (3)
CHEM 2132L - Organic Chemistry II Lab (1)
or CHEM 2136L Organic Chemistry Lab (1)
CHEM 3111 - Quantitative Analysis (4)
CHEM 3141 - Physical Chemistry I (3)
CHEM 3141L - Physical Chemistry I Lab (1)
CHEM 3142 - Physical Chemistry II (3)
CHEM 3142L - Physical Chemistry II Lab (1)
CHEM 3695 - Chemistry Seminar (1)
CHEM 4111 - Instrumental Analysis (4)
CHEM 4121 - Advanced Inorganic Chemistry (4)
CHEM 4133 - Methods of Organic Structure Determination (2)
CHEM 4165 - Principles of Biochemistry I (3)*
CHEM 4695 - Chemistry Seminar (1)
CHEM 4696 - Chemistry Seminar (1)
CHEM 4900 - Directed Undergraduate Research (1 to 4) (*two semesters required, culminating in a comprehensive written report*)

*Students wishing to pursue the non-ACS-certified B.S. degree (with a minimum of 45 credit hours in chemistry) should replace CHEM 4165 with two credit hours of 4000-level chemistry courses that must be approved by the Department of Chemistry.

- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Declaration of Major:* Students are eligible to declare a Major in Chemistry upon passing MATH 1242, PHYS 2102, and PHYS 2102L; and earning a grade of C or above in CHEM 2132 or CHEM 3111,

Degree Requirements

The B. S. in Chemistry with Concentration in Biochemistry requires a total of 120 credit hours. Students may choose from the ACS-certified degree or the non-certified degree. A Major in Chemistry leading to the ACS-certified B.S. degree with a Concentration in Biochemistry requires a minimum of 48 credit hours of chemistry courses, 12 credit hours of mathematics courses, and 8 credit hours of physics courses.

The non-certified B.S. degree with a Concentration in Biochemistry follows the same requirements as the ACS-certified degree with the following exceptions: (1) a minimum of 44 credit hours in chemistry are required, and (2) CHEM 4121 is not required.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. Students with a Major in Chemistry should plan on taking the following courses that meet both general education and major requirements:

MATH 1241 - Calculus I (3)
MATH 1242 - Calculus II (3)
CHEM 1251 - General Chemistry I (3)
CHEM 1251L - General Chemistry I Laboratory (1)
CHEM 1252 - General Chemistry II (3)
CHEM 1252L - General Chemistry II Laboratory (1)
CHEM 4695 - Chemistry Seminar II (1)
CHEM 4696 - Chemistry Seminar (1)

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the Klein College of Science Foreign Language Requirement.

Major Courses (48 credit hours)

CHEM 1251 - General Chemistry I (3)
CHEM 1251L General Chemistry I Lab (1)
CHEM 1252 - General Chemistry II (3)
CHEM 1252L - General Chemistry II Lab (1)
CHEM 2131 - Organic Chemistry I (3)
CHEM 2131L - Organic Chemistry I Lab (1)
CHEM 2132 - Organic Chemistry II (3)
CHEM 2132L - Organic Chemistry II Lab (1)
or CHEM 2136L Organic Chemistry Lab (1)
CHEM 3111 - Quantitative Analysis (4)
CHEM 3141 - Physical Chemistry I (3)
CHEM 3141L - Physical Chemistry I Lab (1)
CHEM 3142 - Physical Chemistry II (3)
CHEM 3142L - Physical Chemistry II Lab (1)
CHEM 3695 - Chemistry Seminar (1)
CHEM 4111 - Instrumental Analysis (4)
or CHEM 4171 - Biochemical Instrumentation (4)*
CHEM 4121 - Advanced Inorganic Chemistry (4)*
CHEM 4165 - Principles of Biochemistry I (3)
CHEM 4165L - Principles of Biochemistry I Lab (1)
CHEM 4166 - Principles of Biochemistry II (3)
CHEM 4695 - Chemistry Seminar (1)
CHEM 4696 - Chemistry Seminar (1)

CHEM 4900 - Directed Undergraduate Research (1 to 4) (*two semesters required, culminating in a comprehensive written report*)**

*CHEM 4121 is not required for the non-certified B.S. degree with Concentration in Biochemistry

**BIOL 3900 may be substituted for CHEM 4900 with special permission from the Department of Chemistry.

Related Courses (31 credit hours)

Mathematics Courses (12 credit hours)

MATH 1241 - Calculus I (3)
MATH 1242 - Calculus II (3)

Plus two of the following:

MATH 2241 - Calculus III (3)
MATH 2242 - Calculus IV (3)
MATH 2164 - Matrices and Linear Algebra (3) -
MATH 2171 - Differential Equations (3)
STAT 3128 - Probability and Statistics for Engineers (3)
or a department-approved math course

Physics Courses (8 credit hours)

PHYS 2101 - Physics for Science and Engineering I (3)
PHYS 2101L - Physics for Science and Engineering I Lab (1)
PHYS 2102 - Physics for Science and Engineering II (3)
PHYS 2102L - Physics for Science and Engineering II Lab (1)

Biology Courses (11 credit hours)

These courses are recommended:
BIOL 2120 - General Biology I (3)
BIOL 2130 - General Biology II (3)
BIOL 2140L - General Biology Lab (2)
BIOL 3111 - Cell Biology (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Students who have declared a major in Chemistry remain in good academic standing within the department if the following criteria are met:

- The Chemistry GPA remains at or above 2.0
- Progression through CHEM 1251, CHEM 1251L, CHEM 1252, CHEM 1252L, CHEM 2131, CHEM 2131L, CHEM 2132, CHEM 2132L and CHEM 3111 occurs in no more than two attempts per course

A student whose Chemistry GPA is below 2.0 is placed on provisional continuation status. Should the Chemistry GPA remain below the required level after three successive semesters, the student is ineligible for continuation in bachelor degree programs in Chemistry. Students may declare the Chemistry major again if their Chemistry GPA rises to the requisite level if they were previously dropped from the major.

Students attempting CHEM 1251, CHEM 1251L, CHEM 1252, CHEM 1252L, CHEM 2131, CHEM 2131L, CHEM 2132, CHEM 2132L and CHEM 3111 for the third time are placed on provisional continuation status.

Students who earn a grade of D, F or W in the third attempt are ineligible for continuation in bachelor degree programs in Chemistry.

Additionally, students must earn a C or above in all required chemistry courses for the major, including the chemistry elective required for the B.A. degree. A student may petition for a one-time exemption to this requirement.

A minimum chemistry GPA of 2.0 is required to graduate.

Minor in Chemistry

The Minor in Chemistry provides a means for students majoring in another discipline to develop a foundation of knowledge in selected areas of chemistry. Students with a major in science or non-science disciplines are welcome to pursue a Minor in Chemistry. A Minor in Chemistry consists of 23 credit hours of chemistry courses.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- *Minimum GPA: 2.0*

Currently Enrolled Students

- Complete the Change of Major/Minor Form and submit it to the Chemistry Department Office

Minor Requirements

Required Courses (20 credit hours)

- CHEM 1251 - General Chemistry I (3)*
CHEM 1251L General Chemistry I Lab (1)*
CHEM 1252 - General Chemistry II (3)*
CHEM 1252L - General Chemistry II Lab (1)*
CHEM 2131 - Organic Chemistry I (3)*
CHEM 2131L - Organic Chemistry I Lab (1)*
CHEM 2132 - Organic Chemistry II (3)*
CHEM 2132L - Organic Chemistry II Lab (1)*
or CHEM 2136L - Organic Chemistry Lab (1)
CHEM 3111 - Quantitative Analysis (4)*

Elective Courses (3 credit hours)

Select from the following:

- CHEM 2141 - Survey of Physical Chemistry (3)
CHEM 3121 - Inorganic Chemistry (3)
CHEM 3141 - Physical Chemistry I (3)
CHEM 4111 - Instrumental Analysis (4)
CHEM 4133 - Methods of Organic Structure Determination (2)
CHEM 4134 - Organic Reaction Mechanisms (2)
CHEM 4165 - Principles of Biochemistry I (3)
CHEM 4200 - Computational Chemistry (4)

Total = 23 Credit Hours

Progression Requirements

A minimum GPA of 2.0 in the minor is required. Students may attempt courses in the minor a total of three times each. Withdrawing from the course after the Add/Drop deadline constitutes an attempt, as does

receiving any letter grade.

Honors Program in Chemistry

This program is intended primarily for chemistry majors. It is a research-oriented program. Details are available from the Department of Chemistry and the department's website at chemistry.charlotte.edu.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Consideration for admission to the Honors Program may be initiated by the student or by any chemistry honors faculty member. The Honors Program Director of the Chemistry Department will formally approve admission. The student may be removed from the Honors Program at any time, upon his/her own request or upon the recommendation of the Honors Committee of the Chemistry Department. They will then exercise the option of (1) withdrawing from the Honors course(s) in accordance with the University policy on withdrawal or (2) switching from the Honors section of the course(s) to a regular (non-Honors) section of the course(s). Continuation in the Honors Program is reviewed each semester and the student may be removed by the Honors Program Director if their GPA requirements are not maintained, or if they have committed any academic integrity code violations.

Course Requirements

1. Complete at least 2 semesters, and a minimum of 4 credit hours of Directed Honors Research CHEM 4900H. At least 2 credit hours are taken in the student's last semester as a capstone experience. The student must form an Honors thesis committee and prepare an Honors research proposal for submission to their thesis committee and the Honors Program Director during their penultimate semester. This proposal must be approved, by their committee, one week prior to being submitted to the Honors College.
2. Complete an Honors Research Capstone experience and complete an Honors thesis based on their own Directed Honors Research.
3. Complete 1 hour of Honors Seminar (CHEM 4696H), which involves a seminar presentation of the results of the Honors research and defense of the Honors thesis. The thesis must be successfully defended before the student's Honors Thesis Committee (consisting of the Honors research advisor, plus two additional members of the Chemistry Department's Honors Faculty).
4. Students are encouraged to join the Chemistry Honors program as early as their Freshman year. Contact the Chemistry Honors Program Director for details on how to get started.
5. It is recommended that students interested in a Chemistry Honors degree join a research group no later than their junior year. They should enroll in CHEM 3695H in their junior year, and CHEM 4695H in their penultimate semester. The student's Honors proposal and application to candidacy are due by Reading Day of their penultimate semester.

CHEM 4696 - Chemistry Seminar (1)

CHEM 4900 - Directed Undergraduate Research (1 to 4)

Progression Requirements

To obtain Honors in Chemistry, a student must successfully complete at least four hours of CHEM 4900 over at least two semesters, at the Honors level, one semester of CHEM 4696 at the Honors level, prepare and successfully defend an honors thesis based on their independent research, and complete the Application to Candidacy process for graduating with honors, as directed by the Honors College. The honors notation will appear on a student's official transcript.

Honors students must have a GPA of at least 3.75 for all Honors work in Chemistry at UNC Charlotte. The preferred GPA for all UNC Charlotte course work is at least 3.5, with a preferred GPA of at least 3.25 for all course work in Chemistry (CHEM) taken at UNC Charlotte. The successful student must receive a grade of "A" for at least 4 hours of Directed Honors Research (CHEM 4900H), and receive a grade of "A" for CHEM 4696H, including the defense of their honors thesis to their thesis committee.

Cooperative Education Program

Students majoring in Chemistry may obtain practical work experience in chemistry before graduation by participating in the Chemistry Cooperative Education Experience any time after the completion of Sophomore year and CHEM 2132. A minimum GPA of 2.5 overall and 2.5 in chemistry is required. At least two semesters of full-time work assignments on alternating semesters must be completed concurrent with enrollment in CHEM 3500. Advisors will assist students to design a schedule that accommodates both work assignments and the upper-division chemistry courses which are normally offered on alternate semesters. Experiences are arranged in coordination with the University Career Center.

Early Entry: Master of Science in Chemistry

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree. The Early Entry Program for the M.S. in Chemistry leads to completion of all requirements for the B.S. and M.S. degrees in only five academic years and one or two summers. Students should consult with the Chemistry M.S. Graduate Program Coordinator about their eligibility for this program and to discuss requirements for selection of a research advisor during their Junior year.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Completed the standard B.S. in Chemistry curriculum through at least Physical Chemistry
- Minimum 3.2 overall undergraduate GPA
- Minimum 3.0 GPA in chemistry, mathematics, and physics courses
- Submit application online at gradadmissions.charlotte.edu/apply

and provide supporting documents

- Recommendation by the Graduate Program Director and approved by the Graduate School

Note: GRE scores are not required.

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 6 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 6 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees). Students may leave the program after four years with the B.S. degree, or they may complete an additional academic year and summer of full-time study and research to earn both the B.S. and M.S. degrees in Chemistry.

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Department of Mathematics and Statistics

math.charlotte.edu

Undergraduate Programs

- **B.A. in Mathematics**
 - Actuarial Science
 - Statistics
 - Teacher Licensure (Secondary Education Minor)
- **B.S. in Mathematics**
 - Actuarial Science
 - Statistics
 - Teacher Licensure (Secondary Education Minor)
- **B.A. in Mathematics for Business**
- **B.S. in Mathematics for Business**
 - Economics/Finance
 - Actuarial Science
- **Minor in Actuarial Mathematics**
- **Minor in Mathematics**
- **Minor in Statistics**
- **Honors Program in Mathematics or Mathematics for Business**
- **Undergraduate Certificate in Actuarial Studies**
- **Early Entry: M.S. in Mathematics**

Mathematics has important applications to numerous areas ranging from economics and other social sciences to physics and engineering. It is a challenging and interesting area to study in its own right with a broad and varied curriculum. Of course, graduates with a major in mathematics can become teachers and are in very high demand. Upon graduation, mathematics majors have many options due to their strengths in critical thinking, quantitative skills, and data reasoning. The leading occupational areas include:

- Accounting and Finance
- Computer Programming
- Sales and Marketing
- Management and Related Positions
- Actuarial
- Computer Systems Analysis
- Statistical and Mathematical Modeling
- Health and Social Services

Career choices for students who concentrate in Statistics would also include those related to the environment, food and drug industry, and the energy sector. Mathematics majors have consistently ranked near the highest in performance on both the LSAT and the GMAT

standardized tests for law school and graduate level business programs, respectively.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Degree Programs

The Department of Mathematics and Statistics offers a B.A. and B.S. in Mathematics (with optional concentrations in Actuarial Mathematics and Statistics); a B.A. and B.S. in Mathematics for Business; three minors: Mathematics, Actuarial Science, and Statistics; a certificate in Actuarial Studies; teacher licensure; and an Honors program. Many of our undergraduate students are accepted into the early entry program from the M.S. in Mathematics or the M.S. in Mathematical Finance.

For further studies, the department offers graduate programs leading to master's and doctoral degrees. The Ph.D. degree is available in Applied Mathematics. The M.S. in Mathematics degree has Concentrations in General Mathematics, Applied Mathematics, Mathematics Education, Actuarial Statistics, and Applied Statistics. Additional information on these programs can be found in the *UNC Charlotte Graduate Catalog*.

Bachelor of Arts in Mathematics

The Department of Mathematics and Statistics offers an undergraduate program of study leading to a Bachelor of Arts (B.A.) degree in Mathematics. This degree provides the flexibility that students need to study mathematics and at the same time study a minor (or even a major) from a variety of career options.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.0
- *Prerequisite Courses:* GPA of at least 2.0 in each of the following categories:
 - All MATH, STAT, and OPRS courses taken
 - All 2000-level and above MATH, STAT, and OPRS courses taken
- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Declaration of Major:* Change of Major forms accepted year-round. Forms are available on the Math Department website. Orientation/advising session is required after declaration.

Degree Requirements

A Major in Mathematics for the B.A. degree consists of a minimum of 37 credit hours of approved Mathematics (MATH), Operations Research (OPRS), or Statistics (STAT) courses, one programming course in Computer Science (ITCS), and 18 credit hours of approved related coursework in an area outside of the department or an approved University minor from outside the department.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as

some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the Klein College of Science Foreign Language Requirement.

Major Courses (41-46 credit hours)

Core Courses (28 credit hours)

ITSC 1212 - Introduction to Computer Science I (4)

MATH 1241 - Calculus I (3)

MATH 1242 - Calculus II (3)

MATH 2164 - Matrices and Linear Algebra (3)

MATH 2167 - Introduction to Mathematical Reasoning (3)

MATH 2171 - Differential Equations (3)

MATH 2241 - Calculus III (3)

MATH 2242 - Calculus IV (3)

MATH 2688 - Mathematics Awareness Seminar (0)

MATH 3163 - Introduction to Modern Algebra (3)

Restricted Elective Courses (12 credit hours)

Select 12 credit hours of approved courses from MATH, STAT, or OPRS at the 3000-level or above.

Restricted Related Elective Courses (18 credit hours)

Select 18 credit hours of electives in related courses. Elective courses should be chosen from related disciplines or an approved minor in another discipline. Courses that count toward this requirement must have a discipline prefix other than MATH, STAT, or OPRS. Students should select courses in consultation with the department and/or their advisor.

Capstone Project (1-6 credit hours)

Students must complete 1 credit hour in this category. Alternatively, students may complete 6 credit hours towards an Honors project. For more information on the Honors Program in Mathematics, visit the program's page.

MATH 3689 - Mathematics Project Seminar (1)
or the sequence:

MATH 3790 - Junior Honors Seminar (3)

MATH 3791 - Senior Honors Tutorial (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

An overall GPA of at least 2.0 and a GPA of at least 2.0 in all math courses is required.

Bachelor of Arts in Mathematics *with Concentration in Actuarial Science*

The Department of Mathematics and Statistics offers an undergraduate program of study leading to a Bachelor of Arts (B.A.) degree in Mathematics with a Concentration in Actuarial Science. This program provides students a comprehensive course of study to learn the concepts and skills needed to begin a career path in actuarial science. Actuaries are employed by insurance companies, government agencies, health service organizations, large corporations, and consulting firms. Actuaries design and price insurance policies and pension programs. Coursework in this program provides students with the core foundation for several of the professional actuarial exams. Required courses in economics, finance, and applied statistical methods also meet the Society of Actuaries requirements for Validation by Educational Experience (VEE).

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.0
- *Prerequisite Courses:* GPA of at least 2.0 in each of the following categories:
 - All MATH, STAT, and OPRS courses taken
 - All 2000-level and above MATH, STAT, and OPRS courses taken
- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Declaration of Major:* Change of Major forms accepted year-round. Forms are available on the Math Department website. Orientation/advising session is required after declaration.

Degree Requirements

The B.A. in Mathematics with a Concentration in Actuarial Science degree program consists of a minimum of 46 credit hours of mathematics and statistics courses, one programming course in computer science, and 12 credit hours of related courses for VEE (Validation by Educational Experience) credit and Technical Skills.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the Klein College of Science Foreign Language Requirement.

Major Courses (62-67 credit hours)

Core Courses (25 credit hours)

ITSC 1212 - Introduction to Computer Science I (4)

MATH 1241 - Calculus I (3)

MATH 1242 - Calculus II (3)

MATH 2164 - Matrices and Linear Algebra (3)

MATH 2167 - Introduction to Mathematical Reasoning (3)

MATH 2171 - Differential Equations (3)

- MATH 2241 - Calculus III (3)
- MATH 2242 - Calculus IV (3)

Concentration Courses (24 credit hours)

- MATH 3227 - Mathematical Theory of Interest and Applications (3)
- MATH 3228 - Financial Mathematics and General Cash Flows (3)
- MATH 4051 - Computer Exploration and Generation of Data (3)
- MATH 4228 - Life Insurance Mathematics (3)
- STAT 3110 - Applied Regression (3)
- STAT 3122 - Probability and Statistics I (3)
- STAT 3123 - Probability and Statistics II (3)
- STAT 3150 - Time Series Analysis (3)

Restricted Elective Courses (12 credit hours)

Select from the following:

- ACCT 2121 - Principles of Accounting I (3)
- ACCT 2122 - Principles of Accounting II (3)
- ECON 2101 - Principles of Economics - Macro (3)
- ECON 2102 - Principles of Economics - Micro (3)
- FINN 3120 - Financial Management (3)
- INFO 2130 - Introduction to Business Computing (3)

Capstone Project (1-6 credit hours)

Students must complete 1 credit hour in this category. Alternatively, students may complete 6 credit hours towards an Honors project. For more information on the Honors Program in Mathematics, visit the program's page.

- MATH 3689 - Mathematics Project Seminar (1)

or the sequence:

- MATH 3790 - Junior Honors Seminar (3)
- MATH 3791 - Senior Honors Tutorial (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation. Suggested courses include:

- MATH 4229 - Advanced Life Insurance Mathematics (3)
- STAT 3160 - Applied Multivariate Analysis (3)
- STAT 3180 - Predictive Analytics (3)
- STAT 4116 - Statistical Computing (3)
- STAT 4123 - Applied Statistics I (3)
- STAT 4124 - Applied Statistics II (3)
- STAT 4227 - Loss Models and Applications (3)

Actuarial Exam and VEE Credit Preparation

The following courses prepare students for the following Actuarial Exams and VEE credits:

Exam FM

- MATH 3227 - Mathematical Theory of Interest and Applications (3)
- MATH 3228 - Financial Mathematics and General Cash Flows (3)

Exam P

- STAT 3122 - Probability and Statistics I (3)
- STAT 3123 - Probability and Statistics II (3)

Exam FAM

- MATH 4228 - Life Insurance Mathematics (3)

- STAT 4227 - Loss Models and Applications (3)

Exam ALTAM

- MATH 4229 - Advanced Life Insurance Mathematics (3)

Exam SRM

- STAT 3110 - Applied Regression (3)
- STAT 3150 - Time Series Analysis (3)
- STAT 3160 - Applied Multivariate Analysis (3)
- STAT 3180 - Predictive Analytics (3)
- STAT 4124 - Applied Statistics II (3)

VEE Statistics

- STAT 3123 - Probability and Statistics II (3)

VEE Economics

- ECON 2101 - Principles of Economics - Macro (3)
- ECON 2102 - Principles of Economics - Micro (3)

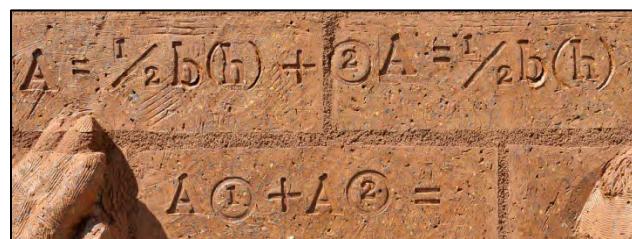

VEE Accounting and Financial Management

- ACCT 2121 - Principles of Accounting I (3)
- FINN 3120 - Financial Management (3)

Degree Total = 120 Credit Hours

Progression Requirements

An overall GPA of at least 2.0 and a GPA of at least 2.0 in all math courses is required.

Bachelor of Arts in Mathematics with Concentration in Statistics

The Department of Mathematics and Statistics offers an undergraduate program of study leading to a Bachelor of Arts (B.A.) degree in Mathematics with a Concentration in Statistics. Mathematics majors study relationships and patterns between numbers, structures, and processes. Math majors in the Statistics concentration take 12 credit hours of calculus, linear algebra, an introductory computer programming course, probability and statistics, applied regression, and upper-level electives such as design of experiments, time series analysis, multivariate analysis, applied statistics, and statistical computing, among others.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.0
- *Prerequisite Courses:* GPA of at least 2.0 in each of the following categories:
 - All MATH, STAT, and OPRS courses taken
 - All 2000-level and above MATH, STAT, and OPRS courses taken
- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Declaration of Major:* Change of Major forms accepted year-round. Forms are available on the Math Department website. Orientation/advising session is required after declaration.

Degree Requirements

A Bachelor of Arts degree in Mathematics with a Concentration in Statistics consists of a minimum of 34 hours of Mathematics (MATH) and Statistics (STAT) courses, one programming course in Computer Science (ITCS), and 18 hours of approved related coursework in an area outside of the department or an approved University minor from outside the department.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the Klein College of Science Foreign Language Requirement.

Major Courses (38-43 credit hours)

Core Courses (25 credit hours)

- ITSC 1212 - Introduction to Computer Science I (4)
- MATH 1241 - Calculus I (3)
- MATH 1242 - Calculus II (3)
- MATH 2164 - Matrices and Linear Algebra (3)
- MATH 2241 - Calculus III (3)
- MATH 2242 - Calculus IV (3)
- MATH 2688 - Mathematics Awareness Seminar (0)
- STAT 2122 - Introduction to Probability and Statistics (3) *
- STAT 2223 - Elements of Statistics II (3) *

Concentration Courses (12 credit hours)

- STAT 3110 - Applied Regression (3)

AND select three from the following:

- STAT 3140 - Design of Experiments (3)
- STAT 3150 - Time Series Analysis (3)
- STAT 3160 - Applied Multivariate Analysis (3)
- STAT 3180 - Predictive Analytics (3)
- STAT 4116 - Statistical Computing (3)
- STAT 4123 - Applied Statistics I (3)
- STAT 4124 - Applied Statistics II (3)

Capstone Project (6 credit hours)

Students must complete 1 credit hour in this category. Alternatively, students may complete 6 credit hours towards an Honors project. For more information on the Honors Program in Mathematics, visit the program's page.

- MATH 3689 - Mathematics Project Seminar (1)
or the sequence:

MATH 3790 - Junior Honors Seminar (3)

MATH 3791 - Senior Honors Tutorial (3)

Restricted Elective Courses (18 credit hours)

Select 18 credit hours of electives in related courses. Elective courses should be chosen from related disciplines or an approved minor in another discipline. Courses that count towards this requirement must have a discipline prefix other than MATH, STAT, or OPRS. Students should select courses in consultation with the department and/or their advisor.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Suggested course(s):

ITCS 3160 - Database Design and Implementation (3)

Degree Total = 120 Credit Hours

Progression Requirements

An overall GPA of at least 2.0 and a GPA of at least 2.0 in all math courses is required.

Bachelor of Science in Mathematics

The Department of Mathematics and Statistics offers an undergraduate program of study leading to a Bachelor of Science (B.S.) degree in Mathematics. Mathematics majors study relationships and patterns between numbers, structures, and processes. Our students graduate with a well-rounded education and the appropriate preparation for math-related careers or research.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.0
- *Prerequisite Courses:* GPA of at least 2.0 in each of the following categories:
 - All MATH, STAT, and OPRS courses taken
 - All 2000-level and above MATH, STAT, and OPRS courses taken
- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Declaration of Major:* Change of Major forms accepted year-round. Forms are available on the Math Department website. Orientation/advising session is required after declaration.

Degree Requirements

The B.S. in Mathematics degree consists of a minimum of 43 credit hours of approved Mathematics (MATH), Operations Research (OPRS),

or Statistics (STAT) courses, one programming course in computer science (ITSC), 11 credit hours of science electives, and 18 credit hours of approved related coursework in an area outside of the department or an approved University minor from outside the department.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the Klein College of Science Foreign Language Requirement.

Major Courses (47-52 credit hours)

Core Courses (minimum 34 credit hours)

- ITCS 1212 - Introduction to Computer Science (4)
- MATH 1241 - Calculus I (3)
- MATH 1242 - Calculus II (3)
- MATH 2164 - Matrices and Linear Algebra (3)
- MATH 2167 - Introduction to Mathematical Reasoning (3)
- MATH 2171 - Differential Equations (3)
- MATH 2241 - Calculus III (3)
- MATH 2242 - Calculus IV (3)
- MATH 2688 - Mathematics Awareness Seminar (0)
- MATH 3141 - Advanced Calculus of One Variable (3)
- MATH 3142 - Advanced Calculus of Several Variables (3)
- MATH 3163 - Introduction to Modern Algebra (3)

And at least one from the following:

- MATH 3123 - Probability and Statistics II (3)
or STAT 3123 - Probability and Statistics II (3)
- MATH 4163 - Modern Algebra (3)
- MATH 4164 - Abstract Linear Algebra (3)
- MATH 4181 - Introduction to Topology (3)

Restricted Elective Courses (12 credit hours)

Select 9 credit hours of approved courses from MATH, STAT, or OPRS at the 3000-level or above AND at least one from the following:

- MATH 3123 - Probability and Statistics II (3)
- MATH 3181 - Fundamental Concepts of Geometry (3)
- MATH 4163 - Modern Algebra (3)
- MATH 4164 - Abstract Linear Algebra (3)
- MATH 4181 - Introduction to Topology (3)
- OPRS 3111 - Operations Research: Deterministic Models (3)

Capstone Project (1-6 credit hours)

Students must complete 1 credit hour in this category. Alternatively, students may complete 6 credit hours towards an Honors project. For more information on the Honors Program in Mathematics, visit the program's page.

- MATH 3689 - Mathematics Project Seminar (1)

or the sequence:

- MATH 3790 - Junior Honors Seminar (3)
- MATH 3791 - Senior Honors Tutorial (3)

Restricted Science Elective Courses (11 credit hours)

Select a minimum of 11 credit hours of approved science courses. Any science course from BIOL, CHEM, ESCI, GEOL, or PHYS is permissible.

Restricted Related Elective Courses (18 credit hours)

Select 18 credit hours of electives in related courses. Elective courses should be chosen from related disciplines or an approved minor in another discipline. Courses that count towards this requirement must have a discipline prefix other than MATH, STAT, or OPRS. Students should select courses in consultation with the department and/or their advisor.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

An overall GPA of at least 2.0 and a GPA of at least 2.0 in all math courses is required.

Bachelor of Science in Mathematics *with Concentration in Actuarial Science*

The Department of Mathematics and Statistics offers an undergraduate program of study leading to a Bachelor of Science (B.S.) degree in Mathematics with a Concentration in Actuarial Science. This program provides students a comprehensive course of study to learn the concepts and skills needed to begin a career path in actuarial science. Actuaries are employed by insurance companies, government agencies, health service organizations, large corporations, and consulting firms. Actuaries design and price insurance policies and pension programs. Coursework in this program provides students with the core foundation for several of the professional actuarial exams. Required courses in economics, finance, and applied statistical methods also meet the Society of Actuaries requirements for Validation by Educational Experience (VEE).

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.0
- *Prerequisite Courses:* GPA of at least 2.0 in each of the following categories:
 - All MATH, STAT, and OPRS courses taken
 - All 2000-level and above MATH, STAT, and OPRS courses taken
- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Declaration of Major:* Change of Major forms accepted year-round. Forms are available on the Math Department website. Orientation/advising session is required after declaration.

Degree Requirements

The B.S. in Mathematics with a Concentration in Actuarial Science degree program consists of a minimum of 52 credit hours of mathematics and statistics courses, one programming course in computer science, and 12 credit hours of related courses for VEE (Validation of Educational Experience) credit and Technical Skills.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the Klein College of Science Foreign Language Requirement.

Major Courses (68-75 credit hours)

Core Courses (25 credit hours)

- ITSC 1212 - Introduction to Computer Science I (4)
- MATH 1241 - Calculus I (3)
- MATH 1242 - Calculus II (3)
- MATH 2164 - Matrices and Linear Algebra (3)
- MATH 2167 - Introduction to Mathematical Reasoning (3)
- MATH 2171 - Differential Equations (3)
- MATH 2241 - Calculus III (3)
- MATH 2242 - Calculus IV (3)

Concentration Courses (30 credit hours)

- MATH 3227 - Mathematical Theory of Interest and Applications (3)
- MATH 3228 - Financial Mathematics and General Cash Flows (3)
- MATH 4051 - Computer Exploration and Generation of Data (3)
- MATH 4228 - Life Insurance Mathematics (3)
- MATH 4229 - Advanced Life Insurance Mathematics (3)
- STAT 3110 - Applied Regression (3)
- STAT 3122 - Probability and Statistics I (3)
- STAT 3123 - Probability and Statistics II (3)
- STAT 3150 - Time Series Analysis (3)
- STAT 4227 - Loss Models and Applications (3)

Restricted Elective Courses (12 credit hours)

Select from the following:

- ACCT 2121 - Principles of Accounting I (3)
- ACCT 2122 - Principles of Accounting II (3)
- ECON 2101 - Principles of Economics - Macro (3)
- ECON 2102 - Principles of Economics - Micro (3)
- FINN 3120 - Financial Management (3)
- FINN 3271 - Principles of Risk Management and Insurance (3)
- INFO 2130 - Introduction to Business Computing (3)

Capstone Project (1-6 credit hours)

Students must complete 1 credit hour in this category. Alternatively, students may complete 6 credit hours towards an Honors project. For more information on the Honors Program in Mathematics, visit the program's page.

MATH 3689 - Mathematics Project Seminar (1)

or the sequence:

MATH 3790 - Junior Honors Seminar (3)

MATH 3791 - Senior Honors Tutorial (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation. Suggested courses include:

STAT 3160 - Applied Multivariate Analysis (3)

STAT 3180 - Predictive Analytics (3)

STAT 4116 - Statistical Computing (3)

STAT 4123 - Applied Statistics I (3)

STAT 4124 - Applied Statistics II (3)

Actuarial Exam and VEE Credit Preparation

The following courses prepare students for the following Actuarial Exams and VEE credits:

Exam FM

- MATH 3227 - Mathematical Theory of Interest and Applications (3)
- MATH 3228 - Financial Mathematics and General Cash Flows (3)

Exam P

- STAT 3122 - Probability and Statistics I (3)
- STAT 3123 - Probability and Statistics II (3)

Exam FAM

- MATH 4228 - Life Insurance Mathematics (3)
- STAT 4227 - Loss Models and Applications (3)

Exam ALTAM

- MATH 4229 - Advanced Life Insurance Mathematics (3)

Exam SRM

- STAT 3110 - Applied Regression (3)
- STAT 3150 - Time Series Analysis (3)
- STAT 3160 - Applied Multivariate Analysis (3)
- STAT 3180 - Predictive Analytics (3)
- STAT 4124 - Applied Statistics II (3)

VEE Statistics

- STAT 3123 - Probability and Statistics II (3)

VEE Economics

- ECON 2101 - Principles of Economics - Macro (3)
- ECON 2102 - Principles of Economics - Micro (3)

VEE Accounting and Financial Management

- ACCT 2121 - Principles of Accounting I (3)
- FINN 3120 - Financial Management (3)

Degree Total = 120 Credit Hours

Progression Requirements

An overall GPA of at least 2.0 and a GPA of at least 2.0 in all math courses is required.

Cooperative Education Program

Students may participate in the Mathematics Cooperative Education Program in either the parallel or alternate track. The parallel track combines part-time academic study and part-time cooperative experience during the same semester, while the alternate track alternates semesters totally devoted to work with semesters totally devoted to academic study. Students in the Mathematics Cooperative Education Program must participate in a minimum of two semesters in the program. Students who are in good standing with the University, have a minimum overall GPA of 2.5, and have completed 30 credit hours are eligible to apply. Transfer students are required to complete 12 credit hours at the University prior to application. Students interested in participating in the program should contact the Coordinator of Undergraduate Programs in the Department of Mathematics and Statistics or the University Career Center for information.

Bachelor of Science in Mathematics *with Concentration in Statistics*

The Department of Mathematics and Statistics offers an undergraduate program of study leading to a Bachelor of Science (B.S.) degree in Mathematics with a Concentration in Statistics. Mathematics majors study relationships and patterns between numbers, structures, and processes. Math majors in the Statistics concentration take 12 credit hours of calculus, linear algebra, an introductory computer programming course, probability and statistics, applied regression, and upper-level electives such as design of experiments, time series analysis, multivariate analysis, applied statistics, and statistical computing, among others.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.0
- *Prerequisite Courses:* GPA of at least 2.0 in each of the following categories:
 - All MATH, STAT, and OPRS courses taken
 - All 2000-level and above MATH, STAT, and OPRS courses taken
- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Declaration of Major:* Change of Major forms accepted year-round. Forms are available on the Math Department website. Orientation/advising session is required after declaration.

Degree Requirements

A Bachelor of Science degree in Mathematics with a Concentration in Statistics consists of a minimum of 40 hours of Mathematics and Statistics courses, one programming course in Computer Science (ITCS), 10-12 hours of technical electives, and 18 hours of approved related coursework in an area outside of the department or an approved University minor from outside the department.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the Klein College of Science Foreign Language Requirement.

Major Courses (44-49 credit hours)

Core Courses (19 credit hours)

- ITSC 1212 - Introduction to Computer Science I (4)
- MATH 1241 - Calculus I (3)
- MATH 1242 - Calculus II (3)
- MATH 2241 - Calculus III (3)
- MATH 2242 - Calculus IV (3)
- MATH 2164 - Matrices and Linear Algebra (3)
- MATH 2688 - Mathematics Awareness Seminar (0)

Concentration Courses (15 credit hours)

- MATH 3141 - Advanced Calculus of One Variable (3)
- STAT 3110 - Applied Regression (3)
- STAT 3122 - Probability and Statistics I (3)
- STAT 3123 - Probability and Statistics II (3)
- STAT 3160 - Applied Multivariate Analysis (3)

Restricted Elective Courses (9 credit hours)

Choose three of the following Statistics courses:

- STAT 3140 - Design of Experiments (3)
- STAT 3150 - Time Series Analysis (3)
- STAT 3180 - Predictive Analytics (3)
- STAT 4116 - Statistical Computing (3)
- STAT 4123 - Applied Statistics I (3)
- STAT 4124 - Applied Statistics II (3)

Capstone Project (6 credit hours)

Students must complete 1 credit hour in this category. Alternatively, students may complete 6 credit hours towards an Honors project. For more information on the Honors Program in Mathematics, visit the program's page.

- MATH 3689 - Mathematics Project Seminar (1)

or the sequence:

- MATH 3790 - Junior Honors Seminar (3)
MATH 3791 - Senior Honors Tutorial (3)

Restricted Technical Elective Courses (10-12 credit hours)

Select 10-12 credit hours from the lists below. *The categories below are only to suggest concentration groups. The courses selected do not need to be within one category.*

Computer Science Group

- ITCS 3153 - Introduction to Artificial Intelligence (3)
ITCS 3160 - Database Design and Implementation (3)
ITCS 3162 - Introduction to Data Mining (3)
ITCS 3190 - Introduction to Cloud Computing for Data Analysis (3)
ITSC 1213 - Introduction to Computer Science II (4)
ITSC 2214 - Data Structures and Algorithms (3)
ECGR 4115 - Convex Optimization and AI Applications (3)

Bioinformatics Group

- ITSC 1213 - Introduction to Computer Science II (4)
BINF 2111 - Introduction to Bioinformatics Computing (4)
BINF 3121 - Statistics for Bioinformatics (3)

Econometrics Group

- ECON 2101 - Principles of Economics - Macro (3)
ECON 2102 - Principles of Economics - Micro (3)
ECON 3112 - Econometrics (3)
INFO 2130 - Introduction to Business Computing (3)

Restricted Related Elective Courses (18 credit hours)

Select 18 credit hours of electives in related courses. Elective courses should be chosen from related disciplines or an approved minor in another discipline. Courses that count towards this requirement must have a discipline prefix other than MATH, STAT, or OPRS. Students should select courses in consultation with the department and/or their advisor.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

An overall GPA of at least 2.0 and a GPA of at least 2.0 in all math courses is required.

Bachelor of Arts in Mathematics for Business

The Department of Mathematics and Statistics offers an undergraduate program of study leading to a Bachelor of Arts (B.A.) degree in Mathematics for Business. This degree is a practical applied mathematics program that provides the flexibility that students need to choose from a variety of career paths in the corporate and commercial world, including banking, investment, and insurance agencies.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.0
- *Prerequisite Courses:* GPA of at least 2.0 in each of the following categories:
 - All MATH, STAT, and OPRS courses taken
 - All 2000-level and above MATH, STAT, and OPRS courses taken
- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Declaration of Major:* Change of Major forms accepted year-round. Forms are available on the Math Department website. Orientation/advising session is required after declaration.

Degree Requirements

A Major in Mathematics for Business for the B.A. degree consists of a minimum of 36 hours of approved Mathematics (MATH), Operations Research (OPRS), or Statistics (STAT) courses, one programming course in Computer Science (ITCS), and 18 hours of approved related coursework in an area outside of the department or an approved University minor from outside the department.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the Klein College of Science Foreign Language Requirement.

Major Courses (40-43 credit hours)

Core Courses (31-34 credit hours)

- ITSC 1212 - Introduction to Computer Science I (4)
MATH 1120 - Calculus (3)*
MATH 2120 - Intermediate Applied Calculus (3)*
MATH 2164 - Matrices and Linear Algebra (3)
MATH 2688 - Mathematics Awareness Seminar (0)
MATH 3227 - Mathematical Theory of Interest and Applications (3)
MATH 4051 - Computer Exploration and Generation of Data (3)
OPRS 3111 - Operations Research: Deterministic Models (3)
STAT 1220 - Elements of Statistics I (BUSN) (3)
STAT 2223 - Elements of Statistics II (3)
STAT 3110 - Applied Regression (3)

*Note: MATH 1120 and MATH 2120 may be replaced by the three-course sequence MATH 1241, MATH 1242, and MATH 2241. Also, MATH 1120 is not equivalent to MATH 1241, and MATH 2120 is not equivalent to MATH 1242.

Restricted Elective Courses (9 credit hours)

Select 9 credit hours of approved courses from MATH, STAT, or OPRS at the 3000-level or above.

Business Elective Courses (9 credit hours)

Select three from the following:

- ACCT 2121 - Principles of Accounting I (3)
- ACCT 2122 - Principles of Accounting II (3)
- ECON 2101 - Principles of Economics - Macro (3)
- ECON 2102 - Principles of Economics - Micro (3)
- INFO 2130 - Introduction to Business Computing (3)

Related Elective Courses (18 credit hours)

Select 18 credit hours of electives in related courses. Elective courses should be chosen from related disciplines or an approved minor in another discipline. Students should select courses in consultation with the department and/or their advisor. Students can double count courses in a minor and the Business electives.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

An overall GPA of at least 2.0 and a GPA of at least 2.0 in all math courses is required.

Bachelor of Science in Mathematics for Business

The Department of Mathematics and Statistics offers an undergraduate program of study leading to a Bachelor of Science (B.S.) degree in Mathematics for Business. This degree is a practical applied mathematics program that tightens the focus on business applications to better prepare students for a successful career path in the areas of insurance, finance, banking, and economics. Graduates of the Mathematics for Business program are valuable assets to the business community. They bring expertise in Mathematics, Statistics, and Operation Research, along with excellent analytic skills to businesses, financial institutions, insurance firms, and government agencies.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.0
- *Prerequisite Courses:* GPA of at least 2.0 in each of the following categories:
 - All MATH, STAT, and OPRS courses taken
 - All 2000-level and above MATH, STAT, and OPRS

courses taken

- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Declaration of Major:* Change of Major forms accepted year-round. Forms are available on the Math Department website. Orientation/advising session is required after declaration.

Degree Requirements

A Major in Mathematics for Business for the B.S. degree consists of a minimum of 48 hours of approved Mathematics (MATH), Operations Research (OPRS), or Statistics (STAT) courses, one programming course in Computer Science (ITCS), and 18 hours of Business related coursework.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the Klein College of Science Foreign Language Requirement.

Major Courses (52 credit hours)

Core Courses (40 credit hours)

- ITSC 1212 - Introduction to Computer Science I (4)
- MATH 1241 - Calculus I (3)
- MATH 1242 - Calculus II (3)
- MATH 2164 - Matrices and Linear Algebra (3)
- MATH 2171 - Differential Equations (3)
- MATH 2241 - Calculus III (3)
- MATH 2688 - Mathematics Awareness Seminar (0)
- MATH 3227 - Mathematical Theory of Interest and Applications (3)
- MATH 4051 - Computer Exploration and Generation of Data (3)
- OPRS 3111 - Operations Research: Deterministic Models (3)
- OPRS 3113 - Operations Research: Probabilistic Models (3)
- STAT 3110 - Applied Regression (3)
- STAT 3122 - Probability and Statistics I (3)
- STAT 3123 - Probability and Statistics II (3)

Concentration Courses (12 credit hours)

Students majoring in Mathematics for Business must select one of the following concentrations:

Concentration in Economics/Finance

Required Courses

- MATH 4122 - Probability and Stochastic Models (3)
- MATH 4128 - Risk Theory (3)
- STAT 3150 - Time Series Analysis (3)

Elective Course

Select one of the following:

- MATH 3xxx - Mathematics Elective (3)
- MATH 4xxx - Mathematics Elective (3)
- STAT 3xxx - Statistics Elective (3)

- STAT 4xxx - Statistics Elective (3)
- OPRS 3xxx - Operations Research Elective (3)
- OPRS 4xxx - Operations Research Elective (3)

Concentration in Actuarial Science

Required Courses

- MATH 3228 - Financial Mathematics and General Cash Flows (3)
- MATH 4228 - Life Insurance Mathematics (3)
- STAT 3150 - Time Series Analysis (3)

Elective Course

Select one of the following:

- MATH 3xxx - Mathematics Elective (3)
- MATH 4xxx - Mathematics Elective (3)
- STAT 3xxx - Statistics Elective (3)
- STAT 4xxx - Statistics Elective (3)
- OPRS 3xxx - Operations Research Elective (3)
- OPRS 4xxx - Operations Research Elective (3)

Notes:

Recommended Actuarial courses:

- MATH 4229 - Advanced Life Insurance Mathematics (3)
- STAT 3180 - Predictive Analytics (3)
- STAT 4227 - Loss Models and Applications (3)

The following courses prepare students for the following Actuarial Exams and VEE credits:

Exam FM

- MATH 3227 - Mathematical Theory of Interest and Applications (3)
- MATH 3228 - Financial Mathematics and General Cash Flows (3)

Exam P

- STAT 3122 - Probability and Statistics I (3)
- STAT 3123 - Probability and Statistics II (3)

Exam FAM

- MATH 4228 - Life Insurance Mathematics (3)
- STAT 4227 - Loss Models and Applications (3)

Exam ALTAM

- MATH 4229 - Advanced Life Insurance Mathematics (3)

Exam SRM

- STAT 3110 - Applied Regression (3)
- STAT 3150 - Time Series Analysis (3)
- STAT 3160 - Applied Multivariate Analysis (3)
- STAT 3180 - Predictive Analytics (3)
- STAT 4124 - Applied Statistics II (3)

VEE Statistics

- STAT 3123 - Probability and Statistics II. (3)

VEE Economics

- ECON 2101 - Principles of Economics - Macro (3)
- ECON 2102 - Principles of Economics - Micro (3)

VEE Accounting and Financial Management

- ACCT 2121 - Principles of Accounting I (3)

- FINN 3120 - Financial Management (3)

Restricted Business Courses (18 credit hours)

- ACCT 2121 - Principles of Accounting I (3)
- ACCT 2122 - Principles of Accounting II (3)
- ECON 2101 - Principles of Economics - Macro (3)
- ECON 2102 - Principles of Economics - Micro (3)
- FINN 3120 - Financial Management (3)
- INFO 2130 - Introduction to Business Computing (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

An overall GPA of at least 2.0 and a GPA of at least 2.0 in all math courses is required.

Teacher Licensure in Mathematics

Students preparing for licensure to teach mathematics in secondary school (grades 9-12) must Major in Mathematics. They may select either the B.A. or the B.S. degree track, but their coursework must include:

Admission Requirements

All Students

- See University Admission Requirements
- Students preparing for licensure to teach mathematics in secondary school (grades 9-12) must Major in Mathematics. They may select either the B.A. in Mathematics or the B.S. in Mathematics degree track, but their coursework must include:

Required Courses

- MATH 3181 - Fundamental Concepts of Geometry (3)
- MATH 4109 - History of Mathematical Thought (3)
- MAED 4103 - Using Technology to Teach Secondary School Mathematics (3)
- MAED 4105 - High School Mathematics from an Advanced Standpoint (3)
- MAED 4252 - Teaching Mathematics to Secondary School Learners (3)
- STAT course together with a Minor in Secondary Education

Currently Enrolled Students

Change of major forms are available on the Math Department website.

Progression Requirements

Before the end of their Sophomore year, students should complete MDSK 2100 (Foundations of Education in Secondary Schools) and obtain an application for formal admission to the teacher education program in the Department of Middle, Secondary, and K-12 Education. Once they are approved for the Teacher Education program, students are enrolled in the Minor in Secondary Education. The minor requires 4 additional courses from the College of Education and one semester of student teaching. Detailed information is available in the Department of Mathematics and Statistics office. Licensure applications are the

responsibility of the student and the Office of Teacher Education Advising and Licensure (TEAL) in the College of Education.

Minor in Mathematics

A Minor in Mathematics requires 18 credit hours. The minor consists of 6 credits of calculus courses, 6 credits of required courses that should be selected depending on career interests, and 6 credits of upper-level MATH, STAT or OPRS.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

Required Courses (9 credit hours)

MATH 1241 - Calculus I (3)

MATH 1242 - Calculus II (3)

MATH 2164 - Matrices and Linear Algebra (3)

or MATH 2171 - Differential Equations (3)

or MATH 2241 - Calculus III (3)

Restricted Elective Course (3 credit hours)

Select one of the following:

MATH 2241 - Calculus III (3)

MATH 2242 - Calculus IV (3)

MATH 2164 - Matrices and Linear Algebra (3)

MATH 2167 - Introduction to Mathematical Reasoning (3)

MATH 2171 - Differential Equations (3)

STAT 2122 - Introduction to Probability and Statistics (3)

MATH 3xxx-4xxx - Mathematics Elective (3)

STAT 3xxx-4xxx - Statistics Elective (3)

OPRS 3xxx-4xxx - Operations Research Elective (3)

Note: Typically, a focus on pure math requires MATH 2164 and MATH 2167. A focus on applied math requires MATH 2171 and/or MATH 2241; and a focus on statistics requires MATH 2164 and/or STAT 2122.

Unrestricted Elective Courses (6 credit hours)

Select two of the following:

MATH 3xxx-4xxx - Mathematics Elective (3)

STAT 3xxx-4xxx - Statistics Elective (3)

OPRS 3xxx-4xxx - Operations Research Elective (3)

Minor Total = 18 Credit Hours

Progression Requirements

A minimum GPA of at least 2.0 in all courses is required.

Minor in Actuarial Mathematics

An actuary is a business professional who uses mathematical skills to aid in the design and pricing of insurance policies and pension programs. Actuaries are employed by insurance companies, government agencies, health service organizations, large corporations, and consulting firms.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admissions Requirements

Minor Requirements

A Minor in Actuarial Mathematics requires 21 credit hours.

Required Courses (21 credit hours)

MATH 1241 - Calculus I (3)

MATH 1242 - Calculus II (3)

MATH 2164 - Matrices and Linear Algebra (3)

MATH 2241 - Calculus III (3)

MATH 3122 - Probability and Statistics I (3)

or STAT 3122 - Probability and Statistics I (3)

or STAT 3128 - Probability and Statistics for Engineers (3)

MATH 3227 - Mathematical Theory of Interest and Applications (3)

MATH 3228 - Financial Mathematics and General Cash Flows (3)

Minor Total = 21 Credit Hours

Progression Requirements

A minimum GPA of at least 2.0 in all courses is required.

Special Policies or Requirements

Actuarial Examinations

Completion of these courses helps prepare students for the first two actuarial examinations administered by the Society of Actuaries and the Casualty Actuarial Society. The first actuarial exam should be taken after completing MATH 3122 or MATH 3123, and the second examination after completing MATH 3228. Further examinations cover material contained in MATH 4228 (Life Insurance Mathematics).

Minor in Statistics

A Minor in Statistics requires 18 credit hours. This minor is not available to students majoring in a mathematics program.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

Calculus Courses (6 credit hours)

Select one of the following:

MATH 1120 - Calculus (3)
MATH 1121 - Calculus for Engineering Technology (3)
MATH 1241 - Calculus I (3)*

Select one of the following:

MATH 2120 - Intermediate Applied Calculus (3)
MATH 2241 - Calculus III (3)*

*Note: MATH 1241 is a prerequisite for MATH 2241.

Statistics Courses (9 credit hours)

Select one of the following:

STAT 1220 - Elements of Statistics I (BUSN) (3)
STAT 1221 - Elements of Statistics I (3)
STAT 1222 - Introduction to Statistics (3)
STAT 2122 - Introduction to Probability and Statistics (3)

Required Course:

STAT 2223 - Elements of Statistics II (3)

Select one of the following:

STAT 3110 - Applied Regression (3)
STAT 3140 - Design of Experiments (3)
STAT 3150 - Time Series Analysis (3)
STAT 3160 - Applied Multivariate Analysis (3)

Major Course (3 credit hours)

Select one course from the student's major:

BINF 2121 - Statistics for Bioinformatics (3)
CJUS 2370 - Research Methods in Criminal Justice (4)
COMM 3100 - Communication Research Methods (3)
ECON 3112 - Econometrics (3)
OPER 3206 - Quality Assurance and Management (3)
POLS 2220 - Political Science Methods (4)
HLTH 3104 - Research and Statistics in Health (3)
SOWK 3900 - Social Work Research I (3)
SOCY 4156 - Quantitative Analysis (4)

If a student's major is not listed above, they should consult the Math Department's Undergraduate Coordinator or select a second course from the following:

STAT 3110 - Applied Regression (3)
STAT 3140 - Design of Experiments (3)
STAT 3150 - Time Series Analysis (3)
STAT 3160 - Applied Multivariate Analysis (3)
STAT 3180 - Predictive Analytics (3)

Minor Total = 18 Credit Hours

Undergraduate Certificate in Actuarial Studies

An actuary is a business professional who uses mathematical skills to aid in the design and pricing of insurance policies and pension programs. Actuaries are employed by insurance companies, government agencies, health service organizations, large corporations, and consulting firms.

The Certificate in Actuarial Studies prepares undergraduate and post-baccalaureate students for a career as an actuary. The coursework provides students with the background knowledge that they need to successfully pass two or three of the professional actuarial exams and obtain Validation by Educational Experience (VEE) credit that is required to become an Associate of the Society of Actuaries (SOA) or the Casualty Actuarial Society (CAS). Coursework towards the Certificate in Actuarial Studies can be used for credit towards the Bachelor's degree in Mathematics. Students in the certificate program have access to resources provided by the UNC Charlotte Actuarial Science program, such as information sessions by employers, presentations by actuaries, and networking events. The certificate may be pursued concurrently with any of the undergraduate degree programs at UNC Charlotte.

Admission Requirements

Current UNC Charlotte Undergraduate Students

To be admitted into the Certificate in Actuarial Studies program, students who already have completed a Bachelor's degree must meet the University requirements for admission into undergraduate certificate programs. See University Admission Requirements.

Their undergraduate coursework must include Calculus I, II, III or equivalent courses. For students in either the B.A. or B.S. in Mathematics or the B.S. in Math for Business programs at UNC Charlotte, a form to declare the certificate is available on the Department of Mathematics and Statistics webpage.

Certificate Requirements

The certificate requires 18 credit hours of mathematics and Statistics coursework that prepare students for Actuarial Exams and VEE Credits. Note that MATH 3227 and MATH 3228 are prep courses for Exam FM - Financial Mathematics, STAT 3122 and STAT 3123 for Exam P and VEE Probability, MATH 4228 and STAT 4227 for Exam FAM - Fundamentals of Actuarial Mathematics, MATH 4229 for Exam ALTAM - Advanced Long Term Actuarial Mathematics, and STAT 3110 and STAT 3150 for Exam SRM - Statistics for Risk Modeling.

Core Courses (12 credit hours)

MATH 3227 - Mathematical Theory of Interest and Applications (3)
MATH 3228 - Financial Mathematics and General Cash Flows (3)
MATH 4228 - Life Insurance Mathematics (3)
STAT 3122 - Probability and Statistics I (3)

Elective Courses (6 credit hours)

Select two of the following:

MATH 4051 - Computer Exploration and Generation of Data (3)
MATH 4229 - Advanced Life Insurance Mathematics (3)
STAT 3110 - Applied Regression (3)
STAT 3123 - Probability and Statistics II (3)
STAT 3150 - Time Series Analysis (3)
STAT 3180 - Predictive Analytics (3)
STAT 4227 - Loss Models and Applications (3)

Optional Courses

Students registered in the Certificate for Actuarial Studies program are eligible and encouraged to take additional courses for VEE Credits and Technical Skills from the following:

ACCT 2121 - Principles of Accounting I (3)
ECON 2101 - Principles of Economics - Macro (3)

- ECON 2102 - Principles of Economics - Micro (3)
- FINN 3120 - Financial Management (3)
- MATH 4128 - Risk Theory (3)
- STAT 4116 - Statistical Computing (3)

Certificate Total = 18 Credit Hours

Honors Program in Mathematics

The honors program in mathematics stimulates the imagination and deepen the understanding of students by encouraging independent study, and to provide recognition of exceptional achievements in mathematics. Students who complete the requirements of the program graduate with honors in mathematics.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Admission to the Honors Program in Mathematics is granted by the Department of Mathematics and Statistics, based on the following minimum requirements:

- At least 20 credit hours in major related courses, including 9 credit hours from:
 - MATH 2120 or MATH 2241
 - MATH 2164 or MATH 2171
 - MATH 3163 or STAT 3110
- A minimum GPA of 3.25 in all mathematics (MATH), statistics (STAT), and operations research (OPRS) courses
- A minimum overall GPA of 3.0

Interested students must contact the Honors Director of the Department of Mathematics and Statistics for admission to the program. Once the Director verifies the minimum requirements, the student must select a mathematics faculty member who is willing to serve as an honors advisor to develop a research project culminating in a thesis. The student must also choose one or two readers for the thesis. In order to graduate with honors, the University requires that students be admitted to honors candidacy at least two semesters before graduation.

Course Requirements

Enrollment in MATH 3790 indicates that the student is officially enrolled in the Mathematics Honors Program. MATH 3791 must culminate in an honors thesis approved by the advisor and the readers. Note that MATH 3791 replaces MATH 3689.

- MATH 3790 - Junior Honors Seminar (3)
- MATH 3791 - Senior Honors Tutorial (3)

Progression Requirements

The requirements for graduation with honors are:

- Completion of all requirements for a Major in Mathematics or Mathematics for Business with a minimum GPA of 3.25 in the major
- Completion of the Senior Honors Seminar (MATH 3791) with a grade of A and a minimum GPA of 3.5 in both Honors Seminars

- Oral presentation of the honors thesis
- Recommendation by the Honors Director of the Department of Mathematics and Statistics that the student can graduate with honors
- Completion of the Application to Candidacy process for graduating with Honors, as directed by the Honors College

Cooperative Education Program

A student may participate in the Mathematics Cooperative Education Program in either the parallel or alternate track. The parallel track combines part-time academic study and part-time cooperative experience during the same semester, while the alternate track alternates semesters totally devoted to work with semesters totally devoted to academic study. Students in the Mathematics Cooperative Education Program must participate in a minimum of two semesters in the program. Students who are in good standing with the University, have a minimum overall GPA of 2.5, and have completed 30 credit hours are eligible to apply. Transfer students are required to complete 12 credit hours at the University prior to application. Students interested in participating in the program should contact the Coordinator of Undergraduate Programs in the Department of Mathematics and Statistics or the University Career Center for information.

Early Entry: Master of Science in Mathematics

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Minimum 3.3 GPA in the major
- Acceptable scores on GRE, but exceptional undergraduate students with Junior or Senior standing and a cumulative GPA of 3.5 or above may receive an automatic waiver of the GRE requirement
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Early Entry: Master of Science in Mathematical Finance

For details, see the College of Business section of this *Catalog* under the "Department of Finance" heading.

Department of Physics and Optical Science

physics.charlotte.edu

Undergraduate Programs

- **B.A. in Physics**
 - Honors Program
- **B.S. in Physics**
 - Honors Program
- **B.S. in Physics and B.S. in Electrical Engineering Dual Degree** (*see College of Engineering section under the Department of Electrical and Computer Engineering heading*) **** This program is under revision. ****
- **B.A. in Physics and B.S. in Mechanical Engineering Dual Degree** (*see College of Engineering section under the Department of Mechanical Engineering and Engineering Science heading*) **** This program is under revision. ****
- **Minor in Physics**
- **Early Entry: M.S. in Applied Physics**
- **Early Entry: M.S. in or Ph.D. in Optical Science and Engineering**

A Major in Physics can lead to many challenging, exciting, and productive careers. Students majoring in physics enter a variety of technical fields, attend medical school, teach in high school, or attend graduate school. Research physicists work in industry and government, in laboratories and hospitals, and on university campuses.

The Department of Physics and Optical Science offers both a Bachelor of Arts (B.A.) and a Bachelor of Science (B.S.) degree. These degrees are intended for students interested in working in industry or attending graduate school in physics or a related field.

The Bachelor of Art degree is appropriate for students seeking an in-depth understanding of physics within the context of a broader education. This curriculum allows the greatest freedom in choosing electives offered by other departments and is ideal for students wishing to pursue double majors, matching physics with another discipline or who plan to teach physics in high school.

The Bachelor of Science degree is appropriate for students planning to pursue physics as a professional career working in a technical industry, either immediately after graduation or after graduate study in physics or a related field.

In addition, the department offers dual degree programs in Physics and Electrical, or Mechanical Engineering, where Engineering students at UNC Charlotte have the opportunity to earn both an engineering degree

and a B.A. in Physics degree simultaneously.

All of the degrees in physics are very structured – one class builds on another. Students should declare the major in their freshman or early in their sophomore year, so that all required classes can be completed in 4 years.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Arts in Physics

The Bachelor of Art degree is appropriate for students seeking an in-depth understanding of physics within the context of a broader education. This curriculum allows the greatest freedom in choosing electives offered by other departments, and is ideal for students wishing to pursue double majors, matching physics with another discipline.

Admission Requirements

Freshmen

- See University Admission Requirements
- Minimum GPA: n/a

Transfers

- See University Admission Requirements
- Minimum GPA: 2.0
- Transferable Credit Hours: 24

Currently Enrolled Students

- Declaration of Major: Students should declare a Physics major in their Freshman or Sophomore year.

Degree Requirements

A Major in Physics leading to the B.A. degree consists of at least 39 credit hours of physics courses (PHYS).

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the Klein College of Science Foreign Language Requirement.

Foundation Courses (22 credit hours)

- PHYS 1000 - New Student Seminar (1)
- PHYS 2101 - Physics for Science and Engineering II (3)*
- PHYS 2101L - Physics for Science and Engineering II Laboratory (1)*
- PHYS 2102 - Physics for Science and Engineering II (3)*
- PHYS 2102L - Physics for Science and Engineering II Laboratory (1)*
- CHEM 1251 - General Chemistry I (3)
- CHEM 1251L - General Chemistry I Lab (1)
- MATH 1241 - Calculus I (3)**
- MATH 1242 - Calculus II (3)
- MATH 2241 - Calculus III (3)

*Under special circumstances, and with the approval of the Undergraduate Studies Committee, PHYS 1101, PHYS 1101L, PHYS 1102, and PHYS 1102L may be substituted for the PHYS 2101-2102 sequence.

**Freshmen should complete MATH 1241 before the beginning of their second year.

Major Courses (27 credit hours)

- PHYS 3101 - Topics and Methods of General Physics (3)
- PHYS 3102 - Physics for Science and Engineering III (3)
- PHYS 3121 - Classical Mechanics I (3)
- PHYS 3141 - Introduction to Modern Physics (3)
- PHYS 3210 - Introduction to Computational Physics (3)
- PHYS 3220 - Mathematical Methods in Physics (3)
- PHYS 4231 - Electromagnetic Theory I (3)
- PHYS 4241 - Quantum Mechanics I (3)
- PHYS 3282 - Advanced Laboratory in Modern Physics (3)

Restricted Elective Courses (6 credit hours)

Select two of the following not already taken as a Major Course:***

- PHYS 3160 - Stellar Astrophysics (3)
- PHYS 3282 - Advanced Laboratory in Modern Physics (3)
- PHYS 3283 - Advanced Laboratory in Classical Physics (3)
- PHYS 4110 - Introduction to Biomedical Optics (3)
- PHYS 4140 - Nuclear Physics (3)
- PHYS 4151 - Thermal Physics (3)
- PHYS 4181 - Solid State Physics (3)
- PHYS 4222 - Classical Mechanics II (3)
- PHYS 4232 - Electromagnetic Theory II (3)
- PHYS 4242 - Quantum Mechanics II (3)
- PHYS 4271 - Waves and Optics (3)
- PHYS 4281 - Advanced Laboratory in Modern Optics (3)

***PHYS 3400, PHYS 3500, PHYS 3900 or PHYS 4000 may be used to fulfill the PHYS course requirements only if approved in advance for this purpose by the Undergraduate Studies Committee.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Major courses must be completed with grades of C or above.

Teacher Licensure

Students interested in teaching physics in high school should take both PHYS 3282 and PHYS 3283. In addition to meeting the requirements for the physics degree, students who plan to become licensed teachers must have a Minor in Secondary Education. These students should contact the Office of Teacher Education Advising and Licensure (TEAL) in the College of Education regarding teacher licensure.

Bachelor of Science in Physics

The Bachelor of Science degree is appropriate for students planning to pursue physics as a professional career, either immediately after graduation in a physics-related industry or after graduate study in physics or a related field.

Admission Requirements

Freshmen

- See University Admission Requirements
- *Minimum GPA:* 2.0 (cumulative and Physics)
- *Pre-Major/Prerequisite Courses:* Complete the following with grades of C or above and no more than 2 attempts per course:
 - PHYS 2101
 - PHYS 2102
 - PHYS 3101

Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.0 (cumulative and Physics)
- *Pre-Major/Prerequisite Courses:* Complete the following with grades of C or above and no more than 2 attempts per course:
 - PHYS 2101
 - PHYS 2102
 - PHYS 3101
- *Declaration of Major:* Transfer students may request to declare a Major in Physics leading to the B.S. degree if the above requirements were met at their previous institution(s). Otherwise, they are eligible to declare the major after completing the above requirements.
- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Declaration of Major:* Students should declare a Physics major in their Freshman or Sophomore year. Current UNC Charlotte undergraduate students seeking to change their major to physics

may request to declare a Major in Physics leading to the B.S. degree if they have completed the above requirements.

Degree Requirements

A Major in Physics leading to the B.S. degree consists of a minimum of 54 credit hours of physics courses (PHYS).

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the Klein College of Science Foreign Language Requirement.

Foundation Courses (22 credit hours)

- PHYS 1000 - New Student Seminar (1)
PHYS 2101 - Physics for Science and Engineering II (3)
PHYS 2101L Physics for Science and Engineering II Laboratory (1)
PHYS 2102 - Physics for Science and Engineering II (3)
PHYS 2102L - Physics for Science and Engineering II Laboratory (1)
CHEM 1251 - General Chemistry I (3)
CHEM 1251L - General Chemistry I Lab (1)
MATH 1241 - Calculus I (3)*
MATH 1242 - Calculus II (3)
MATH 2241 - Calculus III (3)

**Freshmen should complete MATH 1241 before the beginning of their second year.*

Major Courses (42 credit hours)

- PHYS 3101 - Topics and Methods of General Physics (3)
PHYS 3102 - Physics for Science and Engineering III (3)
PHYS 3121 - Classical Mechanics I (3)
PHYS 3141 - Introduction to Modern Physics (3)
PHYS 3210 - Introduction to Computational Physics (3)
PHYS 3220 - Mathematical Methods in Physics (3)
PHYS 3282 - Advanced Laboratory in Modern Physics (3)
PHYS 4151 - Thermal Physics (3)
PHYS 4222 - Classical Mechanics II (3)
PHYS 4232 - Electromagnetic Theory II (3)
PHYS 4231 - Electromagnetic Theory I (3)
PHYS 4241 - Quantum Mechanics I (3)
PHYS 4271 - Waves and Optics (3)
PHYS 4281 - Advanced Laboratory in Modern Optics (3)

Restricted Elective Courses (6 credit hours)

*Select two of the following**:*

- PHYS 3160 - Stellar Astrophysics (3)
PHYS 3283 - Advanced Laboratory in Classical Physics (3)
PHYS 4110 - Introduction to Biomedical Optics (3)
PHYS 4140 - Nuclear Physics (3)
PHYS 4181 - Solid State Physics (3)
PHYS 4242 - Quantum Mechanics II (3)

*** PHYS 3900 or PHYS 4000 may be used to fulfill the PHYS course*

requirements only if approved in advance for this purpose by the Undergraduate Studies Committee. Students planning for graduate study in physics are strongly advised to take PHYS 4242 as part of their 3000/4000 level elective credit hours.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Courses in physics (PHYS) toward the major must all be completed with grades of C or above.

Teacher Licensure

In addition to meeting the requirements for the physics degree, students who plan to become licensed teachers must have a Minor in Secondary Education. These students should contact the Office of Teacher Education Advising and Licensure (TEAL) in the College of Education regarding teacher licensure.

Minor in Physics

A Minor in Physics requires a minimum of 17 credit hours of physics courses.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

Students may select from two options to complete the Minor in Physics. Option 1 is for students who have completed the calculus-based introductory physics course. Option 2 is for students who have completed the algebra-based introductory physics course.

Option 1

PHYS 2101 - Physics for Science and Engineering I (3)
PHYS 2101L - Physics for Science and Engineering I Lab (1)
PHYS 2102 - Physics for Science and Engineering II (3)
PHYS 2102L - Physics for Science and Engineering II Lab (1)
PHYS 3101 - Topics and Methods of General Physics (3)
PHYS 3141 - Introduction to Modern Physics (3)
PHYS xxxx - Physics Elective Course (3)*

Option 2

PHYS 1101 - Introductory Physics I (3)
PHYS 1101L - Introductory Physics I Laboratory (1)
PHYS 1102 - Introductory Physics II (3)
PHYS 1102L - Introductory Physics II Laboratory (1)
PHYS 3101 - Topics and Methods of General Physics (3)
PHYS 3141 - Introduction to Modern Physics (3)
PHYS xxxx - Physics Elective Course (3)*

***Elective Courses**

The PHYS elective course must be selected from the list below of approved PHYS courses at the 3000- or 4000-level.

PHYS 3101 - Topics and Methods of General Physics (3)

PHYS 3102 - Physics for Science and Engineering III (3)
PHYS 3121 - Classical Mechanics I (3)
PHYS 3141 - Introduction to Modern Physics (3)
PHYS 3160 - Stellar Astrophysics (3)
PHYS 3210 - Introduction to Computational Physics (3)
PHYS 3220 - Mathematical Methods in Physics (3)
PHYS 3282 - Advanced Laboratory in Modern Physics (3)
PHYS 3283 - Advanced Laboratory in Classical Physics (3)
PHYS 4110 - Introduction to Biomedical Optics (3)
PHYS 4140 - Nuclear Physics (3)
PHYS 4151 - Thermal Physics (3)
PHYS 4181 - Solid State Physics (3)
PHYS 4222 - Classical Mechanics II (3)
PHYS 4231 - Electromagnetic Theory I (3)
PHYS 4232 - Electromagnetic Theory II (3)
PHYS 4241 - Quantum Mechanics I (3)
PHYS 4242 - Quantum Mechanics II (3)
PHYS 4271 - Waves and Optics (3)
PHYS 4281 - Advanced Laboratory in Modern Optics (3)

Note: PHYS 3900 or PHYS 4000 may also be used to fulfill the 17-credit hour requirement only if approved in advance for this purpose by the Undergraduate Studies Committee.

Minor Total = 17 Credit Hours

Progression Requirements

PHYS courses must be completed with a GPA of C or above.

Honors Program in Physics

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

To obtain a degree with honors in physics, students must:

- Maintain a minimum GPA of 3.0 in all physics courses
- Complete PHYS 3900
- Successfully present the results of their project to a panel of faculty members
- Complete the Application to Candidacy process for graduating with honors, as directed by the Honors College

The honors notation will appear on a student's official transcript. Details are available on the Department of Physics and Optical Science website.

Cooperative Education Program

In the Cooperative Education Program, students complete their lower-division coursework and, after being formally accepted as a co-op student, alternates periods of academic coursework with periods of full-time paid employment in an area mutually agreed upon by the student, an employer, and the University. Students who are in good standing with the University, have a minimum overall GPA of 2.5, and have completed 30 credit hours are eligible to apply. Transfer students are required to complete 12 credit hours at the University prior to application. Further information regarding the application procedure for admission into this program can be obtained from the University Career Center.

Early Entry: Master of Science in Applied Physics

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Programs to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Acceptable scores on the appropriate graduate standardized test (e.g., GRE) (*Note: The GRE requirement is waived for Early Entry Program applicants who are Physics majors and meet all other requirements.*)
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Accelerated Master's Program

(for High School Seniors and UNC Charlotte Undergraduate Freshmen)

Academically talented high school seniors and UNC Charlotte undergraduate freshmen are encouraged to apply to an Accelerated Master's Program to begin work toward both undergraduate and graduate degrees in their Freshman year.

Admission Requirements

- See University Admission Requirements
- Minimum high school GPA of 3.75 (on a 4.0 scale)
- Minimum score of 1220 on SAT

Progression Requirements

Students must maintain a strong academic record at both the undergraduate and graduate levels with a cumulative GPA of 3.0 or above.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on the Accelerated Master's Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/accelerated-masters.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Early Entry: Master of Science or Ph.D. in Optical Science and Engineering

Exceptional undergraduate students at UNC Charlotte may apply to one of these Early Entry Programs to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Acceptable scores on the GRE General Test (*Note: The GRE General Test requirement is waived for Early Entry Program applicants who have a minimum 3.4 GPA in the major*)
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for these degree programs, see the individual program listings in the *Graduate Catalog*.

School of **Professional Studies**

School of Professional Studies

professional.charlotte.edu

The UNC Charlotte School of Professional Studies ensures that all learners, regardless of age, level of experience, or previous education, have opportunities to learn, grow, and achieve their personal and professional goals with a UNC Charlotte education. We believe that everyone deserves lifetime access to education that enables a lifelong journey of personal and professional growth.

Online Academic Programs

Charlotte Online extends learning opportunities to learners hoping to advance their careers on their own time. Our growing selection of online and distance education programs are taught by award-winning faculty and are nationally recognized for quality. Students can connect to campus from anywhere in the U.S. and enroll in undergraduate and graduate programs to fit their needs in industries like business, healthcare, education, engineering, data and computing, and more.

Visit Charlotte Online at: professional.charlotte.edu/online for more details.

Professional Development

These programs, offered through the university's School of Professional Studies, may include certificates, microcredentials, courses, and workforce development solutions for learners and organizations and are open for public enrollment. Professional development programs provide opportunities for upskilling and re-skilling in flexible, short-format options designed to fit into busy schedules. Many programs also support professionals in achieving or maintaining professional licensure. Learners may earn continuing education credits in select courses as well as credentials to enhance their resume or advance in their career. Visit the School of Professional Studies at: professional.charlotte.edu for more information.

Corporate Training and Executive Education

UNC Charlotte Corporate Training and Executive Education helps unlock your workforce's potential with fully-customized professional development training programs tailored to your organization's needs that build skill-centered results and lasting impact. Designed to empower individuals at every level – from front-line supervisors to senior executives – our programs blend the latest industry insights with practical skills development, driving innovation, productivity, and leadership excellence

The Corporate Training and Executive Education difference is an integrated approach that combines strategic partnerships, talent acquisition and talent development solutions.

UNC Charlotte Corporate Training and Executive Education serves businesses and organizations with Custom Solutions and Talent Pathways:

- Through Custom Solutions, we create and customize strategically-designed training programs for organizations that build skill-centered results and lasting impact.
- Through Talent Pathways we consult with clients to map custom pathways through academic education, professional training, custom learning solutions, and associated services to meet their talent management objectives.

Visit <https://corporatetraining.charlotte.edu/> for more details.

Undergraduate Programs

Undergraduate Programs

- **B.S. in Professional Studies**
- **Project Management, Undergraduate Certificate**

Bachelor of Science in Professional Studies

The multi/interdisciplinary major in Professional Studies is intentionally designed to allow transfer and returning students to build on past educational and professional experiences and work with faculty and professional staff to grow knowledge and skills needed to secure employment in a desired field. Students complete a plan of study that includes a core of applied professional skills, an exploration of human social relationships and institutions, a professional competency series, and culminates in a capstone project.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Admission Requirements

Transfers

The Professional Studies degree is available to transfer students and returning degree-seeking UNC Charlotte undergraduate students.

Prospective students interested in the Professional Studies degree should have at least 60 transferable credit hours. A maximum of 64 credit hours from two-year institutions is allowed. See Academic Policy for details. Transfer students with an Associate degree that does not meet the General Education exemption will have their prior coursework evaluated upon application and may qualify for admission directly to the Professional Studies degree or the Professional Studies pre-major. Prospective and newly admitted students will consult with the Office of Adult Students and Extended Services (OASES) for advising. Students who do not have 60 transferable credit hours but otherwise meet the criteria for admission will be admitted to UNC Charlotte as a pre-major where they will work with an OASES advisor to secure admission to the Professional Studies program.

In addition to the online application and required fee, official transcripts from every college attended, and an official high school transcript, the following requirements apply:

- Applicants must present an overall 2.0 grade point average according to calculations performed by the Undergraduate Admissions office.
- Internationally-educated students must have their foreign credentials translated and evaluated by an accredited credential evaluation service. Transfer applicants must have a "course by course report" completed by the service, and they must present the equivalent of a high school diploma in addition to college-transferable coursework.
- Applicants must be in good standing and eligible to return to the last institution attended.

Currently Enrolled Students

- **Declaration of Major:** Students must have a 2.0 cumulative GPA and have completed at least 60 earned credit hours. The final grades of the prerequisite courses must be posted on their transcript.
- Submit the Professional Studies Major Application to request the Professional Studies major.

Degree Requirements

General Education Courses (37-43 credit hours)

For details on required courses, refer to the General Education Program. Some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Credit for Prior Learning (optional)

Up to 23 credit hours (see policy for transfer credit).

Major Core Courses (18 credit hours)

Sociology Courses (6 credit hours)

Courses may not be double counted as focus area courses.

SOCY 2115 - Introduction to Organizations (3)

SOCY 4111 - Social Inequality (3)

or SOCY 4112 - Sociology of Work (3)

or SOCY 4114 - Professionalism in Sociology (3)

or SOCY 4115 - Organizational Sociology (3)

Professional Studies Courses (12 credit hours)

Courses used to satisfy professional competency may not be double counted as a focus area course.

Professional Competency Courses (9 credit hours)

Nine credit hours must be completed in any course with a PROS prefix within any of the Professional Competencies. No more than 6 credit hours of special topics (PROS 3000) may be used to satisfy professional competency and may not be double counted as an elective.

Project Management Series

PROS 3101 - Project Management: Foundations (3)

PROS 3102 - Project Management: Practitioner (3)

PROS 3103 - Project Management: Specialist (3)

PROS 3104 - Project Management: Introduction to Agile (3)
PROS 3105 - Project Management: Process Improvement & Process Design (3)
PROS 4101 - Project Management: Advanced Roles of a Project Manager (3)

Leadership Essentials Series

PROS 3201 - Leadership Essentials: Foundations (1)
PROS 3202 - Leadership Essentials: Practitioner (1)
PROS 3203 - Leadership Essentials: Specialist (1)

Human Resource Management Series

PROS 3301 - Human Resource Management: Foundations (3)
PROS 3302 - Human Resource Management: Practitioner (3)
PROS 3303 - Human Resource Management: Specialist (3)
PROS 3304 - The Role of Human Resource Management in an Organization (3)
PROS 3305 - Human Resource Development and Workplace Planning (3)
PROS 3306 - Workforce Acquisition and Talent Development (3)
PROS 4301 - Human Resource Management in a Changing, Global Environment (3)

Capstone Course (3 credit hours)

PROS 4600 - Professional Studies Capstone (1 to 3)

Area Courses or Optional Minor (12 credit hours)

Complete at least twelve credit hours from approved course list or optional minor. Only three credit hours from the 1000-level may be counted toward the area. A minor may be substituted for the twelve credit hours. Appropriate courses may be substituted with advisor approval.

Area Courses (12 credit hours)

Accounting

Select from the following:

ACCT 2xxx - 4xxx

Anthropology

Select from the following:

ANTH 1101 - Introduction to Anthropology (3)
ANTH 3112 - Globalization and Culture (3)
ANTH 3113 - Economic Anthropology (3)
ANTH 3116 - Cultures and Conflicts (3)
ANTH 3117 - Narratives and Conflicts (3)
ANTH 3132 - Aging and Culture (3)
ANTH 3135 - Origins of Globalization (3)
ANTH 3136 - Globalization and Resistance (3)
ANTH 3160 - Gender, Culture, and Communication (3)
ANTH 4120 - Intercultural Communications (3)

Architecture Studies

ARCH 2xxx-4xxx

Art: Graphic Design

ARTG 2xxx-4xxx

Business Information Systems

INFO 2xxx-4xxx

Capitalism Studies

Select from the following:

CAPI 2050 - Topics in Capitalism Studies (3)
CAPI 2100 - Introduction to Capitalism Studies (3)
CAPI 3050 - Topics in Capitalism Studies (3)
CAPI 4050 - Topics in Capitalism Studies (3)

Civil and Environmental Engineering

CEGR 2xxx-4xxx

Civil/Environmental Engineering Tech

ETCE 1xxx-4xxx

Only three credit hours from the 1000-level may be counted toward ETCE area courses.

Communication Studies

Select from the following:

COMM 1101 - Public Speaking (3)
COMM 2102 - Advanced Public Speaking (3)
COMM 2103 - Argumentation and Debate (3)
COMM 2105 - Small Group Communication (3)
COMM 2107 - Interpersonal Communication (3)
COMM 3052 - Topics in Media & Technology Studies (3)
COMM 3054 - Topics in Organizational Communication (3)
COMM 3120 - Media, Technology & Communication (3)
COMM 3125 - New Media for Communications (3)
COMM 3130 - Rhetoric and Public Culture (3)
COMM 3135 - Leadership, Communication, and Group Dynamics (3)
COMM 3136 - Leadership, Service, and Ethics (3)
COMM 3141 - Organizational Communication (3)

Computing and Information Systems

ITSC 1xxx-4xxx

Only three credit hours from the 1000-level may be counted toward ITSC area courses.

Computer Science

ITCS 1xxx-4xxx

Only three credit hours from the 1000-level may be counted toward ITCS area courses.

Construction Management

CMET 1xxx-4xxx

Only three credit hours from the 1000-level may be counted toward CMET area courses.

Criminal Justice

Select from the following:

CJUS 1100 - Introduction to Criminal Justice (3)
CJUS 3363 - Mediation and Conflict Resolution (3)
CJUS 3381 - Security and Loss Prevention (3)
CJUS 4362 - Computer Crime (3)
CJUS 4363 - Gender, Race, and Justice (3)
CJUS 4370 - Data Analytics and Crime (3)
CJUS 4372 - Drug Analytics (3)
CJUS 4373 - Intelligence Analysis and Security Analytics (3)
CJUS 4374 - Geospatial Analytics and Crime (3)
CJUS 4376 - Social Network Analysis (3)
CJUS 4377 - Crime Measurement and Data Visualization (3)

Data Science

DTSC 1xxx-4xxx
Only three credit hours from the 1000-level may be counted toward DTSC area courses.

Economics
ECON 1xxx-4xxx
Only three credit hours from the 1000-level may be counted toward ECON area courses.

Education - Learning, Design, Tech
ELDT 4xxx

Electrical and Computer Engineering
ECGR 2xxx-4xxx

Electrical Engineering Technology
ELET 1xxx-4xxx
or **ETEE** 1xxx-4xxx
Only three credit hours from the 1000-level may be counted toward ELET or ETEE area courses.

Energy and Electromechanical Systems
ENER 4xxx

Engineering
ENGR 1xxx-4xxx
Only three credit hours from the 1000-level may be counted toward ENGR area courses.

Engineering Technology
ETGR 1xxx-4xxx
Only three credit hours from the 1000-level may be counted toward ETGR area courses.

English
Select from the following:
ENGL 2116 - Introduction to Technical Communication (3)
ENGL 3162 - Language and the Virtual World (3)
ENGL 3180 - Language and Digital Technology (3)
ENGL 4008 - Topics in Advanced Technical Communication (3)
ENGL 4180 - Theories of Technical Communication (3)
ENGL 4181 - Writing and Designing User Documents (3)
ENGL 4182 - Information Design and Digital Publishing (3)
ENGL 4183 - Editing with Digital Technologies (3)

Entrepreneurship
ENTR 3xxx

Film Studies
Select from the following:
FILM 2201 - Introduction to Film (3)
FILM 3120 - The Fundamentals of Video/Film Production (3)
FILM 3121 - Cinematography (3)
FILM 3220 - Introduction to Screenwriting (3)
FILM 3221 - Intermediate Screenwriting: Feature Film (3)
FILM 4120 - Production and Directing (3)
FILM 4121 - Documentary Film Production (3)
FILM 4220 - Film Festivals: Production and Theory (3)
FILM 4221 - Community-Based Film Production (3)

Finance
FINN 3xxx-4xxx

Fire Safety Engineering Technology
ETFS 1xxx-4xxx
Only three credit hours from the 1000-level may be counted toward ETFS area courses.

Geography
GEOG 1xxx-4xxx
Only three credit hours from the 1000-level may be counted toward GEOG area courses.

Gerontology
Select from the following:
GRNT 2100 - Aging and the Lifecourse (3)
GRNT 3125 - Older Worker and Retirement (3)
GRNT 3132 - Aging and Culture (3)
GRNT 4110 - Sociology of Aging (3)
GRNT 4150 - Older Individual and Society (3)
GRNT 4260 - Women: Middle Age and Beyond (3)

Health and Medical Humanities
HHUM 2xxx-4xxx

Health Systems Management
HSMT 2xxx-4xxx

Industrial Engineering Technology
ETIN 3xxx-4xxx

International Studies
Select from the following:
INTL 3112 - Globalization and Culture (3)
INTL 3115 - Globalization and Digital Media (3)
INTL 3116 - Cultures and Conflicts (3)
INTL 3117 - Narratives and Conflicts (3)
INTL 3127 - Global Media (3)
INTL 3131 - Diplomacy in a Changing World (3)
INTL 3135 - Origins of Globalization (3)
INTL 3137 - International Human Rights (3)
INTL 3151 - International Political Economy (3)

Journalism
JOUR 2xxx-4xxx

Legal Studies
LEGL 1xxx-4xxx
Only three credit hours from the 1000-level may be counted toward LEGL area courses.

Management
MGMT 3xxx-4xxx

Manufacturing Engineering Technology
ETMF 3xxx

Marketing
MKTG 3xxx-4xxx

Mathematics

MATH 1xxx-4xxx

Only three credit hours from the 1000-level may be counted toward MATH area courses.

Mechanical Engineering

MEGR 1xxx-4xxx

Only three credit hours from the 1000-level may be counted toward MEGR area courses.

Mechanical Engineering Technology

ETME 1xxx-4xxx

Only three credit hours from the 1000-level may be counted toward ETME area courses.

Military Science

MSCI 1xxx-4xxx

Only three credit hours from the 1000-level may be counted toward MSCI area courses.

Nursing

NURS 2xxx-4xxx

Operations and Supply Chain Management

OPER 3xxx

Operations Research

OPRS 3xxx-4xxx

Philosophy

PHIL 1105 - Critical Thinking (3)

PHIL 2105 - Deductive Logic (3)

PHIL 3210 - Ethical Theory (3)

PHIL 3310 - IT Ethics (3)

PHIL 3320 - Engineering Ethics (3)

PHIL 3340 - Business Ethics (3)

PHIL 3810 - Social and Political Philosophy (3)

PHIL 3990 - Topics and Identity/Society (3)

PHIL 4990 - Advanced Topics in Identity/Society (3)

Physics

PHYS 1xxx-4xxx

Only three credit hours from the 1000-level may be counted toward PHSY area courses.

Political Science and Public Administration

Select from the following:

POLS 1110 - American Politics (3)

POLS 2120 - Introduction to Public Policy (3)

POLS 3104 - Mass Media (3)

POLS 3119 - State and Local Government (3)

POLS 3125 - Health Care Policy (3)

POLS 3126 - Introduction to Public Administration (3)

POLS 3137 - International Human Rights (3)

POLS 3151 - International Political Economy (3)

POLS 3159 - Diplomacy in a Changing World (3)

POLS 3177 - Social & Political Philosophy (3)

POLS 4380 - Intelligence in a Democratic Society (3)

POLS 4381 - Critical Thinking Skills for Intelligence (3)

POLS 4383 - Analytic Writing and Briefing (3)

Professional Studies

PROS 3xxx

PROS courses cannot double count as major core courses. Students taking a PROS course from this area must select different courses outside the 6 hours of PROS major core courses.

Psychology

Select from the following:

PSYC 1101 - General Psychology (3)

PSYC 2302 - Introduction to Positive Psychology (3)

PSYC 2320 - Introduction to Industrial/Organizational Psychology (3)

PSYC 2350 - Introduction to Social Psychology (3)

PSYC 3120 - Industrial Psychology (3)

PSYC 3121 - Organizational Psychology (3)

PSYC 3123 - Social and Personality Development (3)

PSYC 3125 - Older Worker and Retirement (3)

PSYC 3201 - Motivation (3)

PSYC 3301 - Basic Processes in Psychological Assessment (3)

PSYC 4151 - Psychology of Personality (3)

Public Health Sciences

HLTH 2xxx - 4xxx

Social Work

Select from the following:

SOWK 1101 - The Field of Social Work (3)

SOWK 2182 - Human Behavior in the Social Environment I (3)

SOWK 2183 - Human Behavior in the Social Environment II (3)

SOWK 3120 - Diversity and Populations-at-Risk (3)

SOWK 3133 - Community Engagement and Outreach (3)

SOWK 3180 - Case Management (3)

SOWK 3199 - Professional Behaviors, Ethics, and Communication (3)

SOWK 3201 - Foundations of Social Welfare (3)

SOWK 3202 - Social Welfare Policy (3)

SOWK 4109 - Systems of Care for Vulnerable Populations (3)

SOWK 4365 - Grief and Loss Across the Lifespan (3)

Sociology

Select from the following:

SOCY 2100 - Aging and the Lifecourse (3)

SOCY 3125 - Older Worker and Retirement (3)

SOCY 3143 - Social Movements (3)

SOCY 3250 - Political Sociology (3)

SOCY 3251 - Political Sociology (3)

SOCY 3271 - Sociology of Culture (3)

SOCY 3325 - Community and Identity (3)

SOCY 4116 - Sociology of Economic Life (3)

SOCY 4117 - Sociology of Gender, Work, and Family (3)

SOCY 4140 - Social Networks (3)

SOCY 4150 - Older Individual and Society (3)

SOCY 4263 - Group Processes (3)

SOCY 4264 - Status Processes (3)

Software and Information Systems

ITIS 1xxx-4xxx

Only three credit hours from the 1000-level may be counted toward ITIS area courses.

Statistics

STAT 1xxx-4xxx

Only three credit hours from the 1000-level may be counted toward STAT area courses.

Systems Engineering
SEGR 2xxx-4xxx

Writing, Rhetoric, and Digital Studies

WRDS 1xxx-4xxx

Only three credit hours from the 1000-level may be counted toward WRDS area courses.

Optional Minor

Select any minor approved in consultation with advisor.

Unrestricted Elective Courses (0-30 credit hours)

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

A GPA of 2.0 in the major is required for graduation, as well as grades of C or above in all courses.

Project Management, Undergraduate Certificate

The Project Management certificate equips students with the expertise to oversee projects through all phases of its life cycle, emphasizing the application of project control and quality management theories. By engaging with a range of essential project management tools and methodologies, students refine skills in decision-making, resource alignment, and stakeholder communication, preparing them for effective and strategic project leadership.

This Project Management certificate meets the project management education requirements to qualify to take the Project Management Professional (PMP)® exam or Certified Associate in Project Management (CAPM)® exam.

Admission Requirements

The Undergraduate Certificate in Project Management is open to currently enrolled UNC Charlotte undergraduate students.

See University Admission Requirements.

Core Courses

PROS 3101 - Project Management: Foundations (3)

PROS 3102 - Project Management: Practitioner (3)

PROS 3103 - Project Management: Specialist (3)

Select 2 or 3 courses from the following (6-9 credit hours)

PROS 3104 - Project Management: Introduction to Agile (3)

PROS 3105 - Project Management: Process Improvement & Process Design (3)

PROS 4101 - Project Management: Advanced Roles of a Project Manager (3)

Elective Courses (0 - 3 credit hours)

PROS 3000 - Topics in Professional Studies (1 to 3)

PROS 3201 - Leadership Essentials: Foundations (1)

PROS 3301 - Human Resource Management: Foundations (3)

UCOL 3410 - Career Development Internship (1 to 3)

Total = 16 Hours

Progression Requirements

To earn the certificate, students must achieve a grade of C or higher in all required courses.

Honors College

Honors College

honorscollege.charlotte.edu

The Honors College offers academically motivated, high-potential learners from all communities access to opportunities for intellectual breadth, undergraduate research, service learning, and a community feeling within the context of a large public research university. Comprised of thirty distinct honors programs, each with its own admission and graduation requirements, the Honors College is a campus hub for undergraduate honors courses, enrichment opportunities, merit scholars programs, honors scholarships, study abroad, community service, faculty lectures, and University-wide advising for nationally competitive awards such as the Rhodes, Truman, and Goldwater Scholarships. An honors residence option in Levine Hall is also available for students in the Honors College, with priority for freshmen.

The University Honors Program in the Honors College

The University Honors Program (UHP) in the Honors College offers a unique, interdisciplinary undergraduate experience. The program centers around honors coursework and High Impact Practices (HIP). In addition to academic and professional development, the UHP offers a supportive community of students and faculty who mutually invest to help members develop to their fullest potential as scholar citizens. Students are encouraged to participate in varied enrichment activities, community engagement, leadership opportunities, internships, inquiry, and study abroad programs with the goal of broadening perspectives.

The UHP curriculum requires successful completion of HONR 1700, CTCM 2530 (honors sections only, unless entering UHP students already took CTCM 2530), 12 credit hours of honors electives, and completion of an honors capstone project. An Advanced Entry option is available for incoming, transfer, or continuing students with substantial early college, AP, transfer, or completed credit. Students in the UHP also may apply to a disciplinary honors program during their time at UNC Charlotte. The Honors College website maintains a current listing of all honors programs available at UNC Charlotte. Credit for certain honors courses in disciplinary honors programs may count toward the UHP requirements. As their culminating honors curricular requirement, UHP students complete a capstone project in the UHP or in their disciplinary honors program.

Admission Requirements

Students who may apply to the UHP include entering freshmen, transfer and continuing students in any major who: expect to be at UNC Charlotte for at least two years to complete their degree program, have a strong record of academic success, and feel they are a good fit with the UHP mission. Entering freshman must have an unweighted high school GPA of 3.2. Continuing students must have a GPA of 3.4 to apply. All members of UHP must maintain a 3.0 overall GPA, a 3.2 GPA in honors courses, and meet co-curricular expectations each semester.

Course Requirements

To graduate with University Honors distinction noted on the transcript, students must satisfy the following course requirements:

Required Courses

Students who enter UHP with existing credit for CTCM 2530 can be exempt from the required honors section.

HONR 1700 - University Honors Program Colloquium (1) (*with a grade of B or above*)

CTCM 2530 - Critical Thinking and Communication (3) (*honors sections only unless students already took this course prior to joining UHP typically taken in the sophomore year*)

Required Elective Courses

Select 12 credit hours of lower and/or upper division honors electives. At least 6 credit hours of honors elective courses must be at the upper division level (i.e., 3000 level or higher). No more than 6 credit hours of honors elective courses may be at the lower division level (i.e., 1000 or 2000 level). Lower division electives can include (a) honors sections of fundamental themes general education courses such as xxxx 1501-H, xxxx 1502-H, xxxx 1511-H, xxxx 1512-H, AMDM 1575-H, HIST 1575-H, POLS 1575-H, and/or CAPI 1575-H, or (b) 1000 or 2000 level honors sections offered through other departments such as, but not limited to, BINF 1101-H, ECON 2101-H, ECON 2102-H, and WRDS 2101-H. Note that students can count either ECON 2101-H or ECON 2102-H towards the UHP credit, but not both.

Students accepted as Advanced Entry may be exempted from 6 credit hours of lower division honors coursework if they enter with 60+ credit hours, and may be exempted from 3 credit hours of lower division honors coursework if they enter with 30-59 credit hours.

Required Capstone Courses

Students in the UHP must complete an honors capstone project. Students can satisfy this requirement by either applying to a disciplinary honors program and completing their capstone proposal and capstone thesis/project in their discipline (possibly leading to graduating with dual honors; see below), or they can complete their capstone project in the UHP by completing HONR 3790 and HONR 3791. Both the capstone proposal and capstone thesis/project must receive a grade of A for graduation with honors.

Other Requirements

- Complete the Application to Candidacy process for graduating

- with honors, as directed by the Honors College
- Maintain a minimum overall GPA of 3.0, and a 3.2 GPA in honors coursework
- Maintain good standing by enrolling in an average of 2 honors courses per year
- Maintain good standing by participating in required co-curricular engagement opportunities in the UHP (e.g., Community service for year 1 students, Honors Core Experiences [HCE] for years 2-4+ students)

Dual Honors

Students may graduate with dual honors by completing all departmental/college honors program requirements, in addition to the UHP requirements. In this case, the departmental/college capstone thesis/project coursework will satisfy the UHP capstone requirement. Students interested in this option should consult with the departmental/college honors program director about how to apply to their program and/or receive permission to complete their capstone course(s) and/or assignments.

UHP students in departmental/college honors programs with curricular requirements beyond a 2-course capstone sequence may also count one 3000- or 4000-level honors course toward their the UHP honors electives.

Study Abroad

The UHP students participating in a faculty-led, study abroad course (i.e., summer, fall, spring courses) may request up to 3 credit hours as an honors elective course at the 3000- or 4000-level through the UHP Canvas page.

Residence

UHP students are encouraged to live in the Honors College residence, Levine Hall, which provides an environment especially conducive to community-building, academic study and cooperative learning. Per UNC Charlotte policy, first-year students are required to live on campus, so they have first preference for living in Levine Hall. The Honors College office suite and seminar rooms are conveniently located in Levine Hall.

The Dubois Center

The Honors College offers some honors classes, an honors student lounge (5th floor), and several honors activities each semester at The Dubois Center campus in Uptown Charlotte. The UHP students are particularly encouraged to make use of honors spaces at The Dubois Center, easily accessible via light rail.

Student Association

All students in the UHP are members of the University Honors Program Student Association (UHPSA). This student-led organization facilitates the UHP student body meetings, social events, special discussions, student mentoring, and community service projects. All UHP students are required to attend the meetings and complete co-curricular experiences to remain in good standing.

Merit Scholars Programs

The Albert Engineering Leadership Scholars Program, Freeman Scholars, Johnson Scholars, and the Martin Scholars Program are housed in the Honors College; Albert Scholars are members of the UHP; Freeman,

Johnson, and Martin Scholars must be members of Arts and Architecture Honors Program (AAHP), Business Honors Program (BHP), or the UHP.

Honors Programs in Departments and Colleges

Many academic departments and colleges have disciplinary honors programs enabling students to graduate with honors distinction in their major department or college. This recognition will appear on students' official academic transcripts.

Honors programs in colleges include:

- College of Arts + Architecture
- College of Business
- College of Computing and Informatics
- College of Education
- College of Engineering

Honors programs in departments and interdisciplinary programs include:

- Africana Studies
- Anthropology
- Applied Physiology, Health, and Clinical Sciences
- Art History
- Biological Sciences
- Chemistry
- Communication Studies
- Criminal Justice and Criminology
- English
- Geography and Earth Sciences
- Global Studies
- History
- Languages, Cultures and Translation
- Latin American Studies
- Mathematics and Statistics
- Nursing
- Philosophy
- Physics and Optical Science
- Political Science and Public Administration
- Psychological Science
- Public Health and Health Systems Management
- Religious Studies
- Social Work
- Sociology

Information on how to apply to and graduate with disciplinary honors can be found in this *Catalog* under each academic discipline with an honors program.

Nationally Competitive Scholarships Advising

The Honors College, working with the University Endorsement Committee, supports students across campus who wish to apply for nationally and internationally competitive scholarships for advanced undergraduate study, leadership development, experiences abroad, and graduate programs. These scholarships, from a number of foundations and national organizations including Rhodes, Marshall, Harry S. Truman, Barry M. Goldwater, DAAD, Phi Kappa Phi, and the National Science Foundation, require extensive application procedures and faculty support. They are awarded to only the most outstanding applicants. For other awards, such as the Fulbright US Student Program, the Honors College collaborates with campus partners (i.e. The Office of Education Abroad). Students with exemplary academic records—importantly, combined with service and leadership—will be in the best position to excel in these awards competitions. Several of these awards require an on-campus review and institutional endorsement of completed applications. Students wishing to strengthen their applications may register for HONR 2720, offered regularly for competitive applicants across campus, whether they are in honors programs or not.

The Honors College also coordinates the UNC Charlotte Alumni Association Scholarships, which give preference to students in honors programs, as well as scholarships specifically for honors students: the Delbridge E. Narron Scholarship and Travel Award, and the Al Maisto Honors College Scholarship.

Honors Societies

The Honors College supports the campus chapters of three major national honors societies: Phi Beta Kappa, Phi Kappa Phi and Sigma Xi. Nominated students can be inducted into the societies and participate in chapter activities, such as guest speakers, community service projects and social events.

Course Descriptions

Course Descriptions

Course Descriptions

Course descriptions provide the following information:

- Subject prefix
- Course number
- Course title
- Credit hours assigned to the course
- UNC Charlotte General Education requirements that the course satisfies, if any or whether it is a Service Learning (**SL**) course
- Any course with which the course may be cross-listed
- Prerequisites and/or corequisites (if any)
- Brief description of the course content*
- If a course is graded as *Pass/No Credit* rather than with a letter grade
- Any restrictions on the number of times a course may be repeated

*The description may specify the number of class (lecture) and/or laboratory sessions and hours. If no class hours are given, the number of class hours per week is the same as the number of semester hours credit assigned to the course.

An example and explanation of a typical course description:

SUBJ 1234. Title of Course. (Credit Hours) (General Education Requirements Met or Service Learning Course Designation) Prerequisites/corequisites.
Brief description of course content.

Course Prefix

Courses offered for academic credit are listed by number within each subject and the subjects are listed alphabetically according to prefixes which are assigned as listed in the following columns.

PREFIX	SUBJECT
AAHP	Arts + Architecture Honors Program
ACCT	Accounting
AEEE	Applied Energy and Electromechanical Engineering
AERO	Aerospace Studies
AFRS	Africana Studies
AMDM	Foundations of American Democracy
AMST	American Studies
ANTH	Anthropology
ARBC	Arabic
ARCH	Architecture
ARTA	Art: Academic and Departmental
ARTB	Art: Basic Foundation Studios
ARTC	Art: Ceramics
ARTD	Art: Drawing
ARTE	Art: Education

Course Numbering System

Courses are identified by four-digit numbers following the course prefix. The first digit indicates the level of the course:

0001-0999 = specialty courses that prepare for future coursework

1000-2999 = lower division undergraduate courses

3000-4999 = upper division undergraduate courses

The following second digits designate special types of courses:

0 = topics

4 = internship, practica, clinical, and student teaching

5 = cooperative education

6 = seminars

7 = honors

8 = independent study

9 = research-based, thesis, and dissertation research

Note: If the letter L follows the course number, the course is a laboratory course.

Prerequisites and Corequisites

A *prerequisite* is a requirement that must be met (or a course that must be passed) before enrolling in a more advanced course. A *corequisite* is a course which should be taken in the same semester as another.

Cross-Listed Courses

A *cross-listed course* is a single which is simultaneously listed in the schedule of course offerings by one or more academic departments. They share the same meeting times, room, instructor(s), and curriculum. Therefore, ideally, they should also have the same course title. Students may only receive credit for the single section of the cross-listed course for which they are registered. Credit will not be awarded for a course where credit has been awarded for a cross-listed course.

Changes

Course descriptions and numbers are accurate at the time of publication of the *Catalog*. For the most current information, please consult with the academic department or the Class Schedule online at selfservice.charlotte.edu.

Arts + Architecture Honors Program (AAHP)

AAHP 2600. Introductory Honors Seminar. (1) Prerequisite(s): Acceptance in the College of Arts + Architecture Honors Program. Introduces Arts + Architecture Honors students to creative leadership, arts criticism, interdisciplinary interconnections among the spatial, visual, and performing arts, and the role of the arts in the community.

AAHP 3701. Honors Seminar in Dance. (3) Prerequisite(s): For students not enrolled in a University, College, or Departmental Honors Program, permission of instructor is required. Concentrated, in-depth study of a selected topic in the history, theory, and/or practice of dance. Topics and course content vary according to the interests and expertise of the faculty; however, the information and requirements are accessible to an interdisciplinary range of students from within and beyond the College of Arts + Architecture.

AAHP 3702. Honors Seminar in Architecture. (3) Prerequisite(s): For students not enrolled in a University, College, or Departmental Honors Program; permission of instructor is required. Concentrated, in-depth study of a selected topic in the history, theory, and/or practice of architecture. Topics and course content vary according to the interests and expertise of the faculty; however, the information and requirements are accessible to an interdisciplinary range of students from within and beyond the College of Arts + Architecture.

AAHP 3703. Honors Seminar in Music. (3) Prerequisite(s): For students not enrolled in a University, College, or Departmental Honors Program; permission of instructor is required. Concentrated, in-depth study of a selected topic in the history, theory, and/or practice of music. Topics and course content vary according to the interests and expertise of the faculty; however, the information and requirements are accessible to an interdisciplinary range of students from within and beyond the College of Arts + Architecture.

AAHP 3704. Honors Seminar in Theatre. (3) Prerequisite(s): For students not enrolled in a University, College, or Departmental Honors Program; permission of instructor is required. Concentrated, in-depth study of a selected topic in the history, theory, and/or practice of theatre. Topics and course content vary according to the interests and expertise of the faculty; however, the information and requirements are accessible to an interdisciplinary range of students from within and beyond the College of Arts + Architecture.

AAHP 3705. Honors Seminar in Art and Art History. (3) Prerequisite(s): For students not enrolled in a University, College, or Departmental Honors Program; permission of instructor is required. Concentrated, in-depth study of a selected topic in the history, theory, and/or practice of art. Topics and course content vary according to the interests and expertise of the faculty; however, the information and requirements are accessible to an interdisciplinary range of students from within and beyond the College of Arts + Architecture.

AAHP 3706. Interdisciplinary Honors Seminar. (3) Prerequisite(s): For students not enrolled in a University, College, or Departmental Honors Program, permission of instructor is required. Concentrated, in-depth study of a comparative or inter/multi-disciplinary topic in the history, theory, and/or practice of the visual and performing arts. Topics and course content vary according to the interests and expertise of the faculty; however, the information and requirements are accessible to an interdisciplinary range of students from within and beyond the College of Arts + Architecture.

AAHP 3790. Honors Candidacy Proposal Writing. (1) Production of a formal proposal describing the honors capstone project that you will complete next semester. Students will build the content for this proposal over the course of the semester. This assignment describes expectations and provides advice for completing the final product. Students should refer to it throughout the semester. For most students, the writing done in the proposal will form the foundation of the final capstone paper.

AAHP 3791. Honors Thesis. (3) Prerequisite(s): Permission of instructor and approval of a proposal through the Honors College Application to Candidacy process the semester prior to taking the course. An independent thesis project that combines a research agenda with appropriate exploratory practices for the student's discipline. In keeping with the nature of the disciplines of the College of Arts + Architecture, the final product of these theses may vary to include (but not be limited to) a written document, a performance, a concert, or an installation. In all cases, some written and graphic documentation of the ideas and process involved is required for the purposes of evaluation.

Accounting (ACCT)

ACCT 2121. Principles of Accounting I. (3) Prerequisite(s): Sophomore, Junior, or Senior standing; and MATH 1120, MATH 1241, MATH 1242, STAT 1220, STAT 1221, STAT 1222, or STAT 2122 with grade of C or above. Fundamental accounting principles, with emphasis on the use of financial accounting data and analysis of financial statements.

ACCT 2122. Principles of Accounting II. (3) Prerequisite(s): ACCT 2121 with grade of C or above and Sophomore, Junior, or Senior standing. An introduction to managerial accounting with an emphasis on using accounting information to make decisions.

ACCT 3300. Professional Development for Accountants. (1) Pre- or Corequisite(s): ACCT 3311 or ACCT 3323 with a grade of C or better; Accounting or Pre-Accounting majors. Focuses on the transition from student to the Accounting Professional. Students explore various career tracks within public accounting and private industry, along with considerations around pursuing the CPA and other certifications. Students learn how to navigate through the pipeline to employment, including enhancing their interviewing and networking skills, as well as finding and securing internship opportunities. Professional workplace conduct is taught along with the importance of strong ethical behavior.

ACCT 3311. Intermediate Financial Accounting I. (3) Prerequisite(s): College of Business major; ACCT 2121, ACCT 2122, ECON 2101, ECON 2102, INFO 2130, MATH 1120 or equivalent, and STAT 1220 or equivalent, with grades of C or above. Analysis of the financial reporting

requirements of corporations with emphasis on the conceptual framework and accounting for assets.

ACCT 3312. Intermediate Financial Accounting II. (3) Prerequisite(s): College of Business major; and ACCT 3311 with grade of C or above. A continuation of ACCT 3311 with emphasis on financial reporting for liabilities and stockholders' equity. Other special topics covered include the accounting for investments and the statement of cash flows.

ACCT 3323. Intermediate Accounting I. (3) Prerequisite(s): Belk College of Business major and ACCT 2121 with grade of C or above. Pre- or Corequisite(s): INFO 2130 with a grade of C or above. An introduction to the key concepts, processes, and techniques that support the financial reporting process. Topics include: the accounting cycle, the conceptual framework, primary financial statements and disclosure, and the use of present value techniques in accounting measurement.

ACCT 3324. Intermediate Accounting II. (3) Prerequisite(s): Belk College of Business major and ACCT 3323 with grade of C or above. A continuation of ACCT 3323 with emphasis on financial reporting of key balance sheet accounts along with their income statements effects.

ACCT 3325. Intermediate Accounting III. (3) Prerequisite(s): Belk College of Business major and ACCT 3324 with grade of C or above. A continuation of ACCT 3323 and ACCT 3324 with emphasis on financial reporting issues related to special topics, including the accounting for income taxes, pensions, investments, and leases.

ACCT 3330. Managerial Accounting and the Decision Process. (3) Prerequisite(s): College of Business major; and ACCT 2122 or ACCT 3323 with grade of C or above. The concepts associated with internal reporting and business management using accounting data. Techniques in using relevant data for planning, controlling, and decision making are taught. Other topics include: understanding cost behavior, how to accurately assign or allocate costs, developing strong budgeting practices, and learning about responsibility accounting. Excel and Data Analytics are used throughout the course, highlighting the importance of these in the professional world.

ACCT 3340. Accounting Information Systems. (3) Prerequisite(s): College of Business major; ACCT 2121; ACCT 2122 or ACCT 3323, ECON 2101; ECON 2102; INFO 2130; MATH 1120 or equivalent; and STAT 1220 or equivalent; with grades of C or above. An introduction to accounting systems, with particular emphasis on business processes, internal controls, and current accounting technology including data analytics.

ACCT 3350. Introduction to Auditing. (3) Prerequisite(s): Accounting major; and ACCT 3312 or ACCT 3324 and ACCT 3340 with grade of C or above. Introduction to auditing and its role in the capital markets. Students will be introduced to the evaluation of risk, controls, designing and executing tests, and assessing audit evidence. Special attention is given to information technology, data analytics, and comparisons of internal and external auditing.

ACCT 3380. Fraud Examination. (3) Prerequisite(s): ACCT 3311 with grade of C or above. Examines the fraud problem faced by businesses and focuses on fraud prevention and detection. Involves the study of the different types of fraud as well as an examination of the various elements of a fraud investigation.

ACCT 3400. Accounting Internship. (3) Prerequisite(s): Junior or Senior standing; Accounting major in good standing; and permission of department. Provides a meaningful work experience in the field of accounting. Requires a minimum of 150 hours of supervised employment, 50 hours of work per credit hour. Student is responsible for securing internship and completing internship application and approval process prior to registering for the course. Internship must be approved by instructor. Application process and course registration must be completed prior to beginning internship. All proposals are subject to departmental approval. Students may not earn internship credit for work at a current employer. Some students work full-time during the period of the internship and should plan schedules for Junior and Senior years accordingly. May be used to meet general elective requirements, up to a maximum of three credit hours. *Graded on a Pass/No Credit basis. May not be repeated for credit or taken for credit at the same time or following any other internship for credit.*

ACCT 3500. Accounting Cooperative Education Experience. (0) Prerequisite(s): Accounting major with department approval, in conjunction with the University Career Center. Enrollment is required for students participating in a cooperative education position during each semester they are working in a position. Participating students pay a course registration fee for transcript notation and receive full-time student status. Assignments must be arranged and approved in advance. The Cooperative Education Program is only open to undergraduate students; graduate level students are encouraged to contact their academic departments to inquire about academic or industrial internship options for credit. For information, contact the University Career Center. *May be repeated. Graded on a Satisfactory/Unsatisfactory basis.*

ACCT 3900. Current Developments in Accounting. (1 to 3) Prerequisite(s): Permission of department. Topics include: internal and external auditing, governmental accounting, income taxes, managerial accounting and accounting theory. A research project is required. *May be repeated for credit with change of topic.*

ACCT 4220. Income Tax. (3) Prerequisite(s): Accounting major and ACCT 3311 with grade of C or above. An introduction to the Federal income tax system with emphasis on concepts and procedures applicable to all types of entities.

Aerospace Studies (AERO)

AERO 1100. Leadership Laboratory. (0 to 3) Prerequisite(s): Permission of department. Corequisite(s): AERO 1101, AERO 1102, AERO 2101, AERO 2102, AERO 3101, AERO 3102, AERO 4101, or AERO 4102. Provides the opportunity to demonstrate fundamental management skills through execution of Air Force customs and courtesies, health and physical fitness, drill, and ceremonies. Students demonstrate command abilities by utilizing effective communication, physical fitness, and knowledge of military customs and courtesies. *May be repeated for credit while enrolled in Aerospace Studies courses. Graded on a Pass/No Credit basis.*

AERO 1101. Department of the Air Force Professionalism. (1) Corequisite(s): AERO 1100. The aim of Course 1: "DAF Professionalism" is to cultivate a foundational understanding and appreciation of the Department of the Air Force's (DAF) core values, culture, and the essential personal attributes that define professionalism within this

unique environment. This course is meticulously designed to bridge theoretical knowledge with practical skills, fostering a cadre of well-rounded students ready to excel in the DAF ecosystem. Survey course which focuses on the structure and missions of Air Force organizations, officership, and professionalism. Provides an overview of Air Force and defense topics and introduces communication skills training.

AERO 1102. Foundations of the Air Force II: Competition and Security.

(1) Prerequisite(s): AERO 1101. Corequisite(s): AERO 1100. Competition and Security: The overarching aim of Course 2, "Competition and Security," is to introduce students to the concept of national security from a broad perspective, encompassing the military's involvement in securing national interests through a range of activities from cooperation to armed conflict. This course is designed to lay a solid foundation for understanding the multifaceted nature of global security and the critical role of the DAF in maintaining peace and security.

AERO 2101. Evolution of Aerospace Studies I. (1) Prerequisite(s): AERO 1102. Corequisite(s): AERO 1100. The beginnings of manned flight and the development of aerospace power in the United States, including the employment of air power in WWI, WWII, Korea, Vietnam, and the Gulf War. The peaceful employment of U.S. air power in civic actions, space exploration support, and scientific missions are also discussed.

AERO 2102. Evolution of Aerospace Studies II. (1) Prerequisite(s): AERO 2101. Corequisite(s): AERO 1100. Further expounds on the origins of manned flight and the development of aerospace power in the United States to include the employment of air power in WWI, WWII, Korea, Vietnam, and the Gulf War. Discussions on peaceful employment of U.S. air power in civic actions, space exploration support, and scientific missions are facilitated.

AERO 3101. Leadership Studies I. (3) Prerequisite(s): AERO 2102. Corequisite(s): AERO 1100. Study of the anatomy and importance of quality leadership and management, the role of discipline in leadership situations, and the variables that affect leadership. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts. Students deal with actual problems and complete projects associated with planning and managing an Air Force training environment.

AERO 3102. Leadership Studies II. (3) Prerequisite(s): AERO 3101. Corequisite(s): AERO 1100. Advanced studies on the anatomy and importance of quality leadership and management, the role of discipline in leadership situations, and the variables that affect leadership. Additional case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts. Students analyze real-world problems and complete projects associated with planning and managing an Air Force training environment.

AERO 4101. National Security Studies and Preparation for Active Duty I. (3) Prerequisite(s): AERO 3102. Corequisite(s): AERO 1100. Prepare cadets for their first active duty assignment as an Officer in the Air Force. Cadets learn about the role of a professional military leader in a democratic society and societal attitudes toward the armed forces. They also learn the requisites for maintaining adequate national defense structure, the impact of technological and international developments on strategic preparedness, military law, and the overall policy-making process.

AERO 4102. National Security Studies and Preparation for Active Duty II. (3) Prerequisite(s): AERO 4101. Corequisite(s): AERO 1100. The capstone course for the Aerospace Studies curriculum that prepares cadets for their first active duty assignment as an Officer in the Air Force. Cadets learn about the role of a professional military leader in a democratic society and societal attitudes toward the armed forces. Discussions are held on the requisites for maintaining adequate national defense structure, the impact of technological and international developments on strategic preparedness, military law, and the overall policy-making process.

Africana Studies (AFRS)

AFRS 1100. Introduction to Africana Studies. (3) Interdisciplinary survey of key issues in the life and history of peoples of African descent and their interaction with other peoples and world cultures; introduction to theoretical foundations in the field of Africana Studies.

AFRS 1501. Global Social Science: Africana Studies. (3) This Global Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of complex, interconnected world. AFRS 1501 helps students build intercultural competency by exploring social, economic, political, and cultural developments among African and African descended peoples.

AFRS 1512. Local Arts/Humanities: Africana Studies. (3) This Local Theme course uses the methods and insights of the humanities to explore the central question of what it means to be a member of a "local" community. Through the study of the experiences of different peoples, cultures, and communities in our city, our region, or our nation, students will be able to better understand the complexity and diversity of the society in which we live. AFRS 1512 will examine the histories, politics, economics, and culture of African Americans and African descended peoples in the United States.

AFRS 2050. Topics in Africana Studies. (3) Treatment of a special topic. *May be repeated for credit with change of topic and permission of department.*

AFRS 2103. Introduction to Hip Hop. (3) Examines the musical, corporeal, visual, spoken word and literary manifestations of hip hop from its early years to the present, focusing especially on the political, aesthetic, and lifestyle ramifications of hip hop in the US. The Black cultural practices and the intercultural relations across race, class, and gender that have given rise to the various forms of hip hop in North America will also be analyzed.

AFRS 2105. Black Images in the Media in the U.S. (3) Cross-listed Course(s): COMM 2120. Examination of African American images projected through electronic and print media, historically and currently.

AFRS 2107. Global Hip Hop. (3) Cross-listed Course(s): SOCY 2107. The development and growth of Hip Hop from a US inner city Black expressive

culture to a global subaltern social movement. Examines cultural production in Hip Hop in relation to the contemporary global issues that focus on the youth, subalterns, and postcolonial experiences.

AFRS 2111. Yoruba Language and Culture I. (3) Cross-listed Course(s): LANG 1201. First semester elementary Yoruba language and introduction to Yoruba culture. The primary goal is to provide students with the basic spoken, reading, and writing knowledge of Yoruba language, and the cultural and social contexts in which the language functions.

AFRS 2112. Yoruba Language and Culture II. (3) Cross-listed Course(s): LANG 1202. Prerequisite(s): AFRS 2111, Second semester elementary Yoruba language, and introduction to Yoruba culture. The primary goal is to provide students with the basic spoken, reading, and writing knowledge of Yoruba language, and the cultural and social contexts in which the language functions.

AFRS 2120. African American Women. (3) Cross-listed Course(s): WGST 2120. Explores how cultural, political, historical and economic factors shape African American women's positions and opportunities in society today.

AFRS 2156. African Civilization. (3) Cross-listed Course(s): ANTH 2156. A survey of major cultural innovations and foundations of civilizations in ancient Africa; examination of the origins of ideas, beliefs, institutions, and practices; and the philosophical, religious, social, political and economic foundations of ancient African civilizations. Draws from a wide range of historical sources, especially archaeology, language, literary, oral traditions, and material culture.

AFRS 2160. The African American Experience through Civil War. (3) Cross-listed Course(s): HIST 2160. Exploration of circumstances that brought Africans to the Americas and their experience during the era of slavery. Emphasis on the political, economic, and socio-cultural systems that maintained slavery in the South and constrained freedom in the North and the responses and struggles of African Americans. Topics include: slavery/slave trading to the Americas; the system of slavery in British North America; free blacks; political compromises sustaining the peculiar institution; and the impact of the Civil War and Reconstruction on the freedom, citizenship, and suffrage of African-Americans.

AFRS 2161. The African American Experience: Civil War to Civil Rights. (3) Cross-listed Course(s): HIST 2161. Prerequisite(s): AFRS 1100 for majors; it is strongly encouraged that students take AFRS 2160 before enrolling in this course. Exploration of the African American experience from the Civil War to the present and the struggle of freed slaves and free people of color in garnering the promises of emancipation and the changing status of African Americans in American society. Interdisciplinary survey of key eras, issues, debates, and personalities in the African American experience from 1865 to the present.

AFRS 2170. Introduction to Health and Environmental Issues in the Africana World. (3) A general introduction to the cultural, social, political, ethical, and psychological dimensions of health and environmental issues affecting the African and African Diaspora peoples globally, and the policy implications.

AFRS 2172. Black Sexuality and Health. (3) Examines the intersection of sexuality, gender, race, class, and ethnicity, and how they influence social relations and health. Students are introduced to the critical

concepts of sex, gender, and sexuality; the links between becoming gendered, sexuality and heterogeneity within African American populations and the impact it has had on health-related issues.

AFRS 2174. Environmental Literature in Africa and the Caribbean. (3) Introduction to an environment-centered approach in literary and cultural studies through the study of a selection of poems, fictions, plays, and critical literary essays by African and Caribbean writers. Cultural and environmental studies are brought into interdisciplinary dialogue about nature, conservation, and development in Africa and the Caribbean. Also explores the contributions of postcolonial studies to eco-criticism and the narratives of environmental justice in developing countries.

AFRS 2206. African Literature, Music, and Art. (3) Survey of socio-cultural context in which African literature, music, and art function; examination of the impact of changes resulting from international dependence and improved communications across continents and cultures; parallels drawn with other regions of the world, particularly the US and Europe. Creative research or community projects required.

AFRS 2207. Pan-Africanism. (3) Study of the Pan-African movement; examination of historical and contemporary efforts of peoples of African descent to unite their struggles for human advancement, political independence, and equality in Africa, the US, the Caribbean, Western Europe, and Afro-Latin America. Included in the study are popular movements, leading proponents, and related organizations.

AFRS 2215. Black Families in the United States. (3) Critical and comprehensive examination of the life of African American families in the United States including the historical evolution of black families and their relationship with the political-economic structures of American society.

AFRS 2221. Modern Africa. (3) Cross-listed Course(s): HIST 2211 and INTL 2101. A survey of major developments in the 19th and 20th century Sub-Saharan Africa, with emphasis on the European conquest, the colonial period, and the triumph of modern African nationalism.

AFRS 2301. Introduction to African American Literature. (3) Cross-listed Course(s): ENGL 2301. Prerequisite(s): WRDS 1103 or WRDS 1104 with a grade of C or above, or permission of department. Survey of the major periods, texts, and issues in African American literature.

AFRS 3050. Topics in Africana Studies. (3) Treatment of a special topic. *May be repeated for credit with change of topic and permission of department.*

AFRS 3101. Perspectives on Race and Ethnicity in the US. (3) Study of values and make-up of American pluralistic society in historical and contemporary context. Focus on the understanding of African American values and the role of ethnicity and race.

AFRS 3121. Contemporary African Art. (3) Cross-listed Course(s): ARTH 3121. Prerequisite(s): ARTH 1211 or ARTH 1212, or any AFRS course with grade of C and above, or permission of instructor. Survey of contemporary African artists and artworks (1960s to the present day), on the continent and in the diaspora, with international profiles. Readings and discussions focus on politics, gender, class, identity, and mobility.

AFRS 3150. The African American Church and Civil Rights. (3) Cross-listed Course(s): RELS 3150. Role of the African American church in the

struggle for human equality. Topics such as radical, moderate, and accommodationist leadership styles; historical development of the black church in the South; and its emergence as a foundation for modern civil rights movement.

AFRS 3154. Globalization in African History. (3) Cross-listed Course(s): HIST 3154. Examines how the emergence of globalization and global interdependency has impacted the African continent in social, economic, political, cultural, and historical contexts. Discussion of major concepts and thinkers; with specific attention to recent historical developments, successes, and challenges.

AFRS 3155. Health and Healing in Africa. (3) Provides an historical context for some of the major healthcare challenges facing Africa today. Traces the history of health and healing from the pre-colonial era through the period of colonial rule, and since political independence. Both the Africa-centered and Western methods of healing and conceptions of health and illness are examined at different junctures in African history.

AFRS 3159. African American Poetry. (3) Cross-listed Course(s): ENGL 3159. Intensive study of African American poetry, focusing on one period or traversing several.

AFRS 3179. African American Political Philosophy. (3) Cross-listed Course(s): POLS 3172. Prerequisite(s): 3000-level course on Africa from AFRS, POLS, or HIST. Analysis of competing ideologies in African American political philosophy.

AFRS 3190. Political Economy of the Caribbean. (3) Cross-listed Course(s): LTAM 3190. An examination of the manifestations of Caribbean economic problems and policies and Caribbean political development from the post-war period to the present.

AFRS 3192. African Cinema. (3) A study of the relationship of African film/video production to historical and contemporary issues in Africa; and the sociopolitical contexts, intertextuality, and aesthetics of African film/video production.

AFRS 3200. Folklore of Africa and the African Diaspora. (3) A study of the relationships among African and African Diaspora folktales, folk beliefs, customs, legends, myths, proverbs, poetry, songs, performance, narratives, symbols, and social practices. Using an interdisciplinary approach, the course identifies parallel tales and verbal and performance arts in the Mother Continent and the Diaspora and also studies how geographical environments and historical experiences have impacted new manifestations of African folklore.

AFRS 3218. Racial Violence, Colonial Times to Present. (3) Cross-listed Course(s): HIST 3218. Examines the ways in which African Americans and Whites used violence both as part of struggles for liberation and freedom as well as repression from the colonial period to the present in the United States. Focuses on the broader processes of social, political, and cultural change and at efforts to build cooperation.

AFRS 3220. The Caribbean from Slavery to Independence. (3) Cross-listed Course(s): LTAM 3220 and HIST 3180. Covering the sweep of history from European/indigenous contact, through the construction of a plantation regime based on African slave labor, and up to the present day, this course explores the spread of colonialism, the dynamics of slavery, and the tumult of abolition and national independence

movements. The Caribbean Sea is examined as a region, emphasizing the ties uniting the islands and the circum-Caribbean coasts. The region's past - including empire and imperial conflict, racial oppression and interaction, and international contact - and its legacies will be discussed in relation to political economics, race, and contemporary culture.

AFRS 3240. Race and the Law. (3) Cross-listed Course(s): HIST 3240 and LEGL 3241. Explores the unique role law has played in establishing the status of persons of African descent in the Americas, with a focus on the United States. Students investigate how the legal history of African Americans has shaped American race relations over the past 400 years by tracing the evolution of race, racism, and racial formations as a function of America's legal system.

AFRS 3250. African Americans and Health Communication. (3) Focuses on the use of communication strategies to inform and influence individual and community decisions regarding health among African American populations. Considers how health messages are created and the impact they have on African Americans within the context of their lives.

AFRS 3260. Slavery, Racism, and Colonialism in the African Diaspora. (3) Cross-listed Course(s): LTAM 3260 and HIST 3190. Designed to explore how race and racism, slavery, and colonialism served as principal institutions and constructs shaping the experience between Africa and the emerging African Diaspora in the New World. Students will consider how the maintenance of Western social, economic, and political superiority materialized as functions of these three important historical developments.

AFRS 3261. Psychology of the Black Experience. (3) A study of the psychological issues relating to the Black experience in the Americas, using Africa-centered philosophical and psychological frameworks to examine how Black subjectivities have been constructed historically, and how this affects human motivations, self-perceptions, cultures, and behaviors among Africa-descended populations.

AFRS 3262. Philosophy and Race. (3) Cross-listed Course(s): PHIL 3262. Examines the role of the concept of race in the Western philosophical canon, and uses current philosophical texts and methods to examine Western discourses of race and racism. Issues such as whiteness, double consciousness, the black/white binary, Latino identity and race, ethnicity, mixed-race identity, and the intersection of race with gender and class are also examined.

AFRS 3264. Business Culture and Entrepreneurship in Africa. (3) A study of the institutional practices associated with African business culture and entrepreneurship in local, national, and global spaces. A deep historical approach is taken, covering pre-modern entrepreneurial and business culture; how traditions and cultural practices influence the way Africans conduct business; how these have been shaped by the realities of modernity and globalization; and the challenges facing institutional business practices and entrepreneurs in Africa and its emerging market economies.

AFRS 3265. African Economic Development. (3) Focus on economic theories, planning, production, and resource allocation strategies, capital formation, foreign aid, and multinational corporations in Africa.

AFRS 3270. Afro-Latin American History. (3) Cross-listed Course(s): LTAM 3270 and HIST 3181. This course explores the African Diaspora in Latin America ranging from the Caribbean Sea to the Rio de la Plata. From slavery, to fighting for freedom in the Spanish-American Wars of Independence, to forging new notions of citizenship in twentieth century Brazil, African-descended peoples have an important place in Latin America's historical past. According special attention to regions with concentrated populations of African-descended peoples, this course reveals the vibrant history of Afro-Latin America.

AFRS 3278. Race in the History of Brazil. (3) Cross-listed Course(s): LTAM 3278 and HIST 3178. Examining the history of Brazil since Portuguese colonization, this course focuses on experiences, struggles, and debates revolving around questions of race and identity. The course interrogates the construction of a slave society, abolition, negotiation of freedom for slaves, and debates around national identity that attended the formation of the Brazilian republic and which have shaped the country in the 20th century. The Brazilian experience will be approached comparatively, using the United States and other areas of the African Diaspora for context.

AFRS 3290. Research Methods. (3) Prerequisite(s): AFRS 1100 or AFRS 4010; and Junior or Senior standing; or permission of instructor. Prepares students to conduct independent research. Introduces the processes of conceptualization and basic research techniques, and some of the issues related to conducting research on the Black experience. A variety of appropriate studies and methods are utilized over the course of the semester.

AFRS 3328. West African Art and Display. (3) Cross-listed Course(s): ARTH 3328. Prerequisite(s): Any AFRS course with a grade of C or above, or permission of instructor. Addresses major genres, monuments, and issues of artistic production in West Africa. Readings and discussions focus on politics, identity, gender, performance, collection, and display.

AFRS 3395. African American Art. (3) Cross-listed Course(s): ARTH 3395. Survey of the major movements and issues of African American artistic production, from the 17th century to the present day. Readings and discussions focus on stylistic developments, politics, race, gender, identity, and representation.

AFRS 3692. Colloquium. (3) Prerequisite(s): Permission of instructor. A weekly colloquium; research and writing; opportunity for intellectual stimulation, critique and problem solving. Open to majors and non-majors.

AFRS 3895. Independent Study. (1 to 3) Prerequisite(s): Permission of department. Supervised investigation of a problem or subject in the field of Africana Studies. *May be repeated for credit.*

AFRS 3990. Senior Project in Africana Studies. (2-15) Prerequisite(s): Senior standing. Completion of a senior research paper on an academic topic or a community-related written project. Emphasis on mastery of academic skills and content of the field or specific discipline.

AFRS 4050. Topics in Africana Studies. (3) Cross-listed Course(s): GEOG 4700. Treatment of a special topic. *May be repeated for credit with change of topic and permission of department.*

AFRS 4100. African Diaspora Theory. (3) Explores the diverse conceptual and theoretical perspectives in the African Diaspora Studies, with emphasis on the dialectical relationships between social theories and the African Diaspora, especially as these relate to the issues of race, identity, gender, migrations, cultural production, and transnationalism.

AFRS 4105. African International Relations. (3) Cross-listed Course(s): POLS 3169. Examines Africa's relations with external powers (including Europe, the United States, and China), cooperation among African countries, the role of non-state actors in African conflicts, and U.S. policy toward the continent.

AFRS 4401. Professional Internship in Africana Studies. (3) Prerequisite(s): Permission of department chair; Junior or Senior standing; Africana Studies major or minor; a minimum GPA of 2.5; AFRS 1100; and up to 12 credit hours of other AFRS courses. Internship in wide-ranging working environments, including government establishments, private businesses, as well as not-for-profit organizations, especially those focusing on issues affecting African and African Diaspora populations. The internship provides students with experiential learning in an environment that is consistent with the student's professional goals and growth.

AFRS 4600. Senior Seminar in Africana Studies. (3) Prerequisite(s): Senior standing. This advanced seminar explores a wide-body of literature selected as the eminent scholarship in the field of Africana Studies. Students read, analyze, and critique the scholarly literature of the field and prepare written assignments conceptualizing the course readings and discussions.

AFRS 4630. Environmental and Public Health in Africa. (3) In-depth analysis of environmental and public health hazards in Africa, including pandemic, as well as the principles and practice of public health, pollution control, and waste management. The social and political contexts of the environmental and health issues in Africa are emphasized throughout.

AFRS 4640. Environment, State, and Society in the Caribbean and Latin America. (3) The history of the environment in Latin America and the Caribbean, especially the impacts on race, labor, culture, political relations, and state formation from the pre-Columbian period through the present.

AFRS 4652. Race, Health, and the African Diaspora. (3) Global approaches to health disparities throughout the African Diaspora using racial, gender, class, and development theoretical frameworks. Explores the comparative relationships between contemporary social and historical factors determining the health status of peoples of African descent residing in different areas of the world.

AFRS 4790. Africana Studies Senior Honors Project/Thesis. (3) Prerequisite(s): AFRS 3290 (Honors section) or AFRS 4010 (Honors section) with a grade of B or above; Africana Studies major with a GPA of at least 3.25 in all Africana Studies courses counted toward the major and taken at UNC Charlotte, GPA of at least 3.0 for all coursework taken at UNC Charlotte, and approval of a project/thesis proposal through the Honors College Application to Candidacy process the semester prior to taking the course. Students complete the research, analysis, writing, and oral presentation of the honors project/thesis under the supervision of an honors faculty advisor. The project/thesis must address any aspect of African and African Diaspora affairs (including African American life); and

must be driven by the quest to solve an applied problem, or develop a better understanding of a theoretical or practical issue. The final product may be in form of a digital (e.g., web-based), textual (a minimum of 20-page paper, double-spaced), database development, or creative work; and must demonstrate evidence of scholarly rigor, intellectual curiosity, and creative problem-solving.

American Democracy (AMDM)

AMDM 1575. Engaging with American Democracy. (3) An interdisciplinary examination of issues or concepts related to American democracy, with attention to key historical documents including but not limited to: the Declaration of Independence, the U.S. Constitution, select Federalist Papers, the Gettysburg Address, the Emancipation Proclamation, and Dr. Martin Luther King Jr.'s Letter from Birmingham Jail. Additional texts and topics may vary, depending on the specific section.

American Studies (AMST)

AMST 2050. Topics in American Studies. (3) An introduction to the interdisciplinary approach focusing on aspects of American culture and society. *May be repeated for credit with change of topic and permission of advisor.*

AMST 2100. Introduction to American Indian Studies. (3) An introduction to the study of the American Indian experience through selected academic disciplines (e.g., anthropology, history, political science, religious studies) and American Indian intellectual perspectives on, and response to, these disciplines.

AMST 3050. Topics in American Studies. (3) Introduction to the interdisciplinary approach, demonstrating how traditionally distinct disciplines, such as literature and history, or art and political science, interrelate and contribute to an understanding of an American topic. *May be repeated for credit with change of topic and permission of advisor.*

AMST 3090. Topics in American Film. (3) An in-depth treatment of an American film director, subject, or genre. *May be repeated for credit with change of topic and permission of advisor.*

AMST 3100. Introduction to American Studies. (3) Introduction to American culture through an in-depth study of a single decade or era, such as the 1830s, 1890s, 1920s, 1950s or 1960s. Focus on how diverse social, economic, artistic, literary, philosophical, and political forces have shaped American society. Students examine the complex and multifaceted nature of American culture, both as it pertains to the specific era under study and to the present day. *May be repeated for credit with change of topic and permission of advisor.*

AMST 3800. Independent Study or Directed Reading in American Studies. (1 to 3) Prerequisite(s): Permission of American Studies Coordinator. Intended for students who wish to conduct individual investigations related to American Studies. Not limited to American Studies students but should be under the supervision of an American

Studies advisor or designate. *May be repeated for credit one time with permission of advisor.*

AMST 4050. Topics in American Studies. (3) In-depth study using an interdisciplinary approach focusing on aspects of American culture and society. *May be repeated for credit with change of topic and permission of advisor.*

Anthropology (ANTH)

ANTH 1101. Introduction to Anthropology. (3) Biological and cultural evolution; archaeology; language and culture; comparative study of human social institutions such as kinship, subsistence patterns, religion, politics; methods and theories. *May not be taken for credit and for a grade if credit has been received for ANTH 1501.*

ANTH 1501. Global Social Science: An Introduction to Anthropology. (3) This Global Theme course uses the methods and insights of the social and natural sciences to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies, or culture across the globe students will be able to better understand themselves as part of a complex, interconnected world. ANTH 1501 is a holistic exploration of humanity across time and space. It explores human evolution and our relationships with other primates; the connections between language and culture; cross-cultural similarities and differences; and the various ways culture and societies have changed from the distant past to the present. Throughout the course, students will gain an understanding of contemporary human variability, social and environmental problems, power and inequalities, and global connections. *May not be taken for credit and for a grade if credit has been received for ANTH 1101.*

ANTH 1511. Local Social Science: Money, Health, and Happiness. (3) This Local Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a member of a "local" community. Through the study of the experiences of different peoples, cultures, and communities in our city, our region, or our nation students will be able to better understand the complexity and diversity of the society in which we live. ANTH 1511 takes a critical and ethical look at the interconnections between culture, money, work, health, and well-being, with particular attention to inequities and opportunities for improvement. Students engage with real-world problems and issues around these topics and asks them to discuss potential solutions.

ANTH 2010. Topics in Ethnography. (3) Investigation of ethnographic regions of the world. *May be repeated for credit with change of topic.* Examples: Cultures of the Pacific; Cultures of the Mediterranean.

ANTH 2020. Topics in Cultural Anthropology. (3) Specialized topics in Cultural Anthropology. Examples include: Cultures of East Asia; Circumpolar Peoples of the New World. *May be repeated for credit with change of topic.*

ANTH 2040. Topics in Biological Anthropology. (3) Specialized topics in Biological Anthropology. Examples include: Living Primates of the New World; Cultures of Early Homo sapiens. *May be repeated for credit with change of topic.*

ANTH 2050. Topics in Archaeology. (3) Specialized topics in archaeology. *May be repeated for credit with change of topic.* Example: Archaeology of Gender.

ANTH 2090. Topics in Anthropology. (1 to 3) Specialized topics in anthropology. *May be repeated for credit with change of topic.* Examples: Hunters and Gatherers; Political Anthropology.

ANTH 2111. Peoples of Africa. (3) Ethnic and linguistic diversity in Sub-Saharan Africa; ecology and culture; patterns of continuity and change in kinship, marriage, economy, social control, stratification, and religion.

ANTH 2112. North American Indians. (3) Survey of the native peoples of America; culture at the time of European contact; major historical events and relationships; contemporary issues in Indian affairs.

ANTH 2114. Indians of the Southeastern United States. (3) Study of American Indians of the Southeastern United States with emphasis on tribes of the Carolinas. Areas of investigation include pre-contact cultures, Indian-European contact relationships, history, and contemporary Southeastern Indian issues.

ANTH 2115. Culture and Society in the Middle East. (3) Patterns of subsistence, social and political organization in North Africa and the Middle East. Changes in family and community structures, migration, gender roles, and religious outlook since the colonial period.

ANTH 2116. Contemporary Latin America. (3) Cross-listed Course(s): LTAM 2116. A survey of the people and cultures of Mexico, Central America, South America, and the Caribbean. Areas of investigation include religion, race, ethnicity, gender, kinship, social inequality, and economic development.

ANTH 2117. Cultures of the Caribbean. (3) Cross-listed Course(s): INTL 3114 and LTAM 2117. An introduction to society and culture in the Caribbean region. Areas of investigation include ethnicity, nationalism, family and community structure, economy, religion, and politics.

ANTH 2121. The Development of Topics and Themes in Sociocultural Anthropology. (3) Using classic and modern ethnographic texts key concepts are explored in social-cultural anthropology (e.g., belonging, classification, kinship, conflict, politics and economics, technology, illness and healing, movement, time and space, production, exchange and consumption, and the body). These themes are examined through anthropological concepts of power, belief and knowledge, change, culture, identity, materiality, social relations, society, and symbolism. Our aim is to trace how these notions were initially conceptualized by anthropologists and how they have been challenged and reworked by subsequent anthropologists to make sense of the complex world in which we live.

ANTH 2122. Beliefs, Symbols, and Rituals. (3) Structure and content of systems of belief and ritual; role in social life; analysis of religion, myth, magic, witchcraft, symbol systems, cult movements, and religious change.

ANTH 2123. Women in Cross-Cultural Perspective. (3) Cross-listed Course(s): WGST 2123. A cross-cultural survey of the lives of women and the dynamics of gender throughout the world. Uses anthropological

research to examine how gender influences evolution, social stratification, work, kinship, and perceptions of the body.

ANTH 2125. Urban Anthropology. (3) Cross-cultural analysis of urban life; rise of early cities; rural-urban differences; migration; ethnicity, urban poverty; effects of urban life on kinship systems; modernization.

ANTH 2126. World Population Problems. (3) An examination of various world population "problems," such as growth, migration, fertility, and population aging, in order to learn how cultural, political, economic, and environmental factors influence and are influenced by the population structure of a given society.

ANTH 2127. Environmental Anthropology. (3) Anthropological approaches to environmental issues as they affect people around the world, including the relationships between humans and their natural environments, cultural knowledge about environments, the role of wealth and inequality in environmental interactions, international and global environmental governance, and the effects of these on management decisions and outcomes.

ANTH 2131. Introduction to Peace, Conflict, and Identity Studies. (3) Cross-listed Course(s): INTL 2131. Asks what identity is and why it matters in people's lives. Offers a cross-cultural examination of the role of different forms of identity including race, ethnicity, gender, nationalism, and class in causing and resolving conflicts. Case studies from different parts of the world are explored.

ANTH 2141. Our Place in Nature: Introduction to Biological Anthropology. (4) Corequisite(s): ANTH 2141L. Evolutionary theory; primates; primate and human evolution; population genetics; human variation; osteology; bioethics.

ANTH 2141L. Our Place in Nature: Introduction to Biological Anthropology Lab. (0) Corequisite(s): ANTH 2141. Two-hour laboratory session per week. In-depth discussion and debate of assigned readings and anthropological issues presented in lecture and films; hands-on experience with human osteological material, skeletal material of living primates, and casts of major fossil primates and hominids.

ANTH 2142. Primate Behavioral Ecology. (3) Prerequisite(s): ANTH 2141 or the equivalent or permission of instructor. An examination of primate diversity, including evolution, ecology, social behavior (e.g., communication, aggression, male-female social dynamics, mother-infant bonding, infant development, etc.), reproductive strategies and conservation of prosimians, monkeys, and apes.

ANTH 2143. The Fossil Evidence for Human Evolution. (3) Prerequisite(s): ANTH 2141 or the equivalent or permission of instructor. The theory, methods, and fossil evidence utilized in studying the evolutionary biology of the primates, including humans. Emphasizes the morphological and behavioral/cultural adaptations and phylogeny of fossil and living human/nonhuman primates, focusing on the fossil evidence for reconstructing the human lineage, particularly within the genus *Homo*.

ANTH 2144. Neanderthals and Us. (3) Prerequisite(s): ANTH 2141 or permission of instructor. Explores the life, times, culture and fate of the Neanderthals. Using data derived from the fossil record, archaeology, and genetics, we will examine crucial questions about Neanderthals,

including: Who were they? What bio-cultural adaptations allowed them to expand their geographic range and exploit diverse habitats so successfully? What was their lifestyle like and how were they culturally distinct from previous hominids? What happened to them? Do they have any relationship to modern humans like us?

ANTH 2151. Introduction to Archaeology. (3) Archaeological method and theory; important archaeological sites and cultures from Old and New Worlds; ethics and public policy in archaeology.

ANTH 2152. New World Archaeology. (3) Cross-listed Course(s): LTAM 2252. Prehistory of North America; Paleoindians, Eastern United States, Southwest, Mexico; archaeological methods and theory.

ANTH 2153. Historic Archaeology. (3) Theories, methods, and data of the archaeology of the post-1492 world; integration of archaeological and documentary research; globalization through material culture; emphasis on North America.

ANTH 2156. African Civilization. (3) Cross-listed Course(s): AFRS 2156. A survey of major cultural innovations and foundations of civilizations in ancient Africa; examination of the origins of ideas, beliefs, institutions, and practices; and the philosophical, religious, social, political and economic foundations of ancient African civilizations. Draws from a wide range of historical sources, especially archaeology, language, literary, oral traditions, and material culture.

ANTH 2161. Introduction to Linguistic Anthropology. (3) In-depth survey of linguistic anthropology, one of the four major sub-fields of anthropology; study of the relationship between language and culture, with a particular focus on how individual practices and societal norms intersect.

ANTH 2171. Engaging the Human Experience: Applying Anthropology in Life and Work. (3) A broad overview of how anthropologists address current problems and issues facing communities around the world, and the role of anthropology in global and local issues. Applied anthropology has become an increasingly relevant field as globalization has intensified the necessity for improved cultural understanding and communication both within and across borders. Applied anthropologists are found in a vast array of occupations outside of academia, including jobs in the corporate world, medical and health fields, tourism industry, environmental and other activist positions, the development field, gerontology, social work, and in nonprofit organizations. This course helps students understand the relevance of anthropology for important issues and problems facing their communities.

ANTH 3020. Topics in Cultural Anthropology. (3) Prerequisite(s): ANTH 1501. Specialized topics in Cultural Anthropology. Examples include: Contemporary Mayan Religion, Pastoralism in Central Asia. *May be repeated for credit with change of topic.*

ANTH 3040. Topics in Biological Anthropology. (3) Prerequisite(s): ANTH 2141 or permission of instructor. Specialized topics in Biological Anthropology. Examples include: Primate Taxonomy and Systematics; Historical Development of Scientific Racism. *May be repeated for credit with change of topic.*

ANTH 3050. Topics in Archaeology. (3) Prerequisite(s): ANTH 2151 or permission of instructor. Specialized topics in Archaeology. Examples

include: Inka Civilization; Regional Commerce in the Ancient Mediterranean. *May be repeated for credit with change of topic.*

ANTH 3090. Topics in Anthropology. (1 to 3) Prerequisite(s): ANTH 1501 or permission of instructor. Examination of specialized topics in anthropology. *May be repeated for credit with change of topic.* Examples: Art and Anthropology, Ecological Anthropology.

ANTH 3112. Globalization and Culture. (3) Cross-listed Course(s): INTL 3112. Explores the relationship between processes of globalization and cultural change, considering the breakdown of the connection between lived cultural experience and territorial location. Of special interest are issues of cultural homogenization, cultural hybridization, and emergent cultural identities brought about by the flows of people, ideas, and objects in the contemporary world.

ANTH 3113. Economic Anthropology. (3) Prerequisite(s): ANTH 1501, ECON 1101, ECON 2102, or permission of instructor. Intellectual roots of anthropological approaches to economy, formalist-substantivist debate, distribution and exchange, commodities, consumption, and material culture.

ANTH 3116. Cultures and Conflicts. (3) Cross-listed Course(s): INTL 3116. Considers historical ties, geographical inter-connections and economic relationships that underlie contemporary issues involving culture and conflict. Discusses issues of race, class, gender, religion, nationality and citizenship among variously situated population groups and the complicated issues that arise both in the international arena and inside today's multicultural societies.

ANTH 3117. Narratives and Conflicts. (3) Cross-listed Course(s): INTL 3117. In conflict situations, competing interpretations of the past can become part of the struggle itself as each side vies for recognition of its version of events. This course focuses on the role these stories play in the historical development of conflicts and the effects they have on efforts to resolve them. It also focuses initially on the role of narratives in the Israeli-Palestinian conflict. Students have the opportunity to explore other cases, including Northern Ireland, Bosnia, and South Africa.

ANTH 3122. Culture, Health, and Disease. (3) Relationship between cultural beliefs and practices and patterns of health and illness in human populations; role of disease in ecology and epidemiology, nutrition, cultural systems of healing, roles of patient and healer, culture and emotional states, role of religion, and magic in healing.

ANTH 3124. Food, Nutrition, and Culture. (3) Prerequisite(s): ANTH 1501 or permission of instructor. An examination of how food provides special insight into cultures throughout the world. Topics include: the symbolic and social value of food, the social construction of taste, dietary change, food and health, cannibalism, and famine.

ANTH 3125. Food and Globalization. (3) Cross-listed Course(s): INTL 3125. Explores the relationship of the modern food system to larger complex economic, political, and cultural processes. Considers how increasing global interaction and interdependence has transformed how we grow, distribute, and consume food. Topics include: the development of the agro-industrial complex; the formation of new food preferences, eating practices, and taste publics; and, the emergence of alternative fair trade, organic, local, and slow food movements.

ANTH 3126. Anthropology of Vampires, Ghosts, and Witchcraft. (3) Prerequisite(s): ANTH 1501. Explores the political, economic, historical, social, and cultural dimensions of vampires, ghosts, and elements of witchcraft. Drawing on European, African, Southeast Asian, and other comparative examples, commonalities and differences in occult belief systems are illuminated. Also examines how and why beliefs emerge and change with the forces of modernity, and what occult figures mean in their specific cultural contexts.

ANTH 3127. Anthropology of Violence. (3) Cross-listed Course(s): HGHR 3050. Examines numerous types of violence in comparative perspective, from family violence to large scale wars and genocide. Starting with popular understandings of the causes of violence, the course proceeds to cross-cultural investigations of why violence occurs in particular forms in specific times and places. Emphasis is placed on critical reflection and integration of anthropological perspectives.

ANTH 3135. Origins of Globalization. (3) Cross-listed Course(s): INTL 3135. An analysis of European colonial expansion from the 16th through the 19th centuries, emphasizing the creation of the first global systems of political, economic, and cultural interaction that form the foundation of modern globalization. Using a cross-cultural approach, the course explores the competition and conflict among the great powers and the effects of conquest and colonialism on the indigenous peoples of Africa, Asia, and the Americas.

ANTH 3136. Globalization and Resistance. (3) Cross-listed Course(s): INTL 3136. A cross-cultural analysis of changing patterns of resistance by indigenous peoples to the political, cultural and economic effects of globalization from the colonial period to the present. Using case studies from the Americas, Africa, and Asia, the course examines a variety of indigenous resistance strategies and movements and the socio-political dynamics that have driven them and impacted on their effectiveness.

ANTH 3141. Human Osteology. (3) Prerequisite(s): ANTH 2141 or permission of instructor. Students learn to identify all 206 bones and 32 teeth of the human skeleton. This knowledge is then applied to understand how forensic anthropologists and bioarchaeologists reconstruct past lifestyles, health, behavior, and identity at the individual and population levels.

ANTH 3143. Race and Anthropology. (3) Prerequisite(s): ANTH 2141 or permission of instructor. The goal of this course is to confront the nature and significance of biological diversity in the human species, and the ways in which they have been interpreted and represented scientifically. The three general topics to be covered will be: (1) the history of the study of human diversity and its patterns; (2) the body; and (3) the mind.

ANTH 3144. Evolutionary Anthropology. (3) Prerequisite(s): ANTH 2141 or permission of instructor. The aim of this course is to familiarize students with the classic and contemporary literature and issues in evolutionary theory, particularly as applied to human origins. Topics include: primate systematics, homology, adaptation, hierarchy, speciation, and sociobiology.

ANTH 3145. Anthropological Genetics. (3) Prerequisite(s): ANTH 2141 or permission of instructor. The goal of this course is to engage genetic knowledge as it relates to humans, particularly in the context of the cultural, social, and ideological issues it overlaps, such as race, behavior,

counseling, gender, and indigenous property rights. Readings and discussions will incorporate both the scientific and the social issues.

ANTH 3152. Early Civilizations. (3) Prerequisite(s): ANTH 1501 or 2151 or permission of instructor. Great civilizations of Old and New Worlds; Mesopotamia, India, Greece, Africa, Egypt, China, Mexico, Peru; theories of cultural evolution; beginnings of complex societies; archaeological theory and method; environment, and ecology of first civilizations.

ANTH 3153. Archaeological Analysis. (3) Prerequisite(s): ANTH 2151 or permission of instructor. Advanced study of archaeological method and theory; analytical methods; statistics in archaeology.

ANTH 3154. European Prehistory. (3) Prerequisite(s): ANTH 1501 or 2151 or permission of instructor. Prehistory of Europe; Paleolithic, Neolithic, Bronze Age, Iron Age; archaeological methods and theory; ecology and social systems of early European cultures.

ANTH 3157. South American Prehistory. (3) Cross-listed Course(s): LTAM 3257. Archaeology of the indigenous cultures in South America from the earliest settlement until the arrival of the Spanish, including Moche, Nasca, and Inca; focus on the Central Andean region including Peru, Bolivia, Chile, and Ecuador; examination of the origins of agriculture, interactions of people and the environment, rise and collapse of states and empires, and the role of religion and warfare in ancient societies.

ANTH 3160. Gender, Culture, and Communication. (3) Addresses cultural experiences of gender through communication; material covered includes cultural constructions of femininity and masculinity, cultural socialization toward gender and sexuality, gendered communication in private and public settings, popular representations of gender and sexuality in U.S. media, and language diversity based upon ethnicity, class, gender, and sexual orientation.

ANTH 3222. Culture, Health, and Disease. (3) Relationship between cultural beliefs and practices and patterns of health and illness in human populations; role of disease in ecology and epidemiology, nutrition, cultural systems of healing, roles of patient and healer, culture and emotional states, role of religion, and magic in healing.

ANTH 3601. Foundations of Anthropological Theory. (3) Prerequisite(s): ANTH 1501; ANTH 2121 or ANTH 2161; ANTH 2141 or ANTH 2151; ANTH 2171; Anthropology major, minor, or permission of instructor; and Junior standing or permission of instructor. History of anthropological theory; the anthropological perspective in the social sciences; current theoretical and methodological issues in anthropology; presenting anthropology through writing and speaking. Students may attempt this course a maximum of three times, including any grade of D, F, or W.

ANTH 3895. Directed Individual Study. (1 to 4) Prerequisite(s): ANTH 1501 and permission of department. Supervised investigation of specialized topics in anthropology. *May be repeated for credit; up to 6 credits may be applied to the major.*

ANTH 4020. Topics in Cultural Anthropology. (3) Prerequisite(s): ANTH 1501. Specialized topics in Cultural Anthropology. Examples

include: Durkheim and Marx; The Comparative Study of Peasant Rebellion. *May be repeated for credit with change of topic.*

ANTH 4040. Topics in Biological Anthropology. (3) Prerequisite(s): ANTH 2141 or permission of instructor. Specialized topics in Biological Anthropology. Examples include: Evolutionary Ecology of Hominoidea; Comparative Primate Family Structure. *May be repeated for credit with change of topic.*

ANTH 4050. Topics in Archaeology. (3) Prerequisite(s): ANTH 2151 or permission of instructor. Specialized topics in Archaeology. Examples include: Ceramic Analysis; Bioarchaeology and Demography. *May be repeated for credit with change of topic.*

ANTH 4090. Topics in Anthropology. (1 to 3) Prerequisite(s): ANTH 1501 or permission of instructor. Examination of specialized topics in anthropology. Examples: Anthropology and Globalism; Race, Culture, and Society. *May be repeated for credit with change of topic.*

ANTH 4120. Intercultural Communications. (3) Prerequisite(s): ANTH 1501 or permission of instructor. Learning to cope with cultural differences; contrasting value systems; cross-cultural and communication styles; nonverbal communication; cultural relativity; culture and perception; ethnocentrism; cultural shock.

ANTH 4122. Ethnographic Methods. (3) Prerequisite(s): At least 6 hours in ANTH courses or permission of instructor. This course provides students with a basic mastery of the key methods used in cultural anthropological research.

ANTH 4131. Culture, Pregnancy, and Birth. (3) Cross-listed Course(s): WGST 4131. Explores how culture shapes the experience and practice of pregnancy and birth. Topics include: the birthing experience, midwifery, infertility, new reproductive technologies, and surrogate motherhood.

ANTH 4140. Field Biology of the Primates. (3) Prerequisite(s): Junior or Senior standing; ANTH 2141 and ANTH 2142, or permission of instructor. The theory and methods utilized in the study of nonhuman primate behavior. This applied behavioral primatology course entails original research projects done at an appropriate zoological venue in North and South Carolina.

ANTH 4141. Forensic Anthropology. (3) Prerequisite(s): ANTH 3141 or permission of instructor. Basic comparative human anatomy and biological anthropology applied to modern problems in the identification of human remains. Issues in recovery, identification, and interpretation of human remains from archaeological, criminal, and disaster investigations. Legal issues about human remains.

ANTH 4453. Field Project in Archaeology. (1 to 4) Prerequisite(s): ANTH 1501 or ANTH 2151, and permission of instructor. Practical experience in archaeological techniques. Students will participate in field research on an historic or prehistoric archaeological site. Research may include field reconnaissance, excavation, mapping, systematic description and analysis of cultural material, and/or other techniques appropriate to the site and research problem. *May be repeated for credit with change of project; up to 6 credit hours may be applied toward the Anthropology major.*

ANTH 4480. Internship in Anthropology. (3) Prerequisite(s): Permission of department. Research and/or in-service training experience in a cooperating community organization, based upon a contractual agreement among the student, department, and community organization. *May be repeated for credit up to 6 credit hours. Graded on a Pass/No Credit basis.*

ANTH 4482. Teaching Internship in Anthropology. (3) Prerequisite(s): Junior or Senior standing, and permission of department. Teaching assistant experience in introductory anthropology. Includes conducting review sessions, lecturing, assisting faculty member with exams, and related activities. *May be repeated for credit up to 6 credit hours. Graded on a Pass/No Credit basis.*

ANTH 4601. Seminar in General Anthropology. (3) Prerequisite(s): ANTH 3601 with a grade of C or above; Senior standing; Anthropology major; at least 24 credit hours of ANTH courses completed; permission of department; and, when taken for honors credit, approval of a proposal through the Honors College Application to Candidacy process the semester prior to taking the course. Synthesis and integration of subfields of anthropology with emphasis on accomplishing original research, and written and oral presentation in anthropology.

ANTH 4611. Senior Seminar in Applied Anthropology. (3) (SL) Prerequisite(s): ANTH 2171 or permission of instructor; ANTH 3601; and ANTH 4122, ANTH 4140, ANTH 4453, or other social science methods course that meets the requirement for the major. The capstone course for Applied Anthropology majors. In an effort to position students for an applied career, this course is divided into two main sections. First, students participate in a service-learning project that provides experience working as an applied anthropologist on a research project. Second, students complete several professionalization tasks, such as resume writing and interviewing skills, that help them communicate their experiences and skills.

ANTH 4615. Readings in Middle East Ethnography. (3) Seminar exploring both historically significant and recent ethnographies on selected topics. Examples include Israel/Palestine, Women in the Middle East, and Tribe, State, and Nation in the Middle East. *May be repeated for credit with change of topic.*

ANTH 4622. Readings in the Anthropology of Religion. (3) Seminar exploring both historically significant and recent ethnographies of religion. Examples include Islam, Religion and the Senses in the Muslim World, Shamanism, Comparative Ethnography of Religion. *May be repeated for credit with change of topic.*

ANTH 4701. Honors Research in Anthropology. (3) Prerequisite(s): Acceptance into the departmental honors program and permission of department. Independent Honors project; proposal, literature review, and research for project to be completed in ANTH 4601. *Graded on a Pass/No Credit basis.*

ANTH 4702. Honors Writing in Anthropology. (3) Prerequisite(s): ANTH 4701. Students analyze their Honors thesis research data and write up their results in a formal thesis document. They work together to provide peer feedback during the writing process and help each other prepare for a final oral presentation. *Graded on a Pass/No Credit basis.*

Applied Energy and Electromechanical Engineering (AEEE)

AEEE 4000. Special Topics. (1 to 3) Cross-listed Course(s): ENER 5000. Builds upon and synthesizes the knowledge that the students have gained from their curriculum. The specific topics covered in each separate offering of the course will broaden and deepen students' knowledge in general areas related to Applied Energy and Electromechanical Engineering.. *May be repeated for credit.*

AEEE 4010. Special Topics in Energy. (1 to 3) Builds upon and synthesizes the knowledge that the students have gained from their curriculum. The specific topics covered in each separate offering of the course will broaden and deepen students' knowledge in areas of Energy Engineering. *May be repeated for credit with change of topic.*

AEEE 4020. Special Topics in Electromechanical. (1 to 3) Builds upon and synthesizes the knowledge that the students have gained from their curriculum. The specific topics covered in each separate offering of the course will broaden and deepen students' knowledge in areas of Electromechanical Engineering. *May be repeated for credit with change of topic.*

AEEE 4140. Energy Management. (3) Prerequisite(s): ETEM 3231 or ETME 3250 or permission of Program Director; A working knowledge of engineering economics and thermodynamics, and Engineering major or minor. Study of the understanding and implementation of energy management techniques. Emphasis is on energy efficiency applications in homes, businesses, large buildings and industry. Topics include: energy auditing, energy management, energy cost analysis, energy & electric rate structures, lighting, HVAC systems, motors & drivers, boilers and steam systems, cogeneration, commercial and industrial applications and alternative energy sources.

AEEE 4250. Analysis of Renewable Energy Systems. (3) Prerequisite(s): ETEM 3231 or ETME 2222 or permission of Program Director; Engineering major or minor. System analysis of renewable energy systems: well-to-wheels analysis, lifecycle energy and emissions, total cost, skill sets, methodologies and tool kits needed to analyze various technologies on a consistent basis for a given application. Solar photovoltaics, wind energy, and fuel cell technologies are covered.

AEEE 4275. Building Environmental Systems. (3) Prerequisite(s): ETEM 3131 and ETEM 3231; or ETME 3250 or permission of Program Director and Engineering major or minor. Functions and operating characteristics of the major components of refrigerating machines, heat pumps, boilers, furnaces, solar collectors, heat exchangers, fans and pumps. Emphasis on sizing, economics and performance characteristics. Includes coverage of psychometric principles and fan and pump laws.

AEEE 4290. Advanced Instrumentation and Controls. (3) Prerequisite(s): ETEM 3131 or ETME 2222 or permission of Program Director, and Engineering major or minor. Methodologies for measurement, analysis, and control of physical components of various electromechanical systems as well as conventional and renewable energy conversion and storage systems.

Arabic (ARBC)

ARBC 1201. Elementary Arabic I. (3) For students with limited or no previous experience in Arabic. First course in a two-course sequence to develop competence in culture, speaking and writing, listening and reading comprehension in modern standard Arabic.

ARBC 1202. Elementary Arabic II. (3) Prerequisite(s): ARBC 1201 or equivalent. Second course in a two-course sequence to develop competence in culture, speaking and writing, listening and reading comprehension in modern standard Arabic.

ARBC 1502. Global Arts/Humanities: Modern Arab Culture. (3) This Global Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of a complex, interconnected world. ARBC 1502 provides students with an intricate account of how "identity" is conceived and narrated in contemporary Arab cultures. It features a range of English-translated works by prominent scholars, Arab literary figures, and filmmakers that explore several critical narratives surrounding the main theme of this course, i.e., identity, citizenship, and belonging. Special attention will be given to history, family, gender relations, and social change to discuss the main theme previously mentioned. Taught in English.

ARBC 1512. Local Arts/Humanities: Islamic Culture in the United States. (3) This Local Theme course uses the methods and insights of the arts and humanities to explore the central question of what it means to be a member of a "local" community. Through the study of the experiences of different peoples, societies, cultural traditions, and modes of expression in communities at the city, regional, or national level, students will be able to better understand the complexity and diversity of the society in which we live. Students are introduced to critical studies of language through a broad engagement with the contributions and presence of Arab and Islamic cultures in the United States. Course materials may draw widely from language, literature, history, linguistics, film, pop culture, music, cuisine, media, and the arts. Taught in English.

ARBC 2201. Intermediate Arabic I. (3) Prerequisite(s): ARBC 1202 and ARBC 1202L, or permission of department. Continued training in grammar. Intensive practice in reading, writing, and speaking.

ARBC 2202. Intermediate Arabic II. (3) Prerequisite(s): ARBC 2201 or permission of department. Builds on skills acquired in the first semester intermediate level. Introduced advanced grammatical concepts.

ARBC 3050. Topics in Arabic Language and Culture. (3) Study of a particular facet of the Arabic language, culture, or literature. *May be repeated for credit with change of topic.*

ARBC 3051. Topics in Arabic Language and Culture. (1 to 3) Study of a particular facet of the Arabic language, culture, or literature. *May be repeated for credit with change of topic.*

ARBC 3201. Advanced Arabic I. (3) Prerequisite(s): ARBC 2202 or permission of department. Review of Arabic grammar and guided conversation on prepared topics. Emphasis on spoken Arabic.

ARBC 3202. Advanced Arabic II. (3) Prerequisite(s): ARBC 3201 or permission of department. Review of Arabic grammar and guided compositions on prepared topics. Emphasis on vocabulary, idiomatic expressions, and stylistics.

ARBC 3203. Advanced Arabic III. (3) Prerequisite(s): ARBC 3201 or permission of department. Advanced Arabic grammar and conversation on prepared topics. Emphasis on vocabulary, idiomatic expressions, and stylistics.

ARBC 3210. Introduction to Modern Arab Culture. (3) A survey of the contemporary Arab culture in the Middle East and North Africa as reflected in history, language, literature, the arts, and social institutions. Special attention is given to family, gender relations, the role of social change, Arab art, and the Arab experience in the U.S. The course material is explored through scholarly research, media, student presentations, and discussions to promote analytical, discussion writing, and presentation skills. The class is taught in English.

ARBC 3211. Understanding Millennials of the Middle East through Literature, Culture, and Mass Media. (3) A cross-disciplinary study of Middle East diversity and change through a focus on its millennials who provide especially important insights into Middle Eastern societies and the transformations they are undergoing. Examines the changing historical concepts of youth (in the Middle East and worldwide), ethnic identifications, the role of youth in modern political movements, changing notions of gender and sexuality (with generational as well as individual differences), and various religious approaches (views toward and identification with organized religions, attitudes toward other faiths).

ARBC 3225. Short-Term Abroad. (3) Prerequisite(s): Permission of instructor. Faculty-led short-term study abroad experience offered during Spring Break.

Architecture (ARCH)

ARCH 1101. Architectural Design Studio I. (6) This is the first course in the studio sequence of the Core Program. Themes, methods, and objectives are coordinated between the studios in the Core to culminate after four studios in a solid understanding of fundamental issues, knowledge, and skills related to the practice, study, and understanding of architecture.

ARCH 1102. Architectural Design Studio II. (6) Prerequisite(s): ARCH 1101. Corequisite(s): ARCH 1602. This is the second course in the studio sequence of the Core Program. Themes, methods, and objectives are coordinated between the studios in the Core to culminate after four studios in a solid understanding of fundamental issues, knowledge, and skills related to the practice, study, and understanding of architecture. *May be repeated for credit.*

ARCH 1502. Global Arts/Humanities: Global Architecture, Culture, and Environment. (3) All Global Theme courses explore the central, unifying question of what it means to be a citizen of the world. Through

the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of a complex, interconnected world. ARCH 1502 examines architecture as a visual practice, looking at buildings not as inert objects, but as weighty visual constructs that hold cultural and environmental meaning for individuals and societies. ARCH 1502 allows students to develop an interdisciplinary perspective on the role and influence of architecture in society and the philosophical ideas that give buildings and places meaning.

ARCH 1602. Modes of Communication. (3) Prerequisite(s): ARCH 1101. Corequisite(s): ARCH 1102. Introduces undergraduate architecture students to the value and importance of written, verbal, and media communication in the discipline. The primary theme of the course is the integral relationship between three types of writing especially important to a career in architecture: description, analysis, and criticism. The course also explores the practice of free-writing as a type of design process. It focuses on written communication, but also addresses oral communication, which is another foundational practice in our discipline, and considers how writing and speaking are alike and unlike each other. Additionally, graphic communication is integrated as a way to develop a discipline-specific understanding of communication more broadly.

ARCH 2101. Architectural Design Studio III. (6) Prerequisite(s): ARCH 1102 and ARCH 1602. Corequisite(s): ARCH 4201 and ARCH 4301. This is the third course in the studio sequence of the Core Program. Themes, methods, and objectives are coordinated between the studios in the Core to culminate after four studios in a solid understanding of fundamental issues, knowledge, and skills related to the practice, study, and understanding of architecture.

ARCH 2102. Architectural Design Studio IV. (6) Prerequisite(s): ARCH 2101. Corequisite(s): ARCH 4202 and ARCH 4302. This is the fourth course in the studio sequence of the Core Program. Themes, methods, and objectives are coordinated between the studios in the Core to culminate after four studios in a solid understanding of fundamental issues, knowledge, and skills related to the practice, study, and understanding of architecture.

ARCH 3100. Intermediate Design Studio. (6) Prerequisite(s): ARCH 2102; Departmental approval. This course is designed to provide an additional and more advanced design studio for students pursuing the B.A. in Architecture with the Architectural Studies Concentration, so as to better prepare them for graduate studies in architecture. This studio builds upon the lessons learned in ARCH 2102 and introduces students to the basic principles of the integration of systems into building design. The design project is located on a real site in the Charlotte area, and its primary objective is to train students to negotiate multiple scales of the design process: site context; occupancy constraints; material constraints; building systems; environmental conditions; and aesthetic considerations.

ARCH 3101. Architectural Design Studio V. (6) Prerequisite(s): ARCH 2102. Corequisite(s): ARCH 4303 and ARCH 4604. This course applies the lessons of the Core studio to more advanced and comprehensive architectural conditions. Students confront new building technologies and emerging design methodologies.

ARCH 3102. Architectural Design Studio VI. (6) Prerequisite(s): ARCH 3101. This course applies the lessons of the Core studios to more

advanced and comprehensive architectural conditions. Students confront new building technologies and emerging design methodologies.

ARCH 4050. Architecture Topics. (3) Concentrated, in-depth study of selected topic. Topics vary according to faculty expertise and often include contemporary theoretical, social, technological, and design issues. *May be repeated for credit with change of topic.*

ARCH 4101. Architectural Design Studio VII: Advanced Building Design. (6) Prerequisite(s): ARCH 3102. This studio conducts an integrated building design project that synthesizes methods and objectives covered in previous studios.

ARCH 4102. Architectural Design Studio VIII: Topical. (6) Prerequisite(s): ARCH 4101. Various studio topics are offered with different emphasis and subject concentration to allow in-depth studio experiences in particular areas of study.

ARCH 4201. Architectural History I: Prehistory-1750. (3) Global survey of architecture and urbanism from prehistory to 1750. Explores key examples of buildings and cities as well as the theoretical, environmental, political, economic, technological, and cultural contexts in which they were built. Provides a general knowledge of the formal, spatial and ornamental characteristics that distinguish the built environment of distinct historic and traditional building cultures.

ARCH 4202. Architectural History II: 1750-Present. (3) Prerequisite(s): ARCH 4201 or permission of instructor. Global survey of architecture and urbanism from 1750 to the present. Explores key architectural and urban ideas, designers, buildings, and urban projects as well as how they were shaped by their environmental, political, economic, technological, and cultural context.

ARCH 4203. Architectural History III: Survey of Contemporary Theory (1950-Present). (3) Prerequisite(s): ARCH 4202 or permission of instructor. Survey of architectural theory from 1950 to the present. Focuses on the key ideas, texts, debates, and discourse that have informed architectural practice in the late twentieth and early twenty-first centuries.

ARCH 4204. History/Theory Topics. (3) Prerequisite(s): ARCH 4202 or permission of instructor. Cross-listed Course(s): ARCH 5600. Study of topical areas of history and theory of architecture. This course is required for Architecture majors to complement the required survey courses (ARCH 4201, ARCH 4202, and ARCH 4203) to develop in-depth research, writing, and presentation skills. *May be repeated for credit with change of topic.*

ARCH 4206. Professional Practice. (3) Learning objectives include an understanding of the practice of architecture today, its responsibilities and procedures, and emerging alternative forms of practice and roles of the architect.

ARCH 4301. Material and Assembly Principles. (3) Introduces quantitative and qualitative characteristics of architectural materials, systems, and processes. Also introduces the physical properties of materials relevant to their application in construction, assembly, and detail systems. Topics include: masonry, concrete, wood, steel, glass, cladding, roofing and flooring materials, and their assemblies.

ARCH 4302. Environmental Systems Principles. (3) Prerequisite(s): ARCH 4301 or permission of instructor. Introduces qualitative and quantitative analytical methods commonly used to assess the impact of environmental forces on occupant thermal and luminous comfort, energy performance, and regional sustainability. Also introduces the interplay between climatic events, building use, and the architectural variables that inform the appropriate application of building systems technology. Topics include: building envelope performance, and the introduction of passive and mechanical systems for heating, cooling, illuminating, and ventilating buildings.

ARCH 4303. Structural Principles. (3) Prerequisite(s): ARCH 4301, ARCH 4302, PHYS 1101, and PHYS 1101L. Introduces issues relevant to the fundamentals of structures including statics, strength and stability of materials. Also introduces structural concepts, systems, and the tracing of structural loads through basic principles, physical modeling, and theoretical and analytical methods. Topics include: the interrelationship between strain, stress, and stability, as well as the implications of tension, compression, shear, torsion, and bending.

ARCH 4304. Structural Systems. (3) Prerequisite(s): ARCH 4301 and ARCH 4303. Introduces specific structural applications of wood, steel, concrete, and masonry systems commonly used in small-scale commercial/institutional buildings. Also introduces design of beams, columns, walls, joinery, and connections appropriate to each material type through theoretical, analytical, and computer simulation methods.

ARCH 4305. Building Systems Integration. (3) Prerequisite(s): ARCH 4304 and ARCH 4302. Introduces a set of advanced issues related to the comprehensive, systematic integration of building technology systems commonly used in large-scale buildings through case study, analytical, and simulation methods. Topics address the resolution of the building structure, materials, environmental systems, mechanical systems, electrical systems, life safety, building water supply and waste, and conveying systems in building design.

ARCH 4600. Architectural History and Criticism Methodologies. (3) Cross-listed Course(s): ARCH 4204, ARCH 5204, and ARCH 5205. Prerequisite(s): ARCH 4202 or permission of instructor. Explores approaches to the history of architecture from its emergence as a discipline in the 19th century through its expansion in the 20th and 21st centuries to encompass more varied perspectives. Historical-based approaches to criticism of the contemporary built environment are also explored. Required course for Minor in Architectural History and Criticism.

ARCH 4601. Rome Prep. (1) An essential introduction to the School of Architecture Rome Program. It prepares students to optimize the full extent of their Spring semester experience in Italy. Students planning to participate in the Rome program should enroll in this course the semester prior.

ARCH 4604. Computational Methods. (3) Prerequisite(s): ARCH 2102 or permission of instructor. Cross-listed Course(s): ARCH 5604. Advances computation in architecture by understanding the strengths and weaknesses of various kinds of computing and their role in design. Course content included: advanced 3D modeling, basic parametrics, basic scripting, and the importance of digital inquiry. Also introduces computational concepts, their history, and how they relate to design and architecture.

ARCH 4605. Computational Practice. (3) Prerequisite(s): ARCH 4604 or permission of instructor. Capstone course for digital and computational studies in the 5th-Year program. The objectives of the course are to provide the use of advanced digital tools, digital fabrication, advanced visualization techniques, scripting, as well as parametric and building information modeling tools.

ARCH 4607. Urban Form. (3) Prerequisite(s): Enrollment in Bachelor of Architecture degree program. An inquiry into critical matters concerning the contemporary city, this course runs parallel to and resonates with an urban building design studio based on the Center City Campus. Topics focus on the social, cultural, political, historical, and theoretical dimensions of the city.

ARCH 4890. Directed Independent Study. (1 to 6) Prerequisite(s): Architecture major and permission of chair of instruction. Designed to allow students to pursue faculty-directed independent study topics not provided by other college offerings. *May be repeated for credit with permission of college.*

Art: Academic & Departmental Art (ARTA)

ARTA 1402. Gallery Internship. (3) Participation in all phases of exhibition selection, preparation, and presentation in four campus galleries under supervision of campus galleries coordinator. *May be repeated for credit one time.*

ARTA 1502. Global Arts/Humanities: Art in a Global Context. (3) All Global Theme courses explore the central, unifying question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of a complex, interconnected world. ARTA 1502 provides an interdisciplinary introduction to the visual arts in a global context with analysis of visual culture in a variety of media and genres from different historical periods and geographic locations. This course examines the function, meaning, and politics of individual works of art and art movements. It also addresses the role of art as a site for the articulation of value systems, including those of gender, class, and race. *May not be taken for credit and for a grade if credit has been received for LBST 1105.*

ARTA 1512. Local Arts/Humanities: Arts and Community. (3) All Local Theme courses explore the central, unifying question of what it means to be a member of the "local" community in which we live. Through the study of the experiences of different peoples, cultures, and communities in our city, our region, or our nation, students will be able to better understand themselves in the context of the complex and diverse society in which we live. We examine the social, cultural, and political contexts that inform the conception, production, and reception of art and design in local environments.

ARTA 2800. Directed Studies in Art. (1 to 3) Prerequisite(s): Art major; permission of instructor and department. Directed individual research in a particular artistic field of interest not otherwise offered. *May be repeated for credit.*

ARTA 3000. Topics in Art. (1 to 3) Prerequisite(s): Art major or Graphic Design major. Special topic in art. *May be repeated for credit with change of topic.*

ARTA 3201. B.F.A. Portfolio Review. (1) Prerequisite(s): Art major, minimum 2.0 GPA, ARTB 1201, ARTB 1202, ARTB 1203, ARTB 1204, and ARTB 1206 (*Note: Art Education concentration requirements are listed under the section for the B.F.A. in Art with Concentration in Art Education program.*). Students compile a portfolio of work and written information to progress into upper-level course requirements in intended concentration in the B.F.A. in Art. Those denied to an intended concentration may be reviewed by other concentrations for progression. If denied by all concentrations, students must move to B.A. in Art status. Students must pass course by 5th semester enrolled in the department or must move to B.A. in Art status. *Graded on a Pass/No Credit basis.*

ARTA 3400. Internship in the Arts. (1 to 3) Prerequisite(s): Art major; permission of sponsor instructor and department. Opportunity for students to observe, examine, and participate in the creative dynamics and procedural operations of an art organization, arts related business, professional artist's studio, or expert craftworker. Sponsor supervised. A three credit experience requires 120 contact hours per semester. Repeat for credit with different sponsors. *Graded on a Pass/No Credit basis.*

ARTA 3800. Independent Study in Art. (1 to 3) Prerequisite(s): Art major; permission of instructor and department. Supervised individual research of artistic problems with appropriate documentation of the results. *May be repeated for credit.*

ARTA 3801. Visual Arts Workshop. (1 to 6) Prerequisite(s): Art major; permission of instructor and department. Contracted and pre-approved arrangements for student to receive credit for visual arts workshops conducted outside the University's course offerings. *May be repeated for credit.*

ARTA 4600. Senior Seminar. (3) Prerequisite(s): WRDS 1103 or WRDS 1104 with a grade of C or above; Senior standing; and Art major in either of final two semesters of art program. Seminar and intensive writing experience explores a variety of general issues in contemporary art with an emphasis on career questions faced by graduating seniors.

ARTA 4901. Senior Thesis I: Creative Research. (3) Prerequisite(s): Senior standing, Art major, ARTA 3201, and:

- Cross Disciplinary: permission of advisor
- Digital: ARTM 3103 or ARTM 3105
- Painting: ARTD 2139; and two of the following: ARTP 3131, ARTP 3132, ARTP 3161
- Photography: ARTT 3190 and ARTT 3191
- Print Media: ARTB 1201, ARTB 1203, ARTB 1206, ARTR 2161 or ARTR 2162
- 3D: any 3000-level course in ARTC (recommended ARTC 3273); ARTF (recommended ARTF 3353), or ARTZ (recommended ARTZ 3306 or ARTZ 3344)

Advanced Studio course where students research, conceptualize, and create a body of work. Students are self-directed in the development of source ideas, content, and use of materials. They refine their personal expression, and their ability to define an artistic problem or theme. Students are expected to conduct theoretical research and contextualize

their artistic production. In this often interdisciplinary environment, students engage in group critiques and sometimes interact with visiting artists. Six contact hours.

ARTA 4902. Senior Thesis II: Advanced Creative Practice. (3) Prerequisite(s): Senior standing, Art major, ARTA 3201, and ARTA 4901. Advanced, individual project-based studio where students master the ability to work on a consistent body of work, supported by theoretical enquiry, culminating in Senior Exhibition (BFA Thesis Show). Six contact hours. *May be repeated for credit with permission of instructor.*

Art: Basic Foundation Studios (ARTB)

ARTB 1201. 2D Design. (3) Prerequisite(s): Art or Graphic Design major. Introductory studio exploring basic concepts and techniques of visual organization in two dimensions. Includes study of the formal elements and principals of composition and the interrelationship between form and content. Six contact hours.

ARTB 1202. 3D Design. (3) Prerequisite(s): Art or Graphic Design major. A beginning studio emphasizing experimentation with design and materials as related to the exploration of form and space in three dimensions. Six contact hours.

ARTB 1203. Drawing I. (3) Prerequisite(s): Art or Graphic Design major. Introduction to drawing involving skills and theory including perspective, proportion, rendering, and expression in a variety of media and techniques. Priority for majors. Six contact hours.

ARTB 1204. Digital Foundations. (3) Prerequisite(s): Art or Graphic Design major. Introduction to digital technologies, content production in current software, and best digital practices for emerging artists. Six contact hours.

ARTB 1206. First Year Seminar. (3) Prerequisite(s): Art major. Introduction to professional practice, entrepreneurship, and conceptual development for artists. There will be an overview of available Department, College, University, and Community Resources. In-class discussions, assignments, presentations, guest speakers and/or other opportunities will support student learning.

Art: Ceramics (ARTC)

ARTC 2171. Ceramics Handbuilding. (3) Pre- or Corequisite(s): Art or Graphic Design major; ARTB 1201; ARTB 1202; ARTB 1203; ARTB 1204; and ARTB 1206 or ARTG 2180. Introduction to handbuilt forming methods, concept development, ceramic materials, and firing procedures. Six contact hours.

ARTC 2172. Ceramics Wheel I. (3) Pre- or Corequisite(s): Art major or Graphic Design major; ARTB 1201; ARTB 1202; ARTB 1203; ARTB 1204; and ARTB 1206 or ARTG 2180. Introduction to wheel forming methods and emphasis on skill development, design, glaze application, utilitarian and sculptural concepts, and basic high-fire techniques. Six contact hours.

ARTC 3071. Topics in Ceramics. (3) Prerequisite(s): Art major or Graphic Design major; ARTC 2171 or ARTC 2172. Special topics in ceramics. *May be repeated for credit with change of topic.*

ARTC 3171. Ceramic Sculpture. (3) Prerequisite(s): Art or Graphic Design major, and ARTC 2171. Intermediate studio emphasizing sculptural techniques, concepts, and design. Six contact hours.

ARTC 3172. Ceramics Wheel II. (3) Prerequisite(s): Art or Graphic Design major, and ARTC 2172. Continuation of ARTC 2172 emphasizing development of skills, materials, high temperature firing techniques, design concepts related to utility and sculpture. Six contact hours.

ARTC 3273. Intermediate Ceramics. (3) Prerequisite(s): Art or Graphic Design major; and ARTC 3171 or ARTC 3172. Advanced ceramic studio of higher level skills, concepts, and aesthetics. Six contact hours. *May be repeated for credit one time.*

ARTC 3274. Advanced Ceramics. (3) Prerequisite(s): Art major, ARTC 3273, and ARTA 3201; or Graphic Design major. Advanced ceramic studio of higher level skills, concepts, and aesthetics with particular emphasis on personal expression and development of an individual clay portfolio. Six contact hours. *May be repeated for credit one time.*

Art: Drawing (ARTD)

ARTD 2134. Figure Drawing I. (3) Prerequisite(s): Art or Graphic Design major. Prerequisite(s): ARTB 1203. A studio course that explores strategies for drawing the human form in terms of anatomy, proportions, expression, movement, and composition with a variety of media and techniques. Six contact hours.

ARTD 2139. Drawing II. (3) Pre- or Corequisite(s): Art or Graphic Design major; ARTB 1201; ARTB 1202; ARTB 1203; ARTB 1204; and ARTB 1206 or ARTG 2180. Further development of perceptual skills with emphasis on conceptual issues; exploration of subject matter, meaning and content, and thematic development in a variety of black and white and color materials. Six contact hours.

ARTD 3134. Figure and Anatomy. (3) Prerequisite(s): Art or Graphic Design major, and ARTD 2134. Emphasizes the study of anatomy as it pertains to drawing. Complex drawing problems in a variety of media. Six contact hours. *May be repeated for credit two times.*

Art Education (ARTE)

ARTE 2100. Artists as Teachers. (3) Prerequisite(s): Art major; and ARTB 1201 or ARTB 1203 with grade of C or above. An introduction to the role of the visual arts in learning and teaching in a variety of settings. Individual studio practices are translated into teaching expertise to develop and create meaningful, engaged, and relevant curriculum. Experiences in using visual arts to transform individuals and communities are incorporated. A clinical experience of a minimum of 20 hours at an assigned school is required. A minimum grade of B or above in this course is required for admittance to the Major in Art with a Concentration in Art Education.

ARTE 2121. Integrating Art Across the Curriculum. (3) Prerequisite(s): Pre-Elementary (PELM), Elementary Education (ELED), or Special Education and Elementary Education (PSPE, SPEL) major. Exploration of the role of visual arts in the holistic development of children. Provides models for meaningful integrating content and skills in the visual arts with academic subjects. The course is designed to inform Elementary Education majors about the fundamentals of aesthetics, art making, and art pedagogy. Students experiment with various studio materials and methods used to teach diverse learners in the elementary classroom. Four contact hours.

ARTE 3121. Elementary Art Methods. (3) Prerequisite(s): Art major with Art Education concentration and admission to Teacher Education. Analysis of learning themes as related to growth and development in the visual arts; organization of tools, media, and materials appropriate for the elementary level; curriculum design in planning art units and lessons, evaluation, and motivation techniques. A practicum of a minimum of twenty hours in an elementary setting is required, where the student assists the teacher, and on at least two occasions experiences teaching. Five contact hours.

ARTE 3124. Investigating Global Art. (3) Prerequisite(s): Art major, Art History major, and Graphic Design major only. Examines social theory important to informing effective art theory and practice. Guidance and practice in research, identification, and critical examination of important moments in visual culture / art history for incorporation into all aspects of art teaching. Uses electronic media, discursive, and studio methods to synthesize understanding and mastery of knowledge and skills related to course content.

ARTE 4021. Topics in Art Education. (1 to 3) Prerequisite(s): Art major. Special topics in art education. *May be repeated for credit with change of topic.*

ARTE 4122. Secondary Art Methods. (3) Prerequisite(s): Art major with Art Education concentration; admission to Teacher Education; and ARTE 3121 with grade of C or above. Analysis of learning themes as related to growth and development in the visual arts; organization of tools, media, and materials appropriate for the secondary level; curriculum design in planning art units and lessons, evaluation, and motivation techniques. A practicum of a minimum of twenty hours in a secondary setting is required, where the student assists the teacher, and on at least two occasions experiences teaching. Five contact hours.

ARTE 4125. Creativity and Mindfulness. (3) Prerequisite(s): Art major with Art Education concentration, and admission to Teacher Education. Based on research in creativity, affective neuroscience, and mindfulness, this course aims to empower the individual creative process through the use of mindfulness and expressive arts. Course provides an introduction to practices that strengthen cognitive flexibility, overcome self-judgment, enhance creativity, and deepen mindful awareness. Students will learn how to develop skills to reduce stress and cultivate resilience and well-being, to strengthen the holistic development of artists and teachers.

ARTE 4466. Art Education Year-Long Internship. (1) Prerequisite(s): Art Education major; and ARTE 3121 or ARTE 4122. All teacher candidates participate in the year-long internship (YLI) during their final year of the program. During the first semester of the YLI, candidates spend 20 hours

spread over 8-15 weeks in an assigned classroom with the YLI Cooperating Educator (CE) while also completing coursework.

ARTE 4467. Student Teaching in Art. (12) Prerequisite(s): Art major with Art Education concentration; completion of all required coursework at UNC Charlotte with grades of C or above; and admission to Teacher Education. A planned sequence of experiences in the student's area of specialization conducted in an approved school setting under the supervision and coordination of a site coordinator and clinical educator. During student teaching, students must demonstrate the competencies and dispositions identified for their specific teaching field in an appropriate grade level setting. Students are assigned 15 weeks in a school setting. Includes seminars. Senior exhibit of candidate and student work is required. Participating students pay a course registration fee for edTPA portfolio assessment. *Graded on a Pass/No Credit basis.*

Art: Fibers (ARTF)

ARTF 2151. Fibers I. (3) Pre- or Crequisite(s): Art or Graphic Design major; ARTB 1201; ARTB 1202; ARTB 1203; ARTB 1204; and ARTB 1206 or ARTG 2180. Introduction to the field of fibers, with exploration in constructed fibers, garment forms, and surface design, including weaving, dyeing, printing, and three dimensional construction techniques. Six contact hours.

ARTF 3051. Topics in Fibers. (3) Special topics in fibers. *May be repeated for credit with change of topic.*

ARTF 3352. Fibers: Surface Design. (3) Prerequisite(s): Art or Graphic Design major, and ARTF 2151. Exploration of surface design techniques including batik, silkscreen, block printing, and other dyeing processes combined with embellishment techniques such as embroidery and beadwork. Six contact hours. *May be repeated for credit two times.*

ARTF 3353. Fibers: Constructed Textiles. (3) Prerequisite(s): Art or Graphic Design major, and ARTF 2151. An exploration of traditional textile construction methods for application in the making of contemporary sculpture and installation works. Techniques covered may include weaving, twining, garment forms, plaiting, felt-making, knotting, coiling, crochet, etc. Six contact hours. *May be repeated for credit two times.*

Art: Graphic Design (ARTG)

ARTG 2180. Design Thinking. (3) Prerequisite(s): Graphic Design or Art major, ARTB 1201, and ARTB 1203. An introduction to the discipline and profession of graphic design. Focuses on the processes and methodologies that are unique to the design profession, as well as graphic design's history. Project assignments enable students to develop the visual problem-solving skills needed for pursuing further study in graphic design. Three contact hours.

ARTG 2181. Graphic Design I. (3) Prerequisite(s): Graphic Design or Art major, ARTB 1201, and ARTB 1203. An introduction to graphic design and visual communications principles. Projects explore a range of tools, techniques, materials, and procedures. Emphasizes the importance of craft and concept development, as well as fundamentals of original image making, composition, type, and symbols. Six contact hours.

ARTG 2182. Typography I. (3) Prerequisite(s): ARTB 1201, ARTB 1203, and Graphic Design or Art major. An introduction to the fundamental principles and function of type as a means to visually communicate ideas, including the history of typeface design and evolution typographic space and technologies. Hands-on projects incorporate a range of media and methodologies that develop digital typesetting skills and emphasize craft. Six contact hours.

ARTG 3081. Topics in Graphic Design. (1 to 3) Prerequisite(s): Graphic Design or Art major, and ARTG 2181. Special topics in graphic design. Six contact hours. *May be repeated for credit with change of topic.*

ARTG 3183. Graphic Design II. (3) Prerequisite(s): Graphic Design or Art major, ARTB 1202, ARTB 1204, ARTG 2180, ARTG 2181, ARTG 2182, and ARTM 2105. An intermediate-level course that focuses on visual communications problem solving, the computer as a creative tool, and professional designer/client relationships. Course projects build digital media and oral presentation skills while incorporating design strategies and processes to produce both print and screen-based solutions. Six contact hours.

ARTG 3184. Typography II. (3) Prerequisite(s): Graphic Design major, ARTB 1202, ARTB 1204, ARTG 2180, ARTG 2181, ARTG 2182, and ARTM 2105. An advanced investigation of typographic systems and the application of type using new forms of visual media. Course projects include developing complex grid structures, exploring the relationships between image and text, experimenting with the expressive qualities of type, and an introduction to type in motion and interactivity. Six contact hours.

ARTG 3185. UX/UI Design Strategies. (3) Prerequisite(s): Graphic Design major, ARTB 1202, ARTB 1204, ARTG 2180, ARTG 2181, ARTG 2182, and ARTM 2105. Intermediate-to-advanced study of digitally based design for websites and apps. Addresses techniques and strategies for developing engaging user interfaces and content delivery pathways for screen-based materials that meet up-to-date professional standards. Course projects place an emphasis on collaborative concept development, digital iteration, and investigation of user experiences. Six contact hours.

ARTG 3186. Communications Design. (3) Prerequisite(s): Graphic Design major, ARTB 1202, ARTB 1204, ARTG 2180, ARTG 2181, ARTG 2182, and ARTM 2105. Intermediate-to-advanced study of the role of graphic design in branding, advertising, and organizational communications. Project assignments address organizational identity materials as well as advertising and branding campaigns across print and screen-based media. The course develops students' research, process, design, presentation, and persuasion skills. Six contact hours.

ARTG 3408. Graphic Design Internship. (3) Prerequisite(s): Graphic Design major; ARTG 3183; ARTG 3184; and permission of instructor, department, and sponsor (consents required prior to registration). Students are placed in a professional setting for observation and supervised design-related duties. Students are required to provide written documentation of internship. This experience requires 120 contact hours per semester. *May be repeated for credit with change in sponsor. Graded on a Pass/No Credit basis.*

ARTG 4180. Print Production. (3) Prerequisite(s): Graphic Design major, ARTG 3183, ARTG 3184, and ARTG 3186. An advanced-level

graphic design problem-solving class and an in-depth exploration of digital pre-press and commercial printing technologies. Projects focus on the relationships between message and media, alternative approaches to fabrication, and designing as a team. Topics include: project planning, paper selection, copywriting, and color proofing. Six contact hours.

ARTG 4182. Design Research. (3) Prerequisite(s): Graphic Design major, ARTG 3183, ARTG 3184, ARTG 3185, and ARTG 3186. In-depth, advanced study of research processes for graphic designers. Addresses techniques and strategies for incorporating traditional and creative research practices into the work of graphic design. Course projects place an emphasis on the role of ideation, iteration, informed speculation, data visualization, and persuasion in solving broad communication problems within civic and commercial contexts. Six contact hours.

ARTG 4982. Graphic Design Projects. (3) Prerequisite(s): Graphic Design major, ARTG 3185, ARTG 4180, and ARTG 4182. An advanced-level course requiring independent solving of issues pertaining to design and society. Project requirements also include the creation of new portfolio pieces and/or the revision of existing work. Six contact hours.

Art History (ARTH)

ARTH 1211. Art History Survey I. (3) Survey of world art from prehistory to c. 1300C.E., focusing on the functions and meanings of individual works of art, visual culture, and art history as a discipline. Lecture course.

ARTH 1212. Art History Survey II. (3) Survey of world art from c. 1300C.E. to the close of the Second World War, focusing on the functions and meanings of individual works of art, visual culture, and art history as a discipline. Lecture course.

ARTH 2001. Topics in Art History. (3) Special Topics in art history. *May be repeated for credit with change in topic.* Lecture course.

ARTH 2003. Pre-Columbian Art. (3) Cross-listed Course(s): LTAM 3313. Prerequisite(s): ARTH 1212 or permission of instructor. Survey of the cultures, artistic production and architecture of the Pre-Columbian Americas. Readings and discussions focus on artistic traditions, daily life, and political structures.

ARTH 2110. Contemporary Art History. (3) Prerequisite(s): Art, Art History or Graphic Design major. History of primary art movements, artists, and visual culture from 1940 to the present, including theoretical and historical perspectives.

ARTH 2140. Medieval Art. (3) Prerequisite(s): ARTH 1211 or permission of instructor. Survey of the architecture, sculpture, stained glass, mosaics, painting, manuscript illumination, and luxury objects of Europe between the fall of the Roman Empire until the beginning of the Renaissance, both in the Byzantine Empire and the western Middle Ages.

ARTH 2614. Writing Seminar in Art History. (3) Prerequisite(s): Art History major. An introductory course designed to familiarize students with writing in the discipline. Through weekly writing assignments, peer-review activities, reflections, and presentations, students develop the ability to structure written work in a well-organized manner, to assemble and assess primary source material, to demonstrate logic and

argumentation, to develop clear thesis statements, and to strengthen analytical skills by reviewing written essays, museum texts, and gallery or museum shows.

ARTH 3001. Topics in Art History. (1 to 3) Special topics in art history. *May be repeated for credit with change of topic.*

ARTH 3114. Art History Methods. (3) Prerequisite(s): Art History major; ARTH 1211, ARTH 1212, and ARTH 2110; or permission of instructor. Survey of primary methodologies, theories and research in the history of art and art criticism, including formalism; iconography; connoisseurship; biography; social history; Marxism; feminism; postmodern, and contemporary theory.

ARTH 3115. Honors Art History Methods. (3) Prerequisite(s): Art History major; ARTH 1211, ARTH 1212, and ARTH 2110; or permission of instructor. Survey of primary methodologies, theories and research in the history of art and art criticism, including formalism; iconography; connoisseurship; biography; social history; Marxism; feminism; postmodern, and contemporary theory.

ARTH 3121. Contemporary African Art. (3) Cross-listed Course(s): AFRS 3121. Prerequisite(s): ARTH 1211, ARTH 1212, or permission of instructor. Survey of contemporary African artists and artworks (1960s to the present day), on the continent and in the diaspora, with international profiles. Readings and discussions focus on politics, gender, class, identity, and mobility.

ARTH 3317. Maya Art. (3) Cross-listed Course(s): LTAM 3300. Prerequisite(s): ARTH 1211 or permission of instructor. Survey of the cultures, artistic production and architecture of the Maya from c. 250 to 800 C.E. Readings and discussions focus on Maya rulership and social structure.

ARTH 3318. Mexica (Aztec) Art. (3) Cross-listed Course(s): LTAM 3301. Prerequisite(s): ARTH 1212 or permission of instructor. Survey of the cultures, artistic production and architecture of the Central Mexico region from c. 1300 to the period of European invasion in the 16th century. Readings and discussions focus on artistic traditions, daily life, and political structures.

ARTH 3320. Ancient Egyptian and Near Eastern Art. (3) Prerequisite(s): ARTH 1211 or permission of instructor. Survey of the arts and architecture of the ancient Near East, Egypt, and Aegean from 3000 - 600 BCE. Readings and discussions focus on issues of ethnicity, gender, religion, and politics.

ARTH 3322. Ancient Greek Art. (3) Prerequisite(s): ARTH 1211 or permission of instructor. Survey of the arts and architecture of the ancient Greeks, Etruscans, and Persians from c. 800-31 B.C.E. Readings and discussions focus on issues of ethnicity, gender, religion, and politics.

ARTH 3323. Ancient Roman Art I. (3) Prerequisite(s): ARTH 1211. Survey of the arts and architecture of the peoples included in the Roman Empire from c. 300 B.C.E. to c. 100 C.E. Readings and discussions focus on issues of ethnicity, gender, religion, and politics during the later Empire and its provinces.

ARTH 3324. Ancient Roman Art II. (3) Prerequisite(s): ARTH 1211. Survey of the arts and architecture of the peoples included in the Roman Empire from c. 100 to c. 300 C.E. Readings and discussions focus on issues of ethnicity, gender, religion, and politics during the later Empire and in its provinces.

ARTH 3328. West African Art and Display. (3) Cross-listed Course(s): AFRS 3328. Prerequisite(s): ARTH 1212 or permission of instructor. Addresses major genres, monuments, and issues of artistic production in West Africa. Readings and discussions focus on politics, identity, gender, performance, collection, and display.

ARTH 3350. Northern Renaissance Art. (3) Prerequisite(s): ARTH 1212. Survey of Netherlandish and German painting, printmaking, and sculpture of the Renaissance. Readings and discussions focus on religion, patronage, and the uses of art in society.

ARTH 3351. Italian Renaissance Art. (3) Prerequisite(s): ARTH 1212 or permission of instructor. Survey of major artists and issues in Italian Renaissance art and architecture. Readings and discussions focus on major centers of artistic activity, patronage, and the rise of Humanism.

ARTH 3360. Northern Baroque Art. (3) Prerequisite(s): ARTH 1212 or permission of instructor. Survey of Northern European art from the 16th and 17th centuries. Readings and discussions focus on a variety of artistic genres and art's relationship to religion and politics.

ARTH 3381. Modernism. (3) Prerequisite(s): ARTH 1212 or permission of instructor. This course will address the history of modern art from 1850-1950 with a special emphasis on the European avant-garde, issues of identity construction (race, gender, sexuality), and theoretical discussions of representation.

ARTH 3393. History of Photography. (3) Prerequisite(s): Art or Art History major; and ARTH 1212 or permission of instructor. Survey of the major events and stylistic developments in photography from 1839 to the present.

ARTH 3395. African American Art. (3) Cross-listed Course(s): AFRS 3395. Prerequisite(s): ARTH 2110 or permission of instructor. Survey of the major movements and issues of African American artistic production, from the 17th century to the present day. Readings and discussions focus on stylistic developments, politics, race, gender, identity, and representation.

ARTH 3694. Histories of New Media. (3) Prerequisite(s): ARTH 1212; and BFA Studio Art major with Concentration in Digital Media, Photography, or Print Media; or Art History major. Examines the history of new media as both a discourse and a set of artistic practices within contemporary art history. The aim of this seminar is to introduce students to the cultural, historical, theoretical, and socio-political issues that inhere within the discourse and creation of new media, whether it be animation, video art, digital photography, films, or interactive platforms. Leading works in the history of new media art history, philosophy, and cultural studies are read.

ARTH 3810. Independent Study in Art History. (1 to 3) Prerequisite(s): Permission of instructor. Supervised individual investigation of art history topic with appropriate documentation of research results. *May be repeated for credit.*

ARTH 4609. Art History Senior Seminar. (3) Prerequisite(s): Art History major, ARTH 2614 and ARTH 3114; or permission of instructor. A capstone seminar designed around an issue in Art History, in subjects determined by the professor of record: requiring reading, discussion, reports, and a major paper. *May be repeated for credit with change of topic.*

ARTH 4700. Art History Honors Thesis. (3) Prerequisite(s): ARTH 3115 with grade of A; permission of instructor; and approval of a proposal through the Honors College Application to Candidacy process the semester prior to taking the course. The preparation and presentation of an acceptable Honors thesis or its equivalent. The final course in a required three-course sequence for Honors in Art History. Completion of a thesis earning a grade C or above meets the requirement for a 4000-level course in the major; a grade of A is required to earn honors.

Art: Illustration (ARTL)

ARTL 2186. Illustration I. (3) Prerequisite(s): Art or Graphic Design major; ARTB 1201; ARTB 1202; ARTB 1203; ARTB 1204; and ARTB 1206 or ARTG 2180. Introduction to the field of illustration. Projects will focus on traditional and digital media exploration, visual literacy, and conceptual development. Six contact hours.

ARTL 3086. Topics in Illustration. (3) Prerequisite(s): Art or Graphic Design major; ARTL 2186. Special topics in illustration. *May be repeated for credit with change of topic.*

ARTL 3185. Digital Drawing & Painting. (3) Prerequisite(s): ARTB 1201, ARTB 1202, ARTB 1203, ARTB 1204. Introduction to tablet-based drawing and painting using industry standard software. Series of assignments that build basic digital rendering skills with a focus on visual problem-solving, rendering, and drawing. Six contact hours.

ARTL 3186. Visual Development: Environment. (3) Prerequisite(s): Art or Graphic Design major, ARTL 2186. Introduction to designing natural and constructed spaces for purposes such as game design, animation, film and television production design, and graphic novel narrative. Students will practice an iterative design process that involves research, design, planning and construction. Six contact hours.

ARTL 3187. Narrative Illustration for Publishing Industry. (3) Prerequisite(s): Art major, ARTA 3201, and ARTL 2186; or Graphic Design major. An introduction to visualizing a sequential narrative for publication through the use of character, mood, and environment to tell a story or develop a conceptual idea. May include children's book illustration, comics, graphic novels, and commercial illustration. Six contact hours.

ARTL 3188. Visual Development: Character Design. (3) Prerequisite(s): Art major, ARTA 3201, and ARTL 2186; or Graphic Design major. Focus on development of character design skills based in costume design, anatomical study, movement study and cultural constructs. Acquire familiarity with overall production sequence in creation of films, graphic novels, and games. Six contact hours.

ARTL 3286. Narrative Illustration for Entertainment Industry. (3) Prerequisite(s): Art major, ARTA 3201, and ARTL 2186; or Graphic Design

major. An introduction to developing plot-based narrative for film, TV, and game production. May include storyboard design, animation, game design and research related to a variety of markets. *Six Contact Hours.*

ARTL 4981. Illustration Projects. (3) Prerequisite(s): Art or Graphic Design major; ARTA 3201, ARTL 3186, ARTL 3187. Pre- or Corequisite(s): ARTL 3286, and ARTA 4600. Initiation and implementation of a self-designed, advanced-level project solving a complex artistic problem. Research in self-promotion, professional practice, and portfolio refinement required. Six contact hours.

Art: Digital Media (ARTM)

ARTM 2105. 4D. (3) Prerequisite(s): ARTB 1204. Pre- or Corequisite(s): Art or Graphic Design major; ARTB 1201; ARTB 1202; ARTB 1203; and ARTB 1206 or ARTG 2180. In-depth digital production of 2D graphics toward the creation of time-based works employing the Principles of Animation and sound design. Six contact hours.

ARTM 3005. Topics in Digital Media. (3) Prerequisite(s): Art major and ARTA 3201; or Graphic Design major; and permission of instructor. Special topics in the creation of digital art. *May be repeated for credit with change of topic.*

ARTM 3101. Game Design and Graphics. (3) Prerequisite(s): Art or Graphic Design major, or permission of instructor; and ARTM 2105 or ARTG 3183 and ARTM 2105. Graphics, animation, and sound for digital game design. Topics include: game design, graphics and animation for digital games, team-based production, and ethics and conceptual concerns in digital media. Six contact hours. *May be repeated for credit.*

ARTM 3102. 3D Modeling and Animation. (3) Prerequisite(s): Art or Graphic Design major. Pre- or Corequisite(s): ARTM 2105. Intermediate studio exploring the use of digital 3D technologies for the creation or art and design works. Six contact hours.

ARTM 3103. Animation Production. (3) Prerequisite(s): Art or Graphic Design major, or permission of instructor; ARTA 3201 and ARTM 2105 with grade of C or above, or Graphic Design major. Emphasis on animation production, including topics in character animation, pre- through post-production workflow, organization of complex productions, funding sources, and distribution of time-based media. Six contact hours. *May be repeated for credit.*

ARTM 3105. Video Art. (3) Prerequisite(s): Art or Graphic Design major; and ARTM 2105. Video as an art form, including basic techniques of video production, editing, and visual effects. Six contact hours.

ARTM 3205. Interactive Art and Design. (3) Prerequisite(s): Art major or Graphic Design major; ARTA 3201 or ARTG 3183 and ARTM 2105. Advanced work in interactive design. Six contact hours.

ARTM 3390. Digital Compositing. (3) Cross-listed Course(s): ARTT 3390. Prerequisite(s): Art or Graphic Design major; and ARTB 1204. Advanced digital manipulation of photographic imagery in digital photography software, and the exploration of historical and contemporary theory surrounding the manipulation of the photographic medium. Six contact hours.

ARTM 3405. Internship in Digital Media. (3) Prerequisite(s): Art or Graphic Design major; ARTM 3103, ARTM 3105, or ARTM 3205; and permission of instructor, department, and sponsor (required prior to course registration). Placement in a professional setting for observation and supervised digital media-related duties. This experience requires 120 contact hours per semester. Written documentation of internship required. *May be repeated for credit with change in sponsor. Graded on a Pass/No Credit basis.*

Art: Painting (ARTP)

ARTP 2131. Painting I. (3) Pre- or Corequisite(s): Art or Graphic Design major; ARTB 1201; ARTB 1202; ARTB 1203; ARTB 1204; and ARTB 1206 or ARTG 2180. Beginning painting studio, exploration of theory and practice, with a focus on traditional and contemporary methods and mediums in painting, ranging from oil paint to introduction of water-based, digital, and mixed-media approaches. Students are introduced to the work of culturally diverse painters and encouraged to develop unique expressive content of their own. Six contact hours.

ARTP 3031. Topics in Painting. (3) Prerequisite(s): ARTP 2131; Art or Graphic Design major. Special topics in painting. *May be repeated for credit with change of topic.*

ARTP 3131. Abstract Painting. (3) Prerequisite(s): Art or Graphic Design major, and ARTP 2131. Intermediate studio exploring varieties of abstraction in modern and contemporary painting practice, utilizing diverse media (e.g., acrylics, inks, and an introduction of encaustics). Students are encouraged to develop their own visual language and content in response to trends and methods in 21st century abstraction. Six contact hours.

ARTP 3132. Figurative Painting. (3) Prerequisite(s): Art or Graphic Design major; ARTD 3134; ARTP 2131; and ARTA 3201 or Graphic Design major. Intermediate studio exploring the human form as a vehicle for artistic expression using a variety of painting media (e.g., oil, acrylic, watercolor, egg tempera, and experimental processes). Students are introduced to diverse historic and contemporary approaches to figuration and encouraged to develop unique expressive content of their own. Integration of various media and disciplines is fully acceptable. Six contact hours. *May be repeated for credit.*

ARTP 3161. Mixed Media Painting. (3) Prerequisite(s): ARTP 2131 and Art major; or Graphic Design major. Intermediate studio course exploring a variety of mixed-media approaches, including drawing, painting, collage, and assemblage upon a range of substrates, with a possibility of developing large-scale, site specific collaborations in public spaces. Exact format of this class may vary each semester. Six contact hours. *May be repeated for credit.*

Art: Print Media (ARTR)

ARTR 2161. Photo-Mechanical Print Media. (3) Pre- or Corequisite(s): Art or Graphic Design major; ARTB 1201; ARTB 1202; ARTB 1203; ARTB 1204; and ARTB 1206 or ARTG 2180. Introduction and survey of photo-mechanical printmaking processes, including photo-based screenprinting, photo-etching, photo-lithography, and digital printing.

Learn the history and context of photo-mechanical printmaking, as well as its application in contemporary art practices. Explore photo-mechanical printmaking through various print projects including monoprints, varied editions, and conventional editions. Six contact hours.

ARTR 2162. Drawing/Expression in Print Media. (3) Pre- or Corequisite(s): Art or Graphic Design major; ARTB 1201; ARTB 1202; ARTB 1203; ARTB 1204; and ARTB 1206 or ARTG 2180. Introduction and survey of analog printmaking processes, including relief printmaking (linoleum or woodblock), etching/intaglio printmaking, monotype printmaking, as well as drawing-based methods in screenprinting and/or lithography. Learn the history and context of traditional/analog printmaking and its applications in contemporary art practices. Explore mark-making and expression through various printmaking projects including monoprints, varied editions, and conventional editions. Six contact hours.

ARTR 3061. Topics in Print Media. (3) Prerequisite(s): ARTR 2161 or ARTR 2162; Art major or Graphic Design major. Special topics in print media. *May be repeated for credit with change of topic.*

ARTR 3162. Large Format Printing and Mixed Media. (3) Prerequisite(s): Art or Graphic Design major; ARTR 2161; and ARTR 2162. Studio course focused on large format printing, collaboration, and mixed-media. Learn how to create and produce large format prints via hand-pulled, digital, and commercial printing methods. Students collaborate on large-scale public artworks for murals and exhibits integrating printed matter with drawing and painting, investigating traditional and non-traditional substrates. Six contact hours. *May be repeated for credit.*

ARTR 3263. Mixed-Media Bookmaking and Papermaking. (3) Prerequisite(s): Art or Graphic Design major; and ARTR 2161 or ARTR 2162. Studio course focused on print production methods for creating handmade papers and books. An introduction to book art forms, including hand-sewn Western Codex, Japanese binding, accordion pleats, sculptural book forms and pop-ups, etc. Students create a portfolio of handmade papers using abaca and other fibers, and explore three-dimensional paper forms. Six contact hours. *May be repeated for credit.*

Art: Photography (ARTT)

ARTT 2191. Photographic Media I. (3) Prerequisite(s): Art or Graphic Design major. Pre- or Corequisite(s): ARTB 1201; ARTB 1202; ARTB 1203; ARTB 1204; and ARTB 1206 or ARTG 2180. Fundamental principles, processes, and aesthetic vision of photography. Introduction to photographic theory, operation of cameras, and basic photographic materials and techniques. Principles of photography as a means of personal expression. Six contact hours. Six contact hours.

ARTT 3091. Topics in Photography. (3) Prerequisite(s): ARTT 2191 or ARTT 3190; Art or Graphic Design major, and permission of instructor. Special topics in photography. *May be repeated for credit with change of topic.* Six contact hours.

ARTT 3190. Digital Photography: Color, Light, and Lens. (3) Prerequisite(s): Art or Graphic Design major; and ARTB 1201; ARTB 1202; ARTB 1203; ARTB 1204; and ARTB 1206 or ARTG 2180. Exploration of the

technical and aesthetic parameters unique to digital photography. Forms of input and output are discussed along with advanced applications of digital photographic techniques. Six contact hours. *May be repeated for credit one time.*

ARTT 3191. Camera and Light. (3) Prerequisite(s): Art or Graphic Design major, and ARTT 2191. Principles and practices of small, medium or large format photography, in conjunction with available and studio lighting techniques. Emphasis on personal expression. Six contact hours. *May be repeated for credit one time.*

ARTT 3193. Alternative and Historic Photographic Media. (3) Prerequisite(s): ARTT 2191 or ARTT 3190 or ARTT 3390; Art or Graphic Design major. Exploration of alternative and historic photographic processes in combination with advanced applications of digital imaging software. Emphasis on personal expression. Six contact hours. *May be repeated for credit.*

ARTT 3195. Visual Narrative. (3) Prerequisite(s): Art or Graphic Design major, and ARTT 2191. Examines the nature of visual narrative to portray the human condition through the photographic document and ethical storytelling. Historical information and contemporary concerns are explored. Six contact hours. *May be repeated for credit.*

ARTT 3291. Creative Practices in Photography. (3) Prerequisite(s): ARTB 1201; ARTB 1202; ARTB 1203; ARTB 1204; and ARTB 1206 or ARTG 2180; Art or Graphic Design major. Advanced study of photography for individual creative expression with an emphasis on contemporary photographic topics, methodologies, and professional practices. *May be repeated for credit.*

ARTT 3390. Digital Compositing. (3) Cross-listed Course(s): ARTM 3390. Prerequisite(s): Art or Graphic Design major; and ARTT 2191 or ARTM 2105. Advanced digital manipulation of photographic imagery in digital photography software, and the exploration of historical and contemporary theory surrounding the manipulation of the photographic medium. Six contact hours. *May be repeated for credit one time.*

ARTT 3391. Beyond the Print: Experimental and Material-Based Photography. (3) Prerequisite(s): ARTT 2191 or ARTT 3190 or ARTT 3390 or ARTM 3390; Art or Graphic Design major. Exploration of contemporary photographic mixed media techniques, including the combination of traditional and digital methods. Experimental studies in the personal and imaginative use of photographic materials. Six contact hours. *May be repeated for credit.*

ARTT 3409. Internship in Photography. (3) Prerequisite(s): ARTT 3190; Art or Graphic Design major, and permission of instructor, department, and sponsor (consents required prior to registration). Opportunity for students to observe, examine, and participate in the creative dynamics and procedural operations of photographically related organizations, businesses, or museum studies. Sponsor and faculty supervised. This experience requires 120 contact hours per semester. *May be repeated for credit with change in sponsor. Graded on a Pass/No Credit basis.*

Art: Sculpture (ARTZ)

ARTZ 2104. Installation Art. (3) Prerequisite(s): Art or Graphic Design major. Pre- or Corequisite(s): ARTB 1201; ARTB 1202; ARTB 1203; ARTB 1204; and ARTB 1206 or ARTG 2180. Techniques and methods of creating Installation Art, from the generation of initial ideas, to experimentation, mockups, and final assembly. Emphasis on the historical and creative issues surrounding the nature and definition of installation art. Six contact hours. *May be repeated for credit.*

ARTZ 2141. Methods and Materials in Sculpture. (3) Prerequisite(s): Art or Graphic Design major. Pre- or Corequisite(s): ARTB 1201; ARTB 1202; ARTB 1203; ARTB 1204; and ARTB 1206 or ARTG 2180. Introduction to the modeling of the human body, including portraiture, in traditional and contemporary materials. Students learn how to build an armature, model an original form and make 3D reproductions, working with clay, plaster, plasticine, resins, plastic, silicone, and other casting materials, while exploring the expressive qualities of three-dimensional art making. Six contact hours.

ARTZ 2306. Introduction to 3D Modeling and Digital Fabrication. (3) Prerequisite(s): ARTB 1204; Art or Graphic Design major. Pre- or Corequisite(s): ARTB 1201; ARTB 1202; ARTB 1203; and ARTB 1206 or ARTG 2180. Introductory studio exploring the use of computer-aided design for the creation of art and design works. Introduces 3D modeling software such as 123D Design, Blender, and/or Rhino, as well as a series of fabrication methods. Projects emphasize the use of digital fabrication as a tool for realizing conceptually driven work in ceramics, fiber, and sculptural media. Six contact hours.

ARTZ 3041. Topics in Sculpture. (3) Prerequisite(s): ARTZ 2141 or ARTZ 2104; Art major or Graphic Design major. Special Topics in sculpture. *May be repeated for credit with change of topic.*

ARTZ 3142. Sculpture: Metal Fabrication and Bronze Casting. (3) Prerequisite(s): Art or Graphic Design major; and ARTC 2171, ARTC 2172, ARTF 2151, ARTZ 2141, or ARTZ 2306. Investigation of theory and practice in contemporary sculpture; introduction of fabrication methods such as welding, cutting, bending, lost wax bronze casting technique, melting and casting metal and bronze finishing. Creative research, experimentation, and development of a personal voice are at the core of this course. Six contact hours.

ARTZ 3243. Sculpture: Wood and Stone Carving. (3) Prerequisite(s): Art or Graphic Design major; and ARTC 2171, ARTC 2172, ARTF 2151, ARTZ 2141, or ARTZ 2306. Subtractive methods of sculpting in three-dimensional and two-dimensional relief forms. Introduction of tools and techniques of wood and stone carving. Assignments include model-making and casting as preparation for carving projects. The aim of this course is an analytical and critical approach to art making. Projects include sculpture/relief design with a focus on learning to communicate ideas and concepts while utilizing different materials and forms of expression. Six contact hours.

ARTZ 3306. Advanced 3D Modeling and Digital Fabrication. (3) Prerequisite(s): Art or Graphic Design major; ARTA 3201 and ARTZ 2306. Whereas ARTZ 2306 focuses primarily on learning foundational software and fabrication methods, this advanced course aims to integrate these techniques with analog making methodologies and explore the

conceptual implications of digital making within a greater art and design context. Additionally, students are exposed to advanced 3D modeling and fabrication methods. Projects emphasize the use of digital fabrication towards the development of a personal design language. Six contact hours.

ARTZ 3344. Sculpture: Mixed Media. (3) Prerequisite(s): Art or Graphic Design major; and ARTC 2171, ARTC 2172, ARTF 2151, ARTZ 2141, or ARTZ 2306. Advanced metal, wood, and plastic fabrication techniques. Exploration of mixed-media sculpture, through non-traditional materials, including man-made and natural found objects and methods such as recycling and upcycling. Introduction to an environmentally friendly studio practice. Exploration of topics and ideas in the 21st century sculpture. Six contact hours.

Bioinformatics and Genomics (BINF)

BINF 1101. Introduction to Bioinformatics and Genomics. (4) Introduction to the genomics perspective in the life sciences, combining a general introduction to genomic technologies and the bioinformatics methods used to analyze genome-scale data with a presentation of real world scientific problems where these technologies are having an impact. The lab component provides hands-on experience with biological sequence and structure databases, using small-scale projects to introduce students to the world of bioinformatics research. *Fulfills the General Education Natural Science and Lab requirement.*

BINF 2111. Introduction to Bioinformatics Computing. (4) Introduction of fundamentals of programming for bioinformatics (sometimes called "scripting") using current programming languages and paradigms. Introduces both the language and the use of the language within a Unix environment, demonstrating how interpreted languages serve both as a useful tool for writing and testing programs interactively and as a powerful data analysis and processing tool for bioinformatics. Hands-on computing labs in which students learn bioinformatics computing and programming are also included.

BINF 3101. Sequence Analysis. (3) Prerequisite(s): Permission of instructor. The purpose, application, and biological significance of bioinformatics methods that identify sequence similarity, methods that rely on sequence similarity to produce models of biological processes and systems, as well as methods that use sequence characteristics to predict functional features in genomic sequence data.

BINF 3121. Statistics for Bioinformatics. (3) Prerequisite(s): BINF 2111 and satisfactory completion of either MATH 1103, MATH 1120, MATH 1121, MATH 1241, STAT 1220, STAT 1221, STAT 2122, or permission of instructor based on sufficient demonstration of foundational mathematics concepts. Concepts from probability, stochastic processes, information theory, and other statistical methods are introduced and illustrated by examples from molecular biology, genomics and population genetics while exploring the use of the R and Bioconductor software for biostatistical analysis.

BINF 3131. Bioinformatics Algorithms. (4) Prerequisite(s): Permission of instructor. Introduction to common algorithms and data structures for bioinformatics problems. Focuses on teaching students how to formulate a biological problem as a computational problem, and then solving it

using efficient algorithms. Intended for students who have programming skills and basic molecular biology knowledge.

BINF 3201. Genomic Methods. (4) Prerequisite(s): BIOL 1110 and BIOL 1110L; or BIOL 2120; or permission of instructor. Pre- or Corequisite(s): BINF 1101. Lecture topics introduce students to core concepts in genomics that allow bench scientists to acquire large datasets in a high-throughput manner as well as address the computational methods used to analyze these data resources. Labs are intended to give students hands-on experience in setting up and performing experiments with an emphasis on nucleic acid and protein profiling, understanding and troubleshooting published protocols, and interpreting the data using computational tools.

BINF 3900. Undergraduate Research. (1 to 3) Prerequisite(s): BINF 1101 and permission of instructor. Enables students in the Bioinformatics and Genomics program to initiate research projects in their respective fields of interest and to interact with faculty in pursuing research experience. *May be repeated for credit.*

BINF 4010. Topics in Bioinformatics and Genomics. (1 to 3) Prerequisite(s): Permission of department. Exploration of specific topics from the areas of bioinformatics and genomics. *May be repeated for credit with permission of department; students may register for multiple sections of the course with different topics in the same or different semesters.*

BINF 4171. Business of Biotechnology. (3) Prerequisite(s): Junior or Senior standing in a scientific/technical course of study or if in a non-biological/technical or scientific program, special permission of instructor. Introduces students to the field of biotechnology and how biotech businesses are created and managed. The students should be able to define biotechnology and understand the difference between a biotech company and a pharmaceutical company. Additional concepts covered will include platform technology, biotechnology's history, biotechnology products and development processes, current technologies used by biotech companies today, biotechnology business fundamentals, research and development within biotech companies, exit strategies, and careers in the biotech field.

BINF 4191. Life Sciences and the Law. (3) Prerequisite(s): Junior or Senior standing in a scientific/technical major or permission of instructor if in a non-biological/technical or scientific major. Law and regulations permeate our daily lives, and nowhere is this truer than in areas of life sciences. This course explores what the law is, how our current laws developed, and factors currently affecting the evolution of the law. It provides a general overview of U.S. law, including constitutional law, criminal law, contract law, tort law, property law (especially intellectual property law), business law (especially legal aspects of forming a new company), and administrative law. It then focuses on specific aspects of the law affecting the life sciences, such as ownership of tissues and organisms, regulation of drugs and medical devices, regulation of research in the life sciences, the history and regulation of medicine, the economics and various types of health care delivery, and food production.

BINF 4211. Applied Data Mining for Bioinformatics. (4) Prerequisite(s): Permission of department. Concepts and techniques of evaluating bioinformatics data. The objective of this course is to provide students with a working knowledge of data sources, current tools and methodologies used for bioinformatics research through a variety of hands-on data analysis activities.

BINF 4600. Bioinformatics and Genomics Seminar. (1) Pre- or Corequisite(s): BINF 3101 or permission of instructor. A Senior-level seminar course designed to introduce students to the research being conducted in both the Department of Bioinformatics and Genomics at UNC Charlotte, as well as through invited speakers from other universities.

BINF 4650. Senior Project. (1 to 3) Prerequisite(s): Senior standing and permission of department. An individual or group project in the teaching, theory, or application of bioinformatics, genomics, or computational biology under the direction of a faculty member. Projects must be approved by the department before they can be initiated. *May be repeated one time.*

BINF 4900. Principles of Team Science. (3) Prerequisite(s): Permission of department. Introduction of appropriate project design, implementation, and management skills needed to function as a small team solving typical problems in bioinformatics and genomics. Students are given realistic problems and are required to develop specifications, deliverables, timelines, and costs. Under faculty supervision, the group assigns roles, responsibilities, and deadlines in order to complete the project and then execute the project. At the end of the course, the group produces a written document with deliverables and makes a formal presentation of the project. *May be repeated for credit.*

Biology (BIOL)

BIOL 1000. Special Topics in Biology. (1 to 4) Prerequisite(s): Varies by topic offered. Special topics for non-majors in Biology. *May be repeated for credit with change of topic.* Lecture hours and laboratory hours vary by courses taught.

BIOL 1110. Principles of Biology I. (3) Introduction to biology for non-majors. Fundamental principles of life with a human emphasis. *Not accepted toward the Biology major.*

BIOL 1110L. Principles of Biology I Laboratory. (1) Pre- or Corequisite(s): BIOL 1110. One laboratory period of three hours a week. *Not accepted toward the Biology major.*

BIOL 1115. Principles of Biology II. (3) Prerequisite(s): BIOL 1110 with grade of C or above. Continuation of BIOL 1110 for non-majors. Fundamental principles of life with a human emphasis.

BIOL 2000. Special Topics in Biology. (1 to 4) Prerequisite(s): Varies by topic offered. Special introductory topics for biology majors and minors. *May be repeated for credit with change of topic.* Lecture hours and laboratory hours vary with the courses taught.

BIOL 2120. General Biology I. (3) Prerequisite(s): Appropriate eligibility level of BIOL placement; BIOL 1110 with grade of B or above or placement

by the department. Origin and early evolution of life, basic principles of chemistry, cell biology, and genetics. Three lecture periods per week. *May not be attempted more than twice.*

BIOL 2120L. General Biology I Laboratory. (1) Corequisite(s): BIOL 2120. The accompanying laboratory to BIOL 2120. Experimental scientific inquiry into the concepts addressed in General Biology I.

BIOL 2130. General Biology II. (3) Prerequisite(s): BIOL 2120 and BIOL 2120L with grade of C or above or placement by the department. Corequisite(s): BIOL 2130L with grade of C or above, or placement by the department. Ecology, evolution, biodiversity, plant and animal structure and function. Three lecture periods per week. *May not be attempted more than twice.*

BIOL 2130L. General Biology II Laboratory. (1) Prerequisite(s): BIOL 2120 and BIOL 2120L with grade of C or above, or placement by the department. Corequisite(s): BIOL 2130. The accompanying laboratory to BIOL 2130. Experimental scientific inquiry into the concepts addressed in General Biology II.

BIOL 2140L. General Biology Laboratory. (2) Prerequisite(s): BIOL 2120 or BIOL 2130 with grade of C or above. Population ecology, evolution, phylogenetics, invertebrate biology, animal and plant physiology. One three-hour laboratory period and linked laboratory lecture per week. *May not be attempted more than twice.*

BIOL 2259. Fundamentals of Microbiology. (3) Prerequisite(s): BIOL 1110 or BIOL 2120 with grade of C or above; CHEM 1203 or CHEM 1251 with grade of C or above. Basic physiology of bacteria, fungi, protozoa, and viruses, with emphasis on host-parasite interaction and control and epidemiology of infectious diseases. *Not accepted toward the Biology major.* *May not be attempted more than twice.*

BIOL 2259L. Fundamentals of Microbiology Laboratory. (1) Pre- or Corequisite(s): BIOL 2259. One laboratory period of three hours per week. Attendance mandatory for safety training. *Not accepted toward the Biology major.* *May not be attempted more than twice.*

BIOL 2273. Human Anatomy and Physiology. (3) Prerequisite(s): BIOL 1110 or BIOL 2120 with grade of C or above; CHEM 1203 or CHEM 1251 with grade of C or above. Corequisite Course(s): BIOL 2273L. Fundamentals of the anatomy and physiology of the human body. *Not accepted toward the Biology major.* *May not be attempted more than twice.*

BIOL 2273L. Human Anatomy and Physiology Laboratory. (1) Corequisite Course(s): BIOL 2273. One laboratory period of three hours a week. *Not accepted toward the Biology major.* *May not be attempted more than twice.*

BIOL 2274. Human Anatomy and Physiology II. (3) Prerequisite(s): BIOL 2273 with grade of C or above. Co-requisite Course(s): BIOL 2274L. Continuation of BIOL 2273. *Accepted toward the Biology major.* *May not be attempted more than twice.*

BIOL 2274L. Human Anatomy and Physiology II Laboratory. (1) Corequisite Course(s): BIOL 2274. One laboratory period of three hours a week. *Accepted toward the Biology major.* *May not be attempted more than twice.*

BIOL 3000. Special Topics in Biology. (1 to 4) Prerequisite(s): Varies by topic offered. Special topics for intermediate-level Biology majors and minors. *May be repeated for credit with change of topic.* Lecture hours and laboratory hours vary with the courses taught.

BIOL 3111. Cell Biology. (3) Prerequisite(s): Biology major or minor or permission of department; and BIOL 2120, BIOL 2130, CHEM 1252, and CHEM 1252L with grades of C or above. Structure and function of cells. Biomolecular structures and their interactions including membranes, proteins and nucleic acids.

BIOL 3111L. Cell Biology Laboratory. (1) Prerequisite(s): BIOL 2140L with grade of C or above. Pre- or Corequisite(s): BIOL 3111. The accompanying lab to BIOL 3111. Structure and function of cells. Biomolecular structures and their interactions including membranes, proteins and nucleic acids. One laboratory period of three hours a week.

BIOL 3144. Ecology. (3) Prerequisite(s): Biology major or minor or permission of department; and BIOL 2120, BIOL 2130, CHEM 1252, and CHEM 1252L with grades of C or above. Interrelationships of organisms and their environment.

BIOL 3144L. Ecology Laboratory. (1) Prerequisite(s): BIOL 2140L with grade of C or above. Pre- or Corequisite(s): BIOL 3144. The accompanying lab to BIOL 3144. Interrelationships of organisms and their environment. One laboratory period of three hours a week.

BIOL 3161. Introduction to Biotechnology. (3) Prerequisite(s): BIOL 110 or BIOL 2120 with grade of C or above, or permission of department. An overview of basic molecular biology, techniques, and uses of biotechnology tools in environmental and biomedical fields. Three lecture hours per week.

BIOL 3166. Genetics. (3) Prerequisite(s): Biology major or minor or permission of department; BIOL 2120, BIOL 2130, CHEM 1252, and CHEM 1252L with grades of C or above. Basic concepts of heredity; principles of classical, molecular, and population genetics.

BIOL 3166L. Genetics Laboratory. (1) Prerequisite(s): BIOL 2140L with grade of C or above. Pre- or Corequisite(s): BIOL 3166. The accompanying lab to BIOL 3166. Basic concepts of heredity; principles of classical, molecular, and population genetics. One laboratory period of three hours a week.

BIOL 3202. Horticulture. (3) Prerequisite(s): Biology major or minor or permission of department; BIOL 2120 and BIOL 2130 with grades of C or above. Principles of horticulture, greenhouse management, environmental factors, production, and maintenance of cultivars, and landscaping.

BIOL 3202L. Horticulture Laboratory. (1) Prerequisite(s): BIOL 2140L. Pre- or Corequisite(s): BIOL 3202. Greenhouse work, plant identification, and field trips. One laboratory period of three hours a week.

BIOL 3215. Economic Botany. (3) Prerequisite(s): Biology major or minor or permission of department; BIOL 2120 and BIOL 2130 with grades of C or above. Origins of agricultural plants; history of use and misuse of plants by humans; consideration of major groups of crop, spice, medicinal, and drug plants.

BIOL 3222. General Botany. (3) Prerequisite(s): Biology major or minor or permission of department; BIOL 2120 and BIOL 2130 with grades of C or above. Morphology, physiology, reproduction, phylogeny, and ecology of plants.

BIOL 3222L. General Botany Laboratory. (1) Prerequisite(s): BIOL 2140L. Pre- or Corequisite(s): BIOL 3222. The accompanying lab to BIOL 3222. Morphology, physiology, reproduction, phylogeny, and ecology of plants. One laboratory period of three hours a week.

BIOL 3229. Field Botany. (3) Prerequisite(s): Biology major or minor or permission of department; BIOL 2120, BIOL 2130, and BIOL 2140L with grades of C or above. A field course stressing identification, classification and habitat of the vascular plants, particularly of the Piedmont, but also including the Coastal Plain and the mountains of North Carolina. Six hours a day for 9 days.

BIOL 3231. Invertebrate Zoology. (4) Prerequisite(s): Biology major or minor or permission of department; BIOL 2120, BIOL 2130, and BIOL 2140L with grades of C or above. Comparative invertebrate anatomy and physiology, as well as life histories and ecology of select taxonomic groups. Three lecture hours and one laboratory period of three hours a week.

BIOL 3233. Vertebrate Zoology. (4) Prerequisite(s): Biology major or minor or permission of department; BIOL 2120, BIOL 2130, and BIOL 2140L with grades of C or above. Taxonomy, anatomy, physiology, and life histories of vertebrates. Three lecture hours and one laboratory period of three hours a week.

BIOL 3234. Field Entomology. (3) Prerequisite(s): Biology major or minor or permission of department; BIOL 2120, BIOL 2130, and BIOL 2140L with grades of C or above. A field course stressing identification and ecology of insects of the Piedmont of North Carolina. Six hours a day for 9 days.

BIOL 3235. Biology of Insects. (3) Prerequisite(s): Biology major or minor or permission of department; BIOL 2120 and BIOL 2130 with grades of C or above. The anatomy, physiology, development, behavior, ecology, and medical and economic importance of insects.

BIOL 3236. General Zoology. (3) Prerequisite(s): Biology major or minor or permission of department; BIOL 2120 and BIOL 2130 with grades of C or above. The morphology, function, development, phylogeny, and ecology of the principal invertebrate and vertebrate types.

BIOL 3236L. General Zoology Laboratory. (1) Prerequisite(s): BIOL 2140L. Pre- or Corequisite(s): BIOL 3236. The accompanying lab to BIOL 3236. The morphology, function, development, phylogeny, and ecology of the principal invertebrate and vertebrate types. One laboratory period of three hours a week.

BIOL 3244. Field Ecology. (3) Prerequisite(s): Biology major or minor; BIOL 2120, BIOL 2130, and BIOL 2140L. Creates North Carolina naturalists by employing common field methods to explore the native flora and fauna. Introduction to modern field ecology by understanding its development from natural history. Class lectures teach the basics of a number of interdisciplinary fields within ecology. Field exercises offer a variety of sampling techniques, designs, and protocols to identify and

study local plants and animals. Current literature is used to support these exercises.

BIOL 3271. Human Body in Health and Disease. (3) Prerequisite(s): BIOL 1110, BIOL 2120, or BIOL 2273 with grade of C or above; and Biology minor or permission of department. Introduction to the human body and its structural components and mechanisms that help the body maintain optimal working order. Explores the relationship between the body's structure (anatomy) and function (physiology), learning how the body works when it is healthy and what happens when it is affected by a disease. Not accepted toward the Biology major.

BIOL 3272. Plant Physiology. (3) Prerequisite(s): Biology major or minor or permission of department; BIOL 2120, BIOL 2130, BIOL 2140L, CHEM 1252, and CHEM 1252L with grades of C or above. Metabolic and physiological processes of plants and conditions which affect or regulate these processes.

BIOL 3272L. Plant Physiology Laboratory. (1) Prerequisite(s): BIOL 2140L and BIOL 3111L. Corequisite(s): BIOL 3272. The accompanying lab to BIOL 3272. Metabolic and physiological processes of plants and conditions which affect or regulate these processes. One laboratory period of three hours a week.

BIOL 3273. Animal Physiology. (3) Prerequisite(s): Biology major or minor or permission of department; BIOL 2120, BIOL 2130, CHEM 1252, and CHEM 1252L with grades of C or above. Fundamental control mechanisms that operate to maintain the homeostatic state.

BIOL 3273L. Animal Physiology Laboratory. (1) Prerequisite(s): BIOL 2140L with grade of C or above. Pre- or Corequisite(s): BIOL 3273. The accompanying lab to BIOL 3273. Fundamental control mechanisms that operate to maintain the homeostatic state. One laboratory period of three hours a week.

BIOL 3274. Scientific Writing. (3) Prerequisite(s): Biology major or minor; BIOL 2120, BIOL 2130, and BIOL 2140L. An introduction to the process of scientific writing for Biology majors. Biology students are routinely required to produce a variety of written products, such as lab reports, research papers, and grant/research proposals. This course helps students gain proficiency in the written and oral communication of scientific works by using effective reasoning and interpretation skills. Additionally, it provides practical experience in experimental design, conducting scientific literature research, as well as drawing biological conclusions from published data and articulating those conclusions to an appropriate audience. The main goal of this course is to help build a foundation in scientific writing through a combination of in-class workshops and online activities in a hybrid format. *May be attempted a maximum of two times.*

BIOL 3275. Animal Health. (3) Prerequisite(s): BIOL 2130 with C or better; Must be enrolled in one of the following Fields of Study (Major, Minor): Biology (BIOL). A foundation for understanding the concepts and principles that underpin the entire spectrum of animal health. Areas of importance for this course are husbandry/management, disease prevention/treatment, nutrition (digestion and metabolism), genetics, and different systems in animals along with associated common diseases.

BIOL 3405. Internship in Biology. (1 to 3) Prerequisite(s): Permission of department. A project-oriented, internship with a biological focus. Supervised by a faculty member in the Department of Biological Sciences. A UNC Charlotte faculty supervisor from the Department of Biological Sciences must be arranged before beginning the course. *May be repeated for credit up to two credit hours for the B.A. and three credit hours for the B.S.*

BIOL 3500. Biology Cooperative Education Experience. (0) Prerequisite(s): Approval by the department and the University Career Center. Required of students participating in the Cooperative Education Program during the semesters in which they are working. Participating students pay a course registration fee for transcript notation. Assignments must be arranged and approved in advance. The Cooperative Education Program is only open to undergraduate students; graduate level students are encouraged to contact their academic departments to inquire about academic or industrial internship options for credit. For more information, contact the University Career Center. *Course may be repeated. Graded on a Satisfactory/Unsatisfactory basis.*

BIOL 3800. Tutorial in Biology. (1 to 4) Prerequisite(s): Permission of department, minimum overall GPA of 2.8 and Biology GPA of 3.0. Enables Biology majors to engage in directed study in their fields of interest. Maximum credit toward major is one hour for B.A.; two hours for B.S. *May be repeated for credit.*

BIOL 3900. Undergraduate Research. (1 to 3) Prerequisite(s): Permission of department, minimum overall GPA of 2.8 and Biology GPA of 3.0. Enables biology majors to initiate research projects in their respective fields of interest. Maximum credit toward major: six hours for B.A.; nine hours for B.S. *May be repeated for credit with change of topic.* Minimum total of two credit hours of BIOL 3900 may count as one biology lab and a minimum total of four credit hours of BIOL 3900 may count for two biology labs. Maximum of two labs.

BIOL 4000. Special Topics in Biology. (1 to 4) Prerequisite(s): Varies with topic offered; Biology major or minor or permission of department. Special topics for advanced undergraduates. *May be repeated for credit with change of topic.* Lecture hours and laboratory hours vary with the courses taught.

BIOL 4040. Stem Cells. (3) Prerequisite(s): BIOL 3166 with grade of C or above; and Biology major or minor or permission of department. Current molecular genetics research in the broad field of stem cells. Discussion and interpretation of current research related to stem cell development, differentiation, regeneration, and molecular mechanisms of pluripotency.

BIOL 4111. Evolution. (3) Prerequisite(s): BIOL 3111 and BIOL 3166 with grades of C or above; and Biology major or minor or permission of department. Theories of evolution and forces, which affect gene frequencies.

BIOL 4121. Biometry. (4) Prerequisite(s): BIOL 2140L, BIOL 3166, and one STAT course with grades of C or above; and Biology major or minor or permission of department. Advanced biostatistics with design and analysis of experiments. Three lecture hours and one laboratory period of three hours a week.

BIOL 4144. Advanced Ecology. (4) Prerequisite(s): BIOL 2140L, BIOL 3144, and BIOL 3144L with grades of C or above; and Biology major or

minor or permission of department. Energy flow, nutrient cycles, community structure, population growth, and regulation. Three lecture hours and one laboratory period of three hours a week.

BIOL 4162. Advanced Biotechnology I. (3) Prerequisite(s): BIOL 3111L and BIOL 3161 or BIOL 3166 with grades of C or above; and Biology major or minor or permission of department. Problem-based learning approach where students work in teams to develop solution strategies that use biotechnology to solve real-world problems. Three lecture hours per week.

BIOL 4163. Advanced Biotechnology II. (3) Prerequisite(s): BIOL 3161 or BIOL 3166 and BIOL 4162 with grade of C or above and permission of instructor; and Biology major or minor or permission of department. Students work in teams to implement solution strategies developed in BIOL 4162 that use biotechnology to solve real-world problems. One laboratory period and two lecture hours per week.

BIOL 4164. Bacteriophage Discovery. (4) Prerequisite(s): BIOL 2120, BIOL 2120L, BIOL 2130, BIOL 2130L; Instructor approval. Along with the international SEA-PHAGES (Science Education Alliance-Phage Hunters Advancing Genomics and Evolutionary Science) program, students complete the first component of the phage discovery and genomics platform: the isolation, purification, and amplification of new phages from environmental samples by using a specific bacterial host, coupled with electron microscopy and DNA isolation and analysis. The second component is the bioinformatic dissection of phage genomes using computational programs to identify genes, regulatory elements, and other genomic features. The second component occurs in a subsequent semester.

BIOL 4165. Investigating Bacteriophage Genomics. (4) Prerequisite(s): BIOL 2120, BIOL 2120L, BIOL 2130, BIOL 2130L. This course is part of the Howard Hughes Medical Institute (HHMI) SEA-PHAGES program. SEA PHAGES (Science Education Alliance-Phage Hunters Advancing Genomics and Evolutionary Science, (<https://seaphages.org/>) is a discovery-based undergraduate research course that begins with simple digging in the soil to find new viruses, but progresses through a variety of microbiology techniques and eventually to complex genome annotation and bioinformatic analyses.

BIOL 4167. Medical Genetics. (3) Prerequisite(s): BIOL 3111 and BIOL 3166 with grades of C or above; and Biology major or minor or permission of department. Various applications of genetics to human health, including studies of the inheritance of diseases in families, mapping of disease genes to specific locations on chromosomes, diagnosis and treatment of genetic disease, and genetic counseling. The major focus is on the molecular mechanisms through which genes cause diseases.

BIOL 4168. Recombinant DNA Techniques. (4) Prerequisite(s): BIOL 3111L, BIOL 3166, or CHEM 4165 with grade of C or above and permission of instructor; and Biology major or minor or permission of department. Modern molecular biological methods (such as DNA cloning, gel electrophoresis, nucleic acid hybridization, PCR, and DNA sequencing) data analysis and interpretation. Two lecture hour and two laboratory periods of three hours a week.

BIOL 4171. Cell Physiology. (3) Prerequisite(s): BIOL 3111 with grade of C or above; and Biology major or minor or permission of department. The fundamental physiochemical properties of cells.

BIOL 4184. Plant Biotechnology. (3) Prerequisite(s): BIOL 3166 with grade of C or above or permission of department; and Biology major or minor or permission of department. A laboratory-oriented course designed to integrate plant molecular biology, recombinant DNA technology, and plant cell and tissue culture. One lecture hour and two laboratory periods of three hours a week.

BIOL 4199. Molecular Biology. (3) Prerequisite(s): BIOL 3111, BIOL 3166, and CHEM 2131 with grades of C or above; and Biology major or minor or permission of department. Structural and functional interaction of nucleic acids and proteins in the replication, transcription, and translation of genetic material.

BIOL 4233. Parasitology. (3) Prerequisite(s): BIOL 3111 with grade of C or above; and Biology major or minor or permission of department. Morphology, life cycles, ecology, taxonomy, and medical and economic importance of parasites. Three lecture hours a week.

BIOL 4235. Mammalogy. (4) Prerequisite(s): BIOL 2140L and BIOL 3272 or BIOL 3273 with grade of C or above, or permission of instructor; and Biology major or minor or permission of department. Taxonomy, anatomy, physiology, and life histories of the mammals. Three lecture hours and one laboratory period of three hours a week.

BIOL 4242. Biology of Birds. (3) Prerequisite(s): BIOL 3144 with grade of C or above or permission of department; and Biology major or minor or permission of department. Overview of general avian biology, including taxonomy and anatomy, but concentrating on behavior, ecology, and conservation of birds. Focus on birds of the southeastern U.S.

BIOL 4242L. Biology of Birds Laboratory. (1) Corequisite(s): BIOL 4242; and Biology major or permission of department. Meets for one three-hour period per week. The laboratory and field portion of the Biology of Birds focuses on field identification and inventory techniques, with an introduction to anatomy. Binoculars are required.

BIOL 4243. Animal Behavior. (3) Prerequisite(s): BIOL 2120 and BIOL 2130 with grades of C or above; and Biology major or minor or permission of department. An ethological approach to how animals respond to their environment. Causation, development, and adaptive significance of behavior in social systems.

BIOL 4244. Conservation Biology. (3) Prerequisite(s): BIOL 3144 with grade of C or above; and Biology major or minor or permission of department. Conservation values, extinction rates, genetic diversity, demography, habitat fragmentation, reserve management, ecological restoration.

BIOL 4244L. Conservation Biology Laboratory. (1) Prerequisite(s): BIOL 2140L with grade of C or above; and Biology major or permission of department. Pre- or Corequisite(s): BIOL 4244. The accompanying lab to BIOL 4244. Conservation values, extinction rates, genetic diversity, demography, habitat fragmentation, reserve management, ecological restoration. One laboratory period of three hours a week plus field trips.

BIOL 4245. Marine Biology. (3) Prerequisite(s): BIOL 3111 with grade of C or above; and Biology major or minor or permission of department. Diversity and adaptations of marine biota, and ecological processes of marine ecosystems.

BIOL 4250. Microbiology. (3) Prerequisite(s): BIOL 3111 with grade of C or above; and Biology major or minor or permission of department. Morphology, physiology, pathogenicity, metabolism, and ecology of bacteria, viruses, protozoa, and fungi. Aquatic, dairy, and food microbiology.

BIOL 4250L. Microbiology Laboratory. (1) Prerequisite(s): BIOL 3111L with grade of C or above; and Biology major or minor or permission of department. Pre- or Corequisite(s): BIOL 4250 with grade of C or above. One laboratory period of three hours a week. Attendance mandatory for safety training.

BIOL 4251. Immunology. (3) Prerequisite(s): BIOL 3111 with grade of C or above; and Biology major or minor or permission of department. Cellular, molecular and genetic basis for immunity; physical chemistry of antigens and antibodies and their interactions; defense mechanisms.

BIOL 4255. Bacterial Genetics. (3) Prerequisite(s): BIOL 3166 with grade of C or above; and Biology major or minor or permission of department. Regulation of gene expression in bacterial systems. Bacteriophage genetics. DNA transfer in bacteria.

BIOL 4256. Pathogenic Bacteriology. (3) Prerequisite(s): BIOL 4250 with grade of C or above; and Biology major or minor or permission of department. Cellular and molecular interactions of mammalian hosts with prokaryotic parasites.

BIOL 4256L. Pathogenic Bacteriology Laboratory. (1) Prerequisite(s): BIOL 4250L with grade of C or above; and Biology major or permission of department. Pre- or Corequisite(s): BIOL 4256. The accompanying lab to BIOL 4256. Cellular and molecular interactions of mammalian hosts with prokaryotic parasites. One laboratory period of three hours a week.

BIOL 4257. Microbial Physiology and Metabolism. (3) Prerequisite(s): BIOL 4250 with grade of C or above; and Biology major or minor or permission of department. Lectures in microbial metabolism and physiology, including such topics as bacterial nutrition, transport mechanisms, catabolism and energy production, biosynthesis, global regulation of gene expression. Three one-hour lectures per week.

BIOL 4257L. Microbial Physiology and Metabolism Lab. (1) Pre- or Corequisite(s): BIOL 4257; and Biology major or permission of department. Laboratory exercises covering such topics in general microbiology as characterization of microbial growth, transport, preparation and use of cell-free systems, isolation and electrophoresis of periplasmic proteins, isolation and characterization of membrane lipids, and the polymerase chain reaction. One three-hour lab per week.

BIOL 4258. Epidemics and Plagues. (3) Prerequisite(s): BIOL 3111 with grade of C or above, or permission of instructor; and Biology major or minor or permission of department. A study of the history, modeling, epidemiology, environmental, and behavioral changes that contributed to the development of selected epidemics and plagues which have dramatically affected plants, agricultural animals, and humans. Hybrid course with class meetings and online assignments.

BIOL 4259. Virology. (3) Prerequisite(s): BIOL 3111 with grade of C or above; and Biology major or minor or permission of department. Focus on molecular biology, evolution, and pathogenesis of clinically relevant human and animal viruses. Additional topics include: advances in virus-based gene therapy, vaccines, and anticancer agents; viruses as potential bioterrorism threats; bacteriophages and plant viruses; unusual virus-like agents.

BIOL 4260. Population Genetics. (3) Prerequisite(s): BIOL 3166 and STAT 1221 with grades of C or above; and Biology major or minor or permission of department. The genetics of qualitative and quantitative traits in populations, including an assessment of the factors affecting the extent and pattern of the genetic variation in these traits.

BIOL 4261. Genome Stability and Human Disease. (3) Prerequisite(s): BIOL 2120, BIOL 2130, and permission of department. Cross-listed Course(s): BIOL 5261. DNA damage arises from environmental and endogenous insults, and a variety of specialized cellular mechanisms enable the efficient and accurate repair of lesions. When repair processes are impaired in humans, substantial developmental defects and predisposition to cancer may result. This course introduces students to the principal DNA repair pathways and the diseases induced by inherited repair defects, with an emphasis on interpreting primary research. The aim of this course is to build on students' basic knowledge of biological principles to provide in-depth knowledge regarding the relationship between DNA repair dysfunction and human genetic diseases, including certain cancers.

BIOL 4265. Drugs: Molecular and Cellular Mechanisms. (3) Prerequisite(s): BIOL 3111 with grade of C or above, or permission of instructor; and Biology major or minor or permission of department. A detailed focus on representative drugs and their target cells and organs to understand mechanisms of action at a molecular and cellular level. Drug discovery, approval, and economics are also discussed.

BIOL 4272. Comparative Animal Physiology. (3) Prerequisite(s): BIOL 2120 and BIOL 2130 with grades of C or above; and Biology major or minor or permission of department. Pre- or Corequisite(s): BIOL 3111. Fundamental mechanisms and evolutionary diversity of physiological adaptations of animals.

BIOL 4274. Environmental Toxicology and Health. (3) Prerequisite(s): BIOL 2120 and BIOL 2130 with grades of C or above; and Biology major or minor or permission of department. Pre- or Corequisite(s): BIOL 3111. Molecular, physiological and ecological effects of major environmental pollutants.

BIOL 4276. Cardiovascular Physiology. (3) Prerequisite(s): BIOL 3273 with grade of C or above; and Biology major or minor or permission of department. Physiology of the cardiovascular system, especially mammalian with emphasis on the experimental basis for our current knowledge.

BIOL 4277. Endocrinology. (3) Prerequisite(s): BIOL 3273 with grade of C or above; and Biology major or minor or permission of department. Endocrine glands and their physiological roles in metabolism, growth and reproduction.

BIOL 4279. Neurobiology. (3) Prerequisite(s): BIOL 3111 with grade of C or above, or permission of instructor; and Biology major or minor or permission of department. The molecular and cellular processes of neuronal function in the human central and peripheral nervous systems.

BIOL 4279L. Neurobiology Laboratory. (1) Prerequisite(s): Biology major or permission of department Pre- or Corequisite(s): BIOL 4279 with grade of C or above. The accompanying lab to BIOL 4279. The molecular and cellular processes of neuronal function in the human central and peripheral nervous systems. One laboratory period of three hours a week.

BIOL 4283. Developmental Biology. (3) Cross-listed Course(s): BIOL 5283. Prerequisite(s): BIOL 3111 with grade of C or above; and Biology major or minor or permission of department. Developmental processes occurring chiefly during gametogenesis, fertilization, early embryogenesis, and organogenesis.

BIOL 4284. Eukaryotic Microbiology. (4) Cross-listed Course(s): BIOL 5284. Prerequisite(s): BIOL 3111 and BIOL 3166 with grades of C or above, or permission of instructor; and Biology major or minor, or permission of department. The biology of free-living, parasitic, and pathogenic eukaryotic microorganisms with emphasis on systematics, cell physiology, ecology, and molecular biology of species contributing to global environmental cycles, animal and crop disease, death, and economic loss. Three hours of lecture and one three-hour laboratory period per week.

BIOL 4292. Advances in Immunology. (3) Prerequisite(s): BIOL 4251 with grade of C or above; and Biology major or minor or permission of department. Current topics in immunology with particular emphasis upon the genetic systems and molecular mechanisms underlying immune reactions.

BIOL 4293. Comparative Vertebrate Anatomy. (4) Prerequisite(s): BIOL 2140L, BIOL 3111, and BIOL 3111L with grades of C or above; and Biology major or minor or permission of department. Comparison of selected anatomical systems across vertebrates, with emphasis on evolution and functional analyses. Three hours of lecture and one laboratory period of three hours per week.

BIOL 4300. Life: How We Got Here. (3) Prerequisite(s): BIOL 3111 and BIOL 3166. A broad examination of the evolution of life - from abiogenesis to the evolution of replicators, cells, individuals, and societies, with a primary focus of understanding the major transitions in evolution and biological complexity. Topics relating to the future of life - synthetic biology, AI, and climate change - are also considered.

BIOL 4405. Internship/Laboratory Research. (1 to 3) Prerequisite(s): Biology major or Biotechnology minor, permission of instructor, and permission of the Biotechnology Program director. A biotechnology-oriented internship with either an organization or within a biotechnology-related laboratory within the Departments of Biological Sciences, Civil and Environmental Engineering, or Chemistry.

BIOL 4600. Senior Seminar. (2) Prerequisite(s): Biology major, Senior standing, BIOL 3111, BIOL 3144, BIOL 3166, and either BIOL 3272 or BIOL 3273. Student presentation of oral and written reports from pertinent biological literature. Exit exam for Biology majors is administered.

BIOL 4601. Honors Seminar. (2) Prerequisite(s): Biology major or permission of department. Open by invitation to Juniors. Exploration of the nature of science, ethics in science, critical analysis, hypothesis testing and statistical analysis, peer review, and research skills. Students analyze professional research papers, present their analyses orally, select an Honors Advisor, and write a research proposal. Exit exam for Biology majors will be administered. Two lecture hours with occasional additional hours to attend special lectures and seminars.

BIOL 4700. Honors Research I. (3) Prerequisite(s): BIOL 4601 with grade of C or above; Senior standing; and Biology major or permission of department. Independent Honors project: proposal, and research. By invitation.

BIOL 4701. Honors Research II. (3) Prerequisite(s): BIOL 4700; approval of a proposal through the Honors College Application to Candidacy process the semester prior to taking the course; and Biology major or permission of department. Independent Honors project, including thesis preparation and presentation of results. May be substituted for BIOL 4600 and for one lab.

Business Law (BLAW)

BLAW 3150. Business Law I. (3) Prerequisite(s): INFO 2130; Junior or Senior standing, business major, or permission of department. A study of the legal setting of business and its relationship to the business firm. Topics include: the nature of law and the court system, criminal and civil procedure, alternative dispute resolution, constitutional authority to regulate business, business ethics, criminal law, torts, contracts, the law of sales, intellectual property, and cyberlaw.

BLAW 3250. Business Law II. (3) Prerequisite(s): BLAW 3150; Junior or Senior standing, business major, or permission of department. The study of the Uniform Commercial Code. Topics include: commercial paper, bank deposits and collections, letters of credit, documents of title, secured transactions, creditors' rights and bankruptcy, agency law, employment law ---and government regulation of business, business organizations and securities regulation, real and personal property, insurance, wills, trusts, and estates.

Business Analytics (BUSA)

BUSA 2130. Business Computing. (3) Prerequisite(s): ITCS 2116 with a grade C or above, or permission of department. Application of spreadsheet software to solve business problems. An introduction to basic and advanced Excel functionalities. Fundamental programming methods for Excel VBA to automate tasks to improve productivity.

BUSA 3090. Topics in Business Analytics. (2) Prerequisite(s): Permission of advisor. Exploration of topics from areas of business analytics. Specific topics covered serve as the tool for exploring specialized graduate programs and examining career options.

BUSA 3120. Financial Management with a Quantitative Focus. (3) Prerequisite(s): ACCT 2121, ACCT 2122, ECON 2101, ECON 2102, ITCS 2116, MATH 1242, and STAT 1220 with grades of C or above; Business

major; and Junior or Senior standing; or permission of department. Principles and problems of financial aspects of managing capital structure, least-cost asset management, planning and control. Computer application is included where appropriate, and students are expected to use calculus and statistics.

BUSA 3122. Investments with a Quantitative Focus. (3) Prerequisite(s): BUSA 3120 with a grade of C or above, or permission of department. Major topics are security analysis and portfolio management. The viewpoint is that of the investment professionals who are concerned with the evaluation of individual securities and management of security portfolios. Students are expected to use calculus and statistics.

BUSA 3124. Intermediate Microeconomic and Macroeconomic Theory. (3) Prerequisite(s): ECON 2101, ECON 2102, and MATH 1242 with grades of C or above or permission of department. Microeconomic analysis with emphasis on consumer theory and the theory of production. Resource allocation and the determination of optimum output and pricing by a firm operating under various market structures. Distribution and welfare theories. Macroeconomic analysis of the level and growth of national income, production, unemployment, the balance of trade, interest rates, and price levels. Fiscal and monetary policies are considered.

BUSA 3233. Data and Information Management. (3) Prerequisite(s): BUSA 2130 and ITCS 2116 with grades of C or above; and Junior or Senior standing or permission of department. A study of the design and implementation of databases and enterprise data warehouses for business applications. Exploration of basic concepts of database and data warehouse design, the use of SQL to create and manipulate corporate databases, and the exploration of warehouse management software.

BUSA 3400. Business Analytics Internship. (3) Prerequisite(s): Business Analytics major in good standing; Junior or Senior standing; and permission of instructor. Provides a meaningful work experience in the field of business analytics. Requires a minimum of 150 hours of supervised employment, 50 hours of work per credit hour. Students are responsible for securing internship and completing internship application and approval process prior to registering for the course. Internship must be approved by instructor. Application process and course registration must be completed prior to beginning internship. All proposals are subject to departmental approval. Students may not earn internship credit for work at a current employer. May be used to meet requirements of a major elective, up to a maximum of three credit hours. May not be repeated or taken for credit at the same time or following any other internship for credit.

Business (BUSN)

BUSN 1100. Freshman Honors Seminar. (1) Prerequisite(s): Freshman standing in the Business Honors Program. A study of selected topics that impact the potential for success of business honors students in school and beyond. Topics include: University life, corporate and community interaction, career selection, keys to success, and practitioner interaction, among others.

BUSN 1101. Introduction to Business and Professional Development. (3) Prerequisite(s): College of Business major and Freshman standing. Fundamentals of business, including accounting, business analytics, economics, finance, international business, management, management information systems, marketing, and operations and supply chain management. Other topics addressed relate to preparing students for success and include goal setting, understanding the inquiry process, and cultural awareness. Based on hours earned when admitted to the College of Business, this course may not be required.

BUSN 1701. Practicum I: Corporate Citizenship. (1) Prerequisite(s): Admission to Business Honors Program (BHP). An experiential learning course which examines the relationship between corporate citizenship and service to one's community. Lectures, readings, and seminars explore the historical, ethical, and economic foundations of service in business, highlighting issues such as corporate giving, environmental impact of business decisions, and industry professionalism. Prepare for 40 hours non-profit service.

BUSN 2000. Topics in Business and Economics. (1 to 3) Current topics from business and economics. *May be repeated for credit with change of topic and permission of department.*

BUSN 2100. Business Professional Development. (1) Prerequisite(s): College of Business major. A study of selected topics related to preparing business students for academic and career success. Topics include: goal setting, understanding the inquiry process, and cultural awareness. This course is recommended for business students in their first semester at UNC Charlotte who are not eligible for or who have prior credit for BUSN 1100.

BUSN 2701. Practicum II: Professionalism and Service Seminar. (1) Prerequisite(s): Admission to Business Honors Program (BHP). An examination of acceptable industry norms, values, and ethics in the workplace. Simultaneously students complete a 40 hour service project with an approved non-profit organization.

BUSN 2702. Practicum III: Leadership and Group Dynamics. (1) Prerequisite(s): Admission to Business Honors Program (BHP). Students plan and implement a group service project using the fundamentals of communication, planning, organizing, financing, and marketing. Concurrently, students explore and develop their leadership profile by engaging in thoughtful discussions, reflection, and exercises.

BUSN 3400. Business Honors Internship. (0) Prerequisite(s): Sophomore, Junior, or Senior in good Business Honors Program standing, and permission of instructor. The internship requires 150 hours of supervised employment that provides a meaningful work experience in any business field. An internship proposal form must be completed and approved prior to registration and the commencement of the work experience. May be used to meet requirements of a major elective, up to a maximum of three credit hours. *Graded on a Pass/No Credit basis. May not be repeated or taken for credit at the same time or following any other internship for credit.*

BUSN 3701. Practicum IV: Building Networks for Success. (1) Prerequisite(s): BUSN 2701. Exposes Business Honors students to formal and informal networks in organizations. Topics include: mentor relationships, power, and politics. Students prepare for their career success by engaging with speakers from the business community, case

analyses, a mentor relationship, and planning and executing a networking event.

BUSN 4701. Business Honors Thesis. (3) Prerequisite(s): Permission of the Director of Undergraduate Special Programs and approval of a thesis proposal through the Honors College Application to Candidacy process the semester prior to taking the course. Honors project directed by Business Honors committee or assigned faculty member. One faculty contact hour per week and independent research.

Capitalism Studies (CAPI)

CAPI 1501. Global Social Science: Capitalism in Global Context. (3) This Global Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of a complex, interconnected world. This course provides an analysis of capitalism in its global and transnational context. *May not be taken for credit and for a grade if credit has been received for CAPI 2100.*

CAPI 1512. Local Arts/Humanities: Capitalism in the USA and Beyond. (3) Cross-listed Course(s): HIST 1575. An introduction to capitalism as an economic, political, cultural, and social system, with emphasis on the United States. This Local Theme course uses the methods and insights of the arts and humanities to explore the central question of what it means to be a member of a “local” community. Through the study of the experiences of different peoples, societies, cultural traditions, and modes of expression in communities at the city, regional, or national level, students will be able to better understand the complexity and diversity of the society in which we live.

CAPI 1575. Capitalism and Democracy. (3) An examination of issues or concepts related to American democracy, with attention to key historical documents including but not limited to: the Declaration of Independence, the U.S. Constitution, the Federalist Papers, the Gettysburg Address, the Emancipation Proclamation, and Dr. Martin Luther King Jr.’s Letter from Birmingham Jail. Using a variety of approaches, this course will provide the historical context and deep critical analysis necessary to help students understand the importance of these founding documents to the American democratic journey. The course will explain the founding ideas of American capitalism, how capitalism helped to end undemocratic forms of government, and how capitalism created a new contradiction in American democracy through the rise of an unelected capitalist class. This course explores where and when capitalism furthered the goals of American democracy, and where and when capitalism constrained those goals. Students will read documents from government officials, economists, workers, activists, and intellectuals, all of whom tried to further the goals of capitalism or who tried to constrain capitalism in order to make America more democratic. Students will explore periods where democracy thrived under capitalism, and periods when democratic institutions recoiled due to the power and influence of capital. *Fulfills the General Education Foundations of American Democracy requirement.*

CAPI 2050. Topics in Capitalism Studies. (3) An introductory-level approach to the interdisciplinary field of Capitalism Studies, focusing on a special topic. *May be repeated for credit with change in topic.*

CAPI 2100. Introduction to Capitalism Studies. (3) An overview of the history and development of capitalism, since its rise and proliferation across the globe, with special attention to the last 300 years. The how and why capitalism changed during these centuries and the impacts of these changes on global society are explored. Students develop a richer understanding of the complex web of causal forces that link the economy, society, and culture. Emphasis is placed that capitalism is not natural or trans-historical, but rather is a social process, with a history of change over time. *May not be taken for credit and for a grade if credit has been received for CAPI 1501.*

CAPI 3050. Topics in Capitalism Studies. (3) An interdisciplinary perspective on a specific topic, related to the field of Capitalism Studies. *May be repeated for credit with change in topic.*

CAPI 3400. Capitalism Studies Internship. (3) Prerequisite(s): Permission of department. Faculty-supervised field and/or research experience in a cooperating business, government entity, or community organization, with the approval of the Director of Capitalism Studies. Contents of internship based upon a contractual agreement among the student, department, and business, government entity, or community organization.

CAPI 3800. Independent Study. (3) Students pursue individual investigations, supervised by the instructor, of subjects directly related to Capitalism Studies.

CAPI 4050. Capstone in Capitalism Studies. (3) As their capstone project in Capitalism Studies, students explore, in depth, specific subjects in the broader field of Capitalism Studies, using short original research projects. *May be repeated for credit with change in topic.*

Civil and Environmental Engineering (CEGR)

CEGR 2090. Special Topics in Civil and Environmental Engineering. (1 to 3) Prerequisite(s): CEGR major. The special topics covered in each offering of the course serve to advance knowledge at the sophomore level. The content is determined by the instructor and number of credit hours. *May be repeated for credit with change of topic.*

CEGR 2101. Civil Engineering Drawing. (2) Prerequisite(s): Civil Engineering or Environmental Engineering major. Introduction to engineering drawing in the environmental, geotechnical, transportation, and structural sub-disciplines of civil engineering, including sketching, principles of Mechanical drawing, and computer aided drawing (CAD). CAD utilizes the MOSAIC computing environment. One hour of lecture and three hours of laboratory per week.

CEGR 2102. Engineering Economic Analysis. (3) Prerequisite(s): ENGR 1201 with grade of C or above, and Civil Engineering or Environmental Engineering major. Economic analysis of engineering solutions; present and annual worth analysis; cost benefit analysis; internal rate of return analysis; bonds and cost estimating. Three hours per week.

CEGR 2103. Surveying and Technical Drawing. (3) Prerequisite(s): ENGR 1202 with a grade of C or above, and Civil Engineering or Environmental Engineering major. Elements of plane surveying and

technical drawing, including taping, use of level, total station, GPS, topographical surveying, mapping, error adjustment, area and volume computations, sketching, principles of Mechanical drawing, and computer aided drawing (CAD). Three hours of lecture and one laboratory period of three hours each week.

CEGR 2104. Surveying and Site Design. (3) Prerequisite(s): ENGR 1202 with grade of C or above, and Engineering major or minor. Elements of plane surveying, including taping, use of level, total station, and GPS; topographical surveying and mapping; error adjustment; area and volume computations; site development; computer applications. One hour of lecture and 3 hours of field work for four weeks: three hours of lecture.

CEGR 2154. Design Project Lab. (2) Prerequisite(s): CEGR 2102 with grade of C or above, and Civil Engineering or Environmental Engineering major. Problem definition, evaluation of design alternatives, design concepts, conceptual design. Students work together in teams to find, present, and defend their solutions to real world civil engineering problems. One hour of lecture and 3 hours of laboratory per week.

CEGR 3090. Special Topics in Civil Engineering. (1 to 4) Prerequisite(s): Permission of CEE Advisor and Engineering major or minor. Examination of specific new areas emerging in the various fields of civil engineering based upon and synthesizing knowledge students have gained from engineering science, mathematics, and physical science stems of the core curriculum. *May be repeated for credit up to 6 credits.*

CEGR 3111. Construction Engineering. (3) Prerequisite(s): CEGR 3122, CEGR 3255, and CEGR 3278 with grades of C or above; and Engineering major or minor. The principles and techniques of engineering construction projects from the conceptual phase, through design and construction, to completion and close-out are presented. Students develop the analytical skills and awareness necessary on the design engineering side of construction projects. Topics include: project initiation, estimating, budgeting, allocation of resources, construction equipment, formwork and bracing, temporary structures, erection and assembly methods, application of PCI, ASCE, and AASHTO codes, and value engineering.

CEGR 3122. Structural Analysis. (3) Prerequisite(s): MATH 2171 and MEGR 2144 with grades of C or above; Junior or Senior standing; and Civil Engineering major. Analysis of statically determinate and indeterminate beams, trusses and frames to include shear and moment diagrams, rough deflected shapes and deflections; influence lines and criteria for moving loads; indeterminate analyses to include methods of consistent deflection, slope deflection, and moment distribution.

CEGR 3141. Introduction to Environmental Engineering. (3) Prerequisite(s): MATH 2171, CHEM 1251, CHEM 1251L, and MEGR 2141 with grades of C or above; Civil Engineering or Environmental Engineering major. Environmental engineering concepts, including stream pollution analysis, water and wastewater treatment processes; solid and hazardous waste management practices; pollution problems and controls; mass balance analyses, and review of pertinent legislation.

CEGR 3143. Hydraulics and Hydrology. (3) Prerequisite(s): MATH 2171 and MEGR 2141 with grades of C or above; Civil Engineering or Environmental Engineering major. Fluid properties, pressure, closed-

conduit flow, pipe network, pumps, open channel flow, weirs, orifices, flumes; precipitation, runoff, groundwater flow, stream flow, flow measurement.

CEGR 3153. Transportation Laboratory. (2) Pre- or Corequisite(s): CEGR 3161 with grade of C or above, and Civil Engineering major. Design of transportation systems, including highways, airports, pipelines, and mass transit; route layout, geometric design and earthwork calculations; computer-aided system simulation and evaluation. Technical report writing and evaluation of components of written technical communication. One and a half hours of lecture and three hours of laboratory per week.

CEGR 3155. Environmental Laboratory. (2) Prerequisite(s): CHEM 1251 and CHEM 1251L with grades of C or above, and Civil Engineering or Environmental Engineering major. Pre- or Corequisite(s): CEGR 3141 with grade of C or above. Laboratory problems in environmental engineering. Emphasis on analysis and presentation of results as well as on the significance of results as they affect theory and/or practice. Technical report writing and evaluation of different forms of written communication. One and a half hours of lecture and three hours of laboratory per week.

CEGR 3161. Transportation Engineering I. (3) Prerequisite(s): MATH 2241; CEGR 2102, CEGR 2103, and MEGR 2141, all with grades of C or above; Junior or Senior standing; and Civil Engineering major. Analysis of transportation facilities; planning, location, economic considerations, safety analysis, and Intelligent Transportation components, with special emphasis on land transportation.

CEGR 3201. Systems and Design. (3) Prerequisite(s): Civil Engineering major, Senior standing, and permission of instructor. Systems engineering techniques applied to civil engineering problems emphasizing methodological considerations, evaluating alternatives and developing engineering plans carried out by small groups of students.

CEGR 3202. Systems and Design II. (4) Prerequisite(s): CEGR 3201 in immediate preceding semester; and Engineering major or minor. Continuation of CEGR 3201. Creatively investigate the produce alternative solutions for a comprehensive engineering project resulting in written and verbal class presentations. One hour of lecture and three hours of laboratory per week.

CEGR 3221. Structural Steel Design I. (3) Prerequisite(s): CEGR 3122 and CEGR 3255 with grades of C or above; and Engineering major or minor. Analysis and design of structural steel components with emphasis on theories necessary for a thorough understanding of the design procedure. Design philosophies and types of steel structures. Columns, tension members and laterally supported beams are considered. General Flexural theory, including bending of unsymmetrical sections. Current AISC Specifications used.

CEGR 3225. Reinforced Concrete Design I. (3) Prerequisite(s): CEGR 3122 and CEGR 3255 with grades of C or above; and Engineering major or minor. Analysis and design of reinforced concrete components with emphasis on fundamental theories. Mechanics and behavior of reinforced concrete. Flexural members to include singly and doubly-reinforced beams of various cross sections (rectangular, T-beams, joists, one-way slabs, and others). Shear in beams and columns. Short columns to include uniaxial and biaxial bending. Construction of short column

interaction diagrams. Introduction to footings. Current ACI Specifications.

CEGR 3231. Land Development Engineering Fundamentals. (3) Prerequisite(s): CEGR 3161 with grade of C or above, and Engineering major or minor. Analysis of land development industry practices and basic business principals. Analyze land forms for implementation of practical engineering solutions based on social, economic and environmental factors. Analyze and design infrastructure planning of residential and non-residential land development projects.

CEGR 3233. Land Development Engineering Studio. (3) Prerequisite(s): CEGR 3161 with grade of C or above, and Engineering major or minor. Conduct and prepare a site analysis to determine the best use for raw land. Site analysis includes determination of infrastructure constraints, understanding government regulations and how they apply to the development of the site and preparing a conceptual plan for cost determination and feasibility. Use CAD for preparation of conceptual plans and for presenting ideas.

CEGR 3235. Land Development Engineering – Advanced Site Analysis. (3) Prerequisite(s): CEGR 3153, CEGR 3161 with grade of C or above, and Engineering major or minor. Site assessment of land to determine infrastructure needs. Design cost effective infrastructure for residential and commercial developments. Analyze government regulations to determine side design criteria. Prepare a design for each of the major infrastructure components (roads, stormwater, sanitary sewer and water). Prepare plans in CAD for presentation of design alternatives and solutions.

CEGR 3255. Structural Materials I Laboratory. (2) Prerequisite(s): MEGR 2141 with grade of C or above, and Civil Engineering major. Pre- or Corequisite(s): MEGR 2144 with grade of C or above. Composition, properties, and testing of: wood, natural and artificial aggregates, bitumens, portland cement concrete, pozzolans, and structural metals. Experiments in solid mechanics. Data analysis, presentation, and report writing. One and a half hours of lecture and three hours of laboratory per week.

CEGR 3256. Structural Materials Laboratory. (1) Prerequisite(s): MEGR 2141 with a grade of C or above; Civil Engineering major. Pre- or Co-requisite Course(s): MEGR 2144 with a grade of C or above. Composition, properties, and testing of: wood, natural and artificial aggregates, bitumens, portland cement concrete, pozzolans, and structural metals. Experiments in solid mechanics. Data analysis, presentation, and memo writing. One hour of lecture and one and a half hours of laboratory per week.

CEGR 3258. Geotechnical Laboratory. (2) Pre- or Corequisite(s): CEGR 3278 with grade of C or above, and Civil Engineering major. Test to determine engineering properties of soils; consistency, permeability, shear strength, and consolidation. Data analysis, presentation, and report writing. One and a half hours of lecture and three hours of laboratory per week.

CEGR 3259. Geotechnical Laboratory. (1) Prerequisite(s): Civil Engineering major. Pre- or Co-requisite Course(s): CEGR 3278 with a grade of C or above. Test to determine engineering properties of soils; consistency, permeability, shear strength, and consolidation. Data

analysis, presentation, and report writing. One hour of lecture and three hours of laboratory per week.

CEGR 3278. Geotechnical Engineering. (3) Prerequisite(s): MATH 2171 and MEGR 2144 with grades of C or above; and Civil Engineering major. Soil origin, formation, composition, and classification; permeability; seepage; soil mechanics principles, including stresses, shear strength, and consolidation; foundations, retaining structures, and slope stability. Integration of design and technical reporting.

CEGR 3695. Civil Engineering Cooperative Education Seminar. (1) Prerequisite(s): Engineering major or minor Required of co-op students following each work semester. Presentation of engineering reports on work done prior semester. *May be repeated for credit; three (3) credit hours maximum.*

CEGR 3890. Individualized Study. (1 to 3) Prerequisite(s): Permission of department. Supervised individual study within an area of a student's particular interest which is beyond the scope of existing courses. *May be repeated for credit up to 3 credit hours.*

CEGR 3891. Energy Infrastructure Individualized Study. (3) Prerequisite(s): Permission of department; Civil Engineering major, Energy Infrastructure Concentration. Supervised individual study within the area of Energy Infrastructure which is beyond the scope of existing courses.

CEGR 3990. Undergraduate Research in Civil Engineering. (1 to 4) Prerequisite(s): Permission of CEE Advisor and Engineering major or minor. Independent study of a theoretical and/or experimental problem in a specialized area of Civil Engineering. *May be repeated for credit up to 6 credit hours.*

CEGR 4090. Special Topics in Civil Engineering. (1 to 4) Permission of CEE Advisor and Engineering major or minor. Study of specific new areas emerging in the various fields of civil engineering. *May be repeated for credit.*

CEGR 4108. Finite Element Analysis and Applications. (3) Prerequisite(s): CEGR 4224 with grade of B or above, and Engineering major or minor. Finite element method and its application to engineering problems. Application of displacement method to plane stress, plane strain, plate bending and axisymmetrical bodies. Topics include: dynamics, fluid mechanics, and structural mechanics.

CEGR 4122. Power Plant Design. (3) Cross-listed Course(s): CEGR 5122. Prerequisite(s): CEGR 2102, CEGR 3122, and CEGR 3278, all with grades of C or above. Coverage of basic aspects of power generation, including fossil fuel, nuclear, gas, bio, hydro, solar, and wind; analysis and design of infrastructure components and systems in energy production and distribution facilities with a focus on structural and geotechnical systems; history of energy and power; key governing codes, policies and/or regulations for energy facilities; economic and management comparisons of energy alternatives; quality assurance requirements; layouts of power plant sites.

CEGR 4126. Codes, Loads, and Nodes. (3) Prerequisite(s): CEGR 3122 with a grade B or above; and Engineering major or minor. Building systems and components; code requirements according to the latest ASCE Standard 7 pertaining to buildings and other structures; gravity

load analysis including dead, live, roof live and snow loads; lateral load analysis focusing on wind and seismic forces, and applied to the main lateral load resisting systems; software applications using the SAP2000 or similar tool, with 2-D and 3-D models loaded with gravity and lateral loads.

CEGR 4128. Matrix Methods of Structural Analysis. (3)

Prerequisite(s): CEGR 4224 with grade of B or above; and Engineering major or minor. Derivation of the basic equations governing linear structural systems. Application of stiffness and flexibility methods of trusses and frames. Solution techniques utilizing digital computer.

CEGR 4142. Water Treatment Engineering. (3) Prerequisite(s): CEGR 3141 with grade of C or above, or permission of CEE Advisor; and Civil Engineering or Environmental Engineering major. Analysis and design of water and wastewater treatment processes including physical, chemical and biological treatment. Computer-aided design of treatment systems.

CEGR 4144. Engineering Hydrology. (3) Prerequisite(s): CEGR 3143 with grade of C or above, and Civil Engineering or Environmental Engineering major. The quantitative study of the various components of the water cycle, including precipitation, runoff, ground water flow, evaporation and transpiration, stream flow. Hydrograph analysis, flood routing, frequency and duration, reservoir design, computer applications.

CEGR 4145. Groundwater Resources Engineering. (3) Prerequisite(s): CEGR 3143 with grade of C or above, and Civil Engineering or Environmental Engineering major. Overview of hydrological cycle and principles of saturated and unsaturated subsurface flow. Aquifer types and well hydraulics. Field methods for evaluating hydraulic conductivity. Introduction to contaminant fate and transport. Applications of groundwater modeling.

CEGR 4146. Advanced Engineering Hydraulics. (3) Prerequisite(s): CEGR 3143 with grade of C or above, or permission of CEE Advisor; and Civil Engineering or Environmental Engineering major. Problems of liquids as applied in civil engineering; open channel flow; dams and spillways; water power; river flow and backwater curves; pipe networks, fire flow, sewage collection, groundwater, computer applications.

CEGR 4147. Stormwater Management. (3) Prerequisite(s): CEGR 3141 and CEGR 3143 with grades of C or above, and Engineering major or minor. Introduction to the impacts and water quality parameters due to urbanization. Develop a numerical model to analyze water stormwater impacts and evaluate different mitigation methods. Understand and utilize the guiding principles of low impact design (LID) and evaluate the available BMPs and understand their limitations.

CEGR 4149. Environmental Engineering Principles and Practices. (3). Prerequisite(s): CEGR 3141 and Civil Engineering or Environmental Engineering major. Cross-listed Course(s): CEGR 5149. Fundamental science and engineering principles used in environmental engineering and how these principles apply in the functioning of the most common unit processes used in water, wastewater, air, and waste management facilities.

CEGR 4153. Fundamentals of Environmental Microbiology. (3). Prerequisite(s): CEGR 3141 and Civil Engineering or Environmental Engineering major. Cross-listed Course(s): CEGR 5153. Introductory

concepts on fundamentals of environmental microbiology to students from different engineering and science disciplines. This course focuses on understanding the role of microbiology to environmental engineering and science. Concepts related to different molecular biology tools used in microbial ecology will be introduced. Fundamentals of microbiology in different natural and biological processes will be discussed.

CEGR 4161. Advanced Traffic Engineering. (3) Prerequisite(s): CEGR 3161 with grade of C or above, or permission of CEE Advisor; and Engineering major or minor. Analysis of basic characteristics of drivers, vehicles, and roadway that affect the performance of road systems. Stream flow elements, volume, density, speed. Techniques of traffic engineering measurements, investigations and data analysis, capacity analysis. Intersections, accidents, parking.

CEGR 4162. Transportation Planning. (3) Prerequisite(s): CEGR 3161 with grade of C or above, and Engineering major or minor. Urban transportation; travel characteristics of urban transportation systems; analysis of transportation-oriented studies; analytic methods of traffic generation, distribution, modal split, and assignment; traffic flow theory.

CEGR 4168. Airport Planning and Design. (3) Cross-listed Course(s): CEGR 5168. Prerequisite(s): CEGR 3161 and permission of department. The principles of airport planning and design are studied. Covers essential elements of current airport planning and design trends, including airport master planning and layout plans, forecasting, capacity and delay effects, geometric design and layout of airfields including signage and lighting, and the organization and layout of terminal facilities. Also focuses on environmental planning, such as hazardous wildlife attractants, airport noise, and compatible land use. Additionally, it explores the financing options related to capital development of airports, including grants, passenger facility charges, and bonds.

CEGR 4171. Urban Public Transportation. (3) Prerequisite(s): CEGR 3161 with grade of C or above, or permission of CEE Advisor; and Engineering major or minor. Planning, design, and operation of bus, rail, and other public modes. Relationship between particular modes and characteristics of urban areas. Funding, security and other administrative issues.

CEGR 4181. Human Factors in Traffic Engineering. (3) Prerequisite(s): CEGR 3161 with grade of C or above, or permission of CEE Advisor; and Engineering major or minor. Study of the driver's and pedestrian's relationship with the traffic system, including roadway, vehicle, and environment. Consideration of the driving task, driver and pedestrian characteristics, performance and limitations with regard to traffic facility design and operation.

CEGR 4182. Transportation Environmental Assessment. (3) Prerequisite(s): Senior standing and permission of CEE Advisor; and Engineering major or minor. A study of the environmental impact analysis and assessment procedures for transportation improvements. Route location decisions. Noise, air quality, socio-economic, and other impacts.

CEGR 4185. Geometric Design of Highways. (3) Prerequisite(s): CEGR 3153, CEGR 3161 with grade of C or above, and Engineering major or minor. Theory and practice of geometric design of highways including intersections, interchanges, parking and drainage facilities. Driver ability, vehicle performance, safety and economics are considered. Two hours of lecture and three laboratory hours per week.

CEGR 4222. Structural Steel Design II. (3) Prerequisite(s): CEGR 3122 and CEGR 3221 with grades of B or above, and Engineering major or minor. Analysis and design of structural steel components and systems with emphasis on theories necessary for a thorough understanding of the design of complete structures. Composite beams, biaxial bending, beam columns, required strength analysis using the Direct Analysis Method, and bolted and welded connections are covered. Current ANSI/AISC 360 specifications used.

CEGR 4223. Timber Design. (3) Prerequisite(s): CEGR 3122 with grade of B or above; and Engineering major or minor. Principles of timber design. Design of simple timber structures subjected to gravity loads and lateral forces. Computation of design loads; formulation of structural systems; design/analyze structural components and connections; structural system analysis of timber structures.

CEGR 4224. Advanced Structural Analysis. (3) Prerequisite(s): CEGR 3122 with grade of B or above, and Engineering major or minor. Analysis of statically indeterminate structures using approximate and classical methods. Flexibility method, slope deflection method, and moment distribution method. Introduction to matrix methods of structural analysis and commercial structural analysis software.

CEGR 4226. Reinforced Concrete Design II. (3) Prerequisite(s): CEGR 3225 with grade of B or above, and Engineering major or minor. Analysis and design of reinforced concrete components and systems with emphasis on the fundamental theories necessary for a thorough understanding of concrete structures. Concentrically loaded slender columns, slender columns under compression plus bending. Wall footings and column footings. Analysis of continuous beams and frames. Total design project involving the analysis and design of a concrete structure. Current ACI Specifications used.

CEGR 4242. Wastewater Treatment Design. (3) Prerequisite(s): CEGR 3141 with grade of C or above, or permission of department; and Civil Engineering or Environmental Engineering major. Analysis and design of wastewater treatment processes. Regulatory requirements, water quality testing, pretreatment, primary treatment, biological processes, nutrient removal, disinfection and tertiary/advanced processes.

CEGR 4246. Energy and the Environment. (3) Prerequisite(s): CEGR 3141 with grade of C or above, or permission of department; and Civil Engineering or Environmental Engineering major. A quantitative survey of the sources and uses of energy and an analysis of their economic, environmental, and social impacts to society.

CEGR 4247. Sustainability. (3) Prerequisite(s): CEGR 3141 with grade of C or above, and Engineering major or minor. Focuses on sustainability as it applies to civil engineering, including land development choices, infrastructure planning, material selection and disposal, energy sources, and water supply and treatment. Methods of assessing sustainability and incorporating sustainable features in design are reviewed.

CEGR 4262. Traffic Engineering. (3) Prerequisite(s): CEGR 3161 with grade of C or above, or permission of CEE Advisor; and Engineering major or minor. Operation and management of street and highway systems. Traffic control systems, traffic flow theory, and highway capacity. Evaluation of traffic engineering alternatives and the conduct of traffic engineering studies.

CEGR 4264. Landfill Design. (3) Prerequisite(s): CEGR 3258, CEGR 3278 with grade of C or above, permission of department, and Engineering major or minor. Principles and regulations pertaining to waste disposal and municipal solid waste landfill siting, design, construction, and operation. Specific focus on design and construction of composite liner, mass flux analysis, and design and operation of leachate and gas collection systems.

CEGR 4270. Earth Pressures and Retaining Structures. (3) Prerequisite(s): CEGR 3122 and CEGR 3278 with grades of C or above, or permission of CEE Advisor; and Engineering major or minor. Earth pressure theories, effects of wall friction and external loads (including earthquake); design of rigid retaining walls (including structural details); sheetpile wall design; soil reinforcement systems for retaining structures; computer applications.

CEGR 4271. Pavement Design. (3) Prerequisite(s): CEGR 3161 and CEGR 3278 with grades of C or above, or permission of CEE Advisor, and Engineering major or minor. Pavement design concepts and considerations; engineering properties of pavement materials, including soils, bases, asphalt concrete, and portland cement concrete; design of flexible and rigid pavements including shoulders and drainage; computer applications for pavement analysis and design.

CEGR 4272. Design with Geosynthetics. (3) Prerequisite(s): CEGR 3258, CEGR 3278 with grade of C or above, permission of department; and Engineering major or minor. Pre- or Corequisite(s): CEGR 4278. Introduction to geosynthetic materials, properties, laboratory test procedures, and functions; geosynthetic design methods used for geotechnical, transportation hydraulic, and geo-environmental applications (roadways, walls, slopes, foundation soils, landfills, and dams); the incorporation of geosynthetics for soil reinforcement, separation, filtration, drainage and containment.

CEGR 4278. Geotechnical Engineering II. (3) Prerequisite(s): CEGR 3278 with grade of C or above, or permission of CEE Advisor; and Engineering major or minor. Design of shallow and deep foundations, including structural considerations; lateral earth pressure theories; design of rigid and flexible earth retaining structures; advanced aspects of slope stability analysis; and computer applications.

Chemistry (CHEM)

CHEM 1111. Chemistry in Today's Society. (3) For students not majoring in a Physical or Biological Science, Engineering, or science-oriented pre-professional program. The role of chemistry in society and the impact of chemistry on society. An introduction to the chemical concepts needed to understand many of the numerous scientific problems confronting society today. Three lecture hours and one Problem Session hour per week. Students who have received credit for CHEM 1251 may not enroll in CHEM 1111 or CHEM 1111L.

CHEM 1111L. Laboratory in Chemistry. (1) Pre- or Corequisite(s): CHEM 1111. Laboratory exercises to demonstrate what chemists do, techniques used in the laboratory, and the limitations inherent in any laboratory experiment. One three-hour laboratory per week. Students who have received credit for CHEM 1251 may not enroll in CHEM 1111L.

CHEM 1200. Fundamentals of Chemistry. (3) Primarily for students with little or no chemistry background who intend to take CHEM 1251. Introduction to the basic concepts, problem solving skills, and language of chemistry. Develops relationships between chemical formulas and equations, and explores calculations dependent upon these. Students who already have credit for CHEM 1251 with grade of C or above may not take CHEM 1200 for credit. CHEM 1200 will not fulfill chemistry degree requirements.

CHEM 1203. Introduction to General, Organic, and Biochemistry I. (3) Prerequisite(s): Pre-Nursing major. Qualifies as a prerequisite only for CHEM 1204. Fundamentals of chemistry and selected topics from inorganic chemistry. Three lecture hours and one Problem Session hour per week.

CHEM 1203L. Introduction to General, Organic, and Biochemistry I Laboratory. (1) Prerequisite(s): Pre-Nursing major. Pre- or Corequisite(s): CHEM 1203. Laboratory investigations into the nature of inorganic compounds. One three-hour laboratory per week.

CHEM 1204. Introduction to General, Organic, and Biochemistry II. (3) Prerequisite(s): CHEM 1203 with grade of C or above; and Pre-Nursing major. Selected topics from organic and biochemistry. Does not qualify as a prerequisite of any other chemistry course. Three lecture hours and one Problem Session hour per week.

CHEM 1204L. Introduction to General, Organic, and Biochemistry II Laboratory. (1) Prerequisite(s): CHEM 1203 and CHEM 1203L with grades of C or above; and Pre-Nursing major. Pre- or Corequisite(s): CHEM 1204. Laboratory investigations into the nature of organic and biochemical compounds. One three-hour laboratory per week.

CHEM 1251. General Chemistry I. (3) Prerequisite(s): MATH 1100 or MATH 1101 with grade of C or above (or equivalent test score) or CHEM 1200 (which is recommended for students who have not had chemistry in high school) with grade of C or above. A principles-oriented course for science and engineering majors. Fundamental principles and laws of chemistry; the relationship of atomic structure to physical and chemical properties of the elements. Topics include: measurements, chemical nomenclature, reactions and stoichiometry, thermochemistry, atomic structure, periodicity, bonding, and molecular structure. Three lecture hours and one Problem Session hour per week. Students may attempt CHEM 1251 a total of three times. Withdrawing from the course after the Add/Drop deadline constitutes an attempt as does receiving any letter grade. Students who have received credit for CHEM 1251 may not enroll in CHEM 1111 or CHEM 1111L. Students who have received credit for CHEM 1251 with a grade of C or above may not enroll in CHEM 1200.

CHEM 1251L. General Chemistry I Laboratory. (1) Pre- or Corequisite(s): CHEM 1251. Experimental investigations involving the fundamental principles and laws of chemistry. One three-hour laboratory per week. Students may attempt CHEM 1251L a total of three times. Withdrawing from the course after the Add/Drop deadline constitutes an attempt as does receiving any letter grade. Students who have received credit for CHEM 1251L may not enroll in CHEM 1111L.

CHEM 1252. General Chemistry II. (3) Prerequisite(s): CHEM 1251 with grade of C or above. Continuation of CHEM 1251. Topics include: gas laws,

liquids and solids, solutions, chemical kinetics, chemical equilibrium, thermodynamics, and electrochemistry. Three lecture hours and one Problem Session hour per week. Students may attempt CHEM 1252 a total of three times. Withdrawing from the course after the Add/Drop deadline constitutes an attempt as does receiving any letter grade.

CHEM 1252L. General Chemistry II Laboratory. (1) Prerequisite(s): CHEM 1251 and CHEM 1251L with grades of C or above. Pre- or Corequisite(s): CHEM 1252. Continuation of CHEM 1251L. One three-hour laboratory per week. Students may attempt CHEM 1252L a total of three times. Withdrawing from the course after the Add/Drop deadline constitutes an attempt as does receiving any letter grade.

CHEM 1352. General Chemistry for Engineers. (4) Prerequisite(s): Civil Engineering major or Environmental Engineering major. A comprehensive introduction to the chemical principles for students planning to pursue advanced courses and careers in civil and environmental engineering, emphasizing the critical role of chemistry in solving environmental challenges. Topics include chemical reactions, equilibrium, thermodynamics, kinetics, and electrochemistry, with a focus on their application to environmental systems and civil engineering materials. Students will explore the chemistry of natural and engineered systems, including water, air, and soil. Students may attempt CHEM 1352 a total of two times. Withdrawing from the course after the Add/Drop deadline constitutes an attempt, as does receiving any letter grade. Three lecture hours, one Problem Session hour, and one laboratory period of three hours per week.

CHEM 2130. Survey of Organic Chemistry. (3) Prerequisite(s): CHEM 1251 and CHEM 1252 with grades of C or above. A survey of organic chemistry, including aldehydes, ketones, amines, amides and carboxylic acids, designed to meet the needs of B.A. in Biology majors.

CHEM 2131. Organic Chemistry I. (3) Prerequisite(s): CHEM 1251 and CHEM 1252 with grades of C or above. Descriptive principles and techniques of organic chemistry and their applications to reactions of aliphatic and aromatic compounds and natural products. Students may attempt CHEM 2131 a total of three times. Withdrawing from the course after the Add/Drop deadline constitutes an attempt as does receiving any letter grade.

CHEM 2131L. Organic Chemistry I Laboratory. (1) Prerequisite(s): CHEM 1251, CHEM 1251L, CHEM 1252, and CHEM 1252L with grades of C or above. Pre- or Corequisite(s): CHEM 2131 or CHEM 2130 with grade of C or above. Laboratory investigations into the physical and chemical properties of organic compounds. One laboratory period of three hours per week. Students may attempt CHEM 2131L a total of three times. Withdrawing from the course after the Add/Drop deadline constitutes an attempt as does receiving any letter grade.

CHEM 2132. Organic Chemistry II. (3) Prerequisite(s): CHEM 2131 with grade of C or above. Continuation of CHEM 2131. Three lecture hours and one Problem Session hour per week. Students may attempt CHEM 2132 a total of three times. Withdrawing from the course after the Add/Drop deadline constitutes an attempt as does receiving any letter grade.

CHEM 2132L. Organic Chemistry II Laboratory. (1) Prerequisite(s): CHEM 2131L with grade of C or above. Pre- or Corequisite(s): CHEM 2132. Continuation of CHEM 2131L. One laboratory period of three hours per week. Students may attempt CHEM 2132L a total of three times.

Withdrawing from the course after the Add/Drop deadline constitutes an attempt as does receiving any letter grade.

CHEM 2136L. Organic Chemistry Laboratory. (1) Pre- or Corequisite(s): CHEM 2132. Laboratory investigation involving a research-type project in lieu of CHEM 2132L. Available only upon departmental invitation.

CHEM 2141. Survey of Physical Chemistry. (3) Prerequisite(s): CHEM 1252 and CHEM 1252L with grades of C or above; MATH 1120 or one semester of calculus (high school or above); and PHYS 1101, PHYS 2101, or one semester of physics (high school or above). A course designed for students in the life sciences or others desiring a one-semester survey of the physical aspects of chemistry. Application of thermodynamics to chemical reactions, energy transfer processes, and chemical and physical equilibria; the study of reaction rates and mechanisms; structure of gases, liquids, and solids; molecular structure and spectroscopy.

CHEM 3090. Special Topics in Chemistry. (1 to 4) Prerequisite(s): Permission of department. Topics chosen from analytical, biochemistry, inorganic, organic, and physical chemistry. Lecture and/or laboratory hours will vary with the nature of the course taught. *May be repeated for credit.*

CHEM 3111. Quantitative Analysis. (4) Prerequisite(s): CHEM 1252 and CHEM 1252L with grades of C or above. Introduction to quantitative and analytical chemistry. Principles of equilibrium, classical, and simple instrumental approaches are considered. Three lecture hours, one Problem Session hour, and one laboratory period of three hours each week. Students may attempt CHEM 3111 a total of three times. Withdrawing from the course after the Add/Drop deadline constitutes an attempt, as does receiving any letter grade.

CHEM 3121. Inorganic Chemistry. (3) Prerequisite(s): CHEM 2131 with grade of C or above. Exploration of trends and bonding models for main group and metal elements and compounds. Additional topics include: the qualitative and quantitative aspects of periodicity, symmetry, acid-base chemistry, and redox chemistry, with application of these concepts to explain structure, bonding, and reactivity of inorganic and organometallic species.

CHEM 3141. Physical Chemistry I. (3) Prerequisite(s): CHEM 1252 and CHEM 1252L, each with grade of C or above; MATH 1241 and MATH 1242; PHYS 2102 and PHYS 2102L. Pre- or Corequisite(s): At least one of the following: MATH 2241, MATH 2242, MATH 2164, MATH 2171, STAT 3128, or a department-approved mathematics course. Quantum chemistry, atomic and molecular structure, spectroscopy.

CHEM 3141L. Physical Chemistry I Laboratory. (1) Pre- or Corequisite(s): CHEM 3141. Experiments in laser spectroscopy, quantum mechanics, kinetics, and thermodynamics. One laboratory period of three hours per week.

CHEM 3142. Physical Chemistry II. (3) Prerequisite(s): CHEM 1252, CHEM 1252L, and CHEM 3141, each with grade of C or above; MATH 1241 and MATH 1242; PHYS 2102 and PHYS 2102L; or permission of instructor. Pre- or Corequisite(s): At least one of the following: MATH 2241, MATH 2242, MATH 2164, MATH 2171, STAT 3128, or a department-approved

mathematics course. Kinetic theory of gases, statistical and classical thermodynamics, kinetics.

CHEM 3142L. Physical Chemistry II Laboratory. (1) Prerequisite(s): CHEM 3141L with grade of C or above. Pre- or Corequisite(s): CHEM 3141 or CHEM 3142. Continuation of CHEM 3141L. One laboratory period of three hours per week.

CHEM 3165. Survey of Biochemistry. (3) Prerequisite(s): CHEM 2131 with grade of C or above. An introduction to fundamental principles of biochemistry, including the structures and functions of the four major classes of biological macromolecules (proteins, carbohydrates, nucleic acids, and lipids), enzyme catalysis with basic kinetics, and the chemical nature of metabolic/bioenergetics processes. These topics are introduced by examining the primary catabolic pathways of carbohydrates (glycolysis, gluconeogenesis, and the Krebs cycle) in detail.

CHEM 3500. Chemistry Cooperative Education Experience. (0) Prerequisite(s): Junior or Senior standing, chemistry through CHEM 2132, and acceptance into the Experiential Learning Program by the University Career Center. Enrollment in this course is required for Chemistry majors during each semester or summer when they are working on a co-op assignment. Participating students pay a course registration fee for transcript notation. Assignments must be arranged and approved in advance. The Cooperative Education Program is only open to undergraduate students; graduate level students are encouraged to contact their academic departments to inquire about academic or industrial internship options for credit. For more information, contact the University Career Center. *Course may be repeated. Graded on a Satisfactory/Unsatisfactory basis.*

CHEM 3695. Chemistry Seminar I. (1) Prerequisite(s): Chemistry major and CHEM 2131 with a grade of C or above. Introduction to electronic database queries and analysis of the chemical literature. Reading and analyzing primary chemical literature articles and writing a journal format paper based on them.

CHEM 4090. Special Topics in Chemistry. (1 to 4) Prerequisite(s): Permission of instructor. Selected topics in chemistry. Lecture and/or laboratory hours vary with the nature of the course taught. *May be repeated for credit.*

CHEM 4095. Topics for Teachers. (1 to 4) Prerequisite(s): Permission of instructor. Selected topics in chemical education. Lecture and/or laboratory hours vary with the nature of the course taught. *May be repeated for credit.*

CHEM 4111. Instrumental Analysis. (4) Prerequisite(s): CHEM 3111, CHEM 3141, and CHEM 3141L with grades of C or above. Selected modern instrumental methods of analysis, including theory and practice, with considerable attention given to the instrument and elementary electronics involved in the techniques. Two lecture hours and six hours of lab per week.

CHEM 4121. Advanced Inorganic Chemistry. (4) Prerequisite(s): CHEM 2132; and CHEM 2132L or CHEM 2136L with grades of C or above. Pre- or Corequisite(s): CHEM 3141. A review of atomic structure and bonding, a survey of the synthesis, structure, and reactivity of the elements and their most important compounds, a discussion of key industrial

processes dealing with the preparation of inorganic compounds, and an overview of coordination and organometallic chemistry. Laboratory work involves inorganic preparations and characterization techniques. Three lecture hours and one laboratory period of three hours a week.

CHEM 4133. Methods of Organic Structure Determination. (2) Prerequisite(s): CHEM 2132; and CHEM 2132L or CHEM 2136L with grades of C or above. Study and application of modern techniques, primarily spectroscopy, to determine the structure of organic molecules. One hour of lecture and one laboratory period of three hours each week.

CHEM 4134. Organic Reaction Mechanisms. (2) Prerequisite(s): CHEM 2132; and CHEM 2132L or CHEM 2136L with grades of C or above. Mechanistic and theoretical topics which are beyond the scope of CHEM 2131 and CHEM 2132, including orbital symmetry control of organic reactions, the Hammett Equation and other linear free energy relationships, heterocyclic compounds, polycyclic aromatic compounds, organic photochemistry, carbynes, nitrenes, arynes and other short lived, reactive intermediates.

CHEM 4165. Principles of Biochemistry I. (3) Prerequisite(s): CHEM 2132 with grade of C or above. A study of the structures, properties, and functions of biological molecules, bioenergetics of biological reactions, and enzyme catalysis, with particular emphasis on the underlying chemical principles, including thermodynamics and kinetics.

CHEM 4165L. Principles of Biochemistry I Laboratory. (1) Prerequisite(s): CHEM 2132L or CHEM 2136L with grade of C or above. Pre- or Corequisite(s): CHEM 4165. Physical properties of biological molecules and an introduction to experimental techniques of biochemical research. Eleven four-hour lab periods.

CHEM 4166. Principles of Biochemistry II. (3) Prerequisite(s): CHEM 4165 with grade of C or above. A study of various metabolic pathways and information transfer, including molecular aspects of cell biology and genetics, with particular emphasis on the underlying chemical reactions, including thermodynamics and kinetics.

CHEM 4171. Biochemical Instrumentation. (4) Prerequisite(s): CHEM 3111, CHEM 4165, and CHEM 4165L with grades of C or above, or permission of department. Modern instrumental methods used in biorelated areas such as biochemistry, biotechnology, and medical technology. Theory and practice. Electrochemistry, immunochemistry, spectroscopy, chromatography, sedimentation, and electrophoresis. Two lecture hours and six hours of lab per week.

CHEM 4200. Computational Chemistry. (4) Prerequisite(s): CHEM 2141, CHEM 3121, or permission of instructor (for the B.A. in Chemistry program). Pre- or corequisite(s) CHEM 3141 or permission of instructor (for the B.S. and M.S. in Chemistry programs). Electronic and molecular mechanics-based computational methods, including properties, optimized equilibrium and transition state structures and potential energy surfaces of reactions. Three lecture hours and three hours of laboratory each week. Additional projects required of graduate students.

CHEM 4695. Chemistry Seminar II. (1) Prerequisite(s): Senior standing; CHEM 3695 with a grade of C or above; and CHEM 2132, CHEM 2141, CHEM 3111, CHEM 3121, or CHEM 3141 with a grade of C or above. Senior standing. Discussion of recent developments in chemistry based on primary literature. Written and oral reports are required.

CHEM 4696. Chemistry Seminar. (1) Prerequisite(s): CHEM 3695, CHEM 4695, and Senior standing. Discussion of recent developments and special topics in chemistry. Written and oral reports are required.

CHEM 4900. Directed Undergraduate Research. (1 to 4) Prerequisite(s): Permission of instructor overseeing the research; and, when taken for honors credit, approval of a proposal through the Honors College Application to Candidacy process the semester prior to taking the course. Independent study and research in any of these fields of chemistry: organic, physical, analytical, inorganic chemistry or biochemistry. Hours for laboratory and library work to be determined. *May be repeated for credit.*

Humanities & Earth and Social Sciences (CHES)

CHES 2600. LEADS Colloquium. (1) Prerequisite(s): Freshman or Sophomore standing. Cross-listed Course(s): COSC 2600. An introduction to LEADS focused on providing opportunities for students to engage with the key pillars of LEADS. It is conducted in the context of real-world thinking and activities designed to help students understand what leadership is, how it can be cultivated, and how leaders can use creative problem solving to move from ideas to causing action. Through a series of highly personalized activities, the course emphasizes initiative, adaptability, creativity, critical questioning, and problem solving. Reflective learning and the development of communication skills are central to this course experience. Upon successful completion of this course, students should be able to display attitudes, skills, and behaviors that are needed to succeed academically, personally and professionally. Students gain practice and knowledge around communication, critical thinking, collaboration, creativity, and careers. Developing and practicing these core competencies, called the 5 C's, contribute to the student's overall personal and academic brand, confidence level around their academic path, and their connection to the UNC Charlotte and LEADS culture and community.

CHES 3000. Topics in Humanities & Earth and Social Sciences. (1 to 4) Prerequisite(s): Sophomore, Junior, or Senior standing. Cross-listed Course(s): COSC 3000. Topics chosen from the general area of the humanities & earth and social and sciences in order to demonstrate relationships and interdisciplinary influences. Can be used toward general degree requirements as indicated each time the course is offered. *May be repeated for credit with change of topics and permission of student's major department.*

CHES 3400. Non-Residential Studies. (1 to 15) Cross-listed Course(s): COSC 3400. Experience outside the University which provides an alternative learning opportunity to broaden understanding of the major and provide an introduction to various careers. All arrangements for non-residential study must be approved in advance and include a written proposal of goals, methods, duration, hours credit, and evaluation procedures. The University Career Center is available to assist students to locate appropriate work experiences. Student projects are approved, supervised, and evaluated within the student's major department. Grading by a faculty advisor may be on a *Pass/No Credit* basis, ordinarily to be taken in the Junior or Senior year. *May be repeated for credit.* No

more than 15 hours of non-residential studies may be presented toward a degree. (Cannot be used toward general degree requirements.) Contact major department or University Career Center for information.

CHES 3480. Citizenship and Service Practicum. (3) An interdisciplinary, experiential learning course which examines the relationship between citizenship and service to one's community. Lectures, reading, and seminars explore the historical, ethical, and political foundations of voluntary service for issues such as poverty, homelessness, and social justice. Course meets for two hours of lecture/discussion per week and requires completion of 40 hours of voluntary service in the community.

CHES 3500. Humanities & Earth and Social Sciences Cooperative Education Experience. (0) Prerequisite(s): Departmental GPA and credit hours required and approval by the departmental Co-op Coordinator in conjunction with the University Career Center. Enrollment in this course is required for College of Humanities & Earth and Social Sciences students involved in professional work experiences offered through either the co-op (part-time work) or the alternating co-op (full-time work) option of the cooperative education program. Participating students pay a course registration fee for transcript notation. Assignments must be arranged and approved in advance. The Cooperative Education Program is only open to undergraduate students; graduate level students are encouraged to contact their academic departments to inquire about academic or industrial internship options for credit. For information, contact the University Career Center. *Course may be repeated. Graded on a Satisfactory/Uhsatisfactory basis.*

CHES 4800. LEADS Capstone Project. (3) Prerequisite(s): CHES 2600 or COSC 2600 and LEADS elective courses, Senior standing, and permission of department. Cross-listed Course(s): COSC 4800. The capstone experience for completion of the Undergraduate Certificate in Leadership, Innovation, Diversity, and Technology. Student are expected to demonstrate their professional experience, growth, and development through the LEADS certificate program in an electronic portfolio format.

Child and Family Development (CHFD)

CHFD 2111. Foundations in Child and Family Development. (3) Prerequisite(s): Pre-CHFD or CHFD major or minor; and minimum 2.5 GPA overall. Focuses on the latest research and practice in the field of early child development. Increases understanding of the basic concepts of development of children from birth through age 8, including developmental theory, milestones, current issues, and practical examples from the early childhood field. Opportunities to study the developmental domains (social, emotional, cognitive, language, physical, and creativity) and apply this knowledge to planning appropriate activities and establishing appropriate expectations for children are provided.

CHFD 2113. Development: Prenatal to 36 Months. (3) Prerequisite(s): Pre-CHFD or CHFD major or minor; and minimum 2.5 GPA overall. Focuses on development beginning at conception through 36 months of age. The potential influences of biological, genetic, environmental, and cultural factors on development are explored. Examined within the course are theories and research related to developmental processes. Relationship-based approaches (e.g., Touchpoints) are embedded

throughout course content. A field-based clinical assignment of approximately 8 hours is required.

CHFD 2412. The Practice of Observation, Documentation, and Analysis of Young Children's Behavior. (3) Pre- or Corequisite(s): CHFD 2111; Pre-CHFD or CHFD major or minor; and minimum 2.5 GPA overall. Effective methods of observation, documentation, and assessment as related to developmental theory for young children, Birth-8, who are culturally, linguistically, and ability-diverse. A field-based clinical assignment of approximately 30 clinical hours is required.

CHFD 3112. Supporting Young Learners: Birth Through Kindergarten. (3) Prerequisite(s): CHFD major with GPA of at least 2.5 overall and 2.75 in the major; CHFD 2111; CHFD 2113; and CHFD 2412. Focuses on the developmental and individual needs of children as related to group settings, curriculum decisions, and the design of early learning environments. Current issues, the developmentally appropriate practices, curriculum models, the role of the caregiver (family and/or teacher), the process of guiding and teaching, and the facilitation of development and learning of young children who have varied cultural and linguistic needs and readiness levels are explored.

CHFD 3113. Families as the Core of Partnerships. (3) Prerequisite(s): CHFD major or minor with GPA of at least 2.5 overall and 2.75 in the major; CHFD 2111; CHFD 2113; and CHFD 2412. Examines diverse family systems and dynamics as related to the developmental process of parenting in adolescence and adulthood. Emphasis on the role of formal and informal support systems, and effective family-professional collaborative partnerships that are family driven.

CHFD 3114. Responsive Approaches for Infants and Toddlers. (3) Prerequisite(s): Admittance to Teacher Education in Child and Family Development, GPA of at least 2.5 overall and 2.75 in the major, CHFD 3112. Examines integrated approaches to supporting infants and toddlers who are culturally, linguistically, and ability diverse with an emphasis on practice in applied settings including all environments that support children's active learning. Provides opportunities to examine relationships that support and facilitate learning. A field-based clinical assignment of approximately 15-20 hours is included.

CHFD 3115. An Ecological Approach to Learning and Development - Early Childhood to Pre-Adolescence. (3) Prerequisite(s): Admittance to Teacher Education in Child and Family Development with GPA of at least 2.5 overall and 2.75 in the major; CHFD 2111; CHFD 2113; and CHFD 2412. Examines learning and development in the context of the child's physical and social environments, including home, neighborhoods, schools, communities, national policies and global influences. Specific attention to the approaches to learning, emotional/social, health/physical, cognitive, and language/communication domains and theories as seen in a multicultural context.

CHFD 3116. Approaches to Integrated Curriculum for Young Children [3-8]. (3) Prerequisite(s): Admittance to Teacher Education in Child and Family Development, GPA of at least 2.5 overall and 2.75 in the major; CHFD 3112; and CHFD 3115. Examines approaches to learning within the context of emotional/social, health and physical, language and communication, and cognitive domains with an emphasis on practice in applied settings. This course provides opportunities to select, modify, present, and extend curriculum for young children who are culturally, linguistically, and ability diverse in a developmental framework.

CHFD 3118. Approaches to Family Supports and Resources. (3) Prerequisite(s): Admittance to Teacher Education; GPA of at least 2.5 overall and 2.75 in the major; and CHFD 3113. Corequisite(s): CHFD 3416. Examines and applies in-depth research, theory, and practices to create and implement evidence-based supports that build upon family and child strengths in a variety of home and community settings. Candidates complete a field-based clinical assignment of approximately 20 hours in settings with infants, toddlers, and/or twos, their families, and/or prenatal families who are culturally, linguistically, and ability diverse. Collaboration with families is emphasized.

CHFD 3412. Internship 1: The Family and the Community (Birth to 3 Years). (3-6) Prerequisite(s): Admittance to Teacher Education, GPA of at least 2.5 overall and 2.75 in the major. Pre- or Corequisite(s): CHFD 3113. Explores the influence of family and community on the development of infants and toddlers through field-based experiences. Students complete an intensive internship in settings with children who are culturally, linguistically, and ability diverse. Collaboration with families is emphasized. A field-based clinical assignment of approximately 150 hours is required.

CHFD 3414. Language, Literacy, and Mathematical Thinking of Young Children: Birth-Kindergarten. (3) Prerequisite(s): Admittance to Teacher Education in Child and Family Development; GPA of at least 2.5 overall and 2.75 in the major; and CHFD 3112. Examines the development of language, literacy, and mathematical thinking in young children who are culturally, linguistically, and ability-diverse. Research, current educational practice, and instructional materials and strategies are analyzed. Emphasis is on the design and assessment of integrated listening, speaking, reading, writing, and mathematical activities. A field-based clinical experience of approximately 15-20 hours is included.

CHFD 3416. Internship: Child and Family Development. (3) Prerequisite(s): Admittance to Teacher Education in Child and Family Development; GPA of at least 2.5 overall and 2.75 in the major; and CHFD 3113. Corequisite(s): CHFD 3118. Intensive work with children and families in home and community settings planned by student and advisor with focus on integration of theory and practice.

CHFD 3800. Individual Study in Child and Family Development. (1 to 6) Prerequisite(s): Permission of the student's CHFD advisor. Independent study under the supervision of an appropriate faculty member. *May be repeated for credit.*

CHFD 4000. Topics in Child and Family Development. (1 to 6) May include classroom and/or clinical experiences in the content area. *May be repeated for credit with change of topic and permission of department.*

CHFD 4200. Child Life: Supporting Children and Families. (3) An overview of the child life field. Introduces and examines concepts, principles and applications for the child life profession. Students are introduced to the role of the child life specialist in supporting ill children and their families to promote optimal coping and development. Includes site visits.

CHFD 4410. Student Teaching/Seminar: B-K Child and Family Development. (15) Prerequisite(s): Approval of an Application for Student Teaching. Student teaching is a planned sequence of

experiences in the student's area of specialization conducted in an approved school setting under the supervision and coordination of a university supervisor and a clinical educator. During student teaching, the student must demonstrate the competencies identified for their specific teaching field in an appropriate grade level setting. The student is assigned 15 weeks in a school setting. Includes seminars. Participating students pay a course registration fee for edTPA portfolio assessment. *Graded on a Pass/No Credit basis.*

Chinese (CHNS)

CHNS 1201. Elementary Chinese I. (3) Fundamentals of the Chinese language, including speaking, listening comprehension, reading, and writing.

CHNS 1202. Elementary Chinese II. (3) Prerequisite(s): CHNS 1201 or permission of department. Fundamentals of the Chinese language, including speaking, listening comprehension, reading, and writing.

CHNS 1205. Accelerated Elementary Chinese. (4) Focus on basic reading and writing skills for students with native/near-native listening and speaking abilities in Chinese.

CHNS 1502. Global Arts/Humanities: Chinese Culture in the World. (3) This Global Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of a complex, interconnected world. Students are introduced to critical studies of language and culture through a broad engagement with the influence and presence of Chinese and Chinese Culture throughout the world. Course materials may draw widely from pop culture, music, film, media, the arts, and literature. Taught in English.

CHNS 1512. Local Arts/Humanities: Chinese and Chinese Culture in the U.S. (3) This Local Theme course uses the methods and insights of the arts and humanities to explore the central question of what it means to be a member of a "local" community. Through the study of the experiences of different peoples, societies, cultural traditions, and modes of expression in communities at the city, regional, or national level, students will be able to better understand the complexity and diversity of the society in which we live. Students are introduced to critical studies of language through a broad engagement with the influence and presence of Chinese and Chinese Culture in the United States. Course materials may draw from literature, history, film, linguistics, and the arts. Taught in English.

CHNS 2201. Intermediate Chinese I. (3) Prerequisite(s): CHNS 1202 or permission of department. Review of grammar, with conversation and composition.

CHNS 2202. Intermediate Chinese II. (3) Prerequisite(s): CHNS 2201 or permission of department. Continued review of grammar, conversation, and composition.

CHNS 2205. Accelerated Intermediate Chinese. (4) Prerequisite(s): CHNS 1202 or CHNS 1205; or permission of department. Focuses on developing reading and writing skills for students with native/near-native listening and speaking abilities in Chinese.

CHNS 3050. Topics in Chinese. (3) Study of a particular facet of the Chinese language, culture, or literature. *May be repeated for credit with change of topic.*

CHNS 3051. Topics in Chinese. (1 to 3) Study of a particular facet of the Chinese language, culture, or literature. *May be repeated for credit with change of topic.*

CHNS 3201. Chinese Grammar and Conversation I. (3) Prerequisite(s): CHNS 2202 or permission of department. Review of Chinese grammar and guided conversation on prepared topics. Emphasis on spoken Chinese.

CHNS 3202. Chinese Grammar and Conversation II. (3) Prerequisite(s): CHNS 3201 or permission of department. Review of Chinese grammar and guided compositions on prepared topics. Emphasis on vocabulary, idiomatic expressions, and stylistics.

CHNS 3203. Advanced Chinese Grammar and Conversation. (3) Prerequisite(s): CHNS 3201 or permission of the department. CHNS 3203 is a required course for the Chinese Minor. It is designed for students who have successfully completed Chinese Grammar and Conversation I (CHNS 3201) at UNC Charlotte, or have acquired knowledge and skills equivalent to successful completion of CHNS 3201 elsewhere. This course aims to improve students' levels of communicative competence in listening, speaking, reading, writing and cultural acquisition. Students will continue to develop and expand their understanding and use of the Chinese language, especially more specialized vocabulary, and complex sentence structures. In addition to improving the students' fluency in the vernacular style, the course also begins to introduce students to some basic "Literary style" expressions, including vocabulary, idiomatic expressions and stylistics. The course is conducted in Chinese.

CHNS 3225. Short-Term Abroad. (3) Prerequisite(s): Permission of instructor. Faculty-led short-term study abroad experience offered during Spring Break.

CHNS 3400. Chinese Teaching Practicum. (3) Prerequisite(s): One Chinese language course at the 3000 level (CHNS 3201, CHNS 3202 or CHNS 3203) or equivalent with a grade of B or above, or permission of department. Provides students with opportunities to serve as language assistants in Chinese language courses. This course provides students with practical, hands-on experience in the field of Chinese language and cultural education. Students must obtain approval in the semester preceding the semester in which the practicum is to be taken. *May be repeated for credit one time with permission of department.*

College of Science (COSC)

COSC 1600. Thinking Scientifically for College Success. (1 to 3) Prerequisite(s): FR standing and Klein College of Science major. In this Prospect for Success course, students from multiple science disciplines will develop key problem-solving and investigative skills through project-based learning experiences. They will also enhance their personal and

professional development, their student development, and set goals for their collegiate experience. Throughout the course, students will develop the critical skills needed to succeed in their exploration of science and mathematics and work towards becoming an inquisitive, scientifically literate citizen.

COSC 2600. LEADS Colloquium. (1) Cross-listed Course(s): CHES 2600. An introduction to LEADS focused on providing opportunities for students to engage with the key pillars of LEADS. It is conducted in the context of real-world thinking and activities designed to help students understand what leadership is, how it can be cultivated, and how leaders can use creative problem solving to move from ideas to causing action. Through a series of highly personalized activities, the course emphasizes initiative, adaptability, creativity, critical questioning, and problem solving. Reflective learning and the development of communication skills are central to this course experience. Upon successful completion of this course, students should be able to display attitudes, skills, and behaviors that are needed to succeed academically, personally and professionally. Students gain practice and knowledge around communication, critical thinking, collaboration, creativity, and careers. Developing and practicing these core competencies, called the 5 C's, contribute to the student's overall personal and academic brand, confidence level around their academic path, and their connection to the UNC Charlotte and LEADS culture and community.

COSC 3000. Topics in Science. (1 to 4) Prerequisite(s): Sophomore, Junior, or Senior standing. Cross-listed course(s): Topics chosen from the general area of the sciences in order to demonstrate relationships and interdisciplinary influences. Can be used toward general degree requirements as indicated each time the course is offered. *May be repeated for credit with change of topics and permission of student's major department.*

COSC 3400. Non-Residential Studies (1 to 15) Prerequisite(s): Junior or Senior standing. Cross-listed Course(s): CHES 3400. Experience outside the University which provides an alternative learning opportunity to broaden understanding of the major and provide an introduction to various careers. All arrangements for non-residential study must be approved in advance and include a written proposal of goals, methods, duration, hours credit, and evaluation procedures. The University Career Center is available to assist students to locate appropriate work experiences. Student projects will be approved, supervised, and evaluated within the student's major department. Grading by a faculty advisor may be on a Pass/No Credit basis, ordinarily to be taken in the Junior or Senior year. No more than 15 credit hours of non-residential studies may be presented toward a degree. (Cannot be used toward general degree requirements.) Contact major department or University Career Center for information. *May be repeated for credit up to 15 credit hours.*

COSC 4800. LEADS Capstone Project. (3) Prerequisite(s): COSC 2600 and LEADS elective courses; Senior standing and permission of department. Cross-listed Course(s): CHES 4800. The capstone experience for completion of the Undergraduate Certificate in Leadership, Innovation, Diversity, and Technology. Students are expected to demonstrate their professional experience, growth, and development through the LEADS certificate program in an electronic portfolio format.

Criminal Justice and Criminology (CJUS)

CJUS 1200. Professionalism in Criminal Justice and Criminology. (1)

Prerequisite(s): Criminal Justice major. Designed especially for students in their first or second year as a Criminal Justice & Criminology major, this course introduces students to work habits, skill sets, and attitudes that promote academic success, and cultivate professional development as they prepare for a career after graduation. *Criminal Justice majors must complete the course with a grade of C or above.*

CJUS 1511. Local Social Science: Foundations of Criminal Justice. (3)

This Local Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a member of a "local" community. Through the study of the experiences of different peoples, cultures, and communities in our city, our region, or our nation students will be able to better understand the complexity and diversity of the society in which we live. Students are introduced to the major components of the American criminal justice system at the local, state and federal levels. Contemporary issues within the criminal justice system are discussed, including the over-representation of different demographic groups under criminal justice supervision. *May not be taken for credit and for a grade if credit has been received for CJUS 1100. Criminal Justice majors and minors must complete the course with a grade of C or above within two attempts.*

CJUS 2320. Introduction to Courts. (3) Cross-listed Course(s): LEGL 2320. Prerequisite(s): CJUS 1511 with grade of C or above. Analysis of the court area of criminal justice with emphasis on social science literature concerning prosecutors, defense attorneys, judges, juries, court structure, and court reform policies.

CJUS 2340. Criminological Theory. (3) Prerequisite(s): CJUS 1511 with grade of C or above. Designed especially for students in their first or second year as a Criminal Justice & Criminology major/minor, this course provides an overview of the dominant theoretical explanations for crime and deviance. Special attention is given to the empirical research on these theories and their corresponding policy/program recommendations for reducing crime and delinquency in society. *Criminal Justice majors and minors must complete the course with a grade of C or above within two attempts.*

CJUS 2350. Introduction to Corrections. (3) Prerequisite(s): CJUS 1511 with grade of C or above. An overview of community and institutional corrections in the U.S. such as jails, probation, alternatives to incarceration, correctional institutions, treatment strategies, and parole.

CJUS 2360. Ethics and the Criminal Justice System. (3) Prerequisite(s): CJUS 1511 with grade of C or above. The study of applied and professional ethics and ethical issues in the administration of justice.

CJUS 2361. Juvenile Justice. (3) Prerequisite(s): CJUS 1511 with grade of C or above. Intensive analysis of the administration of juvenile justice within the United States. Particular emphasis on decision-making and procedures of police, courts, and correctional agencies for juveniles.

CJUS 2370. Research Methods in Criminal Justice. (3) Prerequisite(s): CJUS 1511 with grade of C or above; Criminal Justice major. Designed especially for students in their first or second year as a Criminal Justice & Criminology major, this course provides an overview

of research design, data collection, and data analysis relevant to criminal justice. *Criminal Justice majors must complete the course with a grade of C or above.*

CJUS 2380. Introduction to Law Enforcement. (3) Prerequisite(s): CJUS 1511 with grade of C or above. An overview of law enforcement agencies and their role in the U.S., including topics such as the history of policing, contemporary policing practices, officer discretion, and police use of force.

CJUS 3000. Topics in Criminal Justice. (3) Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major or minor; and Junior or Senior standing. Specialized criminal justice topics. *May be repeated for credit.*

CJUS 3320. Criminal Justice and the Law. (3) Cross-listed Course(s): LEGL 3320. Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major or minor; and Junior or Senior standing. Nature and development of criminal law including the concepts of criminal liability, responsibility, and capacity; analysis of crimes against persons, property, social order, and morality.

CJUS 3321. Criminal Procedure. (3) Cross-listed Course(s): LEGL 3321. Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major or minor; and Junior or Senior standing. Examines the rules, policies, and law that govern everyday operation of the criminal justice system from arrest to appeal.

CJUS 3323. Correctional Law. (3) Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major or minor; and Junior or Senior standing. Development, substance, and application of the law of corrections.

CJUS 3340. The Juvenile Offender. (3) Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major or minor; and Junior or Senior standing. Nature and extent of juvenile delinquency in the US, theories of delinquent behavior, and an overview of juvenile policing and the juvenile justice system.

CJUS 3341. The Criminal Offender. (3) Prerequisite(s): CJUS 1511 with a grade of C or above; Criminal Justice major or minor; and Junior or Senior standing. Examines theories of adult criminal behavior, with topics such as mental illness and violence, psychopathy, sexual deviance, and substance abuse.

CJUS 3351. Community Corrections. (3) Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major or minor; and Junior or Senior standing. Structure, functions, and effectiveness of community corrections. Emphasis on the deinstitutionalization movement, community-based treatment centers, community service agencies, work release programs, and current trends in community corrections.

CJUS 3352. Institutional Corrections. (3) Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major or minor; and Junior or Senior standing. Structure, functions, and effectiveness of correctional institutions. Emphasis on the history of corrections, classification of offenders, institutionalization, treatment programs, juvenile training schools, and the future of corrections.

CJUS 3353. Juvenile Corrections. (3) Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major or minor; and Junior or Senior standing. Examination of community-based and institutional correctional programs for juveniles and analysis of the effectiveness of these programs.

CJUS 3354. Punishment and Freedom. (3) Cross-listed Course(s): LEGL 3354 and HONR 3700-H01. Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major or minor; and Junior or Senior standing. Examines the manner in which the notions of freedom and punishment are fundamentally bound to one another, and how, at their intersections, these constructs are the source of considerable speculation regarding consumerism, democracy, capitalism, and ethics.

CJUS 3362. Famous Criminal Trials of the Twentieth Century. (3) Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major or minor; and Junior or Senior standing. The study of American criminal trials from 1900 to the present, with a review of specific cases to determine their effect upon, and reflection of, American society and culture.

CJUS 3363. Mediation and Conflict Resolution. (3) Cross-listed Course(s): LEGL 3363. Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major or minor; and Junior or Senior standing. Introduction to conflict and dispute resolution, with a specific emphasis on mediation. Course format includes lecture, case studies, and practice mediation role plays with instructor and peer feedback.

CJUS 3364. The Administration of Criminal Justice. (3) Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major or minor; and Junior or Senior standing. Examines major organizational theories and administrative functions with direct application to criminal justice agencies.

CJUS 3365. Interviewing in Criminal Justice. (3) Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major or minor; and Junior or Senior standing. Examines the interpersonal dynamics, theories, empirical research, and legal basis of the investigative interview necessary for the criminal justice professional. Special emphasis will be given to the establishment of rapport, the process of inquiry, the evaluation of response, cultural and age differences, and the need to remain within the legal bounds of the U.S. Constitution.

CJUS 3366. Domestic Violence. (3) Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major or minor; and Junior or Senior standing. Examination of the interpersonal dynamics of abusive relationships and how the cycle of violence perpetuates the home resulting in various forms of abuse including physical, verbal, psychological, and sexual violence.

CJUS 3367. Problems and Decisions in Criminal Justice. (3) Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major or minor; and Junior or Senior standing. Evaluation of criminal justice policy and decision-making.

CJUS 3380. Law Enforcement Behavioral Systems. (3) Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above;

Criminal Justice major or minor; and Junior or Senior standing. Examines the issues surrounding the individual officer. Such issues include: selection, discretion, ethics, stress, the use of force, and the effects of culture.

CJUS 3382. Community-Oriented Policing and Problem-Solving. (3) Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major or minor; and Junior or Senior standing. Designed to help students learn, in a practical hands on way, about community policing concepts, problem-solving tools and resources, and crime prevention strategies that are currently used by law enforcement and community leaders.

CJUS 3400. Criminal Justice Internship. (3 to 6) Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major; minimum 2.5 GPA; Junior or Senior standing; and permission of department and criminal justice agency. Structured and supervised opportunities for practical experience in a criminal justice agency that complements students' academic and professional goals. *May be repeated for credit up to a maximum of 12 hours but with no more than six hours counting toward the major.*

CJUS 3800. Directed Individual Study. (1 to 3) Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major or minor; Junior or Senior standing; and permission of department. Supervised individual investigation of a topic in criminal justice and criminology. *May be repeated for credit. Graded on a Pass/No Credit basis.*

CJUS 4000. Topics in Crime Analytics. (3) Prerequisite(s): CJUS 1200, CJUS 1511, CJUS 2340, CJUS 2370 (or POLS 2220, or PSYC 2391 & PSYC 3291 or PSYC 3292, or SOCY 3155) and STAT 1222 (or STAT 1220 or STAT 1221), all with grade of C or above, all with grade of C or above; Criminal Justice major; and Junior or Senior standing. Specialized topics in crime analytics. *May be repeated for credit.*

CHNS 4050. Topics in Chinese. (3) Prerequisite(s): CHNS 3202 or equivalent, or permission of instructor. Study of a particular facet of Chinese culture with emphasis on continued language study. Classes offered in Chinese. *May be repeated for credit with change of topic.*

CJUS 4320. Evidence. (3) Cross-listed Course(s): LEGL 4320. Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major or minor; and Junior or Senior standing. A critical examination of the use of evidence within the criminal courtroom. Emphasis placed on the rules of courtroom evidence with particular attention to the proper search and seizure of evidence.

CJUS 4350. Victims and the Criminal Justice System. (3) Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major or minor; and Junior or Senior standing. Relationship between victims of crime and the criminal justice system. Topics include: an analysis of the characteristics of crime victims, victim reporting and non-reporting patterns, treatment of victims by the various segments of the criminal justice system, victim assistance programs, and the issue of compensation and/or restitution for victims of crime.

CJUS 4351. Violence and the Violent Offender. (3) Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major or minor; and Junior or Senior standing. Issues surrounding

violence in today's society and their impact on offenders involved in homicide, child and domestic abuse, and other forms of violence. Examination of myths about violence, victim-offender characteristics and relationships, and theories of violence.

CJUS 4352. Serial Murder. (3) (0) Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major or minor; and Junior or Senior standing. An examination of the history, causation, investigation, and control of serial murder in the United States. Popular beliefs about serial murder are examined and contrasted with the most current research.

CJUS 4360. Drugs, Crime, and the Criminal Justice System. (3) Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major or minor; and Junior or Senior standing. Use of drugs and their relationship to crime, including the impact of drugs on the individual and the criminal justice system.

CJUS 4361. International Criminal Justice. (3) Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major; and Junior or Senior standing. Examination and comparison of the criminal justice system in the US to that of other countries, with an emphasis on worldwide philosophies of law and justice.

CJUS 4363. Gender, Race, and Justice. (3) Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major; and Junior or Senior standing. Examines how racial background, femininities, and masculinities might intersect to influence participants in the criminal justice system. Topics include: perceptions of race for offending and victimization, the notion of gender and offending, women and men as victims of violence and as professionals within the criminal justice system.

CJUS 4364. Aging and Criminal Justice: An Interdisciplinary Understanding. (3) Prerequisite(s): CJUS 1511 and CJUS 2340, both with grade of C or above; Criminal Justice major; and Junior or Senior standing. Cross-listed Course(s):: GRNT 4364. Utilizes an interdisciplinary approach to examining the many ways in which we interface with the criminal justice system as we age. Topics include: the nature and extent of aging related crime, the criminal justice system response to older offenders, older adults as participants in criminal trials, older adults as victims of crime and abuse, and legal issues for the older adult population. Particular attention is placed on assessing these issues from a policy perspective that incorporates concern for administrative, legal, and ethical issues.

CJUS 4365. Criminal Justice and Social Diversity. (3) Prerequisite(s): CJUS 1511 and CJUS 2340, both with a grade of C or above. Criminal Justice major; and Junior or Senior standing. An overview of how class, race, and gender interact with the dynamics of our Criminal Justice System with information on both the historical perspective and current realities of the interplay between diversity and justice in America. Additionally, students will discuss how race, class, gender, and crime are interrelated and how these four areas affect the social realities of today.

CJUS 4366. Street Gangs. (3) Prerequisite(s): CJUS 1511 and CJUS 2340, both with a grade of C or above; Criminal Justice major; and Junior or Senior standing. A general survey of theory, measurement, and research on street gangs and gang activity, as well as gang control programs and policies.

CJUS 4370. Data Analytics and Crime. (3) Prerequisite(s): CJUS 1200, CJUS 1511, CJUS 2340, CJUS 2370 (or POLS 2220, or PSYC 2391 & PSYC 3291 or PSYC 3292, or SOCY 3155) and STAT 1222 (or STAT 1220 or STAT 1221), all with grade of C or above; Criminal Justice major, and Junior or Senior standing. An overview of the skills needed to read, manipulate, and analyze data related to crime and victimization.

CJUS 4371. Criminal Data Sources, Data Management, and Cleaning. (3) Prerequisite(s): CJUS 1200, CJUS 1511, CJUS 2340, CJUS 2370 (or POLS 2220, or PSYC 2391 & PSYC 3291 or PSYC 3292, or SOCY 3155) and STAT 1222 (or STAT 1220 or STAT 1221), all with grades of C or above; Criminal Justice major; and Junior or Senior standing. The identification, extraction, management, and cleaning of criminal justice data in preparation for analytic procedures.

CJUS 4372. Drug Analytics. (3) Prerequisite(s): CJUS 1200, CJUS 1511, CJUS 2340, CJUS 2370 (or POLS 2220, or PSYC 2391 & PSYC 3291 or PSYC 3292, or SOCY 3155) and STAT 1222 (or STAT 1220 or STAT 1221), all with grades of C or above; Criminal Justice major, and Junior or Senior standing. Scholarly and analytic measurement of drug, alcohol, and crime data and the health and financial impacts that drugs have on society.

CJUS 4373. Intelligence Analysis and Security Analytics. (3) Prerequisite(s): CJUS 1200, CJUS 1511, CJUS 2340, CJUS 2370 (or POLS 2220, or PSYC 2391 & PSYC 3292 or PSYC 3291, or SOCY 3155) and STAT 1222 (or STAT 1220 or STAT 1221), all with grades of C or above; Criminal Justice major; and Junior or Senior standing. Intelligence analysis at the Federal, State, and Local levels and how analytic strategies can be employed to analyze qualitative and quantitative data of interest to those operating in the national security environment.

CJUS 4374. Geospatial Analytics and Crime. (3) Prerequisite(s): CJUS 1200, CJUS 1511, CJUS 2340, CJUS 2370 (or POLS 2220, or PSYC 2391 & PSYC 3292 or PSYC 3291, or SOCY 3155) and STAT 1222 (or STAT 1220 or STAT 1221), all with grades of C or above; Criminal Justice major; and Junior or Senior standing. Analytic understanding of the spatial distribution of crime and the factors that precipitate crime patterns.

CJUS 4375. Community-Oriented Policing, Problem Solving, and Crime Analysis. (3) Prerequisite(s): CJUS 1200, CJUS 1511, CJUS 2340, CJUS 2370 (or POLS 2220, or PSYC 2391 & PSYC 3292 or PSYC 3291, or SOCY 3155) and STAT 1222 (or STAT 1220 or STAT 1221), all with grades of C or above; Criminal Justice major; and Junior or Senior standing. Substantive understanding of the implementation of problem-solving strategies in policing as a foundation for crime analysis.

CJUS 4376. Social Network Analysis. (3) Prerequisite(s): CJUS 1200, CJUS 1511, CJUS 2340, CJUS 2370 (or POLS 2220, or PSYC 2391 & PSYC 3292 or PSYC 3291, or SOCY 3155) and STAT 1222 (or STAT 1220 or STAT 1221), all with grades of C or above; Criminal Justice major; and Junior or Senior standing. Discussion of key social network concepts, their application to crime and delinquency, and the policy implications of social networks.

CJUS 4377. Crime Measurement and Data Visualization. (3) Prerequisite(s): CJUS 1200, CJUS 1511, CJUS 2340, CJUS 2370 (or POLS 2220, or PSYC 2391 & PSYC 3292 or PSYC 3291, or SOCY 3155) and STAT 1222 (or STAT 1220 or STAT 1221), all with grades of C or above; Criminal

Justice major; and Junior or Senior standing. Principles and techniques of data visualization as it relates to the measurement of crime and victimization.

CJUS 4378. Causes and Consequences of Crime. (3) Prerequisite(s): CJUS 1200, CJUS 1511, CJUS 2340, CJUS 2370 (or POLS 2220, or PSYC 2391 & PSYC 3292 or PSYC 3291, or SOCY 3155) and STAT 1222 (or STAT 1220 or STAT 1221), all with grades of C or above; Criminal Justice major; and Junior or Senior standing. An examination of various causes and consequences of criminal activity through empirical research and with data analytical tools and techniques.

CJUS 4379. Qualitative Research and Analysis in Criminal Justice. (3) Prerequisite(s): CJUS 1200, CJUS 1511, CJUS 2340, CJUS 2370 (or POLS 2220, or PSYC 2391 & PSYC 3292 or PSYC 3291, or SOCY 3155) and STAT 1222 (or STAT 1220 or STAT 1221), all with grades of C or above; Criminal Justice major; and Junior or Senior standing. An overview of the skills to conduct qualitative research, with an emphasis on the collection and analysis of qualitative data and its use and interpretation in criminal justice.

CJUS 4400. Research Practicum. (3) Prerequisite(s): CJUS 1200, CJUS 1511, CJUS 2340, CJUS 2370 (or POLS 2220, or PSYC 2391 & PSYC 3292 or PSYC 3291, or SOCY 3155) and STAT 1222 (or STAT 1220 or STAT 1221), all with grades of C or above; Criminal Justice major; and Junior or Senior standing. Development, analysis, and presentation of independent research under the supervision of a faculty member. Graduate students are encouraged to register for CJUS 6800.

CJUS 4700. Honors Thesis in Criminal Justice I. (3) Prerequisite(s): CJUS 1200, CJUS 1511, CJUS 2340, CJUS 2370 (or POLS 2220, or PSYC 2391 & PSYC 3292 or PSYC 3291, or SOCY 3155) and STAT 1222 (or STAT 1220 or STAT 1221), all with grades of C or above; Criminal Justice major; and Junior or Senior standing. Required of all Honors students. Students will identify an honors thesis committee, complete assigned readings, and write an honors thesis proposal consistent with departmental and Honors College expectations.

CJUS 4701. Honors Thesis in Criminal Justice II. (3) Prerequisite(s): CJUS 1200, CJUS 1511, CJUS 2340, CJUS 2370 (or POLS 2220, or PSYC 2391 & PSYC 3292 or PSYC 3291, or SOCY 3155) and STAT 1222 (or STAT 1220 or STAT 1221), all with grades of C or above; Criminal Justice major; and Junior or Senior standing. Required of all Honors students. Working with their Honors Thesis Committee, students will complete their thesis, orally defend the final product, and submit all files/documentation to the Honors College.

Construction Management (CMET)

CMET 1400. Introduction to Construction Management. (3) Prerequisite(s): ETCE 1222. An introduction to the construction process, building materials, systems and designs and management issues. The course will focus on current trends in Residential, Commercial, Heavy Civil and Industrial Construction and the materials, systems and equipment used to complete projects.

CMET 1680. Professional Development I: Construction Safety. (1) Prerequisite(s): Open to freshman level Civil Engineering Technology and

Construction Management majors. Professional seminar laboratory study of OSHA regulations pertaining to construction safety. Course includes presentations by industry professionals. Three hours per week.

CMET 2105. Plan Reading. (2) Prerequisite(s): ETCE 1222, CMET 1400, MATH 1103; Engineering major or minor. Corequisite(s): CMET 2221, CMET 2105L. Review and interpretation of construction drawings for Residential, Commercial, Civil and Industrial Projects to determine required materials and work activities in the execution of those projects.

CMET 2105L. Plan Reading Lab. (1). Co-requisite Course(s): CMET 2105, CMET 2221. Laboratory designed to familiarize the student with the variety of construction plans used for Residential, Commercial, Civil and Industrial projects, with emphasis on developing the skills to identify the various materials, equipment and work activities required to complete projects. Three laboratory hours per week.

CMET 2135. Building Information Modeling (BIM). (3) Prerequisite(s): ETCE 1211L. The creation, management, and application of building information models (BIM) to the construction, operation, and maintenance of a facility. Focus on 3D and 4D computer models of building components, renderings, animations, and interfacing with analysis tools.

CMET 2175. Survey of Structures. (3). Prerequisite(s): ETGR 2101, CMET 2221. Basic concepts and principles of structural mechanics, analysis, and design of structural steel, reinforced concrete, and wood systems based on structural building codes. Emphasis is placed on practical aspects of structural analysis and design to include structural loading, beams, columns, and the use of building codes. This course also aims to cover basics behind structural system elements and the purpose these elements serve with relation to the structural load path. *The objective of this course is to provide construction management students with a basic understanding of building loading conditions and design requirements.*

CMET 2221. Construction Means and Methods. (3) Prerequisite(s): PHYS 1101 and Engineering major or minor. Co-requisite Course(s): CMET 2105. A study of the construction means, methods, and equipment used to develop a civil engineering design into a completed structure or system. Topics include: the characteristics, capabilities, and limitations of crews and equipment; selection of individual resources and systems; and analysis based on economics and performance.

CMET 2680. Professional Development II: Sustainable Engineering and Construction. (1) Prerequisite(s): Engineering major or minor. Professional seminar study of introductory concepts of sustainability and their application to engineering and construction. Course includes presentations by industry professionals. Three hours per week.

CMET 3123. Cost Estimating. (3) Prerequisite(s): CMET 2105, CMET 2105L, and CMET 2221; Engineering major or minor. Methods used to prepare construction cost estimates, engineer production and cost, and determine labor and equipment resources.

CMET 3124. Cost Estimating II. (3) Prerequisite(s): CMET 3123. Methods and strategies of estimating and bidding projects in the Residential, Commercial, Civil and Industrial sectors of construction.

CMET 3126. Project Planning and Scheduling. (3) Prerequisite(s): CMET 3123. Introduction to the methods for planning and scheduling including precedence diagrams, Work Breakdown Structures, scheduling logic and constraints, resources leveling and capability of scheduling software.

CMET 3150. Construction Law and Contracts. (3) Prerequisite(s): CMET 3123. Co-requisite Course(s): CMET 3224. Construction Law and Contracts provides a thorough and comprehensive guide to construction law by blending together foundational and socio-legal principles as they relate to the AEC Industry.

CMET 3224. Construction Project Administration. (3) Prerequisite(s): Junior or Senior standing or AAS degree; and Engineering major or minor. A study of the project management processes used in the design and construction of civil engineering projects. Topics include: the roles and responsibilities of project participants, project delivery methods, engineering and construction contracts, project control and documentation, and dispute resolution mechanisms.

CMET 3680. Professional Development III: Professional Ethics. (1) Prerequisite(s): Civil Engineering Technology or Construction Management major; and Junior standing. Professional seminar study of ethical issues and the application of professional ethical codes within the AEC industry. Course includes presentations by industry professionals. Three hours per week.

CMET 4073. Special Topics - Construction Management. (1 to 4) Cross-listed Course(s): CMET 5000. Prerequisite(s): Senior standing, permission of instructor, and Engineering major or minor. A study of new and emerging technical topics pertinent to the field of construction management. *May be repeated for credit.*

CMET 4125. Construction Codes, Permits, Compliance and Sustainability. (3) Prerequisite(s): CMET 3123, CMET 3150, CMET 3224; Engineering major or minor. An analysis of technical specifications, construction regulations and permits, project controls to ensure compliance and sustainability measures and strategies implemented in the AEC Industry.

CMET 4126. Project Scheduling and Control. (3) Prerequisite(s): CMET 3126 and Engineering major or minor. Methods for planning, scheduling, and controlling construction projects, emphasizing manual and computer based techniques for critical path method scheduling, resource management, construction cost control, and reporting practices.

CMET 4129L. Construction Planning Laboratory. (1) Prerequisite(s): CMET 3123 and Engineering major or minor. Pre- or Corequisite(s): CMET 4126. Methods for planning construction operations and projects for directed projects with an emphasis on developing schedules and cost estimates to reflect the plan. Three laboratory hours per week.

CMET 4130. Infrastructure Systems (3) Prerequisite(s): CMET 3123, ETCE 3131, and Engineering major or minor. Design of processes for the construction of permanent works applied to airports, roadways, bridges, dams/levees, water/wastewater facilities, and energy infrastructure; and the design and construction of associated temporary structures.

CMET 4135. Construction Technologies and Innovation. (3) Prerequisite(s): CMET 3123, CMET 3126, and CMET 3224; Civil Engineering Technology or Construction Management Major. An overview of current and new technologies on the horizon along with their applications in the AEC Industry such as Building Information Modeling, Drones, Remote Sensing, Virtual Reality and Artificial Intelligence.

CMET 4228. Construction Office Operations. (2) Prerequisite(s): CMET 3224 and Engineering major or minor. A study of management issues encountered in home and job-site office operations. Topics include: insurance and bonds, risk management, cost accounting, and quality management.

CMET 4272. Capstone Project. (3) Prerequisite(s): Senior standing in Construction Management and permission of department. Utilization of students' previous coursework to creatively investigate and produce solutions for a comprehensive construction management project.

CMET 4290. Temporary Structures in Construction. (3) Prerequisite(s): ETCE 3163 and Engineering major or minor. Temporary structures used to support construction operations such as concrete formwork, scaffolding systems, shoring systems, cofferdams, underpinning, slurry walls, and construction dewatering systems.

CMET 4401. Construction Internship II. (1) Prerequisite(s): CMET 3123, CMET 3150, CMET 3224; Senior Standing, Civil Engineering Technology or Construction Management major and department approval. The objective of the course is to provide the student with Office and Field experiences in the Engineering and Construction Sector of their choice.

CMET 4680. Professional Development IV. (1) Prerequisite(s): Senior standing; and Civil Engineering Technology or Construction Management major. Seminar discussing professional development issues relating to the civil engineering technology and construction management professions. Course includes presentations by industry professionals.

Arts + Architecture (COAA)

COAA 1101. Student Success in Architecture, Art, Performance, and Design. (2) Prerequisite(s): COAA freshmen with 0-30 credit hours. An introduction to the critical attributes and skills necessary to be a successful student in architecture, art, performance, and design. The primary structure of the course is predicated on the three learning outcomes associated with the University's Prospect for Success initiative: commitment to success, cultural awareness, and inquiry. *May not be repeated for grade replacement.*

COAA 3000. Special Topics. (1 to 3) Course description will depend on the topic submitted. All current university rules for special topics courses apply. *May be repeated with a change of topic.*

COAA 3150. Musical Theatre History. (3) Prerequisite(s): Enrollment in Certificate in Music Theatre or permission of instructor. An introduction to Musical Theatre, which surveys the major shows in musical theatre literature, through the study of plots, scores, characters, and songs of the shows. Students explore the genre's place and function in theatre history as both an art form and popular entertainment and its influence on culture in general.

COAA 3350. Musical Theatre Workshop. (1) Prerequisite(s): Enrollment in Certificate in Music Theatre or permission of instructor. Corequisite(s): MUSC 1237. A performance-oriented study of musical theatre, composers, and styles. Provides opportunities for students to synthesize and refine musical theatre performance skills, including acting, singing, and dancing. *May be repeated for credit.*

COAA 4000. Interdisciplinary Topics in Architecture, Art, Performance, and Design. (1 to 5) Interdisciplinary topics in architecture, art, performance, and design.

COAA 4001. Special topics courses offered under the College of Arts + Architecture. (3 or 6) Special topics courses offered under the College of Arts + Architecture. *May be repeated for credit with change of topic.*

COAA 4800. Independent Study. (1 to 5) Independent study investigations in architecture, art, performance, and design.

Communication Studies (COMM)

COMM 1101. Public Speaking. (3) For students who want to upgrade their oral communication skills. Opportunity to study theory and practice of public speaking. Special emphasis placed on constructing and delivering speeches.

COMM 1501. Global Social Science: Global and Intercultural Communication. (3) General Education Only: Does not count towards Communication Studies major. This Global Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of complex, interconnected world. Students build intercultural communication competencies, and become responsible global citizens who understand the world from diverse social, political, economic, and historical perspectives.

COMM 1511. Local Social Science: Health, Well-Being, and Quality of Life. (3) General Education Only: Does not count towards Communication Studies. This Local Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a member of a “local” community. Through the study of the experiences of different peoples, cultures, and communities in our city, our region, or our nation, students will be able to better understand the complexity and diversity of the society in which we live. Students examine individual and social aspects of health and well-being as they are shaped in contexts of interpersonal communication, self-care, marginalization, ethics, and media consumption.

COMM 2050. Topics in Oral Communication. (3) Timely and important areas relevant to the study and practice of oral communication. *May be repeated for credit with permission of advisor.*

COMM 2100. Introduction to Communication Theory. (3) Introduces students to traditional and contemporary theories about human communication processes including the nature of theory building, and

major theoretical developments within the field of communication. May not be taken more than twice.

COMM 2101. Introduction to Rhetorical Theory. (3) Prerequisite(s): COMM 1101, COMM 2100, COMM 2104, and STAT 1220 or STAT 1222, all with grades of C or above; Communication Studies major. Evolution of rhetorical theory from ancient to modern times and examination of major rhetorical theorists. Emphasis on using rhetorical theory to better understand contemporary persuasive messages.

COMM 2102. Advanced Public Speaking. (3) Prerequisite(s): Communication Studies major or minor; COMM 1101 or permission of instructor. Advanced theory and practice of speaking in public. Research, composition, and delivery of various types of speeches and presentations.

COMM 2103. Argumentation and Debate. (3) Cross-listed Course(s): LEGL 2103. Prerequisite(s): Communication Studies major or minor. Introduction to the basic theory and skills of argumentation and debate. Assumptions of argumentation, evidence, reasoning, argument construction, cross-examination, refutation, and ethics included.

COMM 2104. Communications Studies Foundations. (3) Prerequisite(s): Communication Studies major. An overview of the Communication Studies discipline. Topics include an exploration of specialization areas in Communication Studies, research and writing in the discipline, career exploration and academic planning.

COMM 2105. Small Group Communication. (3) Prerequisite(s): Communication Studies major or minor, Computer Science major, Software and Information Systems major, Pre-Public Health major, or Public Health major. Principles of discussion and deliberation in small groups. Practice in organizing, leading, and participating in various forms of group communication. Emphasis on problem solving and group management.

COMM 2107. Interpersonal Communication. (3) Study of the dynamics of one-to-one human communication. The relation of language to human communication, perception and reality, self-concept, nonverbal communication codes, development of trust and self-disclosure, and development of positive communication style.

COMM 2110. Women and the Media. (3) Cross-listed Course(s): WGST 2110. Examination of messages about women as conveyed in contemporary media (magazines, newspapers, videos, the Internet, video games, television, and movies.) The role of gender in the power structures of the media producers is also analyzed.

COMM 2120. Black Images in the Media in the U.S. (3) Cross-listed Course(s): AFRS 2105. Examination of African American images projected through electronic and print media, historically and currently.

COMM 2145. Principles of Public Relations. (3) Prerequisite(s): Communication Studies major or minor; COMM 1101 and COMM 2100; both with grades of C or above. Familiarize students with basic concepts and principles of public relations within the context of communication theory. Acquaints students with the history, functions, roles, social contexts, tools, techniques, and strategies of the profession.

COMM 2146. Public Relations Ethics. (3) Prerequisite(s): COMM 1101; COMM 2100; and COMM 2104; all with grades of C or above; Communication Studies major. Explores strategies for creating and maintaining an ethical organizational culture and models for determining the ethicality of various public relations actions. Students learn how to articulate persuasive arguments for ethical public relations decisions, as well as understanding laws pertaining to unethical public relations practices.

COMM 3050. Topics in Communication Studies. (1 to 3) Timely and important areas relevant to communication studies. *May be repeated for credit with permission of advisor.*

COMM 3051. Topics in Health Communication. (3) Prerequisite(s): COMM 3115 or AFRS 2170. Cross-listed course(s): HHUM 3020. Timely and important areas relevant to the study of health communication. *May be repeated for credit with permission of advisor.*

COMM 3052. Topics in Media & Technology Studies. (3) Prerequisite(s): COMM 3120. Cross-listed course(s): HHUM 3020. Timely and important areas related to media and technologies. Topics will include various contexts in which media and technologies are related to societal issues of concern. *May be repeated for credit with permission of advisor.*

COMM 3053. Topics in Rhetoric, Culture, and Social Change. (3) Timely and important areas relevant to the study of rhetoric, culture and social change. *May be repeated for credit with permission of the major advisor.*

COMM 3054. Topics in Organizational Communication. (3) Prerequisite(s): COMM 3141. Timely and important areas relevant to the study of organizational communication. *May be repeated for credit with permission of advisor.*

COMM 3055. Topics in Public Relations. (3) Prerequisite(s): COMM 2145. Timely and important areas relevant to the study of public relations. *May be repeated for credit with permission of advisor.*

COMM 3056. Topics in Communication Studies. (3) Timely and important areas relevant to communication studies. *May be repeated for credit with permission of the major advisor.*

COMM 3100. Communication Research Methods. (3) Prerequisite(s): COMM 1101; COMM 2100; COMM 2104; and STAT 1220 or STAT 1222; all with a grade of C or above; Communication Studies major. Methods for systematic investigation of communication behavior in all primary communication contexts, including utilization of library materials and quantitative and qualitative techniques for data analysis.

COMM 3101. Persuasion. (3) Prerequisite(s): COMM 1101; COMM 2100; COMM 2104; and STAT 1220 or STAT 1222; all with a grade of C or above; Communication Studies major. Emphasis on the theory and practice of persuasion. Topics include: attitude modification, theories of persuasion, source credibility, persuasive strategies, ethics, and audience analysis.

COMM 3110. Gender and Communication. (3) Cross-listed Course(s): WGST 3110. Examination of the relationship between language and gender. Topics include: how language shapes perceptions of men/women; gender differences in verbal and nonverbal

communication; and gendered communication in relationships, friendships, and the workplace.

COMM 3115. Health Communication. (3) Prerequisite(s): COMM 2100 with a grade of C or above, or HLTH 2101 or AFRS 2170. Introduction to human communication in a healthcare context. Issues of social support, patient-health professional/caregiver interaction, organizational culture, planning health promotion campaigns, and cultural conceptions of health and illness.

COMM 3120. Media, Technology & Communication. (3) Prerequisite(s): COMM 2100 with a grade of C or above. A survey of the function and history of various types of media and technologies as forms of communication, their influence upon society, and the legal and economic environments in which they operate. Students will gain a broad overview of how media and technologies affect communication and our lives.

COMM 3121. Mass Communication and Society. (3) Examines important issues involving mass communication. Critical study of the effect mass communication exerts on society.

COMM 3125. New Media for Communications. (3) Examines the theoretical perspectives and practical skills necessary to create and design content using digital tools. Course covers components of digital media including designing, writing and communication through the web, creating and editing online podcasts and original creation of online digital video.

COMM 3126. Globalization and Digital Media. (3) Cross-listed Course(s): INTL 3115. An analysis of the role and impact of digital media on globalization. The course considers how the internet and social networks have changed our connection from a physical global society to a virtual culture and explores the ways in which digital communication has fostered the globalization of artistic styles, cultural forms, political relationships and economic transactions.

COMM 3130. Rhetoric and Public Culture. (3) Prerequisite(s): COMM 2100 with a grade of C or above. Examination of how and why rhetoric is deployed in various social, cultural, and political contexts to create meaning; emphasis is on both applied and theoretical perspectives of public discourse.

COMM 3131. Black Culture and Communication. (3) Analysis of Black culture through primary texts and communication practices to explore strategies of community building and social change.

COMM 3135. Leadership, Communication, and Group Dynamics. (3) Study of leadership theories, behaviors, and group processes. Emphasis on group dynamics in organizations and the role of the leader. Assessment of leadership style.

COMM 3136. Leadership, Service, and Ethics. (3) Leadership issues facing our society, the role of values and ethics in leadership, and servant leadership.

COMM 3141. Organizational Communication. (3) Cross-listed Course(s): LEGL 3141. Prerequisite(s): COMM 2100 with a grade of C or above. Examines the importance of the operation of communication

processes within organizations and between organizations and their environments.

COMM 3142. Applications in Organizational Communication. (3) Prerequisite(s): Communication Studies major; and COMM 3141 or permission of instructor. Application of the principles, theory, and concepts of organizational communication to organizational settings. Explores how organizational theories are realized in everyday organizational life through case studies, interviews, various research methodologies, assessments, and evaluations.

COMM 3160. Business Communications. (3) Prerequisite(s): INFO 2130 and Junior or Senior standing. The nature and problems of individual, interpersonal and organizational communication in business. Various verbal techniques such as business presentations and writing will be developed and practiced for effective organizational and individual performance.

COMM 3245. Public Relations Writing. (3) Prerequisite(s): Communication Studies major, COMM 1101, COMM 2100, and COMM 2104, all with a grade of C or above; and JOUR 2100 and JOUR 2160. Instruction and writing practice designed to develop the professional-level writing skills expected of entry-level public relations practitioners. Extensive writing exercises in preparing plans, releases, newsletters, brochures, web pages, media kits and other public relations products. Individual and group projects required.

COMM 3246. Public Relations Strategy. (3) Prerequisite(s): Communication Studies major and COMM 2145. Pre- or Corequisite(s): COMM 2146. Focuses on the planning, problem-solving, and management skills required in the contemporary practice of public relations. Students analyze a variety of public relations models and learn to develop problem statements, goals, objectives and tactics, identify and research target publics, and evaluate strategic program results.

COMM 3403. Forensics Practicum. (2) Prerequisite(s): COMM 2103 or equivalent and permission of instructor. Application of forensics principles and practices as a member of the UNC Charlotte Forensics Team. Research, message construction, practice, and tournament competition are required. No more than four hours of COMM 3403 may be used toward requirements for the minor. *May be repeated for credit up to four times.* No more than four hours of COMM 3403 may be used toward requirements for the minor.

COMM 3880. Independent Study. (1 to 3) Prerequisite(s): COMM 1101, permission of instructor and major advisor. Area of study beyond the scope of current offerings to be devised by student and faculty member. *May be repeated for credit.* Three hours of COMM 3880 may be used toward the minor with prior approval of the department chairperson.

COMM 3890. Honors Thesis I. (3) Prerequisite(s): Permission of instructor. Initiation of independent Honors research, including the preparation and defense of a formal thesis proposal.

COMM 3891. Honors Thesis II. (3) Prerequisite(s): COMM 3890; permission of instructor; and approval of a proposal through the Honors College Application to Candidacy process the semester prior to taking the course. Completion of independent Honors research, including the preparation and defense of a formal Honors thesis.

COMM 4050. Topics in Communication Studies. (3) Timely and important areas relevant to communication studies. *May be repeated for credit with permission of advisor.*

COMM 4141. Advanced Organizational Communication. (3) Prerequisite(s): Communication Studies major; COMM 1101; COMM 2100; COMM 2104; and STAT 1220 or STAT 1222; all with a grade of C or above; and COMM 3141. Critical examination of the communication practices of organizations which accomplish such tasks as establishing organizational identification, influencing organizational members, and making decisions. Includes application of research methods to assess and analyze an organization's communication practices.

COMM 4145. Communication Campaigns. (3) Prerequisite(s): Communication Studies major, COMM 1101; COMM 2100; COMM 2104; and STAT 1220 or STAT 1222; all with a grade of C or above; and COMM 2145, and COMM 3245. Lectures, workshops, and guest speakers provide knowledge to enable students to research, design, implement, and complete public relations projects for community-based, not-for-profit organizations. The course is structured and run in a manner similar to a professional public relations agency with students assuming appropriate agency roles. *May be repeated one time.*

COMM 4147. International Public Relations. (3) Prerequisite(s): Communication Studies major and COMM 2145. Examines the complexities of public relations practice in an international setting. Includes overview of the factors that complicate communication across cultures and borders and an examination of the effect those factors have on public relations practice in specific global regions.

COMM 4410. Professional Internship. (3 or 6) Prerequisite(s): Junior or Senior standing, Communication Studies major/minor or Journalism minor, and 2.0 GPA in all coursework in the major or minor. Students work 8-10 hours per week (total 120 hours per semester) for 3 credit hours, or 16-20 hours (total 240 hours per semester) for 6 credit hours in an approved placement. *May be repeated for credit in a different internship placement with permission of advisor and the Communication Studies Internship Coordinator. Graded on a Pass/No Credit basis.*

COMM 4445. International Professional Internship. (3 or 6) Prerequisite(s): Junior or Senior standing, Communication Studies major, and 2.0 GPA in all coursework in the major. Similar to COMM 4410 (Professional Internship) but internship placements are with organizations reflecting a significant global/international component or focus. As with COMM 4410, students work 8-10 hours per week (total 120 hours per semester) for 3 credit hours, or 16-20 hours (total 240 hours per semester) for 6 credit hours in an approved placement. *May be repeated for credit in a different internship placement with permission of advisor and the Communication Studies Internship Coordinator. Graded on a Pass/No Credit basis.*

COMM 4615. Seminar in Health Communication. (3) Prerequisite(s): COMM 1101; COMM 2100; COMM 2104; and STAT 1220 or STAT 1222; all with a grade of C or above; and COMM 3115; and Communication Studies major. Course provides in-depth examination of a major area of health communication utilizing extensive readings, discussion and written work.

COMM 4652. Advanced Seminar in Media & Technology Studies. (3) Prerequisite(s): COMM 1101; COMM 2100; COMM 2104; and STAT 1220 or STAT 1222; all with a grade of C or above; and COMM 3120.;

Communication Studies major or minor. Examines through the seminar format specific topics in media and technology studies. *May be repeated for credit with change in topic.*

Critical Thinking and Communication (CTCM)

CTCM 2530. Interdisciplinary Critical Thinking and Communication. (3) Prerequisite(s): Sophomore standing or higher; and WRDS 1103 or WRDS 1104. Part of an integrated First-Year Writing and Theme curriculum that develops critical thinking and communication competency. Students undertake an interdisciplinary inquiry process and build towards the preparation of a polished product at the end of the semester. The specific subject matter for sections of this course vary since the focus is on developing competencies. *May not be taken for credit and for a grade if credit has been received for LBST 2301.*

Urban Youth and Communities (CUYC)

CUYC 3600. Community Engagement Capstone Seminar. (3) (SL) Provides a culminating and comprehensive experience for students in the Minor in Urban Youth and Communities. Students synthesize the interdisciplinary theory and experiential learning around urban youth and education, communities, and social justice into a comprehensive community and school-based project lead by the student using practices of participatory action research.

Dance (DANC)

DANC 1108. Yoga. (2) Introduction and practice of yoga, especially as it relates to dance training. Students condition the body and mind through the physical and intellectual practice of yoga. Course content includes learning and executing corporeal postures, breath work, and mental focusing exercises. By the end of this course, students will have built upon their individual measures of strength, flexibility, and balance, as well as gained mental clarifying and stress-relieving techniques. *May be repeated for credit.*

DANC 1109. Pilates. (2) Introduction to the fundamentals of the Pilates method with emphasis on core stability, breathing, and body alignment. *May be repeated for credit.*

DANC 1209. Ballet for Majors IA. (2) Prerequisite(s): Dance major or permission of instructor. The study of classical ballet technique at the beginning level, focusing on the following movement concepts as they are performed and understood in ballet: alignment, shift of weight, external rotation (turn-out). This course assumes students have some previous experience studying ballet technique. *May be repeated for credit.*

DANC 1210. Ballet for Majors IB. (2) Prerequisite(s): DANC 1209 with grade of C or above, or permission of instructor. Continuation of the study of classical ballet technique at the beginning level, focusing on the following movement concepts as they are performed and understood in ballet: alignment, shift of weight, external rotation (turn-out). This

course assumes students have some previous experience studying ballet technique. *May be repeated for credit.*

DANC 1212. Ballet I. (2) An introduction to the fundamentals of classical ballet technique, focusing on proper alignment and use of external rotation (turn-out), as well as basic body positions and ballet vocabulary. Recommended for students with no prior experience in ballet. Open to all University students. *May be repeated for credit.*

DANC 1213. Ballet II. (2) Prerequisite(s): DANC 1212 or permission of instructor. A continuation of the fundamentals of classical ballet technique, focusing on proper alignment and use of external rotation (turn-out), as well as basic body positions and ballet vocabulary. Open to all University students. *May be repeated for credit.*

DANC 1214. Modern Dance I. (2) Introduction to modern dance styles for beginners. Elementary modern dance concepts are introduced, including floorwork, standing exercises, and locomotor patterns. Students learn, embody, and demonstrate basic movement vocabulary in a dance studio setting. Body alignment, placement, strength, flexibility and coordination are addressed. Students explore modern dance as a creative practice and artistic expression. Specific modern technique or style varies per instructor. Recommended for students with no prior experience in modern dance. Open to all University students. *May be repeated for credit.*

DANC 1215. Modern Dance II. (2) Prerequisite(s): DANC 1214 or permission of instructor. A continuation of the fundamentals of modern dance, focusing on alignment, placement, strength, flexibility and coordination. Modern dance concepts are further developed through floorwork, standing exercises, locomotor patterns, and extended combinations in center. Students explore modern dance as a creative practice and artistic expression. Specific modern technique or style varies per instructor. Open to all University students. *May be repeated for credit.*

DANC 1217. Modern Dance for Majors IA. (2) Prerequisite(s): Dance major or permission of instructor. Basic modern dance concepts are introduced, including floorwork, standing exercises, and locomotor patterns. Students learn, embody, and demonstrate beginning-level movement vocabulary in a dance studio setting. Body alignment, placement, strength, flexibility and coordination are addressed. Students explore modern dance as a creative practice and artistic expression. Specific modern technique or style varies per instructor. *May be repeated for credit.*

DANC 1218. Modern Dance for Majors IB. (2) Prerequisite(s): DANC 1217 with grade of C or above, or permission of instructor. Basic modern dance concepts continue to be explored, including floorwork, standing exercises, and locomotor patterns. Students continue to learn, embody, and demonstrate beginning-level movement vocabulary in a dance studio setting. Body alignment, placement, strength, flexibility and coordination are addressed. Students explore modern dance as a creative practice and artistic expression. Specific modern technique or style varies per instructor. *May be repeated for credit.*

DANC 1280. Improvisation. (2) Prerequisite(s): Dance major or minor, or permission of instructor. Exploration of body movement in energy, time, and space to build an awareness of the human body and its innate predisposition for movement expression. Students learn, embody,

practice, and demonstrate improvisational dance skills in a studio setting.

DANC 1502. Global Arts/Humanities: Dance in Global Contexts. (3)

All Global Theme courses explore the central, unifying question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of a complex, interconnected world. We learn about how Indigenous dance forms, concert dance, social dance, and popular entertainment dance reflect dance traditions around the world within arts and the humanities, performance studies, religious studies, and critical cultural studies as they relate to the evolution of various dance practices. We situate dance within socio-political issues evidenced in choreography through lectures, discussion, film/video, and live dance performance. *May not be taken for credit and for a grade if credit has been received for LBST 1101.*

DANC 1512. Local Arts/Humanities: Dance in the United States (3)

All Local Theme courses explore the central, unifying question of what it means to be a member of the "local" community in which we live. Through the study of the experiences of different peoples, cultures, and communities in our city, our region, or our nation, students will be able to better understand themselves in the context of the complex and diverse society in which we live. We reflect on topics such as Indigenous practices, social justice, immigration/ migration studies, and critical cultural studies as they relate to the evolution of dance in the United States across theatrical, social, competitive, and musical theatre contexts. We situate dance within the American context as evidenced in choreography through lectures, discussion, film/video, and live dance performance.

DANC 2016. Choreographic Analysis. (3) Prerequisite(s): Dance major, DANC 1280, or permission of instructor. Study of the form and content of choreographic dance works through observation, description, technical analysis, interpretation, and evaluation. Crafting tools and aesthetic communication is examined through daily guided discussion, formal debate, oral project presentation, and writing.

DANC 2119. Anatomy for Dancers. (3) Prerequisite(s): Dance major or minor, or permission of instructor. Experiential anatomy class that explores basic anatomy, movement, and somatic principles. Students learn to sense and assess the body holistically. With embodied learning students can make choices that integrate the body for efficient ways of moving and expression.

DANC 2125. African Dance. (2) An introduction to the practice of selected African traditional dance styles in terms of cultural context, function, and form. *May be repeated for credit.*

DANC 2126. Tap Dance. (2) An introduction to tap dance. Students establish a foundational understanding of tap dance technique, improvisation, and collaboration. *May be repeated for credit.*

DANC 2127. Latin Dance Forms. (2) An introduction to traditional Latin dances such as Salsa, Bachata, Merengue and Cumbia. Students engage in partnering sequences through the exploration of Latin Dance as a social dance form. *May be repeated for credit.*

DANC 2128. Afro-Brazilian Dance. (2) Exploration of dances from the northeastern regions of Brazil. Students engage in movement practice,

discussion, writing reflections, performance and research to gain both physical and cultural understandings of African-Brazilian dances. *May be repeated for credit.*

DANC 2129. Odissi Dance. (2) Introduces the basic elements of curvilinearity, sculptural geometry, rhythm, and musicality of an Eastern Indian classical dance called Odissi. Odissi is a globally popular form presented at concerts, cultural events, and community celebrations.

DANC 2130. Foundations of Hip Hop Dance. (2) Students experience the history, terminology, and technique of Hip Hop Dance through dancing, observation, research, discussion, and choreography. Students will also explore the culture and music of hip hop and other related styles of dance such as jazz funk and house dance. Previous movement training is recommended but not required.

DANC 2209. Ballet for Majors IIA. (2) Prerequisite(s): DANC 1210 with grade of C or above, or permission of instructor. The study of classical ballet technique at the beginning/intermediate level, focusing on the following movement concepts as they are performed and understood in ballet: alignment, shift of weight, external rotation (turn-out), jumping concepts, turning concepts. *May be repeated for credit.*

DANC 2210. Ballet for Majors IIB. (2) Prerequisite(s): DANC 2209 with grade of C or above, or permission of instructor. A continuation of the study of classical ballet technique at the beginning/intermediate level, focusing on the following movement concepts as they are performed and understood in ballet: alignment, shift of weight, external rotation (turn-out), jumping concepts, turning concepts. *May be repeated for credit.*

DANC 2216. Choreography I. (3) Prerequisite(s): DANC 1210, DANC 1217, and DANC 1280; or permission of instructor. Exploration of fundamental elements, concepts, and crafting tools for composing dance. Concert dance and site-specific choreography may be explored. Four contact hours plus a minimum of 2-3 hours lab time.

DANC 2217. Modern Dance for Majors IIA. (2) Prerequisite(s): DANC 1218 with grade of C or above, or permission of instructor. Beginning/Intermediate Modern dance technique. Modern dance concepts are explored including floorwork, standing exercises, and locomotor patterns. Students continue to learn, embody, and demonstrate beginning/intermediate-level movement vocabulary in a dance studio setting. Body alignment, placement, strength, flexibility and coordination are addressed. Students explore modern dance as a creative practice and artistic expression. Specific modern technique or style varies per instructor. *May be repeated for credit.*

DANC 2218. Modern Dance for Majors IIB. (2) Prerequisite(s): DANC 2217 with grade of C or above, or permission of instructor. Intermediate Modern dance technique. Intermediate modern dance concepts are explored, including floorwork, standing exercises, and locomotor patterns. Students continue to learn, embody, and demonstrate intermediate-level movement vocabulary in a dance studio setting. Body alignment, placement, strength, flexibility and coordination are addressed. Students explore modern dance as a creative practice and artistic expression. Specific modern technique or style varies per instructor. *May be repeated for credit.*

DANC 2226. Vernacular Jazz Dance. (2) Traces the development of jazz dance from folk beginnings to the present. Explores vernacular jazz

dance based in African/African-American roots as well as the contemporary or applied aspects of jazz dance. Students will examine the role that vernacular dance and music play in the creation of jazz dance, as well as exploring European influence on African and Latin-based diasporic dances. Includes improvisation, center work, and performance techniques. *May be repeated for credit.*

DANC 2227. Contemporary Jazz Dance. (2) Prerequisite(s): Dance major or minor (others by permission of instructor), and some dance training required. Examination of selected contemporary jazz styles from the 20th and 21st centuries. Students engage in physical, intellectual, and creative practice of contemporary jazz dance. *May be repeated for credit.*

DANC 2228. Music and Dance. (2) Prerequisite(s): DANC 1210, DANC 1217, and DANC 1280; or permission of instructor. Applied study of music as it supports dance education and choreographic and performance practices. This course is an extended study of music theory. It also investigates music as a structural, aesthetic, and cultural aspect of dance. Explores rhythm as a basis for movement and choreography. Embodiment is stressed through exercises in dance teaching, choreography, and step dance or Stomp-style performances.

DANC 2401. Production Practicum - Dance Running Crew. (1) Practical application of production work in the areas of scenery, lighting, sound, costuming, properties, and stage management. *May be repeated for credit.*

DANC 2402. Performance Practicum. (1) Prerequisite(s): Audition. Corequisite(s): Any dance technique course. Practical application of performance techniques within a production setting, including auditions, rehearsals, and performances. *May be repeated for credit.*

DANC 2403. Dancing for Choreographers. (1) Corequisite(s): any level of technique course (DANC 1209, DANC 1210, DANC 1217, DANC 1218, DANC 2209, DANC 2210, DANC 2217, DANC 2218, DANC 3210, or DANC 3218). Experience in rehearsal and performance with faculty member or in conjunction with student choreographers. *May be repeated for credit.*

DANC 2404. Introduction to Dance Production. (3) Overview of all production arts areas: stage management, lighting, scenic, sound, and costumes with application of hands-on skills as running crew for the Dance Concert.

DANC 3100. Pointe. (2) Prerequisite(s): DANC 2209. Corequisite(s): A ballet technique course at the 2000 level or above, or permission of instructor. The study of pointe technique at the beginning level, focusing on how proper ballet alignment supports pointe work, building the strength required to execute pointe technique, and developing pointe vocabulary in a progression from barre work to center work. *May be repeated for credit up to 8 times.*

DANC 3131. Hip Hop and Street Dance. (2) Prerequisite(s): DANC 2130. A continuation of the historical foundations and physical techniques of Hip Hop Dance introduced in Foundations of Hip Hop Dance. Students will develop intermediate to advanced level technical ability in the movement vocabulary and aesthetic principles associated with particular foundational and/or contemporary choreography at a professional level. *May be repeated for credit up to 7 times.*

DANC 3201. Professional Training Certificate in Dance. (4) Prerequisite(s): Audition or permission of department. Both DANC 3201 and DANC 3202 must be taken sequentially during the same academic year. First year of a two-year program of pre-professional technical dance training in ballet, performance experience, and professional dance company observation with the Charlotte Ballet. Emphasis on advanced pointe work for women and men's grande allegro work.

DANC 3202. Professional Training Certificate in Dance. (4) Prerequisite(s): DANC 3201 and audition at Charlotte Ballet. Both DANC 3201 and DANC 3202 must be taken sequentially during the same academic year. Second semester of a two-year program of pre-professional technical dance training in ballet, performance experience, and professional dance company observation with the Charlotte Ballet. Emphasis on advanced pointe work for women and men's grande allegro work.

DANC 3210. Ballet for Majors III. (2) Prerequisite(s): DANC 2210 with grade of C or above, or permission of instructor. The study of classical ballet technique at the intermediate/advanced level, focusing on the following movement concepts as they are performed and understood in ballet: alignment, shift of weight, external rotation (turn-out), jumping concepts, turning concepts. Additional focus on musicality and artistry. *May be repeated for credit up to 7 times.*

DANC 3218. Modern Dance for Majors III. (2) Prerequisite(s): DANC 2218 with grade of C or above, or permission of instructor. Intermediate/Advanced modern dance technique. Intermediate and advanced modern dance concepts are explored, including floorwork, standing exercises, and locomotor patterns. Students continue to learn, embody, and demonstrate intermediate/advanced-level movement vocabulary in a dance studio setting. Body alignment, placement, strength, flexibility and coordination are addressed. Students explore modern dance as a creative practice and artistic expression. Specific modern technique or style varies per instructor. *May be repeated for credit.*

DANC 3221. Dance History, Theory, and Critical Thinking. (3) Exploration of dance traditions through critical reading, research, and writing, emphasizing anthropological and historical approaches. Covers a broad range of dance across concert, social, and ritual traditions from different parts of the world.

DANC 3222. Dance History, Theory, and Critical Thinking II. (3) Exploration of dance as means of personal expression, focusing on critical evaluation, discussion, and written analysis of dances through aesthetic and theoretical approaches. Covers a broad range of dance across concert, social, and ritual traditions from different parts of the world.

DANC 3227. Ballet Pedagogy. (3) Prerequisite(s): DANC 2119 and DANC 2210; Dance major or permission of instructor. Methods and resources in the teaching of ballet techniques for young dancers. How, why, and when to teach the ballet vocabulary. Integration of concepts of anatomy, kinesiology, physics and the laws of motion and musical accompaniment.

DANC 3229. Contact Improvisation. (2) Pre- or Corequisite(s): DANC 1217, DANC 1218, or DANC 1280; or permission of instructor. Experiential exploration of basic concepts of contact improvisation including falling and rolling to the floor, and partnering skills of weight sharing and lifting.

Focus on developing highly attuned body awareness in relation to earth, gravity, and connection to others. Students learn, embody, practice, and demonstrate contact improvisational dance skills in a studio setting. *May be repeated for credit.*

DANC 3230. Choreography II. (3) Prerequisite(s): DANC 2216. Focuses on the development of dance composition concepts and methods. Students use dance and the choreographic process as modes of thinking to investigate ideas and conduct creative research. Four contact hours plus a minimum of 2-3 hours lab time. *May be repeated for credit.*

DANC 3231. Choreography in Context: Danced Collaborations in Urban Spaces. (3) Prerequisite(s): DANC 2216. Examines ways in which we can make art in the context of our physical environments, audiences, and communities, specifically through the processes of site-specific work and community collaborations. The practice of improvisation as a process and product for making dance and performance are deeply investigated. Drawing on the history and methodologies of improvisation, site-specific, and community-centered artists, students build a foundation for and develop their creative skill sets as they improvise, make, and perform dances outside the traditional theatre space. *May be repeated for credit.*

DANC 3232. Digital Skills for Artists. (3) An interdisciplinary course that provides students with the tools to work with digital design and marketing, visual communications, sound editing, and video production. Students learn the basics of effective visual communications, produce visual content and learn to edit videos and photos for online viewing, and become versed in the fundamentals of sound creation and editing. The course culminates in the production of a professional website using digital skills and media tools practiced throughout the semester.

DANC 3253. Black Dance in the Americas. (2) Prerequisite(s): DANC 2226; and DANC 2125 or DANC 2128. Explores the function, consciousness, history, application, and movement aesthetics of black dance in the Americas. Examines the origins of various dances of the African diaspora that influence American culture. Also examined are popular types of dance, including the Charleston, tap, salsa, rumba, and the limbo. This is a movement-based course in which students also engage in discussions, movement analysis, and critique.

DANC 3402. Performance Practicum. (1) Prerequisite(s): two semesters of DANC 2402; Junior or Senior standing; priority given to students accepted into Advanced Dance Studies Certificate Program. An advanced creative process experience for Advanced Dance Studies students. Students may engage in the course as a Rehearsal Director, Research Assistant, or other leadership role. *May be repeated for credit.*

DANC 4001. Topics in Dance. (1 to 3) Special topic in dance. *May be repeated for credit with change in topic.* Two to six contact hours.

DANC 4110. Communicating Across the Dance Discipline. (3) Prerequisite(s): DANC 3221, DANC 3222, Senior standing, and Dance major or minor. Sources from across the dance discipline and related professional communication are used as a basis for research, discussion, writing, and professional presentation.

DANC 4130. The Business of Dance. (3) Prerequisite(s): Dance Major; Completion of the Movement Practices Core. Exploration of dance-making as a business in order to equip students with professional skills

that will aid in their success in dance as a career path. Students investigate the dance field at the intermediate-advanced skill level and develop specific tools in preparation for auditions, performances, and interactions with agents and choreographers.

DANC 4201. Professional Training Certificate in Dance. (4) Prerequisite(s): DANC 3202 and audition at Charlotte Ballet. Third semester of a two-year program of pre-professional technical dance training in ballet, performance experience, and professional dance company observation with the Charlotte Ballet. Emphasis on classical and contemporary variations for women and partnering skills for men. Both DANC 4201 and DANC 4202 must be taken sequentially during the same academic year.

DANC 4202. Professional Training Certificate in Dance. (4) Prerequisite(s): DANC 4201 and audition at Charlotte Ballet. Fourth semester of a two-year program of pre-professional technical dance training in ballet, performance experience, and professional dance company observation with the Charlotte Ballet. Emphasis on classical and contemporary variations for women and partnering skills for men. Both DANC 4201 and DANC 4202 must be taken sequentially during the same academic year.

DANC 4227. Dance Education Methods for the Elementary School. (3) Prerequisite(s): DANC 1209; DANC 1217; DANC 1280; EDUC 1100 or EDUC 1511; SPED 2100; meet requirements for the Praxis Core Test; Criminal Background Check; and accepted application to the College of Education; or permission of instructor. Examination and application of theories and practices for teaching standards-based dance education in grades K-5 with emphasis on arts integration pedagogy. Students plan, deliver, and assess instruction and reflect on their experiences. Includes observation and teaching in an elementary school setting.

DANC 4250. Dance in Community. (3) Students learn to develop relevant lesson plans for teaching community members and facilitate a series of dance classes under the direction of faculty. Designed to train students to successfully enter and exit community programming and/or projects utilizing various dance forms. Students focus on developing tools needed to enter communities and create liaisons through research and interpersonal skills.

DANC 4252. Origins of Jazz: Ring Shout Dance Traditions. (3) Pre- or Corequisite(s): DANC 2125 or DANC 2128; and DANC 2226; or permission of instructor. A research-based course focused on investigation and the analysis of traditional Ring Shout movements created and preserved by the enslaved African Americans of the U.S. Students engage in research of the history, structure, traditions, culture, songs, rhythms and movements of the Ring Shout. Students work in groups, complete research papers, analyze movements via photos and vi3ldeos, reconstruct movement through physical participation, engage in ethnographic field studies, and more.

DANC 4257. Dance Education Methods for the Secondary School. (3) Prerequisite(s): DANC 1209; DANC 1217; DANC 1280; EDUC 1100 or EDUC 1511; SPED 2100; meet requirements for the Praxis Core Test; Criminal Background Check; and accepted application to the College of Education; or permission of instructor. Examination and application of theories and practices for teaching standards-based dance education in grades 6-12 with emphasis on engaging all learners in creative processes. Students

plan, deliver, and assess instruction and reflect on their experiences. Includes observation and teaching in a secondary school setting.

DANC 4328. Teaching Dance: Theories and Practices. (3) Prerequisite(s): DANC 1280, DANC 2119, and four dance movement practice courses; or permission of instructor. Examination and application of diverse theories and practices for teaching dance movement practices in a studio setting with emphasis on developing movement skills and artistry for the beginning dancer. Students plan, deliver, and assess instruction and reflect on their experiences. Includes weekly observation and teaching in a dance setting.

DANC 4400. Internship in Dance. (1 to 6) Prerequisite(s): Minimum 2.5 GPA, Junior or Senior standing, and permission of department chair. Research and/or in-service training for dance majors and minors in cooperating organizations. Specific content is based upon a contract between the students department and professional organization. *Graded on a Pass/No Credit basis.*

DANC 4401. Dance Teaching Practicum. (3) Prerequisite(s): Junior or Senior standing; priority given to students accepted into Certificate in Advanced Dance Studies program; by permission only. An exploration of philosophies about and methods used to teach dance courses. *May be repeated for credit.*

DANC 4402. Choreography and Production Practicum. (3) Prerequisite(s): DANC 2216. Engagement in the creative process of dance-making through development, rehearsal, feedback, and refinement of original choreography for public performance, alongside the production process of planning, collaborating, and executing design, production, and stage management tasks to produce a dance concert. *May be repeated for credit for new choreography project.*

DANC 4466. Dance Curriculum Design. (3) Prerequisite(s): DANC 4227 and DANC 4257. To be taken during the first semester of the Year-Long Internship. Development of units of dance study aligned with state and national curriculum standards based on the needs, interests, and cultural context of the dance program at the student teaching site. Reflection on the role of dance education within a school arts program and the role of dance educators in supporting student development. Course requirements include the development of a draft teaching portfolio aligned with a national teacher assessment instrument. Clinical requirements include one day per week of teaching and observation in the student teaching placement site.

DANC 4467. Student Teaching/Seminar: K-12 Fine and Performing Arts: Dance. (12) Prerequisite(s): Approved application for student teaching from the College of Education; Senior standing; completion of professional education requirements and all coursework; GPA of 2.75 or above in all required Concentration in Dance Education courses; grades of C or above in all courses required for the concentration by the Department of Dance and College of Education; and an overall GPA of 2.5 or above. Corequisite(s): Enrollment only in student teaching; additional classes may not be taken while student teaching. A planned sequence of experiences in the student's area of specialization conducted in an approved school setting under the supervision and coordination of a University Supervisor and a Cooperating Teacher in an appropriate grade level and approved school setting in which the student demonstrates the competencies identified for their specific teaching field in alignment with state and national standards. Participating students pay a course

registration fee for edTPA portfolio assessment. *Graded on a Pass/No Credit basis.*

DANC 4800. Dance Capstone Project. (3) Prerequisite(s): DANC 4110 with a grade of B or above for the written project proposal; grades of C or above in all dance courses; and acceptance into Certificate in Advanced Dance Studies program. Certificate in Advanced Dance Studies students complete their study with an individual project in consultation with a faculty mentor.

DANC 4801. Independent Study. (1 to 6) Prerequisite(s): Permission of department chair. An individual project course for Dance majors. *May be repeated for credit.*

DANC 4802. Applied Dance Capstone. (1) Prerequisite(s): Senior standing. Creation of a culminating project that investigates and articulates the connections between dance and another career field of study that the student has undertaken at UNC Charlotte.

Data Science (DTSC)

DTSC 1110. Sports Analytics. (3) The principles of data science meet sports analytics. Explores the analytical thinking behind the data revolution in sports and how it greatly impacts a sports franchise, a TV broadcast, when a player is up for free agency, and many more topics.

DTSC 1301. Data and Society A. (3) Corequisite(s): DTSC 1302; and STAT 1220, STAT 1221, or STAT 1222. An introduction to data acquisition, models, and analytic methods for interpreting data and developing hypotheses in the context of the interdisciplinary field of Critical Data Studies. Critical Data Studies seeks to track, analyze, and transform the use of large data sets across a variety of domains, including the health sciences, security and surveillance technologies, social media, marketing and business, government and public policy, and other uses of aggregative and algorithmic data science. With resources from Critical Data Studies, students learn how to use statistical methods/tools and scripting programming languages to explore social problems and the ethical implications of collecting and using tabular data. *Graded on a Pass/No Credit basis.*

DTSC 1302. Data and Society B. (3) Corequisite(s): DTSC 1301; and STAT 1220, STAT 1221, or STAT 1222. An introduction to data acquisition, models, and analytic methods for interpreting data and developing hypotheses in the context of the interdisciplinary field of Critical Data Studies. Critical Data Studies seeks to track, analyze, and transform the use of large data sets across a variety of domains, including the health sciences, security and surveillance technologies, social media, marketing and business, government and public policy, and other uses of aggregative and algorithmic data science. With resources from Critical Data Studies, students learn how to use statistical methods/tools and scripting programming languages to explore social problems and the ethical implications of collecting and using tabular data.

DTSC 2110. Sport Business Analytics. (3) Prerequisite(s): Sophomore, Junior, or Senior standing, enrolled in Sports Analytics Certificate. Sport business analytics converts raw data into meaningful and actionable information that enables sport business professionals and companies to make strategic business decisions. This course analyzes the sport

business world and delves into some of the most influential sport business decisions (past and recent) in history.

DTSC 2301. Modeling and Society A. (3) Prerequisite(s): DTSC 1302 with a grade of C or above; and STAT 1220, STAT 1221, or STAT 1222. Corequisite(s): DTSC 2302. In this studio, students learn how to use statistical methods/tools and query languages on relational databases to explore a data science approach to socially relevant challenges associated with a social science discipline. Ethical implications of collecting and using data from external sources are also discussed.

DTSC 2302. Modeling and Society B. (3) Prerequisite(s): DTSC 1301; DTSC 1302; and STAT 1220, STAT 1221, or STAT 1222. Corequisite(s): DTSC 2301. In this studio, students learn how to use statistical methods/tools and query languages on relational databases to explore a data science approach to socially relevant challenges associated with a social science discipline. The ethical implications of collecting and using data from external sources are also discussed.

DTSC 3000. Special Topics in Data Science. (3) Special topics in interdisciplinary data science. Topic varies by semester and instructor. *May be repeated for credit with change of topic.*

DTSC 3400. Data Science Practicum. (1 to 3) An experiential learning course which involves direct involvement on one or more data science projects with a community or industry partner. *May be repeated for credit up to 3 times with permission of instructor.*

DTSC 3601. Predictive Analytics and Their Implications A. (3) Prerequisite(s): DTSC 2301, DTSC 2302, and ITSC 2214. Corequisite(s): DTSC 3602. In this studio, students learn the ethical use of machine learning to develop models and predictive features from unstructured data to explore a data science approach to socially relevant challenges. Validity of predictions are analyzed using appropriate statistical hypothesis tests. The ethical implications of collecting and using data from external sources are also discussed.

DTSC 3602. Predictive Analytics and Their Implications B. (3) Prerequisite(s): DTSC 2301, DTSC 2302, and ITSC 2214. Corequisite(s): DTSC 3601. In this studio, students learn the ethical use of machine learning to develop models and predictive features from unstructured data to explore a data science approach to socially relevant challenges. Validity of predictions are analyzed using appropriate statistical hypothesis tests. The ethical implications of collecting and using data from external sources are also discussed.

DTSC 3800. Independent Study. (1 to 3) Supervised investigation of a problem or subject in the field of Data Science. To be arranged with the instructor, generally during the preceding semester. *May be repeated for credit with change of topic.*

DTSC 3900. Undergraduate Research. (1 to 3) Prerequisite(s): Permission of department. Students make progress on a new or existing original research project, studying a topic in data science, under the guidance of a faculty member. *May be repeated for credit up to three times.*

DTSC 4000. Special Topics in Data Science. (3) Special topics in interdisciplinary data science. Topic varies by semester and instructor. *May be repeated for credit with change of topic.*

DTSC 4301. Data Science for Social Good A. (3) Prerequisite(s): DTSC 3602, STAT 2223, and Senior standing. Corequisite(s): DTSC 4302. This capstone class combines technical, analytic, interpretive, and social dimensions to design and execute a full data science project. Students focus on real-world applications and situations. Projects integrate all the core skills and concepts learned through the program with an agile project implementation. Students are evaluated on their ability to collaboratively develop and communicate their work in both written and oral form, problem solving, influencing, and management. Includes evaluation of inherent bias, fairness, and accountability in data modeling.

DTSC 4302. Data Science for Social Good B. (3) Prerequisite(s): DTSC 3602, ITCS 3162, STAT 2223, and Senior standing. Corequisite(s): DTSC 4301. This capstone class combines technical, analytic, interpretive, and social dimensions to design and execute a full data science project. Students focus on real-world applications and situations. Projects integrate all the core skills and concepts learned through the program with an agile project implementation. Students are evaluated on their ability to collaboratively develop and communicate their work in both written and oral form, problem-solving, influencing, and management. Includes evaluation of inherent bias, fairness, and accountability in data modeling.

Electrical and Computer Engineering (ECGR)

ECGR 2103. Computer Utilization in C++. (3) Prerequisite(s): Computer Engineering or Electrical Engineering major or minor. Introduction to the use of computers and computing methods to solve engineering problems. Structures and object-oriented programming design using C++.

ECGR 2104. Computer Engineering Programming II. (3) Prerequisite(s): ECGR 2103, ITSC 1212, or equivalent with a grade of C or above; and Engineering major or minor. Advanced topics in C++ such as: pointers, recursion, inheritance, polymorphism, and templates. Introduction to linked data structures and analysis of algorithms.

ECGR 2105. Computer Programming. (3) Prerequisite(s): ENGR 1302 or ECGR 2103 or ITSC 1212 with a grade of C or above, or permission of department. Introduction to computer programming using C++. Programming fundamentals are covered, such as variable declaration, arithmetic and logical operators, branches and loops, functions, classes and structures, pointers, dynamic memory management, inheritance, and recursion. Special emphasis is applied to the consideration of low-level and hardware implications of program structure.

ECGR 2111. Network Theory I. (3) Prerequisite(s): Computer Engineering or Electrical Engineering major or minor. Pre- or Corequisite(s): MATH 2171 or permission of department. Ohm's Law and the passive sign convention in circuit analysis. Introduction to Kirchoff's laws. Circuit analysis techniques and network theorems. Energy-storage elements in circuits. Transient and natural response of first-order circuits.

ECGR 2112. Network Theory II. (3) Prerequisite(s): ECGR 2111 or ECGR 2161, MATH 2171, and PHYS 2102, all with grades of C or above; and Engineering major or minor. Pre- or Corequisite(s): ECGR 2254 with grade of C or above. Continuation of ECGR 2111. Transient and natural response of second-order circuits. Complex numbers. Sinusoidal steady state analysis and phasors. Power and energy in single-phase circuits. Frequency-domain analysis and Bode Plots. Introduction to Laplace transforms and transfer functions.

ECGR 2112L. Networks Laboratory. (1) Pre- or Corequisite(s): ECGR 2112 or permission of department.

ECGR 2155. Instrumentation and Networks Laboratory. (1) Prerequisite(s): MATH 1242 with grade of C or above; and Computer Engineering or Electrical Engineering major or minor. Pre- or Corequisite(s): ECGR 2111 or permission of department. Network measurements and applications, introduction to laboratory equipment and techniques.

ECGR 2156. Logic and Networks Laboratory. (1) Prerequisite(s): ECGR 2155 and Engineering major or minor. Pre- or Corequisite(s): ECGR 2112 and ECGR 2181, or permission of department. Experimental logic design, network measurements, applications, and instrumentations.

ECGR 2161. Basic Electrical Engineering I. (3) Prerequisite(s): PHYS 2102 with grade of C or above; and Engineering major or minor. Fundamental concepts and methods of analysis of D.C. and A.C. circuits, elementary operation of electronic devices. Not open to Electrical and Computer Engineering majors.

ECGR 2181. Logic Systems Design. (3) Prerequisite(s): ENGR 1302 with grade of C or above, or ECGR 2103 with grade of C or above, or ITSC 1212 with grade of C or above, or permission of department; and Computer Engineering or Electrical Engineering major or minor. Introduction to Boolean algebra; mixed logic; design of combinational circuits; introduction to sequential systems; MSI building blocks; digital systems design and test; design of multi-input based controller systems; programmable logic devices.

ECGR 2181L. Logic System Design Laboratory. (1) Pre- or Corequisite(s): ECGR 2181 or permission of department. Introduction to laboratory instrumentation, experimental circuit design, digital logic circuit fabrication, and Field Programmable Gate Array devices.

ECGR 2252. ECE Sophomore Design. (2) Prerequisite(s): ECGR 2111 and ECGR 2155 or equivalents; and Engineering major or minor. Pre- or Corequisite(s): ECGR 2112 and ECGR 2181 or equivalents. Introduction to the electrical engineering design process including teamwork, design specifications, conceptual design, detailed design, design integration, cost estimation and market considerations. Product design projects are completed and laboratory prototypes are developed and tested by design teams. Oral presentations and written technical reports on the design projects are required.

ECGR 2254. Analytical Foundations of Electrical and Computer Engineering. (3) Prerequisite(s): MATH 2164, MATH 2171 with grade of C or above; and Engineering major or minor. Use of MATLAB for numeric simulation analysis, complex numbers, real and complex functions, signal representation, functional approximation by curve fitting, introduction to functions of a discrete variable, linear differential

equations, Laplace transforms used for solving linear differential equations, Fourier series and Fourier transforms and their use in solving electrical and computer engineering problems.

ECGR 2255. Digital Design Laboratory. (2) Prerequisite(s): ECGR 2156 and ECGR 3181 with grades of C or above; and Engineering major or minor. Experiments in Digital Systems Design including the use of Programmable Logic Devices.

ECGR 3090. Special Topics. (1 to 4) Prerequisite(s): Permission of department and Engineering major or minor. The course builds upon and synthesizes knowledge from the engineering science, mathematics, and physical sciences stem of the core curriculum. The specific topics teach engineering analysis, synthesis, and design, while simultaneously affording an opportunity for the students to investigate an area of specialization. *May be repeated for credit.*

ECGR 3101. Embedded Systems. (3) Prerequisite(s): Either ECGR 2104 or ECGR 2105, and ECGR 2181, both with grades of C or above, or permission of department; and Engineering major or minor. Introduction to designing microcontroller-based embedded computer systems using assembly and C programs. Examination of real-time operating systems and their impact on performance. Computer engineering applications are emphasized.

ECGR 3101L. Embedded Systems Laboratory. (1) Pre- or Corequisite(s): ECGR 3101 or permission of department. Experiments in embedded systems applications. Lab activities use the C language for the programming of microcontrollers. Exercises will explore efficient programming strategies and interfacing with common microcontroller peripherals.

ECGR 3111. Signals and Systems. (3) Prerequisite(s): ECGR 2112 and ECGR 2254 with grades of C or above; and Engineering major or minor. Analysis of continuous-time and discrete-time signals and systems. Input-output relationships of linear time-invariant systems. Transient and steady state analysis. Frequency domain descriptions, Fourier analysis and the Discrete Fourier Transform. Introduction to Z Transform, its properties, and its relation to LTI systems. Use of Laplace transform for LTI Systems.

ECGR 3112. System Analysis II. (3) Prerequisite(s): ECGR 3111 with grade of C or above; and Engineering major or minor. Introduction to Feedback systems, Laplace Transform theorems and Inverse Laplace transform using partial fraction, Systems analysis using Laplace transform. Transfer functions, Block diagrams and signal flow graphs. BIBO Stability, Routh-Hurwitz Criterion, Root locus method, Time domain response, Effects of adding poles and zeros, PID controllers, and introduction to State-space.

ECGR 3120. Electromagnetic Fields and Waves. (3) Prerequisite(s): ECGR 2112 and MATH 2241 with grades of C or above, or permission of the department. Provides an introduction to electromagnetic fields and waves. Includes static electromagnetic fields, potentials, and their fundamental postulates and boundary conditions. Introduces Maxwell's equations, with applications to time-varying cases to include the complete classical electromagnetic field equations. Study of the propagation and dynamic properties of time harmonic electromagnetic waves in several structures such as a homogeneous medium, at

interfaces between two media, as well as within waveguides. A basic introduction to transmission lines.

ECGR 3121. Introduction to Electromagnetic Fields. (3) Prerequisite(s): ECGR 2112 and MATH 2241 with grades of C or above; and Engineering major or minor. A study of electric and magnetic fields using the vector formulation. Vector analysis. Electrostatics: potential functions, dielectrics, capacitance, energy, and forces associated with electric fields, solution of Laplace's and Poisson's equations. Magnetostatics: vector potential functions, Lorentz forces, hysteresis, magnetic polarization and induction, and energy. Gauss's, Ampere's, Faraday's laws, etc., leading to the Maxwell's equations.

ECGR 3122. Electromagnetic Waves. (3) Prerequisite(s): ECGR 3121 with grade of C or above; and Engineering major or minor. A study of Maxwell's equations, transmission line theory, plane waves in media, propagation of electromagnetic waves in various media. The phenomena of reflection and refraction at interfaces of two dissimilar materials. Guided electromagnetic waves in coaxial cables and waveguides.

ECGR 3123. Data Communications and Networking. (3) Prerequisite(s): ECGR 2111, ECGR 2181, and Engineering major or minor. An introduction to data communications, including transmission media, signal encoding, link control, and multiplexing. Concepts of networking including protocols, LAN, WAN, and wireless networks.

ECGR 3130. Fundamentals of Electronics and Semiconductors. (3) Prerequisite(s): ECGR 2112 with grade of C or above or permission of department. Study of the fundamental concepts and applications of semiconductor devices. Diode characteristics and applications, including clipping and rectifier circuits. MOS, JFET, and bipolar transistor fundamentals, including D.C. biasing and small-signal analysis of single-stage amplifiers. Operational amplifier fundamentals.

ECGR 3130L. Electronics Laboratory. (1) Pre- or Corequisite(s): ECGR 3130 or permission of department. Measurements and applications of electronics circuits.

ECGR 3131. Fundamentals of Electronics and Semiconductors. (3) Prerequisite(s): ECGR 2112 with grade of C or above; and Engineering major or minor. Study of the fundamental concepts and applications of semiconductor devices. Diode characteristics and applications, including clipping and rectifier circuits. MOS, JFET, and bipolar transistor fundamentals, including D.C. biasing and small-signal analysis of single-stage amplifiers. Operational amplifier fundamentals.

ECGR 3132. Electronics. (3) Prerequisite(s): ECGR 3131 with grade of C or above; and Engineering major or minor. Low and high-frequency analysis of transistor amplifiers. Multistage and feedback amplifier design. Stability and oscillation. Operational amplifier design and applications.

ECGR 3133. Solid State Microelectronics I. (3) Prerequisite(s): ECGR 3121 and PHYS 3141, or permission of department; and Engineering major or minor. Simple crystal structures, energy bands, and charge carriers in semiconductors, distribution functions for photons and electrons, optical and electrical properties, carrier diffusion, generation, and recombination.

ECGR 3142. Electrical Energy Conversion. (3) Prerequisite(s): Either ECGR 3120 or ECGR 3121 with grade of C or above, or permission of department; and Engineering major or minor. Principles of operation and basic design features of electromechanical energy converters; three phase power. The role of the magnetic field in transformers and electrical machines; Generation of induced voltages; Electromechanical torque development; Speed control; Circuit models and machine performance; Photovoltaic power conversion.

ECGR 3142L. Electrical Energy Conversion Laboratory. (1) Pre- or Corequisite(s): ECGR 3142 or permission of department. Measurements and application of electromechanical energy converters and three phase systems.

ECGR 3155. Systems and Electronics Laboratory. (1) Prerequisite(s): ECGR 2112, ECGR 2156, and Engineering major or minor. Pre- or Corequisite(s): ECGR 3111 and ECGR 3131, or permission of department. Systems and signals measurements and applications; electronic circuits.

ECGR 3156. Electromagnetic and Electronic Devices Laboratory. (1) Prerequisite(s): ECGR 3155 and Engineering major or minor. Pre- or Corequisite(s): ECGR 3132 or permission of department. Measurements and applications of electromagnetic and solid state devices.

ECGR 3157. ECE Junior Design. (3) Prerequisite(s): ECGR 3111 and either ECGR 3130 or ECGR 3131, all with grades of C or above, or permission of department; Engineering major or minor. Pre- or Co-requisite Course(s): ECGR 3111 and ECGR 3131 with grades of C or above. Application of conceptual design; circuit design; parameter sensitivity analysis; cost-performance tradeoff analysis and interconnection compatibility design. A design project completed in a laboratory setting and a written technical report and oral presentation on the project are required.

ECGR 3159. Professional Practice. (1) Prerequisite(s): Senior standing and Engineering major or minor. Ethics; safety and liability in the manufacturing workplace; product design; product development; cost estimating for nonrecurring engineering work; production planning; Total Quality Management; and effective technical presentation.

ECGR 3161. Robotics Technologies. (3) Pre- or Corequisite(s): ECGR 2105 and ECGR 2112 with a grade of C or above, or permission of department. Introduction to the basic technologies used in a robotic system. Students will examine several sensors and actuators that are used in robotics and learn how to integrate them into a robotics system. Students will further investigate algorithmic control of hardware.

ECGR 3180. Data Structures and Algorithms in C++. (3) Prerequisite(s): ECGR 2104 with grade of C or above. An introduction to data structures and algorithms. Emphasis is placed on practical implementations in an object-oriented framework using the C++ programming language. Additionally, students are introduced how to select data structures and algorithms that are appropriate for engineering-centric computational problems that they encounter.

ECGR 3181. Logic System Design II. (3) Prerequisite(s): ECGR 2181 with grade of C or above or permission of department; and Engineering major or minor. Digital systems design and test. Top-down design of multi-input based controller systems; programmable logic devices.

ECGR 3183. Computer Organization. (3) Prerequisite(s): ECGR 2104 and ECGR 2181. Introduction to key concepts in computer organization, design, and engineering. Topics include: CPU performance analysis, instruction set design, systems-level view of computer arithmetic, design of the datapath and control for a simple processor using VHDL, pipelining, hierarchical memory, I/O systems.

ECGR 3695. Electrical and Computer Engineering Cooperative Education Seminar. (1) Prerequisite(s): ENGR 3500 and permission of the ECE department's co-op advisor; and Engineering major or minor. Required for co-op students during semesters immediately following each work assignment for presentation of engineering reports on work done the prior semester. *Graded on a Pass/No Credit basis. May be repeated for credit.*

ECGR 3890. Individualized Study. (1 to 3) Prerequisite(s): Permission of department and Engineering major or minor. Supervised individual study within an area of a student's particular interest which is beyond the scope of existing courses. *May be repeated for credit.*

ECGR 3990. Undergraduate Research. (1 to 4) Prerequisite(s): Permission of department and Engineering major or minor. Independent study of theoretical and/or experimental problems in the specialized area of engineering analysis and design. Students may pursue a particular area or problem to a depth much greater than can be undertaken within the scope of existing courses. *May be repeated for credit.*

ECGR 4090. Special Topics. (1 to 4) Prerequisite(s): Permission of department and Engineering major or minor. Directed study of current topics of special interest. *May be repeated for credit.*

ECGR 4100. Research Tools and Techniques in Computer Engineering. (3) Cross-listed Course(s): ECGR 5100. Prerequisite(s): Senior standing; and Engineering major or minor or permission of instructor. Introduction to the fundamentals of computer engineering research and the practical tools required to collect, analyze, and report research results. Key engineering mathematics topics are covered, such as the propositional and predicate calculus, analysis of algorithms, and graph theory. Students are exposed to compiling software packages and device drivers, as well as the conventions for developing similar software.

ECGR 4101. Advanced Embedded Systems. (3) Cross-Listed Course(s): ECGR 5101. Prerequisite(s): ECGR 3101 with grade of C or above, and Engineering major or minor. An advanced course in embedded system design utilizing advanced microprocessors. Architecture, software, and interface techniques. This course is project-oriented, involving the use of a logic analyzer and hardware design tools.

ECGR 4102. Engineering Simulation. (3) Prerequisite(s): ECGR 2103 or ECGR 2105 or permission of department; and Engineering major or minor. A wide range of simulation related topics are introduced including the theory of simulation, characteristics of simulators, and trade-offs in simulation studies. Continuous and discrete simulation with primary emphasis on application of simulation techniques to engineering problems. Simulation of actual problems based on students' interest and experience areas.

ECGR 4103. Machine Vision, AI and Image Processing. (3) Prerequisite(s): ECGR 3111 or permission of department; and Engineering

major or minor. An introduction to the theory and application of perceptual machine learning, computer vision and digital image processing including applications in society such as computer vision, robotics, medicine, science, and public health, safety and welfare.

ECGR 4104. Computational Methods in Power Systems. (3) Prerequisite(s): ECGR 4142 or permission of department; and Engineering major or minor. Numerical techniques for analysis, operation, and planning of power systems. Sparse matrix techniques applied to power flow algorithms. Economic operation of power systems. Optimum power flow.

ECGR 4105. Introduction to Machine Learning. (3) Cross-listed Course(s): ECGR 5105. Prerequisite(s): ECGR 3101 or ECGR 3111. Machine learning is a sub-field of Artificial Intelligence that gives computers the ability to learn and/or act without being explicitly programmed. This course examines the necessary theory, principles and algorithms for machine learning. Topics include: supervised, unsupervised learning approaches (including deep learning), optimization procedures, and statistical inference. Students digest and practice their knowledge and skills by class discussion, homework, and exams, as well as obtain in-depth experience with a particular topic through a final project. To prepare students to be successful in this course, light reviews on linear algebra and matrix analysis and programming tutorials are provided as additional course reading materials.

ECGR 4106. Real-Time Machine Learning. (3) Cross-listed Course(s): ECGR 5106. Prerequisite(s): ECGR 3101 or ECGR 3111. An interactive practical introduction to real-time machine learning and deep learning inference based on leveraging GPU and CPU platforms. Introduces Convolutional Neural Networks (CNNs) and Recurrent Neural Networks (RNNs) inference algorithms for real-time computer vision and scene analysis, including object detection, pose estimation, and activity recognition. Examines basic deep learning constructs based on current design tools (e.g., Pytorch and Real-time Tensorflow libraries).

ECGR 4111. Control Systems Theory I. (3) Cross-listed Course(s): ECGR 5411. Prerequisite(s): ECGR 3112 with grade of C or above; and Engineering major or minor. The fundamentals of modern multi-input-multi-output control systems and preliminary analysis of nonlinear systems via the method of linearization. Time domain analysis of control systems. Design of state-feedback controller via the method of pole-placements. Determining controllability and observability of linear systems. The design and compensation of control systems, Phase lead, lag controller synthesis, Nyquist Stability criterion and frequency domain responses. Credit will not be given for ECGR 4111 where credit has been given for ECGR 5411.

ECGR 4112. Principles of Digital Control Systems. (3) Prerequisite(s): ECGR 3111 and Engineering major or minor. Introduction to digital control system principles. Topics include: z-transform, Laplace transform, and starred transform analysis, pulse transfer functions, digital lag, digital lead, and digital PID controller design, closed-loop stability of digital control systems, and introduction to state-variable methods.

ECGR 4115. Convex Optimization and AI Applications. (3) Cross-listed Course(s): ECGR 5115. Prerequisite(s): ECGR 2103 or ECGR 2105 or ITSC 1212 and MATH 2164, or equivalent courses; Junior standing or above, or permission of instructor. Focuses on the theory and the algorithmic

aspects of convex optimization. Topics include: convex sets, convex functions, and convex optimization problems; duality theory and optimality conditions; algorithms for solving convex problems; use of numerical tools to solve problems; and, if time permits, non-convex optimization problems. Also discussed are applications of the materials to engineering topics such as signal processing, control, robotics, machine learning, statistics, and related engineering problems.

ECGR 4116. Artificial Intelligence for Biomedical Applications. (3) Prerequisite(s): ECGR 5116. Cross-listed Course(s): ECGR 4105. Introduction to fundamental concepts of Artificial Intelligence (AI) and its application to biomedical domain. Exposure to pattern recognition, medical image processing, algorithms and machine learning frameworks using Python.

ECGR 4117. AI for Robotics and Automation. (3) Prerequisite(s): ECGR 3101 or ECGR 3111. Cross-listed Course(s): ECGR 5117. The objective of this course is to provide students with a working knowledge of foundational theory, algorithms and design used for creating autonomous robotic systems. The course also provides students an understanding of how foundational algorithms in this area can be translated from a formal algorithmic implementation to a Deep Learning (DL) or Artificial Intelligence (AI) implementation. Credit will not be given for ECGR 4117 where credit has been given for ECGR 5117.

ECGR 4121. Antennas. (3) Prerequisite(s): ECGR 3122 with grade of C or above or permission of department; and Engineering major or minor. Radiation into free space, the point source, thin linear antenna, arrays of linear elements, aperture antennas, impedance, methods of feeding, matching and termination. Antenna systems.

ECGR 4122. Acoustics. (3) Prerequisite(s): ECGR 3111 with grade of C or above; and Engineering major or minor. Vibrations and simple vibrating systems; radiating systems; plane waves of sound, dynamic analogies, microphones and other acoustic transducers; acoustic measurements.

ECGR 4123. Analog and Digital Communication. (3) Prerequisite(s): ECGR 3111 with grade of C or above; and Engineering major or minor. Analysis and transmission of signals, including analog communication systems (amplitude and frequency modulation); digital communications systems (pulse code modulation and data transmission systems).

ECGR 4124. Digital Signal Processing. (3) Prerequisite(s): ECGR 3111 with grade of C or above; and Engineering major or minor. Sampling and signal recovery in linear systems; analysis of sampled systems; discrete and fast Fourier transforms; z-transform; discrete convolution; design of digital FIR and IIR filters.

ECGR 4125. Foundation of Optical Engineering. (3) Prerequisite(s): Either ECGR 3120 or ECGR 3121, and PHYS 3141, with grade of C or above or permission of department; and Engineering major or minor. The engineering aspects and applications of modern optics, optical communications, optical materials, optical devices, basic optical fiber and integrated optics, optical signals, and optical modulation, multiplexing, and related networks, basic Fourier optics and its application in optical images and information. Credit will not be given for ECGR 5125 where credit has been given for ECGR 4125.

ECGR 4127. Machine Learning for the Internet of Things. (3) Prerequisite(s): ECGR 5127. Cross-listed Course(s): ECGR 4105 or ECGR 5105.

Introduces the concepts and skills necessary to design, train, and deploy machine learning models in resource-constrained devices. Topics include: analysis of the computational requirements of machine learning models; requirements of edge-deployed machine learning; techniques to reduce storage, computation, and latency; and software tools available. The concepts are applied through a series of projects.

ECGR 4131. Linear Integrated Electronics. (3) Prerequisite(s): ECGR 3132 with grade of C or above; and Engineering major or minor. Design of linear integrated circuits utilizing bipolar and MOS devices. Application in linear amplifier design, control, and processing of analog signals.

ECGR 4132. Analog Integrated Circuits Design. (3) Prerequisite(s): ECGR 4131 with grade of C or above or permission of department; and Engineering major or minor. Topics include: analog MOS modeling, design of current mirrors, references, and operational amplifiers. Both hand analysis and SPICE simulation utilized.

ECGR 4134. Solid State and Semiconductor Microelectronics II. (3) Prerequisite(s): ECGR 3133 with grade of C or above, or permission of department; and Engineering major or minor. PN-junctions and Schottky junctions; bipolar and field effect transistors; optoelectronic and heterojunction devices; lithography and integrated circuits; microwave devices; light emitting devices and detectors; quantum devices using superlattices; quantum wells and quantum dots; material preparation and characterization; and measurement techniques.

ECGR 4136. Semiconductor Optoelectronic Materials and Devices. (3) Prerequisite(s): ECGR 3133 with grade of C or above, or permission of department; and Engineering major or minor. Direct and indirect bandgap materials; Compound and wide bandgap semiconductors; Electronic properties; Optical properties; Generation and recombination; Junction theory; Light emitting devices; Optical detectors.

ECGR 4138. Electronic Thin Film Materials and Devices. (3) Prerequisite(s): ECGR 3132 or ECGR 3133 with grades of C or above or permission of department; and Engineering major or minor. Applications of thin films in microelectronics/optoelectronics manufacturing processes; vacuum technology, deposition techniques, and the characterization methods relevant to optoelectronic applications; thin film applications such as metallization, silicide formation, light emitting diodes (LED) and lasers, and doping of semiconductors.

ECGR 4141. Power System Analysis I. (3) Prerequisite(s): ECGR 3142 with grade of C or above; and Engineering major or minor. Representation of power system components for analysis studies. Transmission line parameters. Network equations. Load flow analysis and numerical methods.

ECGR 4142. Power System Analysis II. (3) Prerequisite(s): ECGR 4141 with grade of C or above; and Engineering major or minor. Economic operation of power systems. Short circuit studies. Symmetrical components. Transient stability analysis.

ECGR 4143. Electrical Machinery. (3) Prerequisite(s): ECGR 3142 with grade of C or above; and Engineering major or minor. Advanced theory of transformers and rotating machines; harmonic and saturation effects on machine performance. Unbalanced operation and transient conditions.

ECGR 4144. Power Electronics I. (3) Prerequisite(s): ECGR 3131 with grade of C or above; and Engineering major or minor. High power solid state circuits. Topics include: power transfer, DC/DC converters, DC/AC inverters, AC/DC rectifiers, gate-drive circuits for linear and switching amplifiers, pulse-width modulators, power semiconductors, control and converter modeling, renewable energy system integration.

ECGR 4146. Introduction to VHDL. (3) Prerequisite(s): ECGR 2181 with grade of C or above and knowledge of a computer language, or permission of department; and Engineering major or minor. Introduction to VHSIC Hardware Description Language (VHDL) including VHDL-based high-level design of microelectronic systems, VHDL programming, and VHDL synthesis; emphasis on learning and using industry-standard VHDL tools.

ECGR 4151. Solar Cell Fundamentals and Technology. (3) Prerequisite(s): ENGR 1202 "E" sections for Electrical and Computer Engineering students with a grade of C or above; and Engineering major or minor. Principles of operation and basic design features of silicon solar cells. Clean room protocols, processes, and fabrication techniques. Solar cell fabrication, testing, and process modifications to improve performance.

ECGR 4161. Introduction to Robotics. (3) Prerequisite(s): Senior standing and Engineering major or minor. Modeling of industrial robots including homogeneous transformations, kinematics, velocities, static forces, dynamics, computer animation of dynamic models, motion trajectory planning, and introduction to vision, sensors, and actuators.

ECGR 4171. Introduction to Energy Systems. (3) Prerequisite(s): PHYS 2101 and Engineering major or minor. Overview of energy systems: energy types, generation, conversion, storage, transportation/transmission, and utilization. Principles, physical structure, processes, and utilization of fossil fuel, nuclear, and renewables for transportation, thermal, and electrical energy generation are discussed along with associated performance metrics. The course also provides an introduction to environmental impacts of energy production, life-cycle analysis, energy efficiency concepts and metrics, transmission systems, grid reliability, and the impact of smart grid technologies. All topics are presented in the context of industry standards as well as federal and state regulations.

ECGR 4172. Energy Markets. (3) Prerequisite(s): ECGR 4171 and Engineering major or minor. Energy and power systems in regulated and competitive environments and implications on business decisions for firms in these industries. Topics include: mechanism of energy markets; comparative market systems; determination of prices under different market structures; gas, oil, coal, and electricity market architecture; electricity market design; dispatch and new build decisions; smart grid and renewable energy in electricity markets; risk and risk management in energy including demand and price volatility and use of financial derivatives; and the impact of financial market trends and current and proposed policies on the energy industry.

ECGR 4181. Computer Architecture. (3) Prerequisite(s): ECGR 3183 or permission of department; and Engineering major or minor. Latest research and development in the area of computer architecture; multiprocessor architecture, multi-computers, interconnection networks, branch prediction, instruction-level, data-level and thread-level parallelism, and memory hierarchy; high-performance machines and special purpose processors.

ECGR 4182. Digital System Testing. (3) Prerequisite(s): ECGR 2181 and ECGR 3131 with grades of C or above, or permission of department; and Engineering major or minor. Introduction to VLSI testing, test process and automatic test equipment, test economics and product quality, test economics, fault modeling, logic and fault simulation, testability measures, combinational and sequential circuit test generation, memory test, analog test, delay test, IDDQ test, design for testability, built-in self test, boundary scan, analog test bus, system test and core test.

ECGR 4185. Advanced Electromagnetic Field Theory. (3) Prerequisite(s): ECGR 3122 or permission of department; and Engineering major or minor. Maxwell's equations and propagation. Properties of guided and surface waves. Wave properties of light; physical and fiber optics.

ECGR 4186. Optical Communication and Optical Signals. (3) Prerequisite(s): ECGR 4125 or permission of department; and Engineering major or minor. The course covers the fundamentals of modern optical networks, optical systems, and protocols. These include transmission, detection, multiplexing/demultiplexing and related prevailing technology.

ECGR 4187. Data Communications and Networking II. (3) Prerequisite(s): ECGR 3123 or permission of department; and Engineering major or minor. Principles of data communication networks; computer communications network architecture (layering) with emphasis on the network layer, transport layer, and application layer; local area networks; medium access control; routing; data transport; Internet applications.

ECGR 4189. Cloud Native Application Architecture. (3) Prerequisite(s): ECGR 3180. Cross-listed Course(s): ECGR 5189. Comprehensive introduction to architecting modern applications in the cloud that scale to millions of users. The course places equal emphasis on the basic principles of the different components and practices of cloud native architectures, and hands-on experience with industry standard tools.

ECGR 4190. Power Generation: Operation and Control. (3) Prerequisite(s): ECGR 4141 or permission of department; and Engineering major or minor. Characteristics of power generation units, steam, nuclear reactor and hydroelectric. Economic and thermal system dispatch. Transmission losses, load flow problems. Hydro scheduling, hydro-plant models. Energy production cost models. Interchange evaluation.

ECGR 4191. Dynamic and Transient Analysis of Power Systems. (3) Prerequisite(s): ECGR 4142 or permission of department and Engineering major or minor. Large-scale systems state descriptions and hierarchical control. State space models, dynamic stability and testing. Stability of simple and multi-machine systems. Transient phenomena in electrical power systems. Transient stability problem.

ECGR 4231. Sensors and Actuators. (3) Prerequisite(s): ECGR 3121, ECGR 3132, or permission of department; and Engineering major or minor. Fundamentals of sensors and actuators, and their applications in smart machines, industry, metrology, and the environment. Materials for sensors, actuators, electronic and optical sensors, electropoics,

magneto-optics, and fiber optics sensors, microsensors and actuators, sensors and actuators, signal processing and interfaces.

ECGR 4241. Electrical Engineering Senior Design I. (2) Prerequisite(s): ECGR 3111, either ECGR 3130 or ECGR 3131, either ECGR 3120 or ECGR 3121, and ECGR 3157, all with grades of C or above, or permission of department; Senior standing; Electrical Engineering major. A project-oriented course stressing the planning and design of experiments to support the student's project. Formation of the design problem and specification. Credit will not be given for ECGR 4241 where credit has been given for ECGR 4251.

ECGR 4242. Electrical Engineering Senior Design II. (2) Prerequisite(s): ECGR 4241 and Engineering major or minor. A continuation of ECGR 4241 consisting of project development and analysis, culminating in written and oral presentations. Credit will not be given for ECGR 4242 where credit has been given for ECGR 4252.

ECGR 4251. Computer Engineering Senior Design I. (2) Prerequisite(s): ECGR 3111, either ECGR 3130 or ECGR 3131, ECGR 3101, and ECGR 3157, all with grades of C or above, or permission of department; Senior standing; Computer Engineering major. A project-oriented course stressing the planning and design of experiments to support the student's project. Formation of the design problem and specification. Credit will not be given for ECGR 4251 where credit has been given for ECGR 4241.

ECGR 4252. Computer Engineering Senior Design II. (2) Prerequisite(s): ECGR 4251 and Engineering major or minor. A continuation of ECGR 4251 consisting of project development and analysis, culminating in written and oral presentations. Credit will not be given for ECGR 4252 where credit has been given for ECGR 4242.

ECGR 4261. Microwave Circuit Design I. (3) Prerequisite(s): ECGR 3122 or permission of department; and Engineering major or minor. Design and analysis of microwave devices and circuits; Telegrapher's and wave equations; physical transmission lines; circuit analysis techniques; impedance matching techniques; and Wilkinson power dividers, hybrid couplers, transformers, and filters.

ECGR 4265. Microwave Devices and Electronics. (3) Prerequisite(s): ECGR 3122 and PHYS 2102 with grades of C or above or permission of department; and Engineering major or minor. Microwave transmission line theory, parameters, microwave waveguides, microstrip line and components including resonators, slow-wave structures, tees, rings, couplers, circulators, isolators, and microwave tubes. Microwave solid state electronics, including microwave transistors, tunnel diodes, transferred electron devices, avalanche transit-time devices, and monolattice microwave integrated circuits.

ECGR 4290. Science and Technology of Photovoltaics. (3) Prerequisite(s): ECGR 3133 with grade of C or above, or permission of the department; and Engineering major or minor. Review of semiconductor properties; junctions and operating principles of solar cells; efficiency limits and losses in solar cells; solar cells and sunlight; fabrication of solar cell and modules; design of high efficiency silicon solar cells; heterojunction, thin film, and other promising solar cells; and photovoltaic systems and applications.

ECGR 4311. Digital Audio Workstations. (3) Prerequisite(s): ECGR 3111 and ECGR 3131. Students learn to use Digital Audio Workstation (DAW) software for music and other audio data. Topics include: recording and importing audio and MIDI data, basic editing and mixing, effects processing, and mastering. Some audio hardware concepts are also introduced, including compression, equalization, microphones, mixers, and studio monitors.

ECGR 4312. Electronic Music Synthesis. (3) Prerequisite(s): ECGR 3131; and ECGR 4123 or ECGR 4124. The basics of electronic music synthesis using both software and hardware, analog and digital controllers, voltage controlled oscillators (VCO), envelope generators, voltage controlled filters (VCFs), and low frequency oscillators (LFOs). A variety of techniques are covered, including modular, subtractive, and additive synthesis, and effects such as tremolo and vibrato.

ECGR 4333. VLSI Systems Design. (3) Prerequisite(s): ECGR 2181 and either ECGR 3130 or ECGR 3131, both with grades of C or above, or permission of department; and Engineering major or minor. Analysis, design, and synthesis of very large scale integrated circuits. A project-oriented course relying heavily on computer-aided design tools for logic, layout design, and simulation.

ECGR 4422. Random Processes and Optimum Filtering. (3) Prerequisite(s): ECGR 3111 and STAT 3128 or permission of department; and Engineering major or minor. Review of probability, univariate and multivariate distribution functions; random processes, discrete and continuous time processes, widensense stationary, ergodicity; time- and frequency-domain analysis; linear systems, optimum filtering, Wiener filters, Kalman filters; application.

ECGR 4892. Individualized Study. (1 to 6) Prerequisite(s): Engineering major or minor. Individual investigation and exposition of results. *May be repeated for credit.*

Economics (ECON)

ECON 1101. Economics of Social Issues. (3) Economic issues without emphasis on theoretical models. Contemporary economic issues such as pollution control, healthcare, unemployment, and crime are studied. A student is ineligible to take this course if credit has already been received for either ECON 2101 or ECON 2102.

ECON 1501. Global Social Science: Economics of Global Issues. (3) All Global Theme courses explore the central, unifying question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe students will be able to better understand themselves as part of a complex, interconnected world. This course is a survey of relevant interdisciplinary economic issues and policy involving real-world applications. Contemporary economic issues covered may include international trade, growth and economic development, recession, world poverty, discrimination, unemployment, financial security, government macroeconomic policies. A student is ineligible to take this course if credit has already been received for either ECON 2101 or ECON 2102.

ECON 2101. Principles of Economics - Macro. (3) Prerequisite(s): Sophomore, Junior, or Senior standing. Scope and methodology of economics as a social science, the measurement of national income, the

theory of national income determination, money and banking, monetary and fiscal policy, and international economics.

ECON 2102. Principles of Economics - Micro. (3) Prerequisite(s): Sophomore, Junior, or Senior standing. Pricing mechanism of a market economy, the industrial organization of the U.S. economy, problems of economic concentration, the theory of income distribution, and comparative economic systems.

ECON 3090. Topics in Economics. (3) Prerequisite(s): Permission of department. Topics from the areas of economic theory, economic development, consumer economics, welfare economics, and current economic problems. *May be repeated for credit.*

ECON 3112. Econometrics. (3) Prerequisite(s): ECON 2101 and ECON 2102; MATH 1120 or MATH 1241; STAT 1220; and INFO 2130; all with grades of C or above. Econometric techniques, including simple and multiple least squares regression with problems and analyses.

ECON 3115. Money and Banking. (3) Prerequisite(s): ECON 2101 and ECON 2102; MATH 1120 or MATH 1241; and STAT 1220 or equivalent; all with grades of C or above. Basic economic theory is used to understand how financial markets, the monetary system, banks, and financial institutions work. There is a specific focus on the basic economic purpose of these institutions, how they interact with households and firms, and how economic policy interacts with these institutions.

ECON 3122. Intermediate Microeconomics. (3) Prerequisite(s): ECON 2101; ECON 2102; MATH 1120 or MATH 1241; and STAT 1220 or equivalent; all with grades of C or above. Microeconomic analysis with emphasis on consumer theory and the theory of production. Resource allocation and the determination of optimum output and pricing by a firm operating under various market structures. Distribution and welfare theories.

ECON 3123. Intermediate Macroeconomics. (3) Prerequisite(s): ECON 2101; ECON 2102; MATH 1120 or MATH 1241; and STAT 1220 or equivalent; all with grades of C or above. Macroeconomics studies the evolution of the aggregate economy. At the intermediate level the focus is on how the interaction of individual, household, and firm decisions add up to aggregate macroeconomic statistics, such as GDP (both level and growth), aggregate employment and unemployment, or aggregate inflation. Macroeconomic data as well as related theoretical models are analyzed. Predictions of these theoretical models are used to study policy decisions such as interest rate policy by central banks and tax/transfer policy by fiscal authorities.

ECON 3125. Managerial Economics. (3) Prerequisite(s): ECON 2102; MATH 1120 or MATH 1241; STAT 1220 or equivalent; and INFO 2130; all with grades of C or above. Economic decisions of particular interest to business firms (e.g., demand theory and forecasting, cost analysis, and pricing policies).

ECON 3151. Law and Economics. (3) Prerequisite(s): ECON 2102 with grade of C or above. The application of microeconomic concepts to the law with an emphasis on examining the impact of laws on resource use, with the goal of using resources efficiently. The emphasis is on property, contract, tort, and criminal law.

ECON 3171. International Business Economics. (3) Prerequisite(s): ECON 2101 and ECON 2102 with grades of C or above. Survey of international trade and international monetary theory including determination of international trade patterns, welfare implications of international trade and trade restrictions, economic integration, exchange rate determination, and the balance of payments. Credit will not be given for ECON 3171 where credit has already been given for ECON 4171 or ECON 4172.

ECON 3181. Sports Economics. (3) Prerequisite(s): ECON 2101 and ECON 2102 with grades of C or above, and Junior or Senior standing. Application of economic principles to professional and amateur sports. Topics include: league structure, team decision-making, labor relations, incentive structures, college athletics, and stadium financing.

ECON 3400. Economic Internship. (3) Prerequisite(s): Junior or Senior standing; and Economics major or minor in good standing. Provides a meaningful work experience in the field of economics. Requires a minimum of 150 hours of supervised employment, 50 hours of work per credit hour. Student is responsible for securing internship and completing internship application and approval process prior to registering for the course. Internship must be approved by instructor. Application process and course registration must be completed prior to beginning internship. All proposals are subject to departmental approval. Students may not earn internship credit for work at a current employer. May be used to meet requirements of a major or minor elective, up to a maximum of three credit hours. Cannot be taken for credit at the same time or following any other internship for credit. *Graded on a Pass/No Credit basis.*

ECON 3500. Economics Cooperative Education Experience. (0) Prerequisite(s): Economics major. Enrollment in this course is required for the department's Cooperative Education students during each semester they are working in the position. Participating students pay a course registration fee for transcript notation. Assignments must be arranged and approved in advance. The Cooperative Education Program is only open to undergraduate students; graduate level students are encouraged to contact their academic departments to inquire about academic or industrial internship options for credit. For more information, contact the University Career Center. *May be repeated. Graded on a Satisfactory/Unsatisfactory basis.*

ECON 3895. Directed Individual Study. (1 to 3) Prerequisite(s): Permission of instructor and the department. Independent study of a theoretical and/or a policy problem in a special area of economics. Students may pursue a particular program in depth. Topics of the investigation may originate from the student or from the faculty member supervising the study. *May be repeated for credit.*

ECON 4100. Mathematical Economics. (3) Prerequisite(s): ECON 2101 and ECON 2102; and MATH 1120 or MATH 1241; all with grades of C or above. Both microeconomic and macroeconomic problems are analyzed with quantitative techniques. Emphasis is given to the study of methods for mathematically formulating economic relationships including the tools used for finding maximums, minimums, and limits to single, recursive, and simultaneous economic relationships.

ECON 4106. Labor Economics. (3) Prerequisite(s): ECON 2101 and ECON 2102; MATH 1120 or MATH 1241; and STAT 1220 or equivalent. Cross-listed Course(s): ECON 5106. Economics of labor markets with

emphasis on wage and employment theory, collective bargaining, and human capital theory. Historical and legal forces affecting labor markets.

ECON 4112. Econometrics II. (3) Prerequisite(s): ECON 2101, ECON 2102, and ECON 3112; INFO 2130; MATH 1120 or MATH 1241; and STAT 1220 or equivalent; all with grades of C or above; or permission of instructor. Investigates advanced data analysis techniques commonly used by economists, focusing on applications, understanding the strengths and limitations of the methods involved, using statistical and econometric software, and interpreting results. Techniques covered include, but are not limited to, models for dependent variables that are binary in nature, estimation of nonlinear relationships, analysis of panel data (pooled cross-sectional and time series data), and consequences of violation of the classical linear regression model assumptions.

ECON 4116. Public Finance. (3) Prerequisite(s): ECON 2101, ECON 2102, and ECON 3122; MATH 1120 or MATH 1241; and STAT 1220 or equivalent; all with grades of C or above. Revenue and expenditure problems of governmental units, intergovernmental financial relationships and the impact of federal fiscal policy upon the American economy.

ECON 4117. Business and Economic Forecasting. (3) Prerequisite(s): ECON 2101, ECON 2102, and ECON 3112; INFO 2130; MATH 1120 or MATH 1241; and STAT 1220 or equivalent; all with grades of C or above; or permission of instructor. Analysis of fluctuations in economic activity, including production, employment, prices and industry sales. Topics include: forecasting methods, business cycle theories, historical record, industry and sales forecasting.

ECON 4135. Economics of Growth and Development. (3) Prerequisite(s): ECON 2101 and ECON 2102; MATH 1120 or MATH 1241; STAT 1220 or equivalent; all with grades of C or above. Theories of economic growth and development applied to varying economic and social systems. Emphasis on current theoretical models of technological innovation and growth.

ECON 4141. Health Economics. (3) Prerequisite(s): ECON 2101 and ECON 2102; MATH 1120 or MATH 1241; and STAT 1220 or equivalent; all with grades of C or above. Cross-listed Course(s): ECON 5141. The application of microeconomic concepts to markets for health/medical care, including issues such as healthcare delivery, financing, regulation, and costs.

ECON 4150. Urban and Regional Economics. (3) Prerequisite(s): ECON 2101 and ECON 2102; MATH 1120 or MATH 1241; STAT 1220 or equivalent; all with grades of C or above. Spatial and economic organization of cities and regional areas and their special economic problems. Topics include: economic growth, urban location and land use, poverty, housing, public finance, and urban transportation.

ECON 4161. Game Theory. (3) Prerequisite(s): ECON 2101 and ECON 2102; MATH 1120 or MATH 1241; and STAT 1220 or equivalent; all with grades of C or above; or permission of instructor. First course in game theory. The beginning of the course focuses on developing the techniques necessary to solve games. In the latter part of the course, game theoretic analysis is applied to a variety of topics, including, but not limited to, principal agent problems, auctions, and voting. Students see how the tools developed early in the course can be applied to a vast array of problems in economics and related disciplines.

ECON 4171. Economics of International Trade. (3) Prerequisite(s): ECON 2101 and ECON 2102; ECON 3122 or ECON 3171; MATH 1120 or MATH 1241; STAT 1220 or equivalent; all with grades of C or above. Theory of international trade, including determination of international trade patterns, welfare implications of international trade, economic integration, and effects of tariffs and quotas.

ECON 4172. Economics of International Finance. (3) Prerequisite(s): ECON 2101 and ECON 2102; ECON 3123 or ECON 3171; MATH 1120 or MATH 1241; STAT 1220 or equivalent; all with grades of C or above. Survey of international monetary theory. Topics include: exchange rate determination, balance of payments and adjustment, international liquidity, capital movements, international financial organizations, and monetary reform proposals.

ECON 4177. History of Economic Thought. (3) Prerequisite(s): ECON 3122 and ECON 3123 with grades of C or above (one of the two courses may be taken as a corequisite). History of economics as a science and the evolution of theories of value, distribution and employment. Review of the works of Adam Smith, Thomas Malthus, David Ricardo, Karl Marx, Alfred Marshall, Thorstein Veblen, and John Maynard Keynes.

ECON 4180. Industrial Organization and Public Policy. (3) Prerequisite(s): ECON 2102 and ECON 3122; MATH 1120 or MATH 1241; and STAT 1220 or equivalent; all with grades of C or above. An examination of monopolistic competition, oligopoly, and monopoly and questions of public policy in dealing with problems created by industrial concentration.

ECON 4181. Energy and Environmental Economics. (3) Prerequisite(s): ECON 2102 with grade of C or above. Economic issues of both energy and environment. Energy issues include the historical development of energy resources, supply and demand considerations and projections of the future energy balance. Environmental issues are externalities, common property resources, and government regulation. Policy considerations include environmental standards, pollution charges, and property rights. Cost-benefit analysis and microeconomic theory are applied.

ECON 4200. Senior Seminar. (3) Prerequisite(s): ECON 3112, ECON 3122, and ECON 3123, all with grades of C or above; Economics major; and Senior standing. An integrative capstone course for the Economics major that should normally be taken during the student's last semester of study. The primary objective is to provide a framework in which Senior Economics majors can review and solidify their understanding of economic concepts by applying those concepts to specific economic issues. Topics vary. Analytical ability and written and oral communication skills are assessed.

Education (EDUC)

EDUC 1000. Introductory Topics in Education. (1 to 6) May include classroom and/or clinical experiences related to schooling, teaching, learning, educational policy, and/or curriculum. *May be repeated for credit with change of topic and permission of department.*

EDUC 1100. Foundations of Education and Diversity in Schools - Prospect Curriculum. (4) For Freshmen students interested in the field of education and the teaching professions. Provides a foundational

introduction to education including the social, historical, and philosophical foundations, the organization and various levels of schools, and major issues in American education. 12 hours of field-based activities in school and non-classroom settings are required. Includes the University Prospect for Success engagement curriculum. Students who have earned credit for EDUC 1511 may not take EDUC 1100.

EDUC 1511. Local Social Science: Public Education and Schooling in the U.S. (3 to 4) All Local Theme courses explore the central, unifying question of what it means to be a member of the “local” community in which we live. Through the study of the experiences of different peoples, cultures, and communities in our city, our region, or our nation students will be able to better understand themselves in the context of the complex and diverse society in which we live. As education impacts us all and schools are sites of opportunity, change, and even controversy, this class will explore major interdisciplinary issues of education in America including social, historical and philosophical ideas pertaining to education. This class is designed for any student seeking to explore PreK-12 education and will include experiential opportunities to learn more about schools and advocacy opportunities for education as a change agent within society. *May not be taken for credit and for a grade if credit has been received for EDUC 2100.*

EDUC 2100. Foundations of Education and Diversity in Schools. (3) For students interested in the field of education and the teaching professions. An introduction to education, including the social, historical, and philosophical foundations, the organization and various levels of schools, and major issues in American education. 12 hours of field-based activities in observing in school and non-classroom settings are required. Students who have earned credit for EDUC 1100 may not take EDUC 2100. *May not be taken for credit and for a grade if credit has been received for EDUC 1511.*

EDUC 3200. Service Learning Teaching Methods for K-12 Educators. (3) In-depth service learning opportunities for students who will become public school educators. Definitions of community service, volunteerism, democratic education, service-learning pedagogy, community partnership, and leadership are examined.

EDUC 3400. Education Internship. (0) Prerequisite(s): A 2.5 GPA and approval by the College internship coordinator. Enrollment in this course is required for students involved in professional work experiences offered through the College of Education internship program. Assignments must be arranged and approved in advance. *May be repeated for credit. Graded on a Satisfactory/Unsatisfactory basis.* Only open to undergraduate students; graduate level students are encouraged to contact their academic departments to inquire about academic or industrial internship options for credit. For more information, contact the Office of Teacher Education Advising and Licensure (TEAL) in the College of Education.

EDUC 3500. Education Cooperative Education Experience. (0) Prerequisite(s): A 2.5 GPA and approval by the College internship coordinator in conjunction with the University Career Center. Enrollment in this course is required for students involved in professional work experiences offered through the cooperative education program. Participating students pay a course registration fee for transcript notation. Assignments must be arranged and approved in advance. The Cooperative Education Program is only open to undergraduate students; graduate level students are encouraged to contact their academic departments to inquire about academic or industrial internship options

for credit. For more information, contact the University Career Center. *Course may be repeated. Graded on a Satisfactory/Unsatisfactory basis.*

EDUC 3600. Teaching Fellows Seminar. (1) Prerequisite(s): Membership in good standing in the North Carolina Teaching Fellows Program. A discussion-oriented course in contemporary school issues led by the program's director to cover Teaching Fellows Program expectations and prepare students to participate in required school, community, campus, and other enrichment activities. *May be repeated for credit.*

EDUC 3601. Mebane Early Literacy Scholar Seminar. (1) Prerequisite(s): To enroll in this course, students must be participating in the Mebane Early Literacy Scholars Program. The goal of the Mebane Early Literacy Scholars Professional Learning Community is to build Scholars' knowledge and skill in the area of early and elementary literacy education. Scholars gain hands-on experiences beyond their regular coursework through participating in enhanced clinical training and practice, and in instructional mentoring experiences. They engage in schools and the community, and in planning and organizing community- and family-engagement events focused on early literacy education. *May be repeated for credit up to 4 credit hours.*

EDUC 3789. Seminar: Honors in Education. (3) Prerequisite(s): Admission to the Honors in Education program. Prepares Honors students for a successful Honors project by introducing them to the Honors in Education program and by helping them identify an appropriate committee chair and reader. Also covers guidelines for preparing an Honors project, including appropriate designs and themes. Culminates in the presentation and defense of an acceptable Honors project proposal.

EDUC 3790. Honors Thesis in Education. (3) Prerequisite(s): EDUC 3789 with grade of C or above; and approval of a proposal through the Honors College Application to Candidacy process the semester prior to taking the course. Honors students conduct their research and data analysis, and they write and defend their thesis before their honors committee. A grade of A is required for honors recognition from UNC Charlotte. The thesis must be approved and substantially completed (only minor editorial revisions may remain) prior to the student teaching seminar.

EDUC 4000. Topics in Education. (1 to 6) Prerequisite(s): Admission to a Teacher Education program, major, or minor. May include classroom and/or clinical experiences in the content area. *May be repeated for credit with change of topics and permission of department.*

EDUC 4100. Considerations for an Inclusive Society. (3) Prerequisite(s): Admission to the Inclusion, Disability, and Exceptionality in American Society Minor or the Collaborative Educators in Inclusive Schools Minor. Pre- or Corequisite(s): SPED 2100. Introduces societal considerations when supporting individuals who differ from the mainstream including those with a disability or who are English learners. Focuses on the theoretical questions of how society predominantly understands and interacts with differing populations and the implications of these viewpoints and practices. Examines social, cultural, political, and economic determinants within society. Discusses the history, values, and assumptions about varied individuals in society with an examination of the relationship between disability, ethnicity and language, and social class with social change and equitable access to opportunity.

EDUC 4200. Current Issues in Global Education. (3) Prerequisite(s): Completion of Phases I and II of the Minor in Applied Understandings in Global Education: EDUC 1100 or EDUC 1511; INTL 1501; INTL 2100, INTL 2121, or INTL 2131. Students demonstrate an understanding of global issues that impact local teaching and learning ideals. The course is reading and writing intensive, as students are required to reflect on and analyze instruction for diverse learners using a variety of flexible and adaptable instructional methods appropriate for learning in a globalized educational context. Focuses on issues that students may choose to explore in depth during their study abroad/local experience and through the capstone course of the Minor in Applied Understandings in Global Education.

EDUC 4201. Education and Globalization: Theory and Practice Seminar. (3) Prerequisite(s): Completion of Phases I and II of the Minor in Applied Understandings in Global Education: EDUC 1100 or EDUC 1511; INTL 1501; INTL 2100, INTL 2121, or INTL 2131. Pre- or corequisite: EDUC 4200. Students showcase global issues that impact local teaching and learning ideals researched in EDUC 4200 and address action steps toward potential solutions. The course is writing and public speaking intensive, as the seminar prepares candidates to develop a presentation and present it before an audience of faculty, community members, and students. The purpose of the showcase is for candidates to disseminate knowledge gained during their in-depth exploration on a topic related to learning in a globalized educational context (initiated in EDUC 4200 and further explored during their study abroad/local experience). The aim of the showcase presentation is to educate and inform the audience and begin to advocate for global education.

EDUC 4290. Inclusion of Students with Varied Learning Needs. (3) Prerequisite(s): Admission to Teacher Education. Corequisite(s): enrollment in methods course(s) with field experience requirement. Strategies for promoting a positive learning environment using universal evidence-based practices designed to increase access to general education and standard instruction for all students, including students at risk for school failure, individuals from varied cultural and linguistic backgrounds, learners identified as gifted, and students with disabilities.

EDUC 4291. Modifying Instruction for Learners with Diverse Needs in Secondary Schools. (3) Prerequisites for Secondary Education Minors: MDSK 2100, MDSK 3151, and SECD 4140. Corequisites for Secondary Education Minors: READ 3255 and one of the following: MDSK 4251, MDSK 4253, ENGL 4254, or MAED 4252. Strategies for adapting standard instruction to meet the learning needs of all members of secondary classrooms, including students at risk for school failure, individuals from culturally and linguistically diverse backgrounds, gifted learners, and students with disabilities.

EDUC 4292. Collaborative Inclusive Co-Planning and Co-Teaching. (3) Prerequisite(s): EDUC 4100, and EDUC 4290; Admission to the Collaborative Educators in Inclusive Schools Minor. The course is designed to provide opportunities for students to develop knowledge and skills of effective collaborative behaviors and language; review and practice collaborative co-teaching lesson plans previously completed in EDUC 4290; and build effective partnerships among professionals (e.g., teachers, paraprofessionals, related service personnel, and/or human service personnel) working with PreK-12 individuals with exceptionalities and multilingual learners in inclusive learning environments. The knowledge base acquired in this course includes the practice of effective

communication skills, and understanding the influence of cultural diversity when engaging in co-teaching and teaming in working with students with disabilities and multilingual learners. Students will be engaged in continuous reflective activities throughout the course which will enable them to self-assess and make improvements in their knowledge and skills learned in this course. Students enrolled in this course will complete a minimum of 15 to 25 clinical field experiences in a school and/or agency site. (*Spring only*)

EDUC 4293. Universal Design: Considerations for Technology and Society. (3) Prerequisite(s): EDUC 4100; Admission to the Inclusion, Disability, and Exceptionality Minor. Pre- or Corequisite(s): SPED 2100. Introduces the theory and practice of Universal Design (UD) including inclusive design principles for developing accessible technology. Students will consider accessibility in physical environments, communication (including assistive technologies), and common use technology, with targeted content regarding artificial intelligence (AI) and its use and impact for all individuals, including those with a disability. Students will consider laws and legislation that support UD as well as policies regarding privacy and reflect on the implications of UD within their field of study.

Education – Learning, Design, and Technology (ELDT)

ELDT 4100. Foundations for Effective Technology Integration. (3) Instructional methods and technological tools for innovative and effective teaching and learning. Hybrid and online delivery methods will be explored. Other significant topics include models of technology integration and lesson planning, tools for instruction and communication, building professional learning networks, and leveraging technology to meet the needs of all learners.

ELDT 4135. Audiovisual Communications. (3) Prerequisite(s): Junior or Senior standing or departmental approval. Overview of traditional and emerging audiovisual media for education, training, marketing, and public relations, emphasizing knowledge and skills for evaluating, designing, producing, and using media such as photography, television, displays, interactive video, and microcomputers to enhance communication.

ELDT 4140. Educational Television. (3) Prerequisite(s): Junior or Senior standing or departmental approval. An examination of traditional and emerging applications of telecommunications media for teaching, training and informing. Investigation of published research and current strategies for evaluating the social and educational impact of television. Students will evaluate, design, produce, and utilize telecommunications media in micro-teaching settings for the enhancement of communication in their respective disciplines.

Elementary Education (ELED)

ELED 3111. Instructional Design and Assessment in Elementary Education. (3) Prerequisite(s): Admission to Elementary Education Program. The study of the development of curriculum and instructional design with a focus on developing teaching techniques to increase student performance. Candidates are introduced to standards and resources of elementary school curriculum and assessment, and they create, implement, and assess instructional segments developed using curriculum standards and student performance.

ELED 3120. The Elementary School Child. (3) Prerequisite(s): Admission to Teacher Education. Child development theories and research findings, conceptual relationships between education and developmental paradigms, pathways of individual student development, child-centered and other types of educational reforms, the concept of developmental "needs" and the roles and responsibilities of school staff for meeting children's developmental needs. Includes approximately 10 hours of field activities.

ELED 3221. Teaching Science to Elementary School Learners. (3) Prerequisite(s): Admission to Teacher Education. Teaching strategies and materials appropriate for teaching inquiry science in grades K-6 with emphasis on using science process skills and content to develop effective science learning experiences for elementary school children. Includes 10 hours of field experiences.

ELED 3223. Teaching Social Studies to Elementary Learners. (3) Prerequisite(s): Admission to Teacher Education. Instructional methods for teaching and integrating social studies, economics, history, civics, and geography in elementary schools. Focuses on problem-solving, critical thinking, and democratic citizenship with strategies to develop and differentiate effective instructional plans for elementary school children.

ELED 3226. Teaching Language Arts to Elementary School Learners. (3) Prerequisite(s): Admission to Teacher Education. Teaching of language arts in grades K-6, including how the study of language acquisition and growth informs and guides instructional practice. Emphasis on methods for fostering growth in speaking, listening, writing, and reading across the curriculum. Includes 10 hours of field experiences.

ELED 3800. Individual Study in Elementary Education. (1 to 6) Prerequisite(s): Permission of the student's advisor. Independent study under the supervision of an appropriate faculty member. *May be repeated for credit.*

ELED 4121. Assessment and Instructional Differentiation in the Elementary School Classroom. (3) Prerequisite(s): Admission to Teacher Education. Addresses advanced concepts for planning for K-6 classroom measurement and evaluation and the development and use of various types of classroom assessment. Emphasis is placed on using the results of assessment to modify instruction, as well as the incorporation of best practices in differentiated instruction. Also explores concepts and skills related to communicating student progress and various forms of technology useful for assessing student progress.

ELED 4122. Creating an Effective Environment in the Elementary School Classroom. (3) Prerequisite(s): Admission to Teacher Education. Presents research-based concepts, methods, and practices used by effective teachers in the elementary school classroom. There is an emphasis on best practices of effective classroom management and how to establish a productive classroom climate. Candidates explore methods for increasing student motivation in diverse classroom settings, building positive student-teacher relationships, proactively managing student behavior, and establishing effective parent and community partnerships.

ELED 4220. Instructional Planning for Elementary Learners. (3) Prerequisite(s): Admission to Teacher Education. Curriculum planning and development with an emphasis on designing and implementing cross-curricular activities within the elementary classroom setting. Explores research-based practices of a variety of teaching strategies and pedagogies to meet the instructional needs of all learners.

ELED 4255. CAMMP: Computer Applications and Manipulative Mathematics Programs. (3) Prerequisite(s): Admission to Teacher Education and permission of instructor. Examination of constructivism in K-8 mathematics teaching, with emphasis on concrete, representational and symbolic manipulatives; developmentally appropriate computer software.

ELED 3292. Theories and Practice in Urban Education. (3) Prerequisite(s): Admission to Elementary Education Program and completion of all ELED coursework except 4000-level courses. Designed to increase student awareness, knowledge, and understanding of core concepts associated with urban educational settings. Participants are introduced to the educational models, theories, and practices necessary to support learners within these contexts.

ELED 4420. Student Teaching/Seminar: K-6 Elementary Education. (15) Prerequisite(s): Student teaching is a planned sequence of experiences in the student's area of specialization conducted in an approved school setting under the supervision and coordination of a university supervisor and a clinical educator. During student teaching, the student must demonstrate the competencies identified for their specific teaching field in an appropriate grade level setting. The student is assigned 15 weeks in a school setting. Includes seminars. Participating students pay a course registration fee for edTPA portfolio assessment. *Graded on a Pass/No Credit basis.*

Electrical Engineering Technology (ELET)

ELET 1102. C Programming. (3) Prerequisite(s): Engineering major or minor. An introduction to the C programming language with an emphasis on applications in Electrical Engineering Technology.

ELET 1211. DC Circuits. (3) Pre- or Corequisite(s): MATH 1103. An introduction to electric circuits with an emphasis on DC circuit analysis and design. Topics include: fundamental electrical and magnetic principles, circuit analysis laws and theorems, and component characteristics and behaviors..

ELET 1231. Digital Circuits. (3) Corequisite(s): ELET 1231L. Fundamental digital concepts including number systems, logic gates,

Boolean algebra, Karnaugh Maps, and combinational logic. Topics include: combinational digital circuit design and analysis, minimization methods, and hardware descriptor languages such as VHDL.

ELET 1231L. Digital Circuits Laboratory. (1) Prerequisite(s): Engineering major or minor. Corequisite(s): ELET 1231. This laboratory course supports concepts and practices covered in ELET 1231. Meets for three (3) laboratory hours per week.

ELET 2112. AC Circuits. (3) Prerequisite(s): ELET 1211 with grade of C or above. Corequisite(s): ELET 2112L. The continuation of an introduction to electric circuits with an emphasis on AC circuit analysis and design. Topics include: application of electrical and magnetic principles, analysis laws and theorems in AC circuits, an introduction to frequency response and circuit behaviors under AC excitation.

ELET 2112L. AC Circuits Laboratory. (1) Prerequisite(s): Engineering major or minor. Corequisite(s): ELET 2112. This laboratory course supports concepts and practices covered in ELET 2112. Meets for three (3) laboratory hours per week.

ELET 2113L. DC/AC Circuits Laboratory. (1) Prerequisite(s): ELET 1211 or AAS transfer course. Corequisite(s): ELET 2112. This laboratory course supports concepts and practices covered in ELET 1211 and ELET 2112.

ELET 2221. Electronics I. (3) Prerequisite(s): ELET 2112; and Engineering major or minor. Corequisite(s): ELET 2221L. An introduction to semiconductor electronic devices and circuits. Topics include: semiconductor diodes, bipolar junction transistors (BJTs), field-effect transistors (FETs), ideal operational amplifiers and the application of these solid state devices in basic circuits and systems.

ELET 2221L. Electronics I Laboratory. (1) Prerequisite(s): Engineering major or minor. Corequisite(s): ELET 2221. This laboratory course supports concepts and practices covered in ELET 2221. Meets for three (3) laboratory hours per week.

ELET 2231. Microprocessor Fundamentals. (3) Prerequisite(s): ELET 1231, and Engineering major or minor. Corequisite(s): ELET 1102. Application and design assembly and C language programming for AVR microprocessors. Topics include: system timing, bus cycles, interrupts, stacks and subroutines. Upon completion, students should be able to design, program, verify, analyze, and troubleshoot AVR assembly and C language programs.

ELET 2241. Instrumentation and Controls. (3) Prerequisite(s): ETGR 2106 or ETEM 2101; and Engineering major or minor. Corequisite(s): ELET 2241L. An introduction to instrumentation for measurement and control of physical variables, with an emphasis on electronic systems. Topics include: a review of basic circuit analysis, electrical instruments, sensors and measurement principles and a survey of automatic controls from a systems point of view.

ELET 2241L. Instrumentation Laboratory. (1) Prerequisite(s): Engineering major or minor. Corequisite(s): ELET 2241. This laboratory course supports concepts and practices covered in ELET 2241.

ELET 2290. Sophomore Practicum. (3) Prerequisite(s): ELET 1231, ETGR 1101, and Engineering major or minor. Pre- or Corequisite(s): ELET 2221. Introduction to the design process and project management

techniques with an emphasis on Engineering Technology applications. Projects are completed individually and provide reinforcement of the design process introduced in ETGR 1101, along with an introduction to project management techniques and technical communication in written and oral formats. Laboratory prototypes are developed and tested. Selected project(s) require a formal presentation.

ELET 3113. Network Analysis. (3) Prerequisite(s): ELET 2112, and Engineering major or minor. Pre- or Corequisite(s): ETGR 2272 or MATH 1242. An introduction to frequency domain analysis through Laplace Transforms and Fourier Analysis. Topics include: a review of circuit analysis fundamentals in the time domain, circuit transformations, waveform analysis and synthesis and first order natural and forced response with extensive utilization of circuit simulation software.

ELET 3132. Digital Systems. (3) Prerequisite(s): ELET 1231, and Engineering major or minor. The design and implementation of digital systems. Topics include: combinational and sequential digital circuits, minimization methods, state machine design and state assignment techniques, hardware descriptor languages such as VHDL, circuit implementation using MSI integrated circuits and programmable logic devices.

ELET 3132L. Digital Systems Laboratory. (1) Prerequisite(s): ELET 1231, and Engineering major or minor. Pre- or Corequisite(s): ELET 3132. This laboratory course supports concepts and practices covered in ELET 3132. Meets for three (3) laboratory hours per week.

ELET 3141. Power Systems and Machines. (3) Prerequisite(s): ELET 2112, and Engineering major or minor. An introduction to electromagnetic fundamentals, power generation and distribution, AC and DC machines.

ELET 3190. Junior Practicum. (3) Prerequisite(s): ELET 2231, ELET 2290, or AAS transfer course. Focused on an open-ended, but defined, project that is completed in a team environment. Introduces, or reinforces, group project dynamics, a formal design process, project management, information dissemination in both written and oral forms; as well as project analysis, modeling, fabrication and demonstration. Provides the foundation for tools necessary to develop and implement a capstone project in Senior Design I and Senior Design II.

ELET 3222. Electronics II. (3) Prerequisite(s): ELET 2221, and Engineering major or minor. A continuation of the study of solid state devices begun in ELET 2221. Topics include: frequency response of single and multistage amplifiers, feedback and stability, linear and nonlinear operational amplifier circuits, and CMOS and BiCMOS circuits with extensive utilization of circuit simulation software.

ELET 3222L. Electronics II Laboratory. (1) Prerequisite(s): ELET 2221, and Engineering major or minor. Pre- or Corequisite(s): ELET 3222. This laboratory course supports concepts and practices covered in ELET 3222.

ELET 3232. Advanced Microcontroller Systems. (3) Prerequisite(s): ELET 1102; ELET 2231; and Engineering major or minor. The application and design of ARM (Advanced RISC Machine) systems. Topics include: assembly and C language programming and an introduction to the control and interfacing of ARM based systems. Upon completion, students should be able to design, construct, program, verify, analyze

and troubleshoot ARM assembly and C language programs and supporting hardware.

ELET 3242. Fundamentals of Control Systems. (3) Prerequisite(s): ELET 3113, and Engineering major or minor. Automatic control systems concepts, system modeling, control system components, state space model, transfer function model, time responses, poles and zeros, closed loop, reduction of multiple subsystems, stability analysis, Routh-Hurwitz, performance analysis, design techniques, root locus, Bode, Nyquist, PID, and MATLAB control tool box.

ELET 4123. Active Filters. (3) Cross-listed Course(s): ENER 5123. Prerequisite(s): ELET 3113; ELET 3222; and Engineering major or minor. The design, analysis, simulation and implementation of composite, cascaded and summation filters. Topics include: bilinear transfer functions; cascade design with first-order circuits; biquad circuits; Butterworth lowpass circuits; Butterworth bandpass circuits; the Chebyshev response; sensitivity; frequency transformations; highpass and band-elimination filters.

ELET 4133. Embedded Systems. (3) Prerequisite(s): ELET 3232 and Engineering major or minor. The external characteristics of digital and analog integrated circuits and their applications when interfaced to embedded digital systems. Design constraints and considerations due to device limitations and device selection based upon application requirements will be discussed. Upon completion, students should be able to design, program, verify, analyze, and troubleshoot hardware and software in embedded systems.

ELET 4142. Power Electronics. (3) Prerequisite(s): ELET 3222, and Engineering major or minor. An introduction to power electronic devices in electrical systems, including their characteristics, operation, and application.

ELET 4243. Power Networks. (3) Prerequisite(s): ELET 3141, and Engineering major or minor. Study and design of electric power transmission and distribution systems. Topics include: power network components design and interconnection, system studies, national grid and microgrid power distribution, and grid monitoring and control.

English (ENGL)

ENGL 1201. English Learning Community. (1) A continuation of the English Learning Community's First-Year Seminar course which provides time to meet with faculty and English student organizations, as well as maintain the student community through the duration of the first-year experience.

ENGL 1502. Global Arts/Humanities: Global Connections in English Studies. (3) Introduction to a range of oral, written, printed, visual, and/or digital texts from global communities and cultures, paying attention especially to language, diverse perspectives, modes of creation, and/or pedagogical approaches.

ENGL 1512. Local Arts/Humanities: Local Connections in English Studies. (3) Introduction to a range of oral, written, printed, visual, and/or digital texts from local communities and cultures, paying

attention especially to language, diverse perspectives, modes of creation, and/or pedagogical approaches.

ENGL 2015. Topics in Writing. (1 to 3) Offers instruction and practice in special types of writing, such as writing for publication (exclusive of poetry, drama, and fiction), which are not included in other writing courses. In addition, some sections may offer instruction in various aspects of effective writing. *Not more than three hours of 2015 may be used toward the requirements for the English major (and those three hours may not be used toward fulfillment of the 12 hours of English language or composition required for licensure in English). The maximum hours of credit allowed for any student are six for ENGL 2015.*

ENGL 2050. Topics in English. (3) Designed to offer topics of general interest not included in other courses. *May be repeated for credit with permission of department.*

ENGL 2051. Topics in English - Writing Intensive. (3) Designed to offer topics of general interest not included in other courses. *May be repeated for credit with permission of department.* Fulfills General Education writing goal.

ENGL 2072. Topics in Literature and Film. (3) Critical study of the intersections of literature and film. *May be repeated for credit with change of topic.*

ENGL 2074. Topics in Children's Literature, Media, and Culture. (3) Study of children's literature as it relates to other media for young people, including film, television, digital narratives, games, and/or comics. *May be repeated with change of topic.*

ENGL 2081. Topics in Author, Pop Culture, and Genre Studies. (3) Selected topics in author, pop culture, and genre studies. *May be repeated for credit with change of topic.*

ENGL 2082. Topics in Film, Performance, and Print & Digital Culture. (3) Selected topics in film, performance, and print and digital culture. *May be repeated for credit with change of topic.*

ENGL 2083. Topics in Genders, Sexualities, and Literature. (3) Selected topics in genders, sexualities, and literature. *May be repeated for credit with change of topic.*

ENGL 2084. Topics in Global Cultures, Identities, and Diverse Literatures. (3) Selected topics in global cultures, identities, and diverse literatures. *May be repeated for credit with change of topic.*

ENGL 2085. Topics in Literature, Science, and the Environment. (3) Selected topics in literature, science, and the environment. *May be repeated for credit with change of topic.*

ENGL 2090. Topics in English. (3) Special topics not included in other courses. *May be repeated for credit with change of topic.*

ENGL 2100. Writing About Literature. (3) Prerequisite(s): Must be enrolled in one of the following Fields of Study (Major, Minor, or Concentration): Architectural History and Criticism; Child & Family Development Studies; Diverse Literatures and Cultural Studies; Elementary Education; English; Middle Grades Education; Special

Education. Combined practice in writing and study of literature, emphasizing writing processes, including revision.

ENGL 2106. Film Criticism. (3) Introduction to film as an art form. Emphasis will be on the critical analysis of the form and the content of films with attention to issues of visual narrative, audience, cinematography, editing, acting, etc.

ENGL 2108. Introduction to Drama. (3) Representative plays of the western world from the classical period to the modern period to introduce students to drama as literature, with consideration of staging, conventions of the theater, types of drama, and dramatic theory.

ENGL 2116. Introduction to Technical Communication. (3) Technical Communication theory (such as organization, audience analysis, and editing) is taught in the context of oral and written formats, such as memoranda, proposals, reports, PowerPoint presentations, and includes formats and content common to students' own disciplines.

ENGL 2126. Introduction to Creative Writing. (3) A broad introduction to fundamental concepts in creative writing, including the genres of poetry, fiction, and creative nonfiction. Students read and discuss a range of contemporary creative works and compose original poems and prose.

ENGL 2127. Introduction to Poetry Writing. (3) Introduces students to fundamental concepts in reading, writing, and critiquing poetry. Students read and discuss a range of contemporary poetry and aspects of poetics; they also write original poems and bring them to a workshop for group critique.

ENGL 2128. Introduction to Fiction Writing. (3) Introduces students to fundamental concepts in reading, writing, and critiquing fiction. Students read and discuss a range of contemporary fiction and study aspects of fictional craft and genre; they also write original fiction and bring it to a workshop for group critique.

ENGL 2161. Grammar for Writing. (3) A systematic, hands-on review of the grammar behind professional copy editing for academic and public submission, including techniques for using sentence structure, word choice, and information management to make texts intuitively appealing without sacrificing precision and to maximize reading speed.

ENGL 2201. Contemporary Poetry. (3) Introduction to current trends in American and world poetry. Encourages creativity and scholarly engagement with the exciting and multifaceted world of contemporary poetry.

ENGL 2202. Contemporary Fiction. (3) Introduction to current trends in contemporary fiction. Encourages creative and scholarly engagement with the world of contemporary fiction.

ENGL 2301. Introduction to African American Literature. (3) Cross-listed Course(s): AFRS 2301. Survey of the major periods, texts, and issues in African American literature.

ENGL 2400. American Literature Survey. (3) Surveys the whole of American literature from the Colonial to the Modern period. Major authors and literary movements, as well as important ideas and cultural issues are addressed.

ENGL 2401. British Literature Survey I. (3) Surveys British literature from the Medieval period to the Renaissance. Major authors and literary movements as well as important ideas and cultural issues are addressed.

ENGL 2402. British Literature Survey II. (3) Surveys British literature from the Neoclassical to the Modern period. Major authors and literary movements, as well as important ideas and cultural issues are addressed.

ENGL 3050. Topics in English. (3) Special topics not included in other courses. *May be repeated for credit with change of topic.*

ENGL 3051. Topics in English - Writing Intensive. (3) Special topics not included in other courses. *May be repeated for credit with change of topic.*

ENGL 3053. Topics in English - Writing Intensive and Oral Communication. (3) Offers topics of general interest not included in other courses. *May be repeated for credit with permission of department.*

ENGL 3072. Topics in Literature and Film. (3) Selected topics in literature and/or film. *May be repeated for credit with change of topic.*

ENGL 3074. Topics in Children's Literature, Media, and Culture. (3) Study of children's literature as it relates to other media for young people, including film, television, digital narratives, games, and/or comics. *May be repeated with change of topic.*

ENGL 3081. Topics in Author, Pop Culture, and Genre Studies. (3) Selected topics in author, pop culture, and genre studies. *May be repeated with change of topic.*

ENGL 3082. Topics in Film, Performance, and Print & Digital Culture. (3) Selected topics in film, performance, and print and digital culture. *May be repeated for credit with change of topic.*

ENGL 3083. Topics in Genders, Sexualities, and Literature. (3) Selected topics in genders, sexualities, and literature. *May be repeated for credit with change of topic.*

ENGL 3084. Topics in Global Cultures, Identities, and Diverse Literatures. (3) Selected topics in global cultures, identities, and diverse literatures. *May be repeated for credit with change of topic.*

ENGL 3085. Topics in Literature, Science, and the Environment. (3) Selected topics in literature, science, and the environment. *May be repeated for credit with change of topic.*

ENGL 3100. Approaches to Literature and Culture. (3) Introductory study and application of major critical approaches to literature, such as formalism, race studies, new historicism, gender and sexuality studies, postcolonialism, ecocriticism, class studies, and poststructuralism, with an emphasis on diverse perspectives and on writing about literature.

ENGL 3102. Literature for Young Children. (3) Critical study of literature for children under the age of eight, covering such topics as picture books, nursery rhymes, and books for beginning readers.

ENGL 3103. Children's Literature. (3) Critical study of various genres of children's literature, such as realistic fiction, fantasy, and picture books.

ENGL 3104. Literature for Adolescents. (3) Critical study of literature intended for adolescent and pre-adolescent readers, as well as texts that deal with coming-of-age themes.

ENGL 3125. Introduction to U.S. Latinx Literature. (3) Cross-listed Course(s): LTAM 3003. Examines contemporary and recent literatures written in English in the U.S. by Latinx writers, and is designed to introduce students to the variety of texts and contexts which shape contemporary U.S. Latinx literary experiences.

ENGL 3132. Introduction to Contemporary American English. (3) Introduction to the study of word formation, the sound system, and the structure of contemporary American English, including characteristics and applications of traditional grammar.

ENGL 3158. Gender and African American Literature. (3) Exploration of the intersection of gender and African American literature, focusing on either Black women writers or Black male writers, or a combination in dialogue.

ENGL 3159. African American Poetry. (3) Cross-listed Course(s): AFRS 3159. Intensive study of African American poetry, focusing on one period or traversing several.

ENGL 3162. Language and the Virtual World. (3) Explores the various ways in which language is used in cyberspace, and how those practices are re-shaping our daily lives and our cultural expectations.

ENGL 3180. Language and Digital Technology. (3) Rhetorical, psychological, and anthropological theories that underscore the interrelations of written, graphic, and digital communication within technical, rhetorical contexts.

ENGL 3190. Teaching Academic English to Adolescent Learners. (3) An overview of the theories, approaches, and challenges of teaching academic English in secondary school language arts settings.

ENGL 3201. Intermediate Poetry Writing. (3) Prerequisite(s): ENGL 2126, ENGL 2127, ENGL 2128, or permission of instructor. Students continue to build their knowledge and skills in the art and craft of poetry writing. Combines reading and discussion of published contemporary poetry with the writing of original creative works.

ENGL 3202. Intermediate Fiction Writing. (3) Prerequisite(s): ENGL 2126, ENGL 2127, ENGL 2128, or permission of instructor. Students continue to build their knowledge and skills in the art and craft of fiction writing. Combines reading and discussion of published contemporary fiction with the writing of original creative works.

ENGL 3203. Intermediate Creative Nonfiction Writing. (3) Prerequisite(s): ENGL 2126, ENGL 2127, ENGL 2128, or permission of instructor. Students continue to build their knowledge and skills in the art and craft of creative nonfiction writing. Combines reading and discussion of published creative nonfiction with the writing of original creative works.

ENGL 3211. Medieval Literature. (3) Representative British literary texts (poetry, prose, and/or drama) that embody the cultural and literary developments of the Medieval era.

ENGL 3212. British Renaissance Literature. (3) Representative British literary texts (poetry, prose, and/or drama) that embody the cultural and literary developments of the 16th and/or 17th centuries.

ENGL 3213. British Literature of the Restoration and 18th Century. (3) Representative British literary texts (poetry, prose, and/or drama) that embody the cultural and literary developments of the Restoration and/or 18th century.

ENGL 3214. Romantic British Literature, 1785-1832. (3) Literature from the Romantic period, with emphasis on the works of specific writers, which may include works by men and women writers such as Wordsworth, Blake, Coleridge, Wollstonecraft, Austen, and Smith.

ENGL 3215. British Victorian Literature. (3) Representative British literary texts (poetry, prose, and/or drama) that embody the cultural and literary developments of the Victorian era.

ENGL 3216. British Literature in Transition, 1870-1914. (3) Representative British literary texts (poetry, prose, and/or drama) that embody the cultural and literary developments of the period 1870-1914.

ENGL 3217. Modern British Literature. (3) Representative British literary texts (poetry, prose, and/or drama) that embody the cultural and literary developments of the 20th and 21st centuries.

ENGL 3231. Early African American Literature. (3) Exploration of the major periods, texts, and issues in African American literature from its origins to the Harlem Renaissance.

ENGL 3233. American Literature of the Romantic Period. (3) Important writers and ideas of the period of American romanticism, from Irving through Whitman, including such authors as Poe, Emerson, Thoreau, Hawthorne, and Melville.

ENGL 3234. American Literature of the Realist and Naturalist Periods. (3) Important writers and ideas of American literature, from Whitman through the period of World War I, including such authors as Dickinson, Twain, Howells, James, Crane, Dreiser, and Frost.

ENGL 3235. Modern American Literature. (3) Representative American literary texts (poetry, prose, and/or drama) that embody the cultural and literary developments of the 20th and 21st centuries.

ENGL 3236. African American Literature, Harlem Renaissance to Present. (3) Exploration of the major periods, texts, and issues in African American literature from the Harlem Renaissance to the present.

ENGL 3237. Modern and Recent U.S. Multiethnic Literature. (3) Representative U.S. multiethnic texts (poetry and/or prose) exemplifying the literary and cultural developments of the 20th and 21st centuries.

ENGL 3852. Independent Study. (1 to 3) Prerequisite(s): Permission of department. Individual investigations and appropriate exposition of the results. (Unless special permission is granted by the department chair,

no more than six hours of ENGL 3852 may apply toward the English major.)

ENGL 4002. Women and Literature. (3) Selected topics focusing on women and literature, such as images of women, women as writers, and women as literary critics. *May be repeated for credit with change of topic and permission of department (however, only six hours may be used for the requirements for the English major).*

ENGL 4008. Topics in Advanced Technical Communication. (3) Prerequisite(s): ENGL 2116 and COMM 1101. Exploration, both theoretically and practically, of the interrelation of written, oral, graphic, and digital communication within technical rhetorical contexts. *May be repeated for credit one time with permission of department.*

ENGL 4050. Topics in English. (3) Special topics not included in other courses. *May be repeated for credit with change of topic.*

ENGL 4051. Topics in English - Writing Intensive. (3) Special topics not included in other courses. *May be repeated for credit with change of topic.*

ENGL 4072. Topics in Literature and Film. (3) Cross-listed Course(s): ENGL 5072. Selected topics in literature and/or film. *May be repeated for credit with change of topic.*

ENGL 4074. Topics in Children's Literature, Media, and Culture. (3) Cross-listed Course(s): ENGL 5074. Study of children's literature as it relates to other media for young people, including film, television, digital narratives, games, and/or comics. *May be repeated for credit with change of topic.*

ENGL 4077. Topics in Rhetoric and Composition. (3) Cross-listed Course(s): ENGL 5077. Selected topics in rhetoric and composition. *May be repeated for credit with change of topic.*

ENGL 4078. Special Topics in Poetry Writing. (3) Prerequisite(s): ENGL 2126, ENGL 2127, ENGL 3201, or permission of instructor. Cross-listed Course(s): ENGL 5078. Designed for advanced writers of poetry to further develop their skills, styles, and aesthetics. Intensive study of select areas of form or genre with continued practice in the writing of poetry.

ENGL 4079. Special Topics in Fiction Writing. (3) Prerequisite(s): ENGL 2126, ENGL 2128, ENGL 3202, or permission of instructor. Cross-listed Course(s): ENGL 5079. Designed for advanced writers of fiction to further develop their skills, styles, and aesthetics. Intensive study of select areas of form or genre with continued practice in the writing of fiction.

ENGL 4081. Topics in Author, Pop Culture, and Genre Studies. (3) Selected topics in author, pop culture, and genre studies. *May be repeated with change of topic.*

ENGL 4082. Topics in Film, Performance, and Print & Digital Culture. (3) Selected topics in film, performance, and print and digital culture. *May be repeated for credit with change of topic.*

ENGL 4083. Topics in Genders, Sexualities, and Literature. (3) Selected topics in genders, sexualities, and literature. *May be repeated for credit with change of topic.*

ENGL 4084. Topics in Global Cultures, Identities, and Diverse Literatures. (3) Selected topics in global cultures, identities, and diverse literatures. *May be repeated for credit with change of topic.*

ENGL 4085. Topics in Literature, Science, and the Environment. (3) Selected topics in literature, science, and the environment. *May be repeated for credit with change of topic.*

ENGL 4102. British Children's Literature. (3) Focuses on works in British and British Colonial Children's literature. *May be repeated for credit with change of topic.*

ENGL 4103. American Children's Literature. (3) Focuses on works in American Children's literature. *May be repeated for credit with change of topic.*

ENGL 4104. Multiculturalism and Children's Literature. (3) Focuses on works that represent one or more kinds of cultural, ethnic, or social diversity of the United States and other national literatures. *May be repeated for credit with change of topic.*

ENGL 4111. Ancient World Literature. (3) Readings of ancient world literature, in English translation.

ENGL 4112. Modern World Literature. (3) Readings in modern world literature, in English and in English translation.

ENGL 4116. Shakespeare's Early Plays. (3) A study of 10 representative plays from the comedies, histories, and tragedies written 1590-1600.

ENGL 4117. Shakespeare's Late Plays. (3) A study of 10 representative plays from the period 1600-1611, including the late tragedies and tragicomedies.

ENGL 4120. Romantic British Literature, 1785-1832. (3) Literature from the Romantic period, with emphasis on the works of specific writers, which may include works by men and women writers such as Wordsworth, Blake, Coleridge, Wollstonecraft, Austen, and Smith.

ENGL 4132. British Drama to 1642. (3) Cross-listed Course(s): ENGL 5132. A survey of late-medieval and Renaissance drama in England.

ENGL 4141. American Literature of the Realist and Naturalist Periods. (3) Important writers and ideas of American literature, from Whitman through the period of World War I, including such authors as Dickinson, Twain, Howells, James, Crane, Dreiser, Frost.

ENGL 4145. Literature of the American South. (3) Selected works of Southern writers that reflect literary and cultural concerns from Colonial times to the present, including such authors as Poe, the early humorists, local color writers, Chopin, Faulkner, Warren, O'Connor, Welty.

ENGL 4151. Drama. (3) Cross-listed Course(s): ENGL 5151. Drama written in English, focusing on a particular period, nationality, or topic. *May be repeated for credit one time with permission of department.*

ENGL 4160. Origins of Language. (3) Study of linguistic theories of how and when human language developed, with attention to parallel work in anthropology, archeology, and psychology.

ENGL 4161. Modern English Grammar. (3) A study of the structure of contemporary English, with an emphasis on descriptive approaches.

ENGL 4165. Multiculturalism and Language. (3) Readings in and discussion and application of the interrelationships between language and culture, including basic introduction to contemporary American dialects and to social contexts of language.

ENGL 4167. The Mind and Language. (3) Introduction to the study of the mind from a linguistic perspective. Topics include: language growth and loss, language deficits, modularity and hierarchical processing, the interaction of cognitive and linguistic faculties, parsing/processing strategies and limitations, and applications such as therapy, forensics, computing, teaching.

ENGL 4168. Multimodality and Text Description. (3) Explores how different modes of communication interact and are integrated in adapted, new or emergent digital discourses and genres. Multimodal analysis includes the analysis of communication in all its forms, but is particularly concerned with texts in which two or more semiotic resources—or ‘modes’ of communication—are integrated and combined. Such resources include aspects of speech such as intonation and other vocal characteristics, gesture (face, hand, and body) and proxemics, as well as products of human technology such as carving, painting, writing, architecture, image, sound recording, and interactive computing resources.

ENGL 4181. Writing and Designing User Documents. (3) Researching and analyzing audiences to write publishable instructions. Includes the production, testing, and revision of tutorials, reference manuals, on-line documents, and digital media for users of computers and other technologies.

ENGL 4182. Information Design and Digital Publishing. (3) Prerequisite(s): ENGL 2116. Theoretical and practical exploration of visual communication. By rhetorically integrating text and graphics, students write and publish documents and online content for digital environments.

ENGL 4183. Editing with Digital Technologies. (3) Prerequisite(s): ENGL 2116. Substantive editing, copyediting, project management, and editing in hardcopy documents and web and digital environments.

ENGL 4200. Teaching of Writing. (3) Cross-listed Course(s): ENGL 5200. Introduction to various theories that inform practices in the teaching of writing and methods of teaching writing to middle and secondary learners.

ENGL 4201. Teaching of Multiethnic Literature. (3) An overview of the issues, opportunities, and challenges of teaching multiethnic literature in middle and secondary school settings.

ENGL 4202. Advanced Poetry Writing. (3) Prerequisite(s): ENGL 2126, ENGL 2127, ENGL 3201, or permission of instructor. Cross-listed Course(s): ENGL 5202. Designed for advanced writers of poetry to further develop their skills, styles, and aesthetics. Combines reading and discussion of published contemporary poetry with the writing of original creative works.

ENGL 4203. Advanced Fiction Writing. (3) Cross-listed Course(s): ENGL 5203. Prerequisite(s): ENGL 2126, ENGL 2128, ENGL 3202, or permission of instructor. Designed for advanced writers of fiction to further develop their skills, styles, and aesthetics. Combines reading and discussion of published contemporary fiction with the writing of original creative works.

ENGL 4204. Expository Writing. (3) Writing of essays, criticism, and various forms of exposition.

ENGL 4206. Advanced Creative Nonfiction Writing. (3) Cross-listed Course(s): ENGL 5206. Prerequisite(s): ENGL 2126, ENGL 2127, ENGL 2128, ENGL 3203, or permission of instructor. Designed for advanced writers of creative nonfiction to further develop their skills, styles, and aesthetics. Combines the reading and discussion of published contemporary creative nonfiction with the writing of original creative works.

ENGL 4207. Writing Young Adult Fiction. (3) Prerequisite(s): English major or minor; and either ENGL 2126, ENGL 2127, ENGL 2128, ENGL 3103, or ENGL 3104, or permission of instructor. Cross-listed Course(s): ENGL 5207. Today, the young adult (YA) novel is often a beautifully crafted work of literary fiction open to a variety of experimental approaches. This course serves those who already write, or would like to try writing, YA fiction. It explores aspects of reading and writing young adult fiction, including developing a narrative point of view, trajectory and conflict, creating complex characters, and issues of voice and style. *May be repeated for credit with change of topic.*

ENGL 4235. History of the Book. (3) Cross-listed Course(s): ENGL 5235. Explorations of the development, technologies, cultures, and impact of the book and print media.

ENGL 4254. Teaching English/Communication Skills to Middle and Secondary School Learners. (3) Cross-listed Course(s): ENGL 5254. Prerequisite(s): Senior standing; and English major with a Secondary Education minor, Middle Grades Education major, or permission of department. Pre- or Corequisite(s): MDSK 3100; MDSK 3151; MDSK 4210; and MDLG 3130 or SECD 4140. Corequisite(s): MDSK 4100L. Approaches to the teaching of English, including recent theories and research related to writing and literary study, with special attention to technology. Designed primarily for teaching in grades 6-12.

ENGL 4260. History of Global Englishes. (3) Cross-listed Course(s): ENGL 5260. Origins and development of the English language, both spoken and written, from its earliest forms to contemporary usage.

ENGL 4262. Language and Diversity. (3) Examination of contemporary American varieties of English by region, gender, ethnic identity, socio-economic status, age, social networks, and other cultural groupings.

ENGL 4267. Language and Culture in Digital Spaces. (3) Explores how humans make cyberspace into social and cultural spaces through diverse

language practices. Considers how technology use shapes and is shaped in social interaction and how identities, relationships, and discourses develop through digitally-mediated language use.

ENGL 4270. Studies in Writing, Rhetoric, and Literacy. (3) Cross-listed Course(s): ENGL 5270. Studies of writing, rhetoric, and literacy with an emphasis on historical and cultural contexts.

ENGL 4271. Studies in Writing, Rhetoric, and New Media. (3) Cross-listed Course(s): ENGL 5271. Studies of writing, rhetoric, and new media and digital technologies with an emphasis on historical and cultural contexts.

ENGL 4272. Studies in the Politics of Language and Writing. (3) Explores language and writing as sites of political contestation in local, national, and global contexts. Examines theoretical debates and effects of politics and history on language and learning.

ENGL 4273. Studies in Writing, Rhetoric, and Identity. (3) Explores how identities are performed in textual and digital media.

ENGL 4274. Visual Rhetoric. (3) Cross-listed Course(s): ENGL 5274. Theory and practice of crafting rhetorical arguments in print and electronic media that depend upon visual exhibits, such as drawings, photographs, tables, graphs, icons, and videos.

ENGL 4275. Rhetoric and Technology. (3) Cross-listed Course(s): ENGL 5275. Research and theories of the rhetorical construction of technology in history and culture.

ENGL 4277. Digital Literacies. (3) Cross-listed Course(s): ENGL 5277. Exploration of the intersections between evolving digital literacies and traditional school-based literacies.

ENGL 4290. Advanced Creative Project. (3) Prerequisite(s): English major or minor; and ENGL 4202, ENGL 4203, ENGL 4078, ENGL 4209, or permission of instructor. Focuses on the planning of a book-length work of creative writing through independent study and scholarly engagement in related areas of contemporary literature and writing, leading to the development of book proposals, abstracts, discussions of creative works, and oral presentations by students and authors.

ENGL 4325. Trauma and Memory in Contemporary American Literature. (3) Cross-listed Course(s): ENGL 5325. Examination of selected works that explore national experiences of trauma in the U.S.

ENGL 4400. Research, Theory, and Practice of Tutoring Writing. (3) Cross-listed Course(s): WRDS 4402 and ENGL 5400. Prerequisite(s): Interview and permission of WRC Director and/or Assistant Director. A practicum which educates student peer tutors to assist writers in UNC Charlotte's Writing Resources Center (WRC). All writing consultants are required to complete this course, which provides an introduction to writing center research, theory, and practice. Coursework explores the history, contexts, and research-based principles of writing centers; the social, collaborative nature of learning; strategies of one-with-one writing instruction; threshold concepts in Writing Studies; composition theory; and current issues in writing pedagogy, such as linguistic justice and accessibility. Significant attention is given to research-based practices for supporting multilingual writers. In addition to completing coursework, students tutor in the WRC for three hours per week. Because

this course includes a practicum in the WRC, enrollment is by permission only, following a successful interview with the Director and/or Associate Director of the WRC.

ENGL 4410. Professional Internship. (3 or 6) Prerequisite(s): Permission of English Internship Coordinator; Junior or Senior status; English major or minor, or Minor in Technical/Professional Writing; 2.5 GPA or above; and taken a course in professional communication (e.g., journalism, technical communication, public relations, public relations lab, or mass media). Students work 8-10 hours (3 hours credit) or 16-20 hours (6 hours credit) per week in a placement arranged by the Internship Coordinator. *May be repeated for credit one time; only three credit hours may be applied to the English major; three additional hours may be counted as a University elective.*

ENGL 4750. English Honors Seminar. (3) Prerequisite(s): Admission into English Honors Program or permission of instructor. In-depth study of a selected topic in English Studies. Topics and course content vary according to the interests and expertise of the faculty.

ENGL 4751. English Honors Thesis Seminar. (3) Prerequisite(s): Admission into English Honors Program and permission of instructor. In-depth study of a selected topic in English Studies. Topics and course content vary according to the interests and expertise of the faculty. During the course of the semester, students produce a thesis proposal and capstone thesis project.

ENGL 4752. English Honors Thesis. (3) Prerequisite(s): Admission into English Honors Program and permission of instructor. Honors proposal and capstone project completed as part of either ENGL 4750 or an ENGL 4000-5000 level course.

ENGL 4852. Independent Study. (1 to 3) Prerequisite(s): Permission of department. Individual investigations and appropriate exposition of the results. (Unless special permission is granted by the department chair, no more than six hours may apply toward the English major.) *May be repeated for credit with permission of department.*

Engineering (ENGR)

ENGR 0200. Engineering FIT Program. (1) Prerequisite(s): Be registered for the Engineering FIT program. The Engineering FIT course is designed to provide incoming first-year engineering students with the essential mathematical practices required as a strong foundation for their upcoming engineering courses. This course aims to enhance mathematical skills while offering support during the transition from high school to university life. Students will explore the practical applications of mathematics in engineering, emphasizing its significance in making a positive impact on society.

ENGR 0600. Engineering Freshman Learning Community Seminar. (0) Required for all residents of the Freshman Learning Community (FLC). The FLC has three goals: build community with students, faculty, and engineering professionals; learn about the engineering disciplines; and learn how to be a successful engineering student. The seminar offers workshops, site visits, and other activities. *May be repeated for credit. Graded on a Pass/No Credit basis.*

ENGR 1100. Engineering Pathways. (1) Prerequisite(s): College of Engineering student. Assists students in exploring the engineering disciplines offered at UNC Charlotte, learning about career opportunities, and performing a critical analysis of their career goals. Academic and professional skills required to be successful in the College of Engineering are introduced. Students are exposed to campus resources, college culture, and student and professional organizations.

ENGR 1101. First-Year Engineering Track to Success. (3) Prerequisite(s): Must be a participant in Engineering Track to Success Program. This course focuses on developing successful learning behaviors and major exploration. It is designed to assist with the intellectual and social transition from high school to college by increasing the involvement of students in the intellectual life of the campus; providing an orientation to resources available to students; and promoting problem solving and writing skills. *May not be repeated for grade replacement.*

ENGR 1102. Engineering Pathways II. (1) Prerequisite(s): ENGR 1101. Designed to assist students to continue an in-depth exploration of careers in the engineering field. A focus on critical thinking used to make engineering decisions and solve problems is discussed and practiced. Students are exposed to emerging fields in the engineering profession. This course is designed for first year engineering students.

ENGR 1110. Academic and Professional Skills. (1) The course will use profiles of engineering, technology, science, and business professionals to give students an opportunity to identify with, evaluate, and discuss roles and opportunities in professional STEM environments. The course promotes soft skills like planning, goal-setting, communication and teamwork; with a particular emphasis on applications used in the engineering, engineering technology, construction management and other STEM majors.

ENGR 1201. Introduction to Engineering Practices and Principles I. (2) Prerequisite(s): College of Engineering major; Register for MATH 1241 or higher; place in MATH level 4. An introduction to the different disciplines within engineering; the college's computing system; academic, personal and professional development; teamwork; project planning; engineering design; engineering calculations; and oral and written communication skills within a multi-disciplinary format.

ENGR 1202. Introduction to Engineering Practices and Principles II. (2) Prerequisite(s): ENGR 1201 and MATH 1241 with grades of C or above; and Engineering major or minor. Corequisite(s): ENGR 1201 with permission of department. Applications in the disciplines of Civil, Computer, Electrical, Mechanical, and Systems Engineering using tools and techniques specific to the major and discipline. Emphasis is on analytical and problem-solving skills and understanding of the profession/curriculum. Each course section is restricted to a specific engineering major discipline.

ENGR 1300. Exploring Engineering & Technology with Success. (2) Prerequisite(s): Admission to the College of Engineering. This course will welcome students with a diverse cross-section of backgrounds into the engineering college/profession with a variety of hands-on experiences that informs them of the different engineering careers/disciplines and offers them an opportunity to apply the engineering design process to meaningful, real-world projects. Students will further develop learning

efficacy while discovering their passion and finding meaningful connections in the engineering community. With a grade of C or above.

ENGR 1301. Foundations of Math and Science for Engineering. (3) Prerequisite(s): Admission to the College of Engineering. A study of foundational math and science, including vectors, vector algebra, units, Newton's laws, atomic structure, properties of matter, quantum mechanics, ideal gas law, chemical bonding, etc. Course consists of both lectures and breakout practice/lab sessions. With a grade of C or above.

ENGR 1302. Logic and Computational Problem Solving. (3) Prerequisite(s): Admission to the College of Engineering. An immersive project-oriented course where students explore real-world engineering problems, develop methodologies for solving problems logically and with computational tools, and validate solutions. A modern programming language is introduced. With a grade of C or above.

ENGR 1303. Engineering Visualization and Graphical Communication. (3) Prerequisite(s): Admission to the College of Engineering. This course enables students to develop foundational knowledge and skills for visualizing and communicating complex three-dimensional designs and data sets. Through hands-on and practical applications, students learn techniques and tools to create visual spatial representations and conduct data analysis that aids in decision-making. Online 2D and 3D applications will be used, as well as spreadsheets and mathematical analysis software. With a grade of C or above.

ENGR 2800. College of Engineering Ambassadors' Leadership Development. (1 to 3) Prerequisite(s): College of Engineering major and GPA greater than 2.5; Participation is through a competitive selection process. Course activities involve participating in training sessions and monthly meetings with the Outreach and Recruitment Committee; conducting engineering lab tours, workshops and presentations; leading and participating in college sponsored STEM activities; and supporting K-12 and community college recruitment events and the Dean and Chairs functions as needed. Students will translate and analyze how these communication and networking strategies can be utilized in their own professional development in their transition to leadership roles as early career professionals. *May be repeated for credit for up to 9 credit hours.*

ENGR 3095. Leadership Academy Capstone. (0) Prerequisite(s): Admittance into the Leadership Academy program and Engineering major or minor. Participants apply leadership, teamwork, ethical decision-making, communication, and strategic planning principles learned during prior semester Leadership Academy modules to a community-based service learning project. Implementation and evaluation of projects are approved by Leadership Academy staff and advisory board members. *Graded on a Satisfactory/Unsatisfactory basis.*

ENGR 3210. Senior Design Laboratory I. (0) and Prerequisite(s): Engineering major or minor. Corequisite(s): Senior Design I. Laboratory experience to facilitate team interaction and mentor instruction in the multidisciplinary capstone experience. *May be repeated.*

ENGR 3220. Senior Design Laboratory II. (0) Prerequisite(s): Engineering major or minor. Corequisite(s): Senior Design II. Continuation of Senior Design I Laboratory to facilitate team interaction and mentor instruction in the multidisciplinary capstone experience. *May be repeated.*

ENGR 3295. Multidisciplinary Professional Development. (1) Prerequisite(s): Junior or Senior standing per departmental requirements; and Engineering major or minor. A series of multidisciplinary and disciplinary seminars and activities designed to introduce students to basic concepts of professionalism in engineering. Topics include: global, societal, and contemporary issues of current interest such as leadership, entrepreneurship, ethics, and professional licensure. Each course section is restricted to a specific engineering major discipline. Sections may be cross-listed with more than one engineering major discipline.

ENGR 3500. Engineering Cooperative Education Experience. (0) Prerequisite(s): Engineering major or minor. This course is required of Co-op students during the semester they are working. Participating students pay a course registration fee for transcript notation. Assignments must be arranged and approved in advance. The Cooperative Education Program is only open to undergraduate students; graduate level students are encouraged to contact their academic departments to inquire about academic or industrial internship options for credit. For more information, contact the University Career Center. *May be repeated. Graded on a Satisfactory/Unsatisfactory basis.*

ENGR 3790. Engineering Honors Seminar I. (1) Prerequisite(s): Engineering major or minor. Pre- or Corequisite(s): ECGR 3253, ECGR 4241, ECGR 4251, ETGR 4100, MEGR 3255, MEGR 3275, MEGR 3355, MEGR 3455, SEGR 3290, or permission of instructor. Seminar focuses on development of a proposal for the Honors Senior Design II course. The proposal is submitted through Application to Candidacy process for approval by the Honors College. Seminar includes presentations associated with preparing for the Engineering Honors Seminar II course. *Graded on a Pass/No Credit basis.*

ENGR 3791. Engineering Honors Seminar II. (1) Prerequisite(s): ENGR 3790, Engineering major or minor, and approval of a proposal through the Honors College Application to Candidacy process the semester prior to taking the course. Pre- or Corequisite(s): CEGR 3201, CMET 4272, ECGR 3254, ECGR 4242, ECGR 4252, ETCE 4272, ETGR 4200, MEGR 3256, MEGR 3276, MEGR 3356, MEGR 3456, SEGR 3291, or permission of the instructor. Students prepare and present a portfolio showing the impact of the Senior Design process on their preparation for a professional career in engineering.

ENGR 4090. Special Topics. (1 to 4) Prerequisite(s): Engineering major or minor. Directed study of current topics of special interest. *May be repeated for credit.*

Environmental Engineering (ENVE)

ENVE 3111. Construction Engineering. (2) Prerequisite(s): CEGR 3141 with a grade of C or above. Environmental Engineering majors only. The principles and techniques of engineering construction projects from the conceptual phase, through design and construction, to completion and close-out are presented. Students develop the analytical skills and awareness necessary on the design engineering side of construction projects. Topics include: project initiation, estimating, budgeting, allocation of resources, temporary erosion control, and the application of codes, standards, and regulations.

ENVE 3145. Hydraulics Engineering Lab. (2) Prerequisite(s): CEGR 4146 and Civil Engineering or Environmental Engineering major. Laboratory problems in hydrology and hydraulics. Emphasis on analysis and presentation of results as well as on the significance of results as they affect theory and/or practice. Three hours of laboratory per week.

ENVE 3201. Environmental Systems and Design. (1) Prerequisite(s): Instructor approval. Corequisite(s): CEGR 4242. Systems engineering techniques applied to environmental engineering problems emphasizing methodological considerations, evaluating alternatives and developing engineering plans carried out by small groups of students.

ENVE 3202. Environmental Systems and Design. (2) Prerequisite(s): CEGR 4242; Environmental Engineering majors and permission of the instructor. Systems engineering techniques applied to environmental engineering problems emphasizing methodological considerations, evaluating alternatives and developing engineering plans carried out by small groups of students.

Earth Sciences (ESCI)

ESCI 1101. Earth Sciences-Geography. (3) Basic geographical principles and processes in physical geography and the earth sciences: geographic locational methods, earth-sun relationships, earth radiation balance, atmospheric temperature and pressure, interpretation and simple forecasting of weather from mapped data, interpretation of soil-moisture and evapotranspiration balances, soil, climate systems, and biomes.

ESCI 1101L. Earth Sciences-Geography Laboratory. (1) Pre- or Corequisite(s): ESCI 1101. Experimental study and investigation of the basic principles and processes in physical geography and the earth sciences; geographic locational methods, earth-sun relationships, earth radiation balance, atmospheric temperature and pressure, interpretation and simple forecasting of weather from mapped data, interpretation of soil-moisture and evapotranspiration balances, soil, climate systems and biomes. One laboratory period of two hours per week.

Note: Although the laboratory and lecture sections of ESCI 1101 are taught as separate courses, it is strongly recommended that students take ESCI 1101L concurrently with ESCI 1101. Students with scheduling problems or students not fulfilling the University science and technology requirements may take the lecture without the laboratory. Students fulfilling the University science and technology requirements must either: (a) Take ESCI 1101 and ESCI 1101L concurrently; or (b) Take ESCI 1101L in a semester subsequent to taking ESCI 1101.

ESCI 1501. Global Social Science: Environment, Society, and Sustainability. (3) This Global Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of a complex, interconnected world. ESCI 1501 is an introduction to the complex interactions between human systems and global environmental systems, focusing on social science approaches to human imprints on the earth, environmental worldviews and histories, and the role of science in policy

and social change cycles as we examine diverse global environmental issues.

ESCI 2000. Topics in Earth Sciences. (1 to 4) Treatment of major topical issues in Earth Sciences. *May be repeated for credit with change of topic.*

ESCI 2101. The Environmental Dilemma. (3) Nature, causes, and responses to major environmental problems.

ESCI 2200. Introduction to Earth Sciences Research. (3) Pre- or Corequisite(s): ESCI 1101, GEOL 1200, and GEOL 1200L. Basic techniques common to research in all of the earth sciences. Research design and organization, utilization of literature resources, and the use of quantitative methods.

ESCI 2210. Field Methods in the Earth and Environmental Sciences. (3) Prerequisite(s): ESCI 1101, ESCI 1101L, GEOL 1200, and GEOL 1200L; or permission of instructor. Field techniques used in studies of earth and environmental sciences. Skills related to the collection and presentation of scientific data emphasized. Earth Sciences majors should take ESCI 2210 as soon as possible after completion of ESCI 1101, ESCI 1101L, GEOL 1200, and GEOL 1200L.

ESCI 2222. Environmental Science. (3) Prerequisite(s): ESCI 1101 and ESCI 1501. An interdisciplinary study of how humans interact with the living and nonliving parts of their environment. Students integrate knowledge and concepts from the natural sciences with similar ideas from the social sciences. Environmental Science has three primary goals: 1) to understand how life on Earth has survived and thrived, 2) to understand how humans interact with the environment, and 3) to find ways to deal with environmental problems.

ESCI 3000. Selected Topics in Earth Sciences. (1 to 4) Prerequisite(s): ESCI 1101 and ESCI 1101L or GEOL 1200 and GEOL 1200L, and permission of instructor. In-depth treatment of specific topics selected from one of the fields of the earth sciences. *May be repeated for credit with change of topic.*

ESCI 3101. Global Environmental Change. (3) Prerequisite(s): ESCI 1101, METR 1102, or permission of instructor. Fundamental principles of the climate, including the physical processes responsible for global climate change; relationships between past, present, and future changes; and societal and environmental impacts.

ESCI 3105. Oceanography. (3) Prerequisite(s): ESCI 1101 and GEOL 1200, or permission of instructor. Physical, chemical and geological aspects of the world's oceans. Emphasis on oceanic exploration techniques, oceanic circulation, seawater chemistry, marine geology, and coastal systems.

ESCI 3150. Natural Environments of North America. (3) Prerequisite(s): ESCI 1101 or GEOL 1200, GEOL 1200L. Regional geomorphology and ecology of North America with emphasis on development, maintenance, and interaction of the geomorphic and ecological provinces.

ESCI 3170. Environmental Quality Management. (3) Prerequisite(s): ESCI 1101 and ESCI 1101L. Selected methods of air and water resource

analysis with emphasis on conceptual models and statistical techniques of environmental and risk assessment.

ESCI 3180. Environmental Impact Analysis. (3) Prerequisite(s): Earth Science or Geology major with Junior or Senior standing. Environmental impact requirements and associated procedures, guidelines, and methods of assessing physical environmental impacts. Three hours per week of combined lecture and supervised field work leading to the preparation of an environmental impact statement for a locally proposed action.

ESCI 3190. Biogeography. (3) Cross-listed Course(s): GEOG 3190. Prerequisite(s): ESCI 2222 or BIOL 1110. The patterns of life across the Earth and the causes of those patterns, with an emphasis on ecological patterns and historical patterns of biodiversity. The origin of the Earth's biological diversity and methods for conserving that biodiversity is also discussed. Emphasis on student oral and written communication.

ESCI 3205. Water Resources. (3) Prerequisite(s): ESCI 2222 or permission of instructor. The distribution of fresh water and its relevance to society and ecosystems. Fundamentals of the science of water, human use and influence on water, and issues of water management, policy, and law.

ESCI 3220. Air Quality. (3) Prerequisite(s): ESCI 2222 or ESCI 3101. A survey of how human activities combine with weather and geography to create air pollution problems, how air pollution is monitored and reported, and the national and international policies aimed at improving air quality. Three hours of combined lecture and lab per week.

ESCI 3310. National Parks: The Science Behind the Scenery. (3) Prerequisite(s): ESCI 1101 and ESCI 1101L, or GEOL 1200 and GEOL 1200L, or permission of instructor. A discussion of the geological, environmental, and policy aspects of America's national parks, which preserve some of the finest landscapes and scenic beauty in the world. Students learn about the geological processes that created the landscapes in Yellowstone, Yosemite, and the Grand Canyon, as well as many other parks and monuments. The role the parks play as protectors of endangered species, habitats, and undeveloped lands are also discussed.

ESCI 3500. Earth Sciences Cooperative Education Experience. (0) Enrollment in this course is required for the department's earth sciences cooperative education students during each semester that they are working. Participating students pay a course registration fee for transcript notation. Assignments must be arranged and approved in advance. The Cooperative Education Program is only open to undergraduate students; graduate level students are encouraged to contact their academic departments to inquire about academic or industrial internship options for credit. For more information, contact the University Career Center. *Course may be repeated. Graded on a Satisfactory/Unsatisfactory basis.*

ESCI 4000. Selected Topics in Earth Sciences. (1 to 4) Prerequisite(s): ESCI 1101, ESCI 1101L, GEOL 1200, GEOL 1200L, or permission of instructor. In-depth treatment of specific topics selected from one of the fields of the earth sciences. *May be repeated for credit with change of topic.*

ESCI 4005. Engineering Geology. (3) Prerequisite(s): GEOL 1200 and GEOL 1200L, or permission of instructor. the application of geologic principles, techniques, and data to problems in the technology and use of earth materials.

ESCI 4122. Statistics and Data Analysis in Earth Sciences. (3) Cross-listed Course(s): ESCI 5122. Prerequisite(s): MATH 3122, MATH 4122, STAT 1220, STAT 1221, STAT 1222, STAT 2122, or STAT 3122. Develop techniques in a programming environment to quantitatively summarize data related to Earth sciences using univariate and bivariate statistical calculations; defend interpretations of Earth science data from both statistical and physical perspectives.

ESCI 4140. Hydrologic Processes. (4) Prerequisite(s): ESCI 1101 and ESCI 1101L or GEOL 1200 and GEOL 1200L. Atmospheric, soils, and geologic aspects of surface and ground water processes. Three lecture hours and one three-hour lab per week.

ESCI 4145. Groundwater. (4) Prerequisite(s): CHEM 1251, CHEM 1251L, (GEOL 3105 or GEOL 3115 or ESCI 3205 or CEGR 3143), or permission of instructor. Physical and chemical groundwater hydrology, study of aquifer solids, and the role of groundwater in environmental sustainability. Water balance, flow, transport, and chemical reactions in aquifers, including groundwater interactions with other parts of the hydrologic cycle. Three hours of lecture and three hours of lab per week, with occasional field trips.

ESCI 4146. The Business of Ecological Restoration. (3) Prerequisite(s): ESCI 1101. The science, business, and implementation of ecological restoration projects. Topics include: the basics of stream and wetland regulations, restoration, funding, design, construction, and long-term land conservation.

ESCI 4155. Fluvial Processes. (4) Prerequisite(s): ESCI 1101 and ESCI 1101L or GEOL 1200 and GEOL 1200L. Hydrologic and geomorphic study of the transport of water and earth materials within stream systems. Erosion, mass wasting, open channel flow, sediment transport, flooding, stream channel morphology, morphometry of drainage basins, and related topics. Three lecture hours, three lab hours per week.

ESCI 4160. Contaminant Transport. (3) Prerequisite(s): GEOL 1200, GEOL 1200L, ESCI 1101, ESCI 1101L, GEOL 4145, or permission of instructor. Development and application of equations describing mass and energy transport in the subsurface environment. Three hours lecture per week.

ESCI 4170. Fundamentals of Remote Sensing. (4) Prerequisite(s): ESCI 1101 or METR 1102; and GEOL 1200; or permission of instructor. Introduces the physical fundamentals of remote sensing, provides an overview of airborne and satellite remote sensing systems, and offers a basic instruction in the use and interpretation of remote sensing imagery. Identification, interpretation and mapping of both natural and cultural landscape features are also covered. One 2-1/2 hour lecture and one three-hour lab per week.

ESCI 4180. Digital Image Processing in Remote Sensing. (4) Offers both a basic instruction in the use and interpretation of remote sensing data, and advanced remote sensing techniques to help students understand what and how remote sensing can contribute to the

information needs in various fields. 2-1/2 lecture hours and 3 lab hours per week.

ESCI 4190. Contemporary Environmental Issues. (3) Cross-listed Course(s): GEOG 5190. Prerequisite(s): ESCI 2222; Senior standing. An overview of current environmental issues. Solutions to environmental problems are not always clear-cut; this course focuses on the controversies, debates, and clashing views.

ESCI 4201. Hydroclimatology. (3) Cross-listed Course(s): ESCI 5201. Prerequisite(s): ESCI 3101; and Junior or Senior standing. Exploration of the climatic, meteorological, and geographic processes that determine water availability for human use and vegetation growth across Earth's ecosystems. Precipitation in tropical and extratropical weather systems; climate and land-surface factors that drive runoff, evaporation and photosynthesis; effects of long-term climate and CO₂ changes.

ESCI 4210. Soil Science. (4) Prerequisite(s): GEOL 1200, GEOL 1200L, ESCI 1101, ESCI 1101L, or permission of instructor. Study of soils, soil-forming processes and soil morphology with an emphasis on soils as they relate to geologic landscapes and surficial processes. Students will learn how to describe and interpret soils in the field. Three hours lecture, three hours lab per week with occasional field trips.

ESCI 4214. Global Ecosystems: Human Dimensions and Environmental Dynamics. (3) Prerequisite(s): ESCI 1101 or ESCI 1501 or permission of instructor. Cross-listed Course(s): ESCI 5214. This multi-disciplinary course surveys the history and prehistory of human ecological dynamics, drawing on geology, geography, and ecology to understand the interrelationships between global climates, global ecosystems, and their human inhabitants. Topics include: climatic change and its impacts on biological systems, peopling of new landscapes, anthropogenic vegetation change, extinctions, desertification, invasive species interactions, and changes in human subsistence.

ESCI 4220. Atmospheric Chemistry. (3) Prerequisite(s): CHEM 1251 with grade of C or above, or permission of instructor. An examination of the chemistry and dynamics of the Earth's atmosphere, including chemical kinetics and the physics guiding the movement of air locally and globally. A special focus is placed on the chemistry and physics of environmental issues including global ozone depletion, the ozone hole, and urban and regional air pollution. Three hours of combined lecture and lab per week.

ESCI 4222. Watershed Science. (3) Prerequisite(s): Earth Science Major. Geography students: ESCI 4140 or 4155 or GEOL 4145; Biology Majors and M.S. Biology students: BIOL 4149 and permission of instructor; Civil Engineering Majors and M.S.C.E. students: CEGR 3141 or 5144 and permission of instructor; all others require the permission of instructor. Examinations of the cycling of water and chemical elements in natural and perturbed watersheds with emphasis on linkages between the hydrologic and biogeochemical processes which control runoff water quality. Topics include: runoff processes, evapotranspiration, nutrient export and stream, riparian and hyporheic zone hydrochemical dynamics.

ESCI 4233. Geoenvironmental Site Characterization. (4) Prerequisite(s): Earth Sciences, Geology, and M.A. Geography majors: ESCI 4140 or ESCI 4155. Others require permission of instructor.

Advanced field-based examination of hydrologic and geologic conditions in the southeastern United States within the context of current state and federal regulatory requirements and site characterization activities currently performed by professional environmental geoscientists. Topics include: hydrologic investigation and water quality characterization, and geological and geophysical site investigations.

ESCI 4400. Internship in Earth Sciences. (3-6) Prerequisite(s): Permission of department. Research and/or work experience designed to be a logical extension of a student's academic program. The student must apply to the department for an internship by submitting a proposal which specifies the type of work/research experience preferred and how the internship will complement his or her academic program. The department will attempt to place the selected students in cooperating community organizations to complete specified research or work-related tasks which are based on a contractual arrangement between the student and community organization. The student can receive three to six hours credit, depending on the nature and extent of the internship assignment. *May be repeated for credit with change of topic.*

ESCI 4600. Earth and Environmental Sciences Professional Seminar. (1) Prerequisite(s): ESCI 1101, ESCI 1101L, GEOL 1200, GEOL 1200L; Senior standing; Earth Sciences or Geology major; or permission of instructor. Advanced seminar series examining major historical and modern research themes in the Earth and Environmental Sciences. Coursework consists of a series of independent and group oral presentations. *May be repeated for credit with change of topic.*

ESCI 4800. Individual Study in Earth Sciences. (1 to 4) Prerequisite(s): Permission of department and credit hours established in advance; and, when taken for honors credit, approval of a proposal through the Honors College Application to Candidacy process the semester prior to taking the course. Tutorial study or special research problems. *May be repeated for credit with change of topic.*

Civil Engineering Technology (ETCE)

ETCE 1104. Civil/Construction CAD Applications. (3) Prerequisite(s): Civil Engineering Technology or Construction Management major, or permission of department. Introduces students to civil and construction applications of AutoCAD Civil 3D and/or other similar civil engineering survey and design oriented CAD applications. Two hours of lecture and three hours of laboratory per week.

ETCE 1211. Construction Surveying I. (3) Pre- or Corequisite(s): MATH 1103 or above, and ETCE 1104. Corequisite(s): ETCE 1211L. A field surveying and site planning course covering standards, units, and calibration of equipment, measurement of distance, elevation, angles; analysis of systematic and random errors in the measurement; and plane survey, design and layout of horizontal and vertical curves, direction and traversing, construction layout and control, and global positioning system. Three hours of lecture per week.

ETCE 1211L. Construction Surveying I Laboratory. (1) Pre- or Corequisite(s): MATH 1103. Corequisite(s): ETCE 1211. Laboratory supporting ETCE 1211. Three hours of laboratory per week.

ETCE 1222. Construction Materials. (3) Study of the behavior and physical properties of basic construction materials. Topics include: mineral aggregates, Portland cement concrete, masonry, wood, asphalt concrete, metals, plastics, and other materials. Three hours of lecture per week.

ETCE 2112. Construction Surveying and Layout. (3) Prerequisite(s): ETCE 1104, ETCE 1211, and Engineering major or minor. Corequisite(s): ETCE 2112L. An intermediate surveying and site-planning course covering plane survey, design and layout of horizontal and vertical curves, direction and traversing, design of site plant, control of grading, and global positioning system. Two hours of lecture per week.

ETCE 2112L. Construction Surveying and Layout Laboratory. (0) Prerequisite(s): ETCE 1211, ETGR 1103, and Engineering major or minor. Corequisite(s): ETCE 2112. Laboratory supporting ETCE 2112. Three hours of laboratory per week. *Graded on a Pass/No Credit basis.*

ETCE 2163L. Construction Materials and Structures Lab. (1) Prerequisite(s): ETCE 1222. Pre- or Corequisite(s): ETGR 2102. An introduction to basic techniques to evaluate structural materials commonly used in the civil and construction fields.

ETCE 2410. Introduction to Environmental Engineering Technology. (3) Prerequisite(s): MATH 1103 or above and ETGR 2101 with grade of C or above; and Engineering major or minor. An introduction to environmental engineering technology which provides an overview of the environmental field, including laws and regulations, water quality, hydraulic and hydrologic fundamentals, water and wastewater treatment, groundwater contamination, and solid waste management.

ETCE 3131. Soil Mechanics and Earthwork. (3) Prerequisite(s): ETGR 2102 or AAS degree; and Engineering major or minor. Study of soil mechanics for design and construction of foundations and earthwork. Emphasis on practical aspects for foundation design and earthwork construction. Topics include: soil exploration, properties, classification, compaction, consolidation, hydraulic conductivity, shear strength, and introduction to bearing capacity and lateral earth pressure.

ETCE 3131L. Soil Testing Laboratory. (1) Pre- or Corequisite(s): ETCE 3131 and Engineering major or minor. Laboratory designed to familiarize the student with the common laboratory soil tests and analysis procedures with emphasis on the significance of the various tests, the testing procedures and the detailed computations. Three laboratory hours per week.

ETCE 3163. Structural Analysis and Design I. (3) Prerequisite(s): ETGR 2102 and Engineering major or minor. This course presents basic concepts and principles of structural analysis and design of structural steel, reinforced concrete, masonry products, and timber and engineered wood systems. Emphasis is placed on practical aspects of structural analysis and design to include beams, joists, rafters, columns, trusses, and elementary frames.

ETCE 3163L. Structures and Materials Laboratory. (1) Pre- or Corequisite(s): ETCE 3163 and Engineering major or minor. Laboratory designed to evaluate structural materials commonly encountered in the civil and construction environments. Basic beam, truss and frame experiments will be conducted. Standard laboratory and field tests for

typical materials such as block, brick, asphalt, concrete, steel and timber will be performed. Three laboratory hours per week.

ETCE 3242. Hydraulics and Hydrology. (3) Prerequisite(s): ETGR 2102, ETCE 2410, PHYS 1102, or AAS degree; and Engineering major or minor. A study of the fundamental principles of hydraulics and their application in engineering practice, including the fundamentals of fluid flow through orifices, tubes and pipes, in open channels, and over weirs, pump design, network analysis, and modeling.

ETCE 3242L. Hydraulics Laboratory. (1) Pre- or Corequisite(s): ETCE 3242 and Engineering major or minor. Provides an understanding of the apparatus, techniques, and procedures used to measure hydraulic fluid properties and to verify the fundamentals of fluid flow through orifices, tubes and pipes, in open channels, and over weirs. Three laboratory hours per week.

ETCE 3264. Structural Analysis. (3) Prerequisite(s): ETGR 2102, ETGR 2272, and Engineering major or minor. Advanced Shear Moment Diagrams. Building Code and Load Distribution. Deflections of structures, analysis of statically indeterminate structures using virtual work, the force, and the displacement methods of analysis. Introduction to matrix methods of structural analysis.

ETCE 3271. Building Systems. (3) Prerequisite(s): CMET 2105, CMET 2221, CMET 2135, and Engineering major or minor. Basic theory and practical application of heating, ventilation, air conditioning, plumbing and electrical systems in construction. Study of National Fire and Plumbing Codes.

ETCE 3271L. Building Systems Laboratory. (1) Pre- or Corequisite(s): ETCE 3271 and Engineering major or minor. Laboratory exercises demonstrating the basic theory and practical application of heating, ventilation, air conditioning, plumbing and electrical systems in construction. Three laboratory hours per week.

ETCE 4073. Special Topics - Civil Engineering Technology. (1 to 4) Prerequisite(s): Senior standing, and Engineering major or minor, and permission of instructor. A study of new and emerging technical topics pertinent to the field of civil engineering technology. *May be repeated for credit.*

ETCE 4143. Water and Wastewater Systems. (3) Prerequisite(s): ETCE 3242; CHEM 1111 or CHEM 1251; and Engineering major or minor. Study of water supply, treatment, and distribution and liquid waste disposal systems.

ETCE 4143L. Environmental Laboratory. (1) Pre- or Corequisite(s): ETCE 4143 and Engineering major or minor. Laboratory on the analysis of water and sewage and problems related to environmental control. Three laboratory hours per week.

ETCE 4165. Structural Steel Design. (3) Prerequisite(s): ETCE 3163 or ETCE 3264; and Engineering major or minor. Design of beams and columns, floor framing, tensions and compression members, bolted and welded connections according to AISI specifications.

ETCE 4251. Highway Design and Construction. (3) Prerequisite(s): ETCE 1211, ETCE 3131, and Engineering major or minor. Introduction to highway planning, economic considerations, and traffic engineering.

Design and construction of modern highways, including grade separations and interchanges.

ETCE 4266. Reinforced Concrete Design. (3) Prerequisite(s): ETCE 3163 or ETCE 3264; and Engineering major or minor. Design of rectangular beams, T-beams, columns, reinforced concrete floor systems, and reinforced concrete footings according to ACI code. Quality control of concrete and structural inspection.

ETCE 4272. Capstone Project. (3) Prerequisite(s): Senior standing and Civil Engineering Technology major; or permission of department. Utilization of students' previous coursework to creatively investigate and produce solutions for a comprehensive civil engineering technology project.

ETCE 4344. Applied Hydrology and Storm Water Management. (3) Prerequisite(s): ETCE 3242 and Engineering major or minor. Treatment of hydrologic principles, prediction of runoff, design of storm water systems and controls, and the application of best management practices.

ETCE 4350. Construction Geotechnics and Foundations. (3) Prerequisite(s): ETCE 3131 and Engineering major or minor. Study of the concepts and fundamental principles of construction geotechnics related to foundation engineering / construction excavations, temporary structures, dewatering and slope stability.

Electromechanical Engineering Technology (ETEM)

ETEM 2101. Circuit Fundamentals. (3) Prerequisite(s): MATH 1103 or higher. In this foundation course students will learn the principles of DC and AC circuits. Topics of study include basic components, laws, and methods used in circuit analysis. Concepts of DC and AC voltage, current and power will be explored. Students will be instructed on the correct and safe use of equipment and computer tools used in circuits testing and troubleshooting.

ETEM 2161. Foundations of Mechanics. (3) Prerequisite(s): ENGR 1301 (with C or better) or AAS degree, PHYS 1101 or PHYS 2101. This course provides essential tools and a pathway to understanding of basic mechanical design principles. Students learn fundamentals of statics, dynamics, and operation of basic mechanisms. Basic properties of materials and their uses in the manufacturing of products are studied.

ETEM 2171. Algorithms and Programming. (3) Prerequisite(s): ENGR 1302 (with C or better) or AAS degree. An introduction to the design and implementation of algorithms with a focus on practical problem-solving skills relevant to engineering and science. Students will learn and practice programming techniques that are applicable to contemporary programming languages.

ETEM 2181. Circuits and Machines in Action. (2) Prerequisite(s): ENGR 1300 (with C or better) or AAS degree. Pre- or Corequisite(s): ETEM

2101 or ETGR 2106, and ETEM 2161 . An introductory lab course designed to build a strong foundation in lab safety and hands-on skills. Testing and troubleshooting methodologies are introduced using state-of-the-art equipment. Students build and operate functional circuits and simple machines to explore technologies and their possible applications.

ETEM 2201. Circuit Analysis. (3) Prerequisite(s): MATH 1121, ETEM 2101. Knowledge of DC and AC circuit analysis techniques is exercised and expanded. Students learn concepts and uses of transient signals and phasors, passive filters, voltage and current sources, as well as gain an understanding of active and reactive power. Computer-aided circuit simulation software is used throughout the course.

ETEM 2271. Digital Fundamentals. (3) Prerequisite(s): Engineering major or minor, or permission of department. A study of logic methodologies relating to digital electronics. Students learn digital signal representation, logic gates, Boolean algebra, code and signal converters, switching methodologies, and fundamental memory structures.

ETEM 2281. Doing and Making. (3) Prerequisite(s): ETEM 2171, ETEM 2181. Pre- or Co-requisite Course(s): ETME 2111. Students devise and build working prototype solutions to elementary and intriguing challenges. Participants use basic electrical and mechanical prototyping techniques to construct and test simple electromechanical systems. Projects include the interaction of microcontrollers and peripheral devices such as sensors and actuators.

ETEM 2291. Practical System Design. (3) A bridging of electrical and mechanical systems knowledge and practical application. Students learn how to apply basic knowledge of system design under practical constraints and external requirements imposed by standards, codes and safety regulations.

ETEM 3101. Principles of Control. (3) Prerequisite(s): ETEM 2101 or ETGR 2106 . Pre- or Corequisite(s): ETEM 2161 or ETME 2102, MATH 1241. Provides students with essential knowledge to characterize and analyze linear time-invariant systems in both time and frequency domains. System modeling methodologies (such as using Laplace Transforms and transfer functions) are applied to electromechanical systems establishing the foundation needed for understanding of control and automation.

ETEM 3131. Electromechanical Devices. (3) Prerequisite(s): Engineering major or minor, or permission of department. Participants will examine a variety of sensors and actuators that are central to industrial and automated systems.

ETEM 3171. Digital Devices. (3) Prerequisite(s): ETEM 2171, ETEM 2271. Participants will examine and program microcontrollers in preparation for integrating them into complex robotic and automated systems.

ETEM 3181. Exploring Devices. (1) Pre- or Corequisite(s): ETEM 3131, ETEM 3171. Students interface microcontrollers with a variety of electromechanical devices typical of those used across industry. Development of algorithms is applied to create intelligent embedded systems.

ETEM 3191. From Concept to Product. (3) This course provides students with the knowledge and techniques essential to formulate and carry out engineering projects. Participants learn methods used for

product development within the scope of the engineering design process. The course will provide tools and methods needed to execute team projects from creative ideas to ready-to-manufacture products.

ETEM 3231. Power, Machines, and Energy. (3) Prerequisite(s): ETEM 2101 or ETGR 2106. Students will learn the fundamental concepts of power generation, transmission and distribution, including modern and emerging renewable energy sources and storage. Course participants will study motors, energy flow, fluid mechanics, and their applications and practical implementation in commercial processes.

ETEM 3261. Applied Control Systems. (3) Prerequisite(s): ETEM 3101. Students will learn techniques of automated control systems. Feedback control, concepts of stability, compensation, gain and phase margins, and state-space description of physical systems are studied. Concepts for designing controllers and optimizing performance of systems are explored. Modern engineering tools, including computer simulation, are used to design, verify, and evaluate stability and performance of these systems.

ETEM 3271. Digital Signals. (3) Prerequisite(s): ETEM 3171. Digital signals are important for modern technologies involving high performance data exchange, treatment, and use. In this course, students study and practice methods used in digital signal processing, including sampling and reconstruction, discrete time Fourier and Z transforms, and digital filter design.

ETEM 3281. More Doing and Making. (3) Prerequisite(s): ETME 2111. Pre- or Corequisite(s): ETEM 3181, ETEM 3261. Students will be challenged to apply project design processes to formulate and build complete solutions to complex electromechanical engineering problems. Students collaborate to integrate components and subsystems according to engineering best practices.

ETEM 4000. Special Topics in Electromechanical Engineering Technology. (3) Prerequisite(s): Engineering major or minor, or permission of department. Examination of emerging electromechanical engineering topics and technologies. Coursework builds upon the knowledge the students have gained from their electromechanical engineering technology curriculum. *May be repeated for credit with change of topic.*

ETEM 4010. Special Topics in Energy. (3) Prerequisite(s): Engineering major or minor, or permission of department. Examination of emerging energy-related topics and technologies. Coursework builds upon the knowledge the students have gained from their electromechanical engineering technology curriculum. *May be repeated for credit with change of topic.*

ETEM 4100. Electromechanical Capstone Design I. (2) Prerequisite(s): ETEM 3191; Electromechanical Engineering Technology major and senior standing. First of a two-semester course sequence in which student teams implement a senior-level design project which demonstrates abilities as developed by the coursework taken thus far. Project planning techniques, teamwork, and communication are utilized to make substantial progress toward implementation of a designed solution.

ETEM 4131. Intelligent Industrial Systems. (3) Prerequisite(s): ETEM 3231, ETEM 4161. An overview of intelligent industrial systems using case studies in the fields of energy, transportation, manufacturing, etc. Topics

covered include power delivery and protection, fluid mechanics, artificial intelligence, and process monitoring.

ETEM 4141. Digital Manufacturing Methods. (3) Prerequisite(s): Engineering major or minor, or permission of department. An exploration of the way in which products are manufactured today. Technologies investigated include additive and subtractive production techniques. Modern methods, materials, and processes are discussed.

ETEM 4161. Elements of Automation. (3) Prerequisite(s): Engineering major or minor, or permission of department. Students will explore elements and technologies used in automation such as programmable logic controllers (PLCs), human-machine interfaces (HMIs), and industrial networking using industry-standard equipment. A special focus on troubleshooting and fault detection is demonstrated throughout the course.

ETEM 4200. Electromechanical Capstone Design II. (2) Prerequisite(s): ETEM 4100. A continuation of ETEM 4100 consisting of the development and implementation of the designed solution resulting in written reports, oral presentations, a prototype, and appropriate analysis and testing.

ETEM 4261. Robotics and Cyber-Physical Systems. (3) Prerequisite(s): ETEM 3181. Pre- or Corequisite(s): ETEM 3261. Study of cyber-physical systems in business and industrial operations. Study of complex systems including the implementation and control of autonomous robots and unmanned vehicles. Study of complex systems, including the implementation and control of autonomous robots and unmanned vehicles.

ETEM 4600. Technology Seminar. (1) Prerequisite(s): Engineering major or minor, Senior standing. A forum for conversations and professional knowledge exchange and dissemination. Focus is given to current and emerging applications in the sciences, engineering, and everyday life.

ETEM 4800. Independent Study. (1 to 4) Prerequisite(s): Senior standing and Electrical Engineering Technology major, or permission of department. Individual investigation and exposition of results for a directed project in electrical engineering technology. *May be repeated for credit.*

Fire and Safety Engineering Technology (ETFS)

ETFS 1120. Introduction to Fire Protection. (3) An overview of the development, methods, systems and regulations that apply to the fire protection field. Topics include history, evolution, statistics, suppression, organizations, careers, curriculum, and related subjects. Upon completion, students should be able to demonstrate a broad understanding of the fire protection field.

ETFS 1152. Fire Protection and Safety Law. (3) Provides information about potential legal liabilities encountered every day by fire and safety personnel. Explains how to research, read and understand various statutes, regulations, and cases. Actual cases are presented in detail and

followed by explanations that identify the most important issues facing fire and safety personnel.

ETFS 1201. Introduction to Fire Safety and Occupational Safety Engineering Technology. (2) An introduction to disciplines and professional skills in the fire safety and occupational safety professions. Topics include: academic, personal, and professional development; teamwork; computer skills; oral and written communication skills; choosing career pathways.

ETFS 1220. Introduction to Fire Protection and Prevention. (3) Prerequisite(s): Engineering major or minor. An introduction to the relevant issues one would encounter upon entering a career in fire protection. Provides a fundamental overview of the history and philosophy regarding fire protection and prevention. Students investigate fire prevention methodologies that include fire codes, identification and correction of fire hazards, and the relationships of fire prevention with built-in fire protection systems, fire investigation, and the positive effects of fire and life-safety education.

ETFS 1244. Water-Based Fire Suppression. (3) Provides information relating to the features, design, and operation of water-based sprinkler systems, water supplies for fire protection systems, and hydraulic principles to analyze and to solve water supply problems.

ETFS 2124. Introduction to Fire Prevention. (3) An introduction to fire prevention concepts as they relate to community and industrial operations referenced in NFPA standard 101. Topics include the development and maintenance of fire prevention programs, educational programs, and inspection programs. Upon completion, students should be able to research, develop, and present a fire safety program to a citizens or industrial group, meeting.

ETFS 2126. Fire Investigation and Forensics. (3) Explores the investigation into various types of fires: structure, wildland, automobile, fabric, and chemical. Topics include: fire chemistry and physics, scene analysis, case analysis, arson, the new generation of petroleum products, post-flashover patterns of damage, misuse of post-fire indicators, and documentation.

ETFS 2128. Fire and Municipal Financial Operations. (3) The principles of fire department finances and budgeting including apparatus and equipment purchase, capital improvements, budget preparation and auditing. Discussion of funding sources as well as the obligations of being part of a local/municipal government are explored.

ETFS 2132. Building Construction for Fire Protection. (3) Studies the components of building construction that relate to fire and life safety. The focus of this course is on fire fighter safety. The elements of construction and design of structures are shown to be key factors when inspecting buildings, preplanning fire operations, and operating at emergencies.

ETFS 2220. History of Fire in the US. (3) In-depth discussion and research into the historic fires that shaped today's fire service. Utilizing detailed drawings and the latest technology the course will uncover problems in design and construction, code violations or neglect to manmade or natural causes. What were the lessons learned and corrective measures rendered, with a deeper look into America Burning and its impact to the nation.

ETFS 2230. Hazardous Materials. (3) Focuses on the basic knowledge required to evaluate the potential hazards and behavior of materials considered hazardous. Examines the reasons for chemical behavior of hazardous materials and is designed to improve decision making abilities when hazardous materials are encountered in the workplace or at an emergency scene.

ETFS 2230L. Hazardous Materials Lab. (1) Pre- or Corequisite(s): ETFS 2230. Lab: Exposes the student to monitoring and testing equipment, Personal Protective Equipment(PPE), and techniques for proper hazardous materials classification in the workplace or emergency scene, improving decision making abilities involving hazardous materials

ETFS 2256. Fire Service Community Relations. (3) Fire department public relations both to the community and to the media. Content includes details how the public gains information such as through press releases, press conferences, public information officers, and the prevalence of social media and the impact on the perception of the organization. The fire department's role as public servants is emphasized.

ETFS 2264. Introduction to Fire Behavior. (3) Prerequisite(s): Engineering major or minor. A study of the basic terminology, theories, and fundamentals of how and why fires start, spread, are controlled, and the hazards fire causes to life and property.

ETFS 2264L. Fire Behavior and Combustion Laboratory. (1) Prerequisite(s): Engineering major or minor. Laboratory experiments and hands-on computer simulations to illustrate the concepts presented in ETFS 2264.

ETFS 3103. Fire Behavior. (3) Explores the theories and fundamentals of how and why fires start, spread, and are controlled. Topics include: basic principles of heat transfer, ignition of liquids and solids; fire growth and spread, compartment fire temperatures, and compartment fire phenomena.

ETFS 3103L. Fire Behavior Lab. (1) Pre- or Corequisite(s): ETFS 3103 or permission of department. This course provides instruction and hands-on experience with fire science experiments related to the material discussed in the Fire Behavior course.

ETFS 3113. Fire Safety in the Built Environment. (3) Prerequisite(s): Engineering major or minor. Describes how an acceptable level of fire safety and resilience can be obtained during the design stage of a structure, and how this level can be maintained during the service life of the structure through the enforcement of fire safety regulations. Topics include: fire safety strategies, fire safety regulations and their enforcement, egress design and maintenance, passive and active fire protection systems, hazardous materials and facilities, and the performance-based approaches to fire safety.

ETFS 3123. Industrial Hazards and Electricity. (3) Typical industrial hazards encountered including: compressed gasses, chemicals, bio-toxins, radiation sources, boilers and ovens. Introductory concepts and methods of analysis of AC and DC circuits, electrical switchgear, and rotating machinery. Compliance and reporting issues in an industrial setting. Safety procedures and safety equipment are also discussed in regards to working as a fire safety engineer.

ETFS 3124. Risk Management. (3) Techniques for recognizing and controlling risk, personnel accountability, and safety training for workers. Methodologies for avoidance, abatement, and prevention of safety and health hazards in workplaces are also explored.

ETFS 3141. Fire Safety in Constructed Facilities. (3) Foundational principles of fire and safety related features in constructed facilities as outlined in NFPA 101, Life Safety Code®. Topics include structural materials and assemblies, prescriptive and performance-based design in both new and existing structures. Landmark fires and their influence on the NFPA 101 will be highlighted.

ETFS 3144. Active Fire Protection. (3) Review of fire suppression, alarm, and smoke control systems. Topics include: fixed and portable suppression systems, fire suppression agents and extinguishing mechanisms, fire detection devices, fire protective detection and signaling systems, smoke production in fires and principles of smoke movement and management.

ETFS 3150. Adult Learning Theory in Safety. (1) Prerequisite(s): Junior or Senior Standing. A seminar course that introduces the student to the training needs assessment, design, and delivery skills needed to competently implement industrial training programs.

ETFS 3183. Fire Safety Engineering Problem Analysis. (3) Prerequisite(s): ETFS 3103 and Engineering major or minor. Methods of solving fire safety engineering problems. Topics include: enclosure fire radiation heat transfer calculations; calculations of vent flows in enclosure fires; estimating ignition, flame spread, and heat release rate properties of materials on the basis of experimental data; smoke filling of enclosures; and conduction heat transfer through fire protective materials.

ETFS 3400. Fire Safety/Occupational Safety Practicum. (1 to 4) Prerequisite(s): Junior or Senior standing, cumulative 2.2 GPA, and departmental approval. Students participate in an approved applied practicum designed to allow theoretical and course-based learning in a supervised fire and/or safety related environment. Each practicum experience is individual and is arranged with a contract between the supervising faculty member, the student and the employer. Students must complete the practicum proposal form and identify a faculty member who will direct and evaluate the completed work. Practicum requires a weekly progress report as well as a final report and presentation to be graded by the supervising faculty member. *May be repeated for credit up to 4 credits.*

ETFS 3621. Technology and Innovation in the Fire Service. (3) This seminar explores the progression brought about by technology and innovation on the critical components of the fire service industry. Students will learn the history of many fire service tools such as fire apparatus, fire pumps, personal protective equipment, communication and dispatch equipment and rescue tools. The course will incorporate demonstration of current technology accomplished by visits and presentations by both manufacturers and end users utilizing displays both in person and virtual.

ETFS 3695. Fire Safety Prof. Development Seminar. (1) A series of disciplinary seminars and activities designed to introduce students to basic concepts of professionalism in the fire service. Topics include:

professional ethics, fire department structure and culture, leadership and command issues and lifelong learning.

ETFS 3800. Independent Study. (1 to 3) Prerequisite(s): Junior or Senior standing, cumulative GPA of 2.2, and approval of Fire Safety and Occupational Safety program faculty. Designed to allow students to take responsibility for the direction of their learning about a topic of interest to them. Each independent study is individual and is arranged with a contract between the supervising faculty member and the student. Students must complete the independent study proposal form and identify a faculty member who will direct and evaluate the completed work. Each hour of credit for this course should be comparable to what would be expected in the classroom - 15 hours contact time plus outside work or approximately 30 hours. The project is culminated with a final report and presentation. *May be repeated for credit up to 3 credits.*

ETFS 4123. Community Threat Assessment and Mitigation. (3) Prerequisite(s): Junior or Senior standing. Focuses on the emergency service's responsibility while conducting major operations involving multi-alarm units, and natural and man-made disasters that may require interagency or jurisdictional coordination. Emphasis is on threat assessment and mitigation strategies of potential large scale disasters including but not limited to earthquakes, hurricanes, terrorism, hazardous materials releases, tornadoes, and floods. Topics include: fireground decision making, advanced incident command, command and control, safety, personnel accountability, hazard preparedness, mitigation, response, recovery, evacuation, sheltering, and communications.

ETFS 4126. Case Studies in Fire Forensics. (1) Prerequisite(s): ETFS 2126. Utilizes lecture and case studies of documented fire occurrences to demonstrate the role of scientific protocols in forensic fire engineering. The root-cause analysis of fire occurrence is discussed and how it is documented through fire scene reconstruction.

ETFS 4132. Fireground Hydraulics. (3) Exploration of the application of force, weight, velocity and pressure as it relates to the movement of water on the fire ground. Fire loads and the calculation of needed quantities of water are reviewed. Friction loss and flows are calculated for hand hose lines, supply line and master streams. Problems solved will include nozzle reaction forces, theoretical limits of fire pumps, unusual and complex hose layouts including but not limited to wyes, siamese and supply lines.

ETFS 4243. Research Methodology for Fire Safety and Occupational Safety. (3) Prerequisite(s): Junior or Senior Standing, Department Permission. Application of practical, up-to-date review of fire research and its application. The transfer of research and its implications for fire prevention and protection programs are addressed. Development of a student project and a written report in a specified area in fire administration or fire science technology with faculty supervision. Analytical modeling, technical research, oral and written reporting of progress and findings are required.

ETFS 4272. Fire and Safety Capstone. (3) Prerequisite(s): Senior standing and Fire and Safety Engineering Technology major, or permission of department. Utilization of students' previous coursework to creatively investigate and produce solutions for a comprehensive fire and/or safety engineering technology project.

ETFS 4280. Wildland Fire in America. (3) An overview of the history of wildland fires in the United States. The course explores fires that have had impacts on the study of fire behavior, strategy and tactics for dealing with fires and also includes legislative impacts dealing with ecology and conservation as a result of the fires. The course covers fires from the time of settlement of the United States through contemporary times.

ETFS 4283. Fire Modeling. (3) Prerequisite(s): ETFS 3103, and Engineering major or minor. An introduction to fire modeling calculations and computer-based fire modeling techniques. Simple engineering calculations and various types of computer models are presented, and their use for predictions of fire conditions and occupant evacuation are studied.

ETFS 4285. Fatalities in Wildland Fires. (3) An in depth look at five wildland fires that each resulted in multiple fatalities. The course details circumstances that the five fires have in common such as unexpected or unpredicted fire behavior, questionable decision making, problematic command structure and failure to appreciate the danger of the situation. Particular attention is paid to pertinent details of each fire that led to the loss of life.

ETFS 4323. Advanced Fire Service Administration. (3) A study of management theories, leadership philosophies and strategies for the fire service. Emphasis in the course will be on planning, organizing staffing, and evaluating fire protection services. Public fire education, loss prevention principles, and management of resources particular to fire and emergency services are addressed. Discussion of techniques for assessment of public fire protection and its impact on the community and environment.

ETFS 4344. Structural Fire Safety. (3) Prerequisite(s): ETFS 3103, ETME 3123, and Engineering major or minor. Fundamental knowledge for the design and analysis of structures in fire. Topics include: principles of structural design for fire safety, prescriptive-based and performance-based structural fire engineering approaches, behavior of structural materials (e.g., steel, concrete, and timber) in fire, and fire safety design of typical structural members and their assemblies.

ETFS 4901. Fire Safety Research & Data Analysis. (3) Examines the basic principles of research and methodology for analyzing current fire-related research. The course also provides a framework for conducting and evaluating independent research in the following areas: fire dynamics, fire test standards and codes, fire safety, fire modeling, structural fire safety, life-safety, firefighter health and safety, automatic detection and suppression, transportation fire hazards, risk analysis and loss control, fire service applied research and new trends in fire-related research. The course also focuses on data visualization and how to format data into useful information.

Engineering Technology (ETGR)

ETGR 1100L. Engineering Technology Computer Applications Laboratory. (1) Introduces the use of computer applications required for engineering technologists. Topics include: using the computer to solve technical problems, an introduction to engineering computer applications, the use of standard office software, and the use of scientific calculators.

ETGR 1101. Introduction to Engineering Technology and Construction Management. (1) Prerequisite(s): College of Engineering major. Pre- or Corequisite(s): MATH 1100 or MATH 1101. An introduction to disciplines and professional skills in the engineering technology and construction management professions. Topics include: academic, personal, and professional development; teamwork; engineering design; project planning and implementation; and oral and written communication skills.

ETGR 1103. Technical Drawing I. (3) The fundamentals of technical drawing. Topics include: drawing layouts, sketching, orthographic projections, views, lines, dimensioning techniques, and introduction to Computer Aided Drawing (CAD). Upon completion of the course, students should be able to understand, interpret, and produce basic technical drawings, as well as be familiar with the most common commands of modern computer aided drawing tools such as AutoCAD.

ETGR 1201. Introduction to Engineering Technology. (2) Pre- or Corequisite Course(s): MATH 1100 or MATH 1101. College of Engineering majors only. Permission of department required for non-majors. An introduction to disciplines and professional skills in the engineering technology and construction management professions. Topics include: academic, personal, and professional development; teamwork; engineering design; mathematical problem solving; and oral and written communication skills.

ETGR 2101. Applied Mechanics I. (3) Prerequisite(s): MATH 1103 and Engineering major or minor. Fundamentals and applications of statics to include the analysis of force systems using analytical and graphical methods. Included topics are systems of forces, friction, equilibrium of particles and rigid bodies, distributed force systems, centroids and moments of inertia, and introduction to analysis of structures. In addition, stress, deformation, and strain are presented.

ETGR 2102. Applied Mechanics II. (3) Prerequisite(s): ETGR 2101 with grade of C or above; and Engineering major or minor. Fundamentals of mechanics of deformable bodies. Topics of study include building loads, stress and strain, thermal deformation and stress, axial load, statically indeterminate axially loaded members, the principle of superposition, torsion, bending and shear stresses in beams, deflection of beams, transformation of stress and strain, Mohr's circle, and stability and buckling of columns.

ETGR 2106. Electronic Circuits and Devices. (3) Prerequisite(s): MATH 1103 and Engineering major or minor. An introduction to AC and DC circuits. Simple series and series-parallel circuits are used to illustrate applications of Ohm's Law and Kirchhoff's Laws. Power in DC resistive circuits are discussed. Sine waves, complex numbers and phasors are introduced to show their applications to analysis of AC circuits. Capacitors and inductors and their effects are covered.

ETGR 2230. Occupational Safety. (3) An overview of occupational safety which introduces the numerous safety issues commonly found throughout the world. Topics include: ergonomics, industrial hygiene, accident causation, hazardous materials, health- and safety-related organizations, code compliance, and national standards that address health and safety.

ETGR 2272. Engineering Analysis II. (3) Prerequisite(s): MATH 1121 or MATH 1241 with grade of C or above; and Engineering major or minor. A

continuation of the study of engineering problem-solving procedures utilizing integral calculus. Topics include: integration, areas, volumes, centroids and moments of inertia by integration and multivariate calculus to include partial derivatives, and double integration.

ETGR 3000. Special Topics in Engineering Technology. (1 to 4) Prerequisite(s): Senior standing and Engineering Technology major; or permission of department. Examination of specific new areas which are emerging in the various fields of engineering technology. The course builds upon the knowledge the students have gained from their engineering technology curriculum. *May be repeated for credit.*

ETGR 3171. Engineering Analysis III. (3) Prerequisite(s): ETGR 2272 or MATH 1242 with grade of C or above; and Engineering major or minor. A continuation of engineering analysis which includes additional topics and applications in differential equations and linear algebra.

ETGR 3222. Engineering Economics. (3) Prerequisite(s): Engineering major or minor. Principles of evaluating alternative engineering proposals. Compound interest formulas and applications, present worth, equivalent uniform annual value, rate of return, depreciation and depletion, economic feasibility of projects.

ETGR 3295. Multidisciplinary Professional Development. (1) Prerequisite(s): Junior or Senior standing; and Engineering major or minor. A series of multidisciplinary and disciplinary seminars and activities designed to introduce students to basic concepts of professionalism in engineering. Topics include: global, societal, and contemporary issues of current interest such as leadership, entrepreneurship, ethics, and professional licensure. Each course section is restricted to major disciplines in engineering technology. Sections may be cross-listed with more than one engineering major discipline.

ETGR 3695. Engineering Technology Practicum Seminar. (1) Prerequisite(s): ENGR 3500 and Engineering major or minor. Required during the semester immediately following each work assignment for students enrolled in ENGR 3500 for presentation of engineering reports (verbal and oral) on work done the prior semester. *May be repeated for credit.*

ETGR 4100. Capstone Design Project I. (2) Prerequisite(s): ETME 3100 (for Mechanical Engineering Technology students); Engineering major or minor; Senior standing; and completion of all lower-division courses and deficiencies. ETEM 3281 (*for Electrical Engineering Technology students*); ETME 3113; ETME 3143 or ETME 3250; ETME 3150; and ETME 3213 (*for Mechanical Engineering Technology students*). First of a two-semester course sequence in which student teams implement a Senior-level design project which demonstrates abilities as developed by the coursework taken thus far. Project planning techniques are utilized to make substantial progress toward implementation of a design solution.

ETGR 4200. Capstone Design Project II. (2) Prerequisite(s): ETGR 4100 and Engineering major or minor. Second of a two-semester course sequence in which student teams continue to implement a Senior-level design project which demonstrates abilities as developed by the coursework taken thus far. The design solution developed in the first semester is completed and evaluated during the second semester. The primary engineering results delivered is a set of rational decisions, where the rationality of those decisions are supported by the appropriate

analysis and testing. The quality of the design is usually reflected in a prototype of either the hardware or software system.

ETGR 4272. Engineering Analysis IV. (3) Prerequisite(s): ETGR 2272 or MATH 1242 with grade of C or above; STAT 1220 with grade of C or above; and Engineering major or minor. A continuation of engineering analysis to include additional topics and applications in vector operations, probability, and statistics.

ETGR 4301. Environmental Pollution Control. (3) Cross-listed Course(s): ETGR 5301. Prerequisite(s): CHEM 1200 or above, MATH 1100 or above; Engineering major or minor; and Junior or Senior standing. The major aspects of preventing and controlling air, water, and solid-waste pollution and disposal. Topics include: environmental standards and regulations, engineering controls, remediation techniques, sampling and monitoring, and environmental toxicology.

ETGR 4302. Industrial Hygiene. (3) Cross-listed Course(s): ETGR 5302. Prerequisite(s): ETGR 2230, CHEM 1200 or above, MATH 1100 or above, and PHYS 1101 or above; and Junior or Senior standing. Introduces the industrial hygienist's role in characterizing chemical, physical, and biological hazards in the workplace. Topics include: occupational standards and regulations, indoor air quality, ionizing and non-ionizing radiation, thermal stress, sampling/monitoring techniques, personal protective equipment, engineering controls, and program management.

ETGR 4303. Applied Ergonomics and Human Factors. (3) Cross-listed Course(s): ETGR 5303. Prerequisite(s): ETGR 2230; MATH 1100 or above; PHYS 1101 or above; and Junior or Senior standing. An overview of the physiological, biomechanical, and psychological concepts related to workplace layout, machine tools, and work methods. An emphasis is placed on the control and prevention of injuries from over-exertion and related musculoskeletal disorders.

ETGR 4305. System Safety Design and Management. (3) Cross-listed Course(s): ETGR 5305. Prerequisite(s): ETGR 2230; STAT 1220; and Junior or Senior standing. Application of the techniques and concepts of system safety methodologies and process safety management. Emphasis on the application of scientific, design, and management principles incorporating safety audits, safety management, risk assessment, loss control, and statistical applications across all phases of a system life cycle.

Mechanical Engineering Technology (ETME)

ETME 1111. CAD Modeling I. (3) Introduces the concepts of technical drawing and its relationship to the mechanical design process using a feature-based parametric modeler such as SolidWorks. Topics include: sketching, orthographic projections, pictorial views, dimensioning techniques, and introduction to Computer-Aided Design (CAD).

ETME 1112. CAD Modeling II. (3) Prerequisite(s): ETME 1111 with grade of C or above. A continuation of ETME 1111. Introduces the student to advanced modeling techniques employed in Computer-Aided-Drawing (CAD). Topics include: the use of linked features in drawings, traditional and geometric tolerancing, custom templates, assemblies, and basic animation.

ETME 2100. Sophomore Design Practicum. (2) Prerequisite(s) ETGR 1101 or ETGR 1201 with grade of C or above; and ETME 1112 with grade of C or above; and Engineering major or minor. Corequisite(s): ETME 2100L. A Sophomore-level design practicum focused on a simple, defined mechanical design challenge. Projects are completed in teams and introduce students to the design process, project management, machine shop fabrication techniques, memo style report writing and final project demonstrations. Also reinforces topics learned in previous courses such as CAD modeling, documentation generation (drawings), and analytical modeling.

ETME 2100L. Sophomore Design Practicum Laboratory. (1) Prerequisite(s): and Engineering major or minor. Corequisite(s): ETME 2100. A Sophomore-level design practicum focused on a simple, defined mechanical design challenge. Projects are completed individually and introduce students to the design process, project management, machine shop fabrication techniques, memo style report writing and final project demonstrations. Also reinforces topics learned in previous courses such as CAD modeling, documentation generation (drawings), and analytical modeling.

ETME 2101. Applied Mechanics I. (3) Prerequisite(s): MATH 1103 or higher. Fundamentals and applications of statics to include the analysis of force systems using analytical and graphical methods. Included topics are systems of forces, friction, equilibrium of particles and rigid bodies, distributed force systems, centroids and moments of inertia, and introduction to analysis of structures. In addition, stress, deformation, and strain are presented.

ETME 2102. Mechanisms. (3) Prerequisite(s): ETME 1111 with grade of C or above; MATH 1121 or MATH 1241 with grade of C or above; and PHYS 1101 or PHYS 2101 with grade of C or above; and Engineering major or minor. Plane motion and devices used to generate plane motion. Topics include: analysis of displacement, velocity, acceleration, gears, cams, and other mechanical systems.

ETME 2111. CAD Fundamentals. (3) Prerequisite(s): ENGR 1303 with grade of C or above. Instructs in the fundamentals of Computer Aided Design (CAD) for mechanical parts and assemblies. The CAD user interface is introduced to facilitate the process of creating 3D models of parts and assemblies. An introduction to drawings is presented to enable creation of drawing documentation appropriate for industry standards.

ETME 2130. Applied Materials and Manufacturing I. (3) Prerequisite(s): ETGR 1101 with grade of C or above, and Engineering major or minor. Presents a fusion of material science and the applied processes used to form engineering materials into useful components or assemblies. This course is part 1 of a two-segment series. It focuses on metallic materials with crystalline structure, and the specific processes used to form and finish these materials. Practical instruction in theory of machine tool operation, casting, rolling and joining is presented. Alloying, heat treatment, corrosion and operational environment appropriate for the subject materials is discussed.

ETME 2131. Applied Materials and Manufacturing II. (3) Prerequisite(s): ETME 2130, and Engineering major or minor. This course is part 2 of a two-segment series. Focuses on non-metallic materials, polymer-based materials, ceramics, composite materials, and materials with amorphous atomic structure. A fusion of material science and the applied processes used to form the subject engineering materials into

useful components or assemblies is presented. Molding autoclaving, polymer cross-linking, and operational environment appropriate for the subject materials are discussed. Manufacturing quality systems are also explored.

ETME 2141. Applied Engineering Materials. (3) Prerequisite(s): ETGR 1101 with grade of C or above OR ETGR 1201 with grade of C or above OR ENGR 1301 with grade of C or above. An introduction to structure, properties, and applications of metallic, plastic, ceramic and composite materials. Material treatments and testing of properties will also be discussed.

ETME 2142. Applied Manufacturing. (3) Prerequisite(s): ETME 2141. A survey of manufacturing process families which include casting material removal, deformation processes, consolidation processes, and additive processes.

ETME 2200. Project Design and Management. (3) Prerequisite(s): ENGR 1300 with C or better. Failure to plan is a plan to fail. Successful products and projects come from proper prior planning. Within this course, students will get to learn the concepts, frameworks, and tools important to project management. Topics include project planning, risk assessment, scope definition, and interpersonal skills with stakeholders.

ETME 2207. Kinematics. (3) Prerequisite(s): ETME 2111 with C or better, MATH 1241 with C or better, and PHYS 2101 with C or better. This course explores the geometric relationship of rigid bodies in motion. Motion within a mechanical system must be analyzed in order to accomplish the intent of the desired motion. This course instructs in the method of analysis of mechanical components and the mechanical synthesis to achieve a desired motion.

ETME 2220. Circuit Fundamentals. (3) Prerequisite(s): MATH 1103 or higher. In this foundation course, students will learn the principles of DC and AC circuits. Topics of study include basic components, laws, and methods used in circuit analysis. Concepts of DC and AC voltage, current and power will be explored. Students will be instructed on the correct and safe use of equipment and computer tools used in circuits testing and troubleshooting.

ETME 2222. Instrumentation and Measurements. (3) Prerequisite(s): ETME 2220 and ENGR 1302 with C or better. An introduction to measurements and instrumentation of physical variables in manufacturing processes or mechanical systems. Physical phenomena to be measured include: geometrical dimensions, force, position, velocity, acceleration, torque, object distance, temperature and strain. The course will cover measurement principles, sensor selection, design and implementation, data acquisition and statistical analysis of acquired data.

ETME 2290. Machining Laboratory. (1) Prerequisite(s): Engineering Technology Major or Minor and sophomore standing. Machining is an established manufacturing process that still drives innovations in companies around the world. In this course students will get hands-on experience with machining equipment to better their understanding of manufacturing processes. Topics include but are not limited to laboratory safety, milling machine use, grinding, lathe use, product design, and measurement.

ETME 2600. Professional Development Seminar for Engineering Technologists. (1) Becoming a professional is hard. Navigating the industry and finding a job can be even harder. This course is designed to improve students' soft skills and introduce them to the basic concepts of professionalism in engineering to make them real world ready. Topics include self-branding, professional etiquette, career preparation, entrepreneurship, ethics, cultural diversity, and professional licensure.

ETME 3100. Junior Design Practicum. (3) Prerequisite(s): ETME 2100, and Engineering major or minor. Pre- or Corequisite(s): ETME 3133. Corequisite(s): ETME 3100L. A Junior-level design studio focused on a more complex, but still completely defined, thermo-fluids and energy system based design challenge. Projects are completed in teams and introduce students to group project dynamics, advanced machine shop techniques, data acquisition and analysis. Also reinforces topics learned in previous courses such as the design process, project management, formal report style writing, math modeling (Excel, MATLAB, MathCad or EES), documentation generation (Drawings + Procedure), final project demonstrations, and analytical modeling.

ETME 3100L. Junior Design Practicum Laboratory. (1) Prerequisite(s): Engineering major or minor. Corequisite(s): ETME 3100. A Junior-level design practicum focused on a more complex, but defined, thermo-fluids and energy system based design challenge. Projects are completed in teams (3 to 4) and introduce students to group project dynamics, advanced machine shop techniques, data acquisition and analysis. Also reinforces topics learned in previous courses such as the design process, project management, formal report style writing, math modeling (Excel, MATLAB, MathCad and/or EES), documentation generation (Drawings + Procedure), final project demonstrations, and analytical modeling. Meets for one 3-hour laboratory session each week.

ETME 3107. Kinetics. (3) Prerequisite(s): ETME 2101 with C or better, ETME 2207. Pre- or Corequisite(s): ETGR 2272 or MATH 1242. This course explores the relationship between the forces acting on a body of mass and the motion of the body. Apply kinetic principles to analyze forces and motion.

ETME 3113. Dynamics. (3) Prerequisite(s): ETGR 2101 with grade of C or above, and Engineering major or minor. Pre- or Corequisite(s): ETGR 2272 or MATH 1242. The dynamic behavior of particles; translation, rotation and plane motion of a rigid body, the principles of conservation of energy and momentum.

ETME 3123. Strength of Materials. (3) Prerequisite(s): ETGR 2101 with grade of C or above or ETME 2101 with grade of C or above; and Engineering major or minor. Stress-strain relationships resulting from direct loads, torsional loads and bending loads, and the results obtained from applying more than one of these loads simultaneously. Beam deflection and column loading.

ETME 3123L. Stress Analysis Laboratory. (1) Prerequisite(s): WRDS 1103 or WRDS 1104 with a grade of C or above; and Engineering major or minor. Pre- or Corequisite(s): ETME 3123. Experiments illustrating stress-strain relationships in engineering materials and the use of brittle coating, photoelasticity and electrical-resistance strain gages.

ETME 3133. Fluid Mechanics. (3) Prerequisite(s): ETGR 2101 with grade of C or better OR ETME 2101 with grade of C or better, and Engineering major or minor. Pre- or Corequisite(s): MATH 1121 or MATH 1241 or

higher. Fundamental principles of fluid mechanics. Topics include: manometry, buoyancy, forces on submerged bodies, boundary layers, flow over surfaces, Bernoulli's equation with applications, orifices, pipe losses, and an introduction to hydrodynamics.

ETME 3143. Thermodynamics. (3) Prerequisite(s): ETME 3133, and Engineering major or minor. Pre- or Corequisite(s): ETGR 2272 or MATH 1242 with grade of C or above. Fundamentals of thermodynamics including work and heat; classical approach to first and second laws of thermodynamics; ideal gas, entropy, reversibility, irreversibility, and study of various processes and cycles.

ETME 3150. Applied CAD Modeling and Simulation. (3) Prerequisite(s): ETME 1111 with grade of C or above; ETME 2102; ETME 3123; and Engineering major or minor. Introduces the use of some of the tools available for the analysis of parametrically-constructed CAD models. Topics include: the finite element method, finite element analysis (FEA), the use of FEA for stress analysis, thermal analysis, and motion studies, and the important distinctions between FEA results, theoretical results, and experimental results.

ETME 3163. Instrumentation and Controls. (3) Prerequisite(s): ETGR 2106 and Engineering major or minor. Introduction to instrumentation for measurement and control of physical variables, with emphasis on electronic systems. Review of basic circuit analysis, electrical instruments, sensors and measurement principles and a survey of automatic controls from a systems point of view.

ETME 3200. Junior Design Practicum. (3) Prerequisite(s): ETME 2200, ETME 2290. A Junior-level design studio focused on a more complex, but still completely defined design challenge. Projects are completed in teams and introduce students to group project dynamics, advanced machine shop techniques, data acquisition, and analysis. Also reinforces topics learned in previous courses such as the design process, project management, formal report style writing, math modeling (Excel, MATLAB, MathCad, or EES), documentation generation (e.g. drawings, procedures), final project demonstrations, and analytical modeling.

ETME 3213. Machine Design I. (3) Prerequisite(s): ETME 2102; ETME 2130 or ETME 2141; and ETME 3123; and Engineering major or minor. Analysis and design of clutches, brakes, belts and roller chain. Indeterminate normal loading, superposition of stresses and deflections, compound stresses, columns, and fatigue. Theories of failure. Shaft design, deflections of shafts with non-uniform moments of inertia involving computer verification. Antifriction bearings, engineering materials, helical compression springs. Small mechanical component and system designs.

ETME 3223. Machine Design II. (3) Prerequisite(s): ETME 3213 and Engineering major or minor. A continuation of ETME 3213 with emphasis on new methods of problem solving and opportunities to integrate previously attained skills and knowledge into the design and optimization of small machine systems.

ETME 3250. Principles of Thermal Engineering. (3) Prerequisite(s): ETME 3133. Pre- or Corequisite(s): ETGR 2272 or MATH 1242. The first law of thermodynamics, including work and heat, as well as thermodynamic properties and devices. The course covers steady state and transient conduction, forced and natural convection.

ETME 4000. Special Topics in Mechanical Engineering Technology. (3) Prerequisite(s): Engineering major or minor, or permission of department. Examination of specific new areas which are emerging in the various fields of Mechanical Engineering Technology. The course builds upon the knowledge the students have gained from their Mechanical Engineering Technology curriculum. *May be repeated for credit with change of topic.*

ETME 4010. Special Topics in Energy. (3) Prerequisite(s): Engineering major or minor, or permission of department. Examination of emerging energy-related topics and technologies. Coursework builds upon the knowledge the students have gained from their Mechanical Engineering Technology curriculum. *May be repeated for credit with change of topic.*

ETME 4020. Special Topics in Electromechanical. (3) Prerequisite(s): Engineering major or minor, or permission of department. Examination of emerging electromechanical-related topics and technologies. Coursework builds upon the knowledge the students have gained from their Mechanical Engineering Technology curriculum. *May be repeated for credit with change of topic.*

ETME 4100. Mechanical Capstone Design I. (2) Prerequisite(s): ETME 3100 or ETME 3200; Mechanical Engineering Technology major and senior standing. Pre- or Corequisite(s): ETME 3113; ETME 3143 or ETME 3250; ETME 3150; and ETME 3213. First of a two-semester course sequence in which student teams implement a senior-level design project which demonstrates abilities as developed by the coursework taken thus far. Project planning techniques, teamwork, and communication are utilized to make substantial progress toward implementation of a designed solution.

ETME 4111. Advanced CAD Modeling. (3) Prerequisite(s): ETME 2111 with C or better, OR ETME 1112 with C or better. Instructs in the advanced features of Computer Aided Design (CAD) for mechanical parts and assemblies. Advanced features include: part and assembly modeling of complex parts, multi-bodied parts, surfacing, molded parts, analysis of sustainability and costing, tolerance analyst, and collaboration tools.

ETME 4200. Mechanical Capstone Design II. (2) Prerequisite(s): ETME 4100. A continuation of ETME 4100 consisting of the development and implementation of the designed solution resulting in written reports, oral presentations, a prototype, and appropriate analysis and testing.

ETME 4244. Applied Heat Transfer. (3) Prerequisite(s): ETME 3143, and Engineering major or minor. Basic principles of heat transfer. Theory and applications of conduction, free and forced convection and radiation heat transfer. Heat exchangers and heat transfer measurement.

ETME 4250. Thermal Engineering Applications. (3) Prerequisite(s): ETME 3250. The second law of thermodynamics, entropy, and irreversibilities culminating in the analysis of thermodynamic devices and cycles. The course covers heat transfer devices including fins and heat exchangers as well as multi-mode problems involving conduction, convection, and radiation.

ETME 4275. Heating, Ventilating, and Air Conditioning. (3) Pre- or Corequisite(s): ETME 4250. Fundamentals of moist air properties, basic air conditioning processes, heat transfer in building structures, heating and cooling load calculations, air distribution systems, and duct design.

ETME 4250L. Thermal Fluids Laboratory. (1) Prerequisite(s): WRDS 1103 or WRDS 1104 with grade of C or above. Pre- or Corequisite(s): ETME 3250. Laboratory experiments related to the areas of fluid mechanics, heat transfer, and thermodynamics. Three hours of laboratory each week.

Entrepreneurship (ENTR)

ENTR 3000. Special Topics – Entrepreneurship. (3) Prerequisite(s): Junior or Senior in good standing and enrollment in the Entrepreneurship Certificate program. Serves as a special topics course for the undergraduate certificate in entrepreneurship. *May be repeated for credit with change of topic and for up to 6 credit hours.*

ENTR 3276. Recognizing Entrepreneurial Opportunities. (3) Prerequisite(s): Junior or Senior standing, and enrollment in the Undergraduate Certificate in Entrepreneurship program. Helps students take the first step as an entrepreneur. Before entrepreneurs can organize ventures around innovative solutions to exploit opportunities, entrepreneurs benefit from first recognizing and evaluating opportunities. Students achieve two course objectives fundamental to being an entrepreneur: (1) students put together an opportunity portfolio - a detailed understanding and analysis of an industry/technology and all of the situational conditions that inform the opportunity within that industry/technology context; and (2) based on this opportunity portfolio, students are tasked with pitching a potential solution to a specific opportunity.

ENTR 3278. Experiential Entrepreneurship. (3) Prerequisite(s): Junior or Senior standing; Enrollment in the Entrepreneurship Certificate Program. Entrepreneurs work in contexts where they cannot control what ultimately occurs. As means to increase students' self-confidence and mental fortitude for uncertain contexts, this course seeks to present students with conditions of uncertainty and complexity. It involves different approaches, from engaged learning exercises, individual and team projects, to interactions with entrepreneurs.

ENTR 3279. Entrepreneurial Action and Organizing. (3) Prerequisite(s): Junior or Senior standing; Enrollment in the Entrepreneurship Certificate Program. Many individuals often recognize the same opportunities, but only some individuals become entrepreneurs by taking the actions to exploit the opportunity, and only a few of the entrepreneurs become successful by exploiting the opportunity effectively. This course provides students with an understanding of how they can shift from recognizing opportunities to taking actions to exploit the opportunities to create value for a market and for society. It involves a combination of readings, casework, and experiential exercises aimed at helping students learn from real entrepreneurs' experiences, but also providing initial exercises to allow students to put into action what they have learned.

Exercise Science (EXER)

EXER 1099. Topics in Games/Exercise/Sports. (1 to 3) Specialized topics or innovations in games, exercise, and sports. *May be repeated for credit with change of topic.*

EXER 1202. Weight Training. (1) Prerequisite(s): Pre-Kinesiology or Exercise Science major. The foundations of creating, implementing, and performing a safe and effective exercise routine.

EXER 1204. Aerobic Fitness. (1) Prerequisite(s): Pre-Kinesiology or Exercise Science major. Exercise programming designed to develop and maintain cardiovascular fitness through aerobic activity choreographed to music.

EXER 1205. Beginning Yoga. (1) Prerequisite(s): Pre-Kinesiology or Exercise Science major. An introduction to the practice and philosophy of yoga. Students learn how to apply the principles of yoga to enhance physical health and mental well-being.

EXER 1208. Walk, Jog, Run. (1) Prerequisite(s): Pre-Kinesiology or Exercise Science major. Principles of walking, jogging, and running as modes for improving and maintaining cardiovascular health and physical fitness.

EXER 1222. Racquet Sports. (1) Prerequisite(s): Pre-Kinesiology or Exercise Science major. Basic skills, tactics, safety, and rules of racquetball, court and table tennis, squash, and badminton.

EXER 1250. Volleyball. (1) Prerequisite(s): Pre-Kinesiology or Exercise Science major. The rules, fundamental skills, and strategies of the game of volleyball. Games are played each class to sharpen students' skills, knowledge, and sportsmanship.

EXER 1263. Body Shaping. (1) Prerequisite(s): Pre-Kinesiology or Exercise Science major. Safe and appropriate implementation of various resistance training modalities for the improvement of muscular fitness.

EXER 1290. First Aid: Responding to Emergencies. (3) The knowledge and skills associated with being a first responder in case of injury or sudden illness. Qualifying students may receive certifications in: Responding to Emergencies-First Aid, CPR/AED for the Professional Rescuer, Preventing Disease Transmission (Bloodborne Pathogens Training), and Automated External Defibrillator (AED). Open to all students during Summer session. Not accepted for those wanting the Athletic Training major. There is a \$20 additional course fee.

EXER 2101. Foundations of Physical Conditioning. (3) Prerequisite(s): Pre-Kinesiology or Exercise Science major. The basic science and application of physical training programs designed to improve and maintain physical fitness. Emphasis on introducing the core competencies of the Exercise Science degree program. Designed to place the student in the practitioner's role of developing and leading fitness programs for individuals and/or groups.

EXER 2150. Introduction to Exercise Science. (3) Prerequisite(s): Pre-Kinesiology or Exercise Science major. Introduction to the study of exercise science with an emphasis on key concepts, knowledge, skills, practices, workplace settings, and trends.

EXER 2168. Human Anatomy and Physiology for the Health Professions. (3) Prerequisite(s): Pre-Kinesiology or Pre-Nursing major. Fundamentals of the anatomy and physiology of the human body for the health professions. May be taken as an equivalent of BIOL 2273. May not be attempted more than twice.

EXER 2168L. Human Anatomy and Physiology for the Health Professions Laboratory. (1) Prerequisite(s): Pre-Kinesiology or Pre-Nursing major. The accompanying lab to EXER 2168. One laboratory period of three hours a week. May be taken as an equivalent of BIOL 2273L.

EXER 2169. Human Anatomy and Physiology for the Health Professions II. (3) Prerequisite(s): EXER 2168 and EXER 2168L with grades of C or above. Structure, function, and integration of human body systems. Continuation of EXER 2168. EXER 2169 may be taken in place of BIOL 2274 for Exercise Science majors.

EXER 2169L. Human Anatomy and Physiology for the Health Professions II Laboratory. (1) Prerequisite(s): EXER 2168 and EXER 2168L with grades of C or above, and Pre-Exercise Science or Pre-Nursing major. The accompanying lab to EXER 2169. One laboratory period of three hours a week. EXER 2169L may be taken in place of BIOL 2274L for Exercise Science majors.

EXER 2201. Exercise Science Undergraduate Teaching Assistant. (1 to 3) Prerequisite(s): EXER major; Instructor approval required. Undergraduate teaching assistants (UGTAs) assist faculty with the administration of courses while being introduced to best practices in teaching and learning. All UGTAs are expected to meet with the supervising faculty member once a week, attend all class meetings of the course in which they are assisting, hold a minimum of two office hours per week, and complete other activities as requested by the instructor. *May be repeated once for credit.*

EXER 2202. Group Fitness Instructor Training. (3) Prepares students with the cognitive knowledge and physical skills necessary to pass a Group Fitness Instructor National Certification Exam.

EXER 2290. Emergency Medical Response. (3) Prerequisite(s): Exercise Science major; open to all students during Summer Session. The knowledge and skills necessary to work as an emergency medical responder (EMR) to help sustain life, reduce pain and minimize the consequences of injury or sudden illness until more advanced medical care arrives and takes over. Qualifying students may receive certifications in: Emergency Medical Response, CPR/AED for the Professional Rescuer and Healthcare Provider, Preventing Disease Transmission (Bloodborne Pathogens Training). There is a \$20 course fee.

EXER 2294. Care and Prevention of Athletic Injuries. (3) Prerequisite(s): Pre-Kinesiology or Exercise Science major. Focus on the healthcare competencies necessary for the prevention, emergency management and acute care of athletic related injuries. Also provides an introduction to the role of the Certified Athletic Trainer in providing health to the physically active individual.

EXER 2295. Care and Prevention of Athletic Injuries Laboratory. (1) Prerequisite(s): Pre-Kinesiology or Exercise Science major. Focus on the psychomotor competencies and clinical proficiencies necessary for the prevention, emergency management and acute care of athletic-related injuries.

EXER 2296. Evidence-Based Practice. (3) Prerequisite(s): Departmental Honors students with permission of instructor. Gain knowledge of critical appraisal and experience in the practice of evidence based healthcare.

EXER 2299. Medical Terminology. (3) Students learn proper medical and scientific terminology usage within the context of human anatomy and physiology, and pathology.

EXER 2303. Personal Trainer Certification Preparation. (3) Prepares students in the cognitive knowledge and physical skills necessary to pursue national certification as a Personal Trainer.

EXER 2333. Baseball Through History and Playing I (1800s-1947). (3) Half of this course explores the socioeconomic climate of baseball's origins from the 1800s up to Jackie Robinson's debut in 1947. The other half provides activity-oriented instruction that introduces softball's emergence from baseball through basic skills, rules, and strategies of the game.

EXER 2334. Baseball Through History and Playing II (1947-Present). (3) Half of this course explores the socioeconomic climate of baseball from Jackie Robinson's debut in 1947 to present times. The other half provides activity-oriented instruction that introduces softball's emergence from baseball through basic skills, rules, and strategies of the game.

EXER 3099. Movement Problems/Topics. (1 to 6) Prerequisite(s): Permission of instructor. Movement problems/topics chosen by the student which relate to special areas of interest. *May be repeated for credit with permission of instructor.*

EXER 3100. Organization and Administration of Exercise Science. (3) Prerequisite(s): Exercise Science major and permission of instructor or SPOA students seeking Sports Analytics Certificate. Provides the necessary knowledge and skills of organization and administration in various settings within exercise science field. Additionally, students gain the knowledge and skills in professional development and responsibility necessary to function as a professional in exercise science.

EXER 3198. Applied Kinesiology. (3) Prerequisite(s): Grades of C or higher in EXER 2168 or BIOL 2273, EXER 2168L or BIOL 2273L, EXER 2169 or BIOL 2274, EXER 2169L or BIOL 2274L, CHEM 1251 or CHEM 1203, CHEM 1251L or CHEM 1203L, EXER 2101, EXER 2150, STAT 1220 or STAT 1221 or STAT 1222; Exercise Science major; Pre-Exercise Science major. The study of musculoskeletal anatomy and how it relates to normal function of the human body.

EXER 3260. Nutrition for the Physically Active. (3) Prerequisite(s): Grades of C or higher in EXER 2168 or BIOL 2273, EXER 2168L or BIOL 2273L, EXER 2169 or BIOL 2274, EXER 2169L or BIOL 2274L, CHEM 1251 or CHEM 1203, CHEM 1251L or CHEM 1203L, EXER 2101, EXER 2150, STAT 1220 or STAT 1221 or STAT 1222; Exercise Science major; Pre-Exercise Science major. Introduction to principles and concepts of nutrition and how dietary practices affect health and disease.

EXER 3280. Exercise Physiology: Foundation and Theory. (3) Prerequisite(s): EXER 2169 or BIOL 2274 with grade of C or above; and Exercise Science major; Pre-Exercise Science major. The physiological responses to exercise, adaptations to exercise training, and the

mechanisms responsible for them in relation to both health fitness and athletic performance.

EXER 3285. Principles of Strength and Conditioning. (3) Prerequisite(s): EXER 2298 and EXER 3280 with grades of C or above, and Exercise Science major. The biomechanical and physiological principles of strength and conditioning for the physically active.

EXER 3285L. Principles of Strength and Conditioning Lab. (1) Prerequisite(s): EXER 3285 and Exercise Science major with Concentration in Strength and Conditioning, or permission of instructor. Lecture material and laboratory experiences for the biomechanical and physiologic principles of strength and conditioning programs. Strong focus on practical application of strength and conditioning principles for training and testing techniques for special populations, apparently healthy populations, and athletes.

EXER 3286. Exercise Testing: Foundation and Theory. (3) Prerequisite(s): EXER 3280 with grade of C or above, and Exercise Science major. Methods, instruments and protocols for collecting and interpreting health and fitness data to be used for pre-participation screening and individual and group exercise prescription.

EXER 3286L. Exercise Testing Lab. (1) Prerequisite(s): Exercise Science major. Corequisite(s): EXER 3286. Practitioner lab in the use of appropriate data collection methods and protocols.

EXER 3287. Exercise Testing: Principles and Applications. (3) Prerequisite(s): EXER 3280 with grade of C or above. Corequisite(s): EXER 3286. Application of principles using laboratory experiences to develop skills appropriate to the domain of exercise testing. Industry standard data collection instruments, methods, and protocols are used. Supports the content presented in EXER 3286.

EXER 3288. Upper Body Injury Evaluation. (3) Orthopedic evaluation competencies for assessing athletic-related injuries and pathology to the upper extremities, cervical and thoracic spine.

EXER 3289. Upper Body Injury Evaluation Laboratory. (1) Corequisite(s): EXER 3288. Practitioner lab focusing on the psychomotor competencies and clinical proficiencies related to upper extremity, cervical and thoracic spine injury, and pathology assessment.

EXER 3290. Lower Body Injury Evaluation. (3) Prerequisite(s): EXER 2295 and EXER 2298. Orthopedic evaluation competencies for assessing athletic-related injuries and pathology to the lower extremities and lumbar spine.

EXER 3291. Therapeutic Modalities. (3) Prerequisite(s): EXER 2295 and EXER 2298. Theories and techniques of therapeutic modalities within the scope of athletic training.

EXER 3292. Therapeutic Modalities Laboratory. (1) Corequisite(s): EXER 3291. Practitioner lab focusing on the psychomotor competencies and clinical proficiencies related to the use of therapeutic modalities within the scope of athletic training.

EXER 3293. General Medical and Psychosocial Aspects of Athletic Training. (3) Prerequisite(s): EXER 3290 and EXER 3295. Cognitive, psychomotor, and affective competencies and proficiencies that the

entry-level certified athletic trainer must possess to recognize, treat, and refer, when appropriate, the general medical conditions, psychosocial situations, and disabilities of athletes and others involved in physical activity.

EXER 3295. Lower Body Injury Evaluation Laboratory. (1) Corequisite(s): EXER 3290. Practitioner lab focusing on the psychomotor competencies and clinical proficiencies related to lower extremity and lumbar spine injury evaluations.

EXER 3298. Therapeutic Exercise Foundations. (3) Prerequisite(s): EXER 3290 and EXER 3295. Study of the theory and principles that guide the application of therapeutic exercise.

EXER 3330. Motor Development & Pedagogy. (3) Prerequisite(s): Must be enrolled as an Exercise Science major. Introduction to motor-development principles that impact people from birth through adulthood, including progressions and regressions in cognitive, motor, affective, and physical domains. After students learn pedagogical strategies that reflect these principles, they will apply them by teaching age-appropriate motor activities at a movement-based program.

EXER 3333. Pedagogy in Exercise Science. (3) Prerequisite(s): Exercise Science major. Best practices in teaching exercise, physical activity, and lectures in an exercise-science context. Covers brain-based learning theory and strategies to plan and teach individuals, small classes, or large groups.

EXER 3400. Athletic Training Clinical I. (2) Prerequisite(s): EXER 2295 and EXER 2298. Acquisition and application of clinical proficiencies and psychomotor competencies necessary for the entry-level athletic trainer. Students must complete approximately 20 hours of clinical experience per week at an approved athletic training clinical agency.

EXER 3401. Athletic Training Clinical II. (2) Prerequisite(s): EXER 3400. Continuation of EXER 3400. Students must complete approximately 20 hours of clinical experience per week at an approved athletic training clinical agency.

EXER 3490. Exercise Science Internship. (3) Prerequisite(s): Exercise Science major, and EXER 2290 and EXER 3660 with grades of C or above. Application of acquired knowledge and skills in practitioner settings. Requires a minimum of 115 contact hours at the internship site. *May be repeated for credit one time with change of internship site.*

EXER 3660. Practitioner Seminar. (1) Prerequisite(s): Exercise Science major. Emphasis on contemporary practices regarding exercise, health, and wellness. Designed to foster student professional development and preparation for the Exercise Science Internship.

EXER 3800. Directed Independent Studies in Movement Problems. (1 to 6) Prerequisite(s): Minimum of 15 credit hours in the Exercise Science major with a total of 65 credit hours toward the degree and in good academic standing. Independent study under the supervision of an appropriate faculty member. *May be repeated up to 6 credit hours with permission of instructor.*

EXER 3900. Undergraduate Research. (1 to 3) Prerequisite(s): Exercise Science major and permission of instructor or SPOA students

seeking Sports Analytics Certificate and permission of instructor. Enables majors to initiate research projects in their respective fields of interest. *May be repeated for credit with change of topic. A maximum of nine credit hours may be applied toward the major.*

EXER 4100. Organization and Administration of Strength and Conditioning. (3) Cross-listed Course(s): KNES 5100. Prerequisite(s): Exercise Science major (Strength and Conditioning concentration). Provides the knowledge and skills pertaining to the organization, administration, and oversight of Strength and Conditioning programs, including facility design, assessing program needs, safety, legal, and ethical issues.

EXER 4105. Leadership in Healthcare Organizations. (3) Prerequisite(s): EXER major. Focuses on the theories and practices of leadership in healthcare. Global, social, legal, political, economic, and ethical issues are explored.

EXER 4115. Undergraduate Research Methods in Applied Physiology, Health, and Clinical Sciences. (3) Cross-listed Course(s): KNES 5115. Prerequisite(s): Exercise Science major and permission of instructor or SPOA students seeking a Sports Analytics Certificate. Explores the scientific method with an emphasis on evidence-based practice in kinesiology. After exploring the fundamentals of research design, students engage in small group exercises to develop hypothesis driven mock research studies, followed by class discussion to identify limitations and strengths of the chosen designs. These exercises support the student's ability to read and critically analyze the scientific literature pertinent to the field.

EXER 4121. Pharmacology for the Physically Active. (3) Prerequisite(s): Exercise Science major, and EXER 3280 or permission of instructor. An examination of the historical aspects of use, abuse, and addiction within the realm of health and human performance. Exposes students to a wide variety of drug issues and the unique use and abuse patterns of individuals in the exercise science arena.

EXER 4130. Applied Nutrition. (3) Principles of nutrition, dietary guidelines, dietary relationships to diseases and health, special populations, computerized dietary analysis.

EXER 4132. Lifetime Weight Management and Behavior Change. (3) Prerequisite(s): EXER 3260 and EXER 4286. Examines factors in obesity and weight control, emphasizing techniques in behavior modification and lifestyle change for effective weight management.

EXER 4134. Assessment and Development of Physical Fitness. (3) Prerequisite(s): Permission of instructor. Responses and adaptations to exercise, assessment techniques, exercise prescription, leadership and programming.

EXER 4202. Pedagogy in Exercise Science. (3) Prerequisite(s): EXER major. Best practices in teaching exercise, physical activity, and lectures in an exercise science context. It covers brain-based learning theory and strategies to plan and teach individuals, small classes, or large groups.

EXER 4240. Clinical Research Management. (3) Prerequisite(s): STAT 1322 and permission of department. Examines how industry-standard ethical, legal, regulatory, and organizational guidelines governing clinical

research project management, research design, and data handling are applied to the management of clinical research.

EXER 4285. Advanced Strength and Conditioning Theory and Technique. (3) Prerequisite(s): Exercise Science major (Strength and Conditioning concentration) and EXER 3285 with grade of C or above. Introduces advanced scientific principles that govern the development of strength and conditioning programs. Emphasizes the evidence-guided development and implementation of programs that increase strength, aerobic capacity, flexibility, speed, and agility. Prepares students for nationally recognized certifications, such as the National Strength and Conditioning exams.

EXER 4286. Exercise Prescription. (3) Prerequisite(s): Exercise Science major, and EXER 3286 and EXER 3287 with grades of C or above. Interpreting physical fitness assessments and developing exercise prescriptions for individuals who are healthy or have medically controlled diseases.

EXER 4290. Therapeutic Exercise. (3) Prerequisite(s): EXER 3298. Application of the therapeutic techniques used in rehabilitation for upper and lower body injuries within the scope of athletic training.

EXER 4292. Organization and Administration of Athletic Training. (3) Prerequisite(s): EXER 4290. Athletic training organization and administration.

EXER 4293. Biomechanics. (3) Prerequisite(s): Exercise Science major and EXER 2298 with grade of C or above. Introduction to the study of physics principles as they govern human movement, how the neuromuscular system controls human movement, the mechanical principles that underlie musculoskeletal injury, and the influence that gender and ethnicity may have on various musculoskeletal pathologies.

EXER 4333. Sport and Exercise Psychology. (3) Cross-listed Course(s): KNES 5333. Prerequisite(s): Exercise Science major with Strength and Conditioning concentration; and permission of program director. An examination of psychosocial theories and research related to sport and exercise behavior. Covers the psychological factors that influence participation in and performance of exercise.

EXER 4400. Athletic Training Clinical III. (2) Prerequisite(s): EXER 3401. Acquisition and application of advanced clinical proficiencies and psychomotor competencies necessary for the entry-level athletic trainer. Students must complete approximately 20 hours of clinical experience per week at an approved athletic training clinical agency.

EXER 4401. Athletic Training Clinical IV. (2) Prerequisite(s): EXER 4400. Continuation of EXER 4400. Students must complete approximately 20 hours of clinical experience per week at an approved athletic training clinical agency.

EXER 4440. Strength and Conditioning Internship. (3) Prerequisite(s): EXER 2290, EXER 3660; EXER major, Strength and Conditioning Internship. Application of knowledge and skills in a practitioner setting. The 3-credit hour internship is required, twice, for students in the Strength and Conditioning Concentration. May be repeated one time for credit.

EXER 4490. Exercise Science Internship. (9) Prerequisite(s): EXER 2290 and EXER 4660 with grades of C or above; and completion of all required Exercise Science major courses with grades of C or above, except EXER 4132. Application of knowledge and skills in practitioner settings. The 9-credit-hour internship is required for students in the Certified Exercise Physiologist Credentialing concentration and the Strength and Conditioning concentration.

EXER 4700. Honors Research I. (3) Prerequisite(s): Permission of Program Major Coordinator; and approval of a proposal through the Honors College Application to Candidacy process the semester prior to taking the course. Honors project directed by Exercise Science Honors committee or assigned faculty member. One faculty contact hour per week and independent research.

Farsi (FARS)

FARS 1201. Elementary Farsi I. (3) Corequisite(s): FARS 1201L. Fundamentals of the Farsi language, including speaking, listening comprehension, reading, and writing.

FARS 1201L. Elementary Farsi I Lab. (1) Corequisite(s): FARS 1201. Continuation of class activities, practicing the fundamentals of the Farsi language, including speaking, listening comprehension, reading, and writing.

FARS 1202. Elementary Farsi II. (3) Prerequisite(s): FARS 1201 and FARS 1201L, or permission of department. Corequisite(s): FARS 1202L. Fundamentals of the Farsi language, including speaking, listening comprehension, reading, and writing.

FARS 1202L. Elementary Farsi II Lab. (1) Prerequisite(s): FARS 1201 and FARS 1201L. Corequisite(s): FARS 1202. A continuation of class activities, practicing the fundamentals of the Farsi language, including speaking, listening comprehension, reading, and writing.

Film Studies (FILM)

FILM 1502. Global Arts/Humanities: Introduction to Film and Media Art. (3) This Global Theme course uses the methods and insights of the arts and humanities to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of complex, interconnected world. Students are introduced to film and media arts as a dynamic language which continues to speak across cultures through historical and new media developments toward a diverse set of social, political, economic and cultural progressions. Students will explore a wide array of movements, figures and works associated with the history, theory and production of film to gain a deeper understanding of the interconnected relationship between media and culture through its evolution. *May not be taken for credit and for a grade if credit has been received for FILM 2201.*

FILM 2201. Introduction to Film. (3) Introduction to elements of film needed for analyzing and writing about film. *May not be taken for credit and for a grade if credit has been received for FILM 1502.*

FILM 3050. Topics in Film. (3) National film histories, film analysis, film criticism, film genres. *May be repeated for credit with change of topic.*

FILM 3051. Topics in Film. (3) National film histories, film analysis, film criticism, film genres. *May be repeated for credit with change of topic.*

FILM 3120. The Fundamentals of Video/Film Production. (3) Key components: planning and preparation through post-production and presentation, including writing a simple screenplay, storyboarding, locating equipment, casting, shooting, editing, post production synchronization, and exhibition.

FILM 3121. Cinematic Storytelling. (3) Prerequisite(s): FILM 3120 or permission of program. Cinematic approaches and presentations of film and media storytelling such as techniques utilizing light and shadow, creative composition approaches, symbolic camerawork and other advanced image-making techniques.

FILM 3220. Introduction to Screenwriting. (3) Introduction to the craft of screenwriting through a series of short-form screenplay exercises. Intensive study of the basic elements of story and script formatting and analysis of representative films.

FILM 3221. Advanced Screenwriting. (3) Prerequisite(s): FILM 3220 or permission of program. Advanced storytelling techniques such as subtext, symbolism, thematic development, world-building and dialogue. Students identify treatments and develop outlines prior to the completion of works or substantial portions of long-form projects including but not limited to feature-length films, long-form shorts and episodic works. Students must complete the prerequisite of FILM 3220: Introduction to Screenwriting before taking this course.

FILM 3800. Directed Project in Film or Video. (1 to 3) Prerequisite(s): FILM 1502 and FILM 3120, or permission of Film Studies Director or instructor. Pre- or Corequisite(s): FILM 3220 or permission of Film Studies Director or instructor. Individual work on a selected film project or area of film study. To be arranged with the instructor, generally during the preceding semester, and by special permission only. *May be repeated for credit.*

FILM 4120. Production and Directing. (3) Prerequisite(s): FILM 3120, FILM 3220, or permission of Film Studies Director and instructor. Advanced study of the elements of producing and directing a film project, including working with actors, writers, and other members of a film team.

FILM 4121. Creative Nonfiction Production. (3) Prerequisite(s): FILM 3120, or permission of program. A projects-based course that explores documentary modes and methodologies through historical dissection and contemporary lens. Students analyze works and produce short creative nonfiction works over the course of the semester with a focus on personal storytelling and contributing to larger film and media conversations.

FILM 4122 – Music Video Production. (3) Prerequisite(s): FILM 3120, or permission of program. A media production course designed to explore visual practices in relation to music and sound-based

elements including experimental approaches to performance and story-based film projects. Over the course of the semester, students will fully produce their own dynamic works around a centralized musical component.

FILM 4220. Film Festivals & Impact Production. (3) Pre- or Corequisite(s): FILM 3120. Focus on the history and evolution of film festivals and other cultural presentations of film and media including evolving practices in equitable access, programming transparency, and community impact. This course culminates in the development and presentation of a unique community-based cultural event.

FILM 4221. Community-Based Film Production. (3) Prerequisite(s): FILM 1502 and FILM 3120, or permission of the instructor. Offers students an opportunity to partner with specific Charlotte communities in order to produce meaningful media content. Explores how film can be used as a tool for social mobility, empowerment, and connection.

FILM 4320. Acting & Directing for Film. (3) Pre- or Corequisite(s): FILM 3120, or permission of program. A theory/workshop course that explores significant acting and directing methodologies and their cinematic evolution from historical to contemporary implementations. Students gain experience acting and directing through guided production of scenes (scriptwriting, casting, rehearsals, blocking, coverage and editing) to produce compelling cinematic sequences.

FILM 4410. Professional Internship in Film Studies. (1 to 6) Prerequisite(s): FILM 1502; FILM 3120 or equivalent; Film Studies minor; and permission of the Director of the Film Studies program and student's major advisor. Faculty-supervised field and/or research experience in a cooperating professional (e.g., business) or community organization. Contents of internship based upon a contractual agreement among the student, department, and business or community organization.

FILM 4690. Capstone in Film & Media Production. (3) Prerequisite(s): FILM 3120 and three FILM courses at the 3000 or 4000 level; Senior standing; Major concentration and certificate students only. This senior practicum course acts as a pre-professional launching pad and exploration of career options for Film & Media Production students. Students develop a thesis project and ancillary materials over the course of the semester to complete their professional portfolio. Film & Media Production students are highly encouraged to take this their final semester after completing all required production courses.

Finance (FINN)

FINN 3000. Topics in Finance. (3) Prerequisite(s): Junior or Senior standing. Topics from the area of finance. *May be repeated for credit with change of topic.*

FINN 3120. Financial Management. (3) Prerequisite(s): MATH 1120, STAT 1220; ACCT 2121; ACCT 2122 or ACCT 3323; ECON 2101; ECON 2102; INFO 2130; Business major; and Junior or Senior standing. Principles and problems of financial aspects of managing capital structure, least-cost asset management, planning and control. Computer application is included where appropriate.

FINN 3220. Financial Analysis. (3) Prerequisite(s): FINN 3120. An introduction to the theory and practice of corporate valuation. Topics

include: financial statement analysis, discounted cash flow valuation, ratio analysis, constructing pro-forma financial statements, earnings forecasting, and basic statistical methods important in finance.

FINN 3221. Financial Institutions and Markets. (3) Prerequisite(s): FINN 3120. A study of financial institutions and money and capital markets, and the role of financial institutions in the intermediation process. Special emphasis is on the comparative financial policies of financial institutions considered in the context of their market environments.

FINN 3222. Investments. (3) Prerequisite(s): FINN 3120. Major topics are security analysis and portfolio management. The viewpoint is that of the investment professionals who are concerned with the evaluation of individual securities and management of security portfolios.

FINN 3223. International Financial Management. (3) Prerequisite(s): FINN 3120 with grade of C or above; and Finance or International Business major, International Management minor, or permission of department. Viewpoints are those of the senior financial officer of an international corporation and of the international officer of a commercial bank. Topics include: the financing of exports and imports, financing of foreign operations, consideration of foreign exchange rates, and the impact of accounting procedures on financial management.

FINN 3224. Applied Business Finance. (3) Prerequisite(s): FINN 3120. Case studies of the theories and techniques of business finance as they relate to the goal of the financial manager; the maximization of the firm value. Topics include: financial statement analysis, valuation, financial instruments, capital structure, and capital budgeting.

FINN 3225. Commercial Bank Management. (3) Prerequisite(s): FINN 3120. A study of sound and efficient techniques for the management of commercial banks. Topics include: industry structure, administrative organization, and management of assets, liabilities and capital.

FINN 3226. Financial Theory and Practice. (3) Prerequisite(s): FINN 3120. Modern financial theory and its applications, including risk theory, market equilibrium asset pricing models, efficient market theory, capital structure theory and applications (including issues surrounding financial distress and bankruptcy), dividend policy, agency problems, informational asymmetry, advanced topics in capital budgeting, and leasing.

FINN 3255. Real Estate Principles. (3) Prerequisite(s): FINN 3120 with grade of C or above; College of Business major; and Junior or Senior standing. An overview of the real estate industry modules, principles, and practices that enhance students' practical knowledge and skill set. Discusses key concepts of ownership, development, and management of real estate. Allows students to gain a comprehensive real estate approach with a focus on real world application.

FINN 3261. Real Estate Finance. (3) Prerequisite(s): FINN 3120. The fundamentals of real estate finance and investment. Topics include: real estate capital markets, mortgage markets, mortgage securitization, real estate contracts and leases, investment analysis, valuation and appraisal, return and risk considerations, and the effects of debt financing, taxation and government regulations on real estate investment.

FINN 3265. Asset and Property Management. (3) Prerequisite(s): FINN 3255 with grade of C or above; College of Business major; and Junior or Senior standing. An overview of the management and asset approach from the real estate profession. Students distinguish the different roles asset and property managers play in the economy. Explores issues such as lease analysis, negotiation techniques, management operations, property regulations, federal guidelines, and measuring performance that allow students to give insightful recommendations.

FINN 3271. Principles of Risk Management and Insurance. (3) Prerequisite(s): INFO 2130, Junior or Senior standing, business major or permission of department. A study of the different types of non-speculative risks faced by individuals and businesses and the possible methods of treating such risks. An examination of the specific application of these methods with regard to life, health, property, casualty, and liability contracts.

FINN 3272. Life Insurance and Professional Financial Planning. (3) Prerequisite(s): INFO 2130, Junior or Senior standing, business major, or permission of department. Pre- or Corequisite(s): ACCT 3311 or ACCT 3323. Covers the uses of life insurance, annuities, health insurance, and Social Security in the context of financial planning. Explains the integration of social security benefits, employer-provided benefits, and individually purchased life insurance and investments into comprehensive financial plans. Students successfully completing this course should understand the need for the main techniques of financial planning in contemporary U.S. society.

FINN 3273. Property and Liability Insurance Operations. (3) Prerequisite(s): INFO 2130, Junior or Senior standing, business major, or permission of department. An in-depth examination of the operations of property and liability insurance companies in a dynamic business and regulatory environment. Insurer strategies and functions are examined with a focus on underwriting, actuarial activities of ratemaking and loss reserving, claims, marketing, and risk management. The impact of the effects of the global, technological, and legal environments on insurer operations are emphasized.

FINN 3276. Employee Benefits. (3) Prerequisite(s): INFO 2130, Junior or Senior standing, and a business major. Provides an analysis of group plans (e.g., medical, life, disability, and retirement), stock options, profit sharing plans and statutory benefits (e.g., workers' compensation and social security). Includes a review of legislation affecting these plans. Non-traditional plans (e.g., child care, flex time, and wellness programs) are also examined.

FINN 3278. Risk Management and Insurance Sales and Negotiations. (3) Prerequisite(s): INFO 2130 or permission of department; Junior or Senior standing; and College of Business major. Focuses on consultative sales and principled negotiations, which are key elements in achieving professional success. Consultative sales involves discovering client problems and developing solutions that provide substantial value to the client. Clients can be teammates or colleagues within the same company or external clients. Key sales skills discussed and developed are professional ethics, personal branding, networking, communication, creating client relationships, handling objections, obtaining commitment and teaching, tailoring and taking control. Negotiation skills include separating people from the problem, focusing on interests, inventing options for mutual gain and insisting on objective standards. The goal of principled negotiations is to develop a wise agreement with an amicable

outcome. All of these topics are discussed and applied through class discussion, individual and team exercises, and case studies.

FINN 3279. Advanced Topics in Risk Management. (3) An in-depth analysis of advanced concepts in the global risk management and insurance market through discussion and experiential learning or application. Students learn how the U.S. primary, excess, and international insurance markets interact. Advanced concepts and emerging issues are covered, including surplus lines insurance, catastrophes, and issues in corporate risk management with a focus on firms with an international footprint.

FINN 3400. Finance Internship. (3) Prerequisite(s): Junior or Senior standing; Finance major in good standing; and permission of instructor. Provides a meaningful work experience in the field of finance. Requires a minimum of 150 hours of supervised employment, 50 hours of work per credit hour. Student is responsible for securing internship and completing internship application and approval process prior to registering for the course. Internship must be approved by instructor. Application process and course registration must be completed prior to beginning internship. All proposals are subject to departmental approval. Students may not earn internship credit for work at a current employer. May be used to meet requirements of a major elective, up to a maximum of three credit hours. *May not be repeated for credit at the same time or following any other internship for credit. Graded on a Pass/No Credit basis.*

FINN 3500. Finance Cooperative Education Experience. (0) Enrollment in this course is for the University cooperative education students during each semester they are working in a position. Participating students pay a course registration fee for transcript notation. Assignments must be arranged and approved in advance. The Cooperative Education Program is only open to undergraduate students; graduate level students are encouraged to contact their academic departments to inquire about academic or industrial internship options for credit. For more information, contact the University Career Center. *May be repeated. Graded on a Satisfactory/Unsatisfactory basis.*

FINN 3800. Directed Study. (1 to 3) Prerequisite(s): Permission of department and Junior or Senior standing. Enrollment granted only by permission of the faculty with whom the work will be performed. The student's work assignments will be designed by the student and faculty member who will oversee the project of study. The credit hours will be determined prior to enrollment and will be based on the particular project undertaken.

FINN 4158. Student Managed Investment Fund I. (3) Prerequisite(s): FINN 3120 and FINN 3222 with grades of C or above; and permission of instructor (students selected for the course are required to take FINN 4159). Management of an actual portfolio consisting of a portion of the University's Endowment Fund.

FINN 4159. Student Managed Investment Fund II. (3) Prerequisite(s): FINN 4158 with grade of C or above; and permission of instructor. Management of an actual portfolio consisting of a portion of the University's Endowment Fund.

FINN 4160. Equity Analysis. (3) Cross-listed Course(s): MBAD 5160. Prerequisite(s): College of Business major, and FINN 3120 or permission of department or program director. Methods and techniques for

analyzing equities, focusing on three areas of analysis: fundamental, technical, and behavioral. With the practical application of course material, assignments require a fair amount of out-of-class time to complete. At the conclusion of this course, students should have a thorough understanding of fundamental, technical, and behavioral analysis, as well as stronger Excel, Bloomberg, and Oral Communication skills.

FINN 4161. Financial Modeling. (3) Prerequisite(s): FINN 3120. Cross-listed Course(s): FINN 5161. The objective of this course is to introduce spreadsheet techniques in the application of finance context and to help students get good preparation for a future career with Excel work. Students are learning to use Excel to accomplish financial analysis and let Excel do as much work as possible. The course covers topics in Corporate Finance and Investments. The course focuses on financial statement analysis, time value of money, security valuation, cost of capital, capital budgeting, efficient portfolios, CAPM, et al. The course covers Excel techniques including basic spreadsheet use, Excel built-in functions, Data tables, Scenario analysis, Solver, Data analysis, et al. The course requires a primary understanding of corporate finance and investments. It also needs some sophistication in statistics such as mean, standard deviation, covariance, correlation, et al.

FINN 4275. Enterprise Risk Management. (3) Cross-listed Course(s): FINN 5275. Pre- or Corequisite(s): FINN 3271. An in-depth discussion of risk management in non-financial firms, including analysis of techniques that firms use to manage risks. Risk management strategies and how they are applied to business problems are discussed. Some of the techniques examined include self-insurance, captives, financial instruments, and retentions.

Foreign Language Education (FLED)

FLED 4104. Assessment in the Teaching of K-12 Foreign Languages. (2) Cross-listed Course(s): FLED 5104. Prerequisite(s): MDSK 3100, MDSK 3151, MDSK 4210, MDLG 3130, or SECD 4140. Pre- or Corequisite(s): FLED 4200 and MDSK 4100L. Fosters Foreign Language Education teacher candidates' knowledge and skills of creating and implementing performance-based assessments in K-12 classrooms. Learning modules provide an overview of the major principles involved in foreign language assessment, focusing on both the theoretical and practical issues. Students practice creating, administering, and scoring assessments of interpretive, interpersonal, and presentational communication, as well as an Integrated Performance Assessment. They also practice analyzing data from such assessments, interpreting necessary changes in instruction based on those data, and providing student feedback.

FLED 4105. Applied Content Pedagogy. (1) Cross-listed Course(s): MDSK 5105. Prerequisite(s): MDSK 3100; MDSK 3151; MDSK 4210; and MDLG 3130 or SECD 4140. Provides undergraduate teacher education candidates exposure to the continued modeling of evidence-validated practices, the rehearsal of instructional tasks, and numerous opportunities for feedback on pedagogical decision-making in Foreign Language Education. *May be repeated for credit one time.*

FLED 4200. Methods in Teaching Foreign Languages. (3) Cross-listed Course(s): FLED 5200. Prerequisite(s): MDLG 3130 or SECD 4140; MDSK 3100; MDSK 3151; MDSK 4210; and completion of at least two 3000-level

courses or equivalent in the target language, or permission of Department of Middle, Secondary, and K-12 Education. Corequisite(s): MDSK 4100L. Current trends and practices in teaching foreign and second languages in the high school, with emphasis on practical applications. Addresses state-mandated competencies. Required for licensure in the teaching of French, German, or Spanish (K-12). Includes 25 hours of field experiences.

FLED 4201. K-8 Methods - Foreign Languages. (3) Prerequisite(s): Completion of at least two 3000-level courses or equivalent in the target language, or permission of department of Middle, Secondary & K-12 Education. Current trends and practices in teaching foreign and second languages in the elementary school and middle school (K-8), with emphasis on practical applications. Addresses state mandated competencies. Required for licensure in the teaching of French, German, or Spanish (K-12). Includes 15 hours of field experiences.

FLED 4469. Student Teaching/Seminar: K-12 Foreign Language. (15) Prerequisite(s): Permission of department for admission to student teaching, including minimum score of Advanced Low on the Oral Proficiency Interview (OPI). Student teaching is a planned sequence of experiences in the student's area of specialization conducted in an approved school setting under the supervision and coordination of a university supervisor and a clinical educator. During student teaching, the student must demonstrate the competencies identified for their specific teaching field in an appropriate grade level setting. The student is assigned 15 weeks in a school setting. Includes seminars. Participating students pay a course registration fee for edTPA portfolio assessment. *Graded on a Pass/No Credit basis.*

Francophone Studies (FRAN)

FRAN 1502. Global Arts/Humanities: French and Francophone Cultures. (3) This Global Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of a complex, interconnected world. Students are introduced to critical studies of language and culture through a broad engagement with the influence and presence of French and Francophone cultures throughout the world. Course materials may draw widely from pop culture, music, cuisine, film, media, the arts, and literature. Taught in English.

FRAN 1512. Local Arts/Humanities: French and Francophone Cultures in the U.S. (3) This Local Theme course uses the methods and insights of the arts and humanities to explore the central question of what it means to be a member of a "local" community. Through the study of the experiences of different peoples, societies, cultural traditions, and modes of expression in communities at the city, regional, or national level, students will be able to better understand the complexity and diversity of the society in which we live. Students are introduced to critical studies of language through a broad engagement with the influence and presence of French and Francophone cultures in the United States. Course materials may draw widely from literature, history, film, linguistics, and the arts. Taught in English.

FRAN 2050. Topics in Francophone Studies. (3) Analysis of a selected topic related to France or to the Francophone world. Course conducted in English.

FRAN 2200. French Civilization. (3) Cross-listed Course(s): FREN 2209. A study of the French people, past and present, with emphasis on cross-cultural contrasts in attitudes and values. Course conducted in English.

FRAN 3001. Advanced Topics in Francophone Studies (Economy and Society). (3) Analysis of a selected topic related to Francophone Studies. The particular topic of the course may vary from semester to semester. *May be repeated for credit with change of topic.* Course conducted in English.

FRAN 3002. Advanced Topics in Francophone Studies (Historical Context). (3) Analysis of a selected topic related to Francophone Studies. The particular topic of the course may vary from semester to semester. *May be repeated for credit with change of topic.* Course conducted in English.

FRAN 3003. Advanced Topics in Francophone Studies (Arts and Literature). (3) Analysis of a selected topic related to Francophone Studies. The particular topic of the course may vary from semester to semester. *May be repeated for credit with change of topic.* Course conducted in English.

FRAN 3004. Advanced Topics in Francophone Studies (Film). (3) Analysis of a selected topic related to Francophone Studies. The particular topic of the course may vary from semester to semester. *May be repeated for credit with change of topic.* Course conducted in English.

FRAN 3005. Advanced Topics in Francophone Studies (Philosophy and Intellectual History). (3) Analysis of a selected topic related to Francophone Studies. The particular topic of the course may vary from semester to semester. *May be repeated for credit with change of topic.* Course conducted in English.

French (FREN)

FREN 1201. Elementary French I. (3) For students with limited or no previous experience in French. First course in a two-course sequence to develop competence in culture, speaking and writing, listening and reading comprehension in French.

FREN 1202. Elementary French II. (3) Prerequisite(s): FREN 1201 or equivalent. Second course in a two-course sequence to develop competence in culture, speaking and writing, listening and reading comprehension in French.

FREN 1502. Global Arts/Humanities: French and Francophone Cultures. (3) This Global Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of a complex, interconnected world. Students are introduced to critical studies of language and culture through a broad engagement with the influence and presence of French and Francophone cultures throughout the world. Course materials may

draw widely from pop culture, music, cuisine, film, media, the arts, and literature. Taught in English.

FREN 1512. Local Arts/Humanities: French & Francophone Cultures in the U.S. (3) This Local Theme course uses the methods and insights of the arts and humanities to explore the central question of what it means to be a member of a "local" community. Through the study of the experiences of different peoples, societies, cultural traditions, and modes of expression in communities at the city, regional, or national level, students will be able to better understand the complexity and diversity of the society in which we live. Students are introduced to critical studies of language through a broad engagement with the influence and presence of French and Francophone cultures in the United States. Course materials may draw widely from literature, history, film, linguistics, and the arts. Taught in English.

FREN 2050. Topics in French. (1 to 3) Study of French language, culture, or literature. *May be repeated for credit with change of topic.*

FREN 2200. French for Reading Knowledge. (3) Prerequisite(s): FREN 1202 or equivalent. Review of French grammar with emphasis on developing reading skills. Taught in English. Does not count for major or minor credit.

FREN 2201. Intermediate French I. (3) Prerequisite(s): FREN 1202 or equivalent. Review of grammar, with reinforcement and expansion of competence in speaking, understanding, reading, and writing, in a cultural context.

FREN 2202. Intermediate French II. (3) Prerequisite(s): FREN 2201 or permission of department. Review of grammar, with reinforcement and expansion of competence in speaking, understanding, reading, and writing, in a cultural context.

FREN 2209. French Civilization. (3) Cross-listed Course(s): FRAN 2200. A study of the French people, past and present, with emphasis on cross-cultural contrasts in attitudes and values. Conducted in English; no knowledge of French required. Open to majors and non-majors for elective credit.

FREN 3050. Topics in French. (1 to 3) Study of French language, culture, or literature. *May be repeated for credit with change of topic.*

FREN 3201. French Grammar and Conversation. (3) Prerequisite(s): FREN 2202 or permission of department. Review of French grammar and guided conversation on prepared topics. Emphasis on spoken French.

FREN 3202. French Grammar and Composition. (3) Prerequisite(s): FREN 2202 or permission of department. Review of French grammar and guided compositions on prepared topics. Emphasis on vocabulary, idiomatic expressions, and stylistics.

FREN 3203. Introduction to French Literature. (3) Prerequisite(s): FREN 2202. Development of techniques for literary study through analysis of selected major works in French literature. Readings, discussions, presentations, and *explications de texte*.

FREN 3207. French Phonetics. (3) Prerequisite(s): FREN 2201 or permission of department. Study of the sounds of the French language, their production and representation by means of the International

Phonetic Alphabet. Practice in reading and speaking with proper rhythm and intonation.

FREN 3209. France Today. (3) Prerequisite(s): FREN 3201 or FREN 3202, or permission of department. Contemporary France: its institutions, society, and culture.

FREN 3210. Introduction to Business French. (3) Prerequisite(s): FREN 2202 or permission of department. Introduction to spoken and written language of the French-speaking business world. Acquisition of and practice with general commercial terminology used in French for such functional business areas as economics, management, marketing, finance, and import-export.

FREN 3220. Introduction to the Francophone World. (3) Prerequisite(s): FREN 2202 or permission of department. Introduction to the literature, culture and civilization of French-speaking countries, regions and populations outside of France.

FREN 3225. Short-Term Abroad. (3) Prerequisite(s): Permission of instructor. Faculty-led short-term study abroad experience offered during Spring Break.

FREN 3800. Directed Individual Study. (1 to 3) Prerequisite(s): Permission of department; normally open only to French majors and minors. Individual work on a selected area of study. To be arranged with the instructor, generally during the preceding semester, and by special permission only. *May be repeated for credit.*

FREN 4003. Studies in French Literature. (3) Prerequisite(s): FREN 3201 or FREN 3202 (both recommended, and FREN 3203 is also highly recommended), or permission of department. Study of French literature. *May be repeated for credit with change of topic.*

FREN 4005. Studies in the French Language. (3) Prerequisite(s): FREN 3201 or FREN 3202 (both recommended), or permission of department. Study of French language. *May be repeated for credit with change of topic.*

FREN 4007. Studies in French Culture and Civilization. (3) Prerequisite(s): FREN 3201 or FREN 3202 (both recommended), or permission of department. Study of French culture and civilization. *May be repeated for credit with change of topic.*

FREN 4050. Topics in French. (1 to 3) Prerequisite(s): Junior or Senior standing; WRDS 1103 or WRDS 1104 with a grade of C or above, or equivalent if taught in English. Study of French language, culture, or literature. May be taught in French or English. Does not count toward the major. *May be repeated for credit with change of topic.*

FREN 4120. Advanced Business French I. (3) Prerequisite(s): FREN 3210 or permission of department. Advanced studies in Business French, with intensive practice in speaking, listening comprehension, reading, writing, and translation in functional business areas such as economics, management, and marketing.

FREN 4121. Advanced Business French II. (3) Prerequisite(s): FREN 3210 or permission of department. Advanced studies in Business French, with intensive practice in speaking, listening comprehension, reading, writing, and translation in functional business areas such as marketing, finance, and import-export.

FREN 4201. Survey of French Literature I. (3) Prerequisite(s): FREN 3201 or FREN 3202 (both recommended). FREN 3203 also highly recommended. The major literary movements from the Middle Ages to the Enlightenment, with sample texts. Emphasis on continuity and change.

FREN 4202. Survey of French Literature II. (3) Prerequisite(s): FREN 3201 or FREN 3202 (both recommended). FREN 3203 and FREN 4201 also highly recommended. The major literary movements from the Enlightenment to the contemporary period, with sample texts. Emphasis on continuity and change.

FREN 4410. Professional Internship in French. (1 to 6) Prerequisite(s): FREN 3201 and FREN 3202, or equivalent and permission of department. Faculty-supervised field and/or research experience in a cooperating professional (e.g., business), educational, or community organization. Contents of internship based upon a contractual agreement among the student, department, and field organization. *Graded on a Pass/No Credit basis. May be repeated for credit up to 6 credit hours.*

FREN 4800. Directed Individual Study. (1 to 3) Prerequisite(s): Permission of department; normally open only to French majors and minors. Individual work on a selected area of study. To be arranged with the instructor, generally during the preceding semester, and by special permission only. *May be repeated for credit.*

Geography (GEOG)

GEOG 1101. World Regional Geography. (3) A world regional study which emphasizes the distinctly human responses of people to various geographic situations throughout the world. The nature and development of cultural regions is studied. *May not be taken for credit and for a grade if credit has been received for GEOG 1501.*

GEOG 1103. Spatial Thinking. (4) An overview of spatial thinking fundamentals and how geospatial technology can be used to illustrate these notions. Spatial thinking combines: (1) concepts of space, (2) tools of representation, and (3) processes of reasoning, to better structure spatially explicit phenomena, and generate hypothesis to understand and explain those issues. Emphasizes various aspects of spatial thinking as a way of addressing spatially explicit phenomena applied to an array of disciplines.

GEOG 1105. Introduction to Human Geography. (3) An examination of factors which account for the locational characteristics of economic and other human activities. The locational decision-making process is examined as a means of understanding human spatial behavior.

GEOG 1110. Introduction to Urban and Regional Planning. (3) An overview of current and historical trends in Urban and Regional Planning. Examines how plans and planning have been used to resolve social, environmental, and economic conflicts. Topics include: planning in industrial cities, land use planning, planning and social injustice, economic development, transportation planning, planning for global sustainability. *May not be taken for credit and for a grade if credit has been received for GEOG 1511.*

GEOG 1501. Global Social Science: Global Geography. (3) This Global Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of a complex, interconnected world. GEOG 1501 is an introduction to geography as a discipline as well as the perspective and tools geographers employ to better understand and address complex global conditions and issues that impact all human and physical systems. *May not be taken for credit and for a grade if credit has been received for GEOG 1101.*

GEOG 1511. Local Social Science: Urban and Regional Planning. (3) This Local Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a member of a “local” community. Through the study of the experiences of different peoples, cultures, and communities in our city, our region, or our nation, students will be able to better understand the complexity and diversity of the society in which we live. This course introduces students to urban planning, surveying broad planning movements, theories, and processes with a focus on the development of planning as a field and its role in past and future inequities. Students will learn how cities and regions plan for social, environmental, and economic change; mitigate negative impacts; and seek to address inequities. Additionally, students will focus on important issues in planning, and strategies for mitigating negative impacts. Students engage with such topics in the context of national and regional examples, but particularly in Charlotte, NC. *May not be taken for credit and for a grade if credit has been received for GEOG 1110.*

GEOG 2000. Topics in Geography. (1 to 4) Treatment of major topical or regional issues in Geography. *May be repeated for credit with change of topic.*

GEOG 2102. Introduction to Cartographic Design. (4) Prerequisite(s): GEOG 1103. A study of cartography and its essential processes, with particular emphasis on the map as a communication system, the effective communication of data by means of graphical symbols, map interpretation and geovisualization, and thematic map design and production techniques.

GEOG 2103. Elements of GIScience and Technologies. (4) The fundamental concepts of Geographic Information Science (GIS) and its application in planning, marketing, criminal justice, health, natural resources, information technology, engineering, and others. Students learn the processes to collect, organize, analyze, and display geographic data using GIS and are introduced to Global Positioning System (GPS) technologies. Students cover mapping basics including scale, projections, coordinate systems, data classification, and cartographic design. Culminates with group projects on selected topics within Environmental Sustainability.

GEOG 2105. Introduction to Economic Geography. (3) Examination of the spatial dimensions of economic activity, geographic organization and interaction of economic production, consumption, and exchange systems. Emphasis is placed on location-based factors and principles utilizing theoretical and empirical studies. A variety of geographic scales is examined, from the local to the global.

GEOG 2110. Introduction to Geographic Research. (3) Research design and resources in geographic research. Emphasis on spatial applications

in summary statistics; spatial summaries, statistical hypothesis testing; sampling and estimation; association, correlation and regression.

GEOG 2111. Social Inequality and Planning. (3) (SL) Introduction to social, political, economic and cultural forces shaping urban communities. The role of race, class and gender relations and the processes through which community intervention occurs at the local level is explored. Emphasis is on the role of participatory planning, advocacy planning, community organizing and community development. Also explored are community building and social change by focusing on the interplay between local residents, leaders and institutions, through team projects, individual assignments and community service activities. Students participate in a community project that requires them to visit Charlotte neighborhoods several times over the course of the semester, requiring out-of-class time to visit the neighborhoods to collect data in teams of 2-4 students.

GEOG 2121. Introduction to Development Studies. (3) Cross-listed Course(s): INTL 2121. The history of development as a discourse and the different economic and political models that have shaped it. Historical models and contexts of development are addressed in order to understand the evolution of development practice. Different agents and institutional architectures of development are examined as are current issues of debate in global development such as: gender and microloans; climate change politics; and the impacts of migration.

GEOG 2140. Geography of North Carolina. (3) A survey of the cultural, economic, urban, environmental and physical landscape of North Carolina with an emphasis on understanding the complex geographical variety that exists within a dynamic Southern state. Historic, current and future geographic patterns will be explored.

GEOG 2150. Geography of Polar Regions. (3) Arctic and Antarctic regions, history of exploration, the physical environment and political significance.

GEOG 2155. Geography of the U.S. and Canada. (3) Geographic structure of the U.S. and Canada with emphasis on physical environment and patterns of human activities.

GEOG 2160. The South. (3) The culture, environment, population, and economy of the southeastern U.S.; emphasis on current trends and future implications.

GEOG 2165. Patterns of World Urbanization. (3) Introduction to cities of the world including examination of urban systems within different culture areas as well as the internal structure of different cities within the context of traditional and innovative theories of development geography.

GEOG 2200. Introduction to Urban Studies. (3) Cross-listed with URBS 2200. A survey course exploring the diverse perspectives and experience of North American Cities. Lectures and discussions on the development, organization, function, and meaning of urban areas, as well as the multiple and complex relationships that exist between cities and the people who live and work within them. Students who pass this course meet the requirements for the “Western Tradition” area of the LBST requirements and will not have to take an additional course to satisfy that area of General Education.

GEOG 3000. Topics in Regional Geography. (3) Treatment of major regional issues in geography. *May be repeated for credit with change of topic.*

GEOG 3100. Geography of Cities. (3) Prerequisite(s): GEOG 1511 or GEOG 2200, or permission of instructor. Integrative study of cities with emphasis on human-environment interactions, influences of place and space, and urban systems, such as land use patterns, transportation, residential patterns, and commercial activities.

GEOG 3102. Plant Geography. (3) Prerequisite(s): ESCI 1101 or ESCI 1501, or permission of instructor. Explores the spatial and temporal distribution and variety of plant life on earth. Distribution patterns may reflect former geologic or climatic conditions, as well as modern interactions between organisms and their environment. Fossils provide valuable information on the past ranges of plants including paleoecological information that may help explain changing vegetation patterns. Because very few biological communities escape the effects of human activities, the role humans have played in the ecology and distribution of terrestrial plants is a focus of the course. Current issues of conservation and biological diversity are also explored.

GEOG 3105. Geography of the Global Economy. (3) Examination of the globalization of economic activity with focus on the geographic patterns of international production, trade, and foreign direct investment, and environmental impacts of global production, as well as underlying dynamics driven by transnational corporations and nation states within a volatile technological environment.

GEOG 3106. Sustainable Cities. (3) Analysis of the environmental, economic and social sustainability of American cities. Emphasis placed on measuring impacts of current urbanization patterns and identifying effective, and socially palatable, modifications to urban form and policy which will make cities more sustainable.

GEOG 3115. Urban Transportation Problems. (3) Problems associated with moving goods, people and information in urban areas. Topics include: mass transit and pollution problems.

GEOG 3120. Fundamentals of Geographic Information Systems. (4) Prerequisite(s): GEOG 1103 or ESCI 2210, or permission of instructor. Development, current state-of-the-art and future trends in geographic information processing with emphasis on data gathering, storage, and retrieval, analytical capabilities and display technologies. A laboratory component includes development and completion of an applied GIS research project. Three lecture hours, one two-hour lab per week.

GEOG 3161. Migration and Borders in a Global World. (3) Cross-listed Course(s): INTL 3161. Even as globalization promises a world of increasing flows, borders -and their most visible manifestation as fences - are on the rise. This course focuses on the dynamics of diversifying flows of people with the multiplication of borders within and beyond countries. It explores key policy debates such as: the relationship between migration and development; increased demand for migrant workers; the upswing in migrant detention and deportation; and the Right to Freedom of Movement.

GEOG 3162. Europe in the World. (3) Cross-listed Course(s): INTL 3162. The shifting political, economic and cultural geographies of Europe. Addresses how current transformations in Europe influence global

processes and how broader global trends translate into European societies. Topics include: the expansion and consolidation of the European Union; a 'borderless' Europe versus 'Fortress Europe'; post-socialism and post-fascism in Central and Southern Europe; economic globalization; and post-colonial immigration.

GEOG 3180. Hazards and Disasters. (3) An introduction to the study of hazards geography, drawing on concepts explored in human geography, explicitly emphasizing how social and behavioral systems (human adaptation, education, response, risk perception, risk communication) come together with physical risk to create disasters. Students learn about these complex processes through place-based case studies of risk. Further, students consider how they might minimize their own risk by making informed decisions about where they live and work.

GEOG 3190. Biogeography. (3) Cross-listed Course(s): ESCI 3190. Prerequisite(s): BIOL 2120 or ESCI 1101. The patterns of life across the Earth and the causes of those patterns, with an emphasis on ecological patterns and historical patterns of biodiversity. The origin of the Earth's biological diversity and methods for conserving that biodiversity is also discussed. Emphasis on student oral and written communication.

GEOG 3200. Land Use Planning. (3) Land use planning, with emphasis on basic planning processes, implementation techniques and strategies, and issues confronting contemporary urban and rural planning.

GEOG 3205. City Regions and Systems. (3) Prerequisites(s): GEOG 1511 or GEOG 2200, or permission of instructor. Integrative study of the spatial structure of cities with emphasis on land use patterns and models, transportation systems, residential concentrations, commercial activities and manufacturing zones.

GEOG 3210. Regional Planning. (3) Introduction to regional planning strategies and approaches developed by regional planning agencies. Urban-regional planning relationships with emphasis on techniques used in regional analysis.

GEOG 3215. Environmental Planning. (3) Interaction and relationships between natural and human-made elements of the environment with emphasis on planning concepts and methodologies used in contemporary environmental planning.

GEOG 3220. Renewable Energy and Regional Energy Markets. (3) Examination of production, consumption, and distribution of energy, including traditional sources, such as oil, coal, natural gas, and nuclear energy; and renewable sources, including hydroelectric, wind, solar, and biofuels, with special attention to regional energy resources endowments. Energy markets and models are also examined with reference to environmental impacts in both domestic and international contexts.

GEOG 3250. World Food Problems. (3) Magnitude, consequences, major causes and potential solutions to the world's food problems.

GEOG 3260. Medical Geography. (3) Traditional aspects of medical geography including disease mapping, disease ecology and statistical association and more recent social scientific topics, including disease diffusion, healthcare facilities planning and spatial behavior.

GEOG 3280. Sustainability Field Study in the Peruvian Amazon. (3) Prerequisite(s): Permission of instructor. This experiential learning course explores the economic, equity, and environmental issues associated with sustainable development in the Peruvian Amazon rainforest. Students travel to Peru over Spring Break and engage with local communities to discuss the context of how they measure and evaluate locally innovative sustainability practices. Students will examine and analyze the interconnections among the United Nations' sustainable development goals and make comparisons about how the goals are achieved in various physical and cultural landscapes across the globe. Registration for this course is only permitted by successful application process in the Education Abroad Office.

GEOG 3306. Contemporary Issues in the Middle East. (3) Examines the contemporary Middle East and the key socio-economic, cultural, political, and environmental dynamics shaping the region and its peoples in the 21st century.

GEOG 3500. Geography Cooperative Education Experience. (0) Enrollment in this course is required for the department's geography cooperative education students during each semester that they are working. Participating students pay a course registration fee for transcript notation. Assignments must be arranged and approved in advance. The Cooperative Education Program is only open to undergraduate students; graduate level students are encouraged to contact their academic departments to inquire about academic or industrial internship options for credit. For more information, contact the University Career Center. *Course may be repeated. Graded on a Satisfactory/Unsatisfactory basis.*

GEOG 4000. Topics in Geography. (3) Prerequisite(s): Permission of instructor. An intensive study of topics in geography from such areas as urban, manufacturing, planning, retailing activity, transportation, political geography, and environmental geography. *May be repeated for credit with change of topic.*

GEOG 4102. Cartographic Design and Map Construction. (3) Design process and basic map construction techniques with particular emphasis on the graphic elements of map design, planning map design, creating visual hierarchies, the uses of color, and basic mechanical color separation.

GEOG 4103. Computer Programming for GIS Applications. (3) Cross-listed Course(s): GEOG 5103. Prerequisite(s): GEOG 1103 or permission of instructor. Software program development and scripting for GIS and mapping applications using high level programming languages. Emphasis on the design and implementation of geographic data structures and algorithms.

GEOG 4108. Sport, Place, and Development. (3) Prerequisite(s): GEOG 1105. Examination of sport and its impact on the landscape of cities and communities. Implications of sport are examined in terms of urban land use, urban social structure, markets, franchise movement and expansion, urban politics, its role in defining sense of place, and its impact on the development of communities and regions.

GEOG 4110. GIS for Non-Majors. (3) Examines the fundamental concepts and techniques of Geographic Information System (GIS) technology and its application to social and physical sciences. Students learn processing, collecting, organizing, displaying, and analyzing

geographic data from address geocoding, GPS, CD-ROM, World Wide Web, and other sources. Emphasis placed on data preparation, analysis, and presentation. Labs introduce students to ArcGIS.

GEOG 4131. Environmental Modeling with GIS. (4) Prerequisite(s): GEOG 3120 or permission of instructor. Theories and practices of modeling the environment with GIS. Topics include: types of spatial modeling frameworks; GIS data sources and measurement technologies for environmental modeling; development, calibration, and validation of environmental models; 3-dimensional modeling and visualization of physical processes; and spatial analysis of human-environment interactions.

GEOG 4132. Spatial Modeling for Social and Economical Applications. (3) Prerequisite(s): GEOG 3120 or permission of instructor. Theories and practices of spatial modeling with social and economical applications. Topics include: overview of modeling in human geography, socioeconomic data sources, and building and evaluating spatial models. Examples of models covered in class and lab exercises include: spatial accessibility, interaction, diffusion, tipping points, segregation (simulation), geodemographic/segmentation, and Markov models (stochastic).

GEOG 4140. Geographic Information Techniques for Community Planning. (4) Prerequisite(s): GEOG 3120, one community planning course, and/or permission of instructor. Focuses on the connection between community planning and geographic information techniques under the general framework of planning support systems (PSS). It is designed to help students develop knowledge, skills, and experience in: (1) municipal geographic database handling; (2) land suitability and feasibility assessment; (3) landscape aesthetics assessment; (4) sketch planning; and (5) systematic approaches to planning. A real work project from the Charlotte region is conducted. A two-hour lab is required.

GEOG 4150. Spatial Database Development with GPS and GIS. (3) Prerequisite(s): GEOG 3120 or permission of instructor. The fundamentals of database management systems and their relevance in GIS. Emphasis placed on the effective creation, maintenance, and retrieval of data from a spatially enabled database. Topics include: relational database theory and design, entity-relationship diagrams, Structured Query Language (SQL), spatial queries, geodatabase design.

GEOG 4155. Retail Location. (3) Spatial attributes of retailing and related activities. Location patterns, store location research, trade area delineation and consumer spatial behavior are discussed with the goal of creating an evolutionary perspective on the industry. Methodological emphasis on data collection, manipulation, and interpretation using industry-specific software.

GEOG 4160. The Geography of Transportation Systems. (3) Geographical and human factors that affect the movement of goods and people from place to place. Emphasis on transportation routes and networks, commodity flow patterns, and the locational implications of freight rates.

GEOG 4180. Web GIS. (3) Cross-listed Course(s): GEOG 5180. Prerequisite(s): GEOG 3120. Introduction to the basic knowledge of, and advances in, Internet/Web GIS. Emphasis on the principles, methods, and applications of Web- or Internet-based GIS coupled with hands-on

laboratory exercises for conducting GIS data operations, query, mapping, and spatial analysis/modeling via the Internet.

GEOG 4200. Environmental Justice, Injustice, and Planning. (3) Prerequisite(s): GEOG 1103 or GEOG 1511. Cross-listed Course(s): GEOG 5200. Introduction to the history of the environmental justice movement, exploring the environmental issues, policies, and government and community responses to addressing environmental injustice. Students will learn about environmental justice through empirical studies on the spatial distribution of environmental quality and health, enforcement of regulations, access to resources to respond to urban and industrial problems, and environmental decision-making processes through the lens of race and class. Course readings, videos, and lectures will analyze how communities of color, rural, and/or low-income communities, and undocumented immigrants improve environmental regulations and policies through their resistance and activism, despite their exclusion from environmental planning and decision-making processes. Lastly, students will be introduced to community and government led strategies to promote environmentally just development.

GEOG 4209. Small Town and Community Planning. (3) Prerequisite(s): GEOG 1511 and GEOG 2111 or permission of instructor. Explores small town population dynamics, rural-urban fringe land use dynamics, and changes in small towns' community identity and sense of place. Emphasis on the issues and techniques that typify small town planning environments. Students investigate these issues via field work and data collection at municipal scales within the Charlotte region.

GEOG 4210. Urban Planning Methods. (3) Prerequisite(s): GEOG 3205 or permission of instructor. Scope and methods of urban planning. Emphasis on analytical techniques, projections, and data sources used in developing comprehensive planning tasks and strategies.

GEOG 4215. Urban Ecology. (3) Prerequisite(s): ESCI 2222 or permission of instructor. An introduction to the emerging field of urban ecology. Explores the biological, physical, and social components of the urban ecosystem at local, regional, and global scales. Emphasis on the interplay among components and the sustainability of cities during lectures, field trips, and group discussions.

GEOG 4216. Landscape Ecology. (3) An introduction to landscape ecology, the study of the interplay between spatial pattern and ecological process. Lectures and in-depth group discussions focus on the fundamental and applied aspects of topics such as habitat fragmentation, animal movement in human-dominated landscapes, landscape legacies, road ecology, and landscape planning.

GEOG 4220. Housing Policy and Planning. (3) Prerequisite(s): GEOG 1105 and at least one of GEOG 2200, GEOG 2165, GEOG 3100, GEOG 3205, or GEOG 3215; or permission of instructor. Designed to provide students a comprehensive overview of U.S. housing policy while honing their research and analytical skills. Topics include: the evolution of housing policy, how the provision of housing impacts urban spatial patterns, and the past and present role of housing on regional economic development, land use planning, environmental planning, transportation infrastructure, community revitalization, and social capital.

GEOG 4240. Geography of Knowledge and Information. (3) Examination of the factors that influence the location of economic activities in the information age. Discussions and lectures explore the

geographic aspects of the transition away from manufacturing to information processing as the primary mode of production. The transition is examined in terms of technology development, urban and regional development, information flows, and the location of quaternary industry.

GEOG 4250. Food, Migration, and Place. (3) Cross-listed Course(s): GEOG 5250. As people move in the world, food plays a central role in shaping identity, reproducing myth and ritual, and connecting diasporic communities. This mobility establishes dynamic foodways and gives rise to new food landscapes through which we can understand temporally connected sites of intense interaction. This writing intensive course unpacks these processes through investigating the dynamics of food production and consumption in a transnational world. Recognizing the centrality of culinary culture in migrant identities, this course focuses on the role of food habits, rituals, and practices in producing and sustaining shared identities and places. Students gain an understanding of these relations through engagement with case studies and literature addressing the complex spaces we inhabit in a transnational world.

GEOG 4255. Applied Population Analysis. (3) Population data sources; measuring population change; elementary projection and estimation techniques; spatial sampling; migration; survey design; applications in the public and private sectors.

GEOG 4265. Transportation Analysis Methods. (3) Prerequisite(s): Permission of department; statistics recommended. Procedures for analyzing the operation and performance of transportation systems; includes network planning models, minimum path algorithms and assignments; energy, air pollution, and activity analysis models; and research approaches, data sources, time and activity budgets, infrastructure condition and needs assessment.

GEOG 4305. Urban Field and Research Methods. (3) Prerequisite(s): GEOG 1511, GEOG 2200, or permission of instructor. Intensive field study of cities of the Carolinas, with specific emphasis on the Charlotte metropolitan area.

GEOG 4310. Urban Social Geography. (3) Prerequisite(s): GEOG 1105 and at least one of GEOG 2200, GEOG 2165, GEOG 3100, or GEOG 3205; or permission of instructor. Examines the reflexive relationship between society and urban space. Explores the intersection between urban geography and social theory, the evolution of city, community and personal spaces, and the relations and constructions of class, race, gender, and sexuality that shape and are shaped by the urban spaces in which we live and work.

GEOG 4315. The Urban Form. (3) Students will become familiar with the elements that structure urban form as well as the actors, principles, institutions, and other forces that shape the processes of urbanization. Students will approach city building as an iterative process that unfolds at a range of scales, analyzing the ways in which urban form has been shaped by natural settings, agricultural production, land subdivision practices, building forms, transportation networks, land use patterns, social norms, and planning theories. Examples and case studies will be drawn from cities worldwide, while student assignments and projects will focus on the city of Charlotte.

GEOG 4340. Urban Analytics. (3) Prerequisite(s): GEOG 3120 or permission of instructor. Cross-listed Course(s): GEOG 5340. Urban

analytics is an emerging field that helps improve the understanding, management, and planning of cities by harnessing urban big data from a wide array of sources, including mobile devices, remote sensing, social media, and government records. This course is designed to introduce students to the basics of data analytics and its application in dealing with various urban challenges, such as urban sprawl, crime, air pollution, socioeconomic inequity, sustainable transportation, and public health. Hands-on practices will help students to be equipped with the knowledge and skills to collect, manage, and analyze data in urban environments to extract meaningful insights and make informed decisions that support urban planning and policymaking.

GEOG 4400. Internship in Geography. (3-6) Prerequisite(s): Permission of department. Research and/or work experience designed to be a logical extension of a student's academic program. The student must apply to department for an internship by submitting a proposal which specifies the type of work/research experience preferred and how the internship will complement his or her academic program. The student can receive three to six hours credit depending on the nature and extent of the internship assignment. *May be repeated for credit with change of topic.*

GEOG 4600. Geography Professional Development Seminar. (3) Prerequisite(s): GEOG 2110 and Senior standing. Examination of opportunities and key issues involved in the transition from the undergraduate degree program to professional life or continued formal education at the graduate level. Design and/or completion of essential documents to facilitate the transition including resume, professional portfolio, graduate program applications, exit survey, and assessment examination.

GEOG 4700. Black Place-Making: Introduction to Black Geographies. (3) Prerequisite(s): GEOG 1103 or GEOG 1105. Cross-listed Course(s): AFRS 4050, HONR 3700. Black Geographies is a discipline within the critical geographies cannon that studies the social, political, cultural, economic, and ecological aspects of race in/and geography. The course encourages critical reflection on the issues, processes, intrinsic qualities, and interconnections that shape Black lives and geographies on local, national, continental, and international scales. This course introduces students to the rich body of literature and activism highlighting the characteristics, politics, and practices that shape and are shaped by Black communities, and their connections to place, self and the environment.

GEOG 4800. Individual Study in Geography. (1 to 4) Prerequisite(s): Permission of department must be obtained and credit hours established in advance; and, when taken for honors credit, approval of a proposal through the Honors College Application to Candidacy process the semester prior to taking the course. Tutorial study or special research problems. *May be repeated for credit.*

Geology (GEOL)

GEOL 1200. Physical Geology. (3) A study of the basic geological principles and processes in the earth sciences; the earth as a planet; treatment of physical processes shaping the earth; earth materials and landforms.

GEOL 1200L. Physical Geology Laboratory. (1) Pre- or Corequisite(s): GEOL 1200. Experimental study and investigation of the basic geological principles and processes in earth science; minerals, rocks, earth materials, and landforms. One lab period of three hours per week. Off-campus field trip required.

Note: Although the laboratory and lecture sections of GEOL 1200 are taught as separate courses it is recommended that students take GEOL 1200L concurrently with GEOL 1200. Students with scheduling problems or students not fulfilling the UNC Charlotte science and technology requirements may take the lecture without the laboratory. Students fulfilling the UNC Charlotte science and technology requirement must either: (a) take GEOL 1200 and GEOL 1200L concurrently or (b) take GEOL 1200L in a semester subsequent to taking GEOL 1200.

GEOL 1210. Earth History. (3) Prerequisite(s): GEOL 1200 and GEOL 1200L. The origin and evolution of the earth's major features: the beginnings and changes of the earth's continents, atmosphere, oceans, and life forms, set in the vast context of geologic time. Three hours of lecture.

GEOL 1210L. Earth History Lab. (1) Prerequisite(s): GEOL 1200 and GEOL 1200L. Pre- or Corequisite(s): GEOL 1210. Learn basic techniques used by geologists to interpret the history of life, changing surface environments and habitats, plate tectonic movement, mountain building events, and climate changes. Hands-on investigation of rocks, fossils, geologic maps, and more. One lab period of three hours per week. Off campus field trip required.

GEOL 2020. The Planets. (3) Spacecraft exploration over the past 50 years has revealed the diversity and complexity of the Earth's neighbors in space. This course is designed to explore the varied surface landscapes of planets and moons in the solar system and to understand the processes that created them. Topics for discussion will include the origin of the solar system, comparisons among the planetary bodies, and the processes which modify their surfaces (tectonics, volcanism, impact cratering, weather and climate, glaciations, and other processes). The spacecraft and sensors used to study planetary bodies will also be discussed.

GEOL 3000. Selected Topics in Geology. (1 to 4) Prerequisite(s): GEOL 1200 and GEOL 1200L; or permission of instructor. Treatment of specific topics selected from one of the fields of geology. *May be repeated for credit with change of topic.*

GEOL 3105. Mineral Resources. (3) Prerequisite(s): GEOL 1200. An overview of the geologic processes responsible for forming metallic and fossil fuel resources as well as common extraction and waste disposal methods. Economic, environmental and social effects of mineral resource consumption are also examined. Three hours of lecture per week.

GEOL 3115. Mineralogy. (4) Prerequisite(s): GEOL 1200 and GEOL 1200L. Pre- or Corequisite(s): CHEM 1251 and CHEM 1251L, or permission of instructor. An introduction to the methods used to identify minerals based on physical and optical properties with a focus on rock-forming and economic minerals. Three hours of lecture and one three-hour lab per week.

GEOL 3124. Sedimentology. (4) Prerequisite(s): GEOL 1210, GEOL 1210L, and GEOL 3115; or permission of instructor. Examination of sedimentary rock features and compositions as related to origin, dispersion, deposition, diagenesis, classification and general distribution of sedimentary materials. Three hours of lecture and one three-hour lab per week.

GEOL 3130. Structural Geology. (4) Prerequisite(s): GEOL 3115 or permission of instructor. A systematic examination of the structures and processes of rock deformation. Three lecture hours, one three-hour lab per week.

GEOL 3140. Paleontology. (3) Prerequisite(s): GEOL 1200, GEOL 1200L, GEOL 1210, and GEOL 1210L; or permission of instructor. Nature of fossils, analysis of growth and variation in fossil assemblages, reconstruction of the modes of life of extinct organisms, paleobiogeography, biostratigraphy, and the fossil record of evolutionary pattern and processes.

GEOL 3190. Environmental Geology. (3) Prerequisite(s): GEOL 1200 and GEOL 1200L. Aspects of geology with direct or indirect impact on society. Topics include: slope stability, earthquake hazards, solid waste disposal, flooding, ground water problems, soil loss, sediment pollution, watershed dynamics, water and soil pollution, and radioactive waste disposal.

GEOL 3190L. Environmental Geology Laboratory. (1) Pre- or Corequisite(s): GEOL 3190. Investigation of the causes, consequences, and mitigation of natural hazards and disasters. One three-hour lab per week.

GEOL 4000. Selected Topics in Geology. (1 to 4) Prerequisite(s): ESCI 1101, ESCI 1101L, GEOL 1200, and GEOL 1200L; or permission of instructor. In-depth treatment of specific topics selected from one of the fields of geology. *May be repeated for credit with change of topic.*

GEOL 4100. Igneous and Metamorphic Petrology. (4) Prerequisite(s): GEOL 3115. Classification, mineralogy and chemical properties of igneous and metamorphic rocks including the tectonic processes by which they formed. Lab emphasizes hand specimen and petrographic description and interpretation of rocks in thin sections.

GEOL 4105. Geomorphology. (4) Cross-listed Course(s): GEOL 5105. Prerequisite(s): ESCI 1101, GEOL 1200, and GEOL 1200L. Discusses surficial processes and landform development as controlled by climate, tectonics, rock characteristics and time. An emphasis is placed on field-based analyses of weathering, erosion, mass wasting (landslides and rock falls), and surface water processes (flooding and floodplains), and how climate change and tectonics may affect them in landscape development.

GEOL 4110. Stratigraphy. (4) Prerequisite(s): GEOL 1210, GEOL 1210L, and GEOL 3124; or permission of instructor. Vertical and horizontal relationships of layered earth materials as a key to understanding basin history, past depositional environments, and their transformation through time. Three lecture hours, three lab hours per week.

GEOL 4115. Applied Geophysics. (4) Cross-listed Course(s): GEOL 5115. Prerequisite(s): GEOL 1200 or permission of instructor. Instrumental analysis of Earth's geophysical parameters. Study of human-induced

seismic and electrical signals, and natural magnetic and gravitational fields for the purposes of locating faults, ore bodies, ground water, and geotechnical or archaeological targets. Three hours of lecture and one three-hour lab per week.

GEOL 4130. Optical Mineralogy. (4) Prerequisite(s): GEOL 3115. Light optics theory, the behavior of plane polarized light in a solid medium. The laboratory emphasizes the use of petrographic microscope oil immersion techniques and identification of the common rock forming minerals. Three hours of lecture and one three-hour lab per week.

GEOL 4135. Tectonics. (4) Prerequisite(s): GEOL 3130 or permission of instructor. A systematic examination of the evolution and dynamics of the earth from the perspective of plate tectonics theory. Three lecture hours, and one three-hour lab per week.

GEOL 4140. Coastal Geology. (3) Prerequisite(s): GEOL 1200 and GEOL 1210; or permission of instructor. Examination of coastal environments, sediments, and wave-related processes in the present and geologic past. Major topics considered include barrier-island and salt-marsh development, sea-level fluctuations, and the relationship between human development and natural hazards. Three lecture hours per week and one two-day field trip.

GEOL 4145. Hydrogeology. (4) Prerequisite(s): GEOL 1200 and GEOL 1200L or ESCI 1101 and ESCI 1101L; CHEM 1251, and CHEM 1251L; or permission of instructor. Fundamentals of physical and chemical groundwater hydrology. Principles of flow, transport, and chemical reactions in aquifers and the vadose zone, including groundwater-surface water interactions. Three hours of lecture and three hours of lab per week, with occasional field trips.

GEOL 4165. Aqueous and Environmental Geochemistry. (3) Prerequisite(s): CHEM 1251, CHEM 1251L, CHEM 1252, CHEM 1252L, GEOL 1200, and GEOL 1200L; or permission of instructor. Water-rock interaction and processes controlling the chemical composition of natural waters (streams, lakes, and groundwater). Topics include: the carbonate system, mineral precipitation/dissolution, redox reactions, and metal speciation.

GEOL 4175. Geochemistry. (3) Prerequisite(s): GEOL 1200, GEOL 1200L, CHEM 1251, and CHEM 1251L; or permission of instructor. Geochemical survey of origin, evolution, and present composition of the Earth.

GEOL 4310. Applied Soil Science. (4) Prerequisite(s): ESCI 4210 or permission of instructor. Students read and discuss current literature pertaining to the application of soils to various fields of research such as surficial processes, active tectonics, ecology, stratigraphy, archaeology, and environmental assessment. Topics covered will vary depending on the interests of the students. Students will create and execute a semester-long soils-based field or laboratory research project of their choosing. Three hours seminar, three hours field or lab each week.

GEOL 4400. Internship in Geology. (3-6) Prerequisite(s): Permission of department. Research and/or work experience designed to be a logical extension of a student's academic program. Students must apply to the department for an internship by submitting a proposal which specifies the type of work/research experience preferred and how the internship will complement his or her academic program. Students may receive

three to six hours credit depending on the nature and extent of the internship assignment. *May be repeated for credit with change of topic.*

GEOl 4800. Individual Study in Geology. (1 to 4) Prerequisite(s): Permission of department and credit hours established in advance; and, when taken for honors credit, approval of a proposal through the Honors College Application to Candidacy process the semester prior to taking the course. Tutorial study or special research problems. *May be repeated for credit with change of topic.*

German (GERM)

GERM 1201. Elementary German I. (3) For students with limited or no previous experience in German. First course in a four-course sequence to develop competence in culture, speaking and writing, listening and reading comprehension in German.

GERM 1202. Elementary German II. (3) Prerequisite(s): GERM 1201 or permission of department. Second course in a four-course sequence to develop competence in culture, speaking and writing, listening and reading comprehension in German.

GERM 1502. Global Arts/Humanities: German and German-Speaking Cultures. (3) This Global Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of a complex, interconnected world. Students are introduced to critical studies of language and culture through a broad engagement with the influence and presence of German and German-speaking cultures throughout the world. Course materials may draw widely from pop culture, music, film, media, the arts, and literature. Taught in English.

GERM 2201. Intermediate German I. (3) Prerequisite(s): GERM 1202 or permission of department. Third course in a four-course sequence to develop competence in culture, speaking and writing, listening and reading comprehension in German.

GERM 2202. Intermediate German II. (3) Prerequisite(s): GERM 2201 or permission of department. Fourth course in a four-course sequence to develop competence in culture, speaking and writing, listening and reading comprehension in German.

GERM 3050. Topics in German Culture (English). (3) Study of topics in German culture. Conducted in English. *May be repeated for credit with change of topic.*

GERM 3051. Topics in German Culture (German). (3) Prerequisite(s): GERM 2201, GERM 2202, GERM 3201, and GERM 3202; or permission of department. Study of topics in German culture. Conducted in German. *May be repeated for credit with change of topic.*

GERM 3201. Advanced German Language and Culture I. (3) Prerequisite(s): GERM 2202 or permission of department. Review of German grammar, oral, and written work in the language through the study of culture and film. Conducted in German.

GERM 3202. Advanced German Language and Culture II. (3) Prerequisite(s): GERM 2202 or permission of department. Further review of German grammar, oral, and written work in the language through the study of culture and film. Conducted in German.

GERM 3225. Short-Term Abroad. (3) Prerequisite(s): Permission of instructor. Faculty-led short-term study abroad experience offered during Spring Break.

GERM 3650. The Holocaust in German Literature and Film. (3) This course honors and is taught in memory of Dr. Susan Cernyak-Spatz who created this course. She survived the Holocaust in several camps, among them Auschwitz-Birkenau. Through the lens of German literature and film, students examine the Holocaust with a focus on historical, moral, and aesthetic issues in its representation. Conducted in English; no knowledge of German required.

GERM 3660. Survey of German Film. (3) Introduction to major movements in German film history. Conducted in English.

GERM 3670. Seminar: German-American Culture for Business and Engineering I (English). (3) Introduction to German-American business culture taking into consideration the world of engineering. Conducted in English.

GERM 3680. Seminar: German-American Culture for Business and Engineering II (English). (3) Personalized study of German-American business culture taking into consideration the world of engineering. Conducted in English.

GERM 3690. Seminar: Career Planning for the German-American Business World. (3) Study of the German-American business world with emphasis on career planning. Conducted in English.

GERM 4051. Topics in German Culture. (1 to 3) Prerequisite(s): GERM 2201, GERM 2202, GERM 3201, and GERM 3202; or permission of department. Advanced study in German culture. Conducted in German. *May be repeated for credit with change of topic.*

GERM 4061. Topics in German Language. (1 to 3) Prerequisite(s): GERM 2201, GERM 2202, GERM 3201, and GERM 3202; or permission of department. Advanced study in German Language. Conducted in German. *May be repeated for credit with change of topic.*

GERM 4410. Professional Internship in German. (3) Pre- or Corequisite(s): GERM 2201, GERM 2202, GERM 3201, and GERM 3202; or permission of department. Faculty-supervised field and/or research experience in a cooperating professional (e.g., business) or community organization. Contents of internship based upon a contractual agreement among the student, department, and business or community organization. *May be repeated for credit.*

GERM 4661. Advanced Seminar in Business German I. (3) Prerequisite(s): GERM 2201, GERM 2202, GERM 3201, and GERM 3202; or permission of department. Advanced studies in Business German, intensive practice in written business communication and introduction to German economic and business life. Conducted in German.

GERM 4671. Advanced Seminar in Business German II. (3) Prerequisite(s): GERM 2201, GERM 2202, GERM 3201, and GERM 3202;

or permission of department. Advanced studies in Business German, intensive practice in oral business communication and advanced studies in German economic and business life. Conducted in German.

GERM 4800. Directed Individual Study. (1 to 3) Prerequisite(s): Permission of department. Individual work on a selected area of study, arranged with the instructor and by special permission only. *May be repeated for credit.*

Gerontology (GRNT)

GRNT 2100. Aging and the Lifecourse. (3) (SL) Cross-listed Course(s): SOCY 2100. An interdisciplinary course that examines the phenomenon of aging and its consequences for society from a variety of perspectives. Students participate in lectures, discussions and service learning projects designed to give them a broad overview of the field of gerontology. Emphasis on the wide variation in the aging process and approaches to meeting the needs of the aging population.

GRNT 2124. Psychology of Adult Development and Aging. (3) Cross-listed Course(s): PSYC 2124. Prerequisite(s): PSYC 1101 with grade of C or above. Psychological development through adulthood and old age. Emphasis on processes underlying continuity and change in adulthood, including personality and socialization, cognitive development and the psychophysiology of aging.

GRNT 3115. Health and the Aging Process. (3) Cross-listed Course(s): HLTH 3115. Examination of the physiologic processes of aging as a normal life experience. Study of psychological, nutritional and general health issues designed to facilitate high-level wellness.

GRNT 3125. Older Worker and Retirement. (3) Cross-listed Course(s): PSYC 3125 and SOCY 3125. Physical characteristics, personal attitudes, and structural factors affecting the employment of persons over 40. Topics include: biological aging, myths and stereotypes about older workers, public policies, human resources practices, economics of retirement, and theories about career and life stages.

GRNT 3134. Families and Aging. (3) Cross-listed Course(s): SOCY 3134. Theories explaining the formation and functioning of American families with emphasis on the impact of the aging of society. Examination of the current demographic trends and expectations of multigenerational families, as well as the future demands and modifications.

GRNT 3267. Sociology of Dying, Death, and Bereavement. (3) Cross-listed Course(s): SOCY 3267. Social definitions of death, process of dying, facing death across the lifecourse, grief, bereavement, bioethical issues, impacting individuals and society.

GRNT 3600. Senior Seminar and Field Experience in Aging. (3) Prerequisite(s): completion of at least 12 credit hours in gerontology curriculum with grades of C or above, including GRNT 2100 and two primary electives (selected from GRNT 2124, GRNT 3115, GRNT 4110, and GRNT 4250). Capstone course for the Minor in Gerontology designed to help students apply theories, research methods, and specific intervention strategies to substantive issues, and critically examine the organizational structure of aging programs and policies. Two seminar hours and six field placement hours per week.

GRNT 3800. Independent Study in Gerontology. (1 to 8) Prerequisite(s): Permission of instructor and the gerontology undergraduate coordinator. Supervised individual study and/or field-based experience in a topic or area of Gerontology of particular interest to the student. *May be repeated for credit but only a total of 3 credits can be counted toward a Gerontology minor.*

GRNT 4050. Topics in Gerontology. (1 to 4) Investigation of specific issues in Gerontology, either from the perspective of a single discipline or from a multidisciplinary perspective. *May be repeated for credit with change of topic.* A total of 3 credits can be counted toward minor.

GRNT 4110. Sociology of Aging. (3) Cross-listed Course(s): SOCY 4110. Changing characteristics, aspirations and needs of older adults and their impact upon such institutions as the family, work, the economy, politics, education and healthcare; emphasis on sociological theories of aging, contemporary research, and the analysis of specific aging policies and programs.

GRNT 4250. Aging Programs and Services. (3) Examination of federal, state, and local framework of services and programs for the aging.

GRNT 4260. Women: Middle Age and Beyond. (3) Cross-listed Course(s): HLTH 4260 and WGST 4260. Position of older women in society and the particular problems and issues for women as they age.

GRNT 4280. The Experience of Dementia. (3) Cross-listed Course(s): SOWK 4280. Provides an overview of Alzheimer's disease and related disorders using a person-centered perspective. Explored from the perspectives of the person diagnosed, family members and concerned friends, and both informal and formal caregivers. Students gain a holistic insight into these disorders and their implications for both individuals and society.

GRNT 4290. The Experience of Loneliness. (3) Cross-listed Course(s): SOCY 4290. Explores the experience of loneliness among older adults in society. Drawing on academic texts, empirical research, and personal accounts of loneliness, the aim is to identify the extent of loneliness experienced by older adults in various contexts. In particular, the readings consider the consequences of loneliness on the physical, mental, and social well-being of older adults.

GRNT 4353. Environments for Aging. (3) Cross-listed Course(s): SOWK 4353. Introduction to the values and practices of a broad spectrum of housing alternatives for an aging population, which include traditional and household models of long term care, therapeutic environments for individuals with dementia, Naturally Occurring Retirement Communities (NORCS), as well as co-housing and intentional community options.

GRNT 4364. Aging and Criminal Justice: An Interdisciplinary Understanding (3) Cross-listed Course(s): CJUS 4364. Utilizes an interdisciplinary approach to examining the many ways in which we interface with the criminal justice system as we age. Topics include: the nature and extent of aging related crime, the criminal justice system response to older offenders, older adults as participants in criminal trials, older adults as victims of crime and abuse, and legal issues for the older adult population. Particular attention is placed on assessing these issues from a policy perspective that incorporates concern for administrative, legal, and ethical issues.

GRNT 4365. Grief and Loss Across the Lifespan. (3) Cross-listed Course(s): GRNT 5365, SOWK 4365, and SOWK 5365. Prepares the professional practitioner to understand and respond effectively to individuals, families, groups, organizations and communities experiencing both symbolic and tangible losses and accompanying grief reactions. Topics include: theories of normal and complicated grief, factors that influence grief at different stages of the life span, cultural and spiritual influences, traumatic loss, anticipatory grief and end of life care, the impact of loss and working in close contact with grief on professionals, and skills and strategies that address therapeutic needs of vulnerable and resilient populations experiencing grief.

GRNT 4366. Minorities and Aging. (3) Cross-listed Course(s): SOCY 4366. An overview of diversity in aging through a multidisciplinary lens. Key concepts and current research findings concerning older adults are discussed within a historical gerontological context. Drawing from the rich contributions of several disciplines (e.g., gerontology, sociology, social work, psychology), the course challenges students to consider complex issues of aging and their unique impact on diverse older populations.

Health and Human Services (HAHS)

HAHS 1101. Prospect for Success in Health and Human Services. (1 or 3) Prerequisite(s): First-semester Freshman; and either Pre-Kinesiology, Pre-Nursing, Pre-Public Health, Pre-Social Work, or Health Systems Management major. A seminar-style learning experience designed for freshmen College of Health and Human Services pre-majors to engage in the University, college, and community activities to successfully graduate within four years. Provides students with an orientation to University resources, engaging students in self-development/reflection, inquiry, goal-setting, disciplinary content, and constructing a career trajectory in one of the professional disciplines within the college. *May not be repeated for grade replacement.*

HAHS 1201. Prospect for Success for Transfer Student. (1) Prerequisite(s): College of Health and Human Services transfer student. A seminar-style learning experience designed for CHHS transfer student pre-majors to engage in the University, college, and community activities and successfully graduate within four years. Provides an orientation to University resources, engaging students in self-development/reflection, inquiry, goal-setting, disciplinary content, and constructing a career trajectory in one of the professional disciplines within the college. *May not be repeated for grade replacement.*

HAHS 1511. Local Social Science: Issues of Health and Quality of Life. (3) All Local Theme courses explore the central, unifying question of what it means to be a member of the "local" community in which we live. Through the study of the experiences of different peoples, cultures, and communities in our city, our region, or our nation, students will be able to better understand themselves in the context of the complex and diverse society in which we live. This local theme course explores individual and social aspects of health. Analysis of individual health and illness behavior and theory; the social, political, and economic contexts of health and illness; and the broad cultural, ethical, and religious understandings of health and illness. *May not be taken for credit and for a grade if credit has been received for LBST 2214.*

Holocaust, Genocide, and Human Rights Studies (HGHR)

HGHR 2100. Introduction to Holocaust, Genocide, and Human Rights Studies. (3) Cross-listed Course(s): INTL 2100. Examines the Nazi Holocaust and its origins in Western thought and practice. Analyzes the psychological, cultural, and political roots of other genocides and forms of mass violence. Explores modern concepts of human rights and the role of human rights activism.

HGHR 3050. Topics in Holocaust, Genocide, and Human Rights Studies. (3) Cross-listed Course(s): ANTH 3127. Study of a special topic. *May be repeated for credit with change of topic.*

HGHR 3110. Resistance During the Holocaust. (3) Cross-listed Course(s): INTL 3173. Modern history has given rise to various forms of repression, but no system -- not even Nazi Germany -- succeeded in extinguishing the desire for greater freedom. The subjects and victims of the Third Reich devised varied, creative ways to resist Nazi tyranny, preserve pre-Nazi political and social traditions, and assert their dignity. Through memoirs and other readings, the range of responses and survival strategies of Jews, dissident Germans, and peoples of Poland, France, and other German-occupied lands are explored.

HGHR 3220. The U.S.-Vietnam War and the Global Upheaval of the 1960s-1970s. (3) Cross-listed Course(s): HIST 3003 and INTL 3174. The U.S.-Vietnam War continues to haunt the political and cultural landscape of both nations. Yet the war remains poorly understood and remembered - in both lands. This course stresses the diversity of American experiences, as well as the breadth of Vietnamese experiences and perspectives. It provides a multidisciplinary, multicultural, global overview of the war's history and context, examining imperialism, racism, and anti-colonialism; socialism and Stalinism; and the global youth revolt that was provoked in large part by the war. Cultural texts (e.g., music, literature, film), memoirs, and other primary and secondary sources are examined.

Health & Medical Humanities (HHUM)

HHUM 2100. Introduction to Health & Medical Humanities. (3) Prerequisite(s): Interdisciplinary Studies major concentrating in Health & Medical Humanities or Health & Medical Humanities minor. Health & Medical Humanities is an interdisciplinary field that uses humanistic perspectives to understand health and healthcare. The humanities have the potential to teach us about the embodied human experience, including suffering, healing, well-being, and flourishing. As an introduction to the minor or concentration in Health & Medical Humanities, this course employs holistic and integrated understandings of what it means to be human, in contrast to what has been called "biomedical reductionism." Introduces health and the body through multiple ways of knowing; students experience a holistic, "whole-body" approach to understanding the body. Moving through embodied knowing, heartful knowing, narrative knowing, critical knowing, cultural knowing, collaborative knowing, contemplative knowing, aesthetic knowing,

empathetic knowing, social knowing, ethical knowing, and systematic knowing, students are moved through narrative, arts-based, humanities, social science, and dialogic ways of thinking in order to intentionally and variously use stories, poems, mediated images, cultural artifacts, and artwork; physical sensations and emotions; knowledge of culture, history, and society; and contemplation and dialogue to contribute to deep sensemaking and critical examination of what it means to be an embodied human.

HHUM 3020. Topics in Health & Medical Humanities. (3) Prerequisite(s): Interdisciplinary Studies major concentrating in Health & Medical Humanities or Health & Medical Humanities minor. Pre- or Corequisite(s): HHUM 2100. Cross-listed course(s): COMM 3051; COMM 3052. Timely and important areas relevant to Health & Medical Humanities. *May be repeated for credit with permission of advisor.*

HHUM 3030. Health & Medical Humanities Study Abroad. (3) Prerequisite(s): Interdisciplinary Studies major concentrating in Health & Medical Humanities or Health & Medical Humanities minor. Pre- or Corequisite(s): HHUM 2100. Examines Health & Medical humanities in an international setting. *May be repeated for credit with permission of advisor.*

HHUM 4800. Health & Medical Humanities Portfolio Capstone. (3) Prerequisite(s): HHUM 2100; 12 elective credit hours For HHUM minors: 12 elective credit hours (including HHUM 3020 or HHUM 3030 as options) For IDST/HHUM majors: 9 elective credit hours (including HHUM 3020 or HHUM 3030 as options); Interdisciplinary Studies major concentrating in Health & Medical Humanities or Health & Medical Humanities minor. A permit is needed for IDST/HHUM majors to enroll in this course by your advisor or the Director of HHUM. Cross-listed course(s): COMM 4615. Students work in a class setting with their professor or independently with their advisor or other approved faculty member to create a specialized project emphasizing the student's cumulative academic experience across the Health & Medical Humanities program and other related coursework. Coursework typically includes portfolio preparation, written report, and an oral report.

History (HIST)

HIST 1000. Topics in History. (3) Instruction of a historical topic at an introductory level. *May be repeated for credit with change of topic.*

HIST 1120. European History to 1660. (3) Political and cultural developments of Western Europe from the fourth century A.D. to the Age of Absolutism.

HIST 1121. European History Since 1660. (3) Cross-listed Course(s): INTL 2301. European history from the Age of Absolutism to the present. *May not be taken for credit and for a grade if credit has been received for HIST 1502.*

HIST 1160. U.S. History to 1865. (3) American history from the earliest times to 1865. *May not be taken for credit and for a grade if credit has been received for HIST 1575.*

HIST 1161. United States History Since 1865. (3) American history from 1865 to the present.

HIST 1502. Global Arts/Humanities: Issues in Global History. (3) This Global Theme course uses the methods and insights of the arts and humanities to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of a complex, interconnected world. HIST 1502 uses examples drawn from different times and places in global history to explore questions about historical change and continuity over time. Sections of this course may focus on the history of one particular country/region to enable students to appreciate how people in a different part of the world experience common events and processes. Other sections of this course may explore the dynamic relationships between two or more countries or regions of the globe. *May not be taken for credit and for a grade if credit has been received for HIST 1121.*

HIST 1575. American Democracy's Past and Promise. (3) An examination of issues or concepts related to American democracy, with attention to key historical documents including but not limited to: the Declaration of Independence, the U.S. Constitution, the Federalist Papers, the Gettysburg Address, the Emancipation Proclamation, and Dr. Martin Luther King Jr.'s Letter from Birmingham Jail. Using a variety of approaches, this course will provide the historical context and deep critical analysis necessary to help students understand the importance of these foundational documents to the American democratic journey. *Course may be repeated.*

HIST 2000. Topics in U.S. History. (3) Discussion of a topic in U.S. History. *May be repeated for credit with change of topic.*

HIST 2001. Topics in European History. (3) Discussion of a topic in European History. *May be repeated for credit with change of topic.*

HIST 2002. Topics in Non-Western History. (3) Discussion of a topic in non-Western History. *May be repeated for credit with change of topic.* Meets non-Western requirement.

HIST 2003. Topics in Comparative History. (3) Discussion of a topic in comparative history. *May be repeated for credit with change of topic.*

HIST 2004. Topics in Applied History. (3) Discussion of a topic in applied history. *May be repeated for credit with change of topic.*

HIST 2005. Introduction to Historical Studies. (3) Prerequisite(s): Entering Freshman or History Learning Community member, and permission of instructor. Seminar based on a historical theme, in which participants acquire academic and oral expression skills by co-researching and presenting the topic at hand.

HIST 2050. Themes in United States History. (3) Explores major themes in United States history. It does so by emphasizing continuity and change over time through historical examinations, analyses, and findings that focus on the interconnections and intersections of similar and/or different topics and events in the history of the United States. *May be repeated for credit with change in topic.*

HIST 2051. Themes in European History. (3) Explores major themes in European history. It does so by emphasizing continuity and change over time through historical examinations, analyses, and findings that focus on the interconnections and intersections of similar and/or different

topics and events in the history of Europe. *May be repeated for credit with change of topic.*

HIST 2092. Topics in Non-Western History. (3) Discussion of a topic in non-Western history. *May be repeated with change of topic.* Meets non-Western requirement.

HIST 2101. American Business History. (3) A survey of the origins, methods, and goals of modern business enterprise. Lectures emphasize the social history of the American business community and the relation between public policy and economic growth. Discussion emphasizes current economic problems and policies.

HIST 2105. American Slavery and Emancipation. (3) The transformation of life and labor for African Americans from the era of North American colonization through the Civil War and Reconstruction. Emphasizes slavery as a complex system of labor exploitation and racial control, the dynamics of slave communities, slave resistance, emancipation as process, blacks as agents of their own social and economic change, and the broad meanings of slavery and freedom in American life and in world history. Coursework includes reading of primary and secondary texts.

HIST 2111. Technology and Science in Society II: Since the Industrial Revolution. (3) The history of science and technology in society from the 18th century to the present. Examines the inter-connections of science and technology with society, with particular attention to the U.S. This course does not require a background in science or technology.

HIST 2120. American Military History. (3) A survey of the development and organization of military practice from the colonial period to the present.

HIST 2130. History of the American Indian. (3) An introduction to the diversity of Native North America and the trends and movements that shaped the experiences of Native peoples in North America. The course also examines the relationships between Native Americans and non-Native Americans and the repercussions of those relationships.

HIST 2140. Disease and Medicine in History. (3) Development of medical knowledge, trends in the techniques and availability of medical and psychiatric care, impact of disease and medicine, on selected problems in world history.

HIST 2150. U.S. Women's History to 1877. (3) Cross-listed Course(s): WGST 2150. A survey of women's experience in the U.S. from colonization through the Civil War and reconstruction. Special emphasis on the evolution of women's public roles and the impact of class, race, and region in shaping women's lives.

HIST 2151. U.S. Women's History since 1877. (3) Cross-listed Course(s): WGST 2251. A survey of women's experience in the U.S. from reconstruction to the present. Special emphasis on work, family, and feminism, and the impact of class, race, and region in shaping women's lives.

HIST 2152. European Women's and Gender History. (3) Cross-listed Course(s): WGST 2252. An exploration of women's changing roles in European Society and politics, covering topics of religion, work, family, and activism.

HIST 2155. Southern Women's History. (3) Surveys the history of women's experiences in the American South. Through readings, lectures, and discussion students will learn about the importance of race, class, and gender in shaping southern women's lives.

HIST 2160. African American History, 1400-1860. (3) Cross-listed Course(s): AFRS 2160. Explores the events and circumstances that brought Africans to the Americas and the experience of these peoples during the time that slavery persisted in the South. Emphasis will be upon the economic and cultural systems that created and maintained slavery in the South and constrained freedom in the North and on the responses and struggles of Africans to these systems.

HIST 2161. African American History Since 1860. (3) Cross-listed Course(s): AFRS 2161. Explores the African American experience from the Civil War to the present. It follows the struggle of freed slaves and free people of color to take advantage of the promise of emancipation and the changing place of African Americans in their society.

HIST 2162. African American Women's History to 1877. (3) Discusses the historical experiences of women of African descent living in the United States from the colonial period to the end of Reconstruction. Through themes like work, family, religion, identity, image, sexuality, and oppression, students explore how social, political, and economic events shaped the meanings of freedom for women of African descent.

HIST 2163. African American Women's History Since 1877. (3) Discusses the historical experiences of women of African descent living in the United States from the end of Reconstruction to the present. Through themes like work, family, religion, culture, identity, image, sexuality, and oppression, students explore how class, race, and region shaped African American women's lives.

HIST 2170. Latino/as in the United States, 1846 to Present. (3) Cross-listed Course(s): LTAM 2270. A survey of the diverse Latino/a experience in the United States from the Mexican-American War to the present, with emphasis on the twentieth century and contemporary issues. Themes include colonialism, immigration policies, transmigration, labor, rural and urban life, culture, political and environmental activism, and race relations.

HIST 2201. History of Modern Asia. (3) Cross-listed Course(s): INTL 2201. Focus on the rise of modern Asia from the period just prior to the armed intervention of Western European nations. Emphasis is placed on the impact of imperialism, colonialism, and the rise of Asian nationalism on Asian societies. Meets non-Western requirement.

HIST 2206. Colonial Latin America. (3) Cross-listed Course(s): LTAM 2206. A survey of major political, economic, and cultural developments from earliest times to 1826. Meets non-Western requirement.

HIST 2207. Modern Latin America. (3) Cross-listed Course(s): INTL 2401. A survey of Latin American history from 1826 to the present with emphasis on the economy and society. Special attention to twentieth-century revolutions and the role of the United States in Latin America. Meets non-Western requirement.

HIST 2208. Privateers, Buccaneers, and Pirates of the Caribbean, 1523-1726. (3) The investigation of piracy in the Caribbean from the sixteenth to the eighteenth century. The course begins with the

sixteenth-century French and English privateers, such as Sir Francis Drake, who both participated in the Atlantic African Slave Trade and raided the Spanish Colonies. Then it examines the buccaneer age, when crews based at Port Royal, Jamaica and Petit-Goâve, Haiti raided Spanish settlements from the Caribbean to the Pacific Coast. It ends with the Golden Age of Caribbean Piracy in the first few decades of the eighteenth century with crews who were beholden to no nation, such as those of Blackbeard and Stede Bonnet. In conjunction with attending class lectures and discussions, students read textbook and primary source readings, take quizzes and exams, and complete written assignments. *Meets non-Western requirement.*

HIST 2209. Cultures, Contacts, and Conflicts in the Colonial Caribbean, 1492-1898. (3) Investigates the colonial Caribbean as a place where the Atlantic peoples and cultures of Africa, the Americas, and Europe came into contact and conflict. The course starts with the Portuguese, whose maritime innovations and voyages along the African coast laid the groundwork for the 1492 journey of Columbus. Next covered are the Spaniards, from Columbus and the discovery of gold on Hispaniola, to the later role of the Caribbean in the wider Spanish Empire. Also examined are the Dutch, English, and French as they voyaged to the Caribbean, both to plunder and to settle. Topics include: indigenous responses to European contacts, the development of sugar plantations and the importation of enslaved Africans, and how trade connected the peoples of the Caribbean with the wider Atlantic. In conjunction with attending class lectures and discussions, students read textbook and primary source readings, take quizzes and exams, and complete written assignments. *Meets non-Western requirement.*

HIST 2210. Pre-Colonial Africa. (3) A survey of major political, economic and religious developments in Sub-Saharan Africa from earliest times to the early 19th century. Meets non-Western requirement.

HIST 2211. Modern Africa. (3) Cross-listed Course(s): AFRS 2221 and INTL 2101. A survey of major developments in 19th and 20th century Sub-Saharan Africa, with emphasis on the European conquest, the colonial period, and the triumph of modern African nationalism. Meets non-Western requirement.

HIST 2215. A History of Muslim Societies. (3) The history of Muslim societies from the 6th century until the present times. Focuses on the following issues: Birth and expansion of Islamic faith; political, cultural, artistic, intellectual and social history of Muslim societies; relationship between the Islamic World and the Christian Europe; impact of imperialism, nationalism and modernization of Muslim societies; and the efforts to reassert Islamic identity in an era of tightening globalization. Meets non-western requirement.

HIST 2216. The Modern Middle East. (3) Cross-listed Course(s): RELS 2216. An introduction to the history of this important and dynamic region. Focuses on the issues that have defined the Middle East in the recent past and provides students with the historical context needed to understand the region, its peoples, and its conflicts in greater depth. Meets non-Western requirement.

HIST 2222. History of Rome. (3) A survey of Ancient Rome from the Etruscans to the end of the Western Roman Empire in 476 A.D. Topics may include: Etruscan Italy, the Punic Wars, Republican rule, creation of the Empire, the Pax Romana, crisis of the third century, and the fall of Rome.

HIST 2225. Medieval Europe. (3) A survey of Europe from the decline of the Roman Empire, 300 B.C.E. to 1450 C.E. Topics include: the spread of Christianity, the Frankish Monarchy, the Crusades, the revival of towns, the growth of centralized monarchies, and the Black Death and its consequences.

HIST 2226. Renaissance and Reformation in Europe. (3) European history in the era of Renaissance and Reformation, 1400 to 1650, with special attention to art and comparative analysis.

HIST 2230. Life in the Middle Ages. (3) Discussion of the socio-economic underpinnings of the Medieval World with a focus on the daily life of and interactions between nobles and commoners. Topics include: war and chivalry, feudalism and manorialism, law and justice, organized and folk religion, arts and education, and the rise of the city.

HIST 2231. Magic in Medieval and Early Modern Europe, 500-1700. (3) The evolution of the role of magic in society from its ubiquitous common practice in the early Middle Ages to its deeply feared threat to social order in the Age of Enlightenment. Using texts from Medieval popes, kings, theologians, and inquisitors, students trace the changing perceptions of magic, religion, superstition and science that with dramatic social and economic societal upheavals, ultimately lead to deadly purges of imagined diabolical conspirators.

HIST 2235. The Age of Revolutions in Europe, 1789 to 1917. (3) Discussion of the role the major revolutions of the nineteenth century played in the making of modern politics.

HIST 2251. Russian History from 1552 to 1861. (3) Discussion of Russian history from the foundation of Tsarist Empire to the heyday of the Romanov Dynasty.

HIST 2252. Russian History from 1861 to the Present. (3) Discussion of the decline of the Tsarist Empire through the rise and fall of Soviet Russia.

HIST 2260. Britain to 1688. (3) An introduction to medieval and early modern British history, with an emphasis on institutional, cultural, and economic developments.

HIST 2261. Britain Since 1688. (3) An introduction to British history from the Revolution of 1688 to the present. Explores the rise of and fall of the United Kingdom as the world's leading industrial, urban, and imperial country.

HIST 2265. History of Ireland. (3) An introduction to Irish history from prehistory to the present, with attention to power relations, migration, religious identity, and nationalism.

HIST 2281. Modern Germany. (3) A survey of German history in the 19th and 20th Centuries covering the emergence of a unified Germany, the Wilhelmine Empire, the Weimar Republic, the Third Reich, the two Germanys and reunification.

HIST 2297. History of North Carolina, 1500 to the Present. (3) An overview of North Carolina's historical development focusing on the social, economic, and political events that have shaped the state.

HIST 2400. History Internship. (1 to 3) Applied historical techniques utilizing modern methodology and experiences in off-campus institutions or on historical sites. *Graded on a Pass/No Credit basis.*

HIST 3000. Topics in U.S. History. (3) Examination of a topic in U.S. History. *May be repeated for credit with change of topic.*

HIST 3001. Topics in European History. (3) Examination of a topic in European History. *May be repeated for credit with change of topic.*

HIST 3002. Topics in Non-Western History. (3) Examination of a topic in non-Western History. *May be repeated for credit with change of topic.* Meets non-Western requirement.

HIST 3003. Topics in Comparative History. (3) Examination of a topic in comparative history. *May be repeated for credit with change of topic.*

HIST 3004. Topics in Applied History. (3) Examination of a topic in applied history. *May be repeated for credit with change of topic.*

HIST 3005. Topics in Law and History. (3) Examination of a legal topic in historical context or relationship. Readings include case studies and primary source documents. *May be repeated for credit with change of topic.*

HIST 3010. Non-Western History and Culture through Film. (3) An examination of twentieth-century non-Western historical themes in cultural context through films and scholarly monographs. *May be repeated for credit with change of topic.* Meets non-Western requirement.

HIST 3011. History and Culture through Film. (3) An examination of twentieth-century historical themes in cultural context through films and scholarly monographs. *May be repeated for credit with change of topic.*

HIST 3090. Topics in U.S. History. (3) Discussion of a topic in U.S. history. *May be repeated with change of topic.*

HIST 3091. Topics in European History. (3) Discussion of a topic in European history. *May be repeated with change of topic.*

HIST 3092. Topics in Non-Western History. (3) Discussion of a topic in non-Western history. *May be repeated with change of topic.* Meets non-Western requirement.

HIST 3093. Topics in Comparative History. (3) Discussion of a topic in comparative history. *May be repeated with change of topic.*

HIST 3094. Topics in Applied History. (3) Discussion of a topic in applied history. *May be repeated with change of topic.*

HIST 3104. Britain in the Age of Industry and Empire, 1815-1914. (3) For most of the century that spanned the defeat of Napoleon and the outbreak of the First World War, Britain possessed the largest industrial economy and the biggest empire that the world had ever seen. Yet London, which became the imperial capital to a quarter of the world's people, also nurtured radicals who sought to overturn these very changes. This course explores this dynamic by focusing on three interconnected themes in nineteenth- and early twentieth-century Britain: technological and environmental change, culture, and

imperialism. In addition to reading recent scholarship and watching films, students work with historical newspapers, magazines, and other primary sources to develop their own interpretations of this fascinating period.

HIST 3105. Europe in the Age of the French Revolution and Napoleon. (3) Next to the American Revolution, the French Revolution is arguably the most important and dramatic event of the modern era. This course analyses the causes and consequences of the French Revolution and the reign of Napoleon Bonaparte on France and the European continent. Through a combination of primary and secondary sources and focused research and writing exercises, students trace the tumultuous transformation of France from a feudal society to democratic one, and evaluate the impact of Napoleonic reforms in spreading the ideals of liberty, equality, and fraternity throughout Europe.

HIST 3141. World War I. (3) World War I from the outbreak of hostilities to the peace settlement. Impact on the combatant nations and subsequent development of the World.

HIST 3142 World War II. (3) Military and social history of World War II from its outbreak in Europe to peace in the Pacific. Includes case studies of specific battles and its impact on combatants and civilians.

HIST 3147. The Third Reich. (3) The origins of Nazism, the seizure of power, Hitler's domestic and foreign policy, and the collapse in World War II.

HIST 3148. The Holocaust. (3) Study of the roots, conception, evolution and execution of the Holocaust, and its impact on culture and society. This course uses primary sources and eyewitness accounts to examine the Shoah from the perspectives of the perpetrator, rescuer, and bystander.

HIST 3154. Globalization in African History. (3) Cross-listed Course(s): AFRS 3154. Examines how the emergence of globalization and global interdependency has impacted the African continent in social, economic, political, cultural, and historical contexts. Discussion of major concepts and thinkers; with specific attention to recent historical developments, successes, and challenges. Meets non-Western requirement.

HIST 3155. Health and Healing in Africa. (3) An historical context for some of the major healthcare challenges facing Africa today from malaria and river blindness to Ebola and AIDS. Rather than uncritically accepting the impression of Africa as a 'land of disease,' the course traces the history, health, and healing from the pre-colonial era through the period of colonial domination, and since political independence. Meets non-Western requirement.

HIST 3165. History of Modern Japan. (3) Examination of Japan from about 1600 to the present, covering Japan's intellectual, social, and economic transformation from an agricultural society to an industrial power. Meets non-Western requirement.

HIST 3168. Gandhi and Radical Dissent in the Modern World. (3) Examines the life and ideas of 'Mahatma' Mohandas Karamchand Gandhi. Gandhi's radical critiques against oppression were not only central to the Indian nationalist struggle against British colonial rule, but also influenced struggles and dissenters across the globe - like Martin Luther King and the Civil Rights Movement in the United States, Nelson Mandela and the anti-apartheid movement in South Africa, or Aung San Suu Kyi

and the pro-democracy movement in Myanmar. Through his writings, as well as the arguments of his critics, students critically analyze Gandhi's role in the Indian nationalist movement, the character and scope of this dissent; and the influence of his work over American politics - specifically the Civil Rights Movement. Meets non-Western requirement.

HIST 3169. Central Asia from 1800 to the Present. (3) Examination of the history of Central Asia from the Russian conquest up through the collapse of the Soviet Union and the era of independence. Specific consideration is given to the former Soviet Republics of Kazakhstan, Uzbekistan, Tajikistan, Kirgizstan, and Turkmenistan, as well as Afghanistan, Mongolia, and Xinjiang in China. Particular themes and topics include: colonization, revolution, reform, nationalism, Islam, and international relations. Meets non-Western requirement.

HIST 3171. Comparative Genocide. (3) Cross-listed Course(s): INTL 3171. The term "genocide" is often used imprecisely in popular and political discourse. Through examinations of several case studies – the Armenian genocide, the Holocaust, and post-war genocides in Cambodia, Guatemala, and Rwanda, among others - this course explores the roots and the psychological, cultural, and political impacts of genocide and other forms of mass violence.

HIST 3172. Political Repression and Rebellion in the Contemporary World. (3) Cross-listed Course(s): INTL 3172. Modern history has given rise to various forms of repression, but no system has succeeded in extinguishing the desire for greater freedom. This course examines scholarly and popular conceptions of rebellion and other forms of collective defiance. Through the use of memoirs, contemporary accounts, and other texts, it analyzes a variety of case studies of resistance from across the world.

HIST 3176. History of Mexico. (3) Cross-listed Course(s): LTAM 3276. An examination of Mexican history from pre-Columbian times to the present. Special emphasis is given to the Spanish conquest, the colonial economy, the independence period, the revolution, and relations with the United States. Meets non-Western requirement.

HIST 3178. History of Brazil. (3) Cross-listed Course(s): AFRS 3278 and LTAM 3278. A study of Brazilian history since 1500, with an emphasis on social and economic history. Emphasizes slavery and race relations, the emergence of export economics, rural protest movements, the effects of urbanization and industrialization, and the rise and fall of the military dictatorship. Meets non-Western requirement.

HIST 3179. Authoritarianism in Latin America. (3) Cross-listed Course(s): LTAM 3279. A study of authoritarian rule and popular resistance to authoritarianism in one or more selected Latin American countries, including, but not limited to, Argentina, Brazil, and Chile. *May be repeated for credit with change of topic.* Meets non-Western requirement.

HIST 3180. Caribbean History. (3) Cross-listed Course(s): AFRS 3220 and LTAM 3220. Covering the sweep of history from European/indigenous contact, through the construction of a plantation regime based on African slave labor, and up to the present day, this course explores the spread of colonialism, the dynamics of slavery, and the tumult of abolition and national independence movements. The Caribbean Sea will be examined as a region, emphasizing the ties uniting the islands and the circum-Caribbean coasts. The region's past -

including empire and imperial conflict, racial oppression and interaction, and international contact - and its legacies are discussed in relation to political economics, race, and contemporary culture. Meets non-Western requirement.

HIST 3181. Afro-Latin American History. (3) Cross-listed Course(s): AFRS 3270 and LTAM 3270. Explores the African Diaspora in Latin America ranging from the Caribbean Sea to the Rio de la Plata. From slavery, to fighting for freedom in the Spanish-American Wars of Independence, to forging new notions of citizenship in twentieth century Brazil, African-descended peoples have an important place in Latin America's historical past. According special attention to regions with concentrated populations of African-descended peoples, this course reveals the vibrant history of Afro-Latin America. Meets non-Western requirement.

HIST 3190. Slavery, Racism, and Colonialism in the African Diaspora. (3) Cross-listed Course(s): AFRS 3260 and LTAM 3260. Explores how race and racism, slavery, and colonialism served as principal institutions and constructs shaping the experience between Africa and the emerging African Diaspora in the New World. Students consider how the maintenance of Western social, economic, and political superiority materialized as functions of these three important historical developments. Meets non-Western requirement.

HIST 3201. Colonial America. (3) The diverse and dynamic societies of colonial North America, with particular emphasis on Britain's thirteen mainland colonies. The course begins with Europe's age of discovery and exploration and ends on the eve of the imperial crisis that led to American independence. Major themes and topics include: religious and political ideals of the colonists, labor systems, economic development, and the cultural exchanges between Europeans, Africans, and Native Americans.

HIST 3202. American Revolution, 1750-1815. (3) The American Revolution was both a military conflict fought over the issue of colonial independence and a catalyst for sweeping political and social change. Examines the Revolution as a political, social, and military phenomenon, focusing on the transformation of political culture and the experiences of ordinary Americans.

HIST 3203. The Antebellum U.S., 1800-1860. (3) Political and social changes accompanying rapid economic transformation between 1800 and 1860. Emphasis on the sectional tensions between North and South.

HIST 3211. Civil War and Reconstruction, 1860-1877. (3) The American people in war and the postwar adjustment. Emphasis on the political, social and economic conditions of the North and South during the Civil War and Reconstruction period.

HIST 3212. History of the South to 1865. (3) The South from colonial origins through the Civil War. Emphasis on the political and cultural developments which ultimately led the South to secession and the creation of a distinct Southern nation in the Confederacy.

HIST 3213. History of the South since 1865. (3) Southern history from Reconstruction to the present. Emphasis on race and class relations as the South copes with change. Special attention is paid to the Civil Rights Movement, industrialization, and urbanization.

HIST 3215. Southerners. (3) An examination of the distinctive characteristics of Southerners through study of biographies and autobiographies. The varied backgrounds of Southerners and selected Americans from other regions are studied.

HIST 3218. Racial Violence, Colonial Times to Present. (3) Cross-listed Course(s): AFRS 3218. The ways in which African Americans and Caucasians used violence both as part of struggles for liberation and freedom as well as repression from the colonial period to the present in the United States. Focuses on broader processes of social, political, and cultural change and at efforts to build cooperation.

HIST 3239. African American Music: History and Culture. (3) Cross-listed Course(s): AMST 3050. Examines the history and scholarship of African American music from enslavement to the present. Focusing on African American sacred and secular music, students investigate how different musical genres -- including spirituals, blues, jazz, gospel, rhythm and blues, as well as hip hop -- reflected African Americans' social, political, and economic experiences.

HIST 3240. Race and the Law. (3) Cross-listed Course(s): AFRS 3240 and LEGL 3241. Explores the unique role law has played in establishing the status of persons of African descent in the Americas, with a focus on the United States. Students investigate how the legal history of African Americans has shaped American race relations over the past 400 years by tracing the evolution of race, racism, and racial formations as a function of America's legal system.

HIST 3252. United States in the 20th Century, 1932 to the Present. (3) Political, economic, social, and intellectual aspects of American democracy from the New Deal to the Great Society. Special emphasis on the New Deal and post-New Deal reform as well as America's role in world affairs.

HIST 3255. Democracy in America: A Historical Perspective. (3) Considers the history of politics and government in the United States by examining the history of American democracy in theory and practice. To what extent have American politics and government been democratic? What does the history of democracy in America suggest about the future of politics and society in the United States and the world? This course will examine the rise of parties and mass politics, machine politics and reform movements, the history of citizenship and suffrage as relates to race, ethnicity, and gender, the relationship between war and democracy, and the problem of reconciling democratic ideals with existing social and economic hierarchies.

HIST 3256. United States Foreign Relations, 1901 to the Present. (3) American diplomatic history from the administration of Theodore Roosevelt to the present. Special emphasis on the interaction between domestic, economic, political and social changes, and the formulation of American foreign policy.

HIST 3260. The United States and Latin America. (3) Cross-listed Course(s): LTAM 3260. An examination of the complex relationship between the United States and Latin America in the nineteenth and twentieth centuries. Topics include: U.S. territorial and economic expansion, cultural imperialism, and Latin American efforts to safeguard national sovereignty and to achieve economic development.

HIST 3270. History of Capitalism in the U.S. (3) Explores the history of the U.S. economy and the history of capitalism in the U.S., from the Colonial Era to the 21st century, with special attention to the development of business enterprises, business-labor relations, and business-government relations. Topics include: agriculture, labor, and commerce in the colonial-era Atlantic world; the rise and fall of slavery; industrialization; money, banking, and finance; the rise of "big business" and antitrust regulation; lobbying; the rise and decline of organized labor; the New Deal order; the changing position of the U.S. in the global economy; and recent trends in the direction of de-industrialization, "financialization," and growing inequalities of income and wealth. Besides acquiring a rich understanding of the history of capitalism and the past and present dynamics of the U.S. economy, students hone their skills in critical evaluation of qualitative and quantitative evidence, original historical research, and advanced analytical writing.

HIST 3275. American Lives. (3) Exploration of facets of American life through the personal writings of ordinary and famous persons. Students analyze and discuss ways in which historical forces shaped people's lives and the ways in which they interpreted those historical transformations by means of autobiographies and diaries. Case studies may be selected by era or event.

HIST 3280. Blacks in Urban America. (3) African Americans have been part of the urban scene since the colonizing of the Americas. Examines the ways in which their presence in cities has both exemplified and contradicted the understanding of both urban development and race relations in America from colonial times to the present.

HIST 3281. American Cities. (3) Explores U.S. urban history with the city as a physical place, as a socio-political environment, and as a cultural center. Emphasis on the social developments caused by urbanization.

HIST 3288. Modern American West, 1800 to Present. (3) Examination of the history of the modern American West from 1800 to the present. Major themes include conquest, regionalism, environmental change, race and ethnic diversity, economic and political developments, social and cultural trends, and gender and labor relations.

HIST 3310. Teaching History. (3) This interdisciplinary hands-on seminar prepares students for a career in history education. Using historical developments of the 20th century as a starting point, students acquire practical, discipline-specific didactical skills native to the history profession and develop materials on NCSCS themes at the grade level they anticipate teaching. Geared toward advanced education students and history students seeking teaching licensure.

HIST 3380. Introduction to Public History. (3) An overview of the main fields in Public History, including Museum Studies, Historic Preservation, Digital Media, Heritage Tourism, Oral History and other practices at the instructor's discretion. Students explore how historians engage various audiences and undertake projects to understand how public historians work.

HIST 3381. Introduction to Museums and Historic Sites. (3) Introduces students to the history and functions of museums and historic sites. Through lecture, discussion, and field trips, students learn about the role of museums and historic sites in American society and across the globe.

HIST 3382. Introduction to Historic Preservation. (3) Introduction to the history of historic preservation in the United States and beyond. Examines current preservation issues within a broader historical and theoretical context, and highlights techniques available in the United States to identify and preserve historically significant structures, buildings, sites, areas, and objects.

HIST 3600. History Skills Seminar. (3) Prerequisite(s): History major or minor; and 9 credit hours of HIST courses. An introduction to, and practicum of, the skills needed for historical investigation and communication; both in written and oral formats. Students must achieve a grade of C or above to satisfy major requirements.

HIST 3800. Independent Projects in History. (3) Prerequisite(s): Permission of instructor and department. Individual research or readings on an historical topic. *May be repeated for credit with permission of instructor and department.*

HIST 4000. Topics in American Historiography. (3) Prerequisite(s): History major and HIST 3600 with a grade of C or above. Research seminar examining scholarly trends and debates in the field of U.S. History. Students must achieve a grade of C or above to satisfy major requirements.

HIST 4001. Topics in European Historiography. (3) Prerequisite(s): History major and HIST 3600 with a grade of C or above. Research seminar examining scholarly trends and debates in the field of European History. Students must achieve a grade of C or above to satisfy major requirements.

HIST 4002. Topics in Non-Western Historiography. (3) Prerequisite(s): History major and HIST 3600 with a grade of C or above. Research seminar examining scholarly trends and debates in the field of Non-Western History. Meets the History major non-Western course requirements; students must achieve a grade of C or above to satisfy major requirements.

HIST 4003. Topics in Transnational Historiography. (3) Prerequisite(s): History major and HIST 3600 with a grade of C or above. Research seminar examining scholarly trends and debates in the field of Transnational History. Students must achieve a grade of C or above to satisfy major requirements.

HIST 4600. Senior Research Seminar. (3) Prerequisite(s): HIST 3600 with grade of C or above; HIST 4000, HIST 4001, HIST 4002, HIST 4003, or HIST 4797 with grade of C or above; and a History major. A research seminar designed around a specific topic or theme, requiring reading, analysis, discussion, peer review, and a substantial paper.

HIST 4797. Topics in Honors Historiography and Methodology. (3) Cross-listed Course(s): HIST 5797. Prerequisite(s): Permission of instructor. The first course in a required two-course sequence for Honors in History. Prepares students for the research and writing of an honors thesis by providing training in historiography, research methods, source development, and writing. During the course, students meet separately with their thesis advisor to craft their prospectus. Students must achieve a grade of A, or a grade of B with permission of instructor, to be able to take HIST 4799. Students must achieve a grade of C to satisfy major requirements.

HIST 4799. Honors Research and Thesis. (3) Cross-listed Course(s): HIST 5799. Prerequisite(s): HIST 4797 with grade of A, or with a grade of B and permission of the Honors Director; and approval of a proposal through the Honors College Application to Candidacy process the semester prior to taking the course. The final course in a required two-course sequence for Honors in History. Students write an article-style honors thesis of 25-45 pages and successfully defend it before a faculty committee. A grade for A for the thesis is required to earn honors. Students earning a passing grade on their completed thesis meet the department's senior research seminar requirement (HIST 4600).

Public Health Sciences (HLTH)

HLTH 2101. Healthy Lifestyles. (3) Overview of issues related to personal health, including healthy behaviors, lifestyles, and outcomes.

HLTH 2102. Foundations of Public Health. (3) Prerequisite(s): Pre-Public Health major, Health Systems Management major, Public Health minor, or permission of instructor. Introduction to the field of public health, including its history, content areas, scope, and paradigms of professional practice.

HLTH 2103. Foundations of Global Health. (3) Prerequisite(s): Pre-Public Health (PRPH) major, Public Health minor, or permission of instructor. Introduction to the study of global health and its theories, perspectives, methods, and evidence.

HLTH 3000. Topics in Public Health. (1 to 3) Prerequisite(s): Permission of instructor. Additional prerequisites and credit hours vary with topics. Special topics for intermediate level undergraduates. *May be repeated for credit with change of topic.*

HLTH 3102. Comparative Healthcare Systems. (3) Prerequisite(s): Public Health major. Examination of organizations, structures, and relationships in national and international healthcare systems and the associated financial, legal, and policy issues.

HLTH 3103. Behavior Change Theories and Practice. (3) Prerequisite(s): Public Health major. Overview of theoretical approaches to health behavior adherence and compliance, including increasing health enhancing behaviors and sustaining healthy behaviors over time.

HLTH 3104. Research and Statistics in Health. (3) Prerequisite(s): Public Health major. Examination of the use of research methods and statistics in public health, including issues related to research design, measurement, sampling, and the application and interpretation of statistical methods.

HLTH 3104L. Research and Statistics in Health Lab. (1). Prerequisite(s): Public Health major. Corequisite(s): HLTH 3104. Activities designed to complement HLTH 3104. Meets once a week for 1.5 hours.

HLTH 3105. Public Health Education and Promotion. (3) Prerequisite(s): Public Health major. Overview of principles and strategies for health education in public health practice settings.

HLTH 3106. Determinants of Health. (3) Prerequisite(s): Public Health major. Introduction and examination of socioeconomic, behavioral, biological, environmental, and other factors that impact human health.

HLTH 3115. Health and the Aging Process. (3) Cross-listed Course(s): GRNT 3115. Examination of the physiologic processes of aging as a normal life experience. Study of psychological, nutritional and general health issues designed to facilitate high-level awareness.

HLTH 3200. History of Public Health. (3) An overview of health and illness from a population perspective, emphasizing the social and historical contexts in which key public health events have occurred. The content provides an historical interpretation of the development of public health – including the battle against infectious disease – across time and in today's world.

HLTH 3201. Community Engagement. (3) Prerequisite(s): Pre-Public Health major, Public Health major, Public Health minor, or permission of instructor. Emphasizes the nuances of working with diverse communities toward a positive public health outcome. Includes an analysis of communities and partnering with community agencies to impact public health outcomes.

HLTH 3202. Peer Health Education. (3) Prerequisite(s): Pre-Public Health major, Public Health major or minor, or permission of instructor. A multidisciplinary overview of theory and standards of practice intended to prepare students to become peer health educators. Includes an in-depth, intersectional look at mental health, sexual and interpersonal violence prevention, and alcohol and other drug education, outreach, and prevention.

HLTH 3400. Public Health Internship Preparation. (3) Prerequisite(s): Public Health major. Foundational preparation for students completing HLTH 4400.

HLTH 3790. Honors Proposal Seminar. (3) Prerequisite(s): Admission to Public Health and Health Systems Management Honors Program. The Honors Proposal Seminar is the first of a two-semester sequence which leads to the creation of the Public Health and Health Systems Management Capstone Project. Students will identify an honors thesis committee, complete assigned readings, and develop an honors capstone proposal consistent with departmental and Honors College expectations.

HLTH 3791. Honors Capstone Seminar. (3) Prerequisite(s): HLTH 3790; Admission to Public Health and Health Systems Management Honors Program. The Honors Capstone Seminar is the second of a two-semester sequence which leads to the creation and presentation of the Public Health and Health Systems Management Capstone Project. Students will complete the capstone project and formal presentation of the project, consistent with departmental and Honors College expectations.

HLTH 4000. Special Topics in Public Health. (1 to 3) Prerequisite(s): Permission of instructor. Additional prerequisites and credit hours vary with topics. Special topics for advanced undergraduates. *May be repeated for credit with change of topic.*

HLTH 4090. International Comparative Health Systems. (3) Cross-listed Course(s): HLTH 5090. A study tour to explore the cultural, social,

and healthcare systems outside the United States. Participants visit a variety of healthcare sites and attend presentations by practitioners and educators. They will have opportunities to interact with people from the host countries and visit a variety of cultural and historic sites. *May be repeated for credit with change of topic.*

HLTH 4102. Healthcare Administration. (3) Prerequisite(s): HLTH 3102 and Public Health major. Overview of basic concepts and issues within the administration, financing, and policy of healthcare systems.

HLTH 4103. Environmental Health: A Global Perspective. (3) Prerequisite (for Fall only): Public Health major or permission of instructor. Introduction to environmental and occupational health issues and their implications for individual and population health.

HLTH 4104. Epidemiology. (3) Prerequisite(s): HLTH 2102 with a grade of C or above with no concurrent enrollment; and Public Health major or minor, or permission of instructor. Introduction to basic principles and methods used in epidemiology to detect and control disease in populations.

HLTH 4105. Program Planning and Evaluation. (3) Prerequisite(s): HLTH 3103 and Public Health major. Use of program planning and behavior change models to design and evaluate theory-based public health promotion and education initiatives.

HLTH 4105L. Program Planning and Evaluation Lab. (1) Prerequisite(s): HLTH 3103 and Public Health major. Corequisite(s): HLTH 4105. Activities designed to complement HLTH 4105.

HLTH 4215. Health Disparities. (3) An introduction to and examination of key historical events and current issues related to poverty, race/ethnicity, and health disparities, including social, economic, and political issues in ethnic and racial communities, with a special emphasis on theories, concepts, and methods to address the issues.

HLTH 4260. Women: Middle Age and Beyond. (3) Cross-listed Course(s): GRNT 4260 and WGST 4260. Position of older women in society and the particular problems of and issues for women as they age with special attention to health issues.

HLTH 4280. Global Health Issues. (3) Prerequisite(s): HLTH 2103; and Public Health major or minor; or permission of instructor. Introduction to current issues in global health including disparities, root causes, and strategies for resolution.

HLTH 4290. Health Management Information Systems. (3) Overview of the technical, organizational, and management issues confronted by healthcare professionals in the selection, implementation, and management of healthcare information systems.

HLTH 4400. Public Health Internship. (3) Prerequisite(s): HLTH 3400, Public Health major, and permission of instructor. Practical experience in a public health setting that complements students' academic and professional goals. Arranged with BSPH Internship Coordinator.

HLTH 4600. Public Health Capstone. (3) Prerequisite(s): Public Health major and permission of instructor. A culminating project or experience encompassing the five areas of public health: health behavior, environmental health, biostatistics, epidemiology, and health

administration that complements students' academic and professional goals.

HLTH 4800. Independent Study. (1 to 6) Prerequisite(s): Permission of instructor. Directed individual study that may take the form of initiating, designing, and/or conducting an original community-based or research project, or critique and synthesis of existing community or research issues. *May be repeated for credit.*

HLTH 4900. Undergraduate Research. (1 to 4) Prerequisite(s): Permission of instructor. Opportunity for advanced undergraduate students to work on community or research projects conducted by faculty in their field of interest. *May be repeated for credit.*

honors course fulfills the global theme general education requirement for the arts and humanities. Disciplines within the arts and humanities may include philosophy, religion, history, language arts, performing arts, and visual arts and more. Students engage in critical thinking and explore different perspectives and issues related to areas outside of the United States. The course explores what it means to be a member of a global community. Students will ask questions about familiar and unfamiliar communities and/or cultures; discuss cultural similarities and differences across space and time; and interpret events, issues, problems, etc. from familiar and unfamiliar worldviews. As part of the university requirement for themes courses, students will complete a perspectives assignment. While the general aim of the course will remain the same, the content will be determined by respective faculty members. An honors theme course is characterized by inquiry, writing/revising, smaller class sizes, group discussions, and active learning.

HONR 1511. Local Social Science. (3) Prerequisite(s): Must be enrolled in one of the following Classes: Freshman (FR) or Sophomore (SO). Must be enrolled in one of the following Attributes: Arts & Arch Honors Program (AAHP), Business Honors Program (BUHP), Department and College Honors (HONR), Levine Scholars-Active (LEVS), Scholarship for Merit Students (SFMS), Joined UHP 30-59 college crs (UHP1), Joined UHP 60+ college crs (UHP2), University Honors Program(UHPR). This Local Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a member of a "local" community. Through the study of the experiences of different peoples, cultures, and communities in our city, our region, or our nation students will be able to better understand the complexity and diversity of the society in which we live. This honors course fulfills the local theme general education requirement in social science. Disciplines within the social sciences may include sociology, political science, education, geography, and more. Students engage in critical thinking and explore different perspectives and issues related to areas within the United States. The course explores what it means to be a member of a local community. Students will ask questions about familiar and unfamiliar communities and/or cultures; discuss cultural similarities and differences across space and time; and interpret events, issues, problems, etc. from familiar and unfamiliar worldviews. As part of the university requirement for themes courses, students will complete a perspectives assignment. While the general aim of the course will remain the same, the content will be determined by respective faculty members. An honors theme course is characterized by inquiry, writing/revising, smaller class sizes, group discussions, and active learning.

HONR 1512. Local Arts/Humanities. (3) Prerequisite(s): Must be enrolled in one of the following Classes: Freshman (FR) or Sophomore (SO). Must be enrolled in one of the following Attributes: Arts & Arch Honors Program (AAHP), Business Honors Program (BUHP), Department and College Honors (HONR), Levine Scholars-Active (LEVS), Scholarship for Merit Students(SFMS), Joined UHP 30-59 college crs (UHP1), Joined UHP 60+ college crs (UHP2), University Honors Program(UHPR). This Local Theme course uses the methods and insights of the arts and humanities to explore the central question of what it means to be a member of a "local" community. Through the study of the experiences of different peoples, societies, cultural traditions, and modes of expression in communities at the city, regional, or national level, students will be able to better understand the complexity and diversity of the society in which we live. This honors course fulfills the local theme general education requirement for the arts and humanities. Disciplines within the arts and humanities may include philosophy, religion, history, language

Honors College (HONR)

HONR 1501. Global Social Science. (3) Prerequisite(s): Must be a Freshman (FR) or Sophomore (SO). Must be have one of the following attributes: Arts & Arch Honors Program (AAHP), Business Honors Program (BUHP), Department and College Honors (HONR), Levine Scholars-Active (LEVS), Scholarship for Merit Students (SFMS), Joined UHP 30-59 college crs (UHP1), Joined UHP 60+ college crs (UHP2), University Honors Program (UHPR). This Global Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of a complex, interconnected world. This honors course fulfills the global theme general education requirement in social science. Disciplines within the social sciences may include sociology, political science, education, geography, and more. Students engage in critical thinking and explore different perspectives and issues related to areas outside of the United States. The course explores what it means to be a member of a global community. Students will ask questions about familiar and unfamiliar communities and/or cultures; discuss cultural similarities and differences across space and time; and interpret events, issues, problems, etc. from familiar and unfamiliar worldviews. As part of the university requirement for themes courses, students will complete a perspectives assignment. While the general aim of the course will remain the same, the content will be determined by respective faculty members. An honors theme course is characterized by inquiry, writing/revising, smaller class sizes, group discussions, and active learning.

HONR 1502. Global Arts/Humanities. (3) Prerequisite(s): Must be enrolled in one of the following Classes: Freshman (FR) or Sophomore (SO). Must be enrolled in one of the following Attributes: Arts & Arch Honors Program (AAHP), Business Honors Program (BUHP), Department and College Honors (HONR), Levine Scholars-Active (LEVS), Scholarship for Merit Students (SFMS), Joined UHP 30-59 college crs (UHP1), Joined UHP 60+ college crs (UHP2), University Honors Program (UHPR). This Global Theme course uses the methods and insights of the arts and humanities to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of complex, interconnected world. This

arts, performing arts, and visual arts and more. Students engage in critical thinking and explore different perspectives and issues related to areas within the United States. The course explores what it means to be a member of a local community. Students will ask questions about familiar and unfamiliar communities and/or cultures; discuss cultural similarities and differences across space and time; and interpret events, issues, problems, etc. from familiar and unfamiliar worldviews. An honors theme course is characterized by inquiry, writing/revising, smaller class sizes, group discussions, and active learning.

HONR 1700. University Honors Program Colloquium. (1) Prerequisite(s): Good standing in the University Honors Program. Introduces University Honors Program (UHP) students to scholarship, community engagement, and leadership opportunities within the Honors, University, and Greater Charlotte communities. The class format is inquiry and discussion driven. Students participate in an experiential learning opportunity through the National Collegiate Honors Council's City as Text™ program. This course is offered only in the Fall semester for incoming UHP students.

HONR 1702. Economic Welfare and International Communities. (3) Prerequisite(s): Permission of the University Honors Program. Study of the impact of economic institutions on international communities. Focus on development theories, multinational institutions, international debt, and Third World response, international poverty and income distribution and the economic impact on international communities of military spending.

HONR 1710. Levine Scholars Fall Freshman Seminar. (1) Utilizing lectures, discussions, and group activities, this course addresses issues of personal development, transition to college, and connection to the Charlotte community. Building on the NOLS experience, participation in activities both inside and outside of the classroom provides students with the tools for self-reflection, goal setting, and utilizing University resources.

HONR 1711. Levine Scholars Spring Freshman Seminar. (1) Continues the development of Levine Scholarship students as campus and community leaders. Students work together on campus-wide events, develop a mentorship program for the next year's incoming Freshman class, work with community organizations, and develop their individualized plans for their summer internships and civic engagement opportunities.

HONR 2530. Critical Thinking and Communication. (3) This honors course fulfills the Critical Thinking Competency general education requirement. A series of opportunities to think critically and practice process-oriented communication on the subjects of identity, belonging, and community, particularly by way of the forms – social forms, but also forms of speech, writing, and artistic expression – that bring them into being. In addition to providing opportunities for strengthened verbal communication about community-relevant topics typically considered difficult to talk about, this course delivers techniques in the fundamentals of evidence-based argumentation, persuasive writing, the delivery and receipt of useful feedback, and purposeful intellectual inquiry – all in a way that will prepare students for future honors-level work (particularly the senior capstone).

HONR 2710. Levine Scholars Sophomore Seminar. (1) Immerses students in two of the critical components of the Levine Scholars Program: grant proposal writing and enhanced leadership development. Through class discussions, assigned readings, and active learning opportunities, Sophomores are given the tools to understand elements of non-profit organizations, write proposals to fund their civic engagement projects, and become student leaders.

HONR 2720. Competitive Scholarship Workshop. (1) Provides a supportive workshop environment for researching, drafting, developing, and revising material towards nationally competitive scholarships. Activities and assignments include academic resumes, personal statements, research statements, frequently appearing short-answer questions, and interviewing practice. By the end of the course, students develop a malleable set of application materials that can be repurposed for multiple relevant scholarship opportunities.

HONR 2750. Community Service Laboratory. (1) Prerequisite(s): Permission of the University Honors Program. Investigate and demonstrate how individuals can make a difference in the human condition. Students enrolled attend weekly seminar meetings. Relationships between the volunteer individual and community agencies served are examined within the context of problem-solving strategies and social/political justice. Impact of volunteerism upon human rights is explored. *May be repeated for credit with change of topic and coursework. Offered on a Pass/No Credit basis.*

HONR 3700. Honors College Topics. (3) Prerequisite(s): CTCM 2530 or LBST 2301. A seminar course taught by faculty members from different disciplines on interdisciplinary topics. The course is typically characterized by small class sizes, stimulating discussions, engagement in interdisciplinary or disciplinary inquiry, writing and revising, and presentation of an inquiry-based, interdisciplinary or disciplinary product (at a smaller scale than a capstone project). *May be repeated for credit with change of topic and coursework.*

HONR 3702. Seminar in Cultural Values and Social Issues. (3) Prerequisite(s): Permission of the University Honors Program. An examination of social and cultural topics using a writing-intensive and interdisciplinary approach. *May be repeated for credit with change of topic and coursework.*

HONR 3703. Honors Study Abroad. (3) Prerequisite(s): Permission of the Honors College or instructor. The course is for honors students, merit scholars, and Levine scholars. Learning does not just happen in the classroom. It also happens through structured experience, exploration, inquiry, and observation outside the classroom. Predetermined location(s) outside the United States will support our course curriculum for this study abroad course. By engaging fully in this destination, students from a variety of majors will experience different cultures, life experiences, people, and worldviews through an immersive exploration of important cultural sites and unique locations. This transformational experience offers students a deeper understanding of the global community while also strengthening the community of honors students and merit and Levine scholars.

HONR 3790. University Honors Program Capstone Proposal Seminar. (1 to 3) Prerequisite(s): University Honors Program member in good standing and with all other UHP course requirements completed, or

permission of instructor. Students in the University Honors Program (UHP) must complete an honors capstone project in order to graduate with University Honors. Students can satisfy this requirement by applying to a disciplinary honors program and completing a disciplinary capstone or thesis project (leading to dual honors; available for most majors on campus), or can complete their capstone project in UHP by completing HONR 3790 and HONR 3791. In HONR 3790, students will identify an interdisciplinary inquiry question, conduct a review of scholarly literature on their topic, select a faculty committee, and submit an application to candidacy to the Honors College. Upon successful completion of HONR 3790, students will continue to HONR 3791 to develop and lead seminars on their topic for incoming UHP students as their capstone project. Both courses provide opportunities for collaborative work with peers, group discussions, reflection, and feedback.

HONR 3791. University Honors Program Capstone Project. (3) Prerequisite(s): HONR 3790 with grade of A; University Honors Program member in good standing; and approved Honors College Application to Candidacy. Students in the University Honors Program (UHP) must complete an honors capstone project in order to graduate with University Honors. Students can satisfy this requirement by applying to a disciplinary honors program and completing a disciplinary capstone or thesis project (leading to dual honors; available for most majors on campus), or can complete their capstone project in UHP by completing HONR 3790 and HONR 3791. Students will complete their review of the scholarly literature begun in HONR 3790 and design and lead seminars for a small group of incoming honors students. This work is undertaken under the mentorship of an honors faculty committee selected by the student. This course provides the opportunity for collaborative work with peers, group discussions, reflection, and feedback.

Health Systems Management (HSMT)

HSMT 2101. Introduction to the Health Systems Management. (3) Prerequisite(s): Sophomore standing. Introduction to the various systems that comprise the health system and how they work together to support population health, the aim of the larger system. Exposure to germane topics, work settings, trends, skills, and knowledge bases within the health system. Introduction to career options with the Health Systems Management degree.

HSMT 2102. Healthcare Language and Terminology. (3) An introduction to professional communications and vocabulary used in the healthcare field. Emphasis is placed on the fundamentals of terminology and communication. Clinical vocabularies, terminologies, and coding systems, along with definitions, are described in the context of caring for and treating patients. *May be repeated once with an original grade of D or F.*

HSMT 2103. Introduction to Human Resources Management. (3) Prerequisite(s): Sophomore standing. Introduction to human resources management as it applies to health and human services institutions, including recruitment, selection, training, and development. Emphasis is placed upon understanding the basic functions of a manager and the role of leading. Major theories associated with motivating the individual in organizations, interpersonal and group behavior, job design, organizational processes of decision-making, communication, and

change are addressed. Consideration is given to the influence of personal values and ethical frameworks on the processes of managing and leading.

HSMT 2104. Introduction to the U.S. Healthcare System. (3) Prerequisite(s): Health Systems Management major or College of Health and Human Services pre-major; and Sophomore standing. An overview of the organization and delivery mechanisms in the U.S. healthcare system. Various settings for the delivery of healthcare and personnel and financial resources integral to the delivery of care are presented. Also included are the historical development and future growth and direction of the system.

HSMT 3000. Special Topics. (3) Discussion of current and emerging topics in the field of health. *May be repeated for credit with change of topic.*

HSMT 3104. Health Information Systems. (3) Prerequisite(s): Health Systems Management major; and HSMT 2101 and HSMT 2104 with grades of C or above. Health information systems include a variety of information technology used in healthcare settings to collect, store, disseminate, and manage health data. These systems provide healthcare in a more efficient, effective, and economical manner. Various applications for information technology in a healthcare setting are emphasized, as well as their potential benefits.

HSMT 3201. Health System Leadership, Ethics, and Inter-Professional Communication. (3) Prerequisite(s): HSMT 2101, HSMT 2103, and HSMT 2104 with grades of C or above; Health Systems Management major; and 45 credit hours of college coursework. Examination of leadership skills and communication development. Analysis of ethical and bioethical problems confronting health systems. Contemporary issues confronting organizations and people who work to promote, restore, or maintain health are examined. The course also serves as a continuation of the design and development of student ePortfolios.

HSMT 3203. Introduction to Healthcare Accounting and Finance. (3) Prerequisite(s): HSMT 2101 and HSMT 2103 with grades of C or above; Health Systems Management major; and 45 credit hours of college coursework. Basic concepts and techniques of collecting, processing, and reporting financial information relevant to healthcare institutions. Fundamental financial management concepts and tools for healthcare institutions, including financial statements and attributes.

HSMT 3301. Health Insurance and Managed Care. (3) Prerequisite(s): HSMT 3203, Health Systems Management major, and Sophomore standing. An overview of the design, management, and regulation of health insurance and managed care organizations in the U.S. healthcare system. Various settings for the delivery of healthcare and personnel and financial resources integral to the delivery of care are presented. Also included are the historical development and future growth and direction of the health insurance system.

HSMT 3204. Health System Organization Development and Behavior. (3) Prerequisite(s): Health Systems Management major; and HSMT 2101, HSMT 2103, and HSMT 2104 with grades of C or above. Introduction to organizational theory with applications to healthcare systems, including organizational design and inter-organizational networks and alliances.

HSMT 4201. Health Policy and Law. (3) Prerequisite(s): HSMT 3201 and Health Systems Management major. Examination of the formulation, adoption, and implementation of public policy for health services delivery and healthcare through federal, state, and local political processes. Selected legal principles and their application to the healthcare field.

HSMT 4202. Quality Management and Improvement. (3) Prerequisite(s): Health Systems Management major, HSMT 3104, and HSMT 3204. Examination of the concepts and practices of quality management, performance improvement, and assessment of outcomes in healthcare delivery settings; the application of quality management theory to healthcare product and service outcomes.

HSMT 4301. Peer Advising. (3) Prerequisite(s): HSMT 2104, HSMT 3201, Health Systems Management major, minimum 3.0 GPA, and apply for and be accepted into this course. Students competitively selected as Health Systems Management (HSMT) Peer Advisors learn and apply strategies in peer-to-peer communication to assist students with navigating the HSMT curriculum, policies, and procedures. Students translate and analyze how these strategies can be utilized in their own professional development as they transition to leadership roles as early career professionals. *May be repeated for credit one time.*

HSMT 4600. Health Systems Management Capstone. (3) Prerequisite(s): Health Systems Management major; HSMT 2101, HSMT 2103, and HSMT 2104 with grades of C or above; and HSMT 3104, HSMT 3201, HSMT 3203, and HSMT 3204 with grades of D or above. Students synthesize and apply lessons learned throughout the Health Systems Management program. Students analyze a current challenge impacting local health and wellness agencies and work as a team to propose strategies and solutions. Individually, students develop ePortfolios that include work samples and reflections as a digital record of lessons learned and their professional development.

HSMT 4700. Health Systems Management Internship. (3) Prerequisite(s): Health Systems management major, acceptance into departmental honors program, and permission of department. Practical experience in a health and human services setting that complements students' academic and professional goals. Arranged with the HSMT program director.

HSMT 4701. Healthcare Analytics I. (3) Prerequisite(s): Health Systems Management major, acceptance into departmental honors program, and permission of department. Introduction to foundational skills and knowledge in healthcare data analytics. An overview of sources of data in healthcare, including electronic medical record data warehouses, social media databases, wireless biosensors, and patient-provider portal metadata.

HSMT 4702. Healthcare Analytics II. (3) Prerequisite(s): HSMT 4701. Continuation of HSMT 4701. Student works with a team on a project topic of their choice related to a healthcare decision. Each team writes a proposal, protocol, statistical analysis plan, and presents both a written and oral final report. Data needs are assessed and presented during the protocol stage. Students use statistical analysis software (SAS, Stata, SPSS, Excel, etc.) to complete the project.

HSMT 4790. Health Systems Management Study Abroad. (3) Prerequisite(s): Health Systems management major, acceptance into departmental honors program, and permission of department. A study

tour for students. Participants have an opportunity to explore healthcare systems outside the United States, and improve their global understanding of people, culture, and indigenous healthcare practices. Participants visit a variety of healthcare sites and attend presentations by practitioners and educators. Cultural experiences and academic study are a focus.

HSMT 4800. Independent Study. (1 to 3) Prerequisite(s): Permission of instructor. Guided individual study in an issue related to the field of health systems management arranged with a faculty member or a supervised experience in a health systems management related setting. *May be repeated for credit one time.*

International Business (IBUS)

IBUS 3000. Topics in International Business. (3) Prerequisite(s): Permission from the Director of Global Business Studies (GBS). Topics from areas of international business. This course *May be repeated for credit with change of topic.*

IBUS 3400. International Business Internship. (3) Prerequisite(s): International Business major, Junior or Senior in good standing, and permission of instructor. Provides a meaningful work experience in the field of international business. Requires a minimum of 150 hours of supervised employment, 50 hours of work per credit hour. At least 80% of the student's work must be international in nature. While the internship experience is not required to be performed outside the U.S., it is strongly encouraged. Students are responsible for securing their own internship and completing the internship application and approval process prior to registering for the course. Internship must be approved by instructor. Application process and course registration must be completed prior to beginning internship. All proposals are subject to departmental approval. Students may not earn internship credit for work at a current employer. May be used to meet requirements of a major elective, up to a maximum of three credit hours. *May not be repeated for credit. Graded on a Pass/No Credit basis.*

Interdisciplinary Studies (IDST)

IDST 3100. Interdisciplinary Research Methods. (3) Prerequisite(s): Interdisciplinary Studies major or permission of instructor. An overview of qualitative and quantitative methods that are commonly used across academic disciplines and in interdisciplinary research. Examines epistemological considerations that go into crafting an original research question, developing an appropriate research design, and critically analyzing evidence. These include exploring philosophical worldviews, reviewing relevant literature, understanding the relationship between theory and methods, considering ethical issues, and assessing the reliability of data. By studying methods across academic fields, students learn to engage with a broad range of existing scholarship and build a foundation for conducting their own interdisciplinary research.

Management Information Systems (INFO)

INFO 2130. Introduction to Business Computing. (3) Introduction of computer methods to solve business problems. Emphasis on understanding fundamental hardware and software concepts, selecting and using appropriate hardware and software needed for making various business decisions, and developing practical methods for using the computer to solve quantitative business problems. (May not be taken for upper-level credit in business, but may be taken for general University credit.)

INFO 3000. Topics in Management Information Systems. (3) Prerequisite(s): INFO 3233 with grade of C or above. Topics from the area of Management Information Systems. *May be repeated for credit.*

INFO 3130. Management Information Systems. (3) Prerequisite(s): ACCT 2121, ACCT 2122 or ACCT 3323, ECON 2101, ECON 2102, MATH 1120, INFO 2130, and STAT 1220 with grades of C or above; College of Business major; and Junior or Senior standing. Impact of information systems on management decision-making activities. Principles of the structure and analysis of information flows within an organization. Emphasis on database accumulation and generation, capabilities of information processing, system function (e.g., file creation, report generation, etc.) and evaluation and modification of information systems.

INFO 3221. Programming for Business Analytics. (3) Prerequisite(s): INFO 2130 with grade of C or above and Junior or Senior standing, or permission of the department. A study of fundamental programming constructs and concepts required for solving data analytics problems. Emphasizes the use of widely adopted industry platforms such as Python and R to extract, transform, and make use of business data.

INFO 3229. Business Data Communications and Information Security. (3) Pre- or Corequisite(s): INFO 3130 with grade of C or above; and Management Information Systems or Operations and Supply Chain Management major or minor, or permission of department. A study of the current and potential impact of computer data communications technologies and information security on business operations and productivity. Topics include: designing, planning and implementing solutions in such areas as local area networks, networked applications, and information assurance.

INFO 3230. Enterprise Systems. (3) Prerequisite(s): INFO 2130 with grade of C or above; and Management Information Systems or Operations and Supply Chain Management major or minor, or permission of department. A problem-solving based overview of enterprise systems. Through experiential learning, students understand how business processes such as sales, logistics, production, procurement, finance, accounting and human resources are supported in ERP software. Students also learn how to configure an ERP system to meet best practices.

INFO 3231. Business Applications Development. (3) Prerequisite(s): INFO 2130 with grade of C or above; and Management Information Systems major or minor, or permission of department. A study in the development of business applications software. Course emphasizes graphical user interface development using object-oriented, event-

driven programming methods and techniques with a high-level development tool such as Visual Basic or Java.

INFO 3232. International Information Systems Management. (3) Prerequisite(s): INFO 3130 with a grade of C or above. Study of issues and challenges relating to International Information Systems. Topics include: planning and strategic implications of using global information systems and technology; management of global information flows; and, the problems of integrating technology, systems, and people across the globe.

INFO 3233. Data and Information Management. (3) Pre- or Corequisite(s): INFO 3130 with grade of C or above; and Business Analytics, Management Information Systems, Operations and Supply Chain Management, or Marketing major or minor, or permission of department. A study of and implementation of databases for business applications. Exploration of basic concepts of design and the use of SQL to create and manipulate corporate databases.

INFO 3234. Business Information Systems Analysis and Design. (3) Pre- or Corequisite(s): INFO 3233 with grade of C or above; and Management Information Systems major or minor, or permission of department. Examination of business information systems from the perspective of the systems analyst to provide an understanding of concepts, processes and techniques as they are applied to the systems development life cycle. Emphasis on the use of structured and object-oriented techniques to manage the complexities involved in the analysis phase of systems development.

INFO 3236. Business Analytics. (3) Prerequisite(s): Junior or Senior standing; and Business Analytics, Management Information Systems, Operations and Supply Chain Management, Economics, Finance (Finance concentration only), Marketing major or minor, or permission of department. Various data mining and business intelligence methods, such as rule-based systems, decision trees, and logistic regression. Query and reporting, online analytical processing (OLAP) and statistical analysis. Issues relating to modeling, storing, securing, and sharing the organizational data resources.

INFO 3237. Business Analytics II. (3) Prerequisite(s): INFO 3221, INFO 3233, and INFO 3236 with grades of C or above. Focuses on building predictive analytics and understanding and applying a variety of machine learning models. The class is hands-on, and the emphasis is placed on the "know-how" aspect - how to apply business analytics to improve business decision-making.

INFO 3238. Social Media Analytics and Application. (3) Pre- or Corequisite(s): INFO 3130. An integrative approach to social media opportunities for achieving business, marketing, organizational, and personal goals. The emphasis is on social media environment, social network data, social network analysis, and social media analytics and application.

INFO 3240. eBusiness Systems. (3) Prerequisite(s): INFO 3231 with grade of C or above; and Management Information Systems major or minor, or permission of department. Pre- or Corequisite(s): INFO 3234 with grade of C or above. A study of the evolving information technologies facilitating electronic business (eBusiness) and the business practices and strategies used to compete in the new wired global marketplace. Topics include: the infrastructure for eBusiness, new business strategies

and models, web design, and management strategies, and an exploration of a variety of technologies involved in eBusiness.

INFO 3400. Management Information Systems Internship. (3) Prerequisite(s): Junior or Senior in good standing and department approval. Provides a meaningful work experience in the field of management information systems. Requires a minimum of 150 hours of supervised employment, 50 hours of work per credit hour. Students are responsible for securing internship and completing internship application and approval process prior to registering for the course. Internship must be approved by instructor. Application process and course registration must be completed prior to beginning internship. All proposals are subject to departmental approval. Students may not earn internship credit for work at a current employer. May be used to meet requirements of a major elective, up to a maximum of three credit hours. *May not be repeated for credit. Graded on a Pass/No Credit basis.*

INFO 3401. Management Information Systems Internship. (1 to 6) Prerequisite(s): Junior or Senior in good standing and department approval. Full- or part-time academic year internship in areas complementary to the concentration area of studies and designed to allow theoretical and course-based practical learning to be applied in a supervised industrial experience. Requires 50 hours of supervised employment per hour of credit. Each student's internship program must be approved by the supervising faculty. A proposal form must be completed and approved prior to registration and the commencement of the work experience. A mid-term report and a final report to be evaluated by the supervising faculty are required. Grading will be by the supervising faculty and could be in consultation with off-campus supervisor at the internship organization. *Graded as a letter grade.* A student who is employed with applying for this Management Information Systems internship may not earn internship credit through work for the current employer. May be used to meet requirements of a major elective, up to a maximum of three credit hours.

INFO 3500. Management Information Systems Cooperative Education Experience. (0) Prerequisite(s): Management Information Systems major. Enrollment in this course is required for the department's cooperative education students during any semester they are working in a position. Participating students pay a course registration fee for transcript notation. Assignments must be arranged and approved in advance. The Cooperative Education Program is only open to undergraduate students; graduate level students are encouraged to contact their academic departments to inquire about academic or industrial internship options for credit. For more information, contact the University Career Center. *May be repeated. Graded on a Satisfactory/Unsatisfactory basis.*

INFO 3800. Directed Study. (1 to 6) Prerequisite(s): Permission of department and Junior or Senior standing. Enrollment granted only by permission of the faculty with whom the work will be performed. The student's work assignments will be designed by the student and faculty member who will oversee the project of study. The credit hours will be determined prior to enrollment and will be based on the particular project undertaken.

International Studies (INTL)

INTL 1101. Introduction to International Studies. (3) An introductory, interdisciplinary survey of the field of international studies. Attention will focus on the economic, geo-political and socio-cultural issues affecting relationships in an increasingly interdependent global system. *May not be taken for credit and for a grade if credit has been received for INTL 1501.*

INTL 1501. Global Social Science: Globalization and Interdependence. (3) This Global Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies, or cultures across the globe, students will be able to better understand themselves as part of a complex, interconnected world. Students receive an interdisciplinary introduction to our increasingly interdependent global system, focusing on the technological, economic, geo-political, and sociocultural factors that have caused many barriers between nations, society, and people to fall where others have risen. *May not be taken for credit and for a grade if credit has been received for INTL 1101.*

INTL 2100. Introduction to Holocaust, Genocide, and Human Rights Studies. (3) Cross-listed Course(s): HGHR 2100. Examines the Nazi Holocaust and its origins in Western thought and practice. Analyzes the psychological, cultural, and political roots of other genocides and forms of mass violence. Explores modern concepts of human rights and the role of human rights activism.

INTL 2101. Introduction to African Studies. (3) Cross-listed Course(s): HIST 2211 and AFRS 2221. A survey of major developments in 19th and 20th century Sub-Saharan Africa, with emphasis on the European conquest, the colonial period, and the triumph of modern African nationalism.

INTL 2112. Problems in Globalization. (3) Prerequisite(s): International Studies Majors and Minors Only. Permit Required. An examination of the paradoxes of contemporary globalization. Through lectures, discussions, and student presentations, we study the cultural, economic, social and political impact of globalization. We explore how scholars have defined globalization and consider the mechanisms and agents of change. We examine different forms of global governance and if there is an emerging global culture. Finally, we investigate how the international community addresses problems such as poverty, refugee resettlement, immigration, human trafficking, terrorism, and climate change.

INTL 2121. Introduction to Development Studies. (3) Cross-listed Course(s): GEOG 2121. The history of development as a discourse and the different economic and political models that have shaped it. Historical models and contexts of development are addressed in order to understand the evolution of development practice. Different agents and institutional architectures of development are examined as are current issues of debate in global development such as: gender and microloans; climate change politics; and the impacts of migration.

INTL 2131. Introduction to Peace and Conflict Studies. (3) Cross-listed Course(s): ANTH 2131. An introduction to the concentration in Peace and Conflict Studies for the Global Studies Major, and explores the causes and dynamics of conflict as well as strategies for building and sustaining peace in diverse cultural and political contexts. Students will examine

theories of conflict resolution, peacebuilding, and reconciliation through case studies, role-playing, and critical analysis. The course aims to equip students with tools to analyze conflict and contribute to efforts toward justice, nonviolence, and sustainable peace.

INTL 2141. Introduction to Global Culture and Identity. (3) Introduction to concepts fundamental to understanding the complex interplay of culture and identity in the age of globalization. We will spend time defining "culture" and its critical components, and explore how cultures interact, evolve, and, at times, come into conflict. The course will also offer a cross-cultural examination of the role of different forms of identity, including race, ethnicity, gender, nationalism, and class in the global system.

INTL 2201. Introduction to Asian Studies. (3) Cross-listed Course(s): HIST 2201. Focus on the rise of modern Asia from the period just prior to the armed intervention of Western European nations. Emphasis will be placed on the impact of imperialism, colonialism, and the rise of Asian nationalism on Asian societies.

INTL 2301. Introduction to European Studies. (3) Cross-listed Course(s): HIST 1502. European history from the Age of Absolutism to the present.

INTL 2401. Introduction to Latin American Studies. (3) Cross-listed Course(s): HIST 2207. A survey of Latin American history from 1826 to the present with emphasis on the economy and society. Special attention to twentieth-century revolutions and the role of the United States in Latin America.

INTL 3000. Topics in International Studies. (1 to 3) Analysis of a selected topic related to international studies. The particular topic of the course may vary from semester to semester. *May be repeated for credit with change of topic.*

INTL 3001. Topics In Development and Sustainability Studies. (3) Analysis of a selected topic related to Development and Sustainability Studies. *May be repeated for credit with change of topic.*

INTL 3002. Topics in Holocaust, Genocide, and Human Rights Studies. (3) Analysis of a selected topic related to Holocaust, Genocide, and Human Rights Studies. *May be repeated for credit with change of topic.*

INTL 3003. Topics in Peace and Conflict Studies. (3) Analysis of a selected topic related to Peace and Conflict Studies. *May be repeated for credit with a change of topic.*

INTL 3004. Topics in European Studies. (3) Analysis of a selected topic related to European Studies. *May be repeated for credit with change of topic.*

INTL 3005. Topics in Asian Studies. (3) Analysis of a selected topic related to Asian Studies. *May be repeated for credit with change of topic.*

INTL 3006. Topics in Global Culture and Identity. (3) Analysis of a selected topic related to Global Culture and Identity Studies.

INTL 3111. Politics and Culture in Literature. (3) An exploration of different types of political systems across the world and the ways in

which the cultures and values of those systems are reflected in literature. The relationship between politics and literature will be examined with particular reference to such topics as human rights, gender roles and war. The political systems selected for consideration will be representative of different geographic regions and philosophies.

INTL 3112. Globalization and Culture. (3) Cross-listed Course(s): ANTH 3112. Explores the relationship between processes of globalization and cultural change, considering the breakdown of the connection between lived cultural experience and territorial location. Of special interest are issues of cultural homogenization, cultural hybridization, and emergent cultural identities brought about by the flows of people, ideas, and objects in the contemporary world.

INTL 3114. Cultures of the Caribbean. (3) Cross-listed Course(s): ANTH 2117 and LTAM 2117. An introduction to the peoples and societies of the Caribbean with special emphasis on the effects of colonialism, the plantation society, and the struggle for independence. Topics include: the nature of race, color, caste, and class differences in the region; the past and current effects of transformations in the international political economy; the implications of movements of populations to, within, and out of the area; and, the complexities of identity formation in colonial and post-colonial states.

INTL 3115. Globalization and Digital Media. (3) Cross-listed Course(s): COMM 3126. An analysis of the role and impact of digital media on globalization. Considers how the internet and social networks have changed our connection from a physical global society to a virtual culture and explores the ways in which digital communication has fostered the globalization of artistic styles, cultural forms, political relationships and economic transactions.

INTL 3116. Cultures and Conflicts. (3) Cross-listed Course(s): ANTH 3116. Considers historical ties, geographical inter-connections and economic relationships that underlie contemporary issues involving culture and conflict. Discusses issues of race, class, gender, religion, nationality and citizenship among variously situated population groups and the complicated issues that arise both in the international arena and inside today's multicultural societies.

INTL 3117. Narratives and Conflicts. (3) Cross-listed Course(s): ANTH 3117. In conflict situations, competing interpretations of the past can become part of the struggle itself as each side vies for recognition of its version of events. This course focuses on the role these stories play in the historical development of conflicts and the effects they have on efforts to resolve them. It also focuses initially on the role of narratives in the Israeli-Palestinian conflict. Students have the opportunity to explore other cases, including Northern Ireland, Bosnia, and South Africa.

INTL 3118. Thinking Globally, Reading Deeply: Earth Matters. (3) Provides a close reading of a contemporary work of fiction to generate inquiry into matters of environmental humanities. Students are encouraged to investigate further those issues that they find intriguing. The reading deals with issues ranging from migration and making a living, to the human connection with the natural environment. Often, in Global Studies, the focus is on globalization in terms of the economy or political relationships. This course shifts that focus to also consider what is at stake for humans living on a planet with dwindling natural resources, rising temperatures, and sea levels.

INTL 3119. Human Rights and Conflict. (3) Cross-listed Course(s): POLS 3030. Introduces the concept of human rights, which have become the dominant normative discourse in global politics. One of the most important ideas of our age is the notion that all people have inalienable rights. Yet, human rights is also a field where hugely controversial debates play out. What are human rights? Who should have rights? Which rights are most important? Are rights universal? What counts as a violation? Should states promote human rights even against their own narrow self-interests? Are some cultures fundamentally opposed to individual rights? What is the link between human rights, conflict, and peace? This course considers those debates, as well as others.

INTL 3121. Gender and Globalization. (3) Cross-listed Course(s): WGST 2170. Examines how globalization interacts with and influences gender roles around the world. Topics include: the effect of globalization on the gendered divisions of power, violence, labor, and resources.

INTL 3122. Transnational Feminisms. (3) Cross-listed Course(s): WGST 4050. Explores the global formations and operations of feminist resistances and solidarities in the contemporary world. Examines the ways in which women around the globe collectively and creatively respond to intersecting systems of domination and build alliances across differences, divides, and borders to intervene in regimes of oppression and exploitation. By emphasizing transnational interconnectivities among individuals, discourses, institutions, nations, cultures, and histories, the course takes an intersectional and interdisciplinary approach to the critical study of cross-border feminist politics.

INTL 3123. Global Masculinities. (3) Cross-listed Course(s): WGST 3050. By integrating cultural, economic, political, and experiential perspectives, this interdisciplinary course explores the social construction of masculinities and its intersections with other systems of inequality such as race, class, sexuality, ability, religion, and nationality in the transnational context of North America. The course examines the historically situated configurations and transformations of masculinities primarily within the U.S. However, an overall global approach will be pursued to reveal the cross-border linkages between configurations of masculinities as spatial and temporal projects and processes. In other words, while it is impossible to think about men and masculinities as a single constituency or to cover all geographic areas of the world with their cultural and political specificities, we will explore the links between the local and global, the past and present, and across cultures in our analysis of masculinities in North America.

INTL 3124. Solidarity Across Borders. (3) Cross-listed Course(s): WGST 3050. A comparative and relational examination of geographical and cultural borders and borderlands. Conceiving borders simultaneously as literal and figurative, as visible and invisible, as transgressive and oppressive (that is, as paradoxical spaces of connection and separation), the course explores transnational travels of goods, bodies, ideas, and texts and the impact of such cross-border flows and exchanges in the making of justice-oriented global relationalities and solidarities. Rather than being a comprehensive survey course, Solidarity Across Borders examines specific cases of border crossings and translational flows to uncover how colonialisms, capitalisms, nationalisms, militarisms, and heteropatriarchies intersectionally shape global border regimes and how we resist the violent and oppressive operations of those regimes in service of global justice for all. In doing so, the course allows us to devise particular strategies to occupy and cross

borders to form global alliances to make the world a more just, equal, safe, and joyful place for all living beings.

INTL 3125. Food and Globalization. (3) Cross-listed Course(s): ANTH 3125. Explores the relationship of the modern food system to larger complex economic, political, and cultural processes. Considers how increasing global interaction and interdependence has transformed how we grow, distribute, and consume food. Topics include: the development of the agro-industrial complex; the formation of new food preferences, eating practices, and taste publics; and, the emergence of alternative fair trade, organic, local, and slow food movements.

INTL 3127. Global Media. (3) Cross-listed Course(s): COMM 3127. Examines the theories and practices of globalization as related to mediated communication and the operation of global media, its consumption and impact. Specific issues studied include global media conglomeration, global media law, media systems, and international development.

INTL 3128. Belonging: People, Place, Displacement. (3) Cross-listed Course(s): ANTH 3020. In our contemporary globalized world, we often think of people as mobile, moving easily from place to place to study, or work, or to improve their living conditions. But this de-territorialized view of humanity belies the sense of belonging people feel to particular places and how place and culture are deeply intertwined. This course is concerned with the experience of belonging to or in a particular place, territory, land, or landscape, what happens when people are excluded or displaced. It considers the relationship between people, place, and collective identity. How should we understand the meanings of nationalism and citizenship? What do the terms indigeneity and diaspora mean? How are senses of belonging created, maintained, and sometimes disrupted through migration or involuntary dispersion? We will consider cases of migrants and refugees, including climate refugees, and investigate the varieties of reactions to such movement, including the global rise of ethnonationalist movements.

INTL 3129. Global Racisms. (3) Cross-listed Course(s): ANTH 3020, AFRS 3050. We often hear that race is a social construct and that racism is structural. This course considers what those terms mean in a global historical context. We will investigate how racism is related to global capitalism, the world system, and contemporary global health and environmental crises.

INTL 3131. Diplomacy in a Changing World. (3) Cross-listed Course(s): POLS 3159. Diplomacy, a means to resolve disputes between sovereign states short of war, is analyzed through case studies drawn from historical context and through a survey of contemporary crises. The American diplomatic process is also reviewed with particular attention to how policy is shaped, how an embassy functions, and how Americans train for the professional diplomatic service.

INTL 3132. Peacebuilding in Divided Societies. (3) Cross-listed Course(s): POLS 3030. Deepens students' understanding of the theoretical foundations and practices of peacebuilding by comparing it to other approaches to conflict, such as conflict management, settlement, prevention, resolution, and transformation. Explores the various approaches and strategies of peacebuilding that have been applied in the context of deep-rooted conflicts and divided societies and highlights the challenges in transitioning to sustainable peace after decades of violent

conflict. This is done by critically examining several case studies throughout the semester.

INTL 3133. Post-Conflict Reconciliation and Justice. (3) Cross-listed Course(s): POLS 3030. Questions of reconciliation and justice are at the heart of peacebuilding in divided societies and post-conflict settings. This course exposes students to the complexities of reconciliation processes and helps students think analytically about the challenges of balancing the need for justice and peace in societies which have been devastated by violence. The complexity and multidimensional aspects of the relationship between reconciliation and justice are explored, as well as how societies go about resolving/addressing the tensions between the demand for reconciliation, peace, and justice in a post-conflict context.

INTL 3134. Ethnic Conflict in a Changing World. (3) Cross-listed Course(s): POLS 3030. Ethnic conflict is one of the most prevalent types of conflict in the modern world, and the most common form of conflict in the post-Cold War era. Throughout the years, ethnic conflict has claimed lives of millions, has caused many to become refugees, and has destroyed countries, political systems and economies. Many recent events around the world remind us that ethnic conflict is likely to continue to shape international politics. But what are the underlying causes of ethnic disputes? Why do some conflicts remain in the form of peaceful negotiations and some turn violent? How does ethnic conflict spread across regions, how can it be managed and what are the possible solutions? This course will introduce you to the study of ethnic conflict, provide an overview of major ethnic conflicts around the world, and address the questions above.

INTL 3135. Origins of Globalization. (3) Cross-listed Course(s): ANTH 3135. An analysis of European colonial expansion from the 16th through the 19th centuries, emphasizing the creation of the first global systems of political, economic, and cultural interaction that form the foundation of modern globalization. Using a cross-cultural approach, the course explores the competition and conflict among the great powers and the effects of conquest and colonialism on the indigenous peoples of Africa, Asia, and the Americas.

INTL 3136. Globalization and Resistance. (3) Cross-listed Course(s): ANTH 3136. A cross-cultural analysis of changing patterns of resistance by indigenous peoples to the political, cultural and economic effects of globalization from the colonial period to the present. Using case studies from the Americas, Africa, and Asia, the course examines a variety of indigenous resistance strategies and movements and the socio-political dynamics that have driven them and impacted on their effectiveness.

INTL 3137. International Human Rights. (3) Cross-listed Course(s): POLS 3137. Introduces students to the historical foundations and current practices of the international human rights regime. Discussions center primarily on three topics: 1) the conceptual and historical origins of the international regime designed to protect human rights, 2) patterns of and explanations for human rights violations over time and space, and 3) potential international and domestic solutions to protect human rights. During the discussion of these topics, students learn about contemporary issues in human rights, as well as how theory applies to current events and individual cases.

INTL 3138. Environment and Societies. (3) An understanding of life today and socio-environmental processes and interactions. We will examine processes such as colonization, globalization, urbanization,

ethnic, racial, and gender discrimination, issues surrounding healthcare, social welfare, social movements, revolutions, and how they affect and shape our own lives, society, and the environment. This course will include cross-cultural, comparative materials into all content of the course. We live in a global economy/society, and we will grapple with understanding how we as individuals fit into larger socio-environmental processes. This course also aims to introduce students to sociological thinking and how it contributes to a growing interdisciplinary dialogue, which seeks to both understand problems and to find solutions to those problems. As such, we will deal with both theory (a system of ideas intended to explain something) and praxis (practice or conduct).

INTL 3139. Global Environmental Justice. (3) What is environmental justice and how does it relate to environmentalism? This course provides an overview of environmental justice, examining its history and present, with both a local and global focus. This class will also teach you how to use your "sociological imagination" to understand society, your place in it, and various social and environmental problems. In this course we will explore questions related to understanding what is environmental justice, key debates in the area, and if there is a global environmental justice movement. We will examine this in the context of the history of world economic and political systems. Additionally, we will consider the work of scholars and individuals who live outside of the United States, and we will examine social movements that are fighting for environmental justice and also resisting or critiquing certain aspects of globalization.

INTL 3151. International Political Economy. (3) Cross-listed Course(s): POLS 3151. An analysis of the political dynamics of economic relationships among countries. Attention is focused on the political aspects of monetary, trade and investment relationships, and the difficulties involved in coordinating policy and maintaining effective international management.

INTL 3155. Global Citizenship. (3) Cross-listed Course(s): POLS 3030. Explores the question of what it means to be a citizen in today's increasingly interconnected world. Focuses on the concept of global citizenship and examines its usefulness as a guide to action. Following a review of some of the key attributes of citizenship in its broadest terms, some of the ways these notions have been challenged by the considerable political, economic, social, and cultural transformations of our world are examined.

INTL 3161. Migration and Borders in a Global World. (3) Cross-listed Course(s): GEOG 3161. Even as globalization promises a world of increasing flows, borders -and their most visible manifestation as fences - are on the rise. This course focuses on the dynamics of diversifying flows of people with the multiplication of borders within and beyond countries. It explores key policy debates such as: the relationship between migration and development; increased demand for migrant workers; the upswing in migrant detention and deportation; and the Right to Freedom of Movement.

INTL 3162. Europe in the World. (3) Cross-listed Course(s): GEOG 3162. The shifting political, economic and cultural geographies of Europe. Addresses how current transformations in Europe influence global processes and how broader global trends translate into European societies. Topics include: the expansion and consolidation of the European Union; a 'borderless' Europe versus 'Fortress Europe'; post-socialism and post-fascism in Central and Southern Europe; economic globalization; and post-colonial immigration.

INTL 3171. Comparative Genocide. (3) Cross-listed Course(s): HIST 3171. The term “genocide” is often used imprecisely in popular and political discourse. Through examinations of several case studies – the Armenian genocide, the Holocaust, and post-war genocides in Cambodia, Guatemala, and Rwanda, among others - this course explores the roots and the psychological, cultural, and political impacts of genocide and other forms of mass violence.

INTL 3172. Political Repression and Rebellion in the Contemporary World. (3) Cross-listed Course(s): HIST 3172. Modern history has given rise to various forms of repression, but no system has succeeded in extinguishing the desire for greater freedom. This course examines scholarly and popular conceptions of rebellion and other forms of collective defiance. Through the use of memoirs, contemporary accounts, and other texts, it analyzes a variety of case studies of resistance from across the world.

INTL 3173. Resistance During the Holocaust. (3) Cross-listed Course(s): HGHR 3110. Modern history has given rise to various forms of repression, but no system -- not even Nazi Germany -- succeeded in extinguishing the desire for greater freedom. The subjects and victims of the Third Reich devised varied, creative ways to resist Nazi tyranny, preserve pre-Nazi political and social traditions, and assert their dignity. Through memoirs and other readings, the range of responses and survival strategies of Jews, dissident Germans, and peoples of Poland, France, and other German-occupied lands are explored.

INTL 3174. The U.S.-Vietnam War and the Global Upheaval of the 1960s-1970s. (3) Cross-listed Course(s): HGHR 3220 and HIST 3003. The U.S.-Vietnam War continues to haunt the political and cultural landscape of both nations. Yet the war remains poorly understood and remembered - in both lands. This course stresses the diversity of American experiences, as well as the breadth of Vietnamese experiences and perspectives. It provides a multidisciplinary, multicultural, global overview of the war's history and context, examining imperialism, racism, and anti-colonialism; socialism and Stalinism; and the global youth revolt that was provoked in large part by the war. Cultural texts (e.g., music, literature, film), memoirs, and other primary and secondary sources are examined.

INTL 3400. International Studies Internship. (1 to 3) Prerequisite(s): Permission of director. Practical experience and/or training related to the field of international studies. A minimum of 45 hours per credit.

INTL 3800. Independent Study. (1 to 3) Prerequisite(s): Permission of director. Supervised investigation of an issue related to the field of international studies that is of special interest to the student and that is not covered in existing or available courses. *May be repeated with change of topic.*

INTL 4601. International Studies Seminar. (3) Prerequisite(s): Advanced Junior or Senior status. A capstone seminar involving in-depth research and analysis of topics of common interest to all majors, yet specific to each student's area studies concentration.

INTL 4701. Honors Research in Global Studies. (3) Prerequisite(s): INTL 4601; International Studies major with completion of the International Experience requirement; minimum 3.5 major GPA and 3.25 overall GPA; and approval of a project/thesis proposal through the

Honors College Application to Candidacy process. The capstone for the Global Studies Honors Program. Students admitted to the program conduct intensive research on a topic relevant to Global Studies and their concentration within the International Studies major, produce a thesis paper that demonstrates a high level of academic rigor and creative thinking, and present and defend it to a committee of Global Studies faculty for final evaluation.

Computer Science (ITCS)

ITCS 1101. Introduction to Computer Concepts. (3) Pre- or Corequisite(s): MATH 1100, MATH 1101, MATH 1103, MATH 1120, or MATH 1241. Introductory course that gives an overview of computer hardware and software. Primary emphasis is on productivity software (word processing, spreadsheet, and graphical presentation). These applications are taught through a series of projects/assignments. Aspects of Internet research are also covered.

ITCS 1102. Advanced Internet Concepts. (3) An advanced study of the Internet environment designed for any student who is familiar with office productivity tools and a user of Internet technologies; it addresses advanced concepts of computer literacy. Topics include: concepts of website design and how to evaluate websites; proper use of synchronous and asynchronous communication tools (e.g., chat, email, IM); issues of copyright and cyber-ethics; using the Internet to do research; and publishing via the Internet. Other topics may be added to keep the content current and relevant. Students complete extensive Internet-oriented projects to demonstrate mastery of the skills discussed in class. *This course may not be taken for credit by students with a major or minor in the College of Computing and Informatics.*

ITCS 1301. Introduction to the Financial Services Industry. (3) Cross-listed Course(s): ITIS 1301. An overview of the financial services industry, including such areas as the industry components; regulatory considerations and their impact; and relations with other institutions.

ITCS 1610. Computing Applications Seminar. (3) (SL) Prerequisite(s): MATH 1100, MATH 1101, MATH 1103, MATH 1120, or MATH 1242. A service-learning seminar course designed to emphasize the social relevance of computing. The course aims to inform non-computing specialists of computing technologies, research, and career opportunities. Seminar topics are intended to enhance disciplinary knowledge and to develop leadership skills related to using computing knowledge and skills in service to society. Emphasis placed on the basic concepts of leadership theory and its application within the computing discipline on an individual, group, and societal level. Students participate in team-based computing service-learning projects in the community, in conjunction with computing majors taking ITSC 3610. Student performance evaluation considers individual homework assignments, participation in team projects, and class participation.

ITCS 1712. Introduction to Computer Science (Honors). (3) Pre- or Corequisite(s): MATH 1120 or MATH 1241; restricted to CCI Honors students, or an acceptable score on the ITCS 1712 placement test. Introduction to algorithmic problem solving using high level programming languages. Basic programming concepts (decision making, iteration, subroutines) and data types (atomic and aggregates) will be taught in C++ and Java. Advanced concepts such as pointers, references, and polymorphism will be explored.

ITCS 2050. Topics in Computer Science. (1 to 3) Prerequisite(s): Permission of department. Topics in computer science selected to supplement the regular course offerings at the 2000 level. *May be repeated for credit with permission of department. (Additionally, Students may register for multiple sections of the course with different topics in the same semester or in different semesters.)*

ITCS 2116. C Programming. (3) Prerequisite(s): Knowledge of any other computer programming language or permission of department. A study of the programming language C. Data types, operators, functions, program structure, file I/O, storage classes, exceptions, concurrent programming, and the preprocessor.

ITCS 2215. Design and Analysis of Algorithms. (3) Prerequisite(s): MATH 1120 or MATH 1241; ITSC 2175 or MATH 1165; and ITSC 2214. Introduction to the design and analysis of algorithms. Design techniques: divide-and-conquer, greedy approach, dynamic programming. Algorithm analysis: asymptotic notation, recurrence relation, time space complexity and tradeoffs. Study of sorting, searching, hashing, and graph algorithms.

ITCS 2231. Introduction to Business Programming. (3) Pre- or Corequisite(s): INFO 2130 or permission of department. The examination of business problems, the extraction of the logic and business rules, and the relationship between business logic, programming constructs and technologies for decision support.

ITCS 2301. Financial Services Computing Environment. (3) Prerequisite(s): ITCS 1301 or ITIS 1301. Students gain insights on several key components in financial computing environments and the enabling technologies.

ITCS 3050. Topics in Computer Science. (1 to 3) Prerequisite(s): Permission of department. Topics in computer science selected to supplement the regular course offerings at the 3000 level. *May be repeated for credit with permission of department. (Additionally, Students may register for multiple sections of the course with different topics in the same semester or in different semesters.)*

ITCS 3112. Design and Implementation of Object-Oriented Systems. (3) Prerequisite(s): ITSC 2214. In-depth exploration of object-oriented programming and system development. Topics include: evolution of object-oriented methodology; concept of the object-oriented approach; object-oriented programming languages; object-oriented analysis and design; the design of software for reuse; and incremental software development.

ITCS 3120. Introduction to Interactive Computer Graphics. (3) Prerequisite(s): ITSC 2214 and MATH 2164, or permission of department. Introduction to graphics hardware; raster algorithms; event-based programming; shader programming; anti-aliasing methods; matrix algebra for change of coordinates and 2D geometric transformations; 2D viewing transformation and clipping; 2D curves and 2D splines.

ITCS 3134. Digital Image Processing. (3) Prerequisite(s): ITSC 2214, MATH 1242, and MATH 2164 with grades of C or above. Overview of fundamentals of image acquisition, representation, enhancement, segmentation, reconstruction, analysis and recognition. Image generation, viewing and perception; image transformations using the

Fourier transform; spatial operations and filtering (spatial and frequency domain); image coding; lossless and lossy compression; boundary and region based segmentation; thresholding and classification; boundary and regional image descriptors; matching and neural networks; shape numbers.

ITCS 3143. Operating Systems. (3) Prerequisite(s): ITSC 2214 or permission of department. Introduction to multiprogramming operating systems. Process synchronization and management of memory, devices, and files; performance evaluation.

ITCS 3152. Symbolic Programming. (3) Prerequisite(s): ITSC 2214. Basic concepts of symbolic programming including selected topics in artificial intelligence, heuristic searching, symbolic algebra, language parsing, and theorem proving.

ITCS 3153. Introduction to Artificial Intelligence. (3) Prerequisite(s): STAT 2122, MATH 2164, and ITSC 2214, or permission of department. Basic AI-related math fundamentals and AI concepts. Topics include: probability theory and information theory; basic search/problem-solving methods, such as uninformed search, informed search, adversarial search, local search, and constraint satisfaction problem; knowledge representation and reasoning, like propositional logic and inference; probabilistic reasoning such as Bayesian networks, sampling, and decision networks; sequential decision, such as Markov decision processes and reinforcement learning; and machine learning.

ITCS 3156. Introduction to Machine Learning. (3) Prerequisite(s): ITSC 2214, STAT 2122, and MATH 2164. Introduction to the machine learning pipeline of data collection, feature creation, algorithms, and evaluation for classification and regression based on the fundamental foundations on Linear Algebra, Probability Theory, and Optimization. The course covers basic concepts, such as training, validation, overfitting, and error rates in addition to commonly used machine learning algorithms, such as linear regression, perceptrons, naive Bayes, logistic regression, neural networks, dimensionality reduction, clustering, and reinforcement learning.

ITCS 3162. Introduction to Data Mining. (3) Prerequisite(s): ITSC 2214. The key objectives of this course are two-fold: (1) to teach the basic concepts of data mining and (2) to provide extensive hands-on experience in applying the concepts to real-world business applications. Topics include: Data Collection, Data Preprocessing, Data Exploration, Feature Engineering, Prediction Model, Clustering, Association Analysis, Graph/Network Analysis, Text Mining and Social Media Analysis, and Anomaly Detection.

ITCS 3166. Introduction to Computer Networks. (3) Prerequisite(s): ITSC 1213 or permission of department. An in-depth exploration of the principles and technologies that underpin contemporary computer networks and their vital part in today's IT landscape for seamless communication, data sharing, and the growth of emerging technologies. Key elements include: Study of packet communications; Analysis of OSI layered architectures; Study of flow and congestion control protocols at the transport layer; Investigation of routing protocols at the network layer. Students will examine the fundamental concepts and evolving aspects of network technology, including Software-Defined Networking, the provision of AI as a service, the Internet of Things (IoT), and Edge-Computing Networks, along with their practical applications in shaping smart futures (smart cities, smart transportation, smart retail, smart

healthcare, and smart manufacturing). Topics include: Basics of Internet, Network Layer Protocols, Transport Layer Protocols, Application Layer Protocols, Wireless Networking, Emerging Topics on Smart Networked System.

ITCS 3190. Introduction to Cloud Computing for Data Analysis. (3)

Prerequisite(s): ITSC 2214. Introduction to the principles of cloud computing for data science applications. Focuses on distributed computing, and algorithms for scalable data processing. Topics include: parallel processing, information retrieval, knowledge discovery in databases, web search, computational advertising, and scientific data analysis. Students are expected to bring their laptops to class.

ITCS 3211. Computing Leaders Team Projects. (1) (SL)

Prerequisite(s): ITCS 1610 or ITSC 3610. A service-learning course that builds upon the leadership concepts from ITSC 3610 through focused hands-on experience with service-learning projects. Students work in teams to apply computing technologies, knowledge and skills to serve community needs. *May be repeated for elective credit.*

ITCS 3212. Computing Leaders Team Leaders. (1) (SL)

Prerequisite(s): ITCS 1610 or ITSC 3610. A service-learning course that builds upon the leadership concepts from ITSC 3610 through focused hands-on experience with service-learning projects. Companion course to ITCS 3211; students in this course serve as team leaders for the team projects undertaken by students in ITCS 3211. Students lead teams to apply computing technologies, knowledge, and skills to serve community needs. *May be repeated for elective credit.*

ITCS 3216. Introduction to Cognitive Science. (3)

Cross-listed Course(s): ITIS 3216 and PSYC 3216. Prerequisite(s): PSYC 1101 with grade of C or above, or permission of department. Interdisciplinary introduction to the science of the mind. Broad coverage of such topics as philosophy of mind, human memory processes, reasoning and problem solving, artificial intelligence, language processing (human and machine), neural structures and processes, and vision.

ITCS 4010. Topics in Computer Science. (1 to 3)

Prerequisite(s): Permission of department. Topics in computer science selected to supplement the regular course offerings at the 4000 level. *May be repeated for credit with permission of department. (Additionally, students may register for multiple sections of the course with different topics in the same semester or in different semesters.)*

ITCS 4101. Introduction to Natural Language Processing. (3)

Prerequisite(s): ITSC 3156 (C or better). Natural Language Processing (NLP) is a branch of Artificial Intelligence (AI) concerned with developing computer systems that can analyze or generate natural language. This course introduces the main concepts and techniques underlying widely used NLP applications such as text classification, machine translation, question answering, or conversational AI. Topics include: Linguistic analysis tasks, including tokenization, word representations, syntactic and semantic parsing, and coreference resolution; string processing and regular expressions; machine learning models for text processing, including recurrent neural networks and Transformer; language models (LM); ethical considerations and limitations of NLP models.

ITCS 4102. Programming Languages. (3)

Prerequisite(s): ITCS 2214. Formal definition of programming languages, including specification of

syntax and semantics. Evolution of programming languages and language design principles. Structural organization, control structures, data structures and types, name visibility, binding times, parameter passing modes, subroutines, co-routines, and tasks. Functional programming, list processing, logic programming, object-oriented programming systems.

ITCS 4114. Real World Algorithms. (3) Basic and advanced algorithms foundational to computer science. In particular, the course will tie each algorithm with a real-world problem or application, thereby illustrating its relevance and importance in solving complex and challenging problems. Algorithms will span the topics of sorting, searching, geometric and graph algorithms. Algorithm implementation and testing will involve datasets from a variety of application domains.

ITCS 4121. Information Visualization. (3) Prerequisite(s): ITSC 1213 or permission of instructor. Information visualization concepts, theories, design principles, popular techniques, evaluation methods, and information visualization applications.

ITCS 4122. Visual Analytics. (3) Prerequisite(s): STAT 1220, STAT 1221, STAT 1222, STAT 2122, or STAT 2223, or approval of the instructor. Introduces the new field of visual analytics, which provides tools for the interactive visual analysis of large and complex data sets in many application areas. Topics include: visual representation, perception, the analysis process, critical thinking, data transformations, color, interaction, and applications.

ITCS 4123. Visualization and Visual Communication. (3)

Prerequisite(s): ITSC 2214. Understanding the relatively technical field of visualization from the point of view of visual communication; this course draws connections with photography, design, illustration, aesthetics, and art. Both technical and theoretical aspects of the various fields are covered, and the connections between them are investigated.

ITCS 4124. Advanced 3D Computer Graphics. (3)

Prerequisite(s): ITCS 3120. Introduction to 3D transforms, 3D viewing and visibility algorithms; local illumination models; texture mapping; 3D surfaces; advanced lighting models; geometric modeling techniques and procedural geometry methods.

ITCS 4125. Introduction to Virtual Reality and Augmented Reality. (3)

Prerequisite(s): ITSC 2214. Introduces the basic technologies of virtual and augmented reality (VR/AR). Students learn the diverse topics of VR/AR, learn and practice core skills to develop basic VR/AR programs, and learn example VR/AR applications.

ITCS 4141. Computer Systems and Architecture: A Software Perspective. (3)

Prerequisite(s): ITSC 3146; or permission of instructor. Cross-listed course(s): ITCS 5141. Exploration of how software executes within a computer system, from operating system to hardware components, encompassing application for AI, real-time systems, such as robotics, and scientific computing. The course delves into the capability and performance aspects of the Central Processing Unit (CPU), Graphic Processing Unit (GPU), and computer memory system and interconnect architecture, along with how the operating systems manage them. The course includes a project focusing on developing or evaluating applications from system and architecture perspectives. Topics include: CPU/GPU memory and caching architecture; principles of locality of software programs; memory management, virtual memory and paging;

hardware and software multithreading in CPU and GPU; process and thread scheduling and synchronization; interconnect of processing units, memory and external devices such as storage and accelerators; discrete memory system and offloading computation of accelerator architecture.

ITCS 4145. Parallel Programming. (3) Prerequisite(s) ITSC 3146; or permission of instructor. Parallelism is the driving force behind a wide range of applications, including database systems, web browsers, video games and Artificial Intelligence. This course introduces how to program such devices to get the most performance for your applications. Topics include: Dependency analysis; Parallel task decomposition; Shared memory parallel programming techniques; Performance analysis both theoretical and empirical; Concurrency control; Accelerator programming.

ITCS 4150. Mobile Robotics. (3) Prerequisite(s): ITSC 2214 and MATH 2164. Cross-listed Course(s): ITCS 5150. An introduction to basic concepts and techniques used in mobile robotics. Topics include: mobile robot hardware, sensors and sensor data processing, planning and control, robot architectures, localization and mapping, path planning, and mobile robot applications.

ITCS 4151. Intelligent Robotics. (3) Prerequisite(s): ITSC 2214 and MATH 2164. General introduction to spatial descriptions and transformations, and manipulator position and motion. More study on robot planning, programming, sensing, vision, and CAD/CAM.

ITCS 4152. Introduction to Computer Vision. (3) Prerequisite(s): ITCS 3156. Computer Vision is the study of enabling machines to "see" the visual world (i.e., understand images and videos). In this course, the students will learn fundamental computer vision algorithms and have opportunities to implement them. Further, we will be discussing more recent state-of-the-art visual representation learning approaches.

ITCS 4158. Blockchain System Architecture. (3) Cross-listed Course(s): ITCS 5158. Prerequisite(s): ITSC 2214 and MATH 2164. Introduces students to Blockchain technology, which can be used to record and transfer digital assets, and the trustless system architecture underlying this technology. Employs a hands-on learning approach, using open-source platforms such as Hyperledger or Ethereum.

ITCS 4161. Intellectual Property Aspects of Computing. (3) Prerequisite(s): Senior standing or permission of department. This course explores the broad field of intellectual property and the many aspects related to computing. Topics covered include software copyrights, software patents, trademarks and service marks, employment contracts, non-compete agreements, software licenses, software development contracts, preservation of digital evidence, protection of trade secrets, cyberspace law and the use of mediation in IP disputes.

ITCS 4165. Computing Entrepreneurship. (3) Prerequisite(s): ITSC 3155. Introduction to entrepreneurship and the specificities of creating a computing and technology driven small business. An overview of how successful entrepreneurs learn about the marketplace, conduct financial analyses, and utilize management skills to develop entrepreneurial opportunities. Other topics include: intellectual property protection, funding options, technology business planning, and start-up structure.

ITCS 4180. Mobile Application Development. (3) Cross-listed Course(s): ITIS 4180. Prerequisite(s): ITSC 2214 or permission of

department. Mobile platforms are at the center of attention of users and organizations nowadays. Most organizations and businesses are rapidly migrating toward the cloud and need to provide a fast and easy mechanism for users to stay connected to their services. Mobile applications are the top trend nowadays given the high variety of new mobile devices and platforms such as Apple's iOS and Google's Android. In this course, students are introduced to the foundations of mobile development and its unique requirements and constraints. Students design and build a variety of mobile applications with a hands-on and project-based approach.

ITCS 4182. Introduction to High-Performance Computing. (3) Cross-listed Course(s): ITCS 5182. Prerequisite(s): ITCS 4145 or permission of department. Fundamentals of parallel computer systems; throughput computing; memory hierarchies; computation/communication overlapping; mapping high level programs to low level components; leveraging accelerators; performance optimization; performance evaluation.

ITCS 4230. Introduction to Game Design and Development. (3) Prerequisite(s): ITCS 2214. Basic concepts and techniques for electronic game design and development. Topics include: game history and genres, game design teams and processes, what makes a game fun, level and model design, game scripting and programming including computer graphics and animation, artificial intelligence, industry issues, and gender and games.

ITCS 4231. Advanced Game Design and Development. (3) Prerequisite(s): ITCS 4230. Advanced concepts and techniques for electronic game design and development. A project-centered course where students explore complex gameplay and interactivity. Explores topics from the introductory course in more depth, such as: applying software engineering techniques to developing games, advanced game programming and scripting, networking, graphics, physics, audio, game data structures and algorithms, and artificial intelligence.

ITCS 4232. Game Design and Development Studio. (3) Prerequisite(s): ITCS 3155 and ITCS 4231, or permission of instructor; and Senior standing or permission of department. Application of advanced concepts and techniques for electronic game design and development. Teams use engineering techniques to incorporate game programming and scripting, networking, graphics, physics, audio, game data structures and algorithms, and artificial intelligence into an electronic game. Individuals develop a complete portfolio of prior work and the course project.

ITCS 4235. Game Engine Construction. (3) Prerequisite(s): ITCS 4120 or permission of department. Introduction to principles and techniques behind modern computer and console game engines. Graphics Rendering Pipeline (transformations, lighting, shading); 2D/3D Texture Mapping; Image Based Rendering; Spatial Structures and Acceleration Algorithms; Level of Detail; Collision Detection, Culling and Intersection Methods; Vertex/Pixel Shaders; Pipeline Optimization; Rendering Hardware.

ITCS 4236. Artificial Intelligence for Computer Games. (3) Prerequisite(s): ITCS 3153. Application of advanced concepts and techniques in artificial intelligence for electronic game design and development. An investigation of the artificial intelligence techniques necessary for an agent to act, or appear to act, intelligently in interactive virtual worlds. Topics include: uncertainty reasoning, machine learning,

perception, knowledge representation, search, and planning. Emphasis is on implementation and experimentation with the goal of building robust intelligent agents in interactive entertainment domains. Elements of multi-agent collaboration and the use of cognitive architectures in interactive computer games are also discussed.

ITCS 4238. Intelligent and Interactive System Studio. (3) Prerequisite(s): ITCS 3153. This project-oriented course introduces upper-level undergraduate students to algorithms and systems related to robotic vision, perception, navigation planning and control, mapping, localization, and human-robot interaction. Students work in small groups to develop and implement algorithms in real mobile robots and using real sensors, which can lead to their senior design projects.

Software and Information Systems (ITIS)

ITIS 1301. Introduction to the Financial Services Industry. (3) Cross-listed Course(s): ITCS 1301. An overview of the financial services industry, including such areas as the industry components; regulatory considerations and their impact; and relations with other institutions.

ITIS 1350. eScience. (4) Corequisite(s): ITIS 1350L. This course introduces the application of computational methods to scientific exploration and discovery in the natural sciences. Examples include modeling the spread of viruses, predator-prey relationship, the carbon cycle, and fish schooling. Both theory and practice of computational simulation and modeling techniques are examined as tools to support the scientific method. No computer programming knowledge is required. The course grade includes the student's performance in ITIS 1350L. Must be taken concurrently with ITIS 1350L.

ITIS 1350L. eScience Laboratory. (0) Corequisite(s): ITIS 1350. Laboratory exercises that introduce computational tools and techniques that support scientific exploration and discovery in the natural sciences. One three hour laboratory per week. No programming experience is required. Performance in ITIS 1350L will be counted as a portion of the ITIS 1350 grade. Must be taken concurrently with ITIS 1350. *Graded on a Pass/No Credit basis.*

ITIS 2110. IT Infrastructure I: Design and Practice. (3) Prerequisite(s): Sophomore, Junior, or Senior standing or permission of department. Corequisite(s): ITIS 2110L. This course covers basics concepts for IT infrastructure systems administration such as networking administration (e.g., DNS configuration, router configuration, firewall setup, and web server configurations), operating system administration (e.g., account and privilege management, and service management). The course grade includes the student's performance in ITIS 2110L.

ITIS 2110L. IT Infrastructure I: Design and Practice Lab. (0) Corequisite(s): ITIS 2110. Guided laboratory exercises dealing with IT Infrastructure concepts and equipment. Performance in ITIS 2110L will be counted as portion of the ITIS 2110 grade. *Graded on a Pass/No Credit basis.*

ITIS 3105. Server-Side Applications and Data Management. (3) Prerequisite(s): ITIS 2300 and ITSC 1213, or permission of department. This course covers principles that are important for implementing advanced Web-based applications. Emphasis is placed on industrial and business applications which require robust and secure implementations.

Server-side scripting and processing techniques are exercised in course projects.

ITIS 3130. Introduction to Human-Centered Computing. (3) Prerequisite(s): Sophomore, Junior, or Senior standing. Introduction to the dynamic field of Human-Centered Computing, which integrates principles of computer science, cognitive psychology, and design to create technology interfaces that prioritize user needs, experiences, and ethical considerations. Topics include: cognitive science principles to understand human information processing, user interface and user experience design techniques, ethical implications in technology, accessibility, and data visualization. Students will gain an understanding of user-centric design principles and the skills to evaluate and make ethical decisions in technology development.

ITIS 3135. Front-End Web Application Development. (3) Prerequisite(s): ITSC 2214 with grade of C or above. An introduction to front-end web application development. Students will learn the fundamentals of HTML, CSS, and JavaScript, as well as modern frameworks and libraries that simplify development, manage application state, and ensure a consistent user experience. It equips students to create interactive and responsive web applications through hands-on projects.

ITIS 3140. User Experience Methods. (3) Focuses on the various methods used to create and enhance user experiences with technology. Incorporating elements of design thinking, this course equips students with a comprehensive toolkit to systematically identify, empathize with, and address user needs, preferences, and pain points. Students will explore an array of user-centric research methodologies, such as focus groups, user personas, and journey mapping, to gain an understanding of the target audience. They will practice heuristic evaluations, usability testing, and A/B testing to assess and refine interfaces, ensuring optimal usability and satisfaction. Through hands-on projects and case studies, students will employ design thinking processes, fostering creativity, collaboration, and iterative problem-solving to innovate and reiterate user interfaces. By the end of the course, students will have mastered a diverse range of UX methods and proficiency in selecting the most appropriate techniques for various design challenges, positioning them to excel in the dynamic and user-centered field of UX design.

ITIS 3200. Introduction to Information Security and Privacy. (3) Prerequisite(s): ITSC 2214. An introductory overview of key issues and solutions for information security and privacy. Topics include: security concepts and mechanisms; security technologies; authentication mechanisms; mandatory and discretionary controls; basic cryptography and its applications; intrusion detection and prevention; information systems assurance; anonymity and privacy issues for information systems.

ITIS 3216. Introduction to Cognitive Science. (3) Cross-listed Course(s): ITCS 3216 and PSYC 3216. Prerequisite(s): PSYC 1101 with grade of C or above, or permission of department. Interdisciplinary introduction to the science of the mind. Broad coverage of such topics as philosophy of mind; human memory processes; reasoning and problem-solving; artificial intelligence; language processing (human and machine); neural structures and processes; and vision.

ITIS 3246. IT Infrastructure and Security. (3) Prerequisite(s): ITSC 3146. The concepts for the design and implementation of robust IT

infrastructures. Topics include: system hardening, secured access, file storage services, as well as advanced topics in design and configuration of network based services.

ITIS 3261. Foundations of Cloud Computing. (3) Prerequisite(s): ITSC 1212. Foundational elements of cloud computing. Students should be able to create simple cloud-based solutions using popular tools. Topics covered include: introduction to Internet protocols, virtual cloud networks, introduction to command line scripting, virtual servers, containers, serverless computing, cloud data storage and database options, identity and access management, content delivery networks, load balancing and cost optimization.

ITIS 3300. Software Requirements, Analysis and Testing. (3) Prerequisite(s): ITSC 3160 and ITIS 3135, or permission of department. Explores managing, developing, and validating software requirements that lead to compliant software designs and implementations. Students will learn to elicit, analyze, specify, and verify both functional and non-functional requirements using best practices and project risk management tools. Students will gain hands-on experience in developing software requirements models, specifications, and conduct verification and validation. By the end of the course, students will be able to translate high-level system requirements into detailed software specifications, implement effective testing strategies, and ensure the final software product meets all specified requirements.

ITIS 3310. Software Architecture and Design. (3) Prerequisite(s): ITSC 2214 or permission of department. Introduction to software design with emphasis on architectural design and design patterns. Models of software architecture. Architecture styles and patterns, including explicit, event-driven, client-server, and middleware architectures. Decomposition and composition of architectural components and interactions. Use of non-functional requirements for tradeoff analysis. Component based software development, deployment and management. A system design language, such as UML, are introduced and used throughout the course.

ITIS 3320. Introduction to Software Testing and Assurance. (3) Prerequisite(s): ITIS 3200 and ITIS 3300 or permission of department. Methods of evaluating software for correctness, and reliability including code inspections, program proofs and testing methodologies. Formal and informal proofs of correctness. Code inspections and their role in software verification. Unit and system testing techniques, testing tools and limitations of testing. Statistical resting, reliability models.

ITIS 4010. Topics in Software and Information Systems. (3) Prerequisite(s): Junior standing. Topics in software and information systems selected to supplement the regular course offerings. *May be repeated for credit with change of topic.*

ITIS 4166. Backend Application Development. (3) Prerequisite(s): ITCS 3160. Delves into the core principles and advanced techniques of backend development. Through hands-on projects, students will learn API development, secure authentication methods, and deployment strategies using containerization and continuous integration/deployment pipelines.

ITIS 4170. Advanced Client Applications. (3) Prerequisite(s): ITIS 2300 and ITSC 2214. The theory and practice of techniques to develop Web applications that have the features and functionality of traditional

desktop applications, dealing with the browser as graphical user interface and the Internet as platform, with attention to interactivity, speed, functionality, and usability. Technologies covered include: X/DHTML, DOM, CSS, and client-side scripting for layout and formatting, data interaction formats such as XML and JSON, and asynchronous server interaction with client-side scripting and XML (AJAX). The course will examine emerging frameworks for development support, as well as typical applications such as mapping "mashups," folksonomies, and social networking.

ITIS 4180. Mobile Application Development. (3) Cross-listed Course(s): ITCS 4180. Prerequisite(s): ITSC 2214 or permission of department. Mobile platforms are at the center of attention of users and organizations nowadays. Most organizations and businesses are rapidly migrating toward the cloud and need to provide a fast and easy mechanism for users to stay connected to their services. Mobile applications are the top trend nowadays given the high variety of new mobile devices and platforms such as Apple's iOS and Google's Android. In this course, students are introduced to the foundations of mobile development and its unique requirements and constraints. Students design and build a variety of mobile applications with a hands-on and project-based approach.

ITIS 4214. Usable Security and Privacy. (3) Prerequisite(s): Junior or Senior standing. People are often considered the weakest link in security and privacy systems. However, this does not mean that people are at fault. Instead, systems themselves are not designed around users' conceptions and behaviors with regard to security and privacy. Thus, how people interact with current applications is critical to a system's overall security and privacy. This course provides an introduction to the usability and user interface issues related to a variety of security and privacy technologies and tools. Students will examine the security and privacy implications of users' behaviors with applications, and design guidelines for improving both the security and usability of those mechanisms. Prior courses in security and privacy or human-centered computing are a plus.

ITIS 4221. Secure Programming and Penetration Testing. (3) Prerequisite(s): ITIS 3135 or permission of department. Techniques for web application penetration testing, secure software development techniques for network based applications. Automated approaches such as static code analysis and application scanning are also discussed.

ITIS 4246. Competitive Cyber Defense. (3) Cross-listed Course(s): ITIS 5246. Prerequisite(s): ITIS 3200 and ITIS 3246. Hands-on experience with designing, deploying, securing, and defending enterprise network services. Topics include: securing network communication, single sign-on services, firewall and IDS deployment, security policy design and development, log analysis, securing critical network infrastructure, and network access control policies. Students are expected to demonstrate their ability to defend these services against adversary attacks.

ITIS 4250. Computer Forensics. (3) Prerequisite(s): ITIS 2300 or permission of department. The identification, extraction, documentation, interpretation, and preservation of computer media for evidentiary purposes and/or root cause analysis. Topics include: techniques for discovering digital evidence; responding to electronic incidents; tracking communications through networks; understanding electronic media, crypto-literacy, data hiding, hostile code and Windows™ and UNIX™ system forensics; and the role of forensics in the digital environment.

ITIS 4260. Introduction to Security Analytics. (3) Prerequisite(s): ITIS 3200, ITSC 2181, and STAT 1220 or equivalent. Focuses on security-related sense-making and decision-making based on data analytics techniques. Topics include: data cleaning and storage techniques, introduction to R, clustering analysis and statistical inference for security; log analysis; event correlation, anomaly detection, cyber threat intelligence, and use of public cybersecurity information resources.

ITIS 4261. Introduction to Secured Cloud Computing. (3) Prerequisite(s): ITSC 3146. Cross-listed Course(s): ITIS 5261. Design and deployment of secure and robust cloud computing solutions. Instructions will rely on hands-on labs. It focuses on selecting appropriate components in the cloud and securely configuring them to support a specific application.

ITIS 4310. Web Mining. (3) Pre- or Corequisite(s): ITCS 3160 or permission of department. Topics include: measuring and modeling the Web; crawling, Web search and information retrieval; unsupervised learning, supervised learning, semi-supervised learning in Web context; social network analysis and hyperlink analysis; text parsing and knowledge representation.

ITIS 4350. Design Prototyping. (3) Cross-Listed Course(s): ITIS 5350. Prerequisite(s): Sophomore standing. Introduction to theory and approaches for rapid prototyping in interface design. Explores theoretical constructs behind rapid prototyping and how it relates to Human-Computer Interaction. Students study evolutionary prototyping. This begins with low fidelity prototyping techniques such sketching and paper prototyping, and progressively iterate through higher fidelity prototyping techniques using digital tools. In addition to software prototyping, the course also provides an introduction to physical prototyping.

ITIS 4353. Social Technology Design. (3) Cross-listed Course(s): ITIS 5353. Social media platforms such as Wikipedia, Facebook, TikTok, Discord, Twitch, and YouTube are among the most popular in the world. They feature some of the most interesting social interactions and social dynamics that continue to fascinate computing and informatics researchers. This course will examine designs for these and other technologies, principles of online communities, and the social impact of spending at least part of our lives online. Students will summarize and reflect on many online readings, participate in in-class activities and discussion, give in-class presentations, and complete 2-3 assignments and a small-group project. This course does not require any technical or design experience. However, skills in statistical data analysis, machine learning, programming, social-behavioral sciences, or interaction design are a plus.

ITIS 4355. Accessible Design and Implementation. (3) Cross-listed Course(s): ITIS 5355. Introduction to foundational principles of accessibility, as well as accessible practices in design and development of computing interfaces and applications. Accessibility focuses on enabling as many people as possible to use facilities, systems, and services, even when some people's abilities are limited in some way, such as for persons with disabilities. Proactive design and development to support different ways of interacting with computing applications provides broader access and better experiences for more users. This course provides a foundational understanding of disability and assistive technology, legal considerations, and best practices for accessible design and development in computing applications.

ITIS 4358. Physical Computing. (3) Cross-listed Course(s): ITIS 5358. Physical computing considers tangible, embedded, and embodied ways that computing systems can interact directly with people and the physical world, such as in smart products and environments, wearable computing, or Internet of Things devices. This involves the design and development of physical forms using digital fabrication approaches, such as 3D printing, laser cutting, or Computer Numerical Control (CNC) techniques. It also involves the design and development of interactive systems that interact through physical forms by employing physical / sensory inputs and outputs. The course provides foundations in digital design and digital fabrication, small computing systems and programming, physical prototyping with sensors and effectors, as well as elements of user experience design for tangible computing systems.

ITIS 4360. Human-Centered Artificial Intelligence. (3) Cross-listed Course(s): ITIS 5360. Explores the intersection of artificial intelligence and human-centered design, equipping students with the knowledge and skills to develop AI systems that are not only technically advanced but also ethical, responsible, and human-centric. Through a blend of theory and practical application, students will learn about AI technologies, ethical considerations, and methods for incorporating human perspectives. They will learn to create AI systems that align with user needs and societal values, applying principles of transparency, fairness, and accountability. The course covers key topics such as interpretability, bias mitigation, and user-centered AI interface design. Additionally, students will engage in real-world case studies and projects, where they will develop AI solutions that address genuine human needs while navigating the complexities of AI ethics.

ITIS 4390. Interaction Design Projects. (3) Prerequisite(s): ITIS 3130, ITIS 3135. Cross-listed Course(s): IT IS 5390. Project-based learning development of the skills essential for designing and implementing innovative and user-centric digital experiences. Students will learn to design low and high-fidelity prototypes, leveraging versatile platforms, to conceptualize and iterate on interactive solutions, and implementing user interfaces using libraries such as ReactJS, gaining proficiency in creating responsive and engaging web applications. Emphasizing collaboration, students will work in teams on a semester-long project, integrating ethical principles and usability considerations into their designs.

ITIS 4990. Undergraduate Research. (3) Prerequisite(s): Permission of department. Undergraduate research under the supervision and direction of a faculty member. *May be repeated for credit up to 6 credit hours.*

Italian (ITLN)

ITLN 1201. Elementary Italian I. (3) Fundamentals of the Italian language, including speaking, listening comprehension, reading, and writing.

ITLN 1202. Elementary Italian II. (3) Prerequisite(s): ITLN 1201 or permission of department. Fundamentals of the Italian language, including speaking, listening comprehension, reading, and writing.

ITLN 1502. Global Arts/Humanities: Italian Culture in the World. (3) This Global Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a citizen

of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of a complex, interconnected world. Students are introduced to critical studies of culture through a broad engagement with the influence and presence of Italian culture throughout the world. Course materials may draw widely from film, media, the arts, literature, fashion, cuisine, and music. Taught in English.

ITLN 1512. Local Arts/Humanities: Italian Culture in the U.S. (3) This Local Theme course uses the methods and insights of the arts and humanities to explore the central question of what it means to be a member of a "local" community. Through the study of the experiences of different peoples, societies, cultural traditions, and modes of expression in communities at the city, regional, or national level, students will be able to better understand the complexity and diversity of the society in which we live. Students are introduced to critical studies of language through a broad engagement with the influence and presence of Italian culture in the United States. Course materials may draw from literature, history, film, linguistics, and the arts.

ITLN 2201. Intermediate Italian I. (3) Prerequisite(s): ITLN 1202 or permission of department. Review of grammar, conversation, and composition.

ITLN 2202. Intermediate Italian II. (3) Prerequisite(s): ITLN 2201 or permission of department. Continued review of grammar, conversation, and composition.

ITLN 3050. Topics in Italian. (3) Study of Italian language, culture, or literature. *May be repeated for credit with change of topic.*

ITLN 3051. Topics in Italian. (1 to 3) Study of Italian language, culture, or literature. *May be repeated for credit with change of topic.*

ITLN 3201. Italian Grammar and Conversation. (3) Prerequisite(s): ITLN 2202 or permission of department. Review of Italian grammar and guided conversation on prepared topics. Emphasis on spoken and written Italian.

ITLN 3202. Italian Grammar and Composition. (3) Prerequisite(s): ITLN 3201 or permission of department. Review of Italian grammar and guided compositions on prepared topics on culture, film, and literature. Emphasis on: vocabulary, idiomatic expressions, and stylistics.

ITLN 3225. Short-Term Abroad. (3) Prerequisite(s): Permission of instructor. Faculty-led short-term study abroad experience offered during Spring Break.

ITLN 3226. Rome Virtually! (3) Rome Virtually! is a journey of appreciation of Rome through five itineraries. History, historical sites, monuments, museums, traditions, arts, food, and films set in the Eternal City are explored. Webcams, walking videos, Google Maps, films, and lectures by UNC Charlotte professors of Architecture, Art History, and Film Studies are used.

ITLN 3650. History of Italian Film. (3) Cross-listed Course(s): FILM 3050. An introduction to Italian cinema. Lessons are conducted in English. Films are in Italian with English subtitles.

ITLN 3651. Italian Mafia through Film. (3) Cross-listed Course(s): FILM 3051. Survey of the history of the Cosa Nostra, the Sicilian Mafia, and its liaisons, also known as Pizza Connection, with the American Mafia. The inquiry is made through analysis and discussion of Italian and American films on the Mafia.

ITLN 3660. Italian Culture and Business. (3) Cross-listed Course(s): LANG 3050. A survey of Italian geography and culture that are essential to understand for effective business practices.

ITLN 3661. Migrations Across the Mediterranean Sea through Film. (3) Cross-listed Course(s): FILM 3051. An analysis of the geopolitics of migration across the Mediterranean Sea through Italian film.

Computing and Informatics (ITSC)

ITSC 1110. Introduction to Computer Science Principles. (3) A broad-based introduction to key concepts and principles of computer science. Exploration of seven big ideas of computing: creativity, abstraction, data, algorithms, programming, the Internet, and impact of computing.

ITSC 1200. Freshman Seminar (1 to 3) Prerequisite(s): Permission of department. An introductory course designed to engage students in the process of learning about the University, as well as the College of Computing and Informatics in order to prepare each individual to be a successful student, leader, and individual throughout their collegiate experience. The course lays a foundation of awareness, strategies and processes for successful transition into college. The development of learning skills, time management skills, leadership skills and other life skills necessary for college success are emphasized. *May be repeated for credit two times.*

ITSC 1212. Introduction to Computer Science I. (4) Introduction to basic computer literacy, computational thinking and problem-solving using a high level programming language. Programming concepts will be introduced and applied, including: operators; data types; variables, constants, and literals; expressions; control structures and program flow; basic data structures such as arrays, lists, and maps; defining and using functions; file input/output. This is an introductory programming course for non-CS majors and the first course for students interested in pursuing a computer science major or related minor.

ITSC 1213. Introduction to Computer Science II. (4) Prerequisite(s): ITSC 1212 with grade of C or above or DTSC 1302 with grade of C or above. Pre- or Corequisite(s): MATH 1100 or MATH 1101, MATH 1101, MATH 1103, MATH 1120, or MATH 1241. Reinforcement of computational thinking and problem-solving skills. Application of object-oriented programming principles including class design, encapsulation, inheritance, polymorphism, interfaces, abstract classes, aggregation and association. Additional topics include version control, use of debuggers and exception handling. This is the second course for students interested in pursuing a computer science major or related minor.

ITSC 1501. Global Social Science: The Interconnected World of Technology. (3) All Global Theme courses explore the central, unifying question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe students will be able to better understand themselves as part of a complex, interconnected world. This course is a survey of global topics

related to technology and digital citizenship. Issues covered will examine past, current, and future global technologies, recognizing fact from fiction online, using technology to engage in global change, being respectful of people with differing viewpoints, equity of access to resources, global digital laws, and digital literacy.

ITSC 1600. Computing Professionals. (2) Prerequisite(s): Computer Science major; Freshman standing. An introduction to becoming a computing professional. Students learn about setting goals, defining their dream career, becoming a part of the University, planning coursework, building network, managing time, and working in a team. Additionally, guest speakers and industry panels discuss and explain aspects of a professional career in IT-related fields. Throughout the course, students build a professional profile including their goals, values, dream career, student organizations, coding skills, communication skills, curriculum plan, professional network, a team TED talk, resume, and a 30-second elevator pitch.

ITSC 2175. Logic and Algorithms. (3) Prerequisite(s): ITSC 1212 or DTSC 1302; and MATH 1120 or MATH 1241. A study of discreet mathematical concepts. Introduction to propositional calculus, predicate calculus, algorithms, logic functions, finite-state machines; and logic design.

ITSC 2181. Introduction to Computer Systems. (4) Prerequisite(s): ITSC 1212 with grade of C or above or DTSC 1302 with grade of C or above. Introduction to computer system abstractions reflected in programming languages, operating systems, architectures, and networks. Topics include: overview of computer and processor architecture, instruction set architecture and introduction to assembly language, C programming, system calls, processes and process memory layout, interfaces for memory allocation and file systems, file and directory management via the command line, network architecture and protocols (such as HTTP, MAC, IP, DNS).

ITSC 2214. Data Structures and Algorithms. (4) Prerequisite(s): ITSC 1213 with grade of C or above. A study of the design, implementation and testing of abstract data types for linear and non-linear data structures. Introduction to Big O as a tool for analysis of algorithm efficiency and to evaluate tradeoffs in alternative implementations of data structures. Data structures studied include lists, sets, bags, hashmaps, stacks, queues, trees and graphs. Course covers the design and analysis of searching, sorting, and more general traversal algorithms using both iterative and recursive solutions for all the data structures covered. For the implementation of data structures, emphasis is placed on software design principles such as encapsulation, interfaces, generics, unit testing, and code coverage. Programming projects emphasize the use of data structures to solve common computational problems.

ITSC 2600. Computer Science Program, Identity, Career. (2) Prerequisite(s): Major in Computer Science or permission of department. Introduces the computer science program and develops a student's identity and career preparedness. Students learn about the program's progression and graduation requirements, discuss concentration choices, and make curriculum plans. The course stimulates professional identity building emphasizing ethical uses of technology, diversity, career paths, and research. Course outcomes emphasize an inclusive culture dedicated to student success and equity in the field of computing. *This course is designed for internal and external transfer students, and is*

equivalent to the ITSC 1600 requirement for entering freshmen. May not be repeated for grade replacement.

ITSC 2610. Computing Leadership Development. (1) Prerequisite(s): Permission of department. This is a service-learning seminar course for STARS, Student and Technology in Academia Research and Service. This seminar is designed to teach the STARS principles of technical excellence, leadership and service within the computing community. Topics are intended to enhance disciplinary knowledge and skills (computing technologies, research, careers) and to develop leadership skills by using computing knowledge and skills in service to society (service and civic engagement). Students participate in a leadership project throughout the term. *May be repeated for credit.*

ITSC 2700. Honors Seminar. (1) Prerequisite(s): Acceptance into the College of Computing and Informatics Honors Program. Incorporates presentations from College of Computing and Informatics faculty, industry partners, and local entrepreneurs. Topics and course content varies each semester but will focus on helping students identify and refine their professional goals by providing a survey of modern computing professions.

ITSC 2990. Undergraduate Research. (3) Prerequisite(s): Permission of department. Students will conduct a research project under the supervision of a faculty member, working to develop critical research skills and gain hands-on experience in the field of computing and informatics.

ITSC 3146. Introduction to Operating Systems and Networking. (3) Prerequisite(s): ITSC 2214 with grade of C or above and ITSC 2181 with grade of C or above; and College of Computing and Informatics major or minor. Introduces the fundamentals of operating systems together with the basics of networking and communications. Topics include: processes, thread, scheduling, cache, memory management, file systems, interprocess communication, network architecture and protocols, HTTP, MAC, IP, TCP/UPD, and Internet routing.

ITSC 3155. Software Engineering. (3) Prerequisite(s): ITSC 2214 with grade of C or above; and College of Computing and Informatics major or minor. An introduction to software engineering, which advances the study and application of engineering principles, methods, and techniques that can help us to improve the process of creating software as well as the resulting software products. The course covers fundamentals of software engineering, including: modern software process models; eliciting, specifying, and evaluating software system requirements; designing software systems to embody required quality attributes, including usability and security; an introduction to reusable software design solutions in the form of software architectural styles and design patterns; software system modeling, implementation, and deployment; and software quality assurance (measurement, inspection, testing). Project planning, working in teams, and using modern software development tools are also explored.

ITSC 3160. Database Design and Implementation. (3) Prerequisite(s): ITSC 1213 or permission of department. Logical and physical database organization, data models, design issues, and secondary storage considerations. Emphasis on actual participation in the design and implementation of databases. Multiple database technologies are discussed, such as relational (SQL), object oriented and non-relational (NoSQL) databases.

ITSC 3181. Introduction to Computer Architecture. (4) Prerequisite(s): ITSC 1213 with grade of C or above; and ITSC 2175 or MATH 1165 with grade of C or above; and College of Computing and Informatics major or minor. Introduction to the fundamentals of computer architectures and their programmability using assembly and system programming. Topics include: logic design, processor architecture, memory hierarchies, assembly programming, C programming, process and thread parallelism.

ITSC 3500. Computer Science Cooperative Education Experience. (0) This course is required of Co-op students during the semester they are working. Participating students pay a course registration fee for transcript notation. Assignments must be arranged and approved in advance. The Cooperative Education Program is only open to undergraduate students; graduate level students are encouraged to contact their academic departments to inquire about academic or industrial internship options for credit. For more information, contact the University Career Center. *May be repeated. Graded on a Pass/Unsatisfactory basis.*

ITSC 3610. Computing Leaders Seminar. (3) (SL) Prerequisite(s): CCI major. A service-learning seminar course. Seminar topics are intended to enhance disciplinary knowledge and skills (computing technologies, research, careers) and to develop leadership skills by using computing knowledge and skills in service to society (service and civic engagement). Emphasis placed on the basic concepts of leadership theory and its application within the computing discipline on an individual, group, and societal level. Students participate in team-based computing service-learning projects in the community. Student performance evaluation considers individual homework assignments, participation in team projects, class participation, and feedback from those served.

ITSC 3688. Computers and Their Impact on Society. (3) Prerequisite(s): Junior or Senior standing; and either Computer Science major or minor, Humanities, Technology, and Science minor, or Linguistics minor. A study of current topics (software piracy, hacking, professional conduct) in computer science and the impact of computers on various subsets (home, government, and education) of society.

ITSC 3695. Computer Science Cooperative Education Seminar. (1) Required of Co-op students immediately following each work assignment for presentation of reports on work done the prior semester.

ITSC 3790. Honors Research. (3) Prerequisite(s): College of Computing and Informatics Honors Program member in good academic standing and Permission of department. College of Computing and Informatics honors students will be introduced to research methodologies and will conduct a research project under the supervision of a faculty member, working to develop critical research skills and gain hands-on experience in the dynamic field of computing and informatics.

ITSC 3990. Undergraduate Research. (3) Prerequisite(s): Permission of department. Students will conduct a research project under the supervision of a faculty member, working to develop critical research skills and gain hands-on experience in the field of computing and informatics.

ITSC 4155. Software Development Projects. (3) Prerequisite(s): ITCS 2214; and ITCS 3155, or ITIS 3300, or ITIS 3310, or permission of

instructor; and Senior standing or permission of department. Advanced software engineering concepts. Explores the entire software development process, emphasizing requirements engineering, design, implementation, test, deployment, and evolution. Advanced topics in software engineering, such as object-oriented modeling, software architecture, architectural styles, design patterns, middleware frameworks, and programming paradigms. Students apply these concepts, along with concepts from introductory programming courses, data structures and algorithms courses, and introductory software engineering courses, to a team software development project that results in an executable software system prototype.

ITSC 4681. Senior Design I. (3) Prerequisite(s): Senior standing and two 3xxx/4xxx CCI courses with grades of C or above, or permission of department. An individual or group computer engineering design project under the direction of a faculty member. Projects must be approved by the department before they can be initiated.

ITSC 4682. Senior Design II. (3) Prerequisite(s): ITSC 4681. A continuation of ITSC 4681.

ITSC 4750. Honors Thesis. (3) Prerequisite(s): ITSC 3790; Approval of the student's Honors Thesis Committee and approval of a proposal through the Honors College Application to Candidacy process the semester prior to enrollment in the course. The Honors Thesis is an individualized experience that is developed by each student under the supervision of a faculty member (the honors project advisor). An independent thesis project combines a research agenda with appropriate exploratory practices. In keeping with the nature of the disciplines of the College of Computing and Informatics, the final product of these theses may vary to include (but not be limited to) a written document, an app, or a system. In all cases, written documentation of the research performed and, if applicable, the development process leading to a prototype system, is required for the purposes of evaluation. *May be repeated for credit up to 6 credit hours.*

ITSC 4850. Senior Project I. (3) Prerequisite(s): Senior standing and two 3xxx/4xxx CCI courses with grades of C or above, or permission of department. A group project in the teaching, theory, or application of computer science under the direction of a faculty member. A group of no more than 5 students is formed by the supervising faculty member, to meet the needs of the project. Projects must be approved by the department before they can be initiated.

ITSC 4851. Senior Project II. (3) Prerequisite(s): ITSC 4850. A continuation of ITSC 4850.

ITSC 4990. Undergraduate Research. (3) Prerequisite(s): Permission of department. Undergraduate research as part of a joint undergraduate/graduate research project using existing research laboratory facilities and materials. *May be repeated for credit up to 6 credit hours.*

ITSC 4991. Undergraduate Thesis. (3) Prerequisite(s): ITCS 4232, ITSC 4155, ITSC 4681, ITSC 4850, or ITSC 4990; permission of department; and, when taken for honors credit, approval of a proposal through the Honors College Application to Candidacy process the semester prior to taking the course. Students explore a subject in computer science chosen for thesis research and present a written thesis to their thesis

committee consisting of the thesis advisor and at least two other faculty members.

Japanese (JAPN)

JAPN 1201. Elementary Japanese I. (3) Acquisition of communicative competence in speaking, listening comprehension, reading, and writing at a beginning level, with attention to cultural awareness.

JAPN 1202. Elementary Japanese II. (3) Prerequisite(s): JAPN 1201 or permission of department. Continuation of JAPN 1201.

JAPN 1502. Global Arts/Humanities: Japanese Studies. (3) This Global Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of a complex, interconnected world. Students are introduced to critical studies of language and culture through a broad engagement with the influence and presence of Japanese cultures throughout the world. Course materials may draw widely from pop culture, music, cuisine, film, media, the arts, and literature. Taught in English.

JAPN 2050. Topics in Japanese. (1 to 3) Prerequisite(s): JAPN 1202 or permission of instructor. Consideration of a predetermined topic not covered by other JAPN courses. *May be repeated for credit with change of topic.*

JAPN 2201. Intermediate Japanese I. (3) Prerequisite(s): JAPN 1202 or permission of department. Acquisition of communicative competence in speaking, listening comprehension, reading, and writing at an intermediate level, with attention to cultural awareness.

JAPN 2202. Intermediate Japanese II. (3) Prerequisite(s): JAPN 2201 or permission of department. Continuation of JAPN 2201.

JAPN 2205. Japanese Oral Communication. (3) Prerequisite(s): JAPN 1202 or permission of the department. Students explore strategies for effective communication in Japanese. Emphasis is placed on natural and colloquial usage. Conducted primarily in Japanese.

JAPN 2208. Japanese Culture and Society. (3) Explores aspects of Japanese culture, including values, customs, art, mythology, daily life, food, and popular culture, while making connections with their own values and culture. Students are invited to share similarities and differences they notice between cultures. Additionally, multiple assignment options are available to allow students to customize their education experience. Conducted in English; no knowledge of Japanese is required.

JAPN 2209. Introduction to Japanese Civilization and Culture. (3) Conducted in English; no knowledge of Japanese is required. Geographical, historical, and artistic features of Japanese culture as well as aspects of life, thought, and customs of the Japanese-speaking people.

JAPN 3040. Topics in Japanese Culture. (1 to 3) Treatment of specific themes in Japanese culture. Conducted in English. *May be repeated for credit with change of topic.*

JAPN 3060. Topics in Japanese Film. (3) Prerequisite(s): Sophomore, Junior, or Senior standing. Examines topics in Japanese film and culture, including the creative exchange of transnational influences, the emergence of the Japanese studio system as rival and complement to Hollywood, Japanese films, and global cinema. All materials are examined in historical, social, and aesthetic contexts. Conducted in English. *May be repeated for credit with change of topic.*

JAPN 3101. Kanji through Reading. (3) Prerequisite(s): JAPN 2202 or permission of department. Guides students to intermediate level of kanji through the acquisition of essential narrative skills. Conducted in Japanese and English.

JAPN 3105. Japanese Immersion - Communication Skills Development. (3) Prerequisite(s): JAPN 2201. Students work with native Japanese speakers to improve productive communication skills. Continued practice in all four skills: speaking, listening, reading, writing, with a focus on active communication.

JAPN 3130. Business and Culture in Japan. (3) Prerequisite(s): Sophomore, Junior, or Senior standing or permission of department. An introduction to the structure, protocol, and cultural concepts of the Japanese-speaking business world. Development of intercultural understanding and communication skills for conducting business in Japan, including study of basic business vocabulary. Conducted in English.

JAPN 3140. Anime: Genres, Themes and History. (3) Prerequisite(s): Sophomore, Junior, or Senior standing or permission of instructor. Introduces students to the diverse and dynamic world of Japanese animation, or anime, by examining its origins and development as a medium, exploring its genres and subgenres, and discussing how it has been interpreted and evaluated by various critics and scholars. Students will also learn how anime relates to the historical, cultural, and aesthetic contexts of its production and reception. Conducted in English.

JAPN 3201. Upper Intermediate Japanese I. (3) Prerequisite(s): JAPN 2202 or permission of department. Review of Japanese grammar and guided conversation on prepared topics. Emphasis on spoken Japanese.

JAPN 3202. Upper Intermediate Japanese II. (3) Prerequisite(s): JAPN 3201 or permission of department. Review of Japanese grammar and guided compositions on prepared topics. Emphasis on vocabulary, idiomatic expressions, and stylistics.

JAPN 3203. Upper Intermediate Japanese III. (3) Prerequisite(s): JAPN 3201. Solidify the grammar, vocabulary, and kanji foundation built during studies at the beginner and second level and expand learners' four language skills (speaking, listening, reading, and writing) and socio-cultural knowledge that they need to communicate.

JAPN 3225. Short-Term Abroad. (3) Prerequisite(s): Permission of instructor. Faculty-led short-term study abroad experience offered during Spring Break.

JAPN 3400. Teaching Practicum. (3) Pre- or Corequisite(s): One Japanese language course at the 3000 level (JAPN 3201, JAPN 3202 or JAPN 3203), or equivalent with a grade of B or above, or permission of department. An opportunity for interested students to serve as language assistants in upper- and lower-level Japanese language courses, depending on the student's proficiency level in Japanese. Arrangements to take this course should be made during the preceding semester. *Graded on a Pass/No Credit basis. May be repeated for credit one time.*

JAPN 3800. Directed Individual Study. (1 to 3) Prerequisite(s): Permission of department. Individual work on a selected area of study with the instructor, generally arranged during the preceding semester. *May be repeated for credit.*

JAPN 4040. Advanced Topics in Japanese Media and Culture. (3) Pre- or Corequisite(s): JAPN 3040, JAPN 3130, JAPN 3140, or JAPN 3060 with grade of B or above and/or permission of instructor. More advanced study of media and culture in Japan. The specific content will vary each semester, depending on the instructor. Possible topics include: media ecologies/media mix (franchising, platforms, film, animation, manga, music, fan culture, 2.5D, contents tourism, vtbbers), the history of popular music, photography, contemporary literature/literary criticism, critical/cultural theory, and/or various themes (disaster, war, gender/sexuality, ecology, race/ethnicity, technology, migration & diaspora). Taught in English. Japanese language not required. *May be repeated for credit one time with change of topic.*

JAPN 4050. Topics in Japanese. (1 to 3) Prerequisite(s): One Japanese language course at the 3000 level (JAPN 3201, JAPN 3202 or JAPN 3203) or permission of the department. Consideration of a predetermined topic not covered by other JAPN courses. *May be repeated for credit with change of topic.*

JAPN 4101. Japanese Language Proficiency Test (N2) Preparation. (3) Prerequisite(s): JAPN 3202 with grade of C or above or permission from department. Provides preparation for the Japanese Language Proficiency Test (JLPT) at N2 level.

JAPN 4100. Japanese Language Proficiency Test (N3) Preparation. (3) Prerequisite(s): JAPN 3202 with grade of C or above, or permission from department. Provides preparation for the Japanese Language Proficiency Test (JLPT) at N3 level.

JAPN 4205. Advanced Japanese Oral Communication. (3) Prerequisite(s): JAPN 3202 or permission of department. Students are paired with native Japanese speakers via an online conferencing or voice program to improve oral production and communication skills. Practice in writing as well as speech and oral presentation.

JAPN 4206. Advanced Spoken Business Japanese. (3) Prerequisite(s): JAPN 3201 and JAPN 3202. Provides practical experiences in business Japanese conversation. Students acquire new expressions appropriate for business interactions. Conducted in Japanese.

JAPN 4207. Business Japanese Writing. (3) Prerequisite(s): One Japanese language course at the 3000 level (JAPN 3201, JAPN 3202 or JAPN 3203) or permission of the department. Students learn the ceremonial elements and templated formal structure of Japanese business writing through class activities centered around key

expressions and vocabulary. Activities include creating a CV, writing formal emails and proposals, and translating emails from English to Japanese. Offers advanced Japanese students an opportunity to learn Japanese business communications through writing. This helps develop the skills, vocabulary, and expressions necessary to establish relationships and communicate with Japanese clients through writing. Students learn to write a CV, formal emails, and proposals through class activities centered around key expressions and vocabulary, while learning the ceremonial elements and templated formal structures of Japanese business writings.

JAPN 4410. Professional Internship in Japanese. (1 to 6) Prerequisite(s): JAPN 3201 and 3202, or equivalent and permission of department. Faculty-supervised field and/or research experience in a cooperating professional (e.g., business) or community organization (e.g., school). Contents of internship based upon a contractual agreement among the student, department, and business or community organization.

JAPN 4800. Directed Individual Study. (1 to 3) Prerequisite(s): Permission of department; Japanese major. Individual work on a selected area study to be arranged with the instructor, generally during the preceding semester, and by special permission only. *May be repeated for credit.*

JAPN 4900. Introductory Research Project. (3) Prerequisite(s): JAPN 3202 or permission of department. Introduction to research methods and research-based writing in the area of Japanese Studies. Requires students to design and develop an independent project on an approved topic.

JAPN 4900L. Research Activities in Japan. (1) Prerequisite(s): JAPN 2201 or permission of department. Enhances student proficiency in the Japanese language through actual communication and conversation with native speakers of Japanese and through seeking research assistance from Japanese students at their host university. Requirement for Japanese major students who study abroad in Japan for a semester or longer. Conducted in Japanese.

Journalism (JOUR)

JOUR 2100. Writing Foundations in Communication Studies. (0) Prerequisite(s): Pre-Communication or Communication Studies major, or Journalism minor. A self-paced examination of correct grammar, punctuation, and writing style. Refinement of students' writing skills for journalism and public relations applications. Students must pass a test to demonstrate a proficiency in grammar, punctuation, and word usage. *Graded on a Pass/No Credit basis.*

JOUR 2160. Introduction to Journalism. (3) Prerequisite(s): Pre-Communication or Communication Studies major, or Journalism minor. Pre- or Corequisite(s): JOUR 2100. Introduction to the basics of print journalism. Students cover a variety of stories designed to develop news and feature reporting/writing skills. Emphasis is placed on generating story ideas, making ethical news judgments, diversity issues in journalism, gathering information, and writing and editing articles. Students are also introduced to Associated Press style.

JOUR 3050. Topics in Journalism. (3) Prerequisite(s): JOUR 2160. Timely and important areas relevant to journalism. *May be repeated for credit with permission of journalism advisor.*

JOUR 3160. Advanced News Reporting and Writing. (3) Prerequisite(s): JOUR 2160 or permission of instructor. This advanced journalism course continues the study of reporting and writing techniques introduced in JOUR 2160. Course covers news reporting and writing, with emphasis on the print media. Students survey a variety of news sources to become familiar with current events and the various approaches and styles of coverage.

JOUR 3161. News Editing. (3) Prerequisite(s): JOUR 2160 or permission of instructor. Basic studies in selection, preparation and presentation of news, with primary emphasis on newspapers. Examination of the effects of competition in multimedia news markets. Emphasis on issues of ethics, fairness and accuracy in news coverage. Diversity and legal guidelines affecting news presentation are reviewed.

JOUR 3162. Feature Writing. (3) Prerequisite(s): JOUR 2160 or permission of instructor. In depth feature writing for printed newspapers, magazines and newsletters, as well as online publications. Students select feature topics, conduct interviews and gather relevant information to write and edit stories. Students also learn how to market feature articles.

JOUR 3163. Visual Communication in Media. (3) Prerequisite(s): JOUR 2160 or permission of instructor. Course familiarizes the student with principles, theory and techniques of visual communication and explores the role and dynamics of shaping an "image" through the use of visual communication. Students are exposed to the editing and production aspects of communication visually.

JOUR 3401. Journalism Practicum. (2) Provides students with practical experience working with Student Media on campus. (Two semester enrollment limit)

JOUR 4410. Professional Internship. (3 or 6) Prerequisite(s): Junior or Senior standing, Journalism minor, 2.0 GPA in all coursework in the minor, and JOUR 3160 or JOUR 3162. Students work 8-10 hours per week (total 120 hours per semester) for 3 credit hours, or 16-20 hours (total 240 hours per semester) for 6 credit hours in an approved placement. *May be repeated for credit in a different internship with permission of advisor and the Communication Studies Internship Coordinator. Graded on a Pass/No Credit basis.*

Kinesiology (KNES)

KNES 1231. Introduction to Outdoor Adventure. (2) Prerequisite(s): Outdoor Adventure Leadership minor or permission of instructor. Introduction to outdoor adventures through active participation in hikes, challenge courses, climbing wall, a solo experience, weekend trips, class discussions and written reflection. Participation in a Venture public trip required, individually selected from Venture's offerings for the semester. Special fee assessed for the trips.

KNES 2230. Wilderness Experience. (2) Prerequisite(s): Outdoor Adventure Leadership minor or permission of instructor. Provides students with a series of progressive challenges, (including challenge

course and backcountry travel), and time to reflect on and discuss these challenges. The course goals are two-fold; first, to gain deeper understanding of oneself and relationships through participation in in-depth group experiences, and second, to gain the skills and knowledge necessary for planning and conducting one's own backpacking trips. Field experiences during class and two weekend backpacking trips. A special fee is assessed to cover the costs of the trips.

KNES 2233. Rock Climbing. (2) Prerequisite(s): Outdoor Adventure Leadership minor or permission of instructor. Introduction to rock climbing with emphasis on belaying and safety systems, climbing techniques, and the metaphorical and psychological aspects of climbing. Course includes: classroom sessions, use of indoor climbing wall, and weekend trips to outdoor climbing sites. A special fee will be charged to cover the costs of the weekend trips.

KNES 2236. Challenge Course Activities. (2) Prerequisite(s): Outdoor Adventure Leadership minor or permission of instructor. Immersion in a developmental small group team experience using a wide variety of challenge course activities (i.e., ropes course, trust exercises, group initiatives.) The focus is on expanding students' self-knowledge and understanding of how to work effectively with and lead others.

KNES 2237. River Management. (2) Prerequisite(s): KNES 1231; and Outdoor Adventure Leadership minor or permission of instructor. Prepares students to lead whitewater trips in group contexts such as Outward Bound, summer camps, and Venture's trips. The course may cover a variety of whitewater boats, including rafts, canoes, or kayaks as time and student competence allows. Emphasis is placed on safety, management, and teaching practices as established by the American Canoe Association. The course requires off-campus trips and a special fee is assessed to cover these costs.

KNES 2238. White Water Kayaking. (2) Prerequisite(s): Outdoor Adventure Leadership minor or permission of instructor. Offered in conjunction with the U.S. National Whitewater Center (USNWC). An introduction to kayaking with an emphasis on; boat control, safety, the Eskimo roll, river reading and whitewater paddling. Students taking this class must be comfortable being immersed in turbulent water. A special fee is assessed.

KNES 2239. Rock Climbing Management. (2) Prerequisite(s): KNES 2233 or permission of instructor. Intermediate rock climbing with emphasis on setting anchors, managing a rock climbing site, safety systems and rescues, and climbing techniques. Includes: classroom sessions, use of indoor climbing wall, and weekend trips to outdoor climbing sites. A special fee is assessed to cover the costs of the weekend trips.

KNES 3230. Wilderness Trip Leading. (3) Prerequisite(s): Outdoor Adventure Leadership minor or permission of instructor. The broadly accepted skills and knowledge necessary for leading group adventure trips. Includes spring break backpacking trip(s) and classroom sessions. After successful completion of this course students will be eligible to assist with Venture trips. A special fee is assessed to cover the costs of the trips.

KNES 3235. Challenge Course Facilitation. (3) Prerequisite(s): Outdoor Adventure Leadership minor or permission of instructor. Focus on both the technical and facilitation skills and the knowledge necessary

for safely and effectively leading groups through high and low challenge courses. In addition to class room sessions, weekend days at the High Team Challenge Course, and observation/apprenticing of actual Venture programs are required.

KNES 3236. Theory and Foundations of Adventure Education. (3) Prerequisite(s): Outdoor Adventure Leadership minor or permission of instructor. An exploration of the history, philosophical foundations, proposed outcomes, and operational theories that are common in outdoor adventure education.

KNES 4431. Outdoor Adventure Leadership Practicum. (2 to 4) Prerequisite(s): Outdoor Adventure Leadership minor or permission of instructor; and KNES 3230 or KNES 3235. Capstone course for the Minor in Outdoor Adventure Leadership providing an opportunity to take on a defined leadership role with Venture or other outdoor programs. In addition to actual work in the field, there are professional development requirements and a journal of lessons learned.

Languages, Culture and Translation (LANG)

LANG 1201. Elementary Foreign Language I. (3 to 4) Prerequisite(s): Permission of department. Fundamentals of grammar and phonetics, reading, writing, and conversation of a selected language.

LANG 1202. Elementary Foreign Language II. (3 to 4) Prerequisite(s): LANG 1201 or permission of department. Continuation of LANG 1201.

LANG 1205. Accelerated Elementary Foreign Language I and II. (3 to 4) Fundamentals of grammar and phonetics, reading, writing, and conversation of a selected language offered at an accelerated pace for students with some background in the language. Equivalent to LANG 1201 and LANG 1202 in one semester. Fulfills a two-semester language requirement. *May be repeated with different foreign language.*

LANG 1206. Intensive Elementary Foreign Language I and II. (6 to 8) Fundamentals of grammar and phonetics, reading, writing, and conversation of a selected language offered at an intensive pace for students. No prior knowledge of the language is required. Equivalent to LANG 1201 and LANG 1202 in one semester. Fulfills two-semester foreign language requirement.

LANG 1502. Global Arts/Humanities: Introduction to Global Cultures. (3) This Global Theme course uses the methods and insights of the arts and humanities to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of complex, interconnected world. Students have the opportunity to learn about the languages, literatures, and cultures of people and societies across the world. The focus is comparative, with students learning about peoples and cultures from countries that speak at least two different (non-English) languages.

LANG 2050. Topics in Foreign Language. (1 to 4) Studies in a selected field of interest. *May be repeated for credit with change of topic.*

LANG 2201. Intermediate Foreign Language. (3 to 4) Prerequisite(s): LANG 1202 or permission of department. Grammar review, conversation, composition, and readings based on the culture and civilization.

LANG 2202. Intermediate Foreign Language. (3 to 4) Prerequisite(s): LANG 2201 or permission of department. Grammar, conversation, composition, and readings based on students' needs.

LANG 3050. Topics in Language, Literature, and Culture. (3) Studies in a selected field of interest. *May be repeated for credit with change of topic.*

LANG 3051. Topics in Language, Literature, and Culture. (1 to 3) Studies in a selected field of interest. *May be repeated for credit with change of topic.*

LANG 3160. European Cinema. (3) Prerequisite(s): Sophomore, Junior, or Senior standing; and WRDS 1103 or WRDS 1104 with a grade of C or above. Introduction to films of the various national cinemas of Europe and strategies for analyzing and discussing film critically and effectively. Lectures, discussions, viewing films, writing assignments, reviews, critiques, and analyses.

LANG 3201. Advanced Foreign Language I. (3) Prerequisite(s): LANG 2202 or permission of department. Review of grammar and guided conversation on prepared topics. Emphasis on spoken language.

LANG 3202. Advanced Foreign Language II. (3) Prerequisite(s): LANG 3201 or permission of department. Review of grammar and guided compositions on prepared topics. Emphasis on vocabulary, idiomatic expressions, and stylistics.

LANG 3700. Methods in Honors Research. (3) Prerequisite(s): Permission of instructor. The first course in a required two-course sequence for Honors in Languages and Culture Studies. Prepares students for field research and writing of an honors project or thesis. During this course, students are trained in the field of Languages and Culture Studies; they develop and revise a research prospectus. Students must pass with a grade of A (or B with approval from the Honors Director to take LANG 4700).

LANG 3800. Directed Individual Study. (1 to 3) Prerequisite(s): Permission of department; normally open only to foreign language majors and minors. Individual work on a selected area of study. To be arranged with the instructor, generally during the preceding semester, and by special permission only. *May be repeated for credit.*

LANG 4050. Topics in Foreign Language. (3) Prerequisite(s): Senior standing or permission of department. Studies in a selected field of interest. *May be repeated for credit with change of topic.*

LANG 4410. Professional Internship. (1 to 3) Prerequisite(s): ARBC 3201 and ARBC 3202; CHNS 3201 and CHNS 3202; FREN 3201 and FREN 3202; GERM 3201 and GERM 3202; ITLN 3201 and ITLN 3202; JAPN 3201 and JAPN 3202; PORT 3201 and PORT 3202; RUSS 3201 and RUSS 3202; or SPAN 3201 and SPAN 3202; and proficiency at 3000 level and permission by department. Offers students a faculty-supervised field and/or research experience in a cooperating professional or community organization in which a language other than English is used to complete tasks. Students gain oral and written proficiency in both English and

another language in a professional environment. This course does not convene in a classroom; instead, students complete 120 hours at the site of their assigned internship during 16 weeks of the semester. *Graded on a Pass/No Credit basis. May be repeated for credit with permission of department.*

LANG 4690. Senior Seminar. (1) Prerequisite(s): four or more courses at the 3000 or 4000 level in the major or permission of department. Survey of career options for foreign language majors, directed professional development (preparation of resume and portfolio), and completion of departmental required assessments in the areas of speaking, reading, writing, grammar, and content knowledge of the major. *Graded on a Pass/No Credit basis.*

LANG 4700. Honors Project. (3) Prerequisite(s): LANG 3700; permission of Honors Director; minimum GPA of 3.5 in Languages and Culture Studies major or minor; and a cumulative GPA of 3.0. The second course in the honors sequence. Directed research and writing of an honors project or thesis. May be written in English or in target language. Students must pass with grade of A to receive honors; students who pass with a B or below will receive credit for a 4000-level elective, as well as a W credit.

LANG 4800. Directed Individual Study. (1 to 3) Prerequisite(s): Permission of department; normally open only to foreign language majors and minors. Individual work on a selected area of study. To be arranged with the instructor, generally during the preceding semester, and by special permission only. *May be repeated for credit.*

Latin (LATN)

LATN 1201. Elementary Latin I. (4) Beginning survey of elementary Latin grammar through selected readings.

LATN 1202. Elementary Latin II. (4) Prerequisite(s): LATN 1201 or equivalent. Completion of the survey of elementary Latin grammar; connected readings in elementary to intermediate Latin prose.

LATN 2201. Latin Prose. (3) Prerequisite(s): LATN 1202 or equivalent. Extended selected readings in Latin prose of intermediate difficulty: Caesar, Nepos, or Seneca.

Liberal Studies (LBST)

LBST 1101. The Arts and Society: Dance. (3) An introduction to dance in the context of the arts and society. Exploration of the similarities among selected dance traditions from around the world in terms of functionality; how 20th and 21st century American concert dance, social dance, and popular entertainment dance reflect those traditions; socio-political issues evidenced in choreography through lectures, discussion, film video, and live dance performance. *May not be repeated for credit. May not be taken for credit and for a grade if credit has been received for DANC 1502.*

LBST 1102. The Arts and Society: Film. (3) An introduction to the art of film in the context of the arts and society. Analysis of the elements of

narrative and documentary film, including works made for television. Examines the role of Hollywood, international, and independent cinema (including television) in reflecting, shaping, and critiquing society. *May not be repeated for credit.*

LBST 1103. The Arts and Society: Music. (3) An introduction to music in the context of the arts and society. Students experience a wide range of musical styles, approaches to musical performance, and perspectives on the diverse role of music within society in cultures from around the world. Students form communication skills by learning and applying basic musical terminology, developing critical and thoughtful listening skills, and examining how individual perspectives impact music in its creation and its acceptance. *May not be repeated for credit. May not be taken for credit and for a grade if credit has been received for MUSC 1502.*

LBST 1104. The Arts and Society: Theater. (3) An introduction to theater in the context of the arts and society. Analysis of the elements that make up theatrical events. The place of theater in reflecting, shaping, and critiquing society. *May not be repeated for credit. May not be taken for credit and for a grade if credit has been received for THEA 1502.*

LBST 1105. The Arts and Society: Visual Arts. (3) An introduction to the visual arts in the context of the arts and society. The analysis of visual culture in a variety of media and genres in different historical periods and geographic locations. The function, meaning, and politics of individual works of art and art movements. Also addresses the role of art as a site for the articulation of value systems, including gender, class, and race. *May not be repeated for credit. May not be taken for credit and for a grade if credit has been received for ARTA 1502.*

LBST 2101. Western Cultural and Historical Awareness. (3) All sections of this course explore a major aspect of Western culture. Particular attention is given to an examination of the constructed nature of the present through a close examination of the past and the ways that selected institutions, ideas, or practices change over time and spread in human society, producing both continuity and novelty. *May not be repeated for credit.*

LBST 2102. Global and Intercultural Connections. (3) All sections of this course examine two or more cultures in their own contexts and in the contexts of the global conditions and influences that impact all major world cultures today. Particular attention is given to an analysis of the complex nature of globalization and to a consideration of both its positive and negative impacts. *May not be repeated for credit.*

LBST 2211. Ethical Issues in Personal, Professional, and Public Life. (3) An analysis of the conceptual tools needed to make informed, responsible judgments based on the ability to think critically and knowledgeably about issues of personal, professional, and public ethics and morality. The study of a variety of ethical views and ethical issues. *May not be repeated for credit.*

LBST 2212. Literature and Culture. (3) Examination of the connections between literature and culture. Students are offered the opportunity to examine the roles that literature plays in reflecting, shaping, and challenging cultures. *May not be repeated for credit.*

LBST 2213. Science, Technology, and Society. (3) The role of science and technology in society. The appreciation and understanding of science

and the public policy issues related to science and technology. Issues such as science vs. pseudo-science, the ethics of science and technology, the methods of the sciences, the importance of major scientific discoveries, and public expectations of the sciences. *May not be repeated for credit.*

LBST 2214. Issues of Health and Quality of Life. (3) A study of individual and social aspects of health. Analysis of individual health and illness behavior and theory; the social, political, and economic contexts of health and illness; and the broad cultural, ethical, and religious understandings of health and illness. *May not be repeated for credit. May not be taken for credit and for a grade if credit has been received for HAHS 1511.*

LBST 2215. Citizenship. (3) (SL) A study of the concept of citizenship as it has evolved in different cultures with an emphasis on scholarly understandings of the rights and responsibilities of citizenship. Includes an examination of the ethical dimensions of citizenship in political, social, and religious contexts. Includes a service component that allows students to explore the relations of citizenship and public service. During the semester the course meets a total of 27 hours for classroom lectures and discussions and requires completion of 25 hours of voluntary service in the community. *May not be repeated for credit.*

LBST 2301. Critical Thinking and Communication. (3) Prerequisite(s): Sophomore standing or higher; and WRDS 1103 or WRDS 1104 with a grade of C or above. This Critical Thinking and Communication (CTC) course is part of an integrated First-Year Writing and Liberal Studies curriculum that develops critical thinking and communication skills. Students undertake an inquiry process and build towards the preparation of a polished product at the end of the semester. The specific subject matter for sections of this course vary since the focus is on developing competencies. *May not be repeated for credit. May not be taken for credit and for a grade if credit has been received for CTCM 2530.*

Legal Studies (LEGL)

LEGL 1100. Introduction to Law and the Legal System. (3) Prerequisite(s): Declared major at UNC Charlotte and Freshman, Sophomore, or Junior standing. The study of the role of law in society, introducing students to the organization and operation of the American legal system, basic concepts of substantive and procedural law, cases, and statutes.

LEGL 1105. Critical Thinking. (3) Cross-listed Course(s): PHIL 2100. Prerequisite(s): Legal Studies minor. Fundamental skills of clear thinking that help students reason better during communication, problem-solving, and design, particularly as these integrate scientific/engineering efforts with social needs and values. Focuses on clarifying goals, identifying constraints, and generating and evaluating ideas or solutions. Students are ineligible to take this course if credit has already been received for LEGL 1106.

LEGL 1106. Critical Thinking. (3) Prerequisite(s): Legal Studies minor. Fundamental skills of clear thinking that help students reason better during communication, problem-solving, and design, particularly as these integrate scientific/engineering efforts with social needs and values. Focuses on clarifying goals, identifying constraints, and

generating and evaluating ideas or solutions. Students are ineligible to take this course if credit has already been received for LEGL 1105.

LEGL 2103. Argumentation and Debate. (3) Cross-listed Course(s): COMM 2103. Prerequisite(s): Legal Studies minor. Introduction to the basic theory and skills of argumentation and debate. Assumptions of argumentation, evidence, reasoning, argument construction, cross-examination, refutation, and ethics included.

LEGL 2105. Deductive Logic. (3) Cross-listed Course(s): PHIL 2105. Prerequisite(s): Legal Studies minor. Principles of deductive logic, both classical and symbolic, with emphasis on the use of formal logic in analysis of ordinary language discourse.

LEGL 2131. Introduction to Forensic Psychology. (3) Cross-listed Course(s): PSYC 2131. Prerequisite(s): Legal Studies minor. Overview of the field of forensic psychology, including the history of the discipline, and legal and ethical issues such as criminal profiling, definition of "insanity," eyewitness identification, and jury selection.

LEGL 2320. Introduction to Courts. (3) Cross-listed Course(s): CJUS 2320. Prerequisite(s): Legal Studies minor and Junior or Senior standing. Analysis of the court area of criminal justice with emphasis on social science literature concerning prosecutors, defense attorneys, judges, juries, and court reform policies.

LEGL 3000. Topics in Legal Studies. (3) Prerequisite(s): Legal Studies minor. An intensive study of a specialized substantive legal area. The particular topic investigated may vary from semester to semester. *May be repeated with change of topic.*

LEGL 3100. Topics in Legal Skills. (3) Prerequisite(s): Legal Studies minor. An intensive study of a specialized legal skill area. The particular topic investigated may vary from semester to semester. *May be repeated with change of topic.*

LEGL 3113. Constitutional Law and Policy. (3) Cross-listed Course(s): POLS 3114. Prerequisite(s): Legal Studies minor. Development of American constitutionalism (especially federalism and the separation of powers) with major emphasis on constitutional law as a form of public policy and the U.S. Supreme Court as a policy maker.

LEGL 3115. Civil Rights and Liberties. (3) Cross-listed Course(s): POLS 3115. Prerequisite(s): Legal Studies minor. Utilizes public policy analysis to illuminate judicial decisions and opinions relating to contemporary civil rights and liberties.

LEGL 3116. Judicial Process. (3) Cross-listed Course(s): POLS 3116. Prerequisite(s): Legal Studies minor. Introduction to the nature and functions of law; survey of Supreme Court decision making.

LEGL 3117. Gender and the Law. (3) Cross-listed Course(s): POLS 3117. Prerequisite(s): Legal Studies minor. Examines the role gender plays in various aspects of the legal system in the United States. Topics include: the statutory and constitutional provisions that govern discrimination based on gender (e.g., Title VII, the 14th Amendment Equal protection clause) and the role that gender plays in judicial decision making (e.g., the influence of judge, attorney, party, and juror gender on legal outcomes).

LEGL 3137. International Human Rights. (3) Cross-listed Course(s): INTL 3137 and POLS 3137. Prerequisite(s): Legal Studies minor. Introduction to the historical foundations and current practices of the international human rights regime. Discussions center primarily on three topics: 1) the conceptual and historical origins of the international regime designed to protect human rights, 2) patterns of and explanations for human rights violations over time and space, and 3) potential international and domestic solutions to protect human rights. During the discussion of these topics, students learn about contemporary issues in human rights, as well as how theory applies to current events and individual cases.

LEGL 3141. Organizational Communication. (3) Cross-listed Course(s): COMM 3141. Prerequisite(s): Legal Studies minor and COMM 2100. Examines the importance of the operation of communication processes within organizations and between organizations and their environments.

LEGL 3162. International Law. (3) Cross-listed Course(s): POLS 3162. Prerequisite(s): Legal Studies minor. Historical and political analysis of the sources and development of international law. Particular attention is given to the role of modern international law in the relations of nation-states and its application to contemporary global problems.

LEGL 3175. Philosophy of Law. (3) Cross-listed Course(s): POLS 3175. Prerequisite(s): Legal Studies minor. Philosophy underlying the legal system and the Anglo-American practice of law. Topics include: what is "law;" obligation to obey the law, liberty, privacy and tolerance; and criminal responsibility and punishment.

LEGL 3241. Race and the Law. (3) Cross-listed Course(s): AFRS 3240 and HIST 3240. Prerequisite(s): Legal Studies minor. Explores the unique role law has played in establishing the status of persons of African descent in the Americas, with a focus on the United States. Students investigate how the legal history of African Americans has shaped American race relations over the past 400 years by tracing the evolution of race, racism, and racial formations as a function of America's legal system. *May be repeated for credit.*

LEGL 3320. Criminal Justice and the Law. (3) Cross-listed Course(s): CJUS 3320. Prerequisite(s): Legal Studies minor and Junior or Senior standing. Nature and development of criminal law including the concepts of criminal liability, responsibility, and capacity; comprehensive analysis of the various crimes against persons, property, and morality.

LEGL 3321. Criminal Procedure. (3) Cross-listed Course(s): CJUS 3321. Prerequisite(s): Legal Studies minor and Junior or Senior standing. Examines the rules that govern everyday operation of the criminal justice system from investigation to appeal.

LEGL 3354. Punishment and Freedom. (3) Cross-listed Course(s): CJUS 3354 and HONR 3700-H01. Prerequisite(s): Legal Studies minor and Junior or Senior standing. Examines the manner in which the notions of freedom and punishment are fundamentally bound to one another, and how, at their intersections, these constructs are the source of considerable speculation regarding consumerism, democracy, capitalism, and ethics.

LEGL 3363. Mediation and Conflict Resolution. (3) Cross-listed Course(s): CJUS 3363. Prerequisite(s): Legal Studies minor and Junior or

Senior standing. Introduction to conflict and dispute resolution, with a specific emphasis on mediation. Course format includes lecture, case studies, and practice mediation role plays with instructor and peer feedback.

LEGL 3810. Social and Political Philosophy. (3) Cross-listed Course(s): PHIL 3271 and POLS 3177. Prerequisite(s): Legal Studies minor. Examination of basic concepts involved in understanding the nature and structure of political and social formations. Issues may include topics such as justice, human rights, the nature of political power, and the relations between individuals and political/social institutions. Readings from historical and/or contemporary sources, and may include figures such as Plato, Hobbes, Marx, Rawls, Arendt, Foucault, and Butler.

LEGL 4101. Media and the Law. (3) Cross-listed Course(s): COMM 4101. Prerequisite(s): Legal Studies minor. Survey of legal rights, restrictions, and ethical considerations in field of communication including the First Amendment, libel, invasion of privacy, obscenity law, regulation of electronic media, relationships between media and judiciary.

LEGL 4110. North Carolina Student Legislature. (3) Cross-listed Course(s): POLS 4110. Prerequisite(s): Legal Studies minor and permission of instructor. Practicum including workshops, seminars, and guest speakers on legislative process and research, parliamentary procedure, and resolution and bill drafting; participation in an interim council debate at one of the member campuses for one weekend each month during the semester and participation in the NCSL annual session in Raleigh.

LEGL 4265. Social Psychology of Law. (3) Prerequisite(s): Legal Studies minor. Systematic analysis and application of theoretical and empirical research pertaining to the social psychological study of law.

LEGL 4320. Evidence. (3) Cross-listed Course(s): CJUS 4320. Prerequisite(s): Legal Studies minor and Junior or Senior standing. A critical examination of the use of evidence within the criminal courtroom. Emphasis placed on the rules of courtroom evidence with particular attention to the proper search and seizure of evidence.

Latin American Studies (LTAM)

LTAM 1501. Global Social Science: Introduction to Latin American Politics and Society. (3) Cross-listed Course(s): ANTH 1501; POLS 1501; SOCY 1501. This Global Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of complex, interconnected world. Students are introduced to world society and politics by focusing on the peoples of Latin America and the social dynamics that exist in the societies where they live.

LTAM 1502. Global Arts/Humanities: Introduction to Latin American History and Culture. (3) Cross-listed Course(s): HIST 1502, LANG 1502, SPAN 1502. This Global Theme course uses the methods and insights of the arts and humanities to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of complex, interconnected world.

Students are introduced to world art, history, and culture by focusing on key events, people, and societies from Latin America. *May not be taken for credit and for a grade if credit has been received for LTAM 1100.*

LTAM 2001. Topics in Latin American Studies. (3) Analysis of a selected topic related to Latin American Studies. Fulfills an elective in the "Economy and Society" course requirements. *May be repeated for credit with change of topic.*

LTAM 2002. Topics in Latin American Studies. (3) Analysis of a selected topic related to Latin American Studies. Fulfills an elective in the "Historical Perspective" course requirements. *May be repeated for credit with change of topic.*

LTAM 2003. Topics in Latin American Studies. (3) Analysis of a selected topic related to Latin American Studies. Fulfills an elective in the "Arts and Literature" course requirements. *May be repeated for credit with change of topic.*

LTAM 2106. Religion in Latin America. (3) Cross-listed Course(s): RELS 2106. Examines the diversity of religion in Latin America from the pre-colonial period through the present, with special attention to how the intercultural encounters between Indigenous Americans, Africans, and Europeans have shaped religious identities, practices, and institutions in the region.

LTAM 2116. Contemporary Latin America. (3) Cross-listed Course(s): ANTH 2116. A survey of the people and cultures of Mexico, Central America, South America, and the Caribbean. Areas of investigation include religion, race, ethnicity, gender, kinship, social inequality, and economic development.

LTAM 2117. Cultures of the Caribbean. (3) Cross-listed Course(s): ANTH 2117 and INTL 3114. An introduction to society and culture in the Caribbean region. Areas of investigation include ethnicity, nationalism, family and community structure, economy, religion, and politics.

LTAM 2206. Colonial Latin America. (3) Cross-listed Course(s): HIST 2206. A survey of major political, economic, and cultural developments from earliest times to 1826.

LTAM 2207. Modern Latin America. (3) Cross-listed Course(s): HIST 2207. A survey of Latin American history from 1826 to the present with emphasis on the economy and society. Special attention to twentieth-century revolutions and the role of the United States in Latin America.

LTAM 2252. New World Archaeology. (3) Cross-listed Course(s): ANTH 2152. Prehistory of North America; Paleoindians, Eastern United States, Southwest, Mexico; archaeological methods and theory.

LTAM 2270. Latino/as in the United States, 1846 to Present. (3) Cross-listed Course(s): HIST 2170. A survey of the diverse Latino/a experience in the United States from the Mexican-American War to the present, with emphasis on the twentieth century and contemporary issues. Themes include colonialism, immigration policies, transmigration, labor, rural and urban life, culture, political and environmental activism, and race relations.

LTAM 3001. Advanced Topics in Latin American Studies. (3) Analysis of a selected topic related to Latin American Studies. Fulfills an elective

in the "Economy and Society" course requirements. The particular topic of the course may vary from semester to semester. *May be repeated for credit with change of topic.*

LTAM 3002. Advanced Topics in Latin American Studies. (3) Analysis of a selected topic related to Latin American Studies. Fulfills an elective in the "Historical Perspectives" course requirements. The particular topic of the course may vary from semester to semester. *May be repeated for credit with change of topic.*

LTAM 3003. Advanced Topics in Latin American Studies. (3) Cross-listed Course(s): ENGL 3125. Analysis of a selected topic related to Latin American Studies. Fulfills an elective in the "Arts and Literature" course requirements. The particular topic of the course may vary from semester to semester. *May be repeated for credit with change of topic.*

LTAM 3120. Spanish for Business and International Trade. (3) Cross-listed Course(s): SPAN 3220. Introduction to spoken and written language of the Spanish-speaking business world. Acquisition of and practice with general commercial terminology used in Spanish for such functional business areas as economics, management, marketing, finance, and import-export.

LTAM 3129. Cultural Dimension of Doing Business with Spanish-Speaking Countries (3) Prerequisite(s): WRDS 1103 or WRDS 1104. Development of cultural awareness for conducting business with Spanish-speaking countries and U.S. Hispanic communities. Conducted in English.

LTAM 3144. Latin American Politics. (3) Cross-listed Course(s): POLS 3144. Comparative overview of political and socio-economic change in Latin America from the colonial period to the present. Primary emphasis on Latin American politics in the twentieth century, competing political ideologies, socio-economic issues, international political economy, and internal political change.

LTAM 3154. Political Economy of Latin America. (3) Cross-listed Course(s): POLS 3155. Intersections of politics and economics in Latin America, focusing on the efforts to foster economic development in the region. Emphasis on post-World War II era. Topics include: debt management, dependency theory, impact of free market theories, and the power of labor movements.

LTAM 3164. U.S.-Latin American Relations. (3) Cross-listed Course(s): POLS 3164. Addresses the always-complicated and often-conflictive relationship between Latin American and the United States. Particular attention to critical contemporary issues such as the drug trade, immigration, international trade, humanitarian aid and U.S. policy toward Cuba.

LTAM 3190. Political Economy of the Caribbean. (3) Cross-listed Course(s): AFRS 3190. An examination of the manifestations of Caribbean economic problems and policies and Caribbean political development from the post-war period to the present.

LTAM 3220. The Caribbean from Slavery to Independence. (3) Cross-listed Course(s): AFRS 3220 and HIST 3180. Covering the sweep of history from European/indigenous contact, through the construction of a plantation regime based on African slave labor, and up to the present day, this course explores the spread of colonialism, the dynamics of

slavery, and the tumult of abolition and national independence movements. The Caribbean Sea will be examined as a region, emphasizing the ties uniting the islands and the circum-Caribbean coasts. The region's past - including empire and imperial conflict, racial oppression and interaction, and international contact - and its legacies will be discussed in relation to political economics, race, and contemporary culture.

LTAM 3255. Ancient Latin America. (3) Archaeology and ethnohistory of the Aztecs, Maya, Inca, and their predecessors; includes an investigation of prehistoric urbanism, the rise and fall of complex societies, and the application of archaeological methods to complex societies.

LTAM 3257. South American Prehistory. (3) Cross-listed Course(s): ANTH 3157. Archaeology of the indigenous cultures in South America from the earliest settlement until the arrival of the Spanish, including Moche, Nasca, and Inca; focus on the Central Andean region including Peru, Bolivia, Chile, and Ecuador; examination of the origins of agriculture, interactions of people and the environment, rise and collapse of states and empires, and the role of religion and warfare in ancient societies.

LTAM 3260. Slavery, Racism, and Colonialism in the African Diaspora. (3) Cross-listed Course(s): AFRS 3260 and HIST 3190. This course is designed to explore how race and racism, slavery, and colonialism served as principal institutions and constructs shaping the experience between Africa and the emerging African Diaspora in the New World. Students will consider how the maintenance of Western social, economic, and political superiority materialized as functions of these three important historical developments.

LTAM 3270. Afro-Latin American History. (3) Cross-listed Course(s): AFRS 3270 and HIST 3181. This course explores the African Diaspora in Latin America ranging from the Caribbean Sea to the Rio de la Plata. From slavery, to fighting for freedom in the Spanish-American Wars of Independence, to forging new notions of citizenship in twentieth century Brazil, African-descended peoples have an important place in Latin America's historical past. According special attention to regions with concentrated populations of African-descended peoples, this course reveals the vibrant history of Afro-Latin America.

LTAM 3274. Resistance and Adaptation: Indian Peoples Under Spanish Rule. (3) An historical examination of the interactions of indigenous peoples of the western hemisphere with Spanish colonial authorities from the conquest era to 1825. Focuses on the indigenous peoples of Mexico, Peru, Chile, and Argentina.

LTAM 3275. Reform, Riots, and Rebellions in Colonial Spanish America, 1692-1825. (3) An examination of the economic, political, and cultural origins of violent conflict in colonial Latin America, culminating with an analysis of the revolutions for independence.

LTAM 3276. History of Mexico. (3) Cross-listed Course(s): HIST 3176. An examination of Mexican history from pre-Columbian times to the present. Special emphasis is given to the Spanish conquest, the colonial economy, the independence period, the revolution, and relations with the United States. Meets non-Western requirement.

LTAM 3277. The Cuban Revolution. (3) An examination of the economic and political forces that led to the Cuban revolution. Significant background material from the 19th and early 20th centuries are presented in addition to an analysis of the revolution and post-revolutionary events.

LTAM 3278. History of Brazil. (3) Cross-listed Course(s): AFRS 3278 and HIST 3178. A study of Brazilian history since 1500, with an emphasis on social and economic history. The course emphasizes slavery and race relations, the emergence of export economics, rural protest movements, the effects of urbanization and industrialization, and the rise and fall of the military dictatorship. Meets non-Western requirement.

LTAM 3279. Authoritarianism in Latin America. (3) Cross-listed Course(s): HIST 3179. A study of authoritarian rule and resistance thereto in one or more selected Latin American countries, including but not limited to Argentina, Brazil, and Chile. *May be repeated for credit with change of topic.*

LTAM 3301. Mexica (Aztec) Art. (3) Cross-listed Course(s): ARTH 3318. Survey of the cultures, artistic production and architecture of the Central Mexico region from c. 1300 to the period of European invasion in the 16th century. Readings and discussions focus on artistic traditions, daily life, and political structures.

LTAM 3308. Introduction to Literary Analysis. (3) Cross-listed Course(s): SPAN 3208. Continued work with vocabulary building and reading skills. Introduction to the theory and practice of reading literary texts in Spanish.

LTAM 3309. Masterpieces of Hispanic Literature in English Translation. (3) Cross-listed Course(s): SPAN 3009 if course is on Latin America topic. Prerequisite(s): Sophomore, Junior, or Senior standing; and WRDS 1103 or WRDS 1104 with a grade of C or above. Advanced studies of Spanish or Spanish-American literature in English translation. Conducted in English. *May be repeated for credit with change of topic.*

LTAM 3310. Spanish American Civilization and Culture. (3) Cross-listed Course(s): SPAN 3210. Pre- or Corequisite(s): SPAN 3201, SPAN 3202, SPAN 3203, or permission of department. Introduction to the cultural heritage of Spanish America.

LTAM 3313. Pre-Columbian Art. (3) Cross-listed Course(s): ARTH 2003. Survey of the arts and architecture of the Americas before European contact in the 16th century. Special emphasis on the interactions of religion, social systems, and the arts as well as identification of ethnic styles of art. Discussions of readings, lectures, slides and video tapes. Essay exams.

LTAM 3319. Hispanic Women Writers in English Translation. (3) Cross-listed Course(s): SPAN 3019 and WGST 3019. Prerequisite(s): Sophomore, Junior, or Senior standing; and WRDS 1103 or WRDS 1104 with a grade of C or above. Examination of prose and poetry by women writers from Spain and the Americas to understand women's voices and other cultures. Conducted in English; knowledge of Spanish not required.

LTAM 3360. Studies in Hispanic Film (3) Cross-listed Course(s): SPAN 3160 if course is on the Latin American topic. The study of Spanish, Spanish American and/or Hispanic/Latino films. Course conducted in English. *May be repeated for credit with change of topic.*

LTAM 3361. Studies in Latin American Film. (3) The study of Latin American film. Conducted in English.

LTAM 3362. Studies in US Latino/a Cinema. (3) Despite belonging to the largest minority group in the United States, Latinos/as in this country have historically not enjoyed significant representation in Hollywood. Nevertheless, in recent years, there has been a handful of excellent films—both independent and even in Hollywood—that explore Latino/a identity in America. In this course, several films are watched and discussed that demonstrate how race, ethnicity, gender, and the family come together to create unique circumstances for people of Latin American descent, particularly youth, when they come to this country.

LTAM 3400. Latin American Studies Internship. (1 to 3) Prerequisite(s): permission of the coordinator. Practical experience and/or training related to Latin American studies. A minimum of 45 hours per credit.

LTAM 3800. Independent Study. (1 to 3) Supervised investigation of an issue related to Latin American Studies that is of special interest to the student and that is not covered in existing or available courses.

LTAM 4010. Special Topics in Latin American Social Science. (3) Includes courses from disciplines like Anthropology, Geography, Political Science, Sociology, etc. *May be repeated for credit with change of topic.*

LTAM 4020. Topics in Latin American Historiography. (3) Research seminar examining scholarly trends and debates in the field of Latin American History. Meets the LTAM major historiography requirements. Students must achieve a grade of C or above to satisfy major requirements. *May be repeated for credit with change of topic.*

LTAM 4030. Topics in Latin American Humanities. (3) Special topics in Latin American humanities. Courses focus on the artists, philosophers, writers, and other cultural production and cultural producers from Latin America. *May be repeated for credit with change of topic.*

LTAM 4116. Culture and Conflict in the Amazon (3) Examines the development strategies Brazil has used in the Amazon and explores how these policies have affected both the environment and the various populations living in the Amazon. Topics covered include environmental degradation, human rights abuses, culture change, migration, and globalization..

LTAM 4120. Advanced Business Spanish I. (3) Cross-listed Course(s): SPAN 4120. Prerequisite(s): SPAN 3201, SPAN 3202, or SPAN 3203; and SPAN 3220; or permission of department. Advanced studies in Business Spanish, intensive intercultural communication practice in speaking, listening comprehension, reading, writing, and translation/interpretation in functional business areas such as economics, management, banking, accounting, real estate, office systems, and human resources.

LTAM 4121. Advanced Business Spanish II. (3) Cross-listed Course(s): SPAN 4121. Prerequisite(s): SPAN 3201, SPAN 3202, or SPAN 3203; and SPAN 3220; or permission of department. Advanced studies in Business Spanish, intensive intercultural communication practice in speaking, listening comprehension, reading, writing, and translation in functional

business areas such as goods and services, marketing, finance, and import-export.

LTAM 4302. Caribbean Literature in English. (3) Cross-listed Course(s): AFRS 4102. Prerequisite(s): Junior or Senior standing and at least one course in AFRS for AFRS majors. Topics include: loneliness, quest for identity, nationalism, protest, and the use of patois.

LTAM 4309. Introduction to Spanish American Literature. (3) Cross-listed Course(s): SPAN 4209. Prerequisite(s): SPAN 3201, SPAN 3202, SPAN 3203, or permission of department. Pre- or Corequisite(s): SPAN 3208. Introduction to the literary heritage of Spanish America. Reading and analysis of representative works.

LTAM 4310. Studies in Spanish American Poetry. (3) Prerequisite(s): SPAN 4208, SPAN 4209, or permission of department. Studies of colonial, post-independence, twentieth century, and contemporary Spanish American poetry. *May be repeated for credit with change of topic.*

LTAM 4311. Studies in Spanish American Prose Fiction. (3) Cross-listed Course(s): SPAN 4211. Prerequisite(s): SPAN 4208, SPAN 4209, or permission of department. Studies of colonial, post-independence, twentieth century, and contemporary Spanish American prose fiction. *May be repeated for credit with change of topic.*

LTAM 4312. Studies in Spanish American Theater. (3) Cross-listed Course(s): SPAN 4212. Prerequisite(s): SPAN 4208, SPAN 4209, or permission of department. Studies of colonial, post-independence, twentieth century, and contemporary Spanish American theater. *May be repeated for credit with change of topic.*

LTAM 4314. Studies in Hispanic Children's Literature. (3) Cross-listed Course(s): SPAN 4214. Prerequisite(s): SPAN 4208, SPAN 4209, or permission of department. Literary works in Spanish written for children.

LTAM 4315. Studies in Regional Literature of the Americas. (3) Cross-listed Course(s): SPAN 4215. Prerequisite(s): SPAN 4208, SPAN 4209, or permission of department. Studies of Mexican, Central American, Caribbean, Andean, Amazonian, or Southern Cone literature. Readings from representative works. Works from non-Spanish-speaking areas read in Spanish translation. *May be repeated for credit with change of topic.*

LTAM 4316. Social, Political, Cultural, Economic Issues in Hispanic Literature. (3) Cross-listed Course(s): SPAN 4216. Prerequisite(s): SPAN 4208, SPAN 4209, or permission of department. Contextual issues surrounding Hispanic literature.

LTAM 4317. Topics in Hispanic Culture and Civilization. (3) Cross-listed Course(s): SPAN 4217. Prerequisite(s): SPAN 4208, SPAN 4209, or permission of department. Various topics involving the fine arts: music, dance, art, film. *May be repeated for credit with change of topic.* Applicable toward Spanish major or minor only when taught in Spanish.

LTAM 4318. Cuban Literature. (3) Cross-listed Course(s): SPAN 4218. Prerequisite(s): SPAN 4208, SPAN 4209, or permission of department. Cuban literary works in Spanish.

LTAM 4350. Studies in Latin American Literature. (3) Cross-listed Course(s): SPAN 4050. Prerequisite(s): two 3000 level courses or permission of department. Study of a predetermined topic in Latin American literature. *May be repeated for credit with change of topic.*

LTAM 4600. Seminar in Latin American Studies. (3) Prerequisite(s): Advanced Junior or Senior standing. A capstone seminar involving in-depth research and analysis of a topic of common interest to Latin American Studies majors, and the elaboration of a senior writing project. May be taken more than once, in which case the second course will fulfill the capstone requirement.

LTAM 4700. Senior Honors Thesis. (3-6) Prerequisite(s): Senior standing, an overall minimum GPA of 3.25; permission of the Coordinator of Latin American Studies; and approval of a proposal through the Honors College Application to Candidacy process the semester prior to taking the course. The preparation and presentation of an acceptable honors thesis.

Mathematics Education (MAED)

MAED 3070. Topics in Mathematics Education, Secondary. (1 to 6) Prerequisite(s): Permission of department. Special topics in mathematics education at the secondary level. *May be repeated for credit with change of topic.*

MAED 3222. Teaching Mathematics to Elementary School Learners, Grades K-2. (3) Prerequisite(s): Students must be accepted as Elementary Education majors in the College of Education. This course is designed to help students develop knowledge and understanding of school mathematics and methods for teaching mathematics to children in grades K through 2. The course focuses on the importance of learning through manipulative and concrete experiences and on planning lessons in which students develop their ideas through action and discussion.

MAED 3224. Teaching Mathematics to Elementary School Learners, Grades 3-6. (3) Prerequisite(s): MAED 3222. This course is designed to help students develop knowledge and understanding of school mathematics and methods for teaching mathematics to children in Grades 3 through 6. The course includes a focus on planning and developing mathematics lessons and also includes the study of a variety of techniques for assessing student learning.

MAED 4103. Using Technology to Teach Secondary School Mathematics. (3) Prerequisite(s): Admission to Teacher Education or permission of department. Technology as a tool for exploring mathematical ideas and representing mathematical concepts, including lab assignments related to using technology throughout the secondary school mathematics curriculum.

MAED 4105. High School Mathematics from an Advanced Standpoint. (3) Prerequisite(s): MATH 3163, MATH 3181, at least one STAT course; and Minor in Secondary Education or permission of department. Intended for students working towards a Minor in Secondary Education intending to become high school mathematics teachers. Explores the study of high school mathematics topics from an advanced standpoint. Topics include:

functions, geometry and transformations, analytic geometry, complex numbers and trigonometry, and statistics and probability.

MAED 4232. Teaching Mathematics to Middle School Learners. (3) Prerequisite(s): Admission to Teacher Education or permission of department. The initial teaching methods course for middle school mathematics teachers. Focuses on middle school mathematics and its relation to the K-12 curriculum. Topics include: the development of teaching strategies and activities in middle school mathematics with an emphasis on problem solving, mathematical connections, communication and assessment, including school-based field experiences.

MAED 4252. Teaching Mathematics to Secondary School Learners. (3) Prerequisite(s): Admission to Teacher Education or permission of department; MDSK 3100; MDSK 3151; MDSK 4210; and MDLG 3130 or SECD 4140. Corequisite(s): MDSK 4100L and MDSK 4102. The initial teaching methods course for secondary school mathematics teachers. Focuses on secondary school mathematics and its relation to the K-12 curriculum. Topics include: the planning and implementation of high quality mathematics lessons with an emphasis on problem solving, mathematical connections, and communication, including school-based field experiences.

Mathematics (MATH)

MATH 0900. Math Study Skills and Algebra Review. (1) Prepares students to be successful in college algebra or precalculus. Topics include: a review of elementary algebra, exponents and radicals, polynomial and rational functions, equations, and inequalities. Study skills needed to be successful in mathematics are an important part of this course. Placement in this course is based on an appropriate eligibility level of math placement and is restricted to students who do not have college-level math credit.

MATH 1100. College Algebra. (3) Prerequisite(s): Math Placement Level 2 or MATH 0900. The basic mathematics course about the fundamental concepts of algebra for undergraduates whose majors require College Algebra, Pre-Calculus, or Calculus. Topics include: polynomial, exponential, and logarithmic functions and their graphs. Students who have already received credit for MATH 1103 or higher with grade of C or above may not receive credit for taking MATH 1100 or MATH 1101.

MATH 1101. College Algebra with Workshop. (4) Explores topics that are necessary for success in Pre-Calculus or Calculus courses. Topics include: functions and their graphs; composition and inverses; exponential, logarithmic, and polynomial functions. May not be taken for credit and for a grade if credit has been received for MATH 1100. Students who have already received credit for MATH 1103 or above will not receive credit for taking MATH 1101.

MATH 1102. Introduction to Mathematical Thinking. (3) Prerequisite(s): Either No Math Placement Level or Math Placement Level 1. An introduction to mathematical ideas designed primarily for non-science students. Topics are drawn from various branches of mathematics which may include algebra, geometry, number theory, probability, statistics and graph theory. This course is for students who

are not majoring in programs that require College Algebra, Pre-Calculus, or Calculus.

MATH 1103. Precalculus Mathematics for Science and Engineering.

(3) Prerequisite(s): Math Placement Level 3 or MATH 1100 or MATH 1101. Intended for students who plan to take MATH 1241. Review of polynomial and rational functions, properties of functions, composite, and inverse functions. The study of polynomial and rational inequalities, reciprocal functions, trigonometric functions and their graphs, identities and equations, the law of sines and cosines. A brief introduction of limits of functions through their graphs. Students who have already received credit for MATH 1121 or higher with grade of C or above will not receive credit for taking MATH 1103.

MATH 1103L. The Academic Success Experience.

(1) Prerequisite(s): Permission of the MPAACT coordinator for MATH 1103. Co-requisite Course(s): MATH 1103. The Academic Success Experience is a corequisite seminar course specifically designed to provide essential support and enhance the achievement of students who are enrolled in MATH 1103 and part of the National Science Foundation funded MPAACT (Math Pathways for African American Collegiate Transformation) project. The enrollment for the corequisite course is by permission of the MPAACT coordinator for Math 1103. This empowering course aims to foster their academic growth, strengthen their mathematical skills, critical thinking, and problem-solving abilities through a tailored and inclusive approach that recognizes the potential, aspirations, and determination of these students. The Academic Success Experience incorporates personalized mentoring and peer support networks. By completing this course, students will develop the competence and a determined mindset necessary to excel in MATH 1103, establishing a solid mathematical foundation in pre-calculus crucial for success in advanced science and engineering courses. This comprehensive preparation will equip students with the necessary tools for a successful degree completion in their chosen STEM program, empowering them to circumvent challenges and contribute to the diverse landscape of scientific fields.

MATH 1105. Finite Mathematics. (3) Review of high school algebra, elementary matrix algebra, systems of linear equations and inequalities, elementary linear programming; probability.

MATH 1120. Calculus. (3) Prerequisite(s): MATH Placement Level 3 or MATH 1100 or MATH 1101 or MATH 1103. Intended for students majoring in fields other than engineering, mathematics or science. Elements of differential and integral calculus for polynomial, rational, exponential, logarithmic functions, with applications to business and the social and life sciences. Students who have already received credit for MATH 1121 or higher will not receive credit for taking MATH 1120.

MATH 1121. Calculus for Engineering Technology. (3) Prerequisite(s): Math Placement Level 4 or a score of at least 23 on the Math portion of the ACT or MATH 1103 with grade of C or above. Intended for students majoring in Engineering Technology or Construction Management. Technical problem solutions utilizing analytical geometry and differential calculus. Topics include: limits, differentiation, curvilinear motion, related rates, optimization problems, and transcendental functions. Students who have already received credit for MATH 1120, MATH 1241, or higher will not receive credit for taking MATH 1121.

MATH 1241. Calculus I. (3) Prerequisite(s): Math Placement Level 4 or MATH 1103 with a grade of C or better. Designed for students majoring in Mathematics, Science, or Engineering. Elementary functions, derivatives and their applications, introduction to definite integrals.

MATH 1241L. The Academic Success Experience.

(1) Prerequisite(s): Permission of the MPAACT coordinator for MATH 1241. Co-requisite Course(s): MATH 1241. The Academic Success Experience is a corequisite course specifically designed to provide essential support and enhance the achievement of students who are enrolled in MATH 1241 and part of the National Science Foundation funded MPAACT (Math Pathways for African American Collegiate Transformation) project. The enrollment for the corequisite course is by permission of the MPAACT coordinator for MATH 1241. This empowering course aims to foster their academic growth, strengthen their mathematical skills, critical thinking, and problem-solving abilities through a tailored and inclusive approach that recognizes the potential, aspirations, and determination of these students. The Academic Success Experience incorporates personalized mentoring and peer support networks. By completing this course, students will develop the competence and a determined mindset necessary to excel in MATH 1241, establishing a solid foundation in calculus and its practical applications for mathematics, science, and engineering disciplines. This comprehensive preparation will equip them with the necessary tools for a successful degree completion in their chosen STEM program, empowering them to circumvent challenges and contribute to the diverse landscape of scientific fields.

MATH 1242. Calculus II. (3) Prerequisite(s): MATH 1241 with grade of C or above. Methods for evaluating definite integrals, applications of integration, improper integrals, infinite series, Taylor series, power series, and introduction to differential equations.

MATH 1340. Mathematics for Elementary Teachers I.

(3) Prerequisite(s): Enrollment in one of the following majors: Pre-Elementary Education, Elementary Education, Pre-Special Education. Math Level 2 or permission of department. Develops elementary teachers' understanding of essential concepts related to the base-ten number system and operations. Students reconceptualize their understanding of the base-ten number system, including natural numbers, whole numbers, integers, fractions, decimals, and percents. Students also reconceptualize operations within these systems and their properties. Students also develop their understanding of number theory concepts, including prime factorization, greatest common factor, and least common multiple. The content will be taught through a problem-solving approach.

MATH 1341. Mathematics for Elementary Teachers II.

(3) Prerequisite(s): MATH 1340; Must be enrolled in one of the following majors: Pre-Elementary Education, Elementary Education, Pre-Special Education. Develops elementary teachers' understanding of four fundamental, interrelated concepts in elementary mathematics: geometry, measurement and data, ratios and proportions, and algebraic reasoning. Students use proportional reasoning to solve problems involving ratios, compare ratios, interpret unit rates, and solve problems involving percentages. Students understand how algebraic reasoning develops in the elementary grades through sequences and pattern recognition followed by the development of expressions and equations. Students re-conceptualize definitions and properties of polygons and polyhedral including the concepts of perimeter, area, surface area, volume, transformation, and congruence and similarity.

Students develop their understanding of the organization, representation, and analysis of data along with measures of central tendency and variation. The content will be taught through a problem-solving approach.

MATH 2112. Mathematics for Computer Science. (3) Prerequisite(s): MATH 1241 with grade of C or above; Majors or Minors in the College of Computing and Informatics. An overview of linear algebra and probability topics for computer science. Systems of linear equations, vector and matrix operations, eigenvalues and eigenvectors, orthogonality, introduction to probability of events, discrete and continuous random variables and their distributions, and hypothesis testing. This course emphasizes the understanding of concepts through computational implementation of algorithms. May not be taken for credit if credit has been received for both MATH 2164 and STAT 2122.

MATH 2120. Intermediate Applied Calculus. (3) Prerequisite(s): MATH 1120 or MATH 1241. Introduction to the calculus of functions of several variables, trigonometric functions, techniques of integration of functions of one variable, differential equations, and Taylor polynomials and infinite series. May not be taken for credit and for a grade if credit has been received for MATH 1242.

MATH 2164. Matrices and Linear Algebra. (3) Prerequisite(s): MATH 1120 or MATH 1241 with grade of C or above; or permission of department. Matrix algebra, systems of linear equations, vector spaces, linear transformations, determinants, inner products, eigenvalues.

MATH 2165. Introduction to Discrete Structures. (3) Prerequisite(s): ECGR 2103 or ENGR 1302 or ITSC 1212; and MATH 1241. Propositions and truth tables, sets, permutations and combinations, relations and functions, lattices, and trees.

MATH 2167. Introduction to Mathematical Reasoning. (3) Prerequisite(s): MATH 1242 or MATH 2120. Pre- or Corequisite(s): MATH 2164. Focuses on the fundamentals of logical reasoning and mathematical proof-writing. Students will learn what a proof is in mathematics, how to analyze a proof for validity, and have practice writing their simple proofs. Students will also be exposed to mathematical programs, such as LaTeX, and learn how to typeset their proofs. Topics covered include symbolic logic (such as truth tables & quantifiers), types of proof-writing (such as direct proofs, proofs by contrapositive, proofs by contradiction, counter-examples, and mathematical induction), and other basic concepts from set theory, relations, and functions (such as bijections).

MATH 2171. Differential Equations. (3) Prerequisite(s): MATH 1242 with grade of C or above. An introduction to ordinary differential equations including first order equations, general theory of linear equations, series solutions, special solutions, special equations such as Bessel's equation, and applications to physical and geometric problems.

MATH 2241. Calculus III. (3) Prerequisite(s): MATH 1242 with grade of C or above. Functions of two or more variables, vectors in two and three dimensions, partial derivatives, optimization, double and triple integrals and their applications.

MATH 2242. Calculus IV. (3) Prerequisite(s): MATH 2241 with grade of C or above. Parametric curves and surfaces, vector fields, line and

surface integrals; Green's theorem, Divergence theorem, Stoke's theorem and applications. Fourier series and its applications.

MATH 2340. Number Concepts and Relationships. (3) Prerequisite(s): MATH 1100 or MATH 1101 or MATH 1103 with grade of C or above or permission of department. A study of integers, rationals, and real numbers; conjectures and intuitive proofs in a number theory; number sequences, patterns, functions; algebraic concepts and skills. An emphasis on the development of problem-solving strategies and abilities. (May not be taken for the major or minor).

MATH 2341. Algebra and Algebraic Structures. (3) Prerequisite(s): MATH 2340 with grade of C or above or MATH 2102 with grade of C or above or permission of department. A study of functions and their properties arising from a variety of problem situations. Representations of real-world relationships with physical models, charts, graphs, equations, and inequalities. Properties of real and complex numbers. Concrete examples of algebraic structures such as groups, rings, fields, and vector spaces.

MATH 2342. Data Analysis and Probability. (3) Prerequisite(s): STAT 1220 or STAT 1222 with grade of C or above or permission of department. Introduction to the statistical process. Collection of data from experiments and surveys; organizing, representing, and interpreting data; formulating arguments based on analysis. Plan and conduct experiments and simulations to determine experimental probabilities. Develop counting techniques and other methods to determine probabilities. (May not be taken for the major or minor).

MATH 2343. Geometry and Measurement. (3) Prerequisite(s): MATH 1100 or MATH 1101 or MATH 1103 with a grade of C or above or permission of department. A study of properties and relationships of shape, size, and symmetry in two and three dimensions. Explore concepts of motion in two and three dimensions through transformations. Present written and oral arguments to justify conjectures and generalizations. Become familiar with the historical development of Euclidean geometry. (May not be taken for the major or minor).

MATH 2688. Mathematics Awareness Seminar. (0) Prerequisite(s): Sophomore or Junior standing. Introduction to the Department of Mathematics and Statistics and options for majors, concentrations, and minors. Visiting speakers, discussion of internships, cooperative education and job opportunities; selected topics in mathematics. *Recommended to be taken during the Sophomore year.*

MATH 3050. Selected Topics in Mathematics. (2-3) Prerequisite(s): Permission of department. Topics selected to supplement regular offerings at the 3000 level in mathematics or statistics. *May be repeated for credit with permission of department.*

MATH 3116. Graph Theory. (3) Prerequisite(s): with grade of C, and either MATH 2165 or MATH 2167. Graphs as mathematical models. Planarity, colorability, connectivity, trees. Applications and algorithms for networks, matching problems and areas of computer science.

MATH 3122. Probability and Statistics I. (3) Cross-listed Course(s): STAT 3122. Prerequisite(s): MATH 2241 with grade of C or above. Sample spaces, random variables, moment generating functions, some standard distributions, multivariate distributions, laws of large numbers, limit

theorems. Credit may not be given for MATH 3122 when credit has been given for STAT 3122 or STAT 3128.

MATH 3123. Probability and Statistics II. (3) Cross-listed Course(s): STAT 3123. Prerequisite(s): MATH 3122 or STAT 3122. An introduction to statistical inference. Topics include: point estimation (method of moments, method of maximum likelihood, unbiased estimators, efficiency, consistency); confidence intervals and hypothesis tests for unknown parameters, including proportions, means, variances, and differences between means; tests of significance; the power function; goodness-of-fit.

MATH 3141. Advanced Calculus of One Variable. (3) Prerequisite(s): MATH 2241 with grade of C and MATH 2167. Topology of the real line; continuity, uniform continuity, differentiability, integration, sequences and series of functions.

MATH 3142. Advanced Calculus of Several Variables. (3) Prerequisite(s): MATH 3141. Continuity and differentiability of functions of several variables, inverse and implicit function theorems, integration, Fubini's theorem, change of variables, the classical integral theorems of Gauss, Green and Stokes and their generalizations.

MATH 3146. Introduction to Complex Analysis. (3) Prerequisite(s): MATH 2241 with grade of C and MATH 2167. Analytic functions, complex integration, calculus of residues, conformal mapping.

MATH 3163. Introduction to Modern Algebra. (3) Prerequisite(s): MATH 2164 with grade of C and MATH 2167. Examples and elementary properties of basic algebraic structures, especially groups. The course emphasizes the writing of proofs of elementary theorems.

MATH 3166. Combinatorics. (3) Prerequisite(s): MATH 2164 with grade of C, and either MATH 2165 or MATH 2167. Combinatorial modeling, generating functions, recurrence relations, inclusion-exclusion principle and problems from recreational mathematics.

MATH 3171. Applied Mathematics. (3) Prerequisite(s): MATH 2241 and MATH 2171 with grades of C or above. Separation of variables techniques for the classical partial differential equations of mathematical physics; Fourier series; Sturm-Liouville theory.

MATH 3176. Numerical Analysis. (3) Prerequisite(s): ITSC 1212 and MATH 2241. Introduction to fundamental mathematical theory and algorithms in computational math and AI foundation. The topics will include numerical methods for solving nonlinear equations; fixed point theorems and error analysis of iterative methods; function approximation theories; computational schemes and convergence analysis of numerical differentiation/integration.

MATH 3180. Predictive Analytics. (3) Prerequisite(s): MATH 1242, and STAT 2122 or higher. Cross-listed Course(s): STAT 3180. Predictive modeling skills used in pricing and risk classification algorithms in the R programming language. Students learn how to perform exploratory data analysis using the data visualization tools in Base R and the GGPLOT graphical package. Students will learn how to apply Generalized Linear Modeling (GLM) techniques based on Gaussian, Binomial, Poisson, and Gamma families of distributions. Students will learn data analysis and model validation techniques to assess modeling data quality and statistical model fit.

MATH 3181. Fundamental Concepts of Geometry. (3) Prerequisite(s): MATH 2164 with grade of C or above. Foundations of geometry, transformations, comparison of Euclidean and non-Euclidean geometries.

MATH 3227. Mathematical Theory of Interest and Applications. (3) Prerequisite(s): MATH 1242 or MATH 2120. The measurement of interest rates, equations of value, time value of money, basic and more general annuities, NPV and yield rates, loans and amortization schedules.

MATH 3228. Financial Mathematics and General Cash Flows. (3) Pre- or Corequisite(s): MATH 3227. Topics include: interest rates, yield curves, loans, bonds, portfolios, duration, convexity, immunization strategies, and applications.

MATH 3500. Mathematics Cooperative Education Experience. (0) Prerequisite(s): Good standing with the University, completion of 30 credit hours at UNC Charlotte (transfer students are required to complete 12 credit hours), and permission of Department of Mathematics and Statistics. Students are employed in a manner that afford them the opportunity of using and enhancing mathematical knowledge and skills through practical experience of co-op rotation. Participating students pay a course registration fee for transcript notation. Assignments must be arranged and approved in advance. After completing MATH 3500, co-op students must take MATH 3652. The Cooperative Education Program is only open to undergraduate students; graduate level students are encouraged to contact their academic departments to inquire about academic or industrial internship options for credit. For more information, contact the University Career Center. *Course may be repeated. Graded on a Satisfactory/Unsatisfactory basis.*

MATH 3652. Mathematics Cooperative Education Seminar. (1) Prerequisite(s): MATH 3500. Students give an exposition of their work experience in MATH 3500. An exposition of underlying theoretical concepts and related ideas may also be required.

MATH 3689. Mathematics Project Seminar. (1) Prerequisite(s): Senior standing. Oral presentation by the student on an area of mathematics or a mathematical problem.

MATH 3691. Mathematics Seminar. (1 to 6) Prerequisite(s): Permission of department. Group investigation and exposition of topics in mathematics and mathematics education. *May be repeated for credit.*

MATH 3790. Junior Honors Seminar. (3) Prerequisite(s): Permission of department. A seminar course for Junior Honors students. *May be repeated for credit one time with permission of department.*

MATH 3791. Senior Honors Tutorial. (3) Prerequisite(s): Permission of department and approval of a proposal through the Honors College Application to Candidacy process the semester prior to taking the course. Individual tutorials in which students pursue independent study and research in any area of mathematics under the direction of one or more faculty members. The projects of students are planned to culminate in a research paper of original or expository nature. *May be repeated for credit with permission of department.*

MATH 3800. Directed Individual Study in Mathematics. (1 to 3) Prerequisite(s): MATH 1242 with grade of C or above; and permission

from the department and credit hours established in advance. Supervised individual investigation of a topic in mathematics. Students must request permission for independent study from an individual faculty member. *May be repeated for credit with change of topic.*

MATH 4040. Topics in Analysis. (2-3) Prerequisite(s): Permission of department. Topics in analysis selected to supplement regular course offerings in this area of mathematics. *May be repeated for credit with permission of department.* Credit for the M.A. degree in Mathematics requires approval of the department.

MATH 4051. Computer Exploration and Generation of Data. (3) Prerequisite(s): MATH 2120 or MATH 2241; and STAT 2122 or STAT 2223 or STAT 3123. This is a project course. Grades are based on four to five projects that utilize spreadsheet technology. Includes an introduction to a major spreadsheet, such as Excel. Assigned projects may be selected from a range of topics that include: Data Analysis and Exploration; Dynamical Models and Difference Equations (Epidemics, Harvesting Models, Population Dynamics, Predator-Prey Models); Physical Models (projectile motion, including air resistance, orbits of celestial bodies, heat propagation); Combinatorics and Probability (birthday problem, genetics, simulation of distributions); Optimization (inventory control, apportionment algorithms); Financial Mathematics (Stock Price Simulation, Pricing of Derivatives); Business Simulations (Net Present Value Comparisons and Risk Evaluation, Sensitivity Analyses). Completed projects must include written descriptions, explanation, and evaluation along with appropriate working spreadsheets that accomplish the assigned objectives.

MATH 4080. Topics in Geometry and Topology. (3) Prerequisite(s): Permission of department. Topics in geometry or topology selected to supplement regular course offerings in this area of mathematics. *May be repeated for credit with permission of department.* Credit for M.A. degree in Mathematics requires approval of the department.

MATH 4109. History of Mathematical Thought. (3) Prerequisite(s): MATH 1241 or permission of department. A study of the development of mathematics in its historical setting from the earliest beginnings to modern times.

MATH 4122. Probability and Stochastic Models. (3) Prerequisite(s): MATH 3122 or STAT 3122. Topics include: a brief review of probability, including joint and conditional distributions; Markov Chains; Poisson process with applications to actuarial science and replacement models; and binomial model of option pricing.

MATH 4128. Risk Theory. (3) Prerequisite(s): MATH 3122 or STAT 3122. Topics include: modeling risk with Value-at-Risk (VaR) and related quantities; statistical estimation of VaR; back testing; risk management; forecasting risk and volatility modeling with GARCH; and Monte Carlo methods.

MATH 4161. Number Theory. (3) Prerequisite(s): MATH 3163 with grade of C or above or permission of department. A study of the elements of classical number theory including divisibility, congruences, diophantine equations, prime numbers and their distribution, quadratic reciprocity, number-theoretic functions, and famous unsolved problems. Not approved for the M.A. in mathematics degree.

MATH 4163. Modern Algebra. (3) Prerequisite(s): MATH 3163 or permission of department. Groups, rings, integral domains, and fields.

MATH 4164. Abstract Linear Algebra. (3) Prerequisite(s): MATH 3163. Vector spaces over arbitrary fields, linear transformations, diagonalization, inner product spaces, and canonical forms.

MATH 4165. Numerical Linear Algebra. (3) Prerequisite(s): ITSC 1212 and MATH 2164; Junior or Senior standing. Matrix norms and condition numbers. Direct methods for linear systems and their accuracy and stability. Iterative methods for large sparse linear systems and their convergence. Least squares methods for non-square linear systems. Matrix Decompositions (LU and Cholesky Decompositions, Rank Decomposition, QR decomposition; Eigendecomposition and Diagonalization, Singular Value Decomposition). Efficient matrix multiplication methods. Matrix approximations. Matrix phylogeny. Examples of numerical linear algebra in machine learning.

MATH 4175. Mathematical Foundations of Optimization. (3) Prerequisite(s): ITSC 1212, MATH 2164, and MATH 2241. Cross-listed Course(s): MATH 5175. Introduces the mathematical foundation of optimization problems. The covered topics include basic elements of optimization theory and focus on unconstrained and constrained nonlinear optimization. Both mathematical analysis and coding skill training will be offered in this course.

MATH 4181. Introduction to Topology. (3) Prerequisite(s): MATH 2164 with grade of C and MATH 2167. Topics from set theory and point set topology such as cardinality, order, topological spaces, metric spaces, separation axioms, compactness and connectedness.

MATH 4228. Life Insurance Mathematics. (3) Cross-Listed Course(s): MATH 5228. Prerequisite(s): MATH 3122 or STAT 3122; and MATH 3228; or permission of department. Introduction to long-term insurance; survival distribution models, estimating mortality rates, long-term insurance coverages, annuities, premiums, and reserves.

MATH 4229. Advanced Life Insurance Mathematics. (3) Cross-Listed Course(s): MATH 5229. Prerequisite(s): MATH 4228 with grade of C or above, or permission of the department. Advanced Long-Term Insurance; multiple state mortality - Markov Chains, multiple decrements probabilities and insurance, multiple lives probabilities and insurance, pension plans and retirement benefits, profit testing.

MATH 4691. Seminar I in Mathematics and Statistics. (1 to 3) Cross-listed Course(s): MATH 5691. Prerequisite(s): Permission of department. Individual or group investigation and exposition of selected topics in mathematics. *Graded on a Pass/No Credit basis. May be repeated for credit with change of topic.*

MATH 4692. Seminar II in Mathematics and Statistics. (1 to 3) Cross-listed Course(s): MATH 5692. Prerequisite(s): Permission of department. A continuation of MATH 4691. *Graded on a Pass/No Credit basis. May be repeated for credit with change of topic.*

Modern Greek (MDGK)

MDGK 1201. Elementary Modern Greek I. (4) Fundamentals of the Modern Greek language, including speaking, listening comprehension, reading, and writing.

MDGK 1202. Elementary Modern Greek II. (4) Prerequisite(s): MDGK 1201 or permission of department. Fundamentals of the Modern Greek language, including speaking, listening comprehension, reading, and writing.

Middle Grades Education (MDLG)

MDLG 3130. The Early Adolescent Learner. (3) Prerequisite(s): MDSK 2100 and admission to Teacher Education. Physical, sexual, social, cognitive, and emotional development in the 10- to 15-year-old with emphasis on how these developmental diversities affect the middle grades classroom. Includes 30 hours of clinical field experiences.

MDLG 3131. The Philosophy and Curriculum of Middle Grades Education. (3) Prerequisite(s): MDLG 3130, MDSK 3100, MDSK 3151, and **MDSK 4210. Classroom Leadership.** (2) Overview of education in the middle grades (6 to 9) with emphasis on the foundational components, organizational patterns, instructional programs, and integrated curriculum unique to the middle school. Includes 30 hours field experiences.

MDLG 3800. Individual Study in Middle Grades Education. (1 to 3) Prerequisite(s): Permission of the student's advisor. Independent study under the supervision of an appropriate faculty member. *May be repeated for credit.*

MDLG 4440. Student Teaching/Seminar: 6-9 Middle Grades Education. (15) Prerequisite(s): Completion of all coursework, and departmental approval of an application for Student Teaching. Student teaching is a planned sequence of experiences in the student's area of specialization conducted in an approved school setting under the supervision and coordination of a university supervisor and a clinical educator. During student teaching, the student must demonstrate the competencies identified for their specific teaching field in an appropriate grade level setting. The student is assigned 15 weeks in a school setting. Includes seminars. Participating students pay a course registration fee for edTPA portfolio assessment. *Graded on a Pass/No Credit basis.*

Middle, Secondary, and K-12 Education (MDSK)

MDSK 2100. Foundations of Education in Secondary Schools. (3) An introduction to the field of education and teaching at the high school level. Provides students with an introduction to education including social, historical, and philosophical foundations and also examines current organizational structures of schools, school reforms issues, and the roles and responsibilities of high school teachers. In addition to the course, a minimum of 12 hours of clinical observation at a high school is required. This course serves as the prerequisite for students seeking the Minor in Secondary Education.

MDSK 3100. The Connected Classroom. (3) Teacher education candidates analyze the complex ecology of the modern classroom in order to create a learning environment that establishes and connects student success and well-being. The course shares research-based strategies to address the academic and emotional needs of students from a variety of backgrounds. Additionally, the course introduces issues, policies, and strategies for modifying standard instruction for students with disabilities and those identified as gifted.

MDSK 3151. Instructional Design and Technology Integration. (3) Introduction to the systematic process of planning for effective instruction, assessment, technology integration, and classroom leadership. Clinical experience required.

MDSK 3252. Differentiating Instruction for Adolescent Learners. (3) Prerequisite(s): MDSK 3151. This course prepares candidates to analyze and evaluate differentiated instructional strategies. Candidates will also apply their understanding of differentiated instruction by developing lesson plans that are responsive to student readiness, interest, and learning profile.

MDSK 4101. Assessment of Middle Grades and Secondary School Learners in Science. (2) Cross-listed Course(s): MDSK 5101. Prerequisite(s): MDSK 3100, MDSK 3151, and MDSK 4210. Pre- or Corequisite(s): MDSK 4100L and MDSK 4251. For current and future teachers of middle grades and secondary schools to develop multiple criteria assessment models and to master other competencies prescribed by the State of North Carolina. Provides a foundation in the understanding of authentic assessment and its application in middle and secondary school science classrooms.

MDSK 4102. Assessment of Secondary School Learners in Mathematics. (2) Cross-listed Course(s): MDSK 5102. Prerequisite(s): MDSK 3100; MDSK 3151; MDSK 4210; and MDLG 3130 or SECD 4140. Pre- or Corequisite(s): MAED 4252 and MDSK 4100L. Designed to foster Secondary Mathematics Education teacher candidates' knowledge of and skills for creating and implementing equitable assessments in K-12 classrooms. Learning modules provide an overview of the major principles involved in mathematics assessment, focusing on both theoretical and practical issues. Students practice creating/adapting, administering, and/or scoring both formative and summative assessments. Students take into account issues of equity and cultural relevance in this work. They also practice analyzing data from such assessments, making instructional decisions based on those data, and providing student feedback.

MDSK 4103. Assessment in Teaching Middle and Secondary Social Studies. (2) Cross-listed Course(s): MDSK 5103. Prerequisite(s): MDSK 3100; MDSK 3151; MDSK 4210; and MDLG 3130 or SECD 4140. Pre- or Corequisite(s): MDSK 4100L and MDSK 4253. Prepares middle and secondary social studies teachers to plan and implement formal and informal assessments. Encompasses both authentic assessment and more traditional evaluation forms.

MDSK 4104. Assessment in Teaching K-12 English. (2) Cross-listed Course(s): MDSK 5104. Prerequisite(s): MDSK 3100; MDSK 3151; MDSK 4210; MDLG 3130 or SECD 4140; and permission of department. Corequisite(s): ENGL 4254 and MDSK 4100L. Supports current and future English Language Arts teachers as they critically analyze and develop appropriate and diverse assessments for learners. Approaches assessment as a method to support students' literacy development, with particular attention to the ways that assessment should align with and extend students' cultural and learning differences. Examines the alignment across standards and assessment methods and supports students in understanding the ways that assessment data can be analyzed and used to inform future teaching and lesson planning. Students consider how they can engage learners in the assessment process to encourage learners to take responsibility for and ownership over their own learning.

MDSK 4150. Assessment, Reflection, and Management Practices. (3) Corequisite(s): For Middle Grades major - : MDLG 4440; For Secondary Education minor - SECD 4451, SECD 4452, SECD 4453, or SECD 4454. In addition to receiving edTPA support, teacher candidates are familiarized with concepts, methods, and practices used by effective teachers in their daily classroom routine, including assessment, reflection, classroom and behavior management. Course may be taught on site at a Professional Development School. Includes 30 hours of field experiences.

MDSK 4210. Classroom Leadership. (2) Prerequisite(s): Middle Grades Education major or Secondary Education minor. Emphasizes strategies and forms of classroom management and leadership that establish positive, productive, and equitable classroom environments for middle grades and secondary students. Consists of a clinical site visit to a local school.

MDSK 4251. Teaching Science to Middle and Secondary School Learners. (3) Cross-listed Course(s): MDSK 5251. Prerequisite(s): MDSK 3100; MDSK 3151; MDSK 4210; and MDLG 3130 OR SECD 4140. Corequisite(s): MDSK 4100L. Should be taken semester prior to student teaching. Preparation to teach science at the middle and secondary school levels with emphasis on a holistic, interdisciplinary understanding of science; science as related to everyday life and society; and interdisciplinary aspects of science. Includes 30 hours of field experiences.

MDSK 4253. Teaching Social Studies to Middle and Secondary School Learners. (3) (SL) Cross-listed Course(s): MDSK 5253. Prerequisite(s): MDSK 3100; MDSK 3151; MDSK 4210; and MDLG 3130 OR SECD 4140. Corequisite(s): MDSK 4100L. Should be taken semester prior to student teaching. A methods course for teaching social studies at the middle and secondary school levels. Emphasis on using social science content to develop effective teaching strategies, instructional plans, and classroom materials for teaching social studies to middle and secondary school students. Includes 30 hours of field experiences.

MDSK 4300. Content Area Instruction and Assessment. (3) Cross-listed Course(s): MDSK 5300. Prerequisite(s): MDSK 3151. Prepares candidates to plan and implement formal and informal assessments. Learning modules provide opportunities to learn the major principles of various types of assessments; evaluate assessments for curriculum alignment and learning; evaluate assessments for bias; and develop and implement assessment in order to interpret K-12 content knowledge and provide student feedback and make future instructional decisions. This course also provides exposure to the continued modeling of evidence-validated practices, the rehearsal of instructional tasks, and numerous opportunities for feedback on pedagogical decision-making within the content area. *May be repeated for credit one time.*

Mechanical Engineering (MEGR)

MEGR 0699. MEES Transfer Success. (1) Prerequisite(s): Mechanical Engineering major. This course is designed to facilitate the successful transition of new transfer students into the B.S. in Mechanical Engineering degree program and the UNC Charlotte community. Students build a repertoire of strategies and resources as they connect with the campus community, including their advisor, faculty, staff, and students. *This course will not replace credit that is required for any other course in the MEES curriculum. Graded on a Pass/Unsatisfactory basis.*

MEGR 1100. Foundations of Math and Science for Engineers. (4) Prerequisite(s): Mechanical Engineering major. Pre- or Corequisite(s): ENGR 1201. The study of foundational math and science, including vectors, vector algebra, derivatives, units, Newton's laws, atomic structure, properties of matter, ideal gas law, chemical bonding, etc. Lectures and breakout practice/lab sessions.

MEGR 2090. Special Topics in Mechanical Engineering. (1 to 3) Prerequisite(s): Mechanical Engineering major. The special topics covered in each offering of the course serve to advance knowledge at the sophomore level. The content is determined by the instructor and number of credit hours. *May be repeated for credit with change of topic.*

MEGR 2141. Engineering Mechanics I. (3) Prerequisite(s): PHYS 2101 and MATH 1242 with grades of C or above; and Mechanical Engineering, Environmental Engineering or Civil Engineering major (MEGR, CEGR or ENVE). COx sections are for Civil Engineering or Environmental Engineering majors only. Introduces the principles of particle and rigid body mechanics with engineering applications; force systems and resultants; the equilibrium of particles and rigid bodies; friction; and properties of areas and volumes. Individual sections may be restricted to particular majors: -COx sections are for CEGR and ENVE; -00x sections are open to MEGR, CEGR, or ENVE.

MEGR 2144. Introduction to Solid Mechanics. (3) Prerequisite(s): MEGR 2141 with grade of C or above; and Mechanical Engineering or Civil Engineering major (C sections are for Civil Engineering majors only). Engineering theory of deformable solids and applications. Stress and deformation resulting from axial, torsion and bending loads. Shear and moment diagrams, Mohr's circle for stress and strain and buckling of columns.

MEGR 2152. CAD for Mechanical Engineers. (1) Prerequisite(s): ENGR 1303 with a grade of C or better; MEGR major. Treatment of design visualization and computer-aided design with an emphasis on design presentation skills. This course requires a grade of C or better for the Mechanical Engineering curriculum.

MEGR 2156. Design Projects I Laboratory. (2) Prerequisite(s): ENGR 1201, ENGR 1202, and MEGR 2141, all with grades of C or above; and Engineering major or minor. Corequisite(s): MEGR 2180. Introduction to design, as well as the fundamentals of manufacturing, including lathe and mill work. Emphasis on design visualization, functional analysis, communication, and computer-aided design. Students manufacture a design which then is verified for precision and accuracy.

MEGR 2157. Design Projects I Laboratory. (3) Prerequisite(s): ENGR 1300, MEGR 2141 and MEGR 2152, all with grades of C or better; MEGR major. Co-requisite Course(s): MEGR 2180. Introduction to mechanical engineering design with a focus on applying engineering principles to real-world challenges. Students will use engineering models and computer-aided design (CAD) to develop solutions tailored to specific applications. Emphasis is placed on analyzing and optimizing designs, selecting appropriate engineering materials, and effectively communicating solutions through engineering drawings and reports. The course integrates theory with application-based problem-solving, preparing students to address complex design issues across various engineering disciplines. This course requires a grade of C or better for the Mechanical Engineering curriculum.

MEGR 2173. Mechatronics I. (2) Prerequisite(s): ENGR 1302 and PHYS 2102 with grades of C or better; MEGR major. Co-requisite Course(s): MEGR 2174. Fundamentals of mechatronic systems, including basic electrical components, sensors, actuators, circuit analysis, data acquisition, and programming a microcontroller. This course requires a grade of C or better for the Mechanical Engineering curriculum.

MEGR 2174. Mechatronics I Projects Laboratory. (1) Prerequisite(s): PHYS 2102L with a grade of C or better; MEGR major. Co-requisite Course(s): MEGR 2173. Hands-on assembly, programming, diagnostics, and analysis of mechatronic and measurement systems through a series of projects complementing course material of MEGR 2173. This course requires a grade of C or better for the Mechanical Engineering curriculum.

MEGR 2180. Manufacturing Systems. (3) Prerequisite(s): MEGR 2141 with a grade of C or above; Engineering major or minor. Pre- or Corequisite Course(s): MEGR 2156 or MEGR 2157. A broad overview of manufacturing materials, processes, and procedures. Topics include: mechanical behavior and physical properties, basic materials, casting, rolling, forming, welding, cutting, surfaces, engineering metrology, quality assurance, and automation. Basic concepts of engineering economics and cost estimating.

MEGR 2233. Math and Science for Engineers II. (3) Prerequisite(s): ENGR 1301 and MATH 1241 with grades of C or better; MEGR major. A course that includes concepts in chemistry and linear algebra for Mechanical Engineers. Topics include chemical bonding, crystal structure, introduction to electrochemistry, linear systems, matrix algebra, eigenvalues, and eigenvectors. This course requires a grade of C or better for the Mechanical Engineering curriculum.

MEGR 2234. Math and Science for Engineers III. (4) Prerequisite(s): MATH 2171 and MEGR 2233 with grades of C or better; MEGR major. Topics include integral transforms, Fourier series, probability distributions, descriptive statistics, and regression. This course requires a grade of C or better for the Mechanical Engineering curriculum.

MEGR 2240. Computational Methods for Engineers. (3) Prerequisite(s): MEGR 2141 and Engineering major or minor. Automated engineering analysis and synthesis techniques based on software engineering principles. Overview of data representation and computing languages. Program development using programming languages and off-the shelf software packages. Study of numerical methods, potential errors, and computational stability. emphasis on effective design, testing, and debugging practices.

MEGR 2242. Computational Methods for Engineers. (2) Prerequisite(s): Automated engineering analysis and synthesis techniques based on software engineering principles. Overview of data representation and computing languages. Program development using programming languages and off-the-shelf software packages. Study of numerical methods, potential errors, and computational stability. Emphasis on effective design, testing, and debugging practices. This course requires a grade of C or better for the Mechanical Engineering curriculum.

MEGR 2279. Introduction to Biomedical Engineering. (1) Prerequisite(s): Admission to BSME Biomedical Engineering concentration and GPA of 3.0 or above. An examination of various aspects of Biomedical Engineering.

MEGR 2289. Introduction to Precision Engineering and Metrology. (1) Prerequisite(s): MEGR 2141 with a grade of C or above; Admission into the Precision Engineering and Metrology concentration. An examination of various aspects of precision engineering and metrology presented by faculty and industry representatives. There will be a series of demonstrations and experiments focused on precision metrology equipment.

MEGR 2299. Introduction to Motorsports Engineering. (1) Prerequisite(s): Admission to BSME Motorsports concentration (MSEN). The goal of this course is to familiarize students with the subjects they will study in further depth in their plan of study for the motorsports engineering concentration. Students will also be introduced to the Kulwicki Motorsports Laboratory, and will be instructed in and given the chance to practice good working habits in a motorsports workshop environment.

MEGR 2319. Introduction to Aerospace Engineering. (1) Prerequisite(s): MEGR 2141 with a C or better; Admission to the BSME concentration in Aerospace Engineering; MEGR major. An examination of various aspects of aerospace engineering presented by faculty.

MEGR 2499. Introduction to Energy Engineering. (1) Prerequisite(s): Admission to BSME Energy concentration, Sophomore, Junior, or Senior standing, and a GPA of 3.0 or above. An examination of various aspects of energy engineering.

MEGR 2699. MEES Seminar. (1) Prerequisite(s): Mechanical Engineering major. Students attend presentations given by Mechanical Engineering and Engineering Science (MEES) graduate students,

external researchers, and MEES faculty on current research in Mechanical Engineering and related fields. *This course will not replace credit that is required for any other course in the MEES curriculum. Graded on a Pass/Unsatisfactory basis. May be repeated for credit.*

MEGR 3021. Special Topics in Aerospace Engineering. (2) Prerequisite(s): MEGR 2319 and MEGR major. Builds upon and synthesizes the knowledge that the students have gained from the mechanical engineering core curriculum. The specific topics covered in each separate offering of the course will broaden and deepen students' knowledge in area of aerospace engineering. *May be repeated for credit with change of topic.*

MEGR 3022. Special Topics in Motorsports Engineering. (2) Prerequisite(s): MEGR 2299 and MEGR major. Builds upon and synthesizes the knowledge that the students have gained from the mechanical engineering core curriculum. The specific topics covered in each separate offering of the course will broaden and deepen students' knowledge in area of motorsports engineering. *May be repeated for credit with change of topic.*

MEGR 3024. Special Topics in Energy Engineering. (2) Prerequisite(s): MEGR 2499 and MEGR major. Builds upon and synthesizes the knowledge that the students have gained from the mechanical engineering core curriculum. The specific topics covered in each separate offering of the course will broaden and deepen students' knowledge in area of Energy engineering. *May be repeated for credit with change of topic.*

MEGR 3027. Special Topics in Biomedical Engineering. (2) Prerequisite(s): MEGR 2279 and MEGR major. Builds upon and synthesizes the knowledge that the students have gained from the mechanical engineering core curriculum. The specific topics covered in each separate offering of the course will broaden and deepen students' knowledge in area of Biomedical engineering. *May be repeated for credit with change of topic.*

MEGR 3028. Special Topics in Precision Engineering. (2) Prerequisite(s): MEGR 2289 and MEGR major. Builds upon and synthesizes the knowledge that the students have gained from the mechanical engineering core curriculum. The specific topics covered in each separate offering of the course will broaden and deepen students' knowledge in area of Precision engineering and Metrology. *May be repeated for credit with change of topic.*

MEGR 3090. Special Topics in Mechanical Engineering. (3) Prerequisite(s): Mechanical Engineering major or permission of department; Junior standing or higher. *Technical Elective.* Builds upon and synthesizes the knowledge the students have gained from the mechanical engineering core curriculum. The specific topics covered in each separate offering of the course serve as the vehicle for teaching engineering analysis, synthesis and design, while simultaneously affording an opportunity for the students to point themselves toward an area of specialization. *May be repeated for credit with change of topic.*

MEGR 3092. Special Topics in Motorsports Engineering. (3) Prerequisite(s): Mechanical Engineering major; Junior standing or higher. *Technical Elective.* Builds upon and synthesizes the knowledge the students have gained from the mechanical engineering core curriculum. The specific topics covered in each separate offering of the course serve as the vehicle for teaching engineering analysis, synthesis

and design, while simultaneously affording an opportunity for the students to point themselves toward an area of specialization. *May be repeated for credit with change of topic.*

MEGR 3094. Special Topics in Energy Engineering. (3) Prerequisite(s): Mechanical Engineering major; Junior standing or higher. *Technical Elective.* Builds upon and synthesizes the knowledge the students have gained from the mechanical engineering core curriculum. The specific topics covered in each separate offering of the course serve as the vehicle for teaching engineering analysis, synthesis and design, while simultaneously affording an opportunity for the students to point themselves toward an area of specialization. *May be repeated for credit with change of topic.*

MEGR 3097. Special Topics in Biomedical Engineering. (3) Prerequisite(s): Mechanical Engineering major; Junior standing or higher. *Technical Elective.* Builds upon and synthesizes the knowledge students have gained from the Mechanical Engineering core curriculum. The specific topics covered in each separate offering of the course serve as the vehicle for teaching engineering analysis, synthesis and/or design, while simultaneously affording an opportunity for the students to point themselves toward the area of specialization of Biomedical Engineering. *May be repeated for credit with change of topic.*

MEGR 3111. Thermodynamics I. (3) Prerequisite(s): MATH 1242 and PHYS 2101 with grades of C or above; and MEGR major, CEGR major, ENVE major, EEGR major, or SEGR major. First and second laws of thermodynamics. Work and heat carnot cycle. Ideal and real gases. Non-reactive mixture of gases. Availability and irreversibility.

MEGR 3112. Thermodynamics II. (3) Prerequisite(s): MEGR 3111 with grade of C or above; and Engineering major or minor. General thermodynamic relations; equations of state and generalized charts. Combustion, dissociation, and chemical equilibrium. Introduction to power cycles.

MEGR 3114. Fluid Mechanics. (3) Prerequisite(s): MATH 2241 and MEGR 3121 with grades of C or above; and Engineering major or minor. Basic concepts of a fluid and the fundamentals of ideal and real fluid flow. Topics include: fluid statics, conservation principles, Bernoulli's equation, fluid flow in pipes, and measurement devices.

MEGR 3116. Introduction to Heat Transfer. (3) Prerequisite(s): MATH 2171 and MEGR 3111 with grades of C or above; and Engineering major or minor. Pre- or Corequisite(s): MEGR 3114. One and two dimensional steady state conduction. Finite difference methods. Radiative heat transfer, emissivity, black body radiation. Heat exchange among two and multi-body systems. Introduction to concepts and applications of convective heat transfer.

MEGR 3121. Dynamics Systems I. (3) Prerequisite(s): MEGR 2141 and MATH 1242 with grades of C or above; and Engineering major or minor. The kinematics and kinetics of rigid bodies. Work-energy and impulse-momentum principles and conservation laws. Introduction to the kinematics of mechanisms.

MEGR 3122. Dynamic Systems II. (3) Prerequisite(s): MEGR 2240, MEGR 3121, and MATH 2171 with grades of C or above; and Engineering major or minor. Modeling of mechanical dynamic systems. Vibration of

lumped mass systems. Analysis and design of mechanical systems using time domain and frequency domain methods.

MEGR 3123. Dynamic Systems II. (2) Prerequisite(s): MEGR 2234, MEGR 2242, and MEGR 3121, all with grades of C or better; MEGR major. Modeling of mechanical dynamic systems. Analysis and design of mechanical systems using time domain and frequency domain methods.

MEGR 3152. Mechanics and Materials Laboratory. (2) Prerequisite(s): MEGR 2144, with a grade of C or above; and MEGR 3171L or MEGR 3174 with a grade of C or above; and Engineering major or minor. Co-requisite Course(s): MEGR 3161. Laboratory experiments related to the areas of mechanics and materials engineering. Three hours of laboratory work per week.

MEGR 3156. Design Projects Lab II. (2) Prerequisite(s): MEGR 2144 and MEGR 2180; MEGR 2156 or MEGR 2157; ECGR 2161 or MEGR 2173 and MEGR 2174, all with a grade of C or above; and Engineering major or minor. Study of the process of design and reduction to practice of engineering concepts in a team environment. Requirements definition, concept synthesis, concept of evaluation, project planning and execution.

MEGR 3161. Introduction to Engineering Materials. (3) Prerequisite(s): MEGR 2144 and CHEM 1251 or MEGR 1100 or MEGR 2233, with grades of C or above; and Engineering major or minor. Classifications of engineering materials. Introduction to property structure relationships. Ideal and defect atomic structures of solids with examples from metals, ceramics and polymers. Cold working and annealing effects. Phase equilibria in alloys; introduction to diffusional processes and transformation kinetics.

MEGR 3162. Mechanical Behavior and Strengthening of Solids. (3) Prerequisite(s): MEGR 3161 with grade of C or above; and Engineering major or minor. *Technical Elective*. Mechanical properties of materials including elastic behavior, plastic flow, fracture, creep, fatigue, and elevated temperature effects. Correlation of properties with atomic and microscopic structure. Dislocation theory and its application to mechanical behavior and strengthening mechanisms. Alloy hardening effects; effects of processing and heat treatments. Applications in Fe-C alloys.

MEGR 3171. Introduction to Measurements and Instrumentation. (2) Prerequisite(s): ECGR 2161 and MATH 2241 with grades of C or above; and Engineering major or minor. Corequisite(s): MEGR 3171L. Statistical analysis of experimental data, curve fitting. Operational amplifiers and signal conditioning techniques for remote monitoring. Discussion of the principles involved in the use of sensors and transducers in measurements of linear and angular displacement, velocity and acceleration, temperature, force, pressure, torque and flow. Introduction to dynamic measurements and frequency analysis.

MEGR 3171L. Instrumentation Laboratory. (2) Prerequisite(s): PHYS 2102L with grade of C or above; and Engineering major or minor. Corequisite(s): MEGR 3171. Utilization of measuring equipment targeted to mechanical engineering applications. Experiments will focus on the use of instrumentation and computer interfacing methods for the optimization of measurement processes. Basic programming of scientific instruments.

MEGR 3173. Mechatronics II. (2) Prerequisite(s): MEGR 2173 with a grade of C or better; MEGR major. Co-requisite Course(s): MEGR 3174. Fundamentals of mechatronic systems, including concepts in system dynamics, advanced circuit analysis, signal conditioning, error analysis, control, communication, and programming. This course requires a grade of C or better for the Mechanical Engineering curriculum.

MEGR 3174. Mechatronics II Projects Laboratory. (1) Prerequisite(s): MEGR 2174 with a grade of C or better; MEGR major. Co-requisite Course(s): MEGR 3173. Hands-on assembly, programming, diagnostics, and analysis of mechatronic and measurement systems through a series of projects complementing course material of MEGR 3173. This course requires a grade of C or better for the Mechanical Engineering curriculum.

MEGR 3210. Automotive Power Plants. (3) Prerequisite(s): MEGR 3112 with grade of C or above; and Engineering major or minor. *Technical Elective*. Energy analysis of internal and external combustion engines for vehicular propulsion. Thermodynamic principles for combustion efficient use of fuel combustion, different types of fuel use, and pollutant control.

MEGR 3211. Road Vehicle Dynamics. (3) Prerequisite(s): MEGR 3122 with grade of C or above; and Engineering major or minor. *Technical Elective*. An introduction to road vehicle Dynamics. Acceleration and braking performance, road loads, steady-state cornering, suspension, steering system and tire behavior.

MEGR 3214. Refrigeration and Air/Conditioning. (3) Prerequisite(s): MEGR 3112 and 3116 with grades of C or above; and Engineering major or minor. *Technical Elective*. Thermodynamics and heat transfer applied to analysis, design of cooling/heating systems.

MEGR 3216. Thermal/Fluid Design. (3) Prerequisite(s): MEGR 3112, MEGR 3114, and MEGR 3116 with grades of C or above; and Engineering major or minor. Design of systems utilizing thermodynamic, heat transfer, and fluid flow principles. Topics include: thermal system design, thermodynamic modeling, design applications with heat transfer, thermo-economic optimization of simple and complex systems.

MEGR 3221. Machine Analysis and Design I. (3) Prerequisite(s): MEGR 3121 and MEGR 2144 with grades of C or above; and Engineering major or minor. Technical application of basic principles of mechanical science to analysis of machines and mechanical systems. Design of typical machine elements. Strength and deflection requirements.

MEGR 3225. Introduction to Finite Element Analysis. (3) Prerequisite(s): MATH 2171, MEGR 2144, and either MEGR 2240 or MEGR 2242 with grades of C or above; and Engineering major or minor. *Technical Elective*. The basic concepts of finite element analysis (FEA) are introduced. The necessary concepts from linear algebra are reviewed. Simple elements such as truss and beam elements are emphasized, with an introduction to continuum elements for structural analysis. Introduction to heat transfer elements for steady state conduction and convection. Mathematics software is used to illustrate such concepts as the finite element assembly process, and the solution of the primary unknowns. A commercially available finite element code is also introduced.

MEGR 3231. Advanced CAD/CAM. (3) Prerequisite(s): MEGR 2156 or MEGR 2157 with a grade of C or above; and Engineering major or minor. *Technical Elective.* An introduction to advanced CAD modeling techniques, reverse engineering and Rapid technologies with a detailed application of these tools in engineering design.

MEGR 3232. Plastic Part Design. (3) Prerequisite(s): or MEGR 2157 with a grade of C or above; and Engineering major or minor. *Technical/Elective.* An introduction to the science and technology of polymer materials and processes with an emphasis on the application of these topics to engineering design.

MEGR 3233. Introduction to Biomaterials. (3) Prerequisite(s): MEGR 3161 with grade of C or above; and Engineering major or minor. *Technical/Elective.* An introduction to biomaterials science and engineering, focusing on traditional classes of materials used for biomedical applications (i.e., metals, ceramics, polymers, and composites).

MEGR 3234. Introduction to Biodynamics. (3) Prerequisite(s): MEGR 2144 with grade of C or above; and Engineering major or minor. *Technical/Elective.* Introduces dynamic analysis of the human musculoskeletal system. Students learn to develop lumped mass, planar rigid body and 3D rigid body models of human movement, and to learn to calculate internal forces in muscles and joints during daily and sports activities.

MEGR 3235. Waves and Optics. (3) Prerequisite(s): MATH 2171 and MEGR 3122 with grades of C or above; and Engineering major or minor. *Technical/Elective.* An introductory study of optics covering geometrical optics, optical instruments, wave optics (interference and diffraction), Fourier analysis, and polarization.

MEGR 3236. Introduction to Nanoscale Science and Engineering. (3) Prerequisite(s): MEGR 3161 with a grade of C or above; and Engineering major or minor. *Technical/Elective.* Introduction to nanoscale science and engineering. Topics include: nanomanufacturing, nanomaterials and nanostructures, nanomechanics, experiments with nano-instruments, and related environmental issues.

MEGR 3237. Introduction to Control Systems. (3) Prerequisite(s): MEGR 3122 with grade of C or above. *Technical/Elective.* Treatment of the theoretical and practical foundations for the design of automatic control systems; control-oriented modeling, idealized time-domain control design and real-world frequency-domain design techniques that can be used to address practical issues of environmental disturbances, model uncertainty, sensor imperfections, communication delays, and actuator dynamics.

MEGR 3238. Microscopy for Engineering. (3) Prerequisite(s): MEGR 3161 with a grade of C or above. *Technical/elective.* Theory and practical experience in microscopic techniques including optical microscopy and SEM; applications of microscopic techniques in engineering fields, such as morphology of microstructures, analysis of compositions, crystal structure determination, and sample preparation.

MEGR 3240. Advanced Automotive Powerplants. (3) Prerequisite(s): MEGR 3210 with a grade of C or above. *Technical/Elective.* This is a follow-up course to MEGR 3210. Topics include: engine power parameters, race engine design considerations, advanced engine cycles, component design, and fuel delivery/control strategies.

MEGR 3241. Advanced Motorsports Instrumentation. (3) Prerequisite(s): MEGR 3171 with grade of C or above; and Engineering major or minor. *Technical/Elective.* Instruction in data acquisition and analysis techniques as applied in a motorsports setting. A survey of current industry hardware standards including sensors, wiring, logging and display units. Wiring harness construction and installation methods. Analysis of acquired data using industry standard data analysis software. Emphasis on application in race car design and operation contexts.

MEGR 3242. Applied Vehicle Aerodynamics. (3) Prerequisite(s): MEGR 2240, MEGR 3111, and MEGR 3114, all with grade of C or above; and Engineering major or minor. *Technical/Elective.* Flow of air around streamlined and bluff bodies, aerodynamic forces, understanding flow separation and reattachments, aerodynamic tools, introduction to computational fluid dynamics, use of commercial CFD packages to solve fluid flow problems, computer simulation and analysis of flow around bluff bodies and road vehicles including racecars.

MEGR 3244. Tire Mechanics. (3) Prerequisite(s): MEGR 2144 with a grade of C or above. Pre- or Corequisite(s): MEGR 3121. *Technical/Elective.* In-depth analysis of the tire and its influence on vehicle performance, including: design, materials, construction, structural response, rolling resistance, force and moment generation, NVH, wet and dry traction, wear, high speed limit, and standards. Tire models, their limitations, and their governing equations.

MEGR 3245. Advanced Experimental Methods. (3) Prerequisite(s): Engineering major and ECGR 2161 with grade of C or above. *Technical/Elective.* Incorporates lectures, research, and experimental labs relating to jet propulsion, rockets, underwater propulsion, high-speed vehicles, etc. Labs involve configuring instrumentation and data acquisition as well as analysis of data collected during experiments.

MEGR 3251. Thermal/Fluids Laboratory. (2) Prerequisite(s): MEGR 3111, MEGR 3114, and MEGR 3171L, all with grades of C or above; and Engineering major or minor. Laboratory experiments related to the areas of thermodynamics, fluid mechanics, and heat transfer. Three hours of laboratory work per week.

MEGR 3255. Senior Design I. (2) Prerequisite(s): MEGR 3111, MEGR 3114, MEGR 3161, MEGR 3171L or MEGR 3174, and MEGR 3156, all with a grade of C or better; and Engineering major or minor. Pre- or Corequisite(s): MEGR 3152 and MEGR 3251. First of a two-semester sequence leading to a major integrative experience in applying the principles of design and project management to the design of a major mechanical engineering system. Teamwork and communication skills are emphasized.

MEGR 3256. Senior Design II. (2) Prerequisite(s): MEGR 3255 and Engineering major or minor. A continuation of MEGR 3255 including project execution leading to an oral presentation and final written report.

MEGR 3260. Clean Coal Technology. (3) Prerequisite(s): MEGR 3112 and MEGR 3114 with grades of C or above. Pre- or Corequisite(s): MEGR 3116. *Technical/Elective.* A treatment of conventional and high-efficiency low-emissions (HELE) coal-based energy conversion technologies, principles of coal combustion and gasification, pollutant formation and its effects on the environment, emissions regulations, and options for pollution control of existing and newly-constructed power plants.

MEGR 3261. Sustainable Energy. (3) Pre- or Corequisite(s): MEGR 3112. *Technical Elective.* A treatment of global energy challenges, current energy usage, energy carriers, environmental impacts, future energy usage, transitions in energy usage and societal changes, and energy conversion technologies.

MEGR 3262. Turbomachinery. (3) Prerequisite(s): MEGR 3112 and MEGR 3114 with grades of C or above. Pre- or Corequisite(s): MEGR 3116. *Technical Elective.* A treatment of the types, uses, and principles of operation of turbomachines; usage of fluid mechanics, thermodynamics and a blend of additional theory and applications for the selection, specification, and use of turbomachines.

MEGR 3270. Biomedical Fluidics: Microfluidics. (3) Prerequisite(s): MEGR 3114, MEGR 2279, BIOL 3111, or CHEM 4165 with grade of C or above. *Technical Elective.* Exploration of micro/nanotechnology, microfluidics, and biomedical applications; design, analysis, manufacture, and use of microfluidic platforms; brain cell culturing; manipulation of cellular microenvironments in microfluidic platforms.

MEGR 3271. Biomedical Manufacturing: 3D Biofabrication. (3) Prerequisite(s): MEGR 2156, MEGR 2180, or MEGR 2279 with grade of C or above. Technical Elective. 3D biofabrication technologies, including 3D printing and its impact on health challenges including the regeneration of tissue, bones, and organs; application of computer-aided design software; 3D fabrication of non-biomaterials; brain cell culturing and 3D fabrication of biomaterials.

MEGR 3272. Introduction to Bio-Polymers and Composites. (3) Prerequisite(s): MEGR 3161 with a grade of C or above. *Technical elective.* Addresses the basics of polymer science and engineering and correlation between structural parameters and properties of the polymers including mechanical and biocompatibility properties. Examples of medical devices made of polymers and used to fix artificial joints or augment tissue are discussed.

MEGR 3275. Biomedical Engineering Senior Design I. (2) Prerequisite(s): Admission to BSME Biomedical Engineering concentration; MEGR 2279, MEGR 3111, MEGR 3114, MEGR 3161, MEGR 3171L or MEGR 3174, and MEGR 3156, all with a grade of C or better. Pre- or Corequisite(s): MEGR 3152 and MEGR 3251. First of a two-semester sequence leading to a major integrative experience in applying the principles of design and project management to the design of a biomedical engineering system or the solution of a biomedical engineering problem. Teamwork and communication skills are emphasized.

MEGR 3276. Biomedical Engineering Senior Design II. (2) Prerequisite(s): Admission to BSME Biomedical Engineering concentration and MEGR 3275. A continuation of MEGR 3275, including project execution, project reporting, and leading to an oral presentation and a final written report.

MEGR 3282. Statistical Process Control and Metrology. (3) Prerequisite(s): MEGR 2180 with grade of C or above; and Engineering major or minor. *Technical Elective.* Introduction to metrology. Measurement of size, form and surface texture. Introduction to quality control, control charts for attributes and variables, acceptance sampling. Process capability estimation and process control.

MEGR 3283. Metrology and Precision Engineering. (3) Prerequisite(s): MEGR 2180 with a grade of C or above. Principles of precision design and their use in manufacturing and measurement; review of metrology and uncertainty, a case study of precision machine design, mechanical and optical methods of surface texture measurement, measurement of machine tool errors, coordinate metrology and its applications, and the role of vibration analysis in machine design.

MEGR 3285. Precision Senior Design I. (2) Prerequisite(s): MEGR 2289, MEGR 3111, MEGR 3114, MEGR 3161, MEGR 3171L or MEGR 3174, and MEGR 3156, all with a grade of C or better; Admission into the Precision Engineering and Metrology concentration. Pre- or Corequisite(s): MEGR 3152 and MEGR 3251. First of a two-semester sequence leading to a major integrative experience in applying the principles of design and project management to the design of a major mechanical engineering system with precision engineering / metrology emphases. Teamwork and communication skills are emphasized.

MEGR 3286. Precision Senior Design II. (2) Prerequisite(s): MEGR 3285; Admission into the Precision Engineering and Metrology concentration. Second of a two-semester sequence leading to a major integrative experience in applying the principles of design and project management to the design of a major mechanical engineering system with precision engineering / metrology emphases. Teamwork and communication skills are emphasized.

MEGR 3310. Flight Mechanics. (3) Prerequisite(s): MEGR 2141 with a grade of C or above; MEGR major. Fundamentals of atmospheric flight vehicle dynamics, performance, and stability analysis.

MEGR 3315. Aerospace Senior Design I. (2) Prerequisite(s): MEGR 2319, MEGR 3111, MEGR 3161, MEGR 3114, MEGR 3171L or MEGR 3174, and MEGR 3156, all with a grade of C or better; MEGR major. Pre- or Co-requisite Course(s): MEGR 3152 and MEGR 3251. First of a two-semester sequence leading to a major integrative experience in applying the principles of design and project management to the design of a major mechanical engineering system with aerospace engineering emphases. Teamwork and communication skills are emphasized.

MEGR 3316. Aerospace Senior Design II. (2) Prerequisite(s): MEGR 3315; MEGR major. Second of a two-semester sequence leading to a major integrative experience in applying the principles of design and project management to the design of a major mechanical engineering system with aerospace engineering emphases. Teamwork and communication skills are emphasized.

MEGR 3355. Motorsports Senior Design I. (2) Prerequisite(s): Admission to BSME Motorsports concentration; MEGR 2299, MEGR 3111, MEGR 3114, MEGR 3161, MEGR 3171L or MEGR 3174, and MEGR 3156, all with a grade of C or better. Pre- or Corequisite(s): MEGR 3152 and MEGR 3251. First of a two-semester sequence leading to a major integrative experience in applying the principles of design and project management to the design of an automotive engineering system. Teamwork and communication skills are emphasized. An examination of various aspects of automotive and motorsports engineering presented by faculty and industry representatives.

MEGR 3356. Motorsports Senior Design II. (2) Prerequisite(s): Admission to BSME Motorsports concentration and MEGR 3355. A

continuation of MEGR 3355 including project execution, project reporting and leading to an oral presentation and a final written report. An examination of various aspects of automotive and motorsports engineering presented by faculty and industry representatives.

MEGR 3451. Stationary Power Plant Systems. (3) Prerequisite(s): MEGR 3112, MEGR 3114, and MEGR 3116, all with grade of C or above; and Engineering major or minor. *Technical Elective*. Thermodynamics and heat transfer applied to the analysis and design of stationary power plant systems.

MEGR 3452. Introduction to Nuclear Engineering. (3) Prerequisite(s): MEGR 3112, MEGR 3114, and MEGR 3116, all with grade of C or above; and Engineering major or minor. *Technical Elective*. An introduction to the science and technology of nuclear engineering as applied to power plant operation and design.

MEGR 3455. Energy Senior Design I. (2) Prerequisite(s): Admission to BSME Energy concentration; MEGR 2499, MEGR 3111, MEGR 3114, MEGR 3161, MEGR 3171L or MEGR 3174, and MEGR 3156, all with a grade of C or better. Pre- or Corequisite(s): MEGR 3152 and MEGR 3251. First of a two-semester sequence leading to a major integrative experience in applying the principles of design and project management to the design of a major mechanical engineering system with energy/power emphases. Teamwork and communication skills are emphasized.

MEGR 3456. Energy Senior Design II. (2) Prerequisite(s): MEGR 3455 and Engineering major or minor. Second of a two-semester sequence leading to a major integrative experience in applying the principles of design and project management to the design of a major mechanical engineering system with energy/power emphases. Teamwork and communication skills are emphasized.

MEGR 3695. Mechanical Engineering Cooperative Education Seminar. (1) Prerequisite(s): ENGR 3500 and Engineering major or minor. Required of Co-op students during semesters immediately following each work assignment for presentation of engineering reports on work done the prior semester. *Graded on a Pass/No Credit basis. May be repeated for credit.*

MEGR 3890. Individualized Study. (1 to 3) Prerequisite(s): Engineering major or minor, and permission of department. Supervised individual study within an area of a student's particular interest which is beyond the scope of existing courses. *May be repeated for credit.*

MEGR 4090. Special Topics in Mechanical Engineering. (3) Prerequisite(s): Mechanical Engineering major; Junior standing or higher. Cross-listed Course(s): MEGR 5090. *Technical Elective*. Builds upon and synthesizes the knowledge that the students have gained from the mechanical engineering core curriculum. The specific topics covered in each separate offering of the course serve as the means for teaching engineering analysis, synthesis, and/or design. *May be repeated for credit with change of topic.*

MEGR 4091. Special Topics in Aerospace Engineering. (3) Prerequisite(s): MEGR major. Cross-listed Course(s): MEGR 5091. Builds upon and synthesizes the knowledge that the students have gained from the mechanical engineering core curriculum. The specific topics covered in each separate offering of the course will broaden and deepen students' knowledge in areas of aerospace engineering, including but not limited

to: aerospace propulsion, aerospace materials, aerospace structures, aerospace vehicle design, astromechanics, flight dynamics, and aerospace vehicle guidance, navigation, and control. *May be repeated for credit with change of topic.*

MEGR 4092. Special Topics in Motorsports Engineering. (3) Prerequisite (s): Mechanical Engineering major; Junior standing or higher. Cross-listed Course(s): MEGR 5092. *Technical Elective*. Builds upon and synthesizes the knowledge gained from the mechanical engineering core curriculum. The specific topics covered in each separate offering of the course serve as the means for teaching engineering analysis, synthesis, and/or design in topics that relate to Motorsports Engineering. *May be repeated for credit with change of topic.*

MEGR 4094. Special Topics in Energy Engineering. (3) Prerequisite (s): Mechanical Engineering major; Junior standing or higher. Cross-listed Course(s): MEGR 5094. *Technical Elective*. Builds upon and synthesizes the knowledge gained from the mechanical engineering core curriculum. The specific topics covered in each separate offering of the course serve as the means for teaching engineering analysis, synthesis, and/or design in topics that relate to Energy Engineering. *May be repeated for credit with change of topic.*

MEGR 4097. Special Topics in Biomedical Engineering. (3) Prerequisite (s): Mechanical Engineering major; Junior standing or higher. Cross-listed Course(s): MEGR 5097. *Technical Elective*. Builds upon and synthesizes the knowledge gained from the mechanical engineering core curriculum. The specific topics covered in each separate offering of the course serve as the means for teaching engineering analysis, synthesis, and/or design in topics in Biomedical Engineering. *May be repeated for credit with change of topic.*

MEGR 4098. Special Topics in Precision Engineering. (3) Prerequisite(s): Mechanical Engineering major; Junior standing or higher. Cross-listed Course(s): MEGR 5098. *Technical Elective*. Builds upon and synthesizes the knowledge that students have gained from the mechanical engineering core curriculum. The specific topics covered in each separate offering of the course serve as the means for teaching engineering analysis, synthesis, and/or design. *May be repeated for credit with change of topic.*

MEGR 4127. Introduction to Robotics. (3) Prerequisite(s): Senior standing and Mechanical Engineering major. *Technical/Elective*. Modeling of industrial robots, homogeneous transformations, static forces, kinematics, velocities, dynamics, computer animation of dynamic models, motion trajectory planning, and introduction to vision, sensors and actuators.

MEGR 4143. Discrete Mechanical Vibrating Systems. (3) Prerequisite(s): MEGR 3122 or MEGR 3123 with grade of C or above; and Engineering major or minor. *Technical Elective*. Free and forced vibrations of lumped parameter systems with multi-degrees of freedom. Topics include: transient and steady state response, determination of natural frequencies and mode shapes with and without damping. Introduction to principal coordinates and matrix iteration techniques.

MEGR 4210. Automotive Powerplants. (3) Prerequisite(s): Mechanical Engineering major and MEGR 3112 with grade of C or above. Cross-listed

Course(s): MEGR 5210. The engineering principles governing internal combustion engine theory, design, and applications.

MEGR 4211. Road Vehicle Dynamics. (3) Prerequisite(s): Mechanical Engineering major and MEGR 3122 or MEGR 3123 with grade of C or above. Cross-listed Course(s): MEGR 5211. *Technical elective*. Topics related to vehicle dynamics and modeling thereof. Acceleration and braking performance, road loads, steady-state cornering, suspension, steering system, and tire behavior.

MEGR 4235. Waves and Optics. (3) Prerequisite(s): Mechanical Engineering major; and MEGR 3122 or MEGR 3123 with a grade of C or above. Cross-listed Course(s): MEGR 5235 *Technical Elective*. An introductory study of optics covering geometrical optics, optical instruments, wave optics (interference and diffraction), Fourier analysis, and polarization.

MEGR 4237. Introduction to Control Systems. (3) Prerequisite(s): Mechanical Engineering major and MEGR 3122 or MEGR 3123 with a grade of C or above. Cross-listed Course(s): MEGR 5237. Fundamentals of classical control analysis and design. Topics include: modeling and analyzing control systems; design of automatic controllers.

MEGR 4240. Advanced Automotive Powerplants. (3) Prerequisite(s): MEGR 4210 and Mechanical Engineering major. Cross-listed Course(s): MEGR 5240. *Technical Elective*. Advanced engineering principles governing internal combustion engine theory, design, and application.

MEGR 4242. Applied Vehicle Aerodynamics. (3) Prerequisite(s): MEGR 3114 with a C or above, and either MEGR 2240 or MEGR 2242 with a grade of C or above; and Mechanical Engineering major. Cross-listed Course(s): MEGR 5242. Flow of air around streamlined and bluff bodies, aerodynamic forces, understanding flow separation and reattachments, aerodynamic tools, introduction to computational fluid dynamics, use of commercial CFD packages to solve fluid flow problems, computer simulation and analysis of flow around bluff bodies and road vehicles including race cars.

MEGR 4244. Tire Mechanics. (3) Prerequisite(s): MEGR 2144 with grade of C or above; and Mechanical Engineering major. Cross-listed Course(s): MEGR 5244. Pre- or Corequisite(s): MEGR 3121. In-depth analysis of the tire and its influence on vehicle performance, including: design, materials, construction, structural response, rolling resistance, force and moment generation, NVH, wet and dry traction, wear, high speed limit, and standards. Tire models, their limitations, and their governing equations.

MEGR 4272. Mechanics of the Human Locomotor System. (3) Prerequisite(s): MEGR 2144 with grade of C or above; and Mechanical Engineering major. Cross-listed Course(s): MEGR 5272. Introduces dynamic analysis of the human musculoskeletal system. Students learn to develop 3-D rigid body models of human movement, and how to calculate internal forces in muscles and joints during daily and sports activities. Students also learn how to use motion capture system and simulation software of human locomotion.

MEGR 4271. Orthopedic Biomechanics. (3) Prerequisite(s): Mechanical Engineering major and MEGR 2144 with grade of C or above. Cross-listed Course(s): MEGR 5271. Introduces mechanical properties of human body's hard tissues (bone and cartilage) and soft tissues (muscles,

ligament and tendon), and joint biomechanics. Focuses on mechanical and biological considerations for treatment of orthopedic diseases and sports injuries, such as bone fractures, ACL injury, and osteoarthritis. Students learn how to solve medical problems using their engineering knowledge and skills.

MEGR 4273. Regenerative Neural Engineering. (3) Prerequisite(s): Mechanical Engineering major; and MEGR 2156, MEGR 2157, MEGR 2180, or MEGR 2279, with grade of C or above. Cross-listed Course(s): MEGR 5273. The basic principles of neuroscience and biomedical engineering, and the use of these principles in regenerative neural engineering. Topics include: the state-of-the-art in the use of advanced 3D bioprinting, stem cells, conductive materials, nanomaterials, neural modeling, and brain machine interfaces as applied to solving prevalent clinical issues related to neurology.

MEGR 4274. Bioelectronic Medicine. (3) Prerequisite(s): MEGR 2156, MEGR 2157, MEGR 2180, or MEGR 2279, with grade of C or above; and Mechanical Engineering major. Cross-listed Course(s): MEGR 5274. The basic principles of neuroscience and neural engineering, and the use of engineering principles in bioelectronic medicine. Topics include: the use of optogenetics, electrical stimulation, electromagnetic stimulation, and brain machine Interfaces as applied to solving prevalent clinical issues related to neurology and neural engineering.

MEGR 4280. Advanced Manufacturing Processes. (3) Prerequisite(s): Mechanical Engineering major; and MEGR 2144 and MEGR 2180 with grades of C or above, and either MEGR 2156 or MEGR 2157 with a grade of C or above. Cross-listed Course(s): MEGR 5280. Detailed analytical treatment of manufacturing materials, processes and procedures. Forming processes, casting processes, metal cutting processes, tool materials, joining processes, automation, and economics.

MEGR 4290. Introduction to Electric Vehicles and Batteries. (3) Prerequisite(s): MEGR 3121 and MEGR 3112. Cross-listed Course(s): MEGR 5290. Introduction to the drivetrain and power supply of electric vehicles. Automotive drive cycle analysis and range estimation for conventional vehicles, hybrid vehicles and electric vehicles. Fuel efficiency, carbon emissions, and power requirements of all three types of vehicles will be discussed. Discussions on different types of batteries and their challenges. Basics of battery chemistry and sizing for vehicle demands.

MEGR 4291. Battery Performance and Testing. (3) Pre- or Corequisite(s): MEGR 3152. Cross-listed Course(s): MEGR 5291. Introduction to the basic characterization and fundamental working mechanisms of the equipment. Also, students will have the chance to operate the equipment including cyclers, electrochemistry workstation, glovebox battery assembling, etc.

MEGR 4292. Materials Science in Battery Technology. (3) Prerequisite(s): MEGR 3161. Cross-listed Course(s): MEGR 5292. Introduction to the materials science used in advanced battery technology, especially Li-ion battery technology. Discussions will include basic electrochemical engineering, battery component materials (i.e. electrodes, electrolytes, separator), underlying properties and performance, and full devices.

MEGR 4310. Uncrewed Aerial Vehicles. (3) Prerequisite(s): MEGR 3310 and MEGR 3121 all with grades of C or better; MEGR major. Cross-listed

Course(s): MEGR 5310. Fundamental concepts and technologies related to the dynamics, control, navigation, and guidance of uncrewed aerial vehicles.

MEGR 4311. Aerospace Materials. (3) Prerequisite(s): MEGR 3161 with a grade of C or above; MEGR major. Cross-listed Course(s): MEGR 5311. Overview and analysis of weight-efficient and high performance advanced materials for aerospace and other mechanical engineering applications, including composites, polymers, and ceramics.

MEGR 4312. Aerospace Propulsion. (3) Prerequisite(s): MEGR 3111 with C or better and MEGR 3114 with C or better; MEGR major. Cross-listed Course(s): MEGR 5312. An overview of aerospace propulsion and turbomachinery systems, including fundamentals of aerothermodynamics, compressible fluid flows, combustion, propeller propulsion, air-breathing engines, and rocket propulsion.

Meteorology (METR)

METR 1102. Introduction to Meteorology. (3) A first look at various aspects of meteorology, including solar radiation, temperature, pressure and wind, stability, global circulations, precipitation processes, weather systems, severe weather, and current environmental issues. Basic physical principles, meteorological terminology, societal impacts, weather analysis and career options within the field of meteorology are explored.

METR 1102L. Introduction to Meteorology Lab. (1) Introduces atmospheric and weather phenomena, and allows students to analyze current and past weather events, use meteorological data to develop forecasts, and create contoured maps which are used to explain contemporary environmental issues.

METR 1600. First-Year Meteorology Seminar. (1) Prerequisite(s): Declared meteorology majors only with 60 or fewer credits. Introductory-level seminar course for meteorology majors in the first year of the program designed to support their long-term academic success. Selected topics covered include time management, study skills, effective communication, and career and internship opportunities in meteorology and the atmospheric sciences. Students will regularly reflect on course topics and identify how content will be applied in their lives to further encourage their success.

METR 3140. Fundamentals of Meteorology. (3) Prerequisite(s): METR 1102, ESCI 1101, or permission of instructor. Fundamental physical principles of meteorology: analysis of atmospheric behavior, the governing forces and map contouring are all introduced. Specific topics include solar radiation, temperature, moisture, wind and pressure, synoptic systems, jet streams, local weather, thunderstorms, and tropical systems.

METR 3210. Atmospheric Thermodynamics. (3) Prerequisite(s): METR 3140 with grade of C or above and MATH 1241, or permission of instructor. Pre- or Corequisite(s): MATH 1242. The study of the physical processes associated with atmospheric thermodynamics and stability. Topics include: atmospheric composition, equation of state, hydrostatics, first and second laws of thermodynamics for dry, moist, and saturated air, atmospheric stability, parcel buoyancy, and

thermodynamic diagrams. Three hours of combined lecture and lab per week.

METR 3220. Physical Meteorology. (3) Prerequisite(s): METR 3210 with grade of C or above, or permission of instructor. Fundamentals of cloud and precipitation physics, atmospheric electricity, atmospheric radiation, and radiative transfer. Three hours of combined lecture and lab per week.

METR 3245. Synoptic Meteorology. (4) Prerequisite(s): METR 3210 with grade of C or above, or permission of instructor. Principles of meteorological analysis; fundamental concepts of meteorology, thermodynamics, and kinematics are integrated to understand the structure and evolution of mid-latitude cyclones and fronts. Three hours of lecture and one three-hour lab per week.

METR 3250. Dynamic Meteorology. (3) Prerequisite(s): METR 3245 with grade of C or above, MATH 1242, and PHYS 2101; or permission of instructor. Principles of atmospheric dynamics including the equations of motion, circulation, vorticity, divergence, balanced and unbalanced flows, and the general circulation. Three hours of combined lecture and lab per week.

METR 3330. Weather Forecasting. (3) Prerequisite(s): METR 3245 or permission of instructor. Focuses on weather forecasting: real-time, short-term, and long-term. Verification techniques are studied. Three hours of combined lecture and lab per week.

METR 3340. Weather Communications. (3) Pre- or Corequisite(s): METR 3140 or permission of instructor. A survey of the field of weather communications covering weather forecasting principles, television and radio broadcasting, science writing, forensic meteorology, and forecasting for business applications. Three hours of combined lecture and lab per week.

METR 4000. Selected Topics in Meteorology. (1 to 4) Prerequisite(s): METR 3140 or permission of instructor. In-depth treatment of specific topics selected from meteorology. *May be repeated for credit with change of topic.*

METR 4105. Meteorological Computer Applications. (3) Prerequisite(s): METR 3140 and MATH 1241 with grade of C or above, or permission of instructor. Principles of computer programming applied to the analysis of meteorological data. Students become familiar with the Unix environment, learn programming basics, and create programs to analyze various meteorological datasets. Topics include: program composition, compiling, data types, mathematical operators, selective execution, repetitive execution, arrays, functions, and subroutines. Three hours of combined lecture and lab per week.

METR 4110. Atmospheric Instrumentation. (3) Prerequisite(s): METR 3210 with grade of C or above, or permission of the instructor. An overview of common atmospheric measurements systems and their applications. Particular attention is paid to surface, sounding, radar, and satellite systems. Three hours of combined lecture and lab per week.

METR 4150. Applied Climatology. (3) Prerequisite(s): METR 3250 or permission of instructor. Methods of acquiring and analyzing climactic data in various types of applied problems. Emphasis on methods to

assess and reduce the impact of weather and climate upon human activities. Three hours of combined lecture and lab per week.

METR 4205. Climate Dynamics. (3) Prerequisite(s): ESCI 3101 and METR 4105 with grade of D or above. Global climate, climate variability, and dynamics within the climate system, including large-scale phenomena such as El Niño and the North Atlantic Oscillation. Analysis of the links between large-scale climate phenomena and local weather. Three hours of combined lab and lecture per week.

METR 4240. Boundary-Layer Meteorology. (3) Prerequisite(s): METR 3210 or permission of instructor. Examines the flow of temperature, moisture and wind within the atmosphere's boundary layer, including their interactions and exchanges with Earth's land and water surfaces. Applications to the diurnal cycle, short-term forecasting, and air pollution are also discussed. Three hours of lecture per week.

METR 4245. Advanced Synoptic Meteorology. (3) Prerequisite(s): METR 3250 with grade of C or above, or permission of instructor. An integrated view of synoptic and dynamic meteorology focusing on advanced conceptual models and analysis techniques for mid-latitude weather systems and regional precipitation events. Three hours of combined lecture and lab per week.

METR 4250. Advanced Dynamic Meteorology. (3) Prerequisite(s): METR 3250 with grade of C or above, MATH 2171, and MATH 2241; or permission of instructor. An in-depth examination of atmospheric dynamics, focusing on the structure and evolution of synoptic and mesoscale weather systems, wave dynamics (Rossby, topographic, inertia-gravity, etc.), scale-analysis, non-dimensional numbers, and atmospheric modeling. Three hours of combined lecture and lab per week.

METR 4320. Tropical Meteorology. (3) Prerequisite(s): METR 3250 or permission of instructor. A comprehensive study of the tropical atmosphere, including climatology, mean structure and circulation, air-sea energy exchange, cumulus transport, synoptic waves, and tropical storms. Special attention is paid to the formation, evolution, motion, and societal impacts of hurricanes. Three hours of combined lecture and lab per week.

METR 4350. Mesoscale Meteorology. (3) Pre- or Corequisite(s): METR 3250 or permission of instructor. A comprehensive study of the structure, evolution, and dynamics of atmospheric phenomena having spatial scales between 2 and 2000 km. Topics include: fronts, convective initiation, mesoscale convective systems, severe thunderstorms, tornadoes, low-level jets, drylines, land-sea breezes, shallow convection, and terrain effects. Three hours of combined lecture and lab per week.

METR 4400. Internship in Meteorology. (3-6) Prerequisite(s): Permission of department. Research and/or work experience designed to be a logical extension of a student's academic program. The student must apply to department for an internship by submitting a proposal which specifies the type of work/research experience preferred and how the internship will complement his or her academic program. The department will attempt to place the selected students in cooperating community organizations to complete specified research or work-related tasks which are based on a contractual arrangement between the student and community organization. The student can receive three to six hours

credit, depending on the nature and extent of the internship assignment. *May be repeated for credit with change of topic.*

METR 4650. Meteorology Professional Seminar. (1) Prerequisite(s): METR 3245 or permission of instructor. Advanced seminar series examining contemporary scientific themes and career opportunities in the atmospheric sciences. Coursework consists of a series of oral presentations by students, combined with traditional and invited lectures. Topics include: short-term and long-term career goals, internships, graduate school, resume building, professional ethics, interview strategies, and on-campus opportunities.

METR 4800. Individual Study in Meteorology. (1 to 4) Prerequisite(s): Permission from the department and credit hours established in advance; and, when taken for honors credit, approval of a proposal through the Honors College Application to Candidacy process the semester prior to taking the course. Tutorial study or special research problems. Students must request permission for independent study from an individual faculty member. *May be repeated for credit with change of topic.*

Management (MGMT)

MGMT 3000. Topics in Management. (3) Prerequisite(s): Junior or Senior standing. Topics from the area of Management and Administration. *May be repeated for credit.*

MGMT 3140. Management and Organizational Behavior. (3) Prerequisite(s): ACCT 2121; ACCT 2122 or ACCT 3323; ECON 2101; ECON 2102, INFO 2130; College of Business major; and Junior or Senior standing. A study of the role of manager with an emphasis on understanding the behavioral and administrative theories and concepts needed to succeed in contemporary organizations. Topics include: motivation, leadership, managing teams, and teamwork.

MGMT 3170. Ethics and Global Capitalism. (3) Prerequisite(s): Junior or Senior standing. A study of ethical arguments supporting and critical of capitalist economic and social systems. Topics include: property rights, justice, desert, equality, and sustainable capitalism.

MGMT 3241. Acquiring and Maintaining Human Resources. (3) Prerequisite(s): MGMT 3140 with grade of C or above. Concepts, methods, and issues used in effectively managing human resources in contemporary organizations with a focus on workforce planning, recruitment and selection, organizational entry, socialization, diversity, and the legal environment. Experience in developing and utilizing behavioral science research methods to assess effectiveness.

MGMT 3242. Developing and Retaining Human Resources. (3) Prerequisite(s): MGMT 3140 with grade of C or above. Concepts, methods, and issues used in effectively managing human resources in contemporary organizations with a focus on performance assessment, training and development, change, and performance management, compensation and benefits, and retention. Experience in developing and utilizing behavioral science research methods to assess effectiveness.

MGMT 3243. Employment Law. (3) Prerequisite(s): MGMT 3140 with grade of C or above. Examines the legislation which impacts human

resource management practices in union and non-union settings. Topics include: fair employment practices, anti-discrimination law, representation elections, unfair labor practices, compensation and benefit legislation, privacy concerns, and dispute settlement processes.

MGMT 3260. Managerial Communication. (3) Prerequisite(s): MGMT 3140 and COMM 3160 with grades of C or above. Develop an understanding of the use and influence of communication skills, processes and strategies in effective managerial decision making. A practical approach is employed to develop written, oral, nonverbal, listening, team, conflict, and negotiation skills in organizational situations.

MGMT 3274. International Business Processes and Problems. (3) Prerequisite(s): MGMT 3140 with grade of C or above; and Management or International Business major, International Management minor, or permission of department. An introduction to the process, institutions and problems associated with exporting, importing and management of multinational businesses.

MGMT 3275. International Business Management. (3) Prerequisite(s): MGMT 3140 with grade of C or above; and Management or International Business major, International Management minor, or permission of department. An introduction to the processes and strategies, institutions and environments, and barriers and problems with international business, as well as management of various functions (e.g., strategy, organization, HR, finance, marketing, etc.) within a multinational enterprise. Topics include: foundations for global business, the environment of international business, processes and strategies of international business, cross-cultural awareness and management implications.

MGMT 3277. Entrepreneurship. (3) Prerequisite(s): MGMT 3140 with C or ENTR 3276 with C. A study of the factors leading to entrepreneurial success with an emphasis on opportunity identification, structure and planning, and the management of new ventures. Provides tools necessary to understand and evaluate the entrepreneurial process within a large company, new venture, family business, or growing a small business.

MGMT 3280. Strategic Management. (3) Prerequisite(s): Senior standing, College of Business major (Not enrolled as Pre-Accounting, Pre-Business, or Pre-Economics); BLAW 3150, COMM 3160, ECON 3125, FINN 3120, INFO 3130, MGMT 3140, MKTG 3110, and OPER 3100 and earn a grade of C or better. (Accounting majors are required to take BLAW 3150, COMM 3160, FINN 3120, INFO 3130, MGMT 3140, MKTG 3110, and OPER 3100 and earn a grade of C or better.) A capstone course that emphasizes the synthesis and application of concepts from the functional business courses so students develop an understanding of organizations from the perspective of top level executives. Focuses on the role of top management in leading, planning, and decision-making to form effective organizational strategies that integrate internal processes and the economic, technological, ethical, political, and social forces affecting the organization.

MGMT 3282. Managerial Ethics. (3) Prerequisite(s): MGMT 3140 with grade of C or above. A study of the impact of management decisions on customers, employees, creditors, shareholders, community interests, ecology, and government (including taxes and the regulatory environment). The objective is to provide future managers with a

systematic way of analyzing the impact of management decisions on larger society.

MGMT 3287. Managerial Leadership. (3) Prerequisite(s): MGMT 3140 and MGMT 3282 with grades of C or above; and Senior standing. A capstone course for the management major that provides a managerial perspective on leadership in formal organizations. Emphasis is placed on team-building, exercising influence, decision-making, and conflict management. Pedagogical tools to be used include role playing, case analyses, self-assessment of leadership competencies, and shadowing of working managers.

MGMT 3400. Management Internship. (3) Prerequisite(s): Junior or Senior standing; Management major in good standing; and permission of instructor. Provides a meaningful work experience in the field of management. Requires a minimum of 150 hours of supervised employment, 50 hours of work per credit hour. Student is responsible for securing internship and completing internship application and approval process prior to registering for the course. Internship must be approved by instructor. Application process and course registration must be completed prior to beginning internship. All proposals are subject to departmental approval. Students may not earn internship credit for work at a current employer. May be used to meet requirements of a major elective, up to a maximum of three credit hours. Cannot be taken for credit at the same time or following any other internship for credit. *May not be repeated for credit. Graded on a Pass/No Credit basis.*

MGMT 3500. Management Cooperative Education Experience. (0) Prerequisite(s): Management major. Enrollment in this course is required for the department's cooperative education students during each semester they are working in a position. Participating students pay a course registration fee for transcript notation. Assignments must be arranged and approved in advance. The Cooperative Education Program is only open to undergraduate students; graduate level students are encouraged to contact their academic departments to inquire about academic or industrial internship options for credit. For more information, contact the University Career Center. *Course may be repeated. Graded on a Satisfactory/Unsatisfactory basis.*

MGMT 3800. Directed Study. (1 to 6) Prerequisite(s): Permission of department chair and Junior or Senior standing. Enrollment granted only by permission of the faculty with whom the work is performed. The student's work assignments are designed by the student and faculty member who oversee the project of study. Credit hours are determined prior to enrollment and are based on the particular project undertaken.

MGMT 4300. Entrepreneurial Decisions. (3) Cross-listed Course(s): MBAD 5300. Prerequisite(s): Junior or Senior standing. Entrepreneurial decisions are the key dilemmas and debates faced by entrepreneurs. Students learn about the key decisions that real entrepreneurs face in operating their ventures. A dilemma is "an argument presenting two or more equally conclusive alternatives; a choice or a situation involving choice between equally unsatisfactory alternatives; a problem seemingly incapable of a satisfactory solution." The process of entrepreneurship involves the recognition of challenges and dilemmas, vigorous debate, and ultimately, solutions. No solution lasts long in an entrepreneurial milieu whose underpinning is "creative destruction."

Marketing (MKTG)

MKTG 3000. Topics in Marketing. (3) Prerequisite(s): MKTG 3110 with grade of C or above, or permission of department chair. Topics from the area of marketing. *May be repeated for credit with change of topic.*

MKTG 3110. Principles of Marketing. (3) Prerequisite(s): ACCT 2121; ACCT 2122 or ACCT 3323; ECON 2101; ECON 2102; INFO 2130; MATH 1120; and STAT 1220 with grades of C or above; and Junior or Senior standing. Designed to acquaint the student with the marketing concept, various aspects of the marketing-external environment interface, and interrelatedness with other functional areas. Provides marketing majors with a foundation for further study, while offering non-marketing majors a survey of marketing's function in business organizations.

MKTG 3210. Consumer Behavior. (3) Prerequisite(s): Marketing major MKTG 3110 with grade of C or above. Businesses spend an enormous amount of time, money, and other resources on monitoring, predicting, understanding, and influencing the behavior of consumers. Their success depends on convincing consumers to use their products and services rather than competitors' offerings. This course provides a contemporary, strategic approach to consumer behavior. Throughout the course, students examine examples of how key concepts and theories can be applied to company, brand, and organizational decisions. There is a heavy emphasis on application through assignments and in-class exercises. Students learn how marketing managers use their research-based knowledge to reach consumers more efficiently and to create more effective positioning and branding strategies. Credit will not be given for both MKTG 3210 and MKTG 3221.

MKTG 3219. AI in Marketing. (3) Prerequisite(s): MKTG 3110 with grade of C or above; Marketing Major. A comprehensive overview of AI in marketing, covering its definition, historical evolution, and key differences from traditional software. It explores how AI has transformed marketing through personalization, predictive analysis, and chatbots while addressing its limitations and ethical considerations. Additionally, it delves into the technical aspects of AI, including machine learning and deep learning, and discusses the competitive landscape and barriers to AI adoption in marketing.

MKTG 3220. Digital Marketing and Web Analytics. (3) Prerequisite(s): Marketing major and MKTG 3110 with grade of C or above. With technological advances, it is essential and imperative to understand the capabilities of the most commonly used analytical tools in order to make informed decisions. This course covers important techniques in marketing analytics with a focus on marketing analytics applications. It is structured to analyze data through case studies and hands-on exercises either as homework/assignments or in-class exercises. Key concepts are learned from a variety of activities including lectures, class discussions of assigned cases, individual exercises, and a team project. This course is useful for students who are interested in learning analytical techniques with an emphasis on digital marketing.

MKTG 3222. Marketing Research. (3) Prerequisite(s): Marketing major and MKTG 3110 with grade of C or above. An applications course that covers the entire research process, including problem identification, secondary and primary data collection, scaling techniques, survey questionnaire design, reliability and validity, experimental design, sampling, data analysis, and data communication.

MKTG 3224. Product and Brand Management. (3) Prerequisite(s): Marketing major and MKTG 3110 with grade of C or above. Emphasis on branding, brand management, and brand equity. Covers measurement of brand equity sources and outcomes. Particular focus on designing brand strategies, introducing and naming new products and extensions, and the new product development process.

MKTG 3225. Integrated Marketing Communications. (3) Prerequisite(s): Marketing major and MKTG 3110 with grade of C or above. Examines all areas of marketing promotion, including such topics as advertising, media selection, digital marketing, social media, packaging and sales promotion. Provides the framework to be successful in various marketing careers.

MKTG 3226. Business-to-Business Marketing and Retailing. (3) Prerequisite(s): Marketing, Finance, or International Business major, or International Management minor; and MKTG 3110 with grade of C or above. An overview of skills and knowledge involved in individual selling and management of sales programs, including sales management theories and their applications. Emphasis on both buyer and seller negotiation techniques.

MKTG 3228. Marketing Analytics. (3) Prerequisite(s): Marketing, Accounting, Finance, or Business Analytics major; and MKTG 3110 with grade of C or above. Emphasis on analyzing interactions of consumers, firms, and society. Focus on interpreting results. Particular emphasis on analyzing data related to market response, customer segmentation, customer targeting, brand positioning, and pricing and promotion decisions.

MKTG 3230. Social Media/Mobile Marketing and Analytics. (3) Prerequisite(s): Marketing major and MKTG 3110 with grade of C or above. Emphasis on using social and mobile mediums for marketing purposes. Particular focus on key performance indicators, developing and implementing social media plans, marketing applications of mobile phenomena, and analytics for optimizing performance in each medium.

MKTG 3231. Global Marketing Management. (3) Prerequisite(s): MKTG 3110 with grade of C or above; and Marketing major, International Business major, or International Management minor. Building on the fundamentals of marketing, this course introduces the context of the global environment. The cultural, social, legal, political, financial and geographic dimensions of the global marketplace are examined. Using primarily qualitative methods, the impact and integration of global factors in marketing strategies is assessed.

MKTG 3250. Marketing Strategy Consultancy. (3) Prerequisite(s): Marketing major, Senior standing; MKTG 3110 with a grade of C or better and completion of at least two additional marketing courses prior to this course and a third marketing course either prior or in conjunction with this course. All prior courses must be completed with grades of C or above. Integration of all marketing elements in a strategic planning framework. Emphasis on areas of strategic importance, especially those which have significant implications and relevance for marketing policy decisions in competitive situations.

MKTG 3400. Marketing Internship. (3) Prerequisite(s): Junior or Senior standing; Marketing major in good standing; MKTG 3110 with grade of C or above; and permission of instructor. Provides a meaningful work

experience in the field of marketing. Requires a minimum of 150 hours of supervised employment, 50 hours of work per credit hour. Student is responsible for securing internship and completing internship application and approval process prior to registering for the course. Internship must be approved by instructor. Application process and course registration must be completed prior to beginning internship. All proposals are subject to departmental approval. Students may not earn internship credit for work at a current employer. May be used to meet requirements of a major elective, up to a maximum of three credit hours. *Graded on a Pass/No Credit basis. May not be repeated for credit or taken for credit at the same time or following any other internship for credit.*

MKTG 3500. Marketing Cooperative Education Experience. (0) Prerequisite(s): Marketing major. Enrollment in this course is required for the department's cooperative education students during each semester they are working in a position. Participating students pay a course registration fee for transcript notation. Assignments must be arranged and approved in advance. The Cooperative Education Program is only open to undergraduate students; graduate level students are encouraged to contact their academic departments to inquire about academic or industrial internship options for credit. For more information, contact the University Career Center. *Course may be repeated. Graded on a Satisfactory/Unsatisfactory basis.*

MKTG 3800. Directed Study. (1 to 3) Prerequisite(s): Permission of department and Junior or Senior standing. Enrollment granted only by permission of the faculty with whom the work will be performed. The student's work assignments will be designed by the student and faculty member who will oversee the project of study. The credit hours will be determined prior to enrollment and will be based on the particular project undertaken. The proposal must be approved by the department chair.

Military Science (MSCI)

MSCI 1000. Physical Fitness. (1) Prerequisite(s): Students must be able to participate in normal college physical education program and must obtain a physician's signature or a "Medical Fitness Statement" provided by the Department of Military Science at the beginning of the semester. Military Fitness provides a program focused on muscular strength, muscular endurance, and aerobic endurance. The weekly classes provide students with opportunities for strenuous physical activity and also serve as examples of exercise routines that students can adopt as personal workout plans. The course provides a basic understanding of Army Physical Training and improves upon the leadership dynamic of participants. Progress is graded using the Army Physical Fitness Test (APFT) and leadership traits.

MSCI 1101. Leadership and Personal Development. (1) Corequisite(s): MSCI 1101L. Introduces students to the personal challenges and competencies that are critical for effective leadership. Students learn how the personal development of life skills such as cultural understanding, goal setting, time management, mental resiliency, physical fitness, and stress management relate to leadership and the Army profession. Includes instruction in map reading, land navigation, and customs and courtesies of the Army. Participation in leadership lab is required. There is no military obligation to take this course; open to all UNC Charlotte and CAEC consortium students.

MSCI 1101L. Leadership and Personal Development Lab. (1) Corequisite(s): MSCI 1101. Students learn the basic fundamentals in being a member of a team. This is taught through multiple venues, including drill and ceremony, land navigation, weapons familiarization, basic rifle marksmanship, medical tasks, individual movement techniques, engaging targets, understanding Army acronyms, hand and arm signals, reactive leadership, and radio protocol procedures. Freshmen learn basic leadership skills and master the fundamentals of being a follower.

MSCI 1102. Introduction to Leadership. (1) Corequisite(s): MSCI 1102L. Overview of leadership fundamentals such as setting direction, the profession of arms, listening, presenting briefs, providing feedback, and using effective writing skills. Students explore dimensions of leadership attributes and core leader competencies in the context of practical, hands-on, and interactive exercises. Cadets who are contracted or conditionally contracted by the end of their Freshman year may be required to attend Cadet Initial Entry Training (CIET) at Fort Knox, KY, during the summer. Participation in leadership lab is required. There is no military obligation to take this course; open to all UNC Charlotte and CAEC consortium students.

MSCI 1102L. Introduction to Leadership Lab. (1) Corequisite(s): MSCI 1102. Students learn the basic fundamentals in being a member of a team. This is taught through multiple venues including drill and ceremony, land navigation, weapons familiarization, basic rifle marksmanship, medical tasks, individual movement techniques, engaging targets, introduction to the orders process, understanding Army acronyms, hand and arm signals, basic military tactics, and radio protocol procedures. Freshmen learn basic leadership skills and master the fundamentals of being a follower.

MSCI 2101. Innovative Team Leadership. (2) Corequisite(s): MSCI 2101L. Explores the dimensions of creative and innovative tactical leadership strategies and styles by examining team dynamics and historical leadership theories that form the basis of the Army leadership framework. Students practice aspects of personal motivation and team building in the context of planning, executing, and assessing team exercises and participating in leadership labs. Includes instruction in troop leading procedures, tactical movement, squad level operations, battle drills, and problem solving. Participation in leadership lab is required. There is no military obligation to take this course; open to all UNC Charlotte and CAEC consortium students.

MSCI 2101L. Innovative Team Leadership Lab. (1) Corequisite(s): MSCI 2101. Students become proficient in the basic fundamentals and are introduced to leading a small team. This is taught through multiple venues including advanced land navigation, survival skills, building terrain models, medical skills, movement formations, movement techniques, special teams, writing operations orders, situation reporting, call for fire, and introduction to battle drills. Sophomores focus on mentoring freshmen and serve as team leaders.

MSCI 2102. Foundations of Tactical Leadership. (2) Corequisite(s): MSCI 2102L. Examines the challenges of leading teams in the complex operational environment. The course highlights dimensions of terrain analysis, patrolling, route planning, and operations orders. Further study of the Army Leadership Requirements Model explores the dynamics of adaptive leadership in the context of military operations. Participation in

leadership lab is required. There is no military obligation to take this course; open to all UNC Charlotte and CAEC consortium students.

MSCI 2102L. Foundations of Tactical Leadership Lab. (1) Corequisite(s): MSCI 2102. Students become proficient in the basic fundamentals and are introduced to leading a squad-based element. This is taught through multiple venues including advanced land navigation, building terrain models, advanced rifle marksmanship, medical skills, movement formations, movement techniques, special teams, writing operations orders, situation reporting, call for fire, and introduction to battle drills. Sophomores focus on mentoring freshmen and serve as team leaders.

MSCI 3000. Evolution of American Warfare. (3) An historical overview of the American Military Experience and an understanding of military principles, strategy, and tactics since the 17th century. Staff ride(s) and systematic battlefield analysis exercises provide examples of the evolution of strategy, tactics, and military technology. These examples provide a foundation for lessons in leadership that students can use in their future military career.

MSCI 3101. Adaptive Team Leadership. (3) Prerequisite(s): Basic Course credit. Corequisite(s): MSCI 3101L. Academically challenging course where Cadets study, practice, and apply the fundamentals of Army leadership, Army values and ethics, personal development, and small unit tactics at the squad level. At the conclusion of this course, cadets will be capable of planning, coordinating, navigating, motivating and leading a 9-person squad in the execution of a tactical mission during a classroom practical exercise, a leadership lab, or during a situational training exercise (STX) in a field environment. Successful completion of this course helps prepare cadets for success at the ROTC Cadet Leader Course (CLC) which they attend the following summer at Fort Knox, KY. Cadets receive systematic and specific feedback on their leader attributes, values and core leader competencies from their instructor, other ROTC cadre, and MSIV Cadets who evaluate them using the ROTC leader development program (LDP) model. Cadets will be tasked with managing the training of MS II cadets based on direction from MS IV cadets. Course includes instruction in squad operations, problem solving, and combat orders. Participation in leadership lab is required.

MSCI 3101L. Adaptive Team Leadership Lab. (1) Corequisite(s): MSCI 3101. Challenging scenarios related to small-unit tactical operations are used to develop self-awareness and critical thinking skills. The cadet will receive systematic and specific feedback on leadership abilities. Cadets at this level serve as the Non-Commissioned Officer (NCO) Corps of the ROTC Battalion; they plan, rehearse, and lead basic course cadets through the program of instruction. Juniors are the executors of the battalion. Cadets also work on skills that help them succeed at CLC. Those skills include Land Navigation and Squad Level Leadership Tactics.

MSCI 3102. Applied Team Leadership. (3) Prerequisite(s): MSCI 3101. Corequisite(s): MSCI 3102L. A continuation of MSCI 3101, where Cadets study, practice, and apply the fundamentals of Army leadership, Army values and ethics, personal development, and small unit tactics at the patrol/platoon level. At the conclusion of this course, cadets will be capable of planning, coordinating, navigating, motivating and leading a 24-person patrol in the execution of a tactical mission during a classroom practical exercise, a leadership lab, or during a situational training exercise (STX) in a field environment. Successful completion of this

course helps prepare cadets for success at the ROTC Cadet Leader Course (CLC) which they attend the following summer at Fort Knox, KY. Cadets receive systematic and specific feedback on your leader attributes, values and core leader competencies from their instructor, other ROTC cadre, and MSIV Cadets who evaluate them using the ROTC leader development program (LDP) model. Course includes instruction in platoon operations, stability and support operations, and garrison orders. Participation in leadership lab is required.

MSCI 3102L. Applied Team Leadership Lab. (1) Corequisite(s): MSCI 3102. Specific instruction is given in individual leader development, planning and execution of small-unit operations, individual and team development, and the Army as a career choice. Prepares cadets for the mandatory 32-day Cadet Leader Course (CLC) at Fort Knox, KY, during the summer between their Junior and Senior academic years.

MSCI 4101. Developing Adaptive Leaders. (3) Prerequisite(s): MSCI 3101 and MSCI 3102. Corequisite(s): MSCI 4101L. Cadets explore the dynamics of leading in the complex situations of current military operations. They examine differences in customs and courtesies, military law, principles of war, and rules of engagement in the face of international terrorism. They also explore aspects of interacting with non-government organizations, civilians on the battlefield, the decision making processes and host nation support. Participation in leadership lab is required. Mandatory for all Senior ROTC cadets.

MSCI 4101L. Developing Adaptive Leaders Lab. (1) Corequisite(s): MSCI 4101. Cadets lead cadets at lower levels. Leadership experiences are designed to prepare them for their first military unit of assignment. Identify responsibilities of key staff members, coordinate staff roles amongst twelve separate universities and colleges that make up the ROTC battalion, and use battalion field/garrison situations to teach, train, and develop subordinates. Seniors are the battalion's staff, primary supervisors and planners, preparing to transition to Second Lieutenants.

MSCI 4102. Leadership in a Complex World. (3) Prerequisite(s): MSCI 4101. Corequisite(s): MSCI 4102L. Cadets identify the leaders roles and responsibilities for enforcing Army policies and programs. Also covers how to manage Comprehensive Soldier Fitness (CSF). Cadets also explore the dynamics of building a team prepared to handle any future operational environment and win, as well as examine the importance of understanding culture and how it affects the overall mission. Cadets develop both oral and written communication skills by conducting a battle analysis and decision briefs. Participation in leadership lab is required. Mandatory for all Senior ROTC cadets.

MSCI 4102L. Leadership in a Complex World Lab. (1) Corequisite(s): MSCI 4102. A continuation of responsibilities listed in MSCI 4101L. The leadership lab uses case studies, scenarios, and tactical vignettes to prepare cadets to face the complex ethical and practical demands of leading as a commissioned officer in the United States Army.

MSCI 4800. Operational Planning, Independent Study. (1) Provides students with customized coursework specific to a doctrinal area of focus within the United States Army. As a future Army Officer, Cadets are required to develop and refine their planning abilities; specifically, they must possess the capabilities to define mission parameters, forecast logistical requirements, anticipate contingencies, effectively delegate sub-tasks appropriately, and then supervise every phase of a given mission from planning, to execution, to completion. Many of the

intricacies of this process are unique to various functional areas throughout the United States Army. Students are assigned theoretical mission planning exercises based on historic vignettes, which are specific to the branch or functional area for which they will be assigned (or have the greatest interest in), upon commissioning as an Officer in the United States Army.

Music Education (MUED)

MUED 2100. Introduction to Music Education. (2) Introduction to the organization and various types/levels of music education. Overview of historical, ethical, legal, and instructional issues related to music education and diversity in the classroom. A minimum of five hours of community service is required.

MUED 2200. Foundations of Music Education. (2) Prerequisite(s): MUED 2100. Examination of the social, historical, legal, and philosophical foundations of music education, major issues in American education as they relate to music education research, classroom diversity issues, and instructional planning. Clinical experiences required.

MUED 2241. Music Development and Learning. (2) Prerequisite(s): MUED 2200. Introduction to human developmental learning theories and the psychology of music as they relate to teaching music in public schools. Topics include research based perspectives of: 1) education developmental learning theories; 2) musical learning; 3) teaching musical skills; and 4) musical roles. Clinical experiences in various levels and music education settings (general music, band, choir, and/or orchestra) required.

MUED 3270. Teaching Discipline: Assessment and Behavior in the Music Classroom. (2) Prerequisite(s): MUSC 2400. Students develop specific quantitative and qualitative methods that address unique discipline, teaching, and assessment concerns inherent in a music classroom with typical and diverse populations of students. Clinical experiences observing and working with students in a low-performing school setting required.

MUED 4190. Choral Methods. (2) Prerequisite(s): MUSC 2400 and MUSC 3135. Corequisite(s): MUED 4190L. The development of advanced planning and rehearsal techniques, choral pedagogy, selecting and teaching developmentally appropriate diverse repertoire, and administering secondary public school choral programs.

MUED 4190L. Choral Methods Lab. (1) Prerequisite(s): MUSC 2400. Corequisite(s): MUED 4190. Application of content from MUED 4190 with choral ensembles. Clinical experiences required. *May be repeated for credit.*

MUED 4192. General Music Methods. (2) Prerequisite(s): MUSC 2400. Corequisite(s): MUED 4192L. General music methods and materials for elementary grades through high school. Primarily focused on elementary school general music but extends into teaching general music and non-performance based music courses in grades 6 through 12. Topics include current school music theories, diverse song literature for teaching, and approaches to general music teaching with diverse and differently-abled learners.

MUED 4192L. General Music Methods Lab. (1) Prerequisite(s): MUSC 2400. Corequisite(s): MUED 4192. Clinical application of content from MUED 4192 with an on-campus lab ensemble and through clinical hours in a K-12 school setting.

MUED 4194. Instrumental Methods. (2) Prerequisite(s): MUSC 1223, MUSC 1225, MUSC 1227, MUSC 1229, MUSC 2400, and MUSC 3136. Corequisite(s): MUED 4194L. Development of advanced planning and rehearsal techniques, instrumental pedagogy, selecting and teaching developmentally appropriate diverse repertoire, and administering public school instrumental music programs.

MUED 4194L. Instrumental Methods Lab. (1) Pre- or Corequisite(s): Four semesters of MUPF 1117. Corequisite(s): MUED 4194. Clinical application of content from MUED 4194 with an on-campus lab ensemble and public school instrumental ensembles. Clinical experiences required.

MUED 4467. Student Teaching/Seminar: K-12 Music. (12) Prerequisite(s): Approved application for student teaching. Student teaching is a planned sequence of teaching experiences in the student's area of specialization conducted in an approved school setting under a Faculty Site Coordinator and a clinical educator. During student teaching, the student must demonstrate the competencies identified for their specific teaching field in an appropriate grade-level setting. The student is assigned 16 weeks in a school setting. Includes seminars and required professional development. Participating students pay a course registration fee for edTPA portfolio assessment. *Graded on a Pass/No Credit basis.*

Music Performance (MUPF)

MUPF 1110. Orchestra. (1) Prerequisite(s): Advanced string, wind, and percussion players from any major by audition or permission of instructor. An orchestral ensemble performing music from across the chamber, symphonic, choral, and operatic repertoires. Performs standard orchestral works from the Baroque Period through the present. *May be repeated for credit.*

MUPF 1111. Jazz Ensemble. (1) Prerequisite(s): Audition. An ensemble specializing in performance and study of music composed for standard "big band" instrumentation. Performs music styles from the Swing era to present day. *May be repeated for credit.*

MUPF 1111L. Jazz Ensemble Sectional Rehearsals. (0) Corequisite(s): MUPF 1111. Sectional rehearsals for MUPF 1111. *May be repeated for credit.*

MUPF 1112. Wind Ensemble. (1) Prerequisite(s): Audition. A performing ensemble open to advanced wind and percussion players from any major. Performs traditional and contemporary band literature in concerts a minimum of twice per semester. Occasional concert tours and performances for important regional music events. *May be repeated for credit.*

MUPF 1112L. Wind Ensemble Sectional Rehearsals. (0) Corequisite(s): MUPF 1112. Sectional rehearsals for MUPF 1112. *May be repeated for credit.*

MUPF 1113. Symphonic Band. (1) A performing ensemble open to students from any major with experience playing wind and percussion instruments. No formal audition required, only a simple hearing to determine chair placement. Performs traditional and contemporary band literature in one concert each semester. *May be repeated for credit.*

MUPF 1114. Basketball Band. (1) Prerequisite(s): Permission of instructor. A performing ensemble for University athletic contests and other campus events. *May be repeated for credit.*

MUPF 1115. Guitar Ensemble. (1) Prerequisite(s): Permission of instructor. A performing ensemble. *May be repeated for credit.*

MUPF 1117. Instrumental Lab Ensemble. (0) Students meet to create a beginning band or orchestra for the purposes of rehearsing on a secondary instrument in an ensemble format. This format also allows student conductors in instrumental conducting and methods the opportunity to rehearse and conduct a novice ensemble. *Graded on a Pass/No Credit basis. May be repeated.* Four semesters of MUPF 1117 are required for the B.M. with Concentration in Instrumental/General Music Education.

MUPF 1118. Marching Band. (1) Weekly rehearsals and performances at football games and other university/community events. Pre-season camp and performances outside of class are required. *May be repeated for credit.*

MUPF 1119. Special Instrumental Ensemble. (1) Prerequisite(s): Acceptance as a Music major and permission of instructor. An alternative to traditional ensembles listed above for students with specialized performance interests. *May be repeated for credit.*

MUPF 1120. University Chorale. (1) Prerequisite(s): Audition. A mixed chorus that performs music of many styles from the Baroque period to the present. The enrollment ranges from 46 to 58 voices. Open to all UNC Charlotte students with extensive choral experience. *May be repeated for credit.*

MUPF 1120L. University Chorale Sectional Rehearsals. (0) Corequisite(s): MUPF 1120. Sectional rehearsals for MUPF 1120. *May be repeated for credit.*

MUPF 1121. Chamber Singers. (1) Prerequisite(s): audition. A highly-select mixed ensemble that ranges in size from 15 to 26 voices. This ensemble specializes in virtuosic literature from the Renaissance, Early Baroque, and Contemporary periods. Open to all UNC Charlotte students. A full-year commitment is expected. *May be repeated for credit.*

MUPF 1122. Men's Chorus (Mallard Creek Chorale). (1) The Mallard Creek Chorale draws upon majors from across campus and performs several times each semester, including occasionally performing off campus and at athletic events. The ensemble performs folk, spirituals, Broadway, patriotic, barbershop, du-wop, and other musical styles traditional for men's choruses. This ensemble is open to all male UNC Charlotte students with an interest in singing. Special emphasis is placed on building vocal technique and sight singing ability. *May be repeated for credit.*

MUPF 1123. Women's Chorus (Charlotteans). (1) The Charlotteans is open to all female UNC Charlotte students with an interest in singing. This ensemble performs a vast array of music from Renaissance through contemporary composers. Emphasis is placed on building vocal technique and sight singing ability. *May be repeated for credit.*

MUPF 1124. Opera Workshop. (1) Prerequisite(s): audition. Performance of scenes, acts, and entire operas. *May be repeated for credit.*

MUPF 1125. Gospel Choir. (1) A performing ensemble that focuses on the gospel choir repertoire. *May be repeated for credit.*

MUPF 1128. Special Vocal Ensemble. (1) Prerequisite(s): acceptance as a Music major and permission of instructor. An alternative to the traditional ensembles listed above for students with specialized experience. Enrollment restricted to Music majors. *May be repeated for credit.*

MUPF 1132. Wind Quintet. (1) Prerequisite(s): Permission of instructor. A performing ensemble that focuses on the wind quintet repertoire. *May be repeated for credit.*

MUPF 1134. Flute Choir. (1) Prerequisite(s): Permission of instructor. A performing ensemble that focuses on the flute choir repertoire. *May be repeated for credit.*

MUPF 1136. Clarinet Choir. (1) Prerequisite(s): Permission of instructor. A performing ensemble that focuses on the clarinet choir repertoire. *May be repeated for credit.*

MUPF 1137. Saxophone Quartet. (1) Prerequisite(s): Permission of instructor. A performing ensemble that focuses on the saxophone quartet repertoire. *May be repeated for credit.*

MUPF 1139. Woodwind Chamber Music. (1) Prerequisite(s): Permission of instructor. A performing ensemble that focuses on the woodwind chamber music repertoire. *May be repeated for credit.*

MUPF 1142. Brass Quintet. (1) Prerequisite(s): Permission of instructor. A performing ensemble that focuses on the brass quintet repertoire. *May be repeated for credit.*

MUPF 1143. Trumpet Ensemble. (1) Prerequisite(s): Permission of instructor. A performing ensemble that focuses on the trumpet ensemble repertoire. *May be repeated for credit.*

MUPF 1144. Horn Ensemble. (1) Prerequisite(s): Permission of instructor. A performing ensemble that focuses on the horn ensemble repertoire. *May be repeated for credit.*

MUPF 1146. Tuba/Euphonium Ensemble. (1) Prerequisite(s): Permission of instructor. A performing ensemble that focuses on the tuba/euphonium repertoire. *May be repeated for credit.*

MUPF 1149. Brass Chamber Music. (1) Prerequisite(s): Permission of instructor. A performing ensemble that focuses on the brass chamber music repertoire. *May be repeated for credit.*

MUPF 1151. Percussion Ensemble. (1) Prerequisite(s): Permission of instructor. A performing ensemble that focuses on the percussion ensemble repertoire. *May be repeated for credit.*

MUPF 1153. Group Percussion Ensemble. (1) Prerequisite(s): Admission to the music major. Corequisite(s): MUPF 1281 or MUPF 1282, or permission of instructor. A performance-based class focusing on a variety of musical styles and genres realized using percussion. This course develops various techniques required for performing a diverse range of percussion musics. *May be repeated for credit if performing different repertoire.*

MUPF 1155. Piano Ensemble. (1) Prerequisite(s): Permission of instructor. A performing ensemble that focuses on the piano ensemble repertoire. *May be repeated for credit.*

MUPF 1168. Philharmonia. (1) A performing ensemble open to string players from any major. Performs string orchestra repertoire from the Baroque period through the present. Emphasis is placed on developing techniques and sight-reading ability. *May be repeated for credit.*

MUPF 1169. String Chamber Music. (1) Prerequisite(s): Permission of instructor. A performing ensemble that focuses on the string chamber music repertoire. *May be repeated for credit.*

MUPF 1170. Jazz Combo. (1) Prerequisite(s): Permission of instructor. A small performing ensemble that focuses on jazz repertoire and improvisation. *May be repeated for credit.*

MUPF 1240. Applied Music: Euphonium. (1 to 2) Prerequisite(s): Acceptance as a Music major or minor, or permission of instructor. Corequisite(s): MUSC 1300 and an approved principal ensemble. Private instruction, a half-hour lesson per week per credit hour, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1241. Applied Music: Trumpet. (1 to 2) Prerequisite(s): Acceptance as a Music major or minor, or permission of instructor. Corequisite(s): MUSC 1300 and an approved principal ensemble. Private instruction, a half-hour lesson per week per credit hour, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1242. Applied Music: French Horn. (1 to 2) Prerequisite(s): Acceptance as a Music major or minor, or permission of instructor. Corequisite(s): MUSC 1300 and an approved principal ensemble. Private instruction, a half-hour lesson per week per credit hour, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1243. Applied Music: Trombone. (1 to 2) Prerequisite(s): Acceptance as a Music major or minor, or permission of instructor. Corequisite(s): MUSC 1300 and an approved principal ensemble. Private instruction, a half-hour lesson per week per credit hour, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1244. Applied Music: Tuba. (1 to 2) Prerequisite(s): Acceptance as a Music major or minor, or permission of instructor. Corequisite(s): MUSC 1300 and an approved principal ensemble. Private instruction, a half-hour lesson per week per credit hour, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1245. Applied Music: Guitar. (1 to 2) Prerequisite(s): Acceptance as a Music major or minor, or permission of instructor. Corequisite(s): MUSC 1300 and an approved principal ensemble. Private instruction, a half-hour lesson per week per credit hour, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1246. Applied Music: Harp. (1 to 2) Prerequisite(s): Acceptance as a Music major or minor, or permission of instructor. Corequisite(s): MUSC 1300 and an approved principal ensemble. Private instruction, a half-hour lesson per week per credit hour, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1247. Applied Music: Organ. (1 to 2) Prerequisite(s): Acceptance as a Music major or minor, or permission of instructor. Corequisite(s): MUSC 1300 and an approved principal ensemble. Private instruction, a half-hour lesson per week per credit hour, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1248. Applied Music: Piano. (1 to 2) Prerequisite(s): Acceptance as a Music major or minor, or permission of instructor. Corequisite(s): MUSC 1300 and an approved principal ensemble. Private instruction, a half-hour lesson per week per credit hour, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1249. Applied Music: Violin. (1 to 2) Prerequisite(s): Acceptance as a Music major or minor, or permission of instructor. Corequisite(s): MUSC 1300 and an approved principal ensemble. Private instruction, a half-hour lesson per week per credit hour, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1250. Applied Music: Viola. (1 to 2) Prerequisite(s): Acceptance as a Music major or minor, or permission of instructor. Corequisite(s): MUSC 1300 and an approved principal ensemble. Private instruction, a half-hour lesson per week per credit hour, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1251. Applied Music: Cello. (1 to 2) Prerequisite(s): Acceptance as a Music major or minor, or permission of instructor. Corequisite(s): MUSC 1300 and an approved principal ensemble. Private instruction, a half-hour lesson per week per credit hour, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1252. Applied Music: Bass. (1 to 2) Prerequisite(s): Acceptance as a Music major or minor, or permission of instructor. Corequisite(s): MUSC 1300 and an approved principal ensemble. Private instruction, a half-hour lesson per week per credit hour, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1253. Applied Music: Voice. (1 to 2) Prerequisite(s): Acceptance as a Music major or minor, or permission of instructor. Corequisite(s): MUSC 1300 and an approved principal ensemble. Private instruction, a half-hour lesson per week per credit hour, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1256. Applied Music: Saxophone. (1 to 2) Prerequisite(s): Acceptance as a Music major or minor, or permission of instructor. Corequisite(s): MUSC 1300 and an approved principal ensemble. Private instruction, a half-hour lesson per week per credit hour, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1259. Applied Music: Percussion. (1 to 2) Prerequisite(s): Acceptance as a Music major or minor, or permission of instructor. Corequisite(s): MUSC 1300 and an approved principal ensemble. Private instruction, a half-hour lesson per week per credit hour, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1260. Applied Music: Jazz Saxophone. (1) Prerequisite(s): Acceptance as a Music major or permission of instructor. Corequisite(s): An approved principal ensemble. Private instruction in jazz, a half-hour lesson per week, or an hour lesson every two weeks, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1261. Applied Music: Jazz Trumpet. (1) Prerequisite(s): Acceptance as a Music major or permission of instructor. Corequisite(s): An approved principal ensemble. Private instruction in jazz, a half-hour lesson per week, or an hour lesson every two weeks, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1262. Applied Music: Jazz Trombone. (1) Prerequisite(s): Acceptance as a Music major or permission of instructor. Corequisite(s): An approved principal ensemble. Private instruction in jazz, a half-hour lesson per week, or an hour lesson every two weeks, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1263. Applied Music: Jazz Guitar. (1) Prerequisite(s): Acceptance as a Music major or permission of instructor. Corequisite(s): An approved principal ensemble. Private instruction in jazz, a half-hour lesson per week, or an hour lesson every two weeks, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1264. Applied Music: Jazz Piano. (1) Prerequisite(s): Acceptance as a Music major or permission of instructor. Corequisite(s): An approved principal ensemble. Private instruction in jazz, a half-hour lesson per week, or an hour lesson every two weeks, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1265. Applied Music: Jazz Bass. (1) Prerequisite(s): Acceptance as a Music major or permission of instructor. Corequisite(s): An approved principal ensemble. Private instruction in jazz, a half-hour lesson per week, or an hour lesson every two weeks, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1266. Applied Music: Jazz Percussion. (1) Prerequisite(s): Acceptance as a Music major or permission of instructor. Corequisite(s): An approved principal ensemble. Private instruction in jazz, a half-hour lesson per week, or an hour lesson every two weeks, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1270. Applied Music: Musical Theatre. (1) Prerequisite(s): Enrollment in Certificate in Music Theatre or permission of instructor. Corequisite(s): COAA 3350. Private musical theatre instruction -- a half-hour lesson per week or a one-hour lesson every two weeks -- leading to formal jury at the end of the semester. *May be repeated for credit.*

MUPF 1283. Introduction to Piano Keyboard. (1) Prerequisite(s): Admission to the music major. Corequisite(s): MUPF 1155. Introduction to foundational piano/keyboard performance skills; taught in a group setting.

MUPF 1284. Piano Keyboard. (1) Prerequisite(s): MUPF 1283 with a grade of "C" or above, or permission of instructor; Admission to the music major. Corequisite(s): MUPF 1155. Further development of foundational piano/keyboard performance skills; taught in a group setting. *May be repeated for credit if performing different repertoire.*

MUPF 1285. Introduction to Guitars. (1) Corequisite(s): MUPF 1115. An introduction to guitar. Learning by ear and from music notation. Includes a wide variety of musical styles and introductory music theory as it relates to the instrument.

MUPF 1286. Guitars. (1) Prerequisite(s): MUPF 1285 with a grade of "C" or above, or permission of instructor; Admission to the music major. Corequisite(s): MUPF 1115. Further development of guitar techniques taught as a foundation for performance in both classical and non-classical styles; taught in a group setting. *May be repeated for credit if performing different repertoire.*

MUPF 1287. Introduction to Vocal Performance. (1) Prerequisite(s): Admission to the music major. Corequisite(s): MUPF 1122, MUPF 1123, or MUPF 1125. Introduction to the physiology and acoustics of the human singing voice in a group setting. Vocal techniques taught as a healthy foundation for solo performance in both classical and non-classical singing styles.

MUPF 1288. Vocal Performance. (1) Prerequisite(s): MUPF 1287 with a grade of "C" or above, or permission of instructor; ; Admission to the music major. Corequisite(s): MUPF 1122, MUPF 1123, or MUPF 1125. Further development of vocal techniques taught as a healthy foundation for solo performance in both classical and non-classical singing styles; taught in a group setting. *May be repeated for credit if performing different repertoire.*

MUPF 3240. Advanced Applied Music: Euphonium. (2) Prerequisite(s): MUSC 2400 and permission of instructor. Corequisite(s): MUSC 3300 and an approved principal ensemble. Advanced private instruction, a one-hour lesson per week, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 3241. Advanced Applied Music: Trumpet. (2) Prerequisite(s): MUSC 2400 and permission of instructor. Corequisite(s): MUSC 3300 and an approved principal ensemble. Advanced private instruction, a one-hour lesson per week, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 3242. Advanced Applied Music: French Horn. (2) Prerequisite(s): MUSC 2400 and permission of instructor. Corequisite(s): MUSC 3300 and an approved principal ensemble. Advanced private instruction, a one-hour lesson per week, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 3243. Advanced Applied Music: Trombone. (2) Prerequisite(s): MUSC 2400 and permission of instructor. Corequisite(s): MUSC 3300 and an approved principal ensemble. Advanced private instruction, a one-hour lesson per week, leading to a formal jury at the end of the semester. *May be repeated for credit.*

MUPF 3244. Advanced Applied Music: Tuba. (2) Prerequisite(s): MUSC 2400 and permission of instructor. Corequisite(s): MUSC 3300 and an

jazz articulation, advanced jazz improvisation, and solo transcription. *May be repeated for credit.*

MUPF 3264. Advanced Applied Music: Jazz Piano. (2) Prerequisite(s): MUSC 2400 or permission of instructor. Corequisite(s): MUSC 3300 and an approved principal ensemble. Advanced applied study of jazz. Assignments address tone and technical development, jazz phrasing, jazz articulation, advanced jazz improvisation, and solo transcription. *May be repeated for credit.*

MUPF 3265. Advanced Applied Music: Jazz Bass. (2) Prerequisite(s): MUSC 2400 or permission of instructor. Corequisite(s): MUSC 3300 and an approved principal ensemble. Advanced applied study of jazz. Assignments address tone and technical development, jazz phrasing, jazz articulation, advanced jazz improvisation, and solo transcription. *May be repeated for credit.*

MUPF 3266. Advanced Applied Music: Jazz Percussion. (2) Prerequisite(s): MUSC 2400 or permission of instructor. Corequisite(s): MUSC 3300 and an approved principal ensemble. Advanced applied study of jazz. Assignments address tone and technical development, jazz phrasing, jazz articulation, advanced jazz improvisation, and solo transcription. *May be repeated for credit.*

MUPF 3400. Junior Recital. (0) A Junior-level recital of solo and ensemble repertoire performed before a jury of faculty members and the general public. See the *Department of Music Student Handbook* for details. *Graded on a Pass/No Credit basis.*

MUPF 3440. Junior Recital Preparation: Euphonium. (2) Prerequisite(s): Grade of C or above in at least one semester of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3441. Junior Recital Preparation: Trumpet. (2) Prerequisite(s): Grade of C or above in at least one semester of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3442. Junior Recital Preparation: French Horn. (2) Prerequisite(s): Grade of C or above in at least one semester of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3443. Junior Recital Preparation: Trombone. (2) Prerequisite(s): Grade of C or above in at least one semester of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3444. Junior Recital Preparation: Tuba. (2) Prerequisite(s): Grade of C or above in at least one semester of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300

and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3445. Junior Recital Preparation: Guitar. (2) Prerequisite(s): Grade of C or above in at least one semester of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3446. Junior Recital Preparation: Harp. (2) Prerequisite(s): Grade of C or above in at least one semester of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3447. Junior Recital Preparation: Organ. (2) Prerequisite(s): Grade of C or above in at least one semester of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3448. Junior Recital Preparation: Piano. (2) Prerequisite(s): Grade of C or above in at least one semester of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3449. Junior Recital Preparation: Violin. (2) Prerequisite(s): Grade of C or above in at least one semester of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3450. Junior Recital Preparation: Viola. (2) Prerequisite(s): Grade of C or above in at least one semester of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3451. Junior Recital Preparation: Cello. (2) Prerequisite(s): Grade of C or above in at least one semester of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3452. Junior Recital Preparation: Bass. (2) Prerequisite(s): Grade of C or above in at least one semester of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3453. Junior Recital Preparation: Voice. (2) Prerequisite(s): Grade of C or above in at least one semester of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3454. Junior Recital Preparation: Flute. (2) Prerequisite(s): Grade of C or above in at least one semester of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3455. Junior Recital Preparation: Clarinet. (2) Prerequisite(s): Grade of C or above in at least one semester of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3456. Junior Recital Preparation: Saxophone. (2) Prerequisite(s): Grade of C or above in at least one semester of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3457. Junior Recital Preparation: Oboe. (2) Prerequisite(s): Grade of C or above in at least one semester of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3458. Junior Recital Preparation: Bassoon. (2) Prerequisite(s): Grade of C or above in at least one semester of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3459. Junior Recital Preparation: Percussion. (2) Prerequisite(s): Grade of C or above in at least one semester of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3460. Junior Recital Preparation: Jazz Saxophone. (1 to 2) Prerequisite(s): MUPF 3260 with grade of C or above in at least one semester and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3461. Junior Recital Preparation: Jazz Trumpet. (1 to 2) Prerequisite(s): MUPF 3261 with grade of C or above in at least one semester and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson

per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3462. Junior Recital Preparation: Jazz Trombone. (1 to 2) Prerequisite(s): MUPF 3262 with grade of C or above in at least one semester and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3463. Junior Recital Preparation: Jazz Guitar. (1 to 2) Prerequisite(s): MUPF 3263 with grade of C or above in at least one semester and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3464. Junior Recital Preparation: Jazz Piano. (1 to 2) Prerequisite(s): MUPF 3264 with grade of C or above in at least one semester and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3465. Junior Recital Preparation: Jazz Bass. (1 to 2) Prerequisite(s): MUPF 3265 with grade of C or above in at least one semester and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 3466. Junior Recital Preparation: Jazz Percussion. (1 to 2) Prerequisite(s): MUPF 3266 with grade of C or above in at least one semester and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal junior recital of 15-20 minutes in length per credit hour.

MUPF 4400. Senior Recital. (0) A Senior-level recital of solo and ensemble repertoire performed before a jury of faculty members and the general public. See the *Department of Music Student Handbook* for details. *Graded on a Pass/No Credit basis.*

MUPF 4440. Senior Recital Preparation: Euphonium. (2) Prerequisite(s): Grade of C or above in at least two semesters of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal senior recital. See Department of Music's current issue of *Student Handbook* for guidelines and recital procedures.

MUPF 4441. Senior Recital Preparation: Trumpet. (2) Prerequisite(s): Grade of C or above in at least two semesters of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal senior recital. See Department of Music's current issue of *Student Handbook* for guidelines and recital procedures.

MUPF 4457. Senior Recital Preparation: Oboe. (2) Prerequisite(s): Grade of C or above in at least two semesters of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal senior recital. See Department of Music's current issue of *Student Handbook* for guidelines and recital procedures.

MUPF 4458. Senior Recital Preparation: Bassoon. (2) Prerequisite(s): Grade of C or above in at least two semesters of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal senior recital. See Department of Music's current issue of *Student Handbook* for guidelines and recital procedures.

MUPF 4459. Senior Recital Preparation: Percussion. (2) Prerequisite(s): Grade of C or above in at least two semesters of 3000-level Applied Music (MUPF 32xx) and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal senior recital. See Department of Music's current issue of *Student Handbook* for guidelines and recital procedures.

MUPF 4460. Senior Recital Preparation: Jazz Saxophone. (1 to 3) Prerequisite(s): MUPF 3260 with grade of C or above in at least one semester and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal senior recital of 15-20 minutes in length per credit hour.

MUPF 4461. Senior Recital Preparation: Jazz Trumpet. (1 to 3) Prerequisite(s): MUPF 3261 with grade of C or above in at least one semester and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal senior recital of 15-20 minutes in length per credit hour.

MUPF 4462. Senior Recital Preparation: Jazz Trombone. (1 to 3) Prerequisite(s): MUPF 3262 with grade of C or above in at least one semester and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal senior recital of 15-20 minutes in length per credit hour.

MUPF 4463. Senior Recital Preparation: Jazz Guitar. (1 to 3) Prerequisite(s): MUPF 3263 with grade of C or above in at least one semester and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal senior recital of 15-20 minutes in length per credit hour.

MUPF 4464. Senior Recital Preparation: Jazz Piano. (1 to 3) Prerequisite(s): MUPF 3264 with grade of C or above in at least one semester and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal senior recital of 15-20 minutes in length per credit hour.

MUPF 4465. Senior Recital Preparation: Jazz Bass. (1 to 3) Prerequisite(s): MUPF 3265 with grade of C or above in at least one semester and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal senior recital of 15-20 minutes in length per credit hour.

MUPF 4466. Senior Recital Preparation: Jazz Percussion. (1 to 3) Prerequisite(s): MUPF 3266 with grade of C or above in at least one semester and permission of department. Corequisite(s): MUSC 3300 and an approved principal ensemble. Private instruction, a one-hour lesson per week, leading to a formal senior recital of 15-20 minutes in length per credit hour.

Music (MUSC)

MUSC 1100. Rudiments of Music. (2) An introductory course in music literacy, including clefs, pitches, key signatures, durational values, and rests. May be taken concurrently with MUSC 1101.

MUSC 1101. Introduction to Aural Skills and Sight-Singing. (1) Prerequisite(s): Acceptance as a Music major or minor, or permission of instructor. An introduction to Aural Skills and Sight-Singing, including pitch-matching, modal identification, and rhythmic dictation. May be taken concurrently with MUSC 1100 and/or MUSC 1237. Three contact hours.

MUSC 1102. Fundamentals of Musicianship. (3) An introductory course in basic musicianship, including music literacy (clefs, pitches, key signatures, durational values, and rests) and aural skills (the identification and dictation of modes, melodies, and rhythms).

MUSC 1104. History of Rock. (3) Introduction to various musics that formed the foundations of rock music and the numerous sub-genres that developed throughout time from early blues through the contemporary period. Particular emphasis placed on the historical and socio-cultural context from which the genre arose.

MUSC 1222. Jazz Ensemble Techniques. (1) Prerequisite(s): Music minor/major. The teaching and administration of public school jazz ensembles including rehearsal techniques, and analyzing appropriate literature and teaching materials. Fieldwork may be required.

MUSC 1223. Woodwind Techniques. (1) Prerequisite(s): Acceptance as Music major. Playing and teaching techniques and materials for flute, oboe, clarinet, bassoon, and saxophone.

MUSC 1225. Brass Techniques. (1) Prerequisite(s): Acceptance as Music major. Playing and teaching techniques and materials for trumpet, horn, trombone, euphonium, and tuba.

MUSC 1227. String Techniques. (1) Prerequisite(s): Acceptance as Music major. Playing and teaching techniques and materials for violin, viola, cello, and bass. Two contact hours.

MUSC 1228. Advanced String Skills. (1) Prerequisite(s): MUSC 1227 or permission of instructor. Advanced playing and teaching techniques and materials with an emphasis on secondary string instruments.

MUSC 1229. Percussion Techniques. (1) Prerequisite(s): Acceptance as Music major. Playing and teaching techniques and materials for snare drum, timpani, mallet percussion, and accessory instruments.

MUSC 1230. Musicianship I. (3) An introduction to and study of music theory beginning with rudimentary clef and pitch reading and continuing with diatonic scale recognition, key signatures, intervals, triad formation, and basic Roman numeral and figured bass analysis of triads and 7th chords. Practical application of this material through aural skill development such as basic sight-singing, rhythm reading, and simple melodic dictation.

MUSC 1231. Musicianship II. (3) Prerequisite(s): MUSC 1230 with grade of C or above, or permission of instructor. Continuation of Musicianship I. Topics include common practice harmony and voice-leading, and musical structures. Aural skills include rhythmic subdivisions in simple and compound meters, half and dotted half note tactus, and harmonic dictation of all diatonic chords and their requisite 7th chords.

MUSC 1233. Class Piano I. (1) Prerequisite(s): Music major or minor. Corequisite(s): MUSC 1230 or permission of instructor. This is a lab course for MUSC 1230. Functional keyboard skills and technique in a group setting, including the harmonization, transposition, and improvisation of diatonic melodies, as well as sightreading and repertoire.

MUSC 1234. Class Piano II. (1) Prerequisite(s): MUSC 1233 with grade of C or above, or permission of instructor. Corequisite(s): MUSC 1231 or permission of instructor. This is a lab course for MUSC 1231. The continued study of functional keyboard skills and technique, including the harmonization, transposition, and improvisation of major and minor melodies in a variety of keys, as well as sight-reading and repertoire.

MUSC 1236. Movement for Musicians. (1) Prerequisite(s): Acceptance as Music major or minor. A laboratory that investigates the intellectual and physical coordination of the musician using a blended approach of various movement/coordinative modalities and developmental approaches. *May be repeated for credit.*

MUSC 1237. Class Voice. (1) Prerequisite(s): Acceptance as Music major, minor, or Undergraduate Certificate in Musical Theatre; or permission of department. Class instruction in voice. *May be repeated for credit.*

MUSC 1238. Guitar Class I. (1) Class instruction in guitar.

MUSC 1239. Guitar Class II. (1) Continuation of MUSC 1238. Class instruction in guitar.

MUSC 1240. Class Voice for Musical Theatre. (1) Prerequisite(s): MUSC 1237; and Music major or minor; acceptance in the Undergraduate Certificate in Musical Theatre; or permission of the department. Class instruction in voice for Musical Theatre. *May be repeated for credit.*

MUSC 1300. Performance Class. (0) Corequisite(s): Applied Music (MUPF 1240-1259). This is a lab course for Applied Music that provides students with the experience of participating in masterclasses and formal recitals. By also serving as audience members and assisting during public concerts, the students cultivate proper audience decorum, contribute to a professional environment for all university performances,

and increase their knowledge of the repertoire from various cultures and historical periods. Includes introductions to various issues related to health and safety. *Graded on a Pass/No Credit basis. May be repeated.*

MUSC 1402. Opera and Musical Theatre Practicum. (1) Prerequisite(s): Permission of instructor. Practical application of production work in the areas of: introductory stage rigging, lighting adjustments, supertitling, costume, props, backstage management and backstage crew for final rehearsals and performances of the Opera Workshop ensemble. *May be repeated for credit.*

MUSC 1403. Audio Engineering Practicum. (1) Prerequisite(s): Permission of instructor. Practical application of audio engineering work in the areas of recording, controlling, editing, and distributing sound and audio for dance, music, and theatre. *May be repeated for credit.*

MUSC 1502. Global Arts/Humanities: Music in Global Communities. (3) All Global Theme courses explore the central, unifying question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of a complex, interconnected world. We approach our interdisciplinary study of music with the understanding that the social, cultural, and political contexts where music is created, shared, and heard inform the sounds of the music and its various interpretations and meanings. *May not be taken for credit and for a grade if credit has been received for LBST 1103.*

MUSC 1512. Local Arts/Humanities: Music in U.S. Communities. (3) All Local Theme courses explore the central, unifying question of what it means to be a member of the "local" community in which we live. Through the study of the experiences of different peoples, cultures, and communities in our city, our region, or our nation, students will be able to better understand themselves in the context of the complex and diverse society in which we live. In this course, we seek to understand musical practices in U.S. communities in their social context. We approach our interdisciplinary study of music with the understanding that social, cultural, and political contexts where music is created, shared, and heard inform the sounds of the music and its various interpretations and meanings.

MUSC 2001. Topics in Music. (1 to 6) Prerequisite(s): Permission of instructor. Special topic in music. *May be repeated for credit.*

MUSC 2101. Introduction to Music Business. (2) Prerequisite(s): Acceptance as a Music major or minor. An overview of various aspects of the music business, including marketing, promotion, communication, conduct, organization, accounting, and administration. Course projects may include the creation of promotional materials and planning a CD/DVD recording project.

MUSC 2137. Phonetics and Articulation for Singers I: Italian and Latin Diction. (1) Prerequisite(s): Acceptance as a Music major or minor. The teaching of the International Phonetic Alphabet (IPA) and its application to pronunciation and articulation in vocal music in Italian and Latin.

MUSC 2138. Phonetics and Articulation for Singers II: English Diction. (1) Prerequisite(s): MUSC 2137 or permission of instructor. The application of the International Phonetic Alphabet (IPA) to pronunciation and articulation in vocal music in English.

MUSC 2140. Double Reed Making. (1) Designing and adjusting American-style oboe and/or bassoon reeds, including techniques for cane selection, gouging, shaping, profiling, and sharpening the reed knife. *May be repeated for credit.* Two contact hours.

MUSC 2150. Accompanying for Pianists. (1) Corequisite(s): MUPF 1248. Accompanying techniques for pianists. Required accompanying of solos by other student musicians. *May be repeated for credit.* One contact hour.

MUSC 2151. Introduction to Music Technology. (1) Prerequisite(s): Permission of instructor. An introduction to the standard applications of music technology, including general computing processes, digital audio, MIDI, music notation, and computer-aided instruction. Requirements include a project focused on music and culture outside of the classical music canon.

MUSC 2191. Incorporating Music Into the Elementary Classroom. (3) Prerequisite(s): Non-Music major. Students develop basic music skills that allow them to choose, prepare, and teach appropriate music materials for inclusion in the classroom curricula. Field work required.

MUSC 2222. Marching Band Techniques. (1) Prerequisite(s): Acceptance as Music major or minor. The organization and administration of marching band programs in school settings, the application of teaching techniques for the outdoor program and the practical use of computerized software for designing and teaching of field drills.

MUSC 2230. Musicianship III. (3) Prerequisite(s): MUSC 1231 with grade of C or above, or permission of instructor. Continuation of Musicianship II. Analysis of repertoire in binary form including larger form, double, modified, and asymmetrical periods; common chord modulation to closely related keys; introduction to modal mixture; augmented 6ths chords; and distant modulation. Aural skills include form recognition; melodic chromaticism, passing tones, and incomplete neighbors; tonicization and modulation techniques; eighth and dotted eighth tactus, 5/4, and changing time signatures.

MUSC 2233. Class Piano III. (1) Prerequisite(s): MUSC 1234 with grade of C or above, or permission of instructor. Corequisite(s): MUSC 2230 or permission of instructor. This is a lab course for MUSC 2230. The continued study of functional keyboard skills and technique, including chromatic harmonization, the transposition and improvisation of melodies with simple harmonic accompaniments, sight-reading, repertoire, and accompanying.

MUSC 2234. Class Piano IV. (1) Prerequisite(s): MUSC 2233 with grade of C or above, or permission of instructor. This is a lab course. The continued study of functional keyboard skills and technique, including chromatic harmonization, the transposition and improvisation of melodies with four-part accompaniments, score reading, sight-reading, repertoire, and accompanying.

MUSC 2235. Jazz Improvisation I. (2) Prerequisite(s): MUSC 1230 and/or permission of instructor. An introduction to jazz theory and its execution through instrumental improvisation. Detailed study of harmony, chord/scale relationships, musical forms, and the integration of this knowledge into performance. Open to instrumentalists only.

MUSC 2236. Jazz Improvisation II. (2) Prerequisite(s): MUSC 2235 and permission of instructor. A continuation of MUSC 2235, with greater emphasis on performance and integration of advanced harmonic/melodic devices and concepts, solo transcriptions, basic piano voicings, and composition memorization. Open to instrumentalists only.

MUSC 2237. Phonetics and Articulation for Singers III: German Diction. (1) Prerequisite(s): MUSC 2138 or permission of instructor. Phonetics and articulation in vocal music in German.

MUSC 2238. Phonetics and Articulation IV: French Diction. (1) Prerequisite(s): MUSC 2237 or permission of instructor. Phonetics and articulation for singers in vocal music in French.

MUSC 2240. Introduction to Composition. (1) Prerequisite(s): Music major and MUSC 1231; or permission of instructor. Introduces fundamental principles and techniques of composition, including melody, harmonic progression, phrase construction, motive, and simple formal design. *May be repeated for credit.*

MUSC 2400. Sophomore Review. (0) A Sophomore-level proficiency examination consisting of a transcript evaluation, an applied performance evaluation, and an interview. See the *Department of Music Student Handbook* for details.

MUSC 2410. Music Internship. (1 to 3) Prerequisite(s): Permission of department. Provides a meaningful work experience in fields such as music business, music industry, and arts administration. Requires 40-50 hours of supervised employment per credit hour. Proposal forms must be completed and approved prior to registration. *Graded on a Pass/No Credit basis. May be repeated for credit.*

MUSC 3129. Music Theories of the World. (3) Prerequisite(s): MUSC 2230 with a grade of C or better, or permission of instructor. The study of musical characteristics of diverse musical traditions from around the world. Through transcription and analysis of various music styles from around the world, tuning, notation systems, melody, mode, rhythm, and form are covered in depth, with additional consideration of how the musical instruments, lives of musicians, and social settings of performances relate to the musical systems.

MUSC 3130. Counterpoint. (2) Prerequisite(s): MUSC 2230 with a grade of C or above, or permission of instructor. A detailed study of various contrapuntal styles, such as Renaissance, Baroque, Classical, Post-tonal, and Popular styles through extensive exploration of melodic, harmonic, and rhythmic designs with an emphasis on composition.

MUSC 3131. Popular Music Songwriting. (3) Prerequisite(s): MUSC 2230 with a grade of C or better, or permission of instructor. Introduction to popular music songwriting and arranging fundamentals. Through song analysis, composition, and transcription, students learn about the musical characteristics of many genres of popular music, focusing on melody, text-music relationships, rhythm and meter, harmony, form, texture, instrumentation, notation, and the basics of using a DAW.

MUSC 3132. Advanced Tonal Aural Skills. (3) Prerequisite(s): MUSC 2230 with a grade of C or better, or permission of instructor. Continued study of chromatic tonal harmony including a more in-depth study of

modal mixture, the Neapolitan, augmented 6ths, altered dominants, common-tone diminished 7th, common-tone augmented 6ths, and harmonic extensions. Singing and dictating melodies and 4-part harmony with these attributes.

MUSC 3133. Advanced Post-Tonal Aural Skills. (3) Prerequisite(s): MUSC 2230 with a grade of C or better, or permission of instructor. Overview of diatonicism and the disembodiment of common practice methods. Covers post-tonal interval singing to singing and recognizing modes of limited transposition, interval cycles, and set classes, and their requisite literature from the post-tonal canon; requisite advanced meter and rhythmic techniques of unequal meter, changing meter, advanced polyrhythms, rhythmic modulation, and additive meter.

MUSC 3134. Fundamentals of Conducting. (2) Prerequisite(s): MUSC 2230 with grade of C or above, or permission of instructor. Conducting techniques for instrumental and choral ensembles. Field work required.

MUSC 3135. Choral Conducting. (2) Prerequisite(s): MUSC 2138, MUSC 3134, and MUSC 3151, all with grades of C or above, or permission of instructor. Developing conducting skills for interpreting choral music. Field work required.

MUSC 3136. Instrumental Conducting. (2) Prerequisite(s): MUSC 3134 with grade of C or above. Developing conducting skills for interpreting instrumental music. Field work required.

MUSC 3150. Advanced Accompanying for Pianists. (1) Prerequisite(s): Two semesters of MUSC 2150. Corequisite(s): MUPF 3248. Advanced accompanying techniques for pianists. Required accompanying of solos by other student musicians. *May be repeated for credit.*

MUSC 3151. Accompanying for Non-Pianists. (1) Prerequisite(s): MUSC 2234 with grade of C or above or permission of instructor. Accompanying techniques for music teachers and private studio instructors, with an emphasis on techniques appropriate for use in classrooms, rehearsals, and studios. *May be repeated for credit.*

MUSC 3170. Western Classical Music: Antiquity-Baroque. (3) Prerequisite(s): Music major, and MUSC 1231 with grade of C or above, or permission of instructor. The intensive study of the development of ideas and styles in Western classical music from Classical Antiquity through the Baroque Period.

MUSC 3171. Western Classical Music: Classic-Present. (3) Prerequisite(s): MUSC 2230 with a grade of C or above, or permission of instructor. The intensive study of the development of ideas and styles in Western classical music from the Classical period to the present.

MUSC 3172. Western Classical Music Literature. (3) Prerequisite(s): Admission to the music major. Study of the concepts and elements of musical style as they apply to the general style periods in Western music from the Middle Ages to the present.

MUSC 3252. Jazz Piano Techniques. (1) Prerequisite(s): Audition and permission of instructor. Develops jazz piano playing skills with blues and standard jazz harmonic progressions. Content includes the development of common harmonic techniques in jazz compositions, and the interpretation and performance of them in standard jazz literature on the piano.

MUSC 3300. Advanced Performance Class. (0) Corequisite(s): Advanced Applied Music (MUPF 3240-3259), Junior Recital Preparation (MUPF 3440-3459), or Senior Recital Preparation (MUPF 4440-4459). This is a lab course for Advanced Applied Music that provides students with multiple experiences of performing in front of an audience. By also serving as audience members and assisting during public concerts, the students continue to cultivate proper audience decorum, contribute to a professional environment for all university performances, and increase their knowledge of the repertoire from various cultures and historical periods. Includes introductions to various issues related to health and safety. *Graded on a Pass/No Credit basis. May be repeated.*

MUSC 4001. Advanced Topics in Music. (1 to 6) Prerequisite(s): MUSC 2400 and permission of instructor. Special advanced topic in music. *May be repeated for credit.*

MUSC 4037. Vocal Literature. (3) Prerequisite(s): MUSC 2400 or permission of instructor. A survey of American, British, French, German, and Italian literature for solo voice, including a study of style and interpretation.

MUSC 4090. Choral Ensemble Techniques. (1) Prerequisite(s): MUSC 3134 with grade of C or above. An introduction to the voice and to teaching choral ensembles most often found in school programs for pre-service instrumental/general music teachers. Students explore how to effectively rehearse, manage, and perform with a choral ensemble. Students also explore developmentally appropriate vocal-pedagogy concepts for adolescent through adult-aged singers.

MUSC 4094. Instrumental Ensemble Techniques. (1) Prerequisite(s): MUSC 3134 with grade of C or above. An introduction to the band and orchestra instruments most often found in school instrumental music programs for pre-service choral/general music teachers. Students explore how to effectively rehearse, manage, and perform with an instrumental ensemble. Students also explore the acoustics, sound production, and basic techniques of instruments in the brass, woodwind, string, and percussion families.

MUSC 4132. Guitar Pedagogy and Literature. (3) Prerequisite(s): MUSC 2400 or permission of instructor. A survey of teaching methods, historical and pedagogical texts, and literature for guitar.

MUSC 4133. Wind Pedagogy and Literature. (3) Prerequisite(s): MUSC 2400 or permission of instructor. A survey of teaching methods, historical and pedagogical texts, and literature for woodwind and brass instruments.

MUSC 4134. String Pedagogy and Literature. (3) Prerequisite(s): MUSC 2400 or permission of instructor. A survey of teaching methods, historical and pedagogical texts, and literature for string instruments.

MUSC 4135. Percussion Pedagogy and Literature. (3) Prerequisite(s): MUSC 2400 or permission of instructor. A survey of teaching methods, historical and pedagogical texts, and literature for percussion instruments.

MUSC 4136. Keyboard Pedagogy and Literature. (3) Prerequisite(s): MUSC 2400 or permission of instructor. A survey of teaching methods, historical and pedagogical texts, and literature for keyboard instruments.

MUSC 4137. Vocal Pedagogy. (3) Prerequisite(s): MUSC 2400 or permission of instructor. A methodology course designed to present the physiological and acoustical bases for a coherent approach to the teaching of singing. Areas of vocal technique to be studied include the physiology of the voice, posture, breathing, onset of sound, articulation, vocal registration, and other related areas.

MUSC 4138. Jazz Pedagogy and Materials. (3) Prerequisite(s): MUSC 2400 or permission of instructor. The teaching and conducting of public school instrumental and vocal jazz ensembles, including rehearsal techniques, concert presentation, the history and theory of jazz, sources for appropriate teaching materials and improvisation techniques. Field work required.

MUSC 4149. Violin Pedagogy. (3) Prerequisite(s): MUSC 2400 or permission of instructor. Corequisite(s): MUPF 3249. A methodology course outlining the teaching techniques, materials, and related literature necessary for offering private instruction on the violin.

MUSC 4153. Advanced Vocal Pedagogy. (3) Prerequisite(s): MUSC 4137 with grade of C or above or permission of instructor. An advanced course studying the practical aspects of teaching voice, including problem-solving techniques, comparison of various teaching methods, psychology of teaching voice, age-specific teaching techniques, use of movement, and vocalize analysis.

MUSC 4230. Form and Analysis. (3) Prerequisite(s): MUSC 2230 with a grade of C or above, or permission of instructor. The impact of form, process, and other musical elements on the analysis and interpretation of music. A detailed examination of common practice forms including but not limited to Binary, Ternary, Rondo, Theme and Variations, and Sonata form, as well as more recent forms from a variety of styles from the 20th/21st centuries. Chromatic harmony will be discussed in relation to pieces analyzed over the course of the semester.

MUSC 4231. Post-Tonal Processes. (3) Prerequisite(s): MUSC 4230 with grade of C or above or permission of instructor. The study of contemporary art music through the implementation of a variety of analytical techniques including but not limited to modal analysis, set theory, and serial analysis. This course features an exploration of post-tonal styles including but not limited to Impressionism, Modernism, Neoclassicism, Post-Serialism, Minimalism, and Neo-Romanticism.

MUSC 4234. Jazz Arranging and Composition. (3) Prerequisite(s): MUSC 2230 and MUSC 2235, with grades of C or above, or permission of instructor. The study of arranging and orchestration techniques in the jazz style. Detailed analysis of historically important music scores for jazz combo and jazz ensemble. Instrument ranges, scoring techniques, and advanced harmonic substitutions are addressed. Combo and large ensemble writing projects are assigned.

MUSC 4235. Orchestration and Arranging. (2) Prerequisite(s): MUSC 2230 with a grade of C or above, or permission of instructor. Orchestration and the techniques used to transcribe and arrange music for vocal and instrumental ensembles with a focus on writing and performance.

MUSC 4240. Composition. (2) Prerequisite(s): MUSC 4235 with grade of C or above and permission of instructor. An introduction to

compositional techniques of melody, harmony, rhythm, form, and instrumentation with an emphasis on writing, listening, and performance. *May be repeated for credit.*

MUSC 4241. Advanced Composition. (2) Prerequisite(s): MUSC 4240 with grade of C or above or permission of instructor. The advanced study of composition, including process, form, pitch and rhythmic organization, and instrumentation. The course consists of advanced private instruction, a one-hour lesson per week, focusing exclusively on the writing and performance of original compositions. *May be repeated for credit.*

MUSC 4298. Jazz History. (3) Prerequisite(s): MUSC 2230 with a grade of C or above, or permission of instructor. The study of significant musicians and literature in the history of jazz. Detailed analyses of influential scores and recordings constitute a significant part of the course. Written projects such as research and listening reaction papers will be assigned.

MUSC 4410. Senior Music Internship. (2 to 4) Prerequisite(s): Permission of department. Provides a meaningful work experience in any music or music-related field. Enrollment for two credit hours requires a minimum of 50 hours of supervised employment. Enrollment for three credit hours requires a minimum of 100 hours of supervised employment. Enrollment for four credit hours requires a minimum of 150 hours of supervised employment. Proposal forms must be completed and approved prior to registration. *May be repeated for credit up to 4 credit hours.*

MUSC 4800. Senior Project Preparation. (1 to 3) Prerequisite(s): Permission of department. The preparation of an independent project. Proposal forms must be completed and approved prior to registration. *May be repeated for credit up to 3 credit hours.*

MUSC 4900. Music Capstone. (0) Completion of a Senior Music Internship or a Senior Project. *Graded on a Pass/No Credit basis.*

Neurodiagnostics and Sleep Science (NDSS)

NDSS 2101. Introduction to Sleep Medicine. (3) An introduction to sleep science by examining the history of the profession of sleep medicine, basic principles of sleep medicine practice and procedures. The current structure, limitations, political climate and future considerations for the profession are also discussed.

NDSS 3101. Pathophysiology of Sleep, Neurological, and Related Disorders. (3) Prerequisite(s): NDSS major. Explores the diseases affecting the nervous system, the sleep/wake cycle, and psychiatric and behavioral disorders. Topics include: etiology, clinical manifestations, pharmacology, disease prevention, and overview of treatments.

NDSS 3102. Neurological and Sleep Diagnostic and Therapeutic Methods, and Monitoring Services. (3) Prerequisite(s): NDSS major. Explores the services available at sleep and neurophysiology laboratories and interpretation of diagnostic findings. Topics include: sleep procedures, and electroencephalography/long-term epilepsy monitoring. Students participate in laboratory practice sessions.

NDSS 3104. Advanced Sleep and Neurodiagnostic Clinical Procedures. (3) Prerequisite(s): NDSS major; NDSS 3101 and NDSS 3102 with grades of C or above. Explores advanced clinical procedures performed in sleep centers and neurophysiology laboratories. Topics include: patient assessment, suggested immobilization test, ambulatory EEG, actigraphy, portable monitoring, dental sleep medicine, nocturnal ventilator support, and current issues and trends. Laboratory sessions provide practical experience in advanced clinical procedures in neurodiagnostics and sleep science.

NDSS 3405. Neurodiagnostics and Sleep Science Practicum. (3) Prerequisite(s): NDSS major; NDSS 3104 with grade of C or above. Sleep disorders center and clinical neurophysiology laboratory clinical experience.

NDSS 3900. Undergraduate Research. (1 to 3) Prerequisite(s): Permission of program faculty. Enables majors to initiate research projects in their respective fields of interests. The student's work assignments are designed by the student and faculty member who oversee the project of study. Credit hours are determined prior to enrollment and are based on the particular project undertaken. *May be repeated for credit with change of topic.*

NDSS 4101. Principles and Practice of Healthcare Education. (3) Prerequisite(s): NDSS major; NDSS 3101 with grade of C or above. Provides a foundation in the principles and practice of healthcare education. Topics include: the educational process, learner characteristics, and teaching and learning theories, techniques and strategies.

NDSS 4104. Advanced Physiological Monitoring and Data Acquisition. (3) Prerequisite(s): NDSS major; NDSS 3104 with grade of C or above. Explores the advanced clinical procedures performed in clinical neurophysiology laboratories and operating rooms. Topics include: nerve conduction velocity testing, autonomic testing, electronystagmography, visual, brainstem, auditory and somatosensory evoked potentials intraoperative neurophysiologic monitoring and maintenance. Laboratory sessions provide practical experience in neurophysiologic monitoring techniques.

NDSS 4406. Neurodiagnostics and Sleep Science Internship. (3) Prerequisite(s): NDSS major; NDSS 4101 and RESP 4102 with grades of C or above. Sleep and clinical neurophysiology laboratory educational/management internship with mentoring component.

NDSS 4107. Neurodiagnostics and Sleep Science Capstone. (6) Prerequisite(s): NDSS major; NDSS 3405, NDSS 4104, and NURN 4201 with grades of C or above. Students complete a project and presentation culminating from the undergraduate course of study. Project topics provide students the opportunity to summarize, evaluate, and integrate knowledge gained throughout the undergraduate major.

NDSS 4201. Information Technology and Analytics in Neurodiagnostics and Sleep Science. (2) Focuses on information technology and analytics used specifically in neurodiagnostics and sleep science, including storage records, acquiring software requirements, and record transmission. The requirements and analytics of interoperative monitoring, long-term monitoring, epilepsy monitoring, WADA testing,

and long-term Polysomnography acquisition, storage, sharing, and accreditation guidelines are examined.

Nursing: RN-to-BSN (NURN)

NURN 3103. Concepts of Professional Nursing Science. (3) Prerequisite(s): Admission to the RN-BSN Program or permission of instructor. Introduces professional nursing with emphasis on theoretical, ethical, and legal models guiding practice.

NURN 3104. Issues in Cultural Health. (1) Prerequisite(s): Admission to the RN-BSN Program or permission of instructor. Exploration of concepts and models of cultural health. Analysis of current issues related to culture and healthcare and the impact on provision of nursing care.

NURN 3108. Health Assessment for Nurses. (3) Prerequisite(s): Admission to the RN-BSN Program or permission of instructor. Evaluation of human function using interview and physical examination data within a framework for clinical decision making. Competencies necessary for holistic health assessment across the lifespan.

NURN 4100. Aging and Health. (3) Prerequisite(s): Admission to the RN-BSN Program or permission of instructor; NURN 3103; NURN 3104; and NURN 3108. Examination of physiological process of aging as a normal life experience. Study of psychological, nutritional, and general health issues designed to facilitate high-level wellness.

NURN 4192. Enhancing Clinical Judgment. (3) Prerequisite(s): Admission to the RN-BSN Completion option or permission of instructor. Enhances student's ability to make sound nursing clinical judgments. Students have the opportunity to (a) reflect on their own style of thinking, (b) examine the role of critical thinking in making clinical judgments, (c) learn strategies for enhancing critical thinking and clinical reasoning, (d) practice applying the strategies in a variety of case studies, (e) critically study their own clinical practice, and (f) benefit from learning via on-line group discussion with peers.

NURN 4201. Information Technology: Applications in Healthcare. (2) Prerequisite(s): Upper-division standing or permission of instructor. A study of the use of computers and information technology in healthcare. Emphasis is placed on development of the knowledge and competencies necessary for selective use of evaluation of informatics, computer technology and data management in healthcare.

NURN 4203. Leadership in Nursing Practice. (2) Prerequisite(s): Admission to the RN-BSN Program or permission of instructor; NURN 4100; NURN 4201; and NURN 4440. Exploration of societal and professional trends and issues affecting nursing and healthcare. Leadership strategies within the profession and practice of nursing. Analysis of care that supports effective utilization of the healthcare delivery system. Health system mediation and health system management is explored from a nursing intervention perspective.

NURN 4440. Community Health Nursing. (6) Prerequisite(s): Admission to the RN-BSN Program, NURN 3103, NURN 3104, and NURN 3108. Development of competencies for the nursing care management of individuals, families, and populations within communities with emphasis

on the nurse's role in health promotion and maintenance and focus on risk identification and reduction throughout the lifespan.

NURN 4450. Design and Coordination of Care. (6) Prerequisite(s): Admission to the RN-BSN Program, NURN 4100, NURN 4201, and NURN 4440. Application of theory-based practice in a variety of settings with clients who have multiple healthcare needs. Emphases are on clinical judgment and decision-making, diagnostic reasoning, clinical ethics, collaboration and case management. Examination of nursing therapeutics within the structure of nursing process and nursing diagnosis.

NURN 4900. Research in Nursing Practice. (2) Prerequisite(s): Admission to the RN-BSN Program or permission of instructor; NURN 4100; NURN 4201; and NURN 4440. Exploration of the theoretical foundations of nursing with emphasis on research, theories, concepts and processes leading to their application in practice.

Nursing (NURS)

NURS 2100. General Nutrition. (2) Prerequisite(s): CHEM 1204 or 1252. A solid knowledge base of general nutrition viewed from a life cycle perspective. Exploration of behavioral aspects and scientific concepts related to nutrition. Open to Pre-nursing majors, Sophomore, Junior, or Senior standing.

NURS 2200. Human Growth and Development. (3) Pre- or Corequisite(s): Pre-Nursing major, Sophomore, Junior, or Senior standing; and BIOL 2273 and BIOL 2273L, or EXER 2168 and EXER 2168L. Study of the developing person through the lifespan by examining the relationship of selected environmental and social factors to human growth and development. Consideration of the meaning of health and illness to the individual, the family, and the community within the context of life as a continuing, dynamic process from conception through death.

NURS 3102. Introduction to Nursing Science. (3) Prerequisite(s): Admission to the Nursing major. An introduction to the theoretical and scientific basis of nursing practice, including an overview of the profession and examination of major concepts, theories, and models.

NURS 3105. Concepts of Professional Nursing. (3) Prerequisite(s): Admission to the Nursing major. Corequisite(s): NURS 3108. Concepts and standards fundamental to professional nursing practice. Explores the unique role of nursing in the healthcare system.

NURS 3107. Pathophysiology: Clinical Concepts of Illness and Disease. (3) Prerequisite(s): Admission to the Nursing major. Conceptual basis of alterations in physiological processes that disrupt or impair health and the body's response to illness and disease. Building on knowledge obtained in previous courses in the biological and social sciences, this course provides a foundation for building critical thinking skills in the differentiation of disease and illness.

NURS 3108. Health Assessment and Application. (3) Prerequisite(s): Admission to the Nursing major. Pre- or Corequisite(s): NURS 3105 and NURS 3107. Evaluation of human function using interview and physical examination data within a framework for clinical decision making.

Competencies necessary for holistic health assessment across the lifespan.

NURS 3205. Pharmacology in Health and Illness. (3) Prerequisite(s): Admission to the Nursing major and NURS 3107 or permission of instructor. Presentation of the theoretical base for the safe and therapeutic use of drugs. Examination of Pharmacologic agents commonly used in health and illness and the standards and societal controls of drugs are explored.

NURS 3230. Illness and Disease Management. (3) Prerequisite(s): Admission to the Nursing major. Corequisite(s): NURS 3430. Focus on health promotion strategies and nursing interventions appropriate for planning care of adult clients with basic pathophysiological alterations.

NURS 3250. Nursing Care of the Childbearing Family. (2) Prerequisite(s): Junior 1 Nursing Courses. Corequisite(s): NURS 3440. Foundations of nursing care of families during the childbearing year. Emphasis on the nurse's role in health assessment, health promotion and promotion of adaptive processes of the individual and family during pregnancy, birth, transition to parenthood, and the newborn period, including alterations in health status.

NURS 3260. Nursing Care of Children. (2) Prerequisite(s): Junior 1 Nursing Courses. Corequisite(s): NURS 3440. Foundations of nursing care of children and families during the childrearing years. Emphasis on the nurse's role in health assessment, health promotion and promotion of adaptive processes of the child and family during childhood from infancy to adolescence, including alterations in health status.

NURS 3425. Practicum in Concepts of Professional Nursing. (2) Prerequisite(s): Admission to the Nursing Major. Corequisite(s): NURS 3105 and NURS 3108. This clinical course introduces the application of concepts, skills and values fundamental to professional nursing practice.

NURS 3430. Practicum Illness and Disease Management. (3) Prerequisite(s): Admission to the Nursing Major and NURS 3108. Pre- or Corequisite(s): NURS 3230. Clinical practice in healthcare settings that correlates with theoretical content related to basic pathophysiological alterations. Students will provide care in diverse clinical settings to develop psychomotor skills and apply knowledge in making clinical decisions.

NURS 3440. Practicum in Nursing Care of Children and the Childbearing Family. (3) Prerequisite(s): Admission to the Nursing Major and NURS 3108. Development of competencies essential for the nursing care of families during the childbearing and childrearing years. A variety of clinical experiences are provided, including community-based care, patient education, and in-patient care, with an emphasis on family-centered nursing practice.

NURS 3700. Creating and Sustaining Change in Nursing. (2) Prerequisite(s): Admission to Nursing major and Nursing honors program, and permission of the instructor. Introduces students to the use of outcomes data to assess the need for change, allows students to explore state and national databases to evaluate organizational quality outcomes, provides an overview of nursing and change theories to guide the process of change, and introduce methods of overcoming resistance to change. Students identify a topic, develop a PICOT question, conduct a review of the literature, and initiate a plan for implementing a small test

of change, research, quality improvement, or health promotion project. Topics, question, literature review, and plan framework must be approved by course faculty.

NURS 3895. Independent Study in Nursing. (1 to 4) Prerequisite(s): Permission of instructor. Directed individual study in a selected aspect of nursing which is explored in greater depth than included in the planned curriculum. *May be repeated for credit with change of focus.* No more than six hours in NURS 3895 may be counted toward degree requirements.

NURS 4000. Topics in Nursing. (1 to 3) Prerequisite(s): Permission of instructor. Critical examination of selected current topics in nursing.

NURS 4100. Nursing Care of the Aging Adult. (3) Prerequisite(s): Senior standing in the Nursing Program. Examination of the processes of aging. Study of the nursing care for healthy, aging adults; frail, aging adults; institutionalized, aging adults; and dying, aging adults.

NURS 4120. Psychiatric Mental Health Nursing. (3) Prerequisite(s): Admission to the Nursing major, NURS 3430, and NURS 3440. Corequisite(s): NURS 4420. The foundation of Psychiatric Mental Health Nursing with emphasis on biopsychosocial content in the understanding and care of acute and chronic and chemically dependent clients.

NURS 4130. Complex Illness and Disease Management. (3) Prerequisite(s): Admission to the Nursing Major and NURS 3230. Corequisite(s): NURS 4430. Illness and disease management of adult patients with complex pathophysiological alterations. Focus is on care management of clients with complex and pathophysiological health needs.

NURS 4203. Leadership and Informatics for Nursing Practice. (3) Prerequisite(s): Admission to the Nursing Major. Corequisite(s): NURS 4450. Introduction to leadership focusing on healthcare systems and the nurse's role. Explore external and internal forces that affect the work environment and how to influence those forces. Discuss the work environment that best motivates people and creates an atmosphere that inspires, instills confidence and sustains individuals. Incorporate understanding of self to enhance beginning leadership.

NURS 4240. Population Focused Nursing. (3) Prerequisite(s): Admission to the Nursing Major. Corequisite(s): NURS 4440. Examination and analysis of concepts and theories related to care of populations. Focuses on health indicators and risk reduction in multiple groups across the lifespan and development of community partnerships within healthcare systems.

NURS 4420. Practicum in Psychiatric Mental Health Nursing. (3) Prerequisite(s): Admission to the Nursing Major. Corequisite(s): NURS 4120. Development of competencies necessary for the practice of psychiatric mental health nursing. Emphasis is on the use of self in relationships, psychiatric nursing assessment, nursing interventions with clients and working as a member of the healthcare team. A variety of clinical settings are used.

NURS 4430. Practicum in Complex Illness and Disease Management. (3) Prerequisite(s): Admission to the Nursing Major, NURS 3230, and NURS 3430. Corequisite(s): NURS 4130. Clinical practice in healthcare settings that correlate with theoretical content related to complex

pathophysiological alterations. Students provide care in diverse clinical settings to continue to develop psychomotor skills and apply knowledge for clinical decision-making and reasoning.

NURS 4440. Practicum in Population Focused Nursing. (2) Prerequisite(s): Admission to the Nursing Major. Corequisite(s): NURS 4240. Development of competencies related to care of multiple populations. Clinical experiences occur in a variety of communities and agencies that provide opportunities for interdisciplinary experiences.

NURS 4450. Design and Coordination of Care. (3) Prerequisite(s): Admission to the Nursing Major and NURS 4430. Corequisite(s): NURS 4203. Clinical application of knowledge and skills in the design, management, and coordination of care for clients in a variety of healthcare settings. Precepted clinical experience with written clinical decision making projects.

NURS 4600. Professional Nursing: Trends, Issues, and Licensure. (3) Corequisite(s): NURS 4203 and NURS 4900. Current trends and issues that impact a variety of aspects of the nursing profession. Analysis of professional nursing practice in relation to current trends and issues. Required components for professional licensure in nursing, including preparation for the NCLEX-RN exam. Strategies for role transition from nursing student to professional nurse.

NURS 4900. Research in Nursing Practice. (2) Prerequisite(s): Admission to the Nursing Major. Exploration of research methodologies relative to nursing practice, with emphasis on research utilization and evidence-based practice.

Operations and Supply Chain Management (OPER)

OPER 3000. Topics in Operations Management. (3) Prerequisite(s): OPER 3100 with grade of C or above. Topics from the areas of Operations Management. The course *May be repeated for credit.*

OPER 3100. Operations Management. (3) Prerequisite(s): ACCT 2121, ACCT 2122 or ACCT 3323, ECON 2101, ECON 2102, INFO 2130, MATH 1120, and STAT 1220 with grades of C or above; College of Business major; and Junior or Senior standing. Introduction to and development of the management functions in manufacturing and non-manufacturing organizations. A systems approach to the organizational environment, the basic operating functions, the problems and decisions a manager encounters and solution techniques and models. Computer applications are included where appropriate.

OPER 3201. Operations Planning and Control. (3) Prerequisite(s): OPER 3100 with grade of C or above; and Management Information Systems or Operations and Supply Chain Management major or minor, or permission of department. An in-depth study of production planning and control activities in an enterprise resource planning context. Topics covered include: forecasting, operations and capacity planning, master production scheduling, material requirements planning, production activity control, inventory management, and Just-in-Time inventory systems. The use of software to manage operations and the interactions between operations and other functional areas of a business will be emphasized.

OPER 3203. Decision Modeling and Analysis. (3) Prerequisite(s): OPER 3100 with grade of C or above; and Business Analytics, Management Information Systems, or Operations and Supply Chain Management major or minor, or permission of department. Analytical approach to understanding the management process and solving management problems with emphasis on model formulation, solution techniques, and interpretation of results. Topics include: techniques such as linear, integer, goal, and multi-objective programming; queuing theory and applications; decision support via Monte Carlo simulation; decision making under uncertainty and risk; decision trees; and multi-criteria decision making. Microsoft Excel is the main analytical tool.

OPER 3204. Management of Service and Project Operations. (3) Prerequisite(s): OPER 3100 with grade of C or above; and Management Information Systems or Operations and Supply Chain Management major or minor, or permission of department. Examines both strategic and operational decision making in service management with emphasis on the latter. Topics include: service strategy, designing new services, assessing and improving service quality, improving the efficiency and effectiveness of service processes, service process design and service facility location, managing waiting lines, managing service projects, and the integration of technology into service operations.

OPER 3206. Quality Assurance and Management. (3) Prerequisite(s): OPER 3100 with grade of C or above; and Management Information Systems or Operations and Supply Chain Management major or minor, or permission of department. A study of management philosophy, practices and analytical processes implemented in quality planning and administration of products and services. Topics include: corporate culture, quality design, human factors and motivation, quality cost analyses and auditing, service quality, quality assurance, quality circles, and conformance to design.

OPER 3208. Supply Chain Management. (3) Prerequisite(s): OPER 3100 with grade of C or above; and Management Information Systems or Operations and Supply Chain Management major or minor, or permission of department. A study of supply chain management concerned with all of the activities performed from the initial raw materials to the ultimate consumption of the finished product. Examines the major aspects of the supply chain: the product flows; the information flows; and the relationships among supply chain participants. Topics include: supply chain information technologies, supply chain design, strategic alliances between supply chain participants, and supply chain initiatives.

OPER 3400. Operations and Supply Chain Management Internship. (3) Prerequisite(s): Junior or Senior in good standing and department approval. Provides a meaningful work experience in the field of operations and/or supply chain management. Requires a minimum of 150 hours of supervised employment, 50 hours of work per credit hour. Students are responsible for securing internship and completing internship application and approval process prior to registering for the course. Internship must be approved by instructor. Application process and course registration must be completed prior to beginning internship. All proposals are subject to departmental approval. Students may not earn internship credit for work at a current employer. May be used to meet requirements of a major elective, up to a maximum of three credit hours. *May not be repeated for credit. Graded on a Pass/No Credit basis.*

OPER 3500. Operations and Supply Chain Management Cooperative Education Experience. (0) Prerequisite(s): Operations and Supply Chain Management major. Enrollment in this course is required for the department's cooperative education students during each semester they are working in a position. Participating students pay a course registration fee for transcript notation. Assignments must be arranged and approved in advance. The Cooperative Education Program is only open to undergraduate students; graduate level students are encouraged to contact their academic departments to inquire about academic or industrial internship options for credit. For more information, contact the University Career Center. *Course may be repeated. Graded on a Satisfactory/Unsatisfactory basis.*

OPER 3800. Directed Study. (1 to 6) Prerequisite(s): Permission of department and Junior or Senior standing. Enrollment granted only by permission of the faculty with whom the work will be performed. The student's work assignments will be designed by the student and faculty member who will oversee the project of study. The credit hours will be determined prior to enrollment and will be based on the particular project undertaken.

Operations Research (OPRS)

OPRS 3111. Operations Research: Deterministic Models. (3) Cross-listed Course(s): SEGR 3201. Prerequisite(s): MATH 1242 or MATH 2120; and MATH 2164. Linear, integer and dynamic programming, the simplex method, networks, PERT and CPM techniques, game theory, and applications.

OPRS 3113. Operations Research: Probabilistic Models. (3) Cross-listed Course(s): SEGR 3202. Prerequisite(s): MATH 1242 or MATH 2120; MATH 2164; and STAT 2122, STAT 3122, STAT 3128, or MATH 3122. Queuing models, inventory models, simulation, markov chains, decision analysis, game theory and probabilistic dynamic programming.

OPRS 4113. Game Theory. (3) Prerequisite(s): OPRS 3111; and MATH 3122, OPRS 3113, STAT 2122, or STAT 3122. The theory of zero-sum matrix games, mini-max theorem, optimal strategies, symmetric games, economic models, infinite, separable, polynomial, multi-stage, general-sum and in-person games. A project is required of all graduate students.

OPRS 4114. Dynamic Programming. (3) Prerequisite(s): ITCS 1214; OPRS 3111; and MATH 3122, OPRS 3113, STAT 2122, or STAT 3122. The identification of dynamic programming problems and their solution in terms of recurrence relations. Elementary path problems, resource allocation, shortest path, traveling salesmen problem, discrete-time optimal control, replacement models, and inventory systems. A project is required of all graduate students.

Philosophy (PHIL)

PHIL 1502. Global Arts/Humanities: Global and Comparative Philosophy. (3) This Global Theme course uses the methods and insights of the arts and humanities to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of a complex,

interconnected world. This course introduces students to philosophical reflection and activity as sets of practices spanning a variety of historical, cultural, and national contexts. Students may explore questions such as how different cultures and communities understand and experience knowledge, ethics, injustice, death, humor, the self, or the good life.

PHIL 1512. Local Arts/Humanities: Philosophy and Community. (3) This Local Theme course uses the methods and insights of the arts and humanities to explore the central question of what it means to be a member of a “local” community. Through the study of the experiences of different peoples, societies, cultural traditions, and modes of expression in communities at the city, regional, or national level students will be able to better understand the complexity and diversity of the society in which we live. This course involves philosophical reflection on the processes and structures that shape how people live, struggle, and make progress together in a set of overlapping communities. Students may explore questions such as how different cultures and communities understand and experience love and sex, healthcare, technology, democracy, or freedom.

PHIL 2100. Critical Thinking in Philosophy. (3) Cross-listed Course(s): LEGL 1105. Fundamental skills of clear thinking that help students reason better during communication, problem-solving, and design, particularly as these integrate scientific/engineering efforts with social needs and values. Focuses on clarifying goals, identifying constraints, and generating and evaluating ideas or solutions.

PHIL 2105. Deductive Logic. (3) Cross-listed Course(s): LEGL 2105. Principles of deductive logic, both classical and symbolic, with emphasis on the use of formal logic in analysis of ordinary language discourse.

PHIL 2220. Healthcare Ethics. (3) Major ethical dilemmas within medical science and biology are examined to assist students to identify, analyze, and decide ethical issues in such a way that they can defend their positions to themselves and others. Issues include reproductive and genetic technology, death and dying, patient rights, and justice in distribution of healthcare benefits and burdens.

PHIL 3009. Major Figure in Philosophy. (3) An investigation into the thoughts and writings of a major figure in philosophy with special emphasis on primary sources. Included may be Plato, Aristotle, Descartes, Kant, Marx, Nietzsche, Heidegger, Quine, Davidson, Rawls, and others as indicated by departmental needs and interests. *May be repeated for credit.*

PHIL 3019. Topics in History/Genealogy. (3) Specific topics in the history/genealogy of philosophy. *May be repeated for credit with permission of department.*

PHIL 3039. Topics in Ethics/Aesthetics. (3) Specific topics in Ethics/Aesthetics. *May be repeated for credit with permission of department.*

PHIL 3059. Topics in Knowledge/Language. (3) Specific topics in the Knowledge/Language. *May be repeated for credit with permission of department.*

PHIL 3079. Topics in Identity/Society. (3) Specific topics in Identity/Society. *May be repeated for credit with permission of department.*

PHIL 3201. Ancient Philosophy. (3) Western intellectual and philosophic thought from the early Greeks to the post Aristotelian period, often with an eye to issues in contemporary philosophy. Readings from the pre Socratics, Plato, Aristotle, Epicureans, Stoics, Skeptics, and Neoplatonists.

PHIL 3202. Modern Philosophy. (3) Modern philosophic and scientific thought from Descartes to Kant. Readings selected from representative works in the 17th and 18th centuries.

PHIL 3203. Nineteenth-Century Philosophy. (3) Examination of some central problems, issues, and methodologies of Nineteenth-Century Philosophy, including from some more contemporary perspectives, such as feminism. Examination may include: German Idealism (e.g., Fichte, Schelling, Hegel, Schopenhauer), Early Existentialism (e.g., Kierkegaard, Nietzsche), Early Phenomenology (e.g., Balzano, Brentano), Social Philosophy (e.g., Comte, Feuerbach, Bentham, Mill, Marx), and American Philosophy (e.g., Peirce, James, Washington, DuBois).

PHIL 3204 Twentieth-Century Philosophy. (3) Examination of some central problems, issues, and methodologies of Twentieth-Century Philosophy. Examination may include: pragmatism, phenomenology, logical analysis, existentialism, ordinary language philosophy, critical theory, hermeneutics, structuralism, or post-structuralism.

PHIL 3211. Latin American Philosophy. (3) A survey of central texts and movements within Latin American philosophy. Themes of the course include pre-colonial Indigenous metaphysics, political philosophy within conquest-era debates and nation-building projects, Afro-Latin American movements, Latin American feminist philosophy, and philosophical lessons from decolonial and anti-imperial projects across Latin America.

PHIL 3212. American Philosophy. (3) Analyzes the question of what constitutes American Philosophy, examining the interaction between America and philosophy and exploring some of the characteristics that may help contribute to the characterization of American Philosophy including: individualism, community, practicality, fallibility, and meliorism. Critically examines the narrative of American philosophy, focusing on pragmatism, America's distinctive contribution to philosophy, and assesses the role that American philosophy has, can, and should play concerning social and cultural issues in America.

PHIL 3213. Existentialism. (3) Existentialist tradition in philosophy and literature including such issues as: authenticity, absurdity and the meaning of life, freedom and morality, anguish, death, and atheism.

PHIL 3221. Ethical Theory. (3) Selective examination of major normative and metaethical theories that undergird our practical judgments about morally right actions and virtuous persons. Normative theories studied may include virtue ethics, deontology, consequentialism, and representative feminist theories. Metaethical theories studied may include cognitivism, expressivism, realism, and error theory.

PHIL 3222. Environmental Ethics. (3) Critical reflection on the relationship between humans and the natural world through a survey of philosophical perspectives on the environment. Topics may include the moral status of animals, our duties to future generations, whether nature is valuable independently of human needs and desires, sustainability and

economics, environmental injustice, food ethics, and/or debates over climate change.

PHIL 3223. Foundations of Ethics. (3) You are a moral being. You reason with yourself and others about what you morally ought to do and you use moral language to express these thoughts and feelings. But when you step back from these phenomena and ask questions about them, you are not theorizing about ethics but about the foundations of ethics. You are engaged in what has come to be called "metaethics," the topic of this course.

PHIL 3231. Aesthetics. (3) Discussion and analysis of major theories of art ranging from historical figures (Plato, Aristotle, Hume, Kant, Nietzsche, and Dewey) to contemporary philosophers (Sontag, Danto, Kristeva, and Ranciere). Emphasis will be on the development of aesthetics in relation to the visual and performing arts, new media, and philosophy, but also in response to social-political-cultural issues, such as feminism, racism, and the like.

PHIL 3241. Knowledge and Reality. (3) An examination of interrelated issues concerning belief, justification, knowledge, and existence and the implications of these for broader philosophical issues. "Narrower" issues may include: What is the source of our beliefs? How do these sources affect our determinations of what fundamentally exists and what those things are like? How do our assumptions about what exists affect the objects and methods of knowing? When do beliefs become knowledge? Are there some things about the world that we cannot know about? Broader issues may include: What kind of thing is a mind or a self? How does such a thing fit into a natural world? What can non-human animals or computers tell us about intelligence? In what sense can collective entities engage in intentional behavior?

PHIL 3242. Philosophy of Mind. (3) An exploration of epistemological, metaphysical, and ethical questions concerning the mind. The main focus is on the possibility of integrating classic philosophical perspectives with contemporary research in cognitive science. Topics include: the descriptive/normative relation, the connection between philosophy and science, the plausibility of the mind and/or brain as a computational, symbol-manipulating system, including cases in which ethical consequences emerge from this orientation, and other topics such as consciousness, free will and determinism, logic and language, emotion and reasoning, and rationality.

PHIL 3243. Philosophy of Religion. (3) Cross-listed Course(s): RELS 3242. Philosophical implications of religious experience including the definitions, development, and diverse forms of the problems of belief and reason in modern thought.

PHIL 3251. Advanced Logic. (3) Advanced systems of logic, with emphasis upon symbolic logic and formal systematic characteristics such as axiomatics and proof techniques.

PHIL 3252. Philosophy of Language. (3) An inquiry into the nature of language and its use in actual practice. Discussion will focus on theories of meaning and their relations to the fields of logic and linguistics, and will address special topics such as linguistic creativity and linguistic violence.

PHIL 3253. Science, Knowledge, and Values. (3) What is science, anyway? Is there a scientific method? Do values have a place in science?

In this course we will deal with these questions and more. Topics may include distinguishing science from other forms of inquiry, how scientists model and explain phenomena, how new scientific theories emerge, and debates over the role of values in scientific research.

PHIL 3254. History and Philosophy of Biology. (3) How do genes and environments shape organisms? What is the relationship between biology and culture? What led Darwin to develop his theory of evolution in the first place? This class will examine these questions and more. Topics may include Darwin and his intellectual influences, debates over the causes of evolution, key concepts such as "organism" and "function," and the social implications of biological theories.

PHIL 3261. Feminist Philosophy. (3) Cross-listed Course(s): WGST 3820. Overview of feminist critiques of the philosophical canon, contemporary feminist work on philosophical topics (e.g., feminist epistemology, feminist aesthetics, etc.), and philosophical work on topics such as gender, sexuality, and intersectionality. Critical race, postcolonial, and global feminisms will also be studied.

PHIL 3262. Philosophy and Race. (3) Cross-listed Course(s): AFRS 3262. Examines the role of the concept of race in the Western philosophical canon, and uses current philosophical texts and methods to examine Western discourses of race and racism. Issues such as whiteness, double consciousness, the black/white binary, Latino identity and race, ethnicity, mixed-race identity, and the intersection of race with gender and class are also examined.

PHIL 3263. Philosophy and Disability. (3) Introduction to a variety of philosophical issues surrounding disability. Topics may include definitions of disability, its social and material cultures, debates in bioethics, the epistemic status of disabled lived experiences, and the relationships between disability, technology, race, and gender.

PHIL 3271. Social and Political Philosophy. (3) Cross-listed Course(s): LEGL 3810 and POLS 3177. Examination of basic concepts involved in understanding the nature and structure of political and social formations. Issues may include topics such as justice, human rights, the nature of political power, and the relations between individuals and political/social institutions. Readings from historical and/or contemporary sources, and may include figures such as Plato, Hobbes, Marx, Rawls, Arendt, Foucault, and Butler.

PHIL 3272. Philosophy of Technology. (3) Examination of basic concepts and controversies in philosophical discussions of technology. Issues may include relations between technology and nature (and/or human nature), technological determinism, the prospects for intelligent and/or democratic control of particular technologies, and normative issues such as technological systems of social control.

PHIL 3273. Philosophy and the Body. (3) Opportunity to explore the implications of the Eastern and Western philosophical literature on what the body means to individuals and societies. Philosophical readings about the body's relationship to the mind, politics, happiness, social interaction, and education will be explored through lecture, discussion, and writing.

PHIL 3274. Philosophy of Education. (3) Exploration of classic Western approaches to education and the contemporary moral problems faced by

America's schools. Issues to be considered are the effect of race, class, and gender on school culture and teacher preparation.

PHIL 3275. Hip Hop as Redescription. (3) A philosophical examination of hip hop culture—its origins and evolution. Students will examine many aspects, ideas, and perspectives of and on hip hop, including beats, lyrics, race, authenticity, misogyny, homophobia, commercialism, and more. Students will read about hip hop, watch hip hop videos, listen to hip hop music, and maybe even make a little hip hop.

PHIL 3279. Philosophy of Law. (3) Philosophy underlying the legal system and the Anglo-American practice of law. Topics may include what is “law”; obligation to obey the law; liberty, privacy, and tolerance; and criminal responsibility and punishment.

PHIL 3400. Internship in Ethics or Philosophy. (3) Prerequisite(s): Philosophy major or minor; successful completion of 15 or more credit hours in Philosophy; and selection by department and host organization. Field experience can include on-site visits to host companies, corporations, or agencies to investigate or contribute to ethics codes, policies, culture, and/or practices and their philosophical relevance. Background research on challenges facing the host organization today. Final reports evaluated by faculty advisor and shared with the host organization.

PHIL 3800. Independent Study. (1 to 3) Prerequisite(s): Permission of department. Directed individual study of a philosophical issue, problem, or figure(s) of special interest to the student. For approval procedures, students should see the undergraduate coordinator. *May be repeated for credit with change of topic and permission of department.* No more than six hours may apply toward the Philosophy major.

PHIL 4009. Major Figure in Philosophy. (3) An investigation into the thoughts and writings of a major figure in philosophy with a special emphasis on primary sources. *May be repeated for credit with change of topic.*

PHIL 4019. Advanced Topics in History/Genealogy. (3) Advanced topics in the history/genealogy of philosophy. *May be repeated for credit with permission of department.*

PHIL 4039. Advanced Topics in Ethics/Aesthetics. (3) Advanced study of specific topics in ethics/aesthetics. *May be repeated for credit with permission of department.*

PHIL 4059. Advanced Topics in Knowledge/Language. (3) Advanced study of specific topics in the philosophy of knowledge/language. *May be repeated for credit with permission of department.*

PHIL 4079. Advanced Topics in Identity/Society. (3) Advanced study of specific topics in the philosophy of identity/society. *May be repeated for credit with permission of department.*

PHIL 4170. Queer Theory. (3) Introduction to key issues in queer theory, a field of studies that questions and redefines the identity politics of early lesbian and gay studies by investigating the socially constructed nature of identity and sexuality and critiquing normalizing ways of knowing and being.

PHIL 4220. Data Ethics. (3) Introduction to key issues in queer theory, a field of studies that questions and redefines the identity politics of early lesbian and gay studies by investigating the socially constructed nature of identity and sexuality and critiquing normalizing ways of knowing and being.

PHIL 4230. After Auschwitz. (3) Centers around what it means to "go on"—to live and function and think—as an agent and as a human being in a world "after Auschwitz," taken expansively to refer to an entire century of genocides, mass murder, extreme violence, and depredation. Our discussion may range across topics in ethics, aesthetics, politics, theology, or metaphysics. A central feature of the course will be to approach the issue in an expansive way, so as to be able to benefit from an array of perspectives (e.g., bringing together Holocaust studies and postcolonial theory, or genocide studies and critical theory).

PHIL 4270. Indigenous Feminisms. (3) Focuses on Indigenous feminist writings that both aim toward a constructive project of maintaining and respecting Indigenous ways of life and seek to address the detrimental consequences of U.S. and Canadian settler colonialism. We begin with a theoretical analysis of key concepts such as settler colonialism, Indigeneity, gender, and institutional racism. Using these key concepts, we then examine present-day colonial formations. Lastly, we examine state-based efforts to address the needs of Indigenous communities, as well as collective strategies of resistance practiced by Indigenous women.

PHIL 4600. Senior Seminar. (3) This capstone course provides an opportunity to develop or secure a philosophical literacy for those who will end their studies of philosophy with a B.A. and for those who are interested in pursuing a graduate degree in philosophy or a related field. The course will thus help advanced students integrate their studies in philosophy, pursue their individual philosophical interests in more depth, and study philosophical texts or issues that they have not yet had a chance to cover but that are important to a well-rounded education in philosophy. The focus in the seminar will be on contemporary philosophy, though a research project may involve more historical figures or issues.

PHIL 4700. Honors Senior Seminar. (3) Prerequisite(s): Permission of department and approval of a proposal through the Honors College Application to Candidacy process the semester prior to taking the course. Cross-listed Course(s): PHIL 4600. An Honors section of the philosophy Senior Seminar which fulfills the capstone requirement for departmental honors in philosophy and the requirement for Senior Seminar for the philosophy BA. Students will conduct independent research on the philosophical topic approved on their Honors Application to Candidacy Form and produce an approximately 25 page research paper and deliver a live or video oral presentation based on that paper.

Physics (PHYS)

PHYS 1000. New Student Seminar. (1) Prerequisite(s): Physics major. An introduction to the different disciplines within physics, professional opportunities available to physics majors in industry and academia, research interests of the department, and opportunities for student research in the department. This course is required for all Physics majors. Students present both a paper and a talk about physics to their peers and complete a plan of study for their undergraduate degree.

PHYS 1100. Conceptual Physics. (3) A discovery-oriented course which covers a broad spectrum of general physics at a conceptual level, making it a suitable science elective for liberal arts students. Topics include: states of matter, kinematics and dynamics of motion, force, energy and momentum, electricity and magnetism, waves, sound, and light.

PHYS 1100L. Conceptual Physics Laboratory. (1) Pre- or Corequisite(s): PHYS 1100. Laboratory investigations illustrating experimental techniques and fundamental principles of natural phenomena. Three laboratory hours each week.

PHYS 1101. Introductory Physics I. (3) Pre- or Corequisite(s): MATH 1100 or MATH 1101 as a prerequisite or MATH 1103, MATH 1120, MATH 1121, MATH 1241 or higher as a pre- or corequisite; an equivalent math test score may also be considered. First semester of a two semester algebra-based introductory sequence in physics. Introduction to the fundamental principles of natural phenomena. Topics include: kinematics and dynamics of particles, momentum, work, energy, conservation laws, and mechanics of rigid bodies. Knowledge of basic algebra and trigonometry is needed. Three lecture hours each week.

PHYS 1101L. Introductory Physics I Laboratory. (1) Pre- or Corequisite(s): PHYS 1101. Laboratory investigations illustrating experimental techniques and fundamental principles of natural phenomena. Three laboratory hours each week. *If a student has completed PHYS 2101L with grade of C or above in in a previous semester, the student is exempted from taking PHYS 1101L.*

PHYS 1102. Introductory Physics II. (3) Prerequisite(s): PHYS 1101 with grade of C or above. Second semester of the algebra-based introductory sequence in physics. An introduction to topics in electromagnetism, optics, and nuclear physics. A knowledge of basic algebra and trigonometry is needed for this course. Three lecture hours each week.

PHYS 1102L. Introductory Physics II Laboratory. (1) Prerequisite(s): PHYS 1101L or PHYS 2101L. Pre- or Corequisite(s): PHYS 1102. A continuation of PHYS 1101L. Three laboratory hours each week. *If a student has completed PHYS 2102L with grade of C or above in in a previous semester, the student is exempted from taking PHYS 1102L.*

PHYS 1130. Introduction to Astronomy. (3) Introduction to space science, including the historical beginnings of astronomy; motions of celestial bodies; the solar system; optical and radio astronomy; structure and evolution of stars; galaxies; and cosmology. Three lecture hours each week.

PHYS 1130L. Introduction to Astronomy Laboratory. (1) Pre- or Corequisite(s): PHYS 1130. Experimental investigations relating to the

acquisition of and interpretation of astronomical data. One three-hour laboratory each week.

PHYS 1201. Sports and Physics. (3) Fundamental physics concepts are introduced and discussed using only sports-related applications, primarily golf, baseball/softball, and auto racing. Specific physics concepts include forces, Newton's Laws, conservation of energy, conservation of linear momentum, conservation of angular momentum, Bernoulli's principle for fluid flow, centripetal force, vibrations and sound, and heat transfer. In addition, an understanding of materials characteristics are important to the discussions.

PHYS 1201L. Sports and Physics Laboratory (1) Corequisite(s): PHYS 1201. Experimental investigations illustrating the physical principals related to sports activities. Laboratories include analysis of the physics involved in activities such as basketball, baseball, golf, tennis, soccer, hockey, and football.

PHYS 1202. Introduction to Physics in Medicine. (3) An introductory level course that covers the basics physics principles behind technologies currently used in medicine. Examines topics in surgical instrumentation and medical imaging (e.g., the use of lasers in medicine, MRI, ultrasound, CT scanning, and nuclear medicine.) Three lecture hours each week.

PHYS 1203. Physics of Music. (3) Fundamental physics concepts are introduced related to the production and interpretation of sound in musical instruments and the human voice. Specific concepts include forces, kinematics, energy, pressure, simple harmonic motion, fluids, traveling and standing waves, and acoustics. Relationship of physical principles to notes, scales, melody, harmony, rhythm, loudness, pitch, timbre, musical instruments, room acoustics, and recording.

PHYS 1203L. Physics of Music Laboratory. (1) Corequisite(s): PHYS 1203. Laboratory component covering topics introduced in PHYS 1203. Laboratories include the design and construction of wind and string instruments and percussion.

PHYS 1204. Light Phenomena and Technologies. (3) Introductory course that focuses on natural light phenomena and basic knowledge of light based-technologies. Topics include light's properties, light sources and detectors, optical instruments (cameras, telescopes, microscopes and more), the human eye, light in nature (why the sky is blue? The colors of starts, bioluminescence, etc.), light-based technologies (telecommunication, solar sensors, etc.), and research in optics at UNC Charlotte.

PHYS 2101. Physics for Science and Engineering I. (3) Pre- or Corequisite(s): MATH 1241 with grade of C or above. First semester of a two-semester calculus-based introductory sequence in general physics. Topics include: kinematics and dynamics of particles, momentum, work, energy, conservation laws, simple harmonic motion, and mechanics of rigid bodies. Three lecture hours each week.

PHYS 2101L. Physics for Science and Engineering I Laboratory. (1) Pre- or Corequisite(s): PHYS 2101. Experiments selected from motion on an inclined plane, circular motion, momentum and energy in collisions, torques, and conservation laws. Use of the computer for organizing, graphing and analyzing data. Two laboratory hours each week. If a

student has completed PHYS 1101L with grade of C or above in a previous semester, the student is exempted from taking PHYS 2101L.

PHYS 2102. Physics for Science and Engineering II. (3) Prerequisite(s): PHYS 2101 with grade of C or above. Pre- or Corequisite(s): MATH 1242 with grade of C or above. Second semester of the calculus-based introductory sequence in general physics. Topics include: electric charge, electric fields, and magnetic fields. Three lecture hours each week.

PHYS 2102L. Physics for Science and Engineering II Laboratory. (1) Prerequisite(s): PHYS 2101L (or 1101L). Pre- or Corequisite(s): PHYS 2102. A continuation of PHYS 2101L. Experiments selected from series and parallel circuits, RC circuits, EMF and terminal potential difference, electromagnets, and magnetic induction. Two laboratory hours each week. If a student has completed PHYS 1102L with grade of C or above in a previous semester, the student is exempted from taking PHYS 2102L.

PHYS 3101. Topics and Methods of General Physics. (3) Prerequisite(s): PHYS 2102 and MATH 1242 with grades of C or above. Integration of mathematical concepts with basic physical principals. Physics topics chosen from material covered in PHYS 2101 and PHYS 2102. Mathematical concepts include: approximation methods, integration and differentiation, vector algebra, and coordinate systems. Exercises and problems emphasize topics traditionally challenging to beginning physics students. An emphasis is placed on developing additional background and problem solving skills necessary for students to succeed in upper-division physics courses.

PHYS 3102. Physics for Science and Engineering III. (3) Prerequisite(s): PHYS 2102. Pre- or Corequisite(s): MATH 2171, MATH 2241, or PHYS 3101. Introduction to additional topics in physics, including wave motion, geometrical and physical optics, electromagnetic waves, and thermodynamics. An emphasis is placed on developing additional background and problem-solving skills to succeed in upper-level physics courses.

PHYS 3121. Classical Mechanics I. (3) Prerequisite(s): PHYS 3101 or ECGR 2112; and MATH 2171 or MATH 2241; both with grades of C or above. Pre- or Corequisite(s): MATH 2241. Topics include: Newtonian mechanics, kinetic energy, work and potential energy, harmonic oscillators, projectiles and charged particles without and with viscous friction, linear and angular momentum, vector algebra and coordinate transformations, Taylor expansions, mathematical analysis using complex numbers, Fourier series analysis of vibrational motions.

PHYS 3141. Introduction to Modern Physics. (3) Prerequisite(s): PHYS 2102 or PHYS 1102; and MATH 1241; both with grade of C or above. Pre- or Corequisite(s): MATH 1242. Topics include: Special relativity, quantization of charge, light, and energy, the nuclear atom, wavelike properties of particles, introduction to nuclear reactions and applications, introduction to solid state physics, and introduction to particle physics.

PHYS 3160. Stellar Astrophysics. (3) Prerequisite(s): PHYS 3141; and MATH 2171 or MATH 2241; or permission of instructor. An introduction to stellar structure and evolution. Topics include: observational techniques, the interaction of light and matter, spectral classification, stellar structure and energy transport, nuclear energy sources, evolution off the main sequence, variable stars, and stellar remnants.

PHYS 3210. Introduction to Computational Physics. (3) Prerequisite(s): PHYS 2102; and MATH 2171 or MATH 2241; both with grades of C or above. Building on elementary concepts in physics, an introduction to how computers are used to solve physics problems is given. Skills in programming will be developed in the context of applying computational methods to calculate a variety of physical properties found in mechanics and electrodynamics. Techniques for simulating and visualizing the behavior of systems ranging in complexity starting from a single particle, to a few, to many particles are introduced. Also covered are methods for data analysis, including fitting and plotting results graphically that best highlight physical relationships between variables.

PHYS 3220. Mathematical Methods in Physics. (3) Prerequisite(s): PHYS 2102, PHYS 3101, and MATH 2241 with grades of C or above. Pre- or Corequisite(s): MEGR 3121 (Optional for PHYS/MEGR dual majors in place of PHYS 3101 prerequisite). Topics include: Vectors and matrices, waves and Fourier analysis, partial differential equations and boundary value problems, and complex variables.

PHYS 3282. Advanced Laboratory in Modern Physics. (3) Pre- or Corequisite(s): PHYS 3141 with grade of C or above. Selected laboratory work in areas such as atomic spectra, radioactive decay, and the interaction of radiation with matter. Emphasis on development of sound laboratory techniques, methods of data analysis, oral communication of results, and the writing of formal laboratory reports. Three hours of laboratory each week.

PHYS 3283. Advanced Laboratory in Classical Physics. (3) Prerequisite(s): PHYS 2102 and 2102L with grades of C or above. Selected laboratory work in areas such as mechanics, electricity and magnetism, acoustics and thermal physics. Topics are chosen for their relation to important principles and techniques, or for their historical significance. Emphasis on development of sound laboratory techniques, methods of data analysis, and the writing of formal laboratory reports. Three hours of laboratory each week.

PHYS 3400. Internship in Industry or Research Lab. (3) Prerequisite(s): Junior or Senior standing, acceptance into the internship program and approval by the Physics department. *Graded on a Pass/No Credit basis.*

PHYS 3500. Physics Cooperative Education Experience. (0) Prerequisite(s): Completion of 30 credit hours at UNC Charlotte (transfer students must complete 12 credit hours), a minimum GPA of 2.5 for co-op students, good standing with the University, and permission of department. Registration in this course is required of co-op students during each of the semesters they are working. Participating students pay a course registration fee for transcript notation. Assignments must be arranged and approved in advance. The Cooperative Education Program is only open to undergraduate students; graduate level students are encouraged to contact their academic departments to inquire about academic or industrial internship options for credit. For more information, contact the University Career Center. *Course may be repeated. Graded on a Satisfactory/Unsatisfactory basis.*

PHYS 3900. Undergraduate Research. (1 to 3) Prerequisite(s): PHYS 3282; PHYS 3283; permission of Departmental Undergraduate Research Coordinator; and, when taken for honors credit, approval of a proposal through the Honors College Application to Candidacy process the

semester prior to taking the course. Independent research experience under the supervision of faculty member. *May be repeated for credit one time with permission of department.* Up to three credit hours of PHYS 3900 may be applied toward the physics degree requirement of "additional PHYS hours at the 3000/4000 level" with approval of the Departmental Undergraduate Research Coordinator.

PHYS 4000. Selected Topics in Physics. (1 to 4) Prerequisite(s): Permission of department. Advanced special topics. May not be applied toward the degree requirements for "additional hours at the 3000/4000 level" without approval of the departmental Undergraduate Studies Committee. *May be repeated for credit.*

PHYS 4105. Fundamentals of Physics Teaching. (1) This is a 1 credit hour course intended to prepare students for the multitude of challenges and responsibilities as a Undergraduate (UG) Teaching Assistant (TA) for the Department of Physics and Optical Sciences. The class is designed for first time TAs and will introduce Physics teaching techniques and approaches and provide resources to enhance students' learning and classroom engagement. The course is designed to help students develop equitable, evidence based and student-centered teaching practices. This course uses Canvas as a learning management system.

PHYS 4110. Introduction to Biomedical Optics. (3) Prerequisite(s): PHYS 3141; and MATH 2171 or MATH 2241; both with grades of C or above. Pre- or Corequisite(s): PHYS 3121 or MEGR 2144. The basic principles underlying tissue optics, laser-tissue interactions, and optical imaging, microscopy, and spectroscopy for medical applications.

PHYS 4140. Nuclear Physics. (3) Prerequisite(s): PHYS 3141; and MATH 2171 or MATH 2241; both with grades of C or above. A study of the nucleus, radioactivity, nuclear reactions, fission, fusion, interactions of radiation with matter and measurement of radiation.

PHYS 4151. Thermal Physics. (3) Cross-listed Course(s): PHYS 5151. Prerequisite(s): PHYS 3141 and PHYS 3101 with grades of C or above; CHEM 1251, CHEM 1251L, and MATH 2241. An introduction to heat, thermodynamics, kinetic theory, and statistical physics. Topics include: classical thermodynamics, Maxwell-Boltzmann, Fermi-Dirac and Bose-Einstein distributions. Three lecture hours a week.

PHYS 4181. Solid State Physics. (3) Cross-listed Course(s): PHYS 5181. Prerequisite(s): PHYS 3141 or permission of department. An introduction to solid-state physics. Topics include: crystal structures, reciprocal lattices, phonons, free electron Fermi gases, band structures, and electrical, magnetic, and optical properties of metals, semiconductors, and insulators. Three lecture hours each week.

PHYS 4222. Classical Mechanics II. (3) Prerequisite(s): PHYS 3121 and MATH 2241. Continuation of PHYS 3121. Topics include: Lagrangian mechanics, two-body central force problems, coupled oscillators and normal modes, Hamiltonian mechanics, non-inertial frames, rigid body motion.

PHYS 4231. Electromagnetic Theory I. (3) Prerequisite(s): PHYS 3121 or MEGR 2144; PHYS 3220 or MATH 2242; and MATH 2171 or MATH 2241; all with grades of C or above. The first course of a two-semester sequence. Topics include: Review of Vector Algebra & Calculus, Electrostatics, Electric Potential, Electric Field in Matter, Magnetostatics and Magnetic Field in Matter.

PHYS 4232. Electromagnetic Theory II. (3) Prerequisite(s): PHYS 4231 with grade of C or above. A continuation of PHYS 4231. Topics include: Review of Vector Algebra & Calculus, Electrodynamics, Electromagnetic Energy and Momentum Conservation, Poynting Theorem, Electromagnetic Waves, and Radiation.

PHYS 4241. Quantum Mechanics I. (3) Prerequisite(s): PHYS 3220 or MATH 2241; PHYS 3121 or MEGR 2144; PHYS 3141; and MATH 2171 or PHYS 3101; all with grades of C or above. Topics include: blackbody radiation, solutions of the time-independent Schrodinger equation, unbound and bound states, the infinite square well, the harmonic oscillator, the hydrogen atom, spin operators, and the Stern-Gerlach experiment.

PHYS 4242. Quantum Mechanics II. (3) Prerequisite(s): PHYS 4241 with grade of C or above. A continuation of PHYS 4241. Topics include: perturbation theory, atoms in external electric and magnetic fields, the Stark and Zeeman effects, the WKB approximation, selection rules for electromagnetic radiation, scattering theory, multi-electron atoms, and electrons in solids, Bose-Einstein and Fermi-Dirac distributions.

PHYS 4271. Waves and Optics. (3) Prerequisite(s): MATH 2171 or PHYS 3101 with grade of C or above. Pre- or Corequisite(s): PHYS 3121 or MEGR 2144. Topics include: ray analysis of common optical elements, wave properties of light, the superposition of periodic and non-periodic waves, and selected topics from geometrical and physical optics.

PHYS 4281. Advanced Laboratory in Modern Optics. (3) Prerequisite(s): PHYS 3121 or MEGR 2144; PHYS 3141; and PHYS 3282 with grades of C or above. Selected experiments on topics such as fiber optics, interferometry, spectroscopy, polarization, and holography. Emphasis on the development of sound laboratory techniques, methods of data analysis, and the writing of formal laboratory reports. Six hours of laboratory each week.

Political Science (POLS)

POLS 1110. American Politics. (3) Introduction to the role of the President, Congress, Supreme Court, and national administrative agencies in the American political system. Relationship between the American people and their political institutions with emphasis on political culture, the electoral process, political parties, interest groups, and political communication. *May not be taken for credit and for a grade if credit has been received for POLS 1575.*

POLS 1130. Comparative Politics. (3) Introduction to political comparison among nations. Diverse geographical emphases, including Latin America, Europe, Asia, and Africa. *May not be taken for credit and for a grade if credit has been received for POLS 1501.*

POLS 1150. International Politics. (3) Introduction to the analysis of politics among nations: Material and psychological sources of national power; the role of law, force, and diplomacy in world politics; problems of peace and disarmament; and international organization.

POLS 1170. Introduction to Political Philosophy. (3) Survey course that includes an introduction to recognized major political thinkers such

as Plato, Aristotle, Hobbes, Locke, Rousseau, and Marx. Included are other politically influential writers such as Confucius, Mary Wollstonecraft, and Martin Luther King.

POLS 1501. Global Social Science: Introduction to Comparative Politics. (3) This Global Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of a complex, interconnected world. Students learn basic concepts in comparative politics by examining politics and political institutions across a range of countries in Latin America, Europe, Asia, and Africa. Students investigate how economic, political, and social variables influence the likelihood of democratization, economic growth, civil conflict, social empowerment, and related outcomes. *May not be taken for credit and for a grade if credit has been received for POLS 1130.*

POLS 1575. Foundations of American Democracy. (3) T This Foundations for American Democracy Course uses the methods and insights of social sciences, combined with American historical documents including the Declaration of Independence, U.S. Constitution, select Federalist Papers, Gettysburg Address, Emancipation Proclamation, and Letter from a Birmingham Jail, to explore central questions related to American democracy. POLS 1575 introduces students to the central principles of political science through an examination of how the U.S. political system processes the variety of public preferences through elections and government institutions into public policy. *Fulfills the General Education Foundations of American Democracy requirement. May not be taken for credit and for a grade if credit has been received for POLS 1110 or POLS 1511.*

POLS 2120. Introduction to Public Policy. (3) Provides an overview of the policy process in the U.S. focusing on how public problems arise, how they get on the agenda of government, how and why the government responds or fails to respond, defining public policy, explaining how it is made, and who makes it.

POLS 2220. Political Science Methods. (4) Prerequisite(s): Political Science major; at least one introductory POLS course and MATH 1100 or MATH 1101 or equivalent. This course builds the knowledge skills ability (KSA) of students, in other words increases their information literacy. Emphasis on how to do literature searches, write professional papers as political scientists, understand and calculate statistics, and manipulate data with computer statistical packages. Recommended to be taken before majors begin to take upper-level courses. Three hours of lecture and one hour of computer laboratory per week.

POLS 3010. Topics in American Politics or Public Administration. (1 to 4) An intensive study of a topic in American politics or public administration. The particular topic investigated may vary from semester to semester, and a student may take more than one course under this number.

POLS 3030. Topics in Comparative or International Politics. (1 to 4) An intensive study of a topic in comparative or international politics. *May be repeated for credit with change of topic.*

POLS 3070. Topics in Political or Legal Philosophy. (3) Analysis of a selected problem in contemporary political philosophy, legal philosophy,

or in the history of political philosophy. Includes moral and ethical evaluation of political and social practices and institutions. Readings from classic texts or contemporary works. Topic for consideration changes from semester to semester. *May be repeated for credit with permission of instructor.*

POLS 3103. Public Opinion. (3) A study of attitude and opinion measurement with emphasis on the techniques of survey research and public opinion polling and conservative and liberal tendencies in American public opinion and society.

POLS 3104. Mass Media. (3) An examination of the relationship of mass media to politics and government. Government regulation of the media and how the mass media shape political information and behavior.

POLS 3105. Voting and Elections. (3) Psychological, sociological, and political variables that influence voting behavior and that affect electoral stability and change with emphasis on studies derived from survey research.

POLS 3108. Social Movements and Interest Groups. (3) Analysis of the nature of social movements and interest groups and their role in the American political system. Emphasis on membership recruitment and mobilization, campaigns, lobbying, and influence on parties, public opinion, and public policy. Evaluation of the extent to which these organizations enhance the voices of ordinary citizens versus those of corporations and citizens of high social status.

POLS 3109. Political Parties. (3) Analysis of the role of political parties in the American political system. Emphasis on party organizations, nominations, campaigns, interrelation with interest groups and social movements, and the role of parties in the executive, legislative, and judicial arenas.

POLS 3111. The Congress. (3) Analysis of the role of the Congress in the American political system and its relationships with the other branches of government. Recruitment and socialization of congressmen, the committee system, and roll call analysis.

POLS 3112. The Presidency. (3) Analysis of the role of the Presidency in the American political system and its relationships with the other branches of government. Strategies of presidential nomination and election, the sources and indicators of presidential power, and how those who have held the office have shaped it and been shaped by it.

POLS 3114. Constitutional Law and Policy. (3) Cross-listed Course(s): LEGL 3113. Development of American constitutionalism (especially federalism and the separation of powers) with major emphasis on constitutional law as a form of public policy and the U.S. Supreme Court as a policy maker.

POLS 3115. Civil Rights and Liberties. (3) Cross-listed Course(s): LEGL 3115. Utilizes public policy analysis to illuminate judicial decisions and opinions relating to contemporary civil rights and liberties.

POLS 3116. Judicial Process. (3) Cross-listed Course(s): LEGL 3116. Introduction to the nature and functions of law; survey of Supreme Court decision making.

POLS 3117. Gender and the Law. (3) Cross-listed Course(s): LEGL 3117. Examines the role gender plays in various aspects of the legal system in the United States. Topics include: the statutory and constitutional provisions that govern discrimination based on gender (e.g., Title VII, the 14th Amendment Equal protection clause) and the role that gender plays in judicial decision making (e.g., the influence of judge, attorney, party, and juror gender on legal outcomes).

POLS 3119. State and Local Government. (3) An introduction to state and local governments, politics, and policies in the United States. Particular attention is paid to state and local government in North Carolina.

POLS 3121. Urban Politics and Policy. (3) Political analysis of a variety of public policy problems in urban areas and proposals to solve them. Attention will be paid to both the substance of the urban policy problem and ways to evaluate alternative solutions.

POLS 3123. Urban Political Geography. (3) Spatial organization of metropolitan America. How metropolitan residents organize space into territorial units and the human, social, and political ramifications of that organization. Spatial consequences of the most common modes of political, administrative, and territorial organization.

POLS 3124. U.S. Domestic Policy. (3) Examination of the processes of and influences on policy making, including goals and objectives of current U.S. domestic policy. Focus on major policy areas; may include such topics as fiscal and monetary policy, education, transportation, management of national economy, and agriculture, among others.

POLS 3125. Healthcare Policy. (3) An overview of the development and current functioning of U. S. healthcare system and public policies regarding the organization, delivery and financing of healthcare at the federal, state, and local levels.

POLS 3126. Introduction to Public Administration. (3) The role of the administrator and public bureaucracy in modern democratic society, with emphasis on the interplay of forces created by executives, legislators, political parties, and interest groups.

POLS 3127. Public Service in Nonprofit Organizations. (3) Basic introduction to the nonprofit sector and the nature and contributions of the nonprofit sector in the United States. Basic management issues in nonprofit organizations. Highlights the unique contribution and challenges of nonprofits working in different service areas.

POLS 3128. Politics and Film. (3) Examination of the influence and role of film in American politics. Movies provide important cues about cultures, values, and society, and affect how people perceive or view their environment. Explores and analyzes the images and messages conveyed about American politics, and develops understanding of the role of film in American politics. Requires viewing films in class, discussion, and writing about the films.

POLS 3132. Comparative Public Policy. (3) Examination of the policy process and policy outcomes in the United States and other countries. Analyzes policy areas in depth to determine the role that variations in policy culture and political institutions play in shaping policy choices. Examines the possibility and limitations of transferring policy innovation from one polity to another.

POLS 3133. Middle East Politics (3) Political development of Middle Eastern states from the period of European colonization to today. Topics include: Arab nationalism, Islamism, the Palestinian-Israeli conflict, democratization, oil and economic development and regional security.

POLS 3135. Terrorism. (3) Addresses four basic questions: (1) What is terrorism? (2) Why does it occur? (3) How does terrorism network? (4) What are the legal, political, and military coping strategies for terrorism? Emphasis on building an understanding of the nature and root causes of terrorism, and understanding the behavioral and psychological framework of terrorism and responses to it.

POLS 3137. International Human Rights. (3) Cross-listed Course(s): INTL 3137 and LEGL 3137. Introduces students to the historical foundations and current practices of the international human rights regime. Discussions center primarily on three topics: 1) the conceptual and historical origins of the international regime designed to protect human rights, 2) patterns of and explanations for human rights violations over time and space, and 3) potential international and domestic solutions to protect human rights. During the discussion of these topics, students learn about contemporary issues in human rights, as well as how theory applies to current events and individual cases.

POLS 3139. Civil Wars and Political Violence. (3) Most large-scale political violence in recent decades takes the form of civil wars fought largely within countries. This course analyzes the conditions under which such conflicts are most likely to occur, their consequences for civilians, and steps that can be taken to promote their durable resolution.

POLS 3141. European Politics. (3) Comparative analysis of selected European governments including Great Britain, France, Germany, and Italy.

POLS 3143. African Politics. (3) A comparative perspective on politics in Sub-Saharan Africa and on the performance of post-independence political systems there in terms of national and international integration, economic challenges, and efforts to create stable and democratic civilian regimes.

POLS 3144. Latin American Politics. (3) Cross-listed Course(s): LTAM 3144. Comparative overview of political and socio-economic change in Latin America from the colonial period to the present. Primary emphasis on Latin American politics in the twentieth century, competing political ideologies, socio-economic issues, international political economy, and internal political change.

POLS 3148. Chinese Politics. (3) The origins, development, and maintenance of the Chinese political system. The organization and function of the Chinese Communist Party (CCP) and other political groups. The impact of tradition on contemporary Chinese politics.

POLS 3151. International Political Economy. (3) Cross-listed Course(s): INTL 3151. An analysis of the political dynamics of economic relationships among countries. Attention is focused on the political aspects of monetary, trade, and investment relationships, and the difficulties involved in coordinating policy and maintaining effective international management.

POLS 3152. International Organizations. (3) An analysis of the development and functions of formal and informal organizations that govern international politics and markets, including the United Nations system, economic and non-governmental organizations, and regional institutions.

POLS 3153. European Union. (3) An analysis of the European Union (EU) from historical, political, and economic perspectives. Emphasis on the institution's actors (especially states and interest groups) and policies of the EU as well as the changing relationship between the EU and its major trading partners such as the U.S.

POLS 3154. Cyberspace and Politics. (3) Examination of the advent of information technologies and digital communication in the global community and the impact of these changes on multi-level politics--international, regional, national, and sub-national. Four major themes are: exploration of the digital world, cyberspace governance and public policy, electronic government and virtual citizenship, and cyberspace expansion and global reach. Taught mainly as a web-based course.

POLS 3155. Latin American Political Economy. (3) Cross-listed Course(s): LTAM 3154. Intersections of politics and economics in Latin America, focusing on the efforts to foster economic development in the region. Emphasis on post-World War II era. Includes issues such as debt management, dependency theory, impact of free market theories, and the power of labor movements.

POLS 3157. American Foreign and Defense Policy. (3) Examines constitutional provisions for foreign policy in the United States, analyzes the formulation and implementation of American foreign policy, and surveys key defense and security policy issues facing the United States.

POLS 3159. Diplomacy in a Changing World. (3) Cross-listed Course(s): INTL 3131. Diplomacy, a means to resolve disputes between sovereign states short of war, is analyzed through case studies drawn from historical context and through a survey of contemporary crises. The American diplomatic process is also reviewed with particular attention to how policy is shaped, how an embassy functions, and how Americans train for the professional diplomatic service.

POLS 3162. International Law. (3) Cross-listed Course(s): LEGL 3162. Historical and political analysis of the sources and development of international law. Particular attention is given to the role of modern international law in the relations of nation-states and its application to contemporary global problems.

POLS 3163. Introduction to Model United Nations. (3) Preparation for and participation in the Model United Nations (simulation of the United Nations) for students who have not participated in this simulation previously. Includes study of the background of countries to be represented; the history, structure and procedures of the United Nations; drafting of resolutions and position papers; public speaking and caucusing; participation in regional MUN events.

POLS 3164. U.S.-Latin American Relations. (3) Cross-listed Course(s): LTAM 3164. Addresses the always-complicated and often-conflictive relationship between Latin American and the United States. Particular attention to critical contemporary issues such as the drug trade,

immigration, international trade, humanitarian aid and U.S. policy toward Cuba.

POLS 3165. East Asia in World Affairs. (3) Examines the political factors governing diplomatic relations, national order, economic trade, and national security in East Asia. Emphasis on China, Taiwan, Hong Kong, Japan, the Korean peninsula, and the Philippines.

POLS 3166. Politics of the Islamic World. (3) Political development of and current political trends within countries of North and East Africa, the Middle East, Central Asia, and South and Southeast Asia that make up the Islamic World. Topics include: the diverse body of Islamic political thought, manifestation of Islamic political thought in contemporary countries and movements, a discussion of how Islamic societies handle diversity and the issue of democratic rule, and the political development of the growing Muslim minority community in the West.

POLS 3169. African International Relations. (3) Cross-listed Course(s): AFRS 4105. Examines Africa's relations with external powers (including Europe, the United States, and China), cooperation among African countries, the role of non-state actors in African conflicts, and U.S. policy toward the continent.

POLS 3171. History of Classical Political Philosophy. (3) Major concepts and systems of political philosophy of Ancient Greece and Rome.

POLS 3172. African American Political Philosophy. (3) Cross-listed Course(s): AFRS 3179. Prerequisite(s): 3000-level course on Africa from AFRS, HIST, or POLS. Major competing ideologies in African American political philosophy.

POLS 3173. History of Modern Political Philosophy. (3) Major concepts and systems of western political philosophy from the 16th-19th centuries.

POLS 3175. Philosophy of Law. (3) Cross-listed Course(s): LEGL 3175. Philosophy underlying the legal system and the Anglo-American practice of law. Topics include: what is "law;" obligation to obey the law, liberty, privacy and tolerance; and criminal responsibility and punishment.

POLS 3176. Fascism and Communism. (3) Considers the philosophies of fascism and communism and those political theorists who contributed to these two twentieth-century movements. Focuses on the implementation of these theories in nations such as Italy, Germany, the Soviet Union, and China.

POLS 3177. Social and Political Philosophy. (3) Cross-listed Course(s): LEGL 3810 and PHIL 3271. Philosophical concepts involved in understanding and evaluating the basic structure of societies (e.g., economic, educational, legal, motivational, and political) including equality, fraternity, freedom, and rights. Relevance to contemporary social and political issues stressed. Readings from classical and contemporary sources.

POLS 3250. Political Sociology. (3) Cross-listed Course(s): SOCY 3250. Prerequisite(s): SOCY 1101. Sociological analysis of the relationship between social, economic and political systems. Focuses on power relations in society and its effects on the distribution of scarce resources. Topics covered may include: theories of power and the nation state,

political participation and voting, religion and politics, the comparative welfare state, media and ideology, the global economy, war and genocide, revolutions, and social movements. Not open to students who have credit for POLS 3251.

POLS 3251. Political Sociology. (3) Prerequisite(s): SOCY 1101. Sociological analysis of the relationship between social, economic and political systems. Focuses on power relations in society and its effects on the distribution of scarce resources. Topics covered may include: theories of power and the nation state, political participation and voting, religion and politics, the comparative welfare state, media and ideology, the global economy, war and genocide, revolutions, and social movements. Not open to students who have credit for SOCY 3250 or POLS 3250.

POLS 3380. Security and Intelligence in a Democratic Society. (3) Examines roles, missions, and methods of the U.S. intelligence community. Topics include: collection, analysis, politicization of intelligence, sharing intelligence, interactions between the intelligence community and elected officials, covert action, and ethical issues.

POLS 3381. Critical Thinking Skills for Security and Intelligence. (3) Reviews the intelligence analysis process, the environment in which it is conducted, analytic tradecraft standards, and challenges facing today's intelligence analyst, and teaches structured analytic techniques through a series of case studies and team-based exercises.

POLS 3382. Analytic Writing and Briefing. (3) The instruction of clear, concise, and persuasive writing and briefing for policy making, forecasting, and intelligence analysis. Overview of the policymaking process and intelligence cycle. Involves short written assignments and presentations by individuals and teams of students focused on writing and analytical skills necessary to support, inform, and influence policymakers.

POLS 3400. Internship in Political Science. (3-6) Prerequisite(s): Permission of department. Practical experience in politics by working for a party, campaign organization, political office holder, news medium, government agency, or other political organization. Minimum of 150 working hours for three hours credit; minimum of 300 working hours for six hours credit. No more than six credit hours may be received through this course. *Graded on a Pass/No Credit basis.*

POLS 3700. Honors Research. (3) Prerequisite(s): POLS 2220 with grade of A; overall GPA of at least 3.25; cumulative POLS GPA of at least 3.5; and permission of instructor. Supervised investigation of a political science topic that is of special interest to the student and related to the instructor's expertise. Students write a literature review and research design for an article-length research paper.

POLS 3800. Independent Study. (1 to 3) Prerequisite(s): Permission of instructor. Supervised investigation of a political problem that is (1) of special interest to the student; (2) within the area of the instructor's special competence; and (3) normally an extension of previous coursework with the instructor. A student may take more than one course under this number but not more than three hours a semester.

POLS 4110. North Carolina Student Legislature. (3) Cross-listed Course(s): LEGL 4110. Prerequisite(s): Permission of instructor. Practicum including workshops, seminars, and guest speakers on

legislative process and research, parliamentary procedure, and resolution and bill drafting; participation in an interim council debate at one of the member campuses for one weekend each month during the semester and participation in the NCSL annual session in Raleigh. *May be repeated for credit.*

POLS 4163. Advanced Model United Nations. (3) Prerequisite(s): POLS 3163, or the equivalent and permission of instructor. Preparation for and participation in the Model United Nations (simulation of the United Nations) for students who have completed POLS 3163 or the equivalent. Includes study of the background of countries to be represented; the history, structure and procedures of the United Nations; drafting of resolutions and position papers; public speaking and caucusing; participation in international MUN events. *May be repeated for credit.*

POLS 4600. Senior Seminar. (3) Prerequisite(s): Political Science major, POLS 1575, POLS 1501, POLS 1150, and POLS 2220. Capstone course. Seminar style exploration of a selected topic in the discipline. Includes writing a research paper and presenting the results to the class.

POLS 4700. Honors Thesis. (3) Prerequisite(s): POLS 3700; approval of a proposal through the Honors College Application to Candidacy process the semester prior to taking the course; and permission of instructor. Students complete an article-length research paper under the supervision of a member of the faculty. The paper must involve quantitative or other methods of modern political analysis.

POLS 4990. Senior Thesis. (3) Prerequisite(s): POLS 2220 with a grade of B or above; Political Science major; overall GPA of 3.0 or above. Students complete an article-length research paper under the supervision of a member of the faculty. The paper must involve quantitative or other methods of modern political analysis.

Portuguese (PORT)

PORT 1201. Elementary Portuguese I. (3) Fundamentals of the Portuguese language, including speaking, listening comprehension, reading, and writing.

PORT 1202. Elementary Portuguese II. (3) Prerequisite(s): PORT 1201 or permission of department. Fundamentals of the Portuguese language, including speaking, listening comprehension, reading, and writing.

PORT 2201. Intermediate Portuguese I. (3) Prerequisite(s): PORT 1202 or permission of department. Review of grammar, with conversation and composition.

PORT 2202. Intermediate Portuguese II. (3) Prerequisite(s): PORT 2201 or permission of department. Continued review of grammar, conversation, and composition.

PORT 3051. Topics in Portuguese. (1 to 3) Study of a particular facet of the Portuguese language, culture, or literature. *May be repeated for credit with change of topic.*

PORT 3201. Portuguese Grammar and Conversation. (3) Prerequisite(s): PORT 2202 or permission of department. Review of Portuguese grammar and guided conversation on prepared topics. Emphasis on spoken Portuguese.

PORT 3202. Portuguese Grammar and Conversation. (3)
Prerequisite(s): PORT 3201 or permission of department. Review of Portuguese grammar and guided compositions on prepared topics. Emphasis on vocabulary, idiomatic expressions, and stylistics.

Professional Studies (PROS)

PROS 3000. Topics in Professional Studies. (1 to 3) Prerequisite(s): Professional Studies major or permission of department. Explores special or emerging topics in professional studies. *May be repeated for credit with change of topic.*

PROS 3101. Project Management: Foundations. (3) Prerequisite(s): Professional Studies major or permission of instructor. The Project Management series is designed to provide a firm base of skills for systematically planning, organizing, and managing resources to meet specific project goals. The course content is based on the Project Management Institute's (PMI) A Guide to the Project Management Body of Knowledge (PMBOK® Guide). The Foundations level includes defining the organizational need and information gathering to clearly define project requirements.

PROS 3102. Project Management: Practitioner. (3) Prerequisite(s): Professional Studies major or permission of department and PROS 3101. The Project Management series is designed to provide a firm base of skills for systematically planning, organizing, and managing resources to meet specific project goals. The course content is based on the Project Management Institute's (PMI) A Guide to the Project Management Body of Knowledge (PMBOK® Guide). The Practitioner level includes documenting requirements for use by all stakeholders and analyzing, verifying and validating requirements.

PROS 3103. Project Management: Specialist. (3) Prerequisite(s): PROS 3101. The Project Management series is designed to provide a firm base of skills for systematically planning, organizing, and managing resources to meet specific project goals. The course content is based on the Project Management Institute's (PMI) A Guide to the Project Management Body of Knowledge (PMBOK® Guide). The Specialist level includes managing risk and creating a framework for successful requirements management and communication.

PROS 3104. Project Management: Introduction to Agile. (3) Prerequisite(s): PROS 3101. Explores the Agile using Scrum framework to design products to meet the needs of users. Students will learn why, how, and when to apply Agile using Scrum.

PROS 3105. Project Management: Process Improvement & Design. (3) Prerequisite(s): PROS 3101. Lean Six Sigma methodologies used to improve existing processes and design new processes. Students will learn how to improve existing processes and create new processes through a five-phased approach called DMAIC (Define, Measure, Analyze, Improve, and Control.)

PROS 3201. Leadership Essentials: Foundations. (1) Prerequisite(s): Professional Studies major or permission of department. The Leadership Essentials series is designed to strengthen and develop leadership and management skills necessary in contemporary work settings. The

Foundations level includes strategies for successful hiring and conflict resolution.

PROS 3202. Leadership Essentials: Practitioner. (1) Prerequisite(s): Professional Studies major or permission of department and PROS 3201 Leadership Essentials Foundations. The Leadership Essentials series is designed to strengthen and develop leadership and management skills necessary in contemporary work settings. The Practitioner level includes the art of delegation and time management.

PROS 3203. Leadership Essentials: Specialist. (1) Pre- or Corequisite(s): Professional Studies major or permission of department; PROS 3201. The Leadership Essentials series is designed to strengthen and develop leadership and management skills necessary in contemporary work settings. The Specialist level includes emotional intelligence and creating a high performance culture.

PROS 3204. Organizational Leadership. (3) Prerequisite(s): PROS 3201. Exploration of leadership styles and theories, equipping students with the skills to effectively influence individuals and groups within organizations. Students will assess organizational design and culture, identifying strategies to improve overall effectiveness. The course emphasizes collaboration and teamwork, fostering an understanding of group behavior dynamics, and implementing strategies to create cohesive and productive environments.

PROS 3206. Strategic Leadership. (3) Prerequisite(s): PROS 3201. Strategic Leadership delves into principles that emphasize the role of leaders in planning and decision-making to shape effective strategies. Key topics include crafting vision and mission statements, problem-solving, and leading teams toward achieving organizational goals.

PROS 3301. Human Resource Management: Foundations. (3) Prerequisite(s): Professional Studies major or permission of department. The Human Resource Management series is designed to explore the challenges and problem-solving strategies facing leaders in human resource roles. The Foundations level includes workforce planning, human resource development, and employee performance management.

PROS 3302. Human Resource Management: Practitioner. (3) Prerequisite(s): Professional Studies major or permission of department; PROS 3301. The Human Resource Management series is designed to explore the challenges and problem-solving strategies facing leaders in human resource roles. The Practitioner level includes employee engagement, employee relations, and compensation.

PROS 3303. Human Resource Management: Specialist. (3) Prerequisite(s): PROS 3301. The Human Resource Management series is designed to explore the challenges and problem-solving strategies facing leaders in human resource roles. The Specialist level includes change management and organization development.

PROS 3305. Human Resource Development and Workplace Planning. (3) Prerequisite(s): PROS 3301. Two critical facets of modern HR: Human Resource Development (HRD) and Workplace Planning. Students will learn how to effectively plan, develop, and manage HRD that align with organizational objectives, enhance employee performance and engagement, and contribute to long-term success in a rapidly changing environment.

PROS 3306. Workforce Acquisition and Talent Development. (3) Prerequisite(s): PROS 3301. Examines the intertwined realms of workforce acquisition and talent development. Students will learn how to attract, select, and cultivate talent; implement onboarding, training, and development elements to align with business and employee needs; and design comprehensive compensation and benefits programs.

PROS 3321. Foundations of Instructional Design. (3) Introduction to the fundamentals of instructional design principles, learning theories, and key models. It also emphasizes collaboration with stakeholders, sponsors, subject matter experts, and team members. By learning how to identify performance needs, set clear objectives, and engage professionally with others, students build a strong foundation for designing successful learning experiences. This course prepares future instructional designers to start projects on the right footing by focusing on business goals, clear communication, and working effectively in a team environment.

PROS 3322. Designing Effective Learning Solutions. (3) Prerequisite(s): PROS 3321. Building on the foundational principles, this course transforms analysis and initial concepts into tangible learning solutions. Students learn to craft detailed instructional strategies, create meaningful learning activities, incorporate multimedia, and leverage course design tools. By the end of the course, students will be able to produce engaging prototypes that meet defined learning objectives. The course develops future practitioners who can independently translate performance needs into practical, innovative, and learner-centered solutions that improve performance.

PROS 3323. Developing Engaging eLearning Programs. (3) Prerequisite(s): PROS 3321, PROS 3322. In this course, students deepen their development capabilities, moving beyond static learning materials to dynamic, interactive eLearning experiences. The course prepares students to deliver customized, high-quality digital learning solutions by fostering creativity and technical proficiency. As future practitioners, students will be able to produce sophisticated online learning solutions that attract and maintain learner attention, driving measurable improvements.

PROS 3324. Evaluating & Enhancing Learning Solutions. (3) Prerequisite(s): PROS 3321, PROS 3322. Pre- or Corequisite(s): PROS 3323. Teaches students how to measure the effectiveness of their learning programs and continuously improve them. Students learn to identify gaps, refine learning solutions, and demonstrate return on investment. As future practitioners, students will be able to maintain a culture of quality, accountability, and continuous improvement within their organization's learning and development efforts.

PROS 4101. Project Management: Advanced Roles of a Project Manager. (3) Prerequisite(s): PROS 3101. Advanced roles that a project manager may experience and have to master in an organizational environment. Students will complete an exploratory journey through some of the more complex roles a project manager must take on to ensure success. This includes mitigating risks that could lead to project failure, coaching and leading powerful teams through ambiguity while lowering employee resistance to change. This also includes being a strategic leader, data analyst and storyteller.

PROS 4201. Leadership and Innovation. (3) Prerequisite(s): PROS 3201. Exploration of the dynamic relationship between leadership and innovation within organizations. Students will examine the complexities of change management, studying various models and strategies for leading successful change initiatives.

PROS 4301. Human Resource Management in a Changing, Global Environment. (3) Prerequisite(s): PROS 3304 or permission of the department. A deep exploration of the role of HR in today's globalized and ever-changing environment. Students will gain an understanding of the strategic, cultural, and ethical challenges of managing a diverse workforce. Students will also learn to mitigate risks and manage conflict during periods of change.

PROS 4600. Professional Studies Capstone. (1 to 3) Prerequisite(s): Senior standing; PROS 3103 or PROS 3201 or PROS 3301. Working in small consulting groups, students develop viable solutions to actual industry problems presented by partnering organizations and present solutions as part of the culminating project. *May be repeated for credit up to 3 credit hours.*

Psychology (PSYC)

PSYC 1000. The Science and Practice of Psychology. (3) Open to entering Freshmen accepted into the Psychology Learning Community, it is one of 3-4 courses in a registration block. The sub-disciplines of psychology and their related career paths will be explored. Additional topics include: graduate study in psychology, academic success in psychology, and getting the most from the psychology major and degree. The course has a service learning requirement that includes community service in a social-services setting and associated learning assignments.

PSYC 1101. General Psychology. (3) A survey of the field including such topics as learning, emotions, motivation, personality, psychological testing, and abnormal behavior. Emphasis on psychology as a behavioral science. May be taken with or without the lab; however, concurrent enrollment with PSYC 1101L is strongly encouraged. A grade of C or above must be earned within two attempts to declare or continue with a psychology major.

PSYC 1101L. General Psychology Laboratory. (1) Pre- or Corequisite(s): PSYC 1101 with grade of C or above. An introduction to laboratory equipment and procedures used in psychological science. Meets two hours per week. May not be counted toward completion of psychology major or minor.

PSYC 2113. Introduction to Brain, Behavior, and Mental Processes. (3) Prerequisite(s): PSYC 1101 with grade of C or above. Physiological psychology, biopsychology, and neuroscience are rapidly expanding fields of scientific research. Reviews basic knowledge about how the brain works and applies this knowledge to basic behaviors. An introductory class that begins to link biology to psychology via examination of the biological underpinning of behavior.

PSYC 2115. Introduction to Self in Context. (3) Prerequisite(s): PSYC 1101 with grade of C or above. An introduction to the study of the self and the interplay between the self and the social contexts in our world or what factors affect how one identifies themselves with respect to others around them. This course will cover current and past research on the self,

with a focus on relevant theoretical perspectives and common methodologies used in the field.

PSYC 2117. Introduction to Lifespan Development. (3) Prerequisite(s): PSYC 1101 with grade of C or above. An introduction to the study of the physiological, cognitive, and socioemotional changes in human development occurring across the lifespan. Theoretical perspectives and the most widely used research methodologies are reviewed.

PSYC 2300. Psychology Success Strategies for Transfer Students. (3) Prerequisite(s): Psychology major and first semester transfer student. Designed to foster a successful transition for transfer students to UNC Charlotte. Covers such topics as psychological literacy, the sub-disciplines of psychology and their associated career paths, transfer shock and student success strategies, and opportunities for campus and departmental engagement.

PSYC 2301. Introduction to Forensic Psychology. (3) Cross-listed Course(s): LEGL 2131. Prerequisite(s): PSYC 1101 with grade of C or above. This upper 2000-level course provides an overview of the field of forensic psychology, including the history of the discipline, and legal and ethical issues such as criminal profiling, definition of "insanity," eyewitness identification, and jury selection.

PSYC 2302. Introduction to Positive Psychology. (3) Prerequisite(s): PSYC 1101 with grade of C or above. This upper 2000-level course examines the principal concepts, applications, and research paradigms of positive psychology in reference to various contexts such as everyday people, cross-cultural perspectives, adjustment to chronic illness, surviving natural disasters, terrorist attacks, and civil war.

PSYC 2316. Introduction to Cognitive Processes. (3) Prerequisite(s): PSYC 1101 with grade of C or above, or permission of instructor. This upper 2000-level course will introduce and expand on cognitive processes involved in such complex behaviors as language (acquisition and usage), memory, and problem solving, with emphasis upon experimental findings and current theories.

PSYC 2320. Introduction to Industrial/ Organizational Psychology. (3) Prerequisite(s): PSYC 1101 with grade of C or above. This upper 2000-level course covers the study of people at work; what motivates people to work and what leads to satisfaction, alienation, or performance; how to lead others; the structure of an organization and processes of communication, decision making, and conflict; socialization through selection and training; measurement of individual contributions; the design of work itself; ways to change; and develop entire organizations.

PSYC 2333. Introduction to Comparative Psychology. (3) Prerequisite(s): PSYC 1101 with grade of C or above. Animal and human behavior from a comparative point of view. Includes the study of methodology, and classification of behavior patterns, as well as the origin of these patterns.

PSYC 2340. Psychology of Adjustment. (3) Prerequisite(s): PSYC 1101 with grade of C or above. This upper 2000-level course covers the study of the process of adjustment and factors that may influence adaptation. Consideration is given to psychological reactions to critical problems encountered in modern life. Introduction to different approaches to intervention and treatment.

PSYC 2341. Psychopathology. (3) Prerequisite(s): PSYC 1101 with grade of C or above. This upper 2000-level course covers the history of mental health diagnoses. Case studies, differential diagnosis, psychological dynamics of behavior that disrupts an individual's life, including theoretical, clinical, and experimental contributions in the field.

PSYC 2350. Introduction to Social Psychology. (3) Prerequisite(s): PSYC 1101 with grade of C or above. This upper 2000-level course covers the social behavior of individuals. Topics include: interpersonal attraction and relationship development; attitude change; social conflict; social interaction; social perception; and social influence processes; general theories of social behavior; and research approaches.

PSYC 2360. Introduction to Health Psychology. (3) Prerequisite(s): PSYC 1101 with grade of C or above. This upper 2000-level course introduces students to the contributions of psychology to the promotion and maintenance of health, the prevention and treatment of illness, and the improvement of the healthcare system. Topics include: the role of stress and physiological factors in illness, chronic pain disorders and pain management, lifestyle and psychosocial influences on health, and the influence of illness on interpersonal relationships.

PSYC 2370. Child Development. (3) Prerequisite(s): PSYC 1101 and PSYC 2117 with grade of C or above. The upper 2000-level course covers the psychological, cognitive, and socioemotional development in infancy and childhood, including such topics as biological change, learning, thought, language, social relations, intelligence, and morality.

PSYC 2371. Adolescent Development. (3) Prerequisite(s): PSYC 1101 and PSYC 2117 with grade of C or above. This upper 2000-level course covers the cognitive and socioemotional developmental and psychological characteristics of adolescents, with emphasis on the developmental transitions, social contexts, and problems of adolescence.

PSYC 2372. Adult Development and Aging. (3) Cross-listed Course(s): GRNT 2124. Prerequisite(s): PSYC 1101 and PSYC 2117 with grades of C or above. This upper 2000-level course covers the cognitive and psychological development through adulthood and old age. Emphasis on processes underlying continuity and change in adulthood, including personality and socialization, cognitive development, and the psychophysiology of aging.

PSYC 2390. Life Beyond the Psychology Bachelor of Science. (3) Prerequisite(s): Psychology major. Pre- or Corequisite(s): PSYC 2391 co-enrollment or with a C or better. This course is designed to help students begin to chart their academic and career paths within the psychology major. The course provides an overview of the major sub-disciplines within the broad and diverse field of psychology, helping students find a personal career path congruent with their interests and goals. Students learn how to utilize on-campus and online tools that help prepare them for professional and civic life after graduation, and research a range of potential careers available to them with a BS in psychology.

PSYC 2391. Research Methodology I. (3) Prerequisite(s): Psychology major; and PSYC 1101 and STAT 1220, STAT 1221, or STAT 1222 with grades of C or above. This course is designed to introduce students to the experimental, observational, and correlational methods of psychological research. Basic concepts of philosophy of science are also discussed. A

grade of C or above must be earned within 2 attempts to continue in the Psychology major.

PSYC 3001. Topics in Psychology. (1 to 3) Prerequisite(s): PSYC 1101 with grade of C or above and permission of instructor (depending on topic). Examination of special psychological topics. *May be repeated for credit with change of topic.*

PSYC 3099. Topics in Psychological Research. (3) Prerequisite(s): PSYC 1101, PSYC 2391, and PSYC 3291 or PSYC 3292 with grades of C or above, or permission of instructor. Examination of special psychological topics. Preparation of one or more APA-style research papers required. *May be repeated for credit with change of topic.*

PSYC 3101. Sexual Behavior. (3) Prerequisite(s): PSYC 1101 and PSYC 2113 with grades of C or above. Explores the psychology of sexual behavior, including providing an overview of the major psychological theories, providing an understanding of the psychological factors that affect human sexual behavior, and examining current issues and controversies related to sexuality such as sexual dysfunction and sexual offenses.

PSYC 3120. Industrial Psychology. (3) Prerequisite(s): PSYC 2171 or permission of instructor. This lower 3000-level course focuses on the “I-Side” of I/O Psychology, and covers talent acquisition and talent management processes and their impact on individuals and organizations. Topics covered include job analysis, recruitment, employee selection, assessment, onboarding, performance measurement, performance management, and training and development.

PSYC 3121. Organizational Psychology. (3) Prerequisite(s): PSYC 2171 with grade of C or above. Application of psychological principles to group and organizational levels of analysis, with emphasis on work teams and business organizations. Topics include: group dynamics, teams and empowerment, organizational culture and diversity, and organization development and change.

PSYC 3123. Social and Personality Development. (3) Prerequisite(s): PSYC 1101; and PSYC 2130 or PSYC 3135; with grades of C or above. Social and personality development of children, including such topics as infant social behavior, socialization practices, independence and achievement, aggression, sex-role development, and moral development.

PSYC 3125. Older Worker and Retirement. (3) Cross-listed Course(s): GRNT 3125 and SOCY 3125. Physical characteristics, personal attitudes, and structural factors affecting the employment of persons over 40. Topics include: biological aging, myths and stereotypes about older workers, public policies, human resources practices, economics of retirement, and theories about career and life stages.

PSYC 3131. Psychology of Learning and Memory. (3) Prerequisite(s): PSYC 1101 and PSYC 2113 and PSYC 2316 with grades of C or above; PSYC 3292 is also strongly recommended. This lower 3000-level course covers the major theories and research results related to learning and memory in humans and animals. It builds off information learned in the pre-req courses (PSYC 2113 & PSYC 2316).

PSYC 3132. Sensation and Perception. (3) Prerequisite(s): PSYC 1101 and PSYC 2113 with grades of C or above, or permission of instructor.

Introduction to the sensory and perceptual processes that provide the means to experience and make sense of the physical world in which we live. Topics include: discussions of how sensory data are acquired, processed, and interpreted.

PSYC 3141. Introduction to Clinical Psychology. (3) Prerequisite(s): PSYC 1101 and PSYC 2151 with grades of C or above. Overview of the field of clinical psychology, including the theory and practice of discipline.

PSYC 3201. Motivation. (3) Prerequisite(s): PSYC 1101 and PSYC 2391 with grades of C or above. Current theories and research in the area of motivation. Consideration is given to the role of emotion in human motives.

PSYC 3216. Introduction to Cognitive Science. (3) Cross-listed Course(s): ITCS 3216 and ITIS 3216. Prerequisite(s): PSYC 1101 with grade of C or above, or permission of department. Interdisciplinary introduction to the science of the mind. Broad coverage of such topics as philosophy of mind; human memory processes; reasoning and problem solving; artificial intelligence; language processing (human and machine); neural structures and processes; and vision.

PSYC 3291. Critical Thinking About Research. (3) Prerequisite(s): PSYC 1101; PSYC 2391; and STAT 1220, STAT 1221, or STAT 1222 with grades of C or above within two attempts. Recognizing and evaluating methods used in published psychological research, and understanding how to interpret results of statistical tests used in research. Communicating using APA Style is a major component of the course. Emphasis on methodology rather than content. A grade of C or above must be earned within two attempts to continue in the Psychology major.

PSYC 3292. Research Methodology II. (3) Prerequisite(s): Psychology major; and PSYC 1101; PSYC 2391; and STAT 1220, STAT 1221, or STAT 1222; all with grades of C or above within two attempts. Hands-on experience with experimental, observational, and correlational methods of psychological research. Communicating research results using APA Style is a major component of the course. Emphasis on methodology rather than content and applicability of methods to current topics in psychology. A grade of C or above must be earned within two attempts to continue in the Psychology major.

PSYC 3301. Basic Processes in Psychological Assessment. (3) Prerequisite(s): PSYC 1101, PSYC 2391, and PSYC 3292; and STAT 1220, STAT 1221, or STAT 1222; all with grades of C or above. Psychological testing, including scaling procedures, reliability and validity, correlational techniques used in test construction, a review of various kinds of psychological tests, and basic approaches to test interpretation.

PSYC 3302. History and Systems of Psychology. (3) Prerequisite(s): Psychology major; PSYC 3291 or PSYC 3292 with grades of C or above within two attempts. Historical antecedents and origins of modern psychology. Emphasis on influential psychological systems such as behaviorism and psychoanalysis.

PSYC 3316. Language and Cognition. (3) Prerequisite(s): PSYC 1101 and PSYC 2316 or PSYC 3216 with grades of C or above. This upper 3000-level course includes the theory and research on the relationship of language and thought, covering topics such as how language is represented and processed in the mind and brain, the cognitive processes underlying language comprehension, production, and

acquisition, and the influence of language on memory, problem solving, and decision making.

PSYC 3333. Behavioral Neuroscience. (3) Prerequisite(s): PSYC 1101, PSYC 2113, PSYC 2391, and PSYC 3291 or PSYC 3292 with grades of C or above. This upper 3000-level course examines the relationship of physiological systems with emphasis on the nervous system, and how their integration can affect behavior and mental processes. This course covers topics including but not limited to psychopharmacology, sexual differentiation, neurobiology of emotion, sleep, eating, etc. Students should expect to complete APA style writing project(s).

PSYC 3347. Child Psychopathology. (3) Prerequisite(s): PSYC 1101, PSYC 2151, and PSYC 2370, all with grades of C or above. Principles of classification, assessment and treatment of children and adolescents who display deviant affective, cognitive, and social behavior.

PSYC 3355. Psychological Approaches to Diversity. (3) Prerequisite(s): PSYC 1101 and PSYC 3291 or PSYC 3292 with grade of C or above. This upper 3000-level course examines research on the processes and consequences of stereotyping and discrimination for different demographic subgroups (e.g., women, LGBTQ+, disabled and racial/ethnic groups) and the social implications. APA style writing projects will be expected of students.

PSYC 3356. Psychology of Women and Gender. (3) Cross-listed Course(s): WGST 3226. Prerequisite(s): PSYC 1101, PSYC 3291 or PSYC 3292; with grade of C or above. This upper 3000-level course examines the psychological research and theory regarding women and gender topics including gender-role development, gender stereotyping, intersection of gender and ethnicity, gendering of emotions, abilities and achievement, gender and work, and women's health and sexuality. APA style writing projects will be expected of students.

PSYC 3357. Introduction to Community Psychology. (3) Prerequisite(s): PSYC 1101 and PSYC 2391 with grade of C or above or with approval from the instructor. Social forces, particularly within the context of organizations and/or communities, that affect the development of psychopathology and/or personal competency, with emphasis on preventing psychopathology and increasing competency. Topics include: the concept of prevention; assessment of organizations, communities, and other environments; methods of instituting organizational and community change; evaluating the effects of community interventions; social policy analysis; and ethical issues involved in community work.

PSYC 3405. Practicum in Applied Psychology. (1 to 4) Prerequisite(s): Junior or Senior standing, permission of instructor and department. Work in practical settings related to psychology under the supervision of a faculty member. *May be repeated for credit with permission of department.* Students must obtain approval in the semester preceding the semester in which the practicum is to be taken. *Graded on a Pass/No Credit basis.*

PSYC 3407. Service Learning in Psychology. (1 to 4) (SL) Prerequisite(s): Permission of instructor. Work in practical settings related to psychology. Practicum setting may be local or international. *May be repeated for credit. Graded on a pass/no credit basis.*

PSYC 3806. Undergraduate Research Assistantship. (1 to 4) Prerequisite(s): Permission of instructor, Psychology major, and a GPA above 2.0. Assist faculty with current research projects. Exact duties depend on hours enrolled and the needs of the instructor. *May be repeated for credit.* Students must obtain approval from the instructor listed in the schedule of classes in the semester preceding the semester in which the course is to be taken.

PSYC 3808. Undergraduate Teaching Assistantship. (3) Prerequisite(s): Psychology major, Junior or Senior standing, overall GPA of 2.75 or above, and a Psychology GPA of 3.0 or above. Undergraduate teaching assistants (UGTAs) assist faculty with the administration of courses, hold review and practice sessions for students needing assistance. All UGTAs are expected to meet with the supervising faculty member once a week, attend all class meetings of the course in which they are assisting, hold a minimum of two office hours per week, and complete other activities as requested by the instructor. Students wanting to become UGTAs may apply to the faculty listed in the schedule of classes as PSYC 3808 instructors. The selection process is competitive. *May be repeated for credit.*

PSYC 4006. Advanced Topics in Psychology. (3) Prerequisite(s): Psychology major; Senior standing; PSYC 1101; PSYC 2391; PSYC 3291 or PSYC 3292; and STAT 1220, STAT 1221, or STAT 1222; all with grades of C or above within two attempts. Examination of special psychological topics. May be used in fulfillment of the capstone requirement for the major.

PSYC 4009. Advanced Topics in Psychological Research. (3) Prerequisite(s): PSYC 3291 or PSYC 3292 with grade of C or above, Psychology major, and Senior standing. Examination of special psychological topics. Writing is a central requirement of the course. May be used in fulfillment of the capstone requirement for the major.

PSYC 4116. Cognitive Neuroscience. (3) Prerequisite(s): PSYC 3291 OR PSYC 3292 and PSYC 3333 OR PSYC 3216 with grades of C or above, or permission of instructor. Biological basis of consciousness and the neurobiology of mental processes by which we perceive, act, learn, and remember; representation of mental processes from electrophysiological and brain imaging techniques, clinical neurology, and computational science.

PSYC 4151. Psychology of Personality. (3) Prerequisite(s): PSYC 2341, PSYC 2350, and PSYC 3291 or PSYC 3292 with grades of C or above. Current personality theories. Consideration given to psychoanalytic, physiological, trait and factor, the perceptual viewpoints in the light of contemporary research.

PSYC 4360. Advanced Investigation in Health Psychology. (3) Prerequisite(s): PSYC 3292 or PSYC 2360 and PSYC 3291 with a C or better; Psychology Major, Senior Standing. This capstone course is a detailed examination of issues relevant to health and behavior. Using a combination of lecture, readings of primary research and some discussion, this course covers health-related concepts and controversies current in the professional literature. As a 4000-level course, it emphasizes development of written and oral communication skills for a career in psychology-related employment. See comments in the course registration system for the exact focus of the current offering.

PSYC 4601. Seminar in Experimental Psychology. (3) Prerequisite(s): Psychology major; Senior standing; PSYC 1101, PSYC 2391, and PSYC 3292; all with grades of C or above within two attempts. In this capstone course, an in-depth examination of an area of current concern in the psychological laboratory and study design. Each semester may have a different focus such as discrimination, cognitive tasks, experimental analysis of behavior, attention, or emotional responses, or challenge/stress tasks. Emphasizes development of written and oral communication skills. See comments in the course registration system for the exact focus of the current offering.

PSYC 4602. Seminar in Human Adaptation and Behavior. (3) Prerequisite(s): Psychology major; Senior standing; PSYC 2391; PSYC 3291 or PSYC 3292; all with grades of C or above within two attempts. In this capstone, an intensive reading and discussion in selected areas of psychology, such as stress, personality, emotions and psychopathology. Emphasizes development of written and oral communication skills. See comments in the course registration system for the exact focus of the current offering.

PSYC 4620. Seminar in Industrial/Organizational Psychology. (3) Prerequisite(s): Psychology major; Senior standing; PSYC 2391; PSYC 3291 or PSYC 3292; all with grades of C or above within two attempts; and PSYC 2320 with grade of C or above. This capstone covers topics of current concern in industrial/organizational psychology and related disciplines, including issues that affect individuals at work and organizations in society. Emphasizes development of written and oral communication skills. See comments in the course registration system for the exact focus of the current offering.

PSYC 4633. Seminar in Neuroscience. (3) Prerequisite(s): Psychology major; Senior standing; PSYC 3291 or PSYC 3292 and PSYC 3333 or PSYC 4116; all with grades of C or above. This capstone course will provide an intensive study of selected topics in cognitive or behavioral neuroscience, such as psychopharmacology, biofeedback and self-regulation, and sleeping and waking. Emphasizes development of written and oral communication skills.

PSYC 4651. Seminar in Social Psychology. (3) Prerequisite(s): Psychology major; Senior standing; PSYC 2391; PSYC 3291 or PSYC 3292; all with grades of C or above within two attempts; and PSYC 2350 with grade of C or above. In this capstone, an intensive study at the advanced level of topics of current research and theoretical interest in social psychology. Emphasizes development of written and oral communication skills. See comments in the course registration system for the exact focus of the current offering.

PSYC 4655. Seminar in Community Psychology. (3) Prerequisite(s): Psychology major; Senior standing; PSYC 1101; PSYC 2391; PSYC 3292; STAT 1220, STAT 1221, or STAT 1222; all with grades of C or above within two attempts; and PSYC 2150 and PSYC 2165 with grades of C or above. Application of psychological research findings to specific problems in the community with emphasis on problems hypothesized directly to affect psychological well-being. Emphasizes development of written and oral communication skills.

PSYC 4660. Seminar in Health Psychology. (3) Prerequisite(s): Psychology major; Senior standing; PSYC 2391, PSYC 3292 and PSYC 2360 with grade of C or above. In this capstone course, a detailed examination of issues relevant to health and behavior. Readings of

primary research and critical discussion-focused implementation of health-related concepts and controversies current in the professional literature. Limited lectures emphasizes development of written and oral communication skills in line with preparation for students on research-based graduate school trajectory. See comments in the course registration system for the exact focus of the current offering.

PSYC 4671. Seminar in Developmental Psychology. (3) Prerequisite(s): Psychology major; Senior standing; PSYC 2391; PSYC 3291 or PSYC 3292; all with grades of C or above within two attempts; and PSYC 2370 or PSYC 2371 or PSYC 2372, all with grades of C or above. In this capstone, a concentrated examination of selected current issues and research in a field of developmental psychology. Emphasizes development of written and oral communication skills. See comments in the course registration system for the exact focus of the current offering.

PSYC 4701. Honors Thesis I. (3) Prerequisite(s): Psychology major; Junior or Senior standing; PSYC 1101, and STAT 1220, STAT 1221, or STAT 1222 with grades of C or above within two attempts; PSYC 2391 and PSYC 3292 with grades of B or above; and permission of instructor. Initiation of independent Honors research, including the preparation and defense of a formal thesis proposal.

PSYC 4702. Honors Thesis II. (3) Prerequisite(s): Psychology major; Junior or Senior standing; PSYC 1101, and STAT 1220, STAT 1221, or STAT 1222 with grades of C or above within two attempts; PSYC 2391, PSYC 3292, and PSYC 4701 with grades of B or above; permission of instructor; and approval of a proposal through the Honors College Application to Candidacy process the semester prior to taking the course. Completion of independent Honors research, including the preparation and defense of a formal Honors thesis. May be used in fulfillment of the capstone requirement for the major.

Reading, Language, and Literacy (READ)

READ 3224. Teaching Foundational Literacy Skills. (3) Prerequisite(s): Admission to Teacher Education. Research, theory, and evidence-based instructional practices related to the teaching and learning of reading in the elementary school with a specific focus on code-based reading processes including: concepts about print, phonological and phonemic awareness; alphabetic principles, phonics and spelling, high frequency words, fluency, and assessment-based instruction while meeting the needs of all learners. The coursework and objectives described were designed based on current research on reading development and instruction and are aligned to the science(s) of reading. This course includes an extensive field-based component.

READ 3226. Applied Literacy and Practices. (3) Prerequisite(s): Admission to Teacher Education. Research, theory, and evidence-based instructional practices related to integrating literacy within all subject areas focusing on: vocabulary, reading comprehension, and addressing the needs of all learners in elementary classrooms. The coursework and objectives were designed based on current research on reading development and instruction and are aligned to the science of reading. This course includes an extensive field-based component.

READ 3255. Integrating Reading and Writing Across Content Areas. (3) Prerequisite(s): Admission to Teacher Education. Theories, research, and instructional methods, associated with reading and writing in the

content areas of the middle and secondary school curriculum. Includes an extensive field-based component.

READ 4161. Assessment, Design, and Implementation of Classroom Reading Instruction. (3) Prerequisite(s): Admission to Teacher Education and READ 3224. Techniques for assessing reading development and using assessment data to design and implement responsive reading instruction. The coursework and objectives were designed based on current research on reading development and instruction and are aligned to the science of reading. This course includes an extensive field-based component.

READ 4205. Reading and Writing Across Digital Spaces. (3) Prerequisite(s): Admission to Teacher Education and the Reading Education Minor. Pedagogical techniques in reading and writing instruction using Web 2.0 technologies and digital computing devices. Includes 10 hours of field experience.

READ 4270. Investigating Reading Curriculum. (3) Prerequisite(s): Admission to Teacher Education and the Minor in Reading Education; READ 3224; and READ 3226. Examination of the current models and theories for teaching reading; the best practices for literacy growth and development; the instructional tools and techniques available to the teacher of literacy; and the materials for use in teaching reading in grades K-8. Emphasis is on teaching through a balanced literacy approach. Includes 10 hours of field experience.

Religious Studies (RELS)

Note: Depending on how respective sections of RELS courses are taught, a course could fulfill the requirement for Cultural Analysis [C], Historical Analysis [H], or Textual Analysis [T] for the B.A. in Religious Studies. Students must consult the course descriptions circulated each semester to determine which designations have been assigned to a particular course.

RELS 1120. The Bible and Its Interpreters. (3) An introduction to the history of biblical interpretation from the pre-canonical era to the present. *Fulfills the [H] or [T] requirement.*

RELS 1200. World Religions. (3) A study of the historical origins, central teachings, and devotional practices of the major religious traditions - Hinduism, Buddhism, Confucianism, Taoism, Judaism, Christianity, and Islam - alongside those of smaller and newer religious movements. *May not be taken for credit and for a grade if credit has been received for RELS 1502.*

RELS 1201. Introduction to Religion. (3) An introduction to the study of the religious dimensions of human existence. *Fulfills the [C] or [T] requirement.*

RELS 1502. Global Arts/Humanities: Other Worlds. (3) This Global Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of a complex, interconnected world. Students expel how religions change as they move across time and space. It asks: How do religions help people understand their place in the world, form transregional and

even trans-dimensional connections, and create senses of what is "local" and what is "universal"? How do people remake religion in new places and how are those places remade in the process? *May not be taken for credit and for a grade if credit has been received for RELS 1200.*

RELS 1512. Local Arts/Humanities: Religions in America. (3) This Local Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a member of a "local" community. Through the study of the experiences of different peoples, cultures, and communities in our city, our region, or our nation, students will be able to better understand the complexity and diversity of the society in which we live. Selected topics crucial to American religions serve as a prism for understanding how religion has both shaped and been shaped by American cultures. Subjects may include various religious traditions, new religious movements and cult controversies, conversions, environmental issues, popular cultures, and how variables such as sexuality, race, class, gender, region, and politics have changed and been changed by religious worldviews in the past and present.

RELS 2000. Topics in Religious Studies. (1 to 3) Credit hours vary with topics. *May be repeated for credit with change of topic. Fulfills the [C] or [T] requirement.*

RELS 2022. Martyrs, Heretics, and Reformers: Religious Conflict in the Western World. (3) Cross-listed Course(s): HIST 2001. When people think about religion it may evoke benevolent images of prayerfulness, faith, devotion, and worship. This course considers a darker side of religion: conflict, sometimes violent, sometimes not. Survey of the major conflicts of religions in the West, from the beginning of the Common Era to the Protestant Reformation, including, persecutions; doctrinal debates; heresies; inquisitions; crusades; inter-faith conflicts and; reform movements. *Fulfills the [C] or [T] requirement. May be repeated for credit with change of topic.*

RELS 2101. Introduction to Western Religions. (3) An introduction to Judaism, Christianity, Islam and other selected religions. Emphasis on the myths, stories, symbols, rituals, ideas, and ethical practices of these religions in their classical formulations and in their contemporary practices. *Fulfills the [H] or [T] requirement.*

RELS 2102. Introduction to Asian Religions. (3) An introduction to Hinduism, Buddhism, and other selected religions such as Confucianism, Daoism, and Islam. Emphasis on the myths, stories, symbols, rituals, ideas, and ethical practices of these religions in their classical formulations and in their contemporary practices. *Fulfills the [C] or [T] requirement.*

RELS 2104. Hebrew Scriptures/Old Testament. (3) The Hebrew religious tradition from the perspective of its development in the culture of the ancient Near East. *Fulfills the [H] or [T] requirement.*

RELS 2105. Introduction to the New Testament. (3) Literary and historical study of the New Testament in its Jewish and Greco-Roman contexts along with an understanding of the composition, themes, authorship, date, and design of each book. Special attention is given to the historical, archaeological, social, political, and other background information of the New Testament. *Fulfills the [H] or [T] requirement.*

RELS 2106. Religion in Latin America. (3) Cross-listed Course(s): LTAM 2106. Examines the diversity of religion in Latin America from the pre-

colonial period through the present, with special attention to how the intercultural encounters between Indigenous Americans, Africans, and Europeans have shaped religious identities, practices, and institutions in the region. *Fulfills the [C] and [H] requirements.*

RELS 2107. American Indian Lifeways. (3) An introduction to the various dimensions of American Indian religiosity, including other-than-human and human persons; myth and orality; sacred space, time, and objects; embodied lifeways and ceremonies; tradition; and change. Special emphasis is placed on past and present imaginings of American Indian lifeways. *Fulfills the [C] or [H] requirement.*

RELS 2109. Death and the Afterlife. (3) A survey of beliefs and rituals relating to dying, death, and the afterlife as found in religious, philosophical, and literary texts and in art and architecture.

RELS 2110. Judaism. (3) The development of Jewish religious thought from antiquity to the present. *Fulfills the [H] or [T] requirement.*

RELS 2120. Christianity. (3) The worldwide development of the thought and practices of diverse Christian traditions from antiquity to the present. *Fulfills the [C], [H], or [T] requirement.*

RELS 2131. Islam. (3) The development of the traditions in Islam with emphasis on Islamic culture, literature, and mysticism. *Fulfills the [H] or [T] requirement.*

RELS 2135. Qur'an. (3) What is the Qur'an? This course offers an introduction to the academic study of the Qur'an and its place in Muslim communities. *Fulfills the [H] or [T] requirement.*

RELS 2154. Hinduism. (3) The ancient Vedic traditions and the development of Hinduism. Emphasis is on the role of Hinduism in Indian civilization. *Fulfills the [H] or [T] requirement.*

RELS 2157. South and Southeast Asian Buddhism. (3) An examination of Buddhist traditions of South and Southeast Asia covering material from ancient India through modern formations. *Fulfills the [H] or [T] requirement.*

RELS 2166. Daoism. (3) A thematic and historical exploration of a major indigenous religious tradition of China, with particular attention devoted to early, medieval, and modern practices and worldviews. *Fulfills the [H] or [T] requirement.*

RELS 2169. Mahāyāna Buddhism in East Asia. (3) An exploration of the various ways the religious ideal of the bodhisattva has been imagined and employed in devotional practice in Mahāyāna Buddhist traditions in China, Korea, Japan, Vietnam, and the United States. *Fulfills the [H] or [T] requirement.*

RELS 2170. Caribbean Religions. (3) Examines the history and religious practices of traditions developed in the Caribbean - Vodou, Santería, Rastafarianism - as well as those transformed by the space of the Caribbean - Hinduism and Islam. *Fulfills the [H] or [C] requirement.*

RELS 2180. Religion in Latin America. (3) Examines of the richness and diversity of Latin American religions. *Fulfills the [C] requirement.*

RELS 2216. The Modern Middle East. (3) Cross-listed Course(s): HIST 2216. An introduction to the history of this important and dynamic region. The course focuses on the issues that have defined the Middle East in the recent past and provides students with the historical context needed to understand the region, its peoples, and its conflicts in greater depth. *Fulfills the [C] or [H] requirement.*

RELS 2225. Religion and Food. (3) Explores the relationship between religion and food by examining the role food plays in various religious traditions, as well as the construction of food as an ethical category. Religious myths relating to food, discuss food and ritual, the way food is used to shape gender and social roles, and the ways in which food is used as a tool or indicator of morality are studied. *Fulfills the [C] requirement.*

RELS 2235. Religion and Magic. (3) The cross-cultural study of magical and religious behavior, ritual, and belief systems. *Fulfills the [C], [H], or [T] requirement.*

RELS 2246. Jesus at the Movies. (3) An examination of cinematic representations of Jesus with attention to their relation to the historical, social, and political circumstances of their production and to ongoing conversation about the character, meaning, and significance of the Jesus story.

RELS 2250. The Supernatural and American Culture. (3) Despite claims that modernity is a realm of disenchantment, contemporary American culture continues to be haunted by ghosts, possessed by demons, and visited by alien others. This course examines some of the multiple appearances and meanings of the supernatural in American culture. *Fulfills the [C] or [H] requirement.*

RELS 2301. End of the World. (3) A study of the influence of End of the World ideas in various cultures and religious traditions. *Fulfills the [C] or [H] requirement.*

RELS 2600. Orientation to the Study of Religion. (3) Prerequisite(s): Religious Studies major. Required of all majors as early in their program as possible. Examines basic concepts, theories, and approaches that are involved in the critical, academic study of religion. Attention is given to basic research materials and to standard writing practices in the discipline. This

RELS 3000. Special Topics in Religious Studies. (3) Treatment of a special topic in religious studies. *May be repeated for credit with change of topic.* Same as RELS 3001, but does not fulfill the General Education writing goal. *Fulfills the [C], [H], or [T] requirement.*

RELS 3001. Special Topics in Religious Studies-Writing Intensive. (3) Treatment of a special topic in religious studies. *May be repeated for credit with change of topic.* Same as RELS 3000, but fulfills the General Education writing goal. *Fulfills the [C], [H], or [T] requirement.*

RELS 3090. Readings in Primary Texts. (3) Introductory and/or intermediate level readings of ancient and medieval primary source texts in languages such as Greek, Latin, Hebrew, Aramaic, Arabic, Sanskrit, or Chinese. *May be repeated for credit with change of topic.* *Fulfills the [T] requirement.*

RELS 3104. Prophecy and Prophetic Literature in Ancient Israel. (3) An examination of the phenomenon of prophecy in the religion of ancient

Israel, with particular attention devoted to the writings about and writings attributed to named prophets in the Hebrew Bible. *Fulfills the [H] or [T] requirement.*

RELS 3113. Jesus. (3) Prerequisite(s): RELS 2105 is recommended. Jesus and the religion he taught from the point of view of the synoptic gospels. *Fulfills the [H] or [T] requirement.*

RELS 3114. Why God Lies: The Difficulty Deity of the Hebrew Bible. (3) Exploration of difficult passages of the Hebrew Bible in which the deity appears to fib, connive, or outright lie to patriarchs, prophets, and the people. This is not a course in theology, but one which requires an academic and secular approach. Students work to understand the texts of Hebrew Bible in their cultural and historical context, so class material also includes the study and comparison of other myths and narratives of the Ancient Near East. *Fulfills the [C] or [T] requirement.*

RELS 3115. Early Christianity. (3) The history of Christianity in the second-seventh centuries C.E. Topics may include martyrdom and persecution, heresy and orthodoxy, constructions of gender and sexuality in early Christianity, church-state relations, asceticism and monasticism, Constantine, and the Christianization of the Roman Empire. *Fulfills the [H] or [T] requirement.*

RELS 3116. Paul. (3) A close study of the writings of the apostle Paul in their historical contexts with consideration of the ways in which they played a role in the development of the emerging Christian movement. *Fulfills the [H] or [T] requirement.*

RELS 3118. God and Sex in the Hebrew Scriptures/Old Testament. (3) Cross-listed Course(s): WGST 3050. Discussion of sexual boundaries, narratives of sexual abuse and sexual violence, tales of an apparent erotic eden - it's all to be found in the Old Testament/Hebrew Bible. Sexuality and gender in biblical literature and culture are explored. Topics include: God's own sexual relationships to prohibited, apparently prohibited, and permitted sexual relationships among humans. Texts of terror and texts of amatory idylls are examined; sources include primary texts, midrashic discussions on the same, and academic commentaries. *Fulfills the [T] requirement.*

RELS 3122. Esoteric Traditions. (3) The study of one or more particular expressions of religious esotericism (e.g., Jewish Kabbalah; Hindu Tantra; etc.). *May be repeated for credit with change of topic.* *Fulfills the [C] or [T] requirement.*

RELS 3125. The Devil. (3) A cross-cultural investigation of personifications of evil and moral corruption - namely, the Devil and related figures such as demons, witches, and unclean spirits. *Fulfills the [C] requirement.*

RELS 3129. Christian Controversies. (3) An exploration of Christian responses to ethical, cultural, political, and theological conflicts. The issues are selected to represent a range of time periods in the history of various Christian traditions. *Fulfills the [H] or [T] requirement.*

RELS 3134. Religion in the Contemporary United States. (3) An examination of selected topics and issues concerning contemporary American religion and culture. Topics may include, but are not limited to, religion and politics, the numerical decline of some religious groups and the explosive growth of others, the increased visibility of combinative

religious practices and beliefs, new religious movements, and the intertwining of religions, popular culture, and consumer capitalism. *Fulfills the [C] or [T] requirement.*

RELS 3137. Religion in the African American Experience. (3) An introduction to the evolution of black religious thought and culture in America during the 20th century. Emphasizes the rise of the local black church and its expanding role within African American urban communities. Also addresses the emergence of other religious belief systems in contemporary African American culture, such as Voodoo, Santeria, Spiritist churches, the Nation of Islam and even Black Judaism. Issues of race, class, gender, identity, and violence are points of discussion in light of black religious life. *Fulfills the [C] or [H] requirement.*

RELS 3150. The African American Church and Civil Rights. (3) Cross-listed Course(s): AFRS 3150. Role of the African American church in the struggle for human equality. Topics such as radical, moderate, and accommodationist leadership styles; historical development of the Black Church in the South; and the Black Church's emergence as a foundation for modern civil rights movement. *Fulfills the [C] or [H] requirement.*

RELS 3206. Religion and Food. (3) Explores the relationship between religion and food by examining the role food plays in various religious traditions, as well as the construction of food as an ethical category. *Fulfills the [C] requirement.*

RELS 3207. Religion and Politics. (3) The historic and ongoing interactions between religion and politics. Topics include: the public representation of religion; the religious and political institutions that shape religious presence in the public sphere; constructions of the sacred and the secular in political ideologies; and class, gender, and race in the context of political religions and religious politics. *Fulfills the [H] or [C] requirement.*

RELS 3208. Religion and the Arts. (3) Examines the web of relationships between religion and the arts by exploring both religious theories of beauty and art, as well the impact that religious traditions have had on cultural and artistic production. *Fulfills the [C] or [H] requirement.*

RELS 3210. Religion and Popular Culture. (3) An examination of the interactions and intertwining of religion and popular culture. Topics may include, but are not limited to, popular literature, domestic rituals, material and visual cultures, space and place, fan cultures, media, and folklore. Emphasis on how religion and popular culture shape and are shaped by issues of identity, community, nostalgia, memory, commercialism, capitalism, power, and meaning. *Fulfills the [C] or [T] requirement.*

RELS 3212. Religion, Media, and Film. (3) An examination of the historical and contemporary intertwining of religion and various forms of media that may include print, television, film, and online case studies. Although the focus of this course may vary, it may only be taken once for credit. *Fulfills the [C] or [T] requirement.*

RELS 3214. Religion and Healing. (3) Examines the ways that ethnographic methods can be employed to make sense of medicine, magic, illness, spiritual affliction, and healing across diverse social, cultural, and political contexts. What counts as illness? Who decides

which modes of healing are legitimate? These questions introduce students to encounters between religion and medicine, both broadly defined. *Fulfills the [C] requirement.*

RELS 3215. Religion and Sexuality. (3) Cross-listed Course(s): WGST 3215. An examination of the role of religious discourses and practices in shaping, understanding, and evaluating sexual practices, desires and identities. Although the focus of this course may vary, it may only be taken once for credit. *Fulfills the [C] or [T] requirement.*

RELS 3217. The Bible and Homosexuality. (3) Cross-listed Course(s): WGST 3217. Considers a wide range of biblical texts that are referenced in political, cultural, and theological arguments concerning homosexuality, lesbian and gay civil rights, and same-sex marriage. Examines how both pro-gay and anti-gay interpreters have engaged biblical texts and invoked biblical authority across time, rather than determining which views are "right" or "wrong."

RELS 3220. Religion and Gender. (3) An examination of the role of religious discourses and practices in shaping, regulating, and evaluating masculine identities and practices. Although the focus of this course may vary, it may only be taken once for credit. *Fulfills the [C] or [T] requirement.*

RELS 3225. Religion and Race. (3) An examination of the historical and theoretical influence of religion upon racial identity, discrimination, and stratification in society. *Fulfills the [H] or [C] requirement.*

RELS 3230. Race, Religion, and Murder. (3) An introduction to the intersection of race, religion, and violence in American culture. Addresses how Judeo-Christian, Islamic, and Asian traditions have been used to justify and even condone acts of violence against women, children, and peoples of color. *Fulfills the [C] or [T] requirement.*

RELS 3232. Islam in the African American Experience. (3) An examination of the historical practices of Islam and its varied forms within African American culture. A key component of the course centers around the narratives of Noble Drew Ali, Elijah Muhammad, Malcolm X, Warith Deen Mohammed, and Louis Farrakhan. Also has a gendered component looking at the leadership of black women within Islam, the Nation of Islam, and Moorish Science. *Fulfills the [C] or [H] requirement.*

RELS 3235. Muslims in America. (3) Explores the history of Islam in North America. *Fulfills the [C] or [H] requirement.*

RELS 3238. Asians in the Americas. (3) Examines the history of Asian migration to the U.S. and the religious communities they have established. *Fulfills the [C] or [H] requirement.*

RELS 3242. Philosophy of Religion. (3) Cross-listed Course(s): PHIL 3243. Philosophical implications of religious experience, including the definitions, development, and diverse forms of the problems of belief and reason in modern thought. *Fulfills the [C] or [T] requirement.*

RELS 3260. Buddhism in the Modern World. (3) Evaluates a variety of perennial questions about Buddhism in the modern world: Is Buddhism a philosophy? A mind science? An ancient mystical path? A modern construct? A wide range of primary source materials are used to examine how these works shape Buddhism. We consider their pre-modern influences and turn to recent scholarship to discuss how romantic,

imperialist, anti-modern, nationalist, therapeutic, and scientific frames depict one of today's most popular religions. *Fulfills the [C] or [T] requirement.*

RELS 3270. Interpreting Asian Religions. (3) Students learn to read, understand, and analyze sources from Asian religious traditions and critique the ways in which Asian traditions have been studied in the discipline of religion. *Fulfills the [H] or [T] requirement.*

RELS 3300. Religion and Healing. (3) An examination of practices of healing and their concomitant discourses of illness, health, body, society, and cosmos across selected religious and secular traditions. *Fulfills the [C] or [T] requirement.*

RELS 3400. Internships. (3) Prerequisite(s): Religious Studies major or minor, 9 earned credit hours in religious studies, and permission of instructor. Research and in-service training in business or community-based organizations. Specific content based on contract between student, supervising professor and cooperating organization. *May be repeated for credit up to 6 credit hours.* *Fulfills the [C], [H], or [T] requirement.* Approximately 120 contact hours for the semester.

RELS 4000. Advanced Topics in Religious Studies. (3) Prerequisite(s): Permission of instructor. *May be repeated for credit with change of topic.* *Fulfills the [C], [H], or [T] requirement.*

RELS 4010. Major Figure in Religious Studies. (3) A focused examination of the life and works of a major figure, or small set of related figures, and their significance for the study of religion. *May be repeated for credit for different figures.* *Fulfills the [H] or [T] requirement.*

RELS 4040. Major Approach to the Study of Religion. (3) A focused examination of an influential classic or contemporary approach to the study of religion, or small set of related approaches. Focuses on close reading of primary texts and developing students' critical engagement with the texts through writing and discussion. *May be repeated for credit for different approaches.* *Fulfills the [C] or [T] requirement.*

RELS 4107. Early Judaism. (3) Comparative historical and literary study of the varieties of Judaism evidenced during late antiquity (circa 70-640 C.E.), with special attention devoted to the formation and development of rabbinic Judaism. *Fulfills the [H] or [T] requirement.*

RELS 4121. Medieval and Reformation Christianity. (3) An examination of Christian thought and practice from the early Middle Ages (c. 500 CE) through the reformations of the sixteenth century. *Fulfills the [H] or [T] requirement.*

Latin America. (3) Examines the role that religion has played in the changing social, political, and economic landscape of Latin America from the colonial period through the present. *Fulfills the [C] or [H] requirement.*

RELS 4310. Religious Experience. (3) Examines different approaches to narratives of religious experience in order to practice how these narratives are used to understand religion in society. *Fulfills the [C] or [T] requirement.*

RELS 4320. Religion and Language. (3) Introduces methods for analyzing language and communication in religion. By looking closely at

specific communities' uses of spoken and written language, as well as their discourses about language, students critically examine the roles that language plays in constituting people's religious experiences, and how these, in turn, can be said to shape people's communicative practices. *Fulfills the [C] requirement.*

RELS 4600. Senior Seminar. (3) Prerequisite(s): RELS 2600. Required of Religious Studies majors in their final year of studies.

RELS 4657. Religion in Africa. (3) A seminar course that offers a historically and ethnographically situated overview of contemporary issues in African religiosity. Topics include: missionization; religion in pan-African nationalism and decolonization movements; debates over monotheism and Traditional African Religion; the shifting parameters of Christianity and Islam; sorcery, witchcraft, conspiracy; divination and mediumship; human encounters with ghosts and spirits; medicine and healing; and more. *Fulfills the [C] or [H] requirement.*

RELS 4701. Method and Theory in the Study of Religion. (3) A close examination of primary texts representing influential classical and contemporary approaches to the study of religion. Attention given to student writing and oral presentation skills. Optional for honors students. *Fulfills the [C] or [T] requirement.*

RELS 4790. Honors Thesis Proposal and Candidacy. (3) Honors thesis proposal and candidacy preparation. Prospective Religious Studies Honors students take this course the semester before graduation to be eligible for RELS 4791.

RELS 4791. Honors Thesis. (3) Prerequisite(s): RELS 4790, permission of instructor, and approval of a proposal through the Honors College Application to Candidacy process the semester prior to taking the course. Required of all honors students. *May be repeated for credit one time.*

RELS 4800. Independent Studies. (1 to 3) Prerequisite(s): Permission of instructor. An independent studies course in religious studies. *May be repeated for credit.*

Respiratory Therapy (RESP)

RESP 3099. Special Topics in Respiratory Therapy: Emerging Respiratory Therapy Literature. (1) An introduction to the emerging issues, trends, and news of respiratory therapy. Topics include: evidence-based literature reviews related to respiratory therapy professional practice. Topics and emphasis may vary.

RESP 3101. Leadership Practices and Professional Writing for Respiratory Therapists. (3) Prerequisite(s): Admission to BSRT program. A basic introduction to leadership by focusing on the history, trends, issues, and evolution of the respiratory therapy profession. Emphasis is placed on the practice of leadership, analysis of the professional environment for the current and future practice of respiratory care, and communication skills to improve leadership performance. Various topics assist students in becoming confident respiratory therapy advocates through their writing.

RESP 3102. Extended Services in Respiratory Therapy. (3) Prerequisite(s): Admission to BSRT program. A basic introduction into the history, trends, issues, and evolution of respiratory care extended

services. Emphasis is placed on outpatient services reimbursement within the respiratory therapy profession. Topics include: selected respiratory care theories and practices in alternate healthcare sites such as virtual services, outpatient cardiopulmonary rehabilitation, interventional pulmonology, DME services, pulmonary diagnostics, sales/clinical specialties, cardiopulmonary disease education, home care, and sub-acute care.

RESP 3103. Role of Pharmacology in Disease Management. (3) Prerequisite(s): Admission to BSRT program. A disease management approach to patient care with an emphasis on the role of pharmacology in disease management. Builds upon a basic understanding of the concepts and principles of pharmacology as applied in the respiratory therapy in the management of patient with cardiopulmonary disease and critical care.

RESP 3105. Advanced Critical Care Monitoring. (3) Prerequisite(s): Admission to BSRT program. A study of advanced cardiopulmonary monitoring used with critical care patients. Topics include: hemodynamic monitoring, mechanical ventilator waveform graphic analysis, and capnography.

RESP 3203. Cardiopulmonary Pharmacotherapy I. (2) Prerequisite(s): Admission to BSRT program. An introduction to an integrated, case-based evaluation of the physiology, pathophysiology, and pharmacology in the treatment and management of cardiopulmonary disorders. Topic emphasis on disorders that can compromise the cardiopulmonary system.

RESP 3204. Advanced Cardiopulmonary Physiology. (3) Prerequisite(s): Admission to BSRT program. Advanced physiology of the cardiovascular and pulmonary systems. A study of respiratory physiology, cardiac and circulatory function with relevant clinical application of concepts in cell biology, regulation and function of the cardiovascular system, gas exchange and transport, breathing regulation, and respiratory insufficiency.

RESP 3205. Cardiopulmonary Pharmacotherapy. (3) An integrated, case-based evaluation of the physiology, pathophysiology, and pharmacology in the treatment and management of cardiopulmonary disorders. Topic emphasis on using a whole-system approach to patient care and the use of pharmacology in cardiopulmonary disease management.

RESP 3206. Critical Care Monitoring and Mechanical Ventilation. (3) Prerequisite(s): Admission to BSRT program. Introduction to advanced topics in critical care, expressed through a holistic approach to the monitoring of critically ill patients. Introduction of monitoring modalities that are commonly utilized in critical care, analysis of lab values and their significance, and association with interventions that the critical care respiratory therapist encounters during clinical practice.

RESP 3207. Critical Care Monitoring and Mechanical Ventilation II. (2) Prerequisite(s): Admission to BSRT program. Introduction to advanced topics in mechanical ventilation expressed through a holistic approach to the management of critically ill patients. Various modalities of positive pressure ventilation, as well as adjunct measurement tools, are presented to provide an up-to-date perspective on mechanical ventilation and patient care.

RESP 3108. Introduction to Research Methods in Respiratory Therapy. (3) Prerequisite(s): Admission to BSRT program. Designed to highlight foundational concepts of research methods and assist in the development of the skills necessary to plan, conduct, evaluate, and analyze quantitative and qualitative research from an interdisciplinary perspective.

RESP 4101. Health Outcomes and Quality Assessment. (3) Cross-listed Course(s): RESP 5101. Prerequisite(s): RESP 3101. Evidence-based methods and techniques to design, implement, and evaluate healthcare quality control/improvement initiatives, and patient and population education programs.

RESP 4102. Department Management in the Healthcare Environment. (3) Cross-listed Course(s): RESP 5102. Prerequisite(s): RESP 3101. Administration, financial, human resource, legal, and policy concepts and issues in outpatient, inpatient, public, and private sector settings. Topics and emphases may vary.

RESP 4103. Evidence-Based Practice in Respiratory Care. (3) Prerequisite(s): Admission to BSRT program. An introduction to the concept of evidence-based practice and an opportunity to acquire the skills necessary to be able to incorporate evidence and best practices into professional work. These include an understanding of research methods and the approach to critical appraisal of research literature. This is a writing-intensive course with emphasis on written professional communication.

RESP 4105. Patient Education and Disease Management for the Respiratory Therapist. (3) Prerequisite(s): Admission to BSRT program. A review of the pathophysiology of common chronic cardiopulmonary diseases. Develop an understanding of evidenced-based disease management principles. Understand how to develop and implement disease management and patient education programs in the in-patient and out-patient setting.

RESP 4106. Neonatal/Pediatric Critical Care Pathophysiology. (3) Prerequisite(s): Admission to BSRT program. A review of fetal development and circulation related to acute and chronic neonatal disease. A survey of neonatal and pediatric disease processes which affect tissues, organs, and body as a whole. Special emphasis is placed on the etiology of critical illness and a systems oriented approach to diagnosis and treatment in the neonatal and pediatric critical care settings.

RESP 4107. Teaching Fundamentals and Clinical Education. (3) Prerequisite(s): Admission to BSRT program. Application of curricular theory to best practices in the classroom, disease management, and patient education settings. Planning for instruction and evaluation of respiratory therapy-related learning are focal points of this experience. Offers an introduction to the systematic process of planning for effective instruction and assessment as they relate to various clinical curricular concepts.

RESP 4108. Healthcare Outcomes and Quality Assessment: A Management Perspective. (3) Prerequisite(s): Admission to B.S. in Respiratory Therapy. A basic introduction to the administrative, financial, legal, and policy concepts and issues in outpatient, inpatient, public, and private sector healthcare settings. Topics include: evidence-

based methods and techniques in designing, implementing, and evaluating healthcare quality control and improvement initiatives.

RESP 4111. Respiratory Therapy Capstone. (8 or 9) Prerequisite(s): RESP 4101, RESP 4102, and RESP 4103. Experiences in a chosen focus area (clinical, administrative, or population-based). It culminates with a capstone project in the form of research, or other scholarly activity that articulates the design, organization, statistics and data analysis used, and includes an oral and written presentation of the project.

RESP 4204. Adult Critical Care Pathophysiology. (3) Prerequisite(s): Admission to BSRT program and RESP 3204. A survey of the adult disease processes which affect the tissues, organs, or body as a whole. Special emphasis is placed on the etiology of critical illness and a systems-oriented approach to diagnosis and treatment in the critical care setting.

RESP 4205. Information Technology in Respiratory Care. (3) Prerequisite(s): Admission to BSRT program. A study of the use of computer and information technology in healthcare. Emphasis placed on development of the knowledge and competencies necessary for selective use and evaluation of informatics, computer technology, and data management in healthcare.

RESP 4206. Health Communications: Ethical and Legal Implications. (3) Prerequisite(s): Admission to BSRT program. Focuses on the essential principles for respiratory therapists and other healthcare providers. Many ethical and legal issues that respiratory therapists may encounter in patient care settings are explored. Additional content includes discussions on professional moral dilemmas and ethical theories, which are used to illustrate principles that guide ethical decision-making.

RESP 4208. Critical Care Pathophysiological Concepts for Respiratory Therapy. (3) Prerequisite(s): Admission to BSRT program. Designed to survey neonatal, pediatric, and adult disease processes which affect the tissues, organs, or body as a whole. Special emphasis is placed on the etiology of critical illness and a systems-oriented approach to diagnosis and treatment in the critical care setting.

RESP 4410. Respiratory Therapy Practicum. (3) Experiences in a chosen focus area (clinical, education, administrative, research, or population-based). Emphasis is placed on experiential learning that results in expansion of responsibilities or transition into a new role or specialty area within the work environment.

RESP 4910. Respiratory Therapy Capstone Project. (6) Prerequisite(s): Admission to BSRT program. Pre- or Corequisite(s): RESP 3101, RESP 4101, RESP 4102, RESP 4103, and RESP 4107. Includes experiences in a chosen focus area (clinical, education, administrative, or population-based). Culminates in a respiratory therapy-related capstone project in the form of research, or other scholarly activity that articulates the design, organization, implementation, statistics, and data analysis used, and includes an oral and written presentation of the project.

Educational Research, Measurement, and Evaluation (RSCH)

RSCH 4101. Education Research Methods. (3) An orientation to designs and procedures utilized in educational research, emphasizing basic principles for conducting research, interpreting and evaluating published articles representative of educational problems and issues. *May be repeated one time if student receives a grade of C or below.*

Russian (RUSS)

RUSS 1201. Elementary Russian I. (3) Fundamentals of the Russian language, including speaking, listening comprehension, reading, and writing.

RUSS 1202. Elementary Russian II. (3) Prerequisite(s): RUSS 1201. Fundamentals of the Russian language, including speaking, listening comprehension, reading, and writing.

RUSS 2201. Intermediate Russian I. (3) Prerequisite(s): RUSS 1202 or permission of department. Review of grammar, with conversation and composition based upon readings in Russian culture and civilization.

RUSS 2202. Intermediate Russian II. (3) Prerequisite(s): RUSS 2201 or permission of department. Continuation of grammar, conversation, and composition skills, based on readings in Russian literature.

RUSS 3060. Topics in Russian. (3) Prerequisite(s): one RUSS 2000-level course or permission of instructor. Study of a particular facet of the Russian language, culture, or literature. Conducted in English. No knowledge of Russian required. *May be repeated with change of topic.*

RUSS 3061. Topics in Russian. (1 to 3) Prerequisite(s): one RUSS 2000-level course or permission of instructor. Study of a particular facet of the Russian language, culture, or literature. Conducted in English. No knowledge of Russian required. *May be repeated with change of topic.*

RUSS 3201. Advanced Russian Grammar, Composition, and Conversation I. (3) Prerequisite(s): RUSS 2202 or permission of department. Intensive review of Russian grammar, plus mastery of new grammatical structures, while performing written and oral task-oriented activities. Acquisition of new vocabulary in a cultural context.

RUSS 3202. Advanced Russian Grammar, Composition, and Conversation II. (3) Prerequisite(s): RUSS 3201 or permission of department. Intensive practice of Russian grammar, speaking, and writing. Additional Russian civilization and culture as students improve their language skills.

RUSS 3203. Advanced Russian Grammar and Conversation. (3) Prerequisite(s): RUSS 3201 or permission of department. Advanced Russian grammar and conversation on prepared topics. Emphasis on vocabulary, idiomatic expressions, and stylistics.

RUSS 3204. Masterpieces of Russian Literature. (3) Examines the greatest authors and masterpieces of Russian literature, including Tolstoy, Dostoevsky, and Chekhov. All readings, discussions, and

assignments are conducted in English. No knowledge of Russian required.

RUSS 3209. Russian Civilization and Culture. (3) Geographical, historical, and artistic features of Russian culture, as well as aspects of life, thought, behavior, attitudes, and customs of the Russian-speaking people. Lectures, discussions, and viewing of films. Conducted in English. No knowledge of Russian required.

RUSS 3800. Directed Individual Study. (1 to 4) Prerequisite(s): RUSS 3202 or permission of department. Individual work on a selected area of study. To be arranged with the instructor during the preceding semester. By special permission only. *May be repeated for credit.*

Secondary Education (SECD)

SECD 3800. Individual Study in Secondary Education. (1 to 6) Prerequisite(s): Permission of the student's advisor. Independent study under the supervision of an appropriate faculty member. *May be repeated for credit.*

SECD 4140. Adolescence and Secondary Schools. (3) Prerequisite(s): MDSK 2100 and admission to Teacher Education. Corequisite(s): MDSK 3151. Overview of secondary education, including the foundational components and instructional programs appropriate for contemporary adolescents in a diverse U.S. society.

SECD 4440. Student Teaching/Seminar: 9-12 Secondary Education. (15) Prerequisite(s): Permission of department for admission to student teaching. Student teaching is a planned sequence of experiences in the student's area of specialization conducted in an approved school setting under the supervision and coordination of a university supervisor and a clinical educator. During student teaching, the student must demonstrate the competencies identified for their specific teaching field in an appropriate grade level setting. The student is assigned 15 weeks in a school setting. Includes seminars. Participating students pay a course registration fee for edTPA portfolio assessment. *Graded on a Pass/No Credit basis.*

SECD 4452. Student Teaching/Seminar: 9-12 Secondary Math. (12) Prerequisite(s): Departmental permission for admission to student teaching. Corequisite(s): MDSK 4150. Student teaching is a planned sequence of experiences in the student's area of specialization conducted in an approved school setting under the supervision and coordination of a university supervisor and a clinical educator. During student teaching, the student must demonstrate the competencies identified for their specific teaching field in an appropriate grade level setting. The student is assigned 15 weeks in a school setting. Includes seminars. Participating students pay a course registration fee for edTPA portfolio assessment.

SECD 4453. Student Teaching/Seminar: 9-12 Secondary Science. (12) Prerequisite(s): Departmental permission for admission to student teaching. Corequisite(s): MDSK 4150. Student teaching is a planned sequence of experiences in the student's area of specialization conducted in an approved school setting under the supervision and coordination of a university supervisor and a clinical educator. During student teaching, the student must demonstrate the competencies identified for their specific teaching field in an appropriate grade level

setting. The student is assigned 15 weeks in a school setting. Includes seminars. Participating students pay a course registration fee for edTPA portfolio assessment.

SECD 4454. Student Teaching/Seminar: 9-12 Secondary Social Studies. (12) Prerequisite(s): Departmental permission for admission to student teaching. Corequisite(s): MDSK 4150. Student teaching is a planned sequence of experiences in the student's area of specialization conducted in an approved school setting under the supervision and coordination of a university supervisor and a clinical educator. During student teaching, the student must demonstrate the competencies identified for their specific teaching field in an appropriate grade level setting. The student is assigned 15 weeks in a school setting. Includes seminars. Participating students pay a course registration fee for edTPA portfolio assessment.

Systems Engineering (SEGR)

SEGR 2105. Computational Methods for Systems Engineering I. (3) Prerequisite(s): ENGR 1300, ENGR 1302, and MATH 1242 with grades of C or above or permission of department; Systems Engineering major; and Sophomore, Junior, or Senior standing. Introduces programming languages and computational algorithms that are often used by Systems Engineers. Object-Oriented Programming Language, specifically Python, is emphasized.

SEGR 2106. Engineering Economic Analysis. (3) Prerequisite(s): Systems Engineering major; and Sophomore, Junior, or Senior standing or permission of department. Covers economic analysis of engineering alternatives, including time value of money, cash flow analysis, cost estimation, project evaluation, accounting and budgeting tools. The use of AI in economic decision support will be discussed.

SEGR 2110. Systems Engineering Concepts. (3) Prerequisite(s): SEGR 2105 with grade of C or above; and Engineering major or minor. Introduction to systems engineering concepts through various application problems. The focus is particularly on systems engineering problems that utilize mathematical modeling and machine learning skills. The course culminates upon completion of a hands-on term project.

SEGR 2111. Introduction to Engineering Management. (3) Prerequisite(s): ENGR 1300 with a grade of C or better; and Engineering major or minor. Focuses on the fundamentals of engineering management, providing students with management principles and practices and the role of engineering management professionals. Technology advances and their impact on management philosophies, including globalization and artificial intelligence will be discussed.

SEGR 2121. Introduction to Logistics Systems and Supply Chains. (3) Prerequisite(s): ENGR 1300 with a grade of C or better, and Engineering major or minor. Focuses on the fundamentals in logistics systems and supply chain operations. It provides students the understanding of the operations in logistics systems and global supply chains and the roles of logistics/supply chain professionals in global business environment. In addition, the term project assignment requires to embrace the applications of AI in the supply chain operations.

SEGR 3102. System Simulation, Modeling, and Analysis. (3) Prerequisite(s): STAT 3128 with grade of C or above; and Engineering

major or minor. Focuses on the study of discrete-event simulation and its integration with machine learning techniques for the analysis, design, and optimization of complex systems. Students will learn how to use simulation software for simulation modeling and analysis, and apply machine learning algorithms specifically reinforcement learning, to: (i) Model and analyze complex systems, (ii) Optimize system performance, (iii) Make data-driven decisions, and (iv) Improve system design and operations.

SEGR 3103. Human System Interface. (3) Prerequisite(s): SEGR 2105 with grade of C or above or permission of department; and Engineering major or minor. Explores the interface between human, organizational, and systems operations, focusing on the impact of human and cultural factors on the effectiveness of system operations in a global business environment. This course delves into the human-centered aspects of systems operations, including: (i) Human-AI collaboration and augmentation, (ii) Cultural and social implications of AI adoption and (iii) Human factors in system design and optimization.

SEGR 3105. Computational Methods for Systems Engineering II. (3) Prerequisite(s): SEGR 2105 with grade of C or above; and Engineering major or minor. Topics in data analytics and basic machine learning skills, such as regression, classification, data processing, and model validation, by using R programming and packages.

SEGR 3107. Decision and Risk Analysis. (3) Prerequisite(s): SEGR 2106; STAT 3128 with grade of C or above; and Engineering major or minor. Useful tools for analyzing difficult decisions and making the right choice. After introducing the main elements of decision making, the course focuses on structuring decisions using decision trees and influence diagrams. Decisions under conflicting objectives and multiple criteria are also covered, as well as sensitivity and risk analysis. Techniques such as multi-objective decision trees and Analytic Hierarchic Process (AHP) are discussed. Additional topics include decisions without probabilities, risk attitudes, utility functions, value of information and subjective probabilities. Students work on an applied term project related to decision and risk analysis.

SEGR 3110. System Design and Deployment. (3) Prerequisite(s): SEGR 3105; PHYS 2102; and Engineering major or minor. Introduction to various systems engineering applications that require data analytics and machine learning skills. The emphasis is on both descriptive and prescriptive analytics problems by implementing statistical computing, supervised learning, and unsupervised learning. The course culminates upon completion of a hands-on term project.

SEGR 3111. Project Management. (3) Prerequisite(s): STAT 3128 or STAT 1222; and Engineering major or minor. Focuses on the study of various aspects of project management techniques and issues, and the use of conceptual, analytical, and systems approaches in managing engineering projects and activities. It includes the development and writing of project plans and reports for engineering and business operations. In addition, the term project assignment requires to embrace the applications of AI in the operations.

SEGR 3122. Implementation of Logistics Systems and Supply Chains. (3) Prerequisite(s): SEGR 2121 with grade of C or above; and Engineering major or minor. Reviews and analyzes real-life logistics and supply chain implementation cases. Different industry supply chains are compared

and benchmarking is emphasized through review of industry best practices.

SEGR 3131. Computer Aided Design and Manufacturing. (3) Prerequisite(s): SEGR 2101 with grade of C or above or permission of department; and Engineering major or minor. Focuses on the basics of hardware and software implementation in the design and manufacturing processes. The emphasis is in making the design and manufacturing processes effective and efficient for global business competition.

SEGR 3132. Facilities Planning and Material Handling Systems. (3) Prerequisite(s): SEGR 2101 with grade of C or above or permission of department; and Engineering major or minor. Focuses on the basics in facility planning, plant layout design, material handling systems design and integration, and warehousing. The emphasis is on the effective design and integration of plant layout, material handling systems, and warehousing for supply chain operations.

SEGR 3201. Operations Research I: Deterministic Models. (3) Cross-listed Course(s): OPRS 3111. Prerequisite(s): Systems Engineering major; and MATH 1242 and MATH 2164 with grades C or above. Introduces various deterministic Operations Research topics such as linear programming, integer programming, nonlinear programming, network flow problems, dynamic programming, and game theory.

SEGR 3202. Operations Research II: Stochastic Models. (3) Cross-listed Course(s): OPRS 3113. Prerequisite(s): Systems Engineering major; and MATH 2164 and STAT 3128 with grades of C or above. Introduces various stochastic Operations Research topics such as decision-making under uncertainty, probabilistic inventory models, Markov chains, probabilistic dynamic programming, and queueing theory.

SEGR 3290. Systems Design Project I. (2) Prerequisite(s): SEGR 2110 ;SEGR 3110; and SEGR 3102 or SEGR 3107 with a grade of C or above; and Systems Engineering major with 30 or less credit hours remaining in degree requirements. First of a two-semester sequence leading to a major integrative system design experience in applying the principles of systems design and analysis and project management to the design of a system. Teamwork and communication skills are emphasized. It focuses on the development of the project plan and proposal for the capstone systems design project. Each student develops a complete systems design project plan and proposal and makes an oral presentation of the proposal to the faculty. It runs in conjunction with the project management course.

SEGR 3291. Systems Design Project II. (2) Prerequisite(s): SEGR 3290 with grade of C or above; and Systems Engineering major. A continuation of SEGR 3290 for the execution of the proposed systems design project. Includes a mid-term written progress report with an oral presentation and a final written report, plus the final oral presentation to demonstrate project results.

SEGR 3695. Systems Engineering Cooperative Education Seminar. (1) Prerequisite(s): ENGR 3500; and Engineering major or minor. Required of students during semesters immediately following each work assignment for presentation of engineering reports on co-op work done in the prior semester. *Graded on a Pass/No Credit Basis. May be repeated for credit.*

SEGR 3890. Individualized Study. (1 to 3) Prerequisite(s): Permission of department. Supervised individual study within an area of a student's particular interest which is beyond the scope of existing courses. *May be repeated for credit up to 3 credit hours.*

SEGR 4090. Special Topics. (1 to 6) Prerequisite(s): Engineering major or minor. Directed study of current topics of special interest.

SEGR 4101. Network Modeling and Analysis. (3) Prerequisite(s): SEGR 3201 with grade of C or above or SEGR 4952 with grade of C or above; and Engineering major or minor. Explores formulation and solution of optimization problems using network flow algorithms. Topics include: minimum flow problems shortest path, maximum flow, transportation, assignment, minimum spanning trees. Efficient solution algorithms are investigated.

SEGR 4114. Production Control Systems. (3) Cross-listed Course(s): EMGT 5114. Prerequisite(s): STAT 1220, STAT 1221, STAT 1222, or STAT 3128 with grade of C or above; SEGR 3201; and Engineering major or minor. Pre- or Corequisite(s): SEGR 3202. Principles, analysis and design of production and inventory planning and control systems. Some of the main discussions include learning/experience curves, capacity planning, demand forecasting, aggregate production planning, inventory planning, supply chains, production scheduling, and line balancing. Practical modeling approaches including some deterministic, stochastic models and some optimization-based solution techniques in production planning are discussed. Students work on an applied term project related to production planning.

SEGR 4131. Product and Process Design. (3) Prerequisite(s): SEGR 2101 with grade of C or above or permission of department; and Engineering major or minor. Focuses on how to achieve a high-quality, customer-oriented product development process, from technology and product innovation, to design and development, leading up to production. Design for Six Sigma (DFSS) is the main technology discussed plus other product design approaches, such as design for cost, design for safety, and design for environment.

SEGR 4141. Engineering Experimental Design. (3) Cross-listed Course(s): EMGT 5141. Prerequisite(s): STAT 3128 with grade of C or above; and Engineering major or minor. Focuses on how to achieve high-quality/low-cost systems based on Taguchi methods, design of experiments methods, and statistical analysis of data. Also includes introduction to response surface methods.

SEGR 4142. Reliability Management and Survival Analysis. (3) Cross-listed Course(s): EMGT 5142. Prerequisite(s): STAT 3128 with grade of C or above; and Engineering major or minor. Introduces various reliability and survival analysis techniques. Topics include: reliability/survival functions, failure/hazard rate functions; parametric/non-parametric/semi-parametric techniques; Jensen Shannon Divergence, Kullback-Leibler Divergence, and Wasserstein distance for Generative Data Modeling; Conditional Value at Risk.

SEGR 4150. Leadership Skills for Engineers. (3) Prerequisite(s): Junior or Senior standing and Engineering major or minor. Focuses on skills needed to be an effective leader in business and industry in the 21st Century. The course includes introduction to leadership styles and how they are employed in organizations. The course covers leadership skills

and competencies and introduces students to the impact of AI and global communications on organization and leadership.

SEGR 4154. Bayesian Analysis for Human Decision. (3) Cross-listed Course(s): EMGT 5154. Prerequisite(s): STAT 3128 with grade of C or above. The Bayesian approach to decision-making with numerous applications in engineering, business, and healthcare. Topics include Information Theory; Signal Detection and ROC curve; Principle Components and Structural Equation Modeling; d-Separation, Bayesian networks and Causality Inference. *May be repeated for credit.*

SEGR 4170. Total Quality Systems. (3) Cross-listed Course(s): EMGT 5170. Prerequisite(s): STAT 3128 with grade of C or above; and Engineering major or minor. Applicable principles and practice in continuous quality improvement (CQI) and Total Quality Management (TQM). Statistical process control, root cause analysis, management and planning tools as well as how Generative AI can be used to enhance the effectiveness and efficiency of statistical quality control processes. All of the above are discussed through assignments and team projects. Leadership and communication skills are also a part of the class.

SEGR 4201. Fundamentals of Deterministic System Analysis. (3) Cross-listed Course(s): EMGT 5201. Prerequisite(s): MATH 2164. The course is partitioned into three modules: refresher of linear algebra with introduction to data analytics applications, continuous optimization focused on linear systems, and discrete optimization by integer programming and dynamic programming. *May be repeated for credit.*

SEGR 4202. Fundamentals of Stochastic System Analysis. (3) Cross-listed Course(s): EMGT 5202. Prerequisite(s): STAT 3128 with grade of C or above; MATH 2164; and SEGR 3202. The fundamentals of stochastic system analysis. The course is dissected into three modules: probability and statistics, stochastic models, and regression analysis. *May be repeated for credit.*

SEGR 4203. Fundamentals of Engineering Management. (3) Cross-listed Course(s): EMGT 5203. Prerequisite(s): STAT 3128 with grade of C or above. The fundamentals of engineering management. The course is dissected into three modules: engineering economics, decision and Bayesian analysis, and game theory. *May be repeated for credit.*

SEGR 4952. Engineering System Optimization. (3) Prerequisite(s): SEGR 3201 with grade of C or above; Senior standing; and Engineering major or minor. Nonlinear optimization and integer programming are introduced along with hands-on projects. Machine learning applications are utilized for nonlinear optimization. Decomposition methods are discussed along with integer programming.

SEGR 4961. Introduction to Energy Systems. (3) Prerequisite(s): Basic math, economics, or permission of instructor; Junior or Senior standing; and Engineering major or minor. Overview of energy systems: energy types, generation, conversion, storage, transportation/transmission, and utilization. Principles, physical structure, processes, and utilization of fossil fuel, nuclear, and renewables for transportation, thermal, and electrical energy generation are discussed along with associated performance metrics. Also provides an introduction to environmental impacts of energy production, life-cycle analysis, energy efficiency concepts and metrics, transmission systems, grid reliability, and the impact of smart grid technologies. All topics are presented in the context of industry standards as well as federal and state regulations.

SEGR 4962. Energy Markets. (3) Prerequisite(s): Basic math, economics, or permission of instructor; Junior or Senior standing; and Engineering major or minor. Energy and power systems in regulated and competitive environments and implications on business decisions for firms in these industries. Topics include: mechanism of energy markets; comparative market systems; determination of prices under different market structures; gas, oil, coal, and electricity market architecture; electricity market design; dispatch and new build decisions; smart grid and renewable energy in electricity markets; risk and risk management in energy, including demand and price volatility and use of financial derivatives; and the impact of financial market trends and current and proposed policies on the energy industry.

SEGR 4963. Energy Systems Planning. (3) Prerequisite(s): Basic math, economics, or permission of instructor; Junior or Senior standing; and Engineering major or minor. Optimal planning of resources, logistics, distribution and storage in the end to end energy value chain from upstream natural gas production through mid-stream transportation and storage to downstream power generation, utility distribution and consumption. Regression, neural networks and other AI techniques for load forecasting, and optimizing generation, transmission, and distribution planning to meet the forecasted loads. Power systems reliability and control, preventive maintenance, predictive maintenance, process and service quality control.

SEGR 4964. Case Studies in the Energy Industry. (3) Prerequisite(s): Basic math, economics, or permission of instructor; Junior or Senior standing; and Engineering major or minor. Interpret and analyze real world business cases in the energy sector. Cases explore the concepts behind natural monopolies, utility ownership, regulation and de-regulation, utility rates, and service standards. Additionally, economic concepts such as supply and demand, market pricing, producer surplus, monopolistic pricing and ratemaking (regulatory goals, revenue requirements, and the rate base and rate cases) are applied. Some of the cases explore decision-making strategies surrounding marginal prices, congestion management, congestion revenue, electric and gas transmission rights both in terms of physical versus financial markets, locational marginal prices (LMP), financial transmission rights in terms of revenue adequacy and auction revenue rights, and typical energy trading hedging practices.

Sociology (SOCY)

SOCY 1101. Introduction to Sociology. (3) The scientific study of society and its structures, culture and its building blocks, and group interactions; the sociological perspective and process; fundamental concepts, principles, and procedures to understand society.

SOCY 1501. Global Social Science: Sociological Approaches to Global Issues. (3) This Global Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of complex, interconnected world. Students are introduced to the central principles of sociology through an

examination of various social, cultural, economic, and political issues within a global context.

SOCY 1511. Local Social Science: Sociological Approaches to Local Issues. (3) This Local Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a member of a “local” community. Through the study of the experiences of different peoples, cultures, and communities in our city, our region, or our nation, students will be able to better understand the complexity and diversity of the society in which we live. SOCY 1511 introduces students to the central principles of sociology through an examination of various social, cultural, economic, and political issues.

SOCY 2090. Topics in Sociology. (1 to 3) Examination of specialized topics. *May be repeated for credit with change of topic.*

SOCY 2100. Aging and the Lifecourse. (3) (SL) Cross-listed Course(s): GRNT 2100. An interdisciplinary course that examines the phenomenon of aging and its consequences for society from a variety of perspectives. Students participate in lectures, discussions and service learning projects designed to give them a broad overview of the field of gerontology. Emphasis on the wide variation in the aging process and approaches to meeting the needs of the aging population.

SOCY 2107. Global Hip Hop. (3) Cross-listed Course(s): AFRS 2107. The development and growth of Hip Hop from a US inner city Black expressive culture to a global subaltern social movement. Examines cultural production in Hip Hop in relation to the contemporary global issues that focus on the youth, subalterns, and postcolonial experiences.

SOCY 2112. Popular Culture. (3) Analysis of popular forms of everyday life in America: fashions, fads, entertainment trends, advertising, television programming, music, myths, stereotypes, and icons of mass-mediated culture.

SOCY 2115. Introduction to Organizations. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. The ubiquity of formal organizations is a distinctively modern phenomenon. Today, organizations not only dictate activities at the workplace, but also exert profound impacts on nearly all aspects of modern life. As one of the most vibrant and fast growing branches of the discipline, organizational sociology provides the conceptual tools to understand a variety of organizational processes. In this course, you are introduced to some of the basic concepts and topics in organizational sociology. Special emphases will be placed on the social impacts of organizations.

SOCY 2126. World Population Problems. (3) Cross-listed Course(s): ANTH 2126. An examination of various world population “problems,” such as growth, migration, fertility, and population aging, in order to learn how cultural, political, economic, and environmental factors influence and are influenced by the population structure of a given society.

SOCY 2132. Sociology of Marriage and the Family. (3) Cross-cultural examination of family; socialization and sex roles; love, dating, and mate selection; communication; sexuality; power and decision making; parenthood; childlessness; conflict and violence; divorce, remarriage, and stepfamilies; and future family.

SOCY 2161. Sociological Social Psychology. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. How the actual, imagined or implied presence of other people influences a person's thoughts, feelings and behavior. Socialization, self and identity, attitudes, social perception, language, and group processes.

SOCY 2163. Sociology of Gender. (3) Changing patterns of gender inequality; socialization and social structure as basis of gendered behavior, ideologies, and relationships. Alternative gender models and social movements as vehicles to diminishing gender inequality.

SOCY 2169. Sociology of Health and Illness. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. The cultural and structural influences on the definition of health and illness; models of illness behaviors; health demography and epidemiology; social influences on the delivery of healthcare; ethical issues surrounding health and illness; and the development of relevant social policy.

SOCY 2171. Social Problems. (3) Contemporary social problems and consequences for American society.

SOCY 3090. Topics in Sociology. (1 to 3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Examination of specialized sociological topics. *May be repeated for credit with change of topic.*

SOCY 3110. American Minority Groups. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Relations between dominant and minority groups; the establishment, maintenance, and decline of dominance involving racial, ethnic, and religious minorities.

SOCY 3120. Examining Institutional Racism: Implications for Contemporary Leadership. (1 to 3) Prerequisite(s): SOCY 1101 and permission of instructor. A collaborative effort among scholars and the professor to employ the Sociological approach to the investigation and understanding of institutional racism. Implications for emerging leaders and the employment of antiracist attitudes and actions are discussed. The concepts of institutional racism and antiracism are introduced, and then specific topics are reviewed throughout the term. In addition to deepening the knowledge and understanding that students gain and share, all are called to action at the end of the semester. The intellectual pursuit and generation of ideas should not be the end point, but the beginning of ideas and strategies for action. *May be repeated for credit up to 6 credit hours.*

SOCY 3125. Older Worker and Retirement. (3) Cross-listed Course(s): GRNT 3125 and PSYC 3125. Physical characteristics, personal attitudes, and structural factors affecting the employment of persons over 40. Topics include: biological aging, myths and stereotypes about older workers, public policies, human resources practices, economics of retirement, and theories about career and life stages.

SOCY 3132. Sociology of Sport. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Dynamics and emergence of sport; reciprocal influence between sport and society; values, norms, and roles in sports.

SOCY 3134. Families and Aging. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Cross-listed Course(s): GRNT 3134. Theories explaining the formation and functioning of American families with emphasis on the impact of the aging of society. Examination of the

current demographic trends and expectations of multigenerational families, as well as the future demands and modifications.

SOCY 3143. Social Movements. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Analysis of collective behavior, ideology, development, and organizations of movements seeking or resisting change.

SOCY 3153. Sociological Theory. (3) Prerequisite(s): SOCY 1101 with a grade of C or above, SOCY 1501 or SOCY 1511, and Sociology major or minor. Origins and evolution of fundamental sociological concepts and theories.

SOCY 3155. Sociological Research Methods. (4) Prerequisite(s): SOCY 1101 with a grade of C or above, SOCY 1501 or SOCY 1511, and Sociology major or minor. Formulation of research problems; research designs; social measurement; sampling; collection, analysis, and interpretation of data. Three hours of lecture/discussion and completion of weekly laboratory units.

SOCY 3173. Criminology. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Nature and historical development of crime and political-economic organization of crime, criminal law, and theories of crime causation.

SOCY 3250. Political Sociology. (3) Cross-listed Course(s): POLS 3250. Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Sociological analysis of the relationship between social, economic and political systems. Focuses on power relations in society and its effects on the distribution of scarce resources. Topics covered may include: theories of power and the nation state, political participation and voting, religion and politics, the comparative welfare state, media and ideology, the global economy, war and genocide, revolutions, and social movements. Not open to students who have credit for POLS 3251.

SOCY 3261. Human Sexuality. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Human sexuality research; teenage pregnancy; birth control; sex education; sexual fantasy; pornography; homosexuality and bisexuality; sexual communication; and heterosexual alternatives.

SOCY 3267. Sociology of Dying, Death, and Bereavement. (3) Cross-listed Course(s): GRNT 3267. Social definitions of death, process of dying, facing death across the life course, grief, bereavement, bioethical issues impacting individuals and society.

SOCY 3271. Sociology of Culture. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Examines different understandings of "culture" in sociological theory and research, addressing both classical formulations and contemporary applications. Considers how Marx, Weber, and Durkheim conceptualized culture as well as how contemporary scholars build on their ideas. Examines the role of culture in social interaction, collective identity, and collective action. Identifies sociological approaches to the production, distribution and reception of cultural products (e.g., news, music, film) as well as cultural dimensions of organizations and of social change (e.g., globalization, technology). Considers the relationship between culture and power in contemporary society.

SOCY 3324. American Studies: The 1960s. (3) The 1960s was a period of extraordinary conflict and change in American society. Many conventional values, attitudes, and institutions -- idealized during the

1950s -- were dramatically and openly challenged by different groups seeking 'liberation' from status quo structures perceived to be 'hollow' or corrupt. This course examines this period from a cross-disciplinary perspective, with special attention paid to the counterculture movements and the popular culture of the period.

SOCY 3325. Community and Identity. (3) (SL) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Offered as part of a 6 credit hour short-term study abroad program. In this 5-week program in Manchester, UK, students: (1) learn key theories and concepts in urban sociology; (2) apply this knowledge to the study of historical and contemporary Manchester; and (3) participate in service learning opportunities with organizations in Manchester.

SOCY 3753. Honors Sociological Theory. (3) Prerequisite(s): Sociology major or minor, and acceptance into departmental honors program. Origins and evolution of fundamental sociological concepts and theories.

SOCY 3755. Honors Sociological Research Methods. (4) Prerequisite(s): Acceptance into the departmental honors program. Formulation of research problems; research designs; social measurement; sampling; collection, analysis, and interpretation of data. Three hours of lecture/discussion and completion of weekly laboratory units.

SOCY 3769. Honors Sociology of Health and Illness. (3) Prerequisite(s): Acceptance into Sociology honors program; and or SOCY 1501 or SOCY 1511 or permission of instructor. The cultural and structural influences on the definition of health and illness; models of illness behaviors; health demography and epidemiology; social influences on the delivery of healthcare; ethical issues surrounding health and illness; and the development of relevant social policy.

SOCY 3798. Preliminary Honors Research in Sociology. (3) Prerequisite(s): Acceptance into the departmental honors program and permission of department. Honors hours that must be taken to write a proposal and/or conduct preliminary research to begin writing the Honors Thesis in Sociology. SOCY 3799 must be taken the following semester to complete and defend the Honors Thesis in Sociology. *A grade of "A" in SOCY 3798 is required to continue progression in the Honors Program.*

SOCY 3799. Honors Thesis in Sociology. (3) Prerequisite(s): SOCY 3798; acceptance into the departmental honors program; permission of department; and approval of a proposal through the Honors College Application to Candidacy process the semester prior to taking the course. The preparation and presentation of an acceptable Honors thesis or its equivalent. The final course in a required three-course sequence for Honors in Sociology. Completion of a thesis earning a passing grade meets the requirement for a 4000-level course in the major; a grade of A is required to earn honors. *The thesis must include primary or secondary research.*

SOCY 3895. Directed Individual Study. (1 to 4) Prerequisite(s): Permission of instructor. Supervised investigation of a sociological topic. *May be repeated for credit; up to 6 hours may be applied to the major.*

SOCY 4090. Topics in Sociology. (1 to 3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Examination of specialized sociological topics (e.g., sociology of religion, Modern Japan). *May be repeated for credit.*

SOCY 4110. Sociology of Aging. (3) Cross-listed Course(s): GRNT 4110. Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Study of the changing characteristics, aspirations, and needs of older adults and their impact upon such institutions as the family, work, the economy, politics, education, and healthcare; emphasis on sociological theories of aging, contemporary research, and the analysis of specific aging policies and programs.

SOCY 4111. Social Inequality. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Distribution of power, privilege, and prestige; correlates and consequences of inequality; national and international comparisons.

SOCY 4112. Sociology of Work. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. The emergence of post-industrial society and technological change in the workplace; analysis of their impacts on organizations, workers, family, and community.

SOCY 4114. Professionalism in Sociology. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. A conceptual approach to becoming a professional with a degree in sociology. Provides tools to help students enter their professional life, as well as demonstrate how the actual, imagined or implied presence of other people influences a person's thoughts, feelings, and behavior in a professional setting. Focuses on the concepts of socialization, self and identity, attitudes, social perception, language, and group processes to illustrate the different types and settings of work, and how we present, as professionals, in them.

SOCY 4115. Organizational Sociology. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. The sociological analysis of formal organizations. Organizational structures, practices, internal processes, and their relationships with the external environment. Organizations as rational instruments designed to achieve predetermined goals, as human groups where spontaneous social interactions take place, and as organisms situated in broader social, cultural, and economic contexts.

SOCY 4116. Sociology of Economic Life. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Adopts a sociological view to examine economic life. Topics include: industry and market structures, social networks, and inter-organizational relationships.

SOCY 4117. Sociology of Gender, Work, and Family. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Gender manifests at all levels of social life and is deeply embedded in how work is organized, experienced, and rewarded. In this course, students develop a familiarity with the empirical, theoretical, and methodological foundations of research on the interrelation of gender, work and family. The course is thematically divided into two broad units. The first unit explores issues related to the construction of gender in our society and provides an overview of some of the major barriers that women, in particular, face in achieving equality in the workplace and labor market. Also discussed are how women's and men's intersecting identities (race, sexual orientations, parenthood, etc.) shape their experiences of work and consequential rewards. Building on the first unit, the second unit investigates sociological issues related to family challenges that men and women face and how they intersect with workplace inequality. Addressed

are divisions of labor in the home, workplace policies, and the state of millennials' attitudes toward equality and behaviors in the home in order to assess the future of gender progress.

SOCY 4121. Globalization and Development. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Introduces different views and arguments on the nature, impact, and trend of globalization in sociology and other related fields. Explores broad implications of globalization and how the globalization processes transform our world economically, politically, socially, and culturally.

SOCY 4122. Immigration Policy. (3) Immigration is once again transforming the United States and the world. Immigrants in the United States today come from more diverse countries than prior immigrant waves and are settling in new destination areas with little history of immigration. These changes create unique economic, political, and social challenges, as well as opportunities. As a result, there are fierce debates regarding the benefits of immigration and effective means of promoting immigrant incorporation. This course considers these debates. It is anchored in the U.S. case, but also considers lessons from other nations and the impacts of global migration. The course is open to any students with an interest in immigration and a willingness to examine issues that raise difficult moral, political, and academic questions.

SOCY 4125. Urban Sociology. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Cross-cultural analysis of urban development, social structure, ecology, demographic composition, and social problems.

SOCY 4126. Food Insecurity. (3) (SL) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Food is life. This service-learning course examines the root causes of food insecurity in America, the groups most affected, and the best solutions for overcoming challenges; from community outreach to federal legislation. Because a segment of our UNC Charlotte student body also struggles with food insecurity, class participants have the opportunity to explore what food insecurity looks like on campus by visiting the Jamil Niner Student Pantry. Through readings, discussions, classroom activities, and writing assignments, students have the opportunity to enhance their sociological imagination, develop and sharpen their critical thinking skills, and be introduced to new theories and concepts.

SOCY 4135. Sociology of Education. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Educational institution; the school class as a social system; the school as a social environment and a complex organization.

SOCY 4140. Social Networks. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Introduces the structuralist theoretical perspective and basic methods for the analysis of social networks. Topics include: social differentiation and the integration of society; small world networks; voluntary associations; culture; race relations; gender inequality; weak ties and social capital.

SOCY 4145. Sociology of Religion. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. What is religion? How can we study religion scientifically? Rational choice, social network, ecological, and evolutionary approaches examined. Topics include: variation in religious belief and practice, secularization, and characteristics of churches, sects, and cults.

SOCY 4153. Contemporary Sociological Theory. (3) Prerequisite(s): SOCY 1101 with a grade of C or above, SOCY 1501 or SOCY 1511, and Sociology major or minor. Elements and process of theory construction; contemporary social theories, such as theories of social order and causation, power, class structure, and inequality; group process theories; post-modern theories. Not open to students who have credit for SOCY 4154.

SOCY 4156. Quantitative Analysis. (4) Prerequisite(s): Sociology major or minor; SOCY 1101 with a grade of C or above, SOCY 1501 or SOCY 1511, and Sociology major or minor; and STAT 1220, STAT 1221, STAT 1222, or equivalent statistics course. Corequisite(s): SOCY 4156L. Concepts and procedures of sociological analysis; data processing; measurement theory; and quantitative models of analysis. Three hours of lecture/discussion and completion of weekly laboratory units.

SOCY 4156L. Quantitative Analysis Laboratory. (0) Prerequisite(s): Sociology major or minor; SOCY 1101 with a grade of C or above, SOCY 1501 or SOCY 1511, and Sociology major or minor; and STAT 1220, STAT 1221, STAT 1222, or equivalent statistics course. Corequisite(s): SOCY 4156. Required laboratory session for SOCY 4156. Three hours of lecture/discussion and completion of weekly laboratory units.

SOCY 4160. Evolution and Gender. (3) The implications of evolution for gender and gender differences and the social patterns and trends that result. These patterns and trends include gender differences in mate selection, sexual behavior, aggression, emotional experience, and communication styles, as well as differences in parental investment by gender. Also examines how evolutionary theory can illuminate the origins of patriarchy.

SOCY 4165. Sociology of Women. (3) Prerequisite(s): SOCY 1101 or SOCY 1501 or SOCY 1511 or permission of instructor. Examines how the social world of women is influenced by their race, ethnicity, and class. Attention is given to changing roles of women in public and private spheres and to the role conflict that arises as women attempt to meet obligation in families, communities, and the workplace.

SOCY 4168. Sociology of Mental Health and Illness. (3) Prerequisite(s): SOCY 1101 and SOCY 2169, or permission of instructor. Mental health and illness in its social context; relationship between social structures and mental health/disorder. How social factors affect the definition and treatment of mental disorders; the effects of demographic variables on mental health and illness; the role of social support and stress; the organization, delivery and evaluation of mental healthcare services; and considerations of mental healthcare policy.

SOCY 4169. Health Disparities. (3) Prerequisite(s): SOCY 1101 and SOCY 2169, or permission of instructor. Introduction to medical sociological concepts and frameworks necessary to understand health disparities. Examines race, class, and gender-based patterns of inequality. Explores mechanisms that help create and maintain inequality in health, with a focus on racial disparities in physical health.

SOCY 4172. Sociology of Deviant Behavior. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Social definition of deviance; examination of the social processes producing unusual, non-standard, and condemned behavior; and social responses to deviant behavior. *Students can receive credit for either SOCY 4172 or SOCY 4173, but not both.*

SOCY 4263. Group Processes. (3) Prerequisite(s): SOCY 1101 or SOCY 1501 or SOCY 1511, or permission of instructor. Study how small groups structure social life, including the purposes and functions of groups, the various problems and dilemmas that groups face, how the dimensions of status and power shape how individuals behave in groups, and what happens when groups engage in conflict with each other. Study how larger social structures-like organizations and institutions-affect individuals through the small groups they inhabit. Examine the theories that explain group behavior and learn about the methods that social scientists employ when studying small groups.

SOCY 4264. Status Processes. (3) Prerequisite(s): SOCY 1101 or SOCY 1501 or SOCY 1511, or permission of instructor. Status characteristics are markers that identify socially valued properties of individuals. This course examines familiar status characteristics in society, including gender, race, and educational attainment; identify theories that explain status processes; and clarify how these theories help scholars understand phenomena related to several status characteristics.

SOCY 4265. Social Psychology of Law. (3) Cross-listed Course(s): LEGL 4265. Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Systematic analysis and application of theoretical and empirical research pertaining to the social psychological study of law.

SOCY 4267. Sociology of the Internet. (3) Scientific study of the Internet using sociological theory to provide a conceptual approach with which to understand the digital society in which we live and interact, while enhancing student understanding of the tools and ideas with which to analyze interactions within our digital society.

SOCY 4271. Sociology of Music. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Considers sociological research dealing with the production of music; the content of music; and the reception and uses of music. Students assess how individuals and groups use music; how social distinctions like race, class, and gender shape the production and consumption of music; why some types of music are considered "high culture" while other types are considered "popular culture;" how the collective production of music is made possible; and what factors facilitate musical innovation and diversity.

SOCY 4290. The Experience of Loneliness. (3) Cross-listed Course(s): GRNT 4290. Explores the experience of loneliness among older adults in society. Drawing on academic texts, empirical research, and personal accounts of loneliness, the aim is to identify the extent of loneliness experienced by older adults in various contexts. In particular, the readings consider the consequences of loneliness on the physical, mental, and social well-being of older adults.

SOCY 4366. Minorities and Aging. (3) Cross-listed Course(s): GRNT 4366. Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. An overview of diversity in aging through a multidisciplinary lens. Key concepts and current research findings concerning older adults are discussed within a historical gerontological context. Drawing from the rich contributions of several disciplines (e.g., gerontology, sociology, social work, psychology), the course challenges students to consider complex issues of aging and their unique impact on diverse older populations.

SOCY 4371. Comparative Cultural Sociology in the Netherlands. (3) Prerequisite(s): SOCY 1101, SOCY 1501, or SOCY 1511. Offered as part of the spring break study abroad program in the Netherlands. Students

develop an understanding of the theoretical and methodological tools used in comparative research on cultural sociology, while also being engaged in a global experience in the Netherlands.

SOCY 4480. Internship in Sociology. (3-6) Prerequisite(s): Permission of department. Research and/or in-service training for selected students in cooperating community organizations. Specified content based upon a contract between student, department, and community organization. *May be repeated for credit up to 6 credits. Graded on a Pass/No Credit basis.*

SOCY 4482. Undergraduate Teaching Internship in Sociology. (3-9) Prerequisite(s): Permission of department. Students work with Sociology faculty member as a teaching intern. Students must have previously taken the course for which they intern. Specified content based upon a contract between student, department, and supervising Sociology faculty member. *May be repeated for credit up to nine semester hours, with only three semester hours fulfilling SOCY 3000/4000 level elective credit. Graded on a Pass/No Credit basis.*

SOCY 4699. Senior Seminar in Sociology. (3) Prerequisite(s): Sociology major or minor; SOCY 1101 with grade of C or above; SOCY 3153 or SOCY 4153, with grade of C or above; SOCY 3155 with grade of C or above; and SOCY 4156 with grade of C or above. This capstone course draws upon all of the skills that the Sociology student has learned, including understanding interactions among individuals, groups, and social institutions in society; applying major sociological concepts; understanding major social theories; posing research questions, evaluating evidence, and developing logical arguments; and selecting research methods appropriate to sociological inquiry. Students produce a capstone e-portfolio which allows them to demonstrate these sociological skills.

SOCY 4734. Honors Families and Aging. (3) Prerequisite(s): Acceptance into departmental honors program. Theories explaining the formation and functioning of American families with emphasis on the impact of the aging of society. Examination of the current demographic trends and expectations of multigenerational families, as well as the future demands and modifications.

SOCY 4756. Honors Quantitative Analysis. (4) Prerequisite(s): Sociology major or minor; acceptance into departmental honors program; and STAT 1220, STAT 1221, STAT 1222, or equivalent statistics course. Corequisite(s): SOCY 4756L. Concepts and procedures of sociological analysis; data processing; measurement theory; and quantitative models of analysis. Three hours of lecture/discussion and completion of weekly laboratory units.

SOCY 4756L. Honors Quantitative Analysis Laboratory. (0) Prerequisite(s): Sociology major or minor; acceptance into departmental honors program; and STAT 1220, STAT 1221, STAT 1222, or equivalent statistics course. Corequisite(s): SOCY 4756. SOCY 4756L is an ungraded lab session that accompanies the lecture course for SOCY 4756. Students will complete weekly laboratory units.

SOCY 4763. Honors Sociology of Group Processes. (3) Prerequisite(s): SOCY 1101 or SOCY 1501 or SOCY 1511, and acceptance in departmental honors program. Study how small groups structure social life, including the purposes and functions of groups, the various problems and dilemmas that groups face, how the dimensions of status

and power shape how individuals behave in groups, and what happens when groups engage in conflict with each other. Study how larger social structures-like organizations and institutions-affect individuals through the small groups they inhabit. Examine the theories that explain group behavior and learn about the methods that social scientists employ when studying small groups.

SOCY 4765. Honors Social Psychology of Law. (3) Prerequisite(s): SOCY 1101 or SOCY 1501 or SOCY 1511, or permission of instructor; Acceptance into the departmental honors program. Systematic analysis and application of theoretical and empirical research pertaining to the social psychological study of law.

SOCY 4773. Honors Sociology of Deviant Behavior. (3) Prerequisite(s): SOCY 1101 or SOCY 1501 or SOCY 1511, and acceptance into the departmental honors program. Social definition of deviance; examination of the social processes producing unusual, non-standard, and condemned behavior; and social responses to deviant behavior.

Social Work (SOWK)

SOWK 1101. The Field of Social Work. (3) Introduction to social work, social science methods, analysis of contemporary issues, and evaluation of the interconnections of individual, society, and culture. *May not be taken for credit and for a grade if credit has been received for SOWK 1511.*

SOWK 1111. Social Work and the Black Agenda. (1) This course will enhance students' understanding of social work and how the profession addresses issues within the black community. Definitions and theories that provide the structure of social work practice will be discussed. Topics include social work competencies, assessment of major institutions, and tools for advocacy.

SOWK 1511. Local Social Science: Issues of Health and Quality of Life. (3) All Local Theme courses explore the central, unifying question of what it means to be a member of the "local" community in which we live. Through the study of the experiences of different peoples, cultures, and communities in our city, our region, or our nation, students will be able to better understand themselves in the context of the complex and diverse society in which we live. As representatives of the profession and its mission, social workers know the profession's history, values, and ethical standards. This course introduces the students to these topics. In addition, this course provides an interdisciplinary overview of the populations and where practice areas social workers serve, the educational requirements to become a social worker, and the options for certification and licensure. *May not be taken for credit and for a grade if credit has been received for SOWK 1101.*

SOWK 2182. Human Behavior in the Social Environment I. (3) Prerequisite(s): Social Work major. Human development within the biological, psychological, and social structure as it occurs throughout the lifespan.

SOWK 2183. Human Behavior in the Social Environment II. (3) Prerequisite(s): Social Work major. The foundational framework for understanding human interaction between individuals, families, communities, and larger social systems.

SOWK 2184. Writing for the Social Work Profession. (1) An introduction to writing for the social work profession.

SOWK 3090. Topics in Social Work. (1 to 3) Specialized topics in social work. *May be repeated for credit with change of topic.*

SOWK 3120. Diversity and Populations-at-Risk. (3) Prerequisite(s): Upper-Division Social Work major. Analysis of issues of race, ethnicity, gender, sexual orientation, social class, age, and ability within social work practice.

SOWK 3133. Community Engagement and Outreach. (3) Prerequisite(s): Upper-Division Social Work major. Students engage in experiential learning in order to effectively prepare for social work practice with vulnerable populations, and specifically to enhance their ability to build relationships and facilitate access.

SOWK 3180. Case Management. (1) Prerequisite(s): Upper-Division Social Work standing. An introduction to effective case management skills in the profession of social work. Students develop skills to create client-centered service plans, link clients to resources, and case documentation. Students are required to demonstrate the core competencies of social work case management.

SOWK 3181. Practice Methods I. (3) Prerequisite(s): Upper Division Social Work major. Development of competencies within generalist social work practice methods with an emphasis on working with individuals.

SOWK 3182. Practice Methods II. (3) Prerequisite(s): Upper-Division Social Work major and SOWK 3181 with grade of C or above. Development of competencies within generalist social work practice methods with an emphasis on working with families and groups.

SOWK 3184. Practice Methods III. (3) Prerequisite(s): Upper-Division Social Work major and SOWK 3181 with grade of C or above. Development of competencies within generalist social work practice methods with an emphasis on working with communities and large systems.

SOWK 3199. Professional Behaviors, Ethics, and Communication. (3) Prerequisite(s): Upper-Division Social Work major. Issues related to professional values, professional identity, continual learning, and best practices for social workers in a variety of practice situations.

SOWK 3201. Foundations of Social Welfare. (3) Prerequisite(s): Upper-Division Social Work major. History of and current trends in social welfare, and values and conflicts that influence social welfare programming.

SOWK 3202. Social Welfare Policy. (3) Prerequisite(s): Upper-Division Social Work major and SOWK 3201 with grade of C or above. Critical analysis of social welfare policy, including policy development and reform processes and outcomes.

SOWK 3482. Social Work Practicum I. (3 or 5) Prerequisite(s): Upper-Division Social Work major and SOWK 3181 with grade of C or above. Students complete an approved supervised field experience for 16 hours per week. Students concurrently participate in a field seminar to reinforce and enhance their field experience.

SOWK 3484. Social Work Practicum II. (3 or 6) Prerequisite(s): Upper-Division Social Work major and SOWK 3482 with grade of C or above. Students complete an approved supervised field experience for 16 hours per week. Students concurrently participate in a field seminar to reinforce and enhance their field experiences.

SOWK 3900. Social Work Research I. (3) Prerequisite(s): Upper-Division Social Work major; STAT 1222. Introduction to research methods and skills used in social work.

SOWK 3988. Social Work Research II. (3) Prerequisite(s): Upper-Division Social Work major and SOWK 3900 with grade of C or above. Quantitative and qualitative research and the understanding of scientific and ethical approaches to building knowledge.

SOWK 4090. Topics in Social Work. (1 to 3) Cross-listed Course(s): SOWK 5090. Specialized topics in social work. *May be repeated for credit with change of topic.*

SOWK 4101. Social Work Practice with Older Adults. (3) Cross-Listed Course(s): SOWK 5101. Prerequisite(s): Permission of department. Social work practice with older adults with an emphasis on assessment, intervention planning, and implementation.

SOWK 4102. School Social Work. (3) Prerequisite(s): Admission into the Upper Division BSW Program or permission of the BSW Program Coordinator. Provides a foundation for preparation as a school social worker. For students who are currently employed as school social workers, this course enhances and broadens communication, engagement, and assessment skills.

SOWK 4103. Child Welfare. (3) Prerequisite(s): Admission into the Upper Division BSW Program or permission of the BSW Program Coordinator. Examination of the history, purpose, and goals of child welfare services in North Carolina and in the United States. Course information is provided from the context of the child- and family-centered model that guides child welfare services.

SOWK 4105. Mental Health and Substance Use. (3) Increases awareness of mental health and substance abuse issues with both macro and micro practices being highlighted. Students are empowered to engage as agents of change for those vulnerable populations affected by mental illness and/or substance use disorders.

SOWK 4106. Social Work Practice with Latino Communities. (3) Enhances knowledge, values, and skills with regard to social work practice with Latino communities. Integrates an experiential education component, including a combination of class, community, and independent work.

SOWK 4109. Systems of Care for Vulnerable Populations. (3) Cross-listed Course(s): SOWK 5109. Focuses on engaging diversity and difference in practice in relation to social work skills with individuals, families, and groups.

SOWK 4110. Social Work Practice with Immigrants and Refugees. (3) Cross-listed Course(s): SOWK 5110. Development of the skills, knowledge, values, and critical thinking capacity to practice social work with immigrants and refugees. Students: 1) describe historical and theoretical perspectives of migration, 2) analyze the intersection of

migration with core areas of social work practice, including child welfare, criminal justice, education, mental health, and health systems, and 3) develop culturally responsive advocacy efforts and intervention strategies to improve immigrant and refugee well-being.

SOWK 4114. Social Work to Improve LGBT+ Health & Well-Being. (3)

A system-level examination of social work practice and its impact on the health and well-being of LGBT+ community. This course will explain the diverse roles, functions, and skills of social workers that impact the health and well-being of the LGBTQ+ Community, describe the history and challenges of the LGBTQ+ Community, and evaluate past and current macro level changes that advance equity in the LGBTQ community including societal attitudes, beliefs, laws, and policies.

SOWK 4125. Social Development in Malawi. (3) Cross-listed Course(s):

SOWK 5125. Students actively participate in several pre-departure class lectures and work sessions. They travel to Malawi for 11 days and engage in service-learning activities aligned with social development in rural Malawi. Experiential projects are designed and implemented by students using funds they raise. Sustainability and anti-oppressive approaches to social development are highlighted.

SOWK 4126. Health and Well-Being in India. (3) Cross-listed

Course(s): HLTH 4090, HLTH 6090, and SOWK 5126. Health and well-being in India.

SOWK 4280. The Experience of Dementia. (3) Cross-listed Course(s):

GRNT 4280, GRNT 5280. An overview of Alzheimer's disease and related dementias with a focus on the biological, neurological, and social aspects of these diseases. Students will gain a holistic insight into these diseases and their implications for both individuals and society.

SOWK 4353. Environments for Aging. (3) Cross-listed Course(s):

GRNT 4353, GRNT 5353. With roots in environmental psychology, this course explores the ways in which older adults experience and interact with their physical environment at both the macro and micro levels. Students will be introduced to the Americans with Disabilities Act, Universal Design, Age-Friendly communities, and housing options for older adults. This course will examine these programs from a national and local viewpoint.

SOWK 4365. Grief and Loss Across the Lifespan. (3) Cross-listed

Course(s): GRNT 4365, GRNT 5365, and SOWK 5365. Prepares the professional practitioner to understand and respond effectively to individuals, families, groups, organizations and communities experiencing both symbolic and tangible losses and accompanying grief reactions. Topics include: theories of normal and complicated grief, factors that influence grief at different stages of the life span, cultural and spiritual influences, traumatic loss, anticipatory grief and end of life care, the impact of loss and working in close contact with grief on professionals, and skills and strategies that address therapeutic needs of vulnerable and resilient populations experiencing grief.

SOWK 4366. Early Childhood Mental Health. (3) Prerequisite(s):

Admittance to the program covers undergraduate and graduate prerequisite requirements. Cross-listed Courses(s): SOWK 5366. Highlights the relevance of early relationships between children and their parents, families, and other care providers to later health, mental health, and social adjustment. The emphasis will be on how the social environment and neuroanatomy during the earliest years of life interact to shape later functioning. This course will cover basic evidence-based

prevention and interventions for young children and their caregivers. Students should have some familiarity with child developmental theory.

Spanish (SPAN)

SPAN 1101. Elementary Spanish I. (3) For students with limited or no previous experience in Spanish. First course in a two-course sequence to develop competence in culture, speaking and writing, and listening and reading comprehension in Spanish. This course is equivalent to SPAN 1201, but taught fully in the classroom.

SPAN 1102. Elementary Spanish II. (3) Prerequisite(s): SPAN 1101, SPAN 1201, or equivalent. For students with limited or no previous experience in Spanish. Second course in a two-course sequence to develop competence in culture, speaking and writing, and listening and reading comprehension in Spanish. This course is equivalent to SPAN 1202, but taught fully in the classroom.

SPAN 1201. Elementary Spanish I. (4) For students with limited or no previous experience in Spanish. First course in a two-course sequence to develop competence in culture, speaking and writing, listening and reading comprehension in Spanish. This course is equivalent to SPAN 1101, but 50% of the course is conducted online.

SPAN 1202. Elementary Spanish II. (4) Prerequisite(s): SPAN 1101, SPAN 1201, or equivalent. Second course in a two-course sequence to develop competence in culture, speaking and writing, listening and reading comprehension in Spanish. This course is equivalent to SPAN 1102, but 50% of the course is conducted online.

SPAN 1205. Accelerated Elementary Spanish I and II. (4) For students with some previous experience or training in Spanish. Accelerated development of competence in culture, speaking, and writing, listening and reading comprehension in Spanish. Equivalent of SPAN 1201 and SPAN 1202 conducted in one semester. Fulfills two-semester language requirement.

SPAN 1502. Global Arts/Humanities: Cultures of the Hispanic World. (3)

This Global Theme course uses the methods and insights of the social sciences to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of a complex, interconnected world. Students are introduced to critical studies of language and culture through a broad engagement with the influence and presence of Spanish throughout the world. Course materials may draw widely from language, literature, history, linguistics, film, pop culture, music, cuisine, media, and the arts. Taught in English.

SPAN 1512. Local Arts/Humanities: US Hispanic, Latina/o/x Topics. (3)

This Local Theme course uses the methods and insights of the arts and humanities to explore the central question of what it means to be a member of a "local" community. Through the study of the experiences of different peoples, societies, cultural traditions, and modes of expression in communities at the city, regional, or national level, students will be able to better understand the complexity and diversity of the society in which we live. Students are introduced to critical studies of language through a broad engagement with the contributions and presence of

Spanish, Hispanic and Latina/o/x cultures in the United States. Course materials may draw widely from language, literature, history, linguistics, film, pop culture, music, cuisine, media, and the arts. Taught in English.

SPAN 2009. Hispanic Literature in English Translation. (3) Studies of Spanish or Spanish American literature in translation. Course conducted in English. Not applicable toward Spanish major. *May be repeated for credit with change of topic.*

SPAN 2050. Topics in Spanish. (1 to 3) Prerequisite(s): SPAN 1202 or permission of department. Study of a particular facet of the Spanish language, culture, or literature. *May be repeated for credit with change of topic.*

SPAN 2105. Spanish Communication Skills Development I. (3) Prerequisite(s): SPAN 1202. Corequisite(s): SPAN 2201 is recommended. Fulfills the 2000-level language requirement for non-Spanish majors. Continued practice in all four skills: speaking, listening, reading, and writing.

SPAN 2106. Spanish Communication Skills Development II. (3) Prerequisite(s): SPAN 2201 or permission of department. Corequisite(s): SPAN 2202 is recommended. Continued practice in all four skills: speaking, listening, reading, and writing.

SPAN 2200. Spanish for Reading Knowledge. (3) Prerequisite(s): SPAN 1202 or equivalent. Review of Spanish grammar with emphasis on developing reading skills. Taught primarily in English. Does not count for major or minor credit.

SPAN 2201. Intermediate Spanish I. (3) Prerequisite(s): SPAN 1202 or permission of department. Corequisite(s): SPAN 2105 is recommended. Continued training in grammar. Intensive practice in reading, writing, and speaking.

SPAN 2202. Intermediate Spanish II. (3) Prerequisite(s): SPAN 2201 or permission of department; SPAN 2105 is also recommended. Corequisite(s): SPAN 2106 is recommended. Builds on skills acquired in the first semester intermediate level. Introduces advanced grammatical concepts.

SPAN 2210. Introduction to Spanish for Commerce. (3) Prerequisite(s): SPAN 1202 or permission of department. Fundamentals of commercial Spanish, study of the language, protocol, and cultural environment of the Spanish-speaking business world. Basic business vocabulary, cultural concepts, and grammatical review through situational practice. Fulfils the 2000-level language requirement for non-Spanish majors.

SPAN 3009. Masterpieces of Hispanic Literature in English. (3) Prerequisite(s): Sophomore, Junior, or Senior standing; and WRDS 1103 or WRDS 1104 with a grade of C or above; or permission of instructor. Advanced studies of Spanish or Spanish-American literature in English translation. Course conducted in English; knowledge of Spanish not required. Not applicable toward a Spanish major or minor; however, it may count as an elective course for the B.A. in Spanish with Concentration in Hispanic Studies. *May be repeated for credit with change of topic.*

SPAN 3019. Hispanic Women Writers in English Translation. (3) Cross-listed Course(s): LTAM 3319 and WGST 3019. Prerequisite(s): Sophomore, Junior, or Senior standing; and WRDS 1103 or WRDS 1104 with a grade of C or above; or permission of instructor. Examination of prose and poetry by women writers from Spain and the Americas to understand women's voices and other cultures. Conducted in English; knowledge of Spanish not required. Not applicable toward Spanish major or minor; however, it may count as an elective course for the B.A. in Spanish with Concentration in Hispanic Studies.

SPAN 3030. Business and Culture in the Hispanic Caribbean Region. (3) Prerequisite(s): WRDS 1103 or WRDS 1104 with a grade of C or above. Development of intercultural understanding and communication skills for conducting business in the greater Hispanic Caribbean region. Conducted in English. Not applicable toward Spanish major or minor; however, it may count as an elective course for the B.A. in Spanish with Concentration in Hispanic Studies.

SPAN 3050. Topics in Spanish. (1 to 3) Prerequisite(s): SPAN 2202 or equivalent. Study of a particular facet of the Spanish language, culture, or literature at the 3000 level not covered by other SPAN courses. *May be repeated for credit with change of topic.*

SPAN 3160. Studies in Hispanic Film. (3) The study of Spanish Peninsular, Spanish American, or Hispanic/Latino films. Conducted in English. Not applicable toward Spanish major or minor; however, it may count as an elective course for the B.A. in Spanish with Concentration in Hispanic Studies. *May be repeated for credit with change of topic.*

SPAN 3201. Advanced Spanish Grammar and Composition I. (3) Prerequisite(s): SPAN 2202 or permission of department. Advanced studies in Spanish grammar, composition, syntax, and rhetoric. Native and heritage speakers of Spanish may take SPAN 3203 in lieu of SPAN 3201 and SPAN 3202, but they must also take one additional 3000- or 4000-level Spanish course.

SPAN 3202. Advanced Spanish Conversation and Composition. (3) Prerequisite(s): SPAN 2202 or permission of department. Study and practice of formal, academic presentations and reports both written and oral. Introduction to concepts in elocution and phonetics. Native and heritage speakers of Spanish may take SPAN 3203 in lieu of SPAN 3201 and SPAN 3202, but they must also take one additional 3000- or 4000-level Spanish course.

SPAN 3203. Spanish for Heritage Speakers. (3) Prerequisite(s): SPAN 2202, equivalent, or permission of department (native or heritage speaker of Spanish, as determined by the student's advisor). For students who speak Spanish at home or who have lived for more than two years in a Spanish-speaking country. Develops speaking and writing skills in a formal, academic context. Topics include: history, literature, culture, and linguistics of the Spanish-speaking world. Heritage speakers should take this course in lieu of SPAN 3202.

SPAN 3208. Introduction to Literary Analysis. (3) Cross-listed Course(s): LTAM 3308. Pre- or Corequisite(s): SPAN 3201, SPAN 3202, or SPAN 3203 or permission of department. Continued work with vocabulary building and reading skills. Introduction to the theory and practice of reading literary texts in Spanish.

SPAN 3209. Spanish Civilization and Culture. (3) Pre- or Corequisite(s): SPAN 3201, SPAN 3202, SPAN 3203 or permission of department. Introduction to the cultural heritage of peninsular Spain.

SPAN 3210. Spanish American Civilization and Culture. (3) Pre- or Corequisite(s): SPAN 3201, SPAN 3202, SPAN 3203 or permission of department. Introduction to the cultural heritage of Spanish America.

SPAN 3220. Spanish for Business and International Trade. (3) Cross-listed Course(s): LTAM 3120. Prerequisite(s): SPAN 3201, SPAN 3202, or SPAN 3203, or permission of department. Introduction to spoken and written language of the Spanish-speaking business world. Acquisition of and practice with general commercial terminology used in Spanish for such functional business areas as economics, management, marketing, finance, and import-export.

SPAN 3221. Spanish for Criminal Justice. (3) Prerequisite(s): SPAN 3201, SPAN 3202, SPAN 3203, or permission of department. Spoken and written language related to communicative needs in the field of criminal justice. Provides students with the major content and terminology used in the U.S. legal system.

SPAN 3222. Spanish for Medical and Healthcare. (3) Prerequisite(s): SPAN 3201, SPAN 3202, SPAN 3203, or permission of department. Spoken and written language related to communicative needs for healthcare professionals. Emphasis on terminology, phraseology, and etymology necessary for effective communication in principal healthcare and medical fields and settings.

SPAN 3225. Short-Term Abroad. (3) Prerequisite(s): Permission of instructor. Faculty-led short-term study abroad experience offered during Spring Break.

SPAN 3409. Service Learning in the Hispanic Community. (3) Prerequisite(s): Two SPAN 3000-level courses and permission of instructor. Introduction to the Charlotte-Mecklenburg community, focusing on issues of local Hispanic communities today. Offers a faculty-supervised service learning component in a cooperating professional (e.g., business), community, or educational organization.

SPAN 3800. Directed Individual Study. (1 to 3) Prerequisite(s): Permission of department; normally open only to Spanish majors and minors. Individual work on a selected area of study. To be arranged with the instructor during the preceding semester. By special permission only. *May be repeated for credit.*

SPAN 4050. Selected Topics in Spanish. (1 to 3) Prerequisite(s): two SPAN 3000-level courses or permission of department. Consideration of a predetermined topic not covered by other SPAN courses. *May be repeated for credit with change of topic.*

SPAN 4120. Advanced Business Spanish I. (3) Prerequisite(s): two of the following: SPAN 3201, SPAN 3202, SPAN 3203, SPAN 3220; or permission of department. Advanced studies in Business Spanish, intensive intercultural communication practice in speaking, listening comprehension, reading, writing, and translation/interpretation in functional business areas such as economics, management, banking, accounting, real estate, office systems, and human resources.

SPAN 4121. Advanced Business Spanish II. (3) Prerequisite(s): two of the following: SPAN 3201, SPAN 3202, SPAN 3203, SPAN 3220; or permission of department. Advanced studies in Business Spanish, intensive intercultural communication practice in speaking, listening comprehension, reading, writing, and translation in functional business areas such as goods and services, marketing, finance, and import-export.

SPAN 4201. Nineteenth Century Spanish Literature. (3) Prerequisite(s): Two SPAN 3000-level courses. Strongly recommended to have completed SPAN 3208. Survey of peninsular literature from Costumbrismo through the Generation of 1898.

SPAN 4202. Twentieth Century Spanish Literature. (3) Prerequisite(s): Two SPAN 3000-level courses. Strongly recommended to have completed SPAN 3208. Pre- or Co-requisite(s): SPAN 4208 or SPAN 4209. Treatment of major literary developments from the Generation of 1898 to present day.

SPAN 4205. Novel of the Golden Age. (3) Prerequisite(s): Two SPAN 3000-level courses. Strongly recommended to have completed SPAN 3208. *Lazarillo* through *El Criticón*.

SPAN 4206. Theater of the Golden Age. (3) Prerequisite(s): Two SPAN 3000-level courses. Strongly recommended to have completed SPAN 3208. Study of works of the leading dramatists of the period.

SPAN 4208. Survey of Spanish Peninsular Literature. (3) Prerequisite(s): SPAN 3201, SPAN 3202, or SPAN 3203, or permission of department. Pre- or Corequisite(s): Two SPAN 3000-level courses. Strongly recommended to have completed SPAN 3208. Introduction to the literary heritage of Spain. Reading and analysis of representative works.

SPAN 4209. Survey of Spanish American Literature. (3) Cross-Listed Course(s): LTAM 4309. Prerequisite(s): Two SPAN 3000-level courses. Strongly recommended to have completed SPAN 3208. Introduction to the literary heritage of Spanish America. Reading and analysis of representative works.

SPAN 4210. Studies in Spanish American Poetry. (3) Prerequisite(s): Two SPAN 3000-level courses. Strongly recommended to have completed SPAN 3208. Studies of colonial, post-independence, twentieth century, and contemporary Spanish American poetry. *May be repeated for credit with change of topic.*

SPAN 4211. Studies in Spanish American Prose Fiction. (3) Prerequisite(s): Two SPAN 3000-level courses. Strongly recommended to have completed SPAN 3208. Studies of colonial, post-independence, twentieth century, and contemporary Spanish American prose fiction. *May be repeated for credit with change of topic.*

SPAN 4212. Studies in Spanish American Theater. (3) Prerequisite(s): Two SPAN 3000-level courses. Strongly recommended to have completed SPAN 3208. Studies of colonial, post-independence, twentieth century, and contemporary Spanish American theater. *May be repeated for credit with change of topic.*

SPAN 4213. Cervantes. (3) Prerequisite(s): Two SPAN 3000-level courses. Strongly recommended to have completed SPAN 3208. Study of Cervantes' masterpiece, *Don Quijote*, and/or other representative works.

SPAN 4214. Studies in Hispanic Children's Literature. (3) Cross-listed Course(s): LTAM 4314. Prerequisite(s): Two SPAN 3000-level courses. Strongly recommended to have completed SPAN 3208. Literary works in Spanish written for children. *May be repeated for credit with change of topic.*

SPAN 4215. Studies in Regional Literature of the Americas. (3) Cross-listed Course(s): LTAM 4315. Prerequisite(s): Two SPAN 3000-level courses. Strongly recommended to have completed SPAN 3208. Studies of Mexican, Central American, Caribbean, Andean, Amazonian, or Southern Cone literature. Readings from representative works. Works from non-Spanish-speaking areas read in Spanish translation. *May be repeated for credit with change of topic.*

SPAN 4216. Social, Political, Cultural, Economic Issues in Hispanic Literature. (3) Cross-listed Course(s): LTAM 4316. Prerequisite(s): Two SPAN 3000-level courses. Strongly recommended to have completed SPAN 3208. Contextual issues surrounding Hispanic literature.

SPAN 4217. Topics in Hispanic Culture and Civilization. (3) Cross-listed Course(s): LTAM 4317. Prerequisite(s): Two SPAN 3000-level courses. Strongly recommended to have completed SPAN 3208. Various topics involving the fine arts: music, dance, art, film. Applicable toward Spanish major or minor only when taught in Spanish. *May be repeated for credit with change of topic.*

SPAN 4231. Spanish Phonetics. (3) Prerequisite(s): Two SPAN 3000-level courses or permission of department. Detailed analysis, description, and production of Spanish sounds. Practical exercises with phonetic transcription and recordings.

SPAN 4232. Spanish Linguistics. (3) Prerequisite(s): Two SPAN 3000-level courses. Introduction to different fields of Spanish linguistics studies: sociolinguistics, synchronic and diachronic perspectives of phonetics, morphology, syntax, and semantics.

SPAN 4233. History of the Spanish Language. (3) Prerequisite(s): Two SPAN 3000-level courses. Strongly recommended to have completed SPAN 4232. The evolution of Spanish from Latin and the effects of this evolution on Spanish phonetics, morphology, syntax, and semantics.

SPAN 4410. Professional Internship in Spanish. (1 to 6) Prerequisite(s): Permission of department. Faculty-supervised field and/or research experience in a cooperating profession (e.g., business) or community organization within the Hispanic Community. Contents of internship based upon a contractual agreement among the student, department, and business or community organization. *Graded on a Pass/No Credit basis.*

SPAN 4800. Directed Individual Study. (1 to 3) Prerequisite(s): Permission of department; normally open only to Spanish majors and minors. Individual work on a selected area of study. To be arranged with the instructor, generally during the preceding semester. *May be repeated for credit.*

Special Education (SPED)

SPED 2100. Exceptionality in Schools and Society. (3) An introduction to exceptionality intended for students interested in careers in U.S. schools. This required teacher education course assists future teachers and school professionals in understanding the nature of disabilities in school and society, as well as the unique needs of gifted learners. The course examines the impact of exceptionality on learning and other life outcomes as well as the development of appropriate educational programming. As exceptional children require differentiation in inclusive classrooms, school professionals have a responsibility to provide effective educational programs for all students. This course, along with EDUC 1100 or EDUC 1511, contributes to preservice teachers' understanding of learners in American schools.

SPED 3100. Critical Issues in Special Education. (3) Prerequisite(s): SPED 2100, admission to Teacher Education, and admission to Special Education Program. Examines legislation and litigation that govern and/or influence services for individuals with disabilities. Scrutinizes the IEP process and investigates IEP objectives that reflect the general curriculum standards. Examines one's personal philosophy of education, which reflects the diversity of students with disabilities. Identifies services, networks, organizations, and publications that serve or are relevant to individuals with disabilities. Identifies and critiques instructional implications of published research.

SPED 3173. Assessment in Special Education. (3) Prerequisite(s): Admission to Special Education Program. An overview of the principles and practice of educational problem solving with an emphasis on formal/standardized assessment, including curriculum-based assessment and curriculum-based measurement; special education eligibility; linkages between assessment and instruction; and concepts in educational assessment of students with exceptional learning needs (ELN). Topical paper required.

SPED 3175. Instructional Planning in Special Education. (3) Prerequisite(s): Admission to Teacher Education; admission to Special Education Program. This introductory course addresses strategies for the development, implementation, and monitoring of Individualized Education Programs (IEPs) and related instructional planning for P-12 students with disabilities within the general curriculum (high incidence disabilities) or adapted curriculum (low incidence disabilities). Through this course, students are expected to demonstrate proficiency in using the general education curriculum to develop appropriate IEPs and lesson plans for instruction.

SPED 3210. Enhancing the Social-Emotional Development of Young Children in Inclusive Settings. (3) Prerequisite(s): CHFD major or minor with a GPA of at least 2.5 overall and 2.75 in the major, CHFD 2111, CHFD 2113, and CHFD 2412. The social-emotional development of young children (infants, toddlers, and preschoolers) in inclusive early childhood settings. Typical and atypical social-emotional development of young children, the effects of potential risk factors on social-emotional development, and research-based practices to support social and emotional growth are explored. Students learn how to conduct functional behavior assessments, prevent and respond to challenging behaviors, and build social competence in young children in a variety of early childhood settings. 10 hours of observation.

SPED 3800. Individual Study in Special Education. (1 to 6)
Prerequisite(s): Admission to Teacher Education; admission to Special Education Program; and permission of the student's advisor. Independent study under the supervision of an appropriate faculty member. *May be repeated for credit.*

SPED 4101. Data-based Decision-making Within a Multi-tiered System of Support Framework. (3) Prerequisite(s): EDUC 4100; Admission to the Collaborative Educators in Inclusive Schools minor. This course is intended to assist educational candidates in increasing their capabilities to make data-driven instructional decisions (e.g., differentiation, tiered support, accommodations, modifications) that meet the learning needs of all students. An emphasis will be placed on teaming, high-leverage practices, the use of evidence-based practices with a multi-tiered systems of support framework (MTSS), and creating instructional environments in which all learners can be successful. Differences among learners that are influenced by development, exceptionailities, and diversity are explored using case study methodology. It is expected that students completing this course will be able to translate findings from research into data practices that guide and improve support for all learners. Field-based clinical activity required.

SPED 4111. Issues in Early Intervention for Young Children with Disabilities. (3) Prerequisite(s): Completion of CHFD 2000-level courses with the exception of students who articulate with an AA or AAS degree and are required to take CHFD 2111; and CHFD major or minor with GPA of at least 2.5 overall and 2.75 in the major. Explores issues and evidence-based practices for young children with disabilities and their families in home, school, and community settings.

SPED 4112. Authentic Approaches to the Assessment of Young Children with Disabilities: Birth-Kindergarten. (3) Prerequisite(s): Admission to Teacher Education; GPA of at least 2.5 overall and 2.75 in the major; and SPED 4111. Develops competence in evaluation, design, implementation, and interpretation of culturally appropriate, interdisciplinary assessment approaches within the context of the young child's natural environments and in partnership with families that lead to appropriate intervention plans for children with disabilities. A field-based clinical assignment of approximately 20 hours is required.

SPED 4115. Autism Spectrum Disorder Across the Lifespan. (3) Prerequisite(s): Admission to the Inclusion, Disability, and Exceptionality in American Society Minor. An overview of characteristics of learners with autism spectrum disorder (ASD) from a lifespan perspective. Diagnostic criteria of ASD will be discussed, as well as historical overview of the disorder. Students will learn to identify research-based practices to meet the needs of learners with ASD in a variety of settings such as home, clinic, community, and school. Current topics and issues in the field of autism will be discussed. The course is appropriate for any student who desires a career working directly with learners with ASD such as in the fields of counseling, education, psychology, and more.

SPED 4170. Special Education: Consultation and Collaboration. (3) Prerequisite(s): SPED 3100, SPED 3173, SPED 3175, admission to Teacher Education, and admission to Special Education Program. Provides students an opportunity to develop their knowledge base and expertise in consultation and collaboration with parents, General Education teachers, paraprofessionals, related service

personnel, and/or human service personnel. This knowledge base includes the development of effective communication skills, understanding the influence of cultural diversity when working with families, professional development goal setting, and effective supervision of paraeducators. Literature case required.

SPED 4210. Developmental Interventions for Young Children with Disabilities: Birth through Kindergarten. (3) Prerequisite(s): Admission to Teacher Education, GPA of at least 2.5 overall and 2.75 in the major, SPED 4111, and SPED 4112. Developing, facilitating, and evaluating incidental learning, play, and routines-based interventions with young children with disabilities and their families. A field-based clinical assignment of approximately 20 hours is required.

SPED 4270. Classroom Management. (3) Prerequisite(s): SPED 3100, SPED 3175, admission to Teacher Education, and admission to Special Education Program. Equips students with the knowledge and skills of applied behavior analysis (ABA) as an approach for programming effective interventions for children and youths with disabilities. Focuses specifically on "positive behavior support" (PBS), a research-validated approach to interventions designed to prevent problem behavior, encourage environmental management, and promote students' positive and appropriate behavior. Prepares students to conduct a functional behavioral assessment (FBA) in order to more efficiently and effectively identify the interventions to address the students' behavioral needs. The desired outcomes of this course are for students to have a basic understanding of ABA, FBA, and PBS as well as to apply these principles in a classroom setting for students with disabilities. Clinical field experience hours required.

SPED 4271. Systematic Instruction in the Adapted Curriculum. (3) Prerequisite(s): Admission to Teacher Education, and admission to Special Education Program. Co-requisite Course(s): SPED 3100. Principles and procedures used to develop instructional support for students who need essential skill instruction and adaptations to general curriculum. Students are required to design and implement an instructional program with a student with extensive support needs. Clinical field experience is required.

SPED 4272. Teaching Mathematics to K-12 Learners. (3) Prerequisite(s): SPED 3100, SPED 3175, admission to Teacher Education, and admission to Special Education Program. Provides students with effective strategies and materials for teaching math to learners in need of special education. A field-based clinical experience is a required component of the course. Assessment and application of instructional techniques are included.

SPED 4274. General Curriculum Access and Adaptations. (3) Prerequisite(s): SPED 3100, admission to Teacher Education, and admission to Special Education Program. Strategies for developing curricular priorities for students with extensive support needs requiring adaptations to the general curriculum including ways to link to state standards in reading, math, writing, science, and other content areas. This is a clinical intensive course requiring field experience.

SPED 4275. Teaching Reading to Elementary Learners. (3) Prerequisite(s): SPED 3100, SPED 3175, admission to Teacher Education, and admission to Special Education Program. Effective prevention and intervention strategies for addressing the needs of elementary students with disabilities and diverse learning needs. Assessment and application

of instructional strategies are included. A field experience is a required component.

SPED 4276. Teaching Reading to Middle and Secondary. (3) Prerequisite(s): SPED 3100, SPED 3175, SPED 4275, admission to Teacher Education, and admission to Special Education Program. Effective remedial and intervention strategies for addressing the needs of middle and secondary students with disabilities and diverse learning needs. Assessment and application of instructional strategies are included. A field experience is a required component.

SPED 4277. Teaching Written Expression to K-12 Learners. (3) Prerequisite(s): SPED 3100, SPED 3175, admission to Teacher Education, and admission to Special Education Program. Effective teaching strategies and materials in teaching written expression to learners in need of special education. Assessment and application of instructional strategies are included in the course. A field experience is a required component.

SPED 4279. Content-Area Instruction for Inclusive Classrooms. (3) Prerequisite(s): SPED 3100, SPED 3173, SPED 3175, SPED 4272, SPED 4275, admission to Teacher Education, and admission to Special Education Program. Strategies for collaborative instruction, instructionally relevant use of computer-based technology, and strategic instruction to improve access of students with disabilities in the general curriculum with an emphasis on content-area instruction at the middle and secondary levels: English, science, social studies, and mathematics. Application of instructional strategies are included. A field experience is a required component.

SPED 4280. Instruction and Support for Learners with Extensive Support Needs. (3) Prerequisite(s): SPED 3100, SPED 3173, SPED 3175, SPED 4270, admission to Teacher Education, and admission to Special Education Program. Describes various secondary disabling conditions that sometimes occur in conjunction with intellectual disability such as physical disabilities, sensory disabilities, and other health impairments. Assessment, instructional methods and procedures, and collaborative service delivery with related services personnel are studied. A field experience is a required component.

SPED 4281. Communication Instruction for Students with Extensive Support Needs. (3) Prerequisite(s): SPED 3100 and admission to Teacher Education. Preparation for teacher candidates to design and implement strategies for teaching communication skills and designing responsive environments to facilitate meaningful interactions between students with extensive support needs who have limited or no vocal communication and those around them. A field-based clinical placement is required.

SPED 4316. Transition Planning and Service Delivery. (3) Prerequisite(s): SPED 3100, SPED 3175, admission to Teacher Education, and admission to Special Education Program. Methods and procedures used in preparing students with disabilities for the world of work and independence are studied. A field-based clinical assignment of approximately 15 hours is required.

SPED 4318. Collaboration and Transition-Focused Education. (3) Prerequisite(s): Admission to Teacher Education and admission to Special Education program. Provides special educators with knowledge

relating to the role of parents, paraeducators, administrators, other professionals, and students on multi-disciplinary teams, initiatives in building inclusive programs, and the array of services available to children with disabilities. Also provides skills in effective communication; promoting family involvement, including families who are culturally diverse; team planning, and collaborative instruction. The course responds to the professional competencies established by the Council for Exceptional Children, which form the basis of the NCATE standards, and North Carolina Department of Public Instruction, including the North Carolina Professional Teaching Standards and the North Carolina Specialty Area Standards.

SPED 4400. Integrated Instructional Applications in Special Education. (3) Prerequisite(s): SPED 4272 and SPED 4275. Pre- or Corequisite(s): SPED 4277. Corequisite(s): SPED 4277. Implementation and analysis of behavioral and instructional strategies for students with special needs in clinical settings. Candidates develop and apply knowledge of varied learner needs by planning and implementing lessons that align to state standards in academic content areas designed to meet the individual needs of students with disabilities. Additionally, candidates analyze student outcome data and make instructional decisions for subsequent lessons. This is a clinical intensive course requiring extensive classroom experience.

SPED 4475. Student Teaching/Seminar: Special Education K-12: General Curriculum. (15) Prerequisite(s): Admission to Teacher Education; admission to Special Education Program; application to Student Teaching; completion of electronic portfolio Evidence 2 and Evidence 3. Student teaching is a planned sequence of experiences in the student's area of specialization conducted in an approved school setting under the supervision and coordination of a university supervisor and a clinical educator. During student teaching, the student must demonstrate the competencies identified for their specific teaching field in an appropriate grade level setting. The student is assigned 15 weeks in a school setting. Includes seminars. Participating students pay a course registration fee for edTPA portfolio assessment. *Graded on a Pass/No Credit basis.*

SPED 4476. Student Teaching/Seminar: Special Education K-12 Adapted Curriculum. (15) Prerequisite(s): Admission to Teacher Education; admission to Special Education Program; application to Student Teaching; completion of electronic portfolio Evidence 2 and Evidence 3. Student teaching is a planned sequence of experiences in the student's area of specialization conducted in an approved school setting under the supervision and coordination of a university supervisor and a clinical educator. During student teaching, the student must demonstrate the competencies identified for their specific teaching field in an appropriate grade level setting. The student is assigned 15 weeks in a school setting. Includes seminars. Participating students pay a course registration fee for edTPA portfolio assessment. *Graded on a Pass/No Credit basis.*

Special and Elementary Education (SPEL)

SPEL 3100. Introduction to Special Education and Dual Program. (3) Prerequisite(s): Admission to Teacher Education, admission to Dual Program; EDUC 1100 or EDUC 1511; and SPED 2100. Introduces students to the dual program and examines legislation and litigation that govern and/or influence services for individuals with disabilities. Scrutinizes the

IEP process and investigates IEP objectives that reflect the general curriculum standards. Examines one's personal philosophy of education, which reflects the diversity of students with disabilities. Identifies services, networks, organizations, and publications that serve or are relevant to individuals with disabilities. Identifies and critiques instructional implications of published research.

SPEL 3173. Assessment in Special Education and Elementary Education. (3) Prerequisite(s): SPEL 3100 and admission into Special Education and Elementary Education Dual Major Program. Provides an overview of the principles and practice of educational problem solving with an emphasis on formal/standardized assessment, including curriculum-based assessment and curriculum-based measurement; special education eligibility; linkages between assessment and instruction; and concepts in educational assessment of students receiving educational services in special education and general education contexts.

SPEL 4171. Special Education: Consultation and Collaboration in Elementary Schools. (3) Prerequisite(s): Admission to Teacher Education. Provides students an opportunity to develop their knowledge base and expertise in consultation and collaboration with parents, General Education teachers, paraprofessionals, related service personnel, and/or human service personnel. This knowledge base includes the development of effective communication skills, understanding the influence of cultural diversity when working with families, professional development goal setting, and effective supervision of paraeducators.

SPEL 4477. Student Teaching/Seminar: Special Education General Curriculum and Elementary Education K-6 (Dual Program). (15) Student teaching is a planned sequence of experiences in the student's area of specialization conducted in an approved school setting under the supervision and coordination of a university supervisor and a clinical educator. During student teaching, the student must demonstrate the competencies identified for their specific teaching field in an appropriate grade level setting. The student is assigned 15 weeks in a school setting. Includes seminars. Participating students pay a course registration fee for edTPA portfolio assessment. *Graded on a Pass/No Credit basis.*

Sports Analytics (SPOA)

SPOA 1120. Factors of Human Performance. (3) Prerequisite(s): Sports Analytics major. Explores all aspects of human athlete performance, ranging from nutrition and physiology to psychological considerations for the athlete.

SPOA 2120. Applied Kinesiology for Human Performance. (3) Prerequisite(s): SPOA 1120; Sports Analytics major. Study of foundational principles of kinesiology and human musculoskeletal anatomy as it relates to human sports performance.

SPOA 2130. Introduction to Baseball Analytics. (3) Prerequisite(s): STAT 1220 or STAT 1221 or STAT 1222. Introduction to sabermetrics and the history of baseball analytics. It then explains, compares, and contrasts selected metrics and statistics of the sport. This information will be applied to a final project concerning objective knowledge of baseball performance.

SPOA 3110. Physiology of Human Performance. (3) Prerequisite(s): SPOA 2120; Sports Analytics major. Explores the physiological processes necessary for human sports performance.

SPOA 4110. Analytics of Sport through Human Performance Technology. (3) Prerequisite(s): SPOA 3110. Sports Analytics major. Explores the variety of wearables and performance measurement technology to measure, manage, and predict individual and team performance in sports.

SPOA 4120. Modeling of Human Performance. (3) Prerequisite(s): SPOA 2120, ITCS 3160; Sports Analytics major. Capstone experience defining and solving a real-world problem using human performance data.

SPOA 4210. Advanced Baseball Analytics. (3) Prerequisite(s): ITCS 3160. Cross-listed Course(s): ECGR 3090. Theory and fundamentals of baseball analytics using data science to gain objective knowledge on baseball performance.

Statistics (STAT)

STAT 1220. Elements of Statistics I (BUSN). (3) Prerequisite(s): MATH Placement Level 2 or MATH 1100 or MATH 1101 or MATH 1103 or higher. Non-calculus based introduction to data summarization, discrete and continuous random variables (e.g., binomial, normal), sampling, central limit theorem, estimation, testing hypotheses, and linear regression. Applications of theory will be drawn from areas related to business. May not be taken for credit if credit has been received for STAT 1221 or STAT 1222.

STAT 1220L. The Academic Success Experience. (1) Prerequisite(s): STAT 1220 and Permission of the MPAACT coordinator for STAT 1220. The Academic Success Experience is a corequisite seminar course specifically designed to provide essential support and enhance the achievement of students who are enrolled in STAT 1220 and part of the National Science Foundation funded MPAACT (Math Pathways for African American Collegiate Transformation) project. This course aims to foster students' academic growth, strengthen their mathematical skills, critical thinking, and problem-solving abilities through a tailored and inclusive approach that recognizes the potential, aspirations, and determination of these students. The Academic Success Experience incorporates personalized mentoring and peer support networks. Students will develop the competence and a determined mindset necessary to excel in STAT 1220, establishing a solid foundation in statistical concepts and their practical applications. This comprehensive preparation will equip students with the tools for a successful degree completion in their chosen STEM program, empowering them to circumvent challenges and contribute to the diverse landscape of scientific fields.

STAT 1221. Elements of Statistics I. (3) Prerequisite(s): MATH Placement Level 2 or MATH 1100 or MATH 1101 or MATH 1103 or higher. Same topics as STAT 1220 with special emphasis on applications to the life sciences. Students who have already received credit for STAT 1220 or STAT 1222 will not receive credit for taking STAT 1221..

STAT 1222. Introduction to Statistics. (3) A non-calculus based course in statistics with special emphasis on applications to the social and

behavioral sciences. Topics include: data summarization, discrete and continuous random variables (e.g. binomial, normal), sampling, central limit theorem, estimation, testing hypotheses. May not be taken for credit if credit has been received for STAT 1220 or STAT 1221.

STAT 1322. Introduction to Statistics II. (3) Prerequisite(s): STAT 1222 with grade of C or above. A non-calculus based course on statistics. Topics include: confidence intervals, hypothesis testing, and linear regression. Special emphasis on applications to the social and behavioral sciences. Active learning techniques, group work, and projects.

STAT 2122. Introduction to Probability and Statistics. (3) Prerequisite(s): MATH 1242 or MATH 2120, or permission of department. A study of probability models, discrete and continuous random variables, inference about Bernoulli probability, inference about population mean, inference about population variance, the maximum likelihood principle, the minimax principle, Bayes procedures, and linear models. May not be taken for credit and for a grade if credit has been received for STAT 3128.

STAT 2223. Elements of Statistics II. (3) Prerequisite(s): STAT 1220, STAT 1221, STAT 1222, or STAT 2122, or permission of department. Topics include: contingency analysis, design of experiments, more on simple linear regression, and multiple regression. Computers are used to solve some of the problems.

STAT 3110. Applied Regression. (3) Prerequisite(s): STAT 1220, STAT 1221, STAT 1222, or STAT 2122, or MATH 3122 or STAT 3122; and MATH 1242 or MATH 2120; or permission of department. Ordinary regression models, logistic regression models, Poisson regression models.

STAT 3122. Probability and Statistics I. (3) Prerequisite(s): MATH 2241 with grade of C or above. Cross-listed Course(s): MATH 3122. Sample spaces, random variables, moment generating functions, some standard distributions, multivariate distributions, laws of large numbers, limit theorems. *Credit may not be given for STAT 3122 when credit has been given for MATH 3122 or STAT 3128.*

STAT 3123. Probability and Statistics II. (3) Cross-listed Course(s): MATH 3123. Prerequisite(s): MATH 3122 or STAT 3122. An introduction to statistical inference. Topics include: point estimation (method of moments, method of maximum likelihood, unbiased estimators, efficiency, consistency); confidence intervals and hypothesis tests for unknown parameters, including proportions, means, variances, and differences between means; tests of significance; the power function; goodness-of-fit.

STAT 3126. Applied Statistical Methods. (3) Prerequisite(s): MATH 3123 or permission of department. Regression analysis, time series analysis, and forecasting. Survival models and their estimation.

STAT 3128. Probability and Statistics for Engineers. (3) Prerequisite(s): MATH 2241. An introduction to: probability theory; discrete and continuous random variables and their probability distributions; joint probability distributions; functions of random variables and their probability distributions; descriptive statistics; point and interval estimation; one and two sample hypothesis testing; quality control; one and two factor ANOVA; and regression.

STAT 3140. Design of Experiments. (3) Prerequisite(s): STAT 2223, or STAT 3110; Junior or Senior standing, or permission of department.

Randomization and blocking with paired comparisons, significance tests and confidence intervals, experiments to compare k treatment means, randomized blocks and two-way factorial designs, designs with more than one blocking variable, empirical modeling, factorial designs at two levels.

STAT 3150. Time Series Analysis. (3) Prerequisite(s): STAT 2223 or STAT 3110; Junior or Senior standing, or permission of department. Stationary time series models, ARMA processes, modeling and forecasting with ARMA processes, ARIMA models for nonstationary time series models, spectral densities.

STAT 3160. Applied Multivariate Analysis. (3) Prerequisite(s): STAT 2223 or STAT 3110; Junior or senior standing, or permission of department. Introduction to the fundamental ideas in multivariate analysis using case studies. Descriptive, exploratory, and graphical techniques; introduction to cluster analysis, principal components, factor analysis, discriminant analysis, Hotelling T^2 and other methods.

STAT 3180. Predictive Analytics. (3) Prerequisite(s): MATH 1242, and STAT 2122 or higher. Cross-listed Course(s): MATH 3180. Uses predictive modeling skills for pricing and risk classification algorithms in the R programming language. Students learn how to do exploratory data analysis using the data visualization tools in Base R and the GGPLOT graphical I package. Generalized Linear Modeling (GLM) techniques based on Gaussian, Binomial, Poisson, and Gamma families of distributions are applied. Data analysis and model validation techniques are explored to assess modeling data quality and statistical model fit.

STAT 4116. Statistical Computing. (3) Prerequisite(s): STAT 3123 or MATH 3123. Introduction to a variety of computational techniques using various statistics software packages (S-Plus/R or SAS) and symbolic manipulation software packages. Topics include: random number generation, density estimation, and re-sampling techniques (bootstrap, jackknife) and Gibbs sample.

STAT 4123. Applied Statistics I. (3) Prerequisite(s): MATH 2164 with grade of C or above and Junior or Senior standing, or permission of department. Review of stochastic variables and probability distributions, methods of estimating a parameter, hypothesis testing, confidence intervals, contingency tables. Linear and multiple regression, time series analysis.

STAT 4124. Applied Statistics II. (3) Prerequisite(s): STAT 4123 or permission of department. Single factor analysis of variance. Multi-factor analysis of variance. Randomized complete-block designs, nested or hierarchical designs, Latin squares, factorial experiments. Design of experiments.

STAT 4227. Loss Models and Applications. (3) Cross-listed Course(s): STAT 5227. Prerequisite(s): MATH 3122 or STAT 3122; or approval of department. Review of the key features of insurance and reinsurance; severity, frequency, and aggregate loss models; parametric estimation; model selection.

Teaching English As A Second Language (TESL)

TESL 4103. Methods in Teaching English as a Second Language. (3) Prerequisite(s): MDSK 3151 and TESL 4204. For future teachers of English as a Second Language who wish to master a variety of approaches, methods and techniques of teaching ESL and other competencies prescribed by the state of North Carolina. Clinical hours required.

TESL 4104. Authentic Assessment. (3) An exploration of the variety of assessments and evaluations used specifically for English Language Learners (ELLs) in the K-12 public schools. For current and future teachers to develop multiple criteria assessment models and to master other competencies related to the assessment of ELLs within the mainstream and ESL classroom, as prescribed by the State of North Carolina. Clinical hours required.

TESL 4204. Learning, Schools, and Community. (3) Cross-listed Course(s): TESL 5204. An introduction to supportive teaching and learning practices that operate as reflective spaces within the school context and the communities they serve. Topics include: current school and community demographics, contemporary learning trends, connections to state and national policies, academic language and literacy development patterns, and community-oriented differentiated instruction. Clinical hours required.

TESL 4205. Second Language Acquisition and Linguistics in K-12 Schools. (3) Cross-Listed Course(s): TESL 5205. An introduction to the English language as a system, with a particular focus on teaching English as a second language in K-12 public school settings. Topics include: first and second language acquisition processes; English phonology, morphology, and syntax; implications for teaching English language learners the four language skills - listening, speaking, reading, and writing; and implications for teaching in the content areas.

TESL 4469. Advanced Seminar/Practicum in Teaching English as a Second Language. (3) Prerequisite(s): Permission from the department for admission to student teaching; must be taken prior to or in conjunction with student teaching in the major. A planned sequence of experiences within a high-needs ESL school setting under the supervision of a TESL faculty member. Concepts, methods, and practices used by effective teachers of English Language Learners (ELLs) in their daily classroom routines, including systematic observation skills, interpretation of observation data, and application of research-based findings. Extensive observations and implementation of modified lesson plans for ELLs required. Seminar topics vary.

TESL 4600. Literacy Development for Second Language Learners. (3) An introduction to the challenges associated with first language literacy, second language literacy, and second language development. Examinations of the interaction between language, literacy, and culture and their implications for additive models of literacy instruction in a non-native and/or heritage language in diverse K-12 settings. Clinical hours required.

Theatre (THEA)

THEA 1140. The Theatre Experience. (3) Explores the theatre experience through basic concepts of playmaking, from the script's meanings to director's, designers', and actors' choices. Considers how certain plays, performed in specific ways, might affect various people in the audience today. Plays from different historical periods are read, discussed, and seen onstage in the Department of Theatre season.

THEA 1215. Theatre Tech I - Costume. (3) Introduction to costume shop equipment, sewing techniques, and construction of costume accessories. Through the application of analytical and problem-solving skills, students analyze possible technical solutions to production-related tasks and perform basic practices in costume crafts (e.g., sewing, pattern drafting, fabric manipulation).

THEA 1225. Theatre Tech I - Scenic. (3) Through hands-on experience, introduces students to the common methods and materials used in the construction and installation of theatrical scenery. Attention is paid to safety measures and protocols in a theatrical scene shop and varied theatre spaces. Deepens students' understanding of practical problem-solving and active practice.

THEA 1235. Theatre Tech I - Lighting. (3) Introduction to the fundamentals of stage lighting technology, including instrument handling, focusing, basic electrical theory, practitioner roles and current advancements. Exploration through hands-on training of techniques associated with the installation and manipulation of a wide range of lighting technology. Students are exposed to basic and some advanced lighting console programming techniques, as well as being introduced to the concepts of DMX networking and control of automated lighting fixtures.

THEA 1245. Theatre Tech I - Sound. (3) Introduction to the fundamentals of theatrical sound technology, including audio theory, equipment, control, distribution, practitioner roles and current advancements. Hands-on training of techniques associated with the installation and manipulation of audio equipment used in a theatrical environment. Students exercise analytical and problem-solving skills, as well as active practice.

THEA 1265. Introduction to Stage Performance. (3) Introduction to the basic principles and techniques of increasing vocal and physical awareness for the stage. In the vocal awareness segment, the concept of "freeing your voice" is explored. In the physical awareness section, the focus is primarily on neutral presence through elements of the Alexander technique, and through the basic principles of physical theatre from the point of view of the Lecoq training. The main goal is to "unlearn" vocal and physical bad habits and re-learn what it means to simply stand up in front of an audience and BE. Students learn and apply a set of analytical and problem-solving skills, oral communication proficiencies, and practice and collaboration.

THEA 1270. Acting I. (3) Prerequisite(s): THEA 1265. An introductory, intensive, hands-on experience in the craft of ensemble acting for both theatre majors or interested non-majors. Students learn to analyze a scene, engage voice, body and intellect in performance work, and execute self and peer evaluation. Course material is based on acting

techniques derived from the work of Konstantin Stanislavski and using *A Practical Handbook for the Actor* by Melissa Bruder. Four contact hours.

THEA 1300. Play Analysis. (3) Prerequisite(s): Theatre major or minor, or permission of instructor. An introduction to the various methodologies of analyzing play scripts as preparation for performance. Students articulate their critical positions both orally and in writing while comparing and contrasting diverse dramatic texts, as well as recognizing distinctive theatrical genres. There is also a focus on developing writing skills appropriate to the art form.

THEA 1360. Applied Theatre in Communities and Schools. (3) Students preparing to work in a wide range of community and/or school settings explore applied theatre, a broad term for drama/theatre serving people and purposes outside traditional theatre spaces. Introduces applied theatre strategies, histories and techniques in action. Rooted in play, improvisation and story, students plan, implement, and assess basic art and learning experiences with each other and with diverse young people in a community/school setting; they sharpen collaborative skills and critical lenses to create culturally relevant theatre approaches that prioritize diversity, inclusivity, and the assets of the participants and their communities.

THEA 1502. Global Arts/Humanities: Theatre in Global Contexts. (3) All Global Theme courses explore the central, unifying question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies or cultures across the globe, students will be able to better understand themselves as part of a complex, interconnected world. This interdisciplinary course considers how various forms reflect traditions from around the world. It explores theatre's evolution within a dynamic sociopolitical global framework through lecture, discussion, film/video and performance. *May not be taken for credit and for a grade if credit has been received for LBST 1104.*

THEA 1512. Local Arts/Humanities: Theatre in the United States. (3) All Local Theme courses explore the central, unifying question of what it means to be a member of the "local" community in which we live. Through the study of the experiences of different peoples, cultures, and communities in our city, our region, or our nation, students will be able to better understand themselves in the context of the complex and diverse society in which we live. This interdisciplinary course considers the continuing evolution of theatre in the United States through lenses such as indigenous, social justice, immigration/migration, and critical cultural studies utilizing lecture, discussion, film/video, and performance.

THEA 1600. Majors and Minors Seminar. (0) Course consists of regular monthly meetings to disseminate and discuss department information and issues. Second monthly meeting consists of workshops on various aspects of the profession. *May be repeated for credit. Graded on a Pass/No Credit basis.*

THEA 2210. Costume Design I. (3) An introduction to costume design theory and techniques for theatre, dance, and opera.

THEA 2215. Stage Makeup. (3) Theories and techniques of applying and designing stage makeup.

THEA 2221. Stage Management. (3) Introduces stage management through theory and practice as it relates to live performance and the arts. Students learn to become effective team leaders and collaborators who

know how to manage time, people, and multiple resources leading toward the common goal of a successful theatrical production. Provides an understanding of the skills required to compete for jobs in the performing arts industry.

THEA 2230. Scenic Design I. (3) An introduction to scenic design theory and techniques for theatre, dance, and opera.

THEA 2240. Sound Design I. (3) Introduction to the methods, tools, processes, and theory of sound design for theatrical projects. Students learn about sound creation, support, technological innovations, and tools that are standard in the Theatre industry. Involves critical, research, and problem-solving skills.

THEA 2250. Lighting Design I. (3) An introduction to lighting design theory and techniques for theatre, dance, and opera.

THEA 2260. Voice, Text, and the Actor. (3) Prerequisite(s): THEA 2270. Delves into the study of the principles and techniques of vocal production, voice work and dialects for the stage. Using as foundation Kristin Linklater's methods for "freeing your voice," students are immersed in various vocal approaches in order to maximize their full vocal potential. In the second half of the course, students build a foundation for utilizing the International Phonetic Alphabet in both understanding their own voice, stage standard speech, and introductory dialect work. At the end of the course, students demonstrate the ability to employ clear and expressive speech habits in performances practices, cross-disciplinary studies, and everyday life. Students learn and apply a set of analytical and problem-solving skills, and oral communication proficiencies.

THEA 2270. Acting II. (3) Prerequisite(s): THEA 1270. Explores acting techniques based on the work of Constantine Stanislavski and using the Practical Handbook. Students take a more in-depth look at scenes, monologues, and acting techniques which allow them to develop their characters. In addition, students can expect to become more self-aware, which can be infinitely valuable, no matter what career they wish to pursue.

THEA 2280. Acting in Physical Theatre. (3) Prerequisite(s): THEA 1265 with grade of C or above. The study of foundational principles and techniques for increasing physical presence for the stage. Students are submerged in a condensed version of "year one" of Jacques Lecoq's pedagogy of movement-based creative theatre. Advancing from the premise that a gesture could say more than 1000 words, students are moved from silence to voice, from the elemental to the animal, from neutral to character. Students learn and apply a set of analytical and problem-solving skills, oral communication proficiencies, and practice and collaboration.

THEA 2310. Theatre History I. (3) Prerequisite(s): Sophomore, Junior, or Senior standing. An overview of the history of theatre practices, technologies, and literatures from the ancient world through the 17th century.

THEA 2311. Theatre History II. (3) Pre- or Corequisite(s): THEA 1300. An overview of the history of theatre practices, technologies, and literatures from the 17th century to the present.

THEA 2320. Playwriting I. (3) Prerequisite(s): THEA 1300. An introduction to the playwriting process for students interested in dramatic storytelling and the process of new play development. Focuses on: 1) close reading and analysis of representative plays in order to understand dramatic structure, characterization, rhythm, imagery, etc.; 2) creative experimentation through a series of writing exercises; and 3) participation in the process of "workshopping" class products, including offering and receiving constructive criticism.

THEA 2330. Shakespeare in History. (3) Prerequisite(s): THEA 1300. The plays of William Shakespeare are examined, as they emerged from the cultural context which shaped his world and the forms of theatre available to his audience. Involves textual analysis and other types of critical scrutiny across various forms of communication-oral, written, and theatrically embodied-both as individuals and as a group working collaboratively, as they explore the political, social, religious, philosophical, and aesthetic currents which stamped the plays. In addition to examining Shakespeare's work, students read representative examples by his contemporaries so as to further contextualize the material, and study the particular technologies of the Renaissance theatre so as to better understand how the plays may have been originally staged. The thrust of the course is that in uncovering what Shakespeare was, students start to construct notions of what he may yet become. Involves the writing of several short essays.

THEA 2370. Introductory Theatre Teaching Apprenticeship. (1) Prerequisite(s): THEA 1360. Theatre Education licensure students enter the profession as active observers and assistants. Assigned to one school clinical placement and given the option to explore several non-school arts-based experiences targeting youth (e.g., theatres, organizations, events), future theatre teachers observe, analyze, and document while actively participating, assisting, and questioning artistic and pedagogical practices.

THEA 2400. Technical Theatre Practice. (1) Provides practical experience in a realized theatrical production within a defined area of practice on a departmental, or department-supported, theatrical production. Upon completion, students should have a solid understanding of the basic terminologies, processes, safety practices, materials, techniques and goals of the specified area. These areas include, but are not limited to, scenic, costume, lighting and sound production, stage management, and other areas of specificity, as necessary. *May be repeated for credit.*

THEA 2402. Performance Practicum: Theatre. (1) Prerequisite(s): Audition. Practical application of performance techniques within a production setting, including auditions, rehearsals, and performances. *May be repeated for credit.*

THEA 2405. Run Crew Practicum. (1) Provides practical theatre crew experience in a realized theatrical production within a defined area of practice on a departmental, or department-supported, theatrical production. Upon completion, students should have a solid understanding of the basic terminologies, processes, safety practices, materials, techniques and goals of the specified crew area. *May be repeated for credit up to 6 credit hours.*

THEA 2460. Practicum in Creative Drama: K-8. (3) Prerequisite(s): THEA 1160 or permission of instructor. Study and application of advanced theories, concepts, competencies, and processes unique to primary and

middle school settings, with particular attention to the various subject areas. Centered on in-school teaching experience and clinical practice.

THEA 2600. Majors Seminar. (1) Prerequisite(s): Sophomore standing. Students investigate, identify, analyze, and cultivate immediate and life-long career options through directed projects, guest lectures, site visits to the Career Center, mock interviews, and other career preparatory activities and assignments. Students develop effective communication skills (both written and oral) as part of their work on the course projects. Two contact hours. *Graded on a Pass/No Credit basis.*

THEA 3132. 17th to Early 20th Century Theatre. (3) Prerequisite(s): Junior or Senior standing. The history and drama of European and American theatre, from the Restoration period to early 20th century realism and various antirealist movements.

THEA 3202. Audition Techniques. (3) Prerequisite(s): THEA 2201. Provides intermediate to advanced student actors with an understanding of the business of acting and the skills needed for one to be considered for employment. Students are taken through a variety of mock auditions including ones for theatre, film, and commercial work. Areas of focus include the preparation of headshots, resumes, websites, portfolios, and cover letters. Four contact hours.

THEA 3207. Acting for the Musical Theatre. (3) Prerequisite(s): THEA 2201; admission into Certificate in Music Theatre; and permission of instructor. Students develop an effective acting technique for the musical stage. Through in-class exercises and the study of music and scenes of major shows in the repertoire, students develop performance techniques particular to the musical theatre genre, and an appreciation of its particular styles. Students also develop and perform scenes/songs from several musicals of their choice.

THEA 3211. Visual Period Styles for Theatre. (3) Introduction to art, architecture, interior design, and clothing history, including social and economic factors that influenced development. Through research and critical thinking, students demonstrate knowledge of historical and contemporary art movements, architecture, and clothing for application in theatrical design.

THEA 3214. Costume Crafts. (3) Prerequisite(s): THEA 1215, THEA 1225, or permission of instructor. Introduction to costume craft-making uses a materials-based approach. Through the application of analytical and problem-solving skills, students analyze possible technical solutions to production-related tasks and perform advanced practices in costume crafts (e.g., millinery, leather work, thermoplastics, dyeing, distressing, and e-textiles).

THEA 3215. Theatre Tech II - Costume. (3) Prerequisite(s): THEA 1215 or permission of instructor. In-depth exploration of pattern development, draping, fabric modification, and construction of accessories. Through the application of analytical and problem-solving skills, students analyze possible technical solutions to production-related tasks and perform advanced practices in costume crafts (e.g., sewing, pattern drafting, fabric manipulation).

THEA 3222. Theatre Drafting. (3) Introduction to the fundamentals of theatrical hand drafting and computer-aided drafting. While this course specifically explores projects for designers and technicians in theatre, anyone looking to expand their basic skills in drafting will find the class

useful. Learning outcomes include problem-solving, practice, and collaboration.

THEA 3225. Theatre Tech II – Scenic. (3) An introduction to advanced methods, tools, and materials used in the creation of theatrical scenery. Safety methods and protocols are explored, and students focus on critical thinking, analytical, and problem-solving skills as they relate to scenery production.

THEA 3235. Theatre Tech II – Lighting. (3) Prerequisite(s): THEA 1235. Advanced topics in stage lighting technology, including paperwork management within Vectorworks and Lightwright, production archiving methods, advanced large scale show prep package work, and USITT standards and guidelines. Exploration through hands-on training of techniques associated with the installation and manipulation of a wide range of lighting technology. Students are exposed to advanced lighting console programming techniques, as well as strategies and procedures for DMX networking and control of automated lighting fixtures.

THEA 3246. Theatre Tech II - Sound. (3) Prerequisite(s): THEA 1245. A detailed exploration of advanced topics in theatrical sound technology, including audio transport networks and protocols, control networks, advanced control, routing, and distribution, digital console programming, and system processing. Students utilize critical, analytical, and problem-solving skills.

THEA 3256. Drawing and Rendering for the Theatre. (3) Foundational drawing and rendering concepts developed for students of the theatre. Through practice and disciplined application, students master drawing and rendering skills in order to effectively communicate aesthetic choices for application in theatre design.

THEA 3290. Acting on Camera. (3) Prerequisite(s): THEA 2270. A discussion of foundational concepts regarding screen acting technique and strategically applying this technique to create on-camera performances. Students work in various genres with the intentions of mastering the foundations of objective-driven, realistic acting. Students also analyze a film, critiquing the acting using the language of craft discussed in the class. Four contact hours.

THEA 3293. Introduction to African American Theatre. (3) Prerequisite(s): THEA 1265 and THEA 1270. A discussion-centered course designed to give students of all backgrounds an introductory understanding to the world of modern African American theatre. Covers elements of style, design, criticism, and history as they pertain to the genre through reading, discussion, and performance. Students explore, discuss, and analyze issues of politics, race, and gender in the American theatre. Emphasis is placed on major playwrights, theatre companies, and performers within their historical and social contexts.

THEA 3300. Directing I. (3) Prerequisite(s): THEA 1270 or permission of instructor. An introductory course in the fundamentals of directing that focuses on defining the role of the director while discovering a variety of directorial strategies. Processes explored include text analysis, collaboration and leadership, director/actor communication, directing theory, storytelling (narrative), point of view, and stage composition. Students practice applying the concepts and skills they have learned in the class by directing short scenes, acting in short scenes, and participating in an analysis of student work.

THEA 3310. Dramaturgy. (3) Prerequisite(s): THEA 1300. Exploration of plays in the Department of Theatre's current production season through dramaturgical research, play analysis, and essay writing. The writing of performance reviews and program notes is also practiced. Students conduct historical research on the plays, playwrights, and prior productions. Students also learn to apply current theories and cultural concerns to specific points in each play, developing new meaning for staging the plays today.

THEA 3330. Ancient, Medieval, and Asian Theatre. (3) Prerequisite(s): Junior or Senior standing. The history and drama of ancient Greek, ancient Roman, medieval European, and traditional Asian forms of theatre.

THEA 3340. Renaissance European Theatre. (3) Prerequisite(s): Junior or Senior standing. The history and drama of Renaissance European theatre, including Shakespeare.

THEA 3355. Contemporary Theatre. (3) Prerequisite(s): Junior or Senior standing. The history and drama of 20th and 21st century theatre in America, Europe, Africa, and elsewhere.

THEA 3400. Advanced Theatre Practice. (1 to 3) Provides practical experience in a realized theatrical production within a defined area of practice on a departmental, or department-supported, theatrical production. Upon completion, students should have solid understanding of advanced terminologies, processes, safety practices, materials, techniques, and goals of the specified area in which they are concentrating. *May be repeated for credit up to 6 hours.*

THEA 4001. Topics in Theatre. (1 to 6) Special topic in theatre. *May be repeated for credit with change of topic.*

THEA 4002. Topics in Applied Theatre. (1 to 6) Special topics in applied theatre. *May be repeated for credit with change of topic.*

THEA 4003. Topics in Design and Technical Theatre. (1 to 6) Special topic in design and technical theatre. *May be repeated for credit with change of topic.*

THEA 4004. Topics in Directing. (1 to 6) Special topics in theatre directing. *May be repeated for credit with change of topic.*

THEA 4005. Topics in Theatre Performance. (1 to 6) Special topics in theatre or media performance. *May be repeated for credit with change of topic.*

THEA 4006. Topics in Theatre Education. (1 to 6) Special topics in theatre education. *May be repeated for credit with change of topic.*

THEA 4007. Topics in Theatre History. (1 to 6) Special topics in theatre history. *May be repeated for credit with change of topic.*

THEA 4008. Topics in Dramatic Literature. (1 to 6) Special topics in dramatic literature. *May be repeated for credit with change of topic.*

THEA 4204. Acting III: Experiential and Alternative. (3) Prerequisite(s): THEA 3201 with a grade of A. Instructs the advanced acting student on the use of an organic based acting technique in the creation of roles in modern *experimental* and *alternative* plays. Focusing upon Brecht, Artaud, and other contemporary devising stylists, the

student is instructed on research, script analysis, and performance techniques. Four contact hours.

THEA 4205. Stage Dialects. (3) Prerequisite(s): THEA 3201 or THEA 3205 with a grade of B or above. Provides the student with a process in dialect acquisition. Upon completion of the course, the student will have a basic understanding of the International Phonetic Alphabet (IPA), demonstrate knowledge of specific vowel and consonant changes for dialects covered, and be able to demonstrate specific dialects through performance. Four contact hours.

THEA 4210. Costume Design II. (3) Prerequisite(s): THEA 2210. A continuation in costume design theory and techniques for theatre, dance, film, and opera. The emphasis is on improving visual communication skills by exploring the following topic areas: using analytical and problem-solving skills to interpret a text, supporting a text through design choices, and advanced drawing and costume rendering techniques using analog techniques and digital media.

THEA 4225. Computer-Aided Design for Theatre. (3) The study of the use of the computer-aided design (CAD), with special emphasis on how it relates to design for the stage. The course begins at a rudimentary level of understanding of CAD, progresses to 2D, and then to 3D techniques using Vectorworks. Students develop an understanding of how CAD software can be used to understand, imagine, create, and share concepts and techniques for stage design.

THEA 4230. Scenic Design II. (3) Prerequisite(s): THEA 2230 or permission of instructor. Advanced scenic design theory and projects.

THEA 4233. Scenic Painting. (3) Prerequisite(s): THEA 1240 or permission of instructor. An introduction to basic scenic painting techniques, paint media, and materials.

THEA 4234. Stage Properties. (3) Prerequisite(s): THEA 2230. An introduction to the work of a theatre props department. Focuses on the functions and role of the Properties Manager in the production process. Also addresses several common properties fabrication techniques through hands-on projects.

THEA 4237. Puppetry. (3) Focuses on learning of the basic varieties of puppetry for the stage, frameworks for socio-historical reasons for puppetry as a design and performative art form, and gives students an opportunity to create their own short puppet pieces in a studio-style course set-up.

THEA 4250. Lighting Design II. (3) Prerequisite(s): THEA 2250 or permission of instructor. Advanced lighting design theory and projects.

THEA 4281. Commedia dell'Arte. (3) Prerequisite(s): See advisor. Expands on the principles and techniques of what is widely known as the Physical Approach to Theatre, with a primary focus on the Commedia dell'Arte dramatic realm. From mask work to comedic improvisation, to slapstick/comic stage combat, to the creation of new comic work, students are immersed in the essence and power of this Renaissance period theatrical heritage. Students learn and apply a set of analytical and problem-solving skills, research and critical thinking, oral communication proficiencies, and practice and collaboration.

THEA 4282. Summer Contemporary Circus Intensive. (3) Prerequisite(s): See advisor. Expands on the principles and techniques of what is widely known as the contemporary circus realm or the Nouveau Cirque, with a primary focus on the Aerial Circus Disciplines. In order to become a performer with a mastery in movement and the physical gesture, one must diversify the knowledge of such field, and aim to amass and understand a variety of skills. Such knowledge undoubtedly makes the individual a more marketable performer, a true cross-trained artist for the performing arts of the 21st century. Students learn and apply a set of analytical and problem-solving skills, and practice and collaboration. *May be repeated for credit to continue to build skill knowledge in reference to the production/academic schedule.*

THEA 4300. Directing II. (3) Prerequisite(s): THEA 3300. Continuation of THEA 3300, with emphasis on advanced analysis, coaching, communication with designers, and complex staging problems.

THEA 4310. Theatrical Shakespeare. (3) Prerequisite(s): THEA 1270 and THEA 1300. An examination of a play or plays by Shakespeare as expressly theatrical entities, the raw material of vivid and compelling contemporary staging. Students learn the particular skill sets actors need in preparing to perform Shakespeare, beginning by studying iambic pentameter, rhyme, antithesis, image clusters, and other features of the Shakespearean text, combining analysis with practical techniques for incorporation and delivery. Practices demanded by the plays are studied, which grow out of their original performance conditions but focus on playing in the present, developing a sense of character, spatial relationships, and visualization. Also explored are macro directorial concerns about viable readings and how to present them in the theatre. Students combine rigorous critical thinking with active rehearsal room practices in order to develop both a firm understanding of what Shakespeare on stage is and a range of abilities that facilitate effective actor choices.

THEA 4330. Performance Theory. (3) Prerequisite(s): Theatre major or minor; and Junior or Senior standing; or permission of instructor. Application of different perspectives to drama on the page, stage, and screen using various performance theories and approaches: semiotics, deconstruction, psychoanalysis, feminism, post-colonialism, and performance studies.

THEA 4340. Theatre Collaboration. (3) (SL) Prerequisite(s): Permission of instructor. The integration and application of principles of theatre collaboration. Students participate in the collaborative creation of a play production while examining the ideas/principles of a controversial social justice issue. Students devise an original dramatic work, practice collaborative skills, demonstrate understanding of the diverse perspectives around current social or cultural issues within the community and on campus; interpret text, and create and use theatrical space evocatively.

THEA 4360. Theatre for Young Audiences. (3) Students with an interest in theatre, young people, and/or literature explore plays and performances for young audiences. The course considers young audiences through experiences with reading, seeing, and creating plays for young people with a particular emphasis on youth audience response. Students identify recurrent patterns shaping theatre for young audiences locally, nationally, and globally, then move to contribute to the field through individually designed projects.

THEA 4370. Theatre/Drama Curriculum and Methods K-12. (3) Prerequisite(s): THEA 1360, THEA 2370, MDSK 2100, acceptance into Teacher Education Program, and Junior or Senior standing; or permission of instructor. Students synthesize and apply their content and teaching experiences and knowledge to design, implement, and assess theatre programs and curricula. Future theatre educators develop pedagogically sound, artistically challenging, and strategically inclusive approaches, as well as consider questions of systemic challenges and potential reform. This methods course includes strategic preparation and clinical experiences for students transitioning to the student teaching internship.

THEA 4375. Devising/Directing Methods with Youth K-12. (3) Prerequisite(s): THEA 1360 or permission of instructor. Students interested in education and/or applied theatre design inclusive approaches to text, performance, ensemble, and community building. Anchored in community and/or school settings, the course helps students analyze, design, plan, and implement traditional scripted production work, as well as collective creation/devising work. A major emphasis rests on guiding educators and artists to flexibly create and adapt theatrical material to serve young people in a culturally responsive and inclusive way in a variety of contexts.

THEA 4400. Internship in Theatre. (3-6) Prerequisite(s): GPA of at least 2.5, Junior or Senior standing, and permission of department chair. Research and/or in-service training for theatre majors and minors in cooperating organizations. Specific content is based upon a contract between the students, department, and professional organization. *Graded on a Pass/No Credit basis.*

THEA 4467. Student Teaching/Seminar: K-12 Fine and Performing Arts: Theatre. (12) Prerequisite(s): approved application for student teaching; Senior standing; completion of professional education requirements; and grades of C or above in all courses required for licensure. Corequisite(s): enrollment only in student teaching. A planned sequence of experiences in the student's area of specialization conducted in an approved school setting under the supervision and coordination of a University supervisor and a cooperating teacher in which the student demonstrates the competencies identified for their specific teaching field in an appropriate grade level setting. Participating students pay a course registration fee for edTPA portfolio assessment. *Graded on a Pass/No Credit basis.*

THEA 4600. Senior Project. (1) Prerequisite(s): Senior standing. Synthesis, integration, and application of theoretical and experiential study in theatre through individual/group project. Students, working with a mentor, prepare a paper, performance project or portfolio presentation in their area of emphasis. One contact hour.

THEA 4601. Individual Project. (1 to 6) Prerequisite(s): Permission of department chair. An individual project course for Theatre majors. *May be repeated for credit.*

THEA 4610. Advanced Design, Technology, and Management. (2 to 3) Prerequisite(s): Permission of instructor. Large-scale applications of design and production topics on realized productions. *May be repeated for credit.*

THEA 4620. Senior Seminar. (3) Prerequisite(s): Senior standing. Senior Seminar experience for graduating seniors. Students learn and

apply a set of critical thinking, analytical, and practical skills required to theorize, plan, execute, and/or reflect upon a series of final projects. Students explore the theoretical and performance texts of the discipline, analyze and evaluate their personal learning acquisition throughout their studies in the major, review and further develop career-building tools and strategies, and share their knowledge and experiences with other majors as part of a peer-to-peer teaching and learning module.

THEA 4640. Senior Capstone in Applied Theatre. (3) Prerequisite(s): Senior standing. Corequisite(s): THEA 3400. Capstone experience for graduating seniors. Students learn and apply a set of critical thinking, analytical, and practical skills required to theorize, plan, execute, and/or reflect upon a final project in applied theatre. Participating actively in art as research, students gain experience in project management, theatre making, community connection, and arts-based research.

THEA 4650. Senior Capstone in Design/Tech. (3) Capstone experience for graduating seniors. Students learn and apply a set of critical thinking, analytical, and practical skills required to theorize, plan, execute, and/or reflect upon a final project in their chosen concentration area within Theatre Design and Technology.

THEA 4800. Directed Independent Study. (1 to 3) Prerequisite(s): Theatre or Theatre Education major; Junior or Senior standing, minimum 2.5 GPA; and permission of instructor and department. Allows students to pursue faculty-directed independent study topics (1) of special interest to the student, (2) within the area of the instructor's special competence, (3) not provided by other Department offerings. *May be repeated for credit.*

Translating and Translation Studies (TRAN)

TRAN 3601. Introduction to Translation and Interpreting Studies. (3) Prerequisite(s): FREN 3201, FREN 3202; GERM 3201, GERM 3202; JAPN 3201; RUSS 3201; SPAN 3201, SPAN 3202, or SPAN 3203 with grade of C or above; or permission of department. History, theory, pragmatics, and procedures of the fields of translation and interpreting. Designed to develop the research skills, resources, and tools to become good translators and interpreters. Conducted in English.

TRAN 4402. Practicum in Translating I - French. (3) Cross-listed Course(s): TRAN 5402. Pre or Corequisite(s): TRAN 3601 and a FREN 3000-level course or equivalent with grades of C or above, or permission of department. Comparative stylistics, restructuring texts, editing, troubleshooting, and techniques of the translator in working with a variety of text types. Conducted in English and French.

TRAN 4403. Practicum in Translating II - French. (3) Cross-listed Course(s): TRAN 5403. Prerequisite(s): TRAN 4402 with grade of C or above, or permission of department. Critical analysis of different kinds of texts; translating for specific audiences; problems of terminology; development of working dictionaries in fields(s) of specialization. Conducted in English and French.

TRAN 4404. Practicum in Translating III - French. (3) Cross-listed Course(s): TRAN 5404. Pre- or Corequisite(s): TRAN 4403 with grade of C or above, or permission of department. Study of professional journals, technologies, protocol, and resources in the field (e.g., ATA, ALTA).

Advanced issues of translation. Translation of a semester-long project in individual consultation. Conducted in English and French.

TRAN 4412. Practicum in Translating I - German. (3) Cross-listed Course(s): TRAN 5412. Pre- or Corequisite(s): GERM 2201, GERM 2202, GERM 3201, and GERM 3202; or permission of department. Comparative stylistics, restructuring texts, editing, troubleshooting, and techniques of the translator in working with a variety of text types. Conducted in English and German.

TRAN 4413. Practicum in Translating II - German. (3) Cross-listed Course(s): TRAN 5413. Pre- or Corequisite(s): GERM 2201, GERM 2202, GERM 3201, and GERM 3202; or permission of department. Critical analysis of different kinds of texts; translating for specific audiences; problems of terminology; development of working dictionaries in fields(s) of specialization. Conducted in English and German.

TRAN 4414. Practicum in Translating III - German. (3) Cross-listed Course(s): TRAN 5414. Prerequisite(s): GERM 2201, GERM 2202, GERM 3201, and GERM 3202; or permission of department. Translation of a semester-long project in individual consultation. Conducted in English and German.

TRAN 4422. Practicum in Translating I - Japanese (3) Cross-listed Course(s): TRAN 5422. Pre- or Corequisite(s): One Japanese language course at the 3000 level (JAPN 3201, JAPN 3202 or JAPN 3203), or equivalent with a grade of B or above, or permission of department. Comparative stylistics, restructuring texts, editing, troubleshooting, and techniques of the translator in working with a variety of text types. Conducted in English and Japanese.

TRAN 4423. Practicum in Translating II - Japanese. (3) Cross-listed Course(s): TRAN 5423. Prerequisite(s): One Japanese language course at the 3000 level (JAPN 3201, JAPN 3202 or JAPN 3203), or equivalent with a grade of B or above, or permission of department. Provides guided practical experience in translating from Japanese to American English, through work with one genre of source texts.

TRAN 4424. Practicum in Translating III - Japanese. (3) Cross-listed Course(s): TRAN 5424. Prerequisite(s) One Japanese language course at the 3000 level (JAPN 3201, JAPN 3202 or JAPN 3203), or equivalent with a grade of B or above, or permission of department. Provides individualized practical experience in translating from Japanese to American English.

TRAN 4432. Practicum in Translating I - Russian. (3) Cross-listed Course(s): TRAN 5432. Pre- or Corequisite(s): TRAN 3601 and a RUSS 3000-level course or equivalent with a grade of B or above, or permission of department. Grammatical and lexical issues of translation; restructuring texts, editing, troubleshooting, and techniques of the translator in working with a variety of text types (documents, essays, fiction, poetry). Conducted in English and Russian.

TRAN 4433. Practicum in Translating II - Russian. (3) Cross-listed Course(s): TRAN 5433. Prerequisite(s): TRAN 4432 with a grade of B or above, or permission of department. Further work in restructuring texts, editing, troubleshooting. Pragmatic/cultural issues of translation in dealing with a variety of text types (documents, essays, fiction, poetry) as well as the specifics of film translating. Conducted in English and Russian.

TRAN 4434. Practicum in Translating III - Russian. (3) Cross-listed Course(s): TRAN 5434. Prerequisite(s): TRAN 4433 with a grade of B or above, or permission of department. Study of professional journals, technologies, protocol, and resources in the field (e.g., ATA, ALTA). Advanced issues of translation. Translation of a semester-long project in individual consultation with instructor. Conducted in English and Russian.

TRAN 4442. Practicum in Translating I - Spanish. (3) Pre- or Corequisite(s): TRAN 3601 and a SPAN 3000-level course or equivalent, with grade of C or above, or permission of department. May count as coursework for the Spanish major. Understanding audience, text typologies, register, and regionalisms. Continues with theory of translation. Conducted in English and Spanish.

TRAN 4443. Practicum in Translating II - Spanish. (3) Prerequisite(s): TRAN 3601 or TRAN 4442, and a SPAN 3000-level course or equivalent, each with grade of C or above, or permission of department. Emphasizes commercial, financial, legal, political, medical, and scientific translation. Continues with history and theory of translation. Conducted in English and Spanish. May be taken concurrently with TRAN 4444 and may also count as coursework for the Spanish major.

TRAN 4444. Practicum in Translating III - Spanish. (3) Prerequisite(s): TRAN 3601 or TRAN 4442, and a SPAN 3000-level course or equivalent, each with grade of C or above, or permission of department. Emphasizes literary, cultural, and consumer-level translation. Conducted in English and Spanish. May be taken concurrently with TRAN 4443 and may also count as coursework for the Spanish major.

TRAN 4452. Practicum in Translation I – Italian. (3) Provides practical experience in translating from Italian to American English through work with a variety of source texts. Students begin to work with longer source texts.

University College (UCOL)

UCOL 1000. College Transition for First-Year Students. (1 to 3) Prerequisite(s): Freshman standing. Designed to assist with the intellectual and social transition from high school to college by increasing the involvement of students in the intellectual life of the campus; providing an orientation to resources available to students; and promoting problem solving and writing skills. Students who have previously taken any UCOL 1000-level course may not receive credit for this course. *May not be repeated for grade replacement.*

UCOL 1010. College Transition for Transfers. (3) Designed to assist with the intellectual and social transition to UNC Charlotte for transfer students by increasing the involvement of students in the intellectual life of the campus; providing an orientation to resources available to students; and promoting problem solving and writing skills. Students who have previously taken any UCOL 1000-level course may not receive credit for this course. *May not be repeated for grade replacement.*

UCOL 1011. College Transition for Transfers. (1 to 3) Designed to assist with the intellectual and social transition to UNC Charlotte for transfer students by and increasing the involvement of students in the intellectual

life of the campus; providing an orientation to resources available to students; and promoting problem solving and writing skills. Students who have previously taken any UCOL 1000-level course may not receive credit for this course. *May not be repeated for grade replacement.*

UCOL 1200. First-Year Seminar. (3) A seminar-style learning experience designed to assist with the intellectual and social transition from high school to college. This course will provide an orientation to campus resources and help students plan how to make the most of their time at Charlotte. *May not be repeated for grade replacement.*

UCOL 1205. Enrichment Seminar. (1 to 3) A seminar-style learning experience designed to enrich the education experience of one or more courses taken concurrently. The enrichment seminar is focused around a particular theme defined by the companion course(s) and provides opportunities to explore the topics of the course(s) in more detail and with additional materials, experiences, and assignments. The enrichment seminar will also address the college transition experience by enhancing students' involvement with and knowledge of the campus and its resources and promoting problem solving and oral and written communication skills. Open to new first-year students only; requires co-registration in designated companion section(s) as indicated. *May be repeated for credit with change of topic one time.*

UCOL 1206. Enrichment Seminar. (1 to 3) A seminar-style learning experience designed to enrich the education experience of one or more courses taken concurrently. The enrichment seminar is focused around a particular theme defined by the companion course(s) and provides opportunities to explore the topics of the course(s) in more detail and with additional materials, experiences, and assignments. The enrichment seminar also addresses the college transition experience by enhancing students' involvement with and knowledge of the campus and its resources and promoting problem solving and oral and written communication skills. Open to new first-year students only; requires co-registration in designated companion section(s) as indicated. *Graded on a Pass/No Credit basis. May be repeated for credit one time with change of topic.*

UCOL 1201. Forty-Niner Intensive Transition (FIT) Experience. (1 to 3) Designed to provide students new to the university with a menu of activities that promote academic and social transition. Specific topics will vary.

UCOL 1300. Academic Success Seminar. (2) Prerequisite(s): Permission of department. Designed to assist continuing university students with the development of study and problem solving skills. Emphasizes using academic support resources, engaging in campus life, and enhancing academic performance. *May not be repeated for grade replacement.*

UCOL 1305. 49er Focus. (0 to 1) Prerequisite(s): Permission of department. An academic seminar designed to help students find greater success in college and in life. The focus is on maximizing effective study strategies, locating and utilizing resources, and identifying learning preferences to enhance academic performance. *Graded on a Pass/No Credit basis. May not be repeated for grade replacement.*

UCOL 1307. Academic Success Experience. (0) Designed to provide students with a menu of activities that help promote the development of study skills, problem-solving skills, and self-awareness that foster

academic success. Emphasizes using academic support resources, engaging in campus life, and enhancing academic performance.

UCOL 1310. Executive Functioning and Academics. (1) Prerequisite(s): Permission of University College. This enrichment seminar is designed to help students with neurodiversity. The course content focuses on teaching executive function skills/abilities, how they operate, and strategies to engage and strengthen your EF skills/abilities. This course will utilize peer mentors to augment students' academic journeys and connect students with the many on-campus resources available.

UCOL 1311. Executive Functioning and Wellness. (1) Prerequisite(s): Permission of University College. This enrichment seminar is designed to help students with neurodiversity. The course content focuses on teaching executive function skills/abilities, how they operate, and strategies to engage and strengthen your EF skills/abilities. This course will utilize peer mentors to augment students' social & wellness journeys and connect students with the many on-campus resources available.

UCOL 1312. SHIELD Experience. (1) Prerequisite(s): Permission of University College. Designed to provide students with a menu of activities that help promote the development of skills that foster academic success. Emphasizes executive functions development and peer mentor support. *May be repeated for credit up to 6 credit hours.*

UCOL 2000. Topics in General Education. (3) Prerequisite(s): Sophomore, Junior, or Senior standing and permission of the sponsoring department. Topics chosen from the fields covered by General Education in order to demonstrate relationships and interdisciplinary influences. *May be repeated for credit with change of topic and permission of student's major department.* Can be used toward general degree requirements as indicated each time the course is offered.

UCOL 2101. Introduction to Research. (1 to 2) A professional development course that prepares students for successful engagement in undergraduate research. Provides an in-depth overview of research methods and practices. Students actively participate in conducting literature research and learn about the research process.

UCOL 2102. Community Based Research. (1) This course is intended to engage students who have research and/or service learning experience with theories, principles, and methods associated with Community-Based Participatory Research (CBPR). This course is designed to enhance and refine students' existing knowledge about research, service, and how those two practices can be combined to utilize research to serve your community. This course is intended for students who are interested in practicing and applying CBPR techniques in professional spaces that seek to address social, health, or resource disparities in the community. *May be repeated with no stipulations.*

UCOL 2200. University Learning Seminar. (1 to 3) Prerequisite(s): Permission of department. Provides instruction in digital literacy, critical thinking, problem solving, and written and oral communication skills. Each section will be developed around a content theme selected from instructor's discipline. Designed to reinforce and augment students' intellectual and social transition to the University learning environment. Students who have previously taken a UCOL 1000-level course may receive credit for this course if registering with permission.

UCOL 2400. University Professional Internship Program Practicum. (0) Prerequisite(s): Sophomore, Junior, or Senior standing; not open to second degree students. All students with a UPIP internship are required to register for the UPIP practicum in each term in which they have an internship. The UPIP practicum coordinates the professional and career development reflections and assignments that are an integral part of the University's Professional Internship Program. Students must apply and be selected for a UPIP internship in order to register; eligibility restrictions apply. For information, contact the University Career Center. *May be repeated for credit.*

UCOL 2900. Introduction to Applied Undergraduate Research. (1 to 2) A research course that provides hands-on research experience with a faculty or researcher at UNC Charlotte. Prepares students for successful completion in undergraduate research. Students conduct research with a faculty mentor, compose a research paper, and present their research at the Undergraduate Research Conference. Through the course, students are trained and prepared to develop a research product.

UCOL 3101. Graduate Education Opportunities. (1) An introductory course designed to provide talented undergraduate students, particularly from under-represented groups, opportunities to explore various aspects of graduate education. Students participate in instructional sessions designed to provide an overview of graduate education while exploring academic disciplines of interest in more detail. Students develop an admissions application and statement of purpose.

UCOL 3400. Preceptor Training Seminar. (1) Prerequisite(s): Permission of University College. Students enrolled in the seminar learn how to support faculty in the classroom. Topics include: enriching learning engagement, supporting undergraduate student success, enhancing academic enrichment, and monitoring the classroom. Students also develop teaching-related skills and learn to provide mentorship to first-year students. *May not be repeated. Graded on a Pass/No Credit basis.*

UCOL 3410. Career Development Internship. (1 to 3) Prerequisite(s): Junior or Senior standing, and permission of University Career Center. Designed to allow students to take advantage of a workplace experiential learning opportunity when other options are not available. Completing this internship requires at least 50 hours of supervised employment per registered credit hour. The internship must provide a meaningful work experience in which the student uses the competencies gained from their academic program. An internship proposal form must be completed and approved by the University Career Center in consultation with the student's major department prior to registration and the commencement of the work experience. Students cannot normally count the Career Development Internship towards their major or minor requirements (it counts as elective hours only); exceptions may be possible at the program's discretion. *Graded on a Pass/No Credit basis. May be repeated for credit up to 6 credit hours.*

UCOL 3450. Teaching Internship. (1 to 3) Prerequisite(s): Permission of the sponsoring unit and supervising instructor. Pre- or Corequisite(s): UCOL 3400. A structured opportunity for students to develop teaching-related skills by providing assistance to faculty in the classroom and/or working in a structured mentoring role in support units such as the University Center for Academic Excellence. Duties vary depending upon the assignment but may include: conducting review sessions, facilitating study skills sessions, lecturing, and assisting faculty member with

exams. *May be repeated for credit up to 6 credits. Graded on a Pass/No Credit basis. Honors course.*

UCOL 3800. Independent Study. (3) Prerequisite(s): Permission of instructor and Dean of University College. Individual research, research, or field-based experience in a topic under the supervision of a faculty member. *May be repeated for credit with permission.*

Urban Studies (URBS)

URBS 2200. Introduction to Urban Studies. (3) Cross-listed with GEOG 2200. A survey course exploring the diverse perspectives and experience of North American Cities. Lectures and discussions focus on the development, organization, function, and meaning of urban areas, as well as the multiple and complex relationships that exist between cities and the people who live and work within them. Students who pass this course meet the requirements for the "Western Tradition" area of the LBST requirements and will not have to take an additional course to satisfy that area of General Education.

URBS 3050. Topics in Urban Studies. (3) Timely and important areas of scholarship and application relevant to urban studies. *May be repeated for credit with change of topic and permission of Director of the Minor in Urban Studies program.*

URBS 3801. Independent Study in Urban Studies. (1 to 3) Prerequisite(s): URBS 2200, Urban Studies minor; Junior or Senior standing; minimum 2.0 GPA; permission of supervising instructor and Director of Minor in Urban Studies program. Area of study beyond the scope of current offerings to be devised by student and faculty member. *May be repeated for credit. Three hours of URBS 3801 may be used toward the URBS minor with prior approval of the Director of the Minor in Urban Studies.*

URBS 4401. Internship in Urban Studies. (3) Prerequisite(s): URBS 2200, Urban Studies minor; Junior or Senior standing; minimum 2.0 GPA; permission of Director of Minor in Urban Studies program. Students work 8-10 hours per week (total 120 hours per semester) for 3 credit hours in an approved research or in-service placement relevant to urban studies. Specific content of internship based on a contract between the student, supervising professor, and community/corporate organization. *May not be repeated for credit. Graded on a Pass/No Credit basis.*

First-Year Writing (UWRT)

UWRT 1100. Supplemental Writing for English Language Learners. (3) Prerequisite(s): University Writing Program placement test for students whose primary language is not English. Corequisite(s): WRDS 1104. Limited to students whose primary language is not English who may need additional support while concurrently enrolled in a designated section of WRDS 1104. Does not count toward the English major or toward the General Education requirement.

Women's and Gender Studies (WGST)

WGST 1502. Global Arts/Humanities: Introduction to Gender Studies Around the World. (3) This Global Theme course uses the methods and insights of the arts and humanities to explore the central question of what it means to be a citizen of the world. Through the study of one or more different peoples, societies, or cultures across the globe, students will be able to better understand themselves as part of a complex, interconnected world. Students are introduced to the interdisciplinary field of Gender Studies sustained by the vast production of feminist scholarships and movements from around the world. Pursuing a globally relational approach to issues of justice and equality, students explore foundational theories, research studies, and activism that have generated local and global social change on issues regarding gender oppression and its intersections with other systems of inequality.

WGST 1512. Local Arts/Humanities: Introduction to Gender Studies in the U.S. (3) This Local Theme course uses the methods and insights of the arts and humanities to explore the central question of what it means to be a member of a "local" community. Through the study of the experiences of different peoples, cultures, and communities in our city, our region, or our nation, students will be able to better understand the complexity and diversity of the society in which we live. Students are introduced to the contemporary and foundational questions surrounding gender and its intersections with other structures of inequality, with an emphasis on national and regional examples. Students examine those complex questions of identity and power with an application of theories from a wide range of disciplinary backgrounds. *May not be taken for credit and for a grade if credit has been received for WGST 1101.*

WGST 2050. Topics in Women's Studies. (1 to 3) Credit hours vary with topics. Special topics in Women's Studies. *May be repeated for credit with change of topic.*

WGST 2110. Women and the Media. (3) Cross-listed Course(s): COMM 2110. Examination of messages about women as conveyed in contemporary media (magazines, newspapers, videos, the Internet, video games, television, and movies.) The role of gender in the power structures of the media producers is also analyzed.

WGST 2115. Feminism and Pop Culture. (3) Looks at the way gender and feminist philosophy play a role in the consumption and production of media. Questions are asked: What are the gender politics at work in a given piece of media? What kinds of power structures tend to be portrayed and reinforced in our popular media? Texts are analyzed across a variety of pop culture mediums including video games, television, film, music, and more. These pop culture texts are discussed and analyzed, as well as the power structures involved in the production of these texts, and popular culture through the feminist lenses offered by current feminist scholarship in popular culture studies.

WGST 2120. African American Women. (3) Cross-listed Course(s): AFRS 4120. Explores how cultural, political, historical and economic factors shape African American women's positions and opportunities in society today.

WGST 2123. Women in Cross-Cultural Perspective. (3) Cross-listed Course(s): ANTH 2123. A cross-cultural survey of the lives of women and the dynamics of gender throughout the world. Uses anthropological

research to examine how gender influences evolution, social stratification, work, kinship, and perceptions of the body.

WGST 2130. Masculinity and Manhood. (3) This course examines the construction of masculinity in sports, family, work and other social relationships, showing how it shapes and is shaped by people, institutions and society.

WGST 2140. Gender and Sport. (3) Explores the gendered nature of sports and the impact of feminist theory on the study of sport. Areas of focus include historical developments, media and representation, race and ethnicity, masculinity, sexuality, and physicality and power.

WGST 2150. U.S. Women's History to 1877. (3) Cross-listed Course(s): HIST 2150. A survey of women's experience in the U. S. from colonization through the civil war and reconstruction. Special emphasis on the evolution of women's public roles and the impact of class, race, and region in shaping women's lives.

WGST 2160. Introduction to LGBTQ+ Studies. (3) Provides an overview of historical, sociopolitical, and psychological influences on the development of current day lesbian, gay, queer, and trans social movements and cultures and their social and cultural impact and experiences.

WGST 2170. Gender and Globalization. (3) Cross-listed Course(s): INTL 3121. Examines how globalization interacts with and influences gender roles around the world. Topics include: the effect of globalization on the gendered divisions of power, violence, labor, and resources.

WGST 2251. U.S. Women's History since 1877. (3) Cross-listed Course(s): HIST 2151. A survey of women's experience in the U.S. from reconstruction to the present. Special emphasis on work, family, and feminism, and the impact of class, race, and region in shaping women's lives.

WGST 2252. European Women's and Gender History. (3) Cross-listed Course(s): HIST 2152. An exploration of women's experiences in western Europe and Russia, covering topics of religion, work, family, and politics.

WGST 2310. Gender, Activism, and Leadership. (3) Students select and complete a community activism project focusing on a gender issue. Key issues and controversies of past and present feminist/social movements, and what activists are doing today. While exploring the components of ethical leadership, students learn how to apply classroom theory to the real world around them.

WGST 3019. Hispanic Women Writers in English Translation. (3) Cross-listed Course(s): LTAM 3319 and SPAN 3019. Prerequisite(s): Sophomore, Junior, or Senior standing; WRDS 1103 or WRDS 1104 with a grade of C or above; or permission of instructor. Examination of prose and poetry by women writers from Spain and the Americas to understand women's voices and other cultures. Conducted in English; knowledge of Spanish not required. Not applicable toward Spanish major or minor.

WGST 3050. Topics in Women's Studies. (3) Special topics in Women's Studies. *May be repeated for credit with change of topic.*

WGST 3102. Changing Realities of Women's Lives. (3) Influence of gender, race and class stereotypes on women's identities and choices. Examination of women's individual circumstances through writing.

WGST 3100. Research Methods in Women's and Gender Studies. (3) An overview of qualitative and quantitative research methods. Covers the fundamentals of qualitative research by exploring the epistemological issues that shape qualitative research design, multiple ways of knowing, the relationship between theory and qualitative research methods, as well as the significance of critical methods in the study of marginalized groups and the "other." Matters of subjectivity, positionality, reflexivity, and trustworthiness of qualitative data collection and analysis are addressed. Additionally, the following data collection strategies are discussed: focus groups, interviews, narratives, and ethnographies. Examines the fundamentals of quantitative research, by covering the philosophical tenets and basic assumptions of quantitative research, formulation of research questions and hypothesis testing; data collection, basic descriptive statistics, and issues of reliability and validity. Lastly, addresses: (1) the advantages and disadvantages of both qualitative and quantitative research methods and (2) when it is appropriate to use qualitative versus quantitative, or both. *May be repeated for credit one time.*

WGST 3110. Gender and Communication. (3) Cross-listed Course(s): COMM 3110. Examination of the relationship between language and gender. Topics covered include how language shapes perceptions of men/women; gender differences in verbal and nonverbal communication; and gendered communication in relationships, friendships, and the workplace.

WGST 3112. Women's Diaries and Women's Experience. (3) This course examines why women keep diaries, how diaries provide an understanding of women's experiences, and how diaries may be read as literature.

WGST 3130. Perspectives on Motherhood. (3) Examination of the social, political, and economic conditions surrounding motherhood in the U.S.; explores the history and representations of motherhood, contraceptive/abortion issues, pregnancy and birthing practices, gender-neutral, same-sex, and bi-racial parenting.

WGST 3131. History of Sexuality. (3) An exploration of the origins and evolution of our modern attitudes toward sexuality, sexual orientation, and gendering in societal context. Discussion of sexual and gender identification, relationship and marriage, family planning and policy, prostitution and vice, and expressions or depictions of sexuality. Case studies may draw from multiple cultures through time.

WGST 3140. Domestic Violence. (3) A survey of domestic violence in the US focusing on female experience as both victim and survivor of partner abuse. We will evaluate theories of partner violence, examine types of abuse across diverse female lifespans, and discuss multicultural and gender expectations, treatment, modalities, and social policy implications.

WGST 3150. Body Image. (3) Discussion of body image through varying perspectives: size discrimination, advertising and consumerism, eating disorders, cosmetic surgery, self-image/male gaze, health vs. beauty, etc. All perspectives are examined as they are projected across the intersection of sexism, racism, classism, ageism and sexuality.

WGST 3152. Modern Gay America. (3) Focuses on the emergence of the LGBT community in 20th century American Culture. Interdisciplinary methods and topics examine intersections of science, religion, popular culture, politics, geography, and other factors as they affect LGBT people in their heterogeneity. This course is designed to be an introduction to the study of LGBT culture, and students at all levels are invited to participate in the discussion of where this community has been and where it will go in the 21st century.

WGST 3155. Disney: Gender, Race, and Empire. (3) Focuses on how ideologies of gender, race, class, and sexuality are constructed in early and recent animated films of Walt Disney. By examining the content of these films created within particular historical and cultural contexts, students develop an understanding of the cultural productions, meanings, and intersections of racism, sexism, colonialism, and imperialism. A close analysis of these films also introduces concepts in feminist film theory and criticism.

WGST 3156. From Girl to Goddess: Quests of the Female/Feminine. (3) Explores female protagonists' quests through careful analysis of literature and film through a comparison of the universal mythic structure of the Hero and Heroine journeys and archetypes. Focus is placed on how gender expectations and experiences impact the characters' rites of passages. Themes examined are the quests for identity, personal sacrifice, relationships, and how cultural stories reflect deeper patterns in society.

WGST 3157. Women and Activism. (3) Examines current and historical women's activist movements across the globe. Special focus on methods and strategies for creating change and the social and cultural factors that shape specific activist movements.

WGST 3160. Gender and Education. (3) Explores the relationship between gender and education, primarily in the context of formalized schooling. Topics include: the history of women's education; gender identity and socialization; gender discrimination and biases in curriculum and classroom teaching; gender gaps in academic performance; and the relationship between educational choices and gender.

WGST 3180. Gender in Hip Hop Culture. (3) Examines the roles of gender during the Black Power Movement to the ascendancy of Hip Hop culture in the twenty-first century. Designed to introduce students to the patterns of converging and cross cutting racism, nationalism, and feminism that are vitally important to the hip hop generation.

WGST 3215. Religion and Sexuality. (3) Cross-listed Course(s): RELS 3215. An examination of the role of religious discourses and practices in shaping, understand and evaluating sexual practices, desires and identities. Although the focus of this course may vary, it may only be taken once for credit.

WGST 3217. The Bible and Homosexuality. (3) Cross-listed Course(s): RELS 3217. Considers a wide range of biblical texts that are referenced in political, cultural, and theological arguments concerning homosexuality, lesbian and gay civil rights, and same-sex marriage. Examines how both pro-gay and anti-gay interpreters have engaged biblical texts and invoked biblical authority across time, rather than determining which views are "right" or "wrong."

WGST 3220. Feminist Thought. (3) Prerequisite(s): Permission of instructor. Pre- or Co-requisite(s): WGST 1502 or WGST 1512. Cross-cultural and interdisciplinary survey of the main traditions of feminist theory in the context of their historical and philosophical roots.

WGST 3226. Introduction to the Psychology of Women and Gender. (3) Cross-listed Course(s): PSYC 2126. Prerequisite(s): PSYC 1101 with grade of C or above. Application of research in developmental, experimental, and clinical psychology to issues regarding women and gender. Includes such topics as gender-role development, gender differences in cognitive abilities and performance, psychological perspectives on women's physical and mental health, and violence toward women.

WGST 3230. Gender, Work, and Money. (3) Explores the relationship of American women to money - as workers, consumers, caregivers, etc. Examines the dynamics of wealth, poverty, care-giving, mothering, gendering and occupational segregation on the lives of all women, young and old.

WGST 3231. Working Women/Women in Business. (3) Historical, sociological, legal, personal, and cross-cultural issues affecting working women.

WGST 3310. Gender and Sexuality. (3) An interdisciplinary introduction to gender and sexuality studies. Its primary focus is critical perspectives on the social construction of gender and sexuality, inequalities based on gender and sexuality, activism around issues of gender and sexuality, and how gender and sexuality shape and are shaped by other systems of inequality.

WGST 3803. Independent Study. (3) Prerequisite(s): Permission of instructor and Director of Women's and Gender Studies. Supervised individual study and/or field-based experience in a topic or area of Women's and Gender Studies of particular interest to the student. *May be repeated for credit.*

WGST 3820. Feminist Philosophy. (3) Cross-listed Course(s): PHIL 3262. Views of contemporary feminist and female philosophers on traditional philosophical issues such as ethics, human nature, the construction of knowledge, modes of social and political organization, the relationship between the mind and the body, and the nature of God.

WGST 4050. Topics in Women's Studies. (1 to 3) Special topics in Women's Studies. *May be repeated for credit with change of topic.*

WGST 4130. Girl Studies in America. (3) Explores the modern cultural, social and personal experience of girls in America. The central focus of the course is the social construction of femininity and how it impacts female adolescents. The influence of race/ethnicity, class, and sexuality upon the lives of female adolescents are examined.

WGST 4131. Culture, Pregnancy, and Birth. (3) Cross-listed Course(s): ANTH 4131. Explores how culture shapes the experience and practice of pregnancy and birth. Topics include: the birthing experience, midwifery, infertility, new reproductive technologies, and surrogate motherhood.

WGST 4132. Reproductive Justice Movement. (3) Real reproductive justice for women requires "self-determination, equality, and the respect and support of her society" to help end "the discrimination and inequality

that keep women from controlling their own reproductive lives" (NOW, 2012). This course seeks to expand upon this definition as it assesses the history of reproductive issues in the United States, birth control methods, pregnancy, artificial reproductive technologies (ART), abortion, fertility control, and other related topics. It is about the right not to have children, the right to have children, and the right to raise your children. This course focuses on the intersectionality of gender, race, and class and how these factors combine to limit or inhibit human reproductive and social justice rights.

WGST 4140. African American Feminism. (3) Examines the foundations, ideas, concerns and implications of African American feminism within historical and contemporary United States. Centers on fostering dialogues and critical discussions about African American feminism as a site of theory and practice emphasizing social, political, and personal transformation.

WGST 4143. Black Masculinity, Health, and Society. (3) Cross-listed Course(s): AFRS 4050. Exploration of the meanings of Black manhood and the various constructions of Black masculine identity in America and beyond. Students discuss Black male sexuality, including sexual identity development and theories on sexual orientation development. Critical analysis is also given to masculinity theory and how masculinity influences African American men's health, reproductive health, healthcare use, and relationships with women and LGBTQ individuals in the context of other health behavioral theories. Additionally, an intersectional exploration into how Black masculinity is embodied in race, class, education, gender, pop culture, hip hop culture, sports culture, and prison culture is examined in the context of masculinity dimensions.

WGST 4150. Gender, Science, and Technology. (3) Examines select issues related to women and gender in science and technology. Topics include: the role of women in science, the impact of science and technology on women, and feminist critiques of science and technology.

WGST 4151. Women, Biology, and Health. (3) An understanding of the structure and functions of women's bodies and examines the social, economic, environmental, behavioral, and political factors associated with women's health.

WGST 4153. Virginity: Power, Politics, and Pleasure. (3) Examines female virginity from an interdisciplinary perspective - all challenging and re-theorizing our modern conceptions of virginity. Course texts and discussion explore the history, myths, biology, politics, and personal definitions of female virginity and first-time sex across identities of gender, race, sexual orientation, age, and more. A key question considered by the course: why is the initiation into female heterosexuality defined as a "loss" and what has been the consequence?

WGST 4160. Race, Sexuality, and the Body. (3) Examines how biological, historical, and cultural interpretations of race and gender influenced and characterized definitions of sexuality and body image among persons of color.

WGST 4170. Queer Theory. (3) Introduction to key issues in queer theory, a field of studies that questions and redefines the identity politics of early lesbian and gay studies. Queer theory investigates the socially constructed nature of identity and sexuality and critiques normalizing ways of knowing and being.

WGST 4190. Indigenous Feminisms. (3) Cross-listed Course(s): WGST 5190. Focuses on Indigenous feminist writings that both aim toward a constructive project of maintaining and respecting Indigenous ways of life, and that seek to address the detrimental consequences of U.S. and Canadian settler colonialism. Beginning with a theoretical analysis of key concepts such as settler colonialism, Indigeneity, gender, and institutional racism, these key concepts are then examined in present-day colonial formations located through state-sponsored child and family welfare services, patterns of incarceration, high rates of sexual violence, and the displacement of Indigenous peoples from their traditional lands. Lastly, state-based efforts to address the needs of Indigenous communities, and collective strategies of resistance practiced by Indigenous women are explored.

WGST 4228. French Women Writers in Translation. (3) Prerequisite(s): Junior or Senior standing; and WRDS 1103 or WRDS 1104 with a grade of C or above. Advanced studies of literature and criticism by French women writers in English translation, with a focus on women's issues from a cross-cultural perspective. Course conducted in English. *May be repeated for credit with change of topic.*

WGST 4260. Women: Middle Age and Beyond. (3) Cross-listed Course(s): GRNT 4260 and HLTH 4260. Position of older women in society and the particular problems of and issues for women as they age.

WGST 4401. Internship in Women's Studies. (3) Prerequisite(s): Women's and Gender Studies minor and permission from the Director of Women's and Gender Studies. Research and in-service training in cooperative community organizations, corporations, and units that are based on women's and gender-based leadership and studies. Specific content based on a contract between the student, supervising professor, and community organization.

WGST 4601. Senior Colloquium. (3) Prerequisite(s): 15 credit hours in Women's and Gender Studies or permission of instructor. Critical examination of selected issues.

Writing, Rhetoric, and Digital Studies (WRDS)

WRDS 1103. Writing and Inquiry in Academic Contexts I and II. (3) Prerequisite(s): The WRDS Department uses Directed Self Placement to guide students in their choice of 1103 or 1104. Students will take a guided survey during New Student Orientation about their writing experiences that will determine their placement into WRDS 1103 or 1104. Students write extensively as they explore literacy and writing. They engage critically with the opinions and voices of others while developing an extended inquiry project that integrates materials from varied sources and includes writing in multiple genres. Students write, revise, edit, and reflect on their writing with the support of the teacher and peers. Students also immerse themselves in a conversation about a topic through reading, questioning, and process writing. Students learn to distinguish rhetorical contexts, practice different conventions, and develop positions in relation to research. They also adopt digital technologies to network, compose, and/or critique and disseminate their work. Grades are derived primarily from portfolios that include work

generated throughout the term. *Students who have received credit for WRDS 1104 may not enroll in WRDS 1103.*

WRDS 1104. Writing and Inquiry in Academic Contexts I and II with Studio. (4) Prerequisite(s): The WRDS Department uses Directed Self Placement to guide students in their choice of 1103 or 1104. Students will take a guided survey during New Student Orientation about their writing experiences that will determine their placement into WRDS 1103 or 1104. In this hybrid course, students learn to analyze and compose a variety of texts and use a range of technologies, adapting language and style for particular audiences, contexts, and purposes. They develop flexible composing strategies; locate and evaluate primary and secondary research; and deepen engagement with source material, their own ideas, and the ideas of others in order to strengthen claims and solidify logical arguments. Grades are derived primarily from portfolios that include work generated throughout the term. *Students who have received credit for WRDS 1103 may not enroll in WRDS 1104.*

WRDS 2101. Advanced Writing: Research and Critical Analysis. (3) Prerequisite(s): WRDS 1103 or WRDS 1104 with a grade of C or above. Provides strategies for writing in academic majors, across majors, and beyond graduation into professions and graduate school. Students build on their current knowledge, acquiring advanced research practices; engaging in critical analysis of professional materials in their field; learning to use grammar, mechanics, and textual conventions for appropriate media; and understanding and supporting arguments and claims with credible evidence. The focus is on how to transfer academic writing to students' chosen profession or field.

WRDS 3102. The Effective Sentence: A Writing Course for All Majors. (3) Prerequisite(s): WRDS 1103 or WRDS 1104 with a grade of C or above. Students build their writing flexibility by looking at contemporary and historical writing pexercises, multiple ways to word sentences, and writing that matches readers' needs, not the writer's. Students consider the old-to-new information flow, sentence rhythm and stress, grammar, usage, punctuation, writing, and revising to create a cumulative ePortfolio.

WRDS 3140. Arguing With Images. (3) Prerequisite(s): WRDS 1103 or WRDS 1104 with a grade of C or above. Visual rhetoric and culture teaches students to become proficient and thoughtful users of visual argumentation and to understand how visual rhetoric operates within specific sociocultural and political contexts. Through attention to particular examples of controversies involving images, students learn why and how images matter, and how to leverage the power of images in both an effective and a sensitive way. Assignments require students both to analyze particular controversies involving images, and to create their own images that make controversial arguments.

WRDS 3211. Online Writing: Ethics, Appropriation, and Social Media. (3) Prerequisite(s): WRDS 1103 or WRDS 1104 with a grade of C or above. Focuses on issues of responsibility, ownership, and access. Students research and write multimodal, online content, exploring the ethics and accessibility of texts in technological cultures that both facilitate and prevent access.

WRDS 3215. Information Literacy and Digital Composing. (3) Prerequisite(s): WRDS 1103 or WRDS 1104 with a grade of C or above. Provides highly transferable digital composition and rhetorical skills students can use to compose across many different curricular, academic,

professional, and personal contexts. Students learn methods used to cultivate research from digitally enabled social networks and adapt traditional rhetorical skills to account for digital cultures, accessibility, and portability in an update culture that participates in the critique and composition of online knowledge.

WRDS 3220. Current Theories and Applications of Writing. (3) Prerequisite(s): WRDS 1103 or WRDS 1104 with a grade of C or above. Building on historical approaches in composition and rhetorical theories, this activity-based class engages students in a variety of tasks that help them enact the main principles of the discipline. Learning how theories in writing are processes in the making, students learn to use theories to interrogate writing challenges, adapt theories when new tasks present, and develop flexible approaches to communicating in traditional and emerging contexts.

WRDS 4011. Topics in Writing Technologies. (3) Prerequisite(s): WRDS 1103 or WRDS 1104 with a grade of C or above. Examination of how various technologies (e.g., sound, gesture, movement, video) complement, forward, or replace print formats in digital spaces. Students also see how these same technologies are accounted for in print, learning to adapt from one medium to another to produce the most effective text for an audience and message.

WRDS 4021. Topics in Writing and Reading. (3) Prerequisite(s): WRDS 1103 or WRDS 1104 with a grade of C or above. Focuses on how meaning is constructed through particular mediums. Students learn how various types of "writing" inform, create, and are repurposed within a genre and activity system by examining the multiple representations of an idea, perspective, or representation in order to develop strategies for reading and writing efficiently and effectively within and across complex contexts. Students understand how meaning changes throughout the history and presentation of a genre, and how to effectively read and use those shifts in their own presentations.

WRDS 4201. Composing Across Borders: Transnational Digital Composition. (3) Prerequisite(s): WRDS 1103 or WRDS 1104 with a grade of C or above. Explores composing as cultural and political work with a specific focus on what it means to read, write, and research as a global writer in digital settings. In this reading- and writing-intensive hands-on course, students participate and compose in a variety of digital ecosystems, examining how texts create, construct, and reinforce our identity and language use.

WRDS 4210. Contemporary Rhetorical Theory. (3) Prerequisite(s): WRDS 1103 or WRDS 1104 with a grade of C or above. Familiarizes students with some of the contemporary conversations that highlight current debates and trends in writing studies that draw from and influence how we write in multiple contexts. Readings focus on rhetorical theory from the mid-20th century through the early 21st century, with a focus on the last twenty-five years.

WRDS 4225. Writing Research Methods. (3) Prerequisite(s): WRDS 1103 or WRDS 1104 with a grade of C or above. Explores a broad range of theories and methods for engaging in and reading various aspects of power, organizations, and communication through the lens of qualitative, quantitative, and mixed method writing studies research. Students analyze and apply these methods to any article, research site, or professional setting to answer questions about how people use, create, distribute, and create what stands for evidence-based knowledge.

WRDS 4330. Reading, Writing, and Archiving: Charlotte. (3) Prerequisite(s): WRDS 1103 or WRDS 1104 with a grade of C or above. Researchers who work with the public have a particular need to be comfortable with digital tools. Using the city of Charlotte as its subject, this course offers students a basic grounding in the technological skills needed to conduct online historical research and to present the results online, emphasizing how the Internet changes the relationship between researchers and their audience.

WRDS 4400. Writing, Rhetoric, and Digital Studies Internship Practicum. (3) Prerequisite(s): Junior or Senior standing; Writing, Rhetoric, and Digital Studies major or minor; and 2.0 GPA in all major or minor coursework. Pre- or Corequisite(s): WRDS 4225. Internships are off-campus experiential learning activities designed to provide students with opportunities to make connections between the theory and practice of academic study and the practical application of that study in a professional work environment. Internships are completed under the guidance of an on-site supervisor and a faculty sponsor who, in combination with the student, creates a framework for learning and reflection. This internship asks that students use the range of theories and methods from previous courses to study various aspects of power, organizations, and communication flows. Students work 8-10 hours per week and are assisted in finding placements that extend their learning experience.

WRDS 4402. Research, Theory, and Practice of Tutoring Writing. (3) Cross-listed Course(s): ENGL 4400 and ENGL 5400. Prerequisite(s): WRDS 1103 or WRDS 1104; and interview and permission of WRC Director and/or Assistant Director. A practicum, which educates peer tutors to assist writers in the Writing Resources Center (WRC). All writing consultants are required to complete this course, which provides an introduction to writing center research, theory, and practice. Coursework explores the history, contexts, and research-based principles of writing centers; the social, collaborative nature of learning; strategies of one-with-one writing instruction; threshold concepts in Writing Studies; composition theory; and current issues in writing pedagogy, such as linguistic justice and accessibility. Significant attention is given to practices for supporting multilingual writers. In addition to completing coursework, students tutor in the WRC for three hours per week. Because this course includes a practicum in the WRC, enrollment is by permission only, following a successful interview with the Director and/or Assistant Director of the WRC.

WRDS 4800. Independent Study. (1 to 3) Prerequisite(s): Permission of department. Individual investigations and appropriate exposition of the results. (Unless special permission is granted by the department chair, no more than six hours may apply toward the WRDS major.) *May be repeated for credit with permission of department.*

WRDS 4900. Senior Research Capstone. (3) Prerequisite(s): Junior or Senior standing; Writing, Rhetoric, and Digital Studies major or minor; and 2.0 GPA in all major or minor coursework. Pre- or Corequisite(s): WRDS 4225. Students complete an article-length research paper under the supervision of a member of the faculty (typically the instructor-of-record for the course). The paper must involve quantitative or other methods of writing research. Students propose and research a topic that builds on their previous coursework for the Writing, Rhetoric, and Digital Studies major.

Office of **Undergraduate Education**

Office of Undergraduate Education

uge.charlotte.edu

The Office of Undergraduate Education at UNC Charlotte enriches the academic community by offering a broad range of initiatives promoting student success, ensuring access, and enhancing the educational experience of all students. Broadly speaking, the Office of Undergraduate Education's responsibilities fall in two areas: (1) curriculum and integrated learning, and (2) advising and experiential learning. Through transition programs, learning communities, support for student-athletes, career services, experiential learning, disability services, tutorial programs and other success services, the Office of Undergraduate Education supports students in cultivating life skills critical to successful graduation and global citizenship. In addition, through its faculty development programs, curriculum improvement and innovation initiatives, leadership on advising, and community outreach, the Office of Undergraduate Education engages the University's academic units, faculty, and staff in efforts to enhance and improve both the quality and effectiveness of our academic programs. Working with students and stakeholders to address the needs of a diverse student population, the Office of Undergraduate Education utilizes an integrated student-centered approach that reinforces rigorous academic expectations and encourages student engagement from the time of enrollment through graduation.

The Office of Undergraduate Education consists of the following:

- Advising Systems
- Athletic Academic Center
- Communication Across the Curriculum
- Disability Services
- First Year and Transition Programs
- Ninerways Quality Enhancement Project (QEP)
- Office of Undergraduate Research
- University Advising Center (including Pre-Health Advising)
- University Career Center (including Pre-Law Resources)
- University Center for Academic Excellence
- University College
- University Transfer Center

Advising Systems

advising.charlotte.edu/manage-your-academic-journey/technology-your-journey

The Advising Systems Team works with the campus community in supporting student success by utilizing academic software systems for early alerts, appointments, notifications, notes, and student progression/performance tracking. These systems include CONNECT, Navigate Student, and DegreeWorks. Faculty in 1000- and 2000-level courses report early alerts by the fourth week in the semester using CONNECT. An early alert triggers an email sent to a student's UNC Charlotte email account. This email contains information related to missing assignments, missing classes, or demonstrating low performance. Students are able to make appointments with academic advisors and other academic support services, such as tutoring and academic consultations, to improve performance in their courses. Navigate Student is a mobile app that allows students to be able to keep track of university deadlines, provides tips to success, and links to CONNECT. DegreeWorks, managed by the Office of the Registrar, is the official degree audit system to track progress towards degree completion and has degree planning features.

Athletic Academic Center

charlotte49ers.com/sports/athletic-academic-center

The Charlotte 49ers Athletic Academic Center (AAC) is committed to empowering all Charlotte varsity student-athletes to take ownership of their personal academic experience. The center provides a framework of support services designed to meet the unique needs of student-athletes, assisting them to achieve academic and personal success at the University while ensuring the student athlete's compliance with all National Collegiate Athletic Association (NCAA), Conference and University regulations.

The Athletic Academic Center operates dual centers: the ATAC AAC located in the Miltimore-Wallis Athletics Training and Academic Center adjacent to the Barnhardt Student Activity Center and the Board of Trustees (BOT) AAC is located in the Rose Football Center adjacent to McColl-Richardson Field. The academic facilities have study areas, computer labs, private tutor rooms, and offices.

Communication Across the Curriculum

cxc.charlotte.edu

Communication Across the Curriculum (CxC) supports student success through programs designed to integrate writing and speaking into disciplinary curricula and general education. CxC's vision is that all students have multiple, high-quality opportunities throughout their academic careers to develop their communication skills. CxC staff partner with academic colleges, departments, and individual faculty to facilitate curricular transformations that broaden and deepen student learning and engagement. The following programs are offered on a regular basis by CxC:

Curriculum Consultation

CxC consults with departments in all disciplines to strengthen student learning experiences and content knowledge through communication-enhanced curricula. This comprehensive approach identifies areas of strength and opportunities for growth in the teaching and learning of writing and speaking. On a smaller scale, CxC consults with faculty of all ranks and in all disciplines, in small groups and individually, to assist with specific course and assignment design, as well as pedagogy and teaching practice.

Professional Development

CxC facilitates various professional development opportunities for faculty throughout the year that seek to develop communication across the disciplines, including:

- CxC Webinars
- CTCM 2530 Course Prep
- Communication-Enhanced Teaching Academies
- Workshops (customized to group needs, upon request)

Student Communication Consultants

CxC administers a student peer-mentoring program, providing opportunities for students to work as Communication Consultants with faculty and departments who develop communication-enhanced curricula and teaching practice. The consultant's role when working with students is to act as an engaged reader/listener, providing informed, constructive criticism directed toward the focus, scope, evidence, analysis, organization, clarity, and style of papers and presentations. Consultants also provide faculty with constructive feedback on how students are experiencing communication-enhanced curricula and assignments.

Disability Services

ds.charlotte.edu

The Office of Disability Services is the University office designated to determine reasonable accommodations for students with disabilities. Their mission is to provide access to education and campus life at the University and to support a culturally rich, inclusive, and accessible campus environment. They work with undergraduate, graduate, and continuing education students to help ensure that programs, services, and the campus are accessible in accordance with Section 504 of the Rehabilitation Act of 1973, the Americans with Disability Act, and the ADA Amendments Act. Students who plan to request accommodations must submit documentation of their disability to Disability Services for review. Information about the process for connecting with disability services and appropriate documentation forms can be found online at <https://ds.charlotte.edu/students/how-register-services/>

Once documentation is reviewed and a determination is made, students are notified via their University email regarding next steps. Once eligible for services, students must schedule an appointment with a DS staff member to establish accommodations through the interactive process. Students with documented disabilities may be eligible for a variety of reasonable accommodations and services.

The Disability Services staff recognize there are often differences in services and accommodations between high school and college, and services can even vary from university to university. Students are encouraged to contact Disability Services with questions about eligibility, services, and accommodations at UNC Charlotte.

First-Year & Transition Programs

firstyear.charlotte.edu

Recognizing the importance of the first year in shaping a student's college experience, the First-Year & Transition Programs work across the University to develop and coordinate programs that support new students. These include:

Prospect for Success

The Office of Undergraduate Education coordinates the University's Prospect for Success program. Prospect for Success is a campus-wide academic engagement initiative for all incoming first-year students. Students engage with the Prospect for Success program during their first semester at UNC Charlotte.

Each college at UNC Charlotte has a Prospect for Success curriculum that fits the needs of students in their programs. The Prospect course that all new students take addresses three learning outcomes:

commitment to success, inquiry/critical thinking, and engagement across perspectives. Prospect for Success also provides structured activities that engage students with their advisors, campus resources, and co-curricular opportunities. More information may be found at firstyear.charlotte.edu/prospectforsuccess.

Learning Communities

UNC Charlotte's Learning Communities Program enhances the way students live, learn, and succeed in their academic endeavors. Learning communities help new students transition through academic and social challenges by providing small, supportive learning environments. Students who participate in a learning community interact closely with Charlotte faculty, staff, and peer mentors through areas of common interest, enroll in two or three of the same courses, and -- in many cases -- live together in the same residence hall.

Contact and application information for UNC Charlotte's Learning Communities can be found online at lc.charlotte.edu.

NINERways

The NINERways is a university initiative to boost student success in mathematics and statistics in general education courses required for their majors. The primary aim of NINERways is to enhance the learning experience and support systems in introductory mathematics and statistics courses to ensure that students are well-prepared to excel in their chosen fields of study.

Office of Undergraduate Research

our.charlotte.edu

The Office of Undergraduate Research (OUR) supports UNC Charlotte students, faculty, and staff in their endeavors to expand the quantity and enhance the quality of undergraduate research experiences on campus. We strive to be an office that supports access to opportunities for research training and development while fostering academic and professional growth for students. The goal of OUR is to build community amongst scholars, artists, and researchers at UNC Charlotte.

The mission for the Office of Undergraduate Research at UNC Charlotte is to promote scholarly identities through experiential learning by advancing access to and engagement with mentored research and creative activities as an integral part of the undergraduate curricular and co-curricular programs for Charlotte's diverse student body.

Our vision is to expand research opportunities and promote academic success for undergraduate students through innovation, mentored scholarship, creative expression, and entrepreneurship. This high-impact practice enhances students' ability to construct knowledge and prepares them to become life-long learners and to address future problems as enlightened citizens and leaders.

Key aspects of fulfilling this vision include:

- Creating equitable opportunities for all undergraduates to engage in creative learning and critical inquiry that increases relevant career competencies and curiosity about how they can impact their personal and professional communities.
- Removing financial, social, and/or cultural barriers, so research can become a central feature of the undergraduate experience for all interested students at UNC Charlotte.
- Serving as the primary campus resource for students, faculty, and staff seeking guidance or support related to each of these activities.

OUR provides undergraduate research fellowships and opportunities to communicate research to others through multiple research symposia and funding to attend local, regional, and national conferences to present research. OUR fosters the professional development of mentors and research students through workshops, learning communities, and scholarly discussions.

University Advising Center

ucol.charlotte.edu/advising/academic-advising

The University College Advising Center provides academic advising services to students who are undeclared, exploring, or transitioning between majors.

Academic Advisors in the Advising Center collaborate with all Colleges and Schools on-campus to support students in making decisions regarding major declaration and to ensure smooth transitions to and from majors. The Academic Advisors, in collaboration with many campus partners, work to provide new and creative opportunities for students to explore majors and careers that align with their abilities, interests, and strengths. The University College Advising Center works closely with other services within the Office of Undergraduate Education to ensure consistent and frequent referrals to academic enrichment and support services.

University Career Center

career.charlotte.edu

The University Career Center (UCC) offers comprehensive career services designed to assist undergraduate and graduate students in all stages of career development. Each student has a specific career advisor (based on the student's major and including undeclared majors). Career advisors assist students with exploring majors and careers, gaining experience, conducting job and internship searches, and transitioning after graduation. In addition to individual appointments and group workshops, the UCC hosts career fairs and events throughout the year and provides a host of resources online at career.charlotte.edu. UCC staff collaborate with academic colleges to coordinate experiential learning, and career advisors teach career-related sections of freshman and transfer seminars. The UCC offers the following programs.

Preparation for Professional Schools

An education at UNC Charlotte can prepare students for a number of professional careers. Students who plan to enter a professional school are advised to plan their program of study so that general requirements for their degree are met in addition to the requirements for the professional program being considered. This can begin with a discussion with an academic advisor as soon as a student starts to explore professional schools. Students should become familiar with the requirements of the professional schools of interest. That school, not UNC Charlotte, will determine which UNC Charlotte credits will be accepted.

Professional school entrance requires an extensive commitment and focused career choice. Certain careers require an advanced degree, and the University Career Center (UCC) can help students identify what kind of graduate study will best prepare them for the specific career of interest. In addition, the career resource collection in the UCC contains information on preparing for professional school exams, select fellowships and grants, and in-depth career information. Hire-A-Niner, the UCC's online job and internship database, includes relevant job shadowing, internship, and work opportunities. Résumé critique sessions, application essay reviews, and mock interviews offered by the UCC can be geared toward professional school admissions, based on student need. Professional programs recruit on campus career fairs that happen throughout the academic year.

It is important to note that there are more application requirements for professional programs than for undergraduate programs. Application is often an extensive and in-depth process. The UCC can help students plan the application and career development processes, which includes career exploration through job shadowing, self-assessment, career research, and internships.

Pre-Law Advising

Admission to law school is determined mainly by undergraduate grade point average and the score on the Law School Admissions Test (LSAT). Applicants must also submit letters of recommendation and a recitation of extracurricular activities, and personal statement, but those items are

secondary to the GPA and LSAT. There is no defined program of pre-law courses, and law schools do not favor or require a specific major. Law schools look for students who have taken courses that are academically rigorous, including writing intensive and research-oriented courses.

To learn more about law school, please visit the UNC Charlotte Pre-Law Society website at unccprelaw.com or contact the Department of Criminal Justice and Criminology. For law-related student organizations, please visit the Student Organizations website at studentorgs.charlotte.edu.

Part-Time Employment On/Off-Campus

The UCC's Job Location and Development (JLD) Program assists students in obtaining off-campus jobs including part-time, summer, temporary/seasonal, and full-time (non-degree). Job listings may be viewed online in Hire-A-Niner at hireaniner.charlotte.edu and often include career-related positions in various fields. In addition, all on-campus jobs can be found in Hire-A-Niner (both Federal Work Study eligible and non-Federal Work Study).

Experiential Learning Programs

The majority of UNC Charlotte students are expected to and do participate in University-sanctioned experiential learning programs. Opportunities are available for both undergraduate and graduate students to receive course credit, or other recognition for supervised experiences in public and private agencies within the community, nationally, and internationally. These opportunities are offered through experiential learning programs including over 670 courses involving clinical rotations, cooperative education, internships, and practicums. For full description of related courses, see the Course Descriptions section of this *Catalog*.

Cooperative Education

This career-related professional program is available to students in the College of Computing and Informatics and College of Engineering. Participants must be enrolled full-time in an undergraduate degree program, and have a cumulative GPA of at least 2.5, and complete course requirements specified by their department. Transfer students must complete 12 hours at UNC Charlotte before applying to the program. Co-op students work two to three semesters either part-time or full-time (depending on college requirements) with an employer in a paid work experience. Participants receive transcript notation, not academic credit.

Academic Internships

Some academic departments award students credit for completing

relevant internships. Students are encouraged to check with their academic department for further information and academic eligibility requirements.

University Professional Internship Program

The University Professional Internship Program (UPIP) offers paid on-campus internships to full-time sophomores, juniors, and seniors. Internships are designed to provide professional knowledge and skill development consistent with the student's major/career goals. Students work through their home academic department for approval of academic credit for their internship. UNC Charlotte faculty and administrators serve as mentors to interns, with each internship paying \$12 per hour for 10-15 hours per week during the Fall and Spring semesters.

Office of Pre-Health Advising

Office of Pre-Health Advising

UNC Charlotte offers pre-professional preparation for undergraduate, graduate, and post-baccalaureate students interested in pursuing a career in medicine, dentistry, veterinary medicine, pharmacy, optometry, physician assistant, physical therapy, podiatry, and related healthcare careers. Opportunities and services available to students include:

- Strong academic preparation in the required prerequisite core of science and math courses
- Broad selection of recommended complementary non-science Courses
- Pre-Health Advising for academic and non-academic requirements for professional school admission
- Guidance for all phases of the application process to professional schools
- Guest speakers and pre-health information sessions
- Opportunities to participate in research
- Pre-Health student organizations that offer pre-health events, volunteer opportunities, and peer support

Like most universities, UNC Charlotte does not offer a pre-health major or formal pre-health program. Students must select a major and are responsible for completing the prerequisites for their chosen professional school *in addition to* courses for their major and Bachelor's degree. There is no requirement to major in science, but strong preparation in science and math must be demonstrated, regardless of the major. A Pre-Health Advisor will assist the student with identifying the appropriate pre-professional courses and formulating a timeline for their completion.

Pre-health students are encouraged to consult with a Pre-Health Advisor to plan and review their preprofessional course of study and other requirements necessary for admission into professional schools. Additional information may be found on the Pre-Health Professions website at advising.charlotte.edu/pre-health, including prerequisite course lists for various professions.

For pre-health student organizations, visit studentorgs.charlotte.edu.

Prerequisite Core Courses

The basic minimum requirements for entrance to most health professions schools are as follows:

Subjects	Credit Hours
Biology (with labs)	8
General Chemistry (with labs)	8
Organic Chemistry (with labs)	8
Physics (with labs)	8
English	6

Note: These are the common minimum requirements; additional courses may be required at the discretion of individual professional schools. Most students will need additional coursework and healthcare-related extracurricular activities to be competitive for admission to professional schools. Community service is also highly recommended.

Faculty Evaluation Committee for Pre-Health Professions

The UNC Charlotte Pre-Health Professions Faculty Evaluation Committee serves as the main recommending body for UNC Charlotte students seeking entrance to medical, dental, veterinary, and optometry schools. Students must have competitive academic credentials to qualify for a committee letter. For information on the committee letter process, the student should contact the Pre-Health Advising Office prior to applying to professional schools.

University Center for Academic Excellence

ucae.charlotte.edu

The University Center for Academic Excellence (UCAE) provides academic support services and resources that increase learning effectiveness, enhance student success, and promote academic excellence. All services are free to enrolled UNC Charlotte students. For additional information on any of the programs and services offered by the UCAE, visit ucae.charlotte.edu. The UCAE offers the following programs and services:

Academic Skill Workshops

A wide variety of workshops and presentations are offered each semester on topics that help students achieve academic success. These interactive workshops are led by staff and graduate students on-site and across campus. Topics include: Time Management, Goal Setting, Effective Note Taking, Motivation, the Science of Learning, and more.

Learning Commons

The Learning Commons is a place where students can come to study in a welcoming environment with academic support only a few steps away. They can make use of computers and pay-for-print services, as well as a library of resources.

Peer-Assisted Learning

The Peer-Assisted Learning (PAL) program assists students in historically difficult courses in fields such as biology, chemistry, physics, engineering, mathematics, business, and the social sciences. In weekly scheduled group study sessions, trained peer leaders help students refine the unique skills necessary for succeeding in the target course. Peer leaders plan sessions that focus on collaboration and active learning. Data show that students regularly participating in Peer-Assisted Learning sessions are better prepared and average significantly higher final course grades compared to non-participants. The program has been nationally certified through the College Reading and Learning Association (CRLA).

Academic Consultations

Academic Consultations are one-on-one meetings tailored to the academic needs of the student. They are designed to help students discover more about themselves and develop personalized strategies for comprehensive collegiate success. Assessments of study habits/attitudes can also be administered and interpreted during consultations. Students may sign up for one-time or ongoing appointments to address their academic success goals.

Academic Coaching

The 49er Connect program links UNC Charlotte students to trained academic coaches, called Success Guides, who provide academic support and accountability. Success Guides are there to help their peers strengthen academic skills like goal setting, time management, and note-taking. They meet with students to troubleshoot issues in classes or to navigate campus resources. In addition to regular email check-ins, they provide reminders about University deadlines and share study tips throughout the semester.

Accountability Groups

Accountability Groups capitalize on the productivity strategy known as “body doubling” to offer structured individual work time by facilitating a small group environment that encourages community and collaboration, where peer leaders model effective and transferable academic strategies.

Students Obtaining Success

Students Obtaining Success (SOS) is a peer-mentoring program for students experiencing academic difficulty at UNC Charlotte. SOS is a semester-long program that is individually tailored to help students overcome their unique challenges, improve academic performance, and return to good academic standing. The peer mentoring program is designed to empower students to identify strengths, develop academic and personal strategies to be successful, and connect with appropriate campus resources. Any student experiencing academic difficulty is eligible to register for SOS, though priority is given to students participating in 49er Rebound. Each participant meets weekly with a well-trained undergraduate peer mentor for support and guidance. The SOS program has been nationally certified through the College Reading and Learning Association (CRLA) at Level III, Master Mentor.

Tutorial Services

Serving all UNC Charlotte undergraduate students, the Tutorial Services Program provides free tutoring by appointment and drop-in sessions. Appointments are offered in person and virtually. Students also have the

opportunity to set up recurring, weekly appointments. Tutoring is offered for courses in various subjects including mathematics, science, business, engineering, health and human services, foreign languages and others as needed. Peer tutors emphasize learning skill development and content mastery. UCAE Peer Tutors are selected based on expertise in their area of academic discipline and faculty endorsements. Along with tutor professional development and tutee learning facilitation, Tutorial Services progressively updates its practices and policies as a nationally certified program through the College Reading and Learning Association (CRLA) at Level III.

49er Rebound

49er Rebound is an academic recovery program to assist students who are on academic probation at the end of their first year of enrollment at UNC Charlotte. New freshmen and transfer students from all colleges participate in the program. The UCAE collaborates with all eight colleges, secondary advising centers, and staff members across campus to offer a range of options for participating students. These options include both a credit and a non-credit bearing academic success course, or peer mentoring for more individualized support. 49er Rebound works! Students who complete 49er Rebound have significant GPA improvement and return to good academic standing at higher rates than those who do not complete the program.

University College

ucol.charlotte.edu

The University College serves as the academic home for undeclared students, offering a supportive environment for exploration and decision-making. Designed to assist students in discovering their academic and career interests, the University College provides guidance, resources, and advising to help students make informed decisions about their academic paths. With a focus on holistic development, it serves as a bridge to various academic disciplines, fostering a smooth transition for students as they explore and choose a major that aligns with their passions and goals.

The populations of students that form the University College include undergraduate students who are exploring their options before choosing a major or transitioning between majors. Students within the University College will have several Meta-Major options to choose from. Meta-Majors provide a clear pathway to declaring a major and help make connections between academics and different career tracks. Before students declare a major, they are advised in the University College Advising Center. The Advising Center staff are also able to refer students to a variety of support offices available to assist students.

See the “Degree Requirements and Academic Policies” section of this Catalog for details on the General Education Program at UNC Charlotte.

University Transfer Center

transfercenter.charlotte.edu

The University Transfer Center (UTC) is dedicated to supporting and advocating for students with transfer credit, ensuring their success from pre-enrollment through graduation. Through strong collaboration with campus and external partners, the UTC provides resources, advising, and engagement opportunities designed to empower students, enhance retention, and improve graduation outcomes. Our work primarily focuses on prospective and newly enrolled transfer students seeking to navigate their academic journey effectively.

Advising

The UTC offers advising services to facilitate a smooth transition and successful academic progression. Pre-transfer advising is provided primarily through 49erNext and direct outreach at community colleges, ensuring prospective students have the information they need before transferring. For currently enrolled students with transfer credit, the UTC serves as an advocate, offering guidance on transfer credit articulation and supporting students through the academic petition process. The UTC also fosters advising partnerships by collaborating with community college advisors and maintaining UNC Charlotte's Transfer Guides, helping students align their coursework with program requirements for a seamless transition.

Engagement

Beyond academic support, the UTC fosters engagement and recognition for transfer and post-traditional students through a variety of programs and initiatives. To celebrate transfer student success and connect them with campus resources, the UTC organizes events during Gold Rush and National Transfer Student Week. Additionally, the UTC oversees Tau Sigma, the national honor society for transfer students, and facilitates the Transfer Forty-Niner Intensive Transition (FIT) cohort, which helps new transfer students acclimate to UNC Charlotte. For post-traditional students, the UTC provides targeted outreach and programming, offering spaces where adult learners can connect, build peer networks, and access resources that support their academic and personal growth.

By integrating academic advising with intentional engagement and advocacy, the University Transfer Center ensures that transfer and post-traditional students are empowered to thrive at UNC Charlotte.

Campus Life and Student Resources

Campus Life and Student Resources

charlotte.edu/landing/campus-life

The University of North Carolina at Charlotte provides a comfortable and enjoyable environment for students that is conducive to learning. The services, facilities, and programs of the University promote individual student development and foster a community which promotes the involvement of students in their intellectual, cultural, spiritual, emotional, and physical development.

Students at UNC Charlotte are encouraged to participate in extracurricular activities. Athletics, the Student Government Association, the Campus Activities Board, and Student Media are a few of the available activities that can play a significant role in each student's development and total education. Participation in activities, ranging in type from service and religious to athletic and social, and from creative arts and crafts to wilderness experiences, increases a student's opportunities to acquire leadership skills, to experience the responsibilities involved in functioning within a self-governmental process, and to develop personal talents and interests.

Note: Students are entitled to participate in several student groups and organizations as long as they are academically eligible to continue their enrollment. However, participation in some activities requires students to be in good standing with the University, both academically and in accordance with The Code of Student Responsibility (located in the "University Regulation of Student Conduct" section of the Catalog).

Enrollment Management

enrollment.charlotte.edu

Adult Students Admission Program (ASAP)

Adult students, 24 years of age or older who have been out of school for five or more years and present appropriate educational credentials, are encouraged to make an application through the Office of Undergraduate Admissions. This unique program offers adults the opportunity for special admissions status, an academic advisor through the Office of Adult Students and Extended Services (OASES), and adult transitional support services throughout the first two years of their enrollment. Students who declare a major are advised through their major department.

New Student Orientation (NSO)

New Student Orientation (NSO) occurs during the summer and immediately prior to the fall and spring semesters. Led by a team of dedicated staff and student leaders, NSO prepares students and families to succeed at UNC Charlotte by understanding academic expectations, developing connections with their peers, and learning about important campus processes. Learn more at orientation.charlotte.edu.

Niner Guides

Part of Undergraduate Admissions, Niner Guides are the University's official tour guides. Being a Niner Guide is more than just giving tours, it is sharing your love of the University with prospective students and their families when they visit our beautiful campus. Program benefits include: volunteer experience, priority class registration for active guides who fulfill tour requirements, leadership and personal growth opportunities, and public speaking and communication skills. Learn more at admissions.charlotte.edu/connect/niner-guides.

Office of Adult Students and Extended Services (OASES)

OASES serves as a principal resource for nontraditional and adult students and is committed to supporting and enhancing educational experiences. Services include academic and career advising, an adult student transition course, educational and social programming, and extended morning and evening office hours. Programs include an adult students ambassadors program, the Alpha Sigma Lambda Honor Society, scholarships, and the 49er Finish Program. Visit oases.charlotte.edu for detailed information and office hours.

Athletics and Recreation

charlotte49ers.com

Charlotte 49ers/Athletics

The Charlotte 49ers Department of Athletics provides competition in 18 intercollegiate varsity sports for men and women, with the addition of women's lacrosse coming in 2024-25. Each sport competes under the

governing powers of the National Collegiate Athletic Association (NCAA) at the Division I level, which is the highest competitive level for collegiate varsity sports. Scholarships are available for all varsity sports, male and female.

Male student-athletes compete in nine sports: baseball, basketball, cross-country, football, golf, soccer, tennis, indoor track and field, and outdoor track and field. Female student-athletes compete in nine sports: basketball, cross-country, golf, soccer, softball, tennis, volleyball, indoor track and field, and outdoor track and field.

The Charlotte 49ers are affiliated with Conference USA. Conference USA tournament champions in baseball, men's and women's basketball, golf, men's and women's soccer, softball, men's and women's tennis, and volleyball receive automatic bids to the NCAA post-season tournaments. Bowl bids are available to Conference USA schools in football. Charlotte Athletics joined the American Athletic Conference in all sports in the Fall of 2023.

Facilities

On-campus facilities play host to Charlotte 49ers athletics, with the exception of golf and cross-country. Sites for home competition for the 49ers include:

- McColl-Richardson Field at Jerry Richardson Stadium (football)
- Halton Arena (basketball and volleyball)
- Irwin Belk Center and Transamerica Field (soccer and track and field)
- Halton-Wagner Tennis Complex (tennis)
- Robert and Mariam Hayes Stadium (baseball)
- Jani King Field at Sue M. Daughtridge Stadium at Phillips Complex (softball)

For more information about the Charlotte 49ers, please visit Charlotte49ers.com.

UNC Charlotte students receive **FREE ADMISSION** to all regular-season home athletic contests. For all events, students gain admission with a valid UNC Charlotte student ID.

University Recreation

University Recreation is part of UNC Charlotte's Health and Well-being Unit, along with the Center for Wellness Promotion, Student Health, and the Center for Integrated Care, and the Center for Counseling and Psychological Services. Together, they are committed to fostering the holistic well-being of students by providing collaborative care and support. The campus community is empowered and engaged through services, education, activities, and facilities that promote healthy living.

University Recreation develops and conducts programs and services that provide opportunities for University students, faculty/staff members, and alumni to participate in recreational activities. Intramural Sports are scheduled throughout the year in both tournament and league formats for individuals, pairs, and teams. Sport Clubs provide an opportunity to participate in a single sport on a continuing basis. Over 40 clubs, ranging from equestrian to lacrosse and fencing, are active each semester, and many compete regionally and nationally. There are many ways to get physically active with University Recreation. Fitness opportunities include Group Fitness

classes like Zumba, Cycling, Yoga, and Barre. Strength Training and Conditioning options include free weights and barbells, selectorized equipment, functional training equipment, and endless cardio machines on our multiple fitness floors. Personal Training, small group training, and specialty training are also available at an additional fee. The Aquatics program offers log rolling, open swim, swim lessons, and water safety courses.

Three major Special Events are offered each year: RecFest, the 49er Gold Rush 5K, and the On the Green Golf Tournament. These special events are open to the extended campus community and involve food, games, prizes, entertainment, and competition. In addition to structured sports programs, the department promotes the concept of informal use of recreational facilities through the Open Recreation Program (i.e., pick-up basketball, pickleball and volleyball). University Recreation hires hundreds of students each year for jobs such as sport officials, group fitness instructors, personal trainers, lifeguards, patron services assistants, fitness specialists, student supervisors, office assistants, marketing assistants, and more. For additional information, visit urec.charlotte.edu.

Recreational Facilities

Indoor Facilities

University Recreation Center

The University Recreation Center, also known as UREC, is a five-story, 148,000 square foot space dedicated to student recreation and fitness. The facility features four multipurpose courts for basketball, volleyball, badminton, and pickleball; outdoor basketball, pickleball, and sand volleyball courts; indoor and outdoor leisure pools featuring a vortex loop, 4 lanes for lap swimming (25 yards), and zero depth entry; over 30,000 square feet of dedicated fitness space of cardio and strength training equipment on multiple levels; five multipurpose and group fitness studios including one for cycling; a personal training assessment room; a demo kitchen; an elevated track; an indoor turf area; locker rooms on the 1st and 3rd floor including 4 single use accessible locker/changing rooms; and three outdoor terraces with beautiful views of the campus.

At UREC, the mission is to engage the University community through recreational programs, activities, and facilities, and this facility is designed to do just that, by encouraging patrons to lead a healthy and active lifestyle!

Belk Gymnasium

The Belk Gymnasium serves as the primary auxiliary space for indoor recreation, and features multipurpose courts for basketball, volleyball, and badminton; an indoor swimming pool; two racquetball courts; a group fitness studio; and lockers for students, faculty, and staff. It also houses newly renovated classrooms, a weight room and Athletic Trainer for Sport Club athletes, and an auditorium for meetings and presentations.

Student Activity Center

The James H. Barnhardt Student Activity Center (SAC) is a multi-purpose facility designed to meet the diverse social, cultural, and recreational needs of students at UNC Charlotte. The SAC is home to the Halton Arena, a 9,000 seat venue hosting athletic events, concerts, lectures, and a variety of other University functions.

Retractable seating in the area folds back to reveal an indoor climbing wall and four recreational courts that may be used for Intramural Sports, Sports Clubs, or for special events including job fairs, trade shows, etc. In addition to recreational offerings, the SAC also serves as a meeting place for students and the campus community. The third floor of the SAC consists of a large and gracious hospitality area that can be subdivided into five separate meeting salons. Adjacent to the hospitality area is a campus catering kitchen, serving the special events in the SAC as well as other campus events.

Outdoor Facilities

Northeast Recreational Field Complex (NRFC)

The Northeast Rec Field Complex or NRFC, features over 21-acres of synthetic turf fields for soccer, football and softball with lights for night-time use. NRFC is home to several intramural sports as well as open recreation opportunities, and can be used for sport clubs and special events.

Hayes Recreational Field Complex

Located off Phillips Road above the Wells Fargo Field House, the Hayes Rec Field Complex is home to three Rec Services fields - two are natural grass (Fields 11 and 12) and one and one synthetic turf (Field 13) which consists of Field 13A, restricted field for field hockey use, and Field 13B.. All fields are fenced-in and lighted for night-time use. These fields are the home of many Sport Clubs, but are also available for reservation through CRES (Conferences, Reservations, and Event Services).

C.O.R.E.

The Callisthenic Outdoor Recreation Equipment (C.O.R.E.), is conveniently located adjacent to the on-campus greenway and near Belk Residence Hall. The equipment (i.e., pull up, parallel, and dip bars, ab benches, and more) can diversify your outdoor workout experience on campus. The C.O.R.E. was made possible through a partnership with UREC and the Levine Scholars Program.

Auxiliary Services

aux.charlotte.edu

In support of the University's educational mission, Auxiliary Services provides goods and services to meet the needs of the campus community. These include:

- 49er Mobile ID
- Dining, meal plans, and campus spending accounts
- On-campus bookstore
- Printers and copiers
- Parking and transportation services
- Mail and package services
- Passport services
- ATM stations and vending machines
- Laundry and dry cleaning locker pick-up and drop-off service

49er ID

The 49er Mobile ID is the preferred University identification. Physical cards may be available for students whose circumstances require a physical credential. Every student's 49er Mobile ID contains a photo, name, and a unique student ID number (different from a Social Security number for privacy reasons), and ISO number. The 49er Mobile ID proves that the student is a member of the campus community and entitled to certain services.

A 49er Mobile ID allows access to:

- Campus housing
- Campus activities and programs
- Athletic events and recreational facilities (i.e., Student Activity

- Center, Belk Gym, UREC)
- Computer labs
 - Student Health Center
 - 49er Account funds
 - Optional Dining Account funds
 - Meal plans
 - Library privileges
 - A secondary credential for gated parking deck/lot access

To get a 49er ID, students need:

- A student ID number that begins with 800 or 801 (assigned at acceptance; appears on the acceptance letter)
- To be registered for classes
- To download the Transact eAccounts app
- To upload your ID photo in the Transact eAccounts app
- To add your approved credential to your mobile wallet

Entering students should set up their 49er Mobile ID prior to New Student Orientation.

The 49er Mobile ID can only be used by the student to whom it is issued. Misuse of the identification card will result in disciplinary action. There is a \$20 fee to replace lost/stolen identification cards. For additional details, visit aux.charlotte.edu/49er-card.

49er Account

The 49er Account resides on the UNC Charlotte 49er ID. Students deposit funds to activate the account. The 49er Account may be used at over 100 locations including:

- All campus dining locations including athletic events and campus convenience stores
- All campus retail locations: Barnes & Noble Charlotte, NinerTech, Campus Salon, Union Station and REPROS Copy Center
- Atkins Library (fines)
- Parking and Transportation Services
- Mail & Package Services
- Campus vending machines
- Self-service copiers and pay-for-print printers in the library and labs

The 49er Account spends like cash for products and services all over campus but can't be used for cash advances or purchases off-campus. A 49er Account is safe, secure, and won't incur fees like overdraft charges.

There are three ways to deposit funds onto the 49er account:

- 1) Online through the Transact eAccounts app or online at the 49er Spending Accounts website: charlotte-sp.transactcampus.com/UNCC/AnonymousHome.aspx
- 2) In person: Visit the 49er Card and Meal Plan Office in Popp Martin Student Union
- 3) By mail: Send check or money order to the 49er Card Office, 9201 University City Blvd., Charlotte, NC 28223. Be sure to include the student's UNC Charlotte ID number and make checks payable to UNC Charlotte – 49er Account.

Bookstore

Located in the Student Union, Barnes & Noble Charlotte offers: the Niner Course Pack affordable rental textbook program, new and used textbooks (with online ordering and pre-pack services); general interest and children's books; school supplies; computer software; gifts; and the largest selection of UNC Charlotte apparel, gear and merchandise available. More information is available online at aux.charlotte.edu/bookstore and charlotte.bnccollege.com.

Niner Course Pack

The Niner Course Pack is a textbook rental program that all students are enrolled in each semester unless otherwise notified. Enrollment in the program is automatic, and the cost is \$20 per credit hour per term. Students who wish to opt out of the program must do so before the posted deadline each semester. Students who opt out must purchase or rent their materials from Barnes & Noble Charlotte or another bookstore. More information is available at aux.charlotte.edu/niner-pack.

REPROS Copy Center

UNC Charlotte has a pay-for-print system in most computer labs and in the Atkins Library. A 49er Account is required to pay for print jobs in these areas. The 49er Account may also be used at the REPROS Copy Center for other copying services such as binding, wide-format printing and presentation services. REPROS offers full-service and self-service reprographics, and is located on the lower level of the Prospector building. For details, visit aux.charlotte.edu/copy.

Dining on Campus

UNC Charlotte offers a wide variety of dining options in different locations across campus. From buffet-style dining at Social 704 and SoVi to retail dining at over 20 locations, students find something to suit their taste, budget, and food preferences. A number of flexible meal plans suitable for resident students and commuters are available. For additional details, visit aux.charlotte.edu/dining.

Mail & Package Services

Mail & Package Services is a fully-operational Postal Contract Station, capable of services equivalent to that of a U.S. Post Office. Packages are shipped and received through the United States Postal Service. Mail & Package Services handles and distributes mail for residential students and offers campus mailbox rentals. For additional details, visit aux.charlotte.edu/mail.

Union Station

Union Station in Popp Martin Student Union provides shipping, mailing and U.S. Passport services.

Services offered include:

- Package shipping service (USPS, DHL, FedEx)
- Stamps and shipping supplies

- Money orders
- Campus mailbox rental
- Self-service copier
- Fax services
- Notary Services

Passports

Union Station has also been certified as a Passport Acceptance Facility to process U.S. Passports and submit them for Department of State approval. Passport application requires proper documentation. For details, visit aux.charlotte.edu/mail-package/union-station. Passport photo service is also available.

Parking and Transportation Services

Parking and Transportation Services (PaTS) provides parking management and transportation services for UNC Charlotte students, faculty, staff, and visitors.

Parking Permits

The PaTS office is located in the Facilities Operations/Parking and Transportation Services Building. All campus parking requires the purchase of a University virtual parking permit or payment in visitor areas. Virtual parking permits may be purchased online at pats.charlotte.edu. Permits do not guarantee proximity parking, nor do they reserve a specific parking space in any lot or deck.

Permit Types

- Annual Full-time Commuter (C), on-campus Resident (R), and Faculty/Staff (FS)
- Night permits are valid only after 3 p.m.

A limited number of discount permits are available for commuter students and staff who are willing to park in a remote lot. Discount Lot 27 is a "walking lot" with no bus service within 1/10 mile. Additionally, there are discounted North Deck Only permits or Lot 6A permits available to commuter students. Niner Transit services North Deck and Lot 6A.

Complete permit information including prices, permit types, and where each permit allows you to park; and parking rules and regulations are available online at pats.charlotte.edu. For information on fees for motor vehicle registration and parking, see the section on "Financial Information" in this *Catalog*.

Parking Availability

The Parking Availability tool allows commuters to see parking deck capacity in real time. Save time by using parkingavailability.charlotte.edu to create your parking plan prior to heading to campus.

Niner Transit Bus Service

Buses operate seven days a week, except on observed holidays and when the campus is closed: 6 a.m.-2 a.m. weekdays and 9 a.m.-2 a.m. weekends. Niner Transit operates fare-free bus routes that serve the main areas of campus and provide safe, reliable, and ADA-compliant transportation. For route maps and schedules, visit pats.charlotte.edu.

Passio GO!

Passio GO! is a free app that provides real-time transportation tracking information for campus buses and ADA Paratransit vehicles. The app is compatible with Android and iOS operating systems, phones, or tablets, and is available online at passiogo.com.

Niner Paratransit Service

PaTS offers disability transportation service on weekdays during the fall and spring semesters. Service is limited to those with temporary and permanent mobility impairments. Riders must register for the service through the Office of Disability Services at 704-687-4355. Forms are available on the PaTS website at pats.charlotte.edu/transportation/disability-paratransit and at the Office of Disability Services or the PaTS office. For additional information, contact PaTS at 704-687-5636.

Bike and e-Scooter Rentals

Pedal-assist bikes and e-scooters are available for short-term rental at hub locations all over campus. Additional information about the program is available online at pats.charlotte.edu/transportation/e-scooters-and-bikes.

Bike Lockers

Bike lockers are available to current students, faculty, and staff. They are located in CRI, North, and South Village parking decks, and Lot 27. Lockers are supplied at no charge to students, faculty, and staff who have a valid full-year UNC Charlotte parking permit. Otherwise, lockers may be rented for \$15 a semester or \$40 for the year.

Charlotte Area Transit System (CATS)

The Miscellaneous Transportation Service Charge entitles students to ride on Charlotte Area Transit Systems LYNX light rail, CATS buses, CATS airport sprinter service and STS service (requires individuals to sign up for Special Transportation Service) without having to pay a fare.

To ride the LYNX light rail, students must download the CATS-Pass app and show their All-Access Pass, if requested by a fare inspector. LYNX light rail services the main campus, Center City, Pineville, and many locations in between. Routes and schedules are online at charlottenc.gov/cats/rail/Pages/default.aspx.

For CATS buses, students show their All-Access Pass in the CATS-Pass app upon entering a bus.

Dean of Students Office

dso.charlotte.edu

The Dean of Students Office is a department within the Division of Student Affairs and serves as a key link between students and other areas of campus life. The mission of the Dean of Students Office is to enhance student learning and interpersonal growth by serving as a resource for students and families navigating the Niner Nation journey. Each program unit within the Dean of Students Office has a specific mission, but one common goal: to provide education, outreach, and support that maximizes opportunities to fully participate in and authentically contribute to the University experience. Program areas housed within the Dean of Students Office include: Basic Needs Services; Student Assistance and Support Services; Student Accountability and Conflict Resolution. The Dean of Students Office, along with its programs and services, is the central point of contact when individuals want to get involved, need to resolve a conflict, have questions about policies and procedures, or are trying to identify campus resources and information that will put them on the path to success. Through dedicated, passionate, and knowledgeable staff, the Dean of Students Office provides guidance and advocacy for students, empowers independent thinking and problem solving skills, exposes students to diverse perspectives, encourages personal accountability, and cultivates civility and global citizenship.

The main Dean of Students Office suite is located in King 217. For more information, visit dso.charlotte.edu.

Student Assistance and Support Services (SASS)

Student Assistance and Support Services (SASS) advocates for students experiencing a broad range of issues, concerns, or challenges interfering with a student's ability to be successful academically or personally at UNC Charlotte. SASS can advocate for students who may have missed classes due to medical appointments, personal or family emergencies, military orders or certain court orders, but do not have the authority to grant specific academic accommodations within the classroom setting. SASS can provide verification of these types of absences via an online request form and official supporting documentation. Faculty have full authority to provide academic accommodations and are encouraged to work with students directly. The SASS office also oversees both the partial and full withdrawal with extenuating circumstances processes during the current academic term. These academic options assist students who may need to reduce their course load or take a full break from academic work in a given semester. Extenuating circumstances may include medical or mental health concerns, personal emergencies, or military orders.

Students can seek out support directly in the SASS office or may be referred to the office by faculty, staff, or other community members. Professionals within the office also provide consultation to faculty and staff needing guidance regarding a student issue or concerning student

behavior, and guidance and support to parents and family members seeking help on behalf of their students. To learn more about these services, along with the additional services provided by SASS, visit sass.charlotte.edu.

Basic Needs Services

Basic Needs Services Provides assistance and support to students experiencing basic need insecurities, with specific oversight of the University's Jamil Niner Student Pantry. We also facilitate communication among students and a variety of campus partners (housing, academic officials, financial aid, etc.) to raise awareness of campus and local resources, coordinate access of resources, and provide consultations on supporting students related to basic need insecurity.

Jamil Niner Student Pantry

The Jamil Niner Student Pantry is a food pantry that offers fresh and non-perishable food items as well as personal hygiene items for students experiencing food insecurity at UNC Charlotte. The Pantry is located at 1224 John Kirk Dr. on the edge of campus. Visit ninerpantry.charlotte.edu for more information.

Student Accountability and Conflict Resolution (SACR)

The mission of Student Accountability and Conflict Resolution is to uphold academic and community standards, encourage personal accountability and responsible decision making; promote student learning; and reduce and prevent behavior that undermines student success and community safety. We are committed to providing a fair, impartial, and efficient process facilitated through compassionate conversations in which students are heard, respected, and treated with dignity.

As part of their individual responsibility to the University community, all UNC Charlotte students are expected to be familiar with University Policy 406, the Code of Student Responsibility, and University Policy 407, the Code of Student Academic Integrity. Any person may report an alleged violation(s) of the Code of Student Responsibility or Code of Student Academic Integrity online at incidentreport.charlotte.edu. Individuals may report crimes or incidents involving imminent threat of harm to Police and Public Safety at 704-687-2200. Visit accountability.charlotte.edu for more details.

Environmental Facilities and Services

Botanical Gardens

The UNC Charlotte Botanical Gardens, located on campus, consist of the McMillan Greenhouse, the 7-acre Van Landingham Glen, and the 3-acre Susie Harwood Garden. The mission of the gardens is to inspire a love for plants and nature through programming, classes, and botanical displays. The gardens were begun in 1966 by the late biology professor emeritus, Herbert Hechenbleikner, to serve as a living classroom and have evolved into a multifaceted campus and public resource. Collections include orchids, carnivorous plants, succulents, native plants, tropicals, and native collections including hardy outdoor trees, shrubs, wildflowers, and ferns. The outdoor gardens are open seven days a week during daylight hours, and the greenhouse is open Monday through Friday from 9 a.m. to 4 p.m. Students and the public are invited to visit, free of charge. Visitors can check out a hammock at the greenhouse, or enjoy a picnic lunch at tables near the gazebo. The Gardens also offer classes and events throughout the year, including two annual plant sales in the Spring and Fall, and an annual Valentine's Day orchid sale. The plant sales help to support the operations of the Gardens, where admission is always free. More information can be found online at gardens.charlotte.edu.

Environmental Health and Safety

It is the mission of the Environmental Health and Safety Office to support the University by working with all University community members to provide a safe and healthy working, teaching, learning and living environment. This is accomplished by providing high-quality, responsive, customer-focused environmental health and safety services to the campus community. It is our responsibility to develop environmental health and safety programs, maintain appropriate accident documentation, conduct safety inspections of all facilities and operations, audit safety programs, maintain all regulatory required reports, and generally work to reduce the risks of illness or injury.

All members of the University community share the responsibility to provide and maintain a safe and healthful campus environment and to reduce or eliminate known hazards. Each individual is expected to exercise appropriate care in the conduct of his or her activities to preserve the safety and health of self and others. For more information, please visit safety.charlotte.edu.

Recycling

UNC Charlotte students recycle! Started in 1990 by engaged student representatives, the recycling program has grown from collecting just aluminum cans to more than 40+ items on campus. Recycling stations are available in academic and administrative buildings, outdoor areas, and in all residence halls.

Recycling stations collect the most common recyclable items, including bottles and cans, paper, and cardboard. Weird Recycling Centers are

provided in the Student Union and other locations to collect empty and clean plastic bags, cords/cables, batteries, printer cartridges, eyeglasses, and CDs. Packaging products are collected at Mail Services in Prospector, including cardboard and plastic film (wrap, bags, and air pillows).

An online tool, Waste Wizard, is available to look up any item or material to learn how it can be addressed on campus. It can be found at recycling.charlotte.edu. Waste Wizard also includes items that the university can re-use or compost, and provides clear definitions of what items are trash. Keeping trash out of our recycling is critical for getting those materials back into the Charlotte economy.

UNC Charlotte has events and volunteer opportunities to learn and help with recycling. Look for "Free Store" events at the start of a semester, to pick up office supplies collected for re-use. Resident Move-in and Move-out are major recycling events. Our stadium is a "zero-waste" facility by request of the Student Government Association, and student volunteers are critical to collect and sort materials from the large crowd events. Cleanups and an Adopt-a-Spot program help control litter.

For more information or to get involved, visit recycling.charlotte.edu and follow @uncrcycling on Instagram.

Health and Well-being

Student Health

Student Health provides comprehensive healthcare services to enrolled students at UNC Charlotte. Services include primary medical care, disease prevention, and various specialty services, including allergy injections, immunizations, gynecology, lab and x-ray, and STI screening. Student Health is staffed by a team of physicians, physician assistants, nurse practitioners, psychiatrists, and a registered dietitian. The on-site Pharmacy has over-the-counter items and fills prescriptions. Students can have their prescriptions transferred to the pharmacy to assist with continuity of care.

Student Health functions by appointment; this eliminates long waits and assists students in scheduling medical services around class schedules. Students are expected to be 15 minutes early for appointments.

After-Hours Nurse Triage services are available by phone when it is not open, including nights, weekends, and holidays. There are a number of urgent care centers and a major hospital within a few miles of the University, if medical care is needed when Student Health is closed.

The health fee covers the cost to see a provider and some other services. There are charges for x-ray, pharmacy, laboratory, injections

and special procedures. Payment may be made by credit card or transferred to the student's University account. Student Health files insurance for those students who have the Student Blue Health Insurance plan. Visit our website to explore additional insurance companies with which we are in-network. For more information, visit the Student Health website at studenthealth.charlotte.edu or call 704-687-7400.

Students are required to either provide proof of insurance or purchase a University Student Health Insurance Plan. All students will be charged for the Student Health Insurance Plan; however, students will have this charge removed if they complete the waiver by the deadline. The waiver process can be found under the Insurance tab at studenthealth.charlotte.edu.

North Carolina law requires students to have proof of immunizations. This must be provided to Student Health upon registration. Students whose immunizations records are not complete are subject to being withdrawn from their classes. Please see "Immunization Requirements" in the Admission to the University section of this *Catalog* or visit studenthealth.charlotte.edu under the Immunizations tab.

Center for Wellness Promotion

The Center operates from a public health model and utilizes prevention and health promotion strategies to empower students to make informed decisions about their personal health and well-being. The team of multidisciplinary professionals addresses issues such as alcohol use, drug use, recovery from substance use disorders, and a variety of other wellness topics that affect college students.

This is done through health education workshops and events, campus-wide wellness promotion initiatives, and individual consultations with the team members. The Center also coordinates the Charlotte Recovery Program, which provides clinical services and other support to students in recovery from substance use disorders, as well as services for students who want to change their relationship with substances.

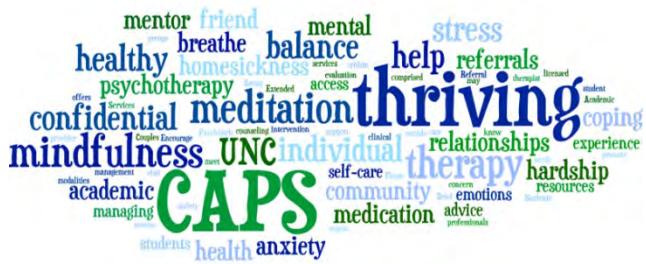

The Center for Wellness Promotion offers a variety of opportunities for students to get involved with wellness promotion initiatives, including undergraduate student employment, graduate assistantships, and internships within the department.

More information about the Center may be found by visiting wellness.charlotte.edu.

Counseling and Psychological Services (CAPS)

Counseling and Psychological Services (CAPS) at UNC Charlotte supports the holistic well-being and academic success of students and contributes to a healthy and inclusive campus climate. This is accomplished by providing short-term individual and group counseling,

crisis management, consultation, referral services, and educational and preventive initiatives for the campus community. In addition, CAPS supports the academic mission of the University by serving as a training site for graduate students and supports scholarly activity and professional development of staff.

CAPS aspires to create an affirming, accessible, and safe environment that celebrates human diversity. CAPS understands diversity, which includes but is not limited to: race, ethnicity, gender identity and expression, sexual identity, sex, age, socio-economic status, religion, ability, nationality, and language.

Counseling provides an opportunity for individuals to improve personal skills, build resiliency in the face of adversity, develop increased confidence, overcome mental health concerns that can hinder personal effectiveness, learn to make better decisions, and acquire a keener awareness and appreciation of their needs and the needs of others. In a personal interaction with a counselor, a student feels supported to validate, explore, and express feelings, examine values and ways of thinking about the world, reflect on and change patterns of behavior, and work toward making healthy changes to meet specific personal and interpersonal goals.

For many students, relationship or other developmental issues are central concerns. Others may be experiencing specific mental health concerns such as depression, anxiety, eating disorders, use of alcohol and other drugs, or difficulties in adjustment. Counselors are available to consult with students about these concerns.

All currently enrolled students are eligible for an initial access appointment. This first appointment is intended to assess the student's needs, and the student and counselor decide how best to meet those needs. Follow-up services may consist of individual or group counseling or psychoeducational workshops at CAPS and/or a referral to an on-campus or off-campus service. Information shared by student clients is confidential in accordance with ethical guidelines and the laws of the state of North Carolina.

Outreach and community engagement services seek to enhance the overall campus climate and promote optimum mental health for our students through stigma reduction, prevention, and psycho-educational programming

Initial access appointments are offered same-day and may be accessed by calling 704-687-0311 or visiting the Christine F. Price Center for Counseling and Psychological Services. More information about CAPS and its services can be obtained by visiting caps.charlotte.edu.

Housing and Residence Life

housing.charlotte.edu

Housing and Residence Life (HRL) offers a variety of housing options including traditional, suite, and apartment style. Living on campus helps you build your foundation for success at UNC Charlotte.

Traditional

Within traditional style housing there are two configurations: singles (one person/one bedroom) and doubles (two person/one bedroom). Each resident is provided a bed (mattress and bed frame), desk and chair, dresser and a closet or wardrobe. Traditional style housing features community bathrooms shared by residents of each floor, as well as community lounges and study rooms. Laundry facilities, a kitchen and vending are also provided in each building.

Suites

Within suite style housing there are five configurations: one person/one bedroom, two person/two bedroom, three person/three bedroom, four person/four bedroom, and four person/two bedroom. Each suite style unit contains bedroom(s), a shared living room and shared bathroom(s). Each resident is provided a bed (mattress and bed frame), desk and chair, dresser and a closet or wardrobe. In most suite shared living rooms, a couch and tv stand is provided (note: shared space furnishings vary by hall).

Apartments

Within apartment style housing there are two configurations: one person/one bedroom and four person/four bedroom. Each apartment style unit contains bedroom(s), a shared living room, a shared kitchen and shared bathroom(s). Each resident is provided a bed (mattress and bed frame), desk and chair, dresser and a closet or wardrobe. In most apartment shared living rooms, a couch and tv stand is provided, in the shared kitchen a full size fridge, microwave, stove/oven and either a small table and chairs or bar stool is provided (note: shared space furnishings vary by hall).

Greek Village

Greek Village comprises 13 houses and is home to UNC Charlotte's sororities. In addition, there are houses reserved for non-greek residents. Each house has a large living/chapter room, dining room, office and full kitchen for common use and sleeps either 28 or 14 residents.

Summer Housing

Students eligible to live in summer housing must be registered for summer classes at UNC Charlotte or enrolled at UNC Charlotte in the spring semester and pre-registered for class in the upcoming fall semester. For information about summer housing, visit housing.charlotte.edu/apply/summer-housing.

Applying For Housing

Living on campus at UNC Charlotte is very popular, and demand is high. To support the success of incoming students, HRL prioritizes applications from entering first time in college (FTIC) students, new transfer and international students, then continuing students as available space allows. In addition, assignments are made according to a combination of factors including availability, date of completed application, roommate requests and building/room preferences. To apply, visit housing.charlotte.edu/apply. A \$100 non-refundable housing application fee is required and does not guarantee a housing assignment.

Accommodations for Students with Disabilities

Housing and Residence Life works in coordination with the Disability Services Office to provide accommodations to any resident with differing abilities or special needs. In order to ensure that all requests are properly handled in accordance with UNC Charlotte's policies and procedures, as well as State and Federal laws, we kindly ask that students contact the Office of Disability Services to submit their requests.

International Programs

oip.charlotte.edu

Office of International Programs

The Office of International Programs (OIP) strives to strengthen international education and global learning at the University as well as in the Charlotte community. On campus, it seeks to make international understanding, intercultural competency and global awareness a fundamental part of the curriculum and an integral part of campus life through innovative and accessible programming. The Office of International Programs serves as a center of leadership and responsibility for the international role and mission of the University. OIP constituent units include OIP Administration (OIPA), the Office of Global Education and Engagement (OGEE), the Office of Education Abroad (EA), the International Student and Scholar Office (ISSO), the English Language Training Institute (ELTI), and the Office of Intercultural and Educational Experiences (OIEE). In addition, OIP is the campus host for the World Affairs Council of Charlotte.

OIP Administration

The Office of International Programs Administration unit (OIPA) includes the Associate Provost, the finance office, and administrative staff. OIPA provides overall leadership and direction for the Office of International Programs and its constituent units; develops, supports, and organizes a wide range of on- and off-campus programming; supports faculty development through various initiatives; guides the development of institutional agreements and ongoing partnerships with foreign universities; and provides leadership and advice to promote campus internationalization efforts.

Office of Global Education and Engagement

The Office of Global Education and Engagement (OGEE) orchestrates academic and co-curricular opportunities to infuse global and intercultural learning for University constituencies and the Charlotte community. OGEE facilitates student development and learning through its campus international and cultural

programming, as well as public service. As such, OGEE implements various internationally focused campus events including, but not limited to International Education Week, International Women's Day, UNC Charlotte International Festival, International Speaker Series, and activities associated with the Mu chapter of the Phi Beta Delta Honor Society for International Scholars.

OGEE offerings promote global learning and engagement. OGEE (1) implements the Global Engagement Scholars Program (GESP), designed to strengthen global competencies and understanding; (2) oversees the Global Gateways on-campus internationally themed living community, offering students the opportunity to live together while participating in intentional cultural learning activities; (3) implements country-culture workshops to enhance the community's global understanding and (4) coordinates the Globally Networked Learning (GNL) program which promotes access to global learning opportunities to all through virtual international collaborative projects in courses that are taught by UNC Charlotte and overseas faculty.

In addition to campus-based programming, OGEE supports OIP's public service work to initiate and respond to the international needs and interests of the University and the Charlotte area-wide community. Current programs include: (1) Great Decisions, an annual series of lectures/discussions on key policy issues; (2) cross-cultural training, custom-designed workshops that focus on appreciation for other cultures and development of skills in effective communications across cultures; and (3) International Festival, a celebration of cultural diversity and "marketplace" style program featuring international foods, music, and dance from more than 50 countries.

Office of Education Abroad

The Office of Education Abroad (EA) is committed to providing quality, accessible global learning opportunities to all students to enhance their studies in an experiential environment abroad. Further, EA supports faculty initiatives to create innovative study abroad, exchange, and virtually connected international programs to enhance learning and student success.

Students are encouraged to consider the benefits of an academic program through study or experiential learning abroad. In addition to University-administered programs, EA has partnerships with program providers facilitating access to additional programs from a worldwide framework of opportunities. Students can select from year-long, semester, summer, or other short-term programs.

In addition, EA provides students the opportunity to implement theoretical knowledge into practice beyond the UNC Charlotte classroom, challenge their assumptions of and learn more about different cultures, and explore their own relationship with the changing global landscape while making progress toward their degree requirements.

International Student and Scholar Office

The International Student and Scholar Office (ISSO) provides support, services, and programs that assist international students visiting scholars and international faculty in achieving their educational, professional and personal goals while fostering an appreciation for a culturally diverse learning environment in the larger University

community.

UNC Charlotte hosts a vibrant international community. About 1,500 non-immigrant international students and more than 100 international scholars and faculty, representing nearly 100 countries around the world, study, teach, and conduct research at UNC Charlotte. The ISSO conducts orientation, cultural programming, and individual advising; provides assistance with navigating complex immigration regulations; maintains institutional compliance; supports and advocates for the international community. International and/or U.S. domestic faculty or staff who wish to learn more about immigration matters or work with international students may attend various workshops offered regularly. The ISSO also supports programs to encourage international and domestic students' interaction, such as the International Coffee Hour, Friendship and Culture Exchange Program, and the Cultural Ambassadors programs.

English Language Training Institute

The English Language Training Institute (ELTI) serves as our University's intensive English language program (IEP) by introducing and refining the English language and cultural adaptation skills that students will need to succeed in their academic careers. Students complete the program well prepared for academic study at UNC Charlotte or other U.S. colleges and universities.

The ELTI offers six levels of English language instruction to participants from a diverse range of countries each semester. In addition to benefitting from 18 hours of instruction each week, students have the opportunity to attend UNC Charlotte academic classes, meet with U.S. conversation partners, and tour area schools and sites of cultural interest. On average, students study with ELTI for two semesters.

ELTI also evaluates new faculty and graduate teaching assistants at UNC Charlotte for whom English is an additional language. An enrichment program is offered each semester for graduate teaching assistants who qualify. The course reinforces communication skills that are vital in the classroom, such as incorporating functional language cues, using accurate vocabulary, and improving pronunciation.

Office of Intercultural and Educational Experiences

The Office of Intercultural and Educational Experience (OIEE) promotes intercultural awareness, education, and professional training by designing and implementing custom on campus short-term programs for both domestic and international partners.

Each program is developed in collaboration with institutional, regional, and overseas partners as well as University faculty to deliver strong, outcome-focused programs. These highly desirable learning

experiences prepare individuals to be successful in an increasingly global society. Program offerings include a wide array of academic and professional development topics, such as education, leadership, marketing, STEM, and language immersion.

Each experience is custom-designed and infused with experiential learning and cultural, social, and recreational events, as well as opportunities for engagement with the Charlotte and University area-wide communities.

World Affairs Council of Charlotte

Founded in 1983, The World Affairs Council of Charlotte (WACC) serves as a community outreach program for the Office of International Programs at UNC Charlotte. By serving as a regional center for education and discussion of world affairs, WACC provides leadership for global thinking, understanding that a broad perspective is necessary for effective competition in the global economy and for responsible citizenship in an increasingly interdependent political world. The WACC hosts internationally renowned speakers to address topics ranging from economics to globalization to foreign policy.

The WACC also serves as a resource for the local school community, providing educational programming and scholarships. Each year, WACC awards nearly \$35,000 through their Council Scholars program, which provides funds to area K-12 educators to support international education initiatives. In addition, WACC has established close ties with the local school districts, providing learning resources to local K-12 student populations. Since 1996, the organization has directly affected over 700 teachers and more than 75,000 students.

Library

library.charlotte.edu

The J. Murrey Atkins Library, the largest academic research library in the Southern Piedmont region and a member of ASERL (the Association of Southeastern Research Libraries), is the center of intellectual life at UNC Charlotte. The Library's mission is to advance the scholarly and creative endeavors of the University and the greater Charlotte community by providing exceptional collections, spaces, services, and technologies. It inspires innovation, supports research, and cultivates scholarship.

Research

In addition to holding over 1.3 million physical items, including almost 13,000 rare books, the Library continuously develops its digital collections and currently provides access to nearly 200,000 electronic journals, 517 databases, and 2.4 million electronic books. Expert subject/liaison librarians offer a variety of research services: course assignment, project, and research paper help; citation management assistance; information literacy classes; support within Canvas courses, and much more. Students get assistance from a subject librarian through live chat, email, phone, in person at the Information and Research Desk on the 1st floor, and one-on-one consultations for deeper, subject-related research guidance. Students and classes

conduct research with rare and archival materials in Special Collections and University Archives on the 10th floor.

Services

Ask Atkins assists students, faculty, and staff at three service desks and via live chat, email, phone, and text. The Information and Research Desk on the 1st floor is the main service point for locating, lending, renewing, and returning library material including laptops, Interlibrary Loan items, and Course Reserves material. Document delivery, book retrieval, and Interlibrary Loan are available to students, faculty, and staff to facilitate access to library collections and research material. Research services include face-to-face and online assistance with all stages of the research process, research instruction sessions and workshops, and data research services. “Atkins kiosks” throughout the building enable users to check out their own library materials, make a study room reservation, and chat with staff. The Office of OneIT maintains its walk-up help desk in Room 140C, while the University Writing Resources Center offers some of its hours in G34. Tutorial Services conducts some tutoring sessions on the ground floor.

Facilities

The Library features study and collaboration spaces for all needs including 50 reservable group study rooms, Graduate and Silent Study rooms, Family Friendly study rooms, and collaborative tables, seating areas, and enclosures throughout the building. The entire building features wireless access, and mobile hotspots can be checked out to use anywhere a wireless connection is needed. Library computers feature a variety of adaptive software supplemented by a dedicated room with assistive technologies next to the Information and Research Desk. Students can check out calculators, chargers, laptops dual monitors, iPads, and cameras. Atkins offers 780 loaner laptops, both PCs and Macs, at the Information and Research Desk. Students can experiment with new technologies (3D printers, cameras, etc.) from the Area 49 Desk, which supports the Visualization Lab, MakerSpace, Gaming Lab, EZ Video Studio, and other specialized spaces on the 2nd floor. A Photogrammetry Lab is located on the 1st Floor near the Information and Research Desk. Other features include device-charging stations and nap pods. Vending machines offer office supplies, coffee/beverages, and other food to supplement the offerings of the Starbucks on the ground floor. Students may bring their own beverages and food. Microwaves are available.

The Charles C. Hight Architecture Library is located on the 2nd Floor of the Storrs building, which houses the College of Arts + Architecture. The Hight Library collection includes: books, audiovisuals, periodicals, graduate thesis documents, drawings, and plans.

For more information and Library hours, visit library.charlotte.edu.

Performing Arts

Within the College of Arts + Architecture, the Departments of Dance, Music, and Theatre serve the educational needs of students and the cultural needs of Charlotte and the University community. It is the mission of these three departments to train students in performing arts-related fields and prepare them for careers across a broad professional landscape. In addition, the departments provide numerous opportunities for non-majors to participate in the performing arts through classes, ensembles, and productions, which are open to non-majors. Together, the three departments present nearly 100 performances each year for the public and campus audiences.

Performance Venues

As UNC Charlotte's primary facility for the arts, **Robinson Hall** is where the weeks and months of planning, programming, and behind-the-scenes work give way to presentation to live audiences. Performance in the College of Arts + Architecture is a form of research, rooted in the history of public presentation, but also projecting forward to suggest new definitions of “concert,” “program,” and “production.” Most importantly, each performance is a shared, communal experience of audience and artists.

Public performances reinforce our role as a resource to the arts community in Charlotte. More than an entertainment venue, Robinson Hall offers a space to challenge preconceptions and to stimulate and amplify community dialogue.

Within Robinson Hall are the **Anne R. Belk Theater** and the **Black Box Theater**. The main stage space, the Anne R. Belk Theater, is a proscenium-style house which seats 340. The theater's orchestra, mezzanine, and box seating offers patrons an environment that is both intimate and elegant. The flexible Black Box Theater space can accommodate 90 to 125 patrons for a unique theatrical experience.

The Rowe Arts building houses the 360-seat **Rowe Recital Hall** and the **White Box Theater**, a classroom and lab theatre space dedicated to the development of student works and projects.

Productions

The Departments of Dance, Music, and Theatre are the headliners at Robinson Hall, and the primary use of the performance spaces is to support the education of our students in the processes of performing arts production. In the weeks before a performance, the theater space

becomes a laboratory as students hang lights, construct sets, work sound and rehearse, learning how to carry out the remarkable technical operations necessary to stage and produce a show.

For upcoming events, visit coaa.charlotte.edu/calendar.

Police and Public Safety

The UNC Charlotte Police Department proactively patrols and responds to calls from the University community 24 hours a day, 365 days a year. The Department is comprised of over 40 sworn police officers who have successfully completed all of the trainings and certifications required to serve as law enforcement officers in North Carolina. Patrols are conducted in marked and unmarked cars, bicycles, off-road vehicles, and on foot. Non-sworn personnel known as "Rangers" serve as extra sets of eyes and ears by patrolling and/or securing buildings and parking lots. Security personnel from the Housing and Residence Life, Atkins Library, and Halton Arena/Student Activities Center provide additional layers of safety and often work in concert with the Department.

The Department's Administrative Office is located in the Facilities Management/Police & Public Safety Building located at 9151 Cameron Boulevard across the street from Student Health. This building contains the Department's 911 Emergency Telecommunication Center which is staffed 24 hours a day that can be reached by dialing 911 from any landline on campus or 704-687-2200 from a cellular phone. Individuals in need of emergency assistance or who simply need police assistance for a non-emergency situation are strongly encouraged to call this number. Individuals who need to pick up a copy of a police report or who are searching for Lost & Found items may stop by the 1st floor lobby of this building or call the Administrative Assistant at 704-687-8300 during normal business hours.

The Department's website contains a wide variety of information pertaining to what the Department is doing to provide for a safe and secure environment on campus and how the Department is increasing its responsiveness to the needs of the campus community. Some of the items on this website include the Department's Annual Security Report,

information on how individuals can reduce their chances of becoming the victim of a crime, and links to other community resources that assist the Department in protecting the campus community. The website also features information about the University's nearly 300 emergency blue light phones and how individuals can sign up to receive emergency text messages. Finally, the website allows individuals to confidentially report a crime on campus or file a commendation/complaint about a particular member of the Department. For more information about any of the aforementioned items, please visit police.charlotte.edu.

Strategic and Success Initiatives

ssi.charlotte.edu

Transition & Success Initiatives

Transition & Success Initiatives assists students and families in successfully transitioning to UNC Charlotte. Our team is committed to providing engaging and meaningful experiences for new and continuing students from their first year and beyond. Additionally, we work to keep families and student supporters informed to provide the best support system possible to their students. All of our programs offer opportunities for current students to grow in their leadership and assist us in achieving these goals.

Gold Rush

Gold Rush is the official welcome week program taking place in August and January each year. Welcoming both new and returning students to campus, Gold Rush is a University-wide effort to assist students in successfully transitioning to campus each year. Gold Rush aims to instill a sense of Niner Pride, teach campus traditions, and expose students to campus resources and opportunities for involvement. A full schedule of Gold Rush activities is available online at tsi.charlotte.edu.

First 49

First 49 is the place to find any and all ways to get involved and connected in your First 49 days of the Fall semester. First 49 is for all Niners, new, returning, and transfer. You name it. We have a way for you to find your spaces and places here at Charlotte.

Visit yearone.charlotte.edu/first49 to learn more about the First 49 days program at UNC Charlotte

I Am A First-Gen Niner

I Am A First-Gen Niner is a collaborative initiative to assist First-Generation Niners on campus to feel **proud** of their First-Gen Identity and celebrate them as they pass milestones in their experience as a First-Generation Niner. What's a First-Generation Niner? A First-Generation Niner is a student who is the first in their immediate family to receive a degree from a four-year institution, this means neither their parents nor their guardians received a degree from a four-year institution. Visit iamfirst.charlotte.edu to learn more.

Niner Nation Family

Niner Nation Family is intended to engage UNC Charlotte parents, family members, and student supporters through quality services and programs. These services and programs facilitate positive relationship-building, enhance communication between families and the University, and create a positive and collaborative environment. Our team believes that when families and supporters are informed and engaged, students benefit. Each of our programs and services strives to keep families and supports up-to-date on Niner Nation and connected to our community. Various levels of involvement are available to all parents, family members, and supporters of current students. Join us by visiting tsi.charlotte.edu.

Niner Finances

Niner Finances provides UNC Charlotte with the knowledge and skills necessary to make informed and sound financial decisions. Niner Finances understands and embraces the fact that knowledge and skills alone do not guarantee financial well-being or security. Our team takes on an individualized approach to working with people to understand their emotions, attitudes, motivations, and lived experiences pertaining to their personal finances. By providing education, resources, coaching, and services that align knowledge with personal orientation, Niner Finances helps to ensure long-term financial security of the individuals we serve. Visit online at ninerfinances.charlotte.edu.

Military and Veteran Services

Military and Veteran Services coordinates support services for military veteran and dependent students such as assistance with University administrative support, veteran-friendly employment, peer mentoring, and veteran service organizations. In addition, the Military and Veteran Services Office is responsible for administering and certifying veterans benefits through the Veterans Administration Office. The Military and Veteran Services Office also plans events on campus in honor of our nation's servicemen, servicewomen, and their dependents and families. Visit online at veterans.charlotte.edu.

Student Engagement

Student Engagement is committed to creating community throughout campus for all students and enhancing skills and competency development.

University Honors & Awards

University Honors & Awards is a recognition program for undergraduate and graduate students that celebrates students who made outstanding contributions to Charlotte throughout the year. Information and applications are available at:
<https://studentaffairs.charlotte.edu/about-us/honors-awards>

TEDx UNC Charlotte

TEDxUNCCharlotte is the university's licensed TEDx event that showcases live talks from University students, faculty, staff, alumni, and Charlotte community members. Talks are delivered on stage in the spring semester and recorded and uploaded to the TEDx YouTube channel. Visit <https://tedx.charlotte.edu/> for more information.

Popp Martin Student Union

The Popp Martin Student Union serves students, faculty, staff, alumni, and visitors providing services and conveniences that members of the college community need in their daily lives and creates an environment for getting to know and understand others through formal and informal community building and programs.

It was renamed the Karen A. Popp and Demond T. Martin Student Union in 2016 to honor the dedication and service of two extraordinary alumni, Karen Popp ('80) and Demond Martin ('97).

The Popp Martin Student Union:

- Serves as an integral part of the educational mission of the university by complementing the academic experience through an extensive array of programs, student employment, and leadership development opportunities
- Is a student-centered organization that values participatory decision-making through the Student Union Advisory Board
- Provides students with meaningful employment opportunities and substantial roles in the decision-making process that affect facilities, services, policies, and programs
- Provides meeting, gathering, office, community, event, and study space
- Supports a diversified array of programming that reflects the needs of the campus community in order to enhance educational, cultural, and developmental social interaction
- Provides a welcoming environment that is the center of campus life, due to its location, programming, and general accessibility to all members of the UNC Charlotte community

- Serves as a unifying force that honors each individual and values diversity

Visit studentunion.charlotte.edu for more information.

NinerTech

The NinerTech computer store is located inside the Popp Martin Student Union. NinerTech exists to support the student experience and the campus community in their computer and technology needs. Students may stop by NinerTech to purchase a computer, iPad, accessories, and more. NinerTech also features certified repair service for Apple and Dell devices. Visit nинertech.charlotte.edu for more information.

Cone University Center

The Bonnie E. Cone University Center was established in 1963 to provide a university center on campus to support student life. Today, it houses many student involvement opportunities, dining services, and event spaces, plus an outdoor patio. You'll find Office of Fraternity and Sorority Life, the Office of Student Assistance and Support Services (SASS), and the Peace Haven Meditation and Reflection Space. Services include Conference Services (CRES), Niner Central, and the Main Street Market dining area. The building is alive with programs and activities in event spaces including After Hours, McKnight Hall, and the Lucas Room, as well as various meeting rooms.

The Cone University Center enriches and supports the University community by:

- Contributing to the overall development of students through informal interaction, organizational participation, leadership development, and the planning for, implementation of, and participation in diverse programs
- Providing services, training, and facilities that support University programs and participation
- Providing students with meaningful employment opportunities and substantial roles in the decision-making processes that affect facilities, services, policies and programs
- Developing and administering policies and procedures that enhance campus life while ensuring an environment that is safe and secure
- Ensuring that the University community is informed of programs, resources, facilities and services

Campus Activities Board

The Campus Activities Board (CAB) is the largest student programming organization on campus and is responsible for planning diverse, quality events for the University community.

CAB offers multiple programs a week and works to enhance and unify the University community by planning social, cultural, educational, and recreational events that complement the University's academic mission.

CAB is located on the second floor of the Student Union. For more information, visit cab.charlotte.edu. Opportunities for student

involvement include the following committees:

CAB Live

As the name implies, this committee is all about live entertainment ranging from comedy, live music, variety acts, poetry slams, showcases, and other entertainment trends. This committee works hard to bring a wide-variety of diverse acts to campus.

T.A.X.I. (Talents, Activities, eXcursions and Interests)

With this committee, anything goes! From talent shows and open mics to trips to Charlotte sporting events, this committee focuses on student talents and interests through programs and trips to explore Charlotte and other destinations.

Daytime Niners

This committee is all about events for Niners throughout the day (8 a.m. - 5 p.m.). Daytime events consist of interactive activities, musical performances, games, or workshops.

Special Events

This committee is all about one-time, large-scale events. These events are designed to draw large crowds. Special Events encompass Gold Rush (Week of Welcome) events, Homecoming events, speakers, major comedy shows, concerts, and more.

Marketing

This committee is in charge of getting CAB's name and events recognized on campus. From strategic branding to co-sponsorships to individual event advertising; from print to social media, Marketing and their Event Staff Street Team help make sure that UNC Charlotte students know about CAB.

Student Niner Media Advising & Support

Student Niner Media Advising & Support provides guidance to students in several areas of media. Student organizations housed in this department serve the campus community with forums for free exchange of ideas and dissemination of news and information. Students can gain competency in career development in a unique co-curricular setting. From writing to reporting to marketing and podcasting, Student Niner Media Advising & Support offers UNC Charlotte students a unique experience in the fast-paced world of media.

Student Media Board

The Student Niner Media Board is the governing body for Student Niner Media and is comprised of student representatives. Media Board is responsible for approving policies, governing documents, electing department heads, and approving the annual budget.

Niner Times

Niner Times is UNC Charlotte's bi-weekly student newspaper published on Tuesdays. It features news, entertainment, sports, and more. The students also maintain [Ninertimes.com](http://ninertimes.com) which features breaking news and exclusive content. The Niner Times also produces *Charlotte Current* multimedia, which features podcasts and video. The Niner Times, ninertimes.com, and *Charlotte Current* provide journalism experience to more than 140 students.

Media Marketing

The media marketing department at Student Niner Media is responsible

for advertising, circulation, and promotions. Students can work in areas including layout, design, sales, and promotions. Media Marketing offers real world experience for business, marketing, and communication careers.

Nova

Nova is the nationally recognized literary-arts magazine published by students interested in the arts. Artists from around the world submit poems, short stories, visual art, and film to be included in the publication. The magazine is published in April. Visit Nova online at novacharlotte.com.

Midas Magazine

Midas Magazine is Student Niner Media's newest publication, which was started in December 2020. The cultural and entertainment magazine is published once a semester, in December and April, and offers a wide variety of content. Students can learn skills in writing, editing, graphic design, or photography when working with *Midas*. Visit Midas at midasmagazine.com.

Internships

Niner Media interns can earn academic credit and receive "hands-on" media experience in writing, design, photography, advertising, desktop publishing, and management. Internships are offered in collaboration with the Department of Communication Studies.

For more information about how to get involved with Student Niner Media, contact the office or visit media.charlotte.edu. Offices are located in the lower level of the Popp Martin Student Union.

Leadership & Community Engagement

Leadership and Community Engagement provides students with opportunities to develop and strengthen leadership skills and understanding while providing the University and student organizations with more effective leadership. Programs consist of group and self-paced leadership workshops, retreats, and conferences, as well as academic courses. Individual and group consultation is also available. Opportunities for service include Alternative Service Breaks, and a variety of monthly service projects in the greater Charlotte area coordinated by the SERVE team.

Academic Certificate in Leadership Studies

An 18-credit hour concentration in interdisciplinary leadership studies is offered, leading to the Undergraduate Certificate in Leadership Studies awarded at graduation from UNC Charlotte.

Alternative Service Breaks

Alternative Service Breaks (ASB) are unique volunteer experiences during which students forgo their traditional spring and/or fall break activities and engage in direct service in a community outside of their own.

Emerging Leaders

The Emerging Leaders program provides a cohort leadership experience for freshmen (applications are available early Fall semester). Participants attend weekly workshops, an overnight retreat, and are guided by a peer mentor.

Executive Leadership Program

The Executive Leadership program, open to students with Senior standing, focuses on the transition from undergraduate leadership to leadership as a new professional.

Individual and Group Consultation

Assistance with applications, interviewing, leadership issues and programmatic needs are available.

LEAD Team

Students in the LEAD team are trained and available to make presentations on a wide variety of leadership topics.

LeaderShape Institute

The Institute is a leadership program for established leaders with a focus on vision and leading with integrity.

Leadership Fellows

Leadership Fellows is a Fall semester cohort leadership experience for students in sophomore, junior, and non-graduating senior standing (applications are available in the spring semester).

Leadership Journey Learning Community

A one-year residential program is offered to first-year students who have an interest in developing or building leadership skills and abilities.

Leadership, Communication, and Group Dynamics

A 3-credit hour leadership theory course (COMM 3135) is taught on leadership, communication, and group dynamics.

Leadership, Service and Ethics

A 3-credit hour course in communication studies (COMM 3136) is offered for students interested in developing a leadership framework and obtaining academic credit.

PILOT (Programs In Leadership and Organizational Training)

PILOT is an individualized leadership program that provides an opportunity for leadership certification through this self-paced program.

SERVE TEAM

SERVE TEAM creates community service opportunities through connections with local non-profit agencies as well as campus based service and volunteer opportunities.

Women's Leadership Development Program

This cohort-based women's leadership conversation series is a Spring semester offering for students who are currently or have recently served

as leaders. It provides the opportunity for interaction with and learning from women who are leaders in our community. Applications are available late Fall semester. Visit leadership.charlotte.edu for more information.

Fraternity and Sorority Life

Fraternity and Sorority Life at UNC Charlotte consists of over 40 fraternities and sororities founded upon the principles of scholarship, leadership, community service, and the formation of lifelong friendships through brotherhood/sisterhood. Fraternities and sororities uphold these fundamental values in their pursuit of collegiate excellence, enabling all members to achieve their personal best. Fraternity and Sorority Life provides students with an opportunity to be a part of a large group with many diverse characteristics while sharing a common goal. The fraternities and sororities work together to provide a quality experience for anyone who joins via service projects, educational programs, and social activities. The experience the student gains from organizing and motivating people, planning and implementing projects and learning to give back what one has received can be an invaluable part of a college education. Membership recruitment for a fraternity or sorority primarily begins with each new semester. However, some organizations hold recruitment meetings throughout the year. Some of the many programs within Fraternity and Sorority Life include: the Harm Reduction Symposium, Greek Weekend, Airband, Annual Stroll Competition, and New Member Convocation. Visit online at greeklife.charlotte.edu.

Venture Outdoor Leadership

Venture offers a variety of outdoor adventure and experiential learning trips, programs and workshops. Activities include trips lasting from 1-21 days in a variety of outdoor endeavors from backpacking to rock climbing to kayaking (to name only a few). Venture also hosts and facilitates many programs on its on-campus Team Challenge Course, High Team Challenge Course, and indoor climbing wall. Venture programs are modeled on the Outward Bound philosophy and are designed to facilitate individual growth through physical challenge, group interaction, and personal reflection - all while having fun. Students involved in VOLTAGE (Venture Outdoor Leadership Training and Group Experience) have the opportunity to be trained as student leaders on Venture's trips and programs. Venture also operates Venture Bound, an opportunity for students to connect with the University and other students in meaningful ways prior to their first semester.

Venture offers courses for academic credit through the Department of Applied Physiology, Health, and Clinical Sciences. Each semester, a variety of one-, two-, and three-credit hour outdoor activity courses are offered, including courses such as: Introduction to Outdoor Adventures, Rock Climbing, Challenge Course Activities, Rock Site Management, Wilderness Experience, Wilderness Trip Leading, and Challenge Course

Facilitation. Students may combine specific courses to complete a Minor in Outdoor Adventure Leadership. For additional details, see the Department of Applied Physiology, Health, and Clinical Sciences section of this *Catalog* and visit venture.charlotte.edu/academics.

For more information about Venture, please visit venture.charlotte.edu.

Student Government Association

The Student Government Association (SGA) advocates for the issues, needs, and interests of the student body. Many students want to make their campus a better place while they are here and also find their work in student government a useful background for later public service. The leaders of student government are committed to representing the student body and to developing students' awareness of the many facets of campus life, working with the University's administration in advancing the needs and interests of students. All enrolled students, both full- and part-time, are eligible to participate in student government. Visit online at sga.charlotte.edu.

The Student Government Association is comprised of:

Executive Branch

The Executive Branch is comprised of the Student Body President, Student Body Vice President, Chief of Staff, Class Presidents, and nominated officers. This branch's main roles are to carry out the President's platform goals, discuss and propose policies for the betterment of the Student Government Association, and prioritize students' interests. The Student Body President serves as a member of the UNC Charlotte Board of Trustees.

Senate

The Student Senate is responsible for promoting the overall well-being of the Student Body through advocating for the interests of students through engaging with University administrators, legislation supporting

student needs, and communicating with the student body. The Senate convenes in the General Assembly every Thursday when classes are in session.

Judicial Branch

The Judicial Branch is composed of student panel members led by the Chief Justice. The branch includes the Chief Justice, Lt. Chief Justice, and 5 other student justices. They are responsible for investigating and reviewing violations of the Student Body Constitution, and the Student Government Bylaws, and reviewing constitutionality of Legislative Branch and Executive Branch actions.

Student Involvement

Student Involvement supports students' engagement with campus through organizations and special events. UNC Charlotte has over 400 student organizations that enhance the academic experience of UNC Charlotte students and provide opportunities to get involved. The categories of student organizations include: academic (pre-professional), fraternities and sororities, graduate organizations, honor societies, interest, performance, service, political, religious, multicultural, international, sport clubs, and media/publication. There are many benefits to joining a student organization, including making new friends, developing new skills and abilities, working collaboratively as part of a team, learning to set and achieve goals, leadership opportunities, as well as having fun. Students may also start a new student organization if there is not one already on campus that matches their interests. Contact Student Involvement with questions about resources available and how to get connected. Contact information and a current listing of all registered student organizations is available online at studentorgs.charlotte.edu.

Student Involvement also hosts special events such as Homecoming, Haunted Union, Light Up the Lake, and Late Night Breakfast that build spirit and tradition for the Niner Nation.

Sustainability

sustainability.charlotte.edu

The Office of Sustainability works with faculty, staff and students to measure progress, propose solutions, initiate changes, develop skills, and share experiences that contribute to environmental, social and financial dimensions of sustainability.

The Office of Sustainability works to:

- Lead initiatives in zero waste, responsible purchasing, and becoming a carbon-neutral campus by 2050
- Partner on events to raise awareness of campus and community

issues, programs and solutions, including Campus Sustainability Month in Fall and Earth Month in Spring

- Support students, student organizations, and departments that propose projects to the Charlotte Green Initiative at cgi.charlotte.edu
- Help faculty address sustainability topics in courses, through workshops, presentations, tours and initiatives to use campus as a learning lab
- Coordinate research on campus operations that lead to lower environmental impacts, improved social outcomes, and reduced costs
- Measure and report our progress on sustainability goals
- Support staff awareness and performance through programs including Sustainability Ambassadors and Green Workplace

To learn more about the history, priorities, progress, resources, and opportunities on campus, visit sustainability.charlotte.edu.

Technology

[OneIT.charlotte.edu](http://oneit.charlotte.edu)

The Office of OneIT provides the University with IT services and manages campus technologies that support teaching, learning, research, and business processes.

Services include:

- Providing IT help at your fingertips: Visit help.charlotte.edu or call 704-687-5500
- Connecting Niners to University software and beyond at software.charlotte.edu
- Administering secure "eduroam" Wi-Fi for all educational buildings and common campus areas
- Maintaining the University's extensive FAQ library at faq.charlotte.edu
- Suggesting hardware recommendations for the University laptop requirement at oneit.charlotte.edu/laptop
- Managing University computers, operating systems, software, voice and data networks and centralized servers
- Overseeing core administrative systems such as Gmail, Banner, Canvas, and My UNC Charlotte
- Supporting the University's web presence

For a complete list of available IT resources, current IT news, or more about the Office of OneIT, visit oneit.charlotte.edu.

University Advancement

advancement.charlotte.edu

The Division of University Advancement at UNC Charlotte manages the campus' external environment by leading the University's communications' strategies and by building strong, progressive relationships between the University and its alumni, students, faculty and staff, donors, friends, corporate partners and elected officials to help advance UNC Charlotte's strategic initiatives.

The departments within University Advancement include Advancement Operations, Alumni Affairs, Community Relations, Constituent Relations, University Communications, University Development, and University Events.

Advancement Operations

University Advancement Operations provides infrastructure, information, and services to support the University's fundraising and engagement activities; to ensure the responsible and ethical management of our alumni and donor database and gift systems; to execute purposeful programs and services to alumni, students, parents, and friends; and to maintain all administrative functions of the Division of University Advancement.

Alumni Affairs

Alumni Affairs develops, coordinates and promotes programs and events for UNC Charlotte alumni, 150,000 strong; including alumni groups and regional networks, award programs, Homecoming and AlumNiner Weekend. Alumni Affairs staff also manages two event venues on campus – the Harris Alumni Center at Johnson Glen and the Hauser Alumni Pavilion, the site of pre-game alumni tailgates.

The UNC Charlotte Alumni Association works to promote a close relationship between alumni and the University by fostering a spirit of loyalty and fraternity among UNC Charlotte graduates, former students, and friends, and by encouraging alumni to become personally involved

in and financially support University activities. The Board of Directors of the Alumni Association is comprised of alumni who represent the general body of alumni and at least one of each of the seven academic colleges of the University and the graduate school, so much as possible.

Community Relations

Community Relations works to strengthen the connection between UNC Charlotte and the greater Charlotte community through intentional and meaningful partnerships with key cultural, educational, social and civic organizations. This is accomplished through targeted outreach initiatives and projects that encourage faculty and staff to use their time and talents in support of the greater Charlotte community. The Community Relations team also coordinates the Community Engagement Orientation for new faculty and senior staff, as well as various community panels.

Constituent Relations

Constituent Relations fosters, supports, and advances UNC Charlotte's relationships with state, regional, and local government officials and agencies, as well as with the business and corporate community, strengthening the University in its mission to deliver on its promise as the region's premier urban research university. From welcoming government representatives to campus to providing information and access, Constituent Relations forges the link between UNC Charlotte and our public representatives.

Additionally, the unit is responsible for enhancing and promoting a strong, effective relationship with the UNC Board of Governors, as well as with business advocates including the Charlotte Regional Business Alliance. Constituent Relations has co-led transformational, interdisciplinary efforts, including the implementation of light rail onto campus, and engagement with the 2012 and 2020 presidential nominating conventions, ensuring unique, informative opportunities for our students, faculty, staff, and community.

University Communications

The mission of University Communications is to elevate the brand reputation of the University by shaping the UNC Charlotte story through strategic communications to internal and external stakeholders. The University Communications team is composed of media relations and reputation management, creative services, internal and operational communications, editorial services, marketing, broadcast and digital media, social media, and web/email communications. The team works with a network of college communicators in the divisions and colleges to provide strategic communications support and guidance to further the Institution's mission.

University Development

The Office of University Development -- composed of major gifts, leadership gifts, annual giving, and planned giving -- builds philanthropic relationships that engage UNC Charlotte alumni, donors, students, faculty, staff, and friends in supporting the University's mission. Thanks to the generosity of UNC Charlotte's donors, University Development campaigns, including #NinerNationGives and the largest in University history - Exponential: The Campaign for UNC Charlotte, truly transform the University by providing scholarships and resources to our students, research opportunities to our faculty, and reaffirming our position as an economic engine for the Charlotte region.

The Foundation of the University of North Carolina at Charlotte, Inc.

Founded in 1960, the UNC Charlotte Foundation is a 501(c)(3) non-profit organization whose purpose is to support the educational mission of UNC Charlotte. Its work centers on engaging the community, soliciting private donations, establishing scholarships, and managing property and other assets to benefit the students, faculty, and staff of UNC Charlotte. An elected Board of Directors, composed of no more than 45 volunteers, governs the Foundation.

University employees perform the fund-raising and business functions of the Foundation. In exchange, the Foundation transfers funds to UNC Charlotte to enhance the institution's teaching, research, and service missions. The Foundation endowment is approximately \$131 million, and the total University endowment is more than \$210.2 million.

University Events

University Events initiates, plans, and implements strategic events and programs that build relationships and strengthen ties to UNC Charlotte. University Events plans and executes all events hosted by the Chancellor including receptions at the Chancellor's residence (Bissell House), groundbreakings and dedication ceremonies, donor events, award ceremonies, and lectures.

University Events oversee the UNC Charlotte Civic Series presented by Bank of America. The series brings nationally recognized speakers to UNC Charlotte and the greater Charlotte community for thought-provoking conversations throughout the year. Featured in the series are three annual events: The Chancellor's Speaker Series, the Barnhardt Seminar on Ethics and the World of Business and the TIAA Lecture Series.

University Events is also responsible for the planning and execution of the University's annual commencement ceremonies. The office oversees every aspect of planning surrounding commencement, from the tickets to the logistics and execution of each ceremony.

Faculty Directory

Faculty

(Note: The year in parentheses represents the year of appointment)

Gaber, Sharon L. (2020); Chancellor; Professor, Department of Earth, Environmental, and Geographical Sciences; A.B., Occidental College; MPL, University of Southern California; Ph.D., Cornell University

Troyer, Jennifer (1999); Provost and Vice Chancellor for Academic Affairs, Belk College of Business; Professor, Department of Economics; B.A., Memphis State University; M.S., Florida State University; Ph.D., Florida State University

Putman, S. Michael (2011); Associate Provost for Academic Programs and Space, Department of Reading and Elementary Education; B.A., State University of New York College at Geneseo; M.A.Ed., Ball State University; Ph.D., Ball State University

Abdulrahman, Abdulwasiu Ajibola (2024); Assistant Professor, Department of Africana Studies; B.A., University of Ilorin, Nigeria; M.A., University of Ilorin, Nigeria; Ph.D., University of Mississippi

Abel, Kirsten (2023); Clinical Assistant Professor, Department of Reading and Elementary Education; B.S., Westfield State University; M.Ed., Framingham State College; Ed.D., University of North Carolina at Wilmington

Abrams, Lyndon P. (2001); Associate Professor, Department of Counseling; B.S., Charleston Southern University; M.Ed., Clemson University; Ph.D., Texas A&M University-Commerce

Abu El Ela, Ahmed (2023); Teaching Assistant Professor, Department of Civil and Environmental Engineering; B.S., University of Zagazig; M.S., University of Zagazig; Ph.D., University of Missouri at Columbia

Abhyankar, Rohini (2025); Teaching Assistant Professor, Office of Student Development and Success, The William States Lee College of Engineering; B.S., Delhi University, India; M.S., Syracuse University; M.B.A., University of Phoenix; Ph.D., Arizona State University

Adams, L. Dean (2013); Senior Associate Dean of Performing Arts, College of Arts + Architecture; Professor, Department of Theatre; B.A., Tufts University; M.A., University of Maryland; M.F.A., Florida State University

Afonin, Kirill (2015); Professor, Department of Chemistry; M.S., Saint Petersburg State Polytechnic University; Ph.D., Bowling Green State University

Adams, Nicole (2024); Assistant Professor, Department of Child Development and Special Education; B.A., University of North Carolina at Asheville; M.Ed., Vanderbilt University; Ph.D., University of Illinois

Ageenko, Ilieva (2024); Senior Lecturer, School of Data Science; M.S., State University of Management, Moscow, Russia; Ph.D., Taras Shevchenko University of Kiev, Ukraine

Aggarwal, Ishwar D. (2011); Research Professor, Department of Physics and Optical Science; M.C.E., The Catholic University of America; Ph.D., The Catholic University of America

Agosta, Rebecca (2013); Lecturer, Department of Writing, Rhetoric, and Digital Studies; B.S.Ed., Appalachian State University; M.A., University of North Carolina at Charlotte

Ahmed, Dewan (2013); Teaching Assistant Professor, Department of Computer Science; B.S., Bangladesh University of Engineering and Technology; M.S., Bangladesh University of Engineering and Technology; Ph.D., University of Ottawa

Ajazi, Elizabeth (2014); Lecturer, Department of Mathematics and Statistics; B.S., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte

Akella, Srinivas (2009); Professor, Department of Computer Science; B.Tech., Indian Institute of Technology, India; M.S., Carnegie Mellon University; Ph.D., Carnegie Mellon University

Aktas, Yildirim M. (1989); Associate Professor, Department of Physics and Optical Science; B.S., Middle East Technical University; Ph.D., University of Missouri at Columbia

Alam, Minhaj Nur (44788); Assistant Professor, Department of Electrical and Computer Engineering; B.S., Islamic University of Technology; M.S., Islamic University of Technology; Ph.D., University of Illinois - Chicago

Alexander, Apryl (44788); Professor, Department of Health Management and Policy; B.S., Virginia Tech University; M.S., Radford University; Ph.D., Florida Institute of Technology

Alhasan, Dana (2023); Assistant Professor, Department of Epidemiology and Community Health; B.A., University of Texas at Austin; M.P.H., University of Texas Health Science Center; Ph.D., University of South Carolina

Aliaga-Buchenau, Ana-Isabel (2002); Department Chair and Professor, Department of Languages, Cultures, and Translation; B.A., Georg-August Universitat Gottingen; M.A., University of North Carolina at Chapel Hill; Ph.D., University of North Carolina at Chapel Hill

Allan, Craig J. (1992); Professor, Department of Earth, Environmental, and Geographical Sciences; B.Sc., University of Manitoba; M.Sc., Trent University; Ph.D., York University

Allen, Tyler (2022); Assistant Professor, Department of Computer Science; B.S., Western Carolina University; M.S., Clemson University; Ph.D., Clemson University

Alkan Gokmen, Hatice Pelin (2024); Lecturer, David R. Rubin School of Architecture Istanbul Technical University, Turkey Scuola Universitaria Professionale della Svizzera Naba Domus Academy, Milan, Italy; M.S., Kadir Has University, Istanbul, Turkey

Almakhadmeh, Wala'a (2023); Teaching Assistant Professor, Department of Civil and Environmental Engineering; B.S., Jordan University of Science and Technology; M.S., Concordia University; Ph.D., Concorida University

Al-Shaer, Ehab (2009); Professor, Department of Software and Information Systems; B.S., King Fahad University; M.S., Northeastern University; Ph.D., Old Dominion University

Al-Shamat, Hania Mounir (44788); Assistant Teaching Professor, Department of Political Science and Public Administration; B.A., American University of Beirut, Lebanon; M.A., American University of Beirut, Lebanon; Ph.D., University of Southern California

Alston, Daniel (2016); Associate Professor, Department of Reading and Elementary Education; B.S., University of South Carolina; M.A.T., University of South Carolina; Ph.D., Clemson University

Alterowitz, Gretchen (2009); Department Chair and Professor, Department of Dance; B.A., University of Montana; M.F.A., University of Iowa

Alvis, Sid (2022); Professor, Office of Student Development and Success, The William States Lee College of Engineering; B.S., Virginia Military Institute; M.B.A., Northern Illinois University

Amato, Louis (Ted) H. (1980); Professor, Department of Economics; A.B., Lenoir-Rhyne College; M.A., University of North Carolina at Greensboro; Ph.D., University of South Carolina

Amburgey, James E. (2005); Associate Professor, Department of Civil and Environmental Engineering; B.S.C.E., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte; Ph.D., Georgia Institute of Technology

Amengonu, Yawo H. (2015); Visiting Lecturer, Department of Electrical and Computer Engineering; B.S.E.E., University of North Carolina at Charlotte; M.S.E.E., University of North Carolina at Charlotte

Amin, Takiyah N. (2011); Assistant Professor, Department of Dance; B.A., State University of New York at Buffalo; M.F.A., Virginia Polytechnic Institute and State University; Ph.D., Temple University

Ancrum, Terrence C. (44935); Visiting Lecturer, Department of Mathematics and Statistics; B.A., University of North Carolina at Charlotte; M.A.T., University of North Carolina at Charlotte

Anderson, Brittany (2020); Associate Professor, Department of Middle, Secondary, and K-12 Education; B.S.Ed., Baylor University; M.Ed., University of North Texas; Ph.D., University of Georgia

Anderson, Heather T. (2007); Lecturer, School of Nursing; A.A., Gardner-Webb University; B.S.N., Gardner-Webb University; M.S.N., Gardner-Webb University

Anderson, Kelly (2000); Professor, Department of Special Education and Child Development; B.S., Drake University; M.S., Drake University; Ph.D., University of North Carolina at Greensboro

Anderson, Nadia (2016); Associate Professor, David R. Ravin School of Architecture; B.Arch., Yale University; M.Arch., University of Pennsylvania

Andrés, Benny J. (2007); Associate Professor, Department of History; B.A., San Diego State University; M.A., University of New Mexico; Ph.D., University of New Mexico

Arafa, Ahmed (2019); Associate Professor, Department of Electrical and Computer Engineering; B.S., Alexandria University; M.S., University of Maryland, College Park; Ph.D., University of Maryland, College Park

Arif, Ahmed A. (2007); Professor, Department of Epidemiology and Community Health; B.S., Sindh Medical College; M.S., Western Kentucky University; Ph.D., University of Texas at Houston

Armour, Jake (2005); Lecturer, Department of Earth, Environmental, and Geographical Sciences; B.S., University of New Mexico; M.S., University of New Mexico

Armstrong, Laura M. (2013); Associate Professor, Department of Psychological Science; B.S., Brown University; M.S., Pennsylvania State University; Ph.D., Pennsylvania State University

Armstrong, Melinda (2020); Lecturer, School of Nursing; B.A., University of North Carolina at Charlotte; B.S.N., University of North Carolina at Charlotte; M.S.N., University of North Carolina at Charlotte

Arnold, Denis G. (2008); Surtman Distinguished Scholar in Business Ethics; and Professor, Department of Management; B.S., Lewis and Clark College; M.A., University of Minnesota; Ph.D., University of Minnesota

Arreola, Brian K. (2009); Professor, Department of Music; B.M., Saint Olaf College; M.M., Indiana University; Ph.D., Indiana University

Arrigo, Bruce A. (2001); Professor, Department of Criminal Justice and Criminology; B.A., Saint Joseph's University; M.A., Duquesne University; Ph.D., Pennsylvania State University

Arthur, Susan T. (2006); Associate Professor, Department of Applied Physiology, Health, and Clinical Sciences; B.S., University of Toledo, Ohio; M.S., University of Toledo, Ohio; Ph.D., University of Toledo, Ohio

Asala, Kathryn (2007); Teaching Professor, Department of Chemistry; B.S., Truman State University; Ph.D., Miami University

Ashby, Jamie (2024); MA Fellow, Department of Languages, Cultures, and Translation; B.A., University of North Carolina at Charlotte; M.A., University of North Carolina at Charlotte; M.A., University of North Carolina at Charlotte

Astratov, Vasily (2002); Professor, Department of Physics and Optical Science; Dipl., St. Petersburg State University; Ph.D., Ioffe Physical-Technical Institute

Athanasiopoulou, Anna (2013); Lecturer, Department of Mathematics and Statistics; B.S., Aristotle University of Thessaloniki; M.A., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Atkinson, Mary L. (2013); Associate Professor, Department of Political Science and Public Administration; B.A., Guilford College; M.A., The American University; Ph.D., University of North Carolina at Chapel Hill

Auten, Anna E. (2017); Assistant Professor and Health and Human Services Librarian, J. Murray Atkins Library; B.S., Tulane University; M.A., University of Florida; M.L.I.S., Florida State University

Avila, JuliAnna (2010); Associate Professor, Department of English; B.A., University of Redlands; M.A.Ed., University of California, Berkeley; Ph.D., University of California, Berkeley

Avrin, Joel D. (1984); Professor, Department of Mathematics and Statistics; A.B., University of California, Berkeley; M.A., University of California, Berkeley; Ph.D., University of California, Berkeley

Azarpayani, Mona (2010); Professor, Department of Art and Art History; B.S., Iran University of Science and Technology; M.Arch., Iran University of Science and Technology; Ph.D., University of Illinois at Urbana-Champaign

Azevedo, Lauren (2023); Assistant Professor, Department of Political Science and Public Administration; B.A., Mercer University; M.P.A., Georgia Southern University; Ph.D., University of Central Florida

Bachman, Hunter (2023); Assistant Teaching Professor, Department of Mechanical Engineering and Engineering Science; B.S., University of Delaware; M.S., University of Delaware; Ph.D., Duke University

Baez-Rivera, Yamilka I. (2014); Teaching Assistant Professor, Department of Engineering Technology and Construction Management; B.S.E.E., University of Puerto Rico; M.S.E.E., University of Puerto Rico; Ph.D., Mississippi State University

Bahamon, Julio C. (2016); Teaching Assistant Professor, Department of Computer Science; B.S., Texas A&M University; M.S., Florida State University; Ph.D., North Carolina State University

Bahin, Riley (2024); Visiting Lecturer, Department of Music; B.M., University of Michigan; M.M., University of Georgia; D.M.A., University of Colorado at Boulder

Baker, Alyah (2024); Assistant Professor, Department of Dance; B.A., Duke University; M.F.A., Duke University

Baker, Debra D. (2003); Senior Lecturer, Department of Communication Studies; B.A., University of North Carolina at Charlotte; M.A., University of North Carolina at Greensboro

Balcos, E. E. (2005); Professor, Department of Dance; B.A., The Colorado College; M.F.A., University of Iowa

Balmer, Jeffrey D. (2006); Associate Professor, David R. Rainey School of Architecture; B.E.S., University of Waterloo; B.Arch., University of Waterloo; M.Arch., Iowa State University

Balog, Valerie G. (2005); Clinical Assistant Professor, Department of Counseling; B.S., John Carroll University; M.A., John Carroll University; Ph.D., Kent State University

Balteanu, Ludmila (2022); Lecturer, Department of Health Management and Policy; M.D. Diploma, State University of Medicine and Pharmacy, Testemitanu, Chisinau Moldova; Physician Anesthesiology Certification, Oncology Institute of Republic Moldova; M.P.H., University of North Carolina at Charlotte

Banerjee, Enika (2018); Lecturer, Department of Languages, Cultures, and Translation; B.A., Sophia University, Japan; M.A., University of London, England

Banks, George C. (2015); Department Chair and Professor, Department of Management; B.A., College of William & Mary; M.A., University of New Haven; Ph.D., Virginia Commonwealth University

Banks, Philwyna (2024); Lecturer, School of Nursing; A.D.N., Cabarrus College of Health Science; B.S.N., University of North Carolina at Chapel Hill; M.S.N., University of North Carolina at Chapel Hill; D.N.P., University of North Carolina at Charlotte

Banks, Sherronda (2023); Lecturer, School of Social Work; B.S., Old Dominion University; M.S.W., Norfolk State University; D.S.W., Simmons University

Barclay, Nicole (2016); Assistant Professor, Department of Engineering Technology and Construction Management; B.S., South Carolina State University; M.S., Clemson University; Ph.D., Clemson University

Barfield, Auguste (2022); Department Chair and Professor, Department of Applied Physiology, Health, and Clinical Sciences; B.A., University of North Carolina at Chapel Hill; M.A., Appalachian State University; D.A., Middle Tennessee State University

Barnes, Meghan (2017); Associate Professor, Department of English; B.A., University of North Carolina at Chapel Hill; M.A.T., University of North Carolina at Chapel Hill; Ph.D., University of Georgia

Barr-Anderson, Daheia (2024); Colvard Distinguished Professor, Department of Applied Physiology, Health, and Clinical Sciences; B.S., Winthrop University; M.S.P.H., University of South Carolina; Ph.D., University of Maryland

Barto, Jeffrey (1992); Lecturer, Department of Applied Physiology, Health, and Clinical Sciences; B.S., Slippery Rock University; M.Ed., University of Pittsburgh; Ph.D., University of Pittsburgh

Basalik, Debra (2024); Assistant Teaching Professor, Department of Communication Studies; B.A., University of North Carolina at Charlotte; Graduate Certificate, University of North Carolina at Charlotte; M.A., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Basinger, Erin (2016); Associate Professor, Department of Communication Studies; B.A., Samford University; M.A., University of Georgia; Ph.D., University of Illinois at Urbana-Champaign

Basu, Balaka (2013); Associate Professor, Department of English; B.A., Cornell University; Ph.D., City University of New York

Bates, Tonya C. (2010); Lecturer, Department of Biological Sciences; B.A., University of North Carolina at Charlotte; B.S., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte

Batista, José M. (2003); Associate Professor, Department of Languages, Cultures, and Translation; B.A., Manhattan College; M.A., University of Georgia; Ph.D., University of Georgia

Batista Pereira, Frederico (2016); Associate Professor, Department of Political Science and Public Administration; B.A., Federal University of Minas Gerais, Brazil; M.A., Federal University of Minas Gerais, Brazil; Ph.D., Vanderbilt University

Beach, Kristen D. (2014); Professor, Department of Child Development and Special Education; B.A., University of California, Los Angeles; M.A., Loyola Marymount University; Ph.D., University of California, Riverside

Beaman, Jonathan M. (2014); Lecturer, Department of Mechanical Engineering and Engineering Science; B.S.M.E., University of North Carolina at Charlotte; M.S.M.E., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Beem, Randi E. (2018); Assistant Professor and Instruction Librarian/Archivist, J. Murrey Atkins Library; B.A., Saint Mary's College; M.L.S., Indiana University Bloomington

Beete, Deborah Ann D. (2018); Lecturer, Department of Epidemiology and Community Health; B.A., Columbia College; M.Div., McCormick Theological Seminary; M.P.H., Columbia University

Beggs, Joyce M. (1989); Associate Professor, Department of Management; B.S., Concord College; M.A., Marshall University; M.B.A., West Virginia College of Graduate Studies; Ph.D., University of Tennessee

Bejger, Christopher M. (2015); Associate Professor, Department of Chemistry; B.S., University of Oregon; Ph.D., University of Texas at Austin

Benedict, Aileen (2024); Visiting Lecturer, Department of Computer Science; B.S., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Benjamin, Michael (2020); Teaching Assistant Professor, Department of Engineering Technology and Construction Management; B.S., South Dakota State University; M.S., University of Cincinnati; M.S., University of Cincinnati; Ph.D., University of Cincinnati

Bennett, Jeanette M. (2012); Associate Professor, Department of Psychological Science; B.A., Gannon University; B.S., Gannon University; M.S., Pennsylvania State University; Ph.D., Pennsylvania State University

Beorkrem, Christopher J. (2005); Associate Professor, David R. Rabin School of Architecture; B.Arch., Iowa State University; M.S., Columbia University

Berez, Jaime (2023); Assistant Professor, Department of Mechanical Engineering and Engineering Science; B.S., University of Maryland at College Park; M.S., Georgia Institute of Technology; Ph.D., Georgia Institute of Technology

Berg-Sæther, Bjarne (2024); Clinical Assistant Professor of BISOM, Department of Business Information Systems/Operations; B.S., Appalachian State University; M.S., East Carolina University; D.B.A., University of Sarasota; Ph.D., University of North Carolina at Charlotte; Certificate, Harvard University

Bergmann, Malena (2003); Lecturer, Department of Art and Art History; B.F.A., University of North Carolina at Greensboro; M.F.A., University of Florida

Berman, Elise (2012); Associate Professor, Department of Anthropology; B.A., Dartmouth College; M.A., The University of Chicago; Ph.D., The University of Chicago

Berzins, Tiffany (2024); Assistant Teaching Professor, Department of Psychological Science; B.A., Southeastern University; M.S., University of Texas at San Antonio; Ph.D., University of Texas at San Antonio

Bess, Marcus (2013); Assistant Professor and Instruction Librarian, J. Murrey Atkins Library; B.A., University of North Carolina at Charlotte; M.S., North Carolina Central University

Biller, Justin B. (2018); Lecturer, Department of Engineering Technology and Construction Management; B.S.E.T., Old Dominion University; M.S., California Polytechnic State University

Billings, Stephen (2008); Associate Professor, Department of Political Science and Public Administration; B.A., Georgetown University; M.A., University of North Carolina at Chapel Hill; M.A., University of Colorado at Boulder; Ph.D., University of Colorado at Boulder

Bin Abdul Baten, Redwan (2022); Assistant Professor, Department of Health Management and Policy; B.S., University of Dhaka, Bangladesh; M.P.H., North South University, Bangladesh; Ph.D., University of Iowa

Binder, Amanda H. (2012); Assistant Professor and Special Sciences and History Librarian, J. Murrey Atkins Library; B.A., Bard College; M.S., University of Illinois at Urbana-Champaign

Binns, Ian (2011); Associate Professor, Department of Reading and Elementary Education; B.S., North Carolina State University; M.Ed., North Carolina State University; Ph.D., University of Virginia

Birdsong, Sarah (2016); Visiting Lecturer, Department of Mathematics and Statistics; B.S., Mars Hill College; M.S., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Bishop, Nancy (2016); Lecturer, Department of Art and Art History; B.F.A., Kansas City Art Institute; M.A., University of Kansas; Ph.D., University of Iowa

Bishwal, Jaya P. (2005); Professor, Department of Mathematics and Statistics; B.S., Sambalpur University; M.S., Sambalpur University; M.Phil., Sambalpur University; Ph.D., Sambalpur University

Bissière, Michèle (1990); Department Chair and Professor, Department of Languages, Cultures, and Translation; M.A., University of Wisconsin at Madison; Ph.D., University of Wisconsin at Madison

Bjerregaard, Beth E. (1992); Professor, Department of Criminal Justice and Criminology; B.S., Kent State University; M.S., Kent State University; Ph.D., State University of New York at Albany

Black, Jason E. (2016); Professor, Department of Communication Studies; B.A., Florida State University; M.A., Wake Forest University; Ph.D., University of Maryland, College Park

Black, Theresa A. (44788); Visiting Lecturer, Department of Chemistry; B.S., Albright College; M.S., University of North Carolina at Charlotte

Blanchard, Anita (2001); Professor, Department of Psychological Science; B.S., University of North Carolina at Chapel Hill; M.S., University of North Carolina at Chapel Hill; M.A., Claremont Graduate University; Ph.D., Claremont Graduate University

Bland, Robert (2024); Assistant Teaching Professor, Department of Mathematics and Statistics; B.S., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Blandford, Cassandra L. (2015); Lecturer, Department of Writing, Rhetoric, and Digital Studies; B.A., Miami University; M.A., University of Louisville

Bledsoe, Jordan R. (2012); Lecturer, Department of Languages, Cultures, and Translation; B.A., Brigham Young University; M.A., Brigham Young University

Blitvich, Pilar G. (2005); Professor, Department of English; B.A., University of Valencia; M.A., University of Valencia; Ph.D., University of Valencia

Bloise, Shelly (2021); Library/Associate Professor; M.L.I.S., Drexel University

Boardman, Erika D. (2022); Library/Associate Professor and Electronic Resources Management Librarian, J. Murrey Atkins Library; B.A., University of North Carolina at Charlotte; M.L.I.S., University of North Carolina at Greensboro

Boaz, Danielle N. (2015); Professor, Department of Africana Studies; J.D., University of Toledo; L.L.M., St. Thomas University; M.A., Florida International University; Ph.D., University of Miami

Bochartin, Jamie E. (2014); Associate Professor, Department of Communication Studies; B.A., DePaul University; M.A., DePaul University; Ph.D., Texas A&M University

Boisvert, Daniel (2007); Senior Lecturer, Department of Philosophy; B.A., Providence College; B.A., University of Central Florida; M.A., University of Florida; Ph.D., University of Florida

Bombik, Anthony J. (44788); Assistant Professor, Department of Mechanical Engineering and Engineering Science; B.S., University of Alabama; M.S., Stanford University; Ph.D., Stanford University

Bonakdar, Ali (2023); Associate Professor, Department of Mechanical Engineering and Engineering Science; B.S., University of Tehran; M.S., Sharif University of Technology; Ph.D., Concorida University

Bong, Ji Yae (2023); Assistant Professor, Department of Educational Leadership; B.A., Inha University; M.Ed., Inha University; Ph.D., Florida State University

Bonoffski, Tracy (2007); Lecturer, Department of Applied Physiology, Health, and Clinical Sciences; B.S., Cornell University; M.S., Wake Forest University

Booton, Debra (2023); Lecturer, Department of Applied Physiology, Health and Clinical Sciences; Certificate, College of DuPage; A.S., Waubonsee Community College; B.A.S., University of Iowa; M.Ed., Colorado State University; D.Hsc., A.T. Still University

Boreman, Glenn D. (2011); Department Chair and Professor, Department of Physics and Optical Science; B.S., University of Rochester; M.S., University of Arizona; Ph.D., University of Arizona

Bossu, Sebastien (2023); Assistant Professor, Department of Mathematics and Statistics; B.S., Sorbonne Universite; M.S., University of Chicago; M.S., Columbia University; Ph.D., Universite Paris-Sinclay

Bottia, Martha C. (2011); Research Assistant Professor, Department of Sociology; B.A., University of Los Andes; M.A., University of Los Andes; M.A., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Bowling, Jessamyn (2016); Associate Professor, Department of Epidemiology and Community Health; B.A., University of North Carolina at Chapel Hill; M.P.H., University of Arizona; Ph.D., Indiana University Bloomington

Boyd, Alice Suzanne (2002); Professor, School of Social Work; B.A., University of Virginia; M.S.W., Virginia Commonwealth University; Ph.D., Virginia Commonwealth University

Boyd, David G. (2018); Associate Professor, Department of Languages, Cultures, and Translation; B.A., University of California, Los Angeles; M.A., The University of Tokyo, Japan; M.A., Princeton University; Ph.D., Princeton University

Boyer, Christopher (2024); Dean, College of Humanities & Earth and Social Sciences; A.B., Dartmouth College; M.A., University of Pittsburgh; Ph.D., University of Chicago

Bradley, Stephanie L. (44788); Assistant Teaching Professor, Department of Sociology; B.S., Clemson University; M.S., Florida State University; Ph.D., Florida State University

Brais, Sayde (2013); Associate Teaching Professor, Department of Communication Studies; B.A., University of North Carolina at Charlotte; M.A., University of North Carolina at Charlotte

Branton, Regina (2022); Professor, Department of Political Science and Public Administration; B.A., University of South Carolina; M.A., University of Wyoming; Ph.D., University of Arizona

Braxtan, Nicole (2016); Assistant Professor, Department of Civil and Environmental Engineering; B.S., Rutgers University; M.S., Princeton University; Ph.D., Lehigh University

Bredy, Vania (2024); Lecturer, Department of Health Management and Policy; B.S., Florida A&M University; M.S.H.C.A., University of Maryland; D.HSc., Nova Southeastern University

Brian, William R. (2017); Associate Professor, Department of Mathematics and Statistics; B.A., Baylor University; M.S., Tulane University; Ph.D., University of Oxford

Brintnall, Kent (2008); Associate Professor, Department of Religious Studies; B.A., Fort Hays State University; M.A., Pacific School of Religion; J.D., Northeastern University; Ph.D., Emory University

Brizendine, Anthony L. (2002); Department Chair and Professor, Department of Engineering Technology and Construction Management; B.S., Bluefield State College; M.S., Virginia Polytechnic Institute and State University; Ph.D., West Virginia University

Brodeur, David (2000); Associate Professor, Department of Art and Art History; B.S., Southern Connecticut State University; M.F.A., University of Wisconsin

Brosek, Jennifer A. (2022); Assistant Professor and Collection Strategist, J. Murray Atkins Library; B.A., The University of Chicago; M.L.S., Indiana University; M.A., The University of Chicago

Bross, Leslie (2019); Associate Professor, Department of Special Education and Child Development; B.S.Ed., University of Missouri; M.S.Ed., University of Kansas; Ph.D., University of Kansas

Brouwer, Cory (2010); Director of Bioinformatics Services; and Research Associate Professor, Department of Bioinformatics and Genomics; B.S., Iowa State University; Ph.D., Iowa State University

Brown, Banita W. (1988); Associate Dean for Academic and Student Success, Klein College of Science; Professor, Department of Chemistry; B.S., Furman University; Ph.D., University of Miami

Brown, Candace S. (2019); Associate Professor, Department of Epidemiology and Community Health; B.S., Pennsylvania State University; M.Ed., Cleveland State University; M.A., University of Southern California; Ph.D., Virginia Commonwealth University

Brown, Cheryl L. (1982); Department Chair and Associate Professor, Department of Political Science and Public Administration; B.A., University of Florida; M.A., University of Michigan; Ph.D., University of Michigan

Brown, Regena Y. (2018); Director of Multicultural Academic Services and Clinical Assistant Professor, Multicultural Academic Services; B.A., University of North Carolina at Charlotte; M.Ed., University of North Carolina at Greensboro

Browne, Aidan F. (2012); Associate Professor, Department of Engineering Technology and Construction Management; B.S., Vanderbilt University; M.S., University of Connecticut; Ph.D., University of Connecticut

Brownell, Blaine (2020); Director and Professor, David R. Rubin School of Architecture; B.A., Princeton University; M.Arch., Rice University

Bryant, Dante D. (2019); Assistant Professor, School of Social Work; B.S., Southeast Missouri State University; M.S.W., University of Texas at Arlington; Ph.D., University of Texas at Arlington

Buch, Kimberly A. (1987); Professor, Department of Psychological Science; B.S., Western Kentucky University; M.A., Western Kentucky University; Ph.D., Iowa State University

Buchenau, Jurgen (1998); Executive Director and Professor, Department of History; B.A., University of Cologne; M.A., University of North Carolina at Chapel Hill; Ph.D., University of North Carolina at Chapel Hill

Buess, Christopher M. (2011); Lecturer/Production Manager, College of Arts + Architecture; B.A., San Diego State University

Bullock, Sharon K. (2007); Lecturer, Department of Biological Sciences; B.S., North Carolina State University; Ph.D., University of North Carolina at Chapel Hill

Bunch-Crump, Kimberly (2024); Assistant Professor, Department of Special Education and Child Development; B.S., Elizabeth City State University; M.Ed., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Bunescu, Razvan (2020); Associate Professor, Department of Computer Science; Ph.D., University of Texas at Austin

Bunescu, Razvan (2020); Associate Professor, Department of Computer Science; Diploma de inginer, Politehnica University of Bucharest, Romania; Ph.D., University of Texas at Austin

Burch, Thomas (2014); Associate Professor, Department of Theatre; B.F.A., University of Kentucky; M.F.A., Northwestern University

Burfield, Allison H. (2009); Associate Professor, School of Nursing; A.S., Athens Area Technical College; B.S.N., University of Central Florida; M.S.N., University of Central Florida; Ph.D., University of Central Florida

Burke, Jennifer (2024); MA Fellow in Spanish, Department of Languages, Cultures, and Translation; M.A., University of North Carolina at Charlotte

Burke, Jessica (2018); Associate Professor, Department of Art and Art History; B.F.A., Oklahoma State University; M.F.A., University of North Carolina at Greensboro

Burke, Kathleen D. (2018); Lecturer, Department of Psychology; B.A., Pennsylvania State University; M.A., Ohio State University

Burnett, Brian M. (2019); Assistant Professor, Turner School of Accountancy; B.S., Biola University; M.B.A., Pepperdine University; Ph.D., University of Colorado at Boulder

Burton, Hughlene A. (1996); Associate Professor, Turner School of Accountancy; B.S., Wake Forest University; Ph.D., The University of Alabama

Butler, Bettie Ray (2011); Professor, Department of Middle, Secondary, and K-12 Education; B.A., North Carolina A&T State University; M.A., Texas A&M University; Ph.D., Texas A&M University

Butler, Malcolm B. (2022); Dean, Cato College of Education; Professor, Department of Middle, Secondary, and K-12 Education; B.S., Southern University and A&M College; M.Ed., University of Florida; Ph.D., University of Florida

Buttmer, Richard (2024); Dean, Belk College of Business; B.B.A., University of Georgia; Ph.D., University of Georgia

Byker, Erik J. (2014); Professor, Department of Reading and Elementary Education; B.A., Dordt College; M.Ed., University of Virginia; Ph.D., Michigan State University

Byrd, Jennifer B. (2016); Visiting Lecturer, Department of English; B.A., University of North Carolina at Charlotte; M.A., University of North Carolina at Charlotte

Cacace, Samantha C. (2021); Assistant Professor, Department of Epidemiology and Community Health; A.A., Wake Technical Community College; B.A., North Carolina State University; M.A., North Carolina Central University; Ph.D., Washington State University

Cachelin, Faryaneh (Fary) M. (2010); Professor, Department of Psychological Science; B.A., Stanford University; M.A., Harvard University; Ph.D., Harvard University

Cai, Wei (1989); Professor, Department of Mathematics and Statistics; B.S., University of Science and Technology of China, China; M.S., University of Science and Technology of China, China; M.S., Brown University; Ph.D., Brown University

Cain, Mary (2023); Lecturer, Department of Applied Physiology, Health and Clinical Sciences; B.S., Erskine College; M.S., Georgia State University; Ph.D., Georgia State University

Cameron, Christopher A. (2010); Interim Department Chair, Department of Africana Studies; Professor, Department of History; B.A., Keene State College; M.A., University of North Carolina at Chapel Hill; Ph.D., University of North Carolina at Chapel Hill

Campbell, Robert C. (2010); Associate Professor, Department of Art and Art History; B.A., Transylvania University; M.F.A., University of Michigan at Ann Arbor

Campbell, William L. (2004); Professor, Department of Music; B.M., University of North Texas; M.M., University of North Texas; D.M.A., University of Illinois at Urbana-Champaign

Campbell-Whatley, Gloria (2003); Professor, Department of Special Education and Child Development; B.A., Dillard University; M.A., University of Alabama at Birmingham; Ed.D., University of Alabama

Canada, Nicholas (2024); Assistant Teaching Professor, Department of American Studies; B.A., University of North Carolina at Charlotte; M.A., University of North Carolina at Charlotte; Ph.D., Bowling Green State University

Canello, Jacopo (2016); Assistant Professor, Department of Earth, Environmental, and Geographical Sciences; B.S., University of Padova; M.D., Ca' Foscari University of Venice; M.S., Trinity College, Dublin; Ph.D., University of Queensland

Canevello, Amy B. (2011); Professor, Department of Psychological Science; B.S., North Dakota State University; M.A., University of Houston; Ph.D., University of Houston

Cannon, Julie (2024); Assistant Professor, Department of Communication Studies; B.F.A., Florida State University; M.A., Purdue University; Ph.D., Cornell University

Cao, Lijuan (2016); Professor, Department of Software and Information Systems; B.S., University of Electronic Science and Technology of China; Ph.D., University of North Carolina at Charlotte

Cao, Tuan Thanh (2013); Lecturer, Department of Biological Sciences; B.S., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte; Ph.D., University of Arizona

Cao, Yang (2003); Associate Professor, Department of Sociology; M.A., Cornell University; Ph.D., Cornell University

Carlson-Reddig, Kelly J. (1992); Associate Director and Associate Professor, David R. Rauh School of Architecture; B.Arch., Texas Tech University; M.E.Des, Yale University

Carman, Joanne G. (2005); Professor, Department of Political Science and Public Administration; B.A., Hartwick College; M.A., State University of New York at Albany; Ph.D., State University of New York at Albany

Carter, Morgan (44929); Visiting Assistant Professor, Department of Biological Sciences; B.S., North Carolina State University; Ph.D., Cornell University

Cartwright, Kelly (45294); Distinguished Professor, Department of Reading and Elementary Education; B.S., Virginia Tech University; M.A., University of Arkansas; Ph.D., University of Arkansas

Caruso, Elizabeth L. (2011); Lecturer, Department of English; B.A., University of North Carolina at Charlotte; M.A., University of North Carolina at Charlotte

Caruso, Elizabeth L. (2018); Assistant Professor and Digital Pedagogy and Emerging Technologies Librarian, J. Murray Atkins Library; B.A., University of North Carolina at Charlotte; M.A., University of North Carolina at Charlotte; M.L.I.S., University of South Carolina

Cary, Justin R. (2014); Lecturer, Department of Writing, Rhetoric, and Digital Studies; B.A., Villanova University; M.A., Xavier University

Casas, Carlos Cruz (2013); Professor, Department of Theatre; B.A., University of Puerto Rico; M.F.A., Dell'Arte International School of Physical Theatre

Cash, Anne H. (2014); Associate Professor, Department of Reading and Elementary Education; B.S., Furman University; Ph.D., University of Virginia

Casto-Boggess, Laura (2023); Assistant Professor, Department of Chemistry; B.S., West Virginia Wesleyan College; Ph.D., University of Tennessee at Knoxville; Post Doctorate, University of California at Berkeley

Cathey, Jack M. (1988); Associate Professor, Turner School of Accountancy; B.S., Wake Forest University; M.Acc., Virginia Polytechnic Institute and State University; Ph.D., Virginia Polytechnic Institute and State University; C.P.A.,

Cavalline, Tara L. (2006); Professor, Department of Engineering Technology and Construction Management; B.S., Pennsylvania State University; M.S., Pennsylvania State University

Cecchi, Valentina (2010); Associate Professor, Department of Electrical and Computer Engineering; B.S., Drexel University; M.S.E.E., Drexel University; Ph.D., Drexel University

Chakrabarti, Kausik (2017); Associate Professor, Department of Biological Sciences; Ph.D., University of Calcutta, India

Chancellor, Bryn K. (2015); Associate Professor, Department of English; B.A., Northern Arizona University; M.A., Arizona State University; M.F.A., Vanderbilt University

Chang, Ian (2024); Assistant Professor, Department of Earth, Environmental, and Geographical Sciences; B.S., Northern Illinois University; Graduate Certificate, Northern Illinois University; M.S., Northern Illinois University; Ph.D., University of Alabama

Chao, Fang-yi (2023); Assistant Teaching Professor, Department of Languages, Cultures, and Translation; B.S., National Tsing Hua University; M.A., Tunghai University; Ph.D., Ohio State University

Chapman, Marvin W. (2003); Clinical Assistant Professor, Department of Reading and Elementary Education; B.A., Wofford College; M.A., Western Carolina University; Ph.D., University of North Carolina at Chapel Hill

Chattpadhyay, Jacqueline (2012); Associate Professor, Department of Political Science and Public Administration; B.A., University of California, Irvine; Ph.D., Harvard University

Chen, Dong (2009); Professor, Department of Engineering Technology and Construction Management; B.S., Tongji University, China; M.S., Iowa State University; Ph.D., Iowa State University

Chen, Duan (2013); Professor, Department of Mathematics and Statistics; B.A., Huazhong University of Science and Technology, China; M.S., Huazhong University of Science and Technology, China; Ph.D., Michigan State University

Chen, Gang (2012); Professor, Department of Earth, Environmental, and Geographical Sciences; B.Sc., Wuhan University, China; M.Sc., Wuhan University, China; Ph.D., University of Calgary

Chen, Ming (2019); Assistant Professor, Department of Marketing; B.S., University of Electronic Science and Technology of China; M.S., University of Electronic Science and Technology of China; M.S., Johns Hopkins University; Ph.D., University of Houston

Chen, Shen-En (2005); Professor, Department of Civil and Environmental Engineering; B.S.C.E., West Virginia University; M.S.C.E., West Virginia University; Ph.D., West Virginia University

Chen, Shi (2016); Associate Professor, Department of Epidemiology and Community Health; B.S., Nanjing University, China; Ph.D., Pennsylvania State University

Chen, Xiang (2023); Assistant Professor, Department of Mechanical Engineering and Engineering Science; B.S., B.L., Harbin Engineering University; M.S., Hong Kong University of Science and Technology; Ph.D., University of Florida

Chen, Youxing (2019); Research Assistant Professor, Department of Mechanical Engineering and Engineering Science; B.S., Chongqing University, China; M.S., Shanghai Jiao Tong University, China; Ph.D., Texas A&M University

Chen, Yuting (2019); Visiting Assistant Professor, Department of Engineering Technology and Construction Management; B.S., Shandong Jianzhu University, China; M.S., Tongji University, China; Ph.D., University of Toronto, Canada

Chen, Zhuo J. (2022); Associate Professor, School of Nursing; B.A., Wuhan University, China; M.S., University of Tennessee at Chattanooga; M.S., University of Oregon; Ph.D., University of Oregon

Cheng, Qiong (2018); Lecturer, Department of Computer Science; B.S., Wuhan University, China; M.S., Georgia State University; Ph.D., Georgia State University

Chertok, Ilana (2015); Professor and Associate Director of the Graduate Division, School of Nursing; B.A., University of Pennsylvania; B.S.N., Rush University; M.S.N., West Virginia University; Ph.D., Ben-Gurion University of the Negev

Cherukuri, Harischandra (Harish) P. (1997); Department Chair and Professor, Department of Mechanical Engineering and Engineering Science; M.S., Montana State University; Ph.D., University of Illinois

Chi, Richard J. (2015); Associate Professor, Department of Biological Sciences; B.S., Florida State University; Ph.D., Florida State University

Chiang, I-Hsuan (Ethan) (2008); Associate Dean for Graduate Programs, Department of Finance; B.A., National Taiwan University, Taiwan; M.B.A., National Chengchi University; Ph.D., Boston College

Chowdhury, Badrul H. (2012); Professor, Department of Electrical and Computer Engineering; M.S., Virginia Polytechnic Institute and State University; Ph.D., Virginia Polytechnic Institute and State University

Christou, Eliana (2016); Associate Professor, Department of Mathematics and Statistics; B.A., National Conservatory of Cyprus; B.A., National Conservatory of Cyprus; B.A., University of Cyprus; M.S., Pennsylvania State University; Ph.D., Pennsylvania State University

Chu, Bei-Tseng (Bill) (1988); Professor, Department of Software and Information Systems; B.S., University of Maryland; M.S., University of Maryland; Ph.D., University of Maryland

Chu, Yongqiang (2018); *Childress Klein Distinguished Professor of Real Estate and Urban Economics, Department of Finance;* B.S., Peking University, China; M.S., National University of Singapore; Ph.D., University of Wisconsin-Madison

Chung, Hee Cheol (2022); *Assistant Professor, Department of Mathematics and Statistics;* B.A., Yonsei University, South Korea; M.A., Yonsei University, South Korea; Ph.D., University of Georgia

Cifarelli, Victor V. (1995); *Professor, Department of Mathematics and Statistics;* B.S., University of Connecticut; M.S., Purdue University; Ph.D., Purdue University

Cisneros, Susana (2016); *Lecturer, Department of Languages, Cultures, and Translation;* B.A., National University of Cordoba; M.A., University of North Carolina at Charlotte

Clark, Darnell K. (44789); *Lecturer, Department of Applied Physiology, Health, and Clinical Sciences;* B.S., Northwestern University; M.S.P.E., Arizona State University; Ed.D., University of North Carolina at Greensboro

Clark, Kimberly (2017); *Clinical Associate Professor, Department of Applied Physiology, Health, and Clinical Sciences;* B.S., Wheeling Jesuit University; M.B.A., West Virginia University; Ed.D., University of North Carolina at Charlotte

Clark, Steven P. (2002); *Associate Professor, Department of Finance;* B.A., Valdosta State University; M.A., University of Georgia; Ph.D., University of Virginia; Ph.D., University of Virginia

Cline, Tyler G. (2017); *Assistant Professor and Digital Archivist, J. Murray Atkins Library;* B.A., Humboldt State University; M.A., California State University

Clinton, Sandra (2010); *Visiting Research Professor, Department of Biological Sciences;* B.S., McGill University; M.S., Arizona State University; Ph.D., University of Washington

Clontz, Steven C. (2014); *Visiting Assistant Professor, Department of Mathematics and Statistics;* B.S., Auburn University; M.S., Auburn University; Ph.D., Auburn University

Coffey, Heather M. (2009); *Professor, Department of Middle, Secondary, and K-12 Education;* B.A., Elon University; M.Ed., University of North Carolina at Greensboro; Ph.D., University of North Carolina at Chapel Hill

Coffman, Maren J. (2004); *Professor, School of Nursing;* A.S., Weber State University; B.S.N., Weber State University; M.S.N., Syracuse University; Ph.D., University of Connecticut

Cohen, Tamara (2011); *Lecturer, Department of Marketing;* B.A., University of Capetown; M.B.A., University of Pennsylvania

Coleman, Elizabeth R. (2014); *Assistant Professor, Department of Reading and Elementary Education;* B.A., Notre Dame University; M.A., Seton Hall University; Ed.D., Loyola University Chicago

Collins, Larianne (2018); *Lecturer, Department of Earth, Environmental, and Geographical Sciences;* B.S., Presbyterian College; M.Ed., University of South Carolina; Ph.D., University of South Carolina

Colombo, Amy (2016); *Lecturer, Department of Writing, Rhetoric, and Digital Studies;* M.F.A., University of Delaware; M.F.A., West Virginia University; Ph.D., Virginia Commonwealth University

Colonnese, Madelyn W. (2017); *Associate Professor, Department of Reading and Elementary Education;* B.S., University of Connecticut; M.A., University of Connecticut; Ph.D., University of Connecticut

Conkie, Robert (2023); *Distinguished Professor of Shakespeare, Department of Theatre;* B.A., University of Melbourne; Graduate Diploma, University of Melbourne; M.A., University of Birmingham; Ph.D., University of Southampton

Connaughton, John E. (1978); *Professor, Department of Economics;* B.A., Boston State College; M.A., Northeastern University; Ph.D., Northeastern University

Conner, Lynne (2016); *Department Chair and Professor, Department of Theatre;* B.A., Oberlin College; M.A., State University of New York at Stony Brook; Ph.D., University of Pittsburgh

Connolly, Paula T. (1991); *Professor, Department of English;* A.B., Boston College; M.A., Boston College; Ph.D., University of Massachusetts at Amherst

Conrad, James M. (2003); *Professor, Department of Electrical and Computer Engineering;* B.S., University of Illinois Urbana-Champaign; M.S., North Carolina State University; Ph.D., North Carolina State University

Cook, Julie A. (2012); *Lecturer, Department of Writing, Rhetoric, and Digital Studies;* B.A., University of North Carolina at Charlotte; M.A., University of North Carolina at Charlotte

Cooper, Brian T. (1997); *Associate Professor, Department of Chemistry;* B.S., Purdue University; Ph.D., University of Arizona

Cooper, Elizabeth A. (2018); *Associate Professor, Department of Bioinformatics and Genomics;* B.A., Grinnell College; Ph.D., University of Southern California

Cooper, Maisha N. (2018); *Associate Professor, Department of Criminal Justice and Criminology; Assistant Professor;* B.S., University of Central Missouri; M.S., University of Central Missouri; Ph.D., Sam Houston State University

Cornelius, Judith B. (2005); *Professor, School of Nursing; Professor;* B.S.N., Hampton Institute; M.S.N., Hampton University; D.N.Sc., Rush University

Costanza, David (2020); *Assistant Professor, David R. Ravin School of Architecture;* B.S., University of Utah; M.S., Massachusetts Institute of Technology; M.Arch., Massachusetts Institute of Technology

Cox, John M. (2011); Associate Professor, Department of Global Studies; B.A., Appalachian State University; M.A., Brandeis University; Ph.D., University of North Carolina at Chapel Hill

Cox, Kyle (2019); Associate Professor, Department of Educational Leadership; B.S.Ed., Miami University; M.A., University of Cincinnati; Ph.D., University of Cincinnati

Cox, Robert W. (2006); Executive Director, Department of Electrical and Computer Engineering; B.S., Massachusetts Institute of Technology; M.Eng., Massachusetts Institute of Technology; Ph.D., Massachusetts Institute of Technology

Cramer, Robert J. (2019); Professor/Irwin Belk Distinguished Scholar in Health Research, Department of Epidemiology and Community Health; B.A., Loyola University Maryland; M.A., University of Alabama; Ph.D., University of Alabama

Crane, Patricia B. (2020); Carol Grottes Belk Distinguished Professor, School of Nursing; B.S.N., University of Louisiana at Monroe; M.S.N., Northwestern State University; Ph.D., University of Arkansas for Medical Sciences

Crocker, Tiana (2018); Assistant Professor, School of Social Work; B.A., University of Virginia; M.S.W., George Mason University; Ph.D., University of Texas at Austin

Cronell, Teresa S. (2022); Lecturer, School of Nursing; B.S., Queens University of Charlotte; M.S.N., Walden University

Crosby, Caylah N. (44788); Assistant Teaching Professor, Department of Mathematics and Statistics; B.S., University of North Carolina at Wilmington; M.S., University of North Carolina at Wilmington; Ph.D., University of North Carolina at Charlotte

Crosby, Gary W. (2019); Lecturer, Department of Mathematics and Statistics; B.S., University of North Carolina at Chapel Hill; M.B.A., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Cross, Donald (2024); Assistant Professor, Department of Languages, Cultures, and Translation; B.A., University of Colorado at Boulder; M.A., State University of New York; Ph.D., State University of New York

Cross, Karen (2013); Clinical Assistant Professor and Supervisor of Student Teaching, Office of School and Community Partnerships, Cato College of Education; B.S., Winston-Salem State University; M.S., Virginia Polytechnic Institute and State University; Ed.D., University of North Carolina at Greensboro

Cukic, Bojan (2014); Dean, College of Computing and Informatics; Professor, Department of Computer Science, M.S., University of Houston; Ph.D., University of Houston

Culbreth, John R. (2004); Professor, Department of Counseling; B.S., Appalachian State University; M.A., Appalachian State University; Ph.D., University of North Carolina at Greensboro

Da Costa Vieira, Rafael Felipe (44929); Associate Professor, Department of Epidemiology and Community Health; D.V.M., Federal Rural University of Pernambuco, Brazil; M.S., Federal University of Parana, Brazil; Ph.D., Londrina State University, Brazil

Dack, Hilary G. (2015); Associate Professor, Department of Middle, Secondary, and K-12 Education; B.A., Davidson College; J.D., University of North Carolina at Chapel Hill; M.Ed., University of Virginia; Ph.D., University of Virginia

Dagher, Debra (2015); Lecturer, Department of Writing, Rhetoric, and Digital Studies; B.A., University of North Carolina at Charlotte; M.Ed., Marymount University

Dahl, Alicia A. (2018); Associate Professor, Department of Epidemiology and Community Health; B.A., Juniata College; M.S., University of Delaware; Ph.D., University of South Carolina

Dai, Yaoyao (2020); Assistant Professor, Department of Political Science and Public Administration; M.A., Duke University; M.A., Pennsylvania State University; Ph.D., Pennsylvania State University

Daise, Debra Ann (2016); Lecturer, English Language Training Institute; B.A., University of Colorado at Boulder Boulder; M.A., University of Colorado at Boulder

Dal Pra, Daniela C. (2012); Visiting Lecturer, Department of Languages, Cultures, and Translation; B.A., Università Ca'Foscari Venezia; M.A., Università Ca'Foscari Venezia

Dalsheim, Joyce (2010); Professor, Department of Global Studies; B.A., The American University; M.S.Ed., University of Pennsylvania; M.A., New School for Social Research; Ph.D., New School for Social Research

Dalton, David (2016); Professor, Department of Languages, Cultures, and Translation; B.A., Brigham Young University; M.A., Brigham Young University; Ph.D., University of Kansas

Dalton, Jane Emily (2013); Professor, Department of Art and Art History; B.A., Augustana College; M.F.A., Rochester Institute of Technology; Ph.D., European Graduate School

Dalton, Joseph B. (2013); Lecturer, Department of Mechanical Engineering and Engineering Science; B.S., University of North Carolina at Charlotte

D'Amico, Mark (2009); Professor, Department of Educational Leadership; B.A., Gannon University; M.A., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Greensboro

Damron, James (2023); Lecturer, Department of Applied Physiology, Health and Clinical Sciences; B.A., Queens University of Charlotte; A.A., Central Piedmont Community College; M.A., Columbia International University; M.Div., Southern Evangelical Seminary; M.A., Loyola University

Daniels, John L. (2001); Professor, Department of Civil and Environmental Engineering; B.S., Lehigh University; M.S., University of Massachusetts; Ph.D., University of Massachusetts

Das, Srijan (2022); Assistant Professor, Department of Computer Science; B.Tech., St. Thomas' College of Engineering and Technology, India; M.Tech., National Institute of Technology, India; Ph.D., Côte d'Azur University, France

Davenport, Casey (2014); Associate Professor, Department of Earth, Environmental, and Geographical Sciences; B.S., Valparaiso University; M.S., North Carolina State University; Ph.D., North Carolina State University

Davenport, Meghan (2023); Lecturer, Department of Psychological Science; B.A., Rice University; M.A., Rice University; Ph.D., Rice University

David, Zhanna (2024); Assistant Teaching Professor, Department of Psychological Science; B.A., University of North Carolina at Charlotte; Graduate Certificate, University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Davin, Kristin J. (2017); Professor, Department of Middle, Secondary, and K-12 Education; B.A., Wake Forest University; M.A.Ed., Wake Forest University; Ph.D., University of Pittsburgh

Davis, Nicholas M. (2017); Assistant Professor, Department of Software and Information Systems; B.A., Case Western Reserve University; Ph.D., Georgia Institute of Technology

Davis, William S. (2018); Lecturer, Department of Communication Studies; B.A., University of North Carolina at Charlotte; M.A., University of North Carolina at Charlotte

de la Cruz, Kalavik (2024); MA Fellow, Department of Languages, Cultures, and Translation; B.A., North Carolina State University; M.A., North Carolina State University

de la Torre, Oscar (2012); Associate Professor, Department of Africana Studies; B.A., University of Barcelona; M.A., University of Pittsburgh; Ph.D., University of Pittsburgh

De Silva Indrasekara, Agampodi S. (2018); Assistant Professor, Department of Chemistry; B.S., University of Peradeniya, Sri Lanka; M.S., North Carolina State University; Ph.D., Rutgers University

Dearden, David (2019); Assistant Dean for Undergraduate Education and Director, University Advising Center, Office of Undergraduate Education; Director, University Advising Center, B.A., St. Joseph's College; M.Ed., Northeastern University; Ed.D., University of Vermont

Deeba, Farah (44929); Assistant Professor, Department of Electrical and Computer Engineering; B.S., Bangladesh University of Engineering and Technology; M.S., University of Saskatchewan; Ph.D., University of British Columbia, Canada

Delmelle, Eric M. (2008); Associate Professor, Department of Earth, Environmental, and Geographical Sciences; B.S., Vrije Universiteit, Belgium; M.A., State University of New York at Buffalo; M.S., State University of New York at Buffalo; Ph.D., State University of New York at Buffalo

Della Justina Fanas, Ticiana (2025); Research Assistant Professor, Department of Biological Sciences; B.Sc., Federal University of Santa Catarina, Brazil; M.Sc., Federal University of Santa Catarina, Brazil; Ph.D., Federal University of Parana, Brazil

Demakis, George (2002); Professor, Department of Psychological Science; B.S., Loyola The University of Chicago; M.S., Virginia Polytechnic Institute and State University; Ph.D., Virginia Polytechnic Institute and State University

Deng, Shaozhong (2005); Professor, Department of Mathematics and Statistics; B.S., Xi'an Jiatong University; M.S., Nanjing University of Aeronautics and Astronautics; M.S., North Carolina State University; Ph.D., North Carolina State University

Depken, Craig A. (2007); Department Chair and Professor, Department of Economics; B.A., University of Georgia; Ph.D., University of Georgia

Desloge, Alissa (2024); Assistant Professor, Department of Epidemiology and Community Health; B.A., University of South Carolina; M.P.H., Yale University; Ph.D., University of Illinois, Chicago

Dessi-Olive, Jonathan (44788); Associate Professor, David R. Rubin School of Architecture; B.S., University of Minnesota; M.Arch., University of Pennsylvania; M.S., Massachusetts Institute of Technology

Diab, Kefaya M. (44788); Assistant Professor, Department of Writing, Rhetoric, and Digital Studies; B.C.S., Al Al-Bait University, Mafrag, Jordan; M.A., New Mexico State University; Ph.D., New Mexico State University - Las Cruces

Diao, Yuanan (1996); Professor, Department of Mathematics and Statistics; B.S., Wuhan University, China; M.S., Beijing University, China; Ph.D., Florida State University

Diaz Vasquez, Jose F. (2019); Assistant Professor, Department of Epidemiology and Community Health; B.S., Santo Domingo Institute of Technology, Dominican Republic; M.S., Polytech Marseille, France; Ph.D., University of Texas Health Science Center at Houston

DiBiase, Warren J. (1997); Associate Professor, Department of Middle, Secondary, and K-12 Education; B.S., Ohio University; B.S.Ed., Ohio University; M.S.Ed., Youngstown State University; Ed.D., West Virginia University

Dickey, Rachel (2016); Associate Professor, David R. Rubin School of Architecture; B.S.Arch., Georgia Institute of Technology; M.D.S., Harvard University; M.Arch., Georgia Institute of Technology

Diegmann, Debra (2016); Teacher-in-Residence, Office of School and Community Partnerships, Cato College of Education; B.A., University of North Carolina at Asheville; M.Ed., Lesley University

Dika, Sandra (2010); Professor, Department of Educational Leadership; B.A.Ed., University of Alberta; M.S., University of Alberta; Ph.D., Virginia Polytechnic Institute and State University

Dinar, Mahmoud (2023); Assistant Professor, Department of Mechanical Engineering and Engineering Science; B.S., Amir Kabir University of Technology; M.S., Chalmers University of Technology; Ph.D., Arizona State University

Dior, Rick (2003); Lecturer, Department of Music; B.M., Manhattan School of Music

Dippong, Joseph Carl (2013); Associate Professor, Department of Sociology; B.A., Hiram College; M.A., Kent State University; Ph.D., Kent State University

Divita, Anna R. (2015); Lecturer, Department of Criminal Justice and Criminology; B.A., Ohio State University; M.S., Boston University

Dobbs, Bryan (2023); Visiting Assistant Professor, Department of Computer Science; B.S., Lenoir-Rhyne University; B.S., Lenoir-Rhyne University; Graduate Certificate, University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Donovan, Luke (2016); Associate Professor, Department of Applied Physiology, Health, and Clinical Sciences; B.S., Pennsylvania State University; M.Ed., University of Virginia; Ph.D., University of Virginia

Donovan-Merkert, Bernadette T. (1992); Dean, Department of Chemistry; B.S., Duke University; Ph.D., University of Vermont

Dornburg, Alexis (2020); Assistant Professor, Department of Bioinformatics and Genomics; B.S., Washington State University; M.S., Yale University

Doroodchi, Mohsen (2014); Teaching Associate Professor, Department of Computer Science; B.S., Shiraz University; M.S., University of Wisconsin-Madison; Ph.D., University of Wisconsin-Madison

Dou, Wenwen (2013); Associate Professor, Department of Computer Science; B.S., Beijing University, China; Ph.D., University of North Carolina at Charlotte

Douglas, James W. (2006); Professor, Department of Political Science and Public Administration; B.A., University of Maryland; M.P.A., University of Baltimore; D.P.A., The University of Georgia

Dow, Alan S. (2000); Professor, Department of Mathematics and Statistics; B.S., University of Manitoba; M.Sc., University of Manitoba; Ph.D., University of Manitoba

Dreau, Didier (2004); Professor, Department of Biological Sciences; B.S., University of Rennes; M.S., Blaise Pascal University; Ph.D., National College of Agriculture

Drew-Branch, Vanessa (2014); Lecturer, School of Social Work; B.S., California University of Pennsylvania; B.A., California University of Pennsylvania; M.S.W., West Virginia University; D.Ed., West Virginia University

Du, Dan (2018); Assistant Professor, Department of History; B.A., Nankai University, China; M.A., Nankai University, China; Ph.D., University of Georgia

Du, Xiuxia (2008); Professor, Department of Bioinformatics and Genomics; B.S., Hefei University of Technology; M.S., Washington University; Ph.D., Washington University

Du, Yan (2023); Associate Professor, Department of Economics; B.A., Xiamen University; Graduate Certificate, University of Kansas; M.S., Oregon State University; Ph.D., Oregon State University

DuBose, Sequina (2019); Associate Professor, Department of Music; B.A., Morgan State University; M.M., George Mason University; Ph.D., University of Maryland, College Park

Duddu, Venkata (2017); Research Assistant Professor, Department of Civil and Environmental Engineering; B.Eng., Osmania University, India; M.S.C.E., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Dulin, Michael (2016); Associate Director of Center for ADVANCing Faculty Success and Professor, Department of Health Management and Policy; B.S.E.E., University of Texas at Austin; Ph.D., University of Texas Health Science Center at Houston; M.D., University of Texas Health Science Center at Houston

Duncan, Jennifer (2002); Lecturer, David R. Rubin School of Architecture; A.A., Cazenovia College; M.A., State University of New York at Albany; M.L.S., State University of New York at Albany

Dungee, Jason (2021); Assistant Professor, Department of Music; B.A., Hampton University; M.M., Westminster Choir College; D.M.A., University of Arizona

Dutcher, Edwin (2024); Associate Professor, Department of Economics; B.S., University of Central Missouri; M.A., Florida State University; Ph.D., Florida State University

Dutta, Debarati (2010); Lecturer, Department of Writing, Rhetoric, and Digital Studies; B.A., University of Calcutta, India; M.A., University of Calcutta, India; Ph.D., Texas Christian University

Eads, Denelle E. (2011); Assistant Professor and Personnel and Staff Development Librarian, J. Murrey Atkins Library; B.A., Bowling Green State University; M.L.I.S., University of North Carolina at Greensboro

Eaker, Mia (2014); Lecturer, Department of Writing, Rhetoric, and Digital Studies; B.A., University of North Carolina at Charlotte; M.A., University of North Carolina at Charlotte

Eastin, Matthew D. (2006); Professor, Department of Earth, Environmental, and Geographical Sciences; B.S., Purdue University; M.S., Colorado State University; Ph.D., Colorado State University

Ebong, Abasifreke (2011); Professor, Department of Electrical and Computer Engineering; B.Sc., University of Port Harcourt, Nigeria; M.Sc., University of Port Harcourt, Nigeria; Ph.D., The University of New South Wales, Australia

Eckard, Paula G. (1990): Professor, Department of English; B.S., University of North Carolina at Charlotte; B.A., University of North Carolina at Charlotte; M.A., University of North Carolina at Charlotte; M.H.D.L., University of North Carolina at Charlotte; Ph.D., University of South Carolina

Eddins, Crystal N. (2017): Associate Professor, Department of Africana Studies; B.A., Michigan State University; M.A., Michigan State University; Ph.D., Michigan State University

Edwards-Knight, Kevin R. (2019): Lecturer, School of Social Work; B.S., Gardner-Webb University; M.S.W., University of North Carolina at Charlotte

Egusa, Shunji (2015): Associate Professor, Department of Physics and Optical Science; B.S., University of Tokyo, Japan; M.S., The University of Chicago; Ph.D., The University of Chicago

Ehlers, Maren A. (2011): Associate Professor, Department of History; M.A., University of Hamburg, Germany; Ph.D., Princeton University

Eickhoff, Karen F. (2012): Clinical Assistant Professor, Department of Management; B.S., University of Tennessee at Chattanooga; M.B.A., University of Tennessee at Knoxville; Ph.D., University of Tennessee at Knoxville

Elberfeld, Nathaniel (2024): Assistant Professor, David R. Rubin School of Architecture; B.S., College of William & Mary; M.Arch., Washington University; M.S., Massachusetts Institute of Technology

El-Ghannam, Ahmed R. (2007): Professor, Department of Mechanical Engineering and Engineering Science; B.Sc., Cairo University, Egypt; M.Sc., Ain Shams University, Egypt; M.S.E., University of Pennsylvania; Ph.D., University of Pennsylvania

Ellinger, Jefferson (2013): Professor, David R. Rubin School of Architecture; B.S., The Ohio State University; M.Arch., Columbia University

Elmitsky, Christine (2013): Associate Professor, School of Nursing; B.S.N., Old Dominion University; M.S.N., Old Dominion University; Ph.D., Old Dominion University

Elowson, Allison H. (2015): Lecturer, Department of Mathematics and Statistics; B.A., Clemson University; M.A., University of North Carolina at Charlotte

Emerling, Jae A. (2007): Associate Dean for Research, Department of Art and Art History; B.A., Wesleyan University; M.A., University of California, Los Angeles; Ph.D., University of California, Los Angeles

Endacott, Camille G. (2021): Assistant Professor, Department of Communication Studies; B.A., Azusa Pacific University; M.A., University of California, Santa Barbara

Engstrom, Rachel M. (2016): Lecturer and Costume Lab Manager, Performing Arts Services, College of Arts + Architecture; B.A., Western Michigan University; M.F.A., California State University, Long Beach

Eppes, Martha C. (2002): Professor, Department of Earth, Environmental, and Geographical Sciences; B.S., Washington and Lee University; M.S., New Mexico Institute of Mining and Technology; Ph.D., University of New Mexico

Erevelles, Sunil (2002): Associate Professor, Department of Marketing; B.Tech., Anna University Madras; M.A., Ohio State University; Ph.D., Ohio State University

Ergun, Emek (2016): Associate Professor, Department of Global Studies; B.A., Boğaziçi University; M.S., Towson University; Ph.D., University of Maryland, Baltimore County

Escobar DeMarco, Jessica (2022): Assistant Professor, Department of Epidemiology and Community Health; B.A., Universidad Evangélica de El Salvador, El Salvador; M.Sc., Cornell University; Ph.D., University of South Carolina

Essakiappan, Somasundaram (2024): Teaching Professor, EPIC; B.S., Anna University; M.S., Texas A&M University; Ph.D., Texas A&M University

Etters, Elizabeth B. (2012): Lecturer, Department of Mathematics and Statistics; B.A., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte

Etzkorn, Markus (2005): Associate Professor, Department of Chemistry; B.S., Albert Ludwigs University of Freiburg, Germany; M.S., Albert Ludwigs University of Freiburg, Germany; Ph.D., Albert Ludwigs University of Freiburg, Germany

Eum, Youngseob (2023): Assistant Professor, Department of Earth, Environmental, and Geographical Sciences; B.A., Seoul National University; M.A., Seoul National University; Ph.D., State University of New York at Buffalo

Ewers, Michael C. (2019): Associate Professor, Department of Earth, Environmental, and Geographical Sciences; B.A., Ohio State University; M.A., Ohio State University; Ph.D., Ohio State University

Exum, Myron Lyn (2000): Associate Professor, Department of Criminal Justice and Criminology; B.A., Wake Forest University; M.A., Wake Forest University; Ph.D., University of Maryland

Fagan, Terence (2016): Teaching Associate Professor, Department of Mechanical Engineering and Engineering Science; B.S., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Fakhro, Dania (2023): Assistant Professor, Department of Counseling; B.S., Aleppo University; Graduate Diploma, Cambridge College International; M.A., Rollins College; Ph.D., University of Central Florida

Faklaris, Cori N. (44788): Assistant Professor, Department of Software and Information Systems; B.S., University of Illinois - Urbana-Champaign; M.S., Indiana University; Ph.D., Carnegie Mellon University

Falaggis, Konstantinos (2017); Assistant Professor, Department of Mechanical Engineering and Engineering Science; B.S., Hamburg University of Technology, Germany; M.E., Hamburg University of Technology, Germany; Ph.D., University of Leeds, England

Falconer, Steven (2015); Professor, Department of Anthropology; M.A., University of Arizona; Ph.D., University of Arizona

Fall, Patricia L. (2015); Professor, Department of Earth, Environmental, and Geographical Sciences; B.A., Prescott College; M.S., University of Arizona; Ph.D., University of Arizona

Fan, Jianping (2001); Professor, Department of Computer Science; M.S., Northwest University, China; Ph.D., Chinese Academy of Sciences, China

Fan, Liyue (2019); Associate Professor, Department of Computer Science; B.S., Zhejiang University, China; Ph.D., Emory University

Fan, Wei (2013); Professor, Department of Civil and Environmental Engineering; B.S., Tongji University, China; M.S., Tongji University, China; Ph.D., University of Texas at Austin

Farney, Lori A. (2012); Lecturer, Department of Sociology; B.S., Middle Tennessee State University; M.A., Middle Tennessee State University

Faust, Mark E. (2003); Associate Professor, Department of Psychological Science; B.A., University of Washington; M.S., University of Oregon; Ph.D., University of Oregon

Ferdinando, Peter (2016); Visiting Lecturer, Department of History; B.A., University of Central Florida; M.A., Florida Atlantic University; Ph.D., Florida International University

Ferdous, Farzana (2020); Lecturer, Department of Biological Sciences; M.S., Clemson University; Ph.D., Clemson University

Fernandes, Anthony M.A. (2007); Professor, Department of Mathematics and Statistics; B.Sc., St. Xavier's College, India; M.Sc., University of Mumbai, India; Ph.D., University of Arizona

Fernandez Sanchez, Paloma (2017); Lecturer, Department of Languages, Cultures, and Translation; B.A., University of Alcalá, Spain; M.A., University of Alcalá, Spain; M.A., Loyola University Chicago; Ph.D., Indiana University Bloomington

Ferrante, Frances A. (2018); Clinical Assistant Professor, School of Social Work; B.S., Concordia College; M.S.W., New York University

Fessler, Adam Bradley (2021); Lecturer, Department of Chemistry; B.S., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Fifield, Austin (2020); Lecturer, Department of Engineering Technology and Construction Management; B.S.E.T., University of North Carolina at Charlotte .

Fillmore Jr., David M. (2004); Professor, Department of Theatre; B.A., Moorhead State University; M.F.A., Northwestern University

Finley, Kelly (2008); Lecturer, Department of Anthropology; B.A., University of North Carolina at Charlotte; M.A., University of Alabama

Fisher, Thomas E. (2014); Clinical Assistant Professor, Office of School and Community Partnerships, Cato College of Education; B.A., University of North Carolina at Charlotte; M.Ed., University of North Carolina at Charlotte; Ed.D., University of North Carolina at Charlotte

Fitzgerald, Miranda S. (2019); Associate Professor, Department of Reading and Elementary Education; B.S., University of Evansville; M.A., Georgetown College; Ph.D., University of Michigan

Fitzgerald, Scott (2003); Department Chair and Professor, Department of Sociology; B.A., Luther College; M.A., Iowa State University; Ph.D., University of Iowa

FitzPatrick, Erin (2017); Associate Professor, Department of Special Education and Child Development; B.A., Illinois College; M.Ed., Middle Tennessee State University; Ph.D., Georgia State University

Flint, Karen E. (2001); Co-Director of Public History; and Associate Professor, Department of History; B.A., Lawrence University; M.A., University of California, Los Angeles

Flores, Wilfredo A. (44788); Asst Prof/Director WRC, Department of Writing, Rhetoric, and Digital Studies; B.A., University of Texas at San Antonio; M.A.T., Texas Tech University; Ph.D., Michigan State University

Fodor, Anthony A. (2006); Professor, Department of Bioinformatics and Genomics; B.A., Vassar College; Ph.D., University of Washington

Foley, Jonathan J. (2022); Associate Professor, Department of Chemistry; B.S., Georgia Institute of Technology; M.S., University of Chicago; Ph.D., University of Chicago

Forget, Thomas (2008); Associate Professor, David R. Rubin School of Architecture; B.A., Columbia University; M.A., Yale University; M.Arch., Princeton University

Forthofer, Melinda (2016); Associate Dean for Academic Affairs, Department of Epidemiology and Community Health; Professor; B.A., Case Western Reserve University; Ph.D., University of Michigan

Fox, Cynthia T. (2002); Lecturer, Department of Marketing; B.A., Wofford College; M.B.A., University of North Carolina at Charlotte

Fox, Robert W. (44929); Senior Lecturer, School of Data Science; B.S., Kansas State University; M.S., University of North Carolina at Charlotte

Foxx, Sejal Parikh (2013); Department Chair and Professor, Department of Counseling; B.A., University of North Florida; M.Ed., University of North Florida; Ph.D., University of North Carolina at Charlotte

Fraher, Andrew (2023); Visiting Clinical Assistant Professor, Department of Business Information Systems and Operations; B.S., Chemical Engineering University; M.B.A., University of Connecticut; D.B.A., University of North Carolina at Charlotte

Fraiser, Matthew (2015); Lecturer and Technical Director, Performing Arts Services, College of Arts + Architecture; B.A., Gardner-Webb University; M.F.A., Florida State University

Frakes, James (2002); Professor, Department of Art and Art History; B.A., Indiana University; M.A., Columbia University; M.Phil., Columbia University; Ph.D., Columbia University

Frank, Cynthia F. (2018); Lecturer, Department of Art and Art History; B.A., Yale University; M.F.A., Yale University

Fratantuono, Ella (2016); Associate Professor, Department of History; B.A., University of Richmond; Ph.D., Michigan State University

Freeman, Heather D. (2006); Professor, Department of Art and Art History; B.A., Oberlin College; M.F.A., Rutgers University

Freeman, Rodney E. (44802); Assistant Professor Librarian, J. Murrey Atkins Library; B.S., Indiana State University; M.P.A., Indiana State University; M.L.S., Purdue University - Indianapolis

Fried, Nathaniel M. (2006); Professor, Department of Physics and Optical Science; B.A., Swarthmore College; M.S., Rensselaer Polytechnic Institute; Ph.D., Northwestern University

Frisch, Miranora O. (2007); Professor, Department of Music; B.A., Saint Olaf College; M.M., Cleveland Institute of Music; D.M.A., University of Minnesota

Fu, Chenglong (44788); Assistant Professor, Department of Software and Information Systems; B.S., University of Science and Technology of China; Ph.D., Temple University

Fuentes, Catherine M. (2008); Professor, Department of Anthropology; B.A., North Carolina State University; M.A., University of Connecticut; Ph.D., University of Connecticut

Funk Johnson, Kristen E. (2019); Assistant Professor, Department of Biological Sciences; B.A., Miami University; Ph.D., Ohio State University

Furr-Rogers, Samantha (2018); Lecturer, Department of Biological Sciences; B.S., University of North Carolina at Charlotte; M.P.H., University of Virginia; Ph.D., University of North Carolina at Charlotte

Futrell, Benjamin J. (2008); Lecturer, David R. Rainin School of Architecture; B.A., University of North Carolina at Charlotte; M.Arch., University of North Carolina at Charlotte

Gabriel, Amanda T. (2014); Lecturer, Turner School of Accountancy; B.S., North Carolina State University; M.Acc., University of North Carolina at Charlotte

Gadaire, Andrew (2023); Assistant Professor, Department of Earth, Environmental, and Geographical Sciences; B.S., Davidson College; M.A., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Gafford, James R. (2018); Professor of Practice and Assistant Director of Research and Special Projects, Energy Production and Infrastructure Center (EPIC); B.S., Christian Brothers University; M.S., Mississippi State University

Gaggl, Paul (2012); Associate Professor, Department of Economics; M.A., University of Vienna; M.A., University of California, Davis; Ph.D., University of California, Davis

Gagne, Sara (2023); Department Chair and Associate Professor, Department of Earth, Environmental, and Geographical Sciences; B.S., McGill University; Ph.D., Carleton University

Gagne, Sara A. (2010); Associate Professor, Department of Earth, Environmental, and Geographical Sciences; B.S., McGill University; Ph.D., Carleton University

Galati, Alexia (2018); Associate Professor, Department of Psychology; B.A., Stanford University; M.A., The University of Chicago; M.A., State University of New York at Stony Brook; Ph.D., State University of New York at Stony Brook

Gales, Altrice M. (2016); Lecturer, Department of Criminal Justice and Criminology; B.A., North Carolina State University; M.S., East Carolina University

Gall, David (2009); Associate Professor, Department of Art and Art History; B.F.A., Visva-Bharati University, India; M.F.A., Maharaja Sahajirao University of Baroda, India; Ph.D., Pennsylvania State University

Gallicano, Tiffany (2016); Associate Professor, Department of Communication Studies; B.A., Willamette University; M.A., University of Maryland; Ph.D., University of Maryland

Gaméz, José L.S. (2002); Dean, College of Arts + Architecture; Professor, School of Architecture, B.A., Texas A&M University; M.Arch., University of California, Berkeley; Ph.D., University of California, Los Angeles

Gandar, John M. (1982); Professor, Department of Economics; B.A., Massey University; M.A., Victoria University; M.A., University of Missouri-Columbia; Ph.D., University of Missouri-Columbia

Gao, Wei (2019); Lecturer, Department of Electrical and Computer Engineering; B.S., Tsinghua University, China; M.S., General Research Institute For Nonferrous Metals, China; Ph.D., Abertay University, Scotland

Gao, Wenyu (2023); Assistant Professor, Department of Mathematics and Statistics; B.S., University of Hong Kong; M.A., Columbia University; Ph.D., Virginia Tech University

Gao, Zheming (2025); Assistant Professor, Department of Industrial and Systems Engineering; B.S., Beihang University, China; M.S., Texas A&M University; M.S., North Carolina State University; Ph.D., North Carolina State University

Garcia, William J. (2004): *Lecturer, Department of Earth, Environmental, and Geographical Sciences; B.A., Washington and Lee University; M.S., Fort Hays State University*

Garcia Leon, Javier E. (2019): *Associate Professor, Department of Languages, Cultures, and Translation; B.Ed., National Pedagogic University, Colombia; M.A., National University of Colombia; Ph.D., University of Ottawa, Canada*

Gardenal Augusto, Danillo (44788): *Assistant Professor, Department of Biological Sciences; B.S., Federal University of Parana, Brazil; M.S., Federal University of Parana, Brazil; Ph.D., Federal University of Parana, Brazil*

Gaub, Janne E. (2019): *Associate Professor, Department of Criminal Justice and Criminology; B.S., University of Arizona; M.A., Arizona State University; Ph.D., Arizona State University*

Gaultney, Jane F. (1992): *Professor, Department of Psychological Science; B.A., Palm Beach Atlantic University; M.A., Florida Atlantic University; Ph.D., Florida Atlantic University*

Gbur, Greg J. (2004): *Professor, Department of Physics and Optical Science; B.A., The University of Chicago; M.A., University of Rochester; Ph.D., University of Rochester*

Ge, Eva (2023): *Assistant Professor, Department of Chemistry; B.A., Cornell University; Ph.D., Princeton University*

Ge, Yaorong (2012): *Professor, Department of Software and Information Systems; B.S., Zhejiang University, China; M.S., Vanderbilt University; Ph.D., Vanderbilt University*

Ge, Yong (2013): *Assistant Professor, Department of Computer Science; B.S., Xi'an Jiaotong University, China; M.S., University of Science and Technology of China; Ph.D., Rutgers University*

Gehrig, Bruce (2002): *Undergraduate Coordinator and Associate Professor, Department of Engineering Technology and Construction Management; B.S., Brigham Young University; M.S., University of Colorado at Boulder at Denver*

Gentry, Thomas A. (2007): *Associate Professor, David R. Ravin School of Architecture; B.Arch., University of Arizona; M.Arch., Illinois Institute of Technology*

Gerardy, Christopher L. (2014): *Lecturer, Department of Physics and Optical Science; B.S., California Institute of Technology; Ph.D., Dartmouth College*

Gerges, Awad S. (2012): *Lecturer, Department of Physics and Optical Science; M.Sc., Military Technical College, Egypt; Ph.D., University of Kent, England*

Gero, John (2014): *Research Professor, Department of Computer Science; B.C.E., University of New South Wales, Australia; M.S., University of Sydney, Australia; Ph.D., University of Sydney, Australia*

Ghali, Noha (2017): *Lecturer, Department of Languages, Cultures, and Translation; B.A., Alexandria University, Egypt; M.A., American University in Cairo, Egypt*

Ghasemi, Amirhossein (2017): *Associate Professor, Department of Mechanical Engineering and Engineering Science; B.S.M.E., Ferdowsi University of Mashad, Iran; M.S.M.E., Amirkabir University of Technology, Iran; Ph.D., University of Kentucky*

Ghosh, Aloke (2019): *Distinguished Professor of Accounting, Turner School of Accountancy; B.S., St. Xavier's College, India; M.A., Tulane University; Ph.D., Tulane University*

Gibas, Cynthia J. (2005): *Interim Department Chair and Professor, Department of Bioinformatics and Genomics; B.A., Lawrence University; Ph.D., University of Illinois at Urbana-Champaign*

Gibbons, Julie W. (2016): *Lecturer, School of Nursing; B.S.N., Georgetown University; M.P.H., University of North Carolina at Chapel Hill*

Gibson, Simon (2017): *Professor of Practice, Department of History; B.A., UCL Institute of Archaeology, England; Ph.D., University of London, England*

Giersch, Jason (2013): *Associate Professor, Department of Political Science and Public Administration; B.A., College of William & Mary; M.Ed., Pennsylvania State University; Ph.D., University of North Carolina at Charlotte*

Gilbert, Katelyn R. (2020): *Lecturer, College of Education; B.A., University of North Carolina at Charlotte; M.Ed., University of North Carolina at Charlotte*

Gilman, Caitlin (2023): *Visiting Lecturer, Department of Mathematics and Statistics; A.A., Cape Fear Community College; B.S., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte*

Gil-Rivas, Virginia (2003): *Professor, Department of Psychological Science; B.A., Universidad Veracruzana, Mexico; M.A., California State University, Dominguez Hills; Ph.D., University of California, Irvine*

Gilson, Cindy (2014): *Associate Dean and Professor, Honors College; B.S., University of Connecticut; M.A., University of Connecticut; Ph.D., University of Connecticut*

Gin, Matthew T. (44788): *Assistant Professor, David R. Ravin School of Architecture; B.A., B.M., Oberlin College; M.E.D., Yale University; A.M., Harvard University; Ph.D., Harvard University*

Girardeau, Arnetta (2023): *Copyright and Licensing Librarian, J. Murrey Atkins Library - Copyright and Licensing Librarian; B.A., Harvard University; M.A., Duke University; J.D., University of North Carolina at Chapel Hill; M.L.I.S., Florida State University*

Glass, Tehia Starker (2008): *Interim Director of Center for ADVANCing Faculty Success, Department of Reading and Elementary Education; Professor; B.S., Bethune-Cookman University; M.A., University of Northern Iowa; Ph.D., University of Nebraska-Lincoln*

Godev, Concepción B. (1998); Professor, Department of Languages, Cultures, and Translation; B.A., University of Malaga; M.A., Pennsylvania State University; Ph.D., Pennsylvania State University

Godfrey-Hurrell, Jessica K. (2019); Clinical Assistant Professor, Department of Special Education and Child Development; B.A., University of North Carolina at Charlotte; M.Ed., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Godin, Yuri (2003); Associate Professor, Department of Mathematics and Statistics; M.S., St. Petersburg State Technical University, Russia; D.Sc., Technion-Israel Institute of Technology, Israel

Godlewska, Maja (2004); Professor, Department of Art and Art History; M.F.A., Eugeniusz Geppert Academy of Fine Arts, Poland

Godly-Reynolds, Erin (2019); Lecturer, Department of Psychological Science; B.A., Marist College; M.A.Ed., Wingate University; M.A., University of North Carolina at Charlotte

Goff, Andrew (2023); Lecturer, Department of Biological Sciences; A.A., Pitt Community College; B.S., University of North Carolina at Wilmington; M.S., University of North Carolina at Wilmington

Goff, Andrew D. (44788); Visiting Lecturer, Department of Biological Sciences; A.A., Pitt Community College; B.S., University of North Carolina at Wilmington; M.S., University of North Carolina at Wilmington

Goff, John (2020); Lecturer, Department of Engineering Technology and Construction Management; B.S., Western Carolina University; M.S., Western Carolina University

Gokmen, Sabri (2024); Assistant Professor, David R. Rainin School of Architecture; B.S., Middle East Technical University; M.S., Georgia Institute of Technology; Ph.D., Georgia Institute of Technology

Goldfield, David R. (1982); Robert Lee Bailey Professor of History, Department of History; B.A., Brooklyn College; M.A., University of Maryland; Ph.D., University of Maryland

Golmohammadi, Alireza (2021); Assistant Professor, Department of Marketing; Ph.D., University of Arkansas

Gomoluch, Susanne (2016); Lecturer, Department of Languages, Cultures, and Translation; M.A., Ruhr-University Bochum, Germany; M.A., University of North Carolina at Chapel Hill; Ph.D., University of North Carolina at Chapel Hill

Good, Amy J. (2008); Associate Professor, Department of Reading and Elementary Education; B.S.Ed., Ohio University; M.Ed., Ohio University; Ph.D., University of Virginia

Gooty, Janaki (2010); Professor, Department of Management; B.S., The National Institute of Engineering; M.B.A., University of Central Oklahoma; Ph.D., Oklahoma State University

Gordon, Alexander Y. (2006); Associate Professor, Department of Mathematics and Statistics; M.S., Moscow State University, Russia; Ph.D., Moscow Institute of Electronic Engineering, Russia

Gordon, Melodye A. (2016); Visiting Lecturer, Department of Writing, Rhetoric, and Digital Studies; B.S., University of North Carolina at Charlotte; M.A., University of North Carolina at Charlotte

Gossett, Loril M. (2008); Associate Professor, Department of Communication Studies; B.A., University of Colorado at Boulder; Ph.D., University of Colorado at Boulder

Gouthro, Susan (2024); Assistant Professor, Department of Music; B.A., Queen's University, Canada; B.M., Queen's University, Canada; D.M.A., James Madison University

Govias, Jonathan (2013); Assistant Professor, Department of Music; B.Mus., University of Victoria; M.M., University of Denver; D.Mus., McGill University

Grabchak, Michael (2011); Professor, Department of Mathematics and Statistics; B.A., Cornell University; M.S., Cornell University; Ph.D., Cornell University

Grace, Kazjon S. (2015); Research Assistant Professor, Department of Software and Information Systems; B.S., University of Sydney, Australia; Ph.D., University of Sydney, Australia

Graham, Ronald S. (2020); Lecturer, Department of Engineering Technology and Construction Management; B.S.M.E., West Virginia University; M.Engr., Colorado State University

Grandinetti, Justin (2019); Associate Professor, Department of Communication Studies; B.S., James Madison University; M.A., James Madison University; Ph.D., North Carolina State University

Grano, Daniel A. (2004); Department Chair and Professor, Department of Communication Studies; B.A., University of Memphis; M.A., Louisiana State University; Ph.D., Louisiana State University

Grant, Lynnore (2025); Assistant Professor, Department of Mechanical Engineering and Engineering Science; B.Sc., West Virginia University; Ph.D., Rice University

Graves, William (2000); Professor, Department of Earth, Environmental, and Geographical Sciences; B.A., University of North Carolina at Chapel Hill; M.A., University of Georgia; Ph.D., University of Georgia

Grdzelishvili, Valery Z. (2006); Professor, Department of Biological Sciences; B.S., Moscow State University, Russia; M.S., Moscow State University, Russia; Ph.D., Moscow State University, Russia

Green, Courtney S. (2015); Lecturer, Department of Engineering Technology and Construction Management; B.S., Marshall University; M.S.E., University of North Carolina at Charlotte

Green, Garth L. (2004); Lecturer, Department of Anthropology; B.A., Duke University; M.A., New School for Social Research; Ph.D., New School for Social Research

Greene, Tisha R. (2018); Interim Associate Dean for Undergraduate Programs and Student Success, Cato College of Education; Clinical Assistant Professor, Department of Educational Leadership; B.A., University of North Carolina at Charlotte; M.A., University of North Carolina at Charlotte; Ed.S., Wingate University; Ed.D., Wingate University

Griffin, Willie J. (44788); Assistant Professor, Honors College; B.A., Morehouse College; M.A., Morgan State University; Ph.D., University of North Carolina at Chapel Hill

Grigorova, Miryana (2017); Assistant Professor, Department of Mathematics and Statistics; B.S., Paris Dauphine University; Ph.D., Paris Diderot University (Paris 7)

Grymes, James (Jay) (2002); Professor, Department of Music; B.M., Virginia Commonwealth University; M.M., Florida State University; Ph.D., Florida State University

Gullena, Emily S. (44788); Lecturer, School of Nursing; A.A., Grand Rapids Community College; A.D.N., Grand Rapids Community College; B.S.N., Ferris State University; M.S.N., Ferris State University

Gunn, Laura H. (2018); Professor, Department of Epidemiology and Community Health; B.A., Jacksonville University; M.S., Duke University; Ph.D., Duke University

Gunter, Donna (2001); Associate Professor and Humanities Librarian, J. Murrey Atkins Library; B.A., University of North Carolina at Charlotte; M.A., Clemson University; M.L.S., University of South Carolina

Guo, Jun-tao (2007); Department Chair and Professor, Department of Bioinformatics and Genomics; B.S., Nankai University, China; M.S., Nankai University, China; M.S., University of Kentucky; Ph.D., University of Kentucky

Guo, Yuqi (2019); Associate Professor, School of Social Work; B.A., East China University of Science and Technology; M.S.W., University of Alabama; Ph.D., University of Alabama

Gwyn, Aaron C. (2003); Associate Professor, Department of English; B.A., East Carolina University; M.A., Oklahoma State University; Ph.D., University of Denver

Haber, Mason G. (2008); Assistant Professor, Department of Psychological Science; B.A., University of Michigan; M.A., Wayne State University; Ph.D., Wayne State University

Hackett, Michael E. (2011); Assistant Professor, Department of Music; B.M., Indiana University Bloomington; M.M., Indiana University Bloomington; D.M., Indiana University Bloomington

Hadzikadic, Mirsad S. (1987); Professor, Department of Software and Information Systems; B.S., University of Banja Luka, Bosnia; M.S., University of Banja Luka, Bosnia; Ph.D., Southern Methodist University

Hague, Douglas (2019); Executive Director and Professor of Practice, School of Data Science; B.S., University of Tulsa; M.S., Pennsylvania State University; Ph.D., Pennsylvania State University

Hajja, Ayman (2023); Teaching Associate Professor, Department of Computer Science; B.S., Yarmouk University; M.S., Northern Illinois University; Ph.D., University of North Carolina at Charlotte

Haldeman, Randal K. (2004); Professor, Department of Music; B.M., University of Wisconsin-Whitewater; M.M., Northwestern University; Ph.D., Florida State University

Hales, Travis W. (2018); Associate Professor, School of Social Work; B.A., State University of New York at Fredonia; M.S.W., University at Buffalo; Ph.D., University at Buffalo

Hall, John (2023); Assistant Professor, EPIC; B.S., Missouri University of Science and Technology; M.S., University of Texas at Austin; Ph.D., University of Texas at Austin

Hall, Robert Mark (2020); Department Chair and Professor, Department of Writing, Rhetoric, and Digital Studies; B.A., Emory University; M.A., University of Alabama; Ph.D., University of Louisville

Hall-Hertel, Katherine (2007); Associate Dean for Graduate Academic and Student Affairs, Graduate School; B.A., California State University; M.A., Catholic University of America; Ed.D., George Washington University

Hammelman, Colleen (2017); Associate Professor, Department of Earth, Environmental, and Geographical Sciences; B.A., Colorado State University; M.A., American University; Ph.D., Temple University

Han, Sungil (44743); Assistant Professor, Department of Criminal Justice and Criminology; B.A., Kyonggi University; M.A., Kyonggi University; Ph.D., University of Central Florida; Ph.D., University of Texas at Dallas

Han, Yufeng (2016); Professor, Department of Finance; B.S., Tsinghua University, China; M.A., State University of New York at Buffalo; M.S., Washington University in St. Louis; Ph.D., Washington University in St. Louis

Hancock, Cynthia (2006); Lecturer, Department of Sociology; B.S., Shepherd College; M.A., University of North Carolina at Chapel Hill; Ph.D., University of North Carolina at Chapel Hill

Hardman, Kristi (2023); Assistant Professor, Department of Music; B.Ed., University of Manitoba; B.Mus., University of Manitoba; M.A., University of British Columbia; Ph.D., The City University of New York Graduate School and University Center

Harkins, Margaret S. (2011); Lecturer, The William States Lee College of Engineering; B.S.C.E., Drexel University; M.S., Drexel University

Harris, Henry (Hank) L. (2004); Assistant Dean and Director of Academic and Career Coaching, Department of Counseling; B.A., University of North Carolina at Wilmington; M.Ed., University of North Carolina at Chapel Hill; Ph.D., University of Virginia

Harris, Melanie L. (2001); Assistant Dean and Director of Academic and Career Coaching, Department of Biological Sciences; Lecturer; Dipl., Universite d'Aix-en-Provence, France; B.A., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte

- Harris, Michael (2023); Library Resident, J. Murrey Atkins Library;** B.A., Chicago State University; M.S., University of Illinois; M.L.I.S., San Jose State University
- Harris, Michelle (2024); Assistant Professor, Department of Criminal Justice and Criminology;** B.A., University of Arkansas; M.A., Georgia State University; Ph.D., Georgia State University
- Harris, Ryan L. (2017); Associate Dean for Public Services, J. Murrey Atkins Library;** B.A., University of California, San Diego; M.L.I.S., Louisiana State University
- Hart, Walter H. (2018); Clinical Assistant Professor, Department of Educational Leadership;** B.A., Wake Forest University; M.Ed., University of North Carolina at Charlotte; Ed.D., University of North Carolina at Charlotte
- Hartley, Andrew J. (2005); Russell M. Robinson II Distinguished Professor of Shakespeare; Professor, Department of Theatre;** B.A., University of Manchester; M.A., Boston University; Ph.D., Boston University
- Hartman, James J. (2017); Lecturer, Office of Student Development and Success, The William States Lee College of Engineering;** B.S., Wayne State University; M.B.A., University of Central Florida
- Hartman, Jennifer L. (2002); Associate Professor, Department of Criminal Justice and Criminology;** B.A., Loyola College of Baltimore; M.S., University of Baltimore; Ph.D., University of Cincinnati
- Hashempour, Javad (2019); Assistant Professor, Department of Engineering Technology and Construction Management;** B.S., National Technical University of Ukraine; M.S., University of Manchester, England; Ph.D., University of Southern Queensland, Australia
- Hauser, Edwin (2000); Director of Transportation Studies; Professor, Department of Earth, Environmental, and Geographical Sciences; Professor, Department of Civil and Environmental Engineering,** B.S., North Carolina State University; M.A., University of North Carolina at Chapel Hill; Ph.D., North Carolina State University
- Hayes, Nathan (2023); Assistant Professor of Management, Department of Management;** B.S., Texas Tech University; Ph.D., Louisiana State University
- Haynes, Christine (2002); Professor, Department of History;** B.A., University of Michigan; M.A., The University of Chicago; Ph.D., The University of Chicago
- Haynes, Tabitha R. (2021); Clinical Assistant Professor, Department of Counseling;** B.A., University of North Carolina at Wilmington; M.A., North Carolina Central University; Ph.D., North Carolina State University
- He, Xiuli (2008); Professor, Department of Business Information Systems and Operations Management;** Bachelor's, Shanghai Tie Dao University, China; M.S., Shanghai Jiao Tong University, China; Ph.D., University of Texas at Austin
- Heafner, Tina (2002); Professor, Department of Middle, Secondary, and K-12 Education;** B.A., Wake Forest University; M.A., Wake Forest University; Ph.D., University of North Carolina at Greensboro
- Heath, Kerbon (2024); Lecturer, School of Nursing;** A.S., Ida State University; A.N., Columbus State Community College; B.S.N., Ohio State University; D.N.P., Ohio University
- Heberlig, Eric (2000); Professor, Department of Political Science and Public Administration;** B.A., Franklin and Marshall College; M.A., Ohio State University; Ph.D., Ohio State University
- Heggestad, Eric D. (2005); Associate Provost for Faculty Affairs, Department of Psychological Science;** B.A., Saint Olaf College; M.A., University of Minnesota; Ph.D., University of Minnesota
- Helmy, Ahmed (2022); Associate Dean for Research, College of Computing and Informatics; Professor, Department of Computer Science;** B.Sc., Cairo University, Egypt; M.S., University of Southern California; Ph.D., University of Southern California
- Her, Tsing Hua (2003); Associate Professor, Department of Physics and Optical Science;** B.S., National Tsing Hua University, Taiwan; Ph.D., Harvard University
- Hernandez, Jessica (2023); Lecturer, School of Nursing;** B.S.N., East Carolina University; M.S.N., East Carolina University
- Hetyei, Gabor (2000); Professor, Department of Mathematics and Statistics;** M.S., Eötvös Loránd University, Hungary; Ph.D., Massachusetts Institute of Technology
- Hewlin, Rodward (2017); Associate Professor, Department of Engineering Technology and Construction Management;** B.S., North Carolina A&T State University; M.S., North Carolina A&T State University; Ph.D., North Carolina A&T State University
- Higham, Carol L. (2015); Visiting Lecturer, Department of History;** B.A., Wellesley College; M.A., Yale University; Ph.D., Duke University
- Hildreth, John C. (2008); Associate Professor, Department of Engineering Technology and Construction Management;** B.S., West Virginia University; M.S., West Virginia University; Ph.D., Virginia Polytechnic Institute and State University
- Hill, Raquel (2016); Lecturer, School of Nursing;** B.S.N., Marshall University; M.S.N., Walden University
- Hines, Robert (2023); Assistant Professor, Department of Political Science and Public Administration;** B.A., University of Georgia; M.P.A., University of Georgia; Ph.D., University of Georgia
- Hippensteel, Scott (2002); Professor, Department of Earth, Environmental, and Geographical Sciences;** B.S., Shippensburg University; M.S., University of Delaware; Ph.D., University of Delaware
- Hobbs, Erica N. (2015); Lecturer, Office of School and Community Partnerships, Cato College of Education;** B.S., Winston-Salem State University; M.Ed., Montreat College

Hochhalter, Aspen N. (2007); Associate Professor, Department of Art and Art History; B.F.A., Creighton University; M.F.A., East Carolina University

Hodge, Susan S. (2008); Lecturer, Department of Criminal Justice and Criminology; B.S., Appalachian State University; M.S., University of North Carolina at Charlotte

Hodgins, M. Garry (2007); Lecturer, Department of Mechanical Engineering and Engineering Science; B.S., Hampden-Sydney College; Ph.D., University of Virginia

Hoenes, Eric (2013); Associate Professor, Department of Religious Studies; B.A., Boston University; M.A., University of California, San Diego; Ph.D., University of California, San Diego

Hogan, Kathleen J. (2014); Professor, Department of English; B.B.A., Western Connecticut State University; M.A., Northeastern University; Ph.D., Rutgers University

Holleman, Jeremy (2016); Associate Professor, Department of Electrical and Computer Engineering; B.S., Georgia Institute of Technology; M.S., University of Washington; Ph.D., University of Washington

Homann, Lisa (2014); Associate Professor, Department of Art and Art History; B.A., University of Washington; M.A., University of California; Ph.D., University of California, Los Angeles

Hong, Tao (2013); Professor, Department of Industrial and Systems Engineering; B.S.E., Tsinghua University, China; M.S., North Carolina State University; Ph.D., North Carolina State University

Hoover, Fushcia-Ann (2021); Assistant Professor, Department of Earth, Environmental, and Geographical Sciences; B.S., University of St. Thomas; M.S., Purdue University; Ph.D., Purdue University

Hopper, Lorenzo (2018); Lecturer, Department of Epidemiology and Community Health; B.A., University of North Carolina at Chapel Hill; M.P.H., East Carolina University

Hopper, Lorenzo N. (2018); Lecturer, Department of Epidemiology and Community Health; B.A., University of North Carolina at Chapel Hill; M.P.H., East Carolina University

Horger, Jacob (2010); Lecturer, Department of Chemistry; B.S., Beloit College; Ph.D., University of South Carolina at Columbia

Horne, Carolyn E. (2022); Associate Professor, School of Nursing; B.S.N., East Carolina University; M.S.N., East Carolina University; Ph.D., East Carolina University

Horne, Timothy S. (2006); Senior Lecturer, Department of Communication Studies; B.A., University of North Carolina at Charlotte; M.A., University of North Carolina at Charlotte

Houck, Charles W. (2008); Lecturer, Department of Global Studies; B.A., Davidson College; M.A., Tulane University; Ph.D., Tulane University

Houston, Evan G. (1974); Professor, Department of Mathematics and Statistics; B.A., Hendrix College; Ph.D., University of Texas at Austin

Howden, Reuben (2008); Professor, Department of Applied Physiology, Health, and Clinical Sciences; B.S., Anglia Ruskin University; Ph.D., De Montfort University

Howell, Catherine (Katie) C. (2016); Interim Associate Dean for Special Collections & University Archives, J. Murrey Atkins Library; B.A., DePaul University; M.S.I.S., University of Texas at Austin

Howell, Cathy D. (2017); Clinical Assistant Professor, Department of Educational Leadership; B.S., East Carolina University; M.A., East Carolina University; Ph.D., University of North Carolina at Charlotte

Howitt, Ivan (2002); Associate Professor, Department of Electrical and Computer Engineering; B.S.E., Georgia Institute of Technology; M.S., Georgia Institute of Technology; Ph.D., University of California, Davis

Hsiang, Simon M. (2015); Department Chair and Professor, Department of Industrial and Systems Engineering; B.S., Feng Chia University; M.S., Texas Tech University; Ph.D., Texas Tech University

Hsu, Frances (2019); Visiting Associate Professor, David R. Rubin School of Architecture; B.S., University of Virginia; M.Arch., Harvard University; Ph.D., Swiss Federal Institute of Technology

Huang, Ming-Chang (2011); Clinical Assistant Professor, Department of Business Information Systems and Operations Management; B.S., National Tsing Hua University, Taiwan; M.S., University of Wisconsin-Madison; Ph.D., University of Wisconsin-Milwaukee

Huerta, Jill (2018); Assistant Dean and Director of the Reynolds Center for Graduate Life and Learning, Center for Graduate Life and Learning; Executive Director; B.A., University of Michigan-Ann Arbor; M.A., Central Michigan University; Ph.D., Michigan State University

Huet, Yvette M. (1991); Department Chair and Director, ADVANCE Faculty Affairs and Diversity Office; Professor, Department of Biological Sciences; B.A., University of Kansas at Lawrence; Ph.D., University of Kansas Medical Center

Hughes, Charles D. (44788); Lecturer, Department of Business Information Systems and Operations Management; B.A., University of North Carolina at Charlotte; M.B.A., University of North Carolina at Charlotte

Hull, Gordon (2008); Professor, Department of Philosophy; B.A., Wake Forest University; M.A., Vanderbilt University; Ph.D., Vanderbilt University

Hunt, Tanya M. (2015); Assistant Dean of Student Services, College of Humanities & Earth and Social Sciences; B.A., West Virginia University; M.A., Liberty University

Hutchcraft, Allison M. (44743); Writer in Res/Asst Teach Prof, Department of English; B.A., Lewis & Clark College; M.F.A., Purdue University

Hutchens, Thomas C. (2021); Research Assistant Professor, Department of Physics and Optical Science; B.S., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Hutchison, Charles B. (2003); Professor, Department of Middle, Secondary, and K-12 Education; B.Sc., University of Cape Coast; M.A., Oklahoma Christian University of Science and Arts Ministry; Ph.D., Georgia State University

Hyman, Christy (2024); Assistant Professor, Department of History; B.A., University of North Carolina at Greensboro; M.A., Virginia State University; MLIS, University of North Carolina at Greensboro; Ph.D., University of Nebraska

Idziorek, Katherine (2021); Assistant Professor, Department of Earth, Environmental, and Geographical Sciences; B.Arch., University of Minnesota, Twin Cities; M.Arch., University of Washington; MURP, University of Washington

Inabnit, Lanny S. (2014); Clinical Assistant Professor, Department of Applied Physiology, Health, and Clinical Sciences; B.S., East Carolina University; M.S., Northeastern University

Ingram, Suzanne E. (2011); Lecturer, Department of English; B.S., Appalachian State University; M.A., Appalachian State University

Ivanina, Anna V. (2017); Research Assistant Professor, Department of Biological Sciences; B.S., Kazan State University, Russia; M.S., Russian Academy of Sciences; Ph.D., Kazan State Academy of Veterinary Medicine, Russia

Jackson, Tiffany L. (2022); Clinical Assistant Professor, School of Nursing; B.S.N., Waynesburg University; M.S.N., Duquesne University; D.N.P., Chatham University

Jackson, Tony E. (1994); Professor, Department of English; B.A., University of South Carolina; M.A., University of Oregon; Ph.D., University of California, Los Angeles

Jacob Machado, Denis (44788); Assistant Professor, Department of Bioinformatics and Genomics; B.S., University of Sao Paulo; M.S., University of Sao Paulo; Ph.D., University of Sao Paulo

Jacobs, Donald J. (2005); Professor, Department of Physics and Optical Science; A.S., Fulton-Montgomery Community College; B.S., Union College; M.S., Purdue University; Ph.D., Purdue University

Jakeway, Angela (2014); Lecturer, Department of Languages, Cultures, and Translation; B.A., Pforzheim University of Applied Sciences; M.A.T., University of North Carolina at Charlotte

Jalali, Nima (2015); Associate Professor, Department of Marketing; B.S., University of Isfahan, Iran; M.B.A., University of Tehran, Iran; Ph.D., University of Wisconsin-Milwaukee

Jang, Jaeyoung (2024); Assistant Professor, Department of Health Management and Policy; B.S., Ewha Woman's University; M.A., Seoul National University; Ph.D., Seoul National University; Ph.D., Florida State University

Janies, Daniel A. (2012); Carol Grotnes Belk Distinguished Professor, Department of Bioinformatics and Genomics; B.S., University of Michigan-Ann Arbor; Ph.D., University of Florida

Janowiak, David (2023); Department Chair and Professor, Department of Theatre; B.A., Lakeland University; M.F.A., University of Wisconsin at Milwaukee

Jarrett, Christopher H. (2009); Director and Professor, David R. Rain School of Architecture; B.Arch., University of Oregon; M.S., Columbia University of New York

Jason, Kendra J. (2015); Associate Professor, Department of Sociology; B.A., Augusta State University; M.S., North Carolina State University; Ph.D., North Carolina State University

Jeannot, Christopher S. (2008); Lecturer, Department of English; B.A., University of Missouri at Saint Louis; M.A., University of North Carolina at Charlotte

Jeffers, William T. (2016); Visiting Lecturer, J. Murrey Atkins Library; B.A., University of North Carolina at Charlotte; M.A., University of North Carolina at Charlotte

Jenkins, Mason Ryan (2021); Clinical Assistant Professor, Department of Marketing; B.A., University of North Carolina at Chapel Hill; M.A., Northeastern University; Ph.D., Northeastern University

Jiang, Jiancheng (2007); Professor, Department of Mathematics and Statistics; B.S., Nankai University, China; M.A., Nankai University, China; Ph.D., Nankai University, China

Jiang, Min (2007); Professor, Department of Communication Studies; B.A., Beijing Foreign Studies University, China; M.A., Beijing Foreign Studies University, China; Ph.D., Purdue University

Johar, Monica S. (2006); Professor, Department of Business Information Systems and Operations Management; B.E., University of Pune, India; M.S., University of Texas at Dallas; Ph.D., University of Texas at Dallas

Johnson, David (2009); Professor, Department of History; B.A., University of Nevada, Reno; M.A., California State University, Sacramento; Ph.D., University of California, Irvine

Johnson, Elizabeth A. (2019); Senior Lecturer, Department of Computer Science; B.A., University of South Carolina; M.A., University of North Carolina at Charlotte; Ed.D., George Washington University

Johnson, Morgan B. (2018); Research Assistant Professor, Department of Biological Sciences; B.S., College of William & Mary; M.S., University of Virginia; Ph.D., University of Virginia

Johnson, Morgan B. (2018); Research Assistant Professor, Department of Biological Sciences; B.S., College of William & Mary; M.S., University of Virginia; Ph.D., University of Virginia

Jones, April (2015); Visiting Lecturer, Department of Theatre; B.A., North Carolina Central University; M.F.A., Virginia Commonwealth University

Jones, Kia F. (2012); Lecturer, Department of Reading and Elementary Education; B.S., University of North Carolina at Greensboro; M.A., North Carolina Agricultural and Technical State University

Jones, Kim (2010); Associate Professor, Department of Dance; B.F.A., Marymount Manhattan College; M.F.A., Florida State University

Jones Cameron, Shanice (2021); Assistant Professor, Department of Communication Studies; B.A., North Carolina Central University; M.A., University of North Carolina at Charlotte

Jordan, Kathleen (2014); Clinical Assistant Professor, School of Nursing; B.S.N., D'Youville College; M.S., University of Rochester; D.N.P., University of South Alabama

Jordan, Sarah L. (1997); Associate Professor, Department of Special Education and Child Development; B.S., East Carolina University; M.A., East Carolina University; Ph.D., University of Florida

Joyner, Margarettte (44788); Visiting Assistant Professor, Department of Theatre; B.F.A., University of South Alabama; M.F.A., Virginia Commonwealth University

Juengst, Sara L. (2017); Associate Professor, Department of Anthropology; B.A., Vanderbilt University; Ph.D., University of North Carolina at Chapel Hill

Jugan, Daniel J. (2013); Lecturer, Department of Computer Science; B.S.Ed., Appalachian State University; M.S., University of North Carolina at Charlotte

Jutmaan, Yanjmaa (44788); Assistant Teaching Professor, Department of Mathematics and Statistics; B.S., Khan-Uul Institute of Mongolia; M.S., Korea Advanced Institute of Science and Technology; Ph.D., University of North Carolina at Charlotte

Kaffen, Philip (2017); Associate Professor, Department of Languages, Cultures, and Translation; B.A., San Jose State University; M.A., University of Washington; Ph.D., New York University

Kaloyanides, Alexandra (2017); Associate Professor, Department of Religious Studies; B.A., Columbia University; M.Phil., Yale University; Ph.D., Yale University

Kamalasadan, Sukumar (2010); Professor, Department of Electrical and Computer Engineering; B.S.E.E., Calicut University; M.S.E., Asian Institute of Technology; Ph.D., University of Toledo

Kanczewski, Steven (2023); Lecturer, Turner School of Accountancy; B.S., University of South Carolina; M.S.A., Wake Forest University

Kangmennaang, Joseph (2019); Assistant Professor, Department of Earth, Environmental, and Geographical Sciences; B.A., University of Ghana; M.A., University of Western Ontario, Canada; Ph.D., University of Waterloo, Canada

Karahan, Selcuk (2024); Clinical Assistant Professor, Department of Finance; B.B.A., Marmara University, Turkey; M.S., West Virginia University; Ph.D., University of Cincinnati

Karp, Jason (2018); Lecturer, Department of Computer Science; B.A., Florida Atlantic University; M.S., Nova Southeastern University; Ed.D., Nova Southeastern University

Kashtan, Aaron (2016); Lecturer, Department of Writing, Rhetoric, and Digital Studies; B.A., Brown University; M.A., Dartmouth College; Ph.D., University of Florida

Katsanos, Fotini G. (2006); Lecturer, Department of Religious Studies; B.A., University of North Carolina at Greensboro; M.A., University of South Carolina at Columbia

Katz, Peta (2013); Lecturer, Department of Anthropology; B.A., University of the Witwatersrand; M.A., The University of Chicago; M.Phil., Yale University; Ph.D., Yale University

Kaye, Emma (2024); Visiting Lecturer, Department of Art and Art History; B.F.A., Pratt Institute; Post-Baccalaureate Studies, Syracuse University; Graduate Studies, Alfred University

Kazemi, Mohammad A. (1982); Professor, Department of Mathematics and Statistics; B.S., Pahlavi University, Iran; M.S., Arya-Mehr University; Ph.D., University of Michigan

Keanini, Russell G. (1992); Professor, Department of Mechanical Engineering and Engineering Science; B.S., Colorado School of Mines; M.S., University of Colorado at Boulder; Ph.D., University of California, Berkeley

Kearney, Linwood W. (2016); Clinical Assistant Professor, Turner School of Accountancy; B.S.B.A., East Carolina University; M.B.A., East Carolina University; Ph.D., Florida State University

Keen, Olya S. (2013); Associate Professor, Department of Civil and Environmental Engineering; B.S., University of South Florida; M.S.E.E., University of South Florida

Keles, Ozgur (2024); Associate Professor, Department of Mechanical Engineering and Engineering Science; B.S., Middle East Technical University; M.S., Middle East Technical University; Ph.D., Purdue University

Kellermanns, Franz (2013); Professor, Department of Management; M.B.A., Indiana University of Pennsylvania; Ph.D., University of Connecticut

Kelly, Michael J. (2005); Professor, Department of Philosophy; B.A., University of Massachusetts Boston; Ph.D., Boston University

Kelly, Scott David (2007); Professor, Department of Mechanical Engineering and Engineering Science; B.S., Cornell University; M.S., California Institute of Technology; Ph.D., California Institute of Technology

Kenar, Anna K. (2018); Lecturer, Department of Art and Art History; B.A., Benedictine University; M.F.A., Northern Illinois University

Kennerly, Susan M. (2012); Professor, School of Nursing; B.S.N., East Carolina University; M.Ed., University of North Carolina at Charlotte; M.N., University of South Carolina; Ph.D., University of Texas

Kernicky, Timothy P. (2020); Research Assistant Professor, Energy Production and Infrastructure Center (EPIC); B.S., Gardner-Webb University; M.S.E., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Kerr, David S. (2005); Associate Professor, Turner School of Accountancy; B.S., Utah State; Ph.D., Michigan State University

Keynton, Robert S. (2020); Dean, The William States Lee College of Engineering; Professor, Department of Mechanical Engineering and Engineering Science; B.S., Virginia Polytechnic Institute and State University; M.S., University of Akron; Ph.D., University of Akron

Khan, Saffeer M. (2022); Associate Professor of Practice and Lab Manager, Energy Production and Infrastructure Center (EPIC); B.E., NED University of Engineering and Technology, Pakistan; M.S., National University of Sciences and Technology, Pakistan; Ph.D., University of North Carolina at Charlotte

Khan, Taufiquar (2020); Department Chair and Professor, Department of Mathematics and Statistics; B.A., Occidental College; M.S., University of Southern California; M.A., University of Southern California; Ph.D., University of Southern California

Kheifets, Igor (2023); Visiting Assistant Professor, Department of Economics; B.S., Moscow State University; M.A., New Economic School; M.S., Universidad Carlos III de Madrid; Ph.D., Universidad Carlos III de Madrid

Khire, Milind (2013); Professor, Department of Civil and Environmental Engineering; B.E., University of Mumbai; M.S., University of Miami; Ph.D., University of Wisconsin-Madison

Khouja, Moutaz J. (1991); Professor, Department of Business Information Systems and Operations Management; B.S., University of Toledo; M.B.A., University of Toledo; Ph.D., Kent State University

Kidder, Carly (2024); SPED/SPEL University Professor, Office of School and Community Partnerships, Cato College of Education; B.A., Miami University; M.A., Wingate University

Killman, Jeffrey A. (2010); Associate Professor, Department of Languages, Cultures, and Translation; B.A.Ed., University of New Mexico; M.S., University of Malaga, Spain; Ph.D., University of Malaga, Spain

Kilmer, Ryan P. (1999); Department Chair and Professor, Department of Psychological Science; B.S., University of Washington; M.A., University of Rochester; Ph.D., University of Rochester

Kim, Joohyun (44788); Assistant Professor, Department of Business Information Systems and Operations Management; B.S., Sogang University; M.S., Korea Advanced Institute of Science and Technology; Ph.D., University of Texas at Dallas

Kim, Kyoung-Hee (2010); Professor, David R. Ravin School of Architecture; B.S.E., Chon-Buk National University; M.S.E., Chon-Buk National University; M.Arch., University of Michigan at Ann Arbor; Ph.D., University of Michigan at Ann Arbor

Kim, Stella Y. (2018); Associate Professor, Department of Educational Leadership; B.S., Yonsei University, South Korea; B.A., Yonsei University, South Korea; M.A., Yonsei University, South Korea; Ph.D., University of Iowa

Kim, Yongtaek (2011); Lecturer, Department of Languages, Cultures, and Translation; B.A., Yonsei University; M.A., Sophia University; Ph.D., University of Oregon

King, Anyea L. (44788); Lecturer, Department of Applied Physiology, Health, and Clinical Sciences; B.S., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte

King, Tao-Hsien (Dolly) (2006); Professor, Department of Finance; B.B.A., National Cheng-Kung University, Taiwan; M.B.A., University of Wisconsin-Madison; Ph.D., University of Wisconsin-Madison

Kirby, Christopher (2011); Professor, Department of Finance; B.S., Clemson University; M.B.A., Duke University; Ph.D., Duke University

Kissau, Scott P. (2006); Associate Dean for Research and Graduate Studies, Cato College of Education; Professor, Department of Middle, Secondary, and K-12 Education; B.A.H., Queen's University, Canada; B.Ed., University of Windsor; M.Ed., University of Windsor; Ph.D., University of Windsor

Kitten, Alicia (44788); Assistant Professor, Department of Reading and Elementary Education; A.S., Cuesta College; B.A., California State University; Ph.D., University of Texas at Austin

Klein, Lidia (2018); Associate Professor, David R. Ravin School of Architecture; M.A., University of Warsaw, Poland; Ph.D., University of Warsaw, Poland

Klibanov, Michael V. (1990); Professor, Department of Mathematics and Statistics; M.S., Novosibirsk State University, Russia; Ph.D., Ural State University, Russia; D.S., Novosibirsk State University, Russia

Kluttz, Ann (1999); Lecturer, Department of Art and Art History; B.F.A., East Carolina University; M.F.A., East Carolina University

Knight, Amber R. (2017); Associate Professor, Department of Political Science and Public Administration; B.A., University of California, Santa Cruz; M.A., University of North Carolina at Chapel Hill; Ph.D., University of North Carolina at Chapel Hill

Knight, Barbara A. (44788); Lecturer, Department of Management; B.S.B.A., Seton Hall University; E.M.B.A., Claremont Graduate University; D.B.A., University of North Carolina at Chapel Hill

Kolano, Lan Quach (2004); Department Chair and Professor, Department of Middle, Secondary, and K-12 Education; B.S., Virginia Polytechnic Institute and State University; M.A., Virginia Polytechnic Institute and State University; Ph.D., University of North Carolina at Chapel Hill

Kopczynski, Hunter (44788); Assistant Professor, Department of Music; B.A., Virginia Polytechnic Institute and State University; M.A., Virginia Polytechnic Institute and State University; M.A., Michigan State University; D.M.A., Michigan State University

Kossack, Christoph A. (44788); Lecturer, Department of Mechanical Engineering and Engineering Science; B.A., North Carolina State University; B.S., University of North Carolina at Charlotte; M.S.M.E., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Krasniqi, Rrezarta (2024); Assistant Professor, Department of Software and Information Systems; B.S., University of Prishtina; M.S., Midwestern State University; M.S., University of Notre Dame; Ph.D., University of North Texas

Krishnan, Siddharth (2017); Assistant Professor, Department of Computer Science; B.S., Sri Sathya Sai Institute of Higher Learning; M.S., Sri Sathya Sai Institute of Higher Learning; M.S., Florida State University; Ph.D., Virginia Tech

Kristoff, Emily (2012); Lecturer, Department of Languages, Cultures, and Translation; B.A., University of Georgia; M.A., University of North Carolina at Charlotte

Kronberg, Anne-Kathrin (2018); Associate Professor, Department of Sociology; M.A., Emory University; Ph.D., Emory University

Kropf, Martha E. (2006); Professor, Department of Political Science and Public Administration; B.A., Kansas State University; Ph.D., American University

Kruckeberg, Dean (2008); Professor, Center for Global and Public Relations Department of Communication Studies; B.A., Wartburg College; M.A., Northern Illinois University; Ph.D., University of Iowa

Krueger, Joanna K. (1999); Associate Professor, Department of Chemistry; B.A., Kalamazoo College; M.A., Princeton University; Ph.D., Princeton University

Kudlats, Jamie (2019); Assistant Professor, Department of Educational Leadership; B.S., Kennesaw State University; M.A.Ed., George Washington University; Ph.D., University of North Carolina at Chapel Hill

Kuemmerle, Christian E. (44788); Assistant Professor, Department of Computer Science; B.S., Technical University of Munich; M.S., Technical University of Munich; Ph.D., Technical University of Munich

Kuhns III, Joseph B. (2003); Professor, Department of Criminal Justice and Criminology; B.A., University of South Florida; M.A., University of South Florida; Ph.D., University of Albany

Kulkarni, Shanti J. (2006); Interim Associate Dean for Research and Graduate Studies, School of Social Work; Professor; B.A., Rice University; M.S.W., University of Texas at Austin; Ph.D., University of Texas at Austin

Kuntzman, Staci (2001); Senior Lecturer, Department of Communication Studies; B.A., Marshall University; M.A., Marshall University

Kurnaz, Musab M. (2018); Assistant Professor, Department of Economics; B.S., Bilkent University, Turkey; M.A., Sabanci University, Turkey; Ph.D., Carnegie Mellon University

Kustov, Alexander (2021); Assistant Professor, Department of Political Science and Public Administration; M.A., Princeton University; Ph.D., Princeton University

LaBella, Abigail L. (44788); Research Associate Professor, Department of Bioinformatics and Genomics; B.S., American University; Ph.D., Duke University

Lachance, Joan R. (2013); Associate Professor, Department of Middle, Secondary, and K-12 Education; B.S., Florida International University; M.Ed., Pontifical Catholic University of Puerto Rico; Ph.D., University of North Carolina at Charlotte

Lai, Gene C. (2017); Professor, Department of Finance; B.A., National Chengchi University, Taiwan; M.S., Georgia State University; Ph.D., University of Texas at Austin

Lai, Luca (2022); Assistant Professor, Department of Anthropology; B.A., University of Cagliari, Italy; M.A., University of Cagliari, Italy; Ph.D., University of South Florida

Lail, Derrick (2014); Lecturer, Department of Criminal Justice and Criminology; B.A., Appalachian State University; B.S., Appalachian State University; M.S., Appalachian State University

Lake, Savannah J. (2021); Library/Associate Professor and Digital Scholarship Coordinator Librarian, J. Murrey Atkins Library; B.A., University of California, Berkeley; M.L.I.S., University of California, Los Angeles

LaMarca, Mary (2014); Visiting Lecturer, Department of Languages, Cultures, and Translation; B.A., Indiana University Bloomington; M.A., New York University; Ph.D., Duke University

Lamb, Angela D. (44788); Clinical Assistant Professor, School of Nursing; B.S., Wright State University; M.S., Simmons University; D.N.P., Simmons University

Lambert, Richard G. (1996); Professor, Department of Educational Leadership; B.S., St. Lawrence University Ed.; Ed.M., Temple University; Ed.S., Georgia State University; Ph.D., Georgia State University

Lampkowski, Christin (2021); Library/Associate Professor, J. Murrey Atkins Library; B.A., Arizona State University; M.L.I.S., University of North Carolina at Greensboro

Lanclos, Donna (2009); Associate Professor of Anthropological Research, J. Murrey Atkins Library; B.A., University of California, Santa Barbara; M.A., University of California, Berkley; Ph.D., University of California, Berkley

Landerreche Cardillo, Paula (2024); Assistant Professor, Department of Philosophy; B.A., Universidad Iberoamericana, Mexico; Graduate Certificate, The New School for Social Research; M.A., The New School for Social Research; Ph.D., DePaul University

Lane, Sandi (2024); Associate Professor, Department of Health Management and Policy; B.S., Southern Illinois University; M.S., University of New Haven; Ph.D., University of North Carolina at Charlotte

Langford, David R. (1994); Interim Department Chair and Associate Professor, School of Nursing; A.S., Brigham Young University; B.S., Brigham Young University; M.S., University of California, San Francisco; D.N.Sc., University of California, San Francisco

Langford, Dee A. (2007); Lecturer, School of Nursing; B.S.N., Old Dominion University; M.S.N., University of North Carolina at Charlotte

Langhinrichsen-Rohling, Jennifer (2019); Professor, Department of Psychological Science; Sc.B., Brown University; M.S., University of Oregon; Ph.D., University of Oregon

Langley, William (2015); Research Associate Professor, Department of Civil and Environmental Engineering; B.S., University of North Carolina at Charlotte; MEngr, University of South Carolina; Ph.D., North Carolina State University

Lansen, Oscar E. (1994); Senior Lecturer, Department of History; B.A., NLO Het Mollerinstituut, The Netherlands; B.Ed., NLO Het Mollerinstituut, The Netherlands; M.A., Radboud University Nijmegen, Netherlands; M.Ed., Radboud University Nijmegen, Netherlands; Ph.D., Radboud University Nijmegen, Netherlands

Larkin, Melissa (2022); Lecturer, School and Community Partnership, Cato College of Education; B.A., University of South Carolina; M.Ed., University of Virginia

Lattimore, Lisa (2023); Lecturer, Office of Student Development and Success, The William States Lee College of Engineering; B.S., Syracuse University; M.S., Cornell University; M.B.A., College of William and Mary

Lawson-Alonso, Aura (2014); Visiting Lecturer, Department of Languages, Cultures, and Translation; B.A., University of North Carolina at Charlotte; M.A., University of North Carolina at Charlotte

Lawton, Kevin (2000); Senior Lecturer, Department of Mechanical Engineering and Engineering Science; B.S., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Le, Chau (2024); Assistant Professor, Department of Engineering Technology and Construction Management; B.S., Ho Chi Minh City University of Technology, Vietnam; M.S., Ho Chi Minh City University of Technology, Vietnam; Ph.D., Texas A&M University

Leak, Jeffrey B. (1998); Interim Associate Dean, Department of English; Professor; B.A., Campbell University; M.A., University of Delaware; Ph.D., Emory University

Lee, Charles Y. (1999); Associate Professor, Department of Mechanical Engineering and Engineering Science; B.S., University of California, Berkeley; M.S., University of California, Berkeley; Ph.D., University of California, Berkeley

Lee, Eun-Kyoung (Othelia) (2010); Professor, School of Social Work; B.A., Catholic University of Korea, South Korea; M.S.W., Smith College; M.P.H.L., Columbia University; Ph.D., Columbia University

Lee, Giseung (2011); Lecturer, Department of Languages, Cultures, and Translation; B.A., University of Ulsan, South Korea; M.A., Portland State University

Lee, Ming-Chun (2013); Associate Professor, David R. Rubin School of Architecture; B.S., National Cheng Kung University, China; M.S., National Cheng Kung University, China; M.Arch., University of Washington; Ph.D., University of Washington

Lee, Minwoo (2017); Associate Professor, Department of Computer Science; B.S., Korea Aerospace University; M.S., Korea Aerospace University; Ph.D., Colorado State University

Leeman, Carol B. (1997); Senior Lecturer, Department of Communication Studies; B.A., University of North Carolina at Charlotte; M.A., Wake Forest University

Leeman, Richard W. (1989); Professor, Department of Communication Studies; B.S., Shippensburg State College; M.A., University of Maryland; Ph.D., University of Maryland

Leilabady, Pedram (2005); Lecturer, Department of Physics and Optical Science; B.S., University of Kent; Ph.D., University of Kent

Leland, Suzanne (2001); Professor, Department of Political Science and Public Administration; B.S., Minnesota State University; M.S., Minnesota State University; Ph.D., University of Kansas

Lessani, Bamdad (2020); Teaching Associate Professor, Department of Mechanical Engineering and Engineering Science; B.S., Vrije Universiteit Brussel, Belgium; Ph.D., Vrije Universiteit Brussel, Belgium

Lesser, Christopher (2024); Assistant Professor, Department of Global Studies; B.A., Princeton University; M.S., Mercy College; M.A., University of California; M.F., University of California; Ph.D., Universidade Federal Fluminense, Brazil

Levens, Sara (2012); Associate Professor, Department of Psychological Science; B.A., University of California, Berkeley; Ph.D., New York University

Leventis, Andrew (2016); Associate Professor, Department of Art and Art History; B.F.A., American Academy of Art; M.F.A., University of London, England

Lewis, Chance W. (2011); Carol Grotnes Belk Distinguished Professor in Urban Studies, Department of Middle, Secondary, and K-12 Education; B.S., Southern University and A&M College; M.Ed., Southern University and A&M College; Ph.D., Colorado State University

Lewis, Janaka B. (2009); Associate Dean for Curriculum and Student Success, Department of English; B.A., Duke University; M.A., Northwestern University; Ph.D., Northwestern University

Li, Lin (2024); Assistant Professor, Department of Earth, Environmental, and Geographical Sciences; B.S., China University of Geosciences, Beijing; M.S., Institute of Geology and Geophysics, Chinese Academy of Science, Beijing; Ph.D., University of Rochester

Li, Shaoyu (2014); Associate Professor, Department of Mathematics and Statistics; B.A., Huazhong University of Science and Technology, China; M.A., Huazhong University of Science and Technology, China; Ph.D., Michigan State University

Li, Wenyin (2023); Assistant Professor, Turner School of Accountancy; B.S., University of Kentucky; B.B.A., University of Kentucky; M.S., University of Kentucky; Ph.D., University of Kentucky

Li, Xingjie (2015); Associate Professor, Department of Mathematics and Statistics; B.S., Fudan University, China; M.S., University of Minnesota; Ph.D., University of Minnesota

Li, Yang (2013); Associate Professor, Department of Mathematics and Statistics; B.S.E., Beijing Institute of Technology, China; M.S., University of Arkansas at Little Rock; Ph.D., University of Missouri-Columbia

Li, Yao (2024); Assistant Professor, Department of Earth, Environmental, and Geographical Sciences; B.E., Wuhan University; M.S., University of Chinese Academy of Science; Ph.D., University of Maryland

Libby, Allan (2023); Associate Professor (Library)/Head of Research Services, J. Murrey Atkins Library Public Services; B.A., University of North Carolina at Wilmington; M.L.S., University of North Carolina at Chapel Hill

Lim, Churlzu (2006); Associate Professor, Department of Industrial and Systems Engineering; B.S., Korea Advanced Institute of Science and Technology, South Korea; M.S., Korea Advanced Institute of Science and Technology, South Korea; Ph.D., Virginia Polytechnic Institute and State University

Lim, Jae Hoon (2006); Professor, Department of Educational Leadership; B.Ed., Seoul National University of Education, South Korea; M.A., Korea University, South Korea; Ph.D., University of Georgia

Lindsay, Kevin J. (2014); Lecturer and Freshman Advisor, Office of Student Development and Success, The William States Lee College of Engineering; B.S., Embry-Riddle Aeronautical University; M.S., Clemson University; M.B.A., Loyola University

Lindsey, Jessica M. (2014); Associate Professor, Department of Music; B.A., University of Nebraska; M.M., University of Nebraska; D.M.A., University of Colorado at Boulder Boulder

Linens, Shelley N. (2019); Clinical Assistant Professor, Department of Applied Physiology, Health, and Clinical Sciences; B.A., University of North Carolina at Chapel Hill; M.Ed., University of Virginia; Ph.D., Virginia Commonwealth University

Linker, Jeanne-Marie (2016); Visiting Lecturer, Department of Mathematics and Statistics; B.S., University of North Carolina at Charlotte; B.A., University of North Carolina at Charlotte; M.S., Texas State University

Lipford, Heather R. (2005); Professor, Department of Software and Information Systems; B.S., University of North Carolina at Charlotte; Ph.D., Georgia Institute of Technology

Listwan, Shelley J. (2010); Professor, Department of Criminal Justice and Criminology; B.A., Wright State University; M.S., University of Cincinnati; Ph.D., University of Cincinnati

Liu, Rong (2016); Assistant Professor, Department of Mathematics and Statistics; B.S., Shandong University, China; Ph.D., Michigan State University

Liu, Xia (2019); Professor, Department of Marketing; B.A., Beijing Normal University, China; M.A., Beijing Normal University, China; M.S., Syracuse University; Ph.D., Syracuse University

Lo, Eugenia (2017); Associate Professor, Department of Biological Sciences; B.S., University of Hong Kong; M.Phil., University of Hong Kong; Ph.D., University of Toronto

Lo, Ya-yu (2004); Professor, Department of Special Education and Child Development; B.A., Soochow University; M.A., Ohio State University; Ph.D., Ohio State University

Long, Sheri Spaine (2013); Professor, Department of Languages, Cultures, and Translation; B.A., University of Iowa; M.A., University of Iowa; Ph.D., University of California, Los Angeles

Looby, Kimberly A. (2018); Library/Associate Professor and Instruction and Information Librarian, J. Murrey Atkins Library; B.A., University of Illinois at Urbana-Champaign; M.A., Eastern Illinois University; M.L.I.S., University of Illinois at Urbana-Champaign

Lorraine, Ann E. (2008); Professor, Department of Bioinformatics and Genomics; B.A., University of Texas at Austin; B.S., University of Texas at Austin; Ph.D., University of California, Berkeley

Lorenz, Tierney K. (2016); Assistant Professor, Department of Psychological Science; B.S., Duke University; M.A., University of Texas at Austin; Ph.D., University of Texas at Austin

Lottman, Maryrica O. (2002); Associate Professor, Department of Languages, Cultures, and Translation; B.A., Hollins University; M.F.A., Pennsylvania State University; M.A., Princeton University; Ph.D., Princeton University

Lu, Aidong (2005); Professor, Department of Computer Science; B.S., Tsinghua University, China; M.S., Tsinghua University, China; Ph.D., Purdue University

Luce, Chrislyn Z. (2004); Clinical Associate Professor, Department of Reading and Elementary Education; B.A., Florida State University; M.S., Florida State University; Ph.D., University of Southern Mississippi

Lukic, Vasilije P. (1984); Professor, Department of Electrical and Computer Engineering; B.S.E.E., University of Belgrade, Serbia; M.S.E.E., University of Belgrade, Serbia; Sc.D., University of Belgrade, Serbia

Lumpkin, Royce (1998); Professor, Department of Music; B.M.Ed., North Texas State University; M.M.Ed., North Texas State University; D.M.A., University of Oklahoma

Luo, Elaine (44929); Assistant Professor, Department of Biological Sciences; B.S., University of Toronto, Canada; Ph.D., University of Hawaii

Luo, Weijun (2011); Research Assistant Professor, Department of Bioinformatics and Genomics; B.S., Nanjing University, China; M.S., Chinese Academy of Sciences, China; Ph.D., University of Michigan

Luttecke, Kristen (2012); Assistant Professor, Turner School of Accountancy; B.S., California State University; Ph.D., University of Colorado at Boulder

Lutz, Chandler (2024); Associate Professor & Steven Ott Distinguished Scholar; B.S., University of Redlands; M.A., University of California at Riverside; Ph.D., University of California at Riverside

Lyerly, Jordan (2019); Lecturer, Department of Psychological Science; B.S., University of North Carolina at Charlotte; M.S.P.H., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Lynch, Susan H. (2006); Associate Director for Undergraduate Programs and Administration, and Clinical Assistant Professor, School of Nursing; B.S.N., University of North Carolina at Greensboro; M.S.N., University of New Mexico

Ma, Lin (2022); Assistant Professor, Department of Mechanical Engineering and Engineering Science; B.S., Xiamen University, China; M.S., Dalhousie University, Canada; Ph.D., Dalhousie University, Canada

Mabe, Alan R. (2019); Visiting Teaching Professor, Department of Educational Leadership; B.A., Guilford College; M.A., Syracuse University; Ph.D., Syracuse University

MacKay, Margaret M. (2014); Lecturer, School of Nursing; B.S., Fairfield University; M.N., Emory University

Madsen, Patrick (2016); Associate Dean for Advising and Experiential Learning, Office of Undergraduate Education; B.A., North Carolina State University; M.S., East Carolina University; Ed.D., Nova Southeastern University

Magennis, Laura (2020); Lecturer, School of Nursing; B.S.N., University of North Carolina at Greensboro; M.S.N., University of North Carolina at Charlotte; D.N.P., University of North Carolina at Charlotte

Magi, Brian I. (2011); Associate Professor, Department of Earth, Environmental, and Geographical Sciences; B.S., University of Arizona; Ph.D., University of Washington

Magoun, Meredith (2024); Assistant Professor, Department of Theatre; B.A., Smith College; M.F.A., Carnegie Mellon University

Maguire, Joanne (1996); Professor, Department of Religious Studies; B.A., Connecticut College; M.T.S., Harvard Divinity School; Ph.D., The The University of Chicago

Mahaffey, Cathy H. (2011); Lecturer, Department of Writing, Rhetoric, and Digital Studies; B.A., University of North Carolina at Charlotte; M.A., University of North Carolina at Charlotte

Maher, Mary Lou (2012); Professor, Department of Software and Information Systems; B.S., Columbia University; M.S., Carnegie Mellon University; Ph.D., Carnegie Mellon University

Maity, Dipankar (2020); Assistant Professor, Department of Electrical and Computer Engineering; B.S.E., Jadavpur University, India; Ph.D., University of Maryland

Makas, Emily G. (2007); Associate Professor, David R. Rubin School of Architecture; B.A., University of Tennessee; M.S., Columbia University; Ph.D., Cornell University

Manack, Marc (2016); Associate Professor, David R. Rubin School of Architecture; B.S.Arch., Ohio State University; M.Arch., Ohio State University

Mangiarcina, Rex (2014); Teacher in Residence, Office of School and Community Partnerships, Cato College of Education; B.A., Western Washington University; M.A.T., University of North Carolina at Charlotte

Manjrekar, Madhav Devidas (2012); Associate Professor, Department of Electrical and Computer Engineering; B.E., Government Polytechnic Mumbai, India; M.S., Indian Institute of Science, India; M.S., Montana State University; Ph.D., University of Wisconsin-Milwaukee

Manlove, Adam (44773); Assistant Professor, Turner School of Accountancy; B.B.A., Abilene Christian University; M.Acc., Wichita State University; Ph.D., Indiana University - Bloomington

Mannah-Blankson, Theresa (2019); Clinical Assistant Professor, Department of Economics; B.A., University of Ghana; M.Phil., University of Ghana; M.A., University of Massachusetts Amherst; Ph.D., University of Massachusetts Amherst

Margarint, Vlad (2023); Assistant Professor, Department of Mathematics and Statistics; B.S., University of Bucharest; M.S., ETH Zurich; Ph.D., University of Oxford

Marino, Juliana (2014); Lecturer, Department of Applied Physiology, Health, and Clinical Sciences; B.S., University of Mary Washington; M.A., Adelphi University

Markant, Douglas (2017); Associate Professor, Department of Psychological Science; B.A., Cornell University; M.A., New York University; Ph.D., New York University

Marks, Jonathan M. (2000); Professor, Department of Anthropology; B.A., Johns Hopkins University; M.S., University of Arizona; M.A., University of Arizona; Ph.D., University of Arizona

Marriott, Ian (1998); Professor, Department of Biological Sciences; B.Sc., University of Birmingham; M.S., Tulane University School of Medicine; Ph.D., Tulane University School of Medicine

Marshall, Thomas S. (2005); Lecturer, Department of Finance; B.B.A., Wake Forest University; M.B.A., University of Pennsylvania

Martin, Gregory W. (2015); Associate Professor, Turner School of Accountancy; B.S., United States Air Force Academy; M.B.A., University of Notre Dame; Ph.D., University of Colorado at Boulder

Martins do Outeiro, Jose C. (44986); Professor, Department of Mechanical Engineering and Engineering Science; M.S., University of Coimbra; Ph.D., University of Coimbra

Massino, Jill M. (2011); Associate Professor, Department of History; B.A., University of Wisconsin Madison; M.A., North Eastern University; Ph.D., Indiana University at Bloomington

Mathews, Jay (2023); Assistant Professor, Department of Physics and Optical Science; B.S., Colorado State University; M.S., Arizona State University; Ph.D., Arizona State University

Matthews, Michael S. (2008); Interim Department Chair and Professor, Department of Special Education and Child Development; B.A., University of Tennessee at Chattanooga; M.A., University of Wisconsin-Madison; Ph.D., University of Georgia

Mauer, David (2015); Professor, Department of Finance; B.B.A., University of Iowa; Ph.D., Purdue University

Maxwell, Daniel G. (2022); Faculty Site Coordinator, Office of School and Community Partnerships, Cato College of Education; B.A., University of North Carolina at Charlotte; M.Ed., University of North Carolina at Charlotte; Ed.D., University of North Carolina at Charlotte

Mayo, Christopher D. (2021); Clinical Assistant Professor, Department of Applied Physiology, Health, and Clinical Sciences; A.S., St. Petersburg College; A.A., St. Petersburg College; BA.S., St. Petersburg College; M.S., Northeastern University

Mayock, Thomas (2016); Associate Professor, Department of Economics; B.S., University of Pennsylvania; Ph.D., Florida State University

McAdams, Jeffrey M. (2014); Assistant Professor and Engineering Librarian, J. Murray Atkins Library; B.G.S., University of Kansas; M.L.S., Emporia State University

McCarter, Susan A. (2008); Professor, School of Social Work; B.A., Clemson University; M.S., Virginia Commonwealth University; M.S.W., Virginia Commonwealth University; Ph.D., Virginia Commonwealth University

McClelland, Ronald (44788); Visiting Assistant Professor, Department of Theatre; B.F.A., Carnegie Mellon University; M.A., The Seattle School of Theology and Psychology

McCloud, Sean P. (2003); Department Chair and Professor, Department of Religious Studies; B.A., Indiana University; M.A., Miami University of Ohio; Ph.D., University of North Carolina at Chapel Hill

McCord, Laneshia (2014); Assistant Professor, School of Social Work; B.S.W., University of Kentucky; M.S.W., University of Georgia; Ph.D., University of Louisville

McCorkle, Laura S. (2017); Associate Professor, Department of Special Education and Child Development; B.S., Murray State University; M.S., Murray State University; Ph.D., University of Georgia

McCormick, Elizabeth L. (2019); Associate Professor, David R. Ravin School of Architecture; B.Arch., Rhode Island School of Design; M.S., Massachusetts Institute of Technology

McCoy, Katryna F. (2019); Associate Professor, School of Nursing; B.S., University of Georgia; B.S.N., Augusta University; M.N., University of Washington; Ph.D., University of Washington

McCulloch, Allison W. (2017); Professor, Department of Mathematics and Statistics; B.S., Purdue University; M.A., Sam Houston State University; Ph.D., Rutgers University

McGoff, Kevin A. (2015); Professor, Department of Mathematics and Statistics; B.S., University of North Carolina at Chapel Hill; Ph.D., University of Maryland, College Park

McGonagle, Alyssa (2016); Associate Professor, Department of Psychological Science; B.A., College of the Holy Cross; M.A., University of New Haven; M.A., University of Connecticut; Ph.D., University of Connecticut

McGuffin, Katherine S. (2017); Clinical Assistant Professor, School of Nursing; B.A., University of North Carolina at Charlotte; B.S.N., University of North Carolina at Charlotte; M.S.N., University of North Carolina at Charlotte; D.N.P., University of North Carolina at Charlotte

McGuffin, Timothy (2023); Lecturer, School of Nursing; A.A., York Technical College; B.S.N., University of South Carolina; M.S.N., University of South Carolina; D.N.P., University of North Carolina at Charlotte

McGuffin, Timothy A. (2020); Lecturer, School of Nursing; B.S.N., University of South Carolina; M.S.N., University of South Carolina; D.N.P., University of North Carolina at Charlotte

McKee, Jesse (2019); Lecturer, Department of Criminal Justice and Criminology; B.S., Northern Arizona University; M.A., Northern Arizona University; Ph.D., Old Dominion University

McKee, Jesse R. (2019); Lecturer, Department of Criminal Justice and Criminology; B.S., Northern Arizona University; M.A., Northern Arizona University; Ph.D., Old Dominion University

McKenzie, Eric (44929); Assistant Teaching Professor, Department of Chemistry; B.A., University of North Carolina at Chapel Hill; B.S., University of North Carolina at Chapel Hill; Ph.D., Indiana University - Bloomington

McKenzie, Mary (2003); Assistant Dean of Curricular, Competency & Experiential Learning and Lecturer, Department of Sociology; B.A., North Carolina State University; M.S., North Carolina State University

McLennon, Susan (2023); Director and Assistant Professor, School of Nursing; B.S., University of Central Florida; M.S., University of Florida; Ph.D., University of Alabama at Birmingham

McMains, Joshua (2024); Assistant Teaching Professor, Department of Psychological Science; B.S., University of Georgia; M.S., Georgia Southern University; Ph.D., University of Georgia

Meaden-Kaplansky, Hedda (2024); Snyder Distinguished Professor, Department of Special Education and Child Development; B.Sc., Hebrew University of Jerusalem, Israel; M.A., Hebrew University of Jerusalem, Israel; Ph.D., University of Illinois at Urbana-Champaign

Medina, Adriana L. (2007); Department Chair and Professor, Department of Reading and Elementary Education; B.S., Vanderbilt University; M.S., Florida International University; Ph.D., University of Miami

Mejias, Marlon (2018); Teaching Assistant Professor, Department of Software and Information Systems; B.S., Howard University; M.S., George Washington University; Ph.D., Howard University

Mellinger, Christopher D. (2017); Professor, Department of Languages, Cultures, and Translation; B.A., Wake Forest University; M.A., Kent State University; Ph.D., Kent State University

Melnikoff, Kirk (2002); Department Chair and Professor, Department of English; B.A., Lehigh University; M.A., Boston University; Ph.D., Boston University

Meneses-Naranjo, Juan (2013); Associate Professor, Department of English; B.A., Universitat Autònoma de Barcelona, Spain; M.A., Universitat Autònoma de Barcelona, Spain; Ph.D., Purdue University

Mennicke, Annelise M. (2015); Associate Professor, School of Social Work; B.S., University of Florida; M.S.W., Florida State University; Ph.D., Florida State University

Merkert, Jon W. (2003); Lecturer, Department of Chemistry; B.S., Colorado State University; Ph.D., University of Vermont

Merlin-Knoblich, Clare P. (2015); Associate Professor, Department of Counseling; B.A., University of North Carolina at Chapel Hill; M.Ed., University of Georgia; Ph.D., College of William & Mary

Merriweather, Lisa R. (2009); Professor, Department of Educational Leadership; B.A., California State University; M.A., Morehead State University; Ph.D., University of Georgia

Metcalfe, Alyson (2014); Lecturer, Department of Finance; B.S., University of North Carolina at Chapel Hill; M.S., University of Georgia; M.S., University of North Carolina at Charlotte

Metzgar, Matthew R. (2011); Clinical Assistant Professor, Department of Economics; B.S., West Virginia University; M.B.A., Wheeling Jesuit University; Ph.D., University of Tennessee

Miatudila, Alain (2013); Lecturer, Department of Engineering Technology and Construction Management; A.A.S., Central Piedmont Community College; B.S., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Michael, Susan K. (2007); Lab Coordinator and Lecturer, Department of Chemistry; B.A., Augustana College; M.S., University of North Carolina at Charlotte

Mickelson, Ann M. (2019); Associate Professor, Department of Special Education and Child Development; B.S., University of Wisconsin-Madison; M.S., University of Wisconsin-Madison; Ph.D., University of South Florida

Mickelson, Roslyn A. (1985); Professor, Department of Sociology Women's and Gender Studies; B.A., University of California, Los Angeles; M.A., University of California, Los Angeles; Ph.D., University of California, Los Angeles

Millard, Eric J. (2018); Associate Professor, Department of Music; B.M., University of Kentucky; M.M., Florida State University; D.M., Florida State University

Miller, Elizabeth R. (2006); Professor, Department of English; B.A., Grace College; M.A., Purdue University; M.A., University of Wisconsin-Madison; Ph.D., University of Wisconsin-Madison

Miller, Erin Till (2013); Professor, Department of Reading and Elementary Education; B.A., Emory University; M.A.T., University of South Carolina; Ph.D., University of South Carolina

Miller, Joshua P. (2018); Lecturer, Department of Political Science and Public Administration; B.A., Stetson University; M.A., University of North Carolina at Chapel Hill; Ph.D., University of North Carolina at Chapel Hill

Miller, Kelli (2015); Clinical Assistant Professor, School of Nursing; B.S.N., Medical College of Georgia; M.S.N., Georgia Southern University; D.N.P., Georgia Southern University

Miller, Ryan (2016); Associate Professor, Department of Educational Leadership; B.J., University of Texas at Austin; M.Ed., Harvard University; Ph.D.; Ph.D., University of Texas at Austin

Mingo, Taryne M. (2018); Associate Professor, Department of Counseling; B.A., University of Georgia; M.Ed., University of Georgia; Ed.S., University of Georgia; Ph.D., University of Georgia

Miri, S. Mehdi (1987); Associate Professor, Department of Electrical and Computer Engineering; B.S., Western Michigan University; M.S., Ph.D.; Ph.D., Ohio State University

Misher, April M. (44927); School of Nursing Lecturer, School of Nursing; B.A., Coastal Carolina University; A.S.N., Northwestern State University; B.S.N., Francis Marion University; M.S.N., University of South Carolina; D.N.P., East Carolina University

Miss, Angela M. (2016); Lecturer, Department of Writing, Rhetoric, and Digital Studies; B.A., University of Georgia; M.A., University of Georgia; Ph.D., University of Georgia

Missihoun, Honore J. (2018); Lecturer, Department of Africana Studies; M.A./M.Ed., Pontifical University of Salamanca, Spain; M.A., Kent State University; Ph.D., University of North Carolina at Chapel Hill

Mitchell, Jason (2023); Visiting Lecturer, Department of Music; B.F.A., Marshall University; M.A., Rutgers University; Ph.D., Florida State University

Mo, Xi (2023); Clinical Assistant Professor, Department of Finance; B.A., Beijing Language and Culture University; M.S., State University of New York at Buffalo; Ph.D., University of North Carolina at Charlotte

Moffitt-Yost, Jacqueline V. (2008); Lecturer, Department of Music; B.M., University of Rochester; M.A., University of Rochester; M.M., Cleveland Institute of Music; D.M.A., University of Rochester

Moglen, Glenn (2023); Department Chair and Professor, Department of Civil and Environmental Engineering; B.S., University of Maryland at College Park; M.S., Colorado State University; Ph.D., Massachusetts Institute of Technology

Mohiuddin-Jacobs, Farida (2015); Lecturer, Department of Physics and Optical Science; B.S., University of Dhaka, Bangladesh; M.S., University of Dhaka, Bangladesh; M.S., Purdue University; Ph.D., Purdue University

Molavi-Zarandi, Marjan (2023); Research Associate Professor, Department of Mechanical Engineering and Engineering Science; B.S., Bahonar University of Kerman; M.S., Concordia University; Ph.D., McGill University

Molchanov, Stanislav A. (1994); Professor, Department of Mathematics and Statistics; D.Sc., Moscow State University, Russia

Moll III, Richard C. (2009); Lecturer, Department of Theatre; B.A., University of North Carolina at Charlotte; B.C.A., University of North Carolina at Charlotte

Moller, Stephanie (2009); Professor, Department of Sociology; B.S., Guilford College; M.A., University of Delaware; M.A., University of Georgia; Ph.D., University of North Carolina at Chapel Hill

Monge, Adriana O. (2014); Associate Professor, Department of Mathematics and Statistics; B.S., Universidad de Sonora, Mexico; M.S., Universidad de Sonora, Mexico; Ph.D., University of Warwick, England

Monque Lopez, Pedro (2024); Assistant Professor, Department of Philosophy; B.A., St. Olaf College; M.Phil., City University of New York; Ph.D., City University of New York

Montanaro, Erika A. (2016); Associate Professor, Department of Psychological Science; B.S., Arizona State University; M.S., University of New Mexico; Ph.D., University of Colorado at Boulder

Montegrico, Jhordin James C. (2017); Lecturer, School of Nursing; B.S.N., University of Santo Tomas, Philippines; M.S.N., Saint Paul University Philippines

Montoro-Rodriguez, Julian (2014); Professor, School of Social Work; B.A., Complutense University of Madrid, Spain; M.A., Case Western Reserve University; Ph.D., Case Western Reserve University

Moon, Sangkil (2013); Department Chair and Professor, Department of Marketing; B.B.A., Seoul National University, South Korea; M.B.A., Seoul National University, South Korea; Ph.D., University of Iowa

Moore, Abigail (2014); Library Faculty President, J. Murrey Atkins Library; B.A., Lehigh University; M.A., City College of New York; M.L.S., Queens University of Charlotte

Moore, Stephen (2023); Lecturer, Department of Management; A.A.S., Mater Dei College; A.S., State University of New York at Canton; B.S., State University of New York Institute of Technology; M.B.A., Syracuse University; M.S., Syracuse University

Moore-Harrison, Trudy (2010); Lecturer, Department of Applied Physiology, Health, and Clinical Sciences; B.S., Howard University; M.S., Howard University; Ph.D., University of Georgia

Mori, Chikako (2006); Lecturer, Department of Languages, Cultures, and Translation; B.A., Chubu University; M.Ed., Ohio University

Morin, Tiffany A. (2018); Lecturer, Department of English; B.A., Fayetteville State University; M.A., University of North Carolina at Charlotte

Morong, Jay (2008); Lecturer, Department of Theatre; B.A., Assumption College; M.A., Boston University

Morris, Debra (2016); Assistant Professor, Department of Educational Leadership; B.A., Appalachian State University; M.A., University of North Carolina at Charlotte; Ed.D., University of North Carolina at Charlotte

Morrison, Danyea (2022); Lecturer, School and Community Partnership, Cato College of Education; B.A., Alabama A&M University; M.A.T., Wayne State University

Morse, Edward (1999); Professor, Department of Mechanical Engineering and Engineering Science; B.S., Swarthmore College; M.S., Cornell University; Ph.D., Cornell University

Morton, Jessica R. (2022); Visiting Lecturer, Department of Writing, Rhetoric, and Digital Studies; B.A., Concord University; M.A., University of North Carolina at Charlotte

Mostafavi, M. Taghi (1986); Associate Professor, Department of Computer Science; B.S., Oklahoma State University; M.S., Oklahoma State University; Ph.D., Oklahoma State University

Moyer, Thomas (2017); Assistant Professor, Department of Software and Information Systems; B.S., Pennsylvania State University; M.S., Pennsylvania State University; Ph.D., Pennsylvania State University

Muesing, Mary Ellen (2003); Lecturer, Department of Writing, Rhetoric, and Digital Studies; B.A., Northeastern Illinois University; M.A., Northeastern Illinois University

Mukherjee, Arindam (2002); Associate Professor, Department of Electrical and Computer Engineering; B.S., Jadavpur University, India; M.S., University of California, Santa Barbara; Ph.D., University of California, Santa Barbara

Mukherjee, Pinku (2008); Dean for Research and Graduate Education, Distinguished Professor, College of Humanities & Earth and Social Sciences; Professor, Department of Biological Sciences, B.S., University of Bombay, India; M.S., University of London, England; Ph.D., University of London, England

Mullaney, Brigid A. (2004); Associate Dean for Research, The William States Lee College of Engineering; Professor, Department of Mechanical Engineering and Engineering Science, B.S., University College Dublin, Ireland; Ph.D., University College Dublin, Ireland

Mumford, Sherman (2016); Lecturer, Office of Student Development and Success, The William States Lee College of Engineering; B.S.E.T., University of North Carolina at Charlotte; M.S., Eastern Michigan University

Munir, Mariya (2016); Assistant Professor, Department of Civil and Environmental Engineering; M.S., Michigan State University; Ph.D., Michigan State University

Murphy, David L. (2001); Associate Professor, Department of Engineering Technology and Construction Management; B.S., Eastern Kentucky University; M.S., Eastern Kentucky University

Murphy, Deana K. (2004); Lecturer, Department of Special Education and Child Development; A.B., University of North Carolina at Chapel Hill; M.Ed., University of North Carolina at Charlotte

Murphy, Jeffrey (1998); Associate Professor, Department of Art and Art History; B.F.A., Ohio State University; M.F.A., University of Florida

Murray, Elizabeth M. (2010); Associate Professor, Department of Theatre; B.A., Pennsylvania State University; M.A., Emerson College; Ph.D., The Ohio State University

Murrell, Alexis (2023); Assistant Professor (Library)/Instruction and Information Literacy Librarian, J. Murrey Atkins Library; B.A., Purdue University; M.L.S., Indiana University

Murtha, Timothy (2023); Professor, Department of Anthropology; B.A., University of Central Florida; M.A., Pennsylvania State University; Ph.D., Pennsylvania State University

Mwangi, Esther W. (2016); Visiting Lecturer, Department of Sociology; B.S., Egerton University, Kenya; M.B.A., University of Central Oklahoma; Ph.D., Ohio State University

Myers, Adam (2016); Clinical Assistant Professor, Department of Middle, Secondary, and K-12 Education; B.A., State University of New York at Fredonia; M.Ed., Winthrop University; Ed.D., Gardner-Webb University

Myers, Adam (2016); Clinical Assistant Professor, Department of Middle, Secondary, and K-12 Education; B.A., State University of New York at Fredonia; M.Ed., Winthrop University; Ed.D., Gardner-Webb University

Najarian, Erin C. (44788); Lecturer, School of Nursing; B.A., University of North Carolina at Chapel Hill; B.S.N., University of North Carolina at Charlotte; M.S.N., Vanderbilt University; D.N.P., Vanderbilt University

Najjar, Nadia (2016); Lecturer, Department of Computer Science; B.S., George Mason University; M.A., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Nance, John C. (2019); Clinical Assistant Professor, Department of Counseling; B.A., Warner University; M.A., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Nanny, Mallory (2023); Lecturer, Department of Art and Art History; B.A., University of North Carolina at Wilmington; M.A., Richmond, The American International University in London, England; M.A., Florida State University; Ph.D., Florida State University

Nasipuri, Asis (2000); Department Chair and Professor, Department of Electrical and Computer Engineering; B.Tech., Indian Institute of Technology, India; M.S., University of Massachusetts; Ph.D., University of Massachusetts

Naylor, David W. (2007); Lecturer, Department of Civil and Environmental Engineering; B.S.C.E., University of North Carolina at Charlotte; M.S.C.E., University of North Carolina at Charlotte

Ndabu, Theophile N. (44788); Lecturer, Department of Business Information Systems and Operations Management; B.S., Rochester Institute of Technology; M.B.A., State University of New York - Polytechnic Institute; Ph.D., University at Buffalo

Ndiaye, Demba (2014); Assistant Professor, Department of Engineering Technology and Construction Management; B.S., Ecole Polytechnique de Thiès, Senegal; M.S., École Polytechnique de Montréal, Canada; Ph.D., École Polytechnique de Montréal, Canada

Neale, Faith R. (2004); Associate Professor, Department of Finance; B.S., University of Florida; M.S.A., Georgia Southwestern State University; Ph.D., Florida State University

Neil, Delia L. (1987); Interim Associate Dean for Academic Affairs, Department of Dance; Associate Professor; B.A., Butler University; M.F.A., University of North Carolina at Greensboro

Nesbit, Jeffrey (2015); Visiting Assistant Professor, David R. Rain School of Architecture; B.S., Texas Tech University; M.Arch., Texas Tech University; M.Arch., University of Pennsylvania

Nesbit, Marissa B. (2019); Assistant Professor, Department of Dance; B.A., Pitzer College; M.F.A., Texas Woman's University; Ph.D., Ohio State University

Nesmelov, Yuri (2009); Professor, Department of Physics and Optical Science; B.S., Kazan State University, Russia; Ph.D., Kazan State University, Russia

Nettles, John (2019); Lecturer, Department of Engineering Technology and Construction Management; B.S.M.E., University of North Carolina at Charlotte; M.S.M.E., University of North Carolina at Charlotte

Newell, David L. (44788); Visiting Assistant Professor, Department of Engineering Technology and Construction Management; A.A.S., Central Piedmont Community College; B.S.E.T., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte

Newton, Jason (2022); Lecturer, Department of History; B.A., Syracuse University; Ph.D., Syracuse University

Newton, Xiaoxia (2018); Professor, Department of Educational Leadership; B.A., Tsinghua University, China; M.A., Tsinghua University, China; Ph.D., University of California, Los Angeles

Nguyen, Loc Hoang (2016); Associate Professor, Department of Mathematics and Statistics; B.S., Vietnam National University, Vietnam; M.A., University of Utah; Ph.D., University of Utah

Nicholson, Joseph R. (2013); Library Faculty President, Associate Professor, and Metadata Librarian, J. Murrey Atkins Library; B.A., University of North Carolina at Chapel Hill; M.A., College of William & Mary; M.S.L.S., University of North Carolina at Chapel Hill

Nicolaides, Kathleen M. (2004); Senior Lecturer, Department of Criminal Justice and Criminology; B.A., Duke University; J.D., Emory University

Nilsson, Isabelle M. (2015); Associate Professor, Department of Earth, Environmental, and Geographical Sciences; B.S., Luleå University of Technology; M.A., University of Toledo; Ph.D., University of Toledo

Niu, Xi (Sunshine) (2015); Associate Professor, Department of Software and Information Systems; M.S., Tsinghua University, China; Ph.D., University of North Carolina at Chapel Hill

Nix-Crawford, Brittney (2024); Lecturer, Department of Communication Studies; B.A., Temple University; M.S., Drexel University; Ph.D., University of Delaware; Ph.D., Clemson University

Noble, Bonnie (1999); Associate Professor, Department of Art and Art History; B.A., Northwestern University; M.A., University of Pennsylvania; Ph.D., Northwestern University

Norander, Per (2015); Lecturer, Department of Economics; B.S., North Park University; M.A., Ohio University

Norander, Stephanie N. (2015); Professor, Department of Communication Studies; B.B.A., Ohio University; M.A., Ohio University; Ph.D., Ohio University

Noras, Maciej A. (2007); Associate Professor, Department of Engineering Technology and Construction Management; M.Sc., Wroclaw University of Technology; Ph.D., Southern Illinois University

O'Brien, Christopher P. (2006); Associate Professor, Department of Special Education and Child Development; B.A., University of Central Florida; M.A., University of Central Florida; Ph.D., University of Central Florida

O'Hare, Heidi (2007); Lecturer, Department of Theatre; B.F.A., University of Wisconsin; M.F.A., University of California

Ocana Gautherot, Kary (2025); Research Assistant Professor, College of Computing and Informatics; B.Sc., Federal University of Rio de Janeiro, Brazil; B.Sc., National University of San Marcos, Peru; M.Sc., Oswaldo Cruz Foundation; D.Sc., Oswaldo Cruz Foundation

Ogburn, Dennis E. (2007); Associate Professor, Department of Anthropology; B.A., Rice University; M.A., University of California, Santa Barbara; Ph.D., University of California, Santa Barbara

Ogunro, Vincent O. (2001); Associate Professor, Department of Civil and Environmental Engineering; B.S., University of Ife, Nigeria; M.S., University of Lagos, Nigeria; Ph.D., Institut National des Sciences Appliquees, France

Oh, Jaewon (44788); Assistant Professor, Department of Engineering Technology and Construction Management; B.S., Konkuk University, Seoul, Korea; M.S., Arizona State University; Ph.D., Arizona State University

Ojaide, Tanure (1990); Frank Porter Graham Professor, Department of Africana Studies; B.A., University of Ibadan, Nigeria; M.A., Syracuse University; Ph.D., Syracuse University

Okoro, Florence (2015); Associate Professor, School of Nursing; B.S.N., Obafemi Awolowo University, Nigeria; M.S.N., Obafemi Awolowo University, Nigeria; Ph.D., University of North Carolina at Chapel Hill

Okraski, Cornelia (2022); Lecturer, Faculty Site Coordinator, Office of School and Community Partnerships, Cato College of Education; B.A., University of Florida; M.A., Pennsylvania State University; M.B.A., Pennsylvania State University

Olson, Gordon W. (2011); Lecturer, Performing Arts Services, College of Arts + Architecture; B.F.A., Arizona State University; M.F.A., University of Texas at Austin

Opiola, Kristie (2016); Assistant Professor, Department of Counseling; B.S., University of Pittsburgh; M.S., Wheelock College; M.Ed., University of North Texas; Ph.D., University of North Texas

Orman, Evelyn K. (2015); Interim Associate Dean for Research, Department of Music; B.M.E., Murray State University; M.Ed., University of Central Florida; Ed.D., University of Alabama

Ornat, Natalie (2018); Library Faculty President, Assistant Professor and Humanities Librarian, J. Murrey Atkins Library; B.A., University of Wisconsin-Madison; M.L.S., University of North Carolina at Chapel Hill

Orozco, Carlos (2001); Associate Professor, Department of Engineering Technology and Construction Management; B.S., Universidad Nacional de Colombia; M.S., Carnegie Mellon University; Ph.D., Carnegie Mellon University

Outlaw, Taylor (2024); Assistant Teaching Professor, Department of Chemistry; B.S., Wake Forest University; Ph.D., Duke University

Overton, Jonathan (44788); Assistant Professor, Department of Sociology; B.A., University of Iowa; M.A., Kent State University; Ph.D., Kent State University

Oyarzun, Susan Elizabeth (Beth) Allred (2017); Clinical Assistant Professor, Department of Educational Leadership; B.A., University of North Carolina at Wilmington; M.S., University of North Carolina at Wilmington; Ph.D., Old Dominion University

Ozelkan, Agnes (2014); Senior Lecturer, Department of Industrial and Systems Engineering; B.S., Eötvös Loránd University; M.S., University of Arizona; Ph.D., University of Arizona

Ozelkan, Agnes G. (2019); Lecturer, Department of Industrial and Systems Engineering; B.S., Eötvös Loránd University, Hungary; M.S., University of Arizona; Ph.D., University of Arizona

Ozelkan, Ertunga C. (2004); Professor, Department of Industrial and Systems Engineering; B.A., Bogaziçi University; M.S., University of Arizona; Ph.D., University of Arizona

Paddock, Jonathan C. (2010); Senior Lecturer, Department of Communication Studies; B.S., Bob Jones University; M.M.C., University of South Carolina at Columbia

Padilla-Falto, Olga (2016); Visiting Lecturer, Department of Languages, Cultures, and Translation; B.S., Georgetown University; M.S., Georgetown University; Ph.D., Georgetown University

Page, Jacob (2024); Visiting Lecturer, Department of Mathematics and Statistics; A.A., Central Piedmont Community College; B.S., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Pajares Dos Santos, Sarah (2024); MA Fellow in Spanish, Department of Languages, Cultures, and Translation; B.A., Complutense University of Madrid, Spain; M.A.T., University of Salamanca

Palladino, Emily M. (2022); Lecturer, School of Nursing; B.S., Western Connecticut State University; M.S.N., Sacred Heart University; D.N.P., Sacred Heart University

Pan, Yinghao (2018); Associate Professor, Department of Mathematics and Statistics; B.S., Fudan University, China; M.S., Yale University; Ph.D., University of North Carolina at Chapel Hill

Pando, Miguel A. (2010); Associate Professor, Department of Civil and Environmental Engineering; B.S., Javeriana University; M.S., University of Alberta; Ph.D., Virginia Polytechnic Institute and State University

Paquette, Elisabeth (2017); Associate Professor, Department of Philosophy; M.A., University of Guelph, Canada; Ph.D., York University, Canada

Parajuli, Jyotsana (2020); Assistant Professor, School of Nursing; B.S.N., Tribhuvan University, Nepal; M.S., Miami University; Ph.D., Pennsylvania State University

Park, Albert (2018); Assistant Professor, Department of Software and Information Systems; B.S., Virginia Polytechnic Institute and State University; M.S., Virginia Polytechnic Institute and State University; Ph.D., University of Washington

Park, Noseong (2016); Assistant Professor, Department of Software and Information Systems; B.E., Soongsil University, South Korea; M.S., Korea Advanced Institute of Science and Technology; Ph.D., University of Maryland, College Park

Park, Sungjune (2001); Professor, Department of Business Information Systems and Operations Management; B.S., Korea Advanced Institute of Science and Technology, South Korea; M.S., Korea Advanced Institute of Science and Technology, South Korea; Ph.D., State University of New York at Buffalo

Parker, Jennifer B. (2013); Supervisor of Student Teaching/Teacher-in-Residence, Office of School and Community Partnerships, Cato College of Education; B.A., University of North Carolina at Charlotte; M.A., Gardner-Webb University

Parker-Sheffield, Miranda (2025); Assistant Professor, Department of Software and Information Systems; B.S., Harvey Mudd College; Ph.D., Georgia Institute of Technology

Parkhideh, Babak (2012); Associate Professor, Department of Electrical and Computer Engineering; B.S., University of Tehran, Iran; M.S., RWTH Aachen University, Germany; Ph.D., North Carolina State University

Parrow, Matthew W. (2006); Associate Dean for Academic Administration, Department of Biological Sciences; B.S., University of North Carolina at Chapel Hill; Ph.D., North Carolina State University

Pass, Michelle (2009); Lecturer, Department of Biological Sciences; B.S., North Carolina State University; M.S., North Carolina A&T State University

Patel, Vijay (2017); Clinical Assistant Professor, Department of Management; B.S.E., University of Canterbury, New Zealand; B.S., University of Canterbury, New Zealand; M.B.A., University of Western Ontario (Western University); D.B.A., Kennesaw State University

Patterson, Olivia (2021); Library/Associate Professor, J. Murrey Atkins Library; B.A., University of North Carolina at Asheville; M.L.I.S., University of North Carolina at Greensboro

Paul, Rajib (2017); Professor, Department of Epidemiology and Community Health; B.S., Ramakrishna Mission Residential College, Narendrapur, India; M.S., Indian Institute of Technology, India; Ph.D., Ohio State University

Payton, Jamie J. (2006); Associate Professor, Department of Computer Science; B.S., University of Tulsa; M.S., Washington University; D.Sc., Washington University

Pearce, Sandy C. (2019); Lecturer, School of Nursing; B.S.N., University of North Carolina at Charlotte; M.S.N., University of North Carolina at Charlotte

Pearce, Trevor R. (2013); Department Chair and Professor, Department of Philosophy; B.S., University of British Columbia; B.A., University of British Columbia; M.A., The University of Chicago; M.S., The University of Chicago; Ph.D., The University of Chicago

Pereira, Malin (1992); Dean, Honors College; Professor, Department of English; B.A., University of Wisconsin-Madison; M.A., University of Wisconsin-Madison; Ph.D., University of Wisconsin-Madison

Pérez-Quifiones, Manuel A. (2015); Professor, Department of Software and Information Systems; B.A., Ball State University; M.S., Ball State University; D.S., George Washington University

Perry, Heather R. (2005); Associate Professor, Department of History; B.A., Vanderbilt University; M.A., Indiana University; Ph.D., Indiana University

Peterman, Amy H. (2005); Associate Professor, Department of Psychological Science; B.S., Carnegie Mellon University; M.S., University of Pittsburgh; Ph.D., University of Pittsburgh

Peters, Amy J. (2009); Lecturer, School of Social Work; B.S.W., Marist College; M.S.W., Fordham University

Petersen, Kevin (2024); Assistant Professor, Department of Criminal Justice and Criminology; B.S., Virginia Tech University; M.S., Radford University; Ph.D., George Mason University

Peterson, Nicole D. (2010); Professor, Department of Anthropology; B.A., Rice University; M.A., University of California, San Diego; Ph.D., University of California, San Diego

Petty, Teresa M. (2005); Associate Provost Undergraduate Education and Dean of University College, Cato College of Education; Professor, Department of Middle, Secondary, and K-12 Education; B.S., University of North Carolina at Greensboro; M.Ed., University of North Carolina at Greensboro; Ed.D., University of North Carolina at Chapel Hill

Phillips, Matthew D. (2013); Associate Professor, Department of Criminal Justice and Criminology; B.A., Winthrop University; M.A., University of North Carolina at Charlotte; Ph.D., State University of New York at Albany

Piatak, Jaclyn S. (2013); Professor, Department of Political Science and Public Administration; B.A., Providence College; M.A., Johns Hopkins University; Ph.D., American University

Pieper, Torsten M. (2018); Professor, Department of Management; B.S., Rollins College; M.M., EMLYON Business School, France; M.S., Saarland University, Germany; Ph.D., European Business School International University

Pilkington, Stephanie F. (2019); Assistant Professor, Department of Engineering Technology and Construction Management; B.S.C.E., Virginia Polytechnic Institute and State University; M.S., Colorado State University; Ph.D., Colorado State University

Pilonieta, Paola (2007); Professor, Department of Reading and Elementary Education; B.A., University of Miami; M.S., University of Miami; Ph.D., University of Miami

Pipkin, Amanda (2008); Department Chair and Associate Professor, Department of History; B.A., Wake Forest University; M.A., Leiden University, The Netherlands; Ph.D., Rutgers University

Pitts, Andrea J. (2015); Associate Professor, Department of Philosophy; B.A., University of North Florida; M.A., University of South Florida

Pizzato, Mark C. (1997); Professor, Department of Theatre; B.A., University of Notre Dame; M.F.A., The Catholic University of America; Ph.D., University of Wisconsin - Milwaukee

Platonova, Elena A. (2007); Associate Professor, Department of Health Management and Policy; M.H.A., University of South Carolina; Ph.D., University of Alabama at Birmingham

Poler, Jordan C. (1995); Professor, Department of Chemistry; B.S., College at Brockport, State University of New York; Ph.D., University of North Carolina at Chapel Hill

Polk, Thomas E. (2017); Lecturer, Department of Computer Science; B.S., Virginia Polytechnic Institute and State University; M.S., Virginia Polytechnic Institute and State University; Ph.D., University of North Carolina at Charlotte

Pollock, Sarah H. (2015); Lecturer, Department of Sociology; B.A., Loyola College; M.A., Temple University

Polly, Andrew B. (2006); Professor, Department of Reading and Elementary Education; B.S., College of William & Mary; M.S., Old Dominion University; Ph.D., University of Georgia

Pope, Jon C. (2016); Lecturer, Department of Writing, Rhetoric, and Digital Studies; B.A., University of Southern Mississippi; M.L.I.S., University of Southern Mississippi

Porras-Aguilar, Rosario G. (2017); Associate Professor, Department of Physics and Optical Science; M.S., National Institute for Research in Astrophysics, Italy; Ph.D., National Institute for Research in Astrophysics, Italy

Potocznick, Stephanie (2019); Associate Professor, Department of Sociology; B.A., Emory University; M.A., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Chapel Hill

Potrykus, Bianca (2016); Lecturer, Department of Languages, Cultures, and Translation; M.A., University of Hamburg, Germany

Poutous, Menelaos (2013); Associate Professor, Department of Physics and Optical Science; B.S., Fairleigh Dickinson University; M.S., Fairleigh Dickinson University; Ph.D., Georgia Institute of Technology

Powell, Laurel B. (44788); Lecturer, Department of Middle Grades, Secondary, and K-12 Education; B.S., Catawba College; M.S., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Powers, Kelly (2008); Associate Professor, School of Nursing; B.S.N., Villanova University; M.S.N., William Patterson University; Ph.D., University of Nevada, Las Vegas

Prasad, Ritika (2009); Associate Professor, Department of History; B.A., Delhi University, India; M.A., Magdalen College, University of Oxford, England; M.A., University of California, Los Angeles; Ph.D., University of California, Los Angeles

Pratt, Gretchen (2012); Lecturer, Department of Writing, Rhetoric, and Digital Studies; B.A., College of Charleston; M.F.A., Purdue University

Price, Bob R. (2012); Associate Dean for Planning, Innovation, and Engagement, J. Murrey Atkins Library; B.S.B.A., Indiana University South Bend; M.A., Azusa Pacific University

Price, Richard G. (2018); Lecturer, Department of Engineering Technology and Construction Management; A.S., York Technical College; B.S., Clemson University; M.E.M., Duquesne University

Pugalee, David K. (1997); Director, Center for Math Science and Technology Education; Professor, Department of Middle, Secondary, and K-12 Education, B.S., Lee College; M.Ed., University of Southern Mississippi; M.S., North Carolina Central University; Ph.D., University of North Carolina at Chapel Hill

Pugalenthhi, Premkumar (2022); Clinical Assistant Professor, Department of Middle Grades, Secondary, and K-12 Education; B.S., Amrita Vishwa Vidyapeetham, India; M.S., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Pujol, Anton (2004); Professor, Department of Languages, Cultures, and Translation; M.B.A., The The University of Chicago; M.A., University of South Carolina at Columbia; Ph.D., The University of Kansas

Quinlan, Margaret M. (2009); Professor, Department of Communication Studies; B.S., Marist College; M.A., Illinois State University; Ph.D., University of Ohio

Rabinovich, Daniel (1996); Professor, Department of Chemistry; B.S., Pontifical Catholic University of Peru; M.A., Columbia University; M.Phil., Columbia University; Ph.D., Columbia University

Radford, Benjamin J. (2019); Associate Professor, Department of Political Science and Public Administration; B.A., University of North Carolina Asheville; M.A., Duke University; Ph.D., Duke University

Rafe, LaTonya (2022); Lecturer, School of Nursing; B.S.N., Olivet Nazarene University; M.S.N., Olivet Nazarene University

Rahman, A B M Mohaimenur (2022); Teaching Assistant Professor, Department of Software and Information Systems; B.S., Bangladesh University of Engineering and Technology, India; Ph.D., University of North Carolina at Charlotte

Raja, Jayaraman (Jay) (1989); Professor, Academic Affairs Department of Mechanical Engineering and Engineering Science, B.E., University of Madras, India; M.Sc., University of Madras, India; Ph.D., Indian Institute of Technology, India

Raja, M. Yasin (1990); Professor, Department of Physics and Optical Science; B.A., Punjab University, Pakistan; M.S., University of Islamabad, Pakistan; M.A., University of Islamabad, Pakistan; Ph.D., University of New Mexico

Rajagopalan, Angela M. (2005); Department Chair and Associate Professor, Department of Art and Art History; B.S., University of California, Berkeley; M.Phil., Graduate Center, City University of New York; Ph.D., Graduate Center, City University of New York

Rajasekhar, Yamuna (2014); Visiting Lecturer, Department of Electrical and Computer Engineering; B.S., University of Mumbai; M.S., University of North Carolina at Charlotte

Ramaprabhu, Praveen (2007); Professor, Department of Mechanical Engineering and Engineering Science; B.S., Anna University; M.S., University of Houston; Ph.D., Texas A&M University

Ramaprasad, Harini (2014); Associate Dean for Undergraduate Programs and Student Success, Department of Computer Science; B.S., Bangalore University; M.S.; Ph.D., North Carolina State University

Ramsey, Sonya Y. (2007); Professor, Department of History; B.A., Howard University; M.A.; Ph.D., University of North Carolina at Chapel Hill

Randle, Natasha (2018); Associate Dean for Undergraduate Programs, Department of Management; Clinical Assistant Professor; B.B.A., North Carolina Central University; M.B.A., Meredith College; Ph.D., Jackson State University

Ranis, Marek P. (2008); Professor, Department of Art and Art History; M.F.A., Eugeniusz Geppert Academy of Fine Arts, Poland

Rankin, Victoria E. (2018); Lecturer, Department of Sociology; B.A., Hunter College; M.S., Hunter College; M.U.P., Hunter College; Ph.D., University of Virginia

Raquet, Jeffrey S. (2001); Senior Lecturer, Department of Mechanical Engineering and Engineering Science; B.S., Rutgers University; M.S., University of Memphis; Ph.D., University of North Carolina at Charlotte

Ras, Zbigniew W. (1981); Professor, Department of Computer Science; M.A., Warsaw University, Poland; Ph.D., Warsaw University, Poland

Rasanen, Ryan (2024); Assistant Professor, Department of Civil and Environmental Engineering; B.S., University of North Dakota; M.S., University of Washington; Ph.D., University of Washington

Rasmussen, Lisa M. (2006); Professor, Department of Philosophy; B.S., University of California, Santa Cruz; M.A., Rice University; Ph.D., Rice University

Rauch, Alan (2002); Professor, Department of English; B.S., McGill University; M.S., Southern Illinois University; M.A., Rutgers University; Ph.D., Rutgers University

Ravindran, Arun (2003); Associate Professor, Department of Electrical and Computer Engineering; B.S., Birla Institute of Technology and Science, India; M.S., Birla Institute of Technology and Science, India; M.S., Ohio State University; Ph.D., Ohio State University

Ravvts, Scott (2024); Assistant Professor, Department of Psychological Science; B.A., University of Texas at Austin; M.S., University of North Carolina at Charlotte; M.S., Virginia Commonwealth University; Ph.D., Virginia Commonwealth University

Rebich, Susan K. (1999); Lecturer, Office of School and Community Partnerships, Cato College of Education; B.S., Youngstown State University; M.Ed., University of North Carolina at Charlotte

Reed, Jennifer (2024); Lecturer, Department of Mathematics and Statistics; B.S., Mars Hill College; M.A., Western Carolina University; Ph.D., Gardner-Webb University

Reeve, Charlie L. (2004); Professor, Department of Psychological Science; B.A., University of Minnesota-Twin Cities; M.A., Bowling Green State University; Ph.D., Bowling Green State University

Reeves, John C. (1996); Professor, Department of Religious Studies; B.A., University of North Carolina at Chapel Hill; M.Div., Southeastern Baptist Theological Seminary; M.Phil., Hebrew Union College-Jewish Institute of Religion, Israel; Ph.D., Hebrew Union College-Jewish Institute of Religion, Israel

Reid, Shannon (2013); Associate Professor, Department of Criminal Justice and Criminology; B.S., University of New Haven; M.S., American University; Ph.D., University of California, Irvine

Reinke, Luke T. (2017); Assistant Professor, Department of Reading and Elementary Education; B.S.E., Duke University; M.A.T., Duke University; Ph.D., University of Pennsylvania

Reisdorf, Bianca C. (2018); Associate Professor, Department of Communication Studies; B.A., Philipps University of Marburg, Germany; M.A., University of Bielefeld, Germany; D. Phil., University of Oxford, England

Reiter, Harold B. (1972); Professor, Department of Mathematics and Statistics; B.S., Louisiana State University; M.S., Clemson University; Ph.D., Clemson University

Reitzel, Adam M. (2012); Associate Dean for Research and Graduate Studies, Klein College of Science; B.A., Illinois Wesleyan University; M.S., University of Florida; Ph.D., Boston University

Ren, Xiaojun (2024); Associate Professor & Irwin Belk Distinguished Scholar, Department of Biological Sciences; B.Eng., Jilin University, China; M.S., Jilin University, China; Ph.D., Jilin University, China

Reynolds, Valerie S. (2015); Lecturer, Department of Earth, Environmental, and Geographical Sciences; B.S., University of North Carolina at Wilmington; M.S., University of Tennessee; Ph.D., University of Tennessee

Ricciutti, Natalie M. (44789); Assistant Professor, Department of Counseling; B.S., University of Mount Union; M.S.Ed., Youngstown State University; Ph.D., Kent State University

Rice, Jacelyn (2017); Assistant Professor, Department of Engineering Technology and Construction Management; B.S.E., University of Nevada, Las Vegas; M.S., Arizona State University; Ph.D., Arizona State University

Richardson, Christine A. (2006); Department Chair and Professor, Department of Biological Sciences; A.B., Princeton University; M.A., Columbia University; M.Ph., Columbia University; Ph.D., Columbia University

Richardson, Jeremy (2024); Assistant Professor, Turner School of Accountancy; B.A., Furman University; M.S., College of Charleston; Ph.D., Texas Tech University

Riffe, Nancy A. (2018); Associate Teaching Professor, Department of Communication Studies; B.A., George Mason University; M.A., University of Alabama; Ph.D., University of Alabama

Rinalducci, Jennifer (2016); Assistant Professor and Arts + Architecture Librarian, J. Murray Atkins Library; B.A., Lehigh University; M.A., Florida State University; M.L.S., University of North Carolina at Chapel Hill

Robinson, Jacqueline (2021); Lecturer, Department of Marketing; M.B.A., Duke University

Robinson Moore, Julia (2005); Associate Professor, Department of Religious Studies; B.A., Alma College; M.Div., Princeton Theological Seminary; Ph.D., Michigan State University

Rock, Tracy (2000); Professor, Department of Reading and Elementary Education; B.A., University of North Carolina at Charlotte; M.A., University of North Carolina at Greensboro; Ph.D., University of North Carolina at Greensboro

Rodriguez, Monica (2014); Professor, Department of Languages, Cultures, and Translation; B.A., University of Vigo; M.A., University of Wisconsin-Milwaukee; Ph.D., Kent State University

Rodriguez-Medina, Bienvenido (2014); Lecturer/Lab Manager, Department of Electrical and Computer Engineering; B.S.E.E., University of Puerto Rico at Mayagüez; M.S.E.E., University of Puerto Rico at Mayagüez; Ph.D., Mississippi State University

Roeder, Rebecca V. (2008); Associate Professor, Department of English; M.A., University of Wisconsin-Madison; Ph.D., Michigan State University

Rogelberg, Steven (2003); Professor, Department of Psychological Science; B.S., Tufts University; M.A., University of Connecticut; Ph.D., University of Connecticut

Rogers, Rebekah L. (2017); Associate Professor, Department of Bioinformatics and Genomics; B.S., University of Georgia; Ph.D., Harvard University

Rolan, Lisa (2023); Clinical Assistant Professor, Department of Marketing; B.S., North Carolina Wesleyan College; M.B.A., Pfeiffer University; D.B.A., University of North Carolina at Charlotte

Roland, Kristin (2023); Clinical Professor, Turner School of Accountancy; B.S., California State University; Ph.D., University of Colorado at Boulder

Rorrer, Audrey S. (2019); Research Associate Professor, Department of Computer Science; B.S., Guilford College; M.A., Appalachian State University; Ph.D., University of North Carolina at Charlotte

Ross, Ticola C. (2017); Clinical Assistant Professor, School of Social Work; B.A., North Carolina State University; M.S., North Carolina State University; M.S.W., University of North Carolina at Charlotte

Rothberg, Robin L. (2007); Senior Lecturer, Department of Communication Studies; B.S., Florida State University; M.A., State University of New York

Rothrock, Kristin (2003); Lecturer, Department of Art and Art History; B.S., Skidmore College; M.F.A., University of Wisconsin-Madison

Rowan, Diana M. (2007); Director and Professor, School of Social Work; B.S., State University of New York at Fredonia; M.S.W., Our Lady of the Lake University; Ph.D., University of Texas at Arlington

Rowney, Matthew (2016); Associate Professor, Department of English; B.A., State University of New York at New Paltz; M.Phil., City University of New York; Ph.D., City University of New York

Roy, Arindam (2018); Associate Professor, Department of Mathematics and Statistics; B.S., University of Calcutta, India; M.S., University of Calcutta, India; M.S., University of Texas - Pan American; Ph. D., University of Illinois at Urbana-Champaign

Russell, David L. (2009); Anne Reynolds Belk Distinguished Professor of Music, Department of Music; B.M., Cleveland Institute of Music and Case Western Reserve University; M.M., Cleveland Institute of Music and Case Western Reserve University

Russell-Pinson, Lisa (2019); Assistant Teaching Professor, Center for Graduate Life; B.A., University of South Carolina; M.S., Georgetown University; Ph.D., Georgetown University

Rutherford-Hemming, Tonya (2018); Clinical Assistant Professor, School of Nursing; B.S.N., University of North Carolina at Chapel Hill; M.S.N., University of North Carolina at Chapel Hill; Ed.D., Northern Illinois University

Sabol, Steven O. (1998); Professor, Department of History; B.A., Elon College; M.A., Old Dominion University; Ph.D., Georgia State University

Sadaf, Ayesha (2016); Associate Professor, Department of Educational Leadership; B.S., Punjab University, Pakistan; M.S., Punjab University, Pakistan; M.S., Purdue University; Ph.D., Purdue University

Safronov, Oleg (2005); Associate Professor, Department of Mathematics and Statistics; M.Sc., St. Petersburg State University; Ph.D., Royal Institute of Technology

Sahoo, Lipsarani (2023); Teaching Assistant Professor, Department of Software and Information Systems; B.S., North Orissa University; M.S., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Salas, Spencer W. (2007); Professor, Department of Middle, Secondary, and K-12 Education; B.A., University of Virginia; M.Ed., George Washington University; Ph.D., University of Georgia

Sanders, Mark M. (2007); Senior Lecturer, Department of Philosophy; B.A., New College of South Florida; M.A., The New School for Social Research; Ph.D., The New School for Social Research

Sandlin, Adam B. (44788); Lecturer, Department of Writing, Rhetoric, and Digital Studies; B.A., University of North Carolina at Charlotte; M.A., Virginia Tech University

Saqib, Fareena (2017); Associate Professor, Department of Electrical and Computer Engineering; B.I.T., National University of Sciences and Technology, Pakistan; M.S.C.E., University of New Mexico; Ph.D., University of New Mexico

Saral, Krista J. (2019); Associate Professor, Department of Economics; B.A., Florida State University; M.S., Florida State University; Ph.D., Florida State University

Sarkar, Kaustavi (2018); Associate Professor, Department of Dance; B.S., Calcutta University, India; M.S., Texas A&M University; Ph.D., Ohio State University

Sarunac, Nenad (2011); Research Professor, Energy Production and Infrastructure Center (EPIC); B.S., University of Zagreb, Croatia; M.S., University of Zagreb, Croatia; Ph.D., Lehigh University

Sashington, Niki (2020); Lecturer, College; B.S., South Carolina State University; M.A.T., Wingate University; M.A., Wingate University

Sass, Ronald (2006); Professor, Department of Electrical and Computer Engineering; B.S., University of Toledo; M.S., Ph.D. Michigan State University

Saulé, Erik (2013); Professor, Department of Computer Science; Ph.D., Laboratoire d'Informatique de Grenoble, France

Saunders, William L. (2007); Lecturer, Department of Civil and Environmental Engineering; B.S.C.E., University of North Carolina at Charlotte; M.S.C.E., University of North Carolina at Charlotte; Ph.D., North Carolina State University

Savage, Dylan (2002); Professor, Department of Music; B.M., Oberlin College; M.M., Indiana University at Bloomington; D.M., Indiana University at Bloomington

Savaiinaea, Tianran (2016); Lecturer, Department of Languages, Cultures, and Translation; B.A., Nanjing University, China; M.A., University of Virginia

Scheff, Jacob S. (2017); Associate Professor, Department of Earth, Environmental, and Geographical Sciences; B.S., University of Illinois at Urbana-Champaign; M.S., University of Washington; Ph.D., University of Washington

Scheid, Teresa L. (1990); Professor, Department of Sociology; B.A., Heidelberg College; M.S., Texas A&M University; Ph.D., North Carolina State University

Schlüter, Jessica A. (2009); Professor, Department of Bioinformatics and Genomics; B.S., Texas A&M University; Ph.D., Iowa State University

Schmedake, Thomas (2002); Department Chair and Professor, Department of Chemistry; B.A., Knox College; Ph.D., University of Wisconsin-Madison

Schmid, Steven (2019); Distinguished Professor, Department of Mechanical Engineering and Engineering Science; B.S., Illinois Institute of Technology; M.S., Northwestern University; Ph.D., Northwestern University

Schmidt, Leslie W. (44788); Clinical Assistant Professor, Department of Reading and Elementary Education; B.S., East Carolina University; M.A., East Carolina University; Ph.D., University of North Carolina at Charlotte

Schmidt, Thomas M. (2013); Associate Professor, Department of Art and Art History; B.A., Loyola University; M.F.A., Alfred University

Schmitz, Dawn (2012); Digital Programs Archivist, and Associate Professor, J. Murrey Atkins Library; B.A., University of Wisconsin-Madison; M.A., University of Pittsburgh; M.L.I.S., University of Pittsburgh; Ph.D., University of Pittsburgh

Schmutz, Vaughn (2011); Associate Professor, Department of Sociology; B.S., Brigham Young University; M.S., Brigham Young University; M.A., Emory University; Ph.D., Emory University

Schroering, Caitlin H. (44789); Assistant Professor, Department of Global Studies; B.A., Denison University; M.A., University of Florida; Ph.D., University of Pittsburgh

Schuckers, Michael (45516); Professor, School of Data Science; Ph.D., Iowa State University

Schuckers, Stephanie (2024); Bank of America Distinguished Professor, Department of Computer Science; B.S.E., Iowa State University; M.S.E., University of Michigan; Ph.D., University of Michigan

Schulkind, Lisa (2014); Associate Professor, Department of Economics; B.A., Union College; M.A., University of California, Davis; Ph.D., University of California, Davis

Scipioni, Marco (44929); Associate Teaching Professor, School of Data Science; B.S., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Scott, Clifton W. (2005); Professor, Department of Communication Studies; B.S., Bradley University; M.A., Northern Illinois University; Ph.D., Arizona State University

Scott, Victoria C. (2015); Associate Professor, Department of Psychological Science; B.A., Emory University; M.A., University of South Carolina; M.B.A., University of South Carolina; Ph.D., University of South Carolina

Sears, Alison (2019); Teaching Assistant Professor, Department of Engineering Technology and Construction Management; B.S., West Virginia University; M.S., West Virginia University; Ph.D., West Virginia University

Serrata, Luz del Carmen (2023); Assistant Professor, Department of Educational Leadership; A.A., Del Mar College; B.B.A., Texas A&M University; M.Ed., University of Texas at San Antonio; Ph.D., University of Texas at Austin

Settemier, Whitney (44743); Lecturer/Fac Site Coord, School and Community Partnership, Cato College of Education; B.S., James Madison University; M.Ed., Queens University - NC

Sexton, Jill (45731); Dean of the Library, J. Murrey Atkins Library; B.A., Rowan College; M.S., University of North Carolina at Chapel Hill

Sha, Wei (2008); Research Assistant Professor, Department of Bioinformatics and Genomics; B.Med., Capital Medical University; M.S., Virginia Polytechnic Institute and State University; Ph.D., Virginia Polytechnic Institute and State University

Shaban, Wafaa (2003); Lecturer, Department of Mathematics and Statistics; B.A., Lebanese University; M.A., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Shaikh, Samira (2016); Associate Professor, Department of Computer Science; B.Eng., L.D. College of Engineering, Ahmedabad, Gujarat, India; M.S., State University of New York; Ph.D., State University of New York

Shankar, Ramesh (2014); Research Professor, Energy Production and Infrastructure Center (EPIC); B.Tech., Indian Institute of Technology, India; M.B.A., Queens University; M.S.E.E., University of Delaware; Ph.D., University of Delaware

Sharma, Aditi (2007); Lecturer, Department of Physics and Optical Science; B.E., Birla Institute of Technology and Science, India; M.S., Birla Institute of Technology and Science, India; M.S., University of Cincinnati; Ph.D., University of Cincinnati

Shaw, George (2018); Associate Professor, Department of Health Management and Policy; B.S.B.A., Charleston Southern University; M.S., North Carolina A&T State University; Ph.D., University of South Carolina

Shealy, Daniel L. (1988); Professor, Department of English; B.A., Newberry College; M.A., University of South Carolina; Ph.D., University of South Carolina

Shears, Jeffrey K. (2022); Professor, School of Social Work; B.S.W., North Carolina Agricultural and Technical State University; M.Ed., North Carolina Agricultural and Technical State University; Ph.D., University of Denver

Sheeler, Cory G. (2015); Lecturer, School of Nursing; B.S., East Carolina University; R.N., Queens University of Charlotte; M.S.N., University of North Carolina at Chapel Hill

Shehab, Mohamed (2007); Professor, Department of Software and Information Systems; B.S., United Arab Emirates University; Ph.D., Purdue University

Shelton, Sarah H. (2018); Clinical Assistant Professor, Department of Applied Physiology, Health, and Clinical Sciences; A.A.S., Catawba Valley Community College; B.A., Ashford University; M.S., University of Charleston; Ph.D., University of Charleston

Shepherd, Mary Jo (2012); Lecturer, Department of Political Science and Public Administration; B.A., University of North Carolina at Charlotte; M.S., Baylor University

Sherman, William Edward (2017); Associate Professor, Department of Religious Studies; B.A., Stanford University; M.A., University of California, Los Angeles; Ph.D., Stanford University

Shields, Jennifer (2008); Visiting Lecturer, David R. Rabin School of Architecture; B.S., University of Virginia; M.A., University of Virginia

Shin, Min C. (2001); Department Chair and Professor, Department of Computer Science; B.A., University of South Florida; M.S., University of South Florida; Ph.D., University of South Florida

Shiridevich, Samira (44788); Assistant Professor, Department of Art and Art History; A.A., Shariaty Technical College, Tehran; B.A., Nasibeh Teacher Training College, Tehran; M.A., Art University of Tehran; M.F.A., University of Florida

Shirley, Terry R. (2006); Lecturer, Department of Earth, Environmental, and Geographical Sciences; B.S., Pennsylvania State University; M.S., Pennsylvania State University

Shoghli, Omidreza (2017); Assistant Professor, Department of Engineering Technology and Construction Management; B.S., Iran University of Science and Technology; M.S., Iran University of Science and Technology; Ph.D., Virginia Polytechnic Institute and State University

Shore, Rebecca M. (2008); Associate Professor, Department of Educational Leadership; B.Ed., University of Southern California; M.A., California State University; Ed.D., University of South Carolina

Shue, Samuel (2021); Teaching Assistant Professor, Department of Electrical and Computer Engineering; B.S., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Shull, Kristina K. (2020); Associate Professor, Department of History; B.A., University of California, Los Angeles; M.A., New York University; M.A., University of California, Irvine; Ph.D., University of California, Irvine

Shuster, Martin (44743); Distinguished Professor, Department of Philosophy; B.A., University of Maryland; M.A., Yale University; M.A., Johns Hopkins University; Ph.D., Johns Hopkins University

Siler, Elizabeth M. (2013); Associate Dean for Collection Services, J. Murrey Atkins Library; Assistant Professor; B.A., Elon University; M.S.L.S., University of Kentucky

Silver, Reginald (2014); Clinical Professor, Department of Business Information Systems and Operations Management; Clinical Assistant Professor; B.S., North Carolina State University; M.B.A., East Carolina University; DrPH, University of North Carolina at Chapel Hill

Simmons, Adreonna N. (2019); Assistant Professor, Community Engagement Librarian, and Archivist, J. Murrey Atkins Library; B.A., University of North Carolina at Chapel Hill; M.L.S., North Carolina Central University

Sinclair, Celia B. (1999); Lecturer, Department of Religious Studies; B.A., Duke University; M.A., Yale University

Singer, Christina L. (2021); Assistant Professor, Department of Art and Art History; B.F.A., East Tennessee State University; M.F.A., University of Florida

Sireli, Afife Yesim (2003); Associate Professor, Department of Industrial and Systems Engineering; B.S., Istanbul Technical University, Turkey; M.S., Istanbul Technical University, Turkey; Ph.D., Old Dominion University

Skullen, Joseph (2020); Department Chair and Professor, Department of Music; B.S., Tennessee Tech University; M.M., Pennsylvania State University; D.M.A., Michigan State University

Slane, Lauren (2025); Teaching Assistant Professor, Department of Computer Science; B.A., Monclair State University; M.A., SIT Graduate Institution; Ed.D., University of North Carolina at Charlotte

Smail, John (1988); Interim Dean, College of Humanities & Earth and Social Sciences; Professor, Department of History; B.A., University of Wisconsin at Madison; M.A., Stanford University; Ph.D., Stanford University

Smelser, Ronald E. (2003); Professor, The William States Lee College of Engineering; Professor, Department of Mechanical Engineering and Engineering Science, S.M.E., University of Cincinnati; S.M.M.E., Massachusetts Institute of Technology; Ph.D., Carnegie Mellon University

Smith, Aimee (2023); Assistant Professor, Department of Psychological Science; B.A., Winthrop University; M.A., Kent State University; Ph.D., Kent State University

Smith, Amanda B. (44788); Lecturer, School of Nursing; B.S., St. John Fisher College; M.S.N., Queens University - NC

Smith, Benjamin C. (2019); Lecturer, Department of Engineering Technology and Construction Management; B.S., North Carolina State University; M.C.E., North Carolina State University

Smith, Christopher (2024); Assistant Professor, School of Nursing; A.D.N., Wayne Community College; B.S.N., Appalachian State University; M.S.N., Appalachian State University; Post-Master Certificate, East Carolina University; Ph.D., East Carolina University

Smith, Courtney S. (2014); Teaching Assistant Professor, Department of Electrical and Computer Engineering; B.S., Norfolk State University; M.S., Norfolk State University

Smith, Dale L. (2016); Department Chair and Professor, Department of Global Studies; A.A., Schiller International University; B.A., University of Southern California; Ph.D., Massachusetts Institute of Technology

Smith, Debra (1998); Associate Professor, Department of Africana Studies; B.A., University of North Carolina at Chapel Hill; M.A., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Greensboro

Smith, Dustin W. (44788); Clinical Assistant Professor, Department of Applied Physiology, Health, and Clinical Sciences; B.S., University of Central Florida; M.A., University of Central Florida

Smith, Heather A. (1999); Professor, Department of Earth, Environmental, and Geographical Sciences; B.A., University of North Carolina at Chapel Hill; M.A., Queen's University, Canada; Ph.D., University of British Columbia, Canada

Smith, John David (2004); Charles H. Stone Distinguished Professor of American History, Department of History; A.B., Baldwin-Wallace College; A.M., University of Kentucky; Ph.D., University of Kentucky

Smith, Michael S. (2019); Assistant Professor, Department of Engineering Technology and Construction Management; B.S.E.T., University of North Carolina at Charlotte; M.S.E.E., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Smith, Patrick (44773); Associate Professor, Department of Finance; Crosland Distinguished Scholar in Real Estate; B.S., University at Buffalo; M.B.A., University at Buffalo; Ph.D., Georgia State University

Smith, Rita (2017); Clinical Assistant Professor, Department of Management; B.A., Rutgers University; M.B.A., Nova Southeastern University; D.Ed., Florida International University

Smith, Stuart T. (1994); Professor, Department of Mechanical Engineering and Engineering Science; B.S., Dunstable College, England; Ph.D., University of Warwick, England

Smith-Ruiz, Dorothy (1992); Professor, Department of Africana Studies; B.A., Fort Valley State College; M.A., Michigan State University; Ph.D., Michigan State University

Smithwick, Jake (2016); Associate Professor, Department of Engineering Technology and Construction Management; B.S., Arizona State University; M.S., Arizona State University; M.P.A., Arizona State University; Ph.D., Arizona State University

Snyder, Gregory (1994); Associate Professor, David R. Ravin School of Architecture; B.S., University of Texas at Arlington; M.Arch., Rice University

Socolovsky, Maya (2008); Associate Professor, Department of English; B.A., University of Leeds; M.A., Vanderbilt University; Ph.D., University of Oxford

Sofsky, William A. (2015); Lecturer, Turner School of Accountancy; B.B.A., Loyola College; M.B.A., Loyola College

Soliz Urrutia, Carmen (2014); Associate Professor, Department of History; B.A., Universidad Nuestra Señora de La Paz, Bolivia; M.A., Universidad de Salamanca, Spain; M.A., Universidad de la Cordillera, Bolivia; Ph.D., New York University

Somayaji, Shankari N. (2018); Lecturer, Department of Biological Sciences; M.S., University of Hyderabad; Ph.D., University of North Carolina at Charlotte

Song, Bao-Hua (Alysa) (2012); Associate Professor, Department of Biological Sciences; M.S., Shandong Normal University, China; Ph.D., Chinese National Academy of Sciences

Song, Jun (2017); Assistant Professor, Department of Mathematics and Statistics; B.S., Seoul National University, South Korea; Ph.D., Pennsylvania State University

Song, Lingguang (2023); Department Chair and Professor, Department of Engineering Technology and Construction Management; B.S., Tianjin University; M.S., Tianjin University; Ph.D., University of Alberta

Sonin, Isaac M. (1991); Professor, Department of Mathematics and Statistics; M.S., Moscow State University, Russia; Ph.D., Moscow State University, Russia

Souffrant, Eddy (2023); Department Chair and Professor, Department of Philosophy; B.A., DePaul University; Ph.D., The City University of New York Graduate School and University Center

Souffrant, Eddy M. (2004); Associate Professor, Department of Philosophy; B.A., DePaul University; Ph.D., The City University of New York Graduate School and University Center

Souvenir, Richard M. (2006); Associate Professor, Department of Computer Science; B.S., Washington University; M.S., Washington University; D.Sc., Washington University

Spainhour, Cheryl (2003); Lecturer, Department of Communication Studies; B.A., University of Georgia; M.A., Wake Forest University

Spano, Fred (2008); Associate Professor, Department of Music; B.A., William Penn College; M.M., Westminster Choir College; Ph.D., Florida State University

Spence, Kyle (2024); Assistant Professor, David R. Ravin School of Architecture; B.Arch., Howard University; M.S., Columbia University

Sperry, David P. (2013); Director of Venture and Lecturer, Department of Applied Physiology, Health, and Clinical Sciences; B.A., Houghton College; M.S.Ed., Alfred University

Spillane, Susan (2023); Lecturer, Department of Writing, Rhetoric, and Digital Studies; B.A., Appalachian State University; M.A., University of North Carolina at Charlotte

Spooner, Frederick H. (1981); Professor, Department of Special Education and Child Development; B.S., Butler University; M.S., Butler University; Ph.D., University of Florida

Spry, Ashley D. (2018); Lecturer, Department of Engineering Technology and Construction Management; B.S.M.E., University of North Carolina at Charlotte; M.S., North Carolina State University

Sridhar, Meera (2014); Associate Professor, Department of Software and Information Systems; B.S., Carnegie Mellon University; M.S., Carnegie Mellon University; Ph.D., University of Dallas at Texas

Stahl, Shayna (2019); Lecturer, Department of Music; B.M., Temple University; M.A., State University of New York at Stony Brook; M.M.Ed., University of Hartford

Stamper, Brandy J.H. (2015); Associate Teaching Professor, Department of Communication Studies; B.A., University of North Carolina at Charlotte; M.A., University of North Carolina at Charlotte

Stanley, Laura J. (2015); Professor, Department of Management; B.S.B.A., University of North Carolina at Chapel Hill; M.Ac., University of North Carolina at Chapel Hill; M.Ed., University of Georgia; Ph.D., University of Georgia

Starker, Tehia V. (2008); Associate Professor, Department of Reading and Elementary Education; B.A., Bethune-Cookman University; M.A., University of Northern Iowa; Ph.D., University of Nebraska

Starrett, Gregory S. (1992); Department Chair and Professor, Department of Anthropology; B.A., Northwestern University; M.A., Stanford University; Ph.D., Stanford University

Stearns, Mary Elizabeth (2005); Professor, Department of Sociology; B.A., Rice University; M.A., University of North Carolina at Chapel Hill; Ph.D., University of North Carolina at Chapel Hill

Steck, Todd R. (1991); Professor, Department of Biological Sciences; B.S., Allegheny College; M.S., University of Rochester; Ph.D., University of Rochester

Stedman, Allison M. (2007); Professor, Department of Languages, Cultures, and Translation; A.B., Dartmouth College; A.M., Dartmouth College; M.A., University of Pennsylvania; Ph.D., University of Pennsylvania

Steele, Lucy A. (2012); Lecturer, Department of Writing, Rhetoric, and Digital Studies; B.A., University of South Carolina; M.A., University of North Carolina at Charlotte

Stellwagen, Sarah D. (44929); Research Assistant Professor, Department of Biological Sciences; B.A., Clemson University; M.S., Clemson University; Ph.D., Virginia Tech University

Stephan, Michelle L. (2011); Professor, Department of Middle, Secondary, and K-12 Education; B.S., Vanderbilt University; M.S., Mississippi State University; Ph.D., Vanderbilt University

Stickels, Benjamin G. (2011); Lecturer, College of Arts + Architecture; B.A., Western Michigan University; M.F.A., University of Missouri at Kansas City

Stogner, John M. (2013); Professor, Department of Criminal Justice and Criminology; B.S., North Carolina State University; B.A., North Carolina State University; M.S., University of North Carolina at Charlotte; Ph.D., University of Florida

Stokes, Ashli Q. (2006); Interim Department Chair and Professor, Department of Communication Studies; B.A., Virginia Polytechnic Institute and State University; M.A., Wake Forest University; Ph.D., University of Georgia

Stone, Amanda (2023); Visiting Lecturer, Department of Earth, Environmental, and Geographical Sciences; B.S., East Carolina University; M.S., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Stone, Shaun M. (2013); Lecturer, Department of Languages, Cultures, and Translation; B.A., Furman University; M.A., University of North Carolina at Charlotte

Stover, Tyler E. (44788); Teaching Associate Professor, Department of Mechanical Engineering and Engineering Science; B.S., Azusa Pacific University; B.S., Purdue University; M.S., Purdue University

Strah, Nicole (44789); Professor, Department of Management; B.S., University of Illinois at Urbana-Champaign; M.S., Purdue University; Ph.D., Purdue University - West Lafayette

Strickland, Jamie (2001); Lecturer, Department of Earth, Environmental, and Geographical Sciences; B.S., University of North Carolina at Charlotte; M.A., University of North Carolina at Charlotte; Ph.D., University of Georgia

Stringfellow, Rodney (2024); Lecturer, Department of Communication Studies; B.A., Purdue University; M.S., Pratt Institute

Striplin, Caryn (2000); Lecturer, Department of Chemistry; B.S., California State University, Chico; Ph.D., Washington State University

Stroud, Josiah (2015); Lecturer, English Language Training Institute; B.A., University of North Carolina at Charlotte; M.A.T., University of North Carolina at Charlotte

Stuart, Jennifer Ames (2013); Associate Dean for Graduate and Executive Programs, Belk College of Business; Assistant Professor, Department of Marketing; B.A., University of Pittsburgh; M.S., University of Pittsburgh; M.B.A., University of Pittsburgh; M.Phil., Columbia University; Ph.D., Columbia University

Stylianou, Antonis C. (1990); Associate Dean for Faculty and Research, Belk College of Business; Professor, Department of Business Information Systems and Operations Management; B.A., Kent State University; M.B.A., Kent State University; Ph.D., Kent State University

Su, Hsin-Hao (2017); Assistant Professor, Department of Computer Science; B.S., National Tsing Hua University, Taiwan; M.S., University of Michigan; Ph.D., University of Michigan

Su, ZhengChang (2006); Professor, Department of Bioinformatics and Genomics; B.S., Yunnan Agricultural University, China; M.S., Jilin University, China; M.S., University of Alabama at Birmingham; Ph.D., Jilin University, China

Subramaniam, Chandrasekar (2003); Department Chair and Associate Professor, Department of Business Information Systems and Operations Management; B.E., Regional Engineering College of Trichy, India; Dipl., Indian Institute of Management, India; Ph.D., University of Illinois at Urbana-Champaign

Subramanian, Kalpathi R. (1993); Associate Professor, Department of Computer Science; B.E., University of Madras, India; M.S., University of Texas at Austin; Ph.D., University of Texas at Austin

Suclipe, Roger F. (2014); Lecturer, School of Social Work; B.A., Appalachian State University; M.S.W., University of North Carolina at Chapel Hill

Suleski, Thomas J. (2003); Professor, Department of Physics and Optical Science; B.S., University of Toledo; M.S., Georgia Institute of Technology; Ph.D., Georgia Institute of Technology

Sullivan, Elizabeth (2016); Associate Professor, Department of Music; B.M., Stetson University; M.M., University of Illinois at Urbana-Champaign; Ph.D., University of Illinois at Urbana-Champaign

Sullivan, Shannon (2014); Professor, Department of Philosophy; B.A., Trinity University; M.A., Vanderbilt University; Ph.D., Vanderbilt University

Sulpy, Alessandra (2016); Lecturer, Department of Art and Art History; B.F.A., Maryland Institute College of Art; M.F.A., Indiana University Bloomington

Sun, Mei (2016); Assistant Professor, Department of Civil and Environmental Engineering; B.E., Tsinghua University, China; M.S., Carnegie Mellon University; Ph.D., Carnegie Mellon University

Sun, Yanqing (1994); Professor, Department of Mathematics and Statistics; B.S., Wuhan University of Technology, China; M.S., Huazhong University of Science and Technology, China; M.S., Florida State University; Ph.D., Florida State University

Sung, Way (2016); Associate Professor, Department of Bioinformatics and Genomics; B.S., University of New Hampshire; Ph.D., University of New Hampshire

Suresh Babu, Arun Vishnu (2022); Teaching Assistant Professor, Department of Mechanical Engineering and Engineering Science; B.S., Amrita Vishwa Vidyapeetham, India; M.S., Indian Institute of Science, India; Ph.D., North Carolina State University

Syverson, Drew D. (2022); Research Assistant Professor, Department of Earth, Environmental, and Geographical Sciences; B.S., University of Minnesota; M.S., University of Minnesota; Ph.D., University of Minnesota

Szmer, John J. (2008); Professor, Department of Political Science and Public Administration; B.A., University of Georgia; M.S., University of Georgia; J.D., University of Georgia; Ph.D., University of South Carolina

Tabarraei, Alireza (2012); Associate Professor, Department of Mechanical Engineering and Engineering Science; B.S., Sharif University of Technology, Iran; M.S., Sharif University of Technology, Iran; Ph.D., University of California, Davis

Tabkhivayghan, Hamed (2016); Associate Professor, Department of Electrical and Computer Engineering; B.S., Sharif University of Technology, Iran; M.S., Sharif University of Technology, Iran; Ph.D., Northeastern University

Tabor, James D. (1989); Professor, Department of Religious Studies; B.A., Abilene Christian University; M.A., Pepperdine University; Ph.D., The University of Chicago

Talukder, Ashit (2015); Professor, Department of Computer Science; B.S., Osmania University, India; M.S., Iowa State University; Ph.D., Carnegie Mellon University

Tang, Wenwu (2010); Professor, Department of Earth, Environmental, and Geographical Sciences; B.S., East China Normal University, China; M.S., Nanjing University, China; Ph.D., The State University of Iowa

Tanyi, Paul N. (2015); Associate Professor, Turner School of Accountancy; B.S., University of Buea; M.S., Illinois State University; M.B.A., Illinois State University; Ph.D., Florida International University

Tarr, Clayton C. (2018); Visiting Lecturer, Department of English; B.A., Indiana University; M.A., University of South Carolina; Ph.D., University of Georgia

Tate, Ashley (44788); Assistant Professor, Department of Dance; B.S., Texas Christian University; M.F.A., Washington University

Taylor, Brian (2023); Lecturer, Department of Music; B.M., University of Texas at Austin; B.A., University of Texas at Austin; M.M., Michigan State University; D.M.A., Michigan State University

Taylor, David Bruce (2004); Professor, Department of Reading and Elementary Education; B.A., University of Texas at Austin; M.Ed., University of Houston; Ph.D., University of Iowa

Taylor, Desiré J. (2012); Lecturer, Department of Mathematics and Statistics; B.S., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte

Taylor, Heather F. (44788); Clinical Assistant Professor, Department of Special Education and Child Development; B.S., Virginia Commonwealth University; M.Ed., Virginia Commonwealth University; Ph.D., University of North Carolina at Charlotte

Taylor, John R. (2006); Lecturer, Department of Mathematics and Statistics; B.S., North Carolina State University; M.S., North Carolina State University; Ph.D., University of North Carolina at Charlotte

Taylor, Terrie K. (2021); Lecturer, School of Social Work; B.A., University of North Carolina at Chapel Hill; M.S.W., University of North Carolina at Charlotte

Tempest, Brett Q. (2010); Associate Dean for Academic Affairs, Department of Civil and Environmental Engineering; B.A., University of North Carolina at Chapel Hill; B.S., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Teng, S. Gary (2000); Professor, Department of Industrial and Systems Engineering; B.E., Chung Yuan University, Taiwan; M.S.I.E., Texas Tech University; Ph.D., Auburn University

Teng, S. Gary (2000); Professor, Department of Industrial and Systems Engineering; B.E., Chung Yuan University, Taiwan; M.S.I.E., Texas Tech University; Ph.D., Auburn University

Terejanu, Gabriel (2018); Professor, Department of Computer Science; B.E., Craiova University, Romania; M.S., University at Buffalo; Ph.D., University at Buffalo

Thaddeus, David J. (1999); Professor, David R. Rabin School of Architecture; B.E., American University of Beirut, Lebanon; M.Arch., University of Houston

Thayer, Matthew (2024); Lecturer, Department of Computer Science; B.S., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte

Thiede, Barbara A. (2006); Associate Professor, Department of Religious Studies; B.A., University of Illinois at Urbana-Champaign; M.A., University of Missouri; Ph.D., University of Missouri

Thiede, Ralf (1990); Professor, Department of English; M.A., University of Missouri; Ph.D., University of Missouri

Thomas, Deborah (2018); Department Chair and Professor, Department of Earth, Environmental, and Geographical Sciences; B.A., University of Kansas; M.A., University of North Carolina; Ph.D., University of South Carolina

Thomas, M. Lori (2008); Associate Professor, School of Social Work; B.A., Carson-Newman College; M.S.W., Virginia Commonwealth University; Ph.D., Virginia Commonwealth University

Thomas, Marie H. (2014); Clinical Assistant Professor, School of Nursing; B.S.N., Vanderbilt University; M.S.N., University of North Carolina at Greensboro; Ph.D., University of North Carolina at Greensboro

Thomas, Marye L. (2018); Director, Research, Faculty Engagement and Institute for Social Capital, Urban Institute; B.A., Carson-Newman College; M.Div., Baptist Theological Seminary - Richmond; M.S.W., Virginia Commonwealth University; Ph.D., Virginia Commonwealth University

Thomas, Nikki L. (2015); Assistant Professor, Archivist for Collection Management, Library Special Collections, J. Murrey Atkins Library; B.A., University of South Carolina; M.S., University of Texas at Austin

Thomas, Suzanne M. (2014); Lecturer, Department of Writing, Rhetoric, and Digital Studies; B.A., University of North Carolina at Charlotte; M.A., University of North Carolina at Charlotte

Thomas Fenwick, Abbey C. (2014); Associate Professor, Department of Applied Physiology, Health, and Clinical Sciences; B.S., Pennsylvania State University; M.Ed., University of Virginia; Ph.D. University of Michigan

Thompson, Lydia (2018); Professor, Department of Art and Art History; B.F.A., Ohio State University; M.F.A., New York State College of Ceramics at Alfred University

Thompson, Michael E. (2005); Associate Professor; Interim Department Chair, Department of Health Management and Policy; B.A., Johns Hopkins University; M.S., University of Maryland, Baltimore County; Dr.P.H., Johns Hopkins University

Thorsett-Hill, Karen (2012); Lecturer, Department of Mechanical Engineering and Engineering Science; B.S.M.E., University of Memphis; M.B.A., California State University; M.S.M.E., University of North Carolina at Charlotte

Thorsheim, Peter J. (2000); Professor, Department of History; B.A., Carleton College; M.A., University of Wisconsin-Madison; Ph.D., University of Wisconsin-Madison

Tian, Weidong (2008); Distinguished Scholar of Risk Management and Insurance; Department Chair and Professor, Department of Finance; Ph.D., McGill University

Tingelstad, Catherine (2018); Assistant Professor and Instruction and Curriculum Engagement Coordinator, J. Murrey Atkins Library; B.A., Duke University; M.H.A., Virginia Commonwealth University; M.L.S., North Carolina Central University

Tipton, Roger (2024); Research Associate Professor, Department of Mechanical Engineering and Engineering Science; B.S.N., Ohio State University; M.S., University of South Florida; Ph.D., University of South Florida

Tobias, John L. (2021); Lecturer, School of Data Science; B.S., University of North Carolina at Charlotte; M.S., High Point University

Tokoro, Shoko (2007); Associate Professor and Electronic and Continuing Resources Librarian, J. Murrey Atkins Library; A.A., College of South Idaho; B.A., University of Hawaii, Hilo; M.A., University of Hawaii, Manoa; M.L.I.S., University of Hawaii, Manoa

Tolone, William J. (1996); Associate Provost and Dean of the Graduate School, Graduate School; Professor, Department of Software and Information Systems; B.S., Millikin University; Ph.D., University of Illinois at Urbana-Champaign

Tomida, Junya (2018); Associate Professor, Department of Biological Sciences; B.S., Osaka Prefecture University, Japan; M.S., Osaka Prefecture University, Japan; Ph.D., Kyoto University Radiation Biology Center, Japan

Tonidandel, Scott (2018); Professor, Department of Management; B.A., Davidson College; M.A., Rice University; Ph.D., Rice University

Toscano, Aaron A. (2006); Professor, Department of English; B.A., Virginia Polytechnic Institute and State University; M.S., Towson University; Ph.D., University of Louisville

Townsend, Colette R. (2014); Lecturer, School of Nursing; Director, Learning Resource Center, B.S.N., West Suburban College of Nursing; M.S.N., University of North Carolina at Charlotte

- Trammell, Susan R. (1996); Professor, Department of Physics and Optical Science; B.S., University of North Carolina at Chapel Hill; M.A., University of Texas at Austin; Ph.D., University of Texas at Austin**
- Tripplett, Nicholas P. (2020); Clinical Assistant Professor, Department of Middle, Secondary, and K-12 Education; B.A., University of North Carolina at Chapel Hill; M.A.T., University of North Carolina at Chapel Hill; Ph.D., University of North Carolina at Charlotte**
- Trotter, Suzanne C. (44929); School of Nursing Lecturer, School of Nursing; B.S.N., Gardner-Webb University; M.S.N., Appalachian State University**
- Troutman, Jerry M. (2010); Professor, Department of Chemistry; B.S., East Carolina University; Ph.D., University of Kentucky**
- Troutman-Jordan, Meredith L. (2003); Professor, School of Nursing; B.S.N., Queens University of Charlotte; M.S.N., University of North Carolina at Charlotte; Ph.D., University of South Carolina**
- Truesdale, Angel D. (2019); Library Faculty President, J. Murrey Atkins Library; B.A., University of North Carolina at Charlotte; M.L.I.S., San Jose State University**
- Truman, Andrew (2015); Professor, Department of Biological Sciences; B.S., University of London; Ph.D., University of London**
- Truong, Khai N. (2013); Associate Professor, Department of Software and Information Systems; B.S., Georgia Institute of Technology; Ph.D., Georgia Institute of Technology**
- Tuma, Mary (1998); Associate Professor, Department of Art and Art History; B.S., University of California, Davis; M.F.A., University of Arizona**
- Tunc, Lutfi (2024); Associate Professor, Department of Mechanical Engineering and Engineering Science; B.S., Middle East Technical University; M.S., Sabanci University; Ph.D., Sabanci University**
- Turi, Lorraine (44788); Lecturer, Department of Art and Art History; B.A., University of North Carolina at Charlotte; M.F.A., East Carolina University**
- Turner, Michael G. (2002); Department Chair and Professor, Department of Criminal Justice and Criminology; B.S., Bowling Green State University; M.S., University of Cincinnati; Ph.D., University of Cincinnati**
- Turner, Michael J. (1998); Associate Professor, Department of Applied Physiology, Health, and Clinical Sciences; B.S., Miami University; M.S., Miami University; Ph.D., University of Tennessee**
- Turner, Tricia Hubbard (2005); Professor, Department of Applied Physiology, Health, and Clinical Sciences; B.S., University of Florida; M.S., University of Florida; Ph.D., Pennsylvania State University**
- Tymvios, Nicholas (2013); Assistant Professor, Department of Engineering Technology and Construction Management; B.S., Purdue University; M.S., Purdue University; Ph.D., Oregon State University**
- Udayanjanji, Madhuri (2016); Visiting Lecturer, Department of Mathematics and Statistics; B.A., Acharya Nagarjuna University, India; M.S., Acharya Nagarjuna University, India; Ph.D., Oakland University**
- Uddin, Mesbah (2008); Professor, Department of Mechanical Engineering and Engineering Science; B.S., Bangladesh University of Engineering and Technology; M.S., Bangladesh University of Engineering and Technology; Ph.D., University of Melbourne**
- Underwood, Nathaniel (2023); Assistant Professor, Department of Art and Art History; B.F.A., Columbus College of Art and Design; M.F.A., University of North Carolina at Greensboro**
- Vainberg, Boris R. (1992); Professor, Department of Mathematics and Statistics; M.Sc., Moscow State University, Russia; D.Sc., Moscow State University, Russia**
- Van, Lori B. (1986); Associate Professor, Department of Psychological Science; B.A., MacMurray College; M.A., Northwestern University; Ph.D., Northwestern University**
- van Oosten-Hawle, Patricija (2022); Associate Professor, Department of Biological Sciences; M.S., University of Vienna, Austria; Ph.D., Vrije Universiteit**
- Vandervelde, Scott (2022); Director and Professor, Turner School of Accountancy; B.A., Hope College; Ph.D., University of Iowa**
- Vermillion, Christopher R. (2014); Assistant Professor, Department of Mechanical Engineering and Engineering Science; B.S., University of Michigan; M.S., University of Michigan; Ph.D., University of Michigan**
- Verrill, David E. (2011); Lecturer, Department of Applied Physiology, Health, and Clinical Sciences; B.S., University of Maine; M.S., University of South Carolina**
- Vetter, Lara E. (2005); Professor, Department of English; B.A., Georgia State University; M.A., Georgia State University; Ph.D., University of Maryland**
- Viana, Henrique (2013); Lecturer, Department of Communication Studies; B.A., East Carolina University; M.A., University of North Carolina at Charlotte**
- Vieira, Marco (2023); Professor, Department of Computer Science; B.S., Polytechnic Institute of Coimbra; M.S., University of Coimbra; M.S., University of Coimbra; Ph.D., University of Coimbra**
- Vinson, David S. (2014); Associate Professor, Department of Earth, Environmental, and Geographical Sciences; B.S., University of Alabama; M.S., University of New Mexico; Ph.D., Duke University**
- Vintinner, Jean P. (2008); Clinical Assistant Professor, Department of Reading and Elementary Education; B.A., University of North Carolina at Charlotte; M.Ed., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte**
- Vivero-Escoto, Juan Luis (2012); Professor, Department of Chemistry; B.S., National Polytechnic Institute of Mexico; M.S., National Polytechnic Institute of Mexico; Ph.D., Iowa State University**

Vosters, Kelly N. (2016); Associate Professor, Department of Economics; B.A., University of Michigan; M.A., Johns Hopkins University; Ph.D., Michigan State University

Vouzouni, Artemis (2020); Lecturer, Business Information Systems and Operations Management; B.S., University of Cyprus, Cyprus; M.S., University of Surrey, England

Vrakkis, Regina M. (2015); Teaching Assistant Professor, Department of Mechanical Engineering and Engineering Science; B.S., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Wachtel, Katie A. (2015); Assistant Professor, Department of Counseling; B.A., Bowling Green State University; M.A., Bowling Green State University; Ph.D., University of North Carolina at Greensboro

Wai, Sebastian (2024); Clinical Assistant Professor, Department of Economics; B.S., Carnegie Mellon University; M.S., Purdue University; Ph.D., Purdue University

Wakeman, Shawnee (2008); Clinical Assistant Professor, Department of Special Education and Child Development; B.A., Catawba College; M.S.A.D., University of North Carolina at Charlotte; M.Ed., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Walker, Lisa S. (1998); Interim Dean, University College; Professor, Department of Sociology; B.A., Florida State University; M.A., University of Arizona; Ph.D., University of Arizona

Walker, Veronica N. (1991); Associate Professor, Department of Africana Studies; B.A., American University; M.S., American University; Ph.D., Howard University

Walker, Virginia L. (2018); Professor, Department of Special Education and Child Development; B.S., Florida State University; M.S., Florida State University; Ph.D., University of Virginia

Wall, Deborah M. (2005); Lecturer, Department of Art and Art History; B.F.A., University of North Carolina at Charlotte; M.A., Winthrop University

Waller, Alexandra (2024); Clinical Assistant Professor, David R. Rabin School of Architecture; B.F.A., James Madison University; M.Arch., Washington University, St. Louis; S.M., Massachusetts Institute of Technology

Walsh, Alison M. (2016); Assistant Dean of Student Services, College of Humanities & Earth and Social Sciences; B.A., Appalachian State University; M.L.I.S., University of North Carolina at Greensboro

Walsh, James I. (1997); Professor, Department of Political Science and Public Administration; B.A., Trinity College; Ph.D., American University

Walter, Michael G. (2011); Professor, Department of Chemistry; B.S., University of Dayton; M.S., Portland State University; Ph.D., Portland State University

Wan Othman, Wan Rabiatul Adawiyah (2016); Lecturer, Department of Mathematics and Statistics; B.S., Indiana University Bloomington; M.S., University of North Carolina at Charlotte

Wang, Chuang (2004); Department Chair and Professor, Department of Educational Leadership; M.A., Xi'an Jiaotong University, China; M.S., Ohio State University; Ph.D., Ohio State University

Wang, Jinzhen (2024); Assistant Professor, Department of Computer Science; B.S., Shandong University, China; M.S., New Jersey Institute of Technology; Ph.D., New Jersey Institute of Technology

Wang, Jun (2019); Research Professor, Department of Bioinformatics and Genomics; M.S., Chengdu University of Technology, China; Ph.D., Wuhan University, China

Wang, Ke (2022); Assistant Professor, Department of Electrical and Computer Engineering; B.S., Peking University, China; M.S., Worcester Polytechnic Institute; Ph.D., George Washington University

Wang, Pu (2017); Associate Professor, Department of Computer Science; B.Eng., Beijing Institute of Technology, China; M.Eng., Memorial University of Newfoundland, Canada; Ph.D., Georgia Institute of Technology

Wang, Qingfang (2005); Associate Professor, Department of Earth, Environmental, and Geographical Sciences; B.S., Tianjin University of Finance and Economics; M.A., Central University of Finance and Economics; Ph.D., University of Georgia

Wang, Weichao (2007); Department Chair and Professor, Department of Software and Information Systems; B.S., Tsinghua University, China; M.S., Tsinghua University, China; M.S., Purdue University; Ph.D., Purdue University

Wang, Weimin (2016); Assistant Professor, Department of Engineering Technology and Construction Management; B.S., Shenyang Agricultural University; M.S., Tongji University; Ph.D., Concordia University

Wang, Yongge (2002); Professor, Department of Software and Information Systems; B.S., Nankai University, China; M.S., Nankai University, China; Ph.D., Heidelberg University

Wantland, Evan B. (2015); Lecturer, Department of Mathematics and Statistics; B.S., Auburn University; M.S., Auburn University; Ph.D., Auburn University

Ward, Brenda J. (2005); Lecturer, Department of Applied Physiology, Health, and Clinical Sciences; B.A., Belmont Abbey College; M.S., State University of New York College at Cortland

Warner, Jennifer M. (1999); Lecturer, Department of Biological Sciences; B.S., University of North Carolina at Chapel Hill; M.S., University of North Carolina at Charlotte

Warren, Kimberly A. (2005); Associate Professor, Department of Civil and Environmental Engineering; B.S., Virginia Polytechnic Institute and State University; M.S., North Carolina State University; Ph.D., North Carolina State University

Wartell, Zachary J. (2005); Associate Professor, Department of Computer Science; B.S., George Institute of Technology; Ph.D., George Institute of Technology

Washburn, Erin K. (2019); Professor, Department of Reading and Elementary Education; B.S., Baylor University; M.Ed., Texas A&M University; Ph.D., Texas A&M University

Washington, Brittani S. (2021); Clinical Assistant Professor, Department of Business Information Systems and Operations Management; B.S., Coastal Carolina University; M.S., Bowie State University; Ph.D., Towson University

Waterkotte, Erik (2012); Associate Professor, Department of Art and Art History; B.F.A., Illinois State University; M.F.A., University of Alberta

Watkins, Rachel (2013); Lecturer, Performing Arts Services, College of Arts + Architecture; B.F.A., University of North Carolina School of the Arts

Watson, Jim R. (2009); Clinical Associate Professor, Department of Educational Leadership; B.S., Western Carolina University; M.A., Appalachian State University; Ed.D., University of North Carolina at Charlotte

Watson, Johnna (1998); Associate Dean for Graduate Enrollment Management and Funding, Graduate School; B.A., University of North Carolina at Pembroke; M.A., University of North Carolina at Charlotte

Watson, Sharon E. (2019); Assistant Professor, Department of Anthropology; B.A., University of Notre Dame; M.P.H., University of South Florida; Ph.D., University of South Florida

Watts, Sandra L. (2005); Lecturer, Department of Languages, Cultures, and Translation; A.B., Cornell University; M.A., University of Michigan

Wayland, Coral B. (1998); Senior Associate Dean for Curriculum, Office of Undergraduate Education; Associate Professor, Department of Anthropology; B.A., University of Florida; Ph.D., University of Pittsburgh

Webb, Jennifer B. (2007); Associate Professor, Department of Psychological Science; B.A., Harvard University; M.H.S., Duke University; M.A., University of Southern California; Ph.D., University of Southern California

Webb, Justin W. (2014); Professor, Department of Management; B.S., Virginia Commonwealth University; M.B.A., University of Richmond; Ph.D., Texas A&M University

Weeks, Gregory B. (2000); Associate Dean for Academic Affairs, College of Humanities & Earth and Social Sciences; Professor, Department of Political Science and Public Administration; A.B., University of California, Berkeley; M.A., San Diego State University; Ph.D., University of North Carolina at Chapel Hill

Weggel, David (2002); Professor, Department of Civil and Environmental Engineering; B.S., Drexel University; M.S., Drexel University; Ph.D., University of Texas

Wei, Jinpeng (2016); Associate Professor, Department of Software and Information Systems; B.S., Wuhan University, China; M.S., Wuhan University, China; Ph.D., Georgia Institute of Technology

Wei, Qiuming (2005); Professor, Department of Mechanical Engineering and Engineering Science; B.S., Northwestern Polytechnic University; M.Erg., Northwestern Polytechnic University; Ph.D., North Carolina State University

Weiland, Travis (2024); Assistant Professor, Department of Mathematics and Statistics; B.A., Warren Wilson College; M.A., Western Carolina University; M.S., University of Massachusetts at Dartmouth; Ph.D., University of Massachusetts at Dartmouth

Weiter, Steve (2023); Dean, J. Murray Atkins Library; B.A., University of Louisville; M.A., Syracuse University; M.L.S., Syracuse University

Wells, Carrie N. (2014); Lecturer, Department of Biological Sciences; B.S., Appalachian State University; M.S., Appalachian State University; Ph.D., Clemson University

Werbeck, Kai-Uwe (2013); Associate Professor, Department of Languages, Cultures, and Translation; B.A., Ruhr-University Bochum, Germany; M.A., Ruhr-University Bochum, Germany; M.A., University of North Carolina at Chapel Hill; Ph.D., University of North Carolina at Chapel Hill

West, Mark I. (1984); Professor, Department of English; B.A., Franconia College; M.E.A.S., University of Wisconsin-Green Bay; Ph.D., Bowling Green State University

Westine, Carl (2017); Associate Professor, Department of Educational Leadership; B.S., Bradley University; M.S., Carnegie Mellon University; Ph.D., Western Michigan University

Whaley, Adam M. (2018); Teaching Assistant Professor, Department of Bioinformatics and Genomics; B.S., East Carolina University; M.S., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Whelan, Matthew (2010); Associate Professor, Department of Civil and Environmental Engineering; B.S., Clarkson University; M.S., Clarkson University; Ph.D., Clarkson University

Whitaker, Beth (2002); Associate Dean for Research and Interdisciplinary Collaboration, Office of Interdisciplinary Studies; Professor, Department of Political Science and Public Administration; B.A., Princeton University; M.A., University of North Carolina at Chapel Hill; Ph.D., University of North Carolina at Chapel Hill

Whitaker, Jennifer A. (2008); Professor, Department of Music; B.M., George Mason University; M.M., Louisiana State University; Ph.D., Louisiana State University

Whitaker, Nicole A. (44929); Lecturer/Athletic Trainer, Department of Applied Physiology, Health, and Clinical Sciences; B.S., University of North Carolina at Charlotte; M.S., West Chester University

Whitaker-Brown, Charlene D. (2013); Clinical Assistant Professor, School of Nursing; B.S., East Carolina UniversityN.; B.S.N., Winston-Salem State University; M.S.N., Indiana State University; D.N.P., Indiana State University

White, Richard A. (2020); Assistant Professor, Department of Bioinformatics and Genomics;B.S., California State University, East Bay; M.S., California State University, East Bay; Ph.D., University of British Columbia, Canada

Wickliff, Gregory A. (1991); Associate Professor, Department of English; B.A., Miami University; M.A., Purdue University; Ph.D., Purdue University

Wiggan, Greg A. (2006); Professor, Department of Middle, Secondary, and K-12 Education; B.S., Morris Brown College; M.S., Florida International University; Ph.D., Georgia State University

Wilde, Scott A. (2020); Lecturer, Department of Mathematics and Statistics; B.A.Ed., Eastern Washington University; M.S., Washington State University; Ph.D., Washington State University

Wilkins, Tatianna (2024); MA Fellow in Spanish, Department of Languages, Cultures, and Translation;B.A., University of North Carolina at Greensboro; M.A., University of North Carolina at Greensboro

Williams, Ashlyn C. (2011); Lecturer, Department of English; B.A., Western Carolina University; M.A., University of North Carolina at Charlotte

Williams, Damien (44788); Associate Professor, Department of Philosophy; B.A., Georgia State University; M.A., Georgia State University; Ph.D., Virginia Tech University

Williams, Tamara L. (2016); Associate Professor, Department of Dance; B.F.A., Florida State University; M.F.A., Hollins University

Williams, Wesley B. (2011); Professor, Department of Engineering Technology and Construction Management; B.S., North Carolina State University; M.S., Georgia Institute of Technology; Ph.D., University of North Carolina at Charlotte

Willis, Andrew R. (2005); Associate Professor, Department of Electrical and Computer Engineering;B.S., Worcester Polytechnic Institute; M.S., Brown University; Ph.D., Brown University

Wilsey, Corrine N. (2019); Lecturer, Department of Epidemiology and Community Health;B.S., Stockton University; M.A., Stockton University; M.Ed., Widener University

Wilson, Dale-Marie C. (2006); Assistant Professor, Department of Computer Science; B.S., New York University; M.S., Auburn University; Ph.D., Auburn University

Wilson, David C. (2003); Professor, Department of Software and Information Systems;B.A., Rockford College; M.S., Indiana University at Bloomington; Ph.D., Indiana University at Bloomington

Wilson, Mark R. (2004); Professor, Department of History;A.B., Harvard University; A.M., The University of Chicago; Ph.D., The University of Chicago

Windett, Jason (2017); Professor, Department of Political Science and Public Administration; B.A., Catawba College; M.A., Appalachian State University; Ph.D., University of North Carolina at Chapel Hill

Wisner, Ellen M. (2016); Lecturer, Department of Biological Sciences; B.S., Centre College; Ph.D., Syracuse University

Witt, Robin (2010); Professor, Department of Theatre;B.F.A., New York University; M.F.A., Northwestern University

Woehr, David J. (2011); Professor, Department of Management; B.A., Trinity University; M.S., Georgia Institute of Technology; Ph.D., Georgia Institute of Technology

Wolek, Artur (2020); Assistant Professor, Department of Mechanical Engineering and Engineering Science;B.S., Virginia Polytechnic Institute and State University; Ph.D., Virginia Polytechnic Institute and State University

Womack, Kiplan S. (2014); Associate Professor, Department of Finance; B.S., Auburn University; M.B.A., University of Alabama; Ph.D., University of Georgia

Wong, Peter L. (1988); Associate Professor, David R. Rainin School of Architecture; B.A., University of Washington; M.Arch., University of Pennsylvania

Wood, Bret A. (2000); Lecturer, Department of Applied Physiology, Health, and Clinical Sciences; B.S., West Virginia University; M.Ed., University of North Carolina at Charlotte

Wood, Charles L. (2005); Department Chair and Professor, Department of Special Education and Child Development; B.S., Western Michigan University; M.Ed., Ohio State University; Ph.D., Ohio State University

Woods, Brittany L. (2020); Lecturer, Department of Chemistry; B.S., Morehead State University; Ph.D., Montana State University

Woods, Stephanie J. (2013); Professor, School of Nursing; B.S.N., Edinboro State College; M.S.N., Edinboro University of Pennsylvania; Ph.D., Wayne State University

Wray, Albert (2012); Lecturer, Department of Writing, Rhetoric, and Digital Studies; B.A., Appalachian State University; M.A., University of North Carolina at Charlotte

Wright, Daniel D. (2018); Lecturer, Department of Finance; B.S., University of Utah; M.B.A., Brigham Young University; M.P.S., Cornell University

Wright, Shirley (2024); Senior ELT/Lecturer, Department of Languages, Cultures, and Translation;B.A., University of Georgia; M.Ed., University of Georgia; Ph.D., University of Texas at Arlington

Wu, Jy S. (1980); Professor, Department of Civil and Environmental Engineering; B.S., National Taiwan University, Taiwan; M.S., Asian Institute of Technology, Thailand; Ph.D., Rutgers University

Wu, Somaly Kim (2009); Associate Professor and Head of Library Technology Innovation, J. Murrey Atkins Library; B.A., Michigan State University; M.L.I.S., Wayne State University

Xiang, Jian (2023); Assistant Professor, Department of Software and Information Systems; B.S., Huazhong University of Science and Technology; M.E., Tsinghua University; Ph.D., University of Virginia

Xiang, Tingting (2019); Assistant Professor, Department of Biological Sciences; B.S., China Agricultural University, China; Ph.D., China Agricultural University

Xie, Jiang (Linda) (2004); Professor, Department of Electrical and Computer Engineering; B.S., Tsinghua University, China; M. Phil, Hong Kong University of Science and Technology; M.S.; M.S., Georgia Institute of Technology; Ph.D., Georgia Institute of Technology

Xu, Depeng (44788); Professor, Department of Software and Information Systems; B.Eng., Tsinghua University, China; M.S., University of Arkansas at Fayetteville; Ph.D., University of Arkansas at Fayetteville

Xu, Terry T. (2004); Professor, Department of Mechanical Engineering and Engineering Science; B.S., Shanghai University, China; M. Phil, Hong Kong University of Science and Technology; Ph.D., Northwestern University

Xue, Hongfei (2023); Assistant Professor, Department of Computer Science; B.S., University of Science and Technology; Ph.D., State University of New York at Buffalo

Yamamoto, Alan (2023); Visiting Lecturer, Department of Music; B.A., University of California at Berkeley; M.M., University of Michigan; D.M.A., University of Colorado at Boulder

Yan, Shan (2010); Professor, Department of Biological Sciences; B.S., Shandong University, China; M.S., Shandong University, China; Ph.D., Fudan University, China

Yan, Yonghong (2019); Associate Professor, Department of Computer Science; B.S., Shandong University of Technology, China; M.S., University of Shanghai for Science and Technology, China; Ph.D., University of Houston

Yang, In Hong (2019); Assistant Professor, Department of Mechanical Engineering and Engineering Science; B.S., Kyung Hee University, South Korea; M.S., Kyung Hee University, South Korea; Ph.D., Texas A&M University

Yang, Jing (2005); Professor, Department of Computer Science; B.A., Tsinghua University, China; M.S., Worcester Polytechnic Institute; Ph.D., Worcester Polytechnic Institute

Yang, Li (2023); Assistant Professor, Department of Computer Science; B.S., Northeastern University, China; M.Eng., University of Central Florida; Ph.D., Arizona State University

Yang, Wenhao (2023); Assistant Professor of Finance, Department of Finance; B.S., Xiamen University; M.S., University of Utah; Ph.D., University of Utah

Yao, Lixia (2013); Assistant Professor, Department of Software and Information Systems; M.S., National University of Singapore; M.A., Columbia University; Ph.D., Columbia University

Yavorsky, Jill (2017); Associate Professor, Department of Sociology; B.S.B.A., Ohio State University; M.A., Ohio State University; Ph.D., Ohio State University

Yohe, Laurel R. (2021); Assistant Professor, Bioinformatics and Genomics; B.S., Loyola University Chicago; Ph.D., Stony Brook University

Yokono, Yukiko (2013); Lecturer, Department of Languages, Cultures, and Translation; B.A., Kanda University of International Studies, Japan; M.A., Akita International University, Japan

Young, Lufei (44788); Professor, School of Nursing; M.D., Xi'an Medical University, China; B.S.N., University of Nebraska; M.S.N., University of Nebraska; Ph.D., University of Nebraska

Yu, Miaomiao (45516); Assistant Professor of Finance, Department of Finance; B.A., Nankai University, China; M.A., Nankai University, China; M.Sc., University of Nebraska; Ph.D., University of Iowa

Zablotsky, Diane L. (1992); Faculty Director, Levine Scholars Program; Associate Professor, Department of Sociology, B.S., Pennsylvania State University; M.A., State University of New York at Binghamton; Ph.D., University of Maryland

Zadrozny, Wlodek (2013); Professor, Department of Computer Science; M.S., University of Warsaw; Ph.D., Polish Academy of Sciences

Zarwell, Meagan C. (2019); Associate Professor, Department of Epidemiology and Community Health; B.A., University of South Carolina; M.A., University of Memphis; Ph.D., Louisiana State University Medical Center New Orleans

Zenarosa, Gabriel L. (2016); Assistant Professor, Department of Industrial and Systems Engineering; B.S., University of the Philippines; M.S., Columbia University; M.S., Carnegie Mellon University; Ph.D., University of Pittsburgh

Zeng, Ke (2024); Assistant Professor, Department of Electrical and Computer Engineering; B.E., University of Zhejiang; M.S., State University of New York at Buffalo; Ph.D., State University of New York at Buffalo

Zhang, Dan (2017); Assistant Professor, David R. Rabin School of Architecture; B.Arch., Tsinghua University, China; M.Arch., Washington University in St. Louis; M.Des., Harvard University

Zhang, Dongsong (2018); Belk Distinguished Professor of Business Analytics; Interim Department Chair and Professor, Department of Business Information Systems and Operations Management; B.S., Peking University, China; M.S., Chinese Academy of Sciences, China; Ph.D., University of Arizona

Zhang, HaiTao (2008); Associate Professor, Department of Mechanical Engineering and Engineering Science; B.S., Fudan University, China; M.S., Fudan University, China; Ph.D., Northwestern University

Zhang, Ran (2023); Assistant Professor, Department of Electrical and Computer Engineering; B.E., Tsinghua University; Ph.D., University at Waterloo

Zhang, Sijia (44788); Assistant Professor, Department of Educational Leadership; B.A., Hunan Normal University, China; M.A., Hunan Normal University, China; Ph.D., University of Alabama

Zhang, Xiang (2022); Assistant Professor, Department of Computer Science; M.S., Harbin Institute of Technology, India; Ph.D., University of New South Wales, Australia

Zhang, Yong (2009); Bissell Distinguished Professor, Department of Electrical and Computer Engineering; B.S., Massachusetts Institute of Technology; Ph.D., Cornell University

Zhang, Zhi Yi (1990); Professor, Department of Mathematics and Statistics; B.A., Hunter College; M.S., Rutgers University; Ph.D., Rutgers University

Zhao, Kexin (2007); Professor, Department of Business Information Systems and Operations Management; B.A., Tsinghua University, China; Ph.D., University of Illinois at Urbana-Champaign

Zhao, Tiefu (2016); Associate Professor, Department of Electrical and Computer Engineering; B.S., Tsinghua University, China; M.S., Tsinghua University, China; Ph.D., North Carolina State University

Zhao, Wei (2004); Professor, Department of Sociology; B.A., Beijing University, China; M.A., Beijing University, China; Ph.D., Duke University

Zhao, Xuejun (2023); Assistant Professor, Department of Business Information Systems and Operations; B.E., Xi'an Jiatong University; M.S., Purdue University; Ph.D., Purdue University

Zheng, Naiquan N. (2008); Professor, Department of Mechanical Engineering and Engineering Science; Bachelor's, Zhejiang University, China; M.S., Shanghai Second Medical University; M.S., University of Saskatchewan; Ph.D., University of Saskatchewan

Zheng, Yuliang (2001); Professor, Department of Software and Information Systems; B.Sc., Nanjing Institute of Technology, China; M.E., Yokohama National University, Japan; Ph.D., Yokohama National University, Japan

Zhou, Aixi (2007); Professor, Department of Engineering Technology and Construction Management; B.S., Shenyang Institute of Aeronautical Engineering, China; M.S., Lanzhou University of Technology, China; Ph.D., Virginia Polytechnic Institute

Zhou, Lina (2018); Professor, Department of Business Information Systems and Operations Management; B.S., Shanxi University, China; M.S., Shanxi University, China; M.S., University of Arizona; Ph.D., Peking University, China

Zhou, Qingning (2017); Associate Professor, Department of Mathematics and Statistics; B.S., Jilin University, China; M.A., University of Missouri; Ph.D., University of Missouri

Zhou, Ru (2018); Research Associate Professor, Department of Biological Sciences; B.S., East China Normal University, China; Ph.D., Chinese Academy of Sciences, China; Ph.D., Shanghai Institute of Material Medica, China

Zhou, Weihua (2005); Associate Professor, Department of Mathematics and Statistics; B.S., University of Science and Technology of China, China; M.S., University of Science and Technology of China, China; M.S., University of Texas at Dallas; Ph.D., University of Texas at Dallas

Zhou, You (2024); Assistant Professor, Department of Physics and Optical Science; B.S., Sun Yat-sen University; Ph.D., Vanderbilt University

Zhu, Lei (2020); Assistant Professor, Department of Industrial and Systems Engineering; B.S., Dalian Ocean University, China; M.S., University of Science and Technology of China, China; Ph.D., University of Arizona

Zhu, Qiang (2023); Assistant Professor, Department of Mechanical Engineering and Engineering Science; B.E., Beihang University; Ph.D., State University of New York at Stony Brook

Zillante, Arthur L. (2006); Senior Associate Dean, Department of Economics; B.S., Florida State University; M.S., Florida State University; Ph.D., Florida State University

Zuber, Pilar (2012); Lecturer, Department of Epidemiology and Community Health; B.S., Towson University; M.S., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Zuk, Emma (2023); Clinical Assistant Professor, Department of Applied Physiology, Health and Clinical Sciences; B.S., High Point University; M.S., University of Connecticut; Ph.D., University of Connecticut

Zuniga, Michelle (2021); Assistant Professor, Department of Earth, Environmental, and Geographical Sciences; B.A., University of Tampa; MURP, University of Colorado at Denver; Ph.D., University of California, Irvine

Emeritus Faculty

(Note: The year in parentheses represents the year of appointment)

Emeritus status is an honor and a mark of distinction granted to fully retired faculty members and senior administrative or academic officers whose service is characterized by high personal achievement and outstanding service to UNC Charlotte. Emeritus faculty members are granted several privileges, among them use of the University library and recreational facilities; a University email account; inclusion in the University catalog and campus directory; invitations to University Commencement and other events; opportunity to purchase tickets for University athletic and cultural events at faculty rates; receipt of University and alumni publications; and free campus parking.

Ahlgrim-Delzell, Lynn A. (2008): Associate Professor Emeritus, Department of Educational Leadership; B.S., Illinois State University; M.S., Illinois State University; Ph.D., University of North Carolina at Greensboro

Algozzine, Robert F. (1988): Professor Emeritus, Department of Educational Leadership; B.S., Wagner College; M.S., State University of New York at Albany; Ph.D., Pennsylvania State University

Allen, C. Michael (1974): Professor Emeritus, Department of Computer Science; B.S.E.E., Carnegie Mellon Institute; M.S.E.E., Carnegie Mellon Institute; Ph.D., State University of New York at Buffalo

Amante, David J. (1974): Associate Professor Emeritus, Department of English; A.B., University of Michigan; M.A., University of Michigan; Ph.D., University of Michigan

Amato, Christie H. (1978): Professor Emerita, Department of Marketing; B.S., University of Tennessee; M.S., University of Alabama; Ph.D., University of Alabama

Anderson, Eric (1967): Professor Emeritus, Department of Art; B.F.A., Miami University; M.F.A., Pratt Institute

Arrington, Theodore S. (1973): Professor Emeritus, Department of Political Science; B.A., University of New Mexico; M.A., University of Arizona; Ph.D., University of Arizona

Ashbaugh, Carl R. (1991): Professor Emeritus, Department of Educational Administration, Research, and Technology; A.A., Graceland College; B.S., Ohio University; M.Ed., Miami University; Ph.D., Ohio State University

Aulette, Judy R. (1986): Associate Professor Emerita, Department of Sociology; B.A., Wayne State University; M.A., Wayne State University; Ph.D., Michigan State University

Baldwin, Defloris (Dee) M. (2009): Professor Emerita, School of Nursing; B.S.N., Hampton Institute; M.S.N., Emory University; Ph.D., Georgia State University

Barden, Lawrence S. (1974): Professor Emeritus, Department of Biological Sciences; B.S., Hendrix College; M.S., University of Maine; Ph.D., University of Tennessee

Barret, Robert L. (1979): Professor Emeritus, Department of Counseling; B.A., Rhodes College; M.A.T., Vanderbilt University; M.Ed., University of North Carolina at Charlotte; Ph.D., Georgia State University

Barry, Ambrose G. (1986): Associate Professor Emeritus, Department of Engineering Technology; B.S., Arizona State University; M.S., Auburn University

Bayer II, David M. (1970): Professor Emeritus, Department of Civil and Environmental Engineering; B.C.E., Georgia Institute of Technology; M.S.C.E., Vanderbilt University; Ph.D., Vanderbilt University; P.E.,

Beasley, Jack M. (1972): Associate Professor Emeritus, Department of Theatre; B.A., Vanderbilt University; M.F.A., University of Georgia

Beattie Jr., John R. (1983): Assistant Professor Emeritus, Department of Special Education and Child Development; B.A., University of Virginia; M.Ed., University of Virginia; Ph.D., University of Florida

Bender, John F. (1982): Professor Emeritus, Department of Earth, Environmental, and Geographical Sciences; B.S., State University of New York at New Paltz; M.S., Pennsylvania State University; Ph.D., State University of New York at Stony Brook

Berne, Linda S. (1978): Professor Emerita, Department of Epidemiology and Community Health; B.S., Mars Hill College; M.A.T., University of South Carolina; Ed.D., University of South Carolina

Bhamornsiri, Surasakdi (1978): Professor Emeritus, Turner School of Accountancy; B.S., Middle Tennessee State University; M.B.A., Middle Tennessee State University; D.B.A., University of Tennessee; C.P.A.,

Bird, James J. (2006): Associate Professor Emeritus, Department of Educational Leadership; B.S., University of Wisconsin at LaCrosse; M.A., Ohio State University; Ph.D., Ohio State University

Bishop, Sue M. (1992): Dean Emerita, College of Health and Human Services; Professor Emerita, School of Nursing; B.S.N., Murray State University; M.S.N., Indiana University; Ph.D., Indiana University

Blowers, Anita N. (1989): Associate Professor Emerita, Department of Criminal Justice and Criminology; B.A., State University of New York at Albany; M.A., State University of New York at Albany; Ph.D., State University of New York at Albany

Bobbio, Stephen M. (1993): Professor Emeritus, Department of Electrical and Computer Engineering; B.S., University of Detroit; Ph.D., College of William & Mary

Bodkin, Charles D. (1991); Professor Emeritus, Department of Marketing; B.B.A., University of Notre Dame; M.B.A., University of North Carolina at Greensboro; Ph.D., Virginia Polytechnic Institute and State University

Boggs, Kathleen Underman (1984); Associate Professor Emerita, School of Nursing; B.S.N., Niagara University; M.S.N., University of Maryland; Ph.D., University of Maryland

Bonney, Rachel Ann (1973); Associate Professor Emerita, Department of Anthropology; B.A., University of Minnesota; M.A., University of Minnesota; Ph.D., University of Arizona

Bosley, Deborah S. (1989); Associate Professor Emerita, Department of English; B.A., University of Illinois; M.A., University of Illinois; Ph.D., Illinois State University

Brabham Jr., Robert F. (1969); Associate University Librarian for Special Collections and Professor Emeritus, Atkins Library; B.A., Furman University; M.A., University of North Carolina at Chapel Hill; M.L.S., Emory University

Bradley, Doris Anne (1968); Associate Professor and Librarian Emerita, Atkins Library; A.B., Wilson College; B.S.L.S., University of North Carolina at Chapel Hill

Brandon, William P. (1994); Distinguished Professor Emeritus, Department of Political Science and Public Administration; B.A., Johns Hopkins University; M.Sc., University of London; M.P.H., University of North Carolina at Chapel Hill; Ph.D., Duke University

Brannon, Lilian B. (1998); Professor Emerita, Department of English; B.A., Converse College; M.A., Sam Houston State University; Ed.D., Texas A&M University

Brenner, Saul (1965); Professor Emeritus, Department of Political Science and Public Administration; B.A., Brooklyn College; L.L.B., Columbia University; M.A., Brooklyn College; Ph.D., New York University

Brenner, Susan C. (1991); Associate Professor Emerita, Department of Art and Art History; B.F.A., San Francisco Art Institute; M.F.A., University of Southern California

Brentrup, Dale A. (1989); Professor Emeritus, School of Architecture; B.Arch., Arizona State University; M.Arch., University of California, Berkeley

Bringle, Edwina (1973); Associate Professor Emerita, Department of Art

Brockman, Diane K. (2004); Associate Professor Emerita, Department of Anthropology; M.A., San Diego State University; M.A., Yale University; Ph.D., Yale University

Brody, Charles J. (2001); Associate Dean for Academic Affairs Emeritus, College of Humanities & Earth and Social Sciences; and Professor Emeritus; Department of Sociology; B.A., Loyola University of the South; M.A., University of New Orleans; Ph.D., University of Arizona

Browder, Diane (1998); Distinguished Professor Emerita, Department of Special Education and Child Development; B.A., Duke University; M.Ed., University of Virginia; Ph.D., University of Virginia

Brown, Mary M. (2007); Professor Emerita, Department of Political Science and Public Administration; B.S., University of Maryland; M.P.A., University of Oklahoma; D.P.A., The University of Georgia

Brunner Huber, Larissa R. (2005); Professor Emerita, Department of Epidemiology and Community Health; B.A., Syracuse University; M.S., University of Massachusetts; Ph.D., Emory University

Brycka, Nishi S. (1996); Lecturer Emerita, Department of Biological Sciences; B.S., Western Michigan University; M.A., Western Michigan University

Burnap, Charles A. (1982); Associate Professor Emeritus, Department of Mathematics and Statistics; B.S., Rensselaer Polytechnic Institute; A.M., Harvard University; Ph.D., Harvard University

Bush, Stewart Fowler (1969); Professor Emeritus, Department of Chemistry; A.B., Erskine College; Ph.D., University of South Carolina

Buttmer, Richard J. (2002); Professor Emeritus, Department of Finance; B.B.A., University of Georgia; Ph.D., University of Georgia

Byars, Nan A. (1993); Professor Emerita, Department of Engineering Technology and Construction Management; B.S., Clemson University; M.S., West Virginia University

Caddell, Elinor Brooks (1965); Distinguished Professor Emerita, School of Nursing; B.S.N.E., Duke University; M.S.N., Duke University; R.N.,

Calhoun, Mary Lynne (1982); Dean Emerita, College of Education; Professor Emerita, Department of Special Education and Child Development; A.B., Randolph-Macon Woman's College; M.Ed., University of Georgia; Ph.D., University of Georgia

Calhoun Jr., Lawrence G. (1973); Professor Emeritus, Department of Psychology; B.A., St. Andrews Presbyterian College; M.A., Xavier University; Ph.D., University of Georgia

Cann Jr., Arnold A. (1975); Professor Emeritus, Department of Psychology; B.A., Northeastern University; Ph.D., Indiana University

Carpano, Claudio (1990); Associate Professor Emeritus, Department of Management; D.P., State University of Rome; M.B.A., Southeastern Louisiana University; Ph.D., University of South Carolina

Carper, Barbara (1989); Professor Emerita, School of Nursing; B.S., Texas Woman's University; M.Ed., Columbia University; Ed.D., Columbia University

Carroll, Jane Judy (1995); Associate Professor Emerita, Department of Counseling, Special Education, and Child Development; B.S., University of Maine; M.S., Florida Institute of Technology; Ed.S., University of Florida; M.Ed., University of Florida; Ph.D., University of Florida

Carver, Ann Cathey (1969); Professor Emerita, Department of English; B.A., Limestone College; M.A., University of Arkansas; Ph.D., Emory University

Casperson, Lee (2004); Professor Emeritus, Department of Electrical and Computer Engineering; B.S., Massachusetts Institute of Technology; B.S., California Institute of Technology; Ph.D., California Institute of Technology

Chaffin, John H. (1989); Associate Professor Emeritus, Department of Engineering Technology; B.A., University of Virginia; M.S., University of North Carolina at Chapel Hill; Ph.D., University of North Carolina at Chapel Hill

Chen, Keh-Hsun (Ken) (1978); Professor Emeritus, Department of Computer Science; B.S., Taiwan Cheng-Kung University; M.S., National Tsing Hua University; Ph.D., Duke University

Coleman, Robert J. (1970); Professor Emeritus, Department of Electrical and Computer Engineering; B.S.E.E., Auburn University; M.S., Auburn University; Ph.D., Auburn University

Collins, Belva J. (2014); Professor Emerita, Department of Child Development and Special Education; B.A., University of Kentucky; M.Ed., University of Virginia; Ed.D., University of Kentucky

Combs, Cynthia C. (1989); Distinguished Professor Emerita; Professor Emerita, Department of Political Science and Public Administration; B.A., Appalachian State University; M.A., Appalachian State University; Ph.D., George Washington University

Conboy, Richard M. (1970); Associate Professor Emeritus, Department of Management; B.S.B.A., Old Dominion University; M.B.A., Virginia Polytechnic Institute and State University; Ph.D., Virginia Polytechnic Institute and State University

Conrad, Robert B. (1970); Professor Emeritus, Department of Business Information Systems and Operations Management; B.S., University of North Carolina at Chapel Hill; Ph.D., University of North Carolina at Chapel Hill

Cooke, Nancy L. (1984); Associate Professor Emerita, Department of Special Education and Child Development; B.S., Ohio State University; M.A., Ohio State University; Ph.D., Ohio State University

Cooper, W. Douglas (1985); Professor Emeritus, Department of Business Information Systems and Operations Management; B.S., North Carolina State University; M.S., North Carolina State University; Ph.D., North Carolina State University

Corbus, Belinda (Lili) (1993); Associate Professor Emerita, Department of Art; B.A., Kenyon College; M.A., University of Maryland; Ph.D., University of Texas at Austin

Correa, Vivian I. (2011); Professor Emerita, Department of Special Education and Child Development; B.S., Georgia State University; M.Ed., University of Georgia; Ph.D., George Peabody College for Teachers

Corwin, Thomas M. (1974); Professor Emeritus, Department of Physics and Optical Science; B.S., Tulane University; M.S., Johns Hopkins University; Ph.D., Georgia Institute of Technology

Croghan, Robert T. (1974); Associate Professor Emeritus, Department of Theatre; B.A., Franklin College

Crosthwaite, James C. (1965); Professor Emeritus, Department of Chemistry; B.S., Anderson College; M.A., DePauw University; Ph.D., Duke University

Croy, Marvin J. (1980); Professor Emeritus, Department of Philosophy; B.A., Florida State University; Ph.D., Florida State University

Curran, Kent E. (1984); Professor Emeritus, Department of Management; B.S.M.E., Bradley University; M.B.A., Bradley University; D.B.A., Louisiana State University

Daneshvar, Kasra (1987); Professor Emeritus, Department of Electrical and Computer Engineering; B.S., Louisiana State University; M.S., University of Illinois; Ph.D., University of Illinois

Davis, Boyd Hill (1970); Distinguished Professor Emerita, Department of English; B.A., University of Kentucky; M.A., University of North Carolina at Chapel Hill; Ph.D., University of North Carolina at Chapel Hill

Davis, David Christopher (1989); Professor Emeritus, Department of English; B.A., Syracuse University; M.F.A., University of Iowa

Davis, Peter S. (2007); Professor Emeritus, Department of Management; B.S.B.A., Appalachian State University; Ph.D., University of South Carolina

Diemer, John A. (1988); Professor Emeritus, Department of Earth, Environmental, and Geographical Sciences; B.A., Oberlin College; M.A., State University of New York at Binghamton; Ph.D., State University of New York at Binghamton

Dienemann, Jacqueline A. (2003); Professor Emerita, School of Nursing; B.S., Mount Saint Mary's College; M.S.N., Catholic University of America; Ph.D., Catholic University of America

Dillard, Jane Murray (1977); Professor Emerita, Department of Music; B.S., East Carolina University; M.A.Ed., East Carolina University

Dorin, Dennis Daniel (1972); Professor Emeritus, Department of Political Science; B.A., Arizona State University; M.A., University of Virginia; Ph.D., University of Virginia

Dubois, Philip L. (2005); Chancellor Emeritus and Professor Emeritus, Department of Political Science and Public Administration; A.B., University of California, Davis; M.S., University of Wisconsin-Madison; Ph.D., University of Wisconsin-Madison

DuBois, Thomas D. (1967); Distinguished Professor Emeritus, Department of Chemistry; B.A., McMurry College; M.S., Ohio State University; Ph.D., Ohio State University

Dudley, James R. (1991); Professor Emeritus, Department of Social Work; B.S., University of Illinois; M.S.W., University of Illinois; Ph.D., Bryn Mawr College

Dunaway, David M. (2005); Associate Professor, Department of Educational Leadership; B.A., Auburn University; M.A., University of South Alabama; Ed.D., Auburn University

Easley, Patricia Burke (1972); Associate Professor and Librarian Emerita, Atkins Library; B.A., State University of New York at Buffalo; M.L.S., University of North Carolina at Chapel Hill

Edwards, Barbara Ann (1976); Associate Professor Emerita, Department of Reading and Elementary Education; B.S., Kent State University; M.A., University of South Florida; Ph.D., University of South Florida

Edwards, Lienne D. (1982); Associate Professor Emerita, School of Nursing; B.S.N., University of North Carolina at Chapel Hill; M.S.N., University of North Carolina at Greensboro; Ph.D., University of North Carolina at Greensboro

Elias, Nabil S. (2001); Associate Professor Emeritus, Turner School of Accountancy; B.Com., Alexandria University, Egypt; M.S., University of Minnesota; Ph.D., University of Minnesota

Estrada, Horacio V. (1983); Associate Professor Emeritus, Department of Mechanical Engineering and Engineering Science; B.S., University of Guadalajara; M.S., National Institute of Mexico; Ph.D., Rensselaer Polytechnic Institute

Evans, Christopher (2010); Professor Emeritus, Department of Mechanical Engineering and Engineering Science; B.S., University of Manchester Institute of Science and Technology; M.S., Cranfield Institute of Technology; Ph.D., University of Birmingham, United Kingdom

Evett, Jack B. (1967); Professor Emeritus, Department of Civil and Environmental Engineering; B.S., University of South Carolina; M.S., University of South Carolina; Ph.D., Texas A&M University

Ferraro, Gary P. (1971); Professor Emeritus, Department of Anthropology; B.A., Hamilton College; M.A., Syracuse University; Ph.D., Syracuse University

Fishman, Stephen M. (1967); Professor Emeritus, Department of Philosophy; A.B., Columbia College; M.A., Columbia University; Ph.D., Columbia University

Fleitas, Daniel W. (1970); Associate Professor Emeritus, Department of Political Science; B.S.P., University of Florida; B.A., University of South Florida; M.S., Florida State University; Ph.D., Florida State University

Flowers, Claudia P. (1995); Professor Emerita, Department of Educational Leadership; B.S., West Georgia College; M.Ed., Georgia State University; Ph.D., Georgia State University

Foos, Paul W. (1991); Professor Emeritus, Department of Psychology; B.A., Bowling Green State University; M.A., Bowling Green State University; Ph.D., Bowling Green State University

Foss, Gwendolyn F. (1998); Associate Professor Emerita, School of Nursing; B.S.N., University of Washington; M.S.N., Wayne State University; D.N.Sc., University of San Diego

Frankle, Raymond A. (1981); University Librarian Emeritus, Atkins Library; A.A., Concordia University; B.A., Concordia University; M.L.S., Long Island University

Frazier, Joyce W. (1988); Clinical Professor Emerita, Office of School and Community Partnerships, Cato College of Education; Clinical Assistant Professor, Department of Reading and Elementary Education, B.A., Marshall University; M.Ed., Marshall University; Ph.D., University of South Carolina

Freitag, Alan (1998); Professor Emeritus, Department of Communication Studies; B.S., University of Wisconsin, Oshkosh; M.A., Webster University; Ph.D., Ohio University

Friday, Paul C. (1992); Professor Emeritus, Department of Criminal Justice and Criminology; B.A., Drew University; M.A., University of Wisconsin; Ph.D., University of Wisconsin

Furuseth, Owen J. (1977); Associate Provost Emeritus, Metropolitan Studies and Extended Academic Programs; Professor Emeritus, Department of Earth, Environmental, and Geographical Sciences, B.A., East Carolina University; M.A., East Carolina University; Ph.D., Oregon State University

Gandar, John M. (1982); Professor Emeritus, Department of Economics; B.A., Massey University; M.A., Victoria University; M.A., University of Missouri-Columbia; Ph.D., University of Missouri-Columbia

Gardner, Susan Jane (1990); Associate Professor Emerita, Department of English; B.A., Macalester College; M.A., University of Wisconsin; Ph.D., Rhodes University

Gay, William C. (1980); Professor Emeritus, Department of Philosophy; B.A., Carson-Newman College; Ph.D., Boston College

Geurin, Virginia Shaw (1972); Professor Emerita, Department of Management; B.S., University of Arkansas; M.A., University of Arkansas; M.B.A., University of Arkansas; Ph.D., University of Arkansas

Gilmore, David C. (1979); Associate Professor Emeritus, Department of Psychology; B.A., Capital University; M.A., Ohio State University; Ph.D., Ohio State University

Gleaves, Robert M. (1969); Associate Professor Emeritus, Department of Languages and Culture Studies; B.A., David Lipscomb College; M.A., Vanderbilt University; Ph.D., Vanderbilt University

Godfrey, Lon Howard (1975); Professor Emeritus, Turner School of Accountancy; B.S., Mississippi College; M.Acc., University of Mississippi; Ph.D., University of Alabama; C.P.A.,

Gonzalez, Ann B. (1990); Professor Emerita, Department of Languages and Culture Studies; B.A., University of North Carolina at Chapel Hill; M.A., University of South Carolina; Ph.D., University of South Carolina

Goodnight, Barbara Ann (1967); Senior Associate Vice Chancellor Emerita, Academic Affairs; Professor Emerita, Department of Sociology; B.S., Texas Woman's University; M.A., Louisiana State University; Ph.D., Louisiana State University

Goolkasan, Paula A. (1974); Professor Emerita, Department of Psychology; B.A., Emmanuel College; M.A., Iowa State University; Ph.D., Iowa State University

Govan, Sandra Y. (1983); Professor Emerita, Department of English; B.A., Valparaiso University; M.A., Bowling Green State University; Ph.D., Emory University

Graham, Johnny R. (1984); Professor Emeritus, Department of Civil and Environmental Engineering; B.S.E., University of North Carolina at Charlotte; M.S.E., University of North Carolina at Charlotte; Ph.D., North Carolina State University

Green, Michael G. (1978); Associate Professor Emeritus, Department of Reading and Elementary Education; B.A., University of California, Berkeley; Ed.M., Harvard University; Ed.D., Harvard University

Gretes, John A. (1982); Professor Emeritus, Department of Educational Leadership; B.S., Old Dominion University; M.S., Old Dominion University; Ed.D., University of Virginia

Grey, Robert Waters (1969); Associate Professor Emeritus, Department of English; A.B., Brown University; M.A., University of Virginia

Grimsley, Douglas Lee (1970); Professor Emeritus, Department of Psychology; B.S., Florida State University; Ph.D., Syracuse University

Grote, Dale A. (1992); Associate Professor Emeritus, Department of Languages and Culture Studies; B.A., Cornell College; M.A., University of Iowa; Ph.D., University of Wisconsin-Madison

Guinn, Robert E. (1976); Associate Professor Emeritus, Department of Accounting; B.A., Carson-Newman College; M.A., University of Alabama; Ph.D., University of Alabama; C.P.A.,

Gutierrez, Nancy A. (2005); Dean Emerita, College of Humanities & Earth and Social Sciences; Professor Emerita, Department of English; B.A., Denison University; M.A., The University of Chicago; Ph.D., The University of Chicago

Hagopian, Gloria A. (1993); Professor Emerita, School of Nursing; B.S.N., University of Rochester; M.S.N., University of Rochester; Ed.D., University of Rochester

Hamaker, Charles A. (1998); Professor Emeritus, J. Murrey Atkins Library; B.S., Eastern Illinois University; M.L.S., Brigham Young University

Hari, Yogeshwar (1978); Professor Emeritus, Department of Mechanical Engineering and Engineering Science; B.S.M.E., Punjab University; M.S.M.E., Purdue University; Ph.D., Purdue University; P.E.,

Harper, Mary Turner (1971); Associate Professor Emerita, Department of English; A.B., Livingstone College; M.Ed., University of North Carolina at Greensboro; Ph.D., Union Graduate School

Hartgen, David T. (1989); Professor Emeritus, Department of Geography; B.S., Duke University; M.S., Northwestern University; Ph.D., Northwestern University

Harver, Andrew R. (1991); Professor Emeritus, Department of Epidemiology and Community Health; B.S., University of Washington; M.S., Ohio University; Ph.D., Ohio University

Head, Sue Greenwood (1976); Associate Professor Emerita, School of Nursing; A.A., Central Piedmont Community College; B.S., University of North Carolina at Charlotte; M.S.N.; M.S.N., University of North Carolina at Chapel Hill

Healey, John H. (1973); Associate Professor Emeritus, Department of Applied Physiology, Health, and Clinical Sciences; B.S., Northern Illinois University; M.S., Northern Illinois University; Ph.D., University of Utah

Hight, Charles C. (1976); Dean Emeritus, College of Architecture; Professor Emeritus, School of Architecture; B.S.C.E., University of Maryland; B.Arch., Auburn University

Hilger, Helene A. (1993); Associate Professor Emerita, Department of Civil and Environmental Engineering; B.A., Rutgers University; B.S., University of North Carolina at Charlotte; M.S., University of North Carolina at Charlotte; Ph.D., North Carolina State University

Hill, Jerre M. (1987); Teaching Professor Emeritus, Department of Mechanical Engineering and Engineering Science; B.S., University of South Carolina; M.E., University of South Carolina; Ph.D., Virginia Polytechnic Institute and State University

Hill Jr., Bill J. (1982); Professor Emerita, Department of Communication Studies; B.S., Appalachian State University; M.A., Wake Forest University; Ph.D., Florida State University

Hinson, Janice M. (2009); Professor Emerita, Department of Reading and Elementary Education; B.A., West Liberty State College; M.S., Old Dominion University; Ph.D., University of Virginia

Hirschel, Joseph David (1977); Professor Emeritus, Department of Criminal Justice and Criminology; B.A., Cambridge University; M.A., State University of New York at Albany; Ph.D., State University of New York at Albany

Hocken, Robert J. (1988); Distinguished Professor Emeritus, Department of Mechanical Engineering and Engineering Science; B.A., Oregon State University; M.A., State University of New York at Stony Brook; Ph.D., State University of New York at Stony Brook

Hogue, James K. (1999); Associate Professor Emeritus, Department of History; B.S., United States Military Academy; M.A., Ohio State University; M.A., Princeton University; Ph.D., Princeton University

Hoover, Heather (1993); Associate Professor Emerita, Department of Art; B.A., Smith College; M.F.A., University of North Carolina at Greensboro

Hopper, Edward W. (1967); Associate Professor Emeritus, Department of Languages and Culture Studies; B.A., North Texas State University; M.A., University of Missouri; Ph.D., University of Missouri

Hornaday, Robert W. (1984); Professor Emeritus, Department of Management; B.A., University of Iowa; M.A., University of Missouri; M.B.A., Florida State University; D.B.A., Florida State University

Hubbard, Karen W. (1986); Associate Professor Emerita, Department of Dance; B.A., Kent State University; M.A., The Ohio State University

Hubbs, Dawn M. (1976); Associate Professor and Librarian Emerita, Atkins Library; A.B., Indiana University; M.L.S., Indiana University

Hudson, Eldred P. (1988); Associate Professor Emeritus, Department of Art and Art History; B.F.A., University of Georgia; M.F.A., Boston University

Huffman, John L. (1993); Professor Emeritus, Department of Communication Studies; B.A., Black Hills State College; Ph.D., University of Iowa

Huskey, Sybil D. (1992); Professor Emerita, Department of Dance; B.F.A., University of Utah; M.F.A., University of Utah

Hymovich, Debra (1993); Professor Emerita, School of Nursing; B.S., Skidmore College; M.A., Columbia University; Ph.D., University of Maryland

Ingalls, Gerald L. (1973); Professor Emeritus, Department of Earth, Environmental, and Geographical Sciences; B.A., University of Southwestern Louisiana; M.A., University of Florida; Ph.D., Michigan State University

Ives, Sallie M. (1977); Associate Professor Emerita, Department of Earth, Environmental, and Geographical Sciences; B.A., University of Maryland; M.A., University of Maryland; Ph.D., University of Illinois

Jacoby, Jay B. (1978); Professor Emeritus, Department of English; B.A., University of Cincinnati; M.A., Villanova University; Ph.D., University of Pittsburgh

Janken, Janice K. (1989); Associate Professor Emerita, School of Nursing; B.S.N., University of Illinois; M.S.N., University of Illinois; Ph.D., University of Illinois

Jernigan III, Irocus Edward (1989); Associate Professor Emeritus, Department of Management; B.S., Middle Tennessee State University; M.B.A., Memphis State University; D.B.A., Memphis State University

Jernigan-Bostian, Marinell H. (1972); Professor Emerita, School of Nursing; B.S., Johns Hopkins University; M.S., University of Alabama; Ed.D., University of Alabama

Johnson, Kathryn Virginia (1988); Associate Professor, Department of Religious Studies; B.A., University of North Carolina at Chapel Hill; M.A., Harvard University; Ph.D., Harvard University

Johnson, Lyman L. (1972); Professor Emeritus, Department of History; B.A., Tufts University; M.A., University of Rhode Island; Ph.D., University of Connecticut

Johnson, Robert E. (1994); Dean Emeritus, The William States Lee College of Engineering; Professor Emeritus, Department of Mechanical Engineering and Engineering Science, B.S.E.S., State University of New York at Buffalo; M.S.E.S., California Institute of Technology; Ph.D., California Institute of Technology

Jones Jr., Daniel S. (1973); Associate Professor Emeritus, Department of Chemistry; B.S., Wake Forest University; A.M., Harvard University; Ph.D., Harvard University

Jones, Jeanneine P. (1992); Professor Emerita, Department of Middle, Secondary, and K-12 Education; B.A., Catawba College; M.Ed., University of North Carolina at Greensboro; Ed.D., University of North Carolina at Greensboro

Kakad, Yogendra (Yogi) P. (1976); Professor Emeritus, Department of Electrical and Computer Engineering; B.S., University of Baroda, India; M.S., University of Florida; Ph.D., University of Florida

Kampen, Michael (1978); Associate Professor Emeritus, Department of Art; B.A., University of Minnesota; M.A., Tulane University; Ph.D., University of Pennsylvania

Kaplan, Charles Howard (1986); Associate Professor Emeritus, Department of Psychology; B.A., Kent State University; M.A., Columbia University; Ed.M., Columbia University; Ph.D., Columbia University

Kaplan, Laura Duhan (1989); Professor Emerita, Department of Philosophy; B.A., Brandeis University; M.Ed., Cambridge College; M.A., Claremont Graduate University; Ph.D., Claremont Graduate University

Kazemi, Donna M. (2003); Professor Emerita, School of Nursing; B.S., Michigan State University; B.S.N., Grand Valley State University; M.S., Central Michigan University; M.S.N., University of Phoenix; Ph.D., Walden University

Kim, Rhyn Hyun (1965); Professor Emeritus, Department of Mechanical Engineering; B.S.M.E., Seoul National University, South Korea; M.S.M.E., Michigan State University; Ph.D., Michigan State University

King, Frances (1977); Associate Professor Emerita, School of Nursing; B.S.N., University of North Carolina at Chapel Hill; M.Ed., University of North Carolina at Charlotte

King, Lee Ellis (1976); Professor Emeritus, Department of Civil and Environmental Engineering; B.S.C.E., North Carolina State University; M.C.E., North Carolina State University; D.Eng., University of California, Berkeley; P.E.,

Knoblauch Jr., Cyril H. (1998); Professor Emeritus, Department of English; B.A., College of St. Thomas; M.A., Brown University; Ph.D., Brown University

Kohut, Gary F. (1983); Professor Emeritus, Department of Management; B.S., Youngstown State University; M.B.A., Youngstown State University; Ph.D., Southern Illinois University

- Laditka, James N. (2008); Associate Professor Emeritus, Department of Epidemiology and Community Health; B.S., State University of New York Polytechnic Institute; M.P.A.D., Syracuse University; Ph.D., Syracuse University; Ph.D., State University of New York at Albany**
- Laditka, Sarah Beth (2008); Professor Emerita, Department of Epidemiology and Community Health; B.A., Colgate University; B.S., State University of New York Polytechnic Institute; M.B.A., Syracuse University; M.A., Syracuse University; Ph.D., Syracuse University**
- Ladner, Betty (1999); Associate Professor Emerita, J. Murray Atkins Library; B.A., College of Mount St. Joseph; M.A., University of Chicago**
- Lamal, Peter Andre (1970); Associate Professor Emeritus, Department of Psychology; B.A., St. Thomas College; M.A., Indiana State University; Ph.D., University of Wisconsin**
- Lambert, Alan Leslie (1974); Professor Emeritus, Department of Mathematics; B.S., University of Miami; M.S., University of Miami; Ph.D., University of Michigan**
- Lambla, Kenneth A. (1983); Professor Emeritus, School of Architecture; B.Envd., University of Kansas; M.Arch., University of California, Berkeley**
- Lamorey, Suzanne G. (2005); Associate Professor Emerita, Department of Special Education and Child Development; B.A., University of California, Berkeley; M.S., Arizona State University; Ph.D., University of Oregon**
- Lance, Larry Michael (1970); Associate Professor Emeritus, Department of Sociology; B.A., Bowling Green State University; M.A., Bowling Green State University; Ph.D., Purdue University**
- Langsam, Deborah Michael (1980); Associate Professor Emerita, Department of Biological Sciences; B.S., Brooklyn College; M.A., City University of New York; Ph.D., Duke University**
- Laurent, Jane K. (1979); Associate Professor Emerita, Department of History; B.A., University of Georgia; M.A., University of Georgia; Ph.D., Brown University**
- Leamy, Larry J. (1988); Professor Emeritus, Department of Biological Sciences; B.S., Eastern Illinois University; M.S., University of Illinois at Urbana-Champaign; Ph.D., University of Illinois at Urbana-Champaign**
- Lee, Jo Ann (1983); Associate Professor Emerita, Department of Psychology; B.A., University of Georgia; M.S., University of Georgia; Ph.D., University of Georgia**
- Leiva, Miriam A. (1966); Distinguished Professor Emerita, Department of Mathematics and Statistics; B.A., Guilford College; M.A., University of North Carolina at Chapel Hill; Ph.D., Union Graduate School**
- Lejk, Richard A. (1983); Associate Professor Emeritus, Department of Computer Science; B.S., Georgia Institute of Technology; M.S.E., University of Michigan; Ph.D., Texas A&M University**
- Levy, Janet E. (1980); Professor Emerita, Department of Anthropology; A.B., Brown University; M.A., Washington University; Ph.D., Washington University**
- Liner, Gaines H. (1971); Professor Emeritus, Department of Economics; B.S., North Carolina State University; M.S., Clemson University; Ph.D., Clemson University**
- Liu, Cheng (1970); Professor Emeritus, Department of Engineering Technology; B.S.C.E., National Taiwan University; M.S.C.E., West Virginia University; P.E.,**
- Lock, Corey R. (1987); Professor Emeritus, Department of Educational Leadership; B.A., University of Kentucky; M.Ed., Miami University; Ph.D., Ohio State University**
- Long, Gary (1972); Associate Professor Emeritus, Department of Psychology; B.A., Wake Forest University; M.S., North Carolina State University; Ph.D., University of Waterloo**
- Lord, J. Dennis (1970); Professor Emeritus, Department of Earth, Environmental, and Geographical Sciences; B.A., University of Georgia; M.A., University of Georgia; Ph.D., University of Georgia**
- Lord, Vivian B. (1994); Professor Emerita, Department of Criminal Justice and Criminology; B.A., University of Georgia; M.A., Goddard College; Ph.D., North Carolina State University**
- Lorden, Joan F. (2003); Provost and Vice Chancellor Emerita, Academic Affairs; Professor Emerita, Department of Psychological Science; B.A., City College of New York; M.S., Yale University; Ph.D., Yale University**
- Lucas, Thomas G. (1983); Professor Emeritus, Department of Mathematics and Statistics; B.S., Oklahoma Baptist University; M.A., University of Missouri; Ph.D., University of Missouri**
- Lucas, Thomas R. (1969); Professor Emeritus, Department of Mathematics and Statistics; B.S., University of Florida; M.S., University of Michigan; Ph.D., Georgia Institute of Technology**
- Lumpkin, Royce (1998); Professor Emeritus, Department of Music; B.M.Ed., North Texas State University; M.M.Ed., North Texas State University; D.M.A., University of Oklahoma**
- Lyons, James E. (1979); Professor Emeritus, Department of Educational Leadership; B.S., Elizabeth City State University; M.A., East Carolina University; Ph.D., Ohio State University**
- MacLean, Robert J. (1981); Associate Professor Emeritus, School of Architecture; B.Arch., University of California, Berkeley; M.A., University of California, Los Angeles**
- Madsen, Ronald A. (1977); Professor Emeritus, Department of Economics; B.S., University of Illinois; M.B.A., Arizona State University; D.B.A., Arizona State University**
- Maisto, Albert A. (1977); Distinguished Professor Emeritus, Department of Psychological Science; B.A., Murray State University; M.A., University of Alabama; Ph.D., University of Alabama**

Malmgren, Edward G. (1976); Associate Professor Emeritus, Turner School of Accountancy; B.A., Lake Forest College; M.S., University of Iowa; Ph.D., University of Iowa; C.P.A.,

Martin, Walter E. (1979); Associate Professor Emeritus, Department of Earth, Environmental, and Geographical Sciences; B.S., East Carolina University; M.A., East Carolina University; Ph.D., University of Tennessee

Matthews, James F. (1964); Professor Emeritus, Department of Biological Sciences; A.B., Atlantic Christian College; M.S., Cornell University; Ph.D., Emory University

Mauldin, Ruth N. (1970); Associate Professor Emerita, School of Nursing; B.A., Duke University; M.S., University of Alabama

Maxwell-Roddy, Bertha L. (1978); Distinguished Professor Emerita, Department of Africana Studies; B.A., Johnson C. Smith University; M.A., University of North Carolina at Greensboro; Ph.D., Union Graduate School

May, K. Randall (1981); Associate Professor and Librarian Emerita, Atkins Library; B.A., Memphis State University; M.L.S., University of Illinois

Mayes, Terrill Wayne (1967); Associate Professor Emeritus, Department of Physics and Optical Science; B.S., Western Kentucky University; M.A., Vanderbilt University; Ph.D., Vanderbilt University

Mays, Lawrence E. (2004); Professor Emeritus, Department of Bioinformatics and Genomics; B.A., University of Virginia; M.S., Pennsylvania State University; M.A., Temple University; Ph.D., University of Virginia

Mayo, Pauline S. (1976); Professor Emerita, School of Nursing; B.S.N., Oklahoma Baptist University; M.S.N., Case Western Reserve University; Ed.D., Case Western Reserve University

McCoy, William J. (1970); Professor Emeritus, Department of Political Science; A.B., Western Kentucky University; M.A., Western Kentucky University; Ph.D., University of Tennessee

McKinley, Shepherd (2003); Lecturer Emeritus, Department of History; B.A., Duke University; M.A., University of North Carolina at Charlotte; Ph.D., University of Delaware

McLeod, Ralph O. (1970); Assistant Professor Emeritus, Department of Languages and Culture Studies; B.Ed., University of Toledo; M.A.T., University of New Mexico; Ph.D., University of New Mexico

Mead, Timothy D. (1979); Professor Emeritus, Department of Political Science; A.B., George Washington University; M.A., George Washington University; Ph.D., George Washington University

Mellichamp, T. Lawrence (1976); Professor Emeritus, Department of Biological Sciences; B.S., University of North Carolina at Charlotte; M.S., University of Michigan; Ph.D., University of Michigan

Melton, Billy F. (1971); Associate Professor Emeritus, Department of Physics and Optical Science; B.S., Oklahoma State University; Ph.D., Oklahoma State University

Mehhinick, Edward F. (1965); Professor Emeritus, Department of Biological Sciences; B.A., Emory University; M.S., Cornell University; Ph.D., University of Georgia

Merrill, Charles S. (1969); Associate Professor Emeritus, Department of Languages and Culture Studies; B.A., North Texas State University; M.A., North Texas State University; Ph.D., University of Texas at Austin

Miller, Martha L. (1976); Professor of Spanish Emerita, Department of Languages and Culture Studies; B.A., Smith College; M.A., University of Wisconsin; Ph.D., Washington University

Mobley Jr., Charles E. (1972); Associate Professor Emeritus, Department of Engineering Technology; B.S.I.E., Mississippi State University; M.S.I.E., Mississippi State University; P.E.,

Modares-Razavi, Hassan (1980); Associate Professor Emeritus, Department of Computer Science; B.S., West Virginia University; M.S., West Virginia University; Ph.D., West Virginia University

Monaghan, Robert (2012); Lecturer Emeritus, Turner School of Accountancy; B.S., University of North Carolina at Charlotte; A.C.C., University of North Carolina at Charlotte

Mohanty, Ganesh Prasad (1972); Distinguished Professor Emeritus, Department of Mechanical Engineering and Engineering Science; B.Sc., Utkal University, India; M.S., Michigan Technological University; Ph.D., Illinois Institute of Technology

Moore, Linda Aderholdt (1985); Associate Professor Emerita, School of Nursing; B.S.N., Duke University; M.S.N., University of Virginia; Ed.D., University of Virginia

Morgan, Margaret (Meg) P. (1987); Associate Professor Emerita, Department of English; B.A., Kean University; M.A., University of Maryland; Ph.D., Purdue University

Mork, Dorlan D. (1972); Associate Professor Emeritus, Department of Curriculum and Instruction; B.A., Luther College; M.A., Western Carolina University; Ed.D., University of Florida

Morrill, Dan L. (1963); Professor Emeritus, Department of History; B.A., Wake Forest University; M.A.; Ph.D., Emory University

Mosley, Michael (1971); Associate Professor Emeritus, Department of Music; B.Mus., Hardin-Simmons University; M.Mus., Indiana University

Mozenter, Frada L. (1981); Professor and Librarian Emerita, Atkins Library; A.B., Temple University; M.A., University of Arizona; M.S.L.S., Drexel University

Mullin, Joan A. (2013); Professor Emerita, Department of English and Department of Writing, Rhetoric, and Digital Studies; B.A., Northeastern Illinois University; M.A., Northeastern Illinois University; Ph.D., Loyola University

Munday, Edgar G. (1987); Associate Professor Emeritus, Department of Mechanical Engineering and Engineering Science; B.S., Clemson University; M.S., Clemson University; Ph.D., Virginia Polytechnic Institute and State University

Neese, Jane B. (1994); Senior Associate Dean, College of Health and Human Services; Associate Professor, School of Nursing, B.S.N., University of South Carolina; M.S., University of Maryland at Baltimore; Ph.D., University of Virginia

Nelson, John A. (1976); Associate Professor Emeritus, School of Architecture; B.Arch., Kent State University; M.Arch., Kent State University

Newman, Ann M. (1981); Associate Professor Emerita, School of Nursing; B.S.N., University of North Carolina at Charlotte; M.S.N., University of North Carolina at Chapel Hill; D.S.N., University of Alabama at Birmingham

Nicholson, Sally W. (1974); Professor Emerita, School of Nursing; B.S.N., University of North Carolina at Chapel Hill; M.N., Emory University; Ph.D., University of Maryland

Nkomo, Stella M. (1983); Professor Emerita, Department of Management; B.S., Bryant College; M.B.A., University of Rhode Island; Ph.D., University of Massachusetts

Noiset, Marie-Thérèse (1986); Professor Emerita, Department of Languages and Culture Studies; B.A., Institut du Parnasse, Belgium; M.A., Trinity College; Ph.D., University of Connecticut

Nunnally Jr., Bennie H. (1979); Professor Emeritus, Department of Finance; B.A., Virginia Union University; M.B.A., Atlanta University; D.B.A., University of Virginia

Oberhofer, Edward (1967); Associate Professor Emeritus, Department of Physics and Optical Science; B.S., North Carolina State College; M.S., North Carolina State University; Ph.D., North Carolina State University

Oh, Hae-Soo (1984); Professor Emeritus, Department of Mathematics and Statistics; B.S., Kyungpook National University, South Korea; M.S., Kyungpook National University, South Korea; Ph.D., University of Michigan

Oliver, James D. (1974); Bonnie E. Cone Distinguished Professor of Teaching Emeritus; Professor Emeritus, Department of Biological Sciences; B.S., University of Arizona; Ph.D., Georgetown University

Papadopoulos, Alexander Spero (1978); Professor Emeritus, Department of Mathematics; B.S., University of Rhode Island; M.S., University of Rhode Island; M.S., Virginia Polytechnic Institute and State University; Ph.D., Virginia Polytechnic Institute and State University

Penninger, Edna Lorraine (1968); Professor and Librarian Emerita, Atkins Library; B.A., Flora McDonald College; M.A., University of Denver; M.A.Ed., University of North Carolina at Charlotte

Perez, Theresa R. (1998); Professor Emerita, Department of Middle, Secondary, and K-12 Education; B.A., California State University, Fresno; M.A., California State University, Fresno; Ph.D., Stanford University

Peters, Susan E. (1979); Associate Professor Emerita, Department of Biological Sciences; B.S., Northern Arizona University; M.S., Northern Arizona University; Ph.D., University of California, Davis

Phillips, Douglas Howard (1995); Professor Emeritus, Department of Electrical Engineering; B.S., Oklahoma State University; M.A., University of Oklahoma; Ph.D., University of New Mexico

Piel, John A. (1988); Professor Emeritus, Department of Reading and Elementary Education; B.A., University of Northern Colorado; M.A., University of Northern Colorado; Ph.D., Florida State University

Pleasants Jr., John (1969); Associate Professor Emeritus, Department of Human Services; A.B., University of North Carolina at Chapel Hill; M.A.T., University of North Carolina at Chapel Hill; Ph.D., University of North Carolina at Chapel Hill

Portwood, Sharon G. (2005); Professor Emerita, Department of Epidemiology and Community Health; B.S., University of Texas at Austin; J.D., University of Texas at Austin; M.A., University of Virginia; Ph.D., University of Virginia

Presler, Judith Louise (1970); Associate Professor Emeritus, Department of Philosophy; A.B., Baldwin-Wallace College; Ph.D., University of Oklahoma

Presnell, Barbara (2003); Senior Lecturer Emerita, Department of Writing, Rhetoric, and Digital Studies; B.A., University of North Carolina at Greensboro; M.F.A., University of North Carolina at Greensboro; M.A., University of Kentucky

Price, Jeffrey W. (1992); Associate Professor Emeritus, Department of Music; B.M., University of North Carolina at Greensboro; M.M., University of North Carolina at Greensboro; D.M., Florida State University

Priebe, Ronald L. (1970); Associate Professor Emeritus, Department of Engineering Technology and Construction Management; B.S.M.E., Valparaiso University; M.S.M.E., University of Illinois

Probst, Linda S. (1988); Lecturer Emeritus, Department of Applied Physiology, Health, and Clinical Sciences; B.S., University of Vermont; M.A.T., University of North Carolina at Chapel Hill

Pyle, Gerald F. (1980); Professor Emeritus, Department of Epidemiology and Community Health; B.A., Kent State University; M.A., University of Chicago; Ph.D., University of Chicago

Queen, J. Allen (1992); Professor Emeritus, Department of Educational Leadership; B.S.Ed., Western Carolina University; M.A.Ed., Western Carolina University; Ed.D., University of Virginia

Quinn, Joseph E. (1971); Professor Emeritus, Department of Mathematics and Statistics; B.S., University of Dayton; Ph.D., Michigan State University

Rassel, Gary R. (1982); Associate Professor Emeritus, Department of Political Science and Public Administration; B.S., South Dakota State University; M.A., University of South Dakota; M.A., Michigan State University; Ph.D., Michigan State University

Reiter, Harold B. (1972); Professor, Department of Mathematics and Statistics; B.S., Louisiana State University; M.S., Clemson University; Ph.D., Clemson University

Revesz, Gyorgy E. (1991); Professor Emeritus, Department of Computer Science; B.S., Eötvös Loránd University, Hungary; Ph.D., Eötvös Loránd University, Hungary

Reynolds, Thomas L. (1982); Associate Provost for Graduate Programs; Dean of the Graduate School; and Professor Emeritus, Department of Biological Sciences; B.A., California State University; M.A., California State University; Ph.D., Ohio State University

Rickelman, Robert J. (1991); Professor Emeritus, Department of Reading and Elementary Education; B.A., Ohio University; M.Ed., Ohio University; Ph.D., University of Georgia

Ringwood, Amy (2004); Associate Professor Emerita, Department of Biological Sciences; B.A., Wake Forest University; Ph.D., University of Hawaii at Manoa

Risley, John M. (1988); Professor Emeritus, Department of Chemistry; B.S., Ball State University; Ph.D., Purdue University

Robbins, Stephanie S. (1981); Professor Emerita, Department of Business Information Systems and Operations Management; A.A., Lasell College; B.A., Emerson College; M.Ed., University of Memphis; Ph.D., University of Alabama; Ph.D., Louisiana State University

Robinson, Bryan E. (1977); Professor Emeritus, Department of Counseling, Special Education, and Child Development; B.A., East Carolina University; M.Ed., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Greensboro

Rose, Russell G. (1969); Associate Professor Emeritus, Department of Languages and Culture Studies; B.A., Wilmington College; M.A., University of Kentucky; Ph.D., University of Kentucky

Rothe, Franz (1989); Associate Professor Emeritus, Department of Mathematics and Statistics; B.A., Universitat Fridericana, Germany; M.A., Eidgenossische Technische Hochschule, Switzerland; Ph.D., Universitat zu Tübingen, Germany

Rowland, Bobbie Haynes (1969); Professor Emerita, Department of Counseling, Special Education, and Child Development; A.B., University of North Carolina at Greensboro; M.S., University of North Carolina at Greensboro; Ph.D., University of North Carolina at Greensboro

Rubin, Beth A. (2002); Professor Emerita, Department of Sociology; B.A., State University of New York at New Paltz; M.A., Indiana University at Bloomington; Ph.D., Indiana University at Bloomington

Runnion, Carole E. (1989); Librarian and Associate Professor Emerita, Atkins Library; B.A., Catawba College; M.S.L.S., University of North Carolina at Chapel Hill

Russo, Benjamin (1984); Professor Emeritus, Department of Economics; B.A., State University of New York at Stony Brook; M.A., University of Iowa; Ph.D., University of Iowa

Saman, Paul Antonius (1963); Professor Emeritus, Department of Languages and Culture Studies; Ph.D., Charles University

Sandarg, Robert M. (1984); Associate Professor Emeritus, Department of Languages and Culture Studies; B.A., University of North Carolina at Chapel Hill; M.A., University of North Carolina at Chapel Hill; Ph.D., University of North Carolina at Chapel Hill

Sanders, Lonnie Delores (1974); Assistant Professor Emerita, School of Nursing; B.S.N., Winston-Salem State University; M.Ed., University of North Carolina at Charlotte; M.N., University of South Carolina; Ph.D., University of South Carolina

Schell, Joseph F. (1964); Professor Emeritus, Department of Computer Science; B.S., University of Dayton; M.A., Indiana University; Ph.D., Indiana University

Schroeder, Richard G. (1991); Professor Emeritus, Turner School of Accountancy; B.Ed., Chicago Teachers College; M.B.A., Northwestern University; D.B.A.; B.A., Arizona State University

Schul, Norman W. (1967); Professor Emeritus, Department of Earth, Environmental, and Geographical Sciences; B.A., Miami University; M.A., Miami University; Ph.D., Syracuse University

Schuster, Marilyn B. (1990); Associate Professor Emerita, J. Murray Atkins Library; B.A., University of North Carolina at Charlotte; M.L.S., University of South Carolina

Sealey, Calvin W. (Bill) (1996); Distinguished Professor Emeritus, Department of Finance; B.A., University of North Carolina at Asheville; M.A., University of Georgia; Ph.D., University of Georgia

Shafer, Douglas S. (1978); Professor Emeritus, Department of Mathematics and Statistics; B.S., Carson-Newman College; M.S., University of North Carolina at Chapel Hill; Ph.D., University of North Carolina at Chapel Hill

Shenk, Dena (1991); Professor Emerita, Department of Anthropology; B.A., State University of New York at Stony Brook; M.A., University of Massachusetts; Ph.D., University of Massachusetts

Sherlock, Barry G. (1997); Professor Emeritus, Department of Engineering Technology and Construction Management; B.S.E.E., University of Cape Town, South Africa; M.S.E.E., University of Cape Town, South Africa; Ph.D., Imperial College, University of London

Sherry, Stanley (Lee) A. (2007); Associate Professor Emeritus, Department of Special Education and Child Development; B.A., Temple University; M.Ed., Temple University; Ph.D., University of Florida

Shumaker, James D. (1972); Professor Emeritus, Department of Philosophy; A.B., Pfeiffer College; M.A., Florida State University; Ph.D., Florida State University

Siegfried Jr., William D. (1976); Associate Professor Emeritus, Department of Psychology; B.A., Trinity College; M.A., Long Island University; Ph.D., Ohio State University

Silverman, Gary S. (2012); Professor Emeritus, Department of Epidemiology and Community Health; B.A., Claremont McKenna College; M.S., University of California, Berkeley; Ph.D., University of California, Los Angeles

Simono, Ronald Bernard (1967); Professor Emeritus, Department of Psychology; B.S., St. Norbert College; M.S., University of Wisconsin; Ph.D., University of Wisconsin

Simpson, Hoyle Mitchel (1982); Associate Professor Emeritus, Department of Physics and Optical Science; B.A., Pfeiffer College; Ph.D., Clemson University

Smith, William Alexander (1966); Associate Professor Emeritus, Department of Electrical Engineering; A.A., Charlotte College; B.S., Charlotte College; M.S., Clemson University; P.E.,

Smith Jr., Clarence E. (1970); Professor Emeritus, Department of Educational Leadership; B.A., University of North Carolina at Chapel Hill; M.A.T., University of North Carolina at Chapel Hill; Ed.D., University of North Carolina at Chapel Hill

Snyder, Robert D. (1975); Dean Emeritus, The William States Lee College of Engineering; Professor Emeritus, Department of Engineering Science, B.S.M.E., Indiana Institute of Technology; M.S.M.E., Clemson University; Ph.D., West Virginia University; P.E.,

Sofras, Pamela A. (1976); Professor Emerita, Department of Dance; B.F.A., The Juilliard School; M.Ed., Lehigh University

Sohn, David (1964); Associate Professor Emeritus, Department of Psychology; B.A., Brooklyn College; Ph.D., University of Texas at Austin

Sommer, John W. (1993); Distinguished Professor Emeritus, Professor Emeritus, Department of Geography and Department of Political Science, A.B., Dartmouth College; A.M., Boston University; Ph.D., Boston University

St. Clair, Edward B. (1970); Associate Professor Emeritus, Department of Religious Studies; B.A., George Washington University; B.D., Southeastern Baptist Theological Seminary; Ph.D., Duke University

Stephenson, Katherine S. (1986); Associate Professor Emerita, Department of Languages and Culture Studies; B.A., Texas Christian University; M.A., University of North Carolina at Chapel Hill; Ph.D., University of North Carolina at Chapel Hill

Stevenson, Thomas H. (1976); Professor Emeritus, Department of Marketing; B.S.B.A., Syracuse University; M.B.A., Syracuse University; Ph.D., Case Western Reserve University

Stinnett, Gary (); Associate Vice Chancellor and University Affirmative Action Officer, Human Resources

Strassberg, Roy (2001); Professor Emeritus, Department of Art and Art History; B.A., State University of New York at Oswego; M.F.A., University of Michigan

Strawn, Martha Ann (1971); Professor Emerita, Department of Art; B.A., Florida State University; M.F.A., Ohio University

Studnicki, James (2006); Professor Emeritus, Department of Epidemiology and Community Health; B.S., University of Pittsburgh; M.B.A., George Washington University; M.P.H., Johns Hopkins University; Ph.D., Johns Hopkins University

Summerville, Frances Lovenia (1968); Associate Professor and Librarian Emerita, Atkins Library; B.A., St. Andrews Presbyterian College; M.L.S., Peabody College

Suther, Judith D. (1979); Professor Emerita, Department of Languages and Culture Studies; B.A., University of Missouri; M.A., University of Michigan; Ph.D., University of Missouri

Swartz, Caroline (2006); Clinical Professor Emerita, Department of Economics; B.S., State University of New York at Fredonia; M.A., Duke University; Ph.D., Duke University

Swayne, Linda E. (1981); Professor Emerita, Department of Marketing; B.B.A., Stetson University; M.B.A., Stetson University; Ph.D., North Texas State University

Swisher, Michael T. (1988); Associate Professor Emeritus, School of Architecture; A.B., Washington University; M.F.A., Massachusetts College of Art

Tedeschi, Richard G. (1976); Professor Emeritus, Department of Psychological Science; B.A., Syracuse University; Ph.D., Ohio University

Terry, William Scott (1976); Professor Emeritus, Department of Psychological Science; B.A., Fairfield University; M.S., Yale University; Ph.D., Yale University

Test, David W. (1983); Professor Emeritus, Department of Special Education and Child Development; B.A., Eisenhower College; M.A., Ohio State University; Ph.D., Ohio State University

Testerman, Jane K. (1997); Associate Professor Emerita, Department of Educational Leadership; B.A., University of North Carolina at Charlotte; M.Ed., University of North Carolina at Charlotte; Ed.S., Appalachian State University; Ed.D., University of North Carolina at Greensboro

Thomas, Herman Edward (1974); Professor Emeritus, Department of Religious Studies; B.S., North Carolina A&T State University; B.D., Duke University; Th.M., Duke University; Ph.D., Hartford Seminary Foundation

Thomas, Mary Beth (1980); Professor Emerita, Department of Biological Sciences; B.A., Agnes Scott College; M.A., University of North Carolina at Chapel Hill; Ph.D., University of North Carolina at Chapel Hill

Tierney, Barbara G. (1998); Associate Professor and Librarian Emerita, Atkins Library; B.A., Northwestern University; M.L.S.; M.L.S., University of Michigan

Tillotson, Joan S. (1973); Associate Professor Emerita, Department of Applied Physiology, Health, and Clinical Sciences; B.S., State University College of New York; M.A., State University of Iowa; Ph.D., State University of Iowa

Tite, Winston R. (1980); Associate Professor Emeritus, Department of Art; B.S., Weber State College; M.F.A., Arizona State University

Toenjes, Richard H. (1973); Associate Professor Emeritus, Department of Philosophy; B.A., St. Louis University; M.A., St. Louis University; Ph.D., University of Southern California

Tolley, Patricia A. (1995); Associate Professor Emerita, Department of Engineering Technology and Construction Management; B.S.M.E., University of North Carolina at Charlotte; M.S.M.E., University of North Carolina at Charlotte; Ph.D., University of North Carolina at Charlotte

Tong, Rosemarie (1999); Distinguished Professor Emerita, Department of Philosophy; B.A., Marygrove College; M.A., Catholic University of America; Ph.D., Temple University

Travis, Jim (1973); Associate Professor Emeritus, Department of Biological Sciences; B.S., East Texas State College; M.S., East Texas State College; Ph.D., Texas A&M University

Travis, Lucille L. (2006); Professor Emerita, School of Nursing; B.S.N., Ohio State University; M.S., Ohio State University; Ph.D., Ohio State University

Trosch, Louis A. (1969); Professor Emeritus, Department of Finance; B.A., Bethany College; M.A., George Washington University; J.D., West Virginia University

Tsu, Raphael (1988); Professor Emeritus, Department of Electrical and Computer Engineering; B.S., University of Dayton; M.S., Ohio State University; Ph.D., Ohio State University

Tyson, Robert K. (1999); Associate Professor Emeritus, Department of Physics and Optical Science; B.S., Pennsylvania State University; M.S., West Virginia University; Ph.D., West Virginia University

Vance, Christine W. (1974); Associate Professor Emerita, Department of Languages and Culture Studies; C.E.L.G., Universite de Paris et Lille, France; Licence-es-Lettres, Universite d'Alger-Aix-en-Provence, France; Licence-es-Lettres, Paris-Sorbonne University, France; M.A., Vanderbilt University; Ph.D., Vanderbilt University

VanSledright, Bruce A. (2011); Professor, Department of Reading and Elementary Education; B.A., Calvin College; M.A., Michigan State University; Ph.D., Michigan State University

Vermillion, Robert (1965); Professor Emeritus, Department of Physics and Optical Science; A.B., King College; M.S., Vanderbilt University; Ph.D., Vanderbilt University

Walcott, Wayne A. (1970); Senior Associate Provost Emeritus, Academic Affairs; Associate Professor Emeritus, Department of Earth, Environmental, and Geographical Sciences; B.S., Western Michigan University; M.A., University of Illinois at Urbana-Champaign; Ph.D., University of Illinois at Urbana-Champaign

Walker, Judith A. (1987); Professor Emerita, J. Murray Atkins Library; B.A., Montclair State College; M.L.I.S., The Catholic University of America

Walsh, Thomas (1970); Associate Professor Emeritus, Department of Chemistry; A.B., University of Notre Dame; Ph.D., University of California, Berkeley

Walters, David R. (1990); Professor Emeritus, School of Architecture; B.Arch., Newcastle University, England; M.Arch., Newcastle University, England

Wang, Sheng-Guo (1997); Professor Emeritus, Department of Engineering Technology and Construction Management; B.S., University of Science and Technology of China, China; M.S., University of Science and Technology of China, China; Ph.D., University of Houston

Watson Jr., Samuel D. (1973); Professor Emeritus, Department of English; B.A., Wofford College; M.A., University of Virginia; Ph.D., University of Iowa

Webster, Murray A. (1993); Professor Emeritus, Department of Sociology; A.B., Stanford University; M.A., Stanford University; Ph.D., Stanford University

Weekly, James K. (1988); Professor Emeritus, Department of Marketing; B.S., Indiana University; M.B.A., Indiana University; D.B.A., Indiana University

Weinstock, Barnet M. (1977); Professor Emeritus, Department of Mathematics; A.B., Columbia College; Ph.D., Massachusetts Institute of Technology

Whaley, Charles R. (1974); Assistant Professor Emeritus, Department of Teaching Specialties; A.B., Princeton University; M.A.T., University of North Carolina at Chapel Hill; Ph.D., University of Texas at Austin

White, Richard B. (1983); Professor Emeritus, Department of Special Education and Child Development; B.A., Miami University; M.S.Ed., Indiana University; Ed.D., Indiana University

Whitmeyer, Joseph M. (1993); Professor Emeritus, Department of Sociology; B.S., Wright State University; M.A., University of Washington; Ph.D., University of Washington

Wichnoski, Bruno J. (1974); Associate Professor Emeritus, Department of Mathematics and Statistics; B.S., Drexel University; M.S., Tulane University; Ph.D., Tulane University

Wierzalis, Edward (2002); Clinical Assistant Professor Emeritus, Department of Counseling; B.S., Pennsylvania State University; M.Ed., Temple University; Ph.D., University of Virginia

Wiggins, Jr., Casper E. (1999); Distinguished Professor Emeritus, Turner School of Accountancy; B.A., Wofford College; M.B.A., University of Georgia; M.S., Clemson University; D.B.A., University of Tennessee

Wihstutz, Volker (1987); Professor Emeritus, Department of Mathematics and Statistics; Diploma, University of Frankfurt, Germany; Ph.D., University of Bremen, Germany

Wilkinson, Anthony Barry (1987); Professor Emeritus, Department of Computer Science; B.Sc., University of Salford, England; M.Sc., University of Manchester, England; Ph.D., University of Manchester, England

Williams, Janet (2008); Associate Professor Emerita, Department of Art and Art History; B.A., Middlesex Polytechnic University; M.F.A., Cranbrook Academy of Art

Wilmoth, Margaret (Peggy) C. (1996); Professor Emerita, School of Nursing; B.S.N., University of Maryland; M.S., University of Maryland; Ph.D., University of Pennsylvania

Winecoff, Michael (2001); Associate Dean for Collection Services Emeritus and Associate Professor Emeritus, J. Murrey Atkins Library; B.A., University of North Carolina at Charlotte; M.L.S., University of North Carolina at Greensboro

Wood, Bret A. (2000); Lecturer Emeritus, Department of Applied Physiology, Health, and Clinical Sciences; B.S., West Virginia University; M.Ed., University of North Carolina at Charlotte

Wood, Karen D. (1985); Professor Emerita, Department of Reading and Elementary Education; B.A., Catawba College; M.A., Appalachian State University; Ed.S., Appalachian State University; Ph.D., University of Georgia

Wood, Wendy M. (1994); Associate Professor Emerita, Department of Special Education and Child Development; B.A., Lynchburg College; M.Ed., Virginia Commonwealth University; Ph.D., Virginia Commonwealth University

Woodward, James H. (1989); Chancellor Emeritus and Professor Emeritus, Department of Civil and Environmental Engineering; B.S.A.E., Georgia Institute of Technology; M.S.A.E., Georgia Institute of Technology; Ph.D., Georgia Institute of Technology; M.B.A., University of Alabama at Birmingham

Wright, Hazel Drye (1966); Assistant Professor Emerita, Department of Mathematics; B.S., Appalachian State Teachers College; M.A., Wake Forest College

Yon, Maria G. (1987); Associate Professor Emerita, Department of Reading and Elementary Education; B.S., Concord College; M.A., West Virginia University; Ed.D., Virginia Polytechnic Institute and State University

Young, David T. (1985); Professor Emeritus, Department of Civil and Environmental Engineering; B.S.C.E., Clemson University; M.S.C.E., Clemson University; Ph.D., Virginia Polytechnic Institute and State University

Zellars, Kelly L. (2000); Professor Emerita, Department of Management; B.A., University of Notre Dame; M.B.A., University of Notre Dame; M.S., University of Wisconsin-Milwaukee; Ph.D., Florida State University

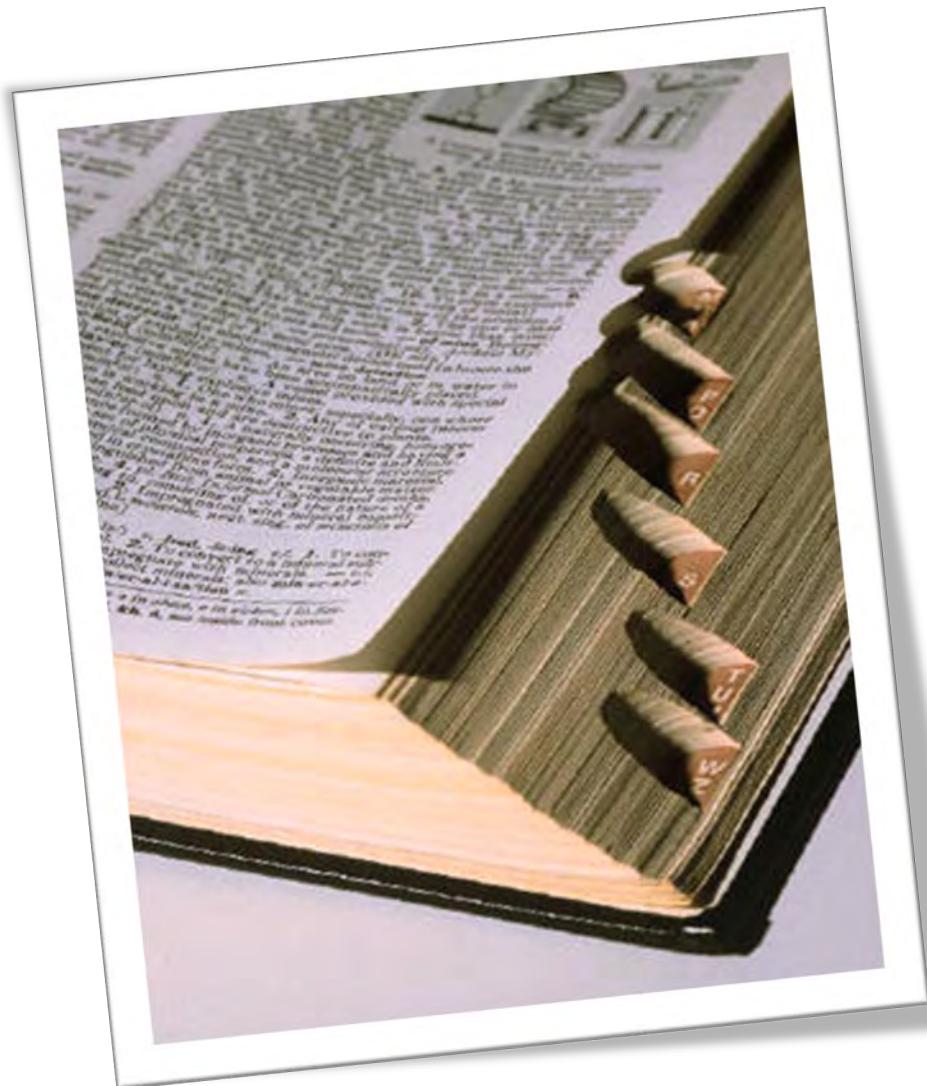

Zhu, You-lan (1990); Professor Emeritus, Department of Mathematics and Statistics; Ph.D., Qinghua University, China

Ziegert, John C. (2010); Professor Emeritus, Department of Mechanical Engineering and Engineering Science; B.S.M.E., Purdue University; M.S., Northwestern University; Ph.D., University of Rhode Island

Zimmermann, Gerda Anna Maria (1974); Associate Professor Emerita, Department of Dance; Diploma, School for Gymnastics, Germany; License, School for Theater, Germany; License, School of Fine Arts, Germany

Zuber, Richard A. (1978); Professor Emeritus, Department of Economics; B.A., Wake Forest University; M.A., University of Kentucky; Ph.D., University of Kentucky

Glossary of Academic Terminology

Glossary of Academic Terminology

-123-

49ers – The official name for student athletic teams at UNC Charlotte.

49er Card – The ID Card that proves a student is a member of the campus community and entitled to certain services. It is required to check out materials, obtain services, and utilize facilities across campus. It also allows students to access their residence, obtain meals, and make purchases wherever the 49er Account is accepted.

-A-

Academic advising – A meeting between a student and an advisor to discuss the student's academic plan of study, course selections prior to registration, and/or career plans.

Academic bridge program - A postsecondary school program that helps students transition from high school to a university.

Academic calendar – An official list of dates and deadlines found at the beginning of this *Catalog* and on the website for the Office of the Registrar. The academic calendar specifies the dates for semesters and terms, enrollment periods, examination periods, holidays, periods classes are not in session, and commencement.

Academic career – The period during which a student is working at an institution toward completion of one or more degrees.

Academic discipline – A subject area of study (e.g., English, marketing, psychology).

Academic Petition – An electronic form by which students request to be granted an academic exception because their extenuating circumstances prevent them from following established rules, policies, and procedures.

Academic probation – A status resulting from unsatisfactory academic work; a warning that the student must improve academic performance or be dismissed after a specific period of time.

Academic rank – the rank of a faculty member, such as professor, associate professor, assistant professor, or lecturer. (*See individual listings for details.*)

Academic record – Official transcript.

Academic standing – The scholastic standing of a student based on their grade point average (GPA).

Academic year – The period of formal academic instruction, extending from August through July. It is divided into Fall, Spring, and Summer semesters.

Access – Ensuring equal opportunity for education, particularly for students from historically underrepresented populations and students with disabilities.

Accommodations – Disability Services counselors meet with qualified students to determine and provide reasonable and appropriate accommodations that support the student's educational goals.

Accreditation – UNC Charlotte is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC). SACSCOC is the recognized accrediting body in the eleven U.S. Southern states (Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Texas and Virginia) and in Latin America for those institutions of higher education that award associate, baccalaureate, master's, or doctoral degrees. Accreditation is certification that an institute of higher education meets a set of criteria established by SACSCOC.

Accrediting Body, Accepted - The following are accepted accrediting bodies: Accrediting Commission for Community and Junior Colleges (ACCJC) Western Association of Schools and Colleges, Higher Learning Commission (HLC), Middle States Commission on Higher Education (MSCHE), New England Commission of Higher Education (NECHE), Northwest Commission on Colleges and Universities (NWCCU), Southern Association of Colleges and Schools Commission on Colleges (SACSCOC), and WASC Senior College and University Commission (WSCUC).

ACT – A test published by American College Testing which measures a student's aptitude in mathematical and verbal comprehension and problem solving.

Add/Drop – A designated time period at the beginning of each semester when a student may add or drop a course without penalty. At UNC Charlotte, the Add/Drop period runs through the 6th business day of the Fall and Spring semesters, and through the 2nd business day for Summer full and half terms.

Adjunct faculty – Part-time or temporary faculty member. It may also denote a faculty member from another academic department whose research or teaching interests overlap substantially with those of the appointing department.

Admission to Candidacy – The period in a doctoral student's studies when they are deemed ready to undertake research resulting in a dissertation or scholarly project.

Admissions and Enrollment Counselor – A person working in the Office of Undergraduate Admissions or Office of Graduate Admissions who assists prospective students by providing information on admissions requirements, academic programs, and the application process.

Advanced Placement (AP) – Standardized courses administered by The College Board offered in high school, the completion of which may result in credit for some of the courses normally required for an undergraduate degree. Awarding of credit based on AP is granted to a student based on prior study or experience (usually indicated by the student's performance on the AP examination).

Advisor – For undergraduate students, a department or college-based faculty or staff member who meets with students each semester to discuss curricular choices and progress toward achieving educational goals. For graduate students, typically the Chair of the student's Thesis or Dissertation committee or academic mentor.

Alma mater – The school from which one has graduated, as in "My alma mater is The University of North Carolina at Charlotte."

Alumna/Alumnus (Alumni) – A female/male (group) who attended or graduated from a particular college or university.

Annotated bibliography – A list of citations of books, articles, and documents followed by a brief descriptive paragraph. The purpose of the annotation or description is to inform the reader of the relevance, accuracy, and quality of the sources cited.

Appeal - A formal, written narrative to request reinstatement following suspension or termination.

Articulation agreement – A written agreement listing courses at one educational institution that are equivalent to courses at another educational institution. Articulation agreements facilitate the smooth transition of students through the secondary, community college, and university educational systems.

Assessment – The act of evaluation or appraisal.

Assignment – Required reading and course work to be completed outside of the classroom as determined by instructors. Many instructors list assignments on a syllabus, which is distributed at the beginning of the semester. Other instructors give assignments during class.

Assistant Professor – usually the entry-level rank for a faculty member who holds a doctorate, although this depends on the institution and the field.

Associate Professor – the mid-level rank of a faculty member. It usually indicates that the individual has been granted tenure at the institution.

Associate's degree – A degree traditionally awarded by community or junior colleges after two years of study, or completion of 60 to 64 credit hours.

Asynchronous course - Online course modality where students access materials and complete assignments without any required real-time interaction with the instructor or other students.

Attempted hours - The credits received from courses completed at UNC Charlotte, regardless of grade earned, courses from which

students withdrew (W or WE), and courses that were repeated (even if additional credit was not earned).

Audit – Enrolling in a course on an audit basis means the course will not count for credit or impact GPA. Registration for audit requires the permission of the instructor.

-B-

Bachelor's degree or baccalaureate – A postsecondary degree requiring 120 credit hours of specified coursework (except for programs that have applied for and received a waiver to exceed 120 credit hours from the UNC Charlotte Board of Trustees). A bachelor's degree is comprised of General Education courses, a major program(s), elective courses, and, in some cases, a minor program(s), and, in general, is completed in four years.

Blue book – A booklet (often with a blue cover, where it derives its name) that contains lined paper for writing essay test answers.

Bridge program – See *Academic bridge program*.

Bursar – The official at the University who oversees the office that provides quality account management service to students, parents, and alumni by proactively assisting them in meeting their financial responsibilities for attendance.

-C-

Cambridge International Examinations – Standardized courses administered by Cambridge Assessment International offered in high school, the completion of which may result in credit for some of the courses normally required for an undergraduate degree. Awarding of credit based on Advanced (A-Level) or Advanced Subsidiary (AS-Level) examinations is granted to a student based on prior study or experience (usually indicated by the student's performance on the A- or AS-level examinations).

Campus – The area where the main buildings of UNC Charlotte are located, both in University City (main campus) and Center City (Dubois Center).

Catalog – A resource of all academic policies and procedures, college and degree requirements, faculty, and course descriptions. UNC Charlotte has both an *Undergraduate Catalog* and *Graduate Catalog*.

Catalog year – The year during which the regulations of a specific edition of the catalog apply.

Certificate – A structured set of professionally oriented courses designed to provide recognition that the student has completed coursework in an applied area of focus. For degree-seeking students, a certificate program may either complement or be concurrent with a traditional program of study. The certificate appears on the official transcript.

CFNC – College Foundation of North Carolina. A comprehensive website used for applying to colleges, exploring career opportunities, and applying for state and federal aid.

Chancellor – The chief executive officer of UNC Charlotte. At some universities, this position is referred to as *president*. To date, UNC Charlotte has had six chancellors.

Chancellor's List – The top honors list which recognizes undergraduate students with outstanding records of academic performance (a GPA of 3.8 or greater) and who meet all other criteria. For details, see the Degree Requirements and Academic Policies section of this *Catalog*.

Class standing – Refers to an undergraduate student's official year in school - Freshman, Sophomore, Junior, or Senior – and is based on the number of earned credit hours.

Classification – Level of progress toward a degree based on the number of earned semester/credit hours.

Clinical faculty – A part-time teaching position with limited research responsibilities.

College – An academic unit of the University. Each of the seven discipline-based colleges at UNC Charlotte represents an organization of related departments and/or schools.

College-Level Examination Preparation Program (CLEP) - A program that allows individuals to earn college credit by demonstrating their knowledge of introductory-level college subjects through standardized exams.

Colloquium – A gathering of scholars to discuss a given topic over a period of a few hours to a few days.

Commencement (*also known as Graduation*) – A formal ceremony in which the University recognizes degree candidates at the end of each Fall and Spring semester, pending receipt of satisfactory final grades.

Commencement Marshals – At each commencement ceremony, the University honors the juniors with the highest grade point averages by inviting them to serve as the marshals who lead the processions of graduates, faculty members, and the platform party.

Community college – A two-year traditional school, offering programs leading to an Associate's degree and, typically, many noncredit courses for community members not seeking a degree. Also called *junior college*.

Concentration – A structured plan of study within a major. (*For example, Public Relations is a concentration within the Communication Studies undergraduate major; Children's Literature is a concentration within the M.A. in English graduate program.*) The number of credit hours for a concentration varies, but is included within the credit hours for the major. The concentration appears on the official transcript.

Contact hours – The number of hours a class meets per week.

Continuing education course (or Professional Development) - A short course or certificate offered for professional development or personal enrichment that does not provide college credit.

Continuous Registration - Enrollment in coursework or research credit every semester without interruption until graduation.

Convocation – The University Convocation is a gathering of senior administration, faculty, administrative staff, and students to hear statements about the major long-term goals and values of the campus, as well as the major immediate plans and issues confronting UNC Charlotte for the upcoming year, as perceived by the Chancellor, the Provost, and the Faculty President. It is hoped that these presentations will help build a greater shared understanding of the mission of the University and the challenges confronting it. The University Convocation is held at the beginning of the academic year. See also *New Student Welcome*.

Core courses – Required courses in a major program.

Corequisite – Specific conditions, requirements, or courses that must be completed while taking another course (i.e., a lab).

Course – A specific subject studied within a limited period of time. Courses may utilize lectures, discussion, laboratory, seminar, workshop, studio, independent study, internship, or other similar teaching formats to facilitate learning.

Course load – Number of credit hours for which a student is enrolled during a semester.

Course number – The four-letter and four-digit identification code that identifies each course taught at the University, such as ENGL 2126 or PSYC 8151.

Course overload – Defined at UNC Charlotte as over 18 credit hours for undergraduates and over 12 credit hours for graduates during full terms. Within half terms, it is defined as over 7 credit hours. Approval is required to take an overload.

Course sections – Course numbers may be divided when classes also meet in discussion sections, or when a course number has sections pertaining to different topics under the same heading. For instance, a course called Architecture Topical Studio may have section 001 – Cycloramic Models and section 002 – Building Envelopes.

Course title – The name of a specific course that indicates subject and content. *Introduction to Creative Writing* is the course title of ENGL 2126; *Behavior Disorders* is the course title for PSYC 8151.

Coursework - A specified amount of work undertaken in a course which leads to its completion; also, the courses taken to attain a degree in a specified program.

Credit course – A course with specified learning goals which the student is required to meet in order to receive a grade. The course may be applied toward the fulfillment of degree requirements at the University.

Credit for prior learning - Credit is awarded to a student for successfully demonstrating college-level mastery of a given subject gained through prior learning experiences other than curriculum coursework. (See UNC Policy 700.10.1, 700.10.1[R]; 700.7.2[R])

Credit/Semester hours - An amount of work represented in intended learning outcomes and verified by evidence of student achievement. UNC Charlotte adheres to the Carnegie unit, which is a nationally recognized equivalency that consists of not less than:

1. 750 minutes of classroom or direct faculty instruction and a minimum of 1500 minutes of out of class student work for one semester hour of credit. Each credit hour corresponds to 50 minutes per week of classroom or direct faculty instruction and a minimum of 100 minutes of out of class work per week for a 15 week semester, or the equivalent amount of work over a different amount of time, whether instruction is delivered face to face, or in a hybrid or distance mode and regardless of the type of academic work leading to the award of credit hours, such as lecture, seminar, internship, practica, studio, to name a few. Regardless of the length of term, the standard of 750 minutes of contact minutes and 1500 minutes of out of class work for each credit hour remains the same.
2. 1500 minutes of direct faculty instruction for one semester hour of credit for a lab course.

Critical thinking - The practice of thinking things through, in which a student must carefully describe something (an event, a book, a person, etc) and evaluate it according to some relevant criterion, considering significant alternatives. Critical thinking is a core component of *liberal education* and of the *general education curriculum*.

Cross-Listed Course - A single course which is simultaneously listed in the schedule of course offerings by one or more academic departments. They share the same meeting times, room, instructor(s), and curriculum. Therefore, ideally, they should also have the same course title. Students may only receive credit for the single section of the cross-listed course for which they are registered. Credit will not be awarded for a course where credit has already been awarded for its cross-listed equivalent.

Cum Laude - Honorary recognition of the success of a graduating student. Translates to "With Honor." For UNC Charlotte, it requires a cumulative GPA of at least 3.4, but less than 3.7.

Curriculum - A program of courses that meets the requirements for a degree in a particular field of study.

-D-

DBA - The Doctor of Business Administration is a professional degree taught in an executive format designed to prepare graduates for leadership positions in organizations and teaching careers in academia.

Dean - The highest authority within an academic division of study. An Academic Dean heads each College. In addition to the academic deans, there is also a Dean of Students within the Division of Student Affairs.

Dean's List - An honors list which recognizes undergraduate students who earn a grade point average of at least 3.4 and not more than 3.79 and meet all other criteria. For details, see the Academic Regulations section of this *Catalog*.

Deferment - The postponing of a fee or tuition, which will be paid at a later date.

Degree - Diploma or title awarded to a student who completed a prescribed course of study.

Degree program - An organized sequence of courses that leads to the awarding of a college degree at the undergraduate or graduate level. Sometimes referred to as *Curriculum*.

Degree requirement - A set of requirements, which a student must fulfill before they graduate.

Department/School - A unit within a college representing a discipline. For example, the Department of English is in the College of Humanities & Earth and Social Sciences (CHESS), and the School of Nursing is in the College of Health and Human Services.

Department chair - The faculty member in charge of an academic department of the university.

Directory Information - Information in a student's education record that would not generally be considered harmful or an invasion of privacy if disclosed. At UNC Charlotte, directory information consists of the student's name, major field of study, dates of attendance, enrollment status, degrees and awards (including scholarships and distinctions) received; and county of residence for award, scholarship, or distinction recipients. See the Family Educational Rights and Privacy Act (FERPA) section of this Catalog for more details.

Disability - The physical and/or learning challenge -- permanent or temporary -- of a student that may impact their academic plan. Accommodations are provided for students with documented disabilities.

Discipline - An area of study representing a branch of knowledge, such as psychology.

Dissertation - The major research project normally required as part of the work for a doctoral degree. Dissertations are expected to make a new and creative contribution to the field of study, or to demonstrate one's excellence in the field.

Dissertation Chair - A graduate faculty member responsible for directing a doctoral student's dissertation research. This may or may not be the student's academic advisor.

Distance Education/Distance Learning - Education that uses one or more types of technology to deliver instruction to students who are separated from the instructor and to support regular and substantive interaction between the students and the instructor synchronously or asynchronously. The following types of technology may be used for distance instruction:

- Internet;
- Satellite or wireless communication; and
- Audio and video conferencing

(34 CFR 600.2 "Distance education" as summarized by the Integrated Postsecondary Education Data System [IPEDS])

For fee charging purposes in the UNC System, a distance education program is one designed to deliver 80 percent or more of the direct instruction through distance education or off-campus, as defined in Section 400.1.1[R](II)(b). There may be a requirement for the student to attend the main campus for a portion of the program, but that requirement is minimal. (See UNC Policy Manual 1000.1.2[IV][A])

DNP - The Doctor of Nursing Practice is a terminal degree designed to prepare graduates to analyze systems of care and provide transformational leadership to improve patient safety, quality of care, and implement evidence-based culturally competent care practices.

Doctoral degree - The most advanced degree, awarded following additional study, often after completion of a master's degree.

Double major - Studying simultaneously for two majors, fulfilling the course requirements for both majors.

Drop/Add - See *Add/Drop*.

Dual/joint degree - Involves a student's working for two different University degrees in parallel, either at the same institution or at different institutions (sometimes in different countries), completing them in less time than it would take to earn them separately. The two degrees might be in the same subject area (especially when the course is split between countries), or in two different subjects.

-E-

Early Entry - Accelerated program for students who begin graduate study during their undergraduate senior year.

Earned hours - The credits received from courses successfully completed at UNC Charlotte.

Ed.D. - The Doctor of Education is a terminal degree designed to prepare educational administrators who can assume mid-level and senior-level leadership positions in public school and postsecondary settings.

Elective course - A course selected at a student's discretion. A *restricted elective course* is a course which must be chosen from a stated group/list of courses to satisfy the program requirements. An *unrestricted elective course* may be in any subject, and may be selected from any course for which the student has the proper prerequisites.

Embargo - In academia, an "embargo" is a restriction placed on research, typically a thesis or dissertation, to be temporarily withheld from publication.

Emeritus faculty - A member of the faculty who has retired but retains the honorary title that corresponds with their last held position at the University.

Equivalency examination - An examination designed to demonstrate knowledge in a subject where the learning was acquired outside a traditional classroom. For example, a student who learned management skills while working at a restaurant could take an equivalency exam, if offered, to earn credit in small business management.

Essay - A method of examination, or homework, by which a student presents their knowledge of the subject by writing a composition.

Equivalency examination (also Challenge Exam or Credit by Exam) - A departmental or institutional exam used to determine if a student's subject matter proficiency is equal to or greater than the corresponding proficiency the student would have achieved had they completed the corresponding course.

Experiential Learning - An engaged learning process whereby students "learn by doing" and by reflecting on the experience. Experiential learning may include community service, service-learning, undergraduate research, project-based learning, study abroad, and culminating experiences such as internships, student teaching, and capstone projects.

Extenuating circumstances - Personal situations that, upon administrative approval, allow students to withdraw late (if necessary) and to receive "WE" grades.

Extracurricular activities - Activities pertinent to student life, but not part of the regular classroom study (e.g., athletics, publications, and social organizations). Also referred to as *co-curricular activities*.

-F-

Face-to-face - A learning modality where students and instructor meet in person, such as in a classroom. This term can describe a course or a program.

Facilitator - The person in an interactive classroom who assists the instructor or students with distribution of handouts, collection of tests and evaluations, technical and troubleshooting issues, etc.

Faculty - All persons who hold Professorial Rank (Professor, Associate Professor, and Assistant Professor) or a Special Faculty Appointment (Visiting Professor, Adjunct Professor, Instructor, Assistant Professor (Library), Assistant Professor (Military), Lecturer, Assistant Research Professor, or Artist-in-Residence).

FAFSA (Free Application for Federal Student Aid) - A form that all students applying for financial assistance are required to complete in order to determine eligibility for financial aid. This form is available from the Office of Student Financial Aid.

FAQ - Frequently Asked Questions. On the Internet and in print, information sources may provide a list of FAQs to assist newcomers in learning more on their own.

Fees – An amount of money charged by institutions (in addition to tuition) to cover the costs of certain services (health services, athletic center, student activities, registration, parking, use of lab equipment or computers, etc.).

FERPA – The Family Educational Rights and Privacy Act (FERPA) is a Federal law that protects the privacy of student education records. The law applies to all schools that receive funds under an applicable program of the U.S. Department of Education.

Final exam – The last, and often the most comprehensive, examination of the entire semester's course material.

Financial aid/assistance – Money available from various sources to help students pay for college. Students must establish eligibility. Funds can be competitive.

Financial aid package – Total amount of financial aid given to a student. Federal and non-Federal aid such as grants, loans, and work-study are combined to help meet the student's need.

Financial need – In the context of student financial aid, financial need is equal to the cost of education (estimated costs for college attendance and basic living expenses) minus the expected family contribution (the amount a student's family is expected to pay, which varies according to the family's financial resources).

Fraternity – A social organization, most often for male students, with specific objectives, rules and regulations.

Full-time student – An undergraduate student with a course load of at least 12 credit hours, as defined by eligibility for federal financial aid, or a graduate student with a course load of at least 9 credit hours. However, undergraduate students need to average a minimum course load of 15 credit hours per semester to graduate within four years.

-G-

General Education Requirements - These courses provide undergraduate students, regardless of their majors, with the foundations of a *liberal education*. For details, see the General Education Program section of the *Undergraduate Catalog*.

Good Academic Standing – Meeting the cumulative GPA requirements for a semester.

Good Academic Standing Warning – The result of unsatisfactory work during the course of a semester; a warning that the student should improve their performance.

GPA (Grade Point Average) – The grade point average for an undergraduate student is determined by adding all accumulated quality points together, and then dividing by the total number of GPA hours the student has attempted, excluding those for which the student received average, only those credits attempted at UNC Charlotte are included. Refer to the example below.

Example of Transcript:					
Subject	Course	Grade	Credit Hours	Quality Points	
AMST	2050	P	3.00	0.00	
CHEM	1251	F	3.00	0.00	
CHEM	1251L	F	1.00	0.00	
ENGR	1201	C	2.00	4.00	
LBST	2101	C	3.00	6.00	
MATH	1241	C	3.00	6.00	
WRDS	1101	B	3.00	9.00	

Term Totals (Undergraduate)

	Attempt Hours	Passed Hours	Earned Hours	GPA Hours	Quality Points	GPA
Current	18.00	14.00	14.00	15.00	25.00	1.66
Term Cumulative	18.00	14.00	14.00	15.00	25.00	1.66

Example of GPA Calculation:

GPA = Quality Points/GPA Hours; $25/15=1.66$

Grades – Evaluative scores provided for each course, and often for individual assignments, examinations, or papers written for that course. There are letter grades (usually A, B, C, D, F) and number grades (usually percentages from 0% to 100%, or on a scale of 0.0 to 4.0). Some undergraduate courses use a *pass/no credit* system with no grades; some graduate courses use a *pass/unsatisfactory* system with no grades.

Graduate assistantship- Employment whereby a graduate student receives financial support for their contributions to the teaching, research, and service missions of the University.

Graduate Faculty Representative - A member of the doctoral student's advisory committee appointed by the Graduate School that assures that the doctoral student is treated fairly and impartially by his or her advisory committee, and assure that University standards and policies are upheld.

Graduate School - The academic college of which all graduate students belong, responsible for the administration of all graduate programs.

Graduate studies – Coursework beyond the bachelor's degree that leads to a graduate certificate, or a master's, professional, or doctoral degree.

Graduation (*also known as Commencement*) – A formal ceremony in which the University awards degrees to graduating students at the end of each Fall and Spring semester, pending receipt of satisfactory final grades.

Graduation with Distinction – Graduating with honors. To be eligible to graduate with distinction, a student must have a certain grade point average computed on at least 48 credit hours of credit completed in residence at UNC Charlotte. (*See Summa Cum Laude, Magna Cum Laude, and Cum Laude*)

Grant – A sum of money given to a student for the purposes of paying at least part of the cost of college. Grants and scholarships do not have to be repaid.

GRE (Graduate Record Examination) – A standardized test that is an admissions requirement for many graduate programs. The exam aims to measure verbal reasoning, quantitative reasoning, analytical writing, and critical thinking skills that have been acquired over a long period of time and that are not related to any specific field of study. The GRE General Test is offered as a computer-based exam administered by selected qualified testing centers.

-H-

Hold Flags – See *Registration hold flags*.

Homecoming – An annual event held by the University to honor alumni.

Honors – A special rank or distinction conferred by the University upon an undergraduate student for excellence in scholarship (based on their GPA). When referring to a course of study, an honors course is for academically talented, enthusiastic, and motivated undergraduate students.

Hooding - The Doctoral Hooding Ceremony is a tradition of individually recognizing graduating doctoral students through a separate event.

Hybrid - A learning modality that combines multiple learning modalities, such as face-to-face and online, online asynchronous and online synchronous, or some other combination. This term can describe a course or a program.

-I-

In-residence - For degree-seeking students, a residency requirement indicates the number of credit hours that must be completed through the University in order to graduate.

Incomplete grade – An "I" (incomplete grade) may be assigned by a faculty member to a student who carried coursework satisfactorily until near the end of the semester, but who was then unable to complete the course, possibly including the final exam. If the student does not remove the "I" within 12 months, the "I" will be changed to "F," "U," or "N," as appropriate. See the Degree Requirements and Academic Policies section of this *Catalog* for complete details.

Independent study – A method of receiving credit for study or research independent of the assignments of any specific course, but supervised and graded by a faculty member.

Interdisciplinary – A course or program of study involving two or more major areas/departments. For example, Women's and Gender Studies is an interdisciplinary program offering a minor within the College of Humanities & Earth and Social Sciences (CHESS).

International Baccalaureate (IB) – Standardized courses offered in high school, the completion of which may result in credit for some of the courses normally required for an undergraduate degree. Awarding of credit based on IB is granted to a student based on prior study or experience (usually indicated by the student's performance on IB examinations).

Internet course – A web-based course completed online. Also called an *online course*. May or may not be self-paced.

Internship – A work experience, paid or non-paid, that provides students with practical experience, most often in their field of study.

Intramural/fitness/sport clubs – Programs designed to encourage students to participate in a variety of competitive, instructional, and recreational organized sports activities.

-J-

Job fair – Also known as a *career fair* or *career expo*, it provides a place for employers and recruiters, to meet with student job seekers, typically for entry-level positions. Fairs usually include company or organization tables or booths where résumés may be collected. Occasionally, it is also where students may perform their first interviews with a prospective employer.

Juris Doctor (J.D.) – A professional doctorate and first professional graduate degree in law.

-L-

Laboratory (lab) – A classroom where students apply material in small-group situations that include experiments, assignments, and projects. A lab course typically has an "L" after the course number.

Learning communities – Small groups of new students and faculty who share common interests. Students enroll in two or more of the same courses and, in many cases, live together in the same residence hall.

Learning strategies – Activities that help people use their own learning style to best approach new learning.

Leave of Absence – Graduate students only may seek a leave from their studies for up to 12 months. During this time, they may not use any University resources.

Lecture – A teaching method in which the professor presents information to the students who take notes, ask questions, and have dialogue with the professor.

Liberal Education – The foundation of the baccalaureate degree in the United States. *Liberal education* strives to make students liberally educated citizens of the world by emphasizing knowledge across disciplines, critical thinking, and application of content. The *General Education Requirements* work toward this end.

Loan – A type of financial aid that is available to students. An education loan must be repaid. In some cases, payments do not begin until the student finishes school.

Lower division course – A course that is intended for freshman and sophomore level students (typically 1000 and 2000 course numbers) that contains introductory content.

-M-

Magna Cum Laude – High honorary recognition of the success of a graduating student. Translates to "With Great Honor." For UNC Charlotte, it requires a cumulative GPA of at least 3.7, but less than 3.9.

Major – A degree-seeking student's primary field of study. A major is a structured plan of study requiring a minimum of 30 credit hours. It must be feasible for undergraduate students to complete degree requirements within 120 credit hours (except for programs that have applied for and received a waiver to exceed 120 credit hours from the UNC Charlotte Board of Trustees). The major appears on the official transcript.

M.A./M.S. – See *Master's degree*.

Master's degree – An advanced degree (e.g., Master of Arts [M.A.], Master of Science [M.S.]) awarded by a university after completion of studies beyond a bachelor's degree.

Matriculated student – A student who has been accepted for admission to the University, has registered in a curriculum, and is pursuing courses toward a degree or certificate. See also *Non-matriculated student*.

Matriculation – The first enrollment following admission as a student.

Meta-Major – Collections of academic majors that have related courses. Undergraduate students within the University College will have several Meta-Major options to choose from. Meta-Majors provide a clear pathway to declaring a major and help make connections between academics and different career tracks.

Micro-credential - A small, specialized recognition that demonstrates a person's skills, knowledge, or accomplishments in a specific area. These credentials reflect narrow, well-defined competencies and are designed to be more flexible, accessible, and shorter than traditional degree programs. Completion of a micro-credential is often recognized with a digital badge as a validated indicator of an accomplishment, skill, quality, or interest.

Mid-term exam – An (often major) examination given in the middle of the semester that tests the student's knowledge of information taught in the course from the beginning of the course up until the time of examination.

Minor – An undergraduate minor represents an optional, secondary field of study for a degree-seeking undergraduate student; no undergraduate student may declare a major and a minor in the same discipline. An undergraduate minor is a structured plan of study requiring a minimum of 15 credit hours and no more than 29 credit hours exclusive of student teaching. A minor should require significant additional coursework beyond what is already required for the major. The minor appears on the official transcript.

Multiple-choice examination – An examination in which questions are followed by two or more answers, from which a student selects the correct answer.

My UNC Charlotte – One-stop shopping for student services via the Web. It combines various systems, user interfaces, and technical solutions already available to the UNC Charlotte community in a single, consistent web-based interface. Students should use My UNC Charlotte online at my.charlotte.edu to access web-enabled student services, course information, e-mail, and calendar scheduling.

-N-

New Student Welcome - An event dedicated to welcome and introduce new undergraduate students (freshmen and transfers) to the UNC Charlotte academic community. During the event, students learn about UNC Charlotte's traditions, mission, and values that drive the niner spirit.

Niner Central – UNC Charlotte's place to go when you don't know where to go. Students can get answers to questions and receive services for all topics related to financial aid and billing, registration, transcripts, student accounts, academic records, and more.

Niner Nation – The collective UNC Charlotte student body.

Niner Nation Family – The collective parent and family members of UNC Charlotte students.

Noble Niner – The honor code created by the Student Government Association which solidifies the high standard of morals, principles, and integrity that all students should strive to uphold in order to bolster the growing reputation of excellence at UNC Charlotte.

Non-Credit - A short course or certificate offered for professional development or personal enrichment that does not provide college credit.

Non-matriculated student – A student who has been accepted for admission to the University, but not yet enrolled. See also *Matriculated student*.

-O-

Objective test – An examination in which questions requiring a very short answer are posed. It can be multiple choice, true/false, fill-in-the-blank, etc. The questions are related to facts (thus objective) rather than to opinions (subjective).

Online - A learning modality which uses the internet to deliver instruction asynchronously or synchronously. This term can describe a course or a program.

Online courses – Courses which are taught and taken either partially or wholly over the Internet.

Open-book examination – A student is permitted to use their textbook, and often classroom notes, during the exam.

Oral examination – A student answers questions by speaking rather than by writing.

Orientation – An organized gathering, held at the beginning of every semester, which provides useful information to new students to acclimate them with the college campus and student life.

-P-

Part-time student – An undergraduate student with a course load of less than 12 credit hours, or a graduate student with less than 9 credit hours. See also *Full-time student*.

Pass/no credit course – A course that rates a student's performance on a pass/no credit basis, rather than on grades.

Ph.D. – The Doctor of Philosophy a type of doctoral degree awarded by a university to students who have completed studies beyond the bachelor's and/or master's degrees, and who have demonstrated their academic ability in oral and/or written examinations and through original research presented in the form of a dissertation (thesis).

Placement test – An examination used to test a student's academic ability in a certain subject so they can be placed in a course at an appropriate level. In some cases, students may get course credits after scoring high on a placement test.

Plagiarism – Passing off someone else's work as your own or using the intellectual property of someone else without giving proper credit. Students must follow certain guidelines to properly acknowledge the use of other people's ideas or words in their work (unless such information is recognized as common knowledge). This is considered a serious offense at every institution, and is subject to disciplinary action that may include failure in a course and/or dismissal from the University.

Pop quiz – A quiz that the instructor has not previously informed the students about.

Postbaccalaureate - A student who has earned a baccalaureate degree and takes educational courses; sometimes referred to as a "post-bacc" or non-degree seeking student.

Postsecondary education – Refers to all education for students after high school, including programs at community colleges, technical colleges, and four-year colleges and universities.

Practicum/Practica - A course where students complete a field experience as part of the regular coursework.

Prerequisites – Specific conditions, requirements, or courses that must be completed before enrolling in another course. Course prerequisites (if any) can be found within each course description. For example, Spanish I is a prerequisite for Spanish II.

Proctor – A person who supervises the taking of an examination to be certain there is no cheating, and that other rules are followed.

Professional credit or professional development courses – Courses offered to improve knowledge and skills in specific professional areas, such as professional development workshops, certification programs, certificates or boot camps. They are usually not offered for academic credit.

Professor – the highest rank attained by a faculty member. Sometimes also called *Full Professor*. A small fraction of tenured faculty are

awarded the title of *Distinguished Professor* to recognize outstanding and broad contributions to the advancement of a field of study.

Provost – Reporting to the Chancellor, the Provost is the chief academic officer who oversees all academic affairs activities, including research and faculty. The Deans of each College report to the Provost.

-Q-

Quiz – A short test, written or oral, usually less formal and usually carries less grade weight than an exam.

-R-

Reading Day – Reading Day is to guarantee that students have one day between scheduled classes and the first final examination day. Per the Academic Calendar policy, faculty must not require student participation in any course-related activities on Reading Day.

Readmission – Approval of the enrollment or admission of a former student.

Reassignment of Duties – A period of time (usually one semester) when a faculty member is not teaching, but concentrating on their own education or research.

Registrar – The official at the University who is responsible for maintaining student records. The Office of the Registrar plans and oversees transfer credit articulation, registration, academic record maintenance, transcript preparation, graduation, a degree audit report system, and curricular records.

Registration – Students select courses to enroll in for the subsequent term.

Registration hold flags - Students may be blocked from registering for courses by "hold flags" that may be placed for various reasons, including College or departmental advising requirements, invalid admissions status, outstanding financial obligations, unreturned equipment or library materials, suspension and disciplinary action, or non-compliance with the North Carolina Immunization Law.

Reinstatement - Re-establishment of a student's active status following a successful suspension/termination appeal or an approved leave of absence.

Required courses – Courses that a student must take in order to complete their degree. In many cases, these courses must be passed with a grade of C or above.

Research paper – A formal written report that includes research findings and a student's own ideas.

Residence - For degree-seeking students, a residency requirement indicates the number of credit hours that must be completed through the University in order to graduate.

Restricted elective course – See *Elective course*.

ROTC – Reserve Officers Training Corps program; a scholarship program wherein the military covers the cost of tuition, fees, and textbooks, and also provides a monthly allowance. Scholarship recipients participate in summer training while in college and fulfill a military service commitment after college.

-S-

SAT – Scholastic Assessment Test I: Reasoning (SAT Reasoning Test) is a standardized test for college admissions that measures a student's aptitude in math, critical reading, and writing.

Schedule of classes – A list of available courses for a specific period of study (i.e., Fall semester), including course numbers, hours, locations, and other pertinent information.

Scholarship – A sum of money given to a student for the purposes of paying at least part of the cost of college. Scholarships can be awarded to students based on academic achievements, financial need, or on many other factors. Scholarships, like grants, do not have to be repaid.

School – See *Department/School*.

Section – One of several classes of the same course. At UNC Charlotte, a three-digit code is used to identify each section of each course offered. For instance, a course called Architecture Topical Studio may have section 001 – Cycloramic Models and section 002 – Building Envelopes.

Self-directed learning – A process in which students take the initiative to diagnose their learning needs, formulate learning goals, identify resources for learning, select and implement learning strategies, and evaluate learning outcomes. The instructor is available as a guide.

Semester or Term – A period of study, usually a third of the academic year (i.e., Fall, Spring, and Summer semesters). Fall and Spring semesters generally include a period of study of one 15-week and two 7-week half terms. The Summer semester generally includes one eleven-week and two five-week half terms. UNC Charlotte offers courses for the Fall, Spring, and Summer semesters, as well as varying term lengths associated with each semester. For the definition of each term refer to the Office of the Registrar.

Semester hour – See *Credit hour*.

Seminar – Most commonly offered as upper-level and graduate courses, these are small classes of approximately 15 students each, designed to facilitate intensive study of specific subject areas.

Service Learning (SL) – Service Learning (SL) incorporates community work into the curriculum, giving students real-world learning experiences that enhance their academic learning while providing a tangible benefit for the community. Service Learning designated courses integrate community service work into the disciplinary content and context of the course, and result in a SL designation on the student's transcript. Any course with an SL designation must include the scholarly exploration of the concepts of citizenship, public or

community service, social issues, or social justice, and provide learning via direct, hands-on experience outside of the classroom.

SOAR – Student Orientation, Advising, and Registration. It is the official UNC Charlotte orientation for new undergraduate students.

Sorority – A social organization for female students, with specific objectives, rules and regulations.

Student Convocation – See *New Student Welcome*.

Studio - A course which typically centers around hands-on design projects, project-based learning, or activities for skill development in applied arts and other fields.

Study abroad – Visiting other countries for educational purposes, including earning academic credit, learning about different cultures, and developing a deeper understanding of the global marketplace.

Subjective test – An examination in which the answers are in the form of narrative sentences, or long or short essays, often expressing opinions (thus subjective) rather than reporting facts (objective).

Summa Cum Laude – The highest honorary recognition of the success of a graduating student. Translates to "With Highest Honor." For UNC Charlotte, it requires a cumulative GPA of at least 3.9.

Supplemental Instruction – Additional assistance for students in historically difficult courses, including accounting, biology, chemistry, communication studies, engineering, mathematics, and physics.

Surveys – A method for collecting information to improve the experience for future students. Current students are often asked to complete questionnaires or participate in focus groups to provide feedback on the quality of services and impact of educational programs.

Suspension - Administrative cancellation of enrollment due to unsatisfactory academic performance.

Syllabus – A course outline typically provided on the first day of class by the instructor that describes course requirements, topics to be covered, required reading, grading criteria, faculty expectations, deadlines, exam dates, class attendance requirements, and other relevant course information.

Synchronous Course - Online course modality that uses real-time interaction with students and instructor with live video conferencing such as Zoom.

-T-

Take-home examination – An examination that may be completed at home. Since students may use additional resources, these exams are usually more difficult than in-class exams.

Term – See *Semester or Term*.

Term paper – A written original work discussing a topic in detail, usually several typed pages in length. Often due at the end of a semester.

Termination (Academic) - Administrative cancellation of enrollment for failure to make satisfactory academic progress following an initial program probation or suspension. Students who are suspended from a graduate program and are denied re-admittance through the suspension appeal process are considered terminated.

Test – An examination, or any other procedure that measures the academic abilities of students.

Thesis - A long essay or dissertation involving personal research, written by a candidate for a graduate degree.

Transcript – A list of all the courses a student has transferred in or taken at UNC Charlotte with the grades that the student earned in each course at UNC Charlotte. A transcript is an exact and complete record of a student's academic history. The University requires a high school transcript when a student applies for admission.

Transferability – The extent to which a course taken from one college or university may be accepted by another. Full or partial transfer of the credit may be available, dependent on factors such as whether the receiving college or university offers an equivalent or similar course at comparable levels of academic expectation for learning. Academic advisors have information about whether and how specific courses will transfer to their institutions and degree programs.

Transfer student – A student who has earned credit in one college or university, and then transfers to another.

Transient study – When credit for courses taken by current UNC Charlotte students at a college or university accredited by an accepted accrediting body are transferred to UNC Charlotte, subject to approval. For details, see the Degree Requirements and Academic Regulations section of this *Catalog*.

True/False examination – An examination in which questions are answered by marking "True" or "False."

Tuition – The amount of money that colleges charge for coursework and other instruction. Tuition can vary widely between educational institutions, and does not cover fees, cost of books, and other materials.

Tuition waiver – A form of financial assistance in which the university may charge little or no tuition.

Tutoring – A method of providing help to students through additional instruction outside of class. Advanced students work with individuals or small groups to increase their understanding of the material.

-U-

Undeclared – A student who has not yet declared a major field of study; sometimes referred to as *undecided*.

Undergraduate studies – A two or four-year program in a college or a university, following high school graduation, which leads to an associate or bachelor's degree, respectively.

University-sanctioned activities - A University-sanctioned event or activity shall be one in which a student represents the University to external constituencies in academic or extracurricular activities including but not limited to University clubs, organizations, athletics, music ensemble tours, teams, and conferences.

Unrestricted elective course – See *Elective course*.

Unsatisfactory grade reports – notifications sent to students in the middle of each semester for courses in which the student is performing below average and a grade has been reported.

Upper-division course – A course that is intended for junior and senior level students (typically 3000 and 4000 course numbers) that contains advanced, and typically more specific, topic content.

-V-

Visiting faculty – Faculty members who come to the university from another institution for an appointment of a year or less, sometimes to fill a temporary vacancy.

-W-

Withdrawal – The procedure in which a student officially removes himself/herself from taking a course, or removes himself/herself from all courses. Tuition may or may not be refunded, depending on the date of withdrawal.

Withdrawal with Extenuating Circumstances (WE) - A Withdrawal with Extenuating Circumstances is for students who are unable to complete their coursework due to an unforeseen circumstance that may include, but not be limited to Personal/Family Emergency, Personal Hardship, Medical/Mental Health Emergency or Military Orders.

W-limit hours – The maximum number of credit hours (currently 16) for which undergraduate students are allowed to receive a grade of W over their academic career at UNC Charlotte.
