This *Catalog* was prepared and published by the Office of Academic Affairs in June 2025. Its goal is to provide a comprehensive, accurate, and useful catalog that changes on a daily basis, which fully describes the ever-changing academic programs, policies, regulations, and requirements of the University.

Although the publisher of this *Catalog* has made every reasonable effort to attain factual accuracy herein, no responsibility is assumed for editorial, clerical or printing errors, or errors occasioned by mistakes. The publisher has attempted to present information that, at the time of preparation for printing, most accurately describes the course offerings, faculty listings, policies, procedures, regulations, and requirements of the University. However, it does not establish contractual relations. The University reserves the right to alter or change any statement contained herein without prior notice.

We request that omissions and inaccuracies be brought to the attention of the Editor, as well as any suggestions and comments on the presentation and content.

About using this PDF Catalog:

This PDF has been formatted with navigation bookmarks. The navigation bookmarks on the left side of the screen function as an interactive table of contents. They will allow you to quickly find sections of interest and move easily throughout this document. You can expand and collapse the bookmarks by clicking on the +/- symbols.

If the Bookmarks Panel has been closed, you can reopen it by clicking on the Bookmarks icon:

The University of North Carolina at Charlotte is committed to equality of educational opportunity and does not discriminate against applicants, students, or employees based on race, color, religion, sex, sexual orientation, gender identity, age, national origin, physical or mental disability, veteran status, or genetic information. In keeping with this commitment, UNC Charlotte ensures that diverse persons of any background are invited, included, and treated equally.

UNC CHARLOTTE ♦ 9201 UNIVERSITY CITY BOULEVARD ♦ CHARLOTTE, NC 28223
www.charlotte.edu

Welcome to UNC Charlotte, North Carolina's urban research university, where great things are happening.

UNC Charlotte is enjoying a strong wave of momentum. Last fall, the University climbed to #81 among the nation's top public universities in the 2025 U.S. News & World Report Best Colleges rankings. In the last five years, we have moved up 76 spots overall and are now one of the top 10 fastest rising universities in the U.S. We also ranked #45 among US News' Most Innovative Schools, the only public university in NC to rank in this category.

Among our most significant accomplishments is our achievement of the nation's top research designation, Carnegie R1, which was announced in February 2025. This milestone reflects the dedication and innovation of our faculty and staff, and is an indication of the positive trajectory that we are on.

As a student attending a top-tier research university, you will benefit from the opportunity to work on cutting-edge research projects and to be taught and mentored by top professors who share the latest knowledge in the classroom.

Our promise is to not only provide a supportive community in Niner Nation but also to help you complete your degree on time, and to be equipped to thrive in an ever-changing world.

As you work toward your degree, please think of UNC Charlotte's dedicated faculty and staff as partners in your success. Their expertise and support, along with the many University resources and services available to you, will enable you to meet your academic, personal and professional aspirations.

While growing our research capabilities, we also have strengthened our commitment to undergraduate education. Over the past decade – through the combined efforts of faculty, staff and students – we've developed comprehensive programs to enhance student success. We call these programs "The Charlotte Model." This innovative work has transformed our University and raised our graduation rates. Today, UNC Charlotte is known as a national model in the areas of student success and social mobility.

During your time here, explore all the possibilities available. Take advantage of leadership and volunteer opportunities; attend cultural events and lectures; join a student organization; participate in intramural sports; and cheer on your Charlotte 49ers whenever they are competing.

Please speak up if you need help. We have many resources on campus to assist you. Please also get involved on campus and be an active partner in your education.

It is truly a privilege to serve as your chancellor. Please know that I will do everything in my power to support and strengthen our academic enterprise, ensure a great college experience for you, and always place the highest priority on the safety and well-being of our campus community.

I am delighted that you've made UNC Charlotte your university of choice. I look forward to seeing you on campus. Go Niners!

Sincerely,

A handwritten signature in black ink that reads "Sharon L. Gaber".

Sharon L. Gaber
Chancellor

If this is your first year at UNC Charlotte, welcome to our dynamic community! If you are returning, we are pleased to welcome you back.

You are part of an engaged and enterprising university that is interconnected with North Carolina's largest city. Because we are situated in a growing and dynamic region, our institution is alive with possibilities to learn and grow. As you explore the academic opportunities available, know that we believe in your ability to succeed and our amazing faculty and staff are ready to help you achieve your goals.

We are dedicated to your education and offer resources to help you along your journey at UNC Charlotte. Niner Central is the place to go with any of your questions about registration, student accounts or financial aid and the University Center for Academic Excellence houses many tools to support success in your classes. Please meet with your academic advisor early and often, and get to know your professors whether it's in class, in the lab or during office hours.

Remember, too, that there is more to the collegiate experience than coursework. I encourage you to become involved in some of the many activities or student organizations. By getting involved, you will build relationships with both your fellow students and our faculty and staff that you will cherish in the years to come.

I hope you will take advantage of the excellent resources available here and explore all that our University has to offer. But don't stop there – explore research, community engagement and professional development opportunities in the greater Charlotte area and in the world beyond. We're here to help you get started.

We are pleased that you have chosen UNC Charlotte. As our University continues to grow, we look forward to seeing your growth as a person, a scholar and a future alum.

Sincerely,

A handwritten signature in black ink, appearing to read "Jennifer Troyer".

Jennifer Troyer
Provost and Vice Chancellor for Academic Affairs

Academic Calendar

2025-2026

UNC Charlotte's academic year is divided into three terms: Fall, Spring, and Summer. These full terms are divided into half terms.

FALL 2025

Aug 11	Academic year begins
Aug 17	New Student Convocation/Welcome
Aug 18	First day of classes (Full Term & First Half Term)
Aug 23	First day of classes (Saturdays)
Aug 30	No Saturday classes
Sep 1	HOLIDAY: Labor Day
Oct 1	Last day of classes (First Half Term)
Oct 3-6	Final examinations (First Half Term)
Oct 9-10	Fall Recess
Oct 14	First day of classes (Second Half Term)
Oct 27	Registration for Spring 2026 begins
Nov 11	HOLIDAY: Veteran's Day
Nov 26-29	HOLIDAY: Thanksgiving
Dec 2	Last day of classes (Full Term & Second Half Term)
Dec 3	Reading day
Dec 4-6, 8-10	Final examinations (Full Term & Second Half Term)
Dec 12-13	Fall Commencement

SPRING 2026

Jan 12	First day of classes (Full Term & First Half Term)
Jan 10	First day of classes (Saturdays)
Jan 19	HOLIDAY: M.L. King, Jr. Day
Feb 25	Last day of classes (First Half Term)
Feb 26	Reading Day (First Half Term)
Feb 27 - Mar 2	Final examinations (First Half Term)
Mar 9-14	Spring Break
Mar 16	First day of classes (Second Half Term)
Mar 30	Registration for Summer 2026 and Fall 2026 begins
Apr 10-11	Refresh Weekend
Apr 29	Last day of classes (Full Term & Second Half Term)
Apr 30	Reading Day (Full Term & Second Half Term)
May 1-2, 4-7	Final examinations (Full Term & Second Half Term)
May 8-9	Spring Commencement
May 11	Academic year ends

SUMMER 2026

May 25	HOLIDAY: Memorial Day
May 18 - Jun 24	Summer First Half Term*
May 18 - Aug 5	Summer Full Term*
Jul 15-27	No classes
Jul 3	HOLIDAY: Independence Day
Jun 29 - Aug 5	Summer Second Half Term*

*Dates include final examinations.

Please note: All dates are subject to change. No classes are held on the above noted holiday dates. A complete list of dates and deadlines is available online from the Office of the Registrar at registrar.charlotte.edu/calendar. Please check this site for the most current information.

Introduction to the Catalog

Introduction to the Catalog

University Catalogs Policy

The University of North Carolina at Charlotte Undergraduate and Graduate Catalogs (hereby referred to as the "Catalogs") are the official source of information regarding the University's academic programs and courses. The Catalogs serve as a guide, in conjunction with regular academic advising, in planning a course of study and in meeting requirements for graduation.

The Catalogs are published annually in the Spring for the following academic year, which begins in the Fall. Although course offerings and academic requirements at UNC Charlotte are continually under examination and revision, the Catalogs are updated only once per year. This annual revision procedure helps ensure that users of the Catalogs will not find unexpected changes during their academic planning processes.

The UNC Charlotte Undergraduate Catalog and the UNC Charlotte Graduate Catalog are not irrevocable contracts. Regulations published in them are subject to change by the University at any time without notice. University regulations are policy statements to guide students, faculty, staff, and administrative officers in achieving the goals of the institution. Necessary interpretations of these policies will be made by the appropriate authorities with the interest of the students and the institution in mind. Students are encouraged to consult an advisor if they have questions about the application of any policy.

The University reserves the right to change any of its policies, rules, and regulations at any time, including those relating to admission, instruction, and graduation. The University also reserves the right to withdraw curricula and specific courses, alter course content, change the calendar, and to impose or increase fees. All such changes are effective as proper authorities determine and may apply not only to prospective students, but also to those who are already enrolled in the University.

Catalog Year Requirements

Major, Minor, Certificate

The requirements specified in the Catalogs apply to students who commence their studies at UNC Charlotte during the academic year specified in this catalog and who remain in continuous enrollment (no enrollment interruption longer than 12 consecutive months) at the institution until they graduate. If program requirements for a major, minor, or certificate are changed in the Catalog, students remain by default under the old requirements. However, students may elect to follow these new requirements. The choice to apply the new requirements must be declared by students prior to applying for graduation by means of an academic petition at <https://academicpetition.charlotte.edu/>. When students declare or change their major they may: 1) elect to stay with the program requirements in the Catalog at the time of their matriculation to the University, or 2) change to follow the program requirements of the current Catalog at the time of their major declaration.

The decision to change Catalog year requirements rests with the student with two rare exceptions: 1) if academic program accreditation and/or professional licensure requirements necessitate the change, or 2) if there is an undue academic burden placed on a department if a student elects to follow the Catalog year requirements of a previous Catalog (e.g., a specialized course is no longer offered).

General Education

The General Education requirements specified in the Catalogs apply to students who commence their studies at UNC Charlotte during that academic year and who remain in continuous enrollment (no enrollment interruption longer than 12 consecutive months) at the institution until they graduate. If the General Education requirements change, students remain by default under the old requirements. However, students may: 1) elect to continue under the requirements outlined in the Catalog at the time of their matriculation to the University or 2) change to follow the General Education requirements of the current Catalog. The choice to apply the new requirements must be declared by students prior to applying for graduation by means of an academic petition.

Readmission to the University

Students who are readmitted to the University are bound by the program and degree requirements in effect at the time of readmission, including General Education requirements.

STUDENTS UNSURE OF WHICH CATALOG TO USE SHOULD CONSULT WITH THEIR ADVISOR.

Exceptions to these policies may be necessitated by changes in course offerings, degree programs, or by action of University authorities. In that event, every effort will be made to avoid penalizing the student.

Catalog Sections

The Undergraduate Catalog is divided into three sections. The first section contains student information about attending the University, such as the academic calendar, the degree programs offered, admission, student conduct, degree requirements and academic policies, and financial information, including tuition and fees and financial aid.

The second (or curriculum) section describes the University's academic programs in detail. The section is organized in alphabetical order by the seven academic colleges, followed by each individual department or program, plus the interdisciplinary School of Data Science, School of Professional Studies, Honors College, and the Office of Undergraduate Education. The section ends with an alphabetical listing of all courses offered by their prefix code.

The third and final section contains information about student life on campus, academic resources, and student services, as well as a faculty directory and glossary of higher education terminology, including definitions specific to UNC Charlotte. Rounding out this section is an index, which is helpful in locating a topic quickly.

What's New This Year

New Programs

New undergraduate degrees and programs that appear for the first time in this *Catalog* include:

- **Undergraduate Degrees with New Concentration**

- Architecture, Architectural Studies Concentration, B.A.
- Architecture, Practice Concentration, B.A.
- Architecture, Pre-Professional Concentration, B.A.
- Global Studies, Global Cultural Studies Concentration, B.A.
- Mechanical Engineering, Aerospace Engineering Concentration, B.S.M.E.
- Music, Contemporary Practices & Cultural Rhetoric Concentration, B.A.
- Philosophy, Pre-Law Concentration, B.A.
- Sports Analytics, B.S.
- Theatre, B.A.

- **Minor Programs**

- Collaborative Educators in Inclusive Schools
- Fire Science, Minor
- Inclusion, Disability, and Exceptionalities in American Society

Early Entry Programs

- Crime Analysis, Graduate Certificate, Early Entry

- **Undergraduate Certificate Programs**

- Project Management, Undergraduate Certificate

Program Changes

Major changes to existing undergraduate degree programs include:

Bachelor's Degrees

- Global Studies, Peace, Conflict, and Identity Concentration, B.A. was renamed to Global Studies, Peace and Conflict Concentration, B.A.
- Marketing, Marketing Analytics Concentration, B.S.B.A. was renamed to Marketing, Digital/AI Marketing Concentration, B.S.B.A.
- Music, B.A. was renamed to Music, Applied Music Concentration, B.A.

Minors

- Diverse Literatures and Cultural Studies, Minor was renamed to Comparative Literature and Cultural Studies, Minor
- International Studies, Minor was renamed to Global Studies, Minor

Certificates

- The Leadership, Innovation, Technology and Diversity, Undergraduate Certificate was renamed to Innovative Thinking and Problem Solving, Undergraduate Certificate

Discontinued Programs

Discontinued undergraduate degrees and programs include:

- Architecture, B.A. (non-concentration option)
- Art, Cross-Disciplinary Concentration, B.F.A.
- Global Studies, Asian Studies Concentration, B.A.

- Global Studies, European Studies Concentration, B.A.
- Minor, Russian
- Spanish, Applied Language Concentration, B.A.
- Spanish, Literature and Culture Concentration, B.A.

Additional Changes

- All Languages and Culture Studies Certificates have been renamed to "LANG" and the concentration area (e.g., LANG: Business French, Undergraduate Certificate).
- General Education Revision: Foundations of American Democracy course requirement
- New Course Prefix: Electrical Engineering Technology (ETEL) was changed to Electromechanical Engineering Technology (ETEM).
- New Course Prefix: Languages and Culture Studies (LACS) was changed to Languages, Cultures and Translation (LANG).

Student Responsibility

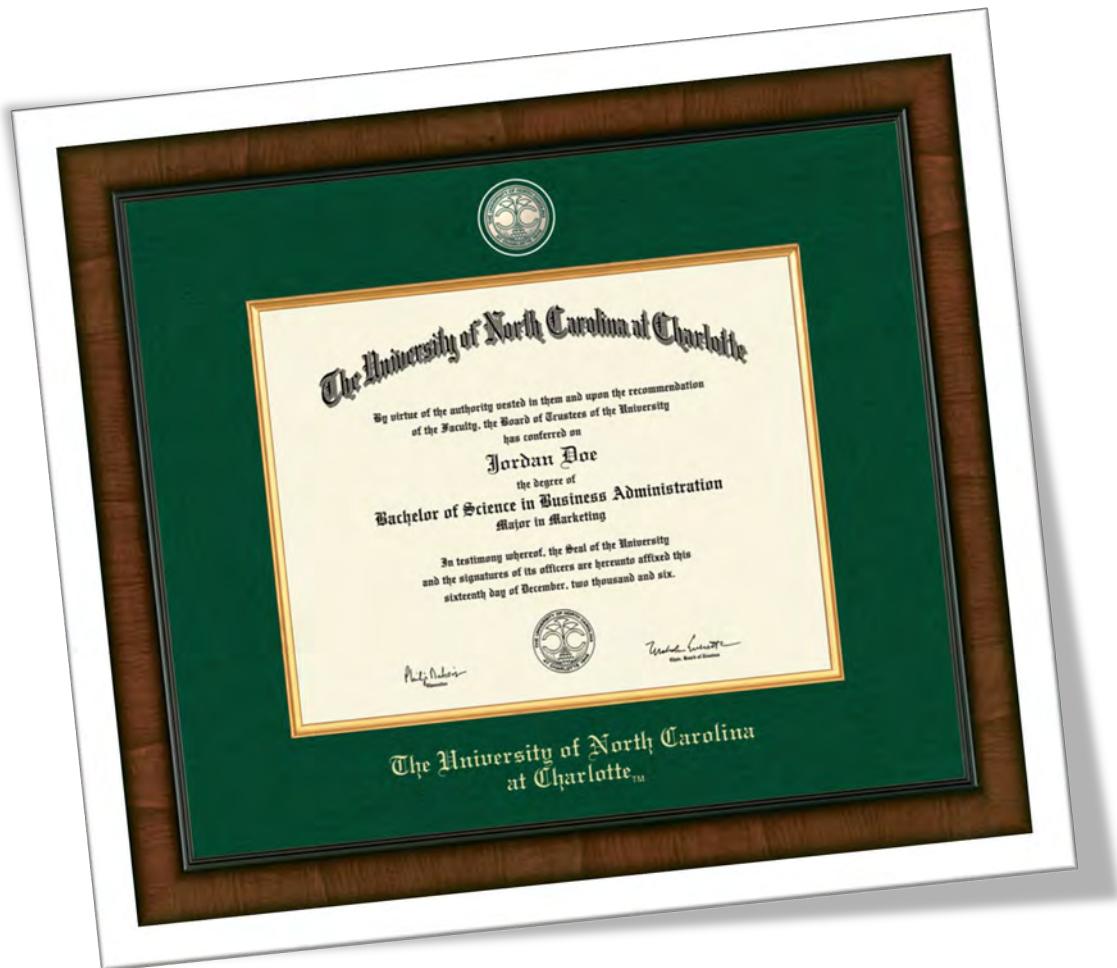

Each student is responsible for the proper completion of their academic program, for familiarity with the *Catalog*, for maintaining the grade point average required, and for meeting all other degree requirements. Students assume academic and financial responsibility for the courses in which they enroll and are relieved of these responsibilities only by formally terminating enrollment. The advisor will counsel, but the final responsibility remains that of the student.

A student is required to have knowledge of and observe all policies and regulations pertaining to campus life and student behavior. Students are encouraged to familiarize themselves with academic terminology located in the Glossary section of this *Catalog*.

Email is the official form of communication at the University; each student is responsible for checking their charlotte.edu email regularly, as well as maintaining communication with the University and keeping a current address and telephone number on file with the Office of the Registrar.

While associated with the University, each student is expected to participate in campus and community life in a manner that will reflect favorably upon the student and the University. The University has enacted two codes of student responsibility --**The UNC Charlotte Code of Student Academic Integrity** and **The UNC Charlotte Code of Student Responsibility** -- which are summarized in this *Catalog* and available in full, online at legal.charlotte.edu/policies/chapter-400. As students willingly accept the benefits of membership in the UNC Charlotte academic community, they acquire obligations to observe and uphold the principles and standards that define the terms of UNC Charlotte community cooperation and make those benefits possible. This includes completion of institutional surveys as requested by the University for program assessment and improvement.

Accreditations

assessment.charlotte.edu/accreditations/accreditation

Accreditation is important for the University to be able to receive and distribute state and federal funds. Also, accreditation is important for the acceptance and transfer of college credits. The Assistant Provost for Institutional Effectiveness and Analytics serves as the accreditation liaison for the University and is responsible for assuring that compliance with accreditation requirements is incorporated into planning and evaluation processes of the institution.

Institutional accrediting bodies, such as the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC), conduct comprehensive reviews of institutions of higher education. This review ensures that "the institution (1) has a mission appropriate to higher education, (2) has resources, programs, and services sufficient to accomplish and sustain that mission, and (3) maintains clearly specified educational objectives that are consistent with its mission and appropriate to the degrees it offers and that indicate whether it is successful in achieving its stated objectives" (Principles of Accreditation: Foundations for Quality Enhancement). The accreditation granted encompasses the entire institution, including all degree programs, instructional sites, and online programs.

UNC Charlotte

UNC Charlotte is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award baccalaureate, master's, and doctoral degrees. UNC Charlotte also may offer credentials such as certificates and diplomas at approved degree levels. Questions about the accreditation of UNC Charlotte may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097, by calling (404) 679-4500, or by using information available on SACSCOC's website (www.sacscoc.org).

The University of North Carolina at Charlotte was reaffirmed by SACSCOC for the next ten years. The decision was made at the December 2023 Annual Meeting of the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC).

College of Arts + Architecture

The Bachelor of Architecture and Master of Architecture are accredited professional degree programs as recognized by the National Architectural Accrediting Board (NAAB).

The Bachelor of Arts in Art, Bachelor of Fine Arts in Art, Bachelor of Fine Arts in Graphic Design, and Bachelor of Arts in Art History are accredited degree programs as recognized by the National Association of Schools of Art and Design (NASAD).

The Bachelor of Arts in Music and Bachelor of Music are accredited degree programs as recognized by the National Association of Schools of Music (NASM).

The University of North Carolina at Charlotte is an accredited institutional member of the National Association of Schools of Dance (NASD).

All arts education programs leading to K-12 licensure (art, dance, music, and theatre education) are accredited by their national accrediting body (the National Association of Schools of Art and Design, National Association of Schools of Dance, National Association of Schools of Music, and National Association of Schools of Theatre) and approved as Educator Preparation Programs by the North Carolina Department of Public Instruction (NCDPI).

College of Business

The programs in business and accounting are accredited by AACSB International, the Association to Advance Collegiate Schools of Business. AACSB International is the premier accrediting agency for bachelor's, master's, and doctoral degree programs in business administration and accounting.

College of Education

The College's professional education programs for PK-12 teachers, counselors, and administrators are approved by the North Carolina Department of Public Instruction (NCDPI) and accredited by the Council for the Accreditation of Educator Preparation (CAEP).

Counseling programs in Counselor Education are accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

College of Engineering

The baccalaureate programs in civil, computer, electrical, mechanical, and systems engineering are accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

The civil, electrical, and mechanical engineering technology baccalaureate programs are accredited by the Engineering Technology Accreditation Commission of ABET, www.abet.org.

The construction management baccalaureate program is accredited by the Engineering Technology Accreditation Commission and the Applied and Natural Science Commission of ABET, www.abet.org.

College of Health and Human Services

The baccalaureate degree in nursing/master's degree in nursing/Doctor of Nursing Practice and/or post-graduation APRN certificate at the University of North Carolina at Charlotte is accredited by the Commission on Collegiate Nursing Education (www.ccneaccreditation.org).

The undergraduate nursing programs are approved by the North Carolina Board of Nursing.

The Nursing Anesthesia program is accredited by the Council on Accreditation of Nurse Anesthesia Education Programs (COA).

The Exercise Science program is accredited by the Commission on Accreditation of Allied Health Education Programs (www.caahep.org) upon the recommendation of the Commission on Accreditation for the

Exercise Sciences (CoAES).

The Clinical Exercise Physiology concentration of the Master of Science in Kinesiology is accredited by the Commission on Accreditation of Allied Health Education Programs (www.caahep.org) upon the recommendation of the Commission on Accreditation for the Exercise Sciences (CoAES).

The Bachelor of Science in Respiratory Therapy (program #500001) and Master of Science in Respiratory Care (program #520001) at UNC Charlotte have been provisionally accredited by the Commission on Accreditation for Respiratory Care (coarc.com). CoARC accredits respiratory therapy education programs in the United States. To achieve this end, it utilizes an 'outcomes-based' process. Programmatic outcomes are performance indicators that reflect the extent to which the educational goals of the program are achieved and by which program effectiveness is documented (coarc.com/students/programmatic-outcomes-data).

The Master of Health Administration program is accredited by the Commission on Accreditation of Healthcare Management Education (CAHME).

The Public Health programs (BSPH, MPH, Ph.D. in Public Health Sciences, and Ph.D. in Health Services Research) are accredited by the Council on Education for Public Health (CEPH).

Both the Bachelor of Social Work (BSW) and the Master of Social Work (MSW) are accredited by the Council on Social Work Education (CSWE).

College of Humanities & Earth and Social Sciences

The Public Relations program within the Department of Communication Studies is certified by the Public Relations Society of America (PRSA).

The Clinical Psychology program within the Ph.D. in Health Psychology is accredited by the American Psychological Association (APA).

The Master of Public Administration program is accredited by the National Association of Schools of Public Affairs and Administration (NASPAA).

Klein College of Science

The Department of Chemistry is on the approval list of the American Chemical Society.

Graduate School

The University is a member of the Council of Graduate Schools, the Conference of Southern Graduate Schools, and The North Carolina Conference of Graduate Schools.

About the University

The University of North Carolina System

www.northcarolina.edu

In North Carolina, all of the public educational institutions that grant baccalaureate degrees are part of The University of North Carolina System. The oldest public university system in the nation, UNC traces its roots to the state's 1776 constitution, which held that "All useful Learning shall be duly encouraged and promoted in one or more Universities." Today, nearly 225,000 students are enrolled on 16 university campuses across the state and at the NC School of Science and Mathematics, the country's first public, residential high school for gifted students.

History

Chartered by the North Carolina General Assembly in 1789, the University of North Carolina was the first public university in the United States to open its doors and the only one to graduate students in the eighteenth century. The first class was admitted in Chapel Hill in 1795. For the next 136 years, the only campus of the University of North Carolina was at Chapel Hill.

Additional institutions of higher education, diverse in origin and purpose, began to win sponsorship from the General Assembly beginning as early as 1877. Five were historically black institutions, and another was founded to educate Native Americans. Some began as high schools. Several were created to prepare teachers for the public schools. Others had a technological emphasis. One is a training school for performing artists.

The 1931 session of the General Assembly redefined the University of North Carolina to include three state-supported institutions: (1) the campus at Chapel Hill (now the University of North Carolina at Chapel Hill), (2) North Carolina State College (now North Carolina State University at Raleigh), and (3) Woman's College (now the University of North Carolina at Greensboro). The new multi-campus University operated with one board of trustees and one president. By 1969, three additional campuses had joined the University through legislative action: (4) the University of North Carolina at Charlotte, (5) the University of North Carolina at Asheville, and (6) the University of North Carolina at Wilmington.

In 1971, legislation was passed bringing into the University of North Carolina the state's ten remaining public senior institutions, each of which had until then been legally separate: (7) Appalachian State University, (8) East Carolina University, (9) Elizabeth City State University, (10) Fayetteville State University, (11) North Carolina Agricultural and Technical State University, (12) North Carolina Central University, (13) the North Carolina School of the Arts (now the University of North Carolina School of the Arts), (14) Pembroke State University (now the University of North Carolina at Pembroke), (15) Western Carolina University, and (16) Winston-Salem State University.

In 1985, the NC School of Science and Mathematics was declared an affiliated school of the University; in July 2007, NCSM by legislative action became a constituent institution of the University of North Carolina.

Board of Governors

The UNC Board of Governors is the policy-making body charged with "the general determination, control, supervision, management, and governance" of the University of North Carolina. Its 28 voting members are elected by the NC General Assembly for four-year terms. Former board chairs may continue to serve for limited periods as non-voting members emeriti. The president of the UNC Association of Student Governments or that student's designee is also a non-voting member.

President and UNC System Office

The chief executive officer of the University of North Carolina System is the President. The President is elected by and reports to the Board of Governors. The President's office is the operations level between the constituent institutions and the Board of Governors. The President has complete authority to manage the affairs and execute the policies of the University of North Carolina and its constituent institutions, subject to the direction and control of the Board of Governors.

Chancellors

Each of the UNC campuses is headed by a Chancellor who is chosen by the Board of Governors on the President's nomination and is responsible to the President.

Board of Trustees

Each UNC campus has a local Board of Trustees that holds extensive powers over academic and other operations of its campus on delegation from the Board of Governors.

Shared Governance

The UNC System operates under an arrangement of shared governance that leverages the collective strengths of its campus chancellors and administrators, local boards of trustees, and the UNC President and Board of Governors. The UNC System also honors the important traditional role of the faculty in the governance of the academy.

History of the University of North Carolina at Charlotte

www.charlotte.edu

UNC Charlotte is one of a generation of universities founded in metropolitan areas of the United States immediately after World War II in response to rising education demands generated by the war and its technology.

To serve returning veterans, North Carolina opened 14 evening college centers in communities across the state. The Charlotte Center opened Sept. 23, 1946, offering evening classes to 278 freshmen and sophomore students in the facilities of Charlotte's Central High School. After three years, the state closed the centers, declaring that on-campus facilities were sufficient to meet the needs of returning veterans and recent high school graduates.

Charlotte's education and business leaders, long aware of the area's unmet needs for higher education, moved to have the Charlotte Center taken over by the city school district and operated as Charlotte College, offering the first two years of college courses. Later the same leaders asked Charlotte voters to approve a two-cent tax to support that college.

Charlotte College drew students from the city, Mecklenburg County and from a dozen surrounding counties. The two-cent tax was later extended to all of Mecklenburg County. Ultimately financial support for the college became a responsibility of the State of North Carolina.

As soon as Charlotte College was firmly established, efforts were launched to give it a campus of its own. With the backing of Charlotte

business leaders and legislators from Mecklenburg and surrounding counties, land was acquired on the northern fringe of the city and bonds were passed to finance new facilities. In 1961, Charlotte College moved its growing student body into two new buildings on what was to become a 1,000-acre campus 10 miles from downtown Charlotte.

Three years later, the North Carolina legislature approved bills making Charlotte College a four-year, state-supported college. The next year, 1965, the legislature approved bills creating the University of North Carolina at Charlotte, the fourth campus of the statewide university system. In 1969, the University began offering programs leading to master's degrees. In 1992, it was authorized to offer programs leading to doctoral degrees.

Today, with an enrollment ranking it third among the 17 schools in the UNC system, it is the largest public university in the greater Charlotte metropolitan region. A doctoral institution, UNC Charlotte serves the region through applied research, knowledge transfer, and engaged community service.

Nearly 1,100 full-time teaching faculty comprise the University's academic departments, and the Fall 2024 enrollment was over 31,000 students, including over 6,200 graduate students.

Mission, Vision, and Values of UNC Charlotte

chancellor.charlotte.edu/institutional-planning/mission-statement

University Mission Statement

UNC Charlotte is a leading urban research university with a significant local-to-global impact. We transform lives, communities, and industries through accessible and affordable education, offering exemplary bachelor's, master's, doctoral, and professional programs. Our commitment to scholarship, innovation, and service drives our contributions to the ever-evolving needs of society. Through strategic partnerships and a focus on real-world applications, we prepare our graduates to excel in their careers and lead with purpose and integrity in a rapidly changing world. See the Mission Statement at <https://chancellor.charlotte.edu/about-unc-charlotte/mission-statement/>.

University Vision and Values

In fulfilling our mission, we envision a University that promises:

- An accessible and affordable quality education that equips students with intellectual and professional skills, ethical principles, and an international perspective.
- A strong foundation in liberal arts and opportunities for experiential education to enhance students' personal and professional growth.
- A robust intellectual environment that values social and cultural diversity, free expression, collegiality, integrity, and mutual respect.

- A safe, diverse, team-oriented, ethically responsible, and respectful workplace environment that develops the professional capacities of our faculty and staff.

To achieve a leadership position in higher education, we will:

- Rigorously assess our progress toward our institutional, academic, and administrative plans using benchmarks appropriate to the goals articulated by our programs and in our plans.
- Serve as faithful stewards of the public and private resources entrusted to us and provide effective and efficient administrative services that exceed the expectations of our diverse constituencies.
- Create meaningful collaborations among university, business, and community leaders to address issues and opportunities of the region.
- Develop an infrastructure that makes learning accessible to those on campus and in our community and supports the scholarly activities of the faculty.
- Pursue opportunities to enhance personal wellness through artistic, athletic, or recreational activities.
- Operate an attractive, environmentally responsible and sustainable campus integrated with the retail and residential neighborhoods that surround us.

Approved by the Board of Governors on April 11, 2014.

Graduation Rate Disclosure Statement

Our data shows that 67.6% of the full-time new freshmen who entered UNC Charlotte in Fall 2017 have received a baccalaureate from UNC Charlotte as of Fall 2023. In addition, another 1.5% were enrolled at UNC Charlotte in pursuit of their baccalaureate degree as of Fall 2023. This information is provided pursuant to requirements of the Student Right-to-Know and Campus Security Act of 1990.

Nondiscrimination

The University of North Carolina at Charlotte is committed to providing a respectful, safe, and inclusive environment for all University community members and guests of the University. The University affirms that its educational and employment decisions must be based on the abilities and qualifications of individuals and may not be based on irrelevant factors, including personal characteristics, that have no connection with academic abilities or job performance. Therefore, the University prohibits discrimination and discriminatory harassment in its educational and employment decisions and provides equal opportunities for all members of the University community and for all those seeking to join the University community.

The following factors may not form the basis for educational or employment-related decisions: race; color; religion, including belief and

non-belief; sex; sexual orientation; gender identity; age; national origin; physical or mental disability; veteran status; and genetic information. See University Policy 501, Nondiscrimination, at legal.charlotte.edu/policies/up-501.

Anyone may report alleged violations of University Policy 501 to the University's Office of Civil Rights and Title IX. All University employees are expected to report alleged violations of this Policy to the University's Office of Civil Rights and Title IX and may be subject to disciplinary action, up to and including dismissal, for failing to report.

For complaints of Title IX Sexual Harassment (as that term is defined by University Policy 504, Title IX Grievance Policy) against a student, faculty member, or staff member, see University Policy 504, Title IX Grievance Policy.

The University's Office of Civil Rights and Title IX will contact the individual who reportedly experienced a violation of this Policy and discuss with the individual available accommodations, resources, and resolution options. The University's Office of Civil Rights and Title IX will assist the individual in utilizing the applicable University process for that individual's report, as set forth on the Office of Civil Rights and Title IX website.

The University strictly prohibits retaliation against individuals for reporting alleged violations of federal law or for cooperating in the University's investigation of alleged violations of federal law. Retaliation includes threatening, intimidating, or coercive behaviors and other adverse actions that would deter a reasonable person in the same or similar circumstances from reporting alleged violations of federal law or cooperating in the University's investigation of any such report, even if the behaviors do not ultimately have that effect.

If you have discrimination concerns, please see the UNC Charlotte Notice of Nondiscrimination for the contact information of individuals who may assist you. This notice and the University's grievance procedures for making a complaint of discrimination may be found online at the Office of Civil Rights and Title IX: <https://civilrights.charlotte.edu/resources-university-policies/notice-nondiscrimination>.

University Structure

UNC Charlotte is organized into five administrative divisions: Academic Affairs, Business Affairs, Institutional Integrity, Student Affairs, and University Advancement. These divisions, as well as Athletics, OneLT, and Research all report to the Chancellor.

Academic Affairs

The Division of Academic Affairs provides administrative oversight and academic leadership. It includes Academic Budget & Personnel; Center for ADVANCing Faculty Success; Enrollment Management; the Graduate School; the Honors College; Institutional Effectiveness and Analytics; International Programs; the Library; Office of Undergraduate Education; School of Professional Studies; urbanCORE; the Honors College, and the

eight discipline-based academic colleges: the Colleges of Arts + Architecture, Business, Computing and Informatics, Education, Engineering, Health and Human Services, Humanities & Earth and Social Sciences, and Science.

Business Affairs

Business Affairs plans for and provides essential human, financial, facility, and administrative support services to the University that are customer-focused, results-oriented, fiscally sound, and integrity-bound. The Division of Business Affairs includes Business Services; Facilities Management; Financial Services; Human Resources; Safety and Security; and Budget.

Institutional Integrity

The Division of Institutional Integrity supports UNC Charlotte in its endeavors to achieve its academic mission and strategic plan while adhering to the University's ethical, legal, and regulatory responsibilities. The Division of Institutional Integrity consists of the Office of Legal Affairs, the Office of Ethics, Policy, and Compliance, the Office of Civil Rights and Title IX, the Internal Audit Department, and the Enterprise Risk Management Department.

Student Affairs

The Division of Student Affairs advances the educational mission of the University by creating welcoming, student-centered learning environments where students excel academically and develop personally into their best selves. The Division of Student Affairs consists of Counseling and Psychological Services (CAPS); Center for Integrated Care; Center for Wellness Promotion; Cone University Center; Dean of Students Office; Housing and Residence Life; Leadership & Community Engagement; Niner Finances; Office of Fraternity and Sorority Life; Popp Martin Student Union; Student Accountability & Conflict Resolution; Student Affairs Marketing & Communications; Student Affairs Research & Assessment; Student Assistance and Support Services; Student Health; Student Involvement; Student Niner Media; Advising and Support; Transition & Success Initiatives; UNC Charlotte Student Legal Services, Inc.; University Recreation; Venture Outdoor Leadership; and Veteran Services.

University Advancement

The Division of University Advancement supports the mission of the University by cultivating alumni, community, and government support and affinity, by raising funds for scholarships and major initiatives, by providing and coordinating community engagement opportunities, and by providing broad based communications leadership that articulates the mission of the University to the region, state and nation. The Division includes Advancement Operations, Alumni Engagement, Development, University Communications, and University Events & Special Programs.

Campuses

Main Campus

The University of North Carolina at Charlotte is the largest institution of higher education in the

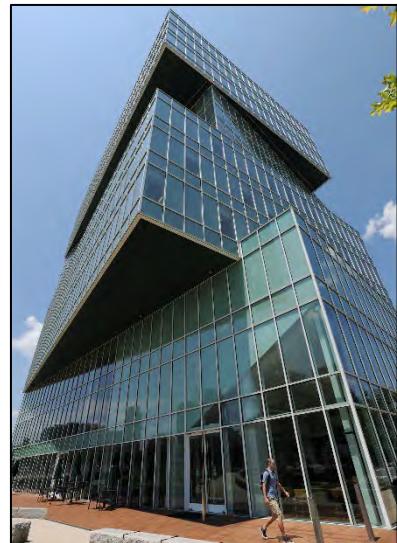

Charlotte region and is a genuine urban university. The main campus is in University City, one of the fastest growing areas of the Charlotte region, located off WT Harris Boulevard on NC 49 near its intersection with US 29, and only eight miles from the interchange of Interstates 85 and 77. Campus facilities are comprised of contemporary buildings, including many constructed in the past ten years and more on the way. In addition to classrooms and well-equipped laboratories, the University offers arts and athletic facilities, dining facilities, and residence accommodations. The campus is designed for the pedestrian, and facilities are generally accessible to students with disabilities.

Dubois Center at UNC Charlotte Center City

The Dubois Center at UNC Charlotte Center City functions as a gateway between the city of Charlotte and the University and as such embodies UNC Charlotte's urban identity in the heart of the greater Charlotte region.

Home to the School of Professional Studies, the building bustles with working professionals and adult learners who are able to conveniently access continuing education programs ranging from 1-day workshops, to short-format certificates and boot camps, to degrees.

In addition to professional programming, The Dubois Center facilitates academic programs having an urban awareness and context, while providing vital learning opportunities for employees and residents of the urban center.

Architecturally, it reflects its mission as a premier institution of higher education; its context in this vibrant, rapidly urbanizing area; and its commitment to environmental sustainability.

Operationally, it incorporates the attributes we wish to instill in the entire University: excellence in programming, responsiveness to stakeholders, entrepreneurship, interdisciplinary productivity, inclusivity, flexibility, and efficiency.

Academic Buildings

Albert & Freeman EPIC

The Energy Production and Infrastructure Center (EPIC) at UNC Charlotte was formed in response to the need from industry to supply highly trained engineers qualified to meet the demands of the energy industry – through traditional and continuing education, and provide

sustainable support the Carolina energy industry by increasing capacity and support for applied research. EPIC is a highly collaborative industry/education partnership that produces a technical workforce, advancements in technology for the global energy industry while supporting the Carolinas' multi-state economic and energy security. It was dedicated on November 16, 2012.

In October 2020, the EPIC building was named the Albert & Freeman Energy Production and Infrastructure Center to recognize and honor alumni Craig and Darla Albert. The generosity of the Alberts, especially throughout Exponential: The Campaign for UNC Charlotte, established both the Albert Engineering Leadership Scholars program and the Freeman Scholarship, both housed in the University's Honors College.

The Albert Engineering Leadership Scholars Program, administered by the Honors College, invests in superior students who have demonstrated excellence in the areas of academic achievement, leadership and community engagement. Albert Scholars serve as the next generation of leaders who will make dynamic contributions to the field of engineering. The program offers students a full, four-year scholarship, along with academic support and the professional guidance necessary to achieve their educational and professional goals.

The Freeman Scholarship, also administered by the Honors College, provides renewable scholarship support to students pursuing any major who are eligible for one of the University's honors programs. The Freeman Scholarship is open to incoming first-year students eligible for a Federal Pell Grant or other federal grant aid programs. The scholarship places a strong emphasis on commitment to academics.

Craig Albert earned a bachelor's degree in mechanical engineering from the Lee College of Engineering in 1985 and currently serves as president and chief operating officer of Bechtel Group Inc., the largest engineering and construction firm in the United States. He is responsible for the management and oversight of the firm's global operations and serves on the company's board of directors. Darla Albert earned a bachelor's degree in business administration from UNC Charlotte's Belk College of Business in 1983.

EPIC is home to the Department of Civil and Environmental Engineering and Department of Electrical and Computer Engineering.

Atkins Library

The J. Murrey Atkins Library, the third building to be constructed on the UNC Charlotte campus, is named for J. Murrey Atkins, the son of a prominent Gastonia family, successful Charlotte businessman and one of the University's founding members.

Atkins, born in Russellville, Kentucky, graduated from Gastonia High School. At Duke University, he served as editor of the yearbook and earned a bachelor's degree in 1927. He attended Harvard Law School and Columbia University and spent five years in New York with the Irving Trust Co. before returning to Charlotte. In 1935, he joined the city's leading investment firm R.S. Dickson and Co., where he was president from 1954 until his death.

Atkins was involved with Charlotte College from its inception. He was chair of the college advisory committee for eight years and chair of the Charlotte Community College System when it was authorized in 1958. When UNC Charlotte became a four-year college, he served as chair of the Board of Trustees.

Sensitive to the social and educational needs of the community, Atkins believed that the Charlotte region needed a public institution of higher learning to stay competitive with other cities in the state. He used his business, financial and political contacts to help Charlotte College become that institution. "Charlotte College was started to meet an emergency and has continued as a necessity," Atkins was fond of saying.

Charlotte College shared a library facility with Central High School. Mozelle Scherger was hired as the first full-time librarian in 1957, when a daytime instructional program was launched. When the college was formally accredited that fall, the number of volumes in the library exceeded 6,000.

Atkins believed the library should be central on the campus, central in student service and the very focal point of learning. When the library was first moved to the new campus, it was temporarily housed in the W. A. Kennedy Building.

The pioneering leader would not live to see the current library adorned with his name. He died Dec. 2, 1963, and the J. Murrey Atkins Library was dedicated on April 19, 1965. The state legislature appropriated \$20.5 million for an expansion in 1995. It was re-dedicated in 2001.

Dalton Library Tower

The Harry L. Dalton Library Tower was completed and dedicated in 1971, and re-dedicated in 2001. It is named in honor of Harry Lee Dalton, distinguished Charlotte business leader and patron of the arts, whose gifts stimulated the development of the Library's Special Collections.

Barnard

The Barnard Building was completed in 1969. It is named in honor of Bascom Weaver Barnard, a founder and first chairman of The Charlotte College Foundation, and first executive director of The Foundation of the University of North Carolina at Charlotte.

Bascom "Barney" Weaver Barnard established the Charlotte College Foundation and served as its first chair. His name features prominently in the early years of UNC Charlotte, and it adorns an 18,000 square-foot building completed in 1969, designed to serve as a facility for instruction and research.

Born Feb. 14, 1894, Barnard was a native of Asheville. He graduated from Trinity College (now Duke University) and completed a master's degree from Princeton University in 1917. He returned to his alma mater, where he taught economics and served as alumni secretary and graduate manager of athletics until 1922. He eventually left academia for the private sector.

Starting in 1939, Barnard worked as an executive for American Commercial Bank (later NCNB, now Bank of America), American Discount Company and the American Credit Corporation while maintaining a busy roster of civic activities. He served on the board for Family and Children Service, the Salvation Army and as chair of the National Affairs Committee of the Charlotte Chamber of Commerce. In

1966, he received one of Charlotte's highest civic honors - the Civitan Distinguished Citizenship Award.

In that same year, Barnard founded Charlotte College Foundation, which by 1971 had raised \$4.5 million for the fledgling University; since then, the foundation has since raised significantly more to support scholarship and academic programming at UNC Charlotte. He served as the foundation's secretary and executive director and established the University's Patrons of Excellence Program, which solicited gifts of \$10,000 or more from individuals, foundations and corporations.

On May 30, 1971, the UNC Charlotte Academic Council presented Barnard with a resolution stating "Scholarships, professorships, research grants, additions to the library collection, faculty recruitment – all these and more have flourished at his hand. In short, he has helped to provide the margin that leads to excellence." Barnard died Sept. 27, 1980.

The Barnard building is one of the five buildings that make up the original quad of UNC Charlotte. Today, Barnard is home to the Department of Anthropology, Adult Students and Extended Services, and Veteran Student Services.

Bioinformatics

The Bioinformatics Research Center opened in 2009 as a teaching and research building located on West Campus. It is a multifunctional facility which fosters an interdisciplinary academic and entrepreneurial program. The center also supports the nearby "Biopolis" (the North Carolina Research Center) through biotechnology efforts in plant genomics, health, and gene-related research.

The Bioinformatics Building is home to the Department of Bioinformatics and Genomics.

Burson

Sherman Burson Jr. was the first Charles Stone Professor of Chemistry and the inaugural dean of the-then College of Arts and Sciences.

A native of Pittsburgh, Pa., Burson was born Christmas Eve 1923. His father, a Methodist minister, moved the family to Massachusetts, where Burson graduated from Harwich High School. Uncertain of his career goals, Burson considered becoming a surgeon, psychologist or medical researcher.

With little money for college, Burson took the advice of his high school principal and moved South where college costs were lower. He spent the 1941-42 academic year at the University of Alabama. When money ran out, he returned to Pennsylvania, where he worked in a steel mill during the day and attended the University of Pittsburgh at night. World War II was under way, and Burson entered the U.S. Army. A special program enabled him to continue studies at Louisiana State University; following the war, he returned to the University of Pittsburgh, where he completed a bachelor's degree in chemistry. He earned a doctorate in 1953.

In 1957, after nearly five years in private industry, Burson decided to pursue a career in academia. He joined the faculty of Pfeiffer College in Misenheimer. At the urging of Bonnie Cone, Burson accepted a position at Charlotte College in 1963. He was a professor of chemistry and chair of the department when Charlotte College became the fourth campus of the University of North Carolina in 1965. It was under Burson that the department achieved accreditation from the American Chemical Society.

UNC Charlotte's first chancellor, Dean Colvard, appointed Burson acting dean of the College of Science and Mathematics in 1973, and in 1980, Chancellor E.K. Fretwell named him dean of the newly formed College of Arts and Sciences (now the College of Humanities & Earth and Social Sciences), formed by the merger of the College of Science and Mathematics with the College of Humanities and the College of Social and Behavioral Sciences. He held this post until retiring in June 1985.

Completed in summer 1985, the Sherman L. Burson Building was

originally dedicated as the Physical Sciences Building. The 104,000-square-foot facility includes a 184-seat tiered lecture hall, a number of smaller lecture halls and laboratory space. Designed by Peterson Associates of Charlotte, the building was constructed by Butler and Sidbury Inc. for a little more than \$8 million. At the time of its rededication in April 1999, the building was noted for its planetarium platform mounted on vibration-resistant pedestals, an underground Van de Graaf linear accelerator and reinforced concrete radiation labs.

The building's design won a national architectural award and was included in the American School and Universities Architectural Portfolio for 1986.

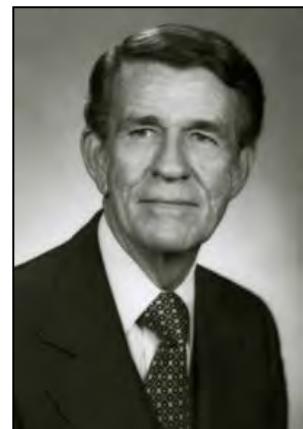

Today, Burson is home to the Department of Chemistry, College of Computing & Informatics, and Physics and Optical Science.

Beginning in late 2025, the Burson building is scheduled to undergo a comprehensive 104,000 square-foot renovation and 45,000-square foot expansion. Upon completion in 2027, Burson will become home to the College of Engineering, the College of Computing and Informatics, and the School of Data Science. The renovated Burson will feature a Super Fab Lab, new research space for each of the colleges, and additional active learning style classrooms. A key focus of the renovation is improved student space to foster collaboration, consolidate advising resources, and create an identifiable home for undergraduate students in these colleges.

Cameron

The C.C. Cameron Applied Research Center recognizes an individual whose civic and business leadership contributed to the development of UNC Charlotte and the entire UNC system.

Clifford Charles Cameron was born in Meridian, Miss. He later attended Louisiana State University, where he completed a bachelor's degree in chemical engineering in 1941. Following service in World War II, he worked as an engineer for Standard Oil Co. At the urging of a war buddy, Cameron changed careers and became a mortgage banker in 1949. He entered this relatively new field with the creation of Cameron Mortgage Co. in Raleigh. The company merged with Brown-Hamel Mortgage Co. of Greensboro

in 1955 and acquired the Carolina Realty Co. of Charlotte. This was the beginning of the Cameron-Brown Co. that would later combine with First Union.

Following that merger, Cameron moved to Charlotte, where he became chief executive officer of First Union in 1968. His affiliation with UNC Charlotte dates to 1967, when Cameron became a member of the board of directors of the UNC Charlotte Foundation. In the early 1980s, Cameron co-chaired UNC Charlotte's first capital campaign and played a leadership role in the University's Silver Anniversary Campaign. He also served on the UNC Charlotte Board of Trustees and the UNC Board of Governors.

Through his involvement with the UNC Charlotte Foundation, Cameron is credited with helping to create University Place and the subsequent economic development that resulted. He also played a part in the development of the Ben Craig Center.

Chancellor emeritus E.K. Fretwell noted in a magazine article that "Cliff Cameron personifies corporate responsibility...He is giving of his management expertise, his leadership, his great prestige and his personal attention to assist the University of North Carolina at Charlotte in its quest for excellence."

Before retiring as First Union chair in 1984, Cameron laid the groundwork for its growth as one of the nation's top 20 banks. Committed to public service, Cameron served as an advisor to North Carolina governors for four decades. He was a member of Gov. Luther Hodge's Business Development Corp., Gov. Dan Moore's Council for Economic Development; Gov. Bob Scott's Conservation and Development Board and Gov. Hunt's Advisory Budget Commission and Transportation Study Commission. Under Gov. James Martin, Cameron served as an assistant for budget and management.

One of the University's most prestigious scholarships bears the name of C.C. Cameron in recognition of First Union's and his personal contributions that made the financial assistance possible. In honor of his service to the University and the state, UNC Charlotte awarded Cameron an honorary Doctor of Public Service in 1983.

Completed in 1990 and dedicated on September 25, 1991, the Cameron Applied Research Center contained roughly 74,000 square feet of laboratory, office, and conference space to support world-class

research. At the time, the center was the focal point for the University's outreach mission to the region. It provided businesses, agencies and organizations access to academic and applied research expertise. A multipurpose facility, the center was designed for maximum flexibility to accommodate evolving research projects. It features vibration-free spaces, a 96-seat auditorium and a media center equipped for teleconference and distance learning.

In 2000, the center was renovated and expanded to add roughly 42,000 square feet of space.

Today, the building is known as Cameron Hall and is home to the University Writing Program, Writing Resources Center, and Department of Systems Engineering and Engineering Management.

Cato

Dedicated May 6, 2004, Cato Hall is often the first point of contact for prospective students interested in enrolling at the state's urban research institution. Named for Wayland H. Cato Jr., the building houses the Chancellor's Office, Enrollment Management, Institutional Integrity, Office of Academic Affairs, and the Office of Assessment and Accreditation.

A distinguished business leader and philanthropist, Cato was born in Ridge Spring, S.C., in 1923. His father, Wayland Cato Sr. worked for United Merchants and Manufacturers (UM&M), a New York-based textile conglomerate. The elder Cato moved his family to Augusta, Ga., in 1937, where the younger Cato attended the Academy of Richmond County, a compulsory ROTC military public school. He graduated with honors in 1940.

Cato Jr. enrolled at UNC-Chapel Hill and was elected to Beta Gamma Sigma, a national honorary scholastic commerce fraternity. He also joined the Naval Reserve Officers Training Corps. In 1944, Cato graduated in the top three percent of his class with a bachelor's degree in commerce.

During World War II, he served nearly three years on active duty in the U.S. Navy, stationed aboard minesweepers in the Pacific Theatre.

Following his discharge, Cato joined his father and other family members in Charlotte. The elder Cato had left UM&M to start his own business, which became the Cato Corporation, a chain of women's apparel stores. Cato Jr. became president and chief executive officer of the family business in 1960. He added the title chair of the board of directors in 1970. He retired as chair emeritus in 2004; his son John Cato was named CEO in 1999.

From 1995 to 2002, Cato Jr. was a director of the UNC Charlotte Foundation. Personally and corporately, he endowed a number of scholarship programs at the University. For his leadership in business in the Carolinas and service to the nation, state and community and for his commitment to learning and scholarship, Cato was awarded an honorary Doctor of Humane Letters during commencement in May 2002.

Conceived as the Humanities Office Wing, Cato Hall originally housed Undergraduate Admissions and the Graduate School, along with the Development Office and the departments of Communication Studies and Social Work. The three-story, 32,500-square-foot facility was built for \$5.1 million using bonds approved by state voters in 2000 and other University funds.

Colvard

The Colvard Building opened in 1979, and its steel-frame and curtain-wall construction and many energy saving features were considered progressive for its time. Harry Wolf of Wolf Associates designed the structure, and he won the 1980 South Atlantic Regional AIA Honor Award for his work. Among the energy-saving features Wolf utilized were vermiculite insulate roofing, insulated walls and a heat reclaimer. Also, the center arcade was designed for the horizontal and vertical movement of students in a space that did not need to be heated or cooled.

While many of Wolf's design techniques are common today, 30 years ago they were considered forward-thinking. It is appropriate such a building honors Dean Wallace Colvard, UNC Charlotte's first permanent chancellor, a man considered ahead of his time in many respects.

Born in 1913, Colvard was raised in the mountains of western North Carolina in Ashe County. President and salutatorian of his high school class, Colvard was the first member of his family to attend an institution of higher learning. He started at Berea College in 1931, where he earned a scholarship. He also met Martha Lampkin; they would wed in the

college's Danforth Chapel in 1939.

After completing his undergraduate degree, Colvard earned a master's degree in endocrinology from the University of Missouri and a doctorate in agricultural economics from Purdue University. He also served as superintendent of North Carolina Agricultural Research Stations from 1938-46. In 1948, Colvard was hired to run North Carolina State University's animal science program. Five years later, he became the dean of agriculture, a post he held until 1960, when he became president of Mississippi State University (MSU), where he unintentionally became part of college sports history. MSU had won three straight Southeastern Conference championships, but the institution declined to participate in the NCAA tournament rather than integrate, even briefly, on the basketball court. In 1963, Colvard defied a court injunction and allowed the MSU basketball team to compete in the tournament against a team with African-American players.

Colvard returned to his native state in 1966 after being named chancellor of UNC Charlotte. He embraced the challenge of turning a pioneering junior college into a university that had become the fourth member of the consolidated UNC system. As chancellor, he secured regional and national accreditation for University programs, helped create the University Research Park, added graduate programs, expanded the campus and oversaw the growth of the student body from 1,700 to 8,705 students.

He retired Dec. 31, 1978, but Colvard did not leave education behind. He helped build two other institutions: the School of Science and Mathematics at Durham and the hands-on museum Discovery Place. He died June 28, 2007.

Today, Colvard is home to the Departments of Communication Studies, Criminal Justice and Criminology, and Psychological Science; Organizational Science, School of Data Science, Office of Undergraduate Education, University Advising Center, University College, School of Professional Studies, and the University Center for Academic Excellence.

Cone University Center

Since first opening its doors in 1962, the Cone University Center has been a gathering place for students, faculty, staff, administrators, alumni and guests. As such, it is fitting that the facility bears the name

of Bonnie Ethel Cone, the beloved mathematics teacher and visionary administrator who, perhaps more than anyone else, is credited as UNC Charlotte's founder.

Born June 22, 1907, in Lodge, S.C., "Miss Bonnie," as she was affectionately called, taught high school in South Carolina for 12 years before moving to Charlotte's Central High School in 1940. During World War II, she taught math to men enrolled in the navy's V12 program at Duke University, and she spent a year working as a statistical analyst for the Naval Ordnance Laboratory in Washington, D.C.

Cone's background made her the perfect person to head one of the new extension centers established in the late 1940s to serve returning war veterans. Cone directed the Charlotte Center and signed on as a part-time instructor in engineering and math.

Always a firm believer that Charlotte needed a public university, Cone was determined to see one built in the Queen City. She helped turn the temporary veteran's center into a permanent two-year college. In 1963, she played a key role in convincing the North Carolina General Assembly to make Charlotte College a part of the University of North Carolina system. On July 1, 1965, Bonnie Cone stood beside Gov. Dan Moore to ring the bell announcing the official creation of the University of North Carolina at Charlotte.

"Miss Cone has provided the faith on which the college many times found its primary ability to exist," said J. Murrey Atkins in a tribute. "She has stuck with it and never even thought of giving up when sometimes the sledding seemed pretty hard."

Cone served as acting chancellor for nine months and remained committed and loyal to UNC Charlotte. She served as vice chancellor for student affairs and community relations until she retired in 1973. On June 29, as part of her retirement service, the UNC Charlotte Board of Trustees named the University Center in her honor. In retirement, Cone continued to raise money and support the University until her death in 2003.

Today, Cone is home to Niner Central, University Scholarship Office, Office of Fraternity and Sorority Life, Cone Center Conferences, College of Computing & Informatics, and Main Street Market.

Denny

In 1965, a new campus facility designed by Odell Associates was completed at a cost of \$569,000. Five years later, the building was dedicated in honor of Mary Rebecca Denny, chair of the UNC Charlotte English Department for 14 years.

Denny was born on Aug. 12, 1896, on the family farm near the small town of Red Springs, N.C. She attended Salem College and taught English in several public schools in eastern North Carolina after completing her bachelor's degree in 1917. She went on to earn a master's degree from Duke University and become associate professor of English at Queens College. She left Queens in 1946 to become the first full-time faculty member at the Charlotte Center of the University of North Carolina (now UNC Charlotte).

Although the Charlotte Center was created to serve in an emergency situation, Denny believed that it would eventually provide more than a temporary opportunity for its students. She was right as the Charlotte Center became Charlotte College, one of the first two-year community colleges in North Carolina, in 1949.

During the next 15 years, Denny completed an impressive list of initiatives, including the creation of the college newspaper, the literary magazine and the college catalog. When Charlotte College became a four-year institution, Denny relinquished her role as department head, but she remained active with the Curriculum Committee. She retired in 1964, with the distinction of being the institution's first professor emeritus.

At the October 9, 1970, dedication ceremony naming what was then the largest classroom building in her honor, UNC Charlotte trustees enthusiastically paid tribute - "We transform glass, steel and stone into a monument to your spirit - forthright, steadfast, energetic and

humanitarian. May this building forever serve as a reminder of your commitment to the ideals of sound scholarship, integrity and excellence."

Following her retirement, Denny returned to her family home in Red Springs, where she resided until her death in 1979.

The Denny building is one of the five buildings that make up the original quad of UNC Charlotte.

Dubois

With the retirement of UNC Charlotte's fourth chancellor in 2020, the University's Center City Building was renamed The Dubois Center at UNC Charlotte Center City (The Dubois Center) to recognize Chancellor Philip L. Dubois and First Lady Lisa Lewis Dubois. The building is regarded as a centerpiece to Dubois' 15-year term as chancellor.

Dubois' career in higher education spans more than 40 years. As a first-generation college student, he earned a bachelor's degree in political science in 1972 from the University of California, Davis, and a master's (1974) and doctoral (1978) degree in political science from the University of Wisconsin-Madison. Dubois returned to the University of California, Davis, to start his career in academia as an assistant professor, rising through faculty and administrative ranks to hold various positions, including full professor and associate vice chancellor for academic programs.

In 1991, Dubois was recruited to UNC Charlotte, where he spent five and a half years as provost and vice chancellor for academic affairs. Under his leadership, UNC Charlotte planned and implemented its first doctoral programs. He led the creation of a strategic academic plan, which included creating programs to reach more nontraditional students, recognizing that as an important goal for an institution founded to educate veterans.

In 1997, Dubois left UNC Charlotte to become president of the University of Wyoming, where he led the development and implementation of comprehensive academic, support services and capital construction

plans, expanded the University's role in statewide economic development, and improved student recruitment and retention.

In 2005, Dubois returned to UNC Charlotte and was named chancellor. During his 15-year tenure, he led the University through a 43% growth in enrollment, an expansion of academic programs, the implementation of diversity-related initiatives, growth in research funding and the construction and renovation of campus facilities. He increased the University's visibility in the Charlotte region and beyond, with undergraduate enrollment reaching nearly 30,000 under his leadership, led the largest facility construction and renovation program in UNC Charlotte's history, and under Dubois' strategic direction, football was added to the University's athletics offerings in 2013.

Dubois collaborated with elected officials and the Charlotte Area Transit System to make possible the construction of the light rail line from Center City Charlotte to the UNC Charlotte campus, increasing the connection and opportunities for partnership between the University and the rest of the city. He oversaw the implementation of new academic degree programs – 10 bachelor's, 17 master's, and 12 doctoral – and established or helped in the development of new offices to support students. To reach more non-traditional students, Dubois implemented the award-winning 49er Finish program, which helps students who left the University to complete their degrees, and partnered with Central Piedmont Community College to launch the 49erNext program, which creates a clear path for community college students to enroll at UNC Charlotte. Dubois worked with Charlotte Mecklenburg Schools to create two early colleges at UNC Charlotte, one for students interested in STEM fields and another for those interested in teaching.

The Dubois Center opened in Fall 2011 and is the only University of North Carolina classroom building conceived and designed specifically to serve the business, organizations, and people of an urban center. Its 25 state-of-the-art classrooms and design studios accommodate more than 1,500 students annually who earn bachelor's or master's degrees in business, architecture, urban design, education, public administration or health administration, plus about 2,600 more who participate in certificate and other continuing education options. In addition, The Projective Eye Gallery, located near the lobby, regularly exhibits the work of artists known locally, nationally and internationally.

The Dubois Center hosts over 2,000 meetings and events annually and includes both university and community constituents.

Duke Centennial

Duke Centennial Hall was dedicated on September 8, 2006, in honor of Duke Energy's century of service and its commitment to leadership for the future.

Duke Energy's history in the Carolinas dates back to 1904, when its first power station was built on the Catawba River. Cheap hydroelectric power helped transform the regional economy from agriculture to manufacturing.

In the 21st Century, our economy continues to change. Duke Energy partnered with UNC Charlotte to help establish the Office of Research Partnerships (formerly Charlotte Research Institute) to advance technology, foster innovation, and drive economic growth in our region.

Duke Centennial is home to the College of Engineering, Mosaic Lab, Center for Precision Metrology, and the Department of Mechanical Engineering and Engineering Science.

Fretwell

The E.K. and Dorrie Fretwell Building honors the campus contributions of UNC Charlotte's second chancellor and his wife.

At the time of its dedication on May 23, 1996, the 162,000-square-foot facility was the largest academic structure on campus. It contains approximately 250 faculty offices and classroom seating for about 2,100 students. Built for \$18 million, the four-story facility was constructed with revenues from a bond issue approved by North Carolina voters in a November 1993 referendum.

The son of two teachers, E.K. Fretwell was born in New York City. He earned a bachelor's degree at Wesleyan University, a master's in teaching from Harvard University and a doctorate from Columbia University. An Associated Press correspondent, writer for the American Red Cross, vice consul for the American Embassy in Prague and middle and high school teacher, Fretwell entered education administration in 1956 as assistant commissioner for higher education for the New York State Board of Regents. He also served as dean for academic development at the City University of New York and president of the State University of New York College at Buffalo. In addition, he was president of the American Association for Higher Education and chair of the Carnegie Foundation for the Advancement of Teaching.

A national leader in education, Fretwell became UNC Charlotte's second chancellor in January 1979. At the time, the University's enrollment was around 8,700 students. By his retirement in June 1989, UNC Charlotte's

enrollment topped 13,000.

During his tenure, Fretwell merged the College of Humanities, Social, and Behavioral Sciences and College of Science and Mathematics into the College of Arts and Sciences (now the College of Humanities & Earth and Social Sciences) and created the Graduate School. Besides enhancing UNC Charlotte's national reputation for educational excellence, Fretwell increased the institution's links to the community through the expansion of the Urban Institute and University Research Park, the development of University Place and establishment of the C.C. Cameron Applied Research Center.

Chancellor Emeritus Fretwell (second left) with his wife Dorrie at the formal dedication ceremony for the Fretwell Building

Throughout his career, Fretwell relied upon his wife Dorrie. He was quoted often as saying they were a team. Born in Chicago, Dorrie Shearer Fretwell grew up in Evanston, Ill. She earned bachelor's and master's degrees in applied music at Drake University. Before her marriage, Fretwell studied voice at the American School of Music in Fontainebleau, France, and began her career as a professional soprano, performing as a soloist with choral societies, musical clubs and opera productions on stage and television. During her husband's tenure in Buffalo, Fretwell served as vice chair of the board of the Buffalo Philharmonic Orchestra and vice president of the Girl Scouts. In Charlotte, she was on the board of Opera Carolina and the Charlotte Symphony. Among the initial enrollees of UNC Charlotte's graduate program in clinical psychology, she was its first graduate. She went into practice with Carolina Psychological Services and published a number of articles related to depression and headache management before retiring in 1996. She passed away December 30, 2011.

At the University's formal ceremony to dedicate the E.K. and Dorrie Fretwell Building, Allan Ostar, president emeritus of the American Association of State Colleges and Universities, noted "as a magnificent center of learning, it is a fitting tribute to a towering educational leader."

Today, Fretwell is home to the College of Humanities & Earth and Social Sciences; Departments of English, Mathematics and Statistics, Political Science and Public Administration, and Sociology; American Studies, Liberal Studies, Women's and Gender Studies programs, Political Science & Public Administration, Interdisciplinary Studies, and Disability Services.

Friday

The Ida and William Friday Building houses the Belk College of Business, and it honors the many contributions of William C. Friday to the University of North Carolina system.

Born in Raphine, Va., Friday grew up in the Gaston County town of Dallas, where he played baseball and basketball. He attended N.C. State University, graduating with a bachelor's degree in textile manufacturing. As a senior, Friday met Ida Howell from Lumberton who was pursuing a bachelor's degree in home economics at Meredith College. They married on May 13, 1942, and Bill Friday continued his education at UNC-Chapel Hill where he earned a law degree. Ida Friday also furthered her studies, obtaining a master's in public health from UNC-Chapel Hill.

Friday spent the majority of his career in higher education. He was assistant dean of students at UNC-Chapel Hill, assistant to the president of the Consolidated University of North Carolina and secretary of the University of North Carolina. At age 36, Friday was named acting president of the UNC system. He would lead the system until 1986. During his tenure, he became recognized as one of America's most respected and effective educational leaders. Through the 1963 Higher Education Act, Friday redefined the purpose of each institution of the UNC system (at the time, UNC-Chapel Hill, N.C. State University and UNC Greensboro; UNC Charlotte became the fourth member of the system in 1965). In 1972, he reorganized the entire system which had grown to include 16 campuses (now 17 after the addition of the N.C. School of Science and Mathematics).

On more than one occasion, Friday noted his achievements could not have been possible without his wife, Ida. He said, "It took two of us to do this." As "first lady" of the UNC System, Ida Friday was active in community service, including president of the Chapel Hill Preservation Society, member of the board of the North Carolina Symphony Society, chair of the YMCA and YWCA at UNC-Chapel Hill and a member of the League of Women Voters.

Dedicated in 1982, the Friday Building incorporated the best classroom designs for teaching future business leaders for its time. UNC Charlotte faculty and staff, along with the architect, visited a number of institutions recognized for having leading business programs, including Harvard University, the University of Virginia and the University of Tennessee. The Friday Building's classrooms are modeled after the case classrooms pioneered at the Harvard Graduate School of Business.

The 64,000-square-foot building was designed to accommodate a third floor, which was constructed in 1994-95 using \$3 million from a state bond referendum approved by voters in 1993. Changes in the building code required the University to make the facility more earthquake resistant. The columns that grace Friday Building contribute to its distinctive look; they were added during the expansion at the suggestion of Chancellor Emeritus Jim Woodward.

Several other UNC institutions have honored the Fridays with buildings on their campuses, including N.C. State University (the William and Ida Friday Institute for Educational Innovation), UNC-Chapel Hill (the William and Ida Friday Center for Continuing Education) and UNC Wilmington (Friday Hall).

Today, Friday is home to the Belk College of Business and its academic departments and programs.

Gage

The Gage Undergraduate Admissions Center opened for the Fall 2019 semester. The two-story, 18,000-square-foot building welcomes prospective students and their families to campus. Additionally, the Center is home to the Office of Undergraduate Admissions and serves as the starting point for campus tours. This facility was made possible through an estate gift by the late Dr. Lucius G. Gage, Jr.

Dr. Gage was a Charlotte physician and a major benefactor to UNC Charlotte. He passed away in September 2011. He was educated in the Charlotte city schools and entered Duke University for his undergraduate degree after his junior year in high school. He then went on to Duke Medical School where he was recognized for exemplary performance. He completed his residency at the University of Virginia. Gage returned to Charlotte to practice medicine at the Nalle Clinic with his father, the late Dr. Lucius G. Gage, Sr., a founding partner, assuming the Director position in the Allergy and Arthritis Department.

Garinger

Elmer Henry Garinger was one of the visionary leaders who helped Charlotte College realize the dream of becoming a four-year, state-supported institution.

As superintendent of Charlotte City Schools, Garinger employed Bonnie Cone, UNC Charlotte founder, as a mathematics teacher at Central High School. Later, he would name her director of the Charlotte Center of the University of North Carolina, the institution that ultimately became UNC Charlotte.

Born July 13, 1891, in Mount Vernon, Mo., Garinger graduated from the local high school and continued his education at the University of Missouri. He completed a bachelor's degree in 1916, and eventually, he earned a master's degree and doctorate from Columbia University.

During his 40-year career with Charlotte City Schools that began in 1921, Garinger gained a national reputation as a leader in education. In 1949, he was named superintendent of Charlotte City Schools, and he took the lead in planning for the consolidation of the Charlotte and Mecklenburg County school systems, a goal achieved in 1959. Garinger served for a year as superintendent of the new system, retiring as superintendent emeritus.

Garinger's association with UNC Charlotte continued throughout his life. He was instrumental in requesting the Charlotte Center be founded, and he was among the Charlotte leaders who worked to change the Charlotte Center to Charlotte College in 1949. When the institution was placed under the community college system in 1958, Garinger was named secretary of the first Board of Trustees of the Charlotte Community College System; he served in this capacity until 1963, when Charlotte College became a four-year, state-supported institution.

After retiring from the Charlotte-Mecklenburg Schools, Garinger worked to improve public education as a member of the N.C. House of Representatives, where he served two terms. In honor of Garinger's service to public education and the University, UNC Charlotte's Board of Trustees voted to name the first faculty building, constructed in 1965, in

his honor. The Elmer Henry Garinger Building was dedicated in October 1970; a portrait of Garinger that hangs in the building was dedicated in March 1987.

He died in Charlotte on August 21, 1982.

The Garinger building is one of the five buildings that make up the original quad of UNC Charlotte. Today, Garinger is home to the Departments of Africana Studies, Philosophy and History.

Grigg

Dedicated on Sept. 8, 2006, William H. Grigg Hall is home to a number of Charlotte Research Institute offices and facilities, including the Center for Optoelectronics and Optical Communications.

Named for the chair emeritus of Duke Energy, Grigg Hall is a 96,820-square-foot, state-of-the-art academic and research facility. In 2002, the Duke Energy Foundation announced a \$10 million gift to the University's capital campaign in support of Charlotte Research Institute programs and initiatives. Construction of Grigg Hall began in 2003 with funding from the state's \$3.1 billion bond referendum approved by North Carolina voters in 2000.

Grigg, who grew up in Albemarle, completed a bachelor's degree from Duke University in 1954. After serving two years in the U.S. Marine Corps, he earned a law degree with distinction from Duke in 1958. After practicing law in Charlotte for five years, Grigg joined Duke Power in 1963 as assistant general counsel. He was promoted to vice president of finance in 1970 and vice president and general counsel in 1971. Elected to Duke Power's board of directors in 1972, Grigg eventually was named vice chair in 1991 and chair and chief executive officer in 1994. He retired in 1997.

During Grigg's tenure with Duke Power, he guided the corporation through some of the most challenging times in the electric utility industry. He helped expand and diversify the company's power plants and led the company's response to competition, including the merger with PanEnergy in 1997 to create Duke Energy. Grigg was named Electric Utility CEO of the Year for 1995 by Financial World magazine.

Committed to civic leadership and quality education, Grigg has served countless community groups, including the Charlotte-Mecklenburg Hospital Authority, Foundation for the Carolinas and the Lynwood Foundation. In honor of his contributions to Charlotte and the greater community, UNC Charlotte awarded Grigg an honorary doctorate of public service in December 1997.

The architectural firm of Perkins-Will, which has offices nationwide, designed Grigg Hall. Constructed for roughly \$24 million, Grigg Hall features a 3,000-square-foot clean room, a controlled environmental space used for research and manufacturing. Clean, contamination-free rooms are used in a variety of research settings – electronics and optics, as well as pharmaceuticals and DVD manufacturing.

Today, Grigg is home to the Department of Physics and Optical Science, Optoelectronics Center, Electrical & Computer Engineering, and Charlotte Research Institute.

Johnson

The Vickie and Gene Johnson Marching Band Center is home to the UNC Charlotte "Pride of Niner Nation" Marching Band.

The 6,700 square foot building houses a conference room, music library and four offices for the band staff. It also includes a storage room for drumline and color guard equipment, as well as ample space to store musical instruments and uniforms for the entire marching band. The band began performing in Fall 2015 with 145 members, but will eventually grow to include 300-350 members.

Johnson Band Center (JBC) was designed by the award-winning architecture firm Watson Tate Savory. The design reflects the architectural characteristics of neighboring Storrs Hall and Robinson Hall, and the building serves as an architectural landmark for patrons going to and from events in the College of Arts + Architecture.

Johnson Band Center is one of a few buildings in the nation dedicated exclusively to a marching band.

Kennedy

The W.A. Kennedy Building was one of the first two facilities on campus. Designed by A. G. Odell Jr., the architect of Ovens Auditorium and Bojangles Coliseum, the building was named for Woodford A. "Woody" Kennedy. Sometimes called the "spiritual father of Charlotte College," Kennedy was a member of the first advisory board of the institution in 1947. He was named to its eight-member board two years later. Without Kennedy's perseverance, Charlotte College likely would have remained a two-year community college.

Kennedy believed that Charlotte deserved and needed a great university. He stated that a thousand additional high school graduates could go to college each year if the opportunities available in other parts of the state were available in Charlotte. With a zeal he once termed an obsession, Kennedy worked tirelessly to raise money and support to make that happen.

He encountered a lack of support among many of Charlotte's business executives and disinterest from politicians. His rhetoric sometimes became strident, characterizing critics of the project as naysayers and deriding the state's support as a 'sop.'

At the time, the school operated with a part-time faculty who taught in part-time classrooms, and it was financed almost entirely by tuition paid by student loans until Kennedy pushed for and obtained the initial state funding in 1955.

As a member of the college's site selection committee, he searched for a scenic location with room for growth and expansion; the committee ultimately settled on the present location of the UNC Charlotte campus. He told reporters, "I may not but you will live to see 10,000 students at Charlotte College."

The statement proved prophetic. Kennedy died on May 11, 1958, the eve of his installation as a trustee of Charlotte Community College. But his

contribution was not forgotten. The trustees proposed that the first building on the new campus be named for him. The building was dedicated on Feb. 16, 1962.

When Kennedy Building first opened, it housed science laboratories (chemistry, physics, biology and geology), as well as labs for a variety of engineering courses. There were 10 classrooms, 12 faculty offices and a lecture room with elevated seating for 100. The building also served as a temporary library; its first floor contained 18,000 volumes while Atkins Library was being built.

Today, Kennedy houses the School of Professional Studies, the Center for Teaching and Learning (CTL), and OneIT.

King

Arnold K. King may be one of the few individuals to have a building named in his honor on two UNC system campuses. Ten years before UNC Charlotte dedicated the King Building for him, UNC Wilmington put King's name on an administrative and classroom building. Such an honor is an indication of the vital role King played throughout the UNC system.

From his days as a student at UNC-Chapel Hill in the 1920s until his retirement as special assistant to UNC President William Friday, King was an integral part in the development of the University of North Carolina system. After receiving his bachelor's degree, he continued his education at the University of Chicago, completing a master's and doctorate. Returning to Chapel Hill, King served as a professor, graduate school administrator, head of summer sessions and vice president. He also was as acting chancellor for UNC Asheville in 1977.

King participated in a number of education-related study commissions, panels and boards across North Carolina and around the country. UNC

President Friday and King were colleagues for more than 20 years. The UNC leader turned to King for his assessment when planning for the system's future. King served as a liaison between Friday and Charlotte College during the institution's transition to becoming the University of North Carolina at Charlotte. He later played the same role for UNC Asheville and UNC Wilmington.

In addition to his long service to the UNC system, King was one of the founders of N.C. Wesleyan College, and he was considered an expert on the history of the UNC system. In retirement, he wrote "The Multi-campus University of North Carolina Comes of Age: 1956-1986," a historical bibliography of his three decades working in the system. He finished a 20-page manuscript on UNC's University Day celebration just two days before his death.

The architectural firm of Odell Associates Inc. designed the building, which was constructed by F.N. Thompson Inc. in 1966 at a cost of \$603,000. The King Building was originally named for Addison

Hardcastle Reese. It was renamed for King following the dedication of Reese Building, which opened in 1982. Dr. King passed away on March 31, 1992, at the age of 90. A resolution in his memory noted, "Our University lost a part of its memory and conscience, and it lost a great friend."

Today, King is home to the Dean of Students Office, Human Resources, Office of the Registrar, and Student Affairs.

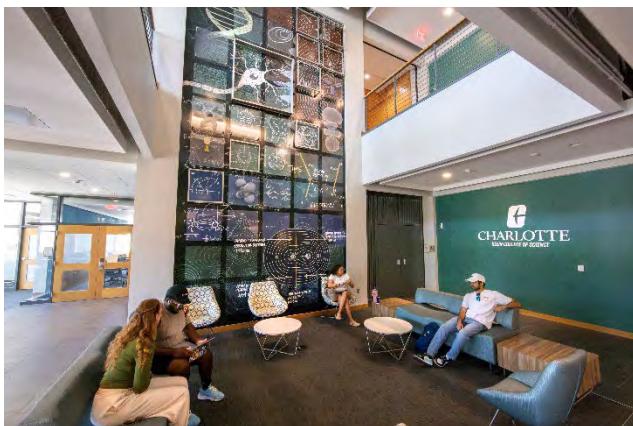

Klein

Klein Hall is a state-of-the-art facility dedicated to advancing scientific research and education. Officially named in 2024, Klein Hall honors the generous \$10 million donation from Gené and Fred Klein, prominent community leaders in Charlotte and loyal supporters of UNC Charlotte. Fred has provided valuable leadership to the University by serving on the Board of Trustees and the Foundation Board, as well as providing key funding for the Childress Klein Center for Real Estate and serving on the Childress Klein Center Advisory Board. As a founding partner of Childress Klein, one of Charlotte's most respected private real estate firms, Fred has helped shape the skyline of our city and developed many of Charlotte's most prominent landmarks. In 2024, Fred was honored with the UNC Charlotte Distinguished Service Award, reserved for civic and community leaders who have been essential to the Charlotte region and the University's growth. The Kleins have a deeply rooted interest and passion for science and mathematics. Gené spent her early career as a math educator, and Fred received his undergraduate degree in

engineering. Together, they have championed the importance of science and math education in fostering critical thinking and problem-solving skills that are valuable to all students, regardless of their professional pursuits.

Klein Hall is a modern marvel, featuring 130,000 square feet of open areas, classrooms, and teaching and research laboratories spread across three stories plus a basement, with a central café and attached regional utility plant that serve the overall campus and student body. Designed by Clark Nexsen and Payette and constructed by Balfour Beatty, Klein Hall opened its doors in 2022 at a cost of over \$80 million. This facility is equipped with cutting-edge laboratories, collaborative spaces, and advanced technological resources, making it a hub for innovative education and scientific discovery. The main lobby also contains a dramatic two-story 3D science and mathematics feature wall designed by architectural firm Jenkins Peer with input from faculty and students.

Overall, Klein Hall and Klein College of Science represent a significant advancement for UNC Charlotte. They embody the university's commitment to scientific excellence and innovation, providing students and faculty with the resources and environment needed to thrive in their academic and research endeavors. The generosity of Gené and Fred Klein has not only transformed the physical landscape of the campus but also set the stage for future scientific breakthroughs and educational advancements.

Klein Hall houses the College of Science.

Macy

The Macy Building was one of the first two facilities constructed on the UNC Charlotte campus. It was named for Pierre Macy, professor of French and chair of the-then Foreign Language Department. The 18,000-square-foot research and instructional facility was constructed concurrently with the Kennedy Building by Odell Associates in 1961 at a cost of \$418,000.

Macy was born in France in 1899 and received degrees from the University of Nancy, the University of Dijon, and the University of Paris

before making the United States his adopted home.

The noted author and translator arrived at Charlotte College in 1949 and almost single-handedly established and maintained the fledgling college's Foreign Language Department (now the Department of Languages, Cultures, and Translation). Before joining the faculty of Charlotte College, Macy was chair of the Romance Language departments at Kentucky Wesleyan College, the University of Tulsa and the College of William and Mary. He returned to his alma mater, the University of Nancy, for one year as a visiting professor.

An integral faculty member of the college, Macy served on the curriculum committee, chaired the concerts and lectures committee, advised the French Club and later served on the University's executive committee.

Students held Macy in such high regard that the 10th edition of the yearbook was dedicated to him in 1960 "for his deep understanding, patient guidance and personal interest in the students of Charlotte College. He has inspired us to greater achievements through his teaching and counseling, and he will be fondly remembered in our memories of Charlotte College."

Macy served as the first commencement marshal for the newly established University. His dedication to UNC Charlotte went well beyond any specific position he held. He taught French three years after relinquishing the department chairmanship and stayed on the faculty two years after he reached retirement age.

At his 1969 retirement, he received the rare honor of being named a faculty emeritus from his colleagues. "The Foreign Language Department, carefully constructed by Dr. Macy over the years, was clearly one of the solid blocks of the foundation of the new institution," read the tribute. He is further remembered today with the Pierre Macy Award for Excellence in French.

The Macy building is one of the five buildings that make up the original quad of UNC Charlotte. Today, Macy is home to the Department of Global Studies and Department of Religious Studies, Art & Art History, and the College of Arts & Architecture.

McEniry

Built to house the University's earth and life sciences programs, the McEniry Building is named for UNC Charlotte's first vice chancellor for academic affairs, William Hugh McEniry. The \$4 million, 103,000-square-foot facility was completed July 7, 1975, to house the Departments of Earth, Environmental, and Geographical Sciences and Biology.

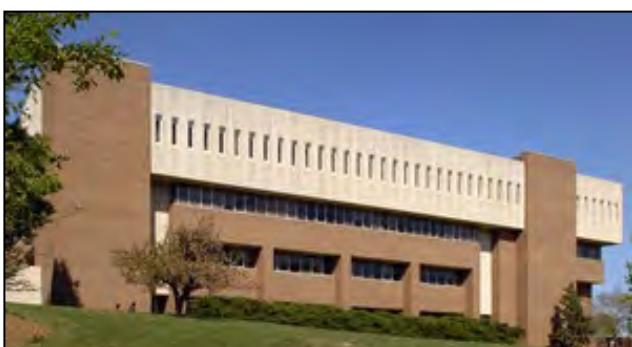

Chancellor Dean Colvard hired McEniry (pronounced My-Canary) in 1967; Colvard was searching for a top-notch administrator with an arts and sciences background. Based upon numerous recommendations, Colvard recruited McEniry away from Stetson University where he had spent 27 years and served as a university dean. Ready for a new challenge, McEniry and his wife, Mary, relocated to North Carolina and settled into a 17-acre plot of land between the University and Huntersville they dubbed "Rural Simplicity."

McEniry is credited with recruiting dedicated and talented faculty to UNC Charlotte, and he was active in a number of organizations, such as the North Carolina Association of Colleges and Universities and the College Entrance Board. He also served as president of the Southern Association of Colleges and Schools.

Dedicated to improving higher education for blacks, McEniry served as a trustee of Johnson C. Smith University. In addition, he personally financed scholarships for some black students and worked with the Ford Foundation to improve academics and the curricula for historically black colleges.

In 1973, McEniry agreed to serve as acting chancellor at Western Carolina University in Cullowhee until a permanent chancellor was hired. He passed away on March 15, 1974, at the age of 57.

The McEniry Building is just one lasting tribute to the University's pioneering vice chancellor. Each year, a member of the graduating class with the highest GPA receives the W. Hugh McEniry Award for Academic Excellence. The North Carolina Association of Colleges and Universities named its top honor for the trailblazing educator - the Hugh McEniry Award for Outstanding Service to North Carolina Higher Education. Following McEniry's death, Stetson University established the McEniry Award, a prestigious honor given a professor as selected by faculty members and students.

Today, McEniry is still home to the Department of Earth, Environmental, and Geographical Sciences.

Memorial Hall

Memorial Hall is dedicated to fallen U.S. veterans. The building houses the Departments of Military Science (Army ROTC) and Aerospace Studies (Air Force ROTC). It serves as a memorial to commemorate UNC Charlotte students who have served in any branch of the Armed Services and lost their lives in service to the country.

Popp Martin Student Union

The UNC Charlotte Student Union originally opened its doors in 2009 as the community center of the University. On any campus, the union serves students, faculty, staff, alumni, and visitors. It provides services and conveniences that members of the college community need in their daily lives and creates an environment for getting to know and understand others through formal and informal associations. It was renamed the Karen A. Popp and Demond T. Martin Student Union in 2016 to honor the dedication and service of two extraordinary alumni, Karen Popp ('80) and Demond Martin ('97).

Karen A. Popp was born in North Carolina, but moved often because of her father's successful career as a high school, college, and NFL football coach. Karen graduated cum laude from UNC Charlotte in 1980, then attended Oxford University in England on a Rotary International Scholarship where she studied law and rowed for her college. She then attended law school at UNC Chapel Hill, serving as an editor on the North Carolina Law Review, becoming a member of the Order of the Coif and graduating cum laude. She has had an exemplary career as an attorney in private practice and the government. Karen clerked for the Honorable Sam J. Ervin, III of the U.S. Court of Appeals for the Fourth Circuit, moved to New York City where she was a Wall Street lawyer at Sullivan & Cromwell, and then an Assistant U.S. Attorney in the Eastern District of New York. She moved to Washington, D.C. to serve in the Office of Legal Counsel at the U.S. Department of Justice, as Associate White House Counsel for President Bill Clinton and as a partner in the international law firm of Sidley Austin, where she led the White Collar corporate defense practice and was a member of the firm's Executive Committee. Karen has received numerous professional awards, honors, and recognitions for being one of the best lawyers in the world and a trailblazer for women.

Demond Martin spent his childhood in Columbus, Ohio, and Inglewood, California; but spent many of his most formative years in Mocksville, North Carolina. Demond was thrilled to be admitted into UNC Charlotte, and immediately felt at home from his first visit. Coming from a small town, he fell in love with the campus and reveled in the opportunity to interact with students from such varied backgrounds. He took part in many campus activities, but it was his participation in the University Transitions Opportunity Program (UTOP) that introduced him to Dr. Herman Thomas, who became a lifelong mentor and challenged Demond to become a person of consequence – not for its own sake, but to best position himself to serve others.

In part due to the UTOP experience, Demond came to campus with a sense of who he wanted to become, and was involved in leadership activities from the moment he arrived. He became SGA president as a sophomore – an unprecedented event at UNC Charlotte at the time. He also joined Alpha Phi Alpha fraternity, Mu Tau chapter and would serve as chapter president. In honor of his skill as an orator, the Chapter established the annual Demond T. Martin Oratorical contest. He would go on to win numerous awards and distinctions, but one of his most gratifying experiences was to be part of a group of student leaders who escorted Ms. Rosa Parks through the city of Charlotte to address students and to inspire a call to action. Demond received his Bachelor of Science degree in Accounting in 1997, having left a mark on the campus, both students and faculty alike.

PORTAL

The Partnership, Outreach, and Research to Accelerate Learning (PORTAL) building, which opened in February 2014, demonstrates UNC Charlotte's commitment to foster partnerships with private industry. Designed to stimulate business growth and job creation along with promoting research and innovation and supporting the entrepreneurial ecosystem of the Charlotte region, PORTAL is a venue where entrepreneurs can collaborate with peers, faculty members, and students to harness the power of a research university to plan strategies that lead to business success.

PORTAL is outfitted with over 90,000 square feet of floor space dedicated to business innovation and partnership with front door access to the exceptional resources, facilities, and academic talent found on the UNC Charlotte campus. The building has a contemporary aesthetic and 4-story atrium bound by office suites, meeting rooms, and a café. Business tenant offices and suites start at about 200 square feet and are expandable as required. An abundance of naturally lit community gathering spaces – including glass enclosed meeting rooms located on two atrium transecting bridges – facilitate networking and idea exchange. Business tenants have access to any of PORTAL's four meeting rooms on a scheduled basis.

Reese

Around Charlotte, Addison Hardcastle Reese is probably better known as a titan of the banking industry rather than for his passionate commitment to UNC Charlotte.

Born in Baltimore County, Md., on Dec. 28, 1908, Reese attended Johns Hopkins University but left after his junior year to begin his lifelong career in banking. He worked as a clerk, a senior national bank examiner and a bank vice president all before serving in the U.S. Air Force during World War II.

Reese returned to banking after the war and was recruited to Charlotte in 1951 as executive vice president of American Trust Company. He was promoted to president in 1954 and organized a series of mergers that became the North Carolina National Bank, which has since evolved into the Bank of America. He also served on the board of the Federal Reserve and as a director of the International Monetary Conference.

Named to the Board of Advisors of the Charlotte Community College System in 1957, Reese was later elected to the college's Board of Trustees. He chaired the Charlotte College Site Committee and worked with University founder Bonnie Cone and Pete McKnight to choose UNC Charlotte's current location.

In 1963, Reese was appointed vice chair of the Charlotte College Board of Trustees and took over as chair following the death of J. Murrey Atkins. He spent a year as a member of the North Carolina Legislative Study Commission on Student Financial Aid and was a member of the

UNC Charlotte Foundation.

In 1968, UNC Charlotte awarded its first honorary degrees. One went to Reese and the other went to Frank Porter Graham, former University of North Carolina president, U.S. senator and United Nations mediator.

Reese's award recognized him as "a man of vision, who foresaw a university of excellence, where those of lesser vision saw only a struggling community college."

The North Carolina Citizens Committee presented Reese with the 1974 Distinguished

Citizenship Award. Reese also served on the boards of trustees for both the University of North Carolina and UNC Charlotte, serving as the chair of the latter from 1972 until his death in 1977.

Like the Colvard Building, the Reese Administration Building was designed by Harry Wolf of Wolf Associates. It was

completed in 1982, and is named in Reese's honor.

Today, Reese houses the office of the Vice Chancellor for Business Affairs, Financial Services, the Office of Financial Aid, and the Graduate School.

Robinson

Robinson Hall for the Performing Arts is a state-of-the-art venue that affords the campus and the community access to a slate of contemporary and classical dance, music and theater offerings.

Named for Russell and Sally Dalton Robinson, the three-story, 118,000-square-foot facility contains classrooms, offices and performance and rehearsal spaces for the departments of dance, music and theatre. It was built and equipped for \$28 million, financed through the statewide bond referendum approved by voters in 2000.

The hall's first floor houses a 332-seat proscenium theater, which includes a 23-seat orchestra pit. The theatre has a 3,500-square-foot stage equipped with 18 trapdoors, a curtain 26 feet high and a 60-foot fly-loft for storing and changing scenery. There also is the Black Box Theatre. Throughout the building are rehearsal rooms and labs for costume, scenery and lighting design.

The Robinsons are both Charlotte natives, and they are considered among the most admired and effective community leaders. In addition to leadership roles at Christ Episcopal Church, they have supported professional, educational and charitable institutions, arts and cultural organizations and economic development services.

Russell Robinson II is founding partner of one of North Carolina's largest law firms - Robinson, Bradshaw and Hinson. According to an article in the Charlotte Observer, Robinson majored in English at Princeton University but transferred to Duke University after two years. He went on to obtain his law degree from Duke in 1956. His firm has represented numerous businesses and organizations, including Belk Store Services Inc., the Duke Endowment, Duke Power and the Charlotte Housing Authority. His book "Robinson on North Carolina Corporation Law" is considered a necessity for any aspiring Tar Heel corporate lawyer.

A member of the UNC Charlotte Board of Trustees from 1987-97, Robinson served as chair for eight years. During his board tenure, Robinson was regarded by observers as a "quiet power" for the University; he focused on increasing public and private funding and obtaining UNC system authorization for doctoral degrees beyond joint Ph.D. programs.

In addition to his role as a trustee, Robinson was a director of the UNC Charlotte Foundation. He also has been a trustee of the Duke Endowment and chair of Duke University's Board of Trustees.

Sally Dalton Robinson attended public schools in Charlotte, St. Mary's School in Raleigh and Duke University. She was a member of Phi Beta Kappa and earned a bachelor's degree in history. Among her many civic contributions, she served as an integral founding member of the Levine Museum of the New South and the St. Francis Jobs Program (now the BRIDGE Jobs Program). She also was on the board of the Charlotte Symphony, the Arts and Science Council, McColl Center for the Visual Arts as well as other religious, charitable and economic organizations.

Dedicated November 3, 2004, Robinson Hall was designed by the Charlotte architectural firm of Jenkins Peer. Skanska and R.J. Leeper were general contractors, while the firm Biemann and Rowell was the mechanical contractor. Port City Electric served as the electrical contractor; the hall's lighting and acoustical controls were among the most sophisticated in modern theater design at the time of construction.

Today, Robinson Hall is home to the Departments of Dance, Music, and Theatre; the Anne R. Belk Theater; and the Lab Theater.

Rowe

The Oliver Reagan Rowe Arts Building honors one of UNC Charlotte's founding fathers. Completed in 1971, the 75,000 square-foot facility was constructed to house the-then departments of Performing and Visual Arts. The building's focal point is an eight-sided theatre that seats 350. It also includes a recital hall, classrooms, offices, practice rooms and a large lobby-gallery.

Rowe was born Dec. 12, 1902, in Newport, Tenn. He and his wife Maria would become avid supporters of the Charlotte arts community and UNC Charlotte. Rowe's family moved to Charlotte when he was a child. After graduating from Central High School, Rowe attended UNC-Chapel Hill, where he completed a bachelor's degree in electrical engineering. He returned to Charlotte and began work with the R.H. Bouigny engineering firm. He eventually became president of R.H. Bouigny Inc., Powell Manufacturing Co. and Powell Agri-Systems Ltd.

In the 1950s, Rowe supported consolidation of city and county schools, which won him the Charlotte News "Man of the Year Award" in 1958. That same year, Gov. Luther Hodges appointed Rowe to the first Board of Trustees for the Charlotte Community College System. He chaired the board's finance committee, and he was instrumental in soliciting the largest single gift to the-then Charlotte College Foundation (now the Foundation of the University of North Carolina at Charlotte).

Between 1961 and 1963, Rowe made numerous speeches championing the cause of higher education for the Charlotte region. In 1964, the Charlotte Civitan Club presented its Distinguished Citizenship Award in recognition of Rowe's efforts on behalf of the University.

During the rest of the 1960s, Rowe continued to find new causes for his leadership. A long-time music lover, Rowe began to support the opera and symphony. Eventually, he was elected president of the Charlotte Symphony Orchestra Society, and in 1973, he established, nurtured and financially supported the "Rowe String Quartet" at UNC Charlotte.

In 1987, Rowe was awarded an honorary Doctor of Human Letters. The citation reads in part that "Oliver Reagan Rowe Sr. was a founding father of the University of North Carolina at Charlotte. He helped to dream the dream and to make it come true ... With his vision, he painted a picture of a major state university when others around him saw only the two-year college then existing."

Today, the Rowe Building is home to the Department of Art and Art History.

Smith

The Sheldon Phelps Smith Building honors an individual whose foresight helped to chart UNC Charlotte's educational course.

Smith, vice president and general manager of the Douglas Aircraft Company's Charlotte Division, served as a trustee of Charlotte College from 1958 to 1965. He is credited with bringing an engineering program to the institution. Through his generosity, Douglas Aircraft Co. engineers taught at Charlotte College on a released time basis; as many as nine part-time instructors from Douglas were in service at one time.

Born in Redlands, Calif., on March 26, 1910, Smith graduated from Pomona College in 1932 with a bachelor's degree in physics. During World War II, he served as a lieutenant with the Engineering Division of the Navy Bureau of Aeronautics and was assigned to the missiles branch. Following the war, he was a missile project engineer with the Douglas Aircraft Co. Prior to moving to Charlotte, he was an assistant design engineer for missiles at the company's Santa Monica facility.

In addition to starting the University's engineering program, Smith is credited with bringing graduate courses in mathematics and physics to the-then Charlotte College through a cooperative agreement with N.C. State University.

As an advocate for the college, Smith once said, "If we marry the manpower development of this Charlotte College area of some 1 million people to the tremendous demand of technical industries for engineers and scientists, we will accomplish two ends: to help satisfy the great national requirements for engineers and scientists and to improve the usefulness and economic standards of the residents of North Carolina."

Smith left Charlotte to become vice president of Douglas Aircraft and vice president of Douglas United Nuclear Corp. in Hanford, Wash. He died April 28, 1966.

The Smith Building, completed in 1966, was originally called the Engineering Building. The 71,000 square-foot, \$1.6 million facility was the largest classroom and laboratory building on the campus at the time. When finished, it housed the Computer Center, Mathematics Department, the Geography and Geology Department (now Department of Earth, Environmental, and Geographical Sciences) and the Engineering Program.

UNC Charlotte dedicated the building in honor of Smith on Dec. 15,

1968, in a ceremony held in the Cone University Center. The Smith family presented a portrait of the building's namesake to be placed in the facility.

Today, Smith is home to the College of Engineering's Office of Student Development and Success, Mosaic Lab, and the Department of Engineering Technology and Construction Management.

Storrs

The Thomas I. Storrs Building resulted from the collaboration between Charlotte architectural firm Ferebee, Walters and Associates and New York architects Charles Gwaltmey and Robert Siegel.

Since its completion in 1990, Storrs Building has been used as an "architectural education instrument," because students and professionals can study its many unique features, as the building is considered a virtual textbook for use of materials and systems. This 87,000-square-foot facility features a complex roof design, natural and artificial lighting systems, double helix stairs and exposure of structural and environmental systems. Home to the School of Architecture in the College of Arts and Architecture, Storrs Building is appropriately named for an individual who dedicated himself to helping build the University.

Storrs, born in 1918, dropped out of high school during the Great Depression. At the age of 15, he began work as a clerk at the Federal Reserve Bank of Richmond, Va. He would later resume his formal education, enrolling in the University of Virginia, where he completed undergraduate studies. He earned a master's degree and doctorate in economics from Harvard University.

Originally from Nashville, Tennessee, Storrs joined the-then North Carolina National Bank (NCNB) in 1960 as executive vice president. He would later serve as one of the architects who laid the foundation for NCNB to emerge as NationsBank (now Bank of America). Following the retirement of Addison Reese, Storrs became chair and CEO, and he would follow his predecessor's example as a member of the UNC Charlotte Board of Trustees for nearly

12 years – the last four years as chair. His civic involvement included serving as president of the Business Foundation of North Carolina, vice president of the North Carolina Engineering Foundation and director of the North Carolina Textile Foundation. In 1990, he was inducted in the North Carolina Business Hall of Fame.

A recipient of the UNC Charlotte Distinguished Service Award, Storrs also has a scholarship in his name at the University of Virginia.

Formal groundbreaking for the \$7.5 million Storrs Building was held Aug. 26, 1988. Dedication of the building was Oct. 29, 1990, and a ceremony to name the facility in honor of Storrs was held Sept. 16, 1992.

Today, the Storrs Building is home to the College of Arts + Architecture and School of Architecture.

Winningham

If one person can be credited for launching the tradition of bringing prominent speakers to the UNC Charlotte campus, then it is Edyth Farnham Winningham, one of the University's pioneering faculty members.

Winningham, born Jan. 26, 1900, in Arthur, N.D., earned a bachelor's degree in modern languages from the University of North Dakota. She later earned a master's in political science from UNC-Chapel Hill, reportedly the first woman in the state to complete the degree.

Beyond teaching high school in North Dakota and North Carolina, Winningham served as a faculty member at the University of Wyoming, the Women's College of the University of North Carolina (now UNC Greensboro) and the UNC College Center in Wilmington (now UNC Wilmington). Her connection to UNC Charlotte dates back to its time as Charlotte College. Winningham joined the faculty in 1947, and she spent the next two decades infecting everyone around her with her passion for politics and international affairs.

Winningham frequently stated that one of her dreams was to bring prominent thought-leaders to the campus to "open up windows" for the

institution's students. Her persistence paid off in 1966 with the establishment of the University Forum Council, which sponsored an event each year to bring noted speakers to the campus to address crucial issues facing contemporary society. She chaired the council until spring 1971, despite retiring in 1967 as professor emeritus. According to Special Collections, the final forum was held March 2, 1995. This 30th annual event focused on "Violence: Is Prevention the Key?"

Even after retiring, Winningham continued to lecture on world affairs and international education. She and her husband also established the James and Edyth F. Winningham Scholarship for undergraduate political science majors.

In 1970, Winningham's service to the greater Charlotte community was recognized by the League of Women of Voters. The organization singled her out for her instrumental role in forming closer ties between the University and the Charlotte community at large, and she was named WBT Radio's Woman of the Year. In 1985, UNC Charlotte awarded her an honorary Doctor of Humane Letters. She died May 27, 1994.

The 10,507-square-foot classroom building which bears her name was constructed in 1965 by F.N. Thompson Inc. The architectural firm Odell Associates designed the facility.

The Winningham building is one of the five buildings that make up the original quad of UNC Charlotte. Today, Winningham is home to the Department of Art & Art History, and Philosophy.

Woodward

As students at UNC Charlotte attend classes in the science and technology building on campus, they are walking into the physical manifestation of the work done by Chancellor Emeritus James Woodward and his wife Martha. On

November 16, 2005, the building was formally dedicated to recognize the Woodwards' 16 years of service and devotion to the University.

The James H. and Martha H. Woodward Hall is a direct result of their vision to help elevate UNC Charlotte to a research institution. The Woodwards worked together to raise awareness of the University's vital role as an economic engine and build many new partnerships and friendships for the institution. As Chancellor from 1989 to 2005, Jim Woodward was the visionary, strategist, and master builder who guided UNC Charlotte's development as a major research institution. Martha played a vital role in strengthening ties to UNC Charlotte through the hosting of thousands of guests regionally and nationally. Throughout their 16 years at the University, the Woodwards worked together to bring much needed attention to both the University's strengths and to its resource needs.

Today, Woodward Hall is home to the College of Computing and Informatics; and Departments of Biological Sciences, Computer Science, Mechanical Engineering & Engineering Science, and Software & Information Systems.

University Logo

In 2021, UNC Charlotte adopted the All-in-C logo, which features a block-style letter C with a pickaxe (used by Charlotte mascot Norm the Niner). The design pays tribute to the University's trailblazing spirit. The All-in-C represents the power to break new ground, the persistence to discover the unknown, and the promise to build the future.

University Seal

UNC Charlotte became the fourth campus of the University of North Carolina in July of 1965. In the fall of 1965, the new UNC Charlotte seal was chosen by a committee of students (the three upper-class presidents), three faculty members, and the school publicity director, who served as chair. Final approval was given by Acting Chancellor Bonnie Cone.

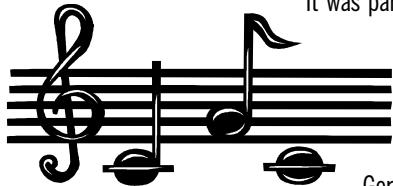

UNC Charlotte seal's elements are: the modern arches (the tulip design from the canopy of the Kennedy Building) at the top to symbolize that this is a twentieth century university; two Cs in the middle to represent Charlotte College, from

which the new campus sprang; and the pine cone at the bottom for the Old North State [land of the longleaf pine]. The date on the seal is 1946, the year in which the institution began as the Charlotte Center of the University of North Carolina.

Alma Mater

UNC Charlotte's Alma Mater has deep roots in the institution's history.

It was part of an "Academic Festival March" composed for UNC Charlotte by James Helme Sutcliffe, a Charlotte composer and music critic who lived in Germany at the time. Dr. Loy

Witherspoon, professor of religious studies, commissioned the March in 1965 when he learned that Charlotte College would become a campus of The University of North Carolina. The March was first performed in 1967 at the installation of Dean W. Colvard as UNC Charlotte's first chancellor. Afterwards, it was performed as a recessional at every Commencement during Dean W. Colvard's tenure as chancellor. When UNC Charlotte founder Bonnie Cone heard the March, she said, "I can hear an alma mater in it," referring to a hymn-like refrain. Dr. Robert Rieke, a professor of history, also heard an alma mater in it.

On a 1990 trip to Germany, Rieke visited Sutcliffe, picked up a recording of the March, and began writing words to fit the final refrain. On Christmas Eve 1991, he sent Bonnie Cone the words and music as a Christmas present to her and to the University, from which he had retired a year earlier. Chancellor James H. Woodward approved the composition as the University's Alma Mater in April 1992. It was sung for the first time at the following May Commencement and has been performed at every Commencement since.

*Hail University! To you we sing our praise.
May Charlotte's light dispel the night,
illumine all our days.
In Carolina's crown the brightest gem we see.
Without your power our finest hour
would hold no victory.
So let us love your life and
cherish your great name.
To aid your cause, uphold your laws,
and your enduring fame.*

The 49ers

The nickname, the 49ers, was chosen in recognition of the importance of the year 1949 in the history of the University. UNC Charlotte, which began as an off-campus center of the University of North Carolina at Chapel Hill, would have closed its doors in 1949 had Bonnie Cone and her supporters not convinced the N.C. Legislature that Charlotte needed a permanent college. Charlotte College was established that year.

Additionally, the campus is located on N.C. Highway 49, and Charlotte has a rich gold mining history -- the term "49ers" symbolizes gold mining. A bronze statue of the 49ers Gold Miner sits at the bottom of the staircase between the Mebane and College of Health and Human Services buildings on campus. The statue recalls the region's history as a gold mining center and symbolizes the pioneering spirit and determination that has led to UNC Charlotte's dramatic growth.

49ers Fight Song

The fight song music was composed by former music faculty member Dr. Harry Bulow in 2001. It replaced one which belonged to the University of Texas at Austin, entitled "Texas Fight," which had been used since the late 1960's. The new fight song was played for five years before Dr. Laurence Marks, UNC Charlotte's director of bands, composed a set of lyrics in 2006. Minor changes suggested by the campus administration, Athletics, and students were accepted by Marks and submitted for final approval by the Chancellor and the 49ers Fight Song, reflected below, was born.

*Hail, Charlotte 49ers, proud as we can be
We stand to fight for the green and white
'Til we win the Victory (Go Niners!)*

*We pledge our trust in you,
And wave your colors high
The loyal Niner Nation cheers,
Forever! We'll Fight-Fight-Fight!*

Mascot

A miner was chosen as the UNC Charlotte mascot as a nod to Reed Gold Mine in nearby Concord, the site of the first documented gold find in the United States in 1799. He was named Norm through popular student vote shortly after he was made mascot. Norm is rarely seen without his trusty pick-axe and never takes his slouch hat off.

Admission to the University

Admission to the University

admissions.charlotte.edu

The University considers applications for admission without regard to race, color, national origin, religion, sex, sexual orientation, age, or disability. It reserves the right to withhold the admission of applicants who fail to meet any of the requirements for admission and to restrict enrollments as required by budgetary or other constraints.

Admissions Process

Applications for admission are reviewed when all required credentials are received. Incomplete applications will not be reviewed. Official transcripts must be received for the application to be reviewed. The review focuses on the academic history of the applicant and considers all relevant factors. The intent of the University is to offer admission to applicants whose credentials indicate a strong likelihood for success in their selected curricula. It is not possible to accommodate all the applicants who meet the minimum criteria, and some programs select the best qualified from those meeting the minimum requirements.

By delegation from the Chancellor, the Admissions Advisory Committee has the authority to grant limited exceptions to the standard entrance requirements set forth in this *Catalog* and prescribed by the University of North Carolina Board of Governors policies. Exceptions for student-athletes are made by the Chancellor after review and recommendation by the Director of Athletics, the Faculty Athletics Representative, and the Athletic Academic Center under the direction of the Provost and Vice Chancellor for Academic Affairs. Notification of the admissions decision is available as soon as the decision is made. Some programs have special admissions processes and may follow alternate timelines.

Students planning to live on campus should complete the online housing application at housing.charlotte.edu after they receive confirmation of their acceptance in the mail.

Information about undergraduate programs is available from:

Office of Undergraduate Admissions
Gage Undergraduate Admissions and Visitors Center
University of North Carolina at Charlotte
9201 University City Boulevard
Charlotte, North Carolina 28223-0001
Telephone: 704-687-5507
Fax: 704-687-1664
E-mail: admissions@charlotte.edu
Web: admissions.charlotte.edu

International Admissions

International students should contact the Office of Undergraduate Admissions by telephone at 704-687-5507, by fax at 704-687-1664, or by email at intl.admissions@charlotte.edu. The primary focus is the admission of students on non-immigrant visas. Undergraduate Admissions processes applications, evaluates credentials, makes admissions decisions, and serves as consultant to prospective students, academic advisors, sponsors, and agencies representing international students and departments. When students are admitted, Undergraduate Admissions provides documentation to the International Student/Scholar Office for Immigration purposes. Application forms and

additional information are available online at admissions.charlotte.edu/international.

When to Apply

Applicants are advised to submit their applications for admission well in advance of the schedule below. The suggested deadline dates are based on the amount of time generally required to process an application and inform the applicant of the admission decision. **Early application is generally advantageous and particularly for programs with limits on the number of new students that can be accepted.**

Freshman Deadline Dates	
Applications Completed By:	Applicants Notified of Decision By:
November 1	January 30
February 1*	April 1

*Freshman students whose applications are completed after the February 1 date will be considered on a space available basis.

Transfer Deadline Dates			
Term	Suggested Application Date	Priority Deadline	Term Begins
Fall	February 15	May 15	August
Spring	September 1	November 15	January
1 st Summer	January 1	May 1	May
2 nd Summer	January 1	May 15	July

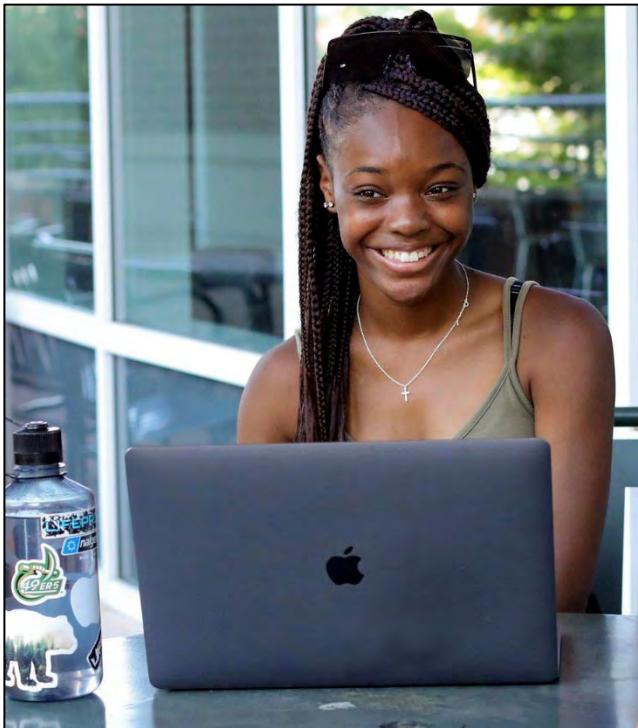

Deadlines for **international students** are earlier. Please refer to the Undergraduate Admissions website for current deadlines.

The University may alter the dates for acceptance of applications without further notice in accordance with available resources and the enrollment limitation established by the North Carolina General

Assembly. For the most current deadlines, please refer to the Undergraduate Admissions website at admissions.charlotte.edu.

Admission Application

The applicant is responsible for supplying all required credentials. Credentials must be official documents and not student copies. Nondisclosure of an applicant's complete academic history will result in rejection of the application and/or immediate dismissal from the University.

Freshmen Applicants

For Freshman Admission, the application includes:

- 1) A completed online *Application for Undergraduate Admission* form
- 2) Application fee of \$75 (nonrefundable and nondeductible)
- 3) Official high school transcript, GPA computed on a 4.0 scale, and senior courses in progress (A high school equivalency certificate or GED may be submitted in lieu of a high school diploma)
- 4) Essay
- 5) Additional credentials, specified below, for international applications

Please note: Effective Fall 2025, students with a weighted GPA between 2.5 and less than 2.8 must submit SAT or ACT scores. Effective Fall 2026, a score of 17 or higher on the ACT or a 930 or higher on the SAT will be required. Students with a weighted GPA of 2.8 or higher have the option to submit these scores.

Transfer Applicants

For Transfer Admission, the application includes:

- 1) A completed online *Application for Undergraduate Admission* form
- 2) Application fee of \$75 (nonrefundable and nondeductible)
- 3) Official high school transcript (This may be waived for applicants who

have already completed an A.A., A.S., A.E., B.A., B.S., or B.F.A. degree or applicants who have more than 24 hours of transferable credit at the discretion of Undergraduate Admissions.)

- 4) One official transcript from every college attended, including summer sessions and any dual enrollment courses taken while enrolled in high school
- 5) Additional credentials, specified below, for foreign educated applicants

International Applicants

For Admission of International Applicants, the application also includes:

- 1) Official scores on the Test of English as a Foreign Language (TOEFL), Duo Lingo, PTE Academic, or International English Language Testing System (IELTS) if the applicant's native language is something other than English
- 2) A course by course evaluation for all college coursework completed outside of the United States. Transfer students should submit a document evaluation for high school coursework. First year applicants must submit a course by course evaluation for high school coursework.
- 3) A Statement of Financial Responsibility showing the applicant's financial resources while in the United States

Any student whose native language is not English will be required to submit proof of English language proficiency.

University Admission Requirements

Freshman Admission Requirements

Candidates for admission to freshman standing, including transfer applicants who present fewer than 24 hours of transferred credit, must:

- 1) Submit a completed application for admission. A completed application is defined as the application, essay, and the official transcripts from all schools attended.
- 2) Have graduated from an approved or accredited high school or have earned an equivalency certificate or G.E.D.
- 3) Present the following **High School Course Units**: 4 units in *English*, emphasizing grammar, composition and literature; 4 units in *mathematics*, including Algebra I, Algebra II, and geometry, and a higher level mathematics course for which Algebra II is a prerequisite; 2 units in *social studies*, including one unit in U.S. history; and 3 units in *science*, including at least one unit in a life or biological science (e.g., biology), at least one unit in a physical science (e.g., chemistry, physics, physical science), and at least one laboratory course; two additional academic units of English, Mathematics, science, social studies, world languages or computer science. Completion of two sequential world language courses is recommended. It is recommended that the candidate for admission also complete a third unit of the same foreign language. Seniors should select a challenging academic schedule that includes English, math, science, social studies (history), and a foreign language.
- 4) Present satisfactory high school grades.
- 5) Present all college-level work completed in high school by submitting one official copy from any college or university attended.
- 6) Request official Advanced Placement (AP), International Baccalaureate (IB), and Cambridge Exam test results to be sent directly to the Office of Undergraduate Admissions (Code 5105).

- 7) Satisfy any additional requirements for acceptance into their chosen major (if any).
- 8) Present verification of specific immunizations required by North Carolina state law described later in this section of the *Catalog*. An *Immunizations Form* is available to download online at studenthealth.charlotte.edu.

Transfer Admission Requirements

Candidates for admission as transfer students must:

- 1) Submit a completed application for admission. A completed application is defined as the application and the official transcripts from all schools attended, including summer sessions and dual enrollment courses from high school.
- 2) Satisfy the requirements for freshman admission if they do not present at least 24 hours of transferred credit accepted by UNC Charlotte.
- 3) Present the High School Course Units (required of all students under the age of 21) specified in the Freshman Admission Requirements. Transfer applicants who did not complete the required course units in high school may earn an Associate in Arts, Associate in Science, Associate in Fine Arts, Associate of Engineering degree, or complete 24 hours of transferable credit.
- 4) Present an academic average of at least C (a grade point average of at least 2.0 on a 4.0 scale) on all post-secondary courses attempted, as calculated by the UNC Charlotte Office of Undergraduate Admissions.
- 5) Be in good standing at the last college or university attended.
- 6) Satisfy any additional requirements for acceptance into their chosen major (if any). For more information concerning selective major requirements, please consult the Admissions website at admissions.charlotte.edu.
- 7) Present verification of specific immunizations required by North Carolina state law described later in this section of the *Catalog*. An *Immunizations Form* is available to download online at studenthealth.charlotte.edu.

Refer to the Undergraduate Admissions website for the most current requirements.

IMPORTANT NOTE: Failure to indicate all institutions of higher education attended on any application for admission or readmission to UNC Charlotte is considered falsification of the application and will result in forfeiture of the transfer of all credits from those institutions attended, as well as possible disciplinary action.

Readmission of Former Students

For details on readmission of former students, please see the "Degree Requirements and Academic Policies" section of this *Catalog*.

Non-Degree Students

Non-degree students are those who are not seeking a degree at UNC Charlotte. On very rare occasions, if space is available, they may enroll in undergraduate courses at the University until they have attempted a total of 18 credit hours with grade evaluation. Students who did not gain admission to a degree-seeking program will not be admitted as a non-degree student. Admission as a non-degree student is up to the discretion of the Office of Undergraduate Admissions. Regular degree students will have preference for places in classes. Non-degree students are expected

to conform to the standards required of all students. After reaching the 18-hour limit, non-degree students must be reviewed and be acceptable for regular degree status before continuing at the University. Non-degree international exchange and senior citizen course audit students are exempt from this requirement.

Non-degree students who have done previous college work (including UNC Charlotte) must be eligible to return to the institution last attended.

The student must be 18 years of age or over and must understand at the time of his/her registration that the work completed in non-degree student status will be evaluated in terms of major department and degree requirements only after the student's formal admission to a degree program.

Visiting Students

Students enrolled at other colleges and universities who wish to take specific courses at the University in a given semester or term may be admitted as visiting students. They register on a space available basis after UNC Charlotte degree-seeking students and must submit a new application for each term they would like to attend as a visiting student.

Pre-Collegiate Enrichment Program (PEP)

The Pre-Collegiate Enrichment Program (PEP) provides an opportunity for highly qualified students to take college credit courses while enrolled in secondary school. Records of credit earned will be maintained for use at the University or at another institution of higher learning. The program is designed for those students who have exhausted their course offerings at their high school and need to supplement their high school curriculum with college courses. The program is not designed for students who wish to take courses to fulfill high school requirements.

Applicants recommended for participation in the program usually have shown very advanced ability in particular academic areas. The recommendations are normally made by the secondary school principal and are reviewed by the Director of Undergraduate Admissions on an individual basis. PEP students are not permitted to live in campus housing.

Admission Requirements for Programs

Baccalaureate Programs

Additional requirements beyond acceptance into UNC Charlotte may be required for particular baccalaureate program majors. See the individual department and program listings for details.

Second Baccalaureate Degree

Students who have earned a bachelor's degree from UNC Charlotte and wish to earn a second bachelor's degree should apply for admission through the Office of the Registrar. Students who have earned a bachelor's degree from a college or university accredited by an accepted accrediting body other than UNC Charlotte should apply through the Office of Undergraduate Admissions. The University automatically waives the General Education requirements for each second degree student. Students may apply for admission to a program leading to a second degree of the same level if the following requirements are met:

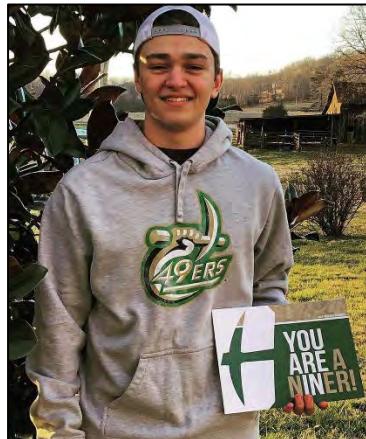

- 1) A completed application must be sent to the Office of Undergraduate

- Admissions in accordance with the published application dates.
- 2) The major field selected must be different from that of the first degree.
 - 3) The degree sought must be different from the first when that degree was granted by UNC Charlotte.
 - 4) The applicant must meet the requirements for acceptance into the selected field.

Undergraduate Certificate Programs

Students who wish to apply for undergraduate certificate programs should consult the Office of Undergraduate Admissions website at admissions.charlotte.edu. If a student has already received a bachelor's degree, they must meet second baccalaureate degree admissions requirements. Students

who have not received a bachelor's degree and have attended a college or university must meet transfer admissions requirements and be admitted to a degree program. Students with a high school diploma who have not attended a college or university must meet freshman requirements and be admitted to a degree program. Some certificate programs may have additional requirements. See the individual certificate listing for details.

Academic Proficiency and Placement

Based on academic records or placement tests, incoming first-year and new transfer students are assessed to determine their proficiency in the written use of English; their mathematical competency level; and their reading skill, vocabulary, and grammar of foreign languages. The objective is to place a student into courses that are commensurate with the student's level of competency; students then register for the course level in which they are placed.

Language Placement and Course Exemption Process

All new students can determine language placement or language course exemption by the following means: Language Placement Test, the CLEP Test, Advisor Contact or Certification of Proficiency. Students should visit "Guidance on Language Placement and Course Exemption" at languages.charlotte.edu/Language-Placement-Course-Exemption to determine the correct process.

Language Placement and Course Exemption Policies

There are no language requirements associated with the General Education Program. Students are required to take language only if it is a requirement of their college or major department. The College of Arts + Architecture and the College of Humanities & Earth and Social Sciences have a language requirement.

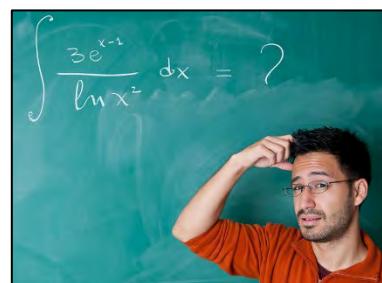

All students within these colleges are required to demonstrate proficiency in a language of their choice through at least the 1202 level. In order to meet this proficiency requirement, students may do one of the following:

- Complete the coursework at UNC Charlotte
- Complete three years of the same language in high school with a grade of C or above
- Achieve the appropriate score on the Language Placement Test
- Receive credit through the CLEP test
- Place out of or be considered exempt from the 1202 level through the Certification of Proficiency process
- Transfer in the equivalent of 1201 and 1202 from another institution
- Earn transfer or transient credit for 1201 and complete the 1202 course, or complete 1201 and place out of or earn transfer or transient credit for 1202
- Transfer in with an A.A., A.S., or A.F.A. degree (for College of Humanities & Earth and Social Sciences)

Although all students in the College of Arts + Architecture and College of Humanities & Earth and Social Sciences are subject to the 1202 proficiency requirement, students in select departments will additionally have to satisfy a proficiency requirement through the intermediate (2000) level, or in rare cases, the advanced (3000) level. Students should consult with their major department to determine whether or not they are required to complete the intermediate or advanced proficiency requirement.

Mathematics Placement Procedures

All students, both freshmen and transfer, are placed into mathematics using their SAT or ACT scores if those scores are in Banner. Students without these scores in Banner, but who are transferring in the equivalent to college algebra, pre-calculus, or calculus credit, are placed based on the class level of the credit received. Students without these scores in Banner who are not transferring in the math credits required for their program of study must take a placement examination to determine their appropriate entry-level MATH course.

Writing Placement Procedures

UNC Charlotte uses a self-selection process for students to choose which of our two primary First-Year Writing Courses they will take: WRDS 1103 or WRDS 1104. WRDS 1103 is worth 3 credit hours and is best suited for students who are comfortable with their writing and research skills. WRDS 1104 is a 4-credit-hour course, with the extra hour for a lab/studio component. This class is better suited for students who feel like their writing and research skills need a bit more work to lay the foundation for college success.

All students may also use the Writing Resources Center (WRC) for additional support. To learn more about WRDS 1103, WRDS 1104, and the WRC, visit writing.charlotte.edu.

Health Requirements

Health Insurance Requirements

Health insurance is required of all degree-seeking undergraduate students with six or more on-campus credit hours; all degree- or

certificate-seeking graduate students with three or more on-campus credit hours; and all international students with an F-1 or J-1 visa, regardless of credit hours.

Students who are currently uninsured may enroll in the Student Health Insurance Plan by completing the enrollment form found on the Student Health Center website at studenthealth.charlotte.edu. Pricing is available on the site as well.

Students with existing health insurance coverage must supply this information online to the Student Health Center every Fall and Spring semester by the posted due date. See the Student Health Center website above for details. Failure to comply will result in automatic enrollment in the Student Health Insurance Plan for the semester.

Immunization Requirements

To protect all students at UNC Charlotte, North Carolina state law requires proof of immunizations upon entering the University. Under North Carolina regulations, students not in compliance will be dropped from all courses. **Upon learning of admission to the University, students should submit their immunization records immediately.** Immunization Records must be uploaded via the Online Student Health Portal. Further details regarding the immunization requirements and the records submission process are available online from the Student Health Center at studenthealth.charlotte.edu. Please consult the website for more detail about the requirements before submitting records to the University. Although a health physical is not required for admission to the University, students are strongly encouraged to contact their healthcare provider or local health department to discuss additional recommendations for vaccinations.

COLLEGE/UNIVERSITY VACCINES AND NUMBER OF DOSES REQUIRED	
Vaccines Required	Dosage
Tetanus, Diphtheria, Acellular Pertussis (Tdap) ¹	1
Diphtheria, Tetanus, and/or Pertussis ¹	2
Polio ²	3
Measles ³	2

Mumps ⁴	2
Rubella ⁵	1
Hepatitis B ⁶	3
Varicella ⁷	1

FOOTNOTE 1 - Three doses of tetanus/diphtheria toxoid, of which one must be tetanus/diphtheria/pertussis (Tdap). Students enrolling in a 4-year college or university for the first time on or after July 1, 2008, must receive a tetanus/diphtheria/Pertussis (Tdap) vaccine.

FOOTNOTE 2 - An individual attending school who has attained his or her 18th birthday is not required to receive polio vaccine.

FOOTNOTE 3 - Measles vaccines are not required if any of the following occur: Diagnosis of disease prior to January 1, 1994; An individual who has been documented by serological testing to have a protective antibody titer against measles and submits the lab report; or An individual born prior to 1957. An individual who enrolled in college or university for the first time before July 1, 1994, is not required to have a second dose of measles vaccine.

FOOTNOTE 4 - Mumps vaccine is not required if any of the following occur: An individual who has been documented by serological testing to have a protective antibody titer against mumps and submits the lab report; An individual born prior to 1957; or Enrolled in college or university for the first time before July 1, 1994. An individual entering college or university prior to July 1, 2008, is not required to receive a second dose of mumps vaccine.

FOOTNOTE 5 - Rubella vaccine is not required if any of the following occur: 50 years of age or older; Enrolled in college or university before February 1, 1989 and after their 30th birthday; An individual who has been documented by serological testing to have a protective antibody titer against rubella and submits the lab report.

FOOTNOTE 6 - Hepatitis B vaccine is not required if any of the following occur: Born before July 1, 1994. Serological testing to document protective antibody titer against Hepatitis B is not acceptable.

FOOTNOTE 7 - Varicella vaccine is not required if any of the following occur: Documented physician diagnosis of disease, a student has been documented by serological testing to have a protective antibody titer against varicella and submits the lab report; or a student is born before April 1, 2001.

International Students and Students Who Have Lived In or Traveled to High Risk Countries/Territories

Vaccines are required as noted above. Additionally, international and other high-risk students are required to have a TB skin test within the 12 months preceding the first day of classes. A TB blood test (T-spot, QuantiFERON Gold Plus) is also accepted. A chest x-ray is required, if TB test is positive.

Freshman and Transfer Students

Immunization records are not sent with other admission records from your previous school. You must request your immunization records be sent directly to the Student Health Center.

Immunization Policy Reinstatements

At least 21 days prior to the start of classes, students who are not in compliance will receive a communication from the Student Health Center (SHC) with details on how to comply with state law. Students who remain in noncompliance as determined by the SHC will be withdrawn from all applicable courses by the Office of the Registrar at the end of the thirty (30) day period. Students are therefore strongly encouraged to submit their immunization records prior to the start of the semester. The SHC will also monitor students who are not in compliance but have been approved by the SHC for an extension to receive the necessary immunizations as indicated by a physician's letter. Once the date for the extension expires, and if the student is still not in compliance, the SHC

will notify the Office of the Registrar that the student has failed to comply with Immunization Requirements. The Office of the Registrar will then withdraw the student from all applicable courses.

Students will be reinstated to their courses after providing evidence of compliance with immunization requirements to the SHC before the end of the last class day of the semester. This reinstatement pertains only to student enrollment status and does not in any way guarantee that the academic, financial, and/or other consequences of noncompliance with immunization requirements can or will be remedied. Such consequences may include, but are not limited to, impact on immigration status, financial aid eligibility, University housing, and University accounts. Additionally, reinstated students may not be eligible to make up class work, assignments, tests, or exams as faculty are encouraged but are not obligated to allow make-up work as appropriate.

Decisions under this policy cannot be appealed, and students will not be reinstated if they become compliant with immunization policies after the last class day of the semester.

Contact Information

Questions regarding these mandatory requirements may be directed to the Student Health Center Immunizations Department at 704-687-7424 or immuinfo@uncc.edu.

New Student Orientation, Registration, and Welcome

New Student Orientation (NSO)

Once admitted, new undergraduate students are required to complete New Student Orientation (NSO), which includes virtual modules and academic advising, as well as attending an in-person session scheduled during the Summer or immediately prior to the start of the Fall and Spring semesters. Separate programs are offered for new first-year students, transfer students, and their parents and family members. NSO prepares students and families to succeed at UNC Charlotte by understanding academic expectations, developing connections with their peers, and learning about important campus processes. Visit the [New Student Orientation website](#) for more information.

International Student Orientation

International Student Orientation, held at the beginning of every semester, is required for non-resident (F-1 and J-1 visas) students.

Program topics include immigration, academics, cultural adjustment, and program opportunities. Contact the International Student/Scholar Office or visit their website online at isso.charlotte.edu for more information.

New Student Welcome

The New Student Welcome is an event attended by students, faculty, and staff to officially welcome new undergraduate students to UNC Charlotte. During the event, students learn about UNC Charlotte's history, mission, values, and engagement opportunities.

University Regulation of Student Conduct

University Regulation of Student Conduct

As students willingly accept the benefits of membership in the UNC Charlotte community, they also commit to obligations to observe and uphold the principles and standards of conduct that reflect the values of the UNC Charlotte community.

At UNC Charlotte, *University Policy 406, The Code of Student Responsibility*, fulfills the duty of the Chancellor to regulate matters of student conduct in the University community. *University Policy 407, The Code of Student Academic Integrity*, governs student behavior relating to academic work. All UNC Charlotte students are expected to be familiar with both Codes and to conduct themselves in accordance with these requirements. Any person may report an alleged violation(s) of the Code online at incidentreport.charlotte.edu. Individuals may report crimes or incidents involving imminent threat of harm to Police and Public Safety at 704-687-2200.

The University has also established a program for the prevention of the use of illegal drugs and alcohol abuse (*University Policy 711*), as well as a policy regulating smoking and tobacco product use on campus (*University Policy 707*). All UNC Charlotte students are obligated to be familiar with and to conduct themselves in accordance with the standards set forth in these policies.

Additionally, the Student Government Association has created a code called *The Noble Niner* that solidifies the high standard of morals, principles, and integrity that all students should strive to uphold the reputation of excellence at UNC Charlotte.

The Code of Student Academic Integrity

legal.charlotte.edu/policies/up-407

Below is a brief summary of University Policy 407, *Code of Student Academic Integrity*. Visit legal.charlotte.edu/policies/up-407 for a full version of that policy.

The Code of Student Academic Integrity governs the responsibility of students to maintain integrity in academic work, defines violations of the standards, describes procedures for handling alleged violations of the standards, and lists applicable penalties. Except in cases of Research Misconduct, as set forth in Chapter 3, Section III.3 of the Code, the following conduct, or complicity in the following conduct, is considered Academic Misconduct under the Code:

- A) **Cheating** using or attempting to use materials, or giving assistance or materials without Authorization to another in any academic exercise that could result in gaining or helping another to gain academic advantage. Cheating includes, but is not limited, to the following actions:
 - 1) Copying - copying from another's assignment, examination, or other academic exercise;
 - 2) Use of Unauthorized Materials - using materials or equipment in connection with an assignment, examination, or other academic exercise which have not been authorized by the faculty member, including but not limited to, notes, calculator, websites, or other technology;
 - 3) Misrepresentation - permitting another to substitute for one's self in an academic exercise, or submitting of an academic exercise that has been prepared by another;

- 4) Unauthorized Collaboration - sharing the work or effort in an academic exercise with another individual or individuals without Authorization. [See examples](#).
- B) **Fabrication** means providing fabricated information, including inventing or counterfeiting information, in any form in an academic exercise. [See examples](#).
- C) **Falsification** means altering without Authorization any data or information, regardless of communication method (e.g., e-mail or other electronic communication), in an academic exercise. [See examples](#).
- D) **Misuse of Academic Materials** means sharing, distributing, altering, acquiring, damaging, or making inaccessible academic materials without Authorization, that could result in gaining or helping another to gain an academic advantage. [See examples](#).
- E) **Multiple Submission** means submitting academic work or substantial portions of the same academic work (including oral reports) in more than one academic exercise without Authorization. [See examples](#).
- F) **Plagiarism** means presenting the words or ideas of another as one's own words or ideas, including failing to properly acknowledge a source, unless the ideas or information are common knowledge. Plagiarism includes self-plagiarism, which is the use of one's own previous work in another context without indicating that it was used previously. [See examples](#).
- G) **Research Misconduct** means a determination that Research Misconduct has occurred under *University Policy 309, Responding to Allegations of Misconduct in Research and Scholarship* and its *Supplemental Procedures*. (See Chapter 3, Section III of the Code.)

A full explanation of these definitions, and a description of procedures used in cases where student violations are alleged, is found in the complete text of *University Policy 407, The Code of Student Academic Integrity*. The Code of Student Academic Integrity, as it may be modified from time to time. Students are advised to contact the Office of Student Accountability & Conflict Resolution or visit legal.charlotte.edu/policies/up-407 to ensure they consult the most recent edition.

The Code of Student Responsibility

legal.charlotte.edu/policies/up-406

Below is a brief summary of University Policy 406, Code of Student Responsibility. Visit legal.charlotte.edu/policies/up-406 for a full version of that policy.

All UNC Charlotte Students are expected to be familiar with University policies and procedures, and to conduct themselves accordingly.

University Policy 406, Code of Student Responsibility ("the Code") fulfills the duty of the Chancellor to regulate matters of Student behavior in the University community.

University Policy 407, Code of Student Academic Integrity, governs Student behavior relating to academic work.

University Policy 501, Nondiscrimination; University Policy 502, Sexual Misconduct and Interpersonal Violence; and University Policy 504, Title IX Grievance Policy, govern behavior related to discrimination, discriminatory harassment, and sexual or interpersonal misconduct, respectively. Any such allegations against Students are processed under those policies and not under this Code. See the Office of Civil Rights and Title IX website for more information.

All Student inquiries concerning the Code of Student Responsibility or University Policy 407 should be directed to the Associate Dean of Students and Director of Student Accountability & Conflict Resolution ("Director").

Philosophy and Purpose

The mission of Student Accountability & Conflict Resolution is to uphold academic and community standards; encourage personal accountability and responsible decision making; promote Student learning; and reduce and prevent behavior that undermines Student success and community safety.

Consistent with UNC Board of Governors Policy 700.4.2, the University is committed to providing a fair, impartial, and efficient process facilitated through compassionate conversations in which Students are heard, respected, and treated with dignity. All Students are responsible for conducting themselves in a manner that helps enhance an environment of learning in which the rights, dignity, value, and freedom of each member of the academic community are respected.

The University works to create and sustain an environment where freedom of speech and expression are supported and honored. The University has the discretion to regulate the time, place, and manner of exercising these and other Constitutionally-protected rights. In administering this Code, the University will exercise care to preserve the freedom of speech and expression for all in the campus community.

The University must balance its commitment to preserving Student

rights, encouraging responsible growth and development of its Students, protecting the rights of those targeted by Student actions, and holding Students accountable for their actions. This balance is achieved through the use of a full spectrum approach that includes adjudicatory and alternative resolution options.

The purpose of this Code is to define what behavior is prohibited, Students' rights and resolution options, and the range of outcomes that may be implemented.

Prohibited Behaviors, Procedures, and Outcomes

Chapter 3 of the Code (legal.charlotte.edu/policies/up-406#ch3) includes a list of behaviors that are prohibited by the Code, **including, but not limited to**, acts of harm (physical injury, fear/risk, harassment/intimidation/bullying, unwanted conduct, etc.), alcohol violations, disorderly behavior, disruption of University activities, drug violations, false identification, fire safety, hazing, misrepresentation, retaliation, theft, trespassing, unauthorized recording, vandalism, violation of law, violation of University policies/regulations, and weapons violations. For a full explanation of all conduct prohibited under the Code, consult Chapter 3 of the Code at legal.charlotte.edu/policies/up-406#ch3.

Chapter 4 of the Code (legal.charlotte.edu/policies/up-406#ch4) provides the accountability procedures. Specific procedures for adjudicating cases are detailed in the Procedures for Case Resolution supplemental to the Code.

Chapter 5 of the Code (legal.charlotte.edu/policies/up-406#ch5) details possible outcomes imposed on Students or Student Organizations found responsible for violating the Code.

Chapter 6 of the Code (legal.charlotte.edu/policies/up-406#ch6) provides information on appeals.

A full explanation of prohibited behaviors, and a description of procedures used in cases where violations are alleged, including appeals processes, are found in the complete text of The Code of Student Responsibility and the Procedures for Case Resolution, as they may be modified from time to time. Students are advised to contact the Office of Student Accountability and Conflict Resolution or visit legal.charlotte.edu/policies/up-406 to ensure they consult the most recent edition.

Sexual Misconduct and Interpersonal Violence

legal.charlotte.edu/policies/chapter-500

The University of North Carolina at Charlotte is committed to providing a respectful, safe, and inclusive environment for all University community members and guests of the University. Unlawful

discrimination and discriminatory harassment, including any form of sexual misconduct or interpersonal violence, undermine the mission of the University and will not be tolerated. The University also strictly prohibits retaliation against individuals for reporting sexual misconduct or interpersonal violence or for cooperating in the University's investigation of sexual misconduct or interpersonal violence. The University's applicable policies, available in Chapter 500 of University Policies, set forth expectations for creating and maintaining an environment free of sexual misconduct and interpersonal violence. The procedures applicable to specific complaints, including but not limited to retaliation, are available on the Office of Civil Rights and Title IX website.

Sexual misconduct (including but not limited to sexual harassment and sexual exploitation) and interpersonal violence (including sexual assault, dating violence, domestic violence, and stalking) are violations of both law and University policy and will not be tolerated in the University community. Such behaviors are particularly sensitive issues that could affect any member of the University community, and as such, reports of sexual misconduct and interpersonal violence will be dealt with promptly and equitably by the University administration, regardless of whether the allegations are made formally, informally, in writing, or verbally.

Anyone may report alleged sexual misconduct or interpersonal violence against a student, faculty member, or staff member to the University's Office of Civil Rights and Title IX. All University employees are expected to report alleged violations of these policies to the University's Office of Civil Rights and Title IX and may be subject to disciplinary action, up to and including dismissal, for failing to report.

The University's Office of Civil Rights and Title IX will contact the individual who reportedly experienced a violation of the applicable policy and discuss with the individual available accommodations, resources, and resolution options. The University's Office of Civil Rights and Title IX will assist the individual in utilizing the applicable University process for that individual's report, as set forth on the Office of Civil Rights and Title IX website. For more information, see civilrights.charlotte.edu/.

The Program to Prevent Use of Illegal Drugs and Alcohol Abuse

legal.charlotte.edu/policies/up-711

Below is a brief summary of University Policy 711, Program to Prevent Use of Illegal Drugs and Alcohol Abuse. Visit legal.charlotte.edu/policies/up-711 for a full version of that policy.

In keeping with efforts to maintain an environment that supports and encourages the pursuit and dissemination of knowledge, it is the policy of The University of North Carolina at Charlotte to consider the use of illegal drugs or alcohol abuse by students, faculty and staff or by others

on premises under University control to be unacceptable conduct that adversely affects the educational environment.

To remind students, faculty, and staff of their responsibilities for maintaining a drug-free environment, this Policy will be distributed throughout the University community each year. Further, the University considers a sound awareness, education, and training program indispensable in combating illegal use of drugs and alcohol abuse, both as a preventive measure and as a remedy. The scope of the University program addresses the awareness needs of students, faculty, administrators, and other staff members and includes the following minimum components.

- The health hazards associated with the use of illegal drugs and alcohol abuse.
- The incompatibility of the use of illegal drugs or abuse of alcohol with maximum achievement of personal, social, and educational goals.
- The potential legal consequences (including both criminal law and University discipline) of illegal drug use and alcohol abuse.
- The effective use of available campus and community resources in dealing with illegal drug use and alcohol abuse problems.

It is the responsibility of all students, faculty, and staff to conduct themselves in a way that contributes to an environment free of illegal drug use and abuse of alcohol. In addition, students, faculty and staff are responsible, as citizens, for knowing about and complying with the provisions of North Carolina law that make it a crime to possess, sell, deliver, or manufacture those drugs designated collectively as "controlled substances" in Article 5 of Chapter 90 of the North Carolina General Statutes, as well as federal law (Drug Free Workplace Act), which prohibits unlawful manufacture, distribution, dispensation, possession, or use of a controlled substance in the workplace of any employer receiving federal grant funds.

The Center for Wellness Promotion is responsible for designing and carrying out a program of awareness education and training for students on the subject of preventing the illegal use of drugs and abuse of alcohol. The Center also coordinates a collegiate recovery program, which provides consultation and referral to appropriate facilities in the community for students who may be in need of treatment for substance use disorders and support to students in recovery from chemical dependence.

The Counseling and Psychological Services (CAPS) and the Center for Wellness Promotion's Collegiate Recovery Program shall, within the limits of available resources, provide services and programs to students seeking assistance with problems of illegal drug use or alcohol abuse. In cases in which the treatment needs of such students exceed available campus resources, the Center for Integrated Care shall provide referral to appropriate facilities in the community.

The University's program emphasizes collaboration with local resources, including the Center for Prevention Services, Dilworth Center for Chemical Dependency, Anuvia Prevention and Recovery Center, McLeod Addictive Disease Center, Carolinas Medical Center Behavioral Health Services, Eastover Psychological and Psychiatric Group, The Insight Program, Alcoholics Anonymous, Narcotics Anonymous, Al-Anon, and Nar-Anon. To this end, the University shall participate in the

Charlotte-Mecklenburg Drug Free Coalition and will work with local advisory boards to further collaborate between the University and the Charlotte community.

The University's awareness, education, and training efforts stress prevention. The goal of these efforts is (1) to encourage non-users of illegal drugs and alcohol to continue to be non-users, (2) to encourage users of alcohol to do so safely and responsibly, and (3) to encourage users of illegal drugs to stop such use.

The use of illegal drugs and the abuse of alcohol are considered by the University to be problems that can be overcome. Therefore, the educational and rehabilitative services cited above are available on a confidential basis. However, the possession, sale, delivery, or manufacture of illegal drugs will not be tolerated on campus or off campus in the event that the interests of the University may be affected.

The University will cooperate fully with law enforcement agencies and will apply appropriate disciplinary procedures should a student violate criminal statutes with regard to illegal drugs or alcohol abuse. Violations may subject a student to prosecution and punishment by civil authorities **and** to conduct action by the University.

When a student has been charged by the University with a violation of policies concerning illegal drug use or alcohol abuse, they may be suspended from enrollment before initiation or completion of regular disciplinary proceedings if the Chancellor or the Chancellor's designee concludes that the student's continued presence within the University community would constitute a clear and immediate danger to the health or welfare of other members of the University community. If such a suspension is imposed, an appropriate hearing of the charges against the suspended person shall be held in accordance with the Code of Student Responsibility.

Smoking and Use of Tobacco Products on University Property

legal.charlotte.edu/policies/up-707

Below is a brief summary of University Policy 707, Smoking and Use of Tobacco Products on University Property. Visit legal.charlotte.edu/policies/up-707 for a full version of that Policy.

The University of North Carolina at Charlotte has a vital interest in maintaining a healthy and safe environment for its students, faculty, staff and visitors while respecting individual choice about smoking and use of tobacco products. Consistent with these concerns and with North Carolina law, the following Policy establishes restrictions on smoking and use of tobacco products on University Property and provides procedures for accommodating the preferences of both smokers and non-smokers.

For the purposes of this Policy:

- A) "Smoking" is defined as the use or possession of a lighted cigarette, lighted cigar, lighted pipe, or any other lighted tobacco product, or the use of an electronic inhaler that employs a mechanical heating element, battery, or electronic circuit to heat a liquid nicotine solution contained in a vapor cartridge, such as an electronic cigarette, electronic cigar, electronic cigarillo, or an electronic pipe.
- B) "Tobacco product" means a cigarette, a cigar, chewing tobacco, vapor product, or any other product that contains tobacco and is intended for inhalation, oral use, or nasal use. The term does not include nicotine patches, nicotine gum, nicotine lozenges, or other tobacco cessation products.
- C) A "Building" is defined as any permanent or temporary structure utilized for the support, shelter or enclosure of people, animals, or property. "Buildings" include, but are not limited to: residence halls; classroom and office buildings; workshops; shuttle, light rail, and bus stops; all recreational and athletic facilities, including athletic fields, gymnasiums, and stadiums; parking decks; stairwells; inside and outside dining areas; vending areas; breezeways; and connectors.
- D) A "University Building" is defined as any Building owned, leased as lessor, or the area leased as lessee and occupied by UNC Charlotte.
- E) "University Property" means University Buildings and grounds owned, leased, operated, controlled, or supervised by UNC Charlotte.
- F) A "University Vehicle" is defined as a vehicle owned or leased by UNC Charlotte.
- G) A "Designated Smoking Area" is defined as an exterior area on the UNC Charlotte campus designated by the Chancellor or the Chancellor's designee as a place for smoking. Designated Smoking Areas will be marked by proper signage, and are subject to the provisions in Section III of this Policy.

Section III. The following restrictions apply to smoking and use of tobacco products on University Property:

- A) Smoking and use of tobacco products is prohibited within all University Buildings.
- B) Smoking is prohibited within 100 linear feet of any University Building unless otherwise allowed under subsection III.D.
- C) Smoking and use of tobacco products in University Vehicles is prohibited.
- D) Smoking is permitted on University Property in Designated Smoking Areas. See the Smoking Policy Map at https://facilities.charlotte.edu/wp-content/uploads/sites/1297/2024/05/Uncc_Smoking_Map.pdf.

Additional restrictions on smoking or use of tobacco products required for safety reasons may be imposed by the University on a case-by-case basis. Areas with such restrictions will be identified by signage.

Cooperation and consideration between smokers and non-smokers, and between users and non-users of tobacco products is necessary to ensure the successful implementation of this Policy. Effective implementation of this Policy depends upon the courtesy, respect, and cooperation of all members of the University community.

Violation of this Policy may subject a student to conduct action under the Code of Student Responsibility.

Noble Niner Code

studentaffairs.charlotte.edu/about-us/resources/noble-niner

The Noble Niner Code was authored by the Student Government Association and describes the ideals which every Charlotte 49er student can ideally reach as they become a fully actualized individual.

It was approved by the UNC Charlotte Board of Trustees on April 20, 2007, and is now adopted as an official document of the University.

Scholarship

A Niner shall strive for academic excellence in and out of the classroom while maintaining academic integrity.

Integrity

A Niner shall act to uphold and improve one's self, the community, and the high standards of the institution.

Respect

A Niner shall welcome all aspects of individuality and self-worth while embracing the learning opportunities that our community provides.

Accountability

A Niner shall hold others responsible for their actions while accepting responsibility for one's own.

Dignity

A Niner shall appreciate the intrinsic value of the institution and work to preserve the 49er environment.

Honor

A Niner shall appreciate students, faculty, administration, and staff as contributing members of the University community.

Compassion

A Niner shall demonstrate genuine consideration and concern for the needs, feelings, ideas, and well-being of others.

Character

A Niner shall exemplify all qualities and traits that promote fellowship and camaraderie among the student body, faculty, staff, and administration.

Nobility

A Niner shall exhibit the virtues and values listed above which befit all members of our Niner Nation.

Degree Requirements and Academic Policies

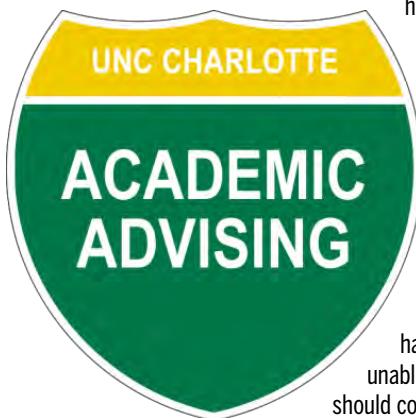

Degree Requirements and Academic Policies

Each student is responsible for the proper completion of his or her academic program, for familiarity with the Catalog, for maintaining the grade point average required, and for meeting all other degree requirements. Students assume academic and financial responsibility for the courses in which they enroll and are relieved of these responsibilities only by formally terminating enrollment.

Academic Advising

advising.charlotte.edu

Each student at UNC Charlotte is assigned an academic advisor or advisory committee in the student's major field of study. Students who

have declared a major, minor, or pre-major should seek advising from their advisor in their College's advising center or department. Students who have more than one major or minor should seek advice from each of their assigned advisors in each academic department. Students who have declared a major and are unable to identify their advisor should contact their major department.

Students who have not chosen or been admitted to a major or pre-major program are enrolled as students of University College (UCOL) and are assigned an advisor from the University Advising Center. The University Advising Center also provides services to students who are transitioning from one major to another. A student may learn how to find their assigned advisor by visiting advising.charlotte.edu.

In helping students achieve their educational and career goals, advisors will focus on enhancing the students' transition from high school or another college/university, will offer assistance in understanding University policies and procedures, and will refer students to campus services that will best ensure the students' success both on campus and in meeting their career goals. The advisors will also facilitate the development of decision-making skills critical to success in college and life. Each student's assigned advisor will communicate regularly with the student throughout the year about important dates, programs, and services that will help ensure success at UNC Charlotte. Students are encouraged to maintain contact with appropriate advisors throughout their university career.

The advisor assists the student to develop a plan of study based on the student's prior preparation and objectives. The academic advisor will provide academic advice and counsel, but the final responsibility for ensuring that program requirements are met remains that of the student.

Baccalaureate Degree Progression

Credit Hours

A credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement. UNC Charlotte adheres to the Carnegie unit, which is a nationally recognized equivalency that consists of not less than:

- 1) 750 minutes of classroom or direct faculty instruction and a minimum of 1500 minutes of out of class student work for one semester hour of credit. Each credit hour corresponds to 50 minutes per week of classroom or direct faculty instruction and 100 minutes of out of class work per week for a 15 week semester, or the equivalent amount of work over a different amount of time; or
- 2) At least an equivalent amount of work as required in paragraph (1) of this definition for other academic activities or instructional modes of delivery as established by the institution including distance education, hybrid, and face-to-face instruction, laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.

Course Load

A student should complete an average of 15 credit hours each Fall and Spring semester to complete a bachelor's degree in four academic years. Enrollment in more than 18 credit hours in a Fall or Spring semester requires advance approval (via Academic Petition at academicpetition.charlotte.edu) of the dean of the student's major college. An undergraduate student enrolled in 12 or more credit hours is considered to be a full-time student and must pay full tuition and fees.

Enrollment in the Summer semester is optional; a maximum load for an undergraduate student enrolled in the Summer semester is 7 credit hours per half term for a total of 14 credit hours. Enrollment in more than 7 credit hours in a Summer half term or 14 credit hours in a Summer semester requires advance approval (via Academic Petition at academicpetition.charlotte.edu) of the dean of the student's major college. Successful academic achievement typically requires two or more hours of preparation per credit hour per week outside of class. For example, enrollment in 16 credit hours would require minimally 32 hours of preparation per week.

Student Classification

At the beginning of each semester, students working toward a bachelor's degree are classified on the basis of earned credit hours:

CLASSIFICATION	EARNED CREDIT HOURS
Freshman	0-29
Sophomore	30-59
Junior	60-89
Senior	90 or more

Baccalaureate Degree Requirements

Credit Hours and Major

All baccalaureate degrees require completion of 120 credit hours (except for programs that have applied for and received a waiver to exceed 120 credit hours from the UNC Charlotte Board of Trustees), including all requirements for a major field of study. Specific requirements for degrees and programs are presented under the college and departmental sections of this *Catalog*.

General Education

All baccalaureate degrees require completion of a common set of General Education requirements. Refer to the General Education Program section of this *Catalog*.

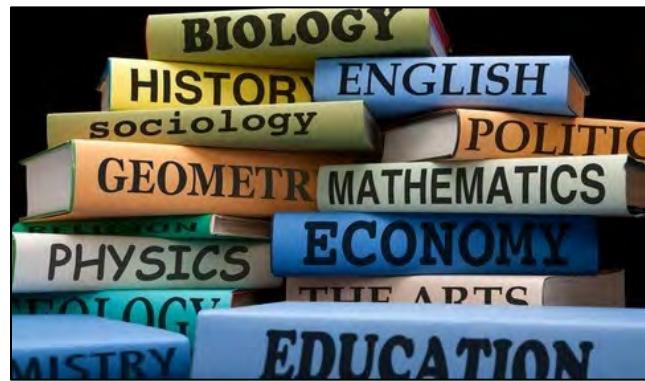

Residence Requirement

To graduate, a student must earn at least 25% of baccalaureate degree requirements at UNC Charlotte, including the last 12 credit hours of work in the major field and at least 6 credit hours of any minor field of study. Coursework taken in residence shall be construed to mean work offered by UNC Charlotte.

- Earning 25% of the degree (the equivalent of 30 credit hours) at UNC Charlotte is a requirement for accreditation by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC). Because this is an accreditation standard, there are no exceptions allowed.
- Exceptions to the requirement of 12 credit hours in the major *may* be made with the approval of the dean of the college of the student's major.

Grade Point Averages

To graduate, a student must be in good academic standing and have earned a grade point average of at least 2.0 and a grade point average of at least 2.0 in the major and in any minor. Some programs require a higher grade point average. The major/minor grade point average is calculated using only courses which satisfy the major/minor requirements. Courses must have been successfully completed and credit earned (subject to the University's repeat policy under "Grading and Related Policies" section). Specific requirements for degrees and programs are presented under the college and departmental sections of the *Undergraduate Catalog*.

General Education

gened.charlotte.edu

The General Education program is an integral element of a student's educational experience at UNC Charlotte. Central to this is the idea that the elements of a student's education are connected in ways that enable them to develop the knowledge, insights, and abilities that will prepare them for their future careers and to be educated citizens who can contribute to our communities. As such, general education has a critical role to play in a students' education, providing a broad foundation of learning that ensures students can apply knowledge and skills in a variety of contexts and disciplines.

At UNC Charlotte, the General Education program is organized around four competencies. Designed to ensure that students connect the breadth of learning that comes from exploring ways of knowing across a diverse range of disciplines to the in-depth knowledge and skills that they experience in their major. That integrative vision is accomplished by the **Core Competencies – Communication, Quantitative / Data, Critical Thinking, and Engagement Across Perspectives** that frame the entire general education curriculum. These competencies are visibly interwoven into the different elements of the lower-division general education requirements so that students can develop the ability to apply these competencies in different contexts. These competencies are also fully integrated into the requirements for each major with intentional connections back to foundational courses which will enable students to re-engage with and deepen their mastery of these competencies in the context of the discipline.

Students should seek advice concerning completion of their General Education requirements from an advisor in their department or college.

The General Education Program is administered by University College, but individual courses are taught by faculty from all of the colleges. Thus, requests for exceptions to any aspects of the General Education requirements for individual students must be approved by the Dean of University College, but matters relating to the course itself need to be addressed by the department and college offering the course. Some transfer students may be exempt from the General Education Requirements; see the Transfer Credit and Advanced Academic Standing section for details.

I. Communication Competency (3-4 credit hours)

The communication competency teaches students to create, use, and interpret messages to generate meanings within and across various contexts. Students are required to take either WRDS 1103 or WRDS 1104, which serves as the foundational course for this competency. WRDS 1104 includes the same face-to-face content as WRDS 1103, but also includes an online writing studio that provides students with additional opportunities to develop skills. After completing one of these courses, students are expected to be prepared to produce effective college-level writing and editing.

Select one of the following:

- WRDS 1103 - Writing and Inquiry in Academic Contexts I and II (3)
- WRDS 1104 - Writing and Inquiry in Academic Contexts I and II with Studio (4)

II. Quantitative/Data Competency Courses (6 credit hours)

The Quantitative / Data competency develops a student's ability to analyze, manipulate, and interpret quantitative information and data. Students are required to complete 6 credit hours in mathematics, statistics, deductive logic or computer science from the following list, and of those at least 3 credit hours must be designated as a MATH or a STAT course. These courses serve as the foundation for the quantitative/data competency.

Mathematics, Statistics, Deductive Logic, or Computer Science

Students should consult with their advisor to determine which courses are appropriate.

- ITSC 1110 - Introduction to Computer Science Principles (3)
- MATH 1100 - College Algebra (3)
- MATH 1101 - College Algebra with Workshop (4)
- MATH 1102 - Introduction to Mathematical Thinking (3)
- MATH 1103 - Precalculus Mathematics for Science and Engineering (3)
- MATH 1105 - Finite Mathematics (3)
- MATH 1120 - Calculus (3)
- MATH 1121 - Calculus for Engineering Technology (3)
- MATH 1165 - Introduction to Discrete Structures (3)
- MATH 1241 - Calculus I (3)
- MATH 1242 - Calculus II (3)
- MATH 1340 - Mathematics for Elementary Teachers I (3)
- MATH 1341 - Mathematics for Elementary Teachers II (3)
- PHIL 2105 - Deductive Logic (3)
- STAT 1220 - Elements of Statistics I (BUSN) (3)
- STAT 1221 - Elements of Statistics I (3)
- STAT 1222 - Introduction to Statistics (3)
- STAT 1322 - Introduction to Statistics II (3)

Note: Most undergraduates at UNC Charlotte major in programs that require mathematics or statistics as related work. For these students,

the related mathematics requirements determine the courses taken to meet the General Education requirement. Students in majors that do not require related work in mathematics should consult with their advisor to determine which courses they should take.

III. Critical Thinking Competency

The critical thinking competency develops a student's ability to identify and analyze problems, evidence, and solutions. CTCM 2530 serves as the foundational course for this competency. This course also builds on the foundation of the communication competency that was introduced in WRDS 1103 or WRDS 1104. Critical thinking and communication skills are recognized as core competencies for students earning a baccalaureate degree, regardless of major. While students continue to develop these skills in advanced courses in their major, the General Education program provides an important foundation. Therefore, all students must take CTCM 2530.

Select the following:

- CTCM 2530 - Interdisciplinary Critical Thinking and Communication (3)

Students must pass WRDS 1103 or WRDS 1104 with a grade of D or above AND have Sophomore standing or higher to register for CTCM 2530.

Transfer students may or may not have met the Critical Thinking and Communication (CTC) requirement in courses taken at previous institutions. Students should check their degree audit in DegreeWorks to see if they have met this requirement.

IV. Global and Local Themes (9 credit hours)

UNC Charlotte's General Education program ensures that students have opportunities to engage in sustained informed inquiry into complex and challenging questions that we face as a society. This integrative vision is accomplished by the three Global and Local Theme courses. These theme courses will provide students with the opportunity to explore related sets of questions from the perspective of the social sciences, arts, and humanities. These courses also serve as the foundation for developing a student's competency in engaging across perspectives.

Global Intersections and Engagement Theme

The Global Intersections and Engagement Theme is grounded in the premise that it is essential for students to understand and engage with the increasingly interconnected global society in which we live both as individuals and as members of society. The courses in the Global Theme will give students this opportunity by exploring the many different ways in which – as individuals and as members of our society – we interact with and are influenced by individuals, cultures, and communities from across the globe. Students should take one global course in the social sciences and one global course in the arts/humanities for a total of two global themes courses.

Global Social Science (3 credits)

Students are required to complete one Global Social Science course selected from the list below:

AFRS 1501 - Global Social Science: Africana Studies (3)
ANTH 1501 - Global Social Science: An Introduction to Anthropology (3)
CAPI 1501 - Global Social Science: Capitalism in Global Context (3)
COMM 1501 - Global Social Science: Global and Intercultural Communication (3)
ECON 1501 - Global Social Science: Economics of Global Issues (3)
ESCI 1501 - Global Social Science: Environment, Society, and Sustainability (3)
GEOG 1501 - Global Social Science: World Geography (3)
HONR 1501 - Global Social Science (3)
INTL 1501 - Global Social Science: Globalization and Interdependence (3)
LTAM 1501 - Global Social Science: Introduction to Latin American Politics and Society (3)
POLS 1501 - Global Social Science: Introduction to Comparative Politics (3)
SOCY 1501 - Global Social Science: Sociological Approaches to Global Issues (3)

Global Arts/Humanities (3 credits)

Students are required to complete one Global Arts/Humanities course selected from the list below:

ARBC 1502 - Global Arts/Humanities: Modern Arab Culture (3)
ARCH 1502 - Global Arts/Humanities: Global Architecture, Culture, and Environment (3)
ARTA 1502 - Global Arts/Humanities: Art in a Global Context (3)
CHNS 1502 - Global Arts/Humanities: Chinese Culture in the World (3)
DANC 1502 - Global Arts/Humanities: Dance in Global Contexts (3)
ENGL 1502 - Global Arts/Humanities: Global Connections in English Studies (3)
FILM 1502 - Global Arts/Humanities: Introduction to Film and Media Art (3)
FRAN 1502 - Global Arts/Humanities: French and Francophone Cultures (3)
FREN 1502 - Global Arts/Humanities: French and Francophone Cultures (3)
GERM 1502 - Global Arts/Humanities: German and German-Speaking Cultures (3)
HIST 1502 - Global Arts/Humanities: Issues in Global History (3)
HONR 1502 - Global Arts/Humanities (3)
ITLN 1502 - Global Arts/Humanities: Italian Culture in the World (3)
JAPN 1502 - Global Arts/Humanities: Japanese Studies (3)
LACS 1502 - Global Arts/Humanities: Introduction to Global Cultures (3)
LTAM 1502 - Global Arts/Humanities: Introduction to Latin American History and Culture (3)
MUSC 1502 - Global Arts/Humanities: Music in Global Communities (3)
PHIL 1502 - Global Arts/Humanities: Global and Comparative Philosophy (3)
RELS 1502 - Global Arts/Humanities: Other Worlds (3)
SPAN 1502 - Global Arts/Humanities: Cultures of the Hispanic World (3)
THEA 1502 - Global Arts/Humanities: Theatre in Global Contexts (3)
WGST 1502 - Global Arts/Humanities: Introduction to Gender Studies Around the World (3)

Local Intersections and Engagement Theme

The Local Intersections and Engagement Theme is grounded in the premise that it is essential for students to understand and engage with

the fact that we live in a nation that has been shaped by a range of cultural, social, economic, and political identities that influence how different groups experience their lives. The courses within the Local Theme will give students this opportunity by exploring the many different ways in which – as individuals and as members of communities – we interact with and are influenced by other individuals, cultures, and communities in our society. Students should take one local course in the social sciences , arts or humanities.

Local Social Science, Arts or Humanities (3 credit hours)

Students are required to complete one Local Social Science, Arts or Humanities course selected from the list below:

AFRS 1512 - Local Arts/Humanities: Africana Studies (3)
ANTH 1511 - Local Social Science: Money, Health, and Happiness (3)

V. Natural Sciences (7 credit hours)

The critical thinking and quantitative/data competencies are reinforced in the natural sciences. These courses introduce students to the methods of various science disciplines, provide an understanding of the current scientific knowledge of the world, how that knowledge is secured, and how scientific knowledge changes over time. Students must take two courses from the list below, one of which must be taken with its corresponding laboratory (L) course, for a total of 7 credits in the natural sciences. Students should consult with their advisor to determine which courses are appropriate.

Select two courses, one of which must be taken with its corresponding laboratory (L) course:

- ANTH 2141 - Principles of Biological Anthropology (4)
ANTH 2141L - Principles of Biological Anthropology Lab (0)
BINF 1101 - Introduction to Bioinformatics and Genomics (4) (*includes both lecture and lab*)
BIOL 1110 - Principles of Biology I (3)
BIOL 1110L - Principles of Biology I Laboratory (1)
BIOL 1115 - Principles of Biology II (3)
BIOL 2120 - General Biology I (3)
BIOL 2120L - General Biology I Laboratory (1)
CHEM 1111 - Chemistry in Today's Society (3)
CHEM 1111L - Laboratory in Chemistry (1)
CHEM 1112 - Chemistry in Today's Society (3)
CHEM 1112L - Laboratory in Chemistry (1)

VI. Foundations of American Democracy (3 credit hours)

The critical thinking and engagement across perspectives competencies are reinforced in the Foundations of American Democracy requirement. This requirement engages students in an exploration of the principles and practices that underpin the United States' democratic system. Through critical analysis of historical documents and contemporary issues, students will develop a nuanced understanding of citizenship and civic responsibility. This course fosters informed engagement in democratic processes, preparing students to contribute thoughtfully to their communities and society at large.

Students are exempted from this requirement if they transfer 60+ credit hours or met this requirement at another UNC System campus or North Carolina Community College.

- AMDM 1575 - Engaging with American Democracy (3)
CAPI 1575 - Capitalism and Democracy (3)
HIST 1575 - American Democracy's Past and Promise (3)
POLS 1575 - American Politics (3)

Declaring Majors and Minors

Declaration of a Major(s)

Students must complete the requirements for an academic major in order to graduate from the University. Students must, therefore, enroll in a program leading to a baccalaureate degree, and, in some cases, they may choose an area of academic concentration within that degree. In order to be admitted to a degree program, a student must meet all requirements for acceptance into that major and submit an approved "Change of Major/Minor" form through the relevant department to the Office of the Registrar. Students may declare multiple majors presuming they meet the requirements for each degree. Students pursuing multiple majors are encouraged to meet with advisors in each department to ensure they are fulfilling degree requirements.

The choice of a major appropriate for a student's interests, aptitudes, and career goals is a crucial decision during a student's academic career. Undergraduate students may declare a major field of study or pre-professional program upon their enrollment at UNC Charlotte as freshmen or transfer students, or they may enroll in the University as undeclared students in University College (UCOL). Undeclared students should work closely with their advisor in the University Advising Center

to identify and prepare for their chosen field of study, and for that reason, advising is required for all undeclared (UCOL) students each semester. All students should declare and be accepted into a major or a pre-professional program by the time they have earned 60 credit hours; transfer students entering with more than 60 credit hours should make that declaration upon enrollment or during their first semester of attendance. A delay in selecting a major and/or multiple changes of major often prevents graduation in a timely fashion.

Declaration of Minor(s)

Students who are working on a bachelor's degree at UNC Charlotte have the option to enroll in a program leading to a minor (or minors) provided: (1) the minor field is different from the major field; (2) the student meets the requirements for acceptance into the minor program; and (3) the appropriate application for admission or the "Change of Major/Minor" form is approved and filed with the Office of the Registrar. Minors are optional and may not be mandated by an academic program/major.

Change of Degree Program, Major, Minor, Concentration

An undergraduate student may change the degree program, major, area of academic concentration, or minor in which they are enrolled and may enroll in a new program of study provided that space is available and they meet the prerequisites for admission to the new program, and submit an approved "Change of Major/Minor" form through the relevant department to the Office of the Registrar. As noted above, changes in major, particularly those made after a student has earned 60 credit hours, may delay graduation.

Second Baccalaureate Degree or Major

Students who have earned bachelor's degrees from UNC Charlotte or a college or university accredited by an accepted accrediting body may apply to a program leading to a second baccalaureate degree or major provided the major field selected is different from that of the first degree or the degree sought is different from the first granted by UNC Charlotte. In addition, the appropriate application for admission must be filed and approved.

Students seeking a second baccalaureate degree or major must: (1) satisfy residency requirement (refer to Residence section of Baccalaureate Degree Requirements) if their first degree was not earned at UNC Charlotte; (2) achieve a minimum grade point average of 2.0 on all work attempted toward the second degree or major; and (3) satisfy all department and college requirements for the degree or major sought. Students who hold a baccalaureate degree from a college or university accredited by an accepted accrediting body will not be required to satisfy the UNC Charlotte General Education Requirements for a second degree. Students will be issued a transfer credit report and will have their credit from their first degree evaluated. Students who are completing a second baccalaureate degree or major within the same degree (e.g., B.A., B.S.) are not awarded another diploma provided the first degree was earned at UNC Charlotte. Second majors are optional and may not be mandated by an academic program/major.

Postbaccalaureate Minor

Students who have earned a bachelor's degree from UNC Charlotte may enroll in a program of study leading to a minor provided: (1) the minor field selected is different from any prior major or minor; (2) the student

meets the requirements for acceptance into the minor program; and (3) the appropriate application for admission or a "Change of Major/Minor" form is approved and filed at the Office of the Registrar. Students who are completing a baccalaureate minor at UNC Charlotte are not awarded another diploma. Minors are optional and may not be mandated by an academic program/major.

Registration

registrar.charlotte.edu

The Office of the Registrar is responsible for the management of the registration process by which students enroll in, drop, and withdraw from courses. Through the registration process, students assume academic and financial responsibility for the courses in which they enroll. They are relieved of these responsibilities only by formally terminating enrollment by dropping or withdrawing in accordance with deadlines specified in the Academic Calendar online at registrar.charlotte.edu/calendar-schedules and the corresponding prorated refund schedule available on the Niner Central website at ninercentral.charlotte.edu/billing-payments-refunds/refunds-financial-aid. If a course is cancelled in which students are enrolled, academic units are obliged to notify those students in a timely manner and to help them find a suitable alternative course, apply a substitution waiver, or use other mechanisms to ensure that degree progress is not impeded.

Registration Appointment Times

Assignments are made according to student classification and cumulative hours earned for undergraduate students and can be viewed online at ninercentral.charlotte.edu/courses-registration/registration-information.

Registration Deadlines

University policies determine when students may enroll or adjust their enrollment in courses. General deadlines are shown below and specific deadlines for a given term or part of term are available online at registrar.uncc.edu/printable-calendar.

Add/Drop Period

The Add/Drop period runs through the 6th business day of the Fall and Spring full terms and on the 2nd business day for Fall and Spring half terms, as well as Summer full and half terms.

During the Add/Drop Period, students can:

- Register for courses
- Drop a course(s) without record (and remain enrolled in other courses)
- Drop all courses without record

Withdrawal Period

The deadline to withdraw from one or more courses (including withdrawal from all courses) is at the 60% completion point of the term. The precise date for each term will be published in the Academic Calendar for each term and part of term.

During the Withdrawal Period, students can:

- Withdraw from one or more courses in accordance with the Withdrawal policy
- Change the grade type to Audit or Pass/No Credit
- Opt out of using a grade replacement

Students who experience a personal or medical crisis have the option of requesting a Withdrawal with Extenuating Circumstances (WE) from courses via the Dean of Students Office during the term the crisis begins. If approved, the Dean of Students Office will notify the student's academic department(s).

Students who leave the University before the close of a term without withdrawing officially will receive a failing or unsatisfactory grade (F for undergraduate credit and U for graduate credit) in each course for which they are registered.

Prerequisites and Permits

All students, including visitors and non-degree students, are required to meet course prerequisites and to obtain the required permissions to enroll in courses through the department which sponsors the course.

Auditing Courses

With the permission of the instructor, a student may audit any course in which space is available. Fees and procedures for this non-credit enrollment are the same as those for a credit enrollment. The procedure for adding, dropping, or withdrawing from an audit course is the same as for credit enrollments. No student will be allowed to change the designation of a course from audit to credit or from credit to audit after the withdrawal date of the semester (or a proportional period for Summer sessions). Participation of auditors in course discussions and in tests or examinations is optional with the instructor. Students who audit receive no University credit, but they are expected to attend the course regularly.

Early Entry to Graduate Programs

Exceptional undergraduate students at UNC Charlotte may be accepted into some certificate, master's, and doctoral programs and begin work toward a graduate certificate or degree before completion of the baccalaureate degree. In those programs offering this option, an applicant may be accepted at any time after completion of 75 or more credit hours of their undergraduate coursework, although it is expected that at least 90 credit hours of undergraduate coursework will have been earned by the time the first graduate course is taken. These students will have provisional acceptance status in the graduate program, pending the award of the baccalaureate degree.

To be accepted to this program, the student must complete an application online at mygradschool.charlotte.edu for the given graduate program and be approved for it. In addition, the student must complete the *Early Entry Program Form* online at graduateschool.charlotte.edu/current-students/forms and have it approved by the Undergraduate Advisor, the Graduate Program Director, and the Graduate School. [Note: The Early Entry Program Form must be approved by the Graduate School before the student begins the Early Entry graduate coursework. Failure to obtain prior Graduate School approval negates the ability to "double count" courses in an accelerated Early Entry Program.] An undergraduate student must have at least a 3.2 overall GPA and have taken the appropriate graduate standardized test and earned an acceptable score. A given program may have more rigorous admissions criteria. If an Early Entry student has not met the normal admission requirements of a 3.0 overall undergraduate GPA at the end of their baccalaureate degree, she/he will be dismissed from the graduate program.

Students accepted into an Early Entry Program will be considered subject to the same policies that pertain to other matriculated graduate students. However, the undergraduate program will remain the student's primary program. Early Entry students are eligible only for undergraduate-level financial aid, grants, and tuition awards.* Early Entry students are restricted to 15 credit hours of graduate level coursework prior to the completion of the baccalaureate degree. No courses taken before admission to the graduate program may be applied to a graduate degree.

Some Early Entry Programs permit students to "double count" graduate-level coursework towards outstanding requirements for the undergraduate degree. The maximum number of graduate credits which may be "double counted" towards an undergraduate degree varies by program. However, under no circumstances will more than 12 credit hours be double-counted. Students use the Early Entry Program Form to detail which courses they plan to "double count" and which courses will be taken solely for graduate credit. Only those graduate-level courses which are applied towards the undergraduate degree are eligible for undergraduate-level financial aid.

Many graduate programs currently offer an Early Entry option. A list of Early Entry Programs may be found on the Graduate Admissions website at gradadmissions.charlotte.edu/programs/early-entry. To be considered for Early Entry admission, a student must complete and submit an application via the Graduate School's admissions system at mygradschool.charlotte.edu and provide supporting documents.

**Note: Students admitted to an Early Entry Program are not eligible to hold a graduate assistantship since they have not completed a baccalaureate degree. Students admitted into an Early Entry Program pay undergraduate fees and undergraduate tuition for all courses (graduate and undergraduate) for which they register until such time that the baccalaureate degree is completed (typically within two semesters).*

Accelerated Master's Programs

Exceptional undergraduate students may be accepted into an Accelerated Master's Program whereby they simultaneously pursue the baccalaureate and master's degrees and gain invaluable mentoring and

research experience along the way. The Accelerated Master's Program may also be accelerated in which up to 12 credit hours earned at the graduate level may be substituted ("double counted") for required undergraduate hours. A list of Accelerated Master's Programs may be found on the Undergraduate Admissions website at admissions.charlotte.edu/academics/accelerated-masters-programs.

In the programs offering this option, an applicant may be considered for admission to the Master's Program directly from high school with a minimum GPA 3.75 or above (on a 4.0 scale) and a minimum score of 1220 on the SAT. For details, see the Undergraduate Admissions website at admissions.charlotte.edu/academics/accelerated-masters-programs.

Note: Students admitted to an Accelerated Master's Program (undergraduate + graduate degrees) are not eligible to hold a graduate assistantship until their final year of study when they are only taking graduate courses. In the Accelerated Master's Program of study, when only graduate courses are taken (typically the final year of study), students are considered "graduate" students and are charged graduate tuition and fees.

Dual Undergraduate and Graduate Registration

First undergraduate degree students at UNC Charlotte who are required to take fewer than 12 credit hours of undergraduate work to fulfill all requirements for the bachelor's degree may be allowed during their final semester to enroll in certain courses for the purpose of obtaining graduate credit. Dually enrolled students will continue to be considered undergraduate students and be charged for the courses taken at the undergraduate level. The total credit hours to be carried in this status shall not exceed 12 credit hours, of which no more than 6 may be for graduate credit. On the basis of work attempted prior to the final semester, such students must meet the grade point criteria for admission to a graduate degree program at the University. No course for which credit is applied to an undergraduate degree may receive graduate credit. Permission to take graduate courses under dual registration does not constitute admission to any graduate degree program at the University. (Undergraduate students may also take graduate courses if admitted to an Early Entry Program or an Accelerated Master's Program.)

Note: Only UNC Charlotte students pursuing their first undergraduate degree are eligible for dual undergraduate and graduate registration. Fifth-year undergraduate students (i.e., students pursuing a second undergraduate degree) are not eligible for dual undergraduate and graduate enrollment.

Inter-Institutional Registration

An inter-institutional registration program is available, for a limited number of undergraduate and graduate students, with the University of North Carolina at Greensboro, North Carolina State University, University of North Carolina at Chapel Hill, Duke University, and North Carolina Central University. The registration process is initiated in the Office of the Registrar and requires, via an Interinstitutional Approval form, the approval of the student's college dean and the Graduate School (graduate students only). Students should consult with their advisor to ensure that the credit earned through inter-institutional registration will allow progress toward degree and compliance with all baccalaureate degree requirements.

Greater Charlotte Consortium

The Greater Charlotte Consortium is a partnership between UNC Charlotte and twelve other campuses: Belmont Abbey College; Central Piedmont Community College; Davidson College; Gaston College; Johnson & Wales University - Charlotte Campus; Johnson C. Smith University; Livingstone College; Pfeiffer University; Queens University of Charlotte; Rowan Cabarrus Community College; Wingate University; and Winthrop University. This partnership is available to undergraduate students and allows registration and enrollment in courses not offered at UNC Charlotte, so that students remain on track to graduation. Students must maintain full-time enrollment status and have no financial holds to enroll. UNC Charlotte students who enroll in a course through the Greater Charlotte Consortium are billed by UNC Charlotte. An application and additional information including program eligibility can be found at greatercharlotteconsortium.org. Students should consult with their advisor to ensure that the credit earned through the Greater Charlotte Consortium will allow progress toward degree and compliance with all baccalaureate degree requirements.

Termination of Enrollment

Termination by the Student

Prior to the end of the Add/Drop Period, students may terminate enrollment in one or more courses by dropping them in accordance with the Registration policy. After the end of the Add/Drop Period, students may terminate enrollment in one or more courses by withdrawing from them in accordance with the Withdrawal and Cancellation of Enrollment policy.

Withdrawal and Cancellation of Enrollment Policy

Students are expected to complete all courses for which they are registered at the close of the Add/Drop Period. These courses will appear on the transcript, count as attempted hours, and except for withdrawals allowed under this policy, receive grades used in the GPA calculation. All types of termination, including withdrawal, withdrawal for extenuating circumstances, and Cancellation of Enrollment are subject to all financial aid and satisfactory academic progress rules.

Withdrawals

(Without Extenuating Circumstances)

Students are allowed opportunities to withdraw from classes and receive a grade of W, subject to the following conditions:

Deadline

The deadline to withdraw from one or more courses (including withdrawal from all courses) is at the 60% completion point of the term. The precise date for each term will be published in the Academic Calendar. After this deadline, late withdrawal will only be allowed for approved extenuating circumstances.

Grade of W

A grade of W will be recorded for each withdrawal without extenuating circumstances. Courses marked W do not count in GPA calculations, but do count in attempted hour calculations for all undergraduate and graduate students.

W-Limit Hours (Undergraduate Students Only)

Undergraduate students may receive a grade of W for no more than 16 credit hours over the course of their Academic Careers. Students may only withdraw from a course if they have enough remaining "W-Limit Hours," as shown in the following examples:

- A student has already received W grades for 14 credit hours and thus has only 2 W-Limit Hours left. The student may not withdraw from a 3-credit course, but could withdraw from a 1- or 2-credit course.
- Another student has 12 remaining W-Limit Hours and is currently taking five 3-credit courses. The student would like to withdraw from all courses but lacks approved extenuating circumstances, and thus must choose at least one course in which to stay enrolled.

Students who are unable to withdraw from a course but stop attending the course will be assigned a grade by the instructor for partial work.

Withdrawal for Extenuating Circumstances

Students who experience serious extenuating circumstances (personal or medical crisis or military deployment) may request a withdrawal for extenuating circumstances. The Dean of Students Office is responsible for developing and communicating standards and procedures in conjunction with the Colleges that govern these decisions (see UNC Charlotte Academic Procedure: Cancellation of Enrollment and Effects of Withdrawal from Courses). The student must submit the request during the term the crisis begins. If approved, a grade of WE will be recorded for each course. Courses marked WE do not count in GPA calculations, but do count in attempted hour calculations. If not approved, the student may appeal to the appropriate office (see UNC Charlotte Academic Procedure: Cancellation of Enrollment and Effects of Withdrawal from Courses online at provost.charlotte.edu/policies/withdrawal-procedure).

Undergraduate Students Only: Undergraduate students who withdraw under approved extenuating circumstances will receive "WE" grades that do not count against their 16-hour limit.

Cancellation of Enrollment

A Cancellation of Enrollment results in removal of all enrollments from all courses for the term. Under Cancellation of Enrollment, courses do not appear on the transcript, count as attempted hours, or receive grades used in the GPA calculation.

Cancellation of Enrollment may occur at the approved request of a student, or through the removal of a student by the University for reasons that include but are not limited to: academic ineligibility, failure to pay tuition and fees, student conduct sanctions, documented emergency, or military deployment. A student may also choose to cancel their own enrollment prior to the first day of classes in accordance with UNC Charlotte Academic Procedure: Cancellation of Enrollment and Effects of Withdrawal from Courses.

More Information

For more information about withdrawing at UNC Charlotte, visit the Withdrawal Services website at withdrawal.charlotte.edu.

Termination by the University

The University maintains the right to terminate a student's enrollment in a course for a variety of reasons including, but not limited to: course schedule changes, course cancellation due to low enrollment, or the student's nonfulfillment of course prerequisites. The University maintains the right to terminate a student's enrollment in all courses in a term for a variety of reasons including, but not limited to: academic suspension, suspension for violation of the Code of Student Responsibility, or suspension in violation of the Code of Student Academic Integrity. Students who have been suspended for academic or disciplinary reasons must apply for readmission as described in the Readmission of Former Students policy.

Course Attendance and Participation

Instructors determine their course policies (including attendance and participation) as long as such policies do not conflict with University policies. Such policies should be pedagogically appropriate. In general, students are expected to attend all scheduled sessions in the courses for which they are registered, participate fully in the learning process, demonstrate respectful behavior while interacting with instructors and peers, and complete all of the course requirements. Instructors may outline additional and more specific standards in the course syllabus, especially when attendance and/or participation are part of the grading criteria for the course.

University-Sanctioned Activities

University-sanctioned events or activities are considered excused absences. A University-sanctioned event or activity is one in which a student formally represents the University to external constituencies in athletic or academic activities. This policy does not supersede individual program attendance and/or participation requirements that are aligned with accreditation or licensure.

Student Responsibilities

- 1) Notification
 - a) A student must inform the instructor of any absence as soon as possible. For any excused absence, a student must inform the instructor no later than the last day of the add/drop period, except when newly added or unforeseen circumstances occur (e.g., a playoff event).
 - b) Notification/Documentation of planned excused absences must be made in writing and delivered by the student electronically or in a face-to-face meeting with the instructor of each class that the student is requesting an excused absence.
- 2) Student experiences that cannot be made up should be discussed with the instructor at the onset of the course to ensure that continued enrollment is feasible while the opportunity to drop the

- class exists.
- 3) Students are responsible for fulfilling any course requirements that occur during the time they are absent from class.
 - 4) Students are expected to maintain satisfactory progress in the course.

Instructor Responsibilities

- 1) Instructors should utilize best practices with regards to course attendance and participation including but not limited to:
 - a) Prioritizing active participation in and engagement with the educational process over course attendance as a measure of student involvement.
 - b) Establish rules of engagement in the syllabus, clarify the course instruction format as in-person, online (synchronous or asynchronous), or a hybrid of in-person and online, and identify multiple ways in which students can demonstrate satisfactory participation. In hybrid or entirely online courses, for example, this could include camera usage, chat boxes, online forums, etc.
 - c) If the course has a policy regarding a limited number of allowed absences, University-sanctioned activities should not count against that limit. In addition, students cannot be required to utilize a "drop" option for work missed afforded to all students due to a University-sanctioned event.
 - d) If a student has a valid University-excused absence, they are entitled to make up missed work for full credit in whatever manner the instructor deems appropriate.
- 2) If student responsibilities are met, the instructor will honor valid University-excused absences that are not already included in other individual instructor excused absences policies.
- 3) The instructor may impose appropriate academic penalties if the student fails to satisfactorily complete the alternate assignment or examination within a reasonable timeframe.
- 4) Required activities outside of class hours that are used for graded participation must be stated in the syllabus. If the required activity falls on a specific date/time, the instructor must provide an alternative assignment, unless the activity is foundational to the course (e.g., a theater performance produced by the class). Such foundational class activities should be included in the course "Notes" in the Banner Schedule. If the activity is one that can be completed over the course of the term and is not limited to a specific date/time, no alternative assignment is required.
- 5) Additional absences from class may be excused by the instructor. Whenever possible, students are expected to seek the permission of the instructor prior to any absences. Examples of valid reasons for consideration of absences include:
 - a) Documented illness
 - b) Serious personal or family emergencies
 - c) Court-imposed legal obligations such as subpoenas or jury duty
 - d) Military obligations
 - e) Academic and/or extracurricular activities
 - f) Religious observances; absences for religious holidays fall under University Policy 409, Religious Accommodation for Students at legal.charlotte.edu/policies/up-409
 - g) Documented quarantining for in-person classes
- 6) If students believe they have been penalized or unjustly treated because of participation in a University-authorized activity, they can appeal using the following sequence of appeal to (1) the

instructor, (2) unit chairperson and (3) the appropriate college dean or designee (college offering the course). The decision of the dean is considered final.

Grading

Instructors assign grades on the basis of their evaluation of the academic performance of each student enrolled in their courses. At the end of the term, the grades are reported to the Office of the Registrar which is responsible for maintaining student academic records and making grades available to students.

Grades

Letters are used to designate the quality of student academic achievement.

UNDERGRADUATE GRADES		
Letter	Meaning	Grade Points Per Credit Hour
A	Excellent	4
B	Good	3
C	Fair	2
D	Passing	1
F	Failing	0
FX	Academic Honesty Violation	0
I	Incomplete	*
IP	In Progress	*
W	Withdrawal	*
WE	Withdrawal (Extenuating Circumstances)	*
AU	Auditing Class	*
NG	Temporary Unreported Grade	*
NR	No recognition given for Auditing Class	*
Cooperative Education		
S	Satisfactory	*
U	Unsatisfactory	*
Pass/No Credit Option		
P	Passing	*
N	No Credit	*

*Not used in computation of grade point average

Grade of FX (Academic Dishonesty Violation)

For details on the use of the FX grade, please see University Policy 407, Code of Student Academic Integrity, Section IV, - Penalties at legal.charlotte.edu/policies/up-407#IV.

Grade of I (Incomplete)

The grade of I is assigned at the discretion of the instructor when a student who is otherwise passing has not, due to circumstances beyond their control, completed all the work in the course. The missing work

must be completed by the deadline specified by the instructor, and no later than 12 months. If the I is not removed during the specified time, a grade of F, U, or N, as appropriate is automatically assigned. The grade of I cannot be removed by enrolling again in the same course, and students should not re-enroll in a course in which they have been assigned the grade of I.

Grade of IP (In Progress)

The grade of IP is based on coursework for courses that extend over more than one semester. For example, a course that requires enrollment for two consecutive semesters would be eligible for an IP grade in the first term (i.e., Undergraduate Senior Project). A grade of IP should not be given for coursework to be completed in one given term. It cannot be substituted for a grade of I. The IP grade expires after six years, and if no final grade has been awarded by that time, the IP grade will default to a grade of N (no credit).

Grade of W (Withdrawal) or WE (Withdrawal with Extenuating Circumstances)

No grade will be given for a course dropped on or before the last day to drop a course without record. After this period, students may only withdraw from a course in accordance with the conditions and deadlines in the Withdrawals policy. Students who withdraw without extenuating circumstances will receive a grade of W and are allowed no more than 16 credit hours of W grades over their academic careers. Students who withdraw under formally recognized extenuating circumstances will receive a grade of WE, indicating that the withdrawn hours do not count against the student's W-limit hours. Post-deadline withdrawal is only allowable for recognized extenuating circumstances. Unsatisfactory academic performance itself is not an extenuating circumstance. The grade of W or WE is posted on the academic transcript.

Pass/No Credit Option

Every student will be permitted during their undergraduate years to select up to a total of four courses (at most one per academic year) in which they can receive an evaluation of P (pass) or N (no credit). This option is designed to encourage curiosity, exploration, and experimentation in areas where a student has strong interest but little or no previous experience. The Pass/No Credit option only applies to courses normally graded on an A-F scale, and it cannot be used on courses taken by a student for credit toward their major or minor or to satisfy University General Education requirements. *[Note: courses designated by the faculty to be graded on a Pass/No Credit basis may count for the major.]* To exercise this option, the student must declare their intention to take a Pass/No Credit option by completing an Academic Petition by the withdrawal deadline for the term. The deadline is available on the Academic Calendar. This petition requires the approval of the student's advisor, major department chair, and college associate dean. Courses completed with the grade of Pass will count toward the hours needed for graduation, but they will not be considered in the computation of the grade point average.

Unsatisfactory Grade Reports

Unsatisfactory Grade Report notifications are sent via email to students in the middle of each semester for courses in which the student is performing below average and a grade has been reported. Students should also seek feedback from instructors. Unsatisfactory grades, if assigned, are available through the secure student access pages of My

UNC Charlotte online at [my.charlotte.edu](#). If not assigned, they are not visible via this medium.

Final Grades

Final grades are available through the secure student access pages of My UNC Charlotte online at [my.charlotte.edu](#).

Final Grade Changes and Appeals from Final Course Grades

When a final course grade other than Incomplete (I) is officially reported by the instructor at the end of an academic term, the grade is recorded by the Office of the Registrar and can be changed only if the grade has been assigned arbitrarily or impermissibly as defined in University Policy 410, Policy and Procedures for Student Appeals of Final Course Grades, available online at [legal.charlotte.edu/policies/up-410](#).

Students should follow the procedures outlined in the policy if they believe that the final course grade that has been assigned is incorrect. The policy requires the student to discuss the grade with the instructor as soon as possible after the grade is received. Students should note, however, that the University is not obliged to respond to a grade appeal unless the student files it with the appropriate department chairperson or interdisciplinary program director within the first four weeks following the last day of the regular semester or the summer term in which the grade was received. When a grade is assigned consistent with University policy, only the instructor has the right to change the grade except as provided in the Incomplete grade policy. When an instructor reports a grade change for a grade other than I, the online "Change of Grade" form must be approved by their department chair and college dean, or the assigned designee of the department chair and/or college dean.

Repeating Courses

A student may receive credit for a course one time only, unless the course description specifies that it "may be repeated for credit." However, subject to College or program restrictions, students can repeat a previously completed course to earn a higher grade. A student seeking to repeat a course for which they have already earned credit (earned a passing grade) must receive a Repeat Course Override. A Repeat Course Override requires approval of the student's advisor, department chair, and dean.

Grade Replacement will automatically be applied for the first two courses (maximum of 8 credit hours) repeated where the previous grade earned was a C or below. Under Grade Replacement, both grades earned for the course will be reflected on the transcript. However, only the higher of the two grades for the course will be used in GPA calculations. For any course repeated without Grade Replacement, the most recent grade earned will be used for prerequisite purposes and ALL GRADES earned for the course will be reflected on the transcript and will be used in overall GPA calculations.

Grade Replacement will not be applied to:

- Any course repeated where the previous grade was earned prior to Fall 2007
- Any course other than the first two courses repeated where the previous grade earned was a C or below

- Courses that may be repeated for credit, except for special topics courses where the student is enrolled in the same topic for which they originally received the grade to be replaced
- Courses for which the initial grade was received owing to an admitted or adjudicated academic dishonesty violation (*this exception is not subject to appeal or academic petition*)

For Grade Replacement to apply, the course to be repeated and the repeat course must have their grades assigned by UNC Charlotte. Grade Replacement will not be processed after a student graduates.

When the course being repeated is a course with an associated lab, the lecture and lab must be repeated concurrently to only consume one of the two allowable grade replacements.

If a student is repeating a course where Grade Replacement would have applied and the student withdraws from the course or from the University, the previous final course grade will be the grade of record for the course and not a W. Any such withdrawal still consumes one of the two grade replacements permitted under this policy. However, a course that is dropped before the end of the Add/Drop period or a course for which the student receives a WE (withdrawal with extenuating circumstances) does not consume one of the allotted replacements.

Students will be notified after the last day to add or drop a course for the term or half-term about any grade replacements in effect for that term or half-term. Students wishing to opt out of using a grade replacement must comply as instructed by the Office of the Registrar and by the withdrawal deadline for the term or half-term. They must similarly comply with the instructions provided and by the withdrawal deadline if they wish to apply grade replacement to a different course being repeated during the same term.

Note: Since credit hours can be awarded only once for a course, repeated courses can affect athletic eligibility, academic standing, veteran's benefits, and financial aid status.

Credit Hours

Credit hours are the number of hours a course is allocated. The majority of undergraduate courses have three (3) credit hours, while labs and other courses may have one, two, four, or more credit hours. Attempted, passed, and earned credit hours are reported on transcripts.

Quality Points

Quality points, also known as grade points, are determined by multiplying the number of points assigned to each grade (A = 4, B = 3, C = 2, D = 1, F = 0) by the number of credit hours associated with that course. Refer to the example below.

GPA Hours

GPA hours, also known as quality hours, are the total number of credit hours in the graded courses the student has attempted, except for those for which a grade of I, IP, W, P, AU, or N is recorded. Refer to the example below.

Grade Point Average (GPA)

The grade point average for an undergraduate student is determined by adding all accumulated quality points together, and then dividing by the

total number of GPA hours the student has attempted, excluding those for which the student received a grade of I, IP, W, P, AU, or N. In computing the grade point average, only those credits attempted at UNC Charlotte are included. Refer to the example below.

Example of Transcript:

Subject	Course	Grade	Credit Hours	Quality Points
AMST	2050	P	3.00	0.00
CHEM	1251	F	3.00	0.00
CHEM	1251L	F	1.00	0.00
ENGR	1201	C	2.00	4.00
LBST	2101	C	3.00	6.00
MATH	1241	C	3.00	6.00
WRDS	1101	B	3.00	9.00

Term Totals (Undergraduate)

	Attempt Hours	Passed Hours	Earned Hours	GPA Hours	Quality Points	GPA
Current Term	18.00	14.00	14.00	15.00	25.00	1.66
Cumulative	18.00	14.00	14.00	15.00	25.00	1.66

Example of GPA Calculation:

$$\text{GPA} = \text{Quality Points}/\text{GPA Hours}; 25/15=1.66$$

Grade Point Average Calculator

To calculate grade point averages, visit ninercentral.charlotte.edu/grades-transcripts-graduation/gpa-calculator.

Academic Standing

This policy statement applies only to undergraduates: "student" should be read as "undergraduate student" throughout. Newly admitted students begin in good academic standing. Each student's academic standing is evaluated at the end of every Fall or Spring semester for which the student was enrolled, based on hours attempted at UNC Charlotte only. The possible results of this evaluation are described below:

Academic Standing

A student will have one of the following types of academic standing:

Academic Standing

To remain in good academic standing, a student must maintain: (1) a cumulative grade point average (GPA) of at least 2.0 and (2) a cumulative ratio of earned to attempted credit hours of at least two-thirds.

Good Academic Standing Warning

A student who meets the cumulative requirements for good academic standing but performs below a 2.0 GPA in the semester of the evaluation or performs below the two-thirds cumulative ratio of earned to attempted hours is given an "academic standing warning." This indicates potential academic problems and is communicated to the student and to the student's advisor and major department(s). Academic standing warnings do not appear on the student's permanent academic record, and the transcript notation will reflect "good academic standing."

Academic Probation

A student whose cumulative GPA is below 2.0 is placed on academic

probation. This status is noted on the student's permanent academic record with the semester of the evaluation and continues until the next evaluation opportunity.

Academic Suspension

A student on academic probation whose cumulative GPA remains below 2.0 at the next evaluation is suspended from the University, unless the student's GPA for that semester is at least 2.3, in which case the student remains on probation instead. Academic suspension is noted on the student's permanent academic record.

Exception for Summer Enrollment

Students who are on academic suspension are permitted to enroll in Summer Term classes, but they are not eligible to enroll for Fall or Spring semesters until they have applied and been approved for reinstatement or readmission.

Academic Distinctions

Chancellor's List

The Chancellor's List recognizes undergraduate degree-seeking students with superb records of academic performance. To qualify for the Chancellor's List during the Fall or Spring semester, a full-time student must be in good academic standing and earn a grade point average of at least 3.8 in 12 or more credit hours graded A, B, or C, with no grade less than C. A part-time student must be in good academic standing and earn a combined fall and spring grade point average of at least 3.8 in 12 or more credit hours graded A, B, or C, with no grade less than C. To qualify for the Chancellor's List as a part-time student, a student must enroll on a part-time basis in both fall and spring semesters in the same academic year.

Students who receive the grade of AU or P are not excluded from recognition as long as 12 credit hours are completed with A, B, or C. Students who receive the grade of D, F, I, NR, or N are not eligible for recognition. Chancellor's List recognition appears on the student's academic record (official transcript).

Dean's List

The Dean's List recognizes undergraduate degree-seeking students with outstanding records of academic performance. To qualify for the Dean's List during the Fall or Spring semester, a full-time student must be in good academic standing and earn a grade point average of at least 3.4 and not more than 3.79 in 12 or more credit hours graded A, B, or C, with no grade less than a C. A part-time student must be in good academic standing and earn a combined Fall and Spring grade point average of at least 3.4 and not more than 3.79 in 12 or more credit hours graded A, B, or C, with no grade less than C. To qualify for the Dean's List as a part-time student, a student must enroll on a part-time basis in both Fall and Spring semester in the same academic year.

Students who receive the grade of AU or P are not excluded from recognition as long as 12 hours are completed with grades of A, B, or C. Students who receive the grade of D, F, I, NR, or N are not eligible for recognition. Dean's List recognition appears on the student's academic record (official transcript).

Graduation with Distinction

Students may earn undergraduate degrees at different levels of distinction: Cum Laude ("With Honor"), Magna Cum Laude ("With Great Honor"), and Summa Cum Laude ("With Highest Honor"). Each of the undergraduate degrees is awarded Cum Laude when the graduating student's cumulative GPA is 3.4 or more but less than 3.7, Magna Cum Laude when it is at least 3.7 but less than 3.9, and Summa Cum Laude when it is at least 3.9. To be eligible to graduate with distinction, a student must be in good academic standing and have a grade point average computed on at least 48 credit hours completed in residence at UNC Charlotte. Students who have fewer than 48 credit hours completed in residence at UNC Charlotte may petition the Office of the Provost to receive graduation with distinction. Students enrolled in a degree completion program at UNC Charlotte for which there are less than 48 credit hours required for the major are exempt from this credit hour requirement and are not required to file a petition.

Readmission of Former Students

The following individuals must make application for readmission to the University prior to the semester or summer term for which registration is sought: a former student who has graduated, a former student who has been suspended for academic or disciplinary reasons, and a student who has not been enrolled for 12 consecutive months after the semester last attended at UNC Charlotte. (Example of the latter: last enrolled Fall semester 2023; not enrolled Spring or Fall 2024; to enroll in Spring 2025, students must apply in Fall 2024.) Readmission is not automatic; students applying for readmission must meet the requirements of the major in which they wish to return. Application should be submitted online at welcomebackniner.charlotte.edu in accordance with the published dates. Official transcripts from any institution attended during the student's absence from the University must be submitted prior to enrollment.

Forgiveness Policy

Undergraduate students who have a break in enrollment from UNC Charlotte for a minimum period of 24 consecutive months or undergraduate students who have a break in enrollment from UNC Charlotte for a minimum of one regular semester and earn an Associate of Arts (AA), an Associate of Science (AS), an Associate of Fine Arts (AFA), or an Associate of Engineering (AE) degree are eligible for

readmission with forgiveness. Students may be readmitted one time only under this policy.

The Forgiveness Policy will be applied automatically upon readmission if the student is eligible. Students electing not to apply the Forgiveness Policy may request to waive the policy in its entirety at the time of readmission only.

If a student is readmitted with forgiveness, only those courses for which the student has received a grade of C or above (or H or P) can be used for academic credit. Readmission under the forgiveness policy also resets the student's W-limit hours (see *Withdrawals Policy* under the "Termination of Enrollment" heading in this section) to the full 16 hours. The GPA will be based only on the courses that return with the student and the courses taken after readmission. Eligibility for continued enrollment is determined as in the case of transfer students. To qualify for graduation with honors, a readmitted student must have a GPA computed on at least 48 hours taken in residence on which the UNC Charlotte GPA is based.

Second Baccalaureate Major/ Baccalaureate Minor

Students who have earned a bachelor's degree from UNC Charlotte may apply for readmission into a program leading to a second major, minor, or second degree (see the "Declaring Undergraduate Majors and Minors" heading in this section). Students readmitted for a second degree are not eligible for application of the forgiveness policy toward the first degree.

Academic Appeal and Grievance Procedures

Academic appeals and grievances are generally addressed by the college where the appeal or grievance arises or, if no particular college is appropriate, by the Office of the Registrar. Undergraduate students may appeal an academic suspension by submitting a written statement online at appeals.charlotte.edu.

Decisions regarding suspension appeals are made by the chair of the academic unit in which the student is enrolled or the dean of University College if the student's major is undeclared. For all other academic appeals, including recommendations of approval, undergraduate students must complete an Academic Petition online at academicpetition.charlotte.edu.

For additional information on grievances, see University Policy 411, "Student Grievance Procedure," online at legal.charlotte.edu/policies/up-411.

Transfer Credit and Advanced Academic Standing

Evaluation of college transfer credits is coordinated through the Office of the Registrar. CLEP, AP, Cambridge, and IB are coordinated through the Office of Undergraduate Admissions. Prospective students who desire further information about policies and procedures for awarding credit should contact the respective office mentioned above or utilize the "Transfer Credit Advisor" tool online at admissions.charlotte.edu.

UNC Charlotte will accept appropriate undergraduate credits earned through AP, IB, CLEP, Cambridge, armed forces service schools, and college level courses completed prior to graduation from high school. In addition, UNC Charlotte will accept or transfer appropriate undergraduate credits earned at a college or university accredited by an accepted accrediting body or through credit by examination. Credit toward a degree is not awarded for Continuing Education Units (CEUs) or for remedial level college courses.

Advanced Placement Course Credit (AP)

The University will accept appropriate undergraduate credits earned through Advanced Placement Program Tests completed prior to graduation from high school. Students must request that official Advanced Placement test results be sent directly to the Office of Undergraduate Admissions for evaluation (UNC Charlotte code 5105). Prospective students who desire further information about policies and procedures for awarding credit should view score requirements and other related information at admissions.charlotte.edu. No more than 8 credit hours can be awarded for any single Advanced Placement exam.

International Baccalaureate Program (IB)

The University will award credit for subjects in which students score appropriate scores on the IB examinations. View score requirements at admissions.charlotte.edu.

Cambridge Exams

The University will award credit for subjects in which students score appropriate scores on Cambridge examinations. View score requirements at admissions.charlotte.edu.

College Level Examination Program (CLEP) General Examination

An undergraduate student may receive up to 23 credit hours of elective credit. CLEP credit will be awarded according to UNC Charlotte policy in place at the time of evaluation. View score requirements at admissions.charlotte.edu. The amount of CLEP credit that is applicable to a specific degree program is determined by the department offering the program.

Transfer Credit from Other Institutions

Official transcripts are evaluated in the Office of the Registrar, and the results are provided to the applicant and to the major department/college. Determining the applicability of transferred credits to major or program requirements is the responsibility of the department chairperson or program director. General rules governing transfer credit:

- 1) Only courses taken at a college or university accredited by an accepted accrediting body will be considered for transfer credit.
- 2) Provisional transfer credit may be granted for study at foreign institutions or a college or university not accredited by an accepted accrediting body, but must be validated by 30 credit hours of successful performance in residence at UNC Charlotte.
- 3) Courses for which credit is accepted must be appropriate for approved University programs and curricula in which the student is enrolled.
- 4) No credit below C level will be accepted; grade points and averages do not transfer.
- 5) Transfer credit is awarded only upon receipt, in the UNC Charlotte Offices of Undergraduate Admissions or the Registrar, of an official transcript from the institution where the credit was earned.

Students who hold a baccalaureate degree from a college or university accredited by an accepted accrediting body will not be required to satisfy the UNC Charlotte General Education Requirements for a second degree. Students will be issued a transfer credit report and will have their credit from their first degree evaluated.

Credit from Two-Year Institutions

The University accepts a maximum of 64 credit hours from two-year institutions for undergraduate students. Remedial and technical courses will not transfer.

Transient Study

Courses undertaken by UNC Charlotte undergraduate degree students at a college or university accredited by an accepted accrediting body may be transferred to the University subject to the following regulations:

- 1) The University is not obligated to accept any credit from another institution unless the student has obtained the prior approval of the dean of the college in which they are enrolled. A "Permit for Transient Study" form should be completed and filed with the UNC Charlotte Office of the Registrar prior to enrollment at another institution.
- 2) No credit will be accepted for courses below C level for undergraduate students.
- 3) The student must request that an official transcript be sent to the UNC Charlotte Office of the Registrar upon completion of the course(s). A form for this purpose is available in the Office of the Registrar at the institution where the course is taken.
- 4) Grades do not transfer.

Credit by Examination

A student currently enrolled at UNC Charlotte may pass a specially prepared challenge examination and receive credit for a University course without having to do the normal course work. The student contacts the chair of the department in which credit is sought to request administration of an examination. Since it may not be appropriate to

award credit by examination for some courses, the decision to offer an examination is that of the department. If the chair authorizes an examination, the student is instructed to pay the required fee for credit by examination and to bring the receipt of payment to the examination. Hours earned through credit by examination will be indicated on the transcript, but no grade points will be awarded. Hours attempted will be assigned equal to the hours earned. Failure on such an examination will incur no grade point penalty or hours attempted. A department may allow a student to take examinations for courses not offered at UNC Charlotte, if it deems it appropriate to do so. No student may challenge a course for which either a passing or failing grade has been received at UNC Charlotte.

Credit for Military Training

The University will approve academic credit for military training equivalent to UNC Charlotte courses required for the students' major, minor, or General Education requirements. The credit must be approved by the student's major department chair, college dean, and the department that offers the course.

Documentation of the training, such as a license of completion, Joint Services Transcript, or notation on the student's DD Form 214, is required. The same requirements apply to transfer or military training credit approved by another institution. Contact the Office of the Registrar for further information.

Exemptions from General Education Requirements

First-Year Writing Requirements

Students will be deemed to have fulfilled the First-Year writing requirement (WRDS 1103 or WRDS 1104) if either of the following apply:

- 1) Exemption from first-year writing (without credit) at another college or university
- 2) 64 or more transferred credit hours from U.S. institution(s) of higher education

Some exceptions may apply for students with transferred credit hours from institutions where English is not the language of instruction.)

Lower-Division Requirements

Some transfer students are exempt from General Education requirements if they are admitted to the University in Fall 2003 or thereafter. These include:

- Students from North Carolina Community Colleges who receive an Associate of Arts (AA), Associate of Science (AS), Associate of Fine Arts (AFA), or Associate of Engineering (AE) degree
- Students from North Carolina Community Colleges who have completed the 31 credit hour general education core. (Comprehensive Articulation Agreement, CAA)
- Students who graduate from a North Carolina Community College with an Associate of Applied Science (AAS) and enroll at UNC Charlotte in an approved 2+2 degree completion program (this exemption becomes invalid if the student changes programs)

Transfer students from out-of-state and private institutions of higher education who receive an Associate Degree from that institution will have

the degree evaluated for the same General Education exemption on a case by case basis by the Office of the Registrar, in consultation with the Office of Undergraduate Education. The criteria used in the evaluation will be the amount of college-level English, math, natural science, social science, and humanities course work that is included in the degree's curriculum. Curriculums that are more technical in nature or lack key features of the UNC Charlotte General Education core may not be approved for an exemption from lower-division General Education requirements, but individual courses will be accepted towards the UNC Charlotte requirements.

Critical Thinking and Communication (CTC) Requirement

See the General Education Program for details on transfer credit and the CTC requirement.

Reverse Transfer

North Carolina's Reverse Transfer Program is designed to award an associate degree to students who previously attended a North Carolina Community College (NCCC) and fulfilled the associate degree requirements while working towards a bachelor's degree at a University of North Carolina institution. This program is a state initiative in which a student can combine credit previously earned at a NCCC with credit they have earned at participating four-year universities to apply for an Associate's Degree from the NCCC they attended initially.

If a student is awarded the Associate in Arts, Associate in Science, Associate in Fine Arts, or Associate in Engineering degree through the Reverse Transfer program, UNC Charlotte will honor the degree to satisfy lower-division General Education requirements. It is the student's responsibility to understand their own community college requirements for completing an Associate in Arts, Associate in Science, Associate in Fine Arts, or Associate in Engineering degree. For more details, see the Academic Policy and Procedure online at provost.charlotte.edu/policies/reverse-transfer.

Graduation

graduation.charlotte.edu

Application for the Degree

Each student must make an application for their degree no later than the filing date specified in the academic calendar online at registrar.charlotte.edu/calendar-schedules. The application may be submitted online through the Office of the Registrar at my.charlotte.edu. The diploma and transcript will reflect the term in which all requirements were completed, and the diploma will be mailed to the student's address of record.

Commencement Ceremonies

Students must have completed or be on track to complete their degree requirements for the term they plan to participate in the commencement ceremony. Undergraduate students who wish to attend commencement must attend the ceremony within their college. Graduate students (including certificates) who wish to attend commencement must attend the Graduate School ceremony. All students must have a valid UNC Charlotte ID or a government issued photo ID and their UNC Charlotte ID number to participate in commencement.

Students completing their degree requirements in May participate in the May ceremony. Students completing degrees in a summer term participate in the August ceremony. Students completing degrees in December participate in the December ceremony.

Teacher Licensure

Students who have completed degree requirements and obtained passing scores on appropriate exit tests (e.g., Principles of Teaching and Learning, Praxis II Subject Assessments) must apply for licensure through the Teacher Education Advising and Licensure (TEAL) Office in the College of Education. TEAL will process and submit application packets including Praxis scores, final transcripts, and required fees to the North Carolina Department of Public Instruction (NCDPI). Licenses are mailed directly to applicants by NCDPI.

Commencement Marshals

At each Commencement ceremony, the University honors the juniors with the highest grade point averages by inviting them to serve as the marshals who lead the processions of graduates, faculty members, and the platform party. To select students for this honor, the University considers juniors who have completed 75 credit hours of degree work, enrolled full-time (12 or more credit hours per semester) during the two most recent semesters, and are able to attend the ceremony.

Academic Records and Transcripts

The Office of the Registrar is responsible for maintaining the official academic records for all students. Upon request by a student through Banner Self-Service, an official transcript of their academic record will be issued to the person or institution designated, provided that all the student's obligations to the University have been settled satisfactorily. For active students, transcripts can be ordered by logging in to my.charlotte.edu and selecting Banner Self Service. For former students who have been away for more than 12 months, transcripts can be ordered through the University's transcript provider, Parchment Exchange, at parchment.com/u/registration/39530834/institution. A one-time account creation will be required for inactive students.

Family Educational Rights and Privacy Act (FERPA) Annual Notification

A full explanation of FERPA rights and responsibilities at UNC Charlotte is found in the complete text of University Policy 402, Student Education Records (FERPA) at legal.charlotte.edu/policies/up-402, as that policy may be modified from time to time.

I. RIGHTS

In establishing University Policy 402, Student Education Records, UNC Charlotte adheres to a policy of compliance with the Family Educational Rights and Privacy Act of 1974, also known as FERPA, a federal law that affords students the following rights with respect to their education records:

A. To inspect and review the student's education records:

Students should submit to the Office of the Registrar, dean of their college, chair of their major academic department, or other appropriate official written requests that identify the record(s) they wish to inspect. The appropriate University official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.

B. To consent to disclosure of the student's education records to third parties, except to the extent that FERPA authorizes disclosure without consent, as follows:

1. Directory Information. Directory Information (as defined in Section 1 of University Policy 402), including the student's name, major field of study, dates of attendance, enrollment status, and degrees and awards (including scholarships and distinctions) received; and county of residence for award, scholarship, or distinction recipients may appear in public documents and may otherwise be disclosed without student consent unless a student submits a request form to the Registrar to withhold such information from disclosure. A request for non-disclosure will be honored by the University indefinitely, unless the student submits to the Registrar a written revocation of such request for non-disclosure.

2. University Officials. University officials with legitimate educational interests in the student's education records are allowed access to student education records. A "legitimate educational interest" is defined as an interest that is essential to the general process of higher education, including teaching, research, public

service, academic advising, general counseling, discipline, job placement, financial assistance, medical services, and academic assistance activities. University officials who may have access to only those education records in which they have legitimate educational interests include, but are not limited to, personnel in the following offices:

- Undergraduate Admissions
- Graduate Admissions
- Office of University Registrar
- Office of Undergraduate Education
- Financial Aid
- Financial Services
- Auxiliary Services
- Student Employment Office
- University Center for Academic Excellence
- Career Center
- Counseling Center
- Office of Adult Students and Extended Services
- Disability Services
- OneiT - for technical support associated with maintaining student education records only
- Internal Audit
- Office of Enrollment Management
- Office of Director of Athletics
- Office of Vice Chancellor for Student Affairs
- Office of Vice Chancellor for Business Affairs
- Office of Dean of Students
- Office of Dean of Graduate School
- Office of International Programs
- Offices of Chairpersons of Departments
- Offices of Deans of Colleges
- Offices of Directors of Interdisciplinary Units
- Office of Provost
- Office of Chancellor
- Office of Legal Affairs
- Campus Police, for internal law enforcement or health and safety purposes only
- University Advancement
- Teaching and Learning Connection
- Academic counselors and advisors
- Campus Behavioral Intervention Team
- Office of Institutional Research
- Faculty members
- Other academic and administrative personnel, as approved by the Chancellor

3. Parents of Dependents. Parents of a student who is a dependent for federal tax purposes, as defined by Section 152 of the Internal Revenue Code of 1954, may have access to that student's education records without prior consent of the student. Parents may demonstrate the tax dependency of a student only by submitting to the University a copy of the first and signature pages of their most recently filed federal income tax return (with personal financial data removed). Alternatively, a student may demonstrate tax dependency, and thus allow parental access to the student's records without prior consent of the student, by submitting to the University a signed statement of their tax dependency. If a dependent student's

parents are divorced, both parents may have access to the student's records, so long as at least one parent claims the student as a dependent.

4. Other Institutions. The University may release a student's education records to officials of another school, school system, or institution of postsecondary education where the student seeks or intends to enroll, or where the student is already enrolled, so long as the disclosure is for purposes related to the student's enrollment or transfer.

5. Financial Aid. The University may release a student's education records to persons or organizations in connection with that student's application for, or receipt of, financial aid, but only to the extent necessary for such purposes as determining eligibility, amount, conditions, and enforcement of terms or conditions of such financial aid.

6. Accreditation Agencies. The University may release students' education records to accreditation organizations or agencies for purposes necessary to carry out their accreditation functions.

7. Judicial Orders. Information concerning a student shall be released in response to a judicial order or lawfully issued subpoena, subject to the conditions set forth in 34 CFR § 99.31(a)(9). The University will make reasonable efforts to notify the student of a subpoena before complying with it, except that the University shall not notify a student of a subpoena if it is from a federal grand jury or is for law enforcement purposes, and it provides that the University shall not disclose to any person the existence or contents of the subpoena or any information furnished in response to the subpoena.

8. Litigation. If the University initiates legal action against a parent or student, or if a parent or student initiates legal action against the University, the University may disclose to the court, without a court order or subpoena, the education records of the student that are relevant for the University to proceed with the legal action as plaintiff or to defend itself in such legal action.

9. Health and Safety. The University may, subject to the conditions set forth in 34 CFR § 99.36, disclose student information to appropriate persons, including parents of a student, in connection with an emergency if knowledge of the information is necessary to protect the health or safety of the student or other individuals.

10. Student Conduct Hearing Results.

a. Disclosure to Victims: The University may disclose to an alleged victim of any crime of violence (as that term is defined in Chapter 1, Section 16 of Title 18, United States Code), or a non-forcible sex offense, the final results of any student conduct proceeding conducted by the University against the alleged perpetrator of such crime or offense with respect to such crime or offense, regardless of whether the alleged perpetrator was found responsible for violating the University's rules or policies with respect to such crime or offense.

b. Disclosure to Third Parties: The University may disclose the final results of any student conduct proceeding against a student who is an alleged perpetrator of any crime of violence or non-

forcible sex offense (as those terms are defined in 34 C.F.R. 99.39), if the student is found responsible on or after October 7, 1998, for violating the University's rules or policies with respect to such crime or offense. Such disclosure shall include only the name of the student, the violation committed, and any sanction imposed by the University on that student. Such disclosure may include the name of any other student, such as a victim or witness, only with the written consent of that other student.

11. Alcohol and Drug Violations. The University may disclose to a parent or legal guardian of a student, information regarding any violation of any Federal, State, or local law, or of any rule or policy of the University, governing the use or possession of alcohol or a controlled substance, regardless of whether that information is contained in the student's education records, if the student is under the age of 21 at the time of disclosure to the parent, and the University determines that the student is responsible for a student conduct violation with respect to such use or possession.

12. Federal, State, and Local Officials and Educational Authorities. Subject to the requirements of 34 CFR § 99.35, the University may disclose education records to authorized representatives of (i) The Comptroller General of the United States; (ii) The Attorney General of the United States; (iii) The Secretary; or (iv) State and local educational authorities.

13. Institutional Studies. The University may disclose education records, but only under the conditions set forth in 34 CFR § 99.31(a)(6), to organizations conducting studies for, or on behalf of, educational agencies or institutions to (A) Develop, validate, or administer predictive tests; (B) Administer student aid programs; or (C) Improve instruction.

14. Contractors. The University may disclose education records to a contractor, consultant, volunteer, or other party to whom the University has outsourced institutional services or functions, provided that the outside party:

- Performs an institutional service or function for which University would otherwise use employees;
- Is under the direct control of the University with respect to the use and maintenance of education records; and
- Is subject to the requirements of 34 CFR § Section 99.33(a) governing the use and redisclosure of Personally Identifiable Information from education records.

15. Registered Sex Offenders. The University may disclose education records concerning sex offenders and other individuals required to register under Section 170101 of the Violent Crime Control and Law Enforcement Act of 1994, 42 U.S.C. 14071, if the information was provided to the University under 42 U.S.C. 14071 and applicable Federal guidelines.

C. To request amendment of the student's education records to ensure that they are not inaccurate or misleading:

A student who wishes to ask the University to amend a record should make a request to the University Registrar pursuant to the procedures in Attachment B to University Policy 402. The student

should clearly identify the part of the record the student wants changed, and specify why it should be changed.

If the University decides not to amend the record as requested, the University will notify the student in writing of the decision and the student's right to a hearing regarding the request for amendment. Additional information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.

D. To be notified of the student's privacy rights under FERPA, as indicated by this Notification.

E. To file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA. Complaints may be filed via email by completing the form at <https://studentprivacy.ed.gov/file-a-complaint> and emailing to FERPA.Complaints@ed.gov. Complaints may also be filed by mail at the following address

U.S. Department of Education
Student Privacy Policy Office
400 Maryland Avenue, SW
Washington, DC 20202-8520

II. DEFINITIONS

"Directory Information" means information in a student's education record that would not generally be considered harmful or an invasion of privacy if disclosed. At UNC Charlotte, directory information consists of the student's name, major field of study, dates of attendance, enrollment status, degrees and awards (including scholarships and distinctions) received; and county of residence for award, scholarship, or distinction recipients.

Photographs, videos, or other media containing a student's image or likeness (collectively, "student images") and University-issued student electronic mail addresses ("email addresses") are designated by UNC Charlotte as "Limited Use Directory Information." Use and disclosure of Limited Use Directory Information will be restricted to:

1. publication in official University publications or on social media sites or websites hosted or maintained by, on behalf of, or for the benefit of the University, including the University's online directory and internal email system;
2. University officials who have access, consistent with FERPA, to such information and only in conjunction with a legitimate educational interest; and
3. external parties contractually affiliated with the University, provided such affiliation requires the sharing of Limited Use Directory Information.

In addition, the following shall be considered Limited Use Directory Information that may be disclosed only to other students enrolled in the same course (regardless of whether such students are enrolled in the same class section or break-out group) that has been audio or video recorded by the University, for instructional and educational purposes only:

1. name, to the extent it is referenced or captured during the audio or video recording;

2. any photograph or image of the student captured during the audio or video recording;
3. any audio or video recording of the student participating in the course; and
4. any online chats or other recorded communications among participants in the course captured during the audio or video recording.

A student who requests to withhold this Limited Use Directory Information from disclosure pursuant to Section II.B.1 of University Policy 402 may limit the extent to which they will be able to participate in the course.

To protect the privacy of other students, students are not permitted to make their own recordings of class sessions or to share or distribute University recordings of class sessions.

"Education Records" include records directly related to a student that are maintained by UNC Charlotte. Education records **do not** include:

1. Records of instructional, administrative, and educational personnel that are in the sole possession of the maker (i.e. file notes of conversations), are used only as a personal memory aid, and are not accessible or revealed to any individual except a temporary substitute;
2. Records of the UNC Charlotte campus police;
3. Student medical and counseling records created, maintained, and used only in connection with provision of medical treatment or counseling to the student, that are not disclosed to anyone other than the individuals providing the treatment. (While a student may not inspect their medical records, these records may be reviewed by a physician of the student's choice);
4. Employment records unrelated to the student's status as a student;
5. Records created or received by an educational agency or institution after an individual is no longer a student in attendance, and that are not directly related to the individual's attendance as a student;
6. Grades on peer-graded papers before they are collected and recorded by a teacher.

"Personally Identifiable Information" includes, but is not limited to:

- The student's name;
- The name of the student's parent or other family members;
- The address of the student or student's family;
- A personal identifier, such as the student's social security number, student identification number, or biometric record;
- Other indirect identifiers, such as the student's date of birth, place of birth, and mother's maiden name;
- Other information that, alone or in combination, is linked or linkable to a specific student that would allow a reasonable person in the school community, who does not have personal knowledge of the relevant circumstances, to identify the student with reasonable certainty; or
- Information requested by a person who the University reasonably believes knows the identity of the student to whom the education record relates.

"Student" means an individual who is or who has been in attendance at UNC Charlotte. It does not include persons who have been admitted but did not attend the University. For the purposes of this policy, "attendance" includes attendance in person or by paper correspondence, videoconference, satellite, Internet, or other electronic information and telecommunications technologies for students who are not physically present in the classroom; and the period during which a person is working under a UNC Charlotte work-study program.

III. COMPLIANCE

UNC Charlotte intends to comply fully with these requirements. University Policy 402, Student Education Records, explains the procedures for compliance. Students may obtain copies of the policy in the Office of the Registrar or online at legal.charlotte.edu/policies/up-402. That policy includes a list of the locations of all education records maintained by the institution.

All questions concerning this FERPA Annual Notification may be directed to the attention of the Office of the Registrar.

State Authorization Reciprocity Agreements (SARA)

NC-sara.org

Every state has the authority to regulate which postsecondary institutions offer education within its boundaries, including online programs and courses. The need to seek state authorization for online learning depends on a combination of each state's laws and the activities that a course, program, or institution is conducting in that state.

UNC Charlotte participates in the national State Authorization Reciprocity Agreements (SARA, see additional information below) and is, therefore, authorized to offer online programs and courses in all its member states and territories. Details on state authorization at UNC Charlotte can be found on the School of Professional Studies State Authorization page (<https://professional.charlotte.edu/state-authorization/>).

SARA Complaint Resolution Procedures: UNC Charlotte

UNC Charlotte's State Authorization Student Complaint Resolution Procedures can be found on the School of Professional Studies State Authorization page (<https://professional.charlotte.edu/state-authorization/complaint-resolution/>). With all student complaints, students are advised to put their concerns in writing and carefully document the events that led to the complaint or grievance. Concerns should be expressed as soon as possible after the event occurs; some of the procedures have specific deadlines for filing grievances or complaints.

The Student Assistance and Support Services (SASS) unit in the Dean of Students Office (<https://sass.charlotte.edu/>) can provide guidance about grievances and appropriate avenues to express concerns about University experiences. If a complaint cannot be resolved to the student's satisfaction through the institution's complaint process, students may file a complaint with the North Carolina Post-Secondary Education Complaints unit (<https://www.northcarolina.edu/post-secondary-education-complaints/>).

If the complaint is not resolved to the student's satisfaction after completing the above steps AND the complaint pertains to online/distance education, students may also file a complaint through SARA North Carolina (SARA-NC) (<https://www2.ncseaa.edu/saranc/index.html>), or in the state in which they reside (if residing outside North Carolina). Please note: SARA North Carolina does not accept complaints regarding grades or student conduct violations.

Students may also file a complaint with UNC Charlotte's regional accrediting agency, the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) (<https://www.sacscoc.org>).

SARA Student Complaint Process

Section 4.5 of the NC-SARA Policy Manual also provides complaint resolution procedures. To access these procedures, please visit <https://nc-sara.org/resources/sara-policy-manual-242>. Generally, complaints against an institution operating under SARA policies go first through the institution's own procedures for resolution of grievances.

If a person bringing a complaint is not satisfied with the outcome of the institutional process for handling complaints, the complaint (except for complaints about grades or student conduct violations) may be appealed, within two years of the incident about which the complaint is made. The resolution of the complaint by the institution's home state SARA State Portal Entity, through its SARA complaint resolution process, will generally be final.

While final resolution of complaints (for purposes of adjudication of the complaint and enforcement of any resultant remedies or redress) resides in certain cases with institutions (complaints about grades or student conduct violations), or more generally with the relevant institution's home state SARA State Portal Entity (all other complaints), the regional compact(s) administering SARA may consider a disputed complaint as a "case file" if concerns are raised against a SARA member state with regard to whether that state is abiding by SARA policies.

Financial Information

Financial Information

ninercentral.charlotte.edu

Undergraduate Tuition and Fees

UNC Charlotte is a publicly supported institution and primarily receives its revenue from the State of NC appropriations, in addition to tuition and fees. It is the combination of tuition and fees that primarily supports the operations and expansion of UNC Charlotte. Tuition and fees are approved by the Student Representatives, UNC Charlotte Board of Trustees, and the UNC Board of Governors. Tuition rates are also approved by the NC General Assembly. These fees are mandatory to every student and cannot be waived.

Tuition and fees are billed by credit hour for Fall, Spring, and Summer terms. 12 or more credit hours are considered full-time for undergraduate students, and 9 or more credit hours are considered full-time for graduate students.

Charges for tuition and fees vary according to the student's status as a resident or non-resident of North Carolina. A non-resident student pays a higher rate of tuition than a legal resident. For more details, see the heading for *Residence Status for Tuition Purposes* later in this section.

For a complete list of current tuition and fees, visit <https://ninercentral.charlotte.edu/billing-payments-refunds/tuition-and-fees/>.

The University reserves the right, with the approval of proper authorities, to make changes in tuition and fees at any time. The University also reserves the right to correct any clerical errors on a student's account. For the most current listing of tuition and fees at The University of North Carolina at Charlotte, see ninercentral.charlotte.edu.

Fixed Tuition Program

The Fixed Tuition program provides eligible, in-state undergraduate students with the same tuition rate for a specific period of continuous enrollment. The Fixed Tuition program only includes tuition and not fees. Fees may be increased annually.

For eligible Freshmen seeking a 4-year bachelor's degree, the tuition rate will be fixed for eight consecutive semesters. For eligible Transfer students, the tuition rate will be fixed for a prorated period of time based on the prior credit they have earned or transferred in from other institutions. Students may view their fixed tuition eligibility period in Banner Self Service (under Student Services/Student Accounts > Fixed Tuition Information).

For more information, visit ninercentral.charlotte.edu/billing-payments-refunds/tuition-and-fees/fixed-tuition-program.

Residence Status for Tuition Purposes

Tuition charges are based upon classification of a student as a resident or a non-resident of North Carolina for tuition purposes. The North Carolina Residency Determination Service (RDS), the sole authority for residency determinations, shall determine whether a student is a resident or non-resident for tuition purposes.

Residency Application Procedure

A new, incoming, or current student who wishes to request a residency classification will apply using the Residency Determination Service (RDS). RDS is the entity responsible for all new classifications of residency in North Carolina. To begin the process, visit www.NCresidency.org. ALL student inquiries about initial determinations, reconsiderations, or appeals, should be directed to RDS. Students may contact RDS at 844-319-3640 or rdsinfo@ncresidency.org.

Appeal Procedure

A new, incoming, or current student who has exhausted the residency application procedure and has been classified as a non-resident for tuition purposes, may request further consideration of that decision to the Residency Determination Service (RDS). RDS is the entity responsible for all classifications of residency in North Carolina. ALL student inquiries about initial determinations, reconsiderations or appeals, should be directed to RDS. Students may contact RDS at 844-319-3640 or rdsinfo@ncresidency.org.

Required Fees

The required fees included in the Tuition and Fees table above are explained below.

49er ID Access Fee

This fee supports the University's 49er ID operations and support. The ID is not only used for identification purposes, but also as a library card and

as a campus card for dining and vending purchases. This fee does not cover the replacement of a lost or stolen card.

Ed and Tech Fee

This fee is directly related to the infrastructure supporting student technology needs across campus including hardware and software applications, supplies for educational materials, web services, laboratory expenses and equipment, public student computing labs, central email and Internet services, training classes and classrooms, and central help desk services.

Food Service Facilities Fee

This fee provides funds to support year-round access, maintenance, repairs, and operation of campus dining facilities.

Health Services Fee

This fee funds health and counseling services for students, which includes the operations of the Student Health Center, the Center for Counseling and Psychological Services, and the Center for Wellness Promotion.

Niner Course Pack Fee

This fee funds the Niner Course Pack for students, which provides textbook rental course materials to students who remain opted in the program. Students who wish to remove this fee must opt out of the program by the posted deadline each semester.

Safety and Security Fee

This fee provides funding for several of the recommendations made by the UNC Board of Governors' 2013-14 UNC [system-wide] Campus Security Initiative report which include, but are not limited to: (1) campus police officer and telecommunicator compensation; (2) highly qualified and trained investigators and hearing officers for reports of serious offenses, such as sexual violence; (3) Title IX and Clery Act compliance coordination; (4) substance abuse counselors, case managers, and/or other counseling staff; and (5) system-level safety and security training, coordination, and audit functions. The fee may also provide funding to meet some additional campus-specific safety and security needs consistent with the report's recommendations. The structure for this fee allows \$26 of the \$30 collected from each student per academic year to fund campus level and shared-services activities, while \$4 of the \$30 is allocated by the UNC General Administration for system-wide coordination, trainings, and other shared services functions.

Transportation Service Fee

This charge supports funding for Niner Transit (campus shuttle system), the Niner Paratransit service and the CATS All-Access Pass. The services provide UNC Charlotte with efficient and safe campus transportation, reduce vehicular congestion, and decrease the demand for proximity parking.

UNC System Student Association Fee

This fee is a University of NC system-wide fee charged to all system students to support the University Of North Carolina Association of Student Governments. This association is a student led advocacy group whose main purpose is to ensure that the benefits of the University of North Carolina are extended to the people of North Carolina, as far as practicable, free of expense.

University Fee

This is a consolidated fee that relates to University debt service payments (to construct new facilities and purchase administrative computing systems) and to support other activities/operations including Athletics programs and events, Student Activity Center operations, and Cone University Center operations. The following fees are consolidated into the University Fee:

- *Athletics* - Funds intercollegiate athletics, including salaries and maintenance and operation of athletic facilities.
- *Student Activities* - Funds non-academic student services (student unions, intramural facilities, student organizations, newspapers, yearbooks, and entertainment programs).
- *Debt Service* - Funds the principal and interest for capital projects. Examples for UNC Charlotte include the Student Union, Football Stadium, and Student Activity Facility.

Special Fees

The following additional major or course fees are charged to cover the cost of supplies or special materials:

ADDITIONAL MAJOR/COURSE FEES <i>(PER SEMESTER)</i>	
Major/Course	Fee
College of Arts + Architecture Student Fee	\$125*
College of Computing and Informatics Student Fee	\$112.50*
College of Engineering Student Fee	\$150*
College of Health and Human Services Student Fee	\$125*
Experiential Learning Fee/Co-op	\$60
International Student Fee (students with Visa type F or J)	\$100
KNES 1290 - First Aid: Responding to Emergencies	\$20

* These fees apply to students enrolled in 6+ credit hours; students enrolled in 1-5 credit hours are charged half the fee listed.

Application Fee

A \$75 application fee must be submitted with the application for admission. The fee is nondeductible and nonrefundable.

Credit by Examination Fee

A written examination for a course requires a fee of \$15. A laboratory examination requiring the arrangement of such things as laboratory materials will require a fee of \$25. A combination of a laboratory and written examination will require a fee of \$30.

Matriculation Fee

Instead of paying separate fees for such things as new student convocation, commencement, and hardcopy academic transcripts, UNC Charlotte students pay a matriculation fee and receive these and other services at no charge. Students are charged the \$150 matriculation fee upon entry into a baccalaureate, graduate certificate/master's, and doctoral program at UNC Charlotte.

Dining, Housing, and Parking

aux.charlotte.edu
housing.charlotte.edu
pats.charlotte.edu

Dining and Meal Plans

Meal plans, the 49er Account, and the Optional Dining Account all reside on the UNC Charlotte 49er ID.

For dining locations, menus, meal plans, and meal plan policies, visit aux.charlotte.edu/meal-plans.

A meal plan purchase provides these advantages:

- Convenience: The 49er ID is used for all campus dining purchases.
- Variety and Flexibility: Meal plans to meet your dining needs; numerous places to eat on campus including late evening and weekend dining and many popular, national brands.
- Diet Preferences: Vegetarian, vegan and healthy options are available at Social 704 in the Student Union, SoVi and Charlotte Greens in South Village Crossing and most retail locations.

Overview of Meal Plans

All first-year students living on campus, regardless of their housing assignment, are required to purchase one of The Daily Plan options. This meal plan must be purchased each semester of occupancy.

Upper-class students assigned to residence halls without private kitchens are also considered to be living in "required housing" and must choose a meal plan as part of the housing contract. These residences include Holshouser, Hunt, Sanford, Scott, Hawthorn, Laurel, Lynch, Oak and the suites in Belk, Levine, Miltimore, Wallis and Witherspoon.

For a listing of available dining locations, menus, meal plans, and meal plan policies, visit aux.charlotte.edu/dining/meal-plans.

Housing

Below are the current academic year's per semester rates for housing at UNC Charlotte. Rates include rent, utilities (including internet, cable, and laundry) and membership in the Resident Students Association (RSA). Prices and plans are subject to change. Housing types are based on availability. Current pricing can be found online at housing.charlotte.edu/apply/rates.

HOUSING PER SEMESTER	
Type	Fee
Tower (Double Occupancy)	\$3,380 - \$3,700
Tower (Single Occupancy)	\$4,550
Suite	\$4,250 - \$5,100
Apartment	\$4,700 - \$5,400
Greek Village	\$4,450 - \$4,500

Admission to UNC Charlotte does not guarantee residence hall space. Arrangements for on-campus housing are made, after admission, with the Office of Housing and Residence Life. Shared Residence Hall space is not available to spouses or children of enrolled students.

Housing Deposit

A \$200 deposit must be submitted with all housing applications. The deposit is not applied toward payment of fees. It is refunded only after the student has left on-campus housing and only if the student has met all financial obligations to the University. In the case of contract cancellation, the date of receipt of the written request for cancellation will

determine, in part, the student's financial obligation to the University (please see the Housing Contract for the current academic year for specific terms and cancellation dates).

Parking

Students attending UNC Charlotte (and faculty and staff) are required to purchase a virtual parking permit or pay a visitor fee in order to park on campus. Vehicle registration and virtual permit purchase is available online. **Virtual permits are required at all times when parked on campus, unless parked in a visitor parking area.** For students, two categories of virtual permits are issued: *Resident*, for students living on-campus, and *Commuter*, for students living off-campus. Lot-specific discount permits are available on a first-come, first-served basis.

The 2024-2025 annual rate for a resident or full-time commuter student is \$480. **Please see pats.charlotte.edu for a complete list of fees, permit information, and where each type of permit allows you to park.** Full-time virtual permits are valid from August 1 of one year through August 14 of the following year.

Parking permits are available to purchase for the fall semester only or the full academic year. Discount remote lot and night permits are also available to commuters. Night permits are valid only after 3 p.m. Parking before 3 p.m. requires parking and payment in a visitor space.

The primary factor that determines permit prices is the cost of new deck construction and replacing flat lots with decks. Neither tuition dollars nor state funds are used toward parking facilities; therefore, parking fees must pay for construction and maintenance of all decks, lots and associated operations.

Penalties for Parking Violations

- Parking and Traffic regulations are enforced 24 hours a day, seven days a week. Currently, permits are enforced at all times, and meters are enforced from 5 a.m. on Monday through 10 p.m. on Friday.
- Violators of University parking regulations are subject to penalties ranging from \$20 to \$480, depending on the severity of the violation.
- If a citation is not paid or appealed within ten (10) business days, the penalty will be applied to the student's University account. Subsequent registration may be withheld for non-payment.
- Copies of parking regulations and the citation penalty list are posted on the PaTS website.

The Parking and Transportation Services website, pats.charlotte.edu, has current UNC Charlotte parking ordinances, parking policy information, virtual permit and citation FAQs. It is also a source for transportation information, updates and changes or disruptions to campus parking and transportation.

Questions concerning parking on campus should be directed to Parking and Transportation Services Communications Center at 704-687-0161; open 5 a.m. Monday through 10 p.m. Friday, except on holidays when the University is closed. Office hours are 8 a.m. to 5 p.m., Monday-Friday. Emergency situations and questions at other times should be directed to the Campus Police at 704-687-2200.

Financial Aid

ninercentral.charlotte.edu/financial-aid

UNC Charlotte administers financial aid without regard to race, color, national origin, religion, gender, sexual orientation, age, or disability.

The University offers a comprehensive program of student financial aid (scholarships, grants, loans, and part-time employment) to assist both graduate and undergraduate students in meeting educational expenses. Reasonable educational expenses include tuition and fees, room and board, books, supplies, transportation, miscellaneous personal expenses, and expenses related to maintenance of a student's dependents.

Eligibility

The programs of student financial aid are administered according to a nationally accepted policy that the family, meaning parents (or those acting in place of parents) and/or spouse, is responsible for a student's educational expenses. Therefore, eligibility for financial aid will be determined by a comparison of a budget (educational expenses as defined above) for the period of attendance with what the student's family can reasonably be expected to contribute.

A financial aid applicant will be considered for available assistance for which they are eligible if the student:

- 1) Completes the application process and related forms only after thoroughly reading all instructions.
- 2) Completes the admission application process and is accepted for enrollment at UNC Charlotte.
- 3) Is working toward a degree or certificate and not simply taking courses.

FINANCIAL AID TIMELINE

Satisfactory Academic Progress (SAP) Policy

Federal and state regulations require that students maintain a certain level of academic performance in order to be eligible for and keep their financial aid. This is known as Satisfactory Academic Progress (SAP). All students who wish to qualify for financial aid must meet three standards known as SAP. These standards include:

- 1) Minimum cumulative Grade Point Average (GPA)
- 2) Minimum credit hour completion rate
- 3) Completion of a degree or program of study within a maximum number of credit hours

All prior coursework, attempted and earned, is reviewed in the determination of SAP. Students who have been readmitted as a result of the Forgiveness Policy are still subject to Satisfactory Academic Progress standards for all attempted coursework at UNC Charlotte.

For more complete details on Satisfactory Academic Progress, see the Financial Aid website at ninercentral.charlotte.edu/financial-aid-loans/keeping-your-aid/satisfactory-academic-progress.

Application Process

To apply for the following programs, students must complete the Free Application for Federal Student Aid using the instructions provided online at www.fafsa.gov. The federal school code for UNC Charlotte is 002975.

- Federal Direct Student Loan
- Federal Pell Grant*
- Federal Supplemental Educational Opportunity Grant*
- Federal TEACH Grant
- Federal Work Study
- Next North Carolina Scholarship*
- University Loans

*For undergraduate students only

Renewal Process

Renewal of financial aid is based upon a student making satisfactory academic progress. The Free Application for Federal Student Aid is required each year that a student applies for financial aid.

Financial Aid Programs

When students apply for financial aid through FAFSA, they receive an aid offer (or "package") that includes a combination of these types of aid, based on their financial need and eligibility. Students may earn more than one type of financial aid. For details about the below financial aid options, please visit finaid.charlotte.edu.

Grants

Federal

Federal Grants, with the exception of TEACH, are awarded to students demonstrating significant financial need as determined by the FAFSA. TEACH is not a need-based grant and could require repayment if the recipient does not fulfill the service agreement.

Completion of the FAFSA is required for grant funding. Grant funding does not have to be repaid, however, the availability of grant funding can be

limited. Completing the FAFSA by March 1 will ensure the maximum financial aid award.

- Pell Grant
- Federal Work Study (FWS)
- Supplemental Educational Opportunity Grant (FSEOG)
- TEACH Grant (requires repayment if Agreement to Serve is not fulfilled)

State

State grants are awarded to North Carolina residents based on funding availability and need. Recipients are determined by the state of North Carolina and must be seeking their first undergraduate degree. Restrictions regarding credit hours and semesters completed may apply.

- Next North Carolina Scholarship

Institutional

Students that apply for financial aid by the established priority date of January 1 are considered for institutional need-based awards provided funding is available.

- State Appropriated Grant (SAG)
- Tuition Assistance Grant (TAG)

Loans

Loans are funds that students borrow from the federal government or other lenders and that must be repaid when students are out of school. Repayment begins six months after students graduate, withdraw, or drop below full-time. We recommend that students borrow only what they need.

- Federal Direct Loan Program
- Federal PLUS Direct Loans
- Alternative Loans

Federal Work Study

Federal Work-Study is a work program through which students earn money to help them pay for school. Since Federal Work-Study funding is limited, it is not included in all student awards. Priority is given to students with higher calculated financial eligibility who indicate on the FAFSA that they are interested in student employment. Students can work a maximum of 20 hours per week.

Other Assistance

Education for the Vocationally Disabled

Vocationally disabled students are eligible for aid provided by the North Carolina State Division of Vocational Rehabilitation. This aid takes the form of services that include vocational counseling and guidance and placement. Payment of expenses such as training, medical treatment, room and board, books, fees, and tuition may be available. A vocational rehabilitation officer is available in Charlotte for interviewing applicants. Appointments may be made by contacting Vocational Rehabilitation Services at 704-568-8804. Their offices are located at 5501 Executive Center Drive in Charlotte.

Veterans Benefits

UNC Charlotte's Veterans Student Services Office (VSSO) works with the

Veterans Administration to assist in administering the various programs of benefit to veterans or eligible relatives of veterans. The VSSO Certifying Official certifies enrollment and transmits necessary credentials and information to the proper Veterans Administrative Office.

Admission to the University should be obtained before the student makes application for veteran's benefits. Applicants must be accepted into a degree program to receive benefits.

In order to be eligible for the full monthly allowance under any of the above laws, an undergraduate student must be enrolled for 12 or more semester hours and a graduate student must be enrolled for nine or more semester hours. Those enrolled on a part-time basis will be eligible for part-time compensation. Students are responsible for reporting any change in enrollment status to the VSO Certifying Official.

For details about available programs, please visit veterans.charlotte.edu or call the VA's toll-free number at 1-800-827-1000.

Children of Veterans

The North Carolina Department of Veterans Affairs awards scholarships for the children of certain deceased or disabled veterans. Those awarded "full" scholarships are entitled to tuition, mandatory fees, board allowance, and room allowance; those awarded "limited" scholarships are entitled to tuition and mandatory fees. Written requests for benefits information may be directed to: VA Atlanta Regional Office, Post Office Box 100022, Decatur, GA 30031-7002 (telephone 888-442-4551).

Before the time of registration, each eligible student who wishes to enter the University should: (1) apply for admission following University procedures and (2) apply for a scholarship award to the North Carolina Department of Veterans Affairs.

Scholarships

scholarships.charlotte.edu

UNC Charlotte provides all new freshmen, transfer, and returning undergraduate and graduate students the opportunity to apply for scholarships at the start of each academic year. Scholarships can be merit-based or need-based, and may also focus on other criteria defined by the individual donor or donors who fund the award. Scholarships can be used to offset tuition, room and board, books, or study abroad experiences, and do not have to be repaid.

UNC Charlotte committed to offering students an elite scholarship resource on campus by establishing the University Scholarship Office in 2015. This designated student service office exists to make it easier for newly admitted and continuing students to find and apply for scholarship opportunities, while serving as the single point of contact to students, parents, faculty, and staff who have scholarship-related questions.

NinerScholars Portal

NinerScholars serves as the common application system for all scholarships offered by a college, department, office, or program at UNC Charlotte. NinerScholars uses the University's student information system to build a scholarship profile specific to each student's academic

history and current status. The Portal then compares a student's profile to the criteria for each UNC Charlotte scholarship, matches them with those scholarships they are eligible for, and provides the student with the ability to apply in real-time.

The NinerScholars Portal gives students direct access to apply to more than 2,000 scholarship opportunities with one application, through one online system. To access the NinerScholars Portal, learn more about the scholarship opportunities below, or take advantage of additional scholarship resources, visit the University Scholarship Office website at scholarships.charlotte.edu.

Scholarship Opportunities

University Scholarships

Last year, UNC Charlotte awarded more than 2,500 scholarships to recognize outstanding students for prior and sustained academic achievement, and provide assistance to students with demonstrated financial need. All University scholarships must be applied for through the NinerScholars Portal. UNC Charlotte does not award automatic merit or need-based scholarships without an application. To be considered for need-based scholarships, a student must complete a Free Application for Federal Student Aid (FAFSA) for the upcoming academic year and have no outstanding requirements or financial obligations to the University.

Outside Scholarships

The University Scholarship Office maintains a comprehensive database of scholarship opportunities that are administered and awarded by organizations, or individual donors, outside the University. This resource is free and allows students to filter external scholarship opportunities, specific to their major, GPA, or professional goals. This resource can be found at scholarships.charlotte.edu.

Levine Scholars Program

The Levine Scholars Program is UNC Charlotte's most prestigious merit scholarship program established in 2009 by benefactors Sandra and Leon Levine. The inaugural class of Levine Scholars entered in the Fall semester of 2010 and a new cohort of approximately 50 students is selected to join the program each year. Levine Scholars carry a high honor, one that bestows tremendous opportunities and assumes high expectations of its recipients – as students, as leaders within the university, and as citizens of the global community. No matter what their interests, Levine Scholars find campus and community partners eager to embrace their contributions and enhance their education through hands-on experiences. To complement classroom learning, Levine Scholars participate in rich and varied opportunities in the vibrant commercial and cultural center of Charlotte. To learn more about the Levine Scholars, visit levinescholars.charlotte.edu.

Honors College Scholarships

The four merit scholarships below are administered directly by the Honors College. Eligible students interested in applying for one of these opportunities must do so by submitting supplemental materials as part of the Honors College Admission Application.

Albert Engineering Leadership Scholars Program

The Albert Engineering Leadership Scholars Program was established by Craig Albert ('85) to invest in the next generation of engineering student leaders, and to produce graduates distinguished by their excellence in applied learning, campus involvement, and professional development.

This scholarship is awarded to incoming freshmen and is renewable for up to three additional years contingent upon maintaining a cumulative GPA of 3.0, continuing full-time enrollment, and meeting program requirements. Albert Scholars receive an award equal to the cost of tuition and fees, room and board, and books.

Freeman Scholarship

The Freeman Scholarship was established by Craig and Darla Albert ('85 and '83) in 2019. Freeman Scholars are impressive, thoughtful, and persistent in overcoming challenges. They all demonstrate intellectual curiosity and a strong academic foundation; community-mindedness and dedication to service; and capacity for reflection, leadership, and growth. Recipients of the Freeman Scholarship are awarded in-state tuition and fees renewable for three additional years, membership in a multi-year honors program and support from the Honors College, and access to honors housing in Levine Hall.

Johnson Scholarship

In establishing the Johnson Scholarship, Gene and Vickie Johnson ('71 and '82) intend to create a perpetual endowment for the purpose of increasing opportunity for middle-income students at UNC Charlotte whose families do not qualify for federal grant aid programs and may struggle to afford a college education. Johnson Scholars may be enrolled in any major and must be eligible for one of the University's honors programs. In addition, recipients must have substantial unmet financial need and come from middle-income families who exceeded the threshold for federal grant aid. Recipients are awarded in-state tuition and fees renewable for three additional years.

Martin Scholars Program

The Martin Scholars Program is one of UNC Charlotte's leading merit scholarship programs, established in 2016 through the generosity of UNC Charlotte alumni Demond T. and Twakia "Kia" Martin ('97 and '98). Martin Scholars are promising, motivated students from underrepresented groups who demonstrate the highest level of financial need in pursuing a college education. Awards are made to new freshmen and transfer students, as well as continuing students. Martin Scholarships are renewable, and award amounts range with the purpose being to eliminate the burden of student loans for each recipient.

Payment

ninercentral.charlotte.edu

The Office of the Bursar bills students for tuition, room and board, and various other University charges. Students with a balance receive an email to their UNC Charlotte email address informing them that their bill is available online at my.charlotte.edu. It is the student's responsibility to regularly check their UNC Charlotte email account regularly. Failure to receive a billing statement or view their account online will not exempt students from having their registration canceled for non-payment.

Payment can be made by cash, check, online from a checking or savings account (eCheck), or by credit card (Visa, MasterCard, American Express, or Discover). All payments must be in U.S. currency. Remittance should be made payable to "UNC Charlotte" and identified with the student name and ID number.

UNC Charlotte offers a payment plan which allows students to spread out their tuition and fees, on-campus housing and dining, and other charges billed to the student's account into multiple installment payments.

Returned Check Policy

If a check is returned by the bank, students are notified via their UNC Charlotte email account, indicating that a penalty of \$35 has been assessed to their student account. A hold is placed on the student's record until the returned check is covered and the penalty is paid.

A student who pays a previous balance with a check in order to have a registration hold flag lifted will have their registration canceled if the check is returned by the bank for any reason.

Parent Information/Authorized Payers

Authorized Payers are family and friends that have been given the ability to access the Student Account information ONLY. In compliance with the Family Educational Rights and Privacy Act of 1974 (FERPA), student financial records may not be shared with a third party without the student's written consent. Adding an authorized payer is the student's written consent that an individual may view their account information and make payments on their behalf. Please note that authorized payers DO NOT have access to a student's stored payment methods, academic records, or other personal information.

Students can add Authorized Payers by logging in to my.charlotte.edu and then clicking the "View or Add Authorized Payer" button located in the My Student Account block.

Authorized Payers will receive an email informing them that they have been granted access to the student's account information. The email notification will include access information that will be used when accessing the information from the Payment/Billing Suite at ecom.charlotte.edu/C21561_tsa/web/login.jsp.

Refunds

ninercentral.charlotte.edu

Fall and Spring Semesters

Students who officially withdraw (drop all courses) from the University during the Fall or Spring semester will receive a refund as follows:

TUITION AND FEES REFUNDS	
Period of Withdrawal	Percent of Tuition and Fees Refunded
Before last day to Add/Drop course(s) with no grade	100%
Period 1*	90%
Period 2*	50%
Period 3*	25%
Period 4*	0%

*Generally, each period is two weeks in length; however, for specific dates

of each period, please visit the Refunds Schedule on the Niner Central website at ninercentral.charlotte.edu/billing-payments-refunds/reductions-hours/refunds-withdrawal.

Summer Terms

Students who officially withdraw (drop all courses) from the University during a Summer term will receive a refund as follows:

TUITION AND FEES REFUNDS	
Period of Withdrawal (Summer Terms)	Percent of Tuition and Fees Refunded
Period 1*	100%
Period 2	0%

**Generally, the first period is very short due to the condensed Summer terms; however, for specific dates of each period, please visit the Refunds Schedule on the Niner Central website at ninercentral.charlotte.edu/billing-payments-refunds/reductions-hours/refunds-withdrawal.*

Exceptions

Charges are refundable by administrative action on a prorated basis for the unexpired portion of the term for the following reasons: death of the student, withdrawal for adequate medical reason as certified by the University's Student Health Center or family doctor, death in the immediate family that necessitates student withdrawal, and dismissal or suspension from school. Immediate family is defined as wife, husband, parent, child, brother, sister, grandparent, and grandchildren, and includes step-, half- and in-law relationships. Appropriate documentation must be submitted to Student Assistance and Support Services.

Appeal Procedure for Refunds

Students are provided an opportunity to appeal charges associated with tuition, fees, housing, and dining. The student will have the burden of proving a case for appeal by a preponderance of evidence. Appeals will not be considered that arise from a student's error on registration or situations resulting from a deliberate decision or series of decisions by the student, such as a failure to be aware of deadlines and/or due dates. Full reductions or refunds are typically not granted for students who attend any portion of a semester. Appeals must be substantiated with supporting documentation or verification of extenuating circumstances that warrant basis for the appeal. Extenuating circumstances may include personal or family emergencies as a result of the illness or death of a family member, medical and/or mental health reasons, orders requiring military service, or errors committed by the University. At both levels of appeal, review and consideration for a decision will be based upon the information provided in the appeal as well as the supporting documentation accompanying the appeal. ***Appeals submitted without supporting documentation will not be processed for review and consideration until supporting documentation is provided. Students must submit a first level appeal within one calendar year from the date the fee was initially charged to the student. The second level of appeal must be submitted within ten (10) business days of the delivery of the first appeal decision.*** See thd.charlotte.edu for more details.

College of **Arts + Architecture**

College of Arts + Architecture

coaa.charlotte.edu

The College of Arts + Architecture is a community of curious individuals and skilled problem solvers who care about the impact of our work on people and the complex social challenges we face.

The primary mission of the College of Arts + Architecture is to promote the arts and design as engines of civic imagination and social responsibility through distinction in creative teaching and research, artistic performance, and community-driven work. Through investigations in the performing and visual arts, design and affiliated pursuits, we provoke thought, cultivate aesthetic sensibilities, make space for memory and reflection, instigate creative action, and help build communities.

The College of Arts + Architecture provides programs that prepare graduates for careers as architects, artists, leaders, cultural administrators, and innovators in our emerging creative economy. The college draws together in a single academic unit disciplines with common histories, methods of inquiry, and potential for contributions to the community. It serves to enhance creative, professional, and cultural production within UNC Charlotte and to help lead the creative economy in the region and state. The college is responsive to both cross-cultural exchange and interdisciplinary research and programming and seeks to provide new connections to the public realm and new opportunities for community leadership.

The College of Arts + Architecture consists of one school and four departments, which share basic educational values and academic aspirations:

- **David R. Rabin School of Architecture**
- **Department of Art and Art History**
- **Department of Dance**
- **Department of Music**
- **Department of Theatre**

Degree Programs

All first-time, full-time freshmen entering the College of Arts + Architecture and UNC Charlotte in the Fall are required to take COAA 1101 (Student Success in Architecture, Art, Performance, and Design) during their first semester in the college.

All students in the College of Arts + Architecture must also satisfy the requirements for the degree program(s) in which they are enrolled. Students should consult with their academic advisor and chosen department to make certain they fully understand all degree requirements.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Majors

- Bachelor of Arts in Architecture
- Bachelor of Arts in Art
- Bachelor of Fine Arts in Art
- Bachelor of Arts in Art History
- Bachelor of Arts in Dance
- Bachelor of Fine Arts in Graphic Design
- Bachelor of Arts in Music
- Bachelor of Music
- Bachelor of Arts in Theatre

Minors

- Architectural History and Heritage
- Art History
- Dance
- Music Performance
- Theatre

Undergraduate Certificates

- Dance
- Jazz

Foreign Language Requirement

All students who earn a degree within the College of Arts + Architecture* are required to demonstrate proficiency in the language of their choice through the 1202 level. Proficiency can be demonstrated in one of the following ways:

- Completing the required coursework at UNC Charlotte
- Completing three years of the same foreign language in high school through level three
- Achieving a satisfactory score on the foreign language placement test (in Spanish, French, or German)
- Through approved transfer or transient credit earned at a college or university accredited by an accepted accrediting body
- A combination of the above methods (e.g., placing out of or earning transfer or transient credit for 1201 and completing the 1202 course, completing 1201 and placing out of or earning transfer or transient credit for 1202)

The following courses meet the College of Arts + Architecture's foreign language requirement. *Please note that the below courses also have prerequisites that students must meet prior to enrolling in the courses.*

ARBC 1202 - Elementary Arabic II (3)
CHNS 1202 - Elementary Chinese II (3)
FARS 1202 - Elementary Farsi II (3)
FREN 1202 - Elementary French II (3)
GERM 1202 - Elementary German II (3)
GREK 1202 - Elementary Ancient Greek II (4)
ITLN 1202 - Elementary Italian II (3)
JAPN 1202 - Elementary Japanese II (3)
LATN 1202 - Elementary Latin II (4)
MDGK 1202 - Elementary Modern Greek II (4)
PORT 1202 - Elementary Portuguese II (3)
RUSS 1202 - Elementary Russian II (3)
SPAN 1202 - Elementary Spanish II (4)
SWAH 1202 - Elementary Swahili II (4)

* This requirement applies to all students entering any degree program within the College of Arts + Architecture except those students in the B.F.A. in Art and the Music Education concentrations within the B.M. in Music.

Arts and Architecture Honors Program (AAHP)

With the founding of the College of Arts + Architecture (CoA+A), an Arts and Architecture Honors Program (AAHP) was established to provide an enriched academic and interdisciplinary experience for the college's most talented and self-motivated undergraduate students. The AAHP is one of the primary initiatives that formally brings students together from all units of the CoA+A. The AAHP furthers the CoA+A's goals of providing creative leadership for the University of North Carolina at Charlotte and greater Charlotte communities by encouraging and developing the full potential of its outstanding students. AAHP students take an active and engaged role in their own education within an interdisciplinary curriculum built on the shared nature of the built, visual, and performing arts. AAHP students not only explore connections between their various artistic disciplines, but also between the arts and the community. For additional details and application forms, visit the College of Arts + Architecture Honors website at coaa.charlotte.edu/college/honors.

Admission Requirements

Current Undergraduate Students and Transfers

- See University Admission Requirements
- See AAHP Prospective Students

Course Requirements

Introductory Course (1 credit hour)

AAHP 2600 - Introductory Honors Seminar (1)

Elective Honors Course (3 credit hours)

Select one course with the Honors designation (H). Any Theme courses (1501, 1502, 1511, 1512), as well as CTCM 2530 and WRDS 1103, that have an Honors section are eligible.

Seminar Courses (6 credit hours)

Select two of the following (at least one of which is not from the student's department):

AAHP 3701 - Honors Seminar in Dance (3)
AAHP 3702 - Honors Seminar in Architecture (3)
AAHP 3703 - Honors Seminar in Music (3)
AAHP 3704 - Honors Seminar in Theatre (3)
AAHP 3705 - Honors Seminar in Art and Art History (3)
AAHP 3706 - Interdisciplinary Honors Seminar (3)

Honors Candidacy (1 credit hour)

AAHP 3790 - Honors Candidacy Proposal Writing (1)

Thesis Course (3 credit hours)

AAHP 3791 - Honors Thesis (3)

This is an independent study course an AAHP student enrolls in with his or her Honors Thesis Advisor. It is taken during the student's final semester, and they must earn a grade of A. A student selects a Thesis Advisor during the Application to Candidacy process. Enrolling in this course is done only during a student's final semester and is required for completing the honors thesis and our program. All AAHP coursework must be completed before enrolling in AAHP 3791. AAHP 3791 is offered to an AAHP student after he or she successfully completes the Application to Candidacy process. The Application to Candidacy process is required for all students at UNC Charlotte completing an honors thesis. The Application to Candidacy process is undertaken during a student's penultimate semester (i.e., the semester before she or he enrolls in AAHP 3791). The process begins with a consultation with the AAHP Director. The process, which includes writing and researching a thesis proposal as well as forming a thesis committee of three faculty members, must be signed off on and submitted to the Honors College by Reading Day of the semester. Students do not receive any AAHP course credit for the Application to Candidacy work they undertake during the semester before enrolling in AAHP 3791. See the Arts and Architecture Honors Program (coaa.charlotte.edu/college/honors) for more details and the Application to Candidacy form.

Progression Requirements

In order to graduate with the Arts + Architecture honors distinction, candidates must have a 3.4 cumulative GPA and complete the requirements outlined above.

David R. Ravin School of Architecture

soa.charlotte.edu

Undergraduate Programs

- **B.A. in Architecture**
 - Architectural Studies
 - Practice
 - Pre-Professional
- **Minor in Architectural History and Heritage**

The mission of the School of Architecture (SoA) is to promote excellence in architecture and urban design education, scholarship, and practice in an inclusive and collaborative environment. The vision of the School of Architecture is to be a nationally recognized program known for linking academic excellence and access, preparing students to be entrepreneurial change agents, and expanding the disciplinary capacities and contributions of architecture in advancing social, technological, and environmental justice.

The School seeks to further the discourse between the theory and practice of architecture through the education and training of students, the work and research of the faculty, and ongoing engagement with the University, the profession, and the community.

To prepare undergraduate students to become future community and architectural leaders, the School of Architecture seeks to provide both a liberal and a professional education based on a holistic view of the built environment. The studio/seminar sequence in the Core Program emphasizes both writing and making to introduce students to alternative and complementary methods of investigating design problems. The professional degree path in the Advanced Program culminates in studios that emphasize self-direction and provide directed instruction on matters of importance to contemporary practice and theory, and includes courses in advanced building technology, professional practice, and digital practices.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Accreditation

The School of Architecture maintains accredited status through the National Architectural Accrediting Board, which reviews the curriculum, facility, faculty, and program resources annually. In addition, the NAAB conducts an intensive site visit every eight years. The School has maintained full accreditation standards as prescribed by this board and includes the following required statement:

"In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized

to accredit professional degree programs in architecture offered by institutions with U.S. regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture degree programs may require a preprofessional undergraduate degree in architecture for admission. However, the preprofessional degree is not, by itself, recognized as an accredited degree."

University of North Carolina at Charlotte, School of Architecture, offers the following NAAB-accredited degree programs:

- Master of Architecture (M.Arch.)
 - M.Arch. 1 Track (non-preprofessional degree + 96 credit hours)
 - M.Arch. 2 Track (pre-professional degree + 60 graduate credit hours)
 - M.Arch. Advanced Standing Track (UNC Charlotte pre-professional B.A. in Architecture + 40 credit hours)

Next accreditation visit for all programs: 2024.

Areas of Academic Focus

Required and elective courses provide opportunities for topical study of issues, themes, subdisciplines, and methods, both current and historic to architectural practices. The School of Architecture faculty offer expertise and instruction in the following areas:

- 1) **Design** - Studios and seminars provide both analytical and synthetic educational experiences along with the opportunity to pursue intense study of physical-environmental subject(s). These courses link humanistic, physical phenomena, social-psychological, behavioral, perceptual, and aesthetic studies. Design courses focus on a sophisticated and detailed study of building and site design arising from the representational methods intrinsic to architecture as well as investigation and criticism of contemporary practice and practitioners as it pertains to the understanding, design, and making of architecture.
- 2) **History and Theory** - These courses provide an understanding of the relationships between culture and its physical architectural manifestations from ancient to contemporary times. Courses focus on interpretive lenses, research methods, and writing strategies for the historical analysis and criticism of architecture. History and theory courses explore how these activities inform and relate to contemporary architectural practice, as well as how related disciplines in the social sciences and humanities inform an understanding of the built environment.
- 3) **Building Technology** - These courses provide a quantitative and qualitative understanding of building materials, structural theory, design, environmental systems issues and principles, and building systems integration. Courses explore emerging issues of sustainable design and the development of innovative building envelopes and systems that utilize both new and traditional materials, technology, and construction methods. Seeking to explore

the historical as well as contemporary realms of thermal, tactile and visual issues of architectural technology, students address appropriate material selection, methods of daylighting, passive and active systems for heating and cooling with consideration of both qualitative and quantitative outcomes.

- 4) **Digital Design, Fabrication, and Visualization** - These courses provide practical and theoretical training on matters of basic and advanced computational practices, including instruction in scripting and digital fabrication. Courses focus on computation as it affects materiality, process, and interaction.
- 5) **Urbanism** - These courses focus on the critical role of architecture in the city -- the processes and specific intents of physical interventions in urban landscapes and infrastructures. Through the design of groups of buildings as well as larger scale urban areas, issues of policy, politics, finance, planning, place, and culture are introduced as part of the essential conception and history of the city fabric.

Independent Studies

When appropriate, students may earn credit by pursuing a self-directed, faculty-approved study of a particular, significant architectural topic or subject.

Research Studies

Students may earn credit through participation in directed faculty research projects.

Rome Program and Education Abroad Opportunities

The School of Architecture conducts an international, semester-based program in Rome, Italy. This program provides a fully integrated curriculum in the Spring semester of the 4th year of the B.A. in Architecture program.

Additionally, the School encourages foreign study and exchange arrangements through the Office for International Programs. In the past, School of Architecture students have studied at Kingston University (London, England); Lund Institute of Technology (Lund, Sweden); University of Technology (Delft, Netherlands); Tongji University (Shanghai, China); and the Royal Danish Academy of Fine Arts (Copenhagen, Denmark).

Bachelor of Arts in Architecture, with Concentration in Architectural Studies

The undergraduate Bachelor of Arts in Architecture (B.A. in Architecture) is a 4-year degree that requires a minimum of 120 credit hours. This degree offers three concentrations, one of which must be completed to earn this degree. Students work with their advisor to declare a concentration during the spring semester of their second year in the program. Students who wish to become registered architects must also earn their professional degree, the Master of Architecture (M.Arch), from a program accredited by the National Architectural Accrediting Board (NAAB). All three concentrations may lead to professional licensure, and pathways to that goal vary depending on performance and the specific concentration earned in this degree. More information on progressing into graduate programs is available below, see Graduate Opportunities at

UNC Charlotte heading).

Admission Requirements

All program-level Admissions and Progression Requirements are in addition to the University of North Carolina at Charlotte's Admission Requirements and the University of North Carolina at Charlotte's Academic Standing Policy.

Undergraduate admission to the School of Architecture (SoA) is to the four-year B.A. in Architecture. Students admitted into this program are not guaranteed admission into the SoA's graduate programs upon completion of this degree. Admission into the program is highly competitive. Details about the process may be found on the SoA Undergraduate Admissions website.

Freshmen and Transfers

All program-level Admissions and Progression Requirements are in addition to the University of North Carolina at Charlotte's Admission Requirements and the University of North Carolina at Charlotte's Academic Standing Policy.

Undergraduate admission to the School of Architecture (SoA) is to the four-year B.A. in Architecture. Students admitted into this program are not guaranteed admission into the SoA's graduate programs upon completion of this degree. Admission into the program is highly competitive. Details about the process may be found on the SoA Undergraduate Admissions website.

Freshmen and Transfers

- See University Admission Requirements
- Minimum GPA: n/a (Freshmen); 2.0 (Transfers)
- *Declaration of Major.* Applicants must first apply to UNC Charlotte indicating "Architecture" as their intended major. UNC Charlotte applications must be completed by February 15.
- Applicants must also submit a secondary application to the SoA by February 15.

Currently Enrolled UNC Charlotte Students

Students already enrolled at UNC Charlotte may apply for a change-of-major into the Architecture program by following the instructions on the SoA admissions website.

Degree Requirements

College Prospect for Success Course (2 credit hours)

All new freshmen in the College of Arts + Architecture must take the following:

COAA 1101 - Student Success in Architecture, Art, Performance, and Design (2)

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. Courses to meet these requirements are incorporated in the curriculum structure. However, as part of their General Education Requirements, students in the B.A. in Architecture program must complete the following:

MATH 1103 - Precalculus Mathematics for Science and Engineering (3)

Core Program (45 credit hours)

All students pursuing the B.A. in Architecture degree at the SoA must complete a 45 credit-hour core sequence of courses designed to provide a solid understanding of fundamental issues, knowledge, and skills related to the practice, study, and understanding of architecture. The courses in the Core Program are:

- ARCH 1101 - Architectural Design Studio I (6)
- ARCH 1102 - Architectural Design Studio II (5)
- ARCH 1602 - Writing Reading Thinking Architecture (3)
- ARCH 2101 - Architectural Design Studio III (5)
- ARCH 2102 - Architectural Design Studio IV (5)
- ARCH 4050 - Architecture Topics (1 to 3)
- ARCH 4201 - Architectural History I: Prehistory-1750 (3)
- ARCH 4202 - Architectural History II: 1750-Present (3)
- ARCH 4204 - History/Theory Topics (3)
- ARCH 4301 - Material and Assembly Principles (3)
- ARCH 4302 - Environmental Systems Principles (3)

Restricted Elective Courses (12 credit hours)

All students pursuing the B.A. in Architecture degree with the Architectural Studies Concentration must complete 12 credit-hours of coursework in two fields related to the discipline, 6 credit-hours per department.

Additional courses in Architecture not included in the Core curriculum of the major may fulfill 6 credit-hours of this requirement.

Courses with the following course numbers may fulfill this requirement:

- AFRS 2xxx/3xxx/4xxx
- ANTH 2xxx/3xxx/4xxx
- ARCH 4xxx
- ARTx 1xxx/2xxx/3xxx/4xxx
- ARTH 1xxxx/2xxx/3xxx/4xxx
- CMET 1xxx/2xxx/3xxx/4xxx
- DANC 1xxx/2xxx/3xxx/4xxx
- ECON 1xxx/2xxx/3xxx/4xxx
- ESCI 1xxx/2xxx/3xxx/4xxx
- HLTH 1xxx/2xxx/3xxx/4xxx
- HIST 1xxx/2xxx/3xxx/4xxx
- GEOG 1xxx/2xxx/3xxx/4xxx
- GEOL 1xxx/2xxx/3xxx/4xxx
- ITxx 1xxx/2xxx/3xxx/4xxx
- JOUR 1xxx/2xxx/3xxx/4xxx
- MATH 1xxx/2xxx/3xxx/4xxx
- MUSC 1xxx/2xxx/3xxx/4xxx
- PHIL 1xxx/2xxx/3xxx/4xxx
- PHYS 1xxx/2xxx/3xxx/4xxx
- POLS 1xxx/2xxx/3xxx/4xxx
- PSYC 1xxx/2xxx/3xxx/4xxx
- SOCY 1xxx/2xxx/3xxx/4xxx
- SOWK 1xxx/2xxx/3xxx/4xxx
- STAT 1xxx/2xxx/3xxx/4xxx
- THEA 1xxx/2xxx/3xxx/4xxx
- WRDS 1xxx/2xxx/3xxx/4xxx

Some courses may require prerequisites or other registration

restrictions that prevent Architecture students from using them to fulfill this requirement.

Courses applied to satisfy General Education requirements may also be applied to satisfy this Restrictive Elective requirement.

Courses applied to satisfy the Restricted Elective requirement may also be applied toward a minor in another department if that department accepts them (the SoA does not determine which credits may be applied to minors in other departments).

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Advising

Undergraduate students are required to meet with the Academic Advisor at least once per semester. Students may elect to meet with the Associate Director also, in order to plan potential transitions into graduate programs.

Progression Requirements

To graduate with a Bachelor of Arts in Architecture degree, an overall GPA of 2.0 must be achieved.

Students are permitted one opportunity to repeat an ARCH course, as long as that opportunity abides by the guidelines of UNC Charlotte's Grade Replacement Policy. An ARCH course cannot be repeated more than once under any circumstances.

Students who earn a grade of F in the same ARCH course twice are suspended from the Architecture program.

Students are permitted one grade of D in any studio. Students who earn a second grade of D in any subsequent studio must repeat that studio.

Students who earn a grade of F in any studio after having earned a grade of D in a previous studio are suspended from the Architecture program.
Students who are suspended from the University due to deficiencies in their academic performance are also suspended from the Architecture program.

Students who are suspended from the Architecture program but remain in good standing with the University may appeal to the School of Architecture for reinstatement. The Associate Director will review the case and stipulate the terms of the appeals process and conditions for approval, after consultations with the Director, Undergraduate Program Director, and Academic Advisor.

Students who are suspended from the Architecture program as a result of being suspended from the University, but who still adhere to the progression requirements of the Architecture program, may appeal to the University for reinstatement. The Associate Director will review the case and consider whether or not to support the appeal to the University. Regardless of that support and the outcome of the appeal to the University, the student remains suspended from the Architecture program and must submit a separate program-level appeal, per the

description above.

Students who are readmitted to the University under the Forgiveness Policy remain suspended from the Architecture program and must submit a separate program-level appeal, per the description above. Students who are suspended from the University due to deficiencies in their academic performance, and who simultaneously fail to meet the above progression requirements may not appeal their suspension from the Architecture program for at least one-year following their readmission to the University.

Special Policies or Requirements

Residency Requirement

All students pursuing the B.A. in Architecture degree must complete a minimum of 27 credit-hours in ARCH-designated courses while in residence at UNC Charlotte.

Graduate Opportunities at UNC Charlotte

All applicants to the David R. Ravin School of Architecture's Master of Architecture program (M.Arch.) are required to complete UNC Charlotte's Graduate School application and follow all procedures for applying to that program. Applicants who earn the B.A. in Architecture from UNC Charlotte with a GPA of 3.5 or higher (both overall and in their major-based courses) are exempt from submitting a portfolio and will be automatically recommended for admission into the SoA's M.Arch. program. These applicants, however, must still be accepted by the Graduate School in order to be considered accepted into the program. Students with GPAs lower than 3.5 must complete all application requirements for the M.Arch. program and will be evaluated alongside all other applicants.

Applicants who are accepted into the SoA's M.Arch. program after earning the B.A. in Architecture with an Architectural Studies Concentration will be placed into one of two curricula:

- The three-year M.Arch. I Curriculum.
- The two-year M.Arch. II Curriculum.

The SoA's M.Arch. Admissions Committee is solely responsible for determining the track in which to place admitted applicants who earn the B.A. in Architecture with an Architectural Studies Concentration. Applicants from this concentration who are placed into the M.Arch. II Curriculum will be admitted on the condition that they complete ARCH 3100: Design Studio in a summer session prior to enrolling in the M.Arch. program, in most cases delaying their graduation from the undergraduate program. Applicants who do not fulfill that condition may be eligible to enroll in the M.Arch. I Curriculum program (if space allows), but they will be ineligible for the M.Arch. II Curriculum.

Honors Program

For details about the Arts + Architecture Honors Program, visit the AAHP program page (<https://coaa.charlotte.edu/college/honors>).

Bachelor of Arts in Architecture, *Practice Concentration*

The undergraduate Bachelor of Arts in Architecture (B.A. in Architecture) is a 4-year degree that requires a minimum of 120 credit hours. This

degree offers three concentrations, one of which must be completed to earn this degree. Students work with their advisor to declare a concentration during the spring semester of their second year in the program. Students who wish to become registered architects must also earn their professional degree, the Master of Architecture (M.Arch.), from a program accredited by the National Architectural Accrediting Board (NAAB). All three concentrations may lead to professional licensure, and pathways to that goal vary depending on performance and the specific concentration earned in this degree. More information on progressing into graduate programs is available below, see Graduate Opportunities at UNC Charlotte heading).

Admission Requirements

All program-level Admissions and Progression Requirements are in addition to the University of North Carolina at Charlotte's Admission Requirements and the University of North Carolina at Charlotte's Academic Standing Policy.

Undergraduate admission to the School of Architecture (SoA) is to the four-year B.A. in Architecture. Students admitted into this program are not guaranteed admission into the SoA's graduate programs upon completion of this degree. Admission into the program is highly competitive. Details about the process may be found on the SoA Undergraduate Admissions website.

Freshmen and Transfers

- See University Admission Requirements
- Minimum GPA: n/a (Freshmen); 2.0 (Transfers)
- *Declaration of Major*: Applicants must first apply to UNC Charlotte indicating "Architecture" as their intended major. UNC Charlotte applications must be completed by February 15.
- Applicants must also submit a secondary application to the SoA by February 15.

Currently Enrolled UNC Charlotte Students

Students already enrolled at UNC Charlotte may apply for a change-of-major into the Architecture program by following the instructions on the SoA admissions website.

Degree Requirements

College Prospect for Success Course (2 credit hours)

All new freshmen in the College of Arts + Architecture must take the following:

COAA 1101 - Student Success in Architecture, Art, Performance, and Design (2)

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. Courses to meet these requirements are incorporated in the curriculum structure. However, as part of their General Education Requirements, students in the B.A. in Architecture program must complete the following:

MATH 1103 - Precalculus Mathematics for Science and Engineering (3)

PHYS 1101 - Introductory Physics I (3)

Core Program (45 credit hours)

All students pursuing the B.A. in Architecture degree at the SoA must complete a 45 credit-hour core sequence of courses designed to provide a solid understanding of fundamental issues, knowledge, and skills related to the practice, study, and understanding of architecture. The courses in the Core Program are:

- ARCH 1101 - Architectural Design Studio I (6)
- ARCH 1102 - Architectural Design Studio II (5)
- ARCH 1602 - Writing Reading Thinking Architecture (3)
- ARCH 2101 - Architectural Design Studio III (5)
- ARCH 2102 - Architectural Design Studio IV (5)
- ARCH 4050 - Architecture Topics (1 to 3)
- ARCH 4201 - Architectural History I: Prehistory-1750 (3)
- ARCH 4202 - Architectural History II: 1750-Present (3)
- ARCH 4204 - History/Theory Topics (3)
- ARCH 4301 - Material and Assembly Principles (3)
- ARCH 4302 - Environmental Systems Principles (3)

Practice Concentration Courses (42 credit hours)

The Practice Concentration is a pathway designed for students intending to pursue the SoA's twelve-month accredited professional degree (the MArch. Advanced Standing Curriculum). This concentration provides the fastest and most intensive pathway to an accredited degree. This concentration requires the following additional advanced coursework:

- ARCH 3101 - Architectural Design Studio V (5)
- ARCH 3102 - Architectural Design Studio VI (5)
- ARCH 4101 - Architectural Design Studio VII: Advanced Building Design (5)
- ARCH 4102 - Architectural Design Studio VIII: Topical (5)
- ARCH 4303 - Structural Principles (3)
- ARCH 4304 - Structural Systems (3)
- ARCH 4604 - Computational Methods (3)
- ARCH 4605 - Computational Practice (3)
- ARCH 4203 - Architectural History III: Survey of Contemporary Theory (1950-Present) (3)

One additional elective (either ARCH 4050 or ARCH 4204) is required for this concentration:

- ARCH 4050 - Architecture Topics (1 to 3)
- or ARCH 4204 - History/Theory Topics (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Note: Students intending to enroll in UNC Charlotte's twelve-month MArch. AS Curriculum must earn, in addition to all requirements of this concentration, 128 credit-hours in total during their undergraduate studies in order to be eligible for that graduate program. Although the B.A. in Architecture degree requires only 120 credits, the School of Architecture's MArch. Admissions Committee will review transcripts to ensure that all applicants admitted to the AS Curriculum have earned 128 credit-hours prior to the start of their enrollment in the program.

Advising

Undergraduate students are required to meet with the Academic Advisor at least once per semester. Students may elect to meet with the Associate Director also, in order to plan potential transitions into graduate programs.

Progression Requirements

To graduate with a Bachelor of Arts in Architecture degree, an overall GPA of 2.0 must be achieved.

Students are permitted one opportunity to repeat an ARCH course, as long as that opportunity abides by the guidelines of UNC Charlotte's Grade Replacement Policy. An ARCH course cannot be repeated more than once under any circumstances.

Students who earn a grade of F in the same ARCH course twice are suspended from the Architecture program.

Students are permitted one grade of D in any studio. Students who earn a second grade of D in any subsequent studio must repeat that studio.

Students who earn a grade of F in any studio after having earned a grade of D in a previous studio are suspended from the Architecture program.
Students who are suspended from the University due to deficiencies in their academic performance are also suspended from the Architecture program.

Students who are suspended from the Architecture program but remain in good standing with the University may appeal to the School of Architecture for reinstatement. The Associate Director will review the case and stipulate the terms of the appeals process and conditions for approval, after consultations with the Director, Undergraduate Program Director, and Academic Advisor.

Students who are suspended from the Architecture program as a result of being suspended from the University, but who still adhere to the progression requirements of the Architecture program, may appeal to the University for reinstatement. The Associate Director will review the case and consider whether or not to support the appeal to the University. Regardless of that support and the outcome of the appeal to the University, the student remains suspended from the Architecture program and must submit a separate program-level appeal, per the description above.

Students who are readmitted to the University under the Forgiveness Policy remain suspended from the Architecture program and must submit a separate program-level appeal, per the description above. Students who are suspended from the University due to deficiencies in their academic performance, and who simultaneously fail to meet the above progression requirements may not appeal their suspension from the Architecture program for at least one-year following their readmission to the University.

Special Policies or Requirements

Residency Requirement

All students pursuing the B.A. in Architecture degree must complete a minimum of 27 credit-hours in ARCH-designated courses while in residence at UNC Charlotte.

Graduate Opportunities at UNC Charlotte

All applicants to the David R. Ravin School of Architecture's Master of Architecture program (M.Arch.) are required to complete UNC Charlotte's Graduate School application and follow all procedures for applying to that program. Applicants who earn the B.A. in Architecture from UNC Charlotte with a GPA of 3.5 or higher (both overall and in their major-based courses) are exempt from submitting a portfolio and will be automatically recommended for admission into the SoA's M.Arch. program. These applicants, however, must still be accepted by the Graduate School in order to be considered accepted into the program. Students with GPAs lower than 3.5 must complete all application requirements for the M.Arch. program and will be evaluated alongside all other applicants.

Applicants who are accepted into the SoA's M.Arch. program after earning the B.A. in Architecture with an Architectural Studies Concentration will be placed into one of two curricula:

- The three-year M.Arch. I Curriculum.
- The two-year M.Arch. II Curriculum.

The SoA's M.Arch. Admissions Committee is solely responsible for determining the track in which to place admitted applicants who earn the B.A. in Architecture with an Architectural Studies Concentration. Applicants from this concentration who are placed into the M.Arch. II Curriculum will be admitted on the condition that they complete ARCH 3100: Design Studio in a summer session prior to enrolling in the M.Arch. program, in most cases delaying their graduation from the undergraduate program. Applicants who do not fulfill that condition may be eligible to enroll in the M.Arch. I Curriculum program (if space allows), but they will be ineligible for the M.Arch. II Curriculum.

Honors Program

Minor in Architectural History and Heritage

The Minor in Architectural History and Heritage is open to students of any major and requires the completion of 18 credit hours of coursework. The requirements vary for students in the BA in Architecture majors and non-architecture majors.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements for Architecture Majors

Architecture majors must complete the requirements for the minor within their B.A. in Architecture 4-year degree.

Required Courses (9 credit hours)

For students in the B.A. in Architecture program, ARCH 4203 and 3 credit hours of ARCH 4204 may count towards both the minor and the major.

ARCH 4203 - Architectural History III: Survey of Contemporary Theory (1950-Present) (3)

ARCH 4204 - History/Theory Topics (3) (*specifically, Critical Approaches to Heritage*)

ARCH 4600 - Architectural History and Criticism Methodologies (3)

Elective Courses (9 credit hours)

Students in the BA in Architecture program should take 9 hours of coursework, including additional ARCH 4204 architectural history elective or any of the other courses listed below.

ARCH 4204 - History/Theory Topics (3)* (*repeated with change of topic*)

AFRS 2105 - Black Images in the Media in the U.S. (3)

AFRS 2156 - African Civilization (3)

AFRS 2206 - African Literature, Music, and Art (3)

AFRS 3121 - Contemporary African Art (3)

ANTH 2050 - Topics in Archaeology (3)

ANTH 2125 - Urban Anthropology (3)

ANTH 2151 - Introduction to Archaeology (3)

ANTH 2152 - New World Archaeology (3)

ANTH 2153 - Historic Archaeology (3)

ARTH 2001 - Topics in Art History (3)

ARTH 2003 - Pre-Columbian Art (3)

ARTH 2110 - Contemporary Art History (3)

ARTH 2140 - Medieval Art (3)

ARTH 3001 - Topics in Art History (1 to 3)

ARTH 3121 - Contemporary African Art (3)

ARTH 3318 - Mexica (Aztec) Art (3)

ARTH 3320 - Ancient Egyptian and Near Eastern Art (3)

ARTH 3322 - Ancient Greek Art (3)

ARTH 3323 - Ancient Roman Art I (3)

ARTH 3328 - West African Art and Display (3)

ARTH 3350 - Northern Renaissance Art (3)

ARTH 3351 - Italian Renaissance Art (3)

ARTH 3360 - Northern Baroque Art (3)

ARTH 3381 - Modernism (3)

ARTH 3393 - History of Photography (3)

ARTH 3395 - African American Art (3)

GEOG 2121 - Introduction to Development Studies (3)

GEOG 2165 - Patterns of World Urbanization (3)

GEOG 2200 - Introduction to Urban Studies (3)

GEOG 3100 - The City and Its Region (3)

GEOG 3110 - Urban Political Geography (3)

GEOG 3115 - Urban Transportation Problems (3)

GEOG 3200 - Land Use Planning (3)

GEOG 3205 - Internal Structure of the City (3)

GEOG 4209 - Small Town Planning (3)

HIST 2004 - Topics in Applied History (3)

HIST 2297 - History of North Carolina, 1500 to the Present (3)

HIST 3004 - Topics in Applied History (3)

HIST 3010 - Non-Western History and Culture through Film (3)

HIST 3011 - History and Culture through Film (3)

HIST 3190 - Slavery, Racism, and Colonialism in the African Diaspora (3)

HIST 3212 - History of the South to 1865 (3)

HIST 3213 - History of the South since 1865 (3)

HIST 3215 - Southerners (3)

HIST 3218 - Racial Violence, Colonial Times to Present (3)

HIST 3239 - African American Music: History and Culture (3)

HIST 3275 - American Lives (3)

HIST 3280 - Blacks in Urban America (3)

HIST 3281 - American Cities (3)

HIST 3381 - Introduction to Museums and Historic Sites (3)

HIST 3382 - Introduction to Historic Preservation (3)

INTL 3112 - Globalization and Culture (3)

INTL 3116 - Cultures and Conflicts (3)

INTL 3127 - Global Media (3)

JOUR 3163 - Visual Communication in Media (3)

LTAM 2117 - Cultures of the Caribbean (3)

LTAM 3220 - The Caribbean from Slavery to Independence (3)

LTAM 3260 - Slavery, Racism, and Colonialism in the African Diaspora (3)

LTAM 3313 - Pre-Columbian Art (3)

LTAM 4116 - Culture and Conflict in the Amazon (3)

LTAM 4317 - Topics in Hispanic Culture and Civilization (3)

MUSC 4298 - Jazz History (3)

PHIL 3231 - Aesthetics (3)

SOCY 2112 - Popular Culture (3)

WGST 2110 - Women and the Media (3)

WGST 3110 - Gender and Communication (3)

Minor Requirements for Non-Architecture Majors

Required Courses (12 credit hours)

Non-architecture majors should take four required courses, including their choice of two of the Architectural history surveys, the history methodologies course, and the history/theory topics course focused on critical approaches to heritage.

Choose two of the following courses (6 credit hours):

ARCH 4201 - Architectural History I: Prehistory-1750 (3)

ARCH 4202 - Architectural History II: 1750-Present (3)

ARCH 4203 - Architectural History III: Survey of Contemporary Theory (1950-Present) (3)

Take both of the following courses (6 credit hours):

ARCH 4204 - History/Theory Topics (3) (*specifically, Critical Approaches to Heritage*)
ARCH 4600 - Architectural History and Criticism Methodologies (3)

Elective Courses (6 credit hours)

Non-architecture majors should take six additional hours of ARCH 4204. Up to six hours may be counted towards the Minor in Architectural History and Heritage and another major or minor.

ARCH 4204 - History/Theory Topics (3) (*repeated with change of topic*)

Total = 18 Credit Hours

Progression Requirements

Students must maintain a minimum GPA of 3.0 in all courses counted toward the minor.

Department of Art and Art History

art.charlotte.edu

Undergraduate Programs

- **B.A. in Art**
- **B.F.A. in Art**
 - 3D Interdisciplinary Studies: Art in Space
 - Art Education
 - Digital Media
 - Illustration
 - Painting
 - Photography
 - Print Media
- **B.F.A. in Graphic Design**
- **B.A. in Art History**
 - Honors Program
- **Minor in Art History**

The Department of Art and Art History offers a diverse and comprehensive program leading to a Bachelor of Arts (a liberal arts degree in Studio Art), a Bachelor of Fine Arts in Art (a professional degree with concentrations in Studio Art or Art Education), a Bachelor of Fine Arts in Graphic Design, and a Bachelor of Arts in Art History. Students pursuing the B.F.A. in Art are required to select a studio concentration in 3D Interdisciplinary Studies: Art in Space, Digital Media, Illustration, Painting, Photography, or Print Media; or an Art Education concentration leading to a K-12 Licensure. Students may also earn a Minor in Art History.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

The degree programs are structured upon the following premises:

- Students need a basic level of skill and aesthetic sensitivity in a variety of studio disciplines.
- Students need an awareness of historical and theoretical knowledge in the arts.
- Students need in-depth knowledge to critically synthesize formal and conceptual aspects of work in a specific area of study.

Studio Art and Graphic Design courses are open to Art and Graphic Design majors only. Most Art History courses are open to any major in the department.

Transfer Credit

All transfer courses are automatically reviewed by the Office of Undergraduate Admissions. Students seeking to appeal the official transfer designations for ARTx courses must provide the Department Academic Advisor with copies of the official course descriptions and a syllabus for each course requested for consideration. Portfolios of creative work from each of the individual studio courses may also be

required.

Bachelor of Arts in Art

The Bachelor of Arts (B.A.) in Art requires 120 credit hours and is recommended for those interested in a double major, or for those intending to pursue a career in a discipline other than art. It is not intended for students interested in an in-depth study in a single studio area.

Admission Requirements

New Freshmen and Transfer Students

- See University Admission Requirements
- *Minimum GPA:* N/A
- *Declaration of Major:* Submit a digital portfolio of work for review. Check the department website for deadlines and FAQs on submission requirements. The department accepts new students from these groups for Fall semesters only. Students who are not admitted may re-submit their portfolio the following year. Only one re-submission is allowed.
- *Transferable Credit Hours:* All transfer courses are automatically reviewed by the Office of Undergraduate Admissions. Students seeking to appeal the official transfer designations for ARTx courses must provide the Department Academic Advisor with copies of the official course descriptions and a syllabus for each course requested for consideration. Portfolios of creative work from each of the individual studio courses may also be required.

Currently Enrolled Students

- Minimum Cumulative GPA: 2.0
- Submit a digital portfolio of work for review. Check the department website for deadlines and FAQs on submission requirements. The department accepts new students from these groups for Fall semesters only. Students who are not admitted may re-submit their portfolio the following year. Only one re-submission is allowed.

Degree Requirements

The Bachelor of Fine Arts (B.F.A.) in Art provides in-depth study with several concentration options; however, students may choose only one concentration area to pursue unless the second concentration area is Art Education (leading to K-12 licensure). If a student is pursuing a second major in Graphic Design, a maximum of 24 credits may be used towards Art major or concentration requirements. Students may take a maximum of 3 studio courses per semester without an approved academic petition to enroll in a 4th studio course.

College Prospect for Success Course (2 credit hours)

All new freshmen in the College of Arts + Architecture must take the following:

COAA 1101 - Student Success in Architecture, Art, Performance, and Design (2)

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Students intending to earn either the B.F.A. in Art or the B.A. in Art should take three ARTB 120x courses, and one ARTH course (ARTH 1211, ARTH 1212, or ARTH 2110) in the first semester of their Freshman year. All of the General Education courses should be organized around the Art requirements. It is usually not possible to graduate in four years without taking this number of Art courses right away. Prerequisite sequencing dictates the time to graduation, and all students should become thoroughly familiar with the course descriptions.

Foreign Language Requirement (0-8 credit hours)

Students in this major within the College of Arts + Architecture are required to demonstrate proficiency in the language of their choice through the 1202 level. For details, refer to the College of Arts + Architecture Foreign Language Requirements at the beginning of this section.

Major Courses (42 credit hours)

Basic Foundation Studios (15 credit hours)

- ARTB 1201 - 2D Design (3)
ARTB 1202 - 3D Design (3)
ARTB 1203 - Drawing I (3)
ARTB 1204 - Digital Foundations (3)
ARTB 1206 - First Year Seminar (3)

Elective Studio Courses (15 credit hours)

Select five of the following. Students must successfully complete the Basic Foundation Studios courses listed above to enroll in upper-level courses. At least 9 credit hours must be taken at UNC Charlotte.

- ARTx any 2000-level 2D studio course*
ARTx any 2000-level 3D studio course**
ARTx any 2000- or 3000-level studio course
ARTx any 2000- or 3000-level studio course
ARTx any 2000- or 3000-level studio course

*Options for 2000-Level 2D Courses:

- ARTD 2134 - Figure Drawing I (3)
ARTD 2139 - Drawing II (3)
ARTG 2181 - Graphic Design I (3)
ARTL 2186 - Illustration I (3)
ARTM 2105 - 4D (3)
ARTP 2131 - Painting I (3)
ARTR 2161 - Photo-Mechanical Print Media (3)
ARTR 2162 - Drawing/Expression in Print Media (3)
ARTT 2191 - Photographic Media I (3)

**Options for 2000-Level 3D Courses:

- ARTC 2171 - Ceramic Handbuilding (3)
ARTC 2172 - Ceramic Wheel I (3)
ARTF 2151 - Fibers I (3)
ARTZ 2104 - Installation Art (3)
ARTZ 2141 Methods and Materials in Sculpture
ARTZ 2306 - Introduction to 3D Modeling and Digital Fabrication (3)

Art History Courses (9 credit hours)

- ARTH 1211 - Art History Survey 1 (3)
ARTH 1212 - Art History Survey 2 (3)
ARTH 2110 - Contemporary Art History (3)

Senior Seminar (3 credit hours)

ARTA 4600 - Senior Seminar (3)*

**This Senior level course should be taken with the last Elective Studio during a student's last one or two semesters of study at UNC Charlotte.*

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Academic Advising

All Art, Graphic Design, and Art History majors are required to meet with the Academic Advisor in the Department of Art and Art History each semester. Students will not be able to register for any course at UNC Charlotte without attending the mandatory advising meetings. The Academic Advisor is available year-round.

Career mentoring in studio, graphic design, art history, and art education is offered by individual faculty members who are active professionals in those areas of study. Contact is best done by email or telephone. Most professors are available for appointments from the first day of classes until the last day of classes each Fall and Spring semester. Requirements for degrees and minors, as well as 4-year B.F.A. calendars, are available in the Department of Art and Art History office and online at art.charlotte.edu.

Students seeking to confirm that General Education graduation requirements are met should use DegreeWorks in My UNC Charlotte (my.charlotte.edu). Those seeking confirmation of Art requirements must contact the Academic Advisor.

Progression Requirements

To graduate with a B.A. in Art, students must achieve a minimum GPA of 2.0 in all courses required for the major.

Honors Program

For details about the Honors Program in Arts + Architecture, see the beginning of the College of Arts + Architecture section.

Bachelor of Fine Arts in Art with Concentration in 3D Interdisciplinary Studies: Art in Space

This Bachelor of Fine Arts (B.F.A.) in Art provides in-depth study in the concentration area. Because it requires 79 credit hours of courses within the Department of Art and Art History, and because many of the concentration courses are sequential, it is important to begin taking three studio art courses and one art history course during the first semester of study. Students should not complete the General Education courses before beginning the courses in the major. This will delay time to graduation. Four-year schedules differ for each concentration and are available online or in the departmental office.

Admission Requirements

New Freshmen and Transfer Students

- See University Admission Requirements
- Minimum GPA: N/A
- Declaration of Major: Submit a digital portfolio of work for review.

Check the department website for deadlines and FAQs on submission requirements. The department accepts new students from these groups for Fall semesters only. Students who are not admitted may re-submit their portfolio the following year. Only one re-submission is allowed.

- Transferable Credit Hours: All transfer courses are automatically reviewed by the Office of Undergraduate Admissions. Students seeking to appeal the official transfer designations for ARTx courses must provide the Department Academic Advisor with copies of the official course descriptions and a syllabus for each course requested for consideration. Portfolios of creative work from each of the individual studio courses may also be required.

Currently Enrolled Students

- Minimum Cumulative GPA: 2.0
- Submit a digital portfolio of work for review. Check the department website for deadlines and FAQs on submission requirements. The department accepts new students from these groups for Fall semesters only. Students who are not admitted may re-submit their portfolio the following year. Only one re-submission is allowed.

Degree Requirements

The Bachelor of Fine Arts (B.F.A.) in Art provides in-depth study with several concentration options; however, students may choose only one concentration area to pursue unless the second concentration area is Art Education (leading to K-12 licensure). If a student is pursuing a second major in Graphic Design, a maximum of 24 credits may be used towards Art major or concentration requirements. Students may take a maximum of 3 studio courses per semester without an approved academic petition to enroll in a 4th studio course.

College Prospect for Success Course (2 credit hours)

All new freshmen in the College of Arts + Architecture must take the following:

COAA 1101 - Student Success in Architecture, Art, Performance, and Design (2)

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-3 credit hours)

Students in this major are required to demonstrate proficiency in the language of their choice through the 1201 level. Proficiency can be demonstrated in one of the following ways:

- Completing the required coursework at UNC Charlotte
- Completing three years of the same foreign language in high school through level three
- Achieving a satisfactory score on the foreign languages placement test (in Spanish, French, or German)
- Through approved transfer or transient credit earned at a college or university accredited by an accepted accrediting body

Major Courses (79 credit hours)

Basic Foundation Studios (15 credit hours)

ARTB 1201 - 2D Design (3)

ARTB 1203 - Drawing 1 (3)
ARTB 1202 - 3D Design (3)
ARTB 1204 - Digital Foundations (3)
ARTB 1206 - First Year Seminar (3)

Art History Courses (15 credit hours)

ARTH 1211 - Art History Survey I (3)
ARTH 1212 - Art History Survey II (3)
ARTH 2110 - Contemporary Art History (3)
ARTH xxxx - Art History Elective Course (3)
ARTH xxxx - Art History Elective Course (3)

Elective Course (3 credit hours)

Students should take any type of course in the department (except ARTE 2121). If an Art History course is selected, students automatically earn a Minor in Art History, but they will need to declare the minor in the Department of Art and Art History advising office.

Advanced Elective Courses (6 credit hours)

Two Department of Art and Art History courses are required at the 3000 or 4000 level. These courses have prerequisites at the 2000 level (or above).

Concentration Courses (30 credit hours)

Concentration Introductory Studio Courses (15 credit hours)

Students must take at least one introductory course from each of the 3D content areas: ARTC, ARTF, ARTZ.

ARTC 2171 - Ceramics Handbuilding (3)
or ARTF 2151 - Fibers I (3)
or ARTZ 2141 - Methods and Materials in Sculpture (3)
or ARTZ 2306 - Introduction to 3D Modeling and Digital Fabrication (3)
1 course from any of these areas: ARTC, ARTF, ARTZ (3)
1 additional course from any of these areas: ARTC, ARTF, ARTZ (3)
1 additional course from any of these areas: ARTC, ARTD, ARTF, ARTG, ARTL, ARTM, ARTP, ARTR, ARTT, ARTZ (3)
1 additional course from any of these areas: ARTC, ARTD, ARTF, ARTG, ARTL, ARTM, ARTP, ARTR, ARTT, ARTZ (3)

Concentration Advanced Studio Courses (15 credit hours)

Students must complete the advanced courses in their chosen concentration. Some courses are sequential and require B.F.A. status as one of the prerequisites.

ARTC 3171 - Ceramic Sculpture (3)
or ARTC 3172 - Ceramics Wheel II (3)
or ARTF 3352 - Fibers: Surface Design (3)
or ARTF 3353 - Fibers: Constructed Textiles (3)
or ARTZ 3142 - Sculpture: Metal Fabrication and Bronze Casting (3)
or ARTZ 3243 - Sculpture: Wood and Stone Carving (3)
or ARTZ 3306 - Advanced 3D Modeling and Digital Fabrication (3)
1 additional 3000-level course from any of these areas: ARTC, ARTF, ARTZ (3)
1 additional 3000-level course from any of these areas: ARTC, ARTF, ARTZ (3)
1 additional 3000-level course from any of these areas: ARTC, ARTD, ARTF, ARTG, ARTL, ARTM, ARTP, ARTR, ARTT, ARTZ (3)
1 additional 3000-level course from any of these areas: ARTC, ARTD, ARTF, ARTG, ARTL, ARTM, ARTP, ARTR, ARTT, ARTZ (3)

Senior Experience (9 credit hours)

Students should take the following courses simultaneously:

ARTA 4600 - Senior Seminar (3)
ARTA 4901 - Senior Thesis I: Creative Research
ARTA 4902 - Senior Thesis II: Advanced Creative Practice (3)
or ARTL 4981 - Illustration Projects (3)

B.F.A. Portfolio Review (1 credit hour)

ARTA 3201 - B.F.A. Portfolio Review (1)

Students should register for ARTA 3201 after completion of ARTB 1201, ARTB 1202, ARTB 1203, ARTB 1204, and ARTB 1206. Internal transfers are required to have a cumulative 2.0 GPA. Art major required. Art Education requirements are listed under the section for the B.F.A. in Art with Concentration in Art Education program. Students compile a portfolio of work and written information to apply to any concentration in the B.F.A. in Art. A passing grade reflects acceptance of portfolio and admission into the B.F.A. degree program. Those denied may retake the course once. If denied a second time, students must move on to B.A. in Art status. Students must pass the course by 5th semester enrolled in the department or must move to B.A. in Art status. ARTA 3201 is graded on a Pass/No Credit basis.

Unrestricted Elective Courses (0-3 credit hours)

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Academic Advising

All Art, Graphic Design, and Art History majors are required to meet with the Academic Advisor in the Department of Art and Art History each semester. Students will not be able to register for any course at UNC Charlotte without attending the mandatory advising meetings. The Academic Advisor is available year-round.

Career mentoring in studio, graphic design, art history, and art education is offered by individual faculty members who are active professionals in those areas of study. Contact is best done by email or telephone. Most professors are available for appointments from the first day of classes until the last day of classes each Fall and Spring semester. Requirements for degrees and minors, as well as 4-year B.F.A. calendars, are available in the Department of Art and Art History office and online at art.charlotte.edu.

Students seeking to confirm that General Education graduation requirements are met should use DegreeWorks in My UNC Charlotte (my.charlotte.edu). Those seeking confirmation of Art requirements must contact the Academic Advisor.

Progression Requirements

To graduate with a B.F.A. in Art with Concentration in 3D Interdisciplinary Studies: Art in Space, students must achieve a minimum GPA of 2.0 in all courses required for the major.

Admission to Upper Division

Art majors must successfully complete ARTB 1201, ARTB 1202, ARTB 1203, ARTB 1204, and ARTB 1206, and then may enroll in ARTA 3201 (which may be repeated once). During the course, students assemble a portfolio of work and written documentation, which they submit to the

B.F.A. Review Committee. Students may not take advanced studio courses without successfully completing this course and having gained acceptance into the B.F.A. program.

Honors Program

For details about the Honors Program in Arts + Architecture, see the beginning of the College of Arts + Architecture section.

Bachelor of Fine Arts in Art

with Concentration in Art Education

The Department of Art and Art History offers a program of Art and Education courses to prepare students for K-12 Art Education licensure in North Carolina. Students should contact the Arts Education Specialist as soon as possible for advising. A decision later than freshman year to seek licensure may result in a delayed graduation date. Forms for the degree requirements and licensure requirements are available in the department office or online at art.charlotte.edu.

Admission Requirements

New Freshmen and Transfer Students

- See University Admission Requirements
- *Minimum GPA:* N/A
- *Declaration of Major:* Submit a digital portfolio of work for review. Check the department website for deadlines and FAQs on submission requirements. The department accepts new students from these groups for Fall semesters only. Students who are not admitted may re-submit their portfolio the following year. Only one re-submission is allowed.
- *Transferable Credit Hours:* All transfer courses are automatically reviewed by the Office of Undergraduate Admissions. Students seeking to appeal the official transfer designations for ARTx courses must provide the Department Academic Advisor with copies of the official course descriptions and a syllabus for each course requested for consideration. Portfolios of creative work from each of the individual studio courses may also be required.

Currently Enrolled Students

- Minimum Cumulative GPA: 2.0
- Submit a digital portfolio of work for review. Check the department website for deadlines and FAQs on submission requirements. The department accepts new students from these groups for Fall semesters only. Students who are not admitted may re-submit their portfolio the following year. Only one re-submission is allowed.

Degree Requirements

The Bachelor of Fine Arts (B.F.A.) in Art provides in-depth study with several concentration options; however, students may choose only one concentration area to pursue unless the second concentration area is Art Education (leading to K-12 licensure). If a student is pursuing a second major in Graphic Design, a maximum of 24 credits may be used towards Art major or concentration requirements. Students may take a maximum of 3 studio courses per semester without an approved academic petition to enroll in a 4th studio course.

College Prospect for Success Course (32 credit hours)

All new freshmen in the College of Arts + Architecture must take the following:

COAA 1101 - Student Success in Architecture, Art, Performance, and Design (2)

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Students intending to earn either the B.F.A. in Art or the B.A. in Art should take three ARTB 120x courses, and one ARTH course (ARTH 1211, ARTH 1212, or ARTH 2110) in the first semester of their Freshman year. All of the General Education courses should be organized around the Art requirements. It is usually not possible to graduate in four years without taking this number of Art courses right away. Prerequisite sequencing dictates the time to graduation, and all students should become thoroughly familiar with the course descriptions.

Major Courses (46 credit hours)

Foundation Courses (15 credit hours)

- ARTB 1201 - 2D Design (3)
- ARTB 1202 - 3D Design (3)
- ARTB 1203 - Drawing 1 (3)
- ARTB 1204 - Digital Foundations (3)
- ARTB 1206 - First Year Seminar (3)

Art History Courses (12 credit hours)

- ARTH 1211 - Art History Survey 1 (3)
- ARTH 1212 - Art History Survey 2 (3)
- ARTH 2110 - Contemporary Art History (3)
- One additional Art History course of student's choice (3)

Studio Courses (24 credit hours)

Required Studio Courses (6 credit hours)

- ARTP 2131 - Painting I (3)
or ARTD 2139 - Drawing II (3)
- ARTR 2161 - Photo-Mechanical Print Media (3)
or ARTR 2162 - Drawing/Expression in Print Media (3)
or ARTT 2191 - Photographic Media I (3)

Elective Studio Courses (18 credit hours)

- One 2000-level course from ARTC (Ceramics), ARTF (Fibers), or ARTZ (Sculpture) (3)
- One more 2000-level course from a different area than above of ARTC, ARTF, or ARTZ (3)
- Two studio courses at the 3000-level from a single (i.e., the same) studio area (6)
- Two elective studios from the following choices: ARTB, ARTC, ARTD, ARTF, ARTG, ARTL, ARTM, ARTP, ARTR, ARTT, ARTZ (6)

BFA Portfolio Review Course (1 credit hour)

ARTA 3201 - BFA Portfolio Review (1)*

Students should register for ARTA 3201 after completion of ARTB 1201,

ARTB 1202, ARTB 1203, ARTB 1204, and ARTB 1206. Internal transfers are required to have a cumulative 2.0 GPA. Art major required. Art Education requirements are listed under the section for the B.F.A. in Art with Concentration in Art Education program. Students compile a portfolio of work and written information to apply to any concentration in the B.F.A. in Art. A passing grade reflects acceptance of portfolio and admission into the B.F.A. degree program. Those denied may retake the course once. If denied a second time, student must move on to B.A. in Art status. Students must pass the course by 5th semester enrolled in the department or must move to B.A. in Art status. ARTA 3201 is graded on a Pass/No Credit basis.

Concentration Courses (34 credit hours)

- ARTE 2100 - Artists as Teachers (3)*
- ARTE 3121 - Elementary Art Methods (3) *
- ARTE 3124 - Investigating Global Art (3)*
- ARTE 4122 - Secondary Art Methods (3) *
- ARTE 4125 - Creativity and Social and Emotional Learning in Art Education (3)
- ARTE 4466 - Art Education Year-Long Internship (1)
- ARTE 4467 - Student Teaching in Visual Art (12)*
- EDUC 4290 - Modifying Instruction for Learners with Diverse Needs (3)*
- SPED 2100 - Introduction to Students with Special Needs (3)

*Transfer students must take these courses at UNC Charlotte.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Academic Advising

All Art, Graphic Design, and Art History majors are required to meet with the Academic Advisor in the Department of Art and Art History each semester. Students will not be able to register for any course at UNC Charlotte without attending the mandatory advising meetings. The Academic Advisor is available year-round.

Career mentoring in studio, graphic design, art history, and art education is offered by individual faculty members who are active professionals in those areas of study. Contact is best done by email or telephone. Most professors are available for appointments from the first day of classes until the last day of classes each Fall and Spring semester. Requirements for degrees and minors, as well as 4-year B.F.A. calendars, are available in the Department of Art and Art History office and online at art.charlotte.edu.

Students seeking to confirm that General Education graduation requirements are met should use DegreeWorks in My UNC Charlotte (my.charlotte.edu). Those seeking confirmation of Art requirements must contact the Academic Advisor.

Progression Requirements

To be formally admitted to the B.F.A. in Art with a concentration in Art Education, students must achieve the following in order to take ARTA

3201.

- *Minimum GPA of 2.7 overall GPA*
- *Pre-Major/Prerequisite Courses:*
 - ARTE 2100 with grade of B or above
 - SPED 2100 with grade of C or above
- Achieve passing scores on Praxis Core (or prove exemption via test scores)
- Application to Teacher Education (includes a clear background check and signed professional dispositions statement)

Admission to Upper Division

Art majors must successfully complete ARTB 1201, ARTB 1202, ARTB 1203, ARTB 1204, and ARTB 1206, and then may enroll in ARTA 3201 (which may be repeated once). During the course, students assemble a portfolio of work and written documentation, which they submit to the B.F.A. Review Committee. Students may not take advanced studio courses without successfully completing this course and having gained acceptance into the B.F.A. program.

Special Policies or Requirements

To progress to Student Teaching, students must earn a minimum 2.75 GPA in all Art and Education courses and a minimum 2.5 GPA overall. All Art and Education coursework must be grade of C or above. Students must also earn a grade of B or above in Student Teaching and pass Praxis II: Art Content and Analysis to be recommended for licensure.

Honors Program

For details about the Honors Program in Arts + Architecture, see the beginning of the College of Arts + Architecture section.

Bachelor of Fine Arts in Art with Concentration in Digital Media

This Bachelor of Fine Arts (B.F.A.) in Art provides in-depth study in the concentration area. Because it requires 79 credit hours of courses within the Department of Art and Art History, and because many of the concentration courses are sequential, it is important to begin taking three studio art courses and one art history course during the first semester of study. Students should not complete the General Education courses before beginning the courses in the major. This will delay time to graduation. Four-year schedules differ for each concentration and are available online or in the departmental office.

The Bachelor of Fine Arts (B.F.A.) in Art provides in-depth study with several concentration options; however, students may choose only one concentration area to pursue unless the second concentration area is Art Education (leading to K-12 licensure). If a student is pursuing a second major in Graphic Design, a maximum of 24 credits may be used towards Art major or concentration requirements. Students may take a maximum of 3 studio courses per semester without an approved academic petition to enroll in a 4th studio course.

College Prospect for Success Course (2 credit hours)

All new freshmen in the College of Arts + Architecture must take the following:

COAA 1101 - Student Success in Architecture, Art, Performance, and Design (2)

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-3 credit hours)

Students in this major are required to demonstrate proficiency in the language of their choice through the 1201 level. Proficiency can be demonstrated in one of the following ways:

- Completing the required coursework at UNC Charlotte
- Completing three years of the same foreign language in high school through level three
- Achieving a satisfactory score on the foreign languages placement test (in Spanish, French, or German)
- Through approved transfer or transient credit earned at a college or university accredited by an accepted accrediting body

Major Courses (79 credit hours)

Basic Foundation Studios (15 credit hours)

ARTB 1201 - 2D Design (3)

ARTB 1203 - Drawing 1 (3)

ARTB 1202 - 3D Design (3)

ARTB 1204 - Digital Foundations (3)

ARTB 1206 - First Year Seminar (3)

Art History Courses (15 credit hours)

ARTH 1211 - Art History Survey I (3)

ARTH 1212 - Art History Survey II (3)

ARTH 2110 - Contemporary Art History (3)
ARTH xxxx - Art History Elective Course (3)
ARTH xxxx - Art History Elective Course (3)

Elective Course (3 credit hours)

Students should take any type of course in the department (except ARTE 2121). If an Art History course is selected, students automatically earn a Minor in Art History, but they will need to declare the minor in the Department of Art and Art History advising office.

Advanced Elective Courses (6 credit hours)

Two Department of Art and Art History courses are required at the 3000 or 4000 level. These courses have prerequisites at the 2000 level (or above).

Concentration Courses (30 credit hours)

Concentration Introductory Studio Courses (15 credit hours)

ARTM 2105 - 4D (3)

1 course from any of these areas: ARTC, ARTF, ARTZ (3)

1 additional course from any of these areas: ARTC, ARTF, ARTZ (3)

1 additional course from any of these areas: ARTC, ARTD, ARTF, ARTG, ARTL, ARTM, ARTP, ARTR, ARTT, ARTZ (3)

1 additional course from any of these areas: ARTC, ARTD, ARTF, ARTG, ARTL, ARTM, ARTP, ARTR, ARTT, ARTZ (3)

Concentration Advanced Studio Courses (15 credit hours)

Students must complete the advanced courses in their chosen concentration. Some courses are sequential and require B.F.A. status as one of the prerequisites.

ARTM 3101 - Game Design and Graphics (3)

or ARTM 3102 - 3D Modeling and Animation (3)

or ARTM 3105 - Video Art (3)

ARTM 3205 - Interactive Art and Design (3)

ARTG 4xxx - UX/UI Design Strategies (3)

or ARTM 3005 - Topics in Digital Media (3)

or ARTM 3103 - Animation Production (3)

or ARTT 3390 - Digital Compositing (3)

or ARTZ 3306 - Advanced 3D Modeling and Digital Fabrication (3)

1 additional 3000-level course from any of these areas: ARTC, ARTD, ARTF, ARTG, ARTL, ARTM, ARTP, ARTR, ARTT, ARTZ (3)

1 additional 3000-level course from any of these areas: ARTC, ARTD, ARTF, ARTG, ARTL, ARTM, ARTP, ARTR, ARTT, ARTZ (3)

Senior Experience (9 credit hours)

Students should take the following courses simultaneously:

ARTA 4600 - Senior Seminar (3)

ARTA 4901 - Senior Thesis I: Creative Research

ARTA 4902 - Senior Thesis II: Advanced Creative Practice (3)

or ARTL 4981 - Illustration Projects (3)

B.F.A. Portfolio Review (1 credit hour)

ARTA 3201 - B.F.A. Portfolio Review (1)

Students should register for ARTA 3201 after completion of ARTB 1201, ARTB 1202, ARTB 1203, ARTB 1204, and ARTB 1206. Internal transfers are required to have a cumulative 2.0 GPA. Art major required. Art Education requirements are listed under the section for the B.F.A. in Art with Concentration in Art Education program. Students compile a portfolio of work and written information to apply to any concentration in

the B.F.A. in Art. A passing grade reflects acceptance of portfolio and admission into the B.F.A. degree program. Those denied may retake the course once. If denied a second time, student must move on to B.A. in Art status. Students must pass the course by 5th semester enrolled in the department or must move to B.A. in Art status. ARTA 3201 is graded on a Pass/No Credit basis.

Unrestricted Elective Courses (0-3 credit hours)

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Academic Advising

All Art, Graphic Design, and Art History majors are required to meet with the Academic Advisor in the Department of Art and Art History each semester. Students will not be able to register for any course at UNC Charlotte without attending the mandatory advising meetings. The Academic Advisor is available year-round.

Career mentoring in studio, graphic design, art history, and art education is offered by individual faculty members who are active professionals in those areas of study. Contact is best done by email or telephone. Most professors are available for appointments from the first day of classes until the last day of classes each Fall and Spring semester. Requirements for degrees and minors, as well as 4-year B.F.A. calendars, are available in the Department of Art and Art History office and online at art.charlotte.edu.

Students seeking to confirm that General Education graduation requirements are met should use DegreeWorks in My UNC Charlotte (my.charlotte.edu). Those seeking confirmation of Art requirements must contact the Academic Advisor.

Progression Requirements

To graduate with a B.F.A. in Art with Concentration in Digital Media, students must achieve a minimum GPA of 2.0 in all courses required for the major.

Admission to Upper Division

Art majors must successfully complete ARTB 1201, ARTB 1202, ARTB 1203, ARTB 1204, and ARTB 1206, and then may enroll in ARTA 3201 (which may be repeated once). During the course, students assemble a portfolio of work and written documentation, which they submit to the B.F.A. Review Committee. Students may not take advanced studio courses without successfully completing this course and having gained acceptance into the B.F.A. program.

Honors Program

Foreign Language Requirement (0-3 credit hours)

Students in this major are required to demonstrate proficiency in the language of their choice through the 1201 level. Proficiency can be demonstrated in one of the following ways:

- Completing the required coursework at UNC Charlotte
- Completing three years of the same foreign language in high school through level three
- Achieving a satisfactory score on the foreign languages placement test (in Spanish, French, or German)
- Through approved transfer or transient credit earned at a college or university accredited by an accepted accrediting body

Major Courses (79 credit hours)

Basic Foundation Studios (15 credit hours)

ARTB 1201 - 2D Design (3)
 ARTB 1203 - Drawing 1 (3)
 ARTB 1202 - 3D Design (3)
 ARTB 1204 - Digital Foundations (3)
 ARTB 1206 - First Year Seminar (3)

Art History Courses (15 credit hours)

ARTH 1211 - Art History Survey I (3)
 ARTH 1212 - Art History Survey II (3)
 ARTH 2110 - Contemporary Art History (3)
 ARTH xxxx - Art History Elective Course (3)
 ARTH xxxx - Art History Elective Course (3)

Elective Course (3 credit hours)

Students should take any type of course in the department (except ARTE 2121). If an Art History course is selected, students automatically earn a Minor in Art History, but they will need to declare the minor in the Department of Art and Art History advising office.

Advanced Elective Courses (6 credit hours)

Two Department of Art and Art History courses are required at the 3000 or 4000 level. These courses have prerequisites at the 2000 level (or above).

Concentration Courses (33 credit hours)

Concentration Introductory Studio Courses (15 credit hours)

ARTD 2134 - Figure Drawing I (3)
 ARTD 2139 - Drawing II (3)
 or ARTR 2162 - Drawing/Expression in Print Media (3)
 ARTL 2186 - Illustration I (3)
 One (1) 2000-level course from any of these areas: ARTC, ARTF, ARTZ (3)
 One (1) additional 2000-level course from any of these areas: ARTC, ARTD, ARTF, ARTG, ARTL, ARTM, ARTP, ARTR, ARTT, ARTZ (3)

Concentration Advanced Studio Courses (18 credit hours)

Students must complete the advanced courses in their chosen concentration. Some courses are sequential and require B.F.A. status as one of the prerequisites.

ARTD 3134 - Figure and Anatomy (3)

or 1 additional 3000-level course from any of these areas: ARTC, ARTD, ARTF, ARTG, ARTL, ARTM, ARTP, ARTR, ARTT, ARTZ (3)

ARTL 3186 - Visual Development: Environment (3)

ARTL 3187 - Narrative Illustration for Publishing Industry (3)

ARTL 3188 - Visual Development: Character Design (3)

or ARTL 3286 - Narrative Illustration for Entertainment Industry (3)

2 additional 3000-level courses from any of these areas: ARTC, ARTD, ARTF, ARTG, ARTL, ARTM, ARTP, ARTR, ARTT, ARTZ (6)

Senior Experience (6 credit hours)

Students should take the following courses simultaneously:

ARTA 4600 - Senior Seminar (3)
 ARTL 4981 - Illustration Projects (3)

B.F.A. Portfolio Review (1 credit hour)

ARTA 3201 - B.F.A. Portfolio Review (1)

Students should register for ARTA 3201 after completion of ARTB 1201, ARTB 1202, ARTB 1203, ARTB 1204, and ARTB 1206. Internal transfers are required to have a cumulative 2.0 GPA. Art major required. Art Education requirements are listed under the section for the B.F.A. in Art with Concentration in Art Education program. Students compile a portfolio of work and written information to apply to any concentration in the B.F.A. in Art. A passing grade reflects acceptance of portfolio and admission into the B.F.A. degree program. Those denied may retake the course once. If denied a second time, student must move on to B.A. in Art status. Students must pass the course by 5th semester enrolled in the department or must move to B.A. in Art status. ARTA 3201 is graded on a Pass/No Credit basis.

Unrestricted Elective Courses (0-3 credit hours)

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Academic Advising

All Art, Graphic Design, and Art History majors are required to meet with the Academic Advisor in the Department of Art and Art History each semester. Students will not be able to register for any course at UNC Charlotte without attending the mandatory advising meetings. The Academic Advisor is available year-round.

Career mentoring in studio, graphic design, art history, and art education is offered by individual faculty members who are active professionals in those areas of study. Contact is best done by email or telephone. Most professors are available for appointments from the first day of classes until the last day of classes each Fall and Spring semester. Requirements for degrees and minors, as well as 4-year B.F.A. calendars, are available in the Department of Art and Art History office and online at art.charlotte.edu.

Students seeking to confirm that General Education graduation requirements are met should use DegreeWorks in My UNC Charlotte (my.charlotte.edu). Those seeking confirmation of Art requirements must contact the Academic Advisor.

Progression Requirements

To graduate with a B.F.A. in Art with Concentration in Illustration, students must achieve a minimum GPA of 2.0 in all courses required for the major.

Admission to Upper Division

Art majors must successfully complete ARTB 1201, ARTB 1202, ARTB 1203, ARTB 1204, and ARTB 1206, and then may enroll in ARTA 3201 (which may be repeated once). During the course, students assemble a

portfolio of work and written documentation, which they submit to the B.F.A. Review Committee. Students may not take advanced studio courses without successfully completing this course and having gained acceptance into the B.F.A. program.

Honors Program

For details about the Honors Program in Arts + Architecture, see the beginning of the College of Arts + Architecture section.

Bachelor of Fine Arts in Art *with Concentration in Painting*

This Bachelor of Fine Arts (B.F.A.) in Art provides in-depth study in the concentration area. Because it requires 79 credit hours of courses within the Department of Art and Art History, and because many of the concentration courses are sequential, it is important to begin taking three studio art courses and one art history course during the first semester of study. Students should not complete the General Education courses before beginning the courses in the major. This will delay time to graduation. Four-year schedules differ for each concentration and are available online or in the departmental office.

Admission Requirements

New Freshmen and Transfer Students

- See University Admission Requirements
- *Minimum GPA:* N/A
- *Declaration of Major:* Submit a digital portfolio of work for review. Check the department website for deadlines and FAQs on submission requirements. The department accepts new students from these groups for Fall semesters only. Students who are not admitted may re-submit their portfolio the following year. Only one re-submission is allowed.
- *Transferable Credit Hours:* All transfer courses are automatically reviewed by the Office of Undergraduate Admissions. Students seeking to appeal the official transfer designations for ARTx courses must provide the Department Academic Advisor with copies of the official course descriptions and a syllabus for each course requested for consideration. Portfolios of creative work from each of the individual studio courses may also be required.

Currently Enrolled Students

- Minimum Cumulative GPA: 2.0
- Submit a digital portfolio of work for review. Check the department website for deadlines and FAQs on submission requirements. The department accepts new students from these groups for Fall semesters only. Students who are not admitted may re-submit their portfolio the following year. Only one re-submission is allowed.

Degree Requirements

The Bachelor of Fine Arts (B.F.A.) in Art provides in-depth study with several concentration options; however, students may choose only one concentration area to pursue unless the second concentration area is Art Education (leading to K-12 licensure). If a student is pursuing a second major in Graphic Design, a maximum of 24 credits may be used towards Art major or concentration requirements. Students may take a maximum of 3 studio courses per semester without an approved academic petition to enroll in a 4th studio course.

College Prospect for Success Course (2 credit hours)

All new freshmen in the College of Arts + Architecture must take the following:

COAA 1101 - Student Success in Architecture, Art, Performance, and Design (2)

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-3 credit hours)

Students in this major are required to demonstrate proficiency in the language of their choice through the 1201 level. Proficiency can be demonstrated in one of the following ways:

- Completing the required coursework at UNC Charlotte
- Completing three years of the same foreign language in high school through level three
- Achieving a satisfactory score on the foreign languages placement test (in Spanish, French, or German)
- Through approved transfer or transient credit earned at a college or university accredited by an accepted accrediting body

Major Courses (79 credit hours)

Basic Foundation Studios (15 credit hours)

- ARTB 1201 - 2D Design (3)
ARTB 1203 - Drawing 1 (3)
ARTB 1202 - 3D Design (3)
ARTB 1204 - Digital Foundations (3)
ARTB 1206 - First Year Seminar (3)

Art History Courses (15 credit hours)

- ARTH 1211 - Art History Survey I (3)
ARTH 1212 - Art History Survey II (3)
ARTH 2110 - Contemporary Art History (3)
ARTH xxxx - Art History Elective Course (3)
ARTH xxxx - Art History Elective Course (3)

Elective Course (3 credit hours)

Students should take any type of course in the department (except ARTE 2121). If an Art History course is selected, students automatically earn a Minor in Art History, but they will need to declare the minor in the Department of Art and Art History advising office.

Advanced Elective Courses (6 credit hours)

Two Department of Art and Art History courses are required at the 3000 or 4000 level. These courses have prerequisites at the 2000 level (or above).

Concentration Courses (30 credit hours)

Concentration Introductory Studio Courses (15 credit hours)

- ARTD 2134 - Figure Drawing I (3)
ARTD 2139 - Drawing II (3)
ARTP 2131 - Painting I (3)
1 course from any of these areas: ARTC, ARTF, ARTZ (3)

1 additional course from any of these areas: ARTC, ARTD, ARTF, ARTG, ARTL, ARTM, ARTP, ARTR, ARTT, ARTZ (3)

Concentration Advanced Studio Courses (15 credit hours)

Students must complete the advanced courses in their chosen concentration. Some courses are sequential and require B.F.A. status as one of the prerequisites.

ARTP 3131 - Abstract Painting (3)

ARTP 3132 - Figurative Painting (3)

ARTP 3161 - Mixed Media Painting (3)

1 additional 3000-level course from any of these areas: ARTC, ARTD, ARTF, ARTG, ARTL, ARTM, ARTP, ARTR, ARTT, ARTZ (3)

1 additional 3000-level course from any of these areas: ARTC, ARTD, ARTF, ARTG, ARTL, ARTM, ARTP, ARTR, ARTT, ARTZ (3)

Senior Experience (9 credit hours)

Students should take the following courses simultaneously:

ARTA 4600 - Senior Seminar (3)

ARTA 4901 - Senior Thesis I: Creative Research

ARTA 4902 - Senior Thesis II: Advanced Creative Practice (3)

or ARTL 4981 - Illustration Projects (3)

B.F.A. Portfolio Review (1 credit hour)

ARTA 3201 - B.F.A. Portfolio Review (1)

Students should register for ARTA 3201 after completion of ARTB 1201, ARTB 1202, ARTB 1203, ARTB 1204, and ARTB 1206. Internal transfers are required to have a cumulative 2.0 GPA. Art major required. Art Education requirements are listed under the section for the B.F.A. in Art with Concentration in Art Education program. Students compile a portfolio of work and written information to apply to any concentration in the B.F.A. in Art. A passing grade reflects acceptance of portfolio and admission into the B.F.A. degree program. Those denied may retake the course once. If denied a second time, student must move on to B.A. in Art status. Students must pass the course by 5th semester enrolled in the department or must move to B.A. in Art status. ARTA 3201 is graded on a Pass/No Credit basis.

Unrestricted Elective Courses (0-3 credit hours)

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Academic Advising

- ARTA 4902 - Senior Thesis II: Advanced Creative Practice (3)
- or ARTL 4981 - Illustration Projects (3)

B.F.A. Portfolio Review (1 credit hour)

- ARTA 3201 - B.F.A. Portfolio Review (1)

Students should register for ARTA 3201 after completion of ARTB 1201, ARTB 1202, ARTB 1203, ARTB 1204, and ARTB 1206. Internal transfers are required to have a cumulative 2.0 GPA. Art major required. Art Education requirements are listed under the section for the B.F.A. in Art with Concentration in Art Education program. Students compile a portfolio of work and written information to apply to any concentration in the B.F.A. in Art. A passing grade reflects acceptance of portfolio and admission into the B.F.A. degree program. Those denied may retake the course once. If denied a second time, student must move on to B.A. in Art status. Students must pass the course by 5th semester enrolled in the department or must move to B.A. in Art status. ARTA 3201 is graded on a Pass/No Credit basis.

Unrestricted Elective Courses (0-3 credit hours)

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Academic Advising

All Art, Graphic Design, and Art History majors are required to meet with the Academic Advisor in the Department of Art and Art History each semester. Students will not be able to register for any course at UNC Charlotte without attending the mandatory advising meetings. The Academic Advisor is available year-round.

Career mentoring in studio, graphic design, art history, and art education is offered by individual faculty members who are active professionals in those areas of study. Contact is best done by email or telephone. Most professors are available for appointments from the first day of classes until the last day of classes each Fall and Spring semester. Requirements for degrees and minors, as well as 4-year B.F.A. calendars, are available in the Department of Art and Art History office and online at art.charlotte.edu.

Students seeking to confirm that General Education graduation requirements are met should use DegreeWorks in My UNC Charlotte (my.charlotte.edu). Those seeking confirmation of Art requirements must contact the Academic Advisor.

Progression Requirements

To graduate with a B.F.A. in Art with Concentration in Print Media, students must achieve a minimum GPA of 2.0 in all courses required for the major.

Admission to Upper Division

Art majors must successfully complete ARTB 1201, ARTB 1202, ARTB 1203, ARTB 1204, and ARTB 1206, and then may enroll in ARTA 3201 (which may be repeated once). During the course, students assemble a portfolio of work and written documentation, which they submit to the B.F.A. Review Committee. Students may not take advanced studio courses without successfully completing this course and having gained acceptance into the B.F.A. program.

Honors Program

For details about the Honors Program in Arts + Architecture, see the beginning of the College of Arts + Architecture section.

Bachelor of Arts in Art History

The Bachelor of Arts (B.A.) in Art History requires 120 credit hours.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.0
- *Other:* There is no portfolio submission to apply for this major.
- *Declaration of Major:* Students declare a Major in Art History by indicating this on the application to UNC Charlotte, or by filling out a Change of Major form to record Art History major status. Students already enrolled at UNC Charlotte must meet with the departmental Academic Advisor prior to declaring the major.
- *Transferable Credit Hours:* Determined by UNC Charlotte Undergraduate Admissions. Students seeking to apply coursework taken at other institutions to the Art History major must provide *copies of the official course description and a syllabus* for each course requested for consideration.
- All transfer courses are automatically reviewed by the Office of Undergraduate Admissions. Students seeking to appeal the official transfer designations for ARTx courses must provide the Department Academic Advisor with copies of the official course descriptions and a syllabus for each course requested for consideration. Portfolios of creative work from each of the individual studio courses may also be required.

Matriculated and transfer students who do not meet requirements for admission to the program because of special circumstances may petition the Art History Faculty for acceptance into the program.

Currently Enrolled Students

Currently enrolled UNC Charlotte students must have a minimum cumulative GPA of 2.0 and must meet with the departmental Academic Advisor prior to declaring the Art History major. Following this meeting, students may complete a Change of Major form to declare the Art History major. Current students who do not meet requirements for admission to the program because of special circumstances may petition the Art History Faculty for acceptance into the program.

Degree Requirements

College Prospect for Success Course (2 credit hours)

All new freshmen in the College of Arts + Architecture must take the following:

COAA 1101 - Student Success in Architecture, Art, Performance, and Design (2)

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

Students in this major within the College of Arts + Architecture are required to demonstrate proficiency in the language of their choice through the 1202 level. For details, refer to the College of Arts +

Architecture Foreign Language Requirements at the beginning of this section.

Major Courses (15 credit hours)

- ARTH 1211 - Art History Survey 1 (3)
- ARTH 1212 - Art History Survey 2 (3)
- ARTH 2110 - Contemporary Art History (3)
- ARTH 2614 - Writing Seminar in Art History (3)
- ARTH 3114 - Art History Methods (3)

Note: ARTH 1211 and ARTH 1212 are normally taken in the Freshman year; ARTH 2110 and ARTH 2614 are normally taken in the Sophomore year or as soon as possible after declaring the major. ARTH 3114 or ARTH 3115 (taught simultaneously) may be taken once the other major courses have been completed.

Elective Art History Courses (18 credit hours)

These electives must be art history courses, in any offered subject. A maximum of 6 credit hours of 2000-level courses is permitted.

Art History Senior Seminar (3 credit hours)

- ARTH 4609 - Art History Senior Seminar (3)

Related Courses (3 credit hours)

Select one of the following:*

- AFRS 2105 - Black Images in the Media (3)
- AFRS 2206 - African Literature, Music and Art (3)
- AMST 3090 - Topics in American Film (3)
- AMST 3100 - Introduction to American Studies (3)
- ANTH 2050 - Topics in Archaeology (3)
- ANTH 2122 - Beliefs, Symbols and Rituals (3)
- ANTH 2151 - Introduction to Archaeology (3)
- ARCH 4201 - Architectural History I: Prehistory-1750 (3)
- ARCH 4202 - Architectural History II: 1750-Present (3)
- ARTB 1201 - 2D Design (3)
- ARTB 1202 - 3D Design (3)
- ARTB 1203 - Drawing I (3)
- ENGL 2106 - Film Criticism (3)
- GERM 3160 - Survey of German Film (3)
- GREK 3800 - Directed Individual Reading (3)
- HIST 2130 - Introduction to Historic Preservation - (3)
- HIST 2135 - Introduction to Museums and Historic Sites (3)
- HIST 3010 - History and Culture Through Film, Non-Western (3)
- HIST 3011 - History and Culture Through Film (3)
- HIST 3281 - American Cities (3)
- LTAM 3360 - Studies in Hispanic Film (3)
- PHIL 3220 - Aesthetics (3)
- POLS 3104 - Mass Media (3)
- RELS 3101 - Greek Myths and Religions (3)
- RELS 3163 - The Religious Art and Architecture of India (3)
- RELS 4127 - Material Christianity (3)
- RUSS 3203 - Russian Civilizations and Culture (3)
- SOCY 2112 - Popular Culture - (3)
- THEA 2130 - Theatre History I (3)
- THEA 2131 - Theatre History II (3)
- WGST 2110 - Women and the Media (3)
- WGST 3150 - Body Image (3)

**Any other course must be preapproved by the Coordinator of Art History and the Department Chair.*

Unrestricted Elective Courses (41-47 credit hours)

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Academic Advising

All Art, Graphic Design, and Art History majors are required to meet with the Academic Advisor in the Department of Art and Art History each semester. Students will not be able to register for any course at UNC Charlotte without attending the mandatory advising meetings. The Academic Advisor is available year-round.

Career mentoring in studio, graphic design, art history, and art education is offered by individual faculty members who are active professionals in those areas of study. Contact is best done by email or telephone. Most professors are available for appointments from the first day of classes until the last day of classes each Fall and Spring semester. Requirements for degrees and minors, as well as 4-year B.F.A. calendars, are available in the Department of Art and Art History office and online at art.charlotte.edu.

Students seeking to confirm that General Education graduation requirements are met should use DegreeWorks in My UNC Charlotte (my.charlotte.edu). Those seeking confirmation of Art requirements must contact the Academic Advisor.

Progression Requirements

Students must receive a grade of D or above in all courses applied to the major. Students cannot advance to the next course in a sequence until a grade of D or above is earned in prerequisite courses. Students must also meet the University's minimum 2.0 major GPA requirement to graduate.

Special Policies or Requirements

To graduate with a B.A. in Art History, students must achieve a minimum GPA of 2.0 in all courses required for the major.

Honors Program

For details about the Honors Program in Arts + Architecture, see the beginning of the College of Arts + Architecture section.

Bachelor of Fine Arts in Graphic Design

The Bachelor of Fine Arts (B.F.A.) in Graphic Design provides in-depth study of the field of graphic design. The degree is a professional degree that prepares students to enter a career in design, advertising, marketing, or other fields of visual communication. The degree requires 78 credit hours of courses in the department, and many courses are sequential. It is important to begin taking three studio art courses and one art history course during the first semester of study. Students should not complete the General Education courses before beginning the courses in the major, as that will delay time to graduation. A four-year schedule of the major is available online or from the department academic advisor.

Admission Requirements

Freshmen, Transfers, and Current UNC Charlotte Students not Majoring in Art

- See University Admission Requirements
- *Minimum GPA:* 2.0 (for current UNC Charlotte students)
- Submit a digital portfolio of work for review. Check the department website for deadlines and FAQs on submission requirements.
- *Declaration of Major.* The department accepts new students from these groups for Fall semesters only. These students may not declare a Graphic Design major in Spring semesters.
- *Transferable Credit Hours.* All transfer courses are automatically reviewed by the Office of Undergraduate Admissions. Students seeking to appeal the official transfer designations for ARTx courses must provide the Department Academic Advisor with copies of the official course descriptions and a syllabus for each course requested for consideration. Portfolios of creative work from each of the individual studio courses may also be required.

Current UNC Charlotte Students with a Major in Art

- See University Admission Requirements
- *Minimum Cumulative GPA:* 2.0
- *Declaration of Major.* Consult with the Graphic Design Program Director

Note: Most graphic design courses are open to Graphic Design majors only.

Degree Requirements

College Prospect for Success Course (2 credit hours)

All new freshmen in the College of Arts + Architecture must take the following:

COAA 1101 - Student Success in Architecture, Art, Performance, and Design (2)

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Students intending to earn the B.F.A. in Graphic Design should take two ARTB 120x courses, and one ARTH course (ARTH 1211, ARTH 1212, or ARTH 2110) in the first semester of their freshman year. Proceed to take two ARTB 120x courses and one Introductory Major Course in the second semester of the freshman year. Sequencing these courses in the first year will aid a student in graduating in four years. All of the General Education courses should be organized around the Graphic Design major requirements. Prerequisite sequencing dictates the time to graduation, and all students should carefully review the course descriptions.

Foreign Language Requirement (0-3 credit hours)

Students in this major are required to demonstrate proficiency in the language of their choice through the 1201 level. Proficiency can be demonstrated in one of the following ways:

- Completing the required coursework at UNC Charlotte
- Completing three years of the same foreign language in high school through level three
- Achieving a satisfactory score on the foreign languages placement

- test (in Spanish, French, or German)
- Through approved transfer or transient credit earned at a college or university accredited by an accepted accrediting body

Major Courses (78 credit hours)

Students may take a maximum of 3 studio courses per semester without an approved academic petition to enroll in a 4th studio course. If a student is pursuing a second major in Art, a maximum of 24 credits may be used towards Graphic Design major requirements.

Basic Foundation Studios (12 credit hours)

- ARTB 1201 - 2D Design (3)
- ARTB 1202 - 3D Design (3)
- ARTB 1203 - Drawing I (3)
- ARTB 1204 - Digital Foundations (3)

Art History Courses (12 credit hours)

- ARTH 1211 - Art History Survey I (3)
- ARTH 1212 - Art History Survey II (3)
- ARTH 2110 - Contemporary Art History (3)
- ARTH xxxx - Art History Elective (3)

Introductory Major Courses (12 credit hours)

All 2000-level courses have prerequisites of certain Basic Foundation Studios (see section above). The 2000-level courses are prerequisites for 3000- and 4000-level courses. Make sure to check the prerequisites and course descriptions for each course.

- ARTG 2180 - Design Thinking (3)
- ARTG 2181 - Graphic Design I (3)
- ARTG 2182 - Typography I (3)
- ARTM 2105 - 4D (3)

Introductory Studio Elective Courses (9 credit hours)

2000-level elective with any of these prefixes: ARTC, ARTF, ARTZ (3)
 Second 2000-level elective with any of these prefixes: ARTC, ARTF, ARTZ (3)
 2000-level elective from any studio art concentration; ARTL, ARTR, and ARTT recommended (3)

Intermediate Major Courses (15 credit hours)

All 3000-level courses have prerequisites of certain Introductory Major Courses (see section above). The 3000-level courses are prerequisites for 4000-level courses. Make sure to check the prerequisites and course descriptions for each course.

- ARTG 3183 - Graphic Design II (3)
- ARTG 3184 - Typography II (3)
- ARTG 3185 - UX/UI Design Strategies (3)
- ARTG 3186 - Communications Design (3)
- ARTM xxxx - Digital Media Elective (3)

Advanced Major Courses (9 credit hours)

All 4000-level courses have prerequisites of certain Intermediate Major Courses (see section above). Make sure to check the prerequisites and course descriptions for each course.

- ARTG 4180 - Print Production (3)
- ARTG 4182 - Design Research (3)

ARTG 4982 - Graphic Design Projects (3)

Advanced Studio Elective Courses (6 credit hours)

Two studio courses are required at the 3000- or 4000- level. These courses have prerequisites at the 2000- level (or above). In addition to regular studio courses from any concentration area, you may choose an internship, or independent study. Art History and Art Education courses do not count towards these requirements. Graphic Design majors are recommended to take courses with these prefixes: ARTL, ARTP, ARTR or ARTM, and/or to complete a graphic design internship for credit.

Senior Seminar (3 credit hours)

Students must have Senior status and be in the last one or two semesters in the degree program in order to register for the following course. It should be taken with the Graphic Design Projects course.

ARTA 4600 - Senior Seminar (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

To graduate with a B.F.A. in Graphic Design, students must achieve a minimum GPA of 2.0 in all courses required for the major.

Honors Program

For details about the Honors Program in Arts + Architecture, see the beginning of the College of Arts + Architecture section.

Honors Program in Art History

The optional honors credential may be awarded to students with a minimum overall GPA of 3.0 and a GPA of at least 3.25 in Art History courses. Candidates must meet GPA requirements to apply to program and maintain them to graduate with the departmental honors designation.

Admission Requirements

Current UNC Charlotte Undergraduate Students Majoring in Art History

To receive Honors in Art History, a candidate must:

- See University Admission Requirements
- Approach an Art History faculty member with the desire to apply to the program and discuss the student's expected area of research/topic.
- After securing an Art History faculty member's agreement to serve as thesis advisor, students must register for ARTH 3115 (offered in Fall semesters only) and earn an A in that course. During the course, begin the Application to Candidacy process for graduating with honors, as directed by the Honors College.
- Earn a grade of A in "Problems in Art History" seminar.
- Register for ARTH 4700 and present an honors thesis based on in depth research in primary sources to a committee composed of three members, at least two of whom must be Art History faculty. An honors candidate may fulfill requirements 3 and 4 either in sequence,

or concurrently during the same semester, as schedules demand.

Upon successful completion, the Honors notation will appear on a student's official transcript.

Minor in Art History

The Minor in Art History requires 18 credit hours of ARTH courses. At least 12 of the credit hours towards the Minor in Art History must be taken at UNC Charlotte.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Students with any major (except Art History) may apply for the Minor in Art History. A GPA of 2.0 is required for admission.
- Students pursuing a Minor in Art History must seek permission from instructors to register for any course with an "Art major" prerequisite. Permission is granted at the discretion of the instructor and is not guaranteed.

Minor Requirements

Required Courses (6 credit hours)

ARTH 1211 - Art History Survey 1 (3)

ARTH 1212 - Art History Survey 2 (3)

Elective Courses (12 credit hours)

Select any four ARTH courses.

Total = 18 Credit Hours

Progression Requirements

Students must receive a grade of D or above in all courses applied to the minor. Students cannot advance to the next course in a sequence until a grade of D or above is earned in prerequisite courses. Students also must meet the University's minimum 2.0 minor GPA requirement to graduate.

Department of Dance

dance.charlotte.edu

Undergraduate Programs

- **B.A. in Dance**
 - Applied Dance
 - Dance Education
 - Performance, Choreography, and Theory
- **Minor in Dance**
- **Professional Training Certificate in Dance**
- **Undergraduate Certificate in Dance, Advanced Studies**
- **Undergraduate Certificate in Musical Theatre** (*see the individual Musical Theatre section*)

In the Department of Dance, students find rigorous dance training and academic preparation and the flexibility and support needed to pursue individual interests and career paths. Dance is an open access program. The curriculum develops students' performance, creative, critical, and collaborative abilities, preparing them with skills to enter dance and related professions. Faculty are diverse in their perspectives and trainings and innovative leaders in performance, choreography, dance scholarship, teacher training, and community engagement. Our professional advisors help students navigate double majors and minors. Dance study is enhanced by state-of-the-art facilities, the interdisciplinary nature of our College of Arts + Architecture, study abroad opportunities, and the activities of a vibrant campus and the bustling, arts-minded city of Charlotte. The University of North Carolina at Charlotte is an accredited institutional member of the National Association of Schools of Dance (NASD).

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Degree Programs

The Department of Dance awards a Bachelor of Arts degree in Dance. All students receive a well-rounded experience of dance while concentrating in one of three areas:

- 1) Applied Dance
- 2) Performance, Choreography, and Theory
- 3) Dance Education with preparation for North Carolina K-12 Fine and Performing Arts, Dance Teacher licensure

Students who have varied backgrounds and interests are highly valued for what they bring to the dance program. Dance advisors and faculty work carefully with students to create plans of study that suit individual needs.

Technique courses include classical ballet, modern dance, contemporary dance, Hip Hop, street dance, jazz, West African, African-Brazilian, and

classical Indian dance. Students work with guest artists, faculty, and other students to perform in a 360-seat theater, 100-seat studio theater, and in community works. Dance student organizations perform and organize events in the department. Students' individual interests are nurtured through mentored projects. Students participate in faculty research projects on and off campus. Field studies include travel across the United States and to New York City to study and perform and study abroad dance programs in the United Kingdom and in Italy.

Students have access to internships, major arts and education institutions such as Charlotte Ballet and Blumenthal Performing Arts, and to professional touring artists. Alumni have varied careers, among them professional concert or commercial dancer, choreographer, K-12 educator, studio owner, college professor, community arts organizer, arts administrator, arts writer, arts marketer, dance therapist, and physical therapist.

The Department of Dance offers dance scholarships and work opportunities. Students attend summer programs on scholarship, including Martha Graham and Paul Taylor intensives and American Dance Festival.

Bachelor of Arts in Dance *with Concentration in Applied Dance*

The B.A. in Dance with Concentration in Applied Dance offers a Dance major with fewer credit hours than the Performance, Choreography, and Theory concentration. Applied Dance may be helpful to Dance majors who wish to pursue coursework outside the department to prepare for careers such as dance therapy, arts marketing, and physical therapy for dance.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- *Declaration of Major:* Students may declare the major at any time.
- *Transferable Credit Hours:* Determined by UNC Charlotte Undergraduate Admissions.

Currently Enrolled Students

- *Declaration of Major:* Students may declare the major at any time by completing a Change of Major form.

Degree Requirements

A minimum of 120 total earned credit hours is required for the degree. The B.A. in Dance with Concentration in Applied Dance requires 44-45 credit hours of coursework in the major. No more than 10 credit hours (five courses) may be double-counted with another major, minor, or General Education requirements.

College Prospect for Success Course (2 credit hours)

All new freshmen in the College of Arts + Architecture must take the following:

COAA 1101 - Student Success in Architecture, Art, Performance, and Design (2)

General Education Requirement (31-32 credit hours)

For details on required courses, refer to the General Education Program.

Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

DANC 1502 - Global Arts/Humanities: Dance in Global Contexts (3)
or DANC 1512 - Local Arts/Humanities: Dance in the United States (3)

Major Courses (45-46 credit hours)

Movement Practice Courses (22-23 credit hours)

African and African Diaspora Courses (6 credit hours)

Choose one of the following:

DANC 2125 - African Dance (2)
or DANC 2128 - African-Brazilian Dance (2)

Choose two of the following:

DANC 2127 – Latin Dance Forms (2)
DANC 2130 – Foundations of Hip-Hop Dance (2)
DANC 2226 - Vernacular Jazz Dance (2)

Ballet Courses (6 credit hours)

DANC 1209 - Ballet for Majors IA (2)
DANC 1210 - Ballet for Majors IB (2)
DANC 2209 - Ballet for Majors IIA (2)
or DANC 2210 - Ballet for Majors IIB (2)

Modern Dance Courses (6 credit hours)

DANC 1217 - Modern Dance for Majors IA (2)
DANC 1218 - Modern Dance for Majors IB (2)
DANC 2217 - Modern Dance for Majors IIA (2)
or DANC 2218 - Modern Dance for Majors IIB (2)

Advanced Movement Practice Courses (4-5 credit hours)

Select one area of focus and complete both courses in that area:

Advanced African Diaspora Dance Courses (4-5 credit hours)

Choose two of the following:

DANC 3131 – Hip Hop and Street Dance (3)
DANC 3253 - Black Dance in the Americas (2)
DANC 4252 - Origins of Jazz: Ring Shout Dance Traditions (3)

Advanced Ballet Courses (4 credit hours)

DANC 3210 - Ballet for Majors III (2)
Additional course in Ballet at the 2000 level or above

Advanced Modern Dance Courses (4 credit hours)

DANC 3218 - Modern Dance for Majors III (2)
or DANC 3229 - Contact Improvisation (2)
Additional course in Modern Dance at the 2000 level or above

Creative Process Courses (8 credit hours)

DANC 1280 - Improvisation (2)
DANC 2216 - Choreography I (3)
DANC 3230 - Choreography II (3)

Dance Theory Courses (9 credit hours)

DANC 2119 - Anatomy for Dancers (3)
DANC 3221 - Dance History, Theory, and Critical Thinking (3)
or DANC 3222 - Dance History, Theory, and Critical Thinking II (3)

DANC 3227 - Ballet Pedagogy (3)
or DANC 4110 - Communicating Across the Dance Discipline (3)
or DANC 4250 - Dance in Community (3)
or DANC 4328 - Teaching Dance: Theories and Practices (3)

Performance and Production Courses (4 credit hours)

DANC 2402 - Performance Practicum (1)
or DANC 2403 - Dancing for Choreographers (1)
DANC 2404 - Introduction to Dance Production (3)

Music Fundamentals Course (2 credit hours)

DANC 2228 - Music and Dance (2)

Dance Capstone Course (1 credit hour)

DANC 4802 – Applied Dance Capstone (1)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

- All DANC courses must be completed with no more than one grade of D.

Bachelor of Arts in Dance *with Concentration in Dance Education*

The Bachelor of Arts (B.A.) in Dance with a Concentration in Dance Education prepares students for K-12 Dance Education licensure in North Carolina. It is designed for students who wish to become dance teachers in public schools, but also benefits dancers who want to teach in studios or community centers. Student Teaching is possible in cooperation with the public schools of the Charlotte area.

Admission Requirements

Students who meet the University's admissions requirements are admissible to the Dance B.A. major. Admission to the Dance Education Concentration is dependent on meeting progression requirements in the Progression Requirements section below.

Freshmen and Transfers

- See University Admission Requirements
- *Declaration of Major:* Students seeking K-12 Dance Education licensure may declare the Dance major at any time by meeting with a Dance advisor.
- *Transferable Credit Hours:* Determined by UNC Charlotte Undergraduate Admissions

Currently Enrolled Students

Declaration of Major: Students may declare the Dance major at any time by meeting with a Dance advisor.

Degree Requirements

College Prospect for Success Course (2 credit hours)

All new freshmen in the College of Arts + Architecture must take the following:

COAA 1101 - Student Success in Architecture, Art, Performance, and Design (2)

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. Students in this major should take the following course that meets General Education requirements and also satisfies requirements in the major:

DANC 1502 - Global Arts/Humanities: Dance in Global Contexts (3)
or DANC 1512 - Local Arts/Humanities: Dance in the United States (3)

Major Courses (44 credit hours)

Movement Practice Courses (18 credit hours)

African and African Diaspora Courses (6 credit hours)

Choose one of the following:

DANC 2125 - African Dance (2)
or DANC 2128 - African-Brazilian Dance (2)

Choose two of the following:

DANC 2127 - Latin Dance Forms (2)
DANC 2130 - Foundations of Hip-Hop Dance (2)
DANC 2226 - Vernacular Jazz Dance (2)

Ballet Courses (6 credit hours)

DANC 1209 - Ballet for Majors IA (2)
DANC 1210 - Ballet for Majors IB (2)
DANC 2209 - Ballet for Majors IIA (2)
or DANC 2210 - Ballet for Majors IIB (2)

Modern Dance Courses (6 credit hours)

DANC 1217 - Modern Dance for Majors IA (2)
DANC 1218 - Modern Dance for Majors IB (2)
DANC 2217 - Modern Dance for Majors IIA (2)
or DANC 2218 - Modern Dance for Majors IIB (2)

SPED 2100 - Introduction to Students with Special Needs (3)
ELED 3120 - The Elementary School Child (3)
or MDLG 3130 - The Early Adolescent Learner (3)
or SECD 4140 - Adolescence and Secondary Schools (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

To be formally admitted to the Dance Education concentration, students must achieve the following:

- Minimum GPA of 2.75 overall GPA
- Pre-Major/Prerequisite Courses:
 - EDUC 2100 with grade of C or above
 - SPED 2100 with grade of C or above
- Passing scores on Praxis Core (or prove exemption via test scores)
- Application to Teacher Education (includes a clear background check and signed professional dispositions statement)
- To progress to student teaching, students must earn a minimum 2.75 GPA in all Dance and Education courses and a minimum 2.5 cumulative GPA overall. A minimum grade of C is required in all major courses, with no more than one grade of D allowed in a Dance course. Additionally, students must earn a grade of P in Student Teaching and a minimum edTPA score of 38 to be recommended for licensure.

Admission to Upper Division

After being accepted to Teacher Education, students may progress to upper level Dance Education coursework.

Honors Program

For details about the Honors Program in Arts + Architecture, see the beginning of the College of Arts + Architecture section.

Internship

Teacher education candidates participate in the yearlong internship during their final year of the program. During the first semester, students

spend one day per week in an assigned classroom while completing coursework on campus. During the second semester of the internship, students complete full-time Student Teaching in the same classroom. Applications for this yearlong internship are due two semesters before Student Teaching.

Bachelor of Arts in Dance *with Concentration in Performance, Choreography, and Theory*

The Bachelor of Arts in Dance with Concentration in Performance, Choreography and Theory is a comprehensive program of classes in technique and performance, creative process, production, history, culture, and theory. Dance students begin their study in the freshman year. In addition to coursework, students have opportunities to perform in two fully produced concerts a year choreographed by faculty and guest artists.

Admission Requirements

- *Declaration of Major:* Students may declare the major at any time by completing a Change of Major form.

Degree Requirements

A Major in Dance with a Concentration in Performance, Choreography, and Theory leading to the B.A. degree requires 120 credit hours, including 52-53 credit hours of dance content coursework.

College Prospect for Success Course (2 credit hours)

All new freshmen in the College of Arts + Architecture must take the following:

COAA 1101 - Student Success in Architecture, Art, Performance, and Design (2)

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. Students in this major should take the following course that meets General Education requirements and also satisfies requirements in the major:

DANC 1502 - Global Arts/Humanities: Dance in Global Contexts (3)
or DANC 1512 - Local Arts/Humanities: Dance in the United States (3)

Major Courses (53-54 credit hours)

Movement Practice Courses (22-23 credit hours)

African and African Diaspora Courses (6 credit hours)

Choose one of the following:

- DANC 2125 - African Dance (2)
or DANC 2128 - African-Brazilian Dance (2)

Choose two of the following:

- DANC 2127 – Latin Dance Forms (2)
DANC 2130 – Foundations of Hip-Hop Dance (2)
DANC 2226 - Vernacular Jazz Dance (2)

Ballet Courses (6 credit hours)
DANC 1209 - Ballet for Majors IA (2)
DANC 1210 - Ballet for Majors IB (2)
DANC 2209 - Ballet for Majors IIA (2)
or DANC 2210 - Ballet for Majors IIB (2)

Modern Dance Courses (6 credit hours)
DANC 1217 - Modern Dance for Majors IA (2)
DANC 1218 - Modern Dance for Majors IB (2)
DANC 2217 - Modern Dance for Majors IIA (2)
or DANC 2218 - Modern Dance for Majors IIB (2)

Advanced Movement Practice Courses (4-5 credit hours)
Select one area of focus and complete both courses in that area:

- 1) Advanced African Diaspora Dance Courses (4-5 credit hours)
Choose two of the following:
DANC 3131 - Hip Hop and Street Dance (3)
DANC 3253 - Black Dance in the Americas (2)
DANC 4252 - Origins of Jazz: Ring Shout Dance Traditions (3)
- 2) Advanced Ballet Courses (4 credit hours)
DANC 3210 - Ballet for Majors III (2)
Additional course in Ballet at the 2000 level or above
- 3) Advanced Modern Dance Courses (4 credit hours)
DANC 3218 - Modern Dance for Majors III (2)
or DANC 3229 - Contact Improvisation (2)
Additional course in Modern Dance at the 2000 level or above

Creative Process Courses (8 credit hours)

- DANC 1280 - Improvisation (2)
DANC 2216 - Choreography I (3)
DANC 3230 - Choreography II (3)

Dance Theory Courses (12 credit hours)

- DANC 2119 - Anatomy for Dancers (3)
DANC 3221 - Dance History, Theory, and Critical Thinking (3)
DANC 3222 - Dance History, Theory, and Critical Thinking II (3)
DANC 4110 - Communicating Across the Dance Discipline (3)

Dance Pedagogy Course (3 credit hours)

- Select one of the following:*
DANC 3227 - Ballet Pedagogy (3)
DANC 4250 - Dance in Community (3)
DANC 4328 - Teaching Dance: Theories and Practices (3)

Performance and Production Courses (6 credit hours)

- Performance Courses (3 credit hours)*
Select a total of 3 credit hours from the following repeatable courses:
DANC 2402 - Performance Practicum (1)
DANC 2403 - Dancing for Choreographers (1)

Production Courses (3 credit hours)

- DANC 2404 - Introduction to Dance Production (3)

Music Fundamentals Course (2 credit hours)

DANC 2228 - Music and Dance (2)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation. Students may choose to pursue a minor or second major.

Degree Total = 120 Credit Hours

Progression Requirements

- All DANC courses must be completed with no more than one grade of D.

Honors Program

For details about the Honors Program in Arts + Architecture, see the beginning of the College of Arts + Architecture section.

Minor in Dance

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

A Minor in Dance consists of 18 credit hours.

Movement Practice Courses (8 credit hours)

Take one course in each area plus one additional Movement Practice course.

African and African Diaspora Course

DANC 2125 - African Dance (2)

DANC 2127 - Latin Dance Forms (2)

DANC 2128 - African-Brazilian Dance (2)

DANC 2130 - Foundations of Hip-Hop Dance (2)

DANC 2226 - Vernacular Jazz Dance (2)

Ballet Course

DANC 1212 - Ballet I (2)

Modern Dance Course

DANC 1214 - Modern Dance I (2)

Additional Movement Practice Course

Take one additional course from those above (may be repeated for credit) or one of the following:

DANC 1213 - Ballet II (2)

DANC 1215 - Modern Dance II (2)

DANC 2126 - Tap Dance (2)

DANC 2129 - Odissi Dance (2)

DANC 2227 - Contemporary Jazz Dance (2)

Dance Theory Courses (3 credit hours)

Choose one:

DANC 1502 - Global Arts/Humanities: Dance in Global Contexts (3)

DANC 1512 - Local Arts/Humanities: Dance in the United States (3)

Dance Performance and Production Courses (3 credit hours)

Select three credits from the following. All courses may be repeated for credit.

DANC 2401 - Production Practicum – Dance Running Crew (1)

DANC 2402 - Performance Practicum (1)

DANC 2403 - Dancing for Choreographers (1)

THEA 2400 - Technical Theatre Practice (1)

Dance Elective Courses (4 credit hours)

Complete additional Dance courses from among those open to non-majors.

Total = 18 Credit Hours

Progression Requirements

All DANC courses must be completed with no more than one grade of D.

Professional Training Certificate in Dance

In conjunction with Charlotte's professional dance company, Charlotte Ballet, UNC Charlotte offers a Professional Training Certificate in Dance for students specializing in ballet performance. This unique partnership provides the student an association with a professional dance company while earning a college degree. The 16 credit hours earned in the Certificate are included in the requirements for the baccalaureate degree. Pre-college credit is also available to high school students.

Open by audition to a student in any academic major, the two-year Professional Training Certificate in Dance provides training with teachers at Charlotte Ballet. Rehearsal and performance opportunities are available in addition to classes in ballet technique, pas de deux, pointe, and variations. The Charlotte Ballet is an exceptional company whose Artistic Director, Alejandro Cerrudo, includes both classical and contemporary works in the repertory.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Open by audition to a student in any academic major.

Certificate Requirements

DANC 3201 - Professional Training Certificate in Dance (4)

DANC 3202 - Professional Training Certificate in Dance (4)

DANC 4201 - Professional Training Certificate in Dance (4)

DANC 4202 - Professional Training Certificate in Dance (4)

Certificate Total = 18 Credit Hours

Undergraduate Certificate in Dance, Advanced Studies

The Certificate for Advanced Dance Studies prepares dance students to work as community artists, educators, and advocates. It offers students who have completed dance degree requirements for the B.A. in Dance with a Concentration in Performance, Choreography, and Theory, or a Concentration in Dance Education the opportunity to deepen their work in performance, choreography, and related practices and to complete a

culminating project.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Certificate Requirements

The certificate requires 21 credit hours beyond the requirements for the B.A. in Dance with Concentration in Performance, Choreography, and Theory or a B.A. in Dance with Concentration in Dance Education, unless otherwise noted.

Movement Practice Courses (4 credit hours)

Select a total of 4 credit hours of movement practice courses at the 2000 or 3000 level with mentor approval.

Performance Practicum Courses (2 credit hours)

DANC 2402 - Performance Practicum (1)

DANC 3402 - Performance Practicum (1)

Career Preparation Courses (6 credit hours)

DANC 3232 - Digital Skills for Artists (3) (*May be counted toward the requirements for the Dance Education concentration*)

DANC 4401 - Dance Teaching Practicum (3)

Leadership Course (3 credit hours)

Select one of the following:

COMM 3136 - Leadership, Service, and Ethics (3)

DANC 4250 - Dance in Community (3)

THEA 2221 - Stage Management (3)

Other course with a Service Learning (SL) designation

Capstone Courses (6 credit hours)

Students should complete DANC 4801 for 3 credit hours in the semester prior to DANC 4800 as preparation for the capstone project.

DANC 4800 - Dance Capstone Project (3)

DANC 4801 – Independent Study (1 to 6)

Special Policies or Requirements

Advanced Dance Studies students must identify a faculty mentor in consultation with the Department Chair.

Certificate Total = 21 Credit Hours

Department of Music

music.charlotte.edu

Undergraduate Programs

- **B.A. in Music**
 - Applied Music
 - Contemporary Practices and Cultural Rhetoric
- **Bachelor of Music**
 - Composition
 - Elective Study in an Outside Field
 - Jazz Studies
 - Music Education, Choral/General
 - Music Education, Instrumental/General
 - Performance, Instrumental
 - Performance, Vocal
- **Minor in Music Performance**
- **Undergraduate Certificate in Jazz**
- **Undergraduate Certificate in Musical Theatre** (*see the individual Musical Theatre section*)

The Department of Music is a community of nationally recognized artists, scholars, and pedagogues who are committed to preparing students of diverse backgrounds and interests for healthy, productive, and successful lives as musical advocates and professionals. The faculty leverage their location within both a major research university and a vibrant cultural metropolis to provide intellectual and artistic leadership through excellence in teaching, scholarly and creative activity, and service.

Located in a state-of-the-art teaching and performance facility, the department offers majors and minors intensive professional programs in all wind, string, and percussion instruments, in addition to world-class studies in piano, voice, opera and musical theatre, choral music, and jazz. The department offers numerous opportunities for UNC Charlotte students from all majors in all colleges to participate in bands, choirs, orchestras, and jazz ensembles.

Music students at UNC Charlotte take full advantage of the incomparable experience of studying music in a vibrant cosmopolitan city. As teachers, they gain real-world experience by working alongside many of the finest music educators in the country. As performers, they frequently appear in churches, jazz clubs, and other venues throughout the Charlotte region.

Partnerships with local arts organizations such as the Charlotte Symphony Orchestra and Opera Carolina allow our students to take master classes with world-renowned visiting artists, and participate in professional performances. Students even have opportunities to hold jobs and internships with these organizations and others throughout the Charlotte region.

A major in music offers students comprehensive training in composition, education, jazz studies, performance, or liberal arts. Most music

graduates move directly into the profession as teachers or performers, while others opt for advanced training in graduate programs or internships with professional organizations. A number of alums have used their undergraduate training as a foundation for other professions, including medicine and law.

UNC Charlotte is a member of the National Association of Schools of Music. The music education program is accredited by the National Council for Accreditation of Teacher Education and approved by the North Carolina Department of Public Instruction.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Admission Requirements

All students who wish to major or minor in music must audition and complete a series of placement examinations following acceptance (see the "Admissions" link at music.charlotte.edu for details). Each student majoring in music, regardless of degree plan or concentration, is required to take private lessons (Applied Music), perform in an approved primary ensemble, and take Performance Class every semester enrolled.* For specific degree requirements, including those for the Sophomore Review and the appropriate culminating experience(s), please review the *Department of Music Student Handbook*.

*These requirements are not applicable for music education majors during the semester they are enrolled in Student Teaching.

Bachelor of Arts in Music, *Applied Music Concentration*

The Bachelor of Arts in Music with a concentration in Applied Music is designed for students who want to combine training in music with the exploration of other disciplines.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- Minimum GPA: n/a
- Transferable Credit Hours: Determined by UNC Charlotte Undergraduate Admissions.
- Declaration of Major: A formal audition is required for acceptance to the Music major (see the Music Department "Admissions" website for audition processes and dates). Students are first admitted as Pre-Music. If the student is approved for acceptance after the audition, their major is changed to Music, and they may proceed with major coursework.

Currently Enrolled Students

- A formal audition is required for acceptance to the Music major. Students already enrolled at UNC Charlotte access the audition information on the Music Department "Admissions" website and follow the current student instructions for securing their audition. If the student is approved for acceptance after the audition, their major is changed to Music, and they may proceed with major coursework. Students must indicate Music Education at the time of audition to avoid a delayed graduation date.

Degree Requirements

The curriculum consists of 31 credit hours of General Education or 33 credit hours if COAA 1101 is included in General Education; 23 credit hours of musicianship courses, including music theory, ear training, piano, and music history; 18 credit hours of performance courses and music electives, including applied lessons and ensembles, and 38 credit hours of electives-all of which can be applied to a minor or second major. For specific requirements, refer to the *Department of Music Student Handbook*. The culminating experience for this degree is either an academic Senior Project or Senior Music Internship.

For the Senior Project, students must complete a minimum of 3 credit hours of MUSC 4800 consisting of a single project. Students may repeat MUSC 4800 to achieve this requirement. In keeping with the diverse nature of scholarly/creative activities in music, the final product may vary to include a historical, theoretical, and/or technical research paper; a portfolio of original compositions; a lecture-recital; or a project of similar scope. In all cases, some written documentation of the ideas and process involved is required.

For the Senior Internship, students must complete a minimum of three credit hours of MUSC 4410. Students may repeat MUSC 4410 to achieve this requirement.

College Prospect for Success Course (2 credit hours)

All new freshmen in the College of Arts + Architecture must take the following:

COAA 1101 - Student Success in Architecture, Art, Performance, and Design (2)

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Major Courses (41 credit hours)

Musicianship Courses (23 credit hours)

MUSC 1230 - Musicianship I (3)

MUSC 1231 - Musicianship II (3)

MUSC 1233 - Class Piano I (1)

MUSC 1234 - Class Piano II (1)

MUSC 2230 - Musicianship III (3)

MUSC 3170 - Western Classical Music: Antiquity-Baroque (3)

MUSC 3171 - Western Classical Music: Classic-Present (3)

Select one from the following:

MUSC 3129 - Music Theories of the World (3)

MUSC 3131 - Popular Music Songwriting (3)

MUSC 3132 - Advanced Tonal Aural Skills (3)

MUSC 3133 - Advanced Post-Tonal Aural Skills (3)

MUSC 4410 - Senior Music Internship (2 to 4) (*a minimum of 3 credit hours is required*)

or MUSC 4800 - Senior Project Preparation (1 to 3) (*a minimum of 3 credit hours is required*)

Performance and Music Elective Courses (16-18 credit hours)

MUPF 11xx - Primary Ensembles (1) (*6 semesters*)
MUPF 11xx - Secondary Ensembles (1) (*2 semesters*)
MUPF 12xx - Applied Music (1 to 2) (*6-8 semesters*)
MUSC 1300 - Performance Class (0) (*4 semesters*)
Any MUSC or MUPF course(s) at the 3000- or 4000-level (2)

Diction Courses (0-2 credit hours)

These courses are required only for students enrolled in MUPF 1253.

MUSC 2137 - Phonetics and Articulation for Singers I: Italian and Latin Diction (1)
MUSC 2138 - Phonetics and Articulation for Singers II: English Diction (1)

Restricted Elective Courses (30 credit hours)

Select 26 credit hours outside the Department of Music. Courses may be used to complete a Minor or Second Major.

Unrestricted Elective Courses (8 credit hours)

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Most Music courses require grades of C or above to progress to subsequent levels of study. All required Music courses must be passed with grades of C or above to graduate. For specific requirements, refer to the *Department of Music Student Handbook*.

All students are required to pass a Sophomore Review (typically pursued the Spring semester of a student's second year in the program). The B.A. Sophomore Review process consists of a Musicianship Evaluation and an Interview in preparation for the capstone project or experience. Students who fail their Sophomore Review will be eligible to initiate a new Review the following semester.

Honors Program

For details about the Honors Program in Arts + Architecture, see the beginning of the College of Arts + Architecture section.

Bachelor of Arts in Music, *Contemporary Practices & Cultural Rhetoric* Concentration

The Bachelor of Arts in Music with a Concentration in Contemporary Practices & Cultural Rhetoric is designed for students who want to combine training in music with the exploration of other disciplines.

All program-level Admissions and Progression Requirements are in addition to the University of North Carolina at Charlotte Admission Requirements.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements

- *Minimum GPA:* n/a
- *Transferable Credit Hours:* Determined by UNC Charlotte Undergraduate Admissions.
- *Declaration of Major:* A personal statement is required for acceptance to the Bachelor of Arts in Music with a Concentration in Contemporary Practices & Cultural Rhetoric (see the Music Department “Admissions” website for submission processes and details). Students are first admitted as Pre-Music. If the student is approved for acceptance after submitting their personal statement, their major is changed to Music, and they may proceed with major coursework.

Currently Enrolled Students

A personal statement is required for acceptance to the Bachelor of Arts in Music with a Concentration in Contemporary Practices & Cultural Rhetoric. Students already enrolled at UNC Charlotte access the application information on the Music Department “Admissions” website and follow the instructions for submitting their personal statement. If the student is approved for acceptance, their major is changed to Music, and they may proceed with major coursework.

Degree Requirements

The curriculum consists of 31 credit hours of General Education or 33 credit hours if COAA 1101 is included in General Education; 30 credit hours of musicianship courses, including music theory, ear training, and music history and literature; 12 credit hours of performance courses and music electives, including group applied instruction and ensembles; and 42 credit hours of electives, all of which can be applied to a minor or second major. For specific requirements, refer to the *Department of Music Student Handbook*. The culminating experience for this degree is either an academic Senior Project or Senior Music Internship.

For the Senior Project, students must complete a minimum of 3 credit hours of MUSC 4800 consisting of a single project. Students may repeat MUSC 4800 to achieve this requirement. In keeping with the diverse nature of scholarly/creative activities in music, the final product may vary to include a historical, theoretical, and/or technical research paper; a portfolio of original compositions; a lecture-recital; or a project of similar scope. In all cases, some written documentation of the ideas and process involved is required.

For the Senior Internship, students must complete a minimum of three credit hours of MUSC 4410. Students may repeat MUSC 4410 to achieve this requirement.

College Prospect for Success Course (2 credit hours)

All new freshmen in the College of Arts + Architecture must take the following:

COAA 1101 - Student Success in Architecture, Art, Performance, and Design (2)

General Education Courses (31 credit hours)

For details on required courses, refer to the General Education Program.

Major Courses (42 credit hours)

Musicianship Courses (30 credit hours)

MUSC 1102 - Fundamentals of Musicianship (3)
MUSC 1230 - Musicianship I (3)
MUSC 1231 - Musicianship II (3)

MUSC 1502 - Global Arts/Humanities: Music in Global Communities (3)
or MUSC 1512 - Local Arts/Humanities: Music in U.S. Communities (3)
MUSC 3172 - Western Classical Music Literature (3)
MUSC 4410 - Senior Music Internship (2 to 4) *
or MUSC 4800 - Senior Project Preparation (1 to 3) *

*A minimum of 3 credit hours is required

Musicianship Electives (12 credit hours)

Select from the following:

AFRS 2103 - Introduction to Hip Hop (3)
AFRS 2107 - Global Hip Hop (3)
AFRS 2206 - African Literature, Music, and Art (3)
COAA 3150 - Musical Theatre History (3)
HIST 3239 - African American Music: History and Culture (3)
MUSC 1104 - History of Rock (3)
MUSC 1502 - Global Arts/Humanities: Music in Global Communities (3) (*if not previously taken*)
or MUSC 1512 - Local Arts/Humanities: Music in U.S. Communities (3) (*if not previously taken*)
MUSC 2230 - Musicianship III (3)
MUSC 3129 - Music Theories of the World (3)
MUSC 3131 - Popular Music Songwriting (3)
MUSC 3170 - Western Classical Music: Antiquity-Baroque (3)
MUSC 3171 - Western Classical Music: Classic-Present (3)
MUSC 4298 - Jazz History (3)
PHIL 3275 - Hip Hop as Redescription (3)

Performance and Music Elective Courses (12 credit hours)

Group Applied Instruction (4 credit hours)

Select from the following:

MUPF 1281 - Introduction to Percussion (1)
MUPF 1282 - Percussion (1)
MUPF 1283 - Introduction to Piano Keyboard (1)
MUPF 1284 - Piano Keyboard (1)
MUPF 1285 - Introduction to Guitars (1)
MUPF 1286 - Guitars (1)
MUPF 1287 - Introduction to Vocal Performance (1)
MUPF 1288 - Vocal Performance (1)

Ensembles (4 credit hours)

Select from the following:

MUPF 1115 - Guitar Ensemble (1)
MUPF 1122 - Men's Chorus (Mallard Creek Chorale) (1)
MUPF 1123 - Women's Chorus (Charlotteans) (1)
MUPF 1125 - Gospel Choir (1)
MUPF 1153 - Group Percussion Ensemble (1)
MUPF 1155 - Piano Ensemble (1)

Music Electives (4 credit hours)

Select from the following:

DANC 2228 - Music and Dance (2)
MUSC 1403 - Audio Engineering Practicum (1)
MUSC 2101 - Introduction to Music Business (2)
MUSC 2151 - Introduction to Music Technology (1)
MUSC 2235 - Jazz Improvisation I (2)
MUSC 4234 - Jazz Arranging and Composition (3)
MUSC 4235 - Orchestration and Arranging (2)

Restricted Elective Courses (30 credit hours)

Select 30 credit hours outside the Department of Music. Courses may be used to complete a Minor or Second Major.

Unrestricted Elective Courses (15 credit hours)

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Most Music courses require grades of C or above to progress to subsequent levels of study. All required Music courses must be passed with grades of C or above to graduate. For specific requirements, refer to the *Department of Music Student Handbook*.

All students are required to pass a Sophomore Review (typically pursued the Spring semester of a student's second year in the program). The B.A. Sophomore Review process consists of a Musicianship Evaluation and an Interview in preparation for the capstone project or experience. Students who fail their Sophomore Review will be eligible to initiate a new Review the following semester.

Honors Program

For details about the Arts + Architecture Honors Program, visit the AAHP program page (coaa.charlotte.edu/college/honors/).

Bachelor of Music with Concentration in Composition

The Bachelor of Music (B.M.) with a Concentration in Composition is designed for students who are planning careers as composers of contemporary art music.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- *Minimum GPA:* n/a
- *Transferable Credit Hours:* Determined by UNC Charlotte Undergraduate Admissions.
- *Declaration of Major:* A formal audition is required for acceptance to the Music major (see the Music Department "Admissions" website for audition processes and dates). Students are first admitted as Pre-Music. If the student is approved for acceptance after the audition, their major is changed to Music, and they may proceed with major coursework.

Currently Enrolled Students

- A formal audition is required for acceptance to the Music major. Students already enrolled at UNC Charlotte access the audition information on the Music Department "Admissions" website and follow the current student instructions for securing their audition. If the student is approved for acceptance after the audition, their major is changed to Music, and they may proceed with major coursework. Students must indicate Music Education at the time of audition to avoid a delayed graduation date.

Degree Requirements

The curriculum consists of 31 credit hours of General Education; 41 credit hours of music composition and basic musicianship; and 34-40 credit hours of supportive courses in music, including ensemble participation and performance studies. The culminating experience for this degree is a senior composition project.

College Prospect for Success Course (2 credit hours)

All new freshmen in the College of Arts + Architecture must take the following:

COAA 1101 - Student Success in Architecture, Art, Performance, and Design (2)

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Music Composition and Basic Musicianship Courses (41 credit hours)

Music Composition Courses (19 credit hours)

- MUSC 2240 - Introduction to Composition (1) (*2 semesters*)
MUSC 3130 - Counterpoint (2)
MUSC 4230 - Form and Analysis (3)
MUSC 4231 - Post-Tonal Processes (3)
MUSC 4235 - Orchestration and Arranging (2)
MUSC 4240 - Composition (2)
MUSC 4241 - Advanced Composition (2)
MUSC 4800 - Senior Project Preparation (1 to 3)

Basic Musicianship Courses (22 credit hours)

- MUSC 1230 - Musicianship I (3)
MUSC 1231 - Musicianship II (3)
MUSC 1233 - Class Piano I (1)
MUSC 1234 - Class Piano II (1)
MUSC 2230 - Musicianship III (3)
MUSC 2233 - Class Piano III (1)
MUSC 2234 - Class Piano IV (1)
MUSC 3170 - Music History I (3)
MUSC 3171 - Music History II (3)

Select one from the following:

- MUSC 3129 - Music Theories of the World (3)
MUSC 3131 - Popular Music Songwriting (3)
MUSC 3132 - Advanced Tonal Aural Skills (3)
MUSC 3133 - Advanced Post-Tonal Aural Skills (3)

Music Supportive Courses (34-38 credit hours)

Ensemble Participation and Performance Courses (26 credit hours)

- MUPF 11xx - Primary Ensembles (1) (*8 semesters*)
MUPF 11xx - Secondary Ensembles (1) (*2 semesters*)
MUPF 12xx - Applied Music (2) (*4 semesters*)
MUPF 32xx - Advanced Applied Music (2) (*4 semesters*)
MUSC 1300 - Performance Class (0) (*4 semesters*)
MUSC 3300 - Advanced Performance Class (0) (*4 semesters*)

Other Supportive Courses (5 credit hours)

- MUSC 2101 - Introduction to Music Business (2)
- MUSC 2151 - Introduction to Music Technology (1)
- MUSC 3134 - Fundamentals of Conducting (2)

Music Business or Technology Course (1 credit hour)

Select one of the following:

- MUSC 1403 - Audio Engineering Practicum (1)
- MUSC 2410 - Music Internship (1 to 3)
- Other approved course

Diction Courses (0-4 credit hours)

Diction Courses are required only for students enrolled in MUPF 1253.

- MUSC 2137 - Phonetics and Articulation for Singers I: Italian and Latin Diction (1)
- MUSC 2138 - Phonetics and Articulation for Singers II: English Diction (1)
- MUSC 2237 - Phonetics and Articulation for Singers III: German Diction (1)
- MUSC 2238 - Phonetics and Articulation IV: French Diction (1)

Techniques Courses (2 credit hours)

MUPF 1117 - Instrumental Lab Ensemble (0) (2 semesters)

Plus select two of the following outside the student's primary instrument:

- MUSC 1223 - Woodwind Techniques (1)
- MUSC 1225 - Brass Techniques (1)
- MUSC 1227 - String Techniques (1)
- MUSC 1229 - Percussion Techniques (1)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation. Based upon the student's interests, the following courses are recommended to supplement the Concentration in Composition:

- MUSC 1237 - Class Voice (1)
- MUSC 3136 - Instrumental Conducting (2)
- Additional techniques courses

Degree Total = 120 Credit Hours

Progression Requirements

Most Music courses require grades of C or above to progress to subsequent levels of study. All required Music courses must be passed with grades of C or above to graduate. For specific requirements, refer to the *Department of Music Student Handbook*.

All students are required to pass a Sophomore Review (typically pursued the Spring semester of a student's second year in the program). The Sophomore Review process consists of a Musicianship Evaluation, an Applied Performance Evaluation, and an Interview. Students who fail their Sophomore Review will be eligible to initiate a new Review the following semester. Students in the major must successfully complete the Sophomore Review before enrolling in some major courses at the 3000 or 4000 level.

Honors Program

For details about the Arts + Architecture Honors Program, see the

beginning of the College of Arts + Architecture section.

Bachelor of Music with Concentration in Elective Study in an Outside Field

The Bachelor of Music with Concentration in Elective Study in an Outside Field is designed for students who want to combine intensive training in music with the exploration of another discipline.

Admission Requirements

Freshmen and Transfers

- Minimum GPA: n/a
- Transferable Credit Hours: Determined by UNC Charlotte Undergraduate Admissions.
- Declaration of Major: A formal audition is required for acceptance to the Music major (see the Music Department "Admissions" website for audition processes and dates). Students are first admitted as Pre-Music. If the student is approved for acceptance after the audition, their major is changed to Music, and they may proceed with major coursework.

Currently Enrolled Students

- A formal audition is required for acceptance to the Music major. Students already enrolled at UNC Charlotte access the audition information on the Music Department "Admissions" website and follow the current student instructions for securing their audition. If the student is approved for acceptance after the audition, their major is changed to Music, and they may proceed with major coursework. Students must indicate Music Education at the time of audition to avoid a delayed graduation date.

Degree Requirements

The curriculum consists of 31 credit hours of General Education and 57-61 credit hours of Music Courses. Additional requirements include 18 credit hours of Elective Studies from courses offered at UNC Charlotte. The culminating experiences for this degree include a Senior Recital and a choice between a (1) Senior Project or (2) Senior Internship.

College Prospect for Success Course (2 credit hours)

All new freshmen in the College of Arts + Architecture must take the following:

- COAA 1101 - Student Success in Architecture, Art, Performance, and Design (2)

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Major Courses (57-61 credit hours)

Basic Musicianship Courses (22 credit hours)

- MUSC 1230 - Musicianship I (3)
- MUSC 1231 - Musicianship II (3)
- MUSC 1233 - Class Piano I (1)
- MUSC 1234 - Class Piano II (1)

MUSC 2230 - Musicianship III (3)
MUSC 2233 - Class Piano III (1)
MUSC 2234 - Class Piano IV (1)
MUSC 3170 - Music History I (3)
MUSC 3171 - Music History II (3)

Select one from the following:

MUSC 3129 - Music Theories of the World (3)
MUSC 3131 - Popular Music Songwriting (3)
MUSC 3132 - Advanced Tonal Aural Skills (3)
MUSC 3133 - Advanced Post-Tonal Aural Skills (3)

Ensemble Participation and Performance Courses (26 credit hours)

MUPF 11xx - Primary Ensembles (1) (*8 semesters*)
MUPF 11xx - Secondary Ensembles (1) (*2 semesters*)
MUPF 12xx - Applied Music (2) (*4 semesters*)
MUPF 32xx - Advanced Applied Music (2) (*3 semesters*)
MUPF 44xx - Senior Recital Preparation (2)
MUSC 1300 - Performance Class (0) (*4 semesters*)
MUSC 3300 - Advanced Performance Class (0) (*4 semesters*)

Phonetics and Articulation Courses (0-4 credit hours)

These courses are required only for students enrolled in MUPF 1253.

MUSC 2137 - Phonetics and Articulation for Singers I: Italian and Latin Diction (1)
MUSC 2138 - Phonetics and Articulation for Singers II: English Diction (1)
MUSC 2237 - Phonetics and Articulation for Singers III: German Diction (1)
MUSC 2238 - Phonetics and Articulation IV: French Diction (1)

Elective Upper-Division Music Courses (6 credit hours)

Select any combination of music courses at the 3000- or 4000-level for the 6 credit hour requirement.

Capstone Experience (3 credit hours)

The culminating experience for this degree include a Senior Recital and a choice between a (1) Senior Project or (2) Senior Internship.

Select one of the following:

MUSC 4410 - Senior Music Internship (2 to 4)
MUSC 4800 - Senior Project Preparation (1 to 3)

Elective Study in an Outside Field Concentration Courses (18 credit hours)

Select 18 credit hours of electives in one academic discipline from courses offered at UNC Charlotte (e.g., 18 credit hours of Psychology, 18 credit hours of Business).

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Most Music courses require grades of C or above to progress to subsequent levels of study. All required Music courses must be passed

with grades of C or above to graduate. For specific requirements, refer to the *Department of Music Student Handbook*.

All students are required to pass a Sophomore Review (typically pursued the Spring semester of a student's second year in the program). The Sophomore Review process consists of a Musicianship Evaluation, an Applied Performance Evaluation, and an Interview. Students who fail their Sophomore Review will be eligible to initiate a new Review the following semester. Students in the major must successfully complete the Sophomore Review before enrolling in some major courses at the 3000 or 4000 level.

Honors Program

For details about the Arts + Architecture Honors Program, see the beginning of the College of Arts + Architecture section.

Bachelor of Music with Concentration in Jazz Studies

The Bachelor of Music (B.M.) with a Concentration in Jazz Studies is designed for students who are planning careers as jazz musicians. The curriculum consists of 31 credit hours of General Education OR 33 credit hours if COAA 1101 is included in General Education; 56 credit hours in the Core Music Curriculum, including private lessons, ensembles, music theory, aural skills, piano, and music history; and 19-21 credit hours in Concentration Courses, including coursework in jazz improvisation, jazz arranging and composition, and jazz history. The culminating experiences for this degree are a junior and senior recital.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- *Minimum GPA:* n/a
- *Transferable Credit Hours:* Determined by UNC Charlotte Undergraduate Admissions.
- *Declaration of Major:* A formal audition is required for acceptance to the Music major (see the Music Department "Admissions" website for audition processes and dates). Students are first admitted as Pre-Music. If the student is approved for acceptance after the audition, their major is changed to Music, and they may proceed with major coursework.

Currently Enrolled Students

- A formal audition is required for acceptance to the Music major. Students already enrolled at UNC Charlotte access the audition information on the Music Department "Admissions" website and follow the current student instructions for securing their audition. If the student is approved for acceptance after the audition, their major is changed to Music, and they may proceed with major coursework. Students must indicate Music Education at the time of audition to avoid a delayed graduation date.

College Prospect for Success Course (2 credit hours)

All new freshmen in the College of Arts + Architecture must take the following:

COAA 1101 - Student Success in Architecture, Art, Performance, and Design (2)

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Major Courses (54 credit hours)

Musicianship Courses (22 credit hours)

- MUSC 1230 - Musicianship I (3)
- MUSC 1231 - Musicianship II (3)
- MUSC 1233 - Class Piano I (1)
- MUSC 1234 - Class Piano II (1)
- MUSC 2230 - Musicianship III (3)
- MUSC 2233 - Class Piano III (1)
- MUSC 2234 - Class Piano IV (1)
- MUSC 3170 - Music History I (3)
- MUSC 3171 - Music History II (3)

Select one from the following:

- MUSC 3129 - Music Theories of the World (3)
- MUSC 3131 - Popular Music Songwriting (3)
- MUSC 3132 - Advanced Tonal Aural Skills (3)
- MUSC 3133 - Advanced Post-Tonal Aural Skills (3)

Performance Courses (32 credit hours)

- MUPF 11xx - Primary Ensembles (Classical) (1) (*4 semesters*)
- MUPF 11xx - Primary Ensembles (Jazz) (1) (*8 semesters*)
- MUPF 11xx - Secondary Ensembles (Jazz) (1) (*4 semesters*)
- MUPF 12xx - Applied Music (1) (*4 semesters*)
- MUPF 126x - Applied Music (Jazz) (1) (*4 semesters*)
- MUPF 32xx - Advanced Applied Music (Jazz) (2) (*2 semesters*)
- MUPF 34xx - Junior Recital Preparation (2)
- MUPF 44xx - Senior Recital Preparation (2)
- MUSC 1300 - Performance Class (0) (*4 semesters*)
- MUSC 3300 - Advanced Performance Class (0) (*4 semesters*)

Concentration Courses (19-21 credit hours)

- MUSC 1222 - Jazz Ensemble Techniques (1)
- MUSC 2101 - Introduction to Music Business (2)
- MUSC 2151 - Introduction to Music Technology (1)
- MUSC 2235 - Jazz Improvisation I (2)
- MUSC 2236 - Jazz Improvisation II (2)
- MUSC 3252 - Jazz Piano Techniques (1)
- MUSC 4138 - Jazz Pedagogy and Materials (3)
- MUSC 4234 - Jazz Arranging and Composition (3)
- MUSC 4235 - Orchestration and Arranging (2)
- MUSC 4298 - Jazz History (3)

Concentration Music Business or Technology Course (1-3 credit hours)

Select one of the following:

- MUSC 1403 - Audio Engineering Practicum (1)
- MUSC 2410 - Music Internship (1 to 3)
- Other approved course

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

All new freshmen in the College of Arts + Architecture must take the following:

COAA 1101 - Student Success in Architecture, Art, Performance, and Design (2)

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Music Studies Courses (61 credit hours)

Basic Musicianship Courses (22 credit hours)

MUSC 1230 - Musicianship I (3)

MUSC 1231 - Musicianship II (3)

MUSC 1233 - Class Piano I (1)

MUSC 1234 - Class Piano II (1)

MUSC 2230 - Musicianship III (3)

MUSC 2233 - Class Piano III (1)

MUSC 2234 - Class Piano IV (1)

MUSC 3170 - Music History I (3)

MUSC 3171 - Music History II (3)

Select one from the following:

MUSC 3129 - Music Theories of the World (3)

MUSC 3131 - Popular Music Songwriting (3)

MUSC 3132 - Advanced Tonal Aural Skills (3)

MUSC 3133 - Advanced Post-Tonal Aural Skills (3)

Performance Courses (23 credit hours)

MUPF 1120 - University Chorale (1) (*7 semesters*)

MUPF 1253 - Applied Music: Voice (1 to 2) (*4 semesters*)

MUPF 3253 - Advanced Applied Music: Voice (2) (*2 semesters*)

MUPF 4453 - Senior Recital Preparation: Voice (2)

MUSC 1300 - Performance Class (0) (*4 semesters*)

MUSC 3300 - Advanced Performance Class (0) (*3 semesters*)

Plus one of the following Secondary Ensembles:

MUPF 1121 - Chamber Singers (1) (*2 semesters*)

MUPF 1122 - Men's Chorus (Mallard Creek Chorale) (1) (*2 semesters*)

MUPF 1123 - Women's Chorus (Charlotteans) (1) (*2 semesters*)

MUPF 1124 - Opera Workshop (1) (*2 semesters*)

MUPF 1125 - Gospel Choir (1) (*2 semesters*)

MUPF 1128 - Special Vocal Ensemble (1) (*2 semesters*)

Other Music Studies Courses (16 credit hours)

MUSC 2137 - Phonetics and Articulation for Singers I: Italian and Latin Diction (1)

MUSC 2138 - Phonetics and Articulation for Singers II: English Diction (1)

MUSC 2151 - Introduction to Music Technology (1)

MUSC 2237 - Phonetics and Articulation for Singers III: German Diction (1)

MUSC 2238 - Phonetics and Articulation IV: French Diction (1)

MUSC 3134 - Fundamentals of Conducting (2)

MUSC 3135 - Choral Conducting (2)

MUSC 3151 - Accompanying for Non-Pianists (1)

MUSC 4094 - Instrumental Ensemble Techniques (1)

MUSC 4137 - Vocal Pedagogy (3)

MUSC 4235 - Orchestration and Arranging (2)

Professional Education Courses (26 credit hours)

MUED 2100 - Introduction to Music Education (2)

MUED 2200 - Foundations of Music Education (2)

MUED 2241 - Music Development and Learning (2)

MUED 3270 - Teaching Discipline: Assessment and Behavior in the Music Classroom (2)

MUED 4190 - Choral Methods (2)

MUED 4190L - Choral Methods Lab (1)

MUED 4192 - General Music Methods (2)

MUED 4192L - General Music Methods Lab (1)

MUED 4467 - Student Teaching/Seminar: K-12 Music (12)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Most Music courses require grades of C or above to progress to subsequent levels of study. All required Music courses must be passed with grades of C or above to graduate. Students must earn a grade of P in Student Teaching with recommendation from their Clinical Educator, University Supervisor, and Principal, and also pass edTPA to be recommended for licensure. For specific requirements, refer to the *Department of Music Student Handbook*.

All students are required to pass a Sophomore Review (typically pursued the Spring semester of a student's second year in the program). The Sophomore Review process consists of a Musicianship Evaluation, an Applied Performance Evaluation, and an Interview. Students who fail their Sophomore Review will be eligible to initiate a new Review the following semester. Students in the major must successfully complete the Sophomore Review before enrolling in some major courses at the 3000 or 4000 level.

At the end of the same semester as Sophomore Review, students seeking K-12 Music Education licensure must have earned a C or above in all MUED coursework, achieved passing scores on Praxis Core (or proven exemption via test scores), obtained a cumulative GPA of 2.75, and completed the Application to Teacher Education which includes a signed Professional Dispositions statement and clear criminal background check.

To progress to Student Teaching, students must achieve a minimum 2.75 GPA in all Music and Education courses, a minimum 2.75 GPA overall, and successfully perform a Senior Recital.

Honors Program

For details about the Honors Program in Arts + Architecture, see the beginning of the College of Arts + Architecture section.

Bachelor of Music with Concentration in Instrumental/General Music Education

The Bachelor of Music (B.M.) with a Concentration in Instrumental/General Music Education is designed for instrumentalists who wish to become public-school instrumental directors or general

music educators. The curriculum leads to a K-12 teaching license in the State of North Carolina.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- *Minimum GPA:* n/a
- *Transferable Credit Hours:* Determined by UNC Charlotte Undergraduate Admissions.

If the student is approved for acceptance after the audition, their major is changed to Music, and they may proceed with major coursework. Students must indicate Music Education at the time of audition to avoid a delayed graduation date.

Degree Requirements

The curriculum consists of 31 credit hours of General Education; 36 credit hours of study in the major area of performance, including performance studies, ensemble participation, pedagogy, and recitals; and 44 credit hours of supportive courses in music, including basic musicianship. The

culminating experiences for this degree are a Junior Recital and a Senior Recital.

College Prospect for Success Course (2 credit hours)

All new freshmen in the College of Arts + Architecture must take the following:

- COAA 1101 - Student Success in Architecture, Art, Performance, and Design (2)

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

Students in this major are required to demonstrate proficiency in two foreign languages selected from French, German, or Italian at the 1201 level; or proficiency in French, German, or Italian through the 1202 level. Proficiency can be demonstrated in one of the following ways:

- Completing the required coursework at UNC Charlotte
- Completing three years of the same foreign language in high school through level three
- Achieving a satisfactory score on the foreign languages placement test (in Spanish, French, or German)
- Through approved transfer or transient credit earned at a college or university accredited by an accepted accrediting body
- A combination of the above methods (e.g., placing out of or earning transfer or transient credit for 1201 and completing the 1202 course, completing 1201 and placing out of or earning transfer or transient credit for 1202)

Major Performance Courses (33 credit hours)

Performance Courses (12 credit hours)

- MUPF 1253 - Applied Music: Voice (1 to 2) (4 semesters)
- MUPF 3253 - Advanced Applied Music: Voice (2) (2 semesters)
- MUSC 1300 - Performance Class (0) (4 semesters)
- MUSC 3300 - Advanced Performance Class (0) (4 semesters)

Ensemble Participation Courses (14 credit hours)

- MUPF 11xx - Secondary Ensembles (1) (6 semesters)

- MUPF 1120 - University Chorale (1) (8 semesters)

Pedagogy Course (3 credit hours)

- MUSC 4137 - Vocal Pedagogy (3)

Recital Courses (4 credit hours)

- MUPF 3453 - Junior Recital Preparation: Voice (2)

- MUPF 4453 - Senior Recital Preparation: Voice (2)

Supportive Music Courses (37 credit hours)

Basic Musicianship Courses (22 credit hours)

- MUSC 1230 - Musicianship I (3)
- MUSC 1231 - Musicianship II (3)
- MUSC 1233 - Class Piano I (1)
- MUSC 1234 - Class Piano II (1)
- MUSC 2230 - Musicianship III (3)

- MUSC 2233 - Class Piano III (1)
- MUSC 2234 - Class Piano IV (1)
- MUSC 3170 - Music History I (3)
- MUSC 3171 - Music History II (3)

Select one from the following:

- MUSC 3129 - Music Theories of the World (3)
- MUSC 3131 - Popular Music Songwriting (3)
- MUSC 3132 - Advanced Tonal Aural Skills (3)
- MUSC 3133 - Advanced Post-Tonal Aural Skills (3)

Other Supportive Music Courses (15 credit hours)

- MUSC 2101 - Introduction to Music Business (2)
- MUSC 2137 - Phonetics and Articulation for Singers I: Italian and Latin Diction (1)
- MUSC 2138 - Phonetics and Articulation for Singers II: English Diction (1)
- MUSC 2151 - Introduction to Music Technology (1)
- MUSC 2237 - Phonetics and Articulation for Singers III: German Diction (1)
- MUSC 2238 - Phonetics and Articulation IV: French Diction (1)
- MUSC 3134 - Fundamentals of Conducting (2)
- MUSC 4037 - Vocal Literature (3)
- MUSC 4230 - Form and Analysis (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Most Music courses require grades of C or above to progress to subsequent levels of study. All required Music courses must be passed with grades of C or above to graduate. For specific requirements, refer to the *Department of Music Student Handbook*.

All students are required to pass a Sophomore Review (typically pursued the Spring semester of a student's second year in the program). The Sophomore Review process consists of a Musicianship Evaluation, an Applied Performance Evaluation, and an Interview. Students who fail their Sophomore Review will be eligible to initiate a new Review the following semester. Students in the major must successfully complete the Sophomore Review before enrolling in some major courses at the 3000 or 4000 level.

Honors Program

For details about the Honors Program in Arts + Architecture, see the beginning of the College of Arts + Architecture section.

Minor in Music Performance

The Minor in Music Performance is designed for students who wish to enhance their skills as performing artists while working towards degrees in other fields. Music Performance minors participate in ensembles, receive private lessons, and take introductory courses in musicianship, as well as MUSC 1502 and MUSC 1512, which can also be used to satisfy a General Education requirement. The total unit requirement for the

Minor in Music Performance is 18 credit hours. For specific requirements, refer to the *Department of Music Student Handbook*.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Interested students should contact the Performing Arts Academic Advisor as soon as possible for advising. Students interested in pursuing this minor must audition through the Department of Music (see the "Admissions" link at music.charlotte.edu for details).

Minor Requirements

General Studies and Musicianship Courses (6 credit hours)

- LBST 1103 - The Arts and Society: Music (3)
- MUSC 1100 - Rudiments of Music (2)
- MUSC 1101 - Introduction to Aural Skills and Sight-Singing (1)

Performance Courses (6 credit hours)

Primary Ensemble Courses (4 credit hours)

Select one of the following to be taken for four semesters:

- MUPF 1110 - Orchestra (1)
- MUPF 1111 - Jazz Ensemble (1)
- MUPF 1112 - Wind Ensemble (1)
- MUPF 1115 - Guitar Ensemble (1)
- MUPF 1120 - University Chorale (1)
- MUPF 1155 - Piano Ensemble (1)

Applied Music Courses (2 credit hours)

Select one of the following to be taken for two semesters:

- MUPF 1240 - Applied Music: Euphonium (1 to 2)
- MUPF 1241 - Applied Music: Trumpet (1 to 2)
- MUPF 1242 - Applied Music: French Horn (1 to 2)
- MUPF 1243 - Applied Music: Trombone (1 to 2)
- MUPF 1244 - Applied Music: Tuba (1 to 2)
- MUPF 1245 - Applied Music: Guitar (1 to 2)
- MUPF 1246 - Applied Music: Harp (1 to 2)
- MUPF 1247 - Applied Music: Organ (1 to 2)
- MUPF 1248 - Applied Music: Piano (1 to 2)
- MUPF 1249 - Applied Music: Violin (1 to 2)
- MUPF 1250 - Applied Music: Viola (1 to 2)
- MUPF 1251 - Applied Music: Cello (1 to 2)
- MUPF 1252 - Applied Music: Bass (1 to 2)
- MUPF 1253 - Applied Music: Voice (1 to 2)
- MUPF 1254 - Applied Music: Flute (1 to 2)
- MUPF 1255 - Applied Music: Clarinet (1 to 2)
- MUPF 1256 - Applied Music: Saxophone (1 to 2)
- MUPF 1257 - Applied Music: Oboe (1 to 2)
- MUPF 1258 - Applied Music: Bassoon (1 to 2)
- MUPF 1259 - Applied Music: Percussion (1 to 2)
- MUPF 1260 - Applied Music: Jazz Saxophone (1)
- MUPF 1261 - Applied Music: Jazz Trumpet (1)
- MUPF 1262 - Applied Music: Jazz Trombone (1)
- MUPF 1263 - Applied Music: Jazz Guitar (1)
- MUPF 1264 - Applied Music: Jazz Piano (1)
- MUPF 1265 - Applied Music: Jazz Bass (1)
- MUPF 1266 - Applied Music: Jazz Percussion (1)
- MUPF 1270 - Applied Music: Musical Theatre (1)
- MUSC 1237 - Class Voice (1) (for voice principals only)

Elective Music Courses (6 credit hours)

Select from extra semesters of Primary Ensembles listed above, extra semesters of Applied Music (space permitting) listed above, or from the following. Please note that some ensembles may require an audition.

- COAA 3350 - Musical Theatre Workshop (1)
- MUPF 1113 - Symphonic Band (1)
- MUPF 1114 - Basketball Band (1)
- MUPF 1118 - Marching Band (1)
- MUPF 1122 - Men's Chorus (Mallard Creek Chorale) (1)
- MUPF 1123 - Women's Chorus (Charlotteans) (1)
- MUPF 1124 - Opera Workshop (1)
- MUPF 1125 - Gospel Choir (1)
- MUPF 1132 - Wind Quintet (1)
- MUPF 1134 - Flute Choir (1)
- MUPF 1136 - Clarinet Choir (1)
- MUPF 1137 - Saxophone Quartet (1)
- MUPF 1139 - Woodwind Chamber Music (1)
- MUPF 1142 - Brass Quintet (1)
- MUPF 1143 - Trumpet Ensemble (1)
- MUPF 1144 - Horn Ensemble (1)
- MUPF 1146 - Tuba/Euphonium Ensemble (1)
- MUPF 1149 - Brass Chamber Music (1)
- MUPF 1151 - Percussion Ensemble (1)
- MUPF 1168 - Philharmonia (1)
- MUPF 1169 - String Chamber Music (1)
- MUPF 1170 - Jazz Combo (1)
- MUSC 1230 - Musicianship I (3)
- MUSC 1231 - Musicianship II (3)
- MUSC 1233 - Class Piano I (1)
- MUSC 1234 - Class Piano II (1)
- MUSC 1402 - Opera and Musical Theatre Practicum (1)
- MUSC 1403 - Audio Engineering Practicum (1)
- MUSC 2101 - Introduction to Music Business (2)
- MUSC 2151 - Introduction to Music Technology (1)
- MUSC 2222 - Marching Band Techniques (1)
- MUSC 2235 - Jazz Improvisation I (2)
- MUSC 2236 - Jazz Improvisation II (2)
- MUSC 2410 - Music Internship (1 to 3)

Total = 18 Credit Hours

Progression Requirements

All courses must be passed with grades of C or above to graduate with a Minor in Music Performance.

Undergraduate Certificate in Jazz

The Undergraduate Certificate in Jazz is designed for instrumentalists who wish to enhance their undergraduate study with intensive training in jazz. It is available to instrumentalists in any of the three music degree tracks (B.A. in Music, B.M. in Music Education, and B.M. in Music Performance) who wish to supplement their required instruction in classical music with elective training in jazz. The curriculum consists of 20 credit hours of jazz studies that combine instruction in performance and musicianship, including ensembles, lessons, improvisation, history, and a course in either arranging or pedagogy. For specific requirements,

refer to the *Department of Music Student Handbook*.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Interested students should contact the Performing Arts Academic Advisor as soon as possible for advising. Students interested in pursuing this certificate must audition through the Department of Music (see the "Admissions" link at music.charlotte.edu for details).

Certificate Requirements

Performance Courses (10 credit hours)

- MUPF 1111 - Jazz Ensemble (4)
- MUPF 1170 - Jazz Combo (2)
- MUPF 126x - Applied Music (Jazz) (4) (*4 semesters*)

Musicianship Courses (10 credit hours)

- MUSC 2235 - Jazz Improvisation I (2)
- MUSC 2236 - Jazz Improvisation II (2)
- MUSC 4138 - Jazz Pedagogy and Materials (3)
or MUSC 4234 - Jazz Arranging and Composition (3)
- MUSC 4298 - Jazz History (3)

Certificate Total = 20 Credit Hours

Progression Requirements

All required courses must be passed with a grade of B or above to earn the Undergraduate Certificate in Jazz.

Musical Theatre

music.charlotte.edu
theatre.charlotte.edu

Undergraduate Programs

- Undergraduate Certificate in Musical Theatre

Musical Theatre is an interdisciplinary program between the Departments of Dance, Music, and Theatre. The term "musical theatre" is defined in a way that embraces the richness and diversity of this challenging interdisciplinary art form, which includes musical comedy, the musical play, new and alternative musical theatre, "Broadway opera," cabaret, and revue. Students receive technique training in acting complemented by training in vocal technique, musicianship, dance, and the study of the repertoire of musical theatre in print and recordings, as well as in rehearsal and performance.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Undergraduate Certificate in Musical Theatre

The Undergraduate Certificate in Musical Theatre is designed to develop the unique skill set required for music theatre performance. The curriculum consists of 19 credit hours of coursework that includes singing, acting, and dance, along with music theatre history, rudimentary sight-singing, and music theatre workshop. Students practice and study the craft, theory, and historical evolution of music theatre.

Admission Requirements

See University Admission Requirements

Admission into the certificate is by audition only. Any courses in the Musical Theatre certificate completed prior to formal admission into the program will subsequently be applied towards the certificate. Interested students should contact the Performing Arts Academic Advisor as soon as possible for advising.

Certificate Requirements

Required Courses (11 credit hours)

COAA 3150 - Musical Theatre History (3)
COAA 3350 - Musical Theatre Workshop (1) (*four semesters for a total of 4 credit hours*)
MUSC 1101 - Introduction to Aural Skills and Sight-Singing (1)
THEA 3207 - Acting for the Musical Theatre (3)

Restricted Elective Courses (8 credit hours)

Elective Voice Courses (4 credit hours)

Select from the following (4 semesters for a total of 4 credit hours):
MUPF 1270 - Applied Music: Musical Theatre (1)
MUSC 1237 - Class Voice (1)
MUSC 1240 - Class Voice for Musical Theatre (1)

Elective Dance Courses (4 credit hours)

Select two of the following:

DANC 1212 - Ballet I (2)
DANC 2126 - Tap Dance (2)
DANC 2127 - Latin Dance Forms (2)
DANC 2130 - Foundations of Hip-Hop Dance (2)
DANC 2226 - Vernacular Jazz Dance (2)
DANC 2227 - Contemporary Jazz Dance (2)

Certificate Total = 19 Credit Hours

Progression Requirements

All courses must be passed with a grade of C or above to earn the Undergraduate Certificate in Musical Theatre.

Department of Theatre

theatre.charlotte.edu

Undergraduate Programs

- **B.A. in Theatre**
 - Theatre
 - Applied Theatre
 - Design/Tech
 - Directing, Dramaturgy, and Dramatic Writing (3-D)
 - Performance
 - Theatre Education (K-12)
- **Minor in Theatre**
- **Undergraduate Certificate in Musical Theatre** (*see the individual Musical Theatre section*)

The Department of Theatre provides a student-focused liberal arts education that trains theatre artists, scholars and teachers to investigate current best practices and emerging entrepreneurial methods in professional theatre. Aligning with the university's commitment to open-access education, we drive vibrant intellectual inquiry, ethical and informed community engagement, and innovative creative research practices.

Led by a faculty of nationally recognized theatre artists and scholars, the curriculum promotes creativity, inquisitiveness, critical thinking, communication skills (oral and written), and cultural competency through classroom experience, individual and collaborative study, and actualized stage productions. Students learn to participate in current critical discourse while engaging with the theory, history, and material conditions of performance; the program thus creates a rigorous intellectual environment firmly rooted in the theatrical art form.

Theatre majors develop a working knowledge of the art form by taking four semesters of core curriculum courses followed by an additional four semesters of study in one of the following concentrations: Performance; Design/Tech; Directing, Devising and Dramatic Writing (3-D); Applied Theatre; or Theatre Education (with the goal of attaining a North Carolina teaching license). All majors take a culminating 3-credit hour senior seminar during the final year.

In addition to required coursework, the department sponsors a wide range of master classes (led by theatre artists and scholars from around the world), lecture-discussions, workshops, and other learning opportunities. Throughout their training, students work both as faculty-mentored individuals and in collaborative groups, so that in addition to making significant contributions to the cultural life of the campus and the Charlotte region through departmental productions, they emerge ready for theatrical internships, graduate programs, or for employment in any profession which places value on critical and analytical thinking, collaborative practice, and effective communication skills.

As part of the curriculum, the department presents a season of faculty-directed, student-acted MainStage productions, workshop-level performances, and professional guest performance events. Auditions

are open to all members of the University community. Performances are held in Robinson Hall and Rowe Arts, which contain three performance spaces and specialized rehearsal, design, and construction laboratories, as well as additional classrooms and department offices.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Arts in Theatre

The Theatre, B.A. degree requires a total of 120 credit hours, including 47 credit hours of theatre courses. This is a structured curriculum. Students take 29 credit hours of Core Courses and advance to the prescribed 15 credit hours of restricted electives (and Senior Seminar).

Admission Requirements

Freshmen and Transfers

- Students who meet the University's admissions requirements are admissible to the major.
- See University Admission Requirements
- *Declaration of Major:* Students can declare the Theatre major on their application for enrollment, after being admitted to the University, or transfer in from another major on campus.
- *Transferable Credit Hours:* Determined by UNC Charlotte Undergraduate Admissions.

Currently Enrolled Students

- Currently enrolled UNC Charlotte students may declare the major at any time by completing a Change of Major Form.

Degree Requirements

College Prospect for Success Course (2 credit hours)

All new freshmen in the College of Arts + Architecture must take the following:

COAA 1101 - Student Success in Architecture, Art, Performance, and Design (2)

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Requirements. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-

counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

College of Arts + Architecture Foreign Language Requirement
Major Courses (29 credit hours)

Core Courses (13 credit hours)

THEA 1140 - The Theatre Experience (3)
THEA 1265 - Introduction to Stage Performance (3)
THEA 1270 - Acting I (3)
THEA 1300 - Play Analysis (3)
THEA 2600 - Majors Seminar (1)

Technical Theatre Practice (2 credit hours)

THEA 2400 - Technical Theatre Practice (1)
THEA 2405 - Run Crew Practicum (1)

Tech I Course (3 credit hours)

Select one of the following:

THEA 1215 - Theatre Tech I - Costume (3)
THEA 1225 - Theatre Tech I - Scenic (3)
THEA 1235 - Theatre Tech I - Lighting (3)
THEA 1245 - Theatre Tech I - Sound (3)

Design I Course (3 credit hours)

Select one of the following:

THEA 2210 - Costume Design I (3)
THEA 2230 - Scenic Design I (3)
THEA 2240 - Sound Design I (3)
THEA 2250 - Lighting Design I (3)

Theatre History Course (3 credit hours)

Select one of the following:

THEA 2310 - Theatre History I (3)
THEA 2311 - Theatre History II (3)

Theatre History/Dramatic Literature Elective Core Course (3 credit hours)

Select one of the following or take the Theatre History course not already selected above:

THEA 2310 - Theatre History I (3)
Or THEA 2311 - Theatre History II (3)
THEA 2330 - Shakespeare in History (3)
THEA 3310 - Dramaturgy (3)
THEA 4008 - Topics in Dramatic Literature (1 to 6)
THEA 4007 - Topics in Theatre History (1 to 6)
THEA 4330 - Performance Theory (3)

Advanced Theatre Practice (2 credit hours minimum)

THEA 3400 Advanced Theatre Practice (1-6 credits) must be taken twice by each major, for a minimum of two credits from two enrollments. One of the two classes must be in student's concentration area during their senior year.

THEA 3400 - Advanced Theatre Practice (1 to 3)

Restricted Elective Courses (15 credit hours)

Students must complete 15 credit hours of Restricted THEA Electives taken at the 2000 level and above. At least 6 of those hours must be at the THEA 3000 level and above. No more than 9 credit hours of THEA

2000 level courses may be counted towards the Restricted Electives requirement.

Senior Year Course (3 credit hours)

Must be taken in the Senior year:
THEA 4620 - Senior Seminar (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

All Theatre (THEA) courses must be passed with a grade of C or above, with no more than one grade of D in a Theatre course.

Honors Program

For details about the Arts + Architecture Honors Program, visit the AAHP program page.

Bachelor of Arts in Theatre with Concentration in Applied Theatre

Admission Requirements

Freshmen and Transfers

- Students who meet the University's admissions requirements are admissible to the major.
- See University Admission Requirements
- *Declaration of Major:* Students can declare the Theatre major on their application for enrollment, after being admitted to the University, or transfer in from another major on campus.
- *Transferable Credit Hours:* Determined by UNC Charlotte Undergraduate Admissions.

Currently Enrolled Students

Currently enrolled UNC Charlotte students may declare the major at any time by completing a Change of Major Form.

Degree Requirements

The Theatre major with a Concentration in Applied Theatre leading to the B.A. degree requires a total of 120 credit hours, including 47 credit hours of theatre courses. This is a structured curriculum. Students must take 29 credit hours of Core courses and the prescribed 18 credit hours of the Concentration in Applied Theatre (with Senior Seminar).

College Prospect for Success Course (2 credit hours)

All new freshmen in the College of Arts + Architecture must take the following:

COAA 1101 - Student Success in Architecture, Art, Performance, and Design (2)

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the

major with departmental approval. Please see your advisor for information..

Foreign Language Requirement (0-8 credit hours)

Students in this major within the College of Arts + Architecture are required to demonstrate proficiency in the language of their choice through the 1202 level. For details, refer to the College of Arts + Architecture Foreign Language Requirements at the beginning of this section.

Major Courses (29 credit hours)

Core Courses (13 credit hours)

THEA 1140 - The Theatre Experience (3)
THEA 1265 - Introduction to Stage Performance (3)
THEA 1270 - Acting I (3)
THEA 1300 - Play Analysis (3)
THEA 2600 - Majors Seminar (1)

Technical Theatre Practice (2 credit hours)

THEA 2400 - Technical Theatre Practice (1)
THEA 2405 - Run Crew Practicum (1)

Tech I Course (3 credit hours)

Select one of the following:

THEA 1215 - Theatre Tech I - Costume (3)
THEA 1225 - Theatre Tech I - Scenic (3)
THEA 1235 - Theatre Tech I - Lighting (3)
THEA 1245 - Theatre Tech I - Sound (3)

Design I Course (3 credit hours)

Select one of the following:

THEA 2210 - Costume Design I (3)
THEA 2230 - Scenic Design I (3)
THEA 2240 - Sound Design I (3)
THEA 2250 - Lighting Design I (3)

Theatre History Course (3 credit hours)

Select one of the following:

THEA 2310 - Theatre History I (3)
THEA 2311 - Theatre History II (3)

Theatre History/Dramatic Literature Elective Core Course (3 credit hours)

Select one of the following or take the Theatre History course not already selected above:

THEA 2310 - Theatre History I (3)
or THEA 2311 - Theatre History II (3)
THEA 2330 - Shakespeare in History (3)
THEA 3310 - Dramaturgy (3)

THEA 3251 - Theatre Production Management (3)

THEA 3256 - Drawing and Rendering for the Theatre (3)

THEA 3300 - Directing I (3)

THEA 4003 - Topics in Design and Technical Theatre (1 to 6)

THEA 4225 - Computer-Aided Design for Theatre (3)

THEA 4400 - Internship in Theatre (3 to 6)

THEA 4601 - Individual Project (1 to 6)

Senior Year Course (3 credit hours)

Must be taken in the Senior year:

THEA 4620 - Senior Seminar (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

All Theatre (THEA) courses must be passed with a grade of C or above, with no more than one grade of D in a Theatre course.

Honors Program

For details about the Honors Program in Arts + Architecture, see the beginning of the College of Arts + Architecture section.

Bachelor of Arts in Theatre with Concentration in Directing, Dramaturgy, and Dramatic Writing

Admission Requirements

Freshmen and Transfers

- Students who meet the University's admissions requirements are admissible to the major.
- See University Admission Requirements
- *Declaration of Major:* Students can declare the Theatre major on their application for enrollment, after being admitted to the University, or transfer in from another major on campus.
- *Transferable Credit Hours:* Determined by UNC Charlotte Undergraduate Admissions.

Currently Enrolled Students

Currently enrolled UNC Charlotte students may declare the major at any time by completing a Change of Major Form.

Degree Requirements

The Theatre major with a Concentration in Directing, Dramaturgy, and Dramatic Writing leading to the B.A. degree requires a total of 120 credit hours, including 47 credit hours of theatre courses. This is a structured curriculum. Students must take 29 credit hours of Core Courses and the prescribed 18 credit hours of the Concentration in Design/Tech (with Senior Seminar).

College Prospect for Success Course (2 credit hours)

All new freshmen in the College of Arts + Architecture must take the following:

COAA 1101 - Student Success in Architecture, Art, Performance, and Design (2)

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

Students in this major within the College of Arts + Architecture are required to demonstrate proficiency in the language of their choice through the 1202 level. For details, refer to the College of Arts + Architecture Foreign Language Requirements at the beginning of this section.

Major Courses (29 credit hours)

Core Courses (13 credit hours)

- THEA 1140 - The Theatre Experience (3)
THEA 1265 - Introduction to Stage Performance (3)
THEA 1270 - Acting I (3)
THEA 1300 - Play Analysis (3)
THEA 2600 - Majors Seminar (1)

Technical Theatre Practice (2 credit hours)

- THEA 2400 - Technical Theatre Practice (1)
THEA 2405 - Run Crew Practicum (1)

Tech I Course (3 credit hours)

Select one of the following:

- THEA 1215 - Theatre Tech I - Costume (3)
THEA 1225 - Theatre Tech I - Scenic (3)
THEA 1235 - Theatre Tech I - Lighting (3)
THEA 1245 - Theatre Tech I - Sound (3)

Design I Course (3 credit hours)

Select one of the following:

- THEA 2210 - Costume Design I (3)
THEA 2230 - Scenic Design I (3)
THEA 2240 - Sound Design I (3)
THEA 2250 - Lighting Design I (3)

Theatre History Course (3 credit hours)

Select one of the following:

- THEA 2310 - Theatre History I (3)
THEA 2311 - Theatre History II (3)

Theatre History/Dramatic Literature Elective Core Course (3 credit hours)

Select one of the following or take the Theatre History course not already selected above:

- THEA 2310 - Theatre History I (3)
or THEA 2311 - Theatre History II (3)
THEA 2330 - Shakespeare in History (3)
THEA 3310 - Dramaturgy (3)
THEA 4007 - Topics in Theatre History (1 to 6)
THEA 4008 - Topics in Dramatic Literature (1 to 6)
THEA 4330 - Performance Theory (3)

Advanced Theatre Practice (2 credit hours minimum)

THEA 3400 (Advanced Theatre Practice) must be taken twice by each major, for a minimum of two credits from two enrollments. One of the two classes must be in the student's concentration area during their senior year.

THEA 3400 - Advanced Theatre Practice (1 to 3)

Concentration Courses (18 credit hours)

Required Concentration Courses (9 credit hours)

- THEA 2320 - Playwriting I (3)
THEA 3310 - Dramaturgy (3)
THEA 3300 - Directing I (3)

Elective Concentration Courses (6 credit hours)

Select two of the following:

- THEA 2270 - Acting II (3)

THEA 2330 - Shakespeare in History (3)
THEA 4004 - Topics in Directing (1 to 6)
THEA 4300 - Directing II (3)
THEA 4310 - Theatrical Shakespeare (3)
THEA 4330 - Performance Theory (3)
THEA 4340 - Theatre Collaboration (3) (SL)
THEA 4800 - Directed Independent Study (1 to 3)

Senior Year Course (3 credit hours)

Must be taken in the Senior year:

THEA 4620 - Senior Seminar (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

All Theatre (THEA) courses must be passed with a grade of C or above, with no more than one grade of D in a Theatre course.

Honors Program

For details about the Honors Program in Arts + Architecture, see the beginning of the College of Arts + Architecture section.

Bachelor of Arts in Theatre with Concentration in Performance

Admission Requirements

Must be taken in the Senior year:

THEA 4620 - Senior Seminar (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

All Theatre (THEA) courses must be passed with a grade of C or above, with no more than one grade of D in a Theatre course.

Honors Program

For details about the Honors Program in Arts + Architecture, see the beginning of the College of Arts + Architecture section.

Bachelor of Arts in Theatre with Concentration in Theatre Education

The Bachelor of Arts (B.A.) in Theatre with a Concentration in Theatre Education prepares students for K-12 Theatre Education licensure in North Carolina. It is designed for students who wish to become theatre teachers in public schools.

Admission Requirements

Freshmen and Transfers

- Students who meet the University's admissions requirements are admissible to the major.
- See University Admission Requirements
- *Transferable Credit Hours:* Determined by UNC Charlotte Undergraduate Admissions

Currently Enrolled Students

- *Pre-Major:* Students seeking K-12 Theatre Education licensure should contact the Arts Education Specialist within their first year. A later semester may result in a delayed graduation date.

- *Declaration of Major:* Currently enrolled UNC Charlotte students may declare the Theatre major at any time by meeting with the Arts Education Specialist. Students begin by declaring a Major in Theatre and completing recommended coursework for the Theatre Education concentration in the first three semesters. Approximately third semester, students apply to Teacher Education. See Progression Requirements.
- Following completion of recommended coursework for the Theatre Education concentration in the first three semesters, students may apply to the Teacher Education Concentration.

Degree Requirements

The Theatre major with a Concentration in Theatre Education to the B.A. degree requires a total of 120 credit hours, including 71 credit hours of theatre and education courses. This is a structured curriculum. Students must take 29 credit hours of Core Courses before advancing to the prescribed 45 credit hours of the Concentration Theatre Courses.

College Prospect for Success Course (2 credit hours)

All new freshmen in the College of Arts + Architecture must take the following:

COAA 1101 - Student Success in Architecture, Art, Performance, and Design (2)

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

Students in this major within the College of Arts + Architecture are required to demonstrate proficiency in the language of their choice through the 1202 level. For details, refer to the College of Arts + Architecture Foreign Language Requirements at the beginning of this section.

Major Courses (29 credit hours)

Core Courses (13 credit hours)

THEA 1140 - The Theatre Experience (3)

THEA 1265 - Introduction to Stage Performance (3)

THEA 1270 - Acting I (3)

- EDUC 4290 - Modifying Instruction for Learners with Diverse Needs (3)
- SPED 2100 - Exceptionality in Schools and Society (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

To be formally admitted to the Theatre Education concentration, students must achieve the following:

- Minimum overall GPA of 2.7
- *Pre-Major/Prerequisite Courses:*
 - MDSK 2100 with grade of C or above
 - THEA 1360 with grade of C or above
- Achieve passing scores on Praxis Core (or prove exemption via test scores)
- Application to Teacher Education (includes a clear background check and signed professional dispositions statement)

Admission to Upper Division

After being accepted to Teacher Education, students may progress to upper level Theatre Education coursework.

Special Policies or Requirements

To progress to student teaching, students must earn a minimum 2.75 GPA in all Theatre and Education courses and a minimum 2.5 cumulative GPA. A minimum grade of C is required for all major courses, with no more than one grade of D allowed in a Theatre course. Additionally, students must earn a grade of P in Student Teaching and a minimum edTPA score of 38 to be recommended for licensure.

Honors Program

For details about the Honors Program in Arts + Architecture, see the beginning of the College of Arts + Architecture section.

Minor in Theatre

Minor Requirements

A Minor in Theatre requires 18 credit hours.

Required Courses (6 credit hours)

- THEA 1140 - The Theatre Experience (3)
- THEA 1300 - Play Analysis (3)

Elective Courses (12 credit hours)

Select four of the following:

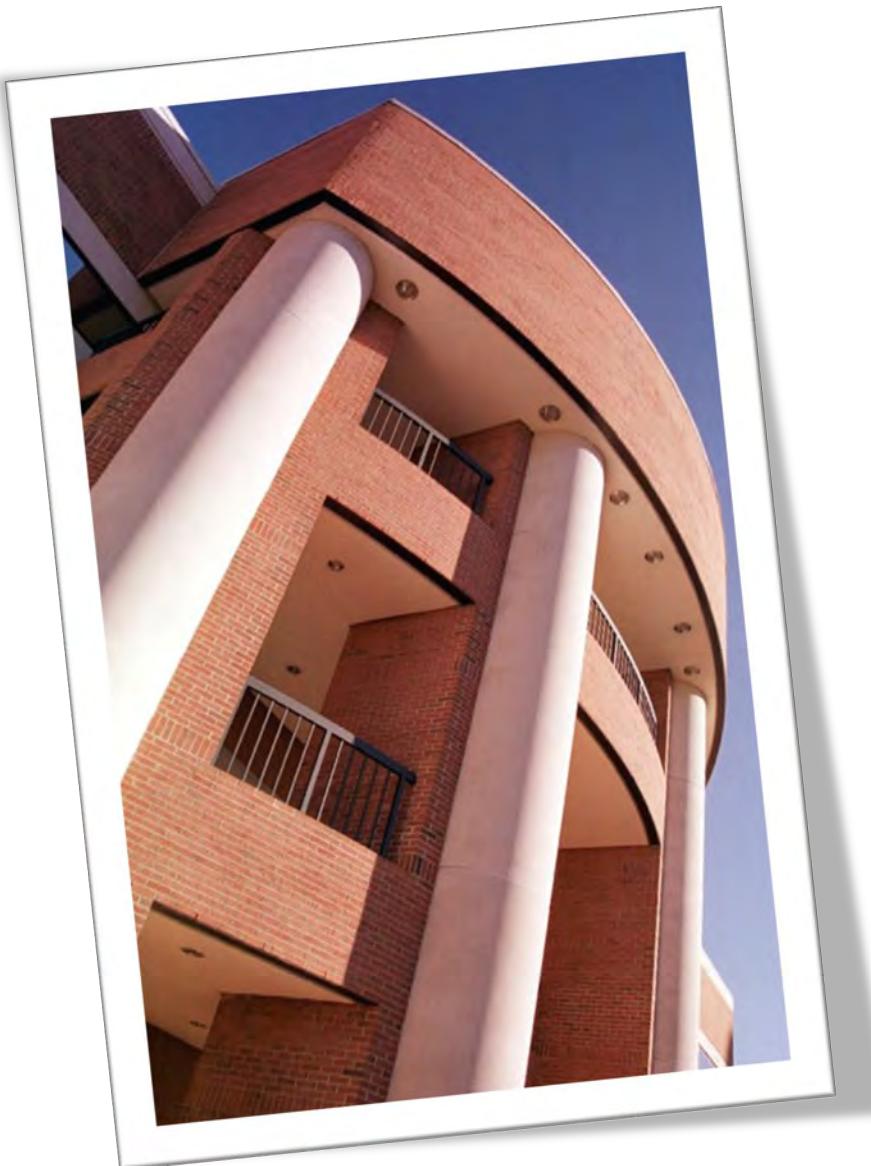

- THEA xxxx - Theatre Elective (3)

Total = 18 Credit Hours

Progression Requirements

All Theatre (THEA) courses must be passed with a grade of C or above, with no more than one grade of D in a Theatre course.

Belk
College of
Business

Belk College of Business

belkcollege.charlotte.edu

The vision of the Belk College of Business is to be a leading urban research business school. We are committed to creating an inclusive culture that inspires a passion for knowledge and intellectual growth, as well as dedication to service. We engage in research that fosters innovative business theory, policy, and practice. In strategic partnership with the Greater Charlotte region, we educate our students to become leaders who are critical thinkers, ethically informed, and globally aware. In carrying out our mission, the Belk College of Business is committed to the following shared values:

- **Integrity:** We embrace integrity as the fundamental basis for trust, leadership, and organizational culture.
- **Knowledge and Innovation:** We are dedicated to encouraging intellectual curiosity, advancing knowledge, and promoting innovation.
- **Excellence:** We have a passion for excellence in business, research, and education.
- We foster an environment that is based on mutual respect, broadens understanding, and builds trust.
- **Global Citizenship:** We promote ethically principled and sustainable global practices that foster economic and social value.

The College of Business consists of the following departments:

- **Turner School of Accountancy**
- **Department of Business Information Systems and Operations Management**
- **Department of Economics**
- **Department of Finance**
- **Department of Management**
- **Department of Marketing**

Degree Programs

Majors

The Belk College of Business offers undergraduate majors with additional concentrations for students at UNC Charlotte. Students who apply for and are accepted into the Belk College of Business are initially classified as Pre-Accounting (PACC), Pre-Business (PBUS), or Pre-Economics (PECO) majors. Students must have earned a minimum cumulative GPA of 2.7, and a minimum grade of C in the Progression Requirements, in order to be accepted into one of the major programs. These majors include:

- Accounting
- Business Administration
- Business Analytics
- Economics with Concentration in Business
- Economics with Concentration in Liberal Arts
- Finance with Concentration in Finance
- Finance with Concentration in Finance and Accounting
- Finance with Concentration in Real Estate
- Finance with Concentration in Risk Management and Insurance
- International Business
- Management with Concentration in Organizational Management
- Management with Concentration in Human Resource Management
- Management Information Systems
- Marketing with Concentration in Marketing
- Marketing with Concentration in Digital/AI Marketing
- Operations and Supply Chain Management

Minors

The Belk College of Business offers four minors for students at UNC Charlotte. Students must earn a minimum cumulative GPA of 2.7 in order to be accepted into the minor programs. Students must take all prerequisites for the courses required in the minor programs. These minors include:

- Economics
- International Management
- Management Information Systems
- Operations and Supply Chain Management

Undergraduate Certificates

- Entrepreneurship

Accreditation

See the "Academic Programs" section of this Catalog for details about program accreditation.

Degree Requirements

All business degrees are composed of: (1) General Education Requirements, (2) Progression Requirements, (3) Core Requirements, (4) Major Requirements, and (5) Electives. To graduate from UNC Charlotte, students must attain a minimum 120 earned credit hours. "Non-Business Elective" and "General Elective" credit hours may be required to address any shortfall needed to meet the 120 earned hours. A Non-Business Elective can be any course offered by the University outside the Belk College of Business. A General Elective can be any course offered by the University that is not already fulfilling a degree requirement.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Catalog Policies

The Belk College reserves the right to impose new curriculum changes at any time. Students unsure of which catalog to use should consult with their Academic and Career Coach. Readmitted students are automatically considered under the program and degree requirements in force at the time of readmission.

Course Level and Prerequisite Restrictions

The Belk College restricts the registration of upper-division business courses (3000-level) only to majors who have attained Junior or Senior standing and satisfied course prerequisites. *Course prerequisites are strongly enforced and cannot be waived.* For one term, Pre-Accounting, Pre-Business, and Pre-Economics students with a minimum cumulative GPA of 2.7 and 60 earned credit hours may register for 3000-level business courses provided that all necessary prerequisites have been met. The Belk College reserves the right to remove students from any courses for which prerequisites (including minimum GPA requirements) have not been successfully met. Students enrolling in MGMT 3280 (Strategic Management) must have achieved Senior-level status and have completed all Core Courses with minimum grades of C or above. *Pre-Accounting, Pre-Business, and Pre-Economics students may not enroll in MGMT 3280.*

Grade Replacement and Repeat Policies

Students are permitted two attempts at any course in the Belk College of Business. An attempt is defined as a course that is completed with a final grade of A, B, C, D, or F. This includes all: (1) Progression Requirements, (2) Core Requirements, and (3) Major Requirements. Students who earn less than a grade of C within two attempts in any of these required courses will be ineligible to continue in the major. The Grade Replacement Policy may be applied for business courses; however, the repeated course(s) will still count as an attempt.

Residency Requirements

In addition to meeting University residency requirements, all students seeking undergraduate degrees in the Belk College must complete at least 50 percent of the Core and Major Requirements at UNC Charlotte. This will vary depending on the major program requirements.

Furthermore, at least half of the hours required for an undergraduate degree in the Belk College of Business must be taken outside of the Belk College in order to have a well-rounded and balanced university education and experience. These 60 hours are designated as "Non-Business." In addition to the General Education Requirements, the following courses are designated as Non-Business: ECON 2101, ECON 2102, ECON 3125, MATH 1120, and STAT 1220.

Transfer and Second-Degree Students

The Belk College of Business major programs are designed to allow transfer students from community colleges and other institutions to enter the program and complete their degree requirements at UNC Charlotte. It is very important that students meet with an advisor at their community college or other institution to plan courses that will be accepted into the Belk College of Business. Due to AACSB accreditation standards, equivalency for upper-division business courses may be denied. Transfer credits allowed may be limited due to University and College residency requirements. Transfer equivalencies are granted upon admission to UNC Charlotte.

Transfer Credit and Transient Study

Once a student is admitted into the Belk College of Business, they are prohibited from transferring in coursework (including Progression, Core, and Major

Courses) from other institutions without prior approval. This policy applies to courses taken from any other institution. Approvals are limited to 1000- and 2000-level courses taken during Summer terms and a maximum of six (6) credit hours of 3000-level courses taken during Summer terms. Approval may be denied due to University or College residency requirements. Equivalency for upper-division business courses may be denied.

Business Honors Program

The Business Honors Program (BHP) provides students with access to a range of opportunities designed to stimulate their thinking and broaden their exposure to topics related to business.

The Business Honors Program is committed to the highest principles of professionalism that guide our actions. We aspire to be a community of learners actively engaged in academic scholarship while demonstrating a high regard for others by modeling excellent ethical standards. We seek to promote service above self and to support and encourage, educate and mentor, value and empathize with others. We advocate these core values among the membership. The core values of the Business Honors Program are based upon a commitment to academic merit, integrity, respect, service above self, and honor.

Admission Requirements

All Students

See University Admission Requirements. Students interested in being admitted to the Business Honors Program must complete an *Application for Admission*. Admission to the program is based on the student's demonstrated honors potential and availability of space in the program. Honors potential is determined by examining GPA (minimum 3.5 for currently enrolled and transfer students), SAT or ACT scores (for new freshmen), courses completed, academic and other distinctions, activities, community service, and other related factors. All admitted students must earn and maintain a minimum 3.5 GPA at UNC Charlotte to be an active member of the program. Students failing to meet minimum requirements of the 3.5 GPA, attendance at BHP meetings, and participation in community service events will not be able to continue in the program.

Course Requirements

A minimum of 9 credit hours of honors courses are required to graduate with Business Honors. Business Honors students are required to complete additional honors coursework depending upon the student's point of entry as outlined below.

Students in the Business Honors Program must complete 3 of the 4 Business Honors courses offered. Business Honors courses may include:

BUSN 1701 - Practicum I: Corporate Citizenship (1)
BUSN 2701 - Practicum II: Professionalism and Service Seminar (1)
BUSN 2702 - Practicum III: Leadership and Group Dynamics (1)
BUSN 3701 - Practicum IV: Building Networks for Success (1)

and honors sections of:

BUSN 1101 - Introduction to Business and Professional Development (3) or BUSN 1100 - Freshman Honors Seminar (1)
COMM 3160 - Business Communications (3)
ECON 2101 - Principles of Economics - Macro (3)
ECON 2102 - Principles of Economics - Micro (3)
MGMT 3140 - Management and Organizational Behavior (3)
MGMT 3280 - Strategic Management (3)
MKTG 3110 - Principles of Marketing (3)
OPER 3100 - Operations Management (3)

Students will be waived from taking honors sections of courses taken prior to entering the Business Honors Program. Other waivers must be approved in advance by the Director of the Business Honors Program. In addition, students entering the Business Honors Program as freshmen are required to complete 3 credit hours in an HONR course or an honors section of an LBST course. Students entering after the Freshman year are encouraged to take an HONR course or an honors section of an LBST course. Honors courses cannot be repeated. A grade of D or F in any honors course results in a student not being eligible to continue in the program.

Progression Requirements

To graduate with "Honors in Business," a student must:

- Complete the minimum required honors courses and other requirements
- Complete the Application to Candidacy process for graduating with honors, as directed by the Honors College, one semester prior to graduation
- Receive a grade of at least A in BUSN 4701 or on the Senior Project in the Honors section of MGMT 3280
- Present a GPA of at least 3.5 overall and 3.2 in all honors courses for which a grade was assigned
- Participate in: (1) monthly meetings, (2) community service, (3) either study abroad or an internship; and (4) other requirements as set forth in the BHP Handbook

Special Policies or Requirements

Dual Honors

Business honors students seeking to graduate with dual honors must complete all secondary college/departmental honors requirements, in addition to BHP requirements. In this case, the secondary college/departmental thesis may be allowed to satisfy the BHP capstone project requirement when an appropriate thesis topic and thesis committee are selected. At a minimum, the thesis topic should involve an aspect of business and include at least one thesis committee member from business. Prior approval must be granted by the Business Honors Program Director prior to the Application to Candidacy proposal stage.

Advising

Academic and Career Coaches and Professional Development staff in the Niblock Student Center support all students in the Belk College of Business. Students meet one-on-one with their Academic and Career Coach and are encouraged to engage in professional development activities that support academic and career success. The Niblock Student Center is dedicated to helping students define their professional goals, engage in success strategies to prepare for the workforce, and complete their degree in a timely manner. Some of the support programs and services offered include:

- Workshops and other programs to promote the development of professional skills
- Events to facilitate student engagement with industry
- Academic courses that allow students to earn credit for qualifying internship experiences

Internships

Students may apply for academic credit for internship experiences. Internship coursework is graded and requires 150 hours of supervised work experience that directly aligns with a student's declared major. Students may not apply for course credit if the work experience has already concluded, if a student is currently employed and is seeking credit with the same employer, or if the business is family-owned.

Minimum eligibility requirements include the following:

- Junior or Senior standing
- Declared Business Major
- Minimum 2.0 GPA
- ACCT 3312 or ACCT 3324 with grade of C or above (for Accounting majors only)
- MKTG 3110 with grade of C or above (for Marketing majors only)

All application materials must be submitted by the application deadline. Upon review and approval of a qualified internship experience and satisfactory completion of eligibility requirements, students will be issued permission to register for the appropriate internship course.

Turner School of Accountancy

belkcollege.charlotte.edu/departments/accounting

Undergraduate Programs

- **B.S. in Accounting**

The Accounting program provides a learning environment in which students acquire conceptual and technical knowledge in the accounting and business areas as well as other essential capabilities for a successful accounting career. The undergraduate accounting curriculum is designed to enable students to:

- a) effectively develop, measure, analyze, validate, and communicate financial and other information
- b) understand the concepts and methods of economics, finance, marketing, quantitative methods, management, and information systems
- c) develop skills, competencies and learning capacities that are essential for a broad education

Graduates should have an excellent foundation for careers in business and accounting. A student who plans to become licensed as a certified public accountant in North Carolina must complete an additional 30 credit hours of academic study beyond the undergraduate accounting education. A student can meet this requirement by completing the Master of Accountancy program (MACC). For details on the MACC, please see the *UNC Charlotte Graduate Catalog*.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Admission Requirements (Pre-Accounting)

Freshmen

Freshman admission is competitive. Students who apply for this major and are accepted into the Belk College of Business are initially classified as Pre-Accounting (PACC) majors. Students interested in pursuing a Major in Accounting should seek admission to the Pre-Accounting

program to ensure appropriate advising and support. Students who complete the Progression Course Requirements listed below may declare an upper-division major in Accounting.

- See University Admission Requirements
- *Minimum GPA:* 2.7 overall
- *Pre-Major/Prerequisite/Progression Courses:*
 - ACCT 2121
 - ACCT 3323 or ACCT 2122 (if previously taken)
 - BUSN 1101
 - ECON 2101
 - ECON 2102
 - INFO 2130
 - MATH 1120, MATH 1121, MATH 1241, or MATH 1242
 - STAT 1220, STAT 1221, STAT 1222, or STAT 2122

[A minimum grade of C is required in all Progression Courses. Once enrolled at UNC Charlotte, students may attempt each of the Progression Courses listed above a maximum of two times. An attempt is defined as a course that is completed with a final grade of A, B, C, D, or F. Courses repeated under the UNC Charlotte Grade Replacement Policy are excluded from the GPA computation, but will count as an attempt.]

Transfers

Transfer students interested in pursuing a Major in Accounting should seek admission to the Pre-Accounting program. Transfer admission requirements for the Pre-Accounting major include the following:

- *Minimum GPA:* 2.7 overall
- *Pre-Major/Prerequisite/Progression Courses:* See Progression Courses above. Minimum grade of C in Progression Courses completed.

Currently Enrolled Students

Declaration of Major and/or Progression Requirements:

- Junior standing (60 credit hours or more)
- Pre-Accounting Requirements listed above
- Approved Change of Major form
- Pre-Accounting students should submit Change of Major forms to an Academic and Career Coach in the Belk College of Business Niblock Student Center.
- Students who fail to declare their upper-division major on time will be prohibited from declaring their upper-division major in the College if their GPA falls below a 2.7.

Degree Requirements

The following courses are required. **Students may attempt each of these courses two times.**

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Business Core Courses (24 credit hours)

- BLAW 3150 - Business Law I (3)
- COMM 3160 - Business Communications (3)

- FINN 3120 - Financial Management (3)
- INFO 3130 - Management Information Systems (3)
- MGMT 3140 - Management and Organizational Behavior (3)
- MGMT 3280 - Strategic Management (3)
- MKTG 3110 - Principles of Marketing (3)
- OPER 3100 - Operations Management (3)

Major Courses (22 credit hours)

- ACCT 3300 - Professional Development for Accountants (1)
- ACCT 3311 - Intermediate Financial Accounting I (3)
or ACCT 3323 - Intermediate Accounting I (3)
- ACCT 3312 - Intermediate Financial Accounting II (3)
or ACCT 3324 - Intermediate Accounting II (3)
- ACCT 3325 - Intermediate Accounting III (3)
- ACCT 3330 - Managerial Accounting and the Decision Process (3)
- ACCT 3340 - Accounting Information Systems (3)
- ACCT 3350 - Internal Auditing (3)
- ACCT 4220 - Income Tax (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Students who do not meet the Progression Requirements above are ineligible for continuation in the Belk College of Business.

To obtain this degree, students must meet the University requirements of a GPA of at least 2.0 overall and in the courses for the major. Students must earn a minimum grade of C in all required Progression, Core, and Major Courses. When students repeat a course, both the old and new grades are included in the overall GPA. Courses repeated under the Grade Replacement Policy are excluded from the overall GPA computation. However, this repeated course does count as an attempt. Students must also meet the Belk College of Business residency requirements as described at the beginning of this section.

Internship

Because the School of Accountancy is committed to experiential learning, it allows for Accounting majors to use one internship for academic credit. Permission of the Accounting Internship Coordinator is required before starting the internship. A minimum of ACCT 3312 or ACCT 3324 with a grade of C or above and an overall GPA of at least 2.0 are required. The student may not have a current or prior work history with the internship company.

Early Entry: Master of Accountancy

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)

- Minimum 3.2 overall undergraduate GPA
- Acceptable scores on the appropriate graduate standardized test (e.g., GRE)
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree

Special Policies or Requirements

Up to 3 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 3 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Business Administration

Undergraduate Programs

- B.S.B.A. in Business Administration

Bachelor of Science in Business Administration: Business Administration

The B.S.B.A. in Business Administration (BUSN) provides graduates with fundamental knowledge of key business disciplines with applicability to organizations of varying sizes and industries. The breadth of business is covered in courses in accounting, business analytics, business law, communications, ethics, finance, marketing, management, management information systems, and operations management. Graduates gain competencies in the fundamentals of business, a global perspective, ethical decision making, effective communication, and critical thinking and data analysis skills.

This major requires a minimum of 120 credit hours. Students must complete the General Education Requirements of the University and the Progression, Core, and Major Requirements of the Belk College of Business.

All program-level Admissions and Progression Requirements are in addition to the University of North Carolina at Charlotte Admission Requirements.

Admission Requirements

The major is designed to primarily serve transfer students and students with some college who are returning to complete their degree. Prospective students who meet the University's transfer requirements to business but have not yet successfully completed all of the progression courses will be admitted as a Pre-Business major and will be advised while completing the progression courses.

General Transfer Admission Requirements

See University Admission Requirements

Business Transfer Requirements

- Minimum GPA: 2.7 overall
- "C" or better in all Business Progression Courses completed
- See Pre-Major/Prerequisite/Progression Courses below

Pre-Major/Prerequisite/Progression Courses

ACCT 2121

ACCT 2122 or ACCT 3323

BUSN 1101

ECON 2101

ECON 2102

INFO 2130

MATH 1120, MATH 1121, MATH 1241, or MATH 1242

STAT 1220, STAT 1221, STAT 1222, or STAT 2122

A minimum grade of C is required for all Progression Courses. Once

enrolled at UNC Charlotte, students may attempt each of the Progression Courses listed above a maximum of two times. An attempt is defined as a course that is completed with a final grade of A, B, C, D, or F. Courses repeated under the UNC Charlotte Grade Replacement Policy are excluded from the GPA computation, but they will count as an attempt.

Degree Requirements

The following courses are required. Students may attempt each of these courses a maximum of two times.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Business Core Courses (27 credit hours)

- BLAW 3150 - Business Law I (3)
- COMM 3160 - Business Communications (3)
- ECON 3125 - Managerial Economics (3)
- FINN 3120 - Financial Management (3)
- INFO 3130 - Management Information Systems (3)
- MGMT 3140 - Management and Organizational Behavior (3)
- MGMT 3280 - Strategic Management (3)
- MKTG 3110 - Principles of Marketing (3)
- OPER 3100 - Operations Management (3)

Major Courses (18 credit hours)

- ACCT 3330 - Managerial Accounting and the Decision Process (3)
- MGMT 3282 - Managerial Ethics (3)
- FINN 3271 - Principles of Risk Management and Insurance (3)
- MGMT 3275 - International Business Management (3)
- INFO 3236 - Business Analytics (3)
- MKTG 3220 - Digital Marketing and Web Analytics (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Students who do not meet the Progression Course Requirements above are ineligible for continuation in the Belk College of Business.

To obtain this degree, students must meet the University requirements of a GPA of at least 2.0 overall and in the courses for the major. Students must earn a minimum grade of C in all required Progression, Core, and Major Courses. When students repeat a course, both the old and new grades are included in the overall GPA. Courses repeated under the Grade Replacement Policy are excluded from the overall GPA computation. However, this repeated course does count as an attempt. Students must also meet the Belk College of Business residency requirements as described at the beginning of this section.

Honors Program

For details about the Business Honors Program, visit the program page.

Department of Business Information Systems and Operations Management

belkcollege.charlotte.edu/departments/bisom

Undergraduate Programs

- **B.S.B.A. in Business Analytics**
- **B.S.B.A. in Management Information Systems**
- **B.S.B.A. in Operations and Supply Chain Management**
- **Minor in Management Information Systems**
- **Minor in Operations and Supply Chain Management**
- **Early Entry: M.S. in Data Science and Business Analytics** (*see the School of Data Science section*)

The Department of Business Information Systems and Operations Management (BISOM) offers majors in three dynamic disciplines toward the Bachelor of Science in Business Administration (B.S.B.A.) degree and two minors. All businesses and not-for-profit organizations provide ample career opportunities in Business Analytics, Management Information Systems, and Operations and Supply Chain Management.

- The **Major in Business Analytics** involves collecting and analyzing data using computational, statistical, and mathematical models and methods to achieve competitive advantage. The program prepares students with the ability to unlock the potential of data to gain business insights, improve business decision making, and solve business problems. The major prepares graduates for jobs involving data-driven business intelligence, decision models, and big data analytics and for graduate education.
- The **Major in Management Information Systems (MIS)** prepares students to understand and use information systems that support improved decision making and business operations leading to enhanced quality of management and growth of the organization. The major produces graduates who bridge the gap between technical knowledge and business functions. Potential careers include systems/business analyst, consultant, data analyst, network specialist, systems developer, application programmer, project manager, technical support specialist, and Web designer. A minor is also offered in this area.
- The **Major in Operations and Supply Chain Management (OSCM)** focuses on the management of resources and processes of an organization to provide quality goods and services. While OSCM has always been important in manufacturing, service organizations have discovered the importance of being able to effectively and efficiently manage operations. OSCM prepares students for careers in the areas of supply chain management, production planning, project management, quality assurance, and operations. A minor is also offered in this area.

All three majors offer students an integrated background in the functional areas of business and focus on enhancing problem-solving and critical thinking skills using current technology. The majors in Business Analytics and Management Information Systems are designated STEM programs.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Science in Business Administration: Business Analytics

A Major in Business Analytics (BUAY) involves collecting and analyzing data using computational, statistical, and mathematical models and methods to achieve competitive advantage through better decisions in uncertain business environments. The BUAY major prepares graduates for jobs involving data-driven business intelligence, decision models, and big data analytics and for graduate education in Data Science and Business Analytics, Supply Chain Management, Mathematical Finance, Marketing, and Economics.

Who uses Business Analytics?

All businesses and not-for-profit organizations nowadays use Business Analytics. Thanks to the rapid development of information technology and telecommunications, these organizations have an opportunity to make use of various types of big data and sophisticated analytics tools at a cost more affordable than ever before. The numerous tools and techniques developed for descriptive, predictive, and prescriptive analytics help the organizations make informed decisions on day-to-day operations and long-term strategic planning.

Skills for Business Analytics majors include:

- Analytical problem solving
- Business process skills
- Communication skills
- Information technology skills
- Organizational skills

Admission Requirements (Pre-Business)

Freshmen

Freshman admission is competitive. Students who apply for this major and are accepted into the Belk College of Business are initially classified as Pre-Business (PBUS) majors. Students interested in pursuing a Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management should seek admission to the Pre-Business program to ensure appropriate advising and support. Students who complete the Progression Course Requirements listed below may declare an upper-division Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management.

- See University Admission Requirements
- *Minimum GPA:* 2.7 overall
- *Pre-Major/Prerequisite/Progression Courses:*
 - ACCT 2121
 - ACCT 2122 or ACCT 3323

- BUSN 1101
- ECON 2101
- ECON 2102
- INFO 2130
- MATH 1120, MATH 1121, MATH 1241, or MATH 1242
- STAT 1220, STAT 1221, STAT 1222, or STAT 2122

[A minimum grade of C is required for all Progression Courses. Once enrolled at UNC Charlotte, students may attempt each of the Progression Courses listed above a maximum of two times. An attempt is defined as a course that is completed with a final grade of A, B, C, D, or F. Courses repeated under the UNC Charlotte Grade Replacement Policy are excluded from the GPA computation, but will count as an attempt.]

Transfers

Transfer students interested in pursuing a Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management should seek admission to the Pre-Business program. Transfer admission requirements for the Pre-Business major include the following:

- See University Admission Requirements
- *Minimum GPA:* 2.7 overall
- *Pre-Major/Prerequisite/Progression Courses:* See Progression Courses above. Minimum grade of C in Progression Courses completed.

Currently Enrolled Students

Declaration of Major and/or Progression Course Requirements:

- Junior standing (60 credit hours or more)
- Pre-Business Requirements listed above
- Approved Change of Major form.
- Pre-Business students should submit Change of Major forms to an Academic and Career Coach in the Belk College of Business Niblock Student Center.
- Students who fail to declare their upper-division major on time will be prohibited from declaring their upper-division major in the College if their GPA falls below a 2.7.

Degree Requirements

This major requires a minimum of 120 credit hours. Students must complete the General Education Requirements of the University and the Progression, Core, and Major Requirements of the Belk College of Business.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Business Core Courses (27 credit hours)

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Students who do not meet the Progression Course Requirements above are ineligible for continuation in the Belk College of Business.

To obtain this degree, students must meet the University requirements of a GPA of at least 2.0 overall and in the courses for the major. Students must earn a minimum grade of C in all required Progression, Core, and Major Courses. When students repeat a course, both the old and new grades are included in the overall GPA. Courses repeated under the Grade Replacement Policy are excluded from the overall GPA computation. However, this repeated course does count as an attempt. Students must also meet the Belk College of Business residency requirements as described at the beginning of this section.

Bachelor of Science in Business Administration: Management Information Systems

A Major in MGIS involves the application of information technology and analytical skills to the solution of organizational problems and opportunities for innovation. MGIS graduates are prepared for positions in the design, planning, development, implementation, and management of information systems.

Who uses Management Information Systems?

All businesses use MGIS to make forecasts, manage day-to-day operations, schedule personnel and equipment, manage quality and inventory, work with suppliers, and undertake projects. In addition, management depends on information systems to collect and analyze data to make decisions. Data on customers, suppliers, competitors, and others are the main inputs to decision making at all levels of the organization. While all organizations have information systems needs, some industries have much greater reliance on them. These include banking, insurance, large-scale retailing, and communications.

Skills for Management Information Systems majors include:

- Analytical problem solving
- Business process skills
- Communication skills
- Information technology skills
- Organizational skills

Admission Requirements (Pre-Business)

Freshmen

Freshman admission is competitive. Students who apply for this major and are accepted into the Belk College of Business are initially classified as Pre-Business (PBUS) majors. Students interested in pursuing a Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management should seek admission to the Pre-Business program to ensure appropriate advising and support. Students who complete the Progression Course Requirements listed below may declare an upper-division Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management.

- OPER 3206 - Quality Assurance and Management (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Students who do not meet the Progression Course Requirements above are ineligible for continuation in the Belk College of Business.

To obtain this degree, students must meet the University requirements of a GPA of at least 2.0 overall and in the courses for the major. Students must earn a minimum grade of C in all required Progression, Core, and Major Courses. When students repeat a course, both the old and new grades are included in the overall GPA. Courses repeated under the Grade Replacement Policy are excluded from the overall GPA computation. However, this repeated course does count as an attempt. Students must also meet the Belk College of Business residency requirements as described at the beginning of this section.

Bachelor of Science in Business Administration: Operations and Supply Chain Management

A Major in Operations and Supply Management (OSCM) focuses on the efficient use of resources to provide quality goods and services. OSCM enables students to pursue such careers in supply chain management, production planning, project management, quality assurance, and operations. Environments in which OSCM graduates are in high demand include health care, government, manufacturing, and service industries.

Who uses Operations and Supply Chain Management?

All businesses, including for-profit and not-for-profit, manufacturing and services, use OSCM. These businesses have to make forecasts, manage day-to-day operations, schedule personnel and equipment, manage quality and inventory, work with suppliers, and undertake projects. While OSCM has always been important in manufacturing, service organizations are discovering the importance of being able to effectively and efficiently manage operations. Financial services and healthcare industries have been on the leading edge in using OSCM to improve operations. Company expenditures on programs such as Six Sigma, total quality management, and operational risk management are in the billions of dollars.

Skills for Operations and Supply Chain Management majors include:

- Analytical problem solving
- Communication skills
- Information technology skills
- Organizational skills
- Project management skills

Admission Requirements (Pre-Business)

Freshmen

Freshman admission is competitive. Students who apply for this major and are accepted into the Belk College of Business are initially classified as Pre-Business (PBUS) majors. Students interested in pursuing a Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management should seek admission to the Pre-Business program to ensure appropriate advising and support. Students who complete the Progression Course Requirements listed below may declare an upper-division Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management.

- ECON 2102
- INFO 2130
- MATH 1120, MATH 1121, MATH 1241, or MATH 1242
- STAT 1220, STAT 1221, STAT 1222, or STAT 2122

[A minimum grade of C is required for all Progression Courses. Once enrolled at UNC Charlotte, students may attempt each of the Progression Courses listed above a maximum of two times. An attempt is defined as a course that is completed with a final grade of A, B, C, D, or F. Courses repeated under the UNC Charlotte Grade Replacement Policy are excluded from the GPA computation, but will count as an attempt.]

Transfers

Transfer students interested in pursuing a Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management should seek admission to the Pre-Business program. Transfer admission requirements for the Pre-Business major include the following:

- See University Admission Requirements
- *Minimum GPA:* 2.7 overall
- *Pre-Major/Prerequisite/Progression Courses:* See Progression Courses above. Minimum grade of C in Progression Courses completed.

Currently Enrolled Students

Declaration of Major and/or Progression Course Requirements:

- Junior standing (60 credit hours or more)
- Pre-Business Requirements listed above
- Approved Change of Major form
- Pre-Business students should submit Change of Major forms to an Academic and Career Coach in the Belk College of Business Niblock Student Center.
- Students who fail to declare their upper-division major on time will be prohibited from declaring their upper-division major in the College if their GPA falls below a 2.7.

Degree Requirements

The following courses are required. **Students may attempt each of these courses two times.**

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Business Core Courses (27 credit hours)

- BLAW 3150 - Business Law I (3)
- COMM 3160 - Business Communications (3)
- ECON 3125 - Managerial Economics (3)
- FINN 3120 - Financial Management (3)

- INFO 3130 - Management Information Systems (3)
- MGMT 3140 - Management and Organizational Behavior (3)
- MGMT 3280 - Strategic Management (3)
- MKTG 3110 - Principles of Marketing (3)
- OPER 3100 - Operations Management (3)

Major Courses (9-12 credit hours)

- OPER 3204 - Management of Service and Project Operations (3)
- OPER 3208 - Supply Chain Management (3)

Plus at least one of the following:

- OPER 3201 - Operations Planning and Control (3)
- OPER 3206 - Quality Assurance and Management (3)

Restricted Elective Courses (3-6 credit hours)

If both OPER 3201 and OPER 3206 are selected above, then select one of the following; otherwise, select two of the following:

- ETIN 3133 - Quality Control (3)
- INFO 3230 - Enterprise Systems (3)
- INFO 3233 - Data and Information Management (3)
- INFO 3236 - Business Analytics (3)
- OPER 3000 - Topics in Operations Management (3)
- OPER 3203 - Decision Modeling and Analysis (3)
- OPER 3400 - Operations and Supply Chain Management Internship (3)
- OPER 3800 - Directed Study (3)
- SEGR 3670 - Total Quality Systems (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Students who do not meet the Progression Course Requirements above are ineligible for continuation in the Belk College of Business.

To obtain this degree, students must meet the University requirements of a GPA of at least 2.0 overall and in the courses for the major. Students must earn a minimum grade of C in all required Progression, Core, and Major Courses. When students repeat a course, both the old and new grades are included in the overall GPA. Courses repeated under the Grade Replacement Policy are excluded from the overall GPA computation. However, this repeated course does count as an attempt. Students must also meet the Belk College of Business residency requirements as described at the beginning of this section.

Minor in Management Information Systems

The Minor in Management Information Systems is designed to provide students who have an interest in business information systems with a broad foundation for integrating information technology techniques and concepts into their major field of study in business. The demand for business graduates who are knowledgeable about designing, planning, developing, managing, and evaluating of information systems continues to increase as the economy moves from a manufacturing to an information base. The demand for MGIS professionals has increased dramatically during the past ten years and the trend is expected to continue. However, there is also an increase in the demand for management information systems professionals who have an in-depth understanding of the application domain and who can apply MGIS

concepts in contexts which are more specific to their major. Thus, professionals with a primary interest and expertise in marketing, health care, banking, finance, accounting, and management are being sought by business application-area specialists.

The focus of the Minor in MGIS is to impart a framework for understanding MGIS and for utilizing its tools to the student's major. The minor will offer graduates a competitive advantage in terms of the types of positions for which they qualify. Graduates of the program will be able to act as technical liaisons between MGIS professionals and their "home" departments, as sales specialists for specialized software/applications systems, and as technical representatives.

The Minor in MGIS is directed not only at UNC Charlotte students majoring in business but also those majoring in other Colleges. The benefits of a Minor in MGIS include increased marketability in information-dependent firms in the public and private sector and the ability to leverage one's major discipline with state-of-the-art computing knowledge. A key benefit of taking MGIS courses is that students learn to effectively use technology in business settings.

Admission Requirements

Current UNC Charlotte Undergraduate Students
See University Admission Requirements

To be accepted into the Minor in MGIS and to progress into the upper-division of the College, a student must present a minimum 2.7 GPA overall and Junior standing.

Minor Requirements

A Minor in Management Information Systems requires a minimum 15 credit hours (five courses) for students who have taken the business prerequisites listed below. **Students may attempt each of these courses two times.**

Prerequisite Courses (18 credit hours)

- ACCT 2121 - Principles of Accounting I (3)
- ACCT 2122 - Principles of Accounting II (3)
- ECON 2101 - Principles of Economics Macro (3)
- ECON 2102 - Principles of Economics Micro (3)
- MATH 1120 - Calculus (3)
- STAT 1220 - Elements of Statistics I (3)

Required Minor Courses (12 credit hours)

- INFO 2130 - Introduction to Business Computing (3)*
- INFO 3130 - Management Information Systems (3)
- INFO 3233 - Data and Information Management (3)
- INFO 3234 - Business Information Systems Analysis and Design (3)

**All Computer Science majors will be exempted from INFO 2130. Other students with sufficient background can apply for Credit by Exam for INFO 2130.*

Elective Minor Course (3 credit hours)

Select one of the following courses:

- ACCT 3340 - Accounting Information Systems (3)
- INFO 3000 - Topics in Management Information Systems (3)
- INFO 3221 - Programming for Business Analytics (3)
- INFO 3231 - Business Application Development (3)

- INFO 3236 - Business Analytics (3)
- INFO 3229 - Business Data Communications and Information Security (3)
- INFO 3240 - eBusiness Systems (3)
- OPER 3203 - Decision Modeling and Analysis (3)

Total = 15 Credit Hours

Progression Requirements

To obtain this minor, students must meet the University requirements of a GPA of at least 2.0 overall and in the courses for the minor. Students must earn a minimum grade of C in all required and elective minor courses and their prerequisite courses. When students repeat a course, both the old and new grades are included in the overall GPA. Courses repeated under the Grade Replacement Policy are excluded from the overall GPA computation. However, this repeated course does count as an attempt. Students must also meet the Belk College of Business residency requirements as described at the beginning of this section.

Minor in Operations and Supply Chain Management

The Minor in Operations and Supply Chain Management (OSCM) is designed to provide business and non-business students who have an interest in supply chain management, manufacturing, and service operations with a broad foundation of OSCM concepts and analytical methodology to be integrated into their major field of study.

The demand for graduates who are knowledgeable about designing, planning, evaluating, and managing supply chains, production, and service systems continues to increase. There is also an increase in the demand of OSCM professionals who can define strategic and operational problems, collect relevant data, and apply advanced analytical techniques to improve the performance of firms. OSCM courses deal with supply chains, service systems, and manufacturing organizations. These areas examine the production function of an organization at a strategic level, as well as the plant and shop floor level. Areas included in the OSCM program include operations strategy, process analysis, product design, quality management, logistics management, procurement, supply chain management, project management, and waiting line management as well as analytical techniques such as optimization and simulation.

The minor offers graduates a competitive advantage in terms of the types of positions for which they qualify. The Minor in OSCM is directed not only at UNC Charlotte students majoring in business but also those majoring in other Colleges. The benefits of a minor in OSCM include increased marketability in the public and private sector and the ability to leverage one's major discipline with a solid understanding of one business area, increased analytical thinking, problem-solving ability, and an understanding of internal and external environments of service and business organizations.

Admission Requirements

Current UNC Charlotte Undergraduate Students
See University Admission Requirements

To be accepted into the Minor in OSCM and to progress into the upper-

division of the College, a student must present a minimum 2.7 GPA overall and Junior standing.

Minor Requirements

A Minor in Operations and Supply Chain Management requires a minimum 15 credit hours (five courses) for students who have taken the business prerequisites listed below. **Students may attempt each of these courses two times.**

Prerequisite Courses (21 credit hours)

- ACCT 2121 - Principles of Accounting I (3)
- ACCT 2122 - Principles of Accounting II (3)
- ECON 2101 - Principles of Economics Macro (3)
- ECON 2102 - Principles of Economics Micro (3)
- INFO 2130 - Introduction to Business Computing (3)*
- MATH 1120 - Calculus (3)
- STAT 1220 - Elements of Statistics I (3)

Required Minor Courses (9 credit hours)

- MGMT 3140 - Management and Organizational Behavior (3)
- OPER 3100 - Operations Management (3)
- OPER 3208 - Supply Chain Management (3)

Elective Minor Courses (6 credit hours)

Select two of the following courses, one of which must be an OPER course:

- INFO 3230 - Enterprise Systems (3)
- INFO 3233 - Data and Information Management (3)
- INFO 3236 - Business Analytics (3)
- OPER 3201 - Operations Planning and Control (3)
- OPER 3203 - Decision Modeling and Analysis (3)
- OPER 3204 - Management of Service and Project Operations (3)
- OPER 3206 - Quality Assurance and Management (3)

**All Computer Science and Software and Information Systems majors will be exempted from INFO 2130. Other students with sufficient background can apply for Credit by Exam for INFO 2130.*

Total = 15 Credit Hours

Progression Requirements

To obtain this minor, students must meet the University requirements of a GPA of at least 2.0 overall and in the courses for the minor. Students must earn a minimum grade of C in all required and elective minor courses and their prerequisite courses. When students repeat a course, both the old and new grades are included in the overall GPA. Courses repeated under the Grade Replacement Policy are excluded from the overall GPA computation. However, this repeated course does count as an attempt. Students must also meet the Belk College of Business residency requirements as described at the beginning of this section.

Department of Economics

belkcollege.charlotte.edu/departments/economics

Undergraduate Programs

- **B.S. in Economics**
 - Business
 - Liberal Arts
- **Minor in Economics**
- **Early Entry: M.S. in Economics**

The study of Economics offers students a problem-solving discipline to foster their intellectual and career development. It provides students with a balanced and broad educational background and prepares them to choose from a wide range of career alternatives.

The Economics program explores the economic decisions of individuals, businesses, governments, and other institutions. It examines the nature of economic activity, why it takes place, and how it affects everyone's lives. The program includes elective courses that enable students to tailor their educational program to meet personal needs and interests. The study of economics also helps students develop a way of thinking that is logical and rigorous. It provides decision-making tools that they can apply to personal as well as business decisions and use to address the many economic decisions they will face in the future.

The Department of Economics offers two programs leading to the Bachelor of Science degree. Students who plan to pursue careers in business-related fields such as banking, finance, and international commerce, or who plan to enter an MBA program, are encouraged to elect the Major in Economics with a Business Concentration. Students planning to pursue a career in education or the social sciences, enter graduate school in economics, or attend law school are encouraged to pursue the Major in Economics with a Liberal Arts Concentration.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Science in Economics *with Concentration in Business*

Admission Requirements (Pre-Economics, Business Concentration)

Freshmen

Freshman admission is competitive. Students who apply for this major and are accepted into the Belk College of Business are initially classified as Pre-Economics (PECO) majors. Students interested in pursuing a Major in Economics with Concentration in Business should seek admission to the Pre-Economics program to ensure appropriate advising and support. Students who complete the Progression Course Requirements listed below may declare an upper-division Major in Economics with Concentration in Business.

- See University Admission Requirements
- *Minimum GPA:* 2.7 overall
- *Pre-Major/Prerequisite/Progression Courses:*

- ACCT 2121
- ACCT 2122 or ACCT 3323
- BUSN 1101
- ECON 2101
- ECON 2102
- INFO 2130
- MATH 1120, MATH 1121, MATH 1241, or MATH 1242
- STAT 1220, STAT 1221, STAT 1222, or STAT 2122

[A minimum grade of C is required for all Progression Courses. Once enrolled at UNC Charlotte, students may attempt each of the Progression Courses listed above a maximum of two times. An attempt is defined as a course that is completed with a final grade of A, B, C, D, or F. Courses repeated under the UNC Charlotte Grade Replacement Policy are excluded from the GPA computation, but will count as an attempt.]

Transfers

Transfer students interested in pursuing a Major in Economics with Concentration in Business should seek admission to the Pre-Economics program. Transfer admission requirements for the Pre-Economics major include the following:

- See University Admission Requirements
- *Minimum GPA:* 2.7 overall
- *Pre-Major/Prerequisite/Progression Courses:* See Progression Courses above. Minimum grade of C in Progression Courses completed.

Currently Enrolled Students

Declaration of Major and/or Progression Course Requirements:

- Junior standing (60 credit hours or more)
- Pre-Economics Requirements listed above
- Approved Change of Major form.
- Pre-Economics students should submit Change of Major forms to an Academic and Career Coach in the Belk College of Business Niblock Student Center.
- Students who fail to declare their upper-division major on time will be prohibited from declaring their upper-division major in the College if their GPA falls below a 2.7.

Degree Requirements

The following courses are required. **Students may attempt each of these courses two times.**

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Business Core Courses (6 credit hours)

Select two of the following:

- BLAW 3150 - Business Law I (3)
- INFO 3130 - Management Information Systems (3)
- MGMT 3140 - Management and Organizational Behavior (3)
- MKTG 3110 - Principles of Marketing (3)
- OPER 3100 - Operations Management (3)

Major Courses (24 credit hours)

- ECON 3112 - Econometrics (3)
- ECON 3122 - Intermediate Microeconomics (3)
- ECON 3123 - Intermediate Macroeconomics (3)
- ECON 3125 - Managerial Economics (3)
- ECON 4200 - Senior Seminar (3)
- FINN 3120 - Financial Management (3)
- COMM 3160 - Business Communications (3)

Plus one of the following Quantitative Skills Courses:

- ECON 4100 - Mathematical Economics (3)
- ECON 4112 - Econometrics II (3)
- ECON 4117 - Business and Economic Forecasting (3)
- INFO 3236 - Business Analytics (3)

Note: It is recommended that students who plan to pursue graduate work in economics complete MATH 1241, ECON 4100, and, as available, ECON 4112 and ECON 4117. Also, they should consider additional work in mathematics but should consult with an Academic Advisor concerning specific courses.

Restricted Elective Courses (9 credit hours)

Select three ECON Electives from the 3000- or 4000-level, excluding the courses listed above.

Unrestricted Elective Courses

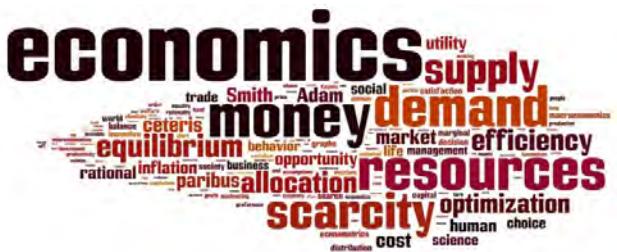

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Students who do not meet the Progression Course Requirements above are ineligible for continuation in the Belk College of Business.

To obtain this degree, students must meet the University requirements of a GPA of at least 2.0 overall and in the courses for the major. Students must earn a minimum grade of C in all required Progression, Core, and Major Courses. When students repeat a course, both the old and new grades are included in the overall GPA. Courses repeated under the Grade Replacement Policy are excluded from the overall GPA computation. However, this repeated course does count as an attempt. Students must also meet the Belk College of Business residency requirements as described at the beginning of this section.

Bachelor of Science in Economics *with* *Concentration in Liberal Arts*

Admission Requirements (Pre-Economics, Liberal Arts Concentration)

Freshmen

FRESHMAN
Freshman admission is competitive. Students who apply for this major and are accepted into the Belk College of Business are initially classified as Pre-Economics (PECO) majors. Students interested in pursuing a Major in Economics with Concentration in Liberal Arts should seek admission to the Pre-Economics program to ensure appropriate advising and support. Students who complete the Progression Course Requirements listed below may declare an upper-division Major in Economics with Concentration in Liberal Arts.

- See University Admission Requirements
 - *Minimum GPA:* 2.7 overall
 - *Pre-Major/Prerequisite/Progression Courses:*
 - WRDS 1103 or WRDS 1104
 - ECON 2101
 - ECON 2102
 - INFO 2130
 - MATH 1120, MATH 1121, MATH 1241, or MATH 1242
 - STAT 1220, STAT 1221, STAT 1222, or STAT 2122

[A minimum grade of C is required for all Progression Courses. Once enrolled at UNC Charlotte, students may attempt each of the Progression Courses listed above a maximum of two times. An attempt is defined as a course that is completed with a final grade of A, B, C, D, or F. Courses repeated under the UNC Charlotte Grade Replacement Policy are excluded from the GPA computation, but will count as an attempt.]

Transfers

Transfer students interested in pursuing a Major in Economics with Concentration in Liberal Arts should seek admission to the Pre-Economics program. Transfer admission requirements for the Pre-Economics major include the following:

- See University Admission Requirements
 - *Minimum GPA:* 2.7 overall
 - *Pre-Major/Prerequisite/Progression Courses.* See Progression Courses above. Minimum grade of C in Progression Courses completed.

Currently Enrolled Students

Declaration of Major and/or Progression Course Requirements:

- Junior standing (60 credit hours or more)
 - Pre-Economics Requirements listed above
 - Approved Change of Major form.
 - Pre-Economics students should submit Change of Major forms to an Academic and Career Coach in the Belk College of Business Niblock Student Center.
 - Students who fail to declare their upper-division major on time will be prohibited from declaring their upper-division major in the College if their GPA falls below a 2.7.

Degree Requirements

The following courses are required. **Students may attempt each of the courses two times.**

General Education Courses (31-32 credit hours)

General Education Requirements (GE GE credit hours)
For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Major Courses (15 credit hours)

- ECON 3112 - Econometrics (3)
 - ECON 3122 - Intermediate Microeconomics (3)
 - ECON 3123 - Intermediate Macroeconomics (3)
 - ECON 4200 - Senior Seminar (3)
 - COMM 3160 - Business Communications (3)

Restricted Elective Courses (12 credit hours)

Select four ECON Electives from the 3000- or 4000-level, excluding the courses listed above.

Note: It is recommended that students who plan to pursue graduate work in economics complete MATH 1241, ECON 4100, and, as available, ECON 4112 and ECON 4117. Also, they should consider additional work in mathematics but should consult with an Academic Advisor concerning specific courses.

Concentration Courses (15+ credit hours)

Students must complete a non-business focus area for the Liberal Arts concentration. Credit hours vary depending on the option chosen. That focus area can be completed in one of three ways:

- 1) Completion of a minor offered outside the Belk College of Business. Credit hours vary dependent on the minor requirements.
 - 2) Completion of a double major offered outside the Belk College of Business. Credit hours vary dependent on the major requirements.
 - 3) Completion of a student-directed focus area. Completion of 15 credit hours of 3000-level or above courses offered outside the Belk College of Business

Unrestricted Elective Courses

Unrestricted Elective Courses
As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Students who do not meet the Progression Course Requirements above are ineligible for continuation in the Belk College of Business.

To obtain this degree, students must meet the University requirements of a GPA of at least 2.0 overall and in the courses for the major. Students must earn a minimum grade of C in all required Progression, Core, and Major Courses. When students repeat a course, both the old and new grades are included in the overall GPA. Courses repeated under the Grade Replacement Policy are excluded from the overall GPA computation. However, this repeated course does count as an attempt. Students must also meet the Belk College of Business residency requirements as described at the beginning of this section.

Minor in Economics

Admission Requirements

Current UNC Charlotte Undergraduate Students

To be accepted into the Minor in Economics and to progress into the upper-division of the College, students must meet the following requirements:

- See University Admission Requirements
- A minimum 2.7 cumulative GPA
- Junior or Senior standing
- A grade of C or above in all prerequisites to required courses in the minor, including:
 - ECON 2101 - Principles of Economics-Macro (3)
 - ECON 2102 - Principles of Economics-Micro (3)
 - MATH 1120 - Calculus (3)
or MATH 1241 Calculus (3)
 - STAT 1220 - Elements of Statistics I - BUSN (3)
 - INFO 2130 - Introduction to Business Computing (3)*

*Required only for ECON 3112 and ECON 3125.

Minor Requirements

A Minor in Economics requires 18 credit hours of economics courses.

Students may attempt each of the courses in the minor two times.

Required Courses (9 credit hours)

ECON 2101 - Principles of Economics Macro (3)
ECON 2102 - Principles of Economics Micro (3)
ECON 3122 - Intermediate Microeconomics (3)
or ECON 3125 - Managerial Economics (3)

Elective Courses (9 credit hours)

Select three ECON elective courses from the following, excluding the courses listed above:

ECON 3XXX-4XXX - Economics Elective (3)
ECON 3XXX-4XXX - Economics Elective (3)
ECON 3XXX-4XXX - Economics Elective (3)

Total = 18 Credit Hours

Progression Requirements

To obtain this minor, students must meet the University requirements of a GPA of at least 2.0 overall and in the courses for the minor. Students must earn a minimum grade of C in all required and elective minor courses and their prerequisite courses. When students repeat a course, both the old and new grades are included in the overall GPA. Courses repeated under the Grade Replacement Policy are excluded from the overall GPA computation. However, this repeated course does count as an attempt. Students must also meet the Belk College of Business residency requirements as described at the beginning of this section.

Early Entry: Master of Science in Economics

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA and 3.2 GPA in the major
- Acceptable scores on the appropriate graduate standardized test (e.g., GRE)
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Accelerated Master's Program

(for High School Seniors and UNC Charlotte Undergraduate Freshmen)

Academically talented high school seniors and UNC Charlotte undergraduate freshmen are encouraged to apply to an Accelerated Master's Program to begin work toward both undergraduate and graduate degrees in their Freshman year.

Admission Requirements

- See University Admission Requirements
 - Minimum high school GPA of 3.75 (on a 4.0 scale)
 - Minimum score of 1220 on SAT

Progression Requirements

Students must maintain a strong academic record at both the undergraduate and graduate levels with a cumulative undergraduate GPA of 3.2 or higher and a cumulative graduate GPA of 3.0 or higher. Students accepted into the Accelerated master's program are subject to the same policies that pertain to other matriculated graduate students.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on the Accelerated Master's Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/accelerated-masters.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Department of Finance

belkcollege.charlotte.edu/departments/finance

Undergraduate Programs

- **B.S.B.A. in Finance**
 - Finance
 - Finance/Accounting
 - Real Estate
 - Risk Management and Insurance
 - **Early Entry: M.S. in Mathematical Finance**

The Department of Finance prepares students for financial leadership within organizations and provides them with an understanding of the legal environment in which these organizations operate. In the Department's various programs, students acquire knowledge that enables them to understand:

- a) The concepts, processes, and institutions involved in planning for, acquiring and allocating capital with respect to modern business organizations
 - b) The economic and legal environment of organizations, and the myriad social and political influences on business
 - c) The concepts and methods of economics, accounting, mathematics, management, information systems, and business law

Students pursuing the Bachelor of Science in Business Administration (B.S.B.A.) degree with a Major in Finance must select one of four concentrations: Finance, Finance and Accounting, Real Estate, or Risk Management and Insurance.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

**Bachelor of Science in Business
Administration: Finance *with Concentration
in Finance***

Students who plan to pursue careers in business-related fields such as banking, finance, and international commerce, or who plan to enter an

MBA program, are encouraged to elect the BSBA in Finance with a Concentration in Finance.

Admission Requirements (Pre-Business)

Freshmen

Freshman admission is competitive. Students who apply for this major and are accepted into the Belk College of Business are initially classified as Pre-Business (PBUS) majors. Students interested in pursuing a Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management should seek admission to the Pre-Business program to ensure appropriate advising and support. Students who complete the Progression Course Requirements listed below may declare an upper-division Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management.

- See University Admission Requirements
- *Minimum GPA:* 2.7 overall
- *Pre-Major/Prerequisite/Progression Courses:*

- ACCT 2121
- ACCT 2122 or ACCT 3323
- BUSN 1101
- ECON 2101
- ECON 2102
- INFO 2130
- MATH 1120, MATH 1121, MATH 1241, or MATH 1242
- STAT 1220, STAT 1221, STAT 1222, or STAT 2122

[A minimum grade of C is required for all Progression Courses. Once enrolled at UNC Charlotte, students may attempt each of the Progression Courses listed above a maximum of two times. An attempt is defined as a course that is completed with a final grade of A, B, C, D, or F. Courses repeated under the UNC Charlotte Grade Replacement Policy are excluded from the GPA computation, but will count as an attempt.]

Transfers

Transfer students interested in pursuing a Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management should seek admission to the Pre-Business program. Transfer admission requirements for the Pre-Business major include the following:

- See University Admission Requirements
- *Minimum GPA:* 2.7 overall
- *Pre-Major/Prerequisite/Progression Courses:* See Progression Courses above. Minimum grade of C in Progression Courses completed.

Currently Enrolled Students

Declaration of Major and/or Progression Course Requirements:

- Junior standing (60 credit hours or more)
- Pre-Business Requirements listed above
- Approved Change of Major form
- Pre-Business students should submit Change of Major forms to an Academic and Career Coach in the Belk College of Business Niblock Student Center.
- Students who fail to declare their upper-division major on time will be

prohibited from declaring their upper-division major in the College if their GPA falls below a 2.7.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

The following courses are required for a B.S.B.A. degree in Finance with a Concentration in Finance. **Students may attempt each of these courses two times.**

Business Core Courses (27 credit hours)

- BLAW 3150 - Business Law I (3)
- COMM 3160 - Business Communications (3)
- ECON 3125 - Managerial Economics (3)
- FINN 3120 - Financial Management (3)
- INFO 3130 - Management Information Systems (3)
- MGMT 3140 - Management and Organizational Behavior (3)
- MGMT 3280 - Strategic Management (3)
- MKTG 3110 - Principles of Marketing (3)
- OPER 3100 - Operations Management (3)

Major Courses (9 credit hours)

- FINN 3222 - Investments (3)
- FINN 3226 - Financial Theory and Practice (3)
- ACCT 3311 - Intermediate Financial Accounting I (3)
- or ACCT 3323 - Intermediate Accounting I (3)

Restricted Elective Courses (9 credit hours)

- Select two to three of the following:*
- BLAW 3250 - Business Law II (3)
 - ECON 3112 - Econometrics (3)
 - ECON 3115 - Money and Banking (3)
 - FINN 3221 - Financial Institutions and Markets (3)
 - FINN 3223 - International Financial Management (3)
 - FINN 3224 - Applied Business Finance (3)
 - FINN 3225 - Commercial Bank Management (3)
 - FINN 3255 - Real Estate Principles (3)
 - FINN 3261 - Real Estate Finance (3)
 - FINN 3271 - Principles of Risk Management and Insurance (3)
 - FINN 3272 - Life Insurance and Professional Financial Planning (3)
 - FINN 3273 - Property and Liability Insurance Operations (3)
 - FINN 3278 - Risk Management and Insurance Sales and Negotiations (3)
 - FINN 3279 - Advanced Topics in Risk Management (3)
 - FINN 4159 - Student Managed Investment Fund II (3)
 - FINN 4160 - Equity Analysis (3)
 - FINN 4161 - Financial Modeling (3)
 - FINN 4275 - Enterprise Risk Management (3)
 - INFO 3236 - Business Analytics (3)
 - OPER 3204 - Management of Service and Project Operations (3)

Select one of the following if only two courses selected above:

- FINN 3400 - Finance Internship (3)
- FINN 3800 - Directed Study (3) (*Chair approval required*)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Students who do not meet the Progression Course Requirements above are ineligible for continuation in the Belk College of Business.

To obtain this degree, students must meet the University requirements of a GPA of at least 2.0 overall and in the courses for the major. Students must earn a minimum grade of C in all required Progression, Core, and Major Courses. When students repeat a course, both the old and new grades are included in the overall GPA. Courses repeated under the Grade Replacement Policy are excluded from the overall GPA computation. However, this repeated course does count as an attempt. Students must also meet the Belk College of Business residency requirements as described at the beginning of this section.

Bachelor of Science in Business Administration: Finance with Joint Concentration in Finance/Accounting

Admission Requirements (Pre-Business)

Freshmen

Freshman admission is competitive. Students who apply for this major and are accepted into the Belk College of Business are initially classified as Pre-Business (PBUS) majors. Students interested in pursuing a Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management should seek admission to the Pre-Business program to ensure appropriate advising and support. Students who complete the Progression Course Requirements listed below may declare an upper-division Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management.

- See University Admission Requirements
- *Minimum GPA:* 2.7 overall
- *Pre-Major/Prerequisite/Progression Courses:*
 - ACCT 2121
 - ACCT 2122 or ACCT 3323
 - BUSN 1101
 - ECON 2101
 - ECON 2102
 - INFO 2130
 - MATH 1120, MATH 1121, MATH 1241, or MATH 1242
 - STAT 1220, STAT 1221, STAT 1222, or STAT 2122
[A minimum grade of C is required for all Progression Courses. Once enrolled at UNC Charlotte, students may attempt each of the Progression Courses listed above a maximum of two times. An attempt is defined as a course that is completed with a final grade of A, B, C, D, or F. Courses repeated under the UNC Charlotte Grade Replacement Policy are excluded from the GPA computation, but will count as an attempt.]

Transfers

Transfer students interested in pursuing a Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management should seek admission to the Pre-Business program. Transfer admission requirements for the Pre-Business major include the following:

- See University Admission Requirements
- *Minimum GPA:* 2.7 overall
- *Pre-Major/Prerequisite/Progression Courses:* See Progression Courses above. Minimum grade of C in Progression Courses completed.

Currently Enrolled Students

- *Declaration of Major and/or Progression Course Requirements:* Junior standing (60 credit hours or more); Pre-Business Requirements listed above; and approved Change of Major form. Pre-Business students should submit Change of Major forms to an Academic and Career Coach in the Belk College of Business Niblock Student Center. Students who fail to declare their upper-division major on time will be prohibited from declaring their upper-division major in the College if their GPA falls below a 2.7.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

The following courses are required for a B.S.B.A. degree in Finance with a joint Finance/Accounting Concentration. **Students may attempt each of these courses two times.**

Business Core Courses (27 credit hours)

- BLAW 3150 - Business Law I (3)
- COMM 3160 - Business Communications (3)
- ECON 3125 - Managerial Economics (3)
- FINN 3120 - Financial Management (3)
- INFO 3130 - Management Information Systems (3)
- MGMT 3140 - Management and Organizational Behavior (3)
- MGMT 3280 - Strategic Management (3)
- MKTG 3110 - Principles of Marketing (3)
- OPER 3100 - Operations Management (3)

Major Courses (12 credit hours)

- FINN 3222 - Investments (3)
- FINN 3226 - Financial Theory and Practice (3)
- ACCT 3311 - Intermediate Financial Accounting I (3)
or ACCT 3323 - Intermediate Accounting I (3)
- ACCT 3312 - Intermediate Financial Accounting II (3)
or ACCT 3324 - Intermediate Accounting II (3)

Restricted Elective Courses (6 credit hours)

Select one to two of the following:

- ACCT 3325 - Intermediate Accounting III (3)
- ACCT 3330 - Managerial Accounting and the Decision Process (3)
- ACCT 3350 - Internal Auditing (3)
- ACCT 3380 - Fraud Examination (3)
- ACCT 4220 - Income Tax (3)

- BLAW 3250 - Business Law II (3)
- ECON 3112 - Econometrics (3)
- FINN 3221 - Financial Institutions and Markets (3)
- FINN 3223 - International Financial Management (3)
- FINN 3224 - Applied Business Finance (3)
- FINN 3225 - Commercial Bank Management (3)
- FINN 3278 - Risk Management and Insurance Sales and Negotiations (3)
- FINN 3279 - Advanced Topics in Risk Management (3)
- FINN 4160 - Equity Analysis (3)
- FINN 4161 - Financial Modeling (3)

Select one of the following if only one course selected above:

- FINN 3400 - Finance Internship (3)
- FINN 3800 - Directed Study (3) (*Department Chair approval required*)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Students who do not meet the Progression Course Requirements above are ineligible for continuation in the Belk College of Business.

To obtain this degree, students must meet the University requirements of a GPA of at least 2.0 overall and in the courses for the major. Students must earn a minimum grade of C in all required Progression, Core, and Major Courses. When students repeat a course, both the old and new grades are included in the overall GPA. Courses repeated under the Grade Replacement Policy are excluded from the overall GPA computation. However, this repeated course does count as an attempt. Students must also meet the Belk College of Business residency requirements as described at the beginning of this section.

Bachelor of Science in Business Administration: Finance with Concentration in Real Estate

The B.S.B.A. in Finance with Concentration in Real Estate provides students with fundamental knowledge and skills to analyze and negotiate commercial real estate. The curriculum incorporates concepts such as architecture, economics, finance, and geography to highlight the collaborative nature of the real estate industry. Students will find careers in property management, asset management, urban planning, and land development, as well as related areas such as finance, and investments. The Belk College of Business faculty members incorporate theory and real world application to allow students to address trends and issues within the industry.

Admission Requirements (Pre-Business)

Freshmen

Freshmen admission is competitive. Students who apply for this major and are accepted into the Belk College of Business are classified as Pre-Business (PBUS) majors. Students interested in pursuing a major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management should seek admission to the Pre-Business program to ensure appropriate advising and support. Students who complete the

Progression Course Requirements listed below may declare an upper-division major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, Operations and Supply Chain Management.

- See University Admission Requirements
- *Minimum GPA:* 2.7 overall
- *Pre-Major/Prerequisite/Progression Courses:*
 - ACCT 2121
 - ACCT 2122 or ACCT 3323
 - BUSN 1101
 - ECON 2101
 - ECON 2102
 - INFO 2130
 - MATH 1120, MATH 1121, MATH 1241, or MATH 1242
 - STAT 1220, STAT 1221, STAT 1222, or STAT 2122

[A minimum grade of C is required for all Progression Courses. Once enrolled at UNC Charlotte, students may attempt each of the Progression Courses listed above a maximum of two times. An attempt is defined as a course that is completed with a final grade of A, B, C, D, or F. Courses repeated under the UNC Charlotte Grade Replacement Policy are excluded from the GPA computation, but will count as an attempt.]

Transfers

Transfer students interested in pursuing a Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management should seek admission to the Pre-Business program. Transfer admission requirements for the Pre-Business major include the following:

- See University Admission Requirements
- *Minimum GPA:* 2.7 overall
- *Pre-Major/Prerequisite/Progression Courses:* See Progression Courses above. Minimum grade of C in Progression Courses completed.

Currently Enrolled Students

Declaration of Major and/or Progression Course Requirements:

- Junior standing (60 credit hours or more)
- Pre-Business Requirements listed above
- Approved Change of Major form
- Pre-Business students should submit Change of Major forms to an Academic and Career Coach in the Belk College of Business Niblock Student Center.
- Students who fail to declare their upper-division major on time will be prohibited from declaring their upper-division major in the College if their GPA falls below a 2.7.

Early Entry: Master of Science in Mathematical Finance

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA and 3.2 GPA in the major
- Acceptable scores on the appropriate graduate standardized test (e.g., GRE)
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Accelerated Master's Program

(for High School Seniors and UNC Charlotte Undergraduate Freshmen)

Academically talented high school seniors and UNC Charlotte undergraduate freshmen are encouraged to apply to an Accelerated Master's Program to begin work toward both undergraduate and graduate degrees in their Freshman year.

Admission Requirements

- See University Admission Requirements
- Minimum high school GPA of 3.75 (on a 4.0 scale)
- Minimum score of 1220 on SAT

Progression Requirements

Students must maintain a strong academic record at both the undergraduate and graduate levels with a cumulative undergraduate GPA of 3.2 or higher and a cumulative graduate GPA of 3.0 or higher. Students accepted into the Accelerated master's program are subject to the same policies that pertain to other matriculated graduate students.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on the Accelerated Master's Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/accelerated-masters.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Department of Management

belkcollege.charlotte.edu/departments/management

Undergraduate Programs

- **B.S.B.A. in Management**
 - Human Resources Management
 - Organizational Management
- **B.S.B.A. in International Business**
- **Minor in International Management**
- **Undergraduate Certificate in Entrepreneurship**

A program of study in the Department of Management leads to a Bachelor of Science in Business Administration (B.S.B.A.) degree with a Major in Management, a B.S.B.A. degree with a Major in International Business, or a Minor in International Management.

The Major in Management is designed to teach students to plan, organize, lead, and control business activities in both the public and private sectors. Students develop skills in decision making, leadership, motivation, problem solving, and teamwork.

Students pursuing the Management major must select one of two concentrations: Human Resource Management or Organizational Management. The former concentration is designed for students interested in "the management of human resources or talent," and the latter concentration is designed for students interested in "general or strategic management."

Courses in this major include the following topics: management and organizational behavior, managerial ethics, decision-making techniques, managing human resources and developing communication skills that make for effective leadership. The objectives of the major are to provide each student with conceptual tools and develop managerial skills that support leadership in a variety of organizations.

Global citizenship is a core value of the Belk College of Business. Because business success requires a global perspective, the Department of Management also offers the B.S.B.A. degree with a Major in International Business and a Minor in International Management.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Science in Business Administration: Management with Concentration in Human Resource Management

Admission Requirements (Pre-Business)

Freshmen

Freshman admission is competitive. Students who apply for this major and are accepted into the Belk College of Business are initially classified as Pre-Business (PBUS) majors. Students interested in pursuing a Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management should seek admission to the Pre-Business program to ensure appropriate advising and support. Students who complete the Progression Course Requirements listed below may declare an upper-division Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management.

Bachelor of Science in Business Administration: International Business

The primary objective of the International Business major is to provide an understanding of the importance of a global perspective on the part of business managers. The major provides an integrated framework for the study of the market environment in which international business firms operate and the impact of those environments upon managerial decision making. Possible careers may result in a variety of business and government sectors—either domestically or abroad.

Admission Requirements (Pre-Business)

[A minimum grade of C is required for all Progression Courses. Once enrolled at UNC Charlotte, students may attempt each of the Progression Courses listed above a maximum of two times. An attempt is defined as a course that is completed with a final grade of A, B, C, D, or F. Courses repeated under the UNC Charlotte Grade Replacement Policy are excluded from the GPA computation, but will count as an attempt.]

Transfers

Transfer students interested in pursuing a Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management should seek admission to the Pre-Business program. Transfer admission requirements for the Pre-Business major include the following:

- See University Admission Requirements
- *Minimum GPA:* 2.7 overall
- *Pre-Major/Prerequisite/Progression Courses:* See Progression Courses above. Minimum grade of C in Progression Courses completed.

Currently Enrolled Students

Declaration of Major and/or Progression Course Requirements:

- Junior standing (60 credit hours or more)
- Pre-Business Requirements listed above
- Approved Change of Major form
- Pre-Business students should submit Change of Major forms to an Academic and Career Coach in the Belk College of Business Niblock Student Center.
- Students who fail to declare their upper-division major on time will be prohibited from declaring their upper-division major in the College if their GPA falls below a 2.7.

Degree Requirements

The following courses are required. **Students may attempt each of these courses two times.** International Business majors are also required to study abroad.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Courses (0-12 credit hours)

Students must attain competency in a second language. This can be fulfilled two ways:

- 1) Complete at least four semesters of coursework in a foreign language (1201 - 2202).
- 2) Demonstrate proficiency in a foreign language at the 2202-level through a test administered by the Department of Languages and Culture Studies. Students are strongly encouraged to enhance their language skills by earning either a Certificate in Business Language (CBL) or a minor in their language of study.

Business Core Courses (27 credit hours)

- BLAW 3150 - Business Law I (3)
COMM 3160 - Business Communications (3)
ECON 3125 - Managerial Economics (3)
FINN 3120 - Financial Management (3)
INFO 3130 - Management Information Systems (3)
MGMT 3140 - Management and Organizational Behavior (3)
MGMT 3280 - Strategic Management (3)
MKTG 3110 - Principles of Marketing (3)
OPER 3100 - Operations Management (3)

Major Courses (9 credit hours)

ECON 3171 - International Business Economics (3)
FINN 3223 - International Financial Management (3)
MGMT 3275 - International Business Management (3)

Restricted Elective Courses (3 credit hours)

Select three of the following*:

Recommended College of Business Elective Courses

ECON 4171 - Economics of International Trade (3)
ECON 4172 - Economics of International Finance (3)
IBUS 3000 - Topics in International Business (3)
IBUS 3400 - International Business Internship (3)
MKTG 3226 - Business-to-Business Marketing and Retailing (3)
MKTG 3231 - Global Marketing Management (3)

Other Approved Elective Courses

AFRS 3264 - Business Culture and Entrepreneurship in Africa (3)
AFRS 3265 - African Economic Development (3)
GEOG 3105 - Geography of the Global Economy (3)
INTL 3112 - Globalization and Culture (3)
INTL 3131 - Diplomacy in a Changing World (3)
INTL 3151 - International Political Economy (3)
INTL 3162 - Europe in the World (3)
LTAM 3129 - Cultural Dimension of Doing Business with Spanish-Speaking Countries (3)
LTAM 3154 - Political Economy of Latin America (3)
LTAM 3190 - Political Economy of the Caribbean (3)
LTAM 3310 - Spanish American Civilization and Culture (3)
POLS 3151 - International Political Economy (3)
POLS 3152 - International Organizations (3)
POLS 3153 - European Union (3)
POLS 3155 - Latin American Political Economy (3)
POLS 3165 - East Asia in World Affairs (3)

Additional Language Elective Courses

CHNS 3201 - Chinese Grammar and Conversation (3)
CHNS 3202 - Chinese Grammar and Conversation (3)
FREN 3201 - French Grammar and Conversation (3)
FREN 3202 - French Grammar and Composition (3)
FREN 3210 - Introduction to Business French (3)
FREN 4120 - Advanced Business French I (3)
FREN 4121 - Advanced Business French II (3)
GERM 3201 - Advanced German Language and Culture I (3)
GERM 3202 - Advanced German Language and Culture II (3)
GERM 4661 - Advanced Seminar in Business German I (3)
GERM 4671 - Advanced Seminar in Business German II (3)
ITLN 3201 - Italian Grammar and Conversation (3)
ITLN 3202 - Italian Grammar and Composition (3)
JAPN 3201 - Upper Intermediate Japanese I (3)
JAPN 3202 - Upper Intermediate Japanese II (3)
RUSS 3201 - Advanced Russian Grammar, Composition, and Conversation I (3)
RUSS 3202 - Advanced Russian Grammar, Composition, and Conversation II (3)
SPAN 3029 - Cultural Dimension of Doing Business with Spanish-Speaking Countries (3)
SPAN 3201 - Advanced Spanish Grammar and Composition I (3)
SPAN 3202 - Advanced Spanish Conversation and Composition (3)
SPAN 3220 - Spanish for Business and International Trade (3)
SPAN 4120 - Advanced Business Spanish I (3)

*Other courses may be approved by the student's Academic Advisor.

**The internship may be satisfied by working at least 150 hours at a company or other organization involved in international business. The work program and the company/association must be pre-approved. At least 80% of the student's work must be international in nature. While the internship experience is not required to be performed outside the U.S., it is strongly encouraged.

Study Abroad (3 credit hours minimum)

This requirement may be satisfied by participating in an approved Study Abroad program outside of the U.S. and Canada during the Fall, Spring, or Summer semester. Students must complete 6 credit hours abroad or 3 credit hours with a minimum duration of 3 weeks abroad.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Students who do not meet the Progression Course Requirements above are ineligible for continuation in the Belk College of Business.

To obtain this degree, students must meet the University requirements of a GPA of at least 2.0 overall and in the courses for the major. Students must earn a minimum grade of C in all required Progression, Core, and Major Courses. When students repeat a course, both the old and new grades are included in the overall GPA. Courses repeated under the Grade Replacement Policy are excluded from the overall GPA computation. However, this repeated course does count as an attempt. Students must also meet the Belk College of Business residency requirements as described at the beginning of this section.

Minor in International Management

The Minor in International Management is designed to provide students who have an interest in global business with an opportunity to enhance their knowledge of international management. Topic areas include the international business environment, including economic trends, politics, and cultural variations and norms; managerial issues, including all functions of a typical multinational enterprise such as organization, production, marketing, human resources, political risk assessment, and negotiation; and international finance. The Minor in International Management offers students a competitive advantage in career opportunities across a broad spectrum of business and government sectors both domestically and globally. The Minor in International Management is only open to students majoring in the Belk College of Business.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

To be accepted into the Minor in International Management and to progress into the upper-division of the College, students must present a minimum 2.7 cumulative GPA and must be of at least Junior standing. A

Minor in International Management requires 15 credit hours. Students may attempt each of the courses in the minor two times.

Required Courses (9 credit hours)

MGMT 3140 - Management and Organizational Behavior (3)
MGMT 3275 - International Business Management (3)
Study Abroad Experience (One course with a minimum of 3 credit hours)

Elective Courses (6 credit hours)

Select two of the following:

ECON 3171 - International Business Economics (3)
ECON 4171 - Economics of International Trade (3)
ECON 4172 - Economics of International Finance (3)
FINN 3223 - International Financial Management (3)
MKTG 3231 - Global Marketing Management (3)

Total = 15 Credit Hours

Progression Requirements

To obtain this minor, students must meet the University requirements of a GPA of at least 2.0 overall and in the courses for the minor. Students must earn a minimum grade of C in all required and elective minor courses and their prerequisite courses. When students repeat a course, both the old and new grades are included in the overall GPA. Courses repeated under the Grade Replacement Policy are excluded from the overall GPA computation. However, this repeated course does count as an attempt. Students must also meet the Belk College of Business residency requirements as described at the beginning of this section.

Special Policies or Requirements

International Management minors are required to study abroad. This requirement may be satisfied by participating in an approved Study Abroad Experience (one course with a minimum of 3 credit hours).

Undergraduate Certificate in Entrepreneurship

The Undergraduate Certificate in Entrepreneurship provides students with an understanding of how to think and act entrepreneurially in efficient and effective ways. The certificate aims to satisfy the increasing societal demand for skill sets related to entrepreneurship, such as being able to recognize and evaluate opportunities or knowing how to create and communicate a vision. Across economic sectors, entrepreneurship serves as the path through which innovations and improvements to the overall quality of life within society come to fruition. In doing so, entrepreneurship and innovation drive economic development.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

The Undergraduate Certificate in Entrepreneurship is open to all UNC Charlotte undergraduate students. However, the capacity of the program is restricted to 60 students entering the program per year. To be accepted into the Undergraduate Certificate in Entrepreneurship program, students must present a minimum 2.7 cumulative GPA and be on track to obtain Junior standing by the time of enrollment in the Undergraduate Certificate in Entrepreneurship. In addition, interested students must submit an online application, including a statement of purpose.

Certificate Requirements

Core Courses (6 credit hours)

Select two of the following:

ENTR 3276 - Recognizing Entrepreneurial Opportunities (3)
ENTR 3278 - Experiential Entrepreneurship (3)
ENTR 3279 - Entrepreneurial Action and Organizing (3)

Elective Courses (6 credit hours)

Select two of the following:

ENTR 3000 - Special Topics – Entrepreneurship (3)
MGMT 3277 - Entrepreneurship (3)
MGMT 4300 - Entrepreneurial Decisions (3)

Certificate Total = 12 Credit Hours

Progression Requirements

Students must meet the University requirements of a GPA of at least 2.0 overall and in the courses for the certificate. Students must earn a minimum grade of C in all required and elective certificate courses. When students repeat a course, both the old and new grades are included in the overall GPA. Courses repeated under the Grade Replacement Policy are excluded from the overall GPA computation. However, this repeated course does count as an attempt. Students may attempt each of the courses in the certificate two times.

Department of Marketing

belkcollege.charlotte.edu/departments/marketing

Undergraduate Programs

- **B.S.B.A. in Marketing**
 - Marketing
 - Digital/AI Marketing

The undergraduate program of study in the Department of Marketing leads to a Bachelor of Science in Business Administration (B.S.B.A.) degree with a Major in Marketing. This major offers a curriculum suitable for students who are: (1) preparing for positions in both profit and nonprofit organizations where enhanced communication abilities and specialized analysis skills in marketing are required, (2) planning to operate their own businesses and want to know how to utilize marketing, and (3) pursuing a strong marketing background at the undergraduate level prior to undertaking graduate studies.

The study of marketing provides students with an opportunity to prepare for various careers including marketing management, product and brand management, sales, advertising and promotions management, digital and social media marketing, retailing, business-to-business marketing, and global marketing. The Department of Marketing offers two different concentrations for marketing majors:

- **Marketing Concentration** - designed for students with an interest in marketing management and strategy
- **Digital/AI Marketing Concentration** - designed for students with an interest in big data-related quantitative marketing and understanding the influence of AI.

The Department of Marketing faculty also participate in various graduate programs (including the MBA, DSBA, and DBA programs) and executive education programs.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Science in Business Administration: Marketing with Concentration in Marketing

This concentration is designed for students with an interest in "strategic and behavioral" marketing.

Admission Requirements (Pre-Business)

Freshmen

Freshman admission is competitive. Students who apply for this major and are accepted into the Belk College of Business are initially classified as Pre-Business (PBUS) majors. Students interested in pursuing a Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management should seek admission to the Pre-Business program to ensure appropriate advising and support. Students who complete the Progression Course Requirements listed below may declare an upper-division Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management.

- See University Admission Requirements
- *Minimum GPA:* 2.7 overall
- *Pre-Major/Prerequisite/Progression Courses:*
 - ACCT 2121
 - ACCT 2122 or ACCT 3323
 - BUSN 1101
 - ECON 2101
 - ECON 2102
 - INFO 2130
 - MATH 1120, MATH 1121, MATH 1241, or MATH 1242
 - STAT 1220, STAT 1221, STAT 1222, or STAT 2122

[A minimum grade of C is required for all Progression Courses. Once enrolled at UNC Charlotte, students may attempt each of the Progression Courses listed above a maximum of two times. An attempt is defined as a course that is completed with a final grade of A, B, C, D, or F. Courses repeated under the UNC Charlotte Grade Replacement Policy are excluded from the GPA computation, but will count as an attempt.]

Transfers

Transfer students interested in pursuing a Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management should seek admission to the Pre-Business program. Transfer admission requirements for the Pre-Business major include the following:

- See University Admission Requirements
- *Minimum GPA:* 2.7 overall
- *Pre-Major/Prerequisite/Progression Courses:* See Progression Courses above. Minimum grade of C in Progression Courses completed.

Currently Enrolled Students

Declaration of Major and/or Progression Course Requirements:

- Junior standing (60 credit hours or more)
- Pre-Business Requirements listed above

- Approved Change of Major form
- Pre-Business students should submit Change of Major forms to an Academic and Career Coach in the Belk College of Business Niblock Student Center.
- Students who fail to declare their upper-division major on time will be prohibited from declaring their upper-division major in the College if their GPA falls below a 2.7.

Degree Requirements

The following courses are required. Students may attempt each of these courses a maximum of two times.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Business Core Courses (27 credit hours)

- BLAW 3150 - Business Law I
 COMM 3160 - Business Communications (3)
 ECON 3125 - Managerial Economics (3)
 FINN 3120 - Financial Management (3)
 INFO 3130 - Management Information Systems (3)
 MGMT 3140 - Management and Organizational Behavior (3)
 MGMT 3280 - Strategic Management (3)
 MKTG 3110 - Principles of Marketing (3)
 OPER 3100 - Operations Management (3)

Concentration Courses (18 credit hours)

Concentration Required Course (3 credit hours)

- MKTG 3250 - Marketing Strategy Consultancy (3)

Concentration Elective Courses (15 credit hours)

Select at least three of the following:

- MKTG 3210 - Consumer Behavior (3)
 MKTG 3222 - Marketing Research (3)
 MKTG 3224 - Product and Brand Management (3)
 MKTG 3226 - Business-to-Business Marketing and Retailing (3)
 MKTG 3228 - Marketing Analytics (3)

Additional Marketing Concentration Electives

Depending on the number of courses taken in the previous option, select enough courses to reach a total of 15 credit hours (five elective courses).

- MKTG 3000 - Topics in Marketing (3)
 MKTG 3219 - AI in Marketing (3)
 MKTG 3220 - Digital Marketing and Web Analytics (3)
 MKTG 3225 - Integrated Marketing Communications (3)
 MKTG 3230 - Social Media/Mobile Marketing and Analytics (3)
 MKTG 3231 - Global Marketing Management (3)
 MKTG 3400 - Marketing Internship (3)
 MKTG 3800 - Directed Study (1 to 3)

Additional Supporting Courses

Depending on which courses were taken in the previous option above, select from the following to reach a total of six courses in the major:

- MKTG 3000 - Topics in Marketing (3)
 MKTG 3220 - Digital Marketing and Web Analytics (3)

- MKTG 3225 - Integrated Marketing Communications (3)
 MKTG 3230 - Social Media/Mobile Marketing and Analytics (3)
 MKTG 3231 - Global Marketing Management (3)
 MKTG 3400 - Marketing Internship (3)
 MKTG 3800 - Directed Study (1 to 3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Students who do not meet the Progression Course Requirements above are ineligible for continuation in the Belk College of Business.

To obtain this degree, students must meet the University requirements of a GPA of at least 2.0 overall and in the courses for the major. Students must earn a minimum grade of C in all required Progression, Core, and Major Courses. When students repeat a course, both the old and new grades are included in the overall GPA. Courses repeated under the Grade Replacement Policy are excluded from the overall GPA computation. However, this repeated course does count as an attempt. Students must also meet the Belk College of Business residency requirements as described at the beginning of this section.

Internship

Because the Department of Marketing is committed to experiential learning, it provides for Marketing majors to use one approved internship for academic credit. An application must be submitted and approved prior to starting the internship. The student may not have a current or prior work history with the internship company.

Bachelor of Science in Business Administration: Marketing with Concentration in Digital/AI Marketing

This concentration is designed for students with an interest in “quantitative” marketing and understanding the influence of AI..

Admission Requirements (Pre-Business)

Freshmen

Freshman admission is competitive. Students who apply for this major and are accepted into the Belk College of Business are initially classified as Pre-Business (PBUS) majors. Students interested in pursuing a Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management should seek admission to the Pre-Business program to ensure appropriate advising and support. Students who complete the Progression Course Requirements listed below may declare an upper-division Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management.

- See University Admission Requirements
- Minimum GPA: 2.7 overall
- Pre-Major/Prerequisite/Progression Courses:
 - ACCT 2121
 - ACCT 2122 or ACCT 3323

- BUSN 1101
- ECON 2101
- ECON 2102
- INFO 2130
- MATH 1120, MATH 1121, MATH 1241, or MATH 1242
- STAT 1220, STAT 1221, STAT 1222, or STAT 2122

[A minimum grade of C is required for all Progression Courses. Once enrolled at UNC Charlotte, students may attempt each of the Progression Courses listed above a maximum of two times. An attempt is defined as a course that is completed with a final grade of A, B, C, D, or F. Courses repeated under the UNC Charlotte Grade Replacement Policy are excluded from the GPA computation, but will count as an attempt.]

Transfers

Transfer students interested in pursuing a Major in Business Analytics, Finance, International Business, Management, Management Information Systems, Marketing, or Operations and Supply Chain Management should seek admission to the Pre-Business program. Transfer admission requirements for the Pre-Business major include the following:

- See University Admission Requirements
- *Minimum GPA:* 2.7 overall
- *Pre-Major/Prerequisite/Progression Courses:* See Progression Courses above. Minimum grade of C in Progression Courses completed.

Currently Enrolled Students

Declaration of Major and/or Progression Course Requirements:

- Junior standing (60 credit hours or more)
- Pre-Business Requirements listed above
- Approved Change of Major form
- Pre-Business students should submit Change of Major forms to an Academic and Career Coach in the Belk College of Business Niblock Student Center.
- Students who fail to declare their upper-division major on time will be prohibited from declaring their upper-division major in the College if their GPA falls below a 2.7.

Degree Requirements

The following courses are required. Students may attempt each of these courses a maximum of two times.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Business Core Courses (27 credit hours)

- BLAW 3150 - Business Law I (3)
- COMM 3160 - Business Communications (3)
- ECON 3125 - Managerial Economics (3)
- FINN 3120 - Financial Management (3)
- INFO 3130 - Management Information Systems (3)

Students must also meet the Belk College of Business residency requirements as described at the beginning of this section.

Internship

Because the Department of Marketing is committed to experiential learning, it provides for Marketing majors to use one approved internship for academic credit. An application must be submitted and approved prior to starting the internship. The student may not have a current or prior work history with the internship company.

College of **Computing and Informatics**

College of **Computing and Informatics**

cci.charlotte.edu

The University of North Carolina at Charlotte's College of Computing and Informatics (CCI) is part of a dynamic and exciting educational and research institution that combines the knowledge and expertise of multidisciplinary faculty, industry professionals, and students. The CCI was formed in 2000 as the College of Information Technology, with the mission of educating information technology specialists, conducting leading-edge research, and partnering with area businesses of great importance to the Charlotte community and the University. It was renamed the College of Computing and Informatics in 2006 in an effort to reflect the College's commitment to maintain relevance with the ever-changing world of computing that impacts all of our lives on a daily basis.

The College of Computing and Informatics consists of three departments:

- Department of Bioinformatics and Genomics
- Department of Computer Science
- Department of Software and Information Systems

Plus one interdisciplinary school:

- School of Data Science

CCI's mission is to empower people to shape the future through computing education, research, and engagement.

Degree Programs

With educational programs rooted in a strong foundation of research, the CCI combines the talents of on- and off-campus partners in achieving its mission. Academic programs include Bachelor's, Master's, and Ph.D. degree programs in computer science, information technology, data science, and bioinformatics and computational biology. Committed to the concept of life-long learning, the College also offers undergraduate and graduate certificate programs.

The College offers a single entry to the Bachelor of Arts in Computer Science and the Bachelor of Science in Computer Science, with the curriculum for specific concentrations housed in the Departments of Computer Science, Software and Information Systems, and Bioinformatics and Genomics. The College also offers Bachelor of Science programs in Data Science and Sports Analytics, housed in the School of Data Science.

A key component of all CCI academic programs is the team interaction between students, faculty, and community partners. Through their involvement in real-world projects, students apply what they learn, thus, giving them practical experience as they help businesses solve computing and informatics challenges.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Majors

Within the College of Computing and Informatics, students can pursue a Bachelor of Science (B.S.) or Bachelor of Arts (B.A.) in Computer Science by completing core courses at the college level and the requirements of specific concentrations offered by the Departments of Computer Science, Software and Information Systems, and Bioinformatics and Genomics. These programs are designed for students interested in pursuing a career in computing, providing a strong foundation in computing and allowing for specialized study in various areas.

Students can also pursue Bachelor of Science (B.S.) degrees in Data Science or Sports Analytics, offered by the School of Data Science. These programs aim to equip students with interdisciplinary data-driven decision-making and analytics.

1. B.S. in Computer Science

The B.S. in Computer Science offers a broad core of computing subjects and allows in-depth study in one of these concentrations:

- AI, Robotics, and Gaming (Department of Computer Science)
- Bioinformatics (Department of Bioinformatics and Genomics)
- Cybersecurity (Department of Software and Information Systems)
- Data Science (Department of Computer Science)
- Web/Mobile Development and Software Engineering (Department of Software and Information Systems)
- Systems and Networks (Department of Computer Science)

2. B.A. in Computer Science

The B.A. in Computer Science offers a foundation in computing and allows in-depth study in one of the following concentrations:

- Bioinformatics (Department of Bioinformatics and Genomics)
- Human-Computer Interaction (Department of Software and Information Systems)
- Information Technology (Department of Software and Information Systems)

3. **B.S. in Data Science (School of Data Science)**
4. **B.S. in Sports Analytics (School of Data Science)**

Minors

- Artificial Intelligence
- Bioinformatics and Genomics
- Data Science
- Human-Centered Design
- Interactive Programming
- Software Development
- Software Systems

Undergraduate Certificates

- Game Design and Development (Computer Science)
- Sports Analytics (School of Data Science)

Honors Program

The Computing and Informatics Honors Program (CCI Honors) is designed to provide academic challenges and research opportunities to high-achieving students to better prepare them for post-graduate success. CCI Honors students must complete honors section(s) of specified course(s), an honors research course, and an honors thesis. Upon the successful completion of the honors program in CCI, students receive Honors commendations on their transcript and in the commencement program.

Admission Requirements

The CCI honors program will offer the following three entry points.

Entry Point 1: This is for students who are admitted to the honors program before having earned credits for ITSC 1213 (Introduction to Computer Science II). This would be first-time-in-college or transfer students entering a CCI major either with or without credit for the first programming course, ITSC 1212 (Introduction to Computer Science I).

Entry Point 2: This is for students who are admitted to the honors program after having earned credits for ITSC 1213 (Introduction to Computer Science II). This would be either students entering a CCI major having already completed ITSC 1213 or students who are already in a CCI major but are admitted to the honors program after completing ITSC 1213.

Entry Point 3: This is for students who are admitted to the honors program after having earned credits for ITSC 2214 (Data Structures and Algorithms). This would be either students entering a CCI major having already completed that course or students who are already in a CCI major but are admitted to the honors program after completing the data structures course.

First-time-in-college students must meet the following requirements:

- See [University Admission Requirements](#)
- Minimum Unweighted High School GPA of 3.5 or higher

Transfer students must meet the following requirements:

- See [University Admission Requirements](#)
- Combined transfer GPA of 3.5 or higher

Current UNC Charlotte undergraduate students) must meet the following requirements:

- See [University Admission Requirements](#)
- Minimum overall GPA of 3.5 or higher

Course Requirements

All CCI Honors students must complete:

- Honors section of ITSC 3688 Computers and their Impact on Society (3 credit hours)
- ITSC 3790 Honors Research (3 credit hours)
- ITSC 4750 Honors Thesis (3 credit hours)

Students admitted via Entry Point 2 must additionally complete:

- Honors section of ITSC 2214 Data Structures and Algorithms (4 credit hours)

Students admitted via Entry Point 1 must additionally complete:

- Honors section of ITSC 1213 Introduction to Computer Science II (4 credit hours)
- Honors section of ITSC 2214 Data Structures and Algorithms (4 credit hours)
- ITSC 4750 - Honors Thesis (3)

Progression Requirements

To graduate with Honors in Computing and Informatics, students must meet the following requirements.

- All students must:
 - Complete an honors section of Computers and their Impact on Society (ITSC 3688) with a grade of B or better.
 - Complete 3 credit hours of Honors Research (ITSC 3790) with a grade of A.
 - Complete 3 credit hours of Honors Thesis (ITSC 4750) with a grade of A.
 - Complete the Application to Candidacy process for graduating with honors, as directed by the Honors College, beginning in the semester prior to registering for ITSC 4750.
- Students admitted via Entry Point 2 must additionally complete an honors section of Data Structures and Algorithms (ITSC 2214) with a grade of B or better.
- Students admitted via Entry Point 1 must additionally complete an honors section of Introduction to Computer Science II (ITSC 1213) with a grade of B or better.

Upon completing the requirements of the honors program, receiving the recommendation of the College of Computing and Informatics Honors Committee and upon certification by the Honors College, the CCI Honors candidate shall graduate with Honors in Computing and Informatics.

Department of Bioinformatics and Genomics

cci.charlotte.edu/departments/department-of-bioinformatics-and-genomics/

Undergraduate Programs

- **B.A. in Computer Science**
 - Bioinformatics
- **B.S. in Computer Science**
 - Bioinformatics
- **Minor in Bioinformatics and Genomics**
- **Early Entry: M.S. in Bioinformatics**
- **Early Entry: Graduate Certificate in Bioinformatics Technology**

Bioinformatics lies at the intersection of Computing and Biology. We are in the midst of a genomic revolution that is generating massive amounts of vital data. As Biology becomes more data-driven and quantitative, there is an increasing need for cross-training in computing and the biological sciences. The educational goal of the Department of Bioinformatics and Genomics is to train professionals who can use quantitative and computer skills to help solve critical problems in Biology and Biomedicine.

The department offers degrees at the bachelors, masters, and doctoral levels, as well as a graduate certificate. Undergraduate students can take a Minor in Bioinformatics or a Concentration in Bioinformatics within the B.A. or B.S. degrees in Computer Science. These degrees are designed to educate students in the collection, analysis, and interpretation of biological data, including the massive datasets being collected worldwide.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Arts in Computer Science with Concentration in Bioinformatics

The Concentration in Bioinformatics presents up-to-date methods for data handling and interpretation while developing an understanding of critical issues in bioinformatics research design, statistical data analysis, and the application of genomics domain knowledge.

The B.A. in Computer Science with Concentration in Bioinformatics requires a compact set of a computer science core (15 credit hours). The Bioinformatics concentration requires 14 credit hours of related work with courses in the fields of biology and chemistry, while other B.A. in Computer Science concentrations require 15 credit hours of elective courses outside the computer science discipline, satisfied by a second major, or a minor. Graduates of the B.A. program are expected to have

knowledge and skill in computer science, plus elective coursework outside the discipline. The emphasis in this program is less theoretical/mathematical, and more on the applied side of computing.

Admission Requirements

Freshmen

- See University Admission Requirements
- *Minimum GPA:* 2.5
- Admission is competitive for computer science programs and, if admissible, freshmen must present a minimum SAT-Math score of 530 or ACT-Math subscore of 22.

Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.5
- *Pre-Major/Prerequisite Courses:* A grade of C or above is required in any previously attempted Computer Science course(s). Students must be able to transfer credits for the equivalent of College Algebra.
- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Minimum GPA:* 2.5
- Must have earned 12 or more hours at UNC Charlotte
- Must have earned a grade of C or higher in MATH 1241, or MATH 1120 (Note: Students coming in with MATH 1120 will still be required to take MATH 1241 for the Bachelor of Science program)
- Must have earned a grade of C or higher in ITSC 1212, or ITSC 1110, or DTSC 1302
- Participation in a Change of Major Workshop offered by the CCI Advising Center is required before becoming eligible to declare the Computer Science major. Details are on the CCI Advising website.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. Students majoring in Computer Science should plan on taking the following courses that meet both general education and major requirements:

MATH 1120 - Calculus (3) (*fulfills Quantitative/Data requirement*)

STAT 1222 - Introduction to Statistics (3) (*fulfills Quantitative/Data requirement*)

Major Courses (39 credit hours)

Core Courses (19 credit hours)

ITSC 1212 - Introduction to Computer Science I (4)

ITSC 1213 - Introduction to Computer Science II (4)

ITSC 1600 - Computing Professionals (2)

or ITSC 2600 - Computer Science Program, Identity, Career (2)

ITSC 2175 - Logic and Algorithms (3)

or MATH 1165 - Introduction to Discrete Structures (3)

ITSC 2214 - Data Structures and Algorithms (4)

ITSC 3688 - Computers and Their Impact on Society (3)

Advanced Statistics Course (3 credit hours)

BINF 3121 - Statistics for Bioinformatics (3)

Related Courses (14 credit hours)

Biol 2120 - General Biology I (3)
 Biol 2130 - General Biology II (3)
 Chem 1251 - General Chemistry I (3)
 Chem 1251L - General Chemistry I Laboratory (1)
 Chem 1252 - General Chemistry II (3)
 Chem 1252L - General Chemistry II Laboratory (1)

Capstone Course (3 credit hours)

Select one of the following:

BINF 4650 - Senior Project (1 to 3)
 BINF 4900 - Principles of Team Science (3)
 ITCS 4232 - Game Design and Development Studio (3)
 ITIS 4390 - Interaction Design Projects (3)
 ITIS 4246 - Competitive Cyber Defense (3)
 ITSC 4681 - Senior Design I (3)
 ITSC 4682 - Senior Design II (3)
 ITSC 4750 - Honors Thesis (3)
 ITSC 4850 - Senior Project I (3)
 ITSC 4851 - Senior Project II (3)
 ITSC 4990 - Undergraduate Research (3)
 ITSC 4991 - Undergraduate Thesis (3)

Concentration Courses (27-29 credit hours)

Required Concentration Courses (18 credit hours)

BINF 1101 - Introduction to Bioinformatics and Genomics (4) (*fulfills the Natural Science General Education requirement*)
 BINF 2111 - Introduction to Bioinformatics Computing (4)
 BINF 3101 - Sequence Analysis (3)
 BINF 4600 - Bioinformatics and Genomics Seminar (1)
 BIOL 3111 - Cell Biology (3)
 BIOL 3166 - Genetics (3)

Concentration Elective Courses (9-11 credit hours)

Subarea 1: Database/Analytics (3-4 credit hours)

Select one of the following:

BINF 4211 - Applied Data Mining for Bioinformatics (4)

Subarea 2: Professional Development (3 credit hours)

Select one of the following:

BINF 4171 - Business of Biotechnology (3)
 BINF 4191 - Life Sciences and the Law (3)

Subarea 3: Upper-Division Elective (3-4 credit hours)

Select one of the following:

BINF 3131 - Bioinformatics Algorithms (4)
 BINF 3201 - Genomic Methods (4)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

- The GPA requirement for all Computer Science undergraduate degree programs is 2.0 or above in all courses applied to the degree

and all courses in the major.

- Students have a limit of 3 attempts per course in the major. This applies to all courses listed under the Major Courses and Concentration Courses categories of B.S. and B.A. in Computer Science degree programs. The third attempt at a course can only be approved by petition. In addition, a Withdrawal does not count as an attempt, as that effort is already restricted via the Withdrawal limit.
- Students are required to achieve a grade of C or above in all Core Courses within the major, as listed above.

Bachelor of Science in Computer Science with Concentration in Bioinformatics

This concentration is designed to best prepare students to match the diverse requirements of employers. It also prepares students to pursue graduate studies in computing and other related areas.

The B.S. in Computer Science program requires a common set of computer science courses, a set of courses within the concentration, as well as a set of elective courses outside the non-computer science discipline, satisfied by a second major, or a minor. Graduates from the B.S. program are expected to have knowledge and skill in computer science plus elective coursework outside the discipline.

Admission Requirements

Freshmen

- See University Admission Requirements
- Minimum GPA:* 2.5
- Admission is competitive for computer science programs and, if admissible, freshmen must present a minimum SAT-Math score of 530 or ACT-Math subscore of 22.

Transfers

- See University Admission Requirements
- Minimum GPA:* 2.5
- Pre-Major/Prerequisite Courses:* A grade of C or above is required in any previously attempted Computer Science course(s). Students must be able to transfer credits for the equivalent of College Algebra.
- Transferable Credit Hours:* 24

Currently Enrolled Students

- Minimum GPA:* 2.5
- Must have earned 12 or more hours at UNC Charlotte
- Must have earned a grade of C or higher in MATH 1241, or MATH 1120 (Note: Students coming in with MATH 1120 will still be required to take MATH 1241 for the Bachelor of Science program)
- Must have earned a grade of C or higher in ITSC 1212, or ITSC 1110, or DTSC 1302
- Participation in a Change of Major Workshop offered by the CCI Advising Center is required before becoming eligible to declare the Computer Science major. Details are on the CCI Advising website.

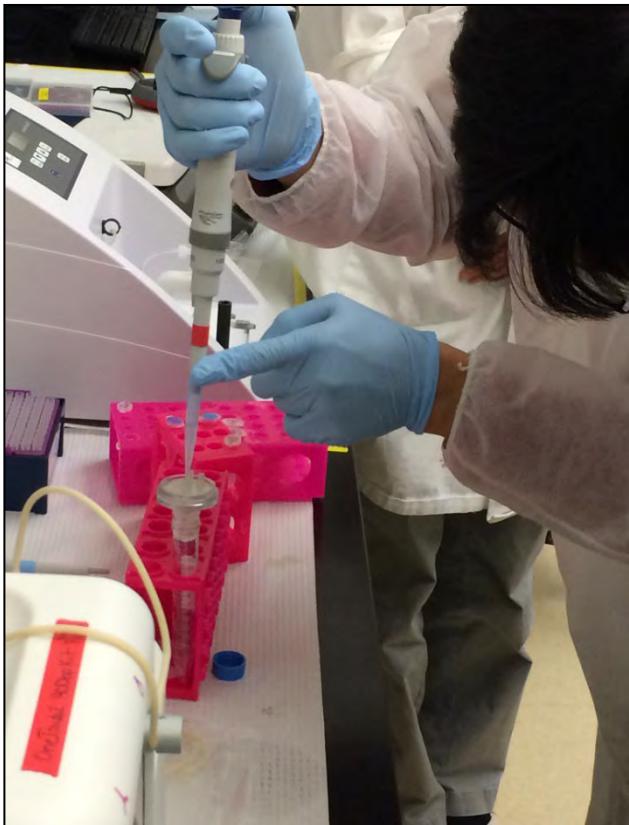

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major

with departmental approval. Please see your advisor for information. Students majoring in Computer Science should plan on taking the following courses that meet both general education and major requirements:

MATH 1241 - Calculus I (3) (*fulfills Quantitative/Data requirement*)
MATH 1242 - Calculus II (3) (*fulfills Quantitative/Data requirement*)

Major Courses (53 credit hours)

Core Courses (29 credit hours)

- ITSC 1212 - Introduction to Computer Science I (4)
ITSC 1213 - Introduction to Computer Science II (4)
ITSC 1600 - Computing Professionals (2)
or ITSC 2600 - Computer Science Program, Identity, Career (2)
ITSC 2175 - Logic and Algorithms (3)
or MATH 1165 - Introduction to Discrete Structures (3)
ITSC 2181 - Introduction to Computer Systems (4)
ITSC 2214 - Data Structures and Algorithms (4)
ITSC 3146 - Introduction to Operating Systems and Networking (3)
ITSC 3155 - Software Engineering (3)
ITSC 3688 - Computers and Their Impact on Society (3)

Mathematics and Statistics Courses (6 credit hours)

- MATH 2164 - Matrices and Linear Algebra (3)
STAT 2122 - Introduction to Probability and Statistics (3)

Elective Courses in Other Disciplines (15 credit hours)

Select 15 elective credit hours. Courses that count towards this requirement must have a discipline prefix other than ITSC, ITCS, or ITIS. This requirement can be fulfilled by pursuing a/an:

- Minor

- Second major
- Honors program
- Undergraduate certificate
- Set of courses selected by the student that do not satisfy any other degree requirement

Concentration Courses (21-22 credit hours)

Required Concentration Courses (12 credit hours)

- BINF 1101 - Introduction to Bioinformatics and Genomics (4) (fulfills the Natural Science General Education requirement)
BINF 2111 - Introduction to Bioinformatics Computing (4)
BINF 3101 - Sequence Analysis (3)
BINF 4600 - Bioinformatics and Genomics Seminar (1)

Concentration Elective Courses (9-11 credit hours)

Subarea 1: Database/Analytics (3-4 credit hours)

Select one of the following:

- BINF 3121 - Statistics for Bioinformatics (3)
BINF 4211 - Applied Data Mining for Bioinformatics (4)

Subarea 2: Professional Development (3 credit hours)

Select one of the following:

- BINF 4171 - Business of Biotechnology (3)
BINF 4191 - Life Sciences and the Law (3)

Subarea 3: Upper-Division Elective (3-4 credit hours)

Select one of the following:

- BINF 3131 - Bioinformatics Algorithms (4)
BINF 3201 - Genomic Methods (4)

Capstone Course (3 credit hours)

Select one of the following:

- BINF 4650 - Senior Project (1 to 3)
BINF 4900 - Principles of Team Science (3)
ITCS 4232 - Game Design and Development Studio (3)
ITIS 4390 - Interaction Design Projects (3)
ITIS 4246 - Competitive Cyber Defense (3)
ITSC 4155 - Software Development Projects (3)
ITSC 4681 - Senior Design I (3)
ITSC 4682 - Senior Design II (3)
ITSC 4750 - Honors Thesis (3)
ITSC 4850 - Senior Project I (3)
ITSC 4851 - Senior Project II (3)
ITSC 4990 - Undergraduate Research (3)
ITSC 4991 - Undergraduate Thesis (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

- The GPA requirement for all Computer Science undergraduate degree programs is 2.0 or above in all courses applied to the degree and all courses in the major.
- Students have a limit of 3 attempts per course in the major. This applies to all courses listed under the Major Courses and Concentration Courses categories of B.S. and B.A. in Computer Science degree programs. The third attempt at a course can only be

- approved by petition. In addition, a Withdrawal does not count as an attempt, as that effort is already restricted via the Withdrawal limit.
- Students are required to achieve a grade of C or above in all Core Courses within the major, as listed above.

Minor in Bioinformatics and Genomics

Designed to introduce students to the collection, informatics analysis and interpretation of data derived from genomic and biological macromolecular investigations, the Minor in Bioinformatics and Genomics provides students with a foundation of understanding and the computing skill necessary to communicate in the increasingly data-centric life sciences. In addition to gaining first-hand experience with current technologies for high-throughput data generation, students will receive training in up-to-date methods for data handling and interpretation while developing an understanding of critical issues in bioinformatics research design, statistical data analysis, and the application of genomics domain knowledge.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Minimum GPA: 2.0
- Students enrolled in a Computer Science major with a concentration in Bioinformatics are not eligible to declare this minor.

Minor Requirements

BINF 1101 - Introduction to Bioinformatics and Genomics (4)

BINF 2111 - Introduction to Bioinformatics Computing (4)

BINF 3101 - Sequence Analysis (3)

BINF 3121 - Statistics for Bioinformatics (3)

or BINF 4211 - Applied Data Mining for Bioinformatics (4)

BINF 4600 - Bioinformatics and Genomics Seminar (1)

Total = 15 Credit Hours

Early Entry: Master of Science in Bioinformatics, or Graduate Certificate in Bioinformatics Technology

Exceptional undergraduate students at UNC Charlotte may be accepted into the M.S. in Bioinformatics or Graduate Certificate in Bioinformatics Technology, and begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Continued Enrollment Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA and a 3.0 Junior/Senior GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for these degree programs, see the program listings in the *Graduate Catalog*.

Department of Computer Science

cs.charlotte.edu

Undergraduate Programs

- **B.S. in Computer Science**
 - AI, Robotics, and Gaming
 - Data Science
 - Systems and Networks
- **Minor in Artificial Intelligence**
- **Minor in Data Science**
- **Minor in Software Systems**
- **Undergraduate Certificate in Game Design and Development**
- **Early Entry: M.S. in Computer Science**

Computer Science is the cornerstone of modern society. It revolutionizes how we learn, communicate, entertain, conduct business, perform research, and practice medicine. It provides computer scientists with nearly limitless opportunities to make satisfying and enriching contributions to society. While other disciplines produce graduates prepared for specific jobs, computer science offers a comprehensive foundation that permits graduates to explore and adapt to new technologies, ideas, and professions. The work of computer scientists falls into many categories. For example, computer scientists:

- **Design, implement, and operate software.** Computer scientists tackle challenging software design, implementation, and testing problems. They also lead and contribute to software projects and operate software systems.
- **Discover, innovate, and create.** Computer scientists produce innovative solutions to society's most difficult and critical challenges. They promote discovery. They are innovators who inspire creativity and overcome challenges big and small.
- **Integrate information and technology into society.** Computer scientists design new ways to integrate information and technology into all aspects of society including business workflows, the arts, research, engineering, healthcare, and education.
- **Manage and explore data.** Computer scientists develop and apply tools and methods to curate, explore, and synthesize data to uncover insights and inform decision-making.

The Department of Computer Science offers degrees at the baccalaureate, master's, and doctoral levels, as well as various certificates. The department offers B.S. and M.S. degrees in Computer Science with concentrations in: Data Science; Artificial Intelligence, Robotics, and Gaming; and Systems and Networks. The M.S. in Computer Science offers an additional concentration in Information Security and Privacy. The department also offers a Ph.D. in Computing and Information Systems. See the *UNC Charlotte Graduate Catalog* for information on the M.S. and Ph.D. degrees.) Students are prepared by internationally recognized faculty through a comprehensive program of coursework, research, and internship opportunities in state-of-the-art computing facilities.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Science in Computer Science *with Concentration in AI, Robotics, and Gaming*

This concentration is designed to best prepare students to match the diverse requirements of employers. It also prepares students to pursue graduate studies in computing and other related areas.

The B.S. in Computer Science program requires a common set of computer science courses, a set of courses within the concentration, as well as a set of elective courses outside the non-computer science discipline, satisfied by a second major, or a minor. Graduates from the B.S. program are expected to have knowledge and skill in computer science plus elective coursework outside the discipline.

Admission Requirements

Freshmen

- See University Admission Requirements
- *Minimum GPA:* 2.5
- Admission is competitive for computer science programs and, if admissible, freshmen must present a minimum SAT-Math score of 530 or ACT-Math subscore of 22.

Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.5
- *Pre-Major/Prerequisite Courses:* A grade of C or above is required in any previously attempted Computer Science course(s). Students must be able to transfer credits for the equivalent of College Algebra.
- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Minimum GPA:* 2.5
- Must have earned 12 or more hours at UNC Charlotte
- Must have earned a grade of C or higher in MATH 1241, or MATH 1120 (Note: Students coming in with MATH 1120 will still be required to take MATH 1241 for the Bachelor of Science program)
- Must have earned a grade of C or higher in ITSC 1212, or ITSC 1110, or DTSC 1302

- Participation in a Change of Major Workshop offered by the CCI Advising Center is required before becoming eligible to declare the Computer Science major. Details are on the CCI Advising website.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. Students majoring in Computer Science should plan on taking the following courses that meet both general education and major requirements:

MATH 1241 - Calculus I (3) (*fulfills Quantitative/Data requirement*)

MATH 1242 - Calculus II (3) (*fulfills Quantitative/Data requirement*)

Major Courses (53 credit hours)

Core Courses (29 credit hours)

ITSC 1212 - Introduction to Computer Science I (4)

ITSC 1213 - Introduction to Computer Science II (4)

ITSC 1600 - Computing Professionals (2)

or ITSC 2600 - Computer Science Program, Identity, Career (2)

ITSC 2175 - Logic and Algorithms (3)

or MATH 1165 - Introduction to Discrete Structures (3)

ITSC 2181 - Introduction to Computer Systems (4)

ITSC 2214 - Data Structures and Algorithms (4)

ITSC 3146 - Introduction to Operating Systems and Networking (3)

ITSC 3155 - Software Engineering (3)

ITSC 3688 - Computers and Their Impact on Society (3)

Mathematics and Statistics Courses (6 credit hours)

MATH 2164 - Matrices and Linear Algebra (3)

STAT 2122 - Introduction to Probability and Statistics (3)

Capstone Course (3 credit hours)

Select one of the following:

ITCS 4232 - Game Design and Development Studio (3)

ITIS 4390 - Interaction Design Projects (3)

ITIS 4246 - Competitive Cyber Defense (3)

ITSC 4155 - Software Development Projects (3)

ITSC 4681 - Senior Design I (3)

ITSC 4682 - Senior Design II (3)

ITSC 4750 - Honors Thesis (3)

ITSC 4850 - Senior Project I (3)

ITSC 4851 - Senior Project II (3)

ITSC 4990 - Undergraduate Research (3)

ITSC 4991 - Undergraduate Thesis (3)

For this concentration, either of the courses below could also be used to satisfy the Capstone requirement:

ITCS 4232 - Game Design and Development Studio (3)

ITCS 4238 - Intelligent and Interactive System Studio (3)

Elective Courses in Other Disciplines (15 credit hours)

Select 15 elective credit hours. Courses that count towards this requirement must have a discipline prefix other than ITSC, ITCS, or ITIS. This requirement can be fulfilled by pursuing a/an:

- Minor
- Second major
- Honors program
- Undergraduate certificate
- Set of courses selected by the student that do not satisfy any other degree requirement

Concentration Courses (21 credit hours)

Required Concentration Courses (3 credit hours)

Select one course from the list below:

ITCS 3153 - Introduction to Artificial Intelligence (3)

ITCS 3156 - Introduction to Machine Learning (3)

Concentration Elective Courses (12 credit hours)

Select any four courses from the list below:

ITCS 3120 - Introduction to Interactive Computer Graphics (3)

ITCS 3153 - Introduction to Artificial Intelligence (3)

ITCS 3156 - Introduction to Machine Learning (3)

ITCS 4101 - Introduction to Natural Language Processing (3)

ITCS 4114 - Real World Algorithms (3)

ITCS 4123 - Visualization and Visual Communication (3)

ITCS 4124 - Advanced 3D Computer Graphics (3)

ITCS 4150 - Mobile Robotics (3)

ITCS 4151 - Intelligent Robotics (3)

ITCS 4152 - Introduction to Computer Vision (3)

ITCS 4230 - Introduction to Game Design and Development (3)

ITCS 4231 - Advanced Game Design and Development (3)

Concentration Technical Elective Courses (6 credit hours)

Select elective courses from the 3000- or 4000- levels of courses offered by the College of Computing and Informatics.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

- The GPA requirement for all Computer Science undergraduate degree programs is 2.0 or above in all courses applied to the degree and all courses in the major.
- Students have a limit of 3 attempts per course in the major. This applies to all courses listed under the Major Courses and Concentration Courses categories of B.S. and B.A. in Computer Science degree programs. The third attempt at a course can only be approved by petition. In addition, a Withdrawal does not count as an attempt, as that effort is already restricted via the Withdrawal limit.
- Students are required to achieve a grade of C or above in all Core Courses within the major, as listed above.

Bachelor of Science in Computer Science with Concentration in Data Science

This concentration is designed to best prepare students to match the diverse requirements of employers. It also prepares students to pursue graduate studies in computing and other related areas.

The B.S. in Computer Science program requires a common set of computer science courses, a set of courses within the concentration, as

well as a set of elective courses outside the non-computer science discipline, satisfied by a second major, or a minor. Graduates from the B.S. program are expected to have knowledge and skill in computer science plus elective coursework outside the discipline.

Admission Requirements

Freshmen

- See University Admission Requirements
- *Minimum GPA:* 2.5
- Admission is competitive for computer science programs and, if admissible, freshmen must present a minimum SAT-Math score of 530 or ACT-Math subscore of 22.

Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.5
- *Pre-Major/Prerequisite Courses:* A grade of C or above is required in any previously attempted Computer Science course(s). Students must be able to transfer credits for the equivalent of College Algebra.
- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Minimum GPA:* 2.5
- Must have earned 12 or more hours at UNC Charlotte
- Must have earned a grade of C or higher in MATH 1241, or MATH 1120 (Note: Students coming in with MATH 1120 will still be required to take MATH 1241 for the Bachelor of Science program)
- Must have earned a grade of C or higher in ITSC 1212, or ITSC 1110, or DTSC 1302
- Participation in a Change of Major Workshop offered by the CCI Advising Center is required before becoming eligible to declare the Computer Science major. Details are on the CCI Advising website.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. Students majoring in Computer Science should plan on taking the following courses that meet both general education and major requirements:

MATH 1241 - Calculus I (3) (*fulfills Quantitative/Data requirement*)
MATH 1242 - Calculus II (3) (*fulfills Quantitative/Data requirement*)

Major Courses (53 credit hours)

Core Courses (29 credit hours)

- ITSC 1212 - Introduction to Computer Science I (4)
- ITSC 1213 - Introduction to Computer Science II (4)
- ITSC 1600 - Computing Professionals (2)
 - or ITSC 2600 - Computer Science Program, Identity, Career (2)
- ITSC 2175 - Logic and Algorithms (3)
 - or MATH 1165 - Introduction to Discrete Structures (3)
- ITSC 2181 - Introduction to Computer Systems (4)
- ITSC 2214 - Data Structures and Algorithms (4)
- ITSC 3146 - Introduction to Operating Systems and Networking (3)
- ITSC 3155 - Software Engineering (3)
- ITSC 3688 - Computers and Their Impact on Society (3)

Mathematics and Statistics Courses (6 credit hours)

- MATH 2164 - Matrices and Linear Algebra (3)
- STAT 2122 - Introduction to Probability and Statistics (3)

Capstone Course (3 credit hours)

Select one of the following:

- ITCS 4232 - Game Design and Development Studio (3)
- ITIS 4390 - Interaction Design Projects (3)
- ITIS 4246 - Competitive Cyber Defense (3)
- ITSC 4155 - Software Development Projects (3)
- ITSC 4681 - Senior Design I (3)
- ITSC 4682 - Senior Design II (3)
- ITSC 4750 - Honors Thesis (3)
- ITSC 4850 - Senior Project I (3)
- ITSC 4851 - Senior Project II (3)
- ITSC 4990 - Undergraduate Research (3)
- ITSC 4991 - Undergraduate Thesis (3)

Elective Courses in Other Disciplines (15 credit hours)

Select 15 elective credit hours. Courses that count towards this requirement must have a discipline prefix other than ITSC, ITCS, or ITIS. This requirement can be fulfilled by pursuing a/an:

- Minor
- Second major
- Honors program
- Undergraduate certificate
- Set of courses selected by the student that do not satisfy any other degree requirement

Concentration Courses (21 credit hours)

Required Concentration Courses (6 credit hours)

- ITCS 3162 - Introduction to Data Mining (3)
- ITSC 3160 - Database Design and Implementation (3)

Concentration Elective Courses (12 credit hours)

Select any three courses from the list below:

- ITCS 3156 - Introduction to Machine Learning (3)
- ITCS 3190 - Introduction to Cloud Computing for Data Analysis (3)
- ITCS 3216 - Introduction to Cognitive Science (3)
- ITCS 4114 - Real World Algorithms (3)
- ITCS 4121 - Information Visualization (3)
- ITCS 4122 - Visual Analytics (3)
- ITCS 4152 - Introduction to Computer Vision (3)
- INFO 3236 - Business Analytics (3)
- ITIS 4310 - Web Mining (3)

Concentration Technical Elective Courses (6 credit hours)

Select elective courses from the 3000- or 4000-levels of courses offered by the College of Computing and Informatics.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

- The GPA requirement for all Computer Science undergraduate

degree programs is 2.0 or above in all courses applied to the degree and all courses in the major.

- Students have a limit of 3 attempts per course in the major. This applies to all courses listed under the Major Courses and Concentration Courses categories of B.S. and B.A. in Computer Science degree programs. The third attempt at a course can only be approved by petition. In addition, a Withdrawal does not count as an attempt, as that effort is already restricted via the Withdrawal limit.
- Students are required to achieve a grade of C or above in all Core Courses within the major, as listed above.

Bachelor of Science in Computer Science with Concentration in Systems and Networks

The B.S. in Computer Science program requires a common set of computer science courses, a set of courses within the concentration, as well as a set of elective courses outside the non-computer science discipline, satisfied by a second major, or a minor. Graduates from the B.S. program are expected to have knowledge and skill in computer science plus elective coursework outside the discipline.

The Computer Systems and Networks concentration enables students to effectively use the computing and communication capabilities of computers and related devices, emphasizing productivity, correctness, performance, and reliability. Computer Systems encompasses the study of computer organization and architectures, covering processors, memory, storage, external devices (e.g., graphic cards, solid-state drives), and their interconnections. It also encompasses system software, including programming languages, compilers, operating systems, database systems, and parallel or distributed processing.

Computer Networks topics span a wide range of concepts and applications, addressing the design, implementation, management, and security of computer networks. Topics include OSI model layers, protocol intricacies, routing algorithms, network security, and emerging technologies like Software-Defined Networking (SDN), Internet of Things (IoT), and Wireless and Edge-Computing Networks.

The Systems and Networks concentration equips students to leverage existing systems to build high-performing, maintainable, and reliable applications. It also enables them to design, manage, secure, and optimize complex computer networks in the modern digital landscape. Students will gain an understanding of a computer system's functional components, characteristics, performance, and interactions, with a focus on addressing challenges like harnessing parallelism, managing memory and storage, and achieving high-bandwidth and low-latency communications for sustained performance improvements now and in the future.

This concentration additionally prepares students to design novel computing and network systems, allowing application engineers to achieve the same level of quality with a fraction of the development effort.

Admission Requirements

Freshmen

- See University Admission Requirements
- *Minimum GPA:* 2.5
- Admission is competitive for computer science programs and, if

admissible, freshmen must present a minimum SAT-Math score of 530 or ACT-Math subscore of 22.

Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.5
- *Pre-Major/Prerequisite Courses:* A grade of C or above is required in any previously attempted Computer Science course(s). Students must be able to transfer credits for the equivalent of College Algebra.
- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Minimum GPA:* 2.5
- Must have earned 12 or more hours at UNC Charlotte
- Must have earned a grade of C or higher in MATH 1241, or MATH 1120 (Note: Students coming in with MATH 1120 will still be required to take MATH 1241 for the Bachelor of Science program)
- Must have earned a grade of C or higher in ITSC 1212, or ITSC 1110, or DTSC 1302
- Participation in a Change of Major Workshop offered by the CCI Advising Center is required before becoming eligible to declare the Computer Science major. Details are on the CCI Advising website.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. Students majoring in Computer Science should plan on taking the following courses that meet both general education and major requirements:

MATH 1241 - Calculus I (3) (*fulfills Quantitative/Data requirement*)

MATH 1242 - Calculus II (3) (*fulfills Quantitative/Data requirement*)

Major Courses (53 credit hours)

Core Courses (29 credit hours)

- ITSC 1212 - Introduction to Computer Science I (4)
- ITSC 1213 - Introduction to Computer Science II (4)
- ITSC 1600 - Computing Professionals (2)
 - or ITSC 2600 - Computer Science Program, Identity, Career (2)
- ITSC 2175 - Logic and Algorithms (3)
 - or MATH 1165 - Introduction to Discrete Structures (3)
- ITSC 2181 - Introduction to Computer Systems (4)
- ITSC 2214 - Data Structures and Algorithms (4)
- ITSC 3146 - Introduction to Operating Systems and Networking (3)
- ITSC 3155 - Software Engineering (3)
- ITSC 3688 - Computers and Their Impact on Society (3)

Mathematics and Statistics Courses (6 credit hours)

MATH 2164 - Matrices and Linear Algebra (3)

STAT 2122 - Introduction to Probability and Statistics (3)

Elective Courses in Other Disciplines (15 credit hours)

Select 15 elective credit hours. Courses that count towards this requirement must have a discipline prefix other than ITSC, ITCS, or ITIS. This requirement can be fulfilled by pursuing a/an:

- Minor
- Second major
- Honors program
- Undergraduate certificate
- Set of courses selected by the student that do not satisfy any other degree requirement

Capstone Course (3 credit hours)

Select one of the following:

- ITCS 4232 - Game Design and Development Studio (3)
- ITIS 4390 - Interaction Design Projects (3)
- ITIS 4246 - Competitive Cyber Defense (3)
- ITSC 4155 - Software Development Projects (3)
- ITSC 4681 - Senior Design I (3)
- ITSC 4682 - Senior Design II (3)
- ITSC 4750 - Honors Thesis (3)
- ITSC 4850 - Senior Project I (3)
- ITSC 4851 - Senior Project II (3)
- ITSC 4990 - Undergraduate Research (3)
- ITSC 4991 - Undergraduate Thesis (3)

Concentration Courses (21 credit hours)

Concentration Elective Courses (15 credit hours)

Select five of the following:

- ITCS 3143 - Operating Systems (3)
- ITCS 3156 - Introduction to Machine Learning (3)
- ITCS 3166 - Introduction to Computer Networks (3)
- ITCS 3190 - Introduction to Cloud Computing for Data Analysis (3)
- ITCS 4102 - Programming Languages (3)
- ITCS 4141 - Computer Systems and Architecture: A Software Perspective (3)
- ITIS 3200 - Introduction to Information Security and Privacy (3)
- ITIS 3246 - IT Infrastructure and Security (3)
- ITIS 4166 - Backend Application Development (3)
- ITSC 3160 - Database Design and Implementation (3)

Concentration Technical Elective Courses (6 credit hours)

Select elective courses from the 3000- or 4000- levels of courses offered by the College of Computing and Informatics.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

- The GPA requirement for all Computer Science undergraduate degree programs is 2.0 or above in all courses applied to the degree and all courses in the major.
- Students have a limit of 3 attempts per course in the major. This applies to all courses listed under the Major Courses and Concentration Courses categories of B.S. and B.A. in Computer Science degree programs. The third attempt at a course can only be approved by petition. In addition, a Withdrawal does not count as an attempt, as that effort is already restricted via the Withdrawal limit.
- Students are required to achieve a grade of C or above in all Core Courses within the major, as listed above.

Minor in Artificial Intelligence

The Minor in Artificial Intelligence is designed for non-Computer Science majors to have significant exposure in fundamentals of computer science and the modern technical area of artificial intelligence, which can provide valuable knowledge and skill in the development of students' majors and for the job market.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Minimum GPA: 2.0*
- Students enrolled in a Computer Science major with a concentration other than Bioinformatics are not eligible to declare this minor.
- Students must have a background in mathematics and have completed one of the following courses:
 - MATH 1100 - College Algebra (3)
 - or MATH 1101 - College Algebra with Workshop (4)
 - MATH 1103 - Precalculus Mathematics for Science and Engineering (3)
 - MATH 1120 - Calculus (3)
 - MATH 1241 - Calculus I (3)

Minor Requirements

The minor requires a minimum of 17 credit hours.

Core Courses (11 credit hours)

- ITSC 1212 - Introduction to Computer Science I (4)
- ITSC 1213 - Introduction to Computer Science II (4)
- ITSC 2214 - Data Structures and Algorithms (4)

Concentration Course (3 credit hours)

- ITCS 3153 - Introduction to Artificial Intelligence (3)

Elective Course (3 credit hours)

Select one of the following:

- ITCS 3120 - Introduction to Interactive Computer Graphics (3)
- ITCS 3134 - Digital Image Processing (3)
- ITCS 4123 - Visualization and Visual Communication (3)
- ITCS 4151 - Intelligent Robotics (3)

Minor Total = 17 Credit Hours

Progression Requirements

Students must receive a grade of C or above in all courses toward the minor.

Minor in Data Science

The Minor in Data Science is designed for non-Computer Science majors to have significant exposure in fundamentals of computer science and the modern technical area of data science, which can provide valuable knowledge and skill in the development of students' majors and for the job market.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements

- Minimum GPA: 2.0
- Students enrolled in a Computer Science major with a concentration other than Bioinformatics are not eligible to declare this minor.
- Students must have a background in mathematics and have completed one of the following courses:
 - MATH 1100 - College Algebra (3)
or MATH 1101 - College Algebra with Workshop (4)
 - MATH 1103 - Precalculus Mathematics for Science and Engineering (3)
 - MATH 1120 - Calculus (3)
 - MATH 1241 - Calculus I (3)

Minor Requirements

The minor requires a minimum of 17 credit hours.

Core Courses (11 credit hours)

ITSC 1212 - Introduction to Computer Science I (4)
ITSC 1213 - Introduction to Computer Science II (4)
ITSC 2214 - Data Structures and Algorithms (4)

Elective Concentration Courses (6 credit hours)

Select two of the following:
ITCS 3162 - Introduction to Data Mining (3)
ITCS 3190 - Introduction to Cloud Computing for Data Analysis (3)
ITSC 3160 - Database Design and Implementation (3)

Minor Total = 17 Credit Hours

Progression Requirements

Students must receive a grade of C or above in all courses toward the minor.

Minor in Software Systems

The Minor in Software Systems is designed for non-Computer Science majors to have significant exposure in fundamentals of computer science and the classical technical area of software systems, which can provide valuable knowledge and skill in the development of students' majors and for the job market.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Minimum GPA: 2.0
- Students enrolled in a Computer Science major with a concentration other than Bioinformatics are not eligible to declare this minor.
- Students must have a background in mathematics and have completed one of the following courses:
 - MATH 1100 - College Algebra (3)
or MATH 1101 - College Algebra with Workshop (4)
 - MATH 1103 - Precalculus Mathematics for Science and Engineering (3)
 - MATH 1120 - Calculus (3)
 - MATH 1241 - Calculus I (3)

Minor Requirements

The minor requires a minimum of 17 credit hours.

Core Courses (11 credit hours)

ITSC 1212 - Introduction to Computer Science I (4)
ITSC 1213 - Introduction to Computer Science II (4)
ITSC 2214 - Data Structures and Algorithms (4)

Elective Concentration Courses (6 credit hours)

Select two of the following:
ITCS 3166 - Introduction to Computer Networks (3)
ITCS 4145 - Parallel Programming (3)
ITSC 3155 - Software Engineering (3)
ITSC 3160 - Database Design and Implementation (3)

Minor Total = 17 Credit Hours

Progression Requirements

Students must receive a grade of C or above in all courses toward the minor.

Undergraduate Certificate in Game Design and Development

The Undergraduate Certificate in Game Design and Development (GDD) provides undergraduate students with the opportunity to reach a demonstrated level of competence in game design and development. Coursework towards the certificate in GDD can be used for credit towards the Bachelor's degree in Computer Science. However, its primary purpose is to provide a well-defined target for students who want to advance their knowledge of modern game design and development techniques and work with a variety of professionals, from artists to writers, to being the vision for an interactive game or media product to life. The certificate may be pursued concurrently with any of the undergraduate degree programs at UNC Charlotte.

Admission Requirements

Current UNC Charlotte Undergraduate Students

To be admitted into the Undergraduate Certificate in Game Design and Development, students must meet the general University requirements for admission into Undergraduate Certificate Programs. See University Admission Requirements.

In addition, the program expects a current working knowledge of two higher-level languages, including at least one procedural language; and a familiarity with computer applications. The following minimal background in mathematics is also required: two semesters of calculus and one semester of discrete structures. Individuals who have worked at a high professional level in the computer industry may be able to substitute work experience for specific subject area admission requirements.

Students who anticipate applying certificate courses toward an undergraduate degree program should seek advice from that program prior to enrolling. Admission to an undergraduate degree program does not ensure admission into a discipline-related certificate program.

Course Requirements

The certificate will be awarded upon completion of five to six undergraduate level courses (15-18 credit hours) in the area of game design and development. Up to a maximum of six transfer credits may be applied to the certificate. Course substitutions may be made at the discretion of the GDD Certificate Coordinator.

Required Compulsory Courses (12 credit hours)

- ITCS 4120 - Introduction to Computer Graphics (3)
- ITCS 4230 - Introduction to Game Design and Development (3)
- ITCS 4231 - Advanced Game Design and Development (3)
- ITCS 4232 - Game Design and Development Studio (3)

Concentration Courses (3-6 credit hours)

Select one of the following two-course sequences.

Artificial Intelligence

- ITCS 3153 - Introduction to Artificial Intelligence (3)
- ITCS 4236 - Artificial Intelligence for Computer Games (3)

Graphics

- ITCS 4120 Introduction to Computer Graphics (3) (*this is already a required compulsory course*)
- ITCS 4235 Game Engine Construction (3)

Networking

- ITCS 3166 Introduction to Computer Networks (3)
- A game-networking related course approved by the GDD Certificate Coordinator (3)

Other

A sequence of two related courses (generally from ITCS/ITIS at the 3000-level or above) approved by the GDD Certificate Coordinator.

Certificate Total = 15-18 Credit Hours

Progression Requirements

The certificate program requires all courses taken for the certificate to be passed at the C level or above, and a GPA in all certificate courses of 2.5 or above.

Early Entry: Master of Science in Computer Science

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Minimum 3.3 GPA in the Department of Computer Science
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents

- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 2.75 overall undergraduate GPA and 3.0 Junior/Senior GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees). The following are approved course substitutions for Early Entry into the M.S. in Computer Science program:

Undergraduate Course	Graduate Substitutions
ITCS 3156	ITCS 6156
ITSC 4155	ITCS 6112
ITCS 4123	ITCS 5123
ITCS 4152	ITCS 5152
ITCS 4230	ITCS 5230
ITCS 4231	ITCS 5231
ITCS 4235	ITCS 5235
ITCS 4236	ITCS 5236
ITCS 4102	ITCS 5102
ITCS 4131	ITCS 6166
ITCS 4141	ITCS 5141
ITCS 4180	ITCS 5180
ITIS 4166	ITIS 5166
ITCS 4121	ITCS 5121
ITCS 4122	ITCS 5122
ITIS 4310	ITIS 5510

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Department of Software and Information Systems

sis.charlotte.edu

Undergraduate Programs

- **B.A. in Computer Science**
 - Human-Computer Interaction
 - Information Technology
- **B.S. in Computer Science**
 - Cybersecurity
 - Web/Mobile Development and Software Engineering
- **Minor in Human-Centered Design**
- **Minor in Interactive Programming**
- **Minor in Software Development**
- **Early Entry: M.S. in Cybersecurity**
- **Early Entry: M.S. in Information Technology**

The Department of Software and Information Systems provides a range of courses and concentrations related to the design, management, and security of software systems with an emphasis on information technology. The department offers courses in information technology design and management; software systems design, architecture, integration, and implementation; human centered design and interaction, cybersecurity, health informatics, and intelligent and complex systems.

The Department of Software and Information Systems offers both undergraduate and graduate programs. The undergraduate majors lead to a Bachelor of Arts (B.A.) or a Bachelor of Science (B.S.) in Computer Science. The Software and Information Systems concentrations included in these degrees described below are technically part of the Computer Science major but for administrative and advising purposes, students completing these concentrations are members of the Department of Software and Information Systems.

Graduate study leads to a Master of Science (M.S.) in Information Technology or Cybersecurity. Graduate certificate programs are also available. See the *UNC Charlotte Graduate Catalog* for information on these graduate programs.

To assist with their studies, students have access to advanced computer labs and software where they can practice and experiment in controlled environments. In addition, the department maintains a high degree of interaction with working industry professionals who provide real-world expertise and experience.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Science in Computer Science *with Concentration in Cybersecurity*

This concentration is designed to best prepare students to match the diverse requirements of employers. It also prepares students to pursue graduate studies in computing and other related areas.

The B.S. in Computer Science program requires a common set of computer science courses, a set of courses within the concentration, as well as a set of elective courses outside the non-computer science discipline, satisfied by a second major, or a minor. Graduates from the B.S. program are expected to have knowledge and skill in computer science plus elective coursework outside the discipline.

Admission Requirements

Freshmen

- See University Admission Requirements
- *Minimum GPA:* 2.5
- Admission is competitive for computer science programs and, if admissible, freshmen must present a minimum SAT-Math score of 530 or ACT-Math subscore of 22.

Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.5
- *Pre-Major/Prerequisite Courses:* A grade of C or above is required in any previously attempted Computer Science course(s). Students must be able to transfer credits for the equivalent of College Algebra.
- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Minimum GPA:* 2.5
- Must have earned 12 or more hours at UNC Charlotte
- Must have earned a grade of C or higher in MATH 1241, or MATH 1120 (Note: Students coming in with MATH 1120 will still be required to take MATH 1241 for the Bachelor of Science program)
- Must have earned a grade of C or higher in ITSC 1212, or ITSC 1110, or DTSC 1302
- Participation in a Change of Major Workshop offered by the CCI Advising Center is required before becoming eligible to declare the Computer Science major. Details are on the CCI Advising website.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Students majoring in Computer Science should plan on taking the following courses that meet both general education and major requirements:

MATH 1241 - Calculus I (3) (*fulfills Quantitative/Data requirement*)
MATH 1242 - Calculus II (3) (*fulfills Quantitative/Data requirement*)

Major Courses (53 credit hours)

Core Courses (29 credit hours)

ITSC 1212 - Introduction to Computer Science I (4)
ITSC 1213 - Introduction to Computer Science II (4)
ITSC 1600 - Computing Professionals (2)
or ITSC 2600 - Computer Science Program, Identity, Career (2)
ITSC 2175 - Logic and Algorithms (3)
or MATH 1165 - Introduction to Discrete Structures (3)
ITSC 2181 - Introduction to Computer Systems (4)
ITSC 2214 - Data Structures and Algorithms (4)
ITSC 3146 - Introduction to Operating Systems and Networking (3)
ITSC 3155 - Software Engineering (3)
ITSC 3688 - Computers and Their Impact on Society (3)

Mathematics and Statistics Courses (6 credit hours)

MATH 2164 - Matrices and Linear Algebra (3)
STAT 2122 - Introduction to Probability and Statistics (3)

Elective Courses in Other Disciplines (15 credit hours)

Select 15 elective credit hours. Courses that count towards this requirement must have a discipline prefix other than ITSC, ITCS, or ITIS. This requirement can be fulfilled by pursuing a/an:

- Minor
- Second major
- Honors program
- Undergraduate certificate
- Set of courses selected by the student that do not satisfy any other degree requirement

Capstone Course (3 credit hours)

Select one of the following:

ITCS 4232 - Game Design and Development Studio (3)
ITIS 4390 - Interaction Design Projects (3)
ITIS 4246 - Competitive Cyber Defense (3)
ITSC 4155 - Software Development Projects (3)
ITSC 4681 - Senior Design I (3)
ITSC 4682 - Senior Design II (3)
ITSC 4750 - Honors Thesis (3)
ITSC 4850 - Senior Project I (3)
ITSC 4851 - Senior Project II (3)
ITSC 4990 - Undergraduate Research (3)
ITSC 4991 - Undergraduate Thesis (3)

Concentration Courses (24 credit hours)

Concentration Required Courses (21 credit hours)

ITIS 3135 - Front-End Web Application Development (3)
ITIS 3200 - Introduction to Information Security and Privacy (3)
ITIS 3246 - IT Infrastructure and Security (3)
ITIS 4221 - Secure Programming and Penetration Testing (3)
ITIS 4250 - Computer Forensics (3)

ITIS 4260 - Introduction to Security Analytics (3)
or ITIS 4214 - Usable Security and Privacy (3)
or ITIS 4261 - Introduction to Secured Cloud Computing (3)
ITSC 3160 - Database Design and Implementation (3)

Concentration Technical Elective Course (3 credit hours)

Select one elective course from 3000- or 4000-level courses offered by the College of Computing and Informatics, excluding the courses listed above.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

- The GPA requirement for all Computer Science undergraduate degree programs is 2.0 or above in all courses applied to the degree and all courses in the major.
- Students have a limit of 3 attempts per course in the major. This applies to all courses listed under the Major Courses and Concentration Courses categories of B.S. and B.A. in Computer Science degree programs. The third attempt at a course can only be approved by petition. In addition, a Withdrawal does not count as an attempt, as that effort is already restricted via the Withdrawal limit.
- Students are required to achieve a grade of C or above in all Core Courses within the major, as listed above.

Bachelor of Science in Computer Science with Concentration in Web/Mobile Development and Software Engineering

This concentration is designed to best prepare students to match the diverse requirements of employers. It also prepares students to pursue graduate studies in computing and other related areas.

The B.S. in Computer Science program requires a common set of computer science courses, a set of courses within the concentration, as well as a set of elective courses outside the non-computer science discipline, satisfied by a second major, or a minor. Graduates from the B.S. program are expected to have knowledge and skill in computer science plus elective coursework outside the discipline.

Admission Requirements

Freshmen

- See University Admission Requirements
- *Minimum GPA:* 2.5
- Admission is competitive for computer science programs and, if admissible, freshmen must present a minimum SAT-Math score of 530 or ACT-Math subscore of 22.

Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.5
- *Pre-Major/Prerequisite Courses:* A grade of C or above is required in any previously attempted Computer Science course(s). Students must be able to transfer credits for the equivalent of College

Algebra.

- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Minimum GPA:* 2.5
- Must have earned 12 or more hours at UNC Charlotte
- Must have earned a grade of C or higher in MATH 1241, or MATH 1120 (Note: Students coming in with MATH 1120 will still be required to take MATH 1241 for the Bachelor of Science program)
- Must have earned a grade of C or higher in ITSC 1212, or ITSC 1110, or DTSC 1302
- Participation in a Change of Major Workshop offered by the CCI Advising Center is required before becoming eligible to declare the Computer Science major. Details are on the CCI Advising website.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. Students majoring in Computer Science should plan on taking the following courses that meet both general education and major requirements:

MATH 1241 - Calculus I (3) (*fulfills Quantitative/Data requirement*)

MATH 1242 - Calculus II (3) (*fulfills Quantitative/Data requirement*)

Major Courses (53 credit hours)

Core Courses (29 credit hours)

ITSC 1212 - Introduction to Computer Science I (4)

ITSC 1213 - Introduction to Computer Science II (4)

ITSC 1600 - Computing Professionals (2)

or ITSC 2600 - Computer Science Program, Identity, Career (2)

ITSC 2175 - Logic and Algorithms (3)

or MATH 1165 - Introduction to Discrete Structures (3)

ITSC 2181 - Introduction to Computer Systems (4)

ITSC 2214 - Data Structures and Algorithms (4)

ITSC 3146 - Introduction to Operating Systems and Networking (3)

ITSC 3155 - Software Engineering (3)

ITSC 3688 - Computers and Their Impact on Society (3)

Mathematics and Statistics Courses (6 credit hours)

MATH 2164 - Matrices and Linear Algebra (3)

STAT 2122 - Introduction to Probability and Statistics (3)

Elective Courses in Other Disciplines (15 credit hours)

Select 15 elective credit hours. Courses that count towards this requirement must have a discipline prefix other than ITSC, ITCS, or ITIS. This requirement can be fulfilled by pursuing a/an:

- Minor
- Second major
- Honors program
- Undergraduate certificate
- Set of courses selected by the student that do not satisfy any other degree requirement

Capstone Course (3 credit hours)

Select one of the following:

- ITCS 4232 - Game Design and Development Studio (3)
- ITIS 4390 - Interaction Design Projects (3)
- ITIS 4246 - Competitive Cyber Defense (3)
- ITSC 4155 - Software Development Projects (3)
- ITSC 4681 - Senior Design I (3)
- ITSC 4682 - Senior Design II (3)
- ITSC 4750 - Honors Thesis (3)
- ITSC 4850 - Senior Project I (3)
- ITSC 4851 - Senior Project II (3)
- ITSC 4990 - Undergraduate Research (3)
- ITSC 4991 - Undergraduate Thesis (3)

Concentration Courses (27 credit hours)

Required Concentration Courses (12 credit hours)

ITIS 3135 - Front-End Web Application Development (3)

ITIS 3310 - Software Architecture and Design (3)

ITIS 4221 - Secure Programming and Penetration Testing (3)

ITSC 3160 - Database Design and Implementation (3)

Elective Concentration Courses (9 credit hours)

Select three courses from the lists below. (The categories are only to indicate sub-areas of this concentration; the courses selected do not need to be within one category.)

Software Design Courses

ITCS 3112 - Design and Implementation of Object-Oriented Systems (3)

ITIS 3130 - Introduction to Human-Centered Computing (3)

ITIS 4350 - Design Prototyping (3)

Software Development Courses

ITIS 3300 - Software Requirements, Analysis and Testing (3)

ITIS 3320 - Introduction to Software Testing and Assurance (3)

ITIS 4166 - Backend Application Development (3)

ITIS 4180 - Mobile Application Development (3)

Technical Elective Concentration Courses (6 credit hours)

Select two elective courses from the 3000- or 4000-levels of courses offered by the College of Computing and Informatics.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

- The GPA requirement for all Computer Science undergraduate degree programs is 2.0 or above in all courses applied to the degree and all courses in the major.
- Students have a limit of 3 attempts per course in the major. This applies to all courses listed under the Major Courses and Concentration Courses categories of B.S. and B.A. in Computer Science degree programs. The third attempt at a course can only be approved by petition. In addition, a Withdrawal does not count as an attempt, as that effort is already restricted via the Withdrawal limit.
- Students are required to achieve a grade of C or above in all Core Courses within the major, as listed above.

Bachelor of Arts in Computer Science with Concentration in Human-Computer Interaction

The concentration in Human-Computer Interaction emphasizes the design, development, and implementation of interactive systems from a human-centric perspective. This concentration prepares students for a wide variety of jobs or graduate studies.

The B.A. in Computer Science program requires a compact set of a computer science core, a set of courses within the concentration, as well as a set of elective courses outside the computer science disciplines, satisfied by a second major, or a minor. Graduates from the B.A. program are expected to have knowledge and skills in computer science plus elective coursework outside the discipline. The emphasis in this program is less theoretical/mathematical, and more on the applied side of computing.

Admission Requirements

Freshmen

- See University Admission Requirements
- *Minimum GPA:* 2.5
- Admission is competitive for computer science programs and, if admissible, freshmen must present a minimum SAT-Math score of 530 or ACT-Math subscore of 22.

Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.5
- *Pre-Major/Prerequisite Courses:* A grade of C or above is required in any previously attempted Computer Science course(s). Students must be able to transfer credits for the equivalent of College Algebra.
- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Minimum GPA:* 2.5
- Must have earned 12 or more hours at UNC Charlotte
- Must have earned a grade of C or higher in MATH 1241, or MATH 1120 (Note: Students coming in with MATH 1120 will still be required to take MATH 1241 for the Bachelor of Science program)
- Must have earned a grade of C or higher in ITSC 1212, or ITSC 1110, or DTSC 1302
- Participation in a Change of Major Workshop offered by the CCI Advising Center is required before becoming eligible to declare the Computer Science major. Details are on the CCI Advising website.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. Students majoring in Computer Science should plan on taking the following courses that meet both general education and major requirements:

MATH 1120 - Calculus (3) (*fulfills Quantitative/Data requirement*)

STAT 1222 - Introduction to Statistics (3) (*fulfills Quantitative/Data requirement*)

Major Courses (40 credit hours)

Core Courses (19 credit hours)

- ITSC 1212 - Introduction to Computer Science I (4)
- ITSC 1213 - Introduction to Computer Science II (4)
- ITSC 1600 - Computing Professionals (2)
- or ITSC 2600 - Computer Science Program, Identity, Career (2)
- ITSC 2175 - Logic and Algorithms (3)
- or MATH 1165 - Introduction to Discrete Structures (3)
- ITSC 2214 - Data Structures and Algorithms (4)
- ITSC 3688 - Computers and Their Impact on Society (3)

Advanced Statistics Course (3 credit hours)

- STAT 2223 - Elements of Statistics II (3)

Elective Courses in Other Disciplines (15 credit hours)

Select 15 elective credit hours. Courses that count towards this requirement must have a discipline prefix other than ITSC, ITCS, or ITIS. This requirement can be fulfilled by pursuing a/an:

- Minor
- Second major
- Honors program
- Undergraduate certificate
- Set of courses selected by the student that do not satisfy any other degree requirement

Capstone Course (3 credit hours)

Select one of the following:

- ITCS 4232 - Game Design and Development Studio (3)
- ITIS 4390 - Interaction Design Projects (3)
- ITIS 4246 - Competitive Cyber Defense (3)
- ITSC 4155 - Software Development Projects (3)
- ITSC 4681 - Senior Design I (3)
- ITSC 4682 - Senior Design II (3)
- ITSC 4750 - Honors Thesis (3)
- ITSC 4850 - Senior Project I (3)
- ITSC 4851 - Senior Project II (3)
- ITSC 4990 - Undergraduate Research (3)
- ITSC 4991 - Undergraduate Thesis (3)

Concentration Courses (27 credit hours)

Concentration Core Courses (18 credit hours)

- ITIS 3130 - Introduction to Human-Centered Computing (3)
- ITIS 3135 - Front-End Web Application Development (3)
- ITIS 3140 - User Experience Methods (3)
- ITIS 4350 - Design Prototyping (3)

Elective Courses

Choose two courses from the following list:

- ITIS 3216 - Introduction to Cognitive Science (3)
- ITIS 4214 - Usable Security and Privacy (3)
- ITIS 4353 - Social Technology Design (3)
- ITIS 4355 - Accessible Design and Implementation (3)
- ITIS 4358 - Physical Computing (3)
- ITIS 4360 - Human-Centered Artificial Intelligence (3)

Concentration Technical Elective Courses (9 credit hours)

Select three elective courses from 3000- or 4000-level courses offered by the College of Computing and Informatics, excluding the courses listed above.

Unrestricted Elective Courses

As needed to complete the required credit hours for graduation. Select elective courses in consultation with advisor.

Degree Total = 120 Credit Hours

Progression Requirements

- The GPA requirement for all Computer Science undergraduate degree programs is 2.0 or above in all courses applied to the degree and all courses in the major.
- Students have a limit of 3 attempts per course in the major. This applies to all courses listed under the Major Courses and Concentration Courses categories of B.S. and B.A. in Computer Science degree programs. The third attempt at a course can only be approved by petition. In addition, a Withdrawal does not count as an attempt, as that effort is already restricted via the Withdrawal limit.
- Students are required to achieve a grade of C or above in all Core Courses within the major, as listed above.

Bachelor of Arts in Computer Science with Concentration in Information Technology

The Concentration in Information Technology emphasizes usability, security, and reliability of IT infrastructures, as well as writing and communication skills. This concentration prepares students for a wide variety of jobs or graduate studies.

The B.A. in Computer Science program requires a compact set of a computer science core, a set of courses within the concentration, as well as a set of elective courses outside the computer science disciplines, satisfied by a second major, or a minor. Graduates from the B.A. program are expected to have knowledge and skills in computer science plus elective coursework outside the discipline. The emphasis in this program is less theoretical/mathematical, and more on the applied side of computing.

Admission Requirements

Freshmen

- See University Admission Requirements
- *Minimum GPA:* 2.5
- Admission is competitive for computer science programs and, if admissible, freshmen must present a minimum SAT-Math score of 530 or ACT-Math subscore of 22.

Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.5
- *Pre-Major/Prerequisite Courses:* A grade of C or above is required in any previously attempted Computer Science course(s). Students must be able to transfer credits for the equivalent of College Algebra.
- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Minimum GPA:* 2.5
- Must have earned 12 or more hours at UNC Charlotte
- Must have earned a grade of C or higher in MATH 1241, or MATH 1120 (Note: Students coming in with MATH 1120 will still be required to take MATH 1241 for the Bachelor of Science program)
- Must have earned a grade of C or higher in ITSC 1212, or ITSC 1110, or DTSC 1302
- Participation in a Change of Major Workshop offered by the CCI Advising Center is required before becoming eligible to declare the Computer Science major. Details are on the CCI Advising website.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. Students majoring in Computer Science should plan on taking the following courses that meet both general education and major requirements:

MATH 1120 - Calculus (3) (*fulfills Quantitative/Data requirement*)
STAT 1222 - Introduction to Statistics (3) (*fulfills Quantitative/Data requirement*)

Major Courses (40 credit hours)

Core Courses (19 credit hours)

- ITSC 1212 - Introduction to Computer Science I (4)
- ITSC 1213 - Introduction to Computer Science II (4)
- ITSC 1600 - Computing Professionals (2)
or ITSC 2600 - Computer Science Program, Identity, Career (2)
- ITSC 2175 - Logic and Algorithms (3)
or MATH 1165 - Introduction to Discrete Structures (3)
- ITSC 2214 - Data Structures and Algorithms (4)
- ITSC 3688 - Computers and Their Impact on Society (3)

Advanced Statistics Course (3 credit hours)

- STAT 2223 - Elements of Statistics II (3)

Elective Courses in Other Disciplines (15 credit hours)

Select 15 elective credit hours. Courses that count towards this requirement must have a discipline prefix other than ITSC, ITCS, or ITIS. This requirement can be fulfilled by pursuing a/an:

- Minor
- Second major
- Honors program
- Undergraduate certificate
- Set of courses selected by the student that do not satisfy any other degree requirement

Capstone Course (3 credit hours)

Select one of the following:

- ITCS 4232 - Game Design and Development Studio (3)
- ITIS 4390 - Interaction Design Projects (3)
- ITIS 4246 - Competitive Cyber Defense (3)
- ITSC 4155 - Software Development Projects (3)
- ITSC 4681 - Senior Design I (3)
- ITSC 4682 - Senior Design II (3)

- ITSC 4750 - Honors Thesis (3)
- ITSC 4850 - Senior Project I (3)
- ITSC 4851 - Senior Project II (3)
- ITSC 4990 - Undergraduate Research (3)
- ITSC 4991 - Undergraduate Thesis (3)

Concentration Courses (33 credit hours)

Concentration Core Courses (15 credit hours)

- ITIS 3130 - Introduction to Human-Centered Computing (3)
- ITIS 3135 - Front-End Web Application Development (3)
- ITIS 3200 - Introduction to Information Security and Privacy (3)
- ITIS 3300 - Software Requirements, Analysis and Testing (3)
- ITSC 3160 - Database Design and Implementation (3)

Concentration Technical Elective Courses (18 credit hours)

Select six elective courses from 3000- or 4000-level courses offered by the College of Computing and Informatics, excluding the courses listed above.

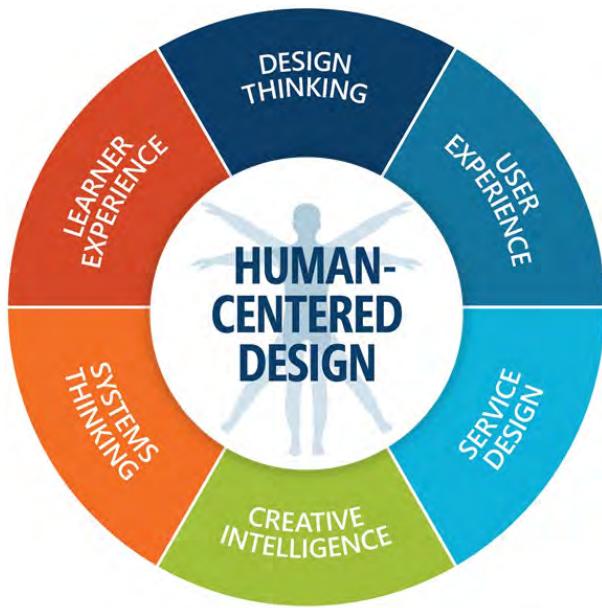

Unrestricted Elective Courses

As needed to complete the required credit hours for graduation. Select courses in consultation with an advisor.

Degree Total = 120 Credit Hours

Progression Requirements

- The GPA requirement for all Computer Science undergraduate degree programs is 2.0 or above in all courses applied to the degree and all courses in the major.
- Students have a limit of 3 attempts per course in the major. This applies to all courses listed under the Major Courses and Concentration Courses categories of B.S. and B.A. in Computer Science degree programs. The third attempt at a course can only be approved by petition. In addition, a Withdrawal does not count as an attempt, as that effort is already restricted via the Withdrawal limit.
- Students are required to achieve a grade of C or above in all Core Courses within the major, as listed above.

Minor in Human-Centered Design

The Minor in Human-Centered Design provides students with the knowledge and skills in the application of human-centered design methods.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Minimum GPA: 2.0
- Students enrolled in a Computer Science major with a concentration other than Bioinformatics are not eligible to declare this minor.

Minor Requirements

Required Courses (13 credit hours)

- ITSC 1110 - Introduction to Computer Science Principles (3)
- ITSC 1212 - Introduction to Computer Science I (4)
- ITIS 3130 - Introduction to Human-Centered Computing (3)
- ITIS 4350 - Design Prototyping (3)

Elective Courses (3 credit hours)

Select one of the following:

- ITCS 3216 - Introduction to Cognitive Science (3)
- ITCS 4122 - Visual Analytics (3)
- ITIS 4390 - Interaction Design Projects (3)

Progression Requirements

All courses must be completed with a grade of C or above.

Minor Total = 16 Credit Hours

Minor in Interactive Programming

The Minor in Interactive Programming provides students with the knowledge and skills in programming using event-driven languages. Students gain hands-on knowledge of how to develop web and software applications and understand critical issues in design, development, and implementation.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Minimum GPA: 2.0
- Students enrolled in a Computer Science major with a concentration other than Bioinformatics are not eligible to declare this minor.

Minor Requirements

Required Courses (11 credit hours)

- ITSC 1212 - Introduction to Computer Science I (4)
- ITSC 1213 - Introduction to Computer Science II (4)
- ITSC 2214 - Data Structures and Algorithms (4)

1st Elective Course (3 credit hours)

Select one of the following:

- ITIS 3130 - Introduction to Human-Centered Computing (3)
- ITIS 4350 - Design Prototyping (3)

2nd Elective Course (3 credit hours)

Select one of the following:

ITIS 3135 - Front-End Web Application Development (3)

ITIS 4180 - Mobile Application Development (3)

Progression Requirements

All courses must be completed with a grade of C or above.

Minor Total = 17 Credit Hours

Minor in Software Development

The Minor in Software Development provides students with the knowledge and skills in software development using programming languages. Students gain hands-on knowledge of software development processes.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
 - Minimum GPA: 2.0
 - Students enrolled in a Computer Science major with a concentration other than Bioinformatics are not eligible to declare this minor.

Minor Requirements

Required Courses (14 credit hours)

ITSC 1212 - Introduction to Computer Science I (4)

ITSC 1213 - Introduction to Computer Science II (4)

ITSC 2214 - Data Structures and Algorithms (4)

ITSC 3155 - Software Engineering (3)

Elective Course (3 credit hours)

Select one of the following:

ITIS 3130 - Introduction to Human-Centered Computing (3)

ITIS 3135 - Front-End Web Application Development (3)

ITIS 4166 - Backend Application Development (3)

ITIS 4180 - Mobile Application Development (3)

ITIS 4350 - Design Prototyping (3)

Progression Requirements

All courses must be completed with a grade of C or above.

Minor Total = 17 Credit Hours

Early Entry: Master of Science in Cybersecurity

Exceptional undergraduate students at UNC Charlotte may be accepted into the M.S. in Cybersecurity and begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA

- Acceptable scores on the appropriate graduate standardized test (e.g., GRE)
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA and a 3.0 Junior/Senior GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for these degree programs, see the program listings in the *Graduate Catalog*.

Early Entry: Master of Science in Information Technology

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Minimum 3.3 GPA in the Department of Computer Science
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 2.75 overall undergraduate GPA and 3.0 Junior/Senior GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees). The following are approved course substitutions for Early Entry into the M.S. in Information Technology program:

Graduate Level Substitutes	Undergraduate Course Equivalent
ITIS 5166 - Network-Based Application Development (3)	ITIS 4166 - Backend Application Development (3)
ITIS 5180 - Mobile Application Development (3)	ITIS 4180 - Mobile Application Development (3)
ITIS 5221 - Secure Programming and Penetration Testing (3)	ITIS 4221 - Secure Programming and Penetration Testing (3)
ITIS 5246 - Competitive Cyber Defense (3)	ITIS 4246 - Competitive Cyber Defense (3)
ITIS 5250 - Computer Forensics (3)	ITIS 4250 - Computer Forensics (3)
ITIS 5260 - Introduction to Security Analytics (3)	ITIS 4260 - Introduction to Security Analytics (3)
ITIS 6011 - Interaction Design Studio (3)	ITIS 4390 - Interaction Design Projects (3)
ITIS 5350 - Rapid Prototyping (3)	ITIS 4350 - Design Prototyping (3)
ITIS 6120 - Applied Databases (3)	ITSC 3160 - Database Design and Implementation (3)
ITIS 6200 - Principles of Information Security and Privacy (3)	ITIS 3200 - Introduction to Information Security and Privacy (3)
ITIS 6216 - Introduction to Cognitive Science (3)	ITIS 3216 - Introduction to Cognitive Science (3)
ITIS 6342 - Information Technology Project Management (3)	ITIS 3300 - Software Requirements, Analysis and Testing (3)
ITIS 6400 - Human-Centered Design (3)	ITIS 3130 - Introduction to Human-Centered Computing (3)
ITIS 6420 - Usable Security and Privacy (3)	ITIS 4214 - Usable Security and Privacy (3)

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Early Entry: Master of Science and Graduate Certificate in Health Informatics and Analytics

For details, see the College of Health and Human Services section of this *Catalog* under the "Department of Epidemiology and Community Health" heading.

School of Data Science

datascience.charlotte.edu

Undergraduate Programs

- **B.S. in Data Science**
- **B.S. in Sports Analytics**
- **Undergraduate Certificate in Sports Analytics**
- **Early Entry: M.S. or Graduate Certificate in Data Science and Business Analytics**
- **Early Entry: Graduate Certificate in Data Science and Business Analytics**
- **Early Entry: M.S. in Health Informatics and Analytics**
- **Early Entry: Graduate Certificate in Health Informatics and Analytics**

UNC Charlotte's School of Data Science (SDS) is committed to growing exemplary talent through research and education. The School offers undergraduate and graduate degree programs and certificates that combine the fields of science, business, mathematics, social science, and sports. In strategic collaboration with industry and regional partners, the School is educating the next generation of data scientists, business analysts, and managers with the technical and critical thinking skills to model the world through data.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Science in Data Science

The B.S. in Data Science is recommended for students interested in developing competencies that will prepare them for careers in "big data" analytics. Graduates with bachelor's degrees in Data Science will be equipped to operate the systems on which analyses are run, prepare data for analysis, and visualize information.

Students in the program progressively develop mathematical skills, computational and statistical thinking, and data modeling needed to manipulate and interrogate data, define and solve problems. A major focus of the degree is developing communications skills, teamwork, and ethical awareness so that students can apply data science techniques in the context of particular domain applications. These competencies prepare graduates for careers in a broad range of fields where the ability to understand and use data, so called "data acumen," is critical. Students in the B.S. in Data Science program are encouraged to complete a minor or certificate that enhances their data science skills and/or domain expertise.

Admission Requirements

Freshmen

- Students who meet the University's admission requirements are admissible to the major.

- See University Admission Requirements

Transfers

- Students who meet the University's admission requirements are admissible to the major.
- See University Admission Requirements

Currently Enrolled Students

Students transferring from within UNC Charlotte must have a cumulative GPA of 2.0.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Out of 31-32 credit hours, 15 credit hours are double-counted for major courses. Successful completion of DTSC 1302 satisfies the General Education requirement for Inquiry in the Sciences - Social Sciences.

Major Courses (55 credit hours)

Data Science Core Courses (18 credit hours)

Each of the Data Science Studio courses is taught as a semester long 6-credit hour course; however, for registration purposes, each studio is broken into two separate classes that are taught in the A and B sessions of a semester.

DTSC 1301 - Data and Society A (3)

DTSC 1302 - Data and Society B (3)

DTSC 2301 - Modeling and Society A (3)

DTSC 2302 - Modeling and Society B (3)

DTSC 3601 - Predictive Analytics and Their Implications A (3)

DTSC 3602 - Predictive Analytics and Their Implications B (3)

Mathematics and Statistics Courses (15 credit hours)

MATH 1120 - Calculus (3)

or MATH 1241 - Calculus I (3)

STAT 1220 - Elements of Statistics I (BUSN) (3)

or STAT 1221 - Elements of Statistics I (3)

or STAT 1222 - Introduction to Statistics (3)

MATH 2164 - Matrices and Linear Algebra (3)

STAT 2223 - Elements of Statistics II (3)

STAT 3160 - Applied Multivariate Analysis (3)

Computing Core Courses (16 credit hours)

ITSC 1213 - Introduction to Computer Science II (4)

ITSC 2175 - Logic and Algorithms (3)

or MATH 1165 - Introduction to Discrete Structures (3)

ITSC 2214 - Data Structures and Algorithms (4)

ITCS 3162 - Introduction to Data Mining (3)

ITSC 3160 - Database Design and Implementation (3)

Capstone Courses (6 credit hours)

DTSC 4301 - Data Science for Social Good A (3)

DTSC 4302 - Data Science for Social Good B (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

The minimum GPA requirement for B.S. in Data Science is 2.0 in each of the following three categories: (1) all courses applied to the degree, (2) all courses in the major, and (3) all upper-division courses in the major.

Students have a limit of 2 attempts per course in the major (plus 1 more by petition). This applies to all core courses (Data Science, Computing and Informatics, and Mathematics and Statistics). The third attempt at a course can only be approved by petition. In addition, a Withdrawal does not count as an attempt, as that effort is already restricted via the Withdrawal limit.

Bachelor of Science in Sports Analytics

The B.S. in Sports Analytics is recommended for students interested in developing skills to prepare them for careers in human performance data analytics. Graduates with Bachelor's degrees in Sports Analytics will be equipped to operate wearable technology, prepare data for analysis, and visualize information to make informed decisions regarding human performance.

Students in the program will progressively develop mathematical skills, computational and statistical thinking, and data modeling needed to understand data, identify and solve problems. A primary focus of the degree is developing critical thinking and communication skills that will allow students to work as part of an interdisciplinary team of sports data analysts.

All program-level Admissions and Progression Requirements are in addition to the University of North Carolina at Charlotte Admission Requirements.

Admission Requirements

Freshmen

- Students who meet the university's admissions requirements are eligible for admission to the major.
- See University Admission Requirements.

Transfers

- Students who meet the university's admissions requirements are eligible for admission to the major.
- See University Admission Requirements.

Currently Enrolled Students

- Students transferring from within the university must have a cumulative GPA of 2.0.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Requirements. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor

for information.

Major Courses (59 credit hours)

Sports Analytics Core (24 credit hours)

- DTSC 1110 - Sports Analytics (3)
- DTSC 1301 - Data and Society A (3)
- DTSC 1302 - Data and Society B (3)
- DTSC 2301 - Modeling and Society A (3)
- DTSC 2302 - Modeling and Society B (3)
- DTSC 3400 - Data Science Practicum (1 to 3)
 - or EXER 3900 - Undergraduate Research (1 to 3)
- DTSC 3601 - Predictive Analytics and Their Implications A (3)
- DTSC 3602 - Predictive Analytics and Their Implications B (3)

Math/Statistics Core (9 credit hours)

- MATH 1120 - Calculus (3)
 - or MATH 1241 - Calculus I (3)
- STAT 1220 - Elements of Statistics I (BUSN) (3)
 - or STAT 1221 - Elements of Statistics I (3)
 - or STAT 1222 - Introduction to Statistics (3)
 - or STAT 2122 - Introduction to Probability and Statistics (3)
- STAT 2223 - Elements of Statistics II (3)

Programming and Algorithms Courses (11 credit hours)

- ITSC 1213 - Introduction to Computer Science II (4)
- ITSC 2214 - Data Structures and Algorithms (4)
- ITSC 3160 - Database Design and Implementation (3)

Exercise Science Courses (6 credit hours)

- SPOA 1120 - Factors of Human Performance (3)
- SPOA 2120 - Applied Kinesiology for Human Performance (3)

Sports Analytics Capstone (3 credit hours)

- SPOA 4120 - Modeling of Human Performance (3)

Sports Analytics Elective Courses (6 credit hours)

Take two of the following:

- DTSC 2110 - Sport Business Analytics (3)
- SPOA 2130 - Introduction to Baseball Statistics (3)
- SPOA 4210 - Advanced Baseball Analytics (3)

Unrestricted Electives

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

The minimum GPA requirement for B.S. in Sports Analytics is 2.0 in each of the following three categories: (1) all courses applied to the degree, (2) all courses in the major, and (3) all upper division courses in the major.

Students have a limit of 2 attempts per course in the major (plus 1 more by petition). This applies to all core courses (Sports Analytics, Computing and Informatics, Mathematics and Statistics, and Exercise Science). The third attempt at a course can only be approved by petition. In addition, a Withdrawal does not count as an attempt, as that effort is already restricted via the Withdrawal limit.

Undergraduate Certificate: Sports Analytics

The Undergraduate Certificate in Sports Analytics is open to students who are interested in applying data analysis and collection strategies within the field of sports. The purpose of the certificate is to allow the students to gain knowledge and pursue a path in the sports analytics field along with their existing major.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

To be eligible for admission to the certificate program, students must have completed the following:

- Statistics Course - STAT 1220, STAT 1221, or STAT 1222 with grade of C or above
- Basic Programming Course - INFO 2130, INFO 3221, or ITSC 1110 with grade of C or above

Other courses may be accepted upon review. Students from all majors on campus are welcome to apply for admission.

Certificate Requirements

Analytics Courses (9 credit hours)

DTSC 1110 - Sports Analytics (3)

EXER 3900 - Undergraduate Research (1 to 3) (*must be taken for 3 credit hours*)

EXER 4115 - Undergraduate Research Methods in Applied Physiology, Health, and Clinical Sciences (3)

Elective Courses (3 credit hours)

Select one of the following:

DTSC 2110 - Sport Business Analytics (3)

EXER 2333 - Baseball Through History and Playing I (1800s-1947) (3)

EXER 2334 - Baseball Through History and Playing II (1947-Present) (3)

EXER 3100 - Organization and Administration of Exercise Science (3)

Certificate Total = 12 Credit Hours

Progression Requirements

All courses in the certificate program require a grade of C or above.

Early Entry: M.S. or Graduate Certificate in Data Science and Business Analytics

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the

time the first graduate course is taken)

- Minimum 3.2 overall undergraduate GPA and 3.2 GPA in the major
- Submit application online at mygradschool.charlotte.edu and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School
- Test scores from the GRE are NOT required of Early Entry applicants to the Data Science and Business Analytics program. Applicants must submit all other elements of a standard graduate application to the program.

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree. A maximum of 12 credit hours may double count.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Accelerated Master's Program

(for High School Seniors and UNC Charlotte Undergraduate Freshmen)

Academically talented high school seniors and UNC Charlotte undergraduate freshmen are encouraged to apply to an Accelerated Master's Program to begin work toward both undergraduate and graduate degrees in their Freshman year.

Admission Requirements

- See University Admission Requirements
- Minimum high school GPA of 3.75 (on a 4.0 scale)
- Minimum score of 1220 on SAT

Progression Requirements

Students must maintain a strong academic record at both the undergraduate and graduate levels with a cumulative undergraduate GPA of 3.2 or higher and a cumulative graduate GPA of 3.0 or higher. Students accepted into the Accelerated master's program are subject to the same policies that pertain to other matriculated graduate students.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for

required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on the Accelerated Master's Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/accelerated-masters.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Early Entry: Master of Science in Health Informatics and Analytics

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum overall undergraduate GPA of 3.2
- Submit application online at mygradschool.charlotte.edu and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School
- Test scores from the GRE are NOT required of Early Entry applicants to the Health Informatics and Analytics program. Applicants must submit all other elements of a standard graduate application to the program.

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for

required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Early Entry: Graduate Certificate in Health Informatics and Analytics

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate certificate before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Submit application online at mygradschool.charlotte.edu and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School
- Test scores from the GRE are NOT required of Early Entry applicants to the Health Informatics and Analytics program. Applicants must submit all other elements of a standard graduate application to the program.

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Cato
College of
Education

College of Education

education.charlotte.edu

The mission of the Cato College of Education at UNC Charlotte is to prepare highly effective and ethical professionals who have a positive impact on children, youth, families, community, and schools and who are successful in urban and other diverse settings. This mission is accomplished through teaching, research, and community engagement that lead to improved practice and by working in partnership with schools, communities, and university colleagues.

The College of Education consists of these departments:

- Department of Counseling
- Department of Educational Leadership
- Department of Middle, Secondary, and K-12 Education
- Department of Reading and Elementary Education
- Department of Special Education and Child Development

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Degree Programs

Majors

- Child and Family Development: (Birth-Kindergarten licensure)
- Elementary Education (grades K-6 licensure)
- Middle Grades Education (grades 6-9 licensure)
- Special Education: General Curriculum (grades K-12 licensure)
- Special Education: Adapted Curriculum (grades K-12 licensure)
- Special Education and Elementary Education (grades K-6 licensure) (*Dual Major*)

Minors

- Applied Understandings in Global Education
- Child and Family Development (non-licensure)
- Collaborative Educators in Inclusive Schools (non-licensure)
- Foreign Language Education (grades K-12 licensure)*
- Inclusion, Disability, and Exceptionalities in American Society (non-licensure)
- Reading Education (grades K-12 licensure)**
- Secondary Education (grades 9-12 licensure)***
- Teaching English as a Second Language (grades K-12 licensure)**
- Urban Youth and Communities (non-licensure)

Graduate Early Entry Programs

- Academically or Intellectually Gifted, Graduate Certificate, Early Entry
- Elementary Education, M.Ed., Early Entry
- Elementary Mathematics Education, Graduate Certificate, Early Entry
- Foreign Language Education, Graduate Certificate, Early Entry
- Learning, Design, and Technology, Online Learning and Teaching Concentration, Graduate Certificate, Early Entry
- Reading Education, M.Ed., Early Entry
- Teaching: Middle and Secondary Education, Graduate Certificate, Early Entry

*The Minor in Foreign Language Education, offered in collaboration with the Department of Languages and Culture Studies in the College of Humanities & Earth and Social Sciences, leads to teacher licensure in one of the following areas (grades K-12):

- | | |
|---|--|
| <ul style="list-style-type: none">• French• German | <ul style="list-style-type: none">• Japanese• Spanish |
|---|--|

**The Reading Education and Teaching English as a Second Language license can only be added to another licensure area.

***The Minor in Secondary Education, offered in collaboration with appropriate departments in the College of Humanities & Earth and Social Sciences, leads to licensure to teach in one of the following areas of Secondary Education (grades 9-12):*

- *Biology*
- *Chemistry*
- *English*
- *Environmental Studies*

- *Mathematics*
- *Physics*
- *Political Science*

In collaboration with the College of Arts + Architecture, the Cato College of Education offers professional education coursework that leads to licensure to teach in one of the following areas (grades K-12):

- *Art*
- *Dance*

- *Music*
- *Theatre*

Accreditation

See the "Academic Programs" section of this Catalog for details about program accreditation.

Program Responsibilities

The Cato College of Education has these undergraduate program responsibilities:

- To develop, deliver, and evaluate high quality undergraduate programs that prepare teachers and other professional personnel for schools and related agencies.
- To operate programs that meet the standards of external governing, licensing, and accrediting agencies.
- To address the culturally diverse educational needs of its particular region.
- To initiate and support activities in global perspectives of its faculty and students.
- To respond effectively to the problems and needs of children, their families, and professionals in schools and related agencies.

Program Values

The Cato College of Education holds these program values:

- *We are a community of scholars* who are committed individually and collectively to creating learning opportunities and environments where we enhance the capacity of our students to have a positive impact on children, youth, communities, families and schools. We are committed to meeting the developmental and educational needs of our students and to maximize the growth, development, and learning of each individual.
- *In our programs of study*, we are committed to high quality programs that are standards-based, to the ongoing assessment of candidates and programs for the purpose of continuous improvement, to collaboration and outreach, and to the highest standards of professional practice and scholarship. We are committed to international understanding and involvement.
- *In fulfilling our professional roles*, we are committed to the generation, dissemination, and application of knowledge. We, therefore, expect that faculty will be teacher-scholars and that they will maintain a balanced commitment to teaching, research, and service. We have a strong commitment to academic excellence and exceptional quality in all that we do.
- *In our dealings with each other, our students, and our professional colleagues in schools and communities*, we are committed to valuing the unique contributions of each individual. We are committed to thoughtfulness, reflection, flexibility, and the exploration of new ideas. We are committed to openness, honesty, forthrightness, and the highest standards of integrity and ethical behavior. We strive to be collegial, collaborative, human, and respectful of others, even when we are not in total agreement with their views or with their work, and we are committed to being sensitive to and supportive of others, including students, staff, faculty, and our professional colleagues in the community.

Conceptual Framework

Professional Educators: Advancing Educational Equity through Excellence and Engagement, the Conceptual Framework for Professional Education Programs at UNC Charlotte, has a strong emphasis on the Cato College of Education's updated vision to be a national leader in educational equity, excellence, and engagement. During coursework, early field experiences, and clinical practice candidates have multiple opportunities to develop the knowledge, skills, and dispositions necessary to produce highly effective and engaged professionals. Our programs seek to develop the proficiencies that are indicated below:

- Professional Responsibilities
 - Ethics
 - Professional Identify and Continuous Growth
 - Leadership
 - Collaboration
 - Policies, Laws, Standards, and Issues
- Dispositions
 - Advocacy
 - Self-Awareness
 - Reflective Practice
 - Social Justice
- Learners and Learning

- Positive Impact and Accountability
- Cultural Competence and Culturally Sustaining Practice
- 21st Century Literacies, Competencies, and Character Qualities
- Effective Pedagogy
 - Specialty Area Knowledge
 - Pedagogical Knowledge
 - Research-Based Practice
 - Research Skills

Honors in Education

The Education Honors Program recruits and supports undergraduate education majors and minors who are interested in enrichment opportunities to supplement their curriculum requirements. These students have the potential and motivation for in-depth academic engagement, leadership, critical reflection, and/or creativity within the education field. The program is designed to cultivate an inclusive community, and students' sense of belonging, reflection, connectedness in inquiry, and leadership/advocacy. Students engage in a self-selected, inquiry-based project that will deepen their knowledge and prepare them to be inquirers/leaders/advocates in their respective field of education.

Admission Requirements

Current UNC Charlotte Undergraduate Students

Admission to the Honors in Education program requires the following:

- 1) See University Admission Requirements
- 2) Declared major or minor in education within the Cato College of Education
- 3) Admission to a teacher education or licensure program with a minimum 3.00 cumulative GPA is preferred. If a promising student does not yet meet the GPA requirement, but has the potential for high task commitment, achievement, and/or creativity in any area of study, research, leadership, or service, the Honors Committee will consider the student's application on a case-by-case basis. The student AND the academic advisor/faculty member should explain how the student will be able to handle the rigors of the Education Honors Program in the application and approval forms.
- 4) Completion of 15 credit hours of coursework (including EDUC 1100 or EDUC 1511 or MDSK 2100) prior to application for the Honors in Education Program
- 5) Completed application form and recommendation by academic advisor and/or faculty member
- 6) A one-page statement explaining:
 - a) The candidate's academic/career goals in the field of education
 - b) How the Honors in Education program is relevant to the candidate's academic and/or career interests

It is recommended that before applying to the Honors in Education program, candidates should meet with their academic advisors and/or Co-Program Director of the Education Honors Committee to discuss their interest, motivation, and academic plan of study.

Course Requirements

Required Courses (6 credit hours)

EDUC 3789 - Seminar: Honors in Education (3)

RSCH 4101 - Education Research Methods (3)

Capstone Course (3 credit hours)

Select one of the following:

CUYC 3600 - Community Engagement Capstone Seminar (3) (SL)

EDUC 3790 - Honors Thesis in Education (3)

EDUC 4201 - Education and Globalization: Theory and Practice Seminar (3)

Progression Requirements

- RSCH 4101 is a prerequisite for EDUC 3789
- EDUC 3789 and RSCH 4101 must be completed with a grade of A or B prior to taking the last course in the Education Honors Program
- CUYC 3600, EDUC 3790, or EDUC 4201 must be completed with a grade of A
- To qualify for graduation with honors recognition, a student must, at a minimum, have at least a 3.2 GPA for all honors courses in their honors program and have an overall GPA of 3.0 at graduation to earn the distinction of Education Honors.

Admission to Upper Division

University Honors Program (UHP) students may elect to transfer to the Education Honors Program, which is a disciplinary-level program. For more details about the UHP transfer options please see the Education Honors Program website: <https://honorseducation.charlotte.edu/uhp-transfer-options>.

Special Policies or Requirements

- Honors students have the potential and motivation for more in-depth academic engagement, leadership, critical reflection, and/or creativity. Potential Education Honors students may exhibit a need for enrichment in any area of study (e.g., elementary, middle grades, high school), research (e.g., quantitative, qualitative, mixed-methods), leadership/advocacy (e.g., equitable educational opportunities for minoritized groups of students), or local/global engagement (e.g., civic engagement, study abroad, service).
- Be formally admitted to the Honors in Education program
- Choose one Honors track: Research Thesis, Service/Experiential Learning, or Study Abroad (requires candidate to complete a study abroad or equivalent domestic experience)
- Submit a written proposal for a self-selected inquiry project to the Honors Project Review Committee
- Disseminate a product to an authentic audience, including the Honors Project Review Committee (research advisor, reader, and any invited guests)
- File for honors candidacy with the Education Honors Committee and the Honors College in accordance with guidelines set by the Honors Council and the College of Education

Teacher Education Policies and Procedures

Admission to Teacher Education Programs

See the specific degree program for admission requirements. Information about additional requirements and procedures may be obtained in the Office of Teacher Education Advising and Licensure (TEAL) in the Cato College of Education. Students in Art, Dance, Music, or Theatre should contact the Arts Education Specialist for specific admission requirements in their major department.

Professional Dispositions

Professional dispositions are consistent patterns of behavior or habits that may impact teaching effectiveness. At the time of entry to the program, all students are asked to sign a dispositions statement that fully identifies and describes behavior patterns that are appropriate and inappropriate in professional conduct. Education students are expected to demonstrate positive professional dispositions in all of their University activities (courses, clinicals, etc.).

Retention in Teacher Education Programs

There are three minimum requirements for retention in a teacher education program:

- 1.) A grade of C or above (a) in all professional education courses *and* (b) in all courses in the student's area of teaching specialization
- 2.) GPA of 2.5 or above (a) overall, (b) in all professional education courses, *and* (c) in the student's area of teaching specialization
- 3.) Disclosure of any criminal charges since admission to the program

Some teacher education programs have additional or higher requirements for retention. Information about these additional requirements can be obtained in the program's home department. *Note: Requirements for admission to student teaching are higher than requirements for retention in the program.*

Admission to Yearlong Internships and Student Teaching

Most undergraduate teacher education programs incorporate student teaching in a yearlong internship that spans a student's Senior year. The yearlong internship consists of one semester of intensive part-time clinical work in the classroom while completing coursework on campus. This clinical semester is followed by a semester of full-time student teaching, usually completed in the same classroom.

Students must apply and be formally admitted to a yearlong internship two semesters prior to the start of student teaching, which is typically in the first or second semester of the Junior year. In addition, during the first semester of their yearlong internship, students are screened for eligibility for student teaching. The minimum requirements for admission to student teaching are as follows:

- 1.) Senior status
- 2.) Prior admission to a teacher education program
- 3.) Completion of all other course work in a student's program of study
- 4.) An overall GPA of 2.50 or above in the student's total program of study
- 5.) Grades of C or above in all professional education courses and a GPA of 2.75 or above in those courses
- 6.) Grades of C or above in all courses in the student's area of teaching specialization and a GPA of 2.75 or above in those courses
- 7.) Recommendation from the student's faculty advisor(s) certifying readiness to student teach

Some teacher education programs have additional requirements for admission to the yearlong internship and student teaching. Information about those requirements can be obtained from the program's home department. Information about procedures and deadlines for applying for yearlong internships and student teaching in all programs can be obtained in the Office of School and Community Partnerships or online at oscp.charlotte.edu.

Graduation and Licensure Requirements

For a degree to be conferred, a student must successfully complete all program requirements, which at a minimum includes:

- Grades of C or above in all professional education classes

For a recommendation of licensure:

- A passing grade in student teaching with recommendation from the clinical educator, school principal, and University Supervisor
- Per NC State Board of Education policy, beginning September 1, 2019 (fall 2019 semester), all candidates seeking a North Carolina licensure recommendation must have an official edTPA minimal passing score.

Academic Advising

The Office of Teacher Education Advising and Licensure (TEAL) serves and advises all students involved in teacher education programs prior to their admission to the major (pre-education students). TEAL is responsible for:

- Promotion of teacher education programs and recruitment of students prior to their admission to UNC Charlotte
- Collaboration with pre-education students and advisors at community colleges in North Carolina
- Academic advisement of pre-education students prior to their admission to a specific teacher education program (which typically occurs during their Sophomore year)
- Collaboration with departments within the College of Arts + Architecture and the College of Humanities & Earth and Social Sciences concerning admission to teacher education programs when those departments have teacher education tracks or degrees
- Academic support services for both students and their faculty advisors as students admitted to a teacher education program progress through their programs, complete student teaching, and apply for licensure
- Management of all applications for teacher licensure

In collaboration with academic departments involved in teacher education, the TEAL Office is the Cato College of Education's central source of information about academic program requirements; criteria and procedures for admission to a specific teacher education program; disseminate information and testing preparation resources for Praxis Core, Pearson and Praxis Subject Assessment examinations; requirements and procedures for obtaining licensure in North Carolina (or in other states that have reciprocity agreements with North Carolina); and final audits to ensure completion of all program and licensure requirements. For more details, visit teal.charlotte.edu.

Support Offices and Resources

Center for Educational Measurement and Evaluation

The Center for Educational Measurement and Evaluation (CEME) is a collaborative research center within the College of Education. CEME provides program evaluation services and statistical, methodological, and measurement expertise to schools and related agencies. Through CEME, faculty and students engage with educators in mutually beneficial projects that lead to evidence-based practices and improved educational outcomes and policy. Visit ceme.charlotte.edu.

Center for Science, Technology, Engineering, and Mathematics Education

The Center for Science, Technology, Engineering, and Mathematics Education (CSTEM) sponsors a wide variety of programs and projects that involve pre-service and in-service teachers and are designed to enhance the quality of instruction in science, technology, engineering, and mathematics, for both pre-college and university students. Visit <https://cstem.charlotte.edu/>.

Office of School and Community Partnerships

The Office of School and Community Partnerships (OSCP) provides high quality learning experiences for pre-service educators and cutting edge professional development for career practitioners by fostering collaborative relationships with diverse schools, public agencies, and multiple constituencies. OSCP collaborates with these stakeholders to ensure successful clinical and internship experiences for education candidates and continuing education opportunities that meet and exceed education standards. The individual needs of the pre-college candidate, teacher-in-training, and career professional are prioritized to ensure equity, excellence, and engagement throughout all programming sponsored by OSCP. Visit osacp.charlotte.edu for more information.

Special Facilities and Resources

Examples that support the work of both faculty and students in undergraduate teacher education programs include:

- The Cato College of Education Building includes classrooms for reading/language arts, science/mathematics, social studies, and student study rooms.
- The *Education Learning Community* is a one-year program for students who wish to become teachers. Community members take some General Education courses as a cohort group and participate in social activities, community service, and professional development activities.
- The Cato College of Education has partnerships with the *Partner Schools Network* that consists of schools in the region, which are public schools that work closely with the College to provide excellent clinical experience opportunities.
- The Atkins Library supports teacher education programs with a large children's literature collection and curriculum and instructional materials. Visit library.charlotte.edu for details on additional available resources.

Financial Aid

A number of scholarships and awards are available to undergraduate students in teacher education. Information about these awards is available online at education.charlotte.edu/resources/student-resources/financial-aid, as well as in the Office of Teacher Education Advising and Licensure (TEAL). Awards that recognize the achievements of undergraduate students in teacher education programs are listed below. Additional information about each of these awards can be found at ninerscholars.charlotte.edu/scholarshipsearch.

Student Organizations

Examples of organizations that are especially relevant to undergraduate students in teacher education programs include:

- **Student North Carolina Association of Education** - The Student North Carolina Association of Education (SNCAE), affiliated with the North Carolina Association of Educators (NCAE) and the National Education Association (NEA)
- **Student Council for Exceptional Children** - The Student Council for Exceptional Children (SCEC), affiliated with the Council for Exceptional Children (CEC)
- **College Middle Level Association** - The College Middle Level Association promotes excellent teaching in the middle grades and support for middle grades teacher candidates
- **Omicron Pi Chapter of Kappa Delta Pi** - The Omicron Pi Chapter of Kappa Delta Pi is an international honor society in education for undergraduate and graduate students. To qualify for membership, undergraduate students must have a 3.5 cumulative GPA, 30 credit hours, and admission to teacher education. Graduate students must have a 3.75 cumulative GPA, 18 credit hours, and majoring in a field of education.

Department of Counseling

counseling.charlotte.edu

Please see the *UNC Charlotte Graduate Catalog* for graduate programs and degrees related to the Department of Counseling.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Department of Educational Leadership

edld.charlotte.edu

Undergraduate Programs

- Early Entry: Graduate Certificate in Learning, Design, and Technology, Online Learning and Teaching Concentration

Please see the *UNC Charlotte Graduate Catalog* for graduate programs and degrees related to the Department of Educational Leadership.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Early Entry: Graduate Certificate in Learning, Design, and Technology, *Online Learning and Teaching Concentration*

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

- (Optional) Acceptable scores on the appropriate graduate standardized test (e.g., GRE)
- (Optional) A work sample that is appropriate for the degree such as an instructional video, portfolio, tutorial, research paper, or technology-enhanced lesson plan

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Department of Middle, Secondary, and K-12 Education

mdsk.charlotte.edu

Undergraduate Programs

- **B.A. in Middle Grades Education**
- **Minor in Foreign Language Education (K-12)**
- **Minor in Secondary Education**
- **Minor in Teaching English as a Second Language**
- **Minor in Urban Youth and Communities**
- **Early Entry: Graduate Certificate in Foreign Language Education**
- **Early Entry: Graduate Certificate in Teaching: Middle and Secondary Education**

The Department of Middle, Secondary, and K-12 Education offers programs leading to a Bachelor of Arts degree in Middle Grades Education; Minors in Secondary Education, Foreign Language Education (FLED), and Teaching English as a Second Language (TESL); teaching licensure in Middle Grades, Secondary, and K-12 Education (foreign language and English as a second language) through Graduate Certificate in Teaching and Master of Arts in Teaching Programs; a Master's of Education degree in Curriculum and Instruction with Concentrations in Middle Grades Education, Secondary Education, Teaching English as a Second Language, and Curriculum Leadership; and a Ph.D. in Curriculum and Instruction. (See the *UNC Charlotte Graduate Catalog* for details on the graduate programs.)

More than ever, the teaching profession offers college graduates exciting opportunities and challenges. The undergraduate teacher education programs offered by the department provide the first crucial step in career development for aspiring teachers of grades 6-9 (middle grades), 9-12 (secondary), and K-12 (foreign languages and English as a second language).

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Arts in Middle Grades Education

Education qualifies graduates for the North Carolina Initial Professional License (IPL) in one of the following four content areas in grades 6-9: English language arts, mathematics, science, or social studies. Graduates of the program are prepared to meet the North Carolina Professional Teaching Standards and the ten Interstate New Teachers Assessment and Support Consortium (INTASC) Standards for new teachers in Content Pedagogy, Student Development, Diverse Learners, Multiple Instructional Strategies, Motivation and Management,

Communication and Technology, Planning, Assessment, Reflective Practice, and School and Community Involvement. Graduates have specific coursework and clinical experiences in a variety of settings in order to learn and apply evidence-based knowledge and practices in the field of adolescent development and middle grades education.

Admission Requirements (Pre-Education Foundational) (6-7 credit hours)

Freshmen and Transfers

Minimum criteria for Admission to the MDSK program:

- See University Admission Requirements
- Completion of the following courses with a minimum grade of a C by the end of the semester of application
 - EDUC 1511 – Local Social Science: Public Education and Schooling in the U.S. (3 to 4)
 - SPED 2100 - Exceptionality in Schools and Society (3)
- An overall GPA of 2.7
- A passing score on the PRAXIS Core exam or acceptable alternatives (SAT or ACT scores)
- 30 credit hours
- Pass a criminal background check (completed at time of application in TEAL)
- Signed Statement of Commitment to Professional Dispositions

Currently Enrolled Students

- *Declaration of Major:* The Middle Grades Education major is intended to be started in the second semester of Sophomore year. Students should plan to declare the major no later than the first semester of the Sophomore year. Students must complete an "Application for Admission to a Teacher Education Program" in the Office of Teacher Education Advising and Licensure (TEAL) in the Cato College of Education. Students must apply for admission to a specific teacher education program and complete the admissions process in order to enroll in any professional education courses at the 3000 level or above.

Degree Requirements

The Major in Middle Grades Education leading to the B.A. degree requires a minimum of 120-125 credit hours.

General Education Courses (31-32 credit hours)

These course requirements vary with a student's academic concentration. In some concentrations, courses may count for both Gen Ed and the requirements of the concentration.

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. Students in this major should plan on taking the following courses that meet general education requirements and also satisfy courses in one of the concentration areas within the major:

Science Concentration

Select any two courses listed in the concentration to meet both Natural Science and concentration requirements.

Mathematics Concentration

Select the following to meet both Mathematics and Logical Reasoning and concentration requirements:

- MATH 1120 - Calculus (3)
STAT 1220 - Elements of Statistics I (BUSN) (3)
or - STAT 1222 - Introduction to Statistics (3)

Core Courses (23 credit hours)

Select one of four academic concentrations to complete (Math, Science, English or History). Dual licensure in a second concentration is possible with additional concentration courses. Admission to Teacher Education and advisor approval are required in order to register for any of the following courses.

- EDUC 4290 - Inclusion of Students with Varied Learning Needs (3)
or SPED 4276 - Teaching Reading to Middle and Secondary Learners (3)
MDLG 3130 - The Early Adolescent Learner (3)
MDLG 3131 - The Philosophy and Curriculum of Middle Grades Education (3)
MDSK 3100 - The Connected Classroom (3)
MDSK 3151 - Instructional Design and Technology Integration (3)
MDSK 3252 - Differentiating Instruction for Adolescent Learners (3)
MDSK 4210 - Classroom Leadership (2)
TESL 4204 - Learning, Schools, and Community (3)

Methodology Courses (3 credit hours)

Select two of the following methodology courses that aligns with the intended areas of licensure:

- MDSK 4251 - Teaching Science to Middle and Secondary School Learners (3)
MAED 4252 - Teaching Mathematics to Secondary School Learners (3)
MDSK 4253 - Teaching Social Studies to Middle and Secondary School Learners (3) (SL)
ENGL 4254 - Teaching English/Communication Skills to Middle and Secondary School Learners (3)

Content Area Instruction and Assessment (3 credit hours)

Select one of the following sections of MDSK 4300 specific to concentration area (English, Science, Social Studies, Math).

- MDSK 4300 - Content Area Instruction and Assessment (3)

Concentration Courses

Mathematics (24 hours)

- MAED 4103 - Using Technology to Teach Secondary School Mathematics (3)
MATH 1120 - Calculus (3) *
or MATH 1241 - Calculus I (3)
MATH 2340 - Number Concepts and Relationships (3)
MATH 2341 - Algebra and Algebraic Structures (3)
MATH 2342 - Data Analysis and Probability (3)
MATH 2343 - Geometry and Measurement (3)
STAT 1220 - Elements of Statistics I (BUSN) (3) *
or STAT 1222 - Introduction to Statistics (3) *

Math Elective* (3)

*Satisfies a Math Logic/General Education requirement

Science (23 hours)

- BIOL 1110 – Principles of Biology I* (3)

and BIOL 1110L - Principles of Biology I and Lab (1)

- BIOL 2259 - Fundamentals of Microbiology (3) *
CHEM 1111 – Chemistry in Today's Society *(3)
and CHEM 1111L - Chemistry in Today's Society Lab (1)
ESCI 1101 – Earth Science-Geography* (3)
and ESCI 1101L - Earth Science-Geography Lab (1)
GEOL 1200 (3) – Physical Geography* (3)
and GEOL 1200L - Physical Geology Lab* (1)
PHYS 1101 (3) – Introduction to Physics* (3)
and PHYS 1101L - Introduction to Physics Lab* (1)

*Satisfies a math logic/General Education requirement

English (24 hours)

- ENGL 2100 - Writing About Literature (3)
ENGL 3104 - Literature for Adolescents (3)
ENGL 3190 - Teaching Academic English to Adolescent Learners (3)
ENGL 4200 - Teaching of Writing (3)
ENGL 4201 - Teaching of Multiethnic Literature (3)
ENGL 4271 - Studies in Writing, Rhetoric, and New Media (3)
Two ENGL elective courses dealing with British or American Literature (6)

History (24 hours)

- HIST 1512 - Local Arts/Humanities: Issues in US History (3)
HIST 2050 - Themes in United States History (3) *
HIST 2051 - Themes in European History (3) *
HIST 2297 - History of North Carolina, 1500 to the Present (3)
HIST XXXX - One course in Non-Western History (3)
HIST XXXX - One course in Non-Western History (3)
HIST XXXX - One course in Non-Western History (3)
POLS 1511 - Local Social Science: Introduction to American Politics (3)

*Satisfies a Math Logic/General Education requirement

Internship & Student Teaching (15 credit hours)

An internship and student teaching experience (MDLG 4440) are requirements for completion of the major. The internship must begin one semester prior to a candidate's final student teaching semester. During the internship semester, students spend one day per week in an assigned classroom while completing coursework on campus. Upon completing the internship semester, students complete full-time student teaching (MDLG 4440) in the same classroom during the final graduating semester for a total of 15 credit hours.

An application is required for admission to the internship and student teaching experience and must be completed in the semester prior to beginning the internship semester (see the Office of School and Community Partnerships website for application deadlines). Student teaching is required the last semester upon completing all other coursework required for the major. Student teaching requires the undergraduate advisor's recommendation. See the Office of School and Community Partnerships website for more information.

- MDLG 4440 - Student Teaching/Seminar: 6-9 Middle Grades Education (15)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

For a degree to be conferred, students must successfully complete all program requirements which include:

- Minimum GPA of 2.7 to declare major
- Minimum GPA of 2.5 must be maintained to remain enrolled.
- Students should plan to take EDUC 1511 and SPED 2100 during Freshman Year.
- Grades in professional education and concentration courses must be C or above.
- Minimum overall GPA in professional education and concentration courses must be 2.75.
- Students may repeat a professional course once.

Requirements for Licensure and Graduation

- A grade of P in student teaching with recommendation from Cooperating Teacher, University Supervisor, and Principal
- Passing score on edTPA is required for licensure and graduation.

Admission to Upper Division

Minimum criteria for Admission to the MDSK program for all currently enrolled and transfer students:

- See University Admission Requirements
- Completion of the following courses with a minimum grade of a C by the end of the semester of application:
 - EDUC 1511 - Local Social Science: Public Education and Schooling in the U.S. (3 to 4)
 - SPED 2100 - Exceptionality in Schools and Society (3)
- An overall GPA of 2.7
- A passing score on the PRAXIS Core exam or acceptable alternatives (SAT or ACT scores)
- 30 credit hours
- Pass a criminal background check (completed at time of application in TEAL)
- Signed Statement of Commitment to Professional Dispositions

Special Policies or Requirements

The successful completion of this degree program includes meeting the North Carolina Department of Public Instruction's licensure requirements for certification. Consequently, additional requirements must be completed during the student's program and are listed below. Since state licensure requirements often change, additional work may be required to complete the program with a teaching license.

Planning Sheet

All education students are tracked through their program with a Program Planning Sheet. The original planning sheet is uploaded to the advising system and lists all courses taken, transfer hours, General Education and minor requirements met, and courses remaining in the program. Note that the University requires that the minimum number of credits in a degree program is 120 credit hours.

Clinicals

Some courses in the professional program include a clinical requirement where students complete specific activities or designated hours in an appropriate setting. Clinicals are designed to expose students to diverse school demographics, locations, and programs.

Academic Advising

The Middle Grades Education major has a very structured curriculum. Students who intend to major in Middle Grades Education are classified as Pre-Education majors in Middle Grades Education. During the pre-education phase, students are advised by TEAL advisors regarding General Education and Academic Concentration courses to meet the requirements for admission to the Middle Grades Education major.

Upon completion of the education prerequisite courses, students apply for admission to the MDSK program as majors. Upon admission to full-standing in the program, students are advised through the MDSK Advising Center where they plan the remainder of their program of studies. Current prospective candidates should reach out to Dr. Adam Myers for guidance.

Honors Program

For details about the Honors Program in Education, see the beginning of the Cato College of Education section.

Minor in K-12 Foreign Language Education

A Minor in K-12 Foreign Language Education requires 35 credit hours, including foreign language methodology and assessment courses, and 21 hours for the student teaching semester.

Admission Requirements

Freshmen and Transfers

Students wishing to Minor in K-12 Foreign Language Education must be approved for admission to the minor by meeting statewide teacher education program admission requirements. Advising and admission to the minor are administered through the Office of Teacher Education Advising and Licensure (TEAL) in the College of Education. The criteria for admission include:

- See University Admission Requirements
- 30 earned credit hours
- GPA of 2.7 or above
- Major in a foreign language for which there is teacher licensure (French, German, Japanese, or Spanish)
- Grades of C or above in either:
 - MDSK 2100
 - EDUC 1100/EDUC 1511 and SPED 2100
- A passing score on the Praxis Core exam or acceptable alternatives (SAT or ACT)
- Signed Statement of Commitment to Professional Dispositions
- Pass a criminal background check (completed at time of application in TEAL)
- Recommendation of major advisor

Students should consult with an advisor in the Office of Teacher Education Advising and Licensure (TEAL) as soon as they begin considering teacher education in order to graduate on time.

After admission to the minor, advising is offered through the Department of Middle, Secondary, and K-12 Education in collaboration with advising in the student's major department.

The minor is designed to be coordinated with coursework in the major, with the final semester as the full-time student teaching semester.

Successful completion of the minor leads to a recommendation for the initial teaching license in the K-12 subject area associated with the student's major (French, German, Japanese, or Spanish).

Minor Requirements

Prerequisites (3 credit hours)

MDSK 2100 - (3)

- or EDUC 1100 –Foundations of Education and Diversity in Schools – Prospect Curriculum (4)
- or EDUC 2100 – Foundations of Education and Diversity in Schools (3)

Pre-Internship (11 credit hours)

MDSK 3100 - The Connected Classroom (3)

MDSK 3151- Instructional Design and Technology Integration (3)

MDSK 4210 - Classroom Leadership (2)

MDLG 3130 - The Early Adolescent Learner (3)

or SECD 4140 - Adolescence and Secondary Schools (3)

Yearlong Internship and Student Teaching (21 credit hours)

Students are required to complete a yearlong internship beginning the semester prior to the student teaching semester and ending upon the successful completion of the student teaching semester. Application to the yearlong internship should be submitted to the Office of School and Community Partnerships during the first semester of education coursework. Deadlines are posted on the Office of School and Community Partnerships website at osacp.charlotte.edu. Prior to student teaching, teacher candidates must demonstrate advanced foreign language skills by obtaining a minimum score of Advanced Low on the Oral Proficiency Interview (OPI).

Major/Content advisor recommendation is required for beginning the Yearlong Internship in Semester 2 of program course sequence. Requirements include:

- GPA of 2.7 in the major/licensure, with grades of C or above, can be attained before the student teaching semester
- Documentation of Major/Content Planning Sheet for Student Folder in the Department of Middle, Secondary, and K-12 Education

FLED 4104 - Assessment in the Teaching of K-12 Foreign Languages (2)

FLED 4105 - Applied Content Pedagogy (1)

FLED 4200 - Methods in Teaching Foreign Languages (3)

FLED 4469 - Student Teaching/Seminar: K-12 Foreign Language (12)

Note: Enrollment in FLED 4469 requires admission to student teaching through the College's Office of School and Community Partnerships, a GPA of 2.75 in the major, licensure area, and in professional education courses with no grades lower than a C, a 2.5 cumulative GPA, a minimum score of Advanced Low on the Oral Proficiency Interview (OPI), and completion of a scholarly paper written in the intended language of instruction (French, German, Japanese or Spanish) that is evaluated by a post-secondary instructor at the proficient or accomplished level in all areas of the corresponding rubric.

Minor Total = 35 Credit Hours

Progression Requirements

For a degree to be conferred, students must successfully complete all program requirements which include:

- Grades of C or above in all professional education courses
- Education degree minimum GPA of 2.75 and a minimum content GPA of 2.75

Recommendation for licensure must include:

- A grade of P in student teaching with recommendation from a Clinical Educator, University Supervisor, and Principal
- Passing score on edTPA is required for licensure and graduation.

Special Policies or Requirements

The successful completion of this degree program includes meeting the North Carolina Department of Public Instruction's licensure requirements for certification. Consequently, additional requirements must be completed during the student's program and are listed below. Since state licensure requirements often change, additional work may be required to complete the program with a teaching license.

Minor in Secondary Education

The Minor in Secondary Education prepares excellent and reflective teacher candidates in the fields of English, Mathematics, Comprehensive Science, and Comprehensive Social Studies to successfully utilize 21st century knowledge, skills, and dispositions for addressing the demands of an ever-changing global and ethnically diverse society, community, and classroom while implementing effective, research-based content pedagogy to meet the individual cognitive and emotional needs of all students, and systematic and reflective analysis of connections between practice and student learning.

A Minor in Secondary Education requires 35 credit hours, including a 3 credit hour introductory course and 12 credit hours for the student teaching semester. The Minor in Secondary Education qualifies graduates for an entry-level (Standard Professional I) license to teach in one of the following subject areas in grades 9-12: English, Biology, Chemistry, Comprehensive Science, Comprehensive Social Studies, Environmental Studies, Physics, or Mathematics. Students major in an appropriate Arts and Sciences discipline and minor in Secondary Education through completion of a three-semester sequence of courses, which includes a yearlong internship incorporating the student teaching semester. The Comprehensive Social Studies license builds on a major in History, Geography, or Political Science. The Comprehensive Science license builds on a Major in Biology, Chemistry, Environmental Studies, or Physics.

Graduates of the Minor in Secondary Education are prepared to meet the state and national standards for new teachers in the following areas: content and content pedagogical knowledge; authentic applications of instructional design; effective integration of advanced and emerging technologies; respectful learning environments for a diverse student population; facilitation of learning for all students through collaboration and use of multiple instructional strategies; student motivation and management; purposeful and reflective practice; systematic formative and summative assessment; and leadership in schools, community, and profession.

Admission Requirements

Current UNC Charlotte Undergraduate Students

Students wishing to minor in Secondary Education must be approved for admission to the minor by meeting statewide teacher education program admission requirements. Advising and admission to the minor are administered through the Office of Teacher Education Advising and Licensure (TEAL) in the College of Education.

The criteria for admission include:

- See University Admission Requirements
- 30 earned credit hours
- GPA of 2.7 or above
- Major in a subject area for which there is teacher licensure (English, Math, Biology, Chemistry, Environmental Studies, Physics, History, Political Science, and Geography)
- Grade of C or above in MDSK 2100
- A passing score on the Praxis Core exam or acceptable alternatives (SAT or ACT scores)
- Signed Statement of Commitment to Professional Dispositions
- Pass a criminal background check (completed at time of application in TEAL)

Students should consult with an advisor in Office of Teacher Education Advising and Licensure (TEAL) as soon as they begin considering teacher education in order to graduate on time.

After admission to the minor, advising is offered through the Department of Middle, Secondary, and K-12 Education in collaboration with advising in the student's major department.

The minor is designed to be coordinated with coursework in the major, with the final semester as the student teaching semester. Successful completion of the minor leads to a recommendation for the initial teaching license in the high school subject area associated with the student's major.

Minor Requirements

The undergraduate Minor in Secondary Education requires a major in the College of Humanities & Earth and Social Sciences in a discipline relevant to the curriculum in grades 9-12, a minimum of 120 credit hours, and a maximum of 128 credit hours as follows:

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. These course requirements vary with a student's academic major in the College of Humanities & Earth and Social Sciences and are defined by faculty in each major.

Core and Related Courses in an Appropriate College of Humanities & Earth and Social Sciences Major (30-66 credit hours)

Academic majors relevant to secondary education include Biology, Chemistry, Environmental Studies, English, Geography, History, Mathematics, Physics, and Political Science. The requirements for each major are defined by faculty in that major.

Secondary Education Courses (32 credit hours)

Admission to Teacher Education and Department of Middle, Secondary, K-12 Education advisor approval are required in order to register for any professional education coursework.

Prior to Admission (3 credit hours)

The following course should be taken prior to a student's final three semesters and must be completed with a grade of C or above for the student to qualify for admission to the Teacher Education Program in the selected field of secondary education.

MDSK 2100 - Foundations of Education in Secondary Schools (3)

Semester 1 (3 credit hours)

MDSK 3100 - The Connected Classroom (3)

Semester 2 (8 credit hours)

MDSK 3151 - Instructional Design and Technology Integration (3)

MDSK 4210 - Classroom Leadership (2)

SECD 4140 - Adolescence and Secondary Schools (3)

Semester 3 (6 credit hours)

(First Semester of Yearlong Internship)

Method Course (3 credit hours)

Select one of the following corresponding to content specific major in which candidate seeking licensure:

MDSK 4251 - Teaching Science to Middle and Secondary School Learners (3)

MAED 4252 - Teaching Mathematics to Secondary School Learners (3)

MDSK 4253 - Teaching Social Studies to Middle and Secondary School Learners (3) (SL)

ENGL 4254 - Teaching English/Communication Skills to Middle and Secondary School Learners (3)

Content Area Instruction and Assessment Course (3 credit hours)

Select the section of the following course that is specific to the content major:

MDSK 4300 - Content Area Instruction and Assessment (3)

Semester 4 (15 credit hours)

(Second Semester of Yearlong Internship)

SECD 4440 - Student Teaching/Seminar: 9-12 Secondary Education (15)

Yearlong Internship

Students are required to complete a yearlong internship beginning the semester prior to the student teaching semester and ending upon the successful completion of the student teaching semester. Application to the yearlong internship should be submitted to the Office of School and Community Partnerships during the second semester of professional education courses.

Major/Content advisor recommendation is required for beginning the Yearlong Internship in Semester 3 of program course sequence.

Requirements include:

- GPA of 2.75 in the major/licensure, with grades of C or above, must be attained before the student teaching semester
- Documentation of Major/Content Planning Sheet for Student Folder in the Department of Middle, Secondary, and K-12 Education

Minor Total = 35 Credit Hours

Progression Requirements

For a degree to be conferred, students must successfully complete all program requirements which include:

- Grades of C or above in all professional education courses
- Education degree minimum GPA of 2.75 and a minimum content GPA of 2.75

Recommendation for licensure must include:

- A grade of P in student teaching with recommendation from a Clinical Educator, University Supervisor, and Principal
- Passing score on edTPA is required for licensure and graduation.

Special Policies or Requirements

The successful completion of this degree program includes meeting the North Carolina Department of Public Instruction's licensure requirements for certification. Consequently, additional requirements must be completed during the student's program and are listed below. Since state licensure requirements often change, additional work may be required to complete the program with a teaching license.

Academic Advising

With the assistance of their major advisor in Arts and Sciences, students intending to seek a teaching license in an area of secondary education (grades 9-12) apply to the Teacher Education Program through the Office of Teacher Education Advising and Licensure (TEAL) in the Cato College of Education. Interested students are encouraged to visit TEAL at any time before applying to teacher education. Upon admission to the Teacher Education Program, which typically occurs at the end of the Freshman year or middle of the Sophomore year, students are assigned a secondary education advisor in the Advising Center of the Department of Middle, Secondary, and K-12 Education. This advisor has particular responsibility for guidance about professional education coursework. Assignment of the student's Minor in Secondary Education advisor is the responsibility of the Chair of the Department of Middle, Secondary, and K-12 Education (MDSK).

Minor in Teaching English as a Second Language

A Minor in Teaching English as a Second Language (TESL) requires the completion of 18 credit hours of specialized coursework. This program is designed for students already seeking an initial license in another content area who wish to gain expertise in the education of English Language Learners in the K-12 public school setting.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Students wishing to minor in Teaching English as a Second Language must be approved for admission to the minor by meeting statewide teacher education program admission requirements. Advising and admission to the minor are administered through the Office of Teacher Education Advising and Licensure (TEAL) in the Cato College of Education.

The criteria for admission include:

- 30 earned credit hours
- GPA of 2.7 or above
- Major or minor in a subject area for which there is teacher licensure (Elementary Education, Special Education, Secondary or Middle Grades Education, etc.)
- Grades of C or above in either:
 - MDSK 2100
 - EDUC 1100/EDUC 1511 and SPED 2100
- A passing score on the Praxis Core exam or acceptable alternatives (SAT or ACT scores)
- Signed Statement of Commitment to Professional Dispositions
- Pass a criminal background check (completed at time of application in TEAL)

Students should consult with an advisor in the Office of Teacher Education Advising and Licensure (TEAL) as soon as they begin considering teacher education in order to graduate on time.

After admission to the minor, advising is offered through the Department of Middle, Secondary, and K-12 Education in collaboration with advising in the student's major department. Contact the Cato School of Education for advising.

The minor is designed to be coordinated with Junior and Senior level coursework in the major. The final semester includes an advanced seminar/practicum in TESL taken in conjunction with the major area of studies internship in a high-needs ESL setting. Successful completion of the minor and passing licensure testing requirements lead to a recommendation for North Carolina add-on K-12 licensure in ESL.

Minor Requirements

TESL 4103 - Methods in Teaching English as a Second Language (3)

TESL 4104 - Authentic Assessment (3)

TESL 4204 - Learning, Schools, and Community (3)

TESL 4205 - Second Language Acquisition and Linguistics in K-12 Schools (3)

or - ENGL 3132 - Introduction to Contemporary American English (3)

TESL 4469 - Advanced Seminar/Practicum in Teaching English as a Second Language (3)*

TESL 4600 - Literacy Development for Second Language Learners (3)

**TESL 4469 should be taken in conjunction with the student teaching course for the academic program. Student teaching must be completed in a high-needs school with a large ESL student population.*

Minor Total = 18 Credit Hours

Progression Requirements

While it is recommended that the TESL Minor be declared prior to beginning the professional education courses in the major area of studies, candidates' situations with special circumstances for later TESL Minor declarations will be considered by the TESL Minor Program Director on a case-by-case basis.

For a degree to be conferred, students must successfully complete all program requirements which include:

- Grades of C or above in all professional education courses
- Maintain an overall GPA of 2.5 or higher

Requirements for Licensure and Graduation

- A grade of P in student teaching with recommendation from Cooperating Teacher, University Supervisor, and Principal

Special Policies or Requirements

TESL Minors must complete their major area of studies year-long internship in a high-needs ESL setting.

Minor in Urban Youth and Communities

The Minor in Urban Youth and Communities is an interdisciplinary program focused on civic engagement and service learning designed to prepare UNC Charlotte students to become informed and engaged citizens by providing opportunities to be agents of change in their community. The minor is open to all majors who seek to explore the strengths, capabilities, and issues of youth and communities in urban settings. Elective courses are concentrated in the areas of Urban Youth and Education, Communities, and Social Justice.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

The Minor in Urban Youth and Communities is open to all majors and can be declared at any time. No minimum GPA is required for admission to the Minor in Urban Youth and Communities program. Additionally, although no course prerequisites are required for admission, some elective courses may have prerequisites.

Minor Requirements

The minor requires 15 credit hours, including two required courses for all students and an additional required course for Cato College of Education majors.

Core Courses (3-6 credit hours)

All majors except Cato College of Education majors:

CTCM 2530 - Interdisciplinary Critical Thinking and Communication (3)

Cato College of Education majors only:

CTCM 2530 - Interdisciplinary Critical Thinking and Communication (3)
EDUC 3200 - Service Learning Teaching Methods for K-12 Educators (3)

Elective Courses (6-9 credit hours)

For the Minor in Urban Youth and Communities, 6-9 elective credit hours are required (6 credit hours if a College of Education major and taking EDUC 3200, 9 credit hours otherwise). For all majors except College of Education majors, one elective course (3 credit hours) must be chosen from each of the following areas: Urban Youth and Education, Communities, and Social Justice. College of Education majors select an elective course only from the Communities and Social Justice areas.

Urban Youth and Education Course (3 credit hours)

Select one of the following:

- AFRS 2208 - Education of African Americans (3)
- CHFD 2111 - Foundations in Child and Family Development (3)
- CJUS 2361 - Juvenile Justice (3)
- EDUC 1511 - Local Social Science: Public Education and Schooling in the U.S. (3)
- or EDUC 1100 - Foundations of Education and Diversity in Schools - Prospect Curriculum (4)
- EDUC 3200 - Service-Learning Teaching Methods for K-12 Educators (3)
- MDSK 2100 - Foundations of Education in Secondary Schools (3)
- PSYC 2370 - Child Development (3)
- PSYC 2371 - Adolescent Development (3)
- SOCY 4135 - Sociology of Education (3)

Communities Course (3 credit hours)

Select one of the following:

- AFRS 2215 - Black Families in the United States (3)
- AFRS 3280 - Blacks in Urban America (3)
- ANTH 2125 - Urban Anthropology (3)
- GEOG 2000 - Social Inequality and Planning (3)
- GEOG 2200 - Introduction to Urban Studies (3)
- GEOG 4220 - Housing Policy (3)
- HIST 3281 - American Cities (3)
- LTAM 1100 - Introduction to Latin America (3)
- LTAM 1501 - Global Social Science: Introduction to Latin American Politics and Society (3)
- LTAM 1502 - Global Arts/Humanities: Introduction to Latin American History and Culture (3)
- PSYC 3155 - Community Psychology (3)
- RELS 3137 - Religion in the African-American Experience (3)
- SOCY 4124 - Sociology of the Community (3)

Social Justice Course (3 credit hours)

Select one of the following:

- AFRS 3101 - Perspectives on Race and Ethnicity in the U.S. (3)
- ARSC 3480 - Citizenship and Service Practicum (3)
- CJUS 3366 - Domestic Violence (3)
- CJUS 4363 - Gender, Race, and Justice (3)
- COMM 3136 - Leadership, Service, and Ethics (3)
- HIST 3218 - Racial Violence, Colonial Times to Present (3)
- PSYC 3806 - Undergraduate Research Assistantship (3) (*Summer only*)
- SOCY 3143 - Social Movements (3)
- SOCY 4111 - Social Inequality (3)
- SOCY 4125 - Urban Sociology (3)

Capstone Course (3 credit hours)

To be taken the final semester of the minor:

CUYC 3600 - Community Engagement Capstone Seminar (3) (SL)*

Minor Total = 15 Credit Hours

Progression Requirements

In courses applied to the minor, students must maintain a GPA of 2.0 or above.

This minor requires a capstone project completed after all other minor requirements have been completed or simultaneously with enrollment in the capstone course.

Early Entry: Graduate Certificate in Foreign Language Education

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Demonstrate native or near-native speaking proficiency in the intended language of licensure via a passing score on the Praxis Subject Assessment or a minimum score of Advanced Low on the American Council on the Teaching of Foreign Language's Oral Proficiency Interview (OPI) AND Writing Proficiency Test (WPT) in the intended language of licensure
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees). Graduate level courses that may be double counted include:

- FLED 5104 - Assessment in the Teaching of K-12 Foreign Languages (2)
FLED 5200 - Methods in Teaching Foreign Languages (3)
MDLG 5130 - The Middle Grades Experience (2)
MDSK 5100L - Content Pedagogy Lab (1)
MDSK 5204 - Equity and Education (2)
MDSK 6162 - Planning for K-12 Instruction (2)
MDSK 6162L - Instructional Design Lab (1)
SECD 5140 - The Secondary School Experience (2)
Advanced Content Course (5000-6999) in the intended licensure area (3)

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Early Entry: Graduate Certificate in Teaching: Middle and Secondary Education

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

All program-level Admissions and Progression Requirements are in addition to the University of North Carolina at Charlotte Admission Requirements.

Admission Requirements

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Demonstration of content mastery via enrollment in a relevant degree program or a passing score on the appropriate Praxis Subject Assessment
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents including two recommendations
- Recommendation by the Graduate Program Director and approved by the Graduate School after applying

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 6 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 6 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Department of Reading and Elementary Education

reel.charlotte.edu

Undergraduate Programs

- **B.A. in Elementary Education**
- **Minor in Applied Understandings in Global Education**
- **Minor in Reading Education**
- **Early Entry: M.Ed. in Elementary Education**
- **Early Entry: M.Ed. in Reading Education**
- **Early Entry: Graduate Certificate in Elementary Mathematics Education**

The Department of Reading and Elementary Education offers two initial K-6 licensure elementary education programs: a B.A. in Elementary Education for undergraduate students, and a Graduate Certificate Program to those that hold an undergraduate degree in another field. A Minor in Reading Education is offered for students already seeking initial license in another content area who wish to gain expertise in reading methods in the K-12 public school setting. The department also offers the Minor in Applied Understanding in Global Education for students interested in engaging with global issues and studying abroad.

For previously licensed teachers who wish to continue their education, the department collaborates with the Department of Middle, Secondary, and K-12 Education to offer a concentration in elementary education within the M.Ed. in Curriculum and Instruction program. Designed for experienced teachers, the M.Ed. in Reading Education qualifies graduates for the North Carolina Advanced Standard Professional II teaching license in K-12 reading education. Relevant to all areas of the K-12 curriculum, this program is designed for classroom teachers and aspiring literacy specialists who are interested in improving instructional programs and practices that promote literacy among all learners. There is also a Ph.D. in Curriculum and Instruction with concentrations in Reading Education and in Curriculum and Education Development. See the *Graduate Catalog* for details on these graduate degree programs.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Arts in Elementary Education

The B.A. in Elementary Education program qualifies graduates for Standard Professional 1 (SP1) Professional Educator's License in K-6 Elementary Education. Graduates of the program are prepared to meet the North Carolina Professional Teaching Standards (NCPTS) and the ten Interstate New Teachers Assessment and Support Consortium (INTASC) Standards for new teachers in Content Pedagogy, Student Development, Diverse Learners, Multiple Instructional Strategies, Motivation and Management, Communication and Technology, Planning, Assessment, Reflective Practice, School and Community Involvement. Graduates have specific coursework and clinical experiences in a variety of settings in order to learn and apply evidence-based knowledge and practices in the field of elementary education.

Admission Requirements (Pre-Education)

Current UNC Charlotte Undergraduate Students, Freshmen and Transfers*

- See University Admission Requirements
- Minimum Overall GPA: 2.7
- Pre-Major/Prerequisite Courses: A minimum of 30 credit hours in approved college-level courses, and a grade of C or above in the following:
 - EDUC 1100 or EDUC 1511**
 - SPED 2100**
- Passing scores on the Praxis Core: Academic Skills Assessments in Reading, Writing, and Mathematics; or an acceptable substitute score on the SAT or ACT
- Completion and clearance on the Criminal Background Check
- Signed Statement of Commitment to Professional Dispositions

* Students seeking to enroll in the TA to Teachers program should submit an Undergraduate Admissions Application and meet the articulated admission requirements. Additionally, a secondary application should be submitted through the Distance Education website that includes academic transcripts reflecting an A.A. or A.S. degree and a principal/administrator recommendation.

** Students seeking to enroll in the TA to Teachers program who lack credit for EDUC 1100/ EDUC 1511 and SPED 2100 are admitted as a Pre-Education major and are required to complete the courses through Credit by Exam prior to enrollment in the program.

Currently Enrolled Students

- Declaration of Major: The Elementary Education major is intended to be started in the first semester of Junior year. Students should

plan to declare the major no later than the second semester of the Sophomore year. Students must complete an "Application for Admission to a Teacher Education Program" in the Office of Teacher Education Advising and Licensure (TEAL) in the Cato College of Education. Students must apply for admission to a specific teacher education program and complete the admissions process in order to enroll in any professional education courses at the 3000 level or above.

Degree Requirements

The Major in Elementary Education leading to the B.A. degree requires a minimum of 120 credit hours.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. Students in this major should plan on taking the following courses that meet general education requirements and also satisfy courses in the major. MATH 1341 is not a required course for the completion of the degree; however, students are highly encouraged to include this course in their program of study.

BIOL 1110 - Principles of Biology I (3)

BIOL 1110L - Principles of Biology I Laboratory (1)

MATH 1340 - Mathematics for Elementary Teachers I (3)

Foundation Courses (6-7 credit hours)

EDUC 1511 - Local Social Science: Public Education and Schooling in the U.S. (3)*

or EDUC 1100 - Foundations of Education and Diversity in Schools - Prospect Curriculum (4)*

SPED 2100 - Exceptionality in Schools and Society (3)*

*SPED 2100 and either EDUC 1100 or EDUC 1511 should be taken no later than a student's Sophomore year; both must be completed with a grade of C or above to qualify for admission to the Teacher Education Program.

Major Courses (60 credit hours)

Note: Admission to Teacher Education and advisor approval are required in order to register for any of the following courses.

EDUC 4290 - Inclusion of Students With Varied Learning Needs (3)
ELED 3111 - Instructional Design and Assessment in Elementary Education (3)

ELED 3120 - The Elementary School Child (3)

ELED 3221 - Teaching Science to Elementary School Learners (3)

ELED 3223 - Teaching Social Studies to Elementary Learners (3)

ELED 3226 - Teaching Language Arts to Elementary School Learners (3)

ELED 3292 - Theories and Practice in Urban Education (3)

ELED 4121 - Assessment and Instructional Differentiation in the Elementary School Classroom (3)

ELED 4122 - Creating an Effective Environment in the Elementary School Classroom (3)

ELED 4220 - Instructional Planning for Elementary Learners (3)

ELED 4420 - Student Teaching/Seminar: K-6 Elementary Education (15)

MAED 3222 - Teaching Mathematics to Elementary School Learners, Grades K-2 (3)

- MAED 3224 - Teaching Mathematics to Elementary School Learners, Grades 3-6 (3)
- READ 3224 - Teaching Foundational Literacy Skills (3)
- READ 3226 - Applied Literacy and Practices (3)
- READ 4161 - Assessment, Design, and Implementation of Classroom Reading Instruction (3)

Related Courses (3 credit hours)

Select one creative arts activity course from the following, with a different area of emphasis from the Global and Local Themes Requirements (1502/1512):

- ARTE 2121 - Integrating Art Across the Curriculum (3)
- MUSC 1102 - Fundamentals of Musicianship (3) -
- MUSC 2191 - Incorporating Music Into the Elementary Classroom (3)
- THEA 1360 - Applied Theatre in Communities and Schools (3)
- Others approved by the advisor

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Academic Advising

Freshmen and Sophomores who intend to major in Elementary Education are classified as Pre-Education students in Elementary Education. They are assigned an advisor in the College's Office of Teacher Education Advising and Licensure (TEAL), who helps them select appropriate General Education and minor courses, and also helps them meet the requirements for admission to teacher education. Upon admission to the Teacher Education Program in Elementary Education, which typically occurs at the end of the Sophomore year, students will be advised in the Elementary Education Advising Center.

Note: Elementary education courses are available on a very limited basis in the summer.

Progression Requirements

For a degree to be conferred, students must successfully complete all program requirements which include:

- Minimum GPA of 2.7 to declare major
- Minimum GPA of 2.5 must be maintained to remain enrolled
- Students should plan to take EDUC 1100/EDUC 1511 and SPED 2100 during Freshman Year.
- Grades in professional education courses must be C or above
- Minimum overall GPA in professional education courses must be 2.75
- Students may repeat a professional course once.

Requirements for Licensure and Graduation

- A grade of P in student teaching with recommendation from Cooperating Teacher, University Supervisor, and Principal is required for licensure and graduation.
- Passing score on edTPA is required for licensure and graduation.

Admission to Upper Division

- *Minimum Overall GPA: 2.7*

- *Pre-Major/Prerequisite Courses:* A minimum of 30 credit hours in approved college-level courses, and a grade of C or above in the following:
 - EDUC 1100 or EDUC 1511**
 - SPED 2100**
- A passing score on the Praxis Core exam or acceptable alternatives (SAT or ACT scores)
- Completion and clearance on the Criminal Background Check
- Signed Statement of Commitment to Professional Dispositions

Special Policies or Requirements

The successful completion of a degree in Elementary Education includes meeting the North Carolina Department of Public Instruction's licensure requirements for K-6 certification. Consequently, additional requirements must be completed during the student's program and are listed below. Since state licensure requirements often change, additional work may be required to complete the program with a teaching license.

Planning Sheet

All education students are tracked through their program with a Program Planning Sheet. The original planning sheet is uploaded to the advising system and lists all courses taken, transfer hours, General Education and minor requirements met, and courses remaining in the program. Note that the University requires that the minimum number of credits in a degree program is 120 credit hours.

Clinicals

All courses in the professional program include a clinical requirement where students complete specific activities or designated hours in an elementary school. Clinicals are designed to expose students to diverse school demographics, locations, and programs.

Honors Program

For details about the Honors Program in Education, see the beginning of the Cato College of Education section.

Internship

Teacher education candidates participate in the yearlong internship during their final year of the program. During the first semester, students spend one day per week in an assigned classroom while completing coursework on campus. During the second semester of the internship, students complete full-time student teaching in the same classroom. Applications for this yearlong internship are due two semesters before student teaching.

Minor in Applied Understandings in Global Education

The Minor in Applied Understandings in Global Education is designed for candidates seeking a Major in Elementary, Middle Grades, Secondary, or Special Education who wish to prepare K-12 students to be effective and responsible citizens in a global society. The minor is focused upon providing candidates with opportunities to gain knowledge of the world, engage in problem solving and critical thinking around significant global issues, and develop skills in viewing events and issues from diverse global perspectives.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Advising and admission to the minor are administered through the Office of Teacher Education Advising and Licensure (TEAL). Candidates interested in pursuing the Minor in Applied Understandings in Global Education must have a minimum overall GPA of 2.5 and be approved for admission to the minor by demonstrating the potential for academic achievement commensurate with Cato College of Education program admission requirements. After admission into the minor, advising is offered through the Department of Reading and Elementary Education.

Minor Requirements

The Minor in Applied Understandings in Global Education requires the completion of 18 credit hours of specialized coursework. The minor is designated to be coordinated with coursework in the student's major.

Phase I: Introduction to Diversity Courses (6 credit hours)

EDUC 1100 - Foundations of Education and Diversity in Schools -

Prospect Curriculum (4)

or EDUC 1511 - Local Social Science: Public Education and Schooling in the U.S. (3)

INTL 1101 - Introduction to International Studies (3)

Phase II: Global Studies Courses (6 credit hours)

Required Global Studies Course

CTCM 2530 - Interdisciplinary Critical Thinking and Communication (3)

Elective Global Studies Course

Select one of the following:

INTL 2100 - Introduction to Holocaust, Genocide, and Human Rights Studies (3)

INTL 2121 - Introduction to Development Studies (3)

INTL 2131 - Introduction to Peace, Conflict, and Identity Studies (3)

Note: Other INTL courses may be considered with approval of the advisor.

Phase III: Applied Understandings Courses (6 credit hours)

EDUC 4200 - Current Issues in Global Education (3)

EDUC 4201 - Education and Globalization: Theory and Practice (3)

Minor Total = 18 Credit Hours

Progression Requirements

All courses applied to the Minor in Applied Understandings in Global Education require a grade of C or above, and students must earn an overall GPA of 2.5 or above in courses applied to the minor.

Minor in Reading Education

A Minor in Reading Education requires the completion of 18 credit hours of specialized coursework. This program is designed for students already seeking initial license in another content area who wish to gain expertise in reading methods in the K-12 public school setting. Students in this minor may also apply for Early Entry into the M.Ed. in Reading Education program.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- Students wishing to Minor in Reading Education must be approved for admission to the minor by meeting statewide teacher education program admission requirements. Advising and admission to the minor are administered through the Office of Teacher Education Advising and Licensure (TEAL) in the College of Education. The criteria for admission include:
 - 30 earned credit hours
 - Overall GPA of 2.7 or above
 - Major or minor in an initial licensure area
 - Grades of C or above in either:
 - MDSK 2100
 - EDUC 1100/EDUC 1511 and SPED 2100
 - A passing score on the Praxis Core exam or acceptable alternatives (SAT or ACT scores)
 - Signed Statement of Commitment to Professional Dispositions
 - Pass a criminal background check (completed at time of application in TEAL)

After admission to the minor, advising is offered through the Reading and Elementary Education Department in collaboration with advising in the student's major department. Contact the School of Education or advising.

Declaring the minor also requires admission to a major or minor in a subject area for which there is teacher licensure (Elementary Education, Special Education, Secondary or Middle Grades Education, Foreign Language Education, etc.).

The minor is designed to be coordinated with coursework in the major, with the final semester as the student teaching semester. Successful completion of the minor and passing licensure testing requirements leads to a recommendation for North Carolina add-on K-12 license in Reading.

Minor Requirements

Core Courses (9 credit hours)

READ 3224 - Teaching Foundational Literacy Skills (3)

READ 3226 - Applied Literacy and Practices (3)

READ 4161 - Assessment, Design, and Implementation of Classroom Reading Instruction (3)

Elective Courses (9 credit hours)

Explorations of Traditional and New Literacies (3 credit hours)

Select one of the following:

ENGL 2109 - Children's Literature, Media, and Culture (3)

ENGL 3102 - Literature for Young Children (3)

ENGL 3103 - Children's Literature (3)

ENGL 3104 - Literature for Adolescents (3)

ENGL 4102 - Classics in British Children's Literature (3)

ENGL 4103 - Classics in American Children's Literature (3)

ENGL 4104 - Multiculturalism and Children's Literature (3)

Note: ENGL courses may be taken prior to admission to the minor.

Meeting the Needs of Unique Readers (3 credit hours)

Select one of the following:

SPED 4275 - Teaching Reading to Elementary Learners (3)

- SPED 4276 - Teaching Reading to Middle and Secondary Learners (3)
- TESL 4204 - Learning, Schools, and Community (3)
- TESL 4205 - Second Language Acquisition and Linguistics in K-12 Schools (3)
- TESL 4600 - Literacy Development for Second Language Learners (3)

Extending Literacy Pedagogy (3 credit hours)

Select one of the following:

- READ 3255 - Integrating Reading and Writing Across Content Areas (3)
- READ 4205 - Reading and Writing Across Digital Spaces (3)
- READ 4270 - Investigating Reading Curriculum (3)

Progression Requirements

For a degree to be conferred, students must successfully complete all program requirements which include:

- Grades of C or above in all professional education courses
- Maintain an overall GPA of 2.5 or higher

Recommendation for Licensure

- A grade of P in student teaching with recommendation from Cooperating Teacher, University Supervisor, and Principal

Total = 18 Credit Hours

Early Entry: Master of Education in Elementary Education or Graduate Certificate in Elementary Mathematics Education

Exceptional undergraduate students at UNC Charlotte may apply to either of these Early Entry Programs to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Graduate Program Director prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 6 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 6 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for these degree programs, see the individual program listings in the *Graduate Catalog*.

Early Entry: Master of Education in Reading Education

Exceptional undergraduate students at UNC Charlotte may apply to either of these Early Entry Programs to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 60 undergraduate credit hours (although it is expected that close to 75 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees). For Elementary Education students in the Minor in Education program, the following 9 hours may count towards both the minor and M.Ed. in Reading:

Undergraduate Course	Graduate Course Substitute
Exploration of Traditional and New Literacies requirement	READ 6300 - Global Literacy in a Multicultural World: Genre Study (3)
Meeting the Needs of Unique Readers requirement	READ 6204 - Teaching Reading to English Language Learners (3)
READ 3255 - Integrating Reading and Writing Across Content Areas (3)	READ 6252 - K-12 Writing Development and Instruction (3) or READ 6255 - Middle/Secondary Reading and Writing (3)
READ 4270 - Investigating Reading Curriculum (3)	READ 6252 - K-12 Writing Development and Instruction (3) or READ 6255 - Middle/Secondary Reading and Writing (3)

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for these degree programs, see the individual program listings in the *Graduate Catalog*.

Department of Special Education and Child Development

spcd.charlotte.edu

Undergraduate Programs

- **B.A. in Child and Family Development**
- **B.A. in Special Education**
- **B.A. in Special Education General Curriculum and Elementary Education K-6 Dual Degree**
- **Minor in Child and Family Development**
- **Minor in Collaborative Educators in Inclusive Schools**
- **Minor in Inclusion, Disability, and Exceptionalities in American Society**
- **Early Entry: Graduate Certificate in Academically or Intellectually Gifted**

The mission of the Department of Special Education and Child Development is to prepare highly effective and ethical professionals who have a positive impact on children, youth, families, community, and schools and who are successful in urban and other settings. This mission is accomplished through teaching, research, and community engagement that lead to improved practice and by working in partnership with schools, communities, and university colleagues.

The goals of the Special Education and Child and Family Development programs are to:

- Provide instruction at the undergraduate, masters, and doctoral levels that models high-leverage practices and challenges learners to aspire to excellence
- Generate and synthesize knowledge through quality research that informs the preparation programs of the Department
- Provide genuine and meaningful service to the public schools and other service providers that informs the preparation programs of the Department

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Arts in Child and Family Development

The B.A. degree in Child and Family Development prepares graduates to work in educational and related settings that serve infants, toddlers, preschoolers, and kindergartners with and without disabilities, and their families. The program qualifies graduates for the Standard Professional 1 (SP1) Professional Educator's License in birth-kindergarten (B-K) education.

Graduates of the program are prepared to meet the North Carolina Professional Teaching Standards and the ten Interstate New Teachers Assessment and Support Consortium (INTASC) Standards for new teachers in Content Pedagogy, Student Development, Diverse Learners, Multiple Instructional Strategies, Motivation and Management, Communication and Technology, Planning, Assessment, Reflective Practice, and School and Community Involvement. Candidates have specific coursework and clinical experiences in a variety of settings in order to learn and apply evidence-based knowledge and practices in the field of early childhood development and education.

4-Year Program

Admission Requirements (Pre-Education)

Freshmen

- See University Admission Requirements
- Minimum Overall GPA: 2.7
- Pre-Major/Prerequisite Courses: A minimum of 30 credit hours in approved college-level courses, and a grade of C or above in the following:
 - EDUC 1100 or EDUC 1511
 - SPED 2100
- A passing score on the Praxis Core exam or acceptable alternatives (SAT or ACT scores)
- Completion and clearance on the Criminal Background Check
- Signed Statement of Commitment to Professional Dispositions

Currently Enrolled Students

- Declaration of Major: The Child and Family Development major is intended to be started in the first semester of Junior year. Students should plan to declare the major no later than the second semester of the Sophomore year. Students must complete an "Application for Admission to a Teacher Education Program" in the Office of Teacher Education Advising and Licensure (TEAL) in the Cato College of Education. Students must apply for admission to a specific teacher education program and complete the admissions process in order to enroll in any professional education courses at the 3000 level or above.

Degree Requirements

The Major in Child and Family Development leading to the B.A. degree requires a minimum of 120 credit hours.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. Students in this major should plan on taking the following courses that meet general education requirements and also satisfy prerequisites for courses in the major:

PSYC 1101 - General Psychology (3)

SOCY 15xx – Themes Requirement (3)

Foundation Courses (6-7 credit hours)

EDUC 1511 - Local Social Science: Public Education and Schooling in the U.S. (3)*

or EDUC 1100 - Foundations of Education and Diversity in Schools - Prospect Curriculum (4)*

SPED 2100 - Exceptionality in Schools and Society (3)*

**SPED 2100 and either EDUC 1100 or EDUC 1511 should be taken no later than a student's Sophomore year. Both courses must be completed with a grade of C or above to qualify for admission to the Teacher Education Program in Child and Family Development.*

Major Courses (63 credit hours)

CHFD 2111 - Foundations in Child & Family Development (3)

CHFD 2113 - Development: Prenatal to 36 Months (3)

CHFD 2412 - The Practice of Observation, Documentation, and Analysis of Young Children's Behavior (3)

ELDT 4100 – Foundations for Effective Technology Integration (3)

Admission to Teacher Education and advisor approval are required in order to register for any of the following courses:

CHFD 3112 - Supporting Young Learners – Birth Through Kindergarten (3)

CHFD 3113 - Families as the Core of Partnerships (3)

CHFD 3114 - Responsive Approaches for Infants and Toddlers (3)

CHFD 3115 - An Ecological Approach to Learning and Development – Early Childhood to Pre-Adolescence (3)

CHFD 3116 - Approaches to Integrated Curriculum for Young Children (3-8) (3)

CHFD 3118 - Approaches to Family Supports and Resources (3)

CHFD 3414 - Language, Literacy, and Mathematical Thinking of Young Children: Birth-Kindergarten (3)

CHFD 3416 - Internship: Child and Family Development (3)

CHFD 4410 - Student Teaching/Seminar: B-K Child and Family Development (15) **

SPED 3210 - Enhancing the Social-Emotional Development of Young Children in Inclusive Settings (3)

SPED 4111 - Issues in Early Intervention for Young Children with Disabilities (3)

SPED 4112 - Authentic Approaches to the Assessment of Young Children with Disabilities: Birth-Kindergarten (3)

SPED 4210 - Developmental Interventions for Young Children with Disabilities: Birth through Kindergarten (3)

***Enrollment in CHFD 4410 requires admission to student teaching through the College's Office of School and Community Partnerships.*

Restricted Elective Courses (12 credit hours)

Select four of the following. Please note that some courses may have prerequisites.

Sociology Courses

SOCY 2132 - Sociology of Marriage and the Family (3)

SOCY 2133 - Sociology of Marriage and Family - Writing Intensive (3)

SOCY 3134 - Families and Aging (3)

SOCY 3169 - Sociology of Health and Illness (3)

SOCY 4110 - Sociology of Aging (3)

SOCY 4111 - Social Inequality (3)

SOCY 4112 - Sociology of Work (3)

SOCY 4115 - Organizational Sociology (3)

SOCY 4124 - Sociology of the Community (3)

SOCY 4125 - Urban Sociology (3)

SOCY 4131 - Family Policy (3)
SOCY 4135 - Sociology of Education (3)
SOCY 4150 - Older Individual and Society (3)
SOCY 4160 - Evolution and Gender (3)
SOCY 4165 - Sociology of Women (3)
SOCY 4168 - Sociology of Mental Health and Illness (3)
SOCY 4172 - Sociology of Deviant Behavior (3)
SOCY 4173 - Sociology of Deviant Behavior - Writing Intensive (3)
SOCY 4265 - Social Psychology of Law (3)
Other 4000-level SOCY course with approval

Psychology Courses

PSYC 2340 - Psychology of Adjustment (3)
PSYC 2350 - Introduction to Social Psychology (3)
PSYC 2370 - Child Development (3)
PSYC 2371 - Adolescent Development (3)
PSYC 3355 - Psychological Approaches to Diversity (3)
PSYC 3356 - Psychology of Women and Gender (3)
Other 2000-level PSYC course that relates to cognitive, social, and/or personality development with approval

Teaching English as a Second Language Courses

TESL 4103 - Methods in Teaching English as a Second Language (3)
TESL 4204 - Learning, Schools, and Community (3)
TESL 4600 - Literacy Development for Second Language Learners (3)

Children's Literature and Childhood Studies Minor Courses

ENGL 2074 - Topics in Children's Literature, Media, and Culture (3)
ENGL 3102 - Literature for Young Children (3)
ENGL 4103 - American Children's Literature (3)
ENGL 4104 - Multiculturalism and Children's Literature (3)
ENGL 4263 - Linguistics and Language Learning (3)
MUSC 2191 - Incorporating Music Into the Elementary Classroom (3)
PHIL 3940 - Philosophy of Education (3)
THEA 4360 - Theatre for Young Audiences (3)
WGST 3130 - Perspectives on Motherhood (3)

Public Health Minor Courses

AFRS 3261 - Psychology of the Black Experience (3)
ANTH 3122 - Culture, Health, and Disease (3)
ANTH 3222 - Culture, Health, and Disease (3)
ANTH 4131 - Culture, Pregnancy, and Birth (3)
HLTH 3101 - Foundations of Public Health (3)
PHIL 3230 - Healthcare Ethics (3)
POLS 3125 - Healthcare Policy (3)
NURS 4191 - Women's Health Issues (3)
WGST 4191 - Women's Health Issues (3)

Other Approved Elective Courses

ANTH 15xx - Themes Requirement (3)
AMST 3210 - Childhood in America (3)
ARTE 2121 - Integrating Art Across the Curriculum (3)
CHFD 4200 - Child Life: Supporting Children and Families (3)
RELS 3215 - Religion and Sexuality (3)
PSYC 2360 - Introduction to Health Psychology (3)
SPAN 1201 - Elementary Spanish I (4) (*or other foreign language courses approved by advisor*)
WGST 1101 - Introduction to Women's Studies (3)
WGST 3160 - Gender and Education (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements: 4-Year Program

For a degree to be conferred, students must successfully complete all program requirements which include:

- Minimum GPA of 2.7 to declare major
- Minimum GPA of 2.5 must be maintained to remain enrolled
- Students should plan to take EDUC 1100/EDUC 1511 and SPED 2100 during freshman year.
- Students should plan to take CHFD 2111, CHFD 2113, and CHFD 2412 during sophomore year.
- Grades in professional education courses must be C or above.
- Minimum overall GPA in professional education courses must be 2.75
- Students may repeat a professional course once.
- Students may be dropped from a course if they register out of sequence.

Requirements for Licensure and Graduation

- A grade of P in student teaching with recommendation from Cooperating Teacher, University Supervisor, and Principal is required for licensure and graduation.
- Passing score on edTPA is required for licensure and graduation.

Admission to Upper Division

- *Minimum Overall GPA: 2.7*
- *Pre-Major/Prerequisite Courses:* A minimum of 30 credit hours in approved college-level courses, and a grade of C or above in the following:
 - EDUC 1100 or EDUC 1511
 - SPED 2100
- A passing score on the Praxis Core exam or acceptable alternatives (SAT or ACT scores)
- Completion and clearance on the Criminal Background Check
- Signed Statement of Commitment to Professional Dispositions

Special Policies or Requirements: 4-Year Program

The successful completion of this degree program includes meeting the North Carolina Department of Public Instruction's licensure requirements for certification. Consequently, additional requirements must be completed during the student's program and are listed below. Since state licensure requirements often change, additional work may be required to complete the program with a teaching license.

Planning Sheet

All education students are tracked through their program with a Program Planning Sheet. The original planning sheet is uploaded to the advising system and lists all courses taken, transfer hours, General Education and minor requirements met, and courses remaining in the program. Note that the University requires that the minimum number of credits in a degree program is 120 credit hours.

Clinicals

Some courses in the professional program include a clinical requirement where students complete specific activities or designated hours in an appropriate setting. Clinicals are designed to expose students to diverse school demographics, locations, and programs.

2+2-Year Program

Admission Requirements (Pre-Education)

Transfers

- See University Admission Requirements
- *Minimum GPA:* Overall 2.7 and minimum 2.5 on all courses taken at the community college
- *Degrees:* A.A.S. degree in Early Childhood Education or similar title with curriculum acceptable to the department with 60-64 credit hours of coursework (transfer applicants not having the A.A.S. degree or its equivalent must meet University admission requirements)
- *Pre-Major/Prerequisite Courses:*
 - EDUC 1100 or EDUC 1511 (with grade of C or above by the end of the semester of application or the equivalent transferred community college courses)
 - SPED 2100 (with grade of C or above by the end of the semester of application or the equivalent transferred community college courses)
 - Prerequisite background courses for the program (a limited number of such background courses may be made up by taking them at UNC Charlotte)
 - A minimum of 31 credit hours in General Education courses that are taken as part of all North Carolina A.A.S. Early Childhood Education programs, plus additional University General Education requirements that may not be part of A.A.S. degree but are required to earn a Bachelor degree in Birth-Kindergarten (B-K) teaching licensure program
 - A.A.S. degree in Early Childhood (Licensure Track) with 31 credit hours of General Education courses follows the 2+2 Articulation Plan
 - A.A.S. degree in Early Childhood (Non-Licensure Track) without 31 credit hours of General Education credits must complete additional General Education credits to meet the 31 credit hour requirement
- A passing score on the Praxis Core exam or acceptable alternatives (SAT or ACT scores)
- Completion and clearance on the Criminal Background Check
- Signed Statement of Commitment to Professional Dispositions

Currently Enrolled Students

- *Declaration of Major:* Students must complete an "Application for Admission to a Teacher Education Program" in the Office of Teacher Education Advising and Licensure (TEAL) in the Cato College of Education. Students must apply for admission to a specific teacher education program and complete the admissions process in order to enroll in any professional education courses at the 3000 level or above.

Degree Requirements

The B.A. in Child and Family Development 2+2-year degree program for transfer students consists of a minimum of 60 credit hours.

A.A.S. Degree (60-64 credit hours)

General Education Courses

For details on required courses, refer to the General Education Program. Some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Major Courses (51 credit hours)

Admission to Teacher Education and advisor approval are required in order to register for any of the following courses:

- CHFD 3112 - Supporting Young Learners – Birth Through Kindergarten (3)
- CHFD 3113 - Families as the Core of Partnerships (3)
- CHFD 3114 - Responsive Approaches for Infants and Toddlers (3)
- CHFD 3115 - An Ecological Approach to Learning and Development – Early Childhood to Pre-Adolescence (3)
- CHFD 3116 - Approaches to Integrated Curriculum for Young Children (3-8) (3)
- CHFD 3118 - Approaches to Family Supports and Resources (3)
- CHFD 3414 - Language, Literacy, and Mathematical Thinking of Young Children: Birth-Kindergarten (3)
- CHFD 3416 - Internship: Child and Family Development (3)
- CHFD 4410 - Student Teaching/Seminar: B-K Child and Family Development (15) **
- SPED 3210 - Enhancing the Social-Emotional Development of Young Children in Inclusive Settings (3)
- SPED 4111 - Issues in Early Intervention for Young Children with Disabilities (3)
- SPED 4112 - Authentic Approaches to the Assessment of Young Children with Disabilities: Birth-Kindergarten (3)
- SPED 4210 - Developmental Interventions for Young Children with Disabilities: Birth through Kindergarten (3)

***Enrollment in CHFD 4410 requires admission to student teaching through the College's Office of School and Community Partnerships.*

Restricted Elective Courses (9 credit hours)

Select three courses from the options in the 4-Year Program above.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements: 2+2 Program

For a degree to be conferred, students must successfully complete all program requirements which include:

- Minimum GPA of 2.7 to declare major
- Minimum GPA of 2.5 must be maintained to remain enrolled.
- Grades in professional education and concentration courses must be C or above.
- Minimum overall GPA in professional education and concentration courses must be 2.75.
- Students may repeat a professional course once.
- Students may be dropped from a course if they register out of sequence.

Requirements for Licensure and Graduation

- A grade of P in student teaching with recommendation from

- Cooperating Teacher, University Supervisor, and Principal is required for licensure and graduation.
- Passing score on edTPA is required for licensure and graduation

Admission to Upper Division

- *Minimum Overall GPA: 2.7*
- *Pre-Major/Prerequisite Courses:* A minimum of 30 credit hours in approved college-level courses, and a grade of C or above in the following:
 - EDUC 1100 or EDUC 1511
 - SPED 2100
- A passing score on the Praxis Core exam or acceptable alternatives (SAT or ACT scores)
- Completion and clearance on the Criminal Background Check
- Signed Statement of Commitment to Professional Dispositions

Special Policies or Requirements: 2+2 Program

The successful completion of this degree program includes meeting the North Carolina Department of Public Instruction's licensure requirements for B-K certification. Consequently, additional requirements must be completed during the student's program and are listed below. Since state licensure requirements often change, additional work may be required to complete the program with a teaching license.

Planning Sheet

All education students are tracked through their program with a Program Planning Sheet. The original planning sheet is uploaded to the advising system and lists all courses taken, transfer hours, General Education and minor requirements met, and courses remaining in the program. Note that the University requires that the minimum number of credits in a degree program is 120 credit hours. The B.A. in Child and Family Development 2+2-year degree program for transfer students consists of a minimum of 60 credit hours.

Clinicals

Some courses in the professional program include a clinical requirement where students complete specific activities or designated hours in an appropriate setting. Clinicals are designed to expose students to diverse school demographics, locations, and programs.

Internship

Teacher education candidates participate in the yearlong internship during their final year of the program. During the first semester, students spend a minimum of one day per week in an assigned classroom while completing coursework on campus. During the second semester of the internship, students complete full-time student teaching in the same classroom. Applications for this yearlong internship are due two semesters prior to student teaching; part two of the application is due one semester prior to student teaching.

Additional Information for 2+2 Transfer/Articulation Program

- *Academic Advising:*
Students who intend to major in Child and Family Development and to earn B-K licensure are classified as Pre Child and Family Development majors. These students are assigned an advisor in the Office of Teacher Education Advising and Licensure (TEAL), who help students select appropriate General Education and elective

courses, and who will help them meet the requirements for admission to teacher education. To be admitted to the Teacher Education Program in Child and Family Development, students must have completed an admission application through the TEAL office, attained a grade of C or above in SPED 2100 and either EDUC 1100 or EDUC 1511, attained passing scores on all three parts of the Praxis Core or acceptable alternatives (SAT or ACT scores), and attained an overall GPA of at least 2.7 in at least 30 credit hours of coursework.

- Applications for admission to the Teacher Education Program in Child and Family Development are available from and are to be returned to the TEAL office after a student has earned at least 30 credit hours of coursework. Students are then assigned a major advisor in Child and Family Development who assists planning the remainder of the program of study. Course selections for each subsequent semester must be approved by the student's advisor in Child and Family Development. Assignment of the student's major advisor is the responsibility of the Child and Family Development Undergraduate Program Director in the Department of Special Education and Child Development (SPCD).

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Additional Information for the 4-Year and 2+2-Year Programs

Academic Advising

Students who intend to major in Child and Family Development and to earn B-K licensure are classified as Pre-Education students in Child and Family Development. These students are assigned an advisor in the Office of Teacher Education Advising and Licensure (TEAL), who help students select appropriate General Education and elective courses, and who will help them meet the requirements for admission to teacher education. To be admitted to the Teacher Education Program in Child and Family Development, students must have completed an admission application through the TEAL office, attained a grade of C or above in SPED 2100 and either EDUC 1100 or EDUC 1511, attained passing scores on all three parts of the Praxis Core or acceptable alternatives (SAT or ACT scores), and attained an overall GPA of at least 2.7 in at least 31 credit hours of coursework.

Applications for admission to the Teacher Education Program in Child and Family Development are available from and are to be returned to the TEAL office after a student has earned at least 31 credit hours of coursework. Students are then assigned a major/minor advisor in child and family development who assists planning the remainder of the program of study. Course selections for each subsequent semester must be approved by the student's advisor in child and family development. Assignment of the student's major/minor advisor is the responsibility of the Child and Family Development Undergraduate Program Director in the Department of Special Education and Child Development (SPCD).

Progression Requirements

All students with an education major must maintain a 2.5 GPA overall and

a 2.75 GPA in their professional courses. All professional courses must be passed with a grade of C or above, and students may repeat a professional course once. Students may be dropped from a course if they register out of sequence.

Special Policies or Requirements

The successful completion of this degree program includes meeting the North Carolina Department of Public Instruction's licensure requirements for B-K certification. Consequently, additional requirements must be completed during the student's program and are listed below. Since state licensure requirements often change, additional work may be required to complete the program with a teaching license.

Planning Sheet

All education students are tracked through their program with a Program Planning Sheet. The original planning sheet is uploaded to the advising system and lists all courses taken, transfer hours, General Education and minor requirements met, and courses remaining in the program. Note that the University requires that the minimum number of credits in a degree program is 120 credit hours.

Clinicals

Some courses in the professional program include a clinical requirement where students complete specific activities or designated hours in an appropriate setting. Clinicals are designed to expose students to diverse school demographics, locations, and programs.

Honors Program

For details about the Honors Program in Education, see the beginning of the Cato College of Education section.

Internship

Teacher education candidates participate in the yearlong internship during their final year of the program. During the first semester, students spend a minimum of one day per week in an assigned classroom while completing coursework on campus. During the second semester of the internship, students complete full-time student teaching in the same classroom. Applications for this yearlong internship are due two semesters prior to student teaching; part two of the application is due one semester prior to student teaching.

Bachelor of Arts in Special Education

The B.A. in Special Education program includes a choice of one of two licensure areas: (1) the Special Education: General Curriculum license or (2) the Special Education: Adapted Curriculum license. The Special Education: General Curriculum license qualifies graduates for the Standard Professional 1 (SP1) Professional Educator's License to teach children with special needs in grades K-12 with mild disabilities (i.e., learning disabilities, mild cognitive disabilities, and emotional/behavioral disabilities). The Special Education: Adapted Curriculum license qualifies graduates for the Standard Professional 1 (SP1) Professional Educator's License to teach children with special needs in grades K-12 with severe disabilities (i.e., significant cognitive disabilities, multiple disabilities).

Graduates of the program are prepared to: provide individually planned, systematically implemented, and carefully evaluated instruction for students with special needs; provide educational services to students with special needs in general classrooms, resource classrooms, and other

educational settings; and help students with special needs achieve the greatest possible personal self-sufficiency and success in present and future environments. Graduates of the program are prepared to meet the North Carolina Professional Teaching Standards and the ten Interstate New Teachers Assessment and Support Consortium (INTASC) Standards for new teachers in Content Pedagogy, Student Development, Diverse Learners, Multiple Instructional Strategies, Motivation and Management, Communication and Technology, Planning, Assessment, Reflective Practice, and School and Community Involvement. Graduates have specific coursework and clinical experiences in a variety of settings in order to learn and apply evidence-based knowledge and practices in the field of special education.

Admission Requirements (Pre-Education)

Freshmen and Transfers

- See University Admission Requirements
- *Minimum Overall GPA: 2.7*
- *Pre-Major/Prerequisite Courses:* A minimum of 30 credit hours in approved college-level courses, and a grade of C or above in the following:
 - EDUC 1100 or EDUC 1511
 - SPED 2100
- A passing score on the Praxis Core exam or acceptable alternatives (SAT or ACT scores)
- Completion and clearance on the Criminal Background Check
- Signed Statement of Commitment to Professional Dispositions

Currently Enrolled Students

- *Declaration of Major:* The Special Education major is intended to be started in the first semester of the Junior year. Students should plan to declare the major no later than the second semester of the Sophomore year. Students must complete an "Application for Admission to a Teacher Education Program" in the Office of Teacher Education Advising and Licensure (TEAL) in the Cato College of Education. Students must apply for admission to a specific teacher education program and complete the admissions process in order to enroll in any professional education courses at the 3000 level or above.

Degree Requirements

The Major in Special Education leading to the B.A. degree requires a minimum of 120 credit hours.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. Students in this major should plan on taking the following course that meets general education requirements and also satisfies prerequisites for courses in the major:

PSYC 1101 - General Psychology (3)

Foundation Courses (6-7 credit hours)

EDUC 1511 - Local Social Science: Public Education and Schooling in the U.S. (3)*
or EDUC 1100 - Foundations of Education and Diversity in Schools -

Prospect Curriculum (4)*
SPED 2100 - Exceptionality in Schools and Society (3)*

*SPED 2100 and either EDUC 1100 or EDUC 1511 should be taken no later than a student's Sophomore year. Both courses must be completed with a grade of C or above to qualify for admission to the Teacher Education Program in Special Education.

Major Courses (57-63 credit hours)

Core Courses (39 credit hours)

Admission to Teacher Education and advisor approval are required in order to register for any of the following courses:

ELDT 4100 - Foundations for Effective Technology Integration (3)
SPED 3100 - Critical Issues in Special Education (3)
SPED 3173 - Assessment in Special Education (3)
SPED 3175 - Instructional Planning in Special Education (3)
SPED 4270 - Classroom Management (3)
SPED 4272 - Teaching Mathematics to K-12 Learners (3)
SPED 4275 - Teaching Reading to Elementary Learners (3)
SPED 4277 - Teaching Written Expression to K-12 Learners (3)
SPED 4279 - Content Area Instruction for Inclusive Classrooms (3)
SPED 4318 - Collaboration and Transition-Focused Education (3)
SPED 4400 - Integrated Instructional Applications in Special Education (3)
TESL 4204 - Learning, Schools, and Community (3)

Plus select one of the following:

PSYC 2117 -
PSYC 2370 - Child Development (3)
PSYC 2371 - Adolescent Development (3)
SOCY 4135 - Sociology of Education (3)

Licensure Courses (18-27 credit hours)

Select one of the following licensure areas:

General Curriculum License Courses (18 credit hours)
SPED 4276 - Teaching Reading to Middle and Secondary Learners (3)
SPED 4475 - Student Teaching/Seminar: Special Education K-12:
General Curriculum (15) **

Adapted Curriculum License Courses (27 credit hours)

SPED 4271 - Systematic Instruction in the Adapted Curriculum (3)
SPED 4274 - General Curriculum Access and Adaptations (3)
SPED 4280 - Instruction and Support for Learners with Extensive Support Needs (3)
SPED 4281 - Communication Instruction for Students with Extensive Support Needs (3)
SPED 4476 - Student Teaching/Seminar: Special Education K-12:
Adapted Curriculum (15) **

**Enrollment in SPED 4475 or SPED 4476 requires admission to student teaching through the College's Office of School and Community Partnerships..

Unrestricted Elective Courses

As needed to complete the credit hours for graduation. It is recommended that students take content courses that will enable them to be labeled as "Highly Qualified" to teach content courses within a Special Education setting. Students should see an advisor for additional recommendations.

Degree Total = 120 Credit Hours

Academic Advising

Freshmen and Sophomores who intend to major in Special Education are classified as Pre-Education students in Special Education. These students are assigned an advisor in the Office of Teacher Education Advising and Licensure (TEAL), who help students select appropriate General Education and elective courses, and who will help them meet the requirements for admission to teacher education. To be admitted to the Teacher Education Program in Special Education, students must have completed an admission application through the TEAL office, attained a grade of C or above in SPED 2100 and either EDUC 1100 or EDUC 1511, attained passing scores on all three parts of the Praxis Core test or acceptable alternatives (SAT or ACT scores), and attained an overall GPA of at least 2.7 in at least 30 credit hours of coursework.

Applications for admission to the Teacher Education Program in Special Education are available from and are to be returned to the TEAL office after a student has earned at least 30 credit hours of coursework. Students are then assigned a major advisor in special education who assists planning the remainder of the program of study, including selection of either one of the two licensure areas, or both licensure areas. Course selections for each subsequent semester must be approved by the student's advisor in special education.

Progression Requirements

For a degree to be conferred, students must successfully complete all program requirements which include:

- Minimum GPA of 2.7 to declare major
- Minimum GPA of 2.5 must be maintained to remain enrolled.
- Students should plan to take EDUC 1100 / EDUC 1511 and SPED 2100 during Freshman Year.
- Students should plan to be admitted to upper division before Junior Year.
- Grades in professional education courses must be C or above
- Minimum overall GPA in professional education courses must be 2.75.
- Students may repeat a professional course once.

Requirements for Licensure and Graduation

- A grade of P in student teaching with recommendation from Cooperating Teacher, University Supervisor, and Principal is required for licensure and graduation.
- Passing score on edTPA is required for licensure and graduation

Special Policies or Requirements

The successful completion of this degree program includes meeting the North Carolina Department of Public Instruction's licensure requirements for K-12 certification. Consequently, additional requirements must be completed during the student's program and are listed below. Since state licensure requirements often change, additional work may be required to complete the program with a teaching license.

Planning Sheet

All education students are tracked through their program with a Program Planning Sheet. The original planning sheet is uploaded to the advising system and lists all courses taken, transfer hours, General Education and

minor requirements met, and courses remaining in the program. Note that the University requires that the minimum number of credits in a degree program is 120 credit hours.

Clinicals

Some courses in the professional program include a clinical requirement where students complete specific activities or designated hours in an appropriate setting. Clinicals are designed to expose students to diverse school demographics, locations, and programs.

Honors Program

For details about the Honors Program in Education, see the beginning of the Cato College of Education section.

Internship

Teacher education candidates participate in the yearlong internship during their final year of the program. During the first semester, students spend a minimum of one day per week in an assigned classroom while completing coursework on campus. During the second semester of the internship, students complete full-time student teaching in the same classroom. Applications for this yearlong internship are due two semesters prior to student teaching; part two of the application is due one semester prior to student teaching.

Bachelor of Arts in Special Education General Curriculum and Elementary Education K-6 Dual Program

In addition to the traditional Special Education General Curriculum or Adapted Curriculum K-12 Program options, the Department of Special Education and Child Development in collaboration with the Department of Reading and Elementary Education also offers a B.A. in Special Education - General Curriculum and Elementary Education K-6 Dual Program. The Special Education - General Curriculum and Elementary Education K-6 Dual Program qualifies graduates for the Standard Professional 1 (SP1) Professional Educator's License in Special Education General Curriculum K-6 and Elementary Education K-6. Graduates from the Dual Program are licensed to teach children with mild disabilities in grades K-6. Additionally, the Dual Program qualifies graduates for entry level positions in the elementary general education classroom in grades K-6.

Graduates of the Special Education - General Curriculum and Elementary Education K-6 Dual Program are prepared to: provide individually planned, systematically implemented, and carefully evaluated instruction for students with disabilities; provide educational services to students with disabilities in general classrooms, resource classrooms, and other educational settings; and help students with disabilities achieve the greatest possible personal self-sufficiency and success in present and future environments. Graduates of the program are prepared to meet the North Carolina Professional Teaching Standards and the ten Interstate New Teachers Assessment and Support Consortium (INTASC) Standards for new teachers in Content Pedagogy, Student Development, Diverse Learners, Multiple Instructional Strategies, Motivation and Management, Communication and Technology, Planning, Assessment, Reflective Practice, and School and Community Involvement. Graduates have specific coursework and clinical experiences in a variety of settings in order to learn and apply evidence-based knowledge and practices in the fields of special education and elementary education.

Admission Requirements (Pre-Education)

The Special Education - General Curriculum and Elementary Education K-6 Dual Program accepts 30 students per academic year. Once 30 applicants have been accepted into the Dual Program, the application process is closed. Students cannot apply to the Dual Program once they have already taken courses in another education program. Applications are reviewed first by the TEAL Office to determine that minimal acceptance requirements have been met. A second review of applications occurs by the Director of the Dual Program.

Freshmen and Transfers

- See University Admission Requirements
- *Minimum Overall GPA:* 2.7
- *Pre-Major/Prerequisite Courses:* A minimum of 30 credit hours in approved college-level courses, and a grade of C or above in the following:
 - EDUC 1100 or EDUC 1511
 - SPED 2100
- A passing score on the Praxis Core exam or acceptable alternatives (SAT or ACT scores)
- Completion and clearance on the Criminal Background Check
- Signed Statement of Commitment to Professional Dispositions
- Professional goals statement detailing interest in obtaining dual licensure

Currently Enrolled Students

- *Declaration of Major:* The Special Education General Curriculum and Elementary K-6 dual major is intended to be started in the second semester of Sophomore year. Students should plan to declare the major no later than the first semester of the Sophomore year. Students must complete an "Application for Admission to a Teacher Education Program" in the Office of Teacher Education Advising and Licensure (TEAL) in the Cato College of Education. Students must apply for admission to a specific teacher education program and complete the admissions process in order to enroll in any professional education courses at the 3000 level or above.

Degree Requirements

The Major in Special Education - General Curriculum and Elementary Education K-6 Dual Program leading to the B.A. degree requires a minimum of 120 credit hours.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. Students in this major should plan on taking the following courses that meet general education requirements and also satisfy courses in the major:

- BIOL 1110 - Principles of Biology I (3)
- BIOL 1110L - Principles of Biology I Laboratory (1)
- MATH 1340 - Mathematics for Elementary Teachers I (3)
- MATH 1341 - Mathematics for Elementary Teachers II (3)

(Recommended)

Foundation Courses (6-7 credit hours)

EDUC 2100 - Local Social Science: Public Education and Schooling in the U.S. (3)*
or EDUC 1100 - Foundations of Education and Diversity in Schools - Prospect Curriculum (4)*
SPED 2100 - Exceptionality in Schools and Society (3)*

**SPED 2100 and either EDUC 1100 or EDUC 1511 should be taken prior to a student's Sophomore year. Both courses must be completed with a grade of C or above to qualify for admission to the Teacher Education Program in the Special Education - General Curriculum and Elementary Education K-6 Dual Program.*

Major Courses (81 credit hours)

Admission to Teacher Education and advisor approval are required in order to register for any of the following courses:

ELDT 4100 - Foundations for Effective Technology Integration (3)
ELED 3111 - Instructional Design and Assessment in Elementary Education (3)
ELED 3120 - The Elementary School Child (3)
ELED 3221 - Teaching Science to Elementary School Learners (3)
ELED 3223 - Teaching Social Studies to Elementary Learners (3)
ELED 3292 - Theories and Practice in Urban Education (3)
ELED 4121 - Assessment and Instructional Differentiation in the Elementary School Classroom (3)
ELED 4122 - Creating an Effective Environment in the Elementary School Classroom (3)
ELED 4220 - Instructional Planning for Elementary Learners (3)
MAED 3222 - Teaching Mathematics to Elementary School Learners, Grades K-2 (3)
MAED 3224 - Teaching Mathematics to Elementary School Learners, Grades 3-6 (3)
READ 3224 - Teaching Foundational Literacy Skills (3)
READ 3226 - Applied Literacy and Practices (3)
SPED 3175 - Instructional Planning in Special Education (3)
SPED 4270 - Classroom Management (3)
SPED 4272 - Teaching Mathematics to K-12 Learners (3)
SPED 4275 - Teaching Reading to Elementary Learners (3)
SPED 4277 - Teaching Written Expression to K-12 Learners (3)
SPEL 3100 - Introduction to Special Education and Dual Program (3)**
SPEL 3173 - Assessment in Special Education and Elementary Education (3)
SPEL 4171 - Special Education: - Consultation and Collaboration in Elementary Schools (3)
SPEL 4477 - Student Teaching/Seminar: Special Education General Curriculum and Elementary Education K-6 (Dual Program) (15)
TESL 4204 - Learning, Schools, and Community (3)

***This course is an important and required introduction to the Dual Program, and it must be completed during the Fall semester of the student's Sophomore year.*

Related Licensure Requirement Course (3 credit hours)

Select one of the following:

ARTE 2121 - Integrating Art Across the Curriculum (3)
MUSC 1102 - Fundamentals of Musicianship (3)
MUSC 2191 - Incorporating Music Into the Elementary Classroom (3)
THEA 1360 - Applied Theatre in Communities and Schools (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Academic Advising

During the duration of the program, students are advised by the Dual Major Undergraduate Program Director. Students accepted into the Special Education - General Curriculum and Elementary Education K-6 Dual Program are required to attend advising sessions each semester during the program.

Progression Requirements

For a degree to be conferred, students must successfully complete all program requirements which include:

- Minimum GPA of 2.7 to declare major
- Minimum GPA of 2.5 must be maintained to remain enrolled
- Students should plan to take EDUC 1100 / EDUC 1511 and SPED 2100 during Freshman Year and be admitted to upper division before Sophomore Year.
- Grades in professional education must be C or above
- Minimum overall GPA in professional education courses must be 2.75
- Students may repeat a professional course once.
- Students may be dropped from a course if they register out of sequence.
- Approval of the Chair (or his or her designee) of the department that offers the program

Requirements for Licensure and Graduation

- A grade of P in student teaching with recommendation from Cooperating Teacher, University Supervisor, and Principal is required for licensure and graduation.
- Passing score on edTPA is required for licensure and graduation.

Special Policies or Requirements

The successful completion of this degree program includes meeting the North Carolina Department of Public Instruction's licensure requirements for K-6 certification. Consequently, additional requirements must be completed during the student's program and are listed below. Since state licensure requirements often change, additional work may be required to complete the program with a teaching license.

Planning Sheet

All education students are tracked through their program with a Program Planning Sheet. The original planning sheet is uploaded to the advising system and lists all courses taken, transfer hours, General Education and minor requirements met, and courses remaining in the program. Note that the University requires that the minimum number of credits in a degree program is 120 credit hours.

Clinicals

Some courses in the professional program include a clinical requirement where students complete specific activities or designated hours in an appropriate setting. Clinicals are designed to expose students to diverse school demographics, locations, and programs.

Honors Program

For details about the Honors Program in Education, see the beginning of the Cato College of Education section.

Internship

Teacher education candidates participate in the yearlong internship during their final year of the program. During the first semester, students spend a minimum of one day per week in an assigned classroom while completing coursework on campus. During the second semester of the internship, students complete full-time student teaching in the same classroom. Applications for this yearlong internship are due two semesters before student teaching; part two of the application is due one semester prior to student teaching.

Minor in Child and Family Development

The Minor in Child and Family Development provides opportunities for students to develop an overview of early learning and development, an understanding of early childhood issues, and insights into the role of families, as well as the role of child care in out-of-home experiences.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Students who declare the minor are required to complete six courses (18 credit hours total).
- Some of the required courses have prerequisites, so students should declare the Minor in Child and Family Development as early as possible to plan their schedule. Students declaring the minor as Sophomores and Juniors can usually complete the degree on schedule. Students interested in the minor should begin taking classes *as early as possible* after declaration.
- Advising and admission to the minor are administered through the Office of Teacher Education Advising and Licensure (TEAL).

Minor Requirements

- CHFD 2111 - Foundations in Child and Family Development (3)*
CHFD 2113 - Development: Prenatal to 36 Months (3)*
CHFD 2412 - The Practice of Observation, Documentation, and Analysis of Young Children's Behavior (3)
CHFD 3113 - Families as the Core of Partnerships (3)
SPED 3210 - Enhancing the Social-Emotional Development of Young Children in Inclusive Settings (3)-
SPED 4111 - Issues in Early Intervention for Young Children with Disabilities (3)

*CHFD 2111 and/or CHFD 2113 must be the first courses completed.

Minor Total = 18 Credit Hours

Progression Requirements

Students who declare the Minor in Child and Family Development are required to complete the above six courses. A minimum grade of C or above in the courses is required. CHFD 2111 and/or CHFD 2113 must be the first courses completed.

Special Policies or Requirements

At least 50% of courses applied to the minor must be taken at UNC Charlotte.

- EDU 146 (CHFD 0001) can be substituted for SPED 3210
- EDU 145 (CHFD 0001) and EDU 151 (EDUC 0001) can be substituted for any of the 3000/4000 level courses.
- CHFD 4200 can be substituted for any of the 3000/4000 level courses

Clinicals

Some courses in the professional program include a clinical requirement where students complete specific activities or designated hours in an appropriate setting. Clinicals are designed to expose students to diverse school demographics, locations, and programs.

Minor in Collaborative Educators in Inclusive Schools

The Collaborative Educators in Inclusive Schools minor provides opportunities for any undergraduate candidates admitted to a teacher licensure program to enhance their collaboration and co-teaching knowledge, practice and experiences so that they are more adequately prepared for typical responsibilities as a Pre-K to 12 educator. This minor is designed to prepare candidates for their careers by addressing competencies related to interdisciplinary collaboration and programming with a specific focus on supporting the needs of multilingual learners and students with disabilities. These competencies support candidates' ability to meet the diverse needs of students in classrooms. This minor is open to education majors only who have been admitted to a teacher licensure program at UNC Charlotte, but does not lead to a teaching license.

Admission Requirements

Admission to the teacher education program.

Required Courses

- CHFD 3113 - Families as the Core of Partnerships (3)
ECON 4100 - Mathematical Economics (3)
EDUC 4290 - Inclusion of Students with Varied Learning Needs (3)
EDUC 4292 - Collaborative Inclusive Co-Planning and Co-Teaching (3)
SPED 4101 - Data-based Decision-making Within a Multi-tiered System of Support Framework (3)
TESL 4204 - Learning, Schools, and Community (3)

Progression Requirements

Students who declare the *Collaborative Educators in Inclusive Schools Minor* are required to complete all six courses, earn a minimum grade of C or above, and maintain a GPA of 2.5 or higher.

Total = 18 Credit Hours

Minor in Inclusion, Disability, and Exceptionalities in American Society

The Inclusion, Disability, and Exceptionality in American Society Minor provides opportunities for undergraduates in all colleges except for the Cato College of Education to enhance their knowledge of exceptionalities including disabilities and giftedness and to recognize the impact exceptionalities have on the lives of people who experience them and on the people with whom they live and interact. This minor will prepare students to build environments that will increase accessibility and participation in all life experiences for children of all ages and adults with disabilities and other exceptionalities. The minor is designed to enhance a student's career by preparing them to understand the nature of exceptionalities, the meaning of disability and giftedness in our society, working with families of individuals with exceptionalities, and methods of promoting a more inclusive society. Program electives include courses in extensive support needs and gifted education. This minor is open to non-education majors who plan to work in careers involving individuals with exceptionalities. This minor does not lead to a teaching license.

Admission Requirements

Current UNC Charlotte Undergraduate Students

Admission to UNC Charlotte. See University Admission Requirements.

Minor Requirements

Required Courses

The following four courses are required as part of the Inclusion, Disability, and Exceptionalities in American Society minor:

- SPED 2100 - Exceptionality in Schools and Society (3)
- EDUC 4100 - Considerations for an Inclusive Society (3)
- CHFD 3113 - Families as the Core of Partnerships (3)
- EDUC 4293 - Universal Design: Considerations for Technology and Society (3)

Electives

Complete two of the following courses as electives:

- PSYC 2113 - Introduction to Brain, Behavior, and Mental Processes (3)
- PSYC 2117 - Introduction to Lifespan Development (3)
- PSYC 2370 - Child Development (3)
- PSYC 2371 - Adolescent Development (3)
- SOCY 2171 - Social Problems (3)
- SOCY 4111 - Social Inequality (3)
- SOCY 4135 - Sociology of Education (3)
- SOWK 1101 - The Field of Social Work (3)
- SPED 4115 - Autism Spectrum Disorder Across the Lifespan (3)
- SPED 4281 - Communication Instruction for Students with Extensive Support Needs (3)
- SPED 4318 - Collaboration and Transition-Focused Education (3)
- SPED 5211 - Nature and Needs of Gifted Students (3)
- SPED 6161 - Social and Emotional Needs of Gifted Students (3)

Minor Total = 18 Credit Hours

Progression Requirements

Students who declare the Inclusion, Disability, and Exceptionalities in American Society Minor are required to complete the four core courses

and two elective courses, earning a minimum grade of C or above in the program courses.

Early Entry: Graduate Certificate in Academically or Intellectually Gifted

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.0 overall undergraduate GPA
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents (i.e., transcripts and a brief personal statement)
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, with signatures indicating approval by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework
- Maintain a minimum 3.4 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree

Special Policies or Requirements

Up to 6 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 6 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for these degree programs, see the individual program listings in the *Graduate Catalog*.

The William States Lee *College of* Engineering

The William States Lee College of Engineering

enr.charlotte.edu

The William States Lee College of Engineering transforms lives, communities, and industries through student-centered applied learning, powerful partnerships, and research that solves complex problems that focuses on impacting society.

The Lee College of Engineering offers Baccalaureate degree programs in Engineering, Engineering Technology, and Construction Management. The College offers master's degree programs in Engineering, Construction and Facilities Engineering, Applied Energy and Electromechanical Engineering, Fire Protection and Safety Management, and Engineering Management. Ph.D. programs are available in Civil Engineering, Electrical Engineering, and Mechanical Engineering; as well as an interdisciplinary Ph.D. in Infrastructure and Environmental Systems. For details on the graduate programs, refer to the *UNC Charlotte Graduate Catalog*.

The College of Engineering consists of the following departments:

- **Department of Civil and Environmental Engineering**
- **Department of Electrical and Computer Engineering**
- **Department of Engineering Technology and Construction Management**
- **Department of Industrial and Systems Engineering**
- **Department of Mechanical Engineering and Engineering Science**

Degree Programs

Engineering Programs

The Baccalaureate programs in engineering offer professional engineering education that can be used as the foundation for different career objectives: workforce ready professional engineers in industry, business, or consulting; graduate study preparing for careers in research, development, or teaching; and a more general and liberal engineering education with the objective of keeping a variety of career paths open.

The course of study includes the humanities, social sciences, physical sciences, mathematics, and engineering sciences and design. The student expecting to accept employment in industry may emphasize the engineering design and engineering science aspects of a program, while the student preparing for graduate study might emphasize the mathematics and science aspects. Some graduates take on executive and management responsibilities in industries and firms that are based upon engineering products and services. These students may choose to construct an elective option in their program to include economics and business-related courses that strengthen their communications and other non-technical skills.

Engineering students are strongly encouraged to pursue the requirements for registration as a Professional Engineer (PE). The first step in the registration process is the successful completion of the Fundamentals of Engineering (FE) Examination. Students are encouraged to take this examination during their Senior year. Additional requirements for professional licensure subsequent to graduation include the accumulation of at least four-years of progressive engineering experience and successful completion of the Professional Engineer Examination (PE Exam). Students who complete the Cooperative Education Program or who complete their master's degree only need three years of progressive engineering experience to be eligible to take the PE Exam in North Carolina.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Once a student is admitted into the Lee College of Engineering, they are prohibited from transferring in coursework (Foundation, Core, and Major Courses) from other institutions without prior approval. This policy applies to courses taken from any other institution. Approvals are typically limited to 1000- and 2000-level courses taken during Summer terms. Policies for approving the transfer of 3000-level and above courses vary by degree program and should be discussed with an academic advisor prior to filing a petition for transient study. Approval may be denied due to University or College residency requirements. Equivalency for upper-division engineering courses may be denied.

Majors

- Bachelor of Science in Civil Engineering (B.S.C.E.)
- Bachelor of Science in Electrical Engineering (B.S.E.E.)
- Bachelor of Science in Environmental Engineering (B.S.)
- Bachelor of Science in Computer Engineering (B.S.C.P.E.)

- Bachelor of Science in Mechanical Engineering (B.S.M.E.)
- Bachelor of Science in Systems Engineering (B.S.S.E.)

Minors

- Minor in Computer Engineering
- Minor in Electrical Engineering
- Minor in Fire Safety
- Minor in Mechanical Engineering
- Minor in Occupational Safety

Honors Programs

- Engineering, Honors Program

Graduate Early Entry Programs

- Applied Energy and Electromechanical Engineering, M.S., Early Entry
- Civil Engineering, M.S., Early Entry
- Computer Engineering, M.S., Early Entry
- Construction and Facilities Engineering, M.S., Early Entry
- Electrical Engineering, M.S. or Ph.D., Early Entry
- Engineering Management, M.S., Early Entry
- Fire Protection and Safety Management, M.S., Early Entry
- Mechanical Engineering, M.S., Early Entry
- Optical Science and Engineering, M.S. or Ph.D., Early Entry

Engineering Technology Programs

Engineering technology is the profession in which knowledge of mathematics and natural sciences gained through higher education, experience, and practice is devoted primarily to the implementation and extension of existing technology for the benefit of humanity. Engineering technology education focuses on the applied aspects of science and engineering aimed at preparing graduates for practice in the technological spectrum closest to product improvement, manufacturing, construction, and engineering operational functions.

Engineering technology programs are characterized by a focus on application and practice with an approximately equal mix of theory, practice, and laboratory experience.

Graduates of the engineering technology programs are recruited by most major technological companies in the U.S. They are employed across the technological spectrum but are best suited to areas that deal with application, implementation, production, and construction. Technical sales and customer service fields also account for many placements.

Engineering technology students are encouraged to pursue the requirements for registration as a Professional Engineer. The first step in the registration process is the successful completion of the Fundamentals of Engineering (FE) Examination. Students are encouraged to take this examination during their Senior year. Additional requirements for professional licensure following graduation include the accumulation of at least eight years of progressive experience and successful completion of the Professional Engineer Examination (PE Exam). Students who complete the Cooperative Education Program or who complete their master's degree only need seven years of progressive engineering experience to be eligible to take the PE Exam in North Carolina.

Majors

- Bachelor of Science in Engineering Technology (BSET)

Graduate Early Entry Programs

- Applied Energy and Electromechanical Engineering, M.S., Early Entry

Construction Management Program

Construction management provides the education necessary for entry into the construction industry in a variety of careers in the residential, commercial, and industrial sectors, as well as infrastructure, and heavy horizontal construction. Related careers in real estate and land development, infrastructure development, code enforcement, and insurance are also career options.

The program is enhanced by a business/management core that includes courses in statistics, computer applications, economics, accounting, engineering economics, business management, business law, finance, and construction law. The Construction Management program shares a common lower division (First-Year and Second-Year) curriculum with the Civil Engineering Technology Program. This provides a two-year opportunity to determine which program best fits the desired academic objective and allows students who are interested to complete a double major in both Construction Management and Civil

Engineering Technology.

Majors

- Bachelor of Science in Construction Management (BSCM)

Graduate Early Entry Programs

- Construction and Facilities Engineering, M.S., Early Entry

Honors Program

The Engineering Honors Program provides students with access to opportunities designed to stimulate their thinking and broaden their exposure to topics related to the professional practice of engineering and engineering design. The Engineering Honors Program is committed to the highest principles of professional practice that guide our decision-making. The Engineering Honors Program is a community of learners actively engaged in academic scholarship while demonstrating the highest regard for others by modeling the ethical standards that protect the public safety; promote service to community above the self; and support, encourage, educate, and value others. These are the core values of the members of the program.

Admission Requirements

Students interested in being admitted to the Engineering Honors Program must be enrolled in the Engineering Senior Design capstone experience in their home department to be eligible to participate in the collegewide program. Admission to the program is based on the student's demonstrated honors potential and is determined by examining the cumulative GPA (minimum 3.50 for currently enrolled or transfer students), academic and other distinctions, activities, and other related factors. All admitted students must maintain a minimum 3.50 cumulative GPA at UNC Charlotte to remain a member of the program. Students failing to meet the minimum cumulative GPA requirement will be ineligible to enroll in the Honors Program.

Course Requirements

Students in the Engineering Honors Program must complete Engineering Honors Seminar I and II in conjunction with the respective Senior Design capstone course required for their program of study.

ENGR 3790 - Engineering Honors Seminar I (1)

ENGR 3791 - Engineering Honors Seminar II (1)

Progression Requirements

To graduate with "Honors in Engineering," a student must complete the required seminar course sequence and complete the Application to Candidacy process for graduating with honors, as directed by the Honors College, beginning one semester prior to graduation. A cumulative GPA of at least 3.50 overall and a grade of A must be earned in the Honors Program capstone project presentation.

Additional Engineering Programs and Opportunities

Maximizing Academic and Professional Success Program (MAPS)

The goals of the MAPS Program are to improve the retention, academic performance, and professional development of students who are committed to earning a degree from the William States Lee College of Engineering. The MAPS Program serves as a process for transition, as new College of Engineering students establish personal connections; learn, understand, and apply academic success and professional development strategies; and grow in self-confidence and personal independence. The MAPS Program also supports the University Center for Academic Excellence (UCAE) through funding of Peer Assisted Learning (PAL) leaders to provide additional student services for foundational first-year College of Engineering courses.

Assessment results consistently indicate that students who attend seven or more transition coaching sessions earn an average first-semester GPA of 3.20, as compared to non-participants with an average first-semester GPA of 2.70. Additionally, students who attend five or more PAL sessions during a semester for a given course typically earn a final course grade that is one-half, to one full letter grade higher compared to other students. For more details, please visit osds.charlotte.edu/maps-program/mission.

Freshman Learning Community (FLC)

The FLC is home to approximately 200 College of Engineering First-Year students who live, study, and interact in a single residence hall. Students benefit from having similar interests and course schedules. Students have free access to the Creativity Lab, a maker space, in the building. In addition, MAPS peer coaching and tutoring for a variety of First-Year courses are offered. Other events, such as "transition to university life" for new students, engineering site visits, and social activities are also available to participants. For details, visit osds.charlotte.edu/freshman-learning-community.

Student Leadership Academy

The Leadership Academy is an optional two-year extracurricular program designed to develop the leadership capabilities of College of Engineering students through a series of weekend retreats with other students, faculty, and industry partners. Top industry executives help facilitate specific activities providing

current, real-world perspectives on team-building, effective communication, ethics, integrity, emotional intelligence, positive influence, and goal-setting, all characteristics of a successful leader and communicator in business and the community. Selected students who fulfill all requirements of the program receive a transcript notation and a Crucial Conversations Certificate of Completion. For details, visit osds.charlotte.edu/leadership-academy.

Engage ME!

The Engage ME! Multicultural Engineers Program is meticulously structured to enhance retention rates and foster a profound sense of belonging among first-generation, first-time-in-college, underrepresented, and minority students within the William States Lee College of Engineering. Engage ME! aims to cultivate a vibrant community among engineering students while providing access to a myriad of resources both within and beyond the college.

This program embodies the principle that every member of our community possesses the full potential to excel in all degree programs offered by the College of Engineering. Through a variety of initiatives including social networking, peer activities, mentoring programs, and outreach events, Engage ME! nurtures academic, social and professional growth.

Furthermore, the program equips students with the tools to identify and seize opportunities for academic and professional success. To learn more about Engage ME! and its comprehensive offerings, please visit the Office of Student Development and Success at osds.charlotte.edu/engage-me/3.

WE Engage!

WE Engage! supports the academic and professional development of women in engineering, engineering technology and construction management. The program promotes and fosters peer and professional networking among women engineers through interactions that increase the recruitment, retention, graduation, and employment of women studying in the Lee College of Engineering. For details, visit <https://osds.charlotte.edu/osds-programs/we-engage/about-we-engage/>.

Experiential Learning and Service Learning Opportunities

Students are encouraged to participate in professional work experiences in support of their academic and career development through the cooperative education, internships and service learning programs offered to students in the College. The College works with the University Career Center to expand experiential learning offerings to enable more students to graduate with career related experience. For more information about experiential learning opportunities, see the University Career Center section of this Catalog and visit osds.charlotte.edu.

Cooperative Education (Co-op) Program

Students may obtain practical work experience while pursuing their degree by participating in cooperative education whereby a student completes a certain number of work sessions of full-time work experience in industry. Students can begin their co-op work sessions in the spring, summer and/or fall. The work experience is under the direction of the student's major department and is closely related to his or her field of study. Program benefits include transcript notation, possible technical elective credit (depending on the student's major), and credit towards the "professional engineering work experience" requirement for licensure to be a Professional Engineer in North Carolina.

To be eligible for the Co-op program, a student must have completed at least 30 credit hours at UNC Charlotte, including a number of specified courses with an overall minimum GPA of 2.50. A transfer student is expected to have completed at least 12 credit hours at UNC Charlotte.

The Co-op student works closely with their academic advisor to ensure a clear path to graduation. Students who participate in Co-op traditionally are more highly recruited at higher starting salaries than other students.

Students interested in learning more about the advantages and opportunities of participating in this program should contact the College's Director for Student Professional Development and Employer Relations or the University Career Center. For details, visit osds.charlotte.edu.

Domestic Internships

A number of opportunities for internships (either for-credit or not) exist for students at local and regional employers. Internships for College of Engineering students are always paid positions. UNC Charlotte University Career Center defines an Internship as requiring a minimum of 80 work hours which need to be completed in no less than five weeks for one semester. Fall and Spring semester internships are typically part-time. Summer internships may be full- or part-time.

Internships posted by the University Career Center do not routinely offer academic credit. Students can earn credit, when other options are not available, by registering for UCOL 3410 (Career Development Internship). UCOL 3410 allows Junior- and Senior-level students to earn one to three hours of elective credit, depending on criteria set by the employer and the University Career Center in consultation with the student's major department. Approval for enrollment must be arranged before the student begins the work experience.

Students interested in learning more about the advantages and opportunities of participating in this program should contact the College's Director for Student Professional Development and Employer Relations or the University Career Center. For details, visit osds.charlotte.edu.

International Experiences

The College provides opportunities for overseas study, research, and/or an industrial experience. In many cases, students who meet eligibility requirements receive special scholarships and/or grants to help defray the cost of these programs.

Fundamentals of Engineering (FE) Exam

The first step in professional licensure is the FE exam. Students in ABET accredited programs may take the FE Exam at any time. The College encourages students to take and successfully pass this national examination during their Senior year. For details, visit pd.charlotte.edu/licensure.

Continuing Engineering Studies

The College of Engineering sponsors various special educational programs for practicing engineers, technologists, technicians, and others, in addition to its regular academic degree programs and courses. These include conferences, short courses, seminars, and other continuing education programs designed to aid those practicing in technical professions and occupations to keep abreast of the latest developments in the rapidly expanding technology. For more information, visit the School of Professional Studies at professional.charlotte.edu.

Department of Civil and Environmental Engineering

cee.charlotte.edu

Undergraduate Programs

- **B.S. in Civil Engineering**
 - Energy Infrastructure
 - Land Development Engineering
- **B.S. in Environmental Engineering**
- **Early Entry: M.S. in Civil Engineering**

The Department of Civil and Environmental Engineering offers exceptional educational and research opportunities for students. Undergraduate civil engineering students receive comprehensive exposure to technical subjects in all four disciplines of civil engineering: Environmental/Water Resources, Geotechnical, Structures, and Transportation, which are integral parts of the mandatory curriculum.

While the B.S.C.E. curriculum is designed to provide undergraduate students with a broad Civil and Environmental Engineering educational experience, undergraduate students may also select an optional concentration in two select areas:

- Energy Infrastructure
- Land Development Engineering

The Civil Engineering field encompasses various challenges, including:

1. Analysis, design, construction, and monitoring of foundation systems, buildings, bridges, dams, and other structures.
2. Transportation systems, such as highways, mass transit, airports, railroads, pipelines, canals, and harbor facilities.
3. Land development, and urban and regional planning.
4. Power infrastructure design and testing.
5. Environmental solutions, addressing air pollution, groundwater pollution, water pollution, noise pollution, ecological effects.
6. Managing water resources for urban use, industrial applications, and land reclamation.
7. Developing systems for water transmission and river control.
8. Establishing water quality control systems for purification and waste treatment.

Undergraduate Environmental Engineering (B.S.) students undergo coursework that integrates core Environmental Engineering subjects with ongoing design experience throughout the curriculum. This approach offers students opportunities to assess, analyze, and solve real-world and locally relevant problems related to contamination of soils, water, and the atmosphere. The Environmental Engineering field

encompasses various challenges, including:

1. Environmental solutions, addressing air pollution, groundwater pollution, water pollution, noise pollution, ecological effects.
2. Managing water resources for urban use, industrial applications, and land reclamation.
3. Developing systems for water transmission and river control.
4. Establishing water quality control systems for purification and waste treatment

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Advanced Degree Programs

Civil and Environmental Engineering students can pursue the following advanced degrees:

- Master of Science in Civil Engineering (M.S.C.E.)
- Master of Science in Engineering (M.S.E.)
- Doctor of Philosophy (Ph.D.) in Civil Engineering
- Doctor of Philosophy (Ph.D.) in Infrastructure and Environmental Systems (INES)

Graduate students typically engage in coursework and/or research within a specific technical area.

Students should consider the graduate study options offered by the Department of Civil and Environmental Engineering as they plan their undergraduate program of study. While qualified students can begin working on a Master's degree at the completion of their B.S.C.E. or Environmental Engineering B.S., students also have two options for an accelerated Master's degree:

- 1) Incoming First-Year students may elect to enroll in the 5-year program to obtain both a B.S. and an M.S. degree upon graduation.
- 2) An early-entry M.S. degree option is available to students who meet the 3.20 GPA criterion. Qualified students who elect this option apply to the Graduate School as an undergraduate student, and are permitted to double-count 9 credit hours of graduate coursework towards upper-level undergraduate electives. For additional information about the graduate programs, see the *UNC Charlotte Graduate Catalog*.

Civil Engineering (B.S.C.E.) Program Educational Objectives

The Bachelor of Science in Civil Engineering (BSCE) Program Educational Objectives (PEO) listed below describe the program's objectives for BSCE graduates three to five years after they have completed the program.

- 1) BSCE Program graduates will be progressing successfully in their career and exhibiting leadership qualities.
- 2) BSCE Program graduates will be demonstrating integrity and ethical behavior in all professional activities. Graduates will further demonstrate professionalism by nearing/obtaining professional

- licensure as appropriate for their chosen career, and by actively participating in professional activities.
- 3) BSCE Program graduates will be demonstrating their technical ability to solve problems and/or manage engineering solutions from conception through implementation.
 - 4) BSCE Program graduates will be maintaining and expanding professional competencies and mastering emerging technologies by engaging in lifelong learning that includes graduate studies and professional education.
 - 5) BSCE Program graduates will strive to incorporate global, societal, economic, and environmental impacts in their professional work, consistent with the principles of sustainable development.
 - 6) BSCE graduates will be committed to continued engagement and support of the Civil and Environmental Engineering Department and seek opportunities to mentor future engineers.
 - 7) BSCE Program graduates will be engaging and collaborating with the communities in which they live and work.

Accreditation

The undergraduate Civil Engineering Program within the Department of Civil and Environmental Engineering at The University of North Carolina at Charlotte is accredited by the Engineering Accreditation Commission of ABET, <https://www.abet.org>.

Student Outcomes

The following student outcomes for the BSCE program support the program educational objectives. Attainment of these outcomes prepares graduates to enter the professional practice of engineering. Student outcomes include:

- 1) An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics;
- 2) An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors;
- 3) An ability to communicate effectively with a range of audiences;
- 4) An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts;
- 5) An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives;
- 6) An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions; and
- 7) An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

ASCE Program Criteria

ABET requires that accredited programs meet program-specific criteria established by the American Society of Civil Engineers (ASCE). Specifically, the Civil Engineering program at UNC Charlotte must meet ASCE program-specific criteria related to: 1) Curriculum and 2) Faculty as outlined below:

- 1) **Curriculum:** The curriculum must prepare graduates to apply knowledge of mathematics through differential equations, calculus-based physics, chemistry, and at least one additional area of basic

science; apply probability and statistics to address uncertainty; analyze and solve problems in at least four technical areas appropriate to civil engineering; conduct experiments in at least two technical areas of civil engineering and analyze and interpret the resulting data; design a system, component, or process in at least two civil engineering contexts; include principles of sustainability in design; explain basic concepts in project management, business, public policy, and leadership; analyze issues in professional ethics; and explain the importance of professional licensure.

- 2) **Faculty:** The program must demonstrate that faculty teaching courses that are primarily design in content are qualified to teach the subject matter by virtue of professional licensure, or by education and design experience. The program must demonstrate that it is not critically dependent on one individual.

Bachelor of Science in Civil Engineering (B.S.C.E.)

A Major in Civil Engineering leading to the Bachelor of Science in Civil Engineering (B.S.C.E.) degree consists of 120 credit hours.

Accreditation

The undergraduate Environmental Engineering Program within the Department of Civil and Environmental Engineering is actively seeking accreditation, but is not currently accredited by the Engineering Accreditation Commission of ABET.

Admission Requirements

First-Year Students

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)
- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above
 - Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Currently Enrolled Students

Internal Change of Major

Internal change of majors within the College of Engineering must have a minimum GPA of 2.50 (2.80 for Mechanical Engineering). Students who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Change of Major Into a Program in the College of Engineering

First-time college students who seek eligibility for a change of major from a non-engineering major into an engineering program are required to:

- Complete the First-Year Curriculum.
- Have no more than two attempts per course, including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).

Students Seeking Eligibility for a Change of Major

- Should continue to be advised by their current advisor.
- Should focus on successfully completing courses that count towards the program of interest and not rely on grades in unrelated courses to elevate the GPA.
- Are not permitted to enroll in Sophomore engineering courses.
- May request authorization to enroll in ENGR 1300, ENGR 1301, ENGR 1302 or ENGR 1303 via a request to the College of Engineering Advising department at osds-advising@charlotte.edu.

Transfers Seeking Eligibility for a Change of Major

Students who transfer to Charlotte into a non-engineering major and have not met the Transfer Requirements for a given engineering program are not guaranteed to be considered for a change of major. Representatives of the program of interest make decisions on a student's eligibility to pursue a change of major based on a holistic review of a student's entire academic record, including grades earned at other institutions. A record of unsuccessful attempts in courses will weigh negatively on such decisions. If transfer students are allowed to pursue eligibility for a change of major to a given program, they will be required to:

- Complete the Common First-Year Curriculum.
- Have no more than two attempts per course including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).
- Complete at least 12 credits of courses at Charlotte, including at least four courses in math, science and/or engineering.

Common First-Year Curriculum (CFY)

The College of Engineering uses a Common First-Year Curriculum (CFY) for all Engineering students in order to:

- Provide a strong academic base of foundational knowledge and skills
- Facilitate changing majors within the first year
- Support students with lower math placement and increase access to all majors
- Allow students to explore different majors before committing
- Enhance learning with innovative pedagogies and activities

Common First-Year Courses

All new first year students are initially advised by a central office within the W.S. Lee College of Engineering. Students must complete the following classes that are common to all majors of the college (except Construction Management and Fire and Safety Engineering Technology) in order to progress and matriculate to their major department. *All First-Year Curriculum courses require a grade of C or better.*

ENGR 1300 Exploring Engineering & Technology with Success(2)

ENGR 1301 Foundations of Math and Science for Engineering(3)

ENGR 1302 Logic and Computational Problem Solving(3)

ENGR 1303 Engineering Visualization and Graphical Communication(3)

PHYS 2101(3)

PHYS 2101L(1)

Two MATH courses: MATH 1103* or MATH 1241* or MATH 1242*(3 each)

See Notes 1 and 2 below

* All students should consult their advisor to select the math courses that match their planned major.

Note 1

Progression into Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Mechanical Engineering, and Systems Engineering Major Courses after completing the Common First Year Curriculum requires that students also complete MATH 1241, MATH 1242, PHYS 2101, and PHYS 2101L.

Note 2

Progression into Civil Engineering Technology, Electromechanical Engineering Technology, and Mechanical Engineering Technology Major Courses after completing the Common First Year Curriculum requires that students complete MATH 1241, PHYS 2101, and PHYS 2101L with a C or better (except for Electromechanical Engineering Technology).

Note 3

Students must earn at least a 2.0 GPA in the first semester to continue into the second semester.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Elective courses should be chosen to satisfy University General Education requirements, meet the objectives of a broad education consistent with the educational goals of the profession, and complement the student's overall educational plan. To avoid taking "extra" elective courses, students must select their elective courses carefully after consulting with their faculty advisor.

First-Year Courses (21 credit hours)

See Common First-Year Curriculum (CFY) for details.

Foundation Courses (19 credit hours)

Required Foundation Courses (16 credit hours)

CHEM 1352 - General Chemistry for Engineers(4)*

MATH 2171 - Differential Equations (3)*
MATH 2241 - Calculus III (3)*
STAT 3128 - Probability and Statistics for Engineers (3)
PHYS 2102 - Physics for Science and Engineering II (3)

Plus one of the following:

CHEM 1252 - General Chemistry II (3)
and CHEM 1252L - General Chemistry II Lab (1)
PHYS 2102 - Physics for Science and Engineering II (3)
and PHYS 2102L - Physics for Science and Engineering II Lab (1)

Elective Foundation Courses (3 credit hours)

Select one of the following:

BIOL 1110 - Principles of Biology I (3)
BIOL 1115 - Principles of Biology II (3)
BIOL 2120 - General Biology I (3)
BIOL 2259 - Fundamentals of Microbiology (3)
BIOL 2273 - Human Anatomy and Physiology (3)
BIOL 3111 - Cell Biology (3)
BIOL 4250 - Microbiology (3)
ESCI 1101 - Earth Sciences-Geography (3)
GEOL 1200 - Physical Geology (3)
GEOL 2100 - The Violent Earth (3)
GEOL 3190 - Environmental Geology (3)

*A grade of C or above is required.

Major Courses (48 credit hours)

CEGR 2101 - Civil Engineering Drawing (2)
CEGR 2102 - Engineering Economic Analysis (3)*
CEGR 2154 - Design Project Lab (2)*
CEGR 3111 - Construction Engineering (3)*
CEGR 3122 - Structural Analysis (3)*
CEGR 3141 - Introduction to Environmental Engineering (3)*
CEGR 3143 - Hydraulics and Hydrology (3)*
CEGR 3153 - Transportation Laboratory (2)
CEGR 3155 - Environmental Laboratory (2)
CEGR 3161 - Transportation Engineering I (3)*
CEGR 3201 - Systems and Design (3)
CEGR 3256 - Structural Materials Laboratory (1)
CEGR 3259 - Geotechnical Laboratory (1)
CEGR 3278 - Geotechnical Engineering (3)*
ENGR 3295 - Multidisciplinary Professional Development (1)
MEGR 2141 - Engineering Mechanics I (3)*
MEGR 2144 - Introduction to Solid Mechanics (3)*

*A grade of C or above is required.

Elective Courses (21 credit hours)

Civil Engineering Design Elective Courses (6 credit hours)
Select one course in at least two technical areas (Options):

Option 1: Environmental Engineering

CEGR 4142 - Water Treatment Engineering (3)*
CEGR 4147 - Stormwater Management (3)*
CEGR 4242 - Wastewater Treatment Design (3)*

Option 2: Geotechnical Engineering

CEGR 4264 - Landfill Design (3)*
CEGR 4270 - Earth Pressures and Retaining Structures (3)

CEGR 4278 - Geotechnical Engineering II (3)*

Option 3: Structural Engineering

CEGR 3221 - Structural Steel Design I (3)*
CEGR 3225 - Reinforced Concrete Design I (3)*
CEGR 4122 - Power Plant Design (3)

Option 4: Transportation Engineering

CEGR 4161 - Advanced Traffic Engineering (3)*
CEGR 4162 - Transportation Planning (3)*
CEGR 4185 - Geometric Design of Highways (3)*
CEGR 4262 - Traffic Engineering (3)*

*A grade of C or above is required.

Mechanical/Electrical Engineering Elective Course (3 credit hours)

Select one of the following:

ECGR 2161 - Basic Electrical Engineering I (3)
MEGR 3111 - Thermodynamics I (3)
MEGR 3121 - Dynamics Systems I (3)

Civil Engineering Restricted Elective Courses (3 credit hours)

Select one of the following (that hasn't already been taken):

CEGR 3221 - Structural Steel Design I (3)
CEGR 3225 - Reinforced Concrete Design I (3)

Civil Engineering Unrestricted Elective Courses (6 credit hours)

Select two from the following:

CEGR 3000-3999
CEGR 4000-4999

Technical Elective Courses (3 credit hours)

Select one technical elective course from the list below. Any course not appearing on this list requires written permission from the Undergraduate Director prior to registering for the course. Any non-listed courses must be at the 3000-level or above and must come from one of the departments listed below.

Accounting

ACCT 3330 - Managerial Cost Accounting (3)

Biology

BIOL 4144 - Advanced Ecology (4)
BIOL 4250 - Microbiology (3)
BIOL 3000-4999 - Biological Sciences Elective

Business Administration

BLAW 3150 - Business Law I (3)
BLAW 3250 - Business Law II (3)
COMM 3160 - Business Communications (3)
FINN 3120 - Financial Management (3)
MKTG 3110 - Marketing Concepts (3)

Chemistry

CHEM 1252 - General Chemistry II (3)
CHEM 2000-4999 - Chemistry Elective

Computer Science

ITCS 3000-4999 - Computer Science Elective

Earth Sciences

- ESCI 3180 - Environmental Impact Analysis (3)
- ESCI 4140 - Hydrologic Processes (4)
- GEOL 3130 - Structural Geology (4)
- GEOL 3190 - Environmental Geology (3)
- GEOL 3000-4999 – Geology Elective

Economics

- ECON 3125 - Managerial Economics (3)
- ECON 4150 - Urban and Regional Economics (3)
- ECON 4160 - Economics of Transportation (3)
- ECON 4171 - Economics of International Trade (3)
- ECON 4181 - Energy and Environmental Economics (3)
- ECON 3000-4999 – Economics Elective

Engineering

- CEGR 3000-4999 – Civil Engineering Elective
- ECGR 3000-4999 – Electrical and Computer Engineering Elective
- MEGR 3000-4999 – Mechanical Engineering Elective
- SEGR 3000-4999 – Systems Engineering Elective

Geography

- GEOG 3100 - The City and Its Region (3)
- GEOG 3115 - Urban Transportation Problems (3)

- GEOG 3200 - Land Use Planning (3)
- GEOG 3210 - Regional Planning (3)
- GEOG 3215 - Environmental Planning (3)
- GEOG 4155 - Retail Location (3)
- GEOG 4160 - The Geography of Transportation Systems (3)
- GEOG 3000-4999 – Geography Elective

Management Information Systems

- INFO 3000-4999 – Management Information Systems Elective

Mathematics

- MATH 2164 - Matrices and Linear Algebra (3)
- MATH 2242 - Calculus IV (3)
- MATH 3000-4999 – Mathematics Elective

Physics

- PHYS 3000-4999 – Physics Elective

Operations Management

- OPER 3100 - Operations Management (3)
- OPER 3201 - Operations Planning and Control (3)
- OPER 3203 - Decision Modeling and Analysis (3)
- OPER 3204 - Management of Service and Project Operations (3)
- OPER 3206 - Quality Assurance and Management (3)

Operations Research

- OPRS 3111 - Operations Research: Deterministic Models (3)
- OPRS 3113 - Operations Research: Probabilistic Models (3)
- OPRS 3000-4999 – Operations Research Elective

Statistics

- STAT 3000-4999 – Statistics Elective

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year Courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core

courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Concentrations

The B.S.C.E. degree is also available with optional Concentrations in Energy Infrastructure, Environmental/Water Resources Engineering, Geotechnical Engineering, Land Development Engineering, Structures, and Transportation. See the following individual listings for each.

Bachelor of Science in Civil Engineering (B.S.C.E.) with Concentration in Energy Infrastructure

The Bachelor of Science in Civil Engineering (B.S.C.E.) with a Concentration in Energy Infrastructure requires a minimum of 120 credit hours. The Concentration in Energy Infrastructure is intended for students interested in a specialized focus in energy as it relates to civil engineering, infrastructure, and environmental issues related to the development, generation, and distribution of energy.

Through careful course selection and scheduling, students can obtain the Concentration in Energy Infrastructure within the required 120-hour B.S.C.E. curriculum. Students completing the requirements described in this program receive a special designation on their transcripts showing they have completed the Concentration in Energy Infrastructure.

Admission Requirements

First-Year Students

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This

selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)
- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above
 - Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Currently Enrolled Students

- A grade of C or above is required for selected major Courses. Students must earn at least a 2.50 GPA in the selected Concentration Courses.

Internal Change of Major

Internal change of majors within the College of Engineering must have a minimum GPA of 2.50 (2.80 for Mechanical Engineering). Students who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Change of Major Into a Program in the College of Engineering

First-time college students who seek eligibility for a change of major from a non-engineering major into an engineering program are required to:

- Complete the First-Year Curriculum.
- Have no more than two attempts per course, including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).

Students Seeking Eligibility for a Change of Major

- Should continue to be advised by their current advisor.
- Should focus on successfully completing courses that count towards the program of interest and not rely on grades in unrelated courses to elevate the GPA.
- Are not permitted to enroll in Sophomore engineering courses.
- May request authorization to enroll in ENGR 1300, ENGR 1301, ENGR 1302 or ENGR 1303 via a request to the College of Engineering Advising department at osds-advising@charlotte.edu.

Transfers Seeking Eligibility for a Change of Major

Students who transfer to Charlotte into a non-engineering major and have not met the Transfer Requirements for a given engineering program are not guaranteed to be considered for a change of major. Representatives of the program of interest make decisions on a student's eligibility to pursue a change of major based on a holistic review of a student's entire academic record, including grades earned at other institutions. A record of unsuccessful attempts in courses will weigh

negatively on such decisions. If transfer students are allowed to pursue eligibility for a change of major to a given program, they will be required to:

- Complete the Common First-Year Curriculum.
- Have no more than two attempts per course including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).
- Complete at least 12 credits of courses at Charlotte, including at least four courses in math, science and/or engineering.

Common First-Year Curriculum (CFY)

The College of Engineering uses a Common First-Year Curriculum (CFY) for all Engineering students in order to:

- Provide a strong academic base of foundational knowledge and skills
- Facilitate changing majors within the first year
- Support students with lower math placement and increase access to all majors
- Allow students to explore different majors before committing
- Enhance learning with innovative pedagogies and activities

Common First-Year Courses

All new first year students are initially advised by a central office within the W.S. Lee College of Engineering. Students must complete the following classes that are common to all majors of the college (except Construction Management and Fire and Safety Engineering Technology) in order to progress and matriculate to their major department. *All First-Year Curriculum courses require a grade of C or better.*

ENGR 1300 Exploring Engineering & Technology with Success(2)

ENGR 1301 Foundations of Math and Science for Engineering(3)

ENGR 1302 Logic and Computational Problem Solving(3)

ENGR 1303 Engineering Visualization and Graphical Communication(3)

PHYS 2101(3)

PHYS 2101L(1)

Two MATH courses: MATH 1103* or MATH 1241* or MATH 1242* (3 each)

See Notes 1 and 2 below

* All students should consult their advisor to select the math courses that match their planned major.

Note 1

Progression into Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Mechanical Engineering, and Systems Engineering Major Courses after completing the Common First Year Curriculum requires that students also complete MATH 1241, MATH 1242, PHYS 2101, and PHYS 2101L.

Note 2

Progression into Civil Engineering Technology, Electromechanical Engineering Technology, and Mechanical Engineering Technology Major Courses after completing the Common First Year Curriculum requires that students complete MATH 1241, PHYS 2101, and PHYS 2101L with a C or better (except for Electromechanical Engineering Technology).

Note 3

Students must earn at least a 2.0 GPA in the first semester to continue into the second semester.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Elective courses should be chosen to satisfy University General Education requirements, meet the objectives of a broad education consistent with the educational goals of the profession, and complement the student's overall educational plan. To avoid taking "extra" elective courses, students must select their elective courses carefully after consulting with their faculty advisor.

First-Year Courses (21 credit hours)

See Common First-Year Curriculum (CFY) for details.

Additional Foundation Courses (19 credit hours)

Required Foundation Courses (16 credit hours)

CHEM 1352-General Chemistry for Engineers(4)

MATH 2171-Differential Equations (3) *

MATH 2241-Calculus III(3) *

PHYS 2102-Physics for Science and Engineering II(3)

STAT 3128-Probability and Statistics for Engineers(3)

Elective Foundation Course (3 credit hours)

Select one of the following:

BIOL 1110 - Principles of Biology I (3)

BIOL 1115 - Principles of Biology II (3)

BIOL 2120 - General Biology I (3)

BIOL 2259 - Fundamentals of Microbiology (3)

BIOL 2273 - Human Anatomy and Physiology (3)

BIOL 3111 - Cell Biology (3)

BIOL 4250 - Microbiology (3)

ESCI 1101 - Earth Sciences-Geography (3)

GEOL 1200 - Physical Geology (3)

GEOL 2100 - The Violent Earth (3)

GEOL 3190 - Environmental Geology (3)

*A grade of C or above is required.

Major Courses (41 credit hours)

CEGR 2101-Civil Engineering Drawing (2) *

CEGR 2102-Engineering Economic Analysis(3) *

CEGR 2154-Design Project Lab(2) *

CEGR 3111-Construction Engineering(3) *

CEGR 3122-Structural Analysis(3) *

CEGR 3141-Introduction to Environmental Engineering(3) *

CEGR 3143-Hydraulics and Hydrology(3) *

CEGR 3153-Transportation Laboratory(2)

CEGR 3155-Environmental Laboratory(2)

CEGR 3161-Transportation Engineering I(3) *

CEGR 3201-Systems and Design(3)

CEGR 3256-Structural Materials Laboratory(1) *

CEGR 3259-Geotechnical Laboratory(1)

CEGR 3278-Geotechnical Engineering(3) *

ENGR 3295-Multidisciplinary Professional Development(1)

MEGR 2141-Engineering Mechanics I(3) *

MEGR 2144-Introduction to Solid Mechanics(3) *

*A grade of C or above is required.

Elective Courses (21 credit hours)

Civil Engineering Concentration Design Courses (6 credit hours)

CEGR 4122 - Power Plant Design (3) *

CEGR 4264 - Landfill Design (3) *

*A grade of C or above is required.

Mechanical/Electrical Engineering Elective Course (3 credit hours)

Select one of the following:

ECGR 2161 - Basic Electrical Engineering I (3)

MEGR 3111 - Thermodynamics I (3)

MEGR 3121 - Dynamics Systems I (3)

Civil Engineering Restricted Elective Courses (3 credit hours)

Select one of the following:

CEGR 3221 - Structural Steel Design I (3)

CEGR 3225 - Reinforced Concrete Design I (3)

Civil Engineering Concentration Elective Courses (6 credit hours)

Take two of the following courses:

CEGR 3891 - Energy Infrastructure Individualized Study (3) *

CEGR 4146 - Advanced Engineering Hydraulics (3) *

CEGR 4246 - Energy and the Environment (3) *

*A grade of C or above is required.

Concentration Elective Courses (3 credit hours)

Select one course from the list below.

CEGR 4247 - Sustainability (3) *

ECON 4181 - Energy and Environmental Economics (3) *

ECGR 4171 - Introduction to Energy Systems (3) *

*A grade of C or above is required.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from

a course with a grade of W

- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year Courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Bachelor of Science in Civil Engineering (B.S.C.E.) with Concentration in Land Development Engineering

The Bachelor of Science in Civil Engineering (B.S.C.E.) with a Concentration in Land Development Engineering is intended for students interested in a specialized focus in land development engineering as it relates to civil engineering and infrastructure issues.

Through careful course selection and scheduling, students can obtain the Concentration in Land Development Engineering within the required 120 credit hour B.S.C.E. curriculum. Students completing the requirements described in this program receive a special designation on their transcripts showing they have completed the Concentration in Land Development Engineering.

Admission Requirements

First-Year Students

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)
- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above
 - Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Currently Enrolled Students

- A grade of C or above is required for selected major Courses. Students must earn at least a 2.50 GPA in the selected Concentration Courses.

Internal Change of Major

Internal change of majors within the College of Engineering must have a

minimum GPA of 2.50 (2.80 for Mechanical Engineering). Students who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Change of Major Into a Program in the College of Engineering

First-time college students who seek eligibility for a change of major from a non-engineering major into an engineering program are required to:

- Complete the First-Year Curriculum.
- Have no more than two attempts per course, including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).

Students Seeking Eligibility for a Change of Major

- Should continue to be advised by their current advisor.
- Should focus on successfully completing courses that count towards the program of interest and not rely on grades in unrelated courses to elevate the GPA.
- Are not permitted to enroll in Sophomore engineering courses.
- May request authorization to enroll in ENGR 1300, ENGR 1301, ENGR 1302 or ENGR 1303 via a request to the College of Engineering Advising department at osds-advising@charlotte.edu.

Transfers Seeking Eligibility for a Change of Major

Students who transfer to Charlotte into a non-engineering major and have not met the Transfer Requirements for a given engineering program are not guaranteed to be considered for a change of major. Representatives of the program of interest make decisions on a student's eligibility to pursue a change of major based on a holistic review of a student's entire academic record, including grades earned at other institutions. A record of unsuccessful attempts in courses will weigh negatively on such decisions. If transfer students are allowed to pursue eligibility for a change of major to a given program, they will be required to:

- Complete the Common First-Year Curriculum.
- Have no more than two attempts per course including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).
- Complete at least 12 credits of courses at Charlotte, including at least four courses in math, science and/or engineering.

Common First-Year Curriculum (CFY)

The College of Engineering uses a Common First-Year Curriculum (CFY) for all Engineering students in order to:

- Provide a strong academic base of foundational knowledge and skills
- Facilitate changing majors within the first year
- Support students with lower math placement and increase access to all majors
- Allow students to explore different majors before committing
- Enhance learning with innovative pedagogies and activities

Common First-Year Courses

All new first year students are initially advised by a central office within the W.S. Lee College of Engineering. Students must complete the following classes that are common to all majors of the college (except Construction Management and Fire and Safety Engineering Technology) in order to progress and matriculate to their major department. *All First-Year Curriculum courses require a grade of C or better.*

ENGR 1300 Exploring Engineering & Technology with Success(2)
ENGR 1301 Foundations of Math and Science for Engineering(3)
ENGR 1302 Logic and Computational Problem Solving(3)
ENGR 1303 Engineering Visualization and Graphical Communication(3)
PHYS 2101(3)
PHYS 2101L(1)
Two MATH courses: MATH 1103* or MATH 1241* or MATH 1242*(3 each)
See Notes 1 and 2 below

*All students should consult their advisor to select the math courses that match their planned major.

Note 1

Progression into Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Mechanical Engineering, and Systems Engineering Major Courses after completing the Common First Year Curriculum requires that students also complete MATH 1241, MATH 1242, PHYS 2101, and PHYS 2101L.

Note 2

Progression into Civil Engineering Technology, Electromechanical Engineering Technology, and Mechanical Engineering Technology Major Courses after completing the Common First Year Curriculum requires that students complete MATH 1241, PHYS 2101, and PHYS 2101L with a C or better (except for Electromechanical Engineering Technology).

Note 3

Students must earn at least a 2.0 GPA in the first semester to continue into the second semester.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Elective courses should be chosen to satisfy University General Education requirements, meet the objectives of a broad education consistent with the educational goals of the profession, and complement the student's overall educational plan. To avoid taking "extra" elective courses, students must select their elective courses carefully after consulting with their faculty advisor.

First-Year Courses (21 credit hours)

See Common First-Year Curriculum (CFY) for details.

Additional Foundation Courses (19 credit hours)

Required Foundation Courses (16 credit hours)

CHEM 1352 - General Chemistry for Engineers(4)
MATH 2171 - Differential Equations(3)*
MATH 2241 - Calculus III(3)*
PHYS 2102 - Physics for Science and Engineering II(3)
STAT 3128 - Probability and Statistics for Engineers(3)
**A grade of C or above is required.*

Elective Foundation Course (3 credit hours)

Select one of the following:

BIOL 1110 - Principles of Biology I (3)
BIOL 1115 - Principles of Biology II (3)
BIOL 2120 - General Biology I (3)
BIOL 2259 - Fundamentals of Microbiology (3)
BIOL 2273 - Human Anatomy and Physiology (3)
BIOL 3111 - Cell Biology (3)
BIOL 4250 - Microbiology (3)
ESCI 1101 - Earth Sciences-Geography (3)
GEOL 1200 - Physical Geology (3)
GEOL 2100 - The Violent Earth (3)
GEOL 3190 - Environmental Geology (3)

Major Courses (41 credit hours)

CEGR 2101-Civil Engineering Drawing(2)*
CEGR 2102-Engineering Economic Analysis(3)*
CEGR 2154-Design Project Lab(2)*
CEGR 3111-Construction Engineering(3)*
CEGR 3122-Structural Analysis(3)*
CEGR 3141-Introduction to Environmental Engineering(3)*
CEGR 3143-Hydraulics and Hydrology(3)*
CEGR 3153-Transportation Laboratory(2)
CEGR 3155-Environmental Laboratory(2)
CEGR 3161-Transportation Engineering I(3)*
CEGR 3201-Systems and Design(3)
CEGR 3256-Structural Materials Laboratory(1)*
CEGR 3259-Geotechnical Laboratory(1)
CEGR 3278-Geotechnical Engineering(3)*
ENGR 3295-Multidisciplinary Professional Development(1)
MEGR 2141-Engineering Mechanics I(3)*
MEGR 2144-Introduction to Solid Mechanics(3)*
**A grade of C or above is required.*

Elective Courses (21 credit hours)

Civil Engineering Concentration Design Courses (6 credit hours)

CEGR 4147-Stormwater Management(3)*
CEGR 4185-Geometric Design of Highways(3)*
**A grade of C or above is required.*

Mechanical/Electrical Engineering Elective Course (3 credit hours)

Select one of the following:

ECGR 2161 - Basic Electrical Engineering I (3)
MEGR 3111 - Thermodynamics I (3)
MEGR 3121 - Dynamics Systems I (3)

Civil Engineering Restricted Elective Courses (3 credit hours)

Select one of the following:

CEGR 3221 - Structural Steel Design I (3)
CEGR 3225 - Reinforced Concrete Design I (3)

Civil Engineering Concentration Courses (6 credit hours)

CEGR 3231 - Land Development Engineering Fundamentals(3)*
CEGR 3235 - Land Development Engineering - Advanced Site Analysis(3)*
**A grade of C or above is required.*

Concentration Elective Courses (3 credit hours)

Select one course from the list below. Any course not appearing on this list requires written permission from the Undergraduate Director prior to registering for the course.

CEGR 3233-Land Development Engineering Studio(3)*

CEGR 4247-Sustainability(3)*

*A grade of C or above is required.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

First-Year Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year Courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Bachelor of Science

in Environmental Engineering (B.S.)

Coursework combines training in the core subject matter of Environmental Engineering with design experience that runs throughout the curriculum, students will have opportunities to assess, analyze, and solve real-world and locally relevant problems related to contamination of soils, water, and the atmosphere.

All program-level Admissions and Progression Requirements are in addition to the University of North Carolina at Charlotte Admission Requirements.

Admission Requirements

First-Year Students

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)
- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above
 - Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Currently Enrolled Students

Internal Change of Major

Internal change of majors within the College of Engineering must have a minimum GPA of 2.50 (2.80 for Mechanical Engineering). Students who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Change of Major Into a Program in the College of Engineering

First-time college students who seek eligibility for a change of major from a non-engineering major into an engineering program are required to:

- Complete the First-Year Curriculum.
- Have no more than two attempts per course, including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).

Students Seeking Eligibility for a Change of Major

- Should continue to be advised by their current advisor.
- Should focus on successfully completing courses that count towards the program of interest and not rely on grades in unrelated courses to elevate the GPA.
- Are not permitted to enroll in Sophomore engineering courses.
- May request authorization to enroll in ENGR 1300, ENGR 1301, ENGR 1302 or ENGR 1303 via a request to the College of Engineering Advising department at osds-advising@charlotte.edu.

Transfers Seeking Eligibility for a Change of Major

Students who transfer to Charlotte into a non-engineering major and have not met the Transfer Requirements for a given engineering program are not guaranteed to be considered for a change of major. Representatives of the program of interest make decisions on a student's eligibility to pursue a change of major based on a holistic review of a student's entire academic record, including grades earned at other institutions. A record of unsuccessful attempts in courses will weigh negatively on such decisions. If transfer students are allowed to pursue eligibility for a change of major to a given program, they will be required to:

- Complete the Common First-Year Curriculum.
- Have no more than two attempts per course including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).

- Complete at least 12 credits of courses at Charlotte, including at least four courses in math, science and/or engineering.

Common First-Year Curriculum (CFY)

The College of Engineering uses a Common First-Year Curriculum (CFY) for all Engineering students in order to:

- Provide a strong academic base of foundational knowledge and skills
- Facilitate changing majors within the first year
- Support students with lower math placement and increase access to all majors
- Allow students to explore different majors before committing
- Enhance learning with innovative pedagogies and activities

Common First-Year Courses

All new first year students are initially advised by a central office within the W.S. Lee College of Engineering. Students must complete the following classes that are common to all majors of the college (except Construction Management and Fire and Safety Engineering Technology) in order to progress and matriculate to their major department. *All First-Year Curriculum courses require a grade of C or better.*

ENGR 1300 Exploring Engineering & Technology with Success (2)
ENGR 1301 Foundations of Math and Science for Engineering (3)
ENGR 1302 Logic and Computational Problem Solving (3)
ENGR 1303 Engineering Visualization and Graphical

Communication (3)

PHYS 2101 (3)

PHYS 2101L (1)

Two MATH courses: MATH 1103* or MATH 1241* or MATH 1242* (3 each)

See Notes 1 and 2 below

* All students should consult their advisor to select the math courses that match their planned major.

Note 1

Progression into Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Mechanical Engineering, and Systems Engineering Major Courses after completing the Common First Year Curriculum requires that students also complete MATH 1241, MATH 1242, PHYS 2101, and PHYS 2101L.

Note 2

Progression into Civil Engineering Technology, Electromechanical Engineering Technology, and Mechanical Engineering Technology Major Courses after completing the Common First Year Curriculum requires that students complete MATH 1241, PHYS 2101, and PHYS 2101L with a C or better (except for Electromechanical Engineering Technology).

Note 3

Students must earn at least a 2.0 GPA in the first semester to continue into the second semester.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major

with departmental approval. Please see your advisor for information.

Elective courses should be chosen to satisfy University General Education requirements, meet the objectives of a broad education consistent with the educational goals of the profession, and complement the student's overall educational plan. To avoid taking "extra" elective courses, students must select their elective courses carefully after consulting with their faculty advisor.

First-Year Courses (21 credit hours)

See Common First-Year Curriculum (CFY) for details.

Additional Required Foundation Courses (19 credit hours)

BIOL 1110 - Principles of Biology I (3)
CHEM 1352 - General Chemistry for Engineers (4)
ESCI 2210 - Field Methods in the Earth and Environmental Sciences (3) *
MATH 2171 - Differential Equations (3) *
MATH 2241 - Calculus III (3) *
STAT 3128 - Probability and Statistics for Engineers (3)

Major Courses (46 credit hours)

CEGR 2101 - Civil Engineering Drawing (2) *
CEGR 2102 - Engineering Economic Analysis (3) *
CEGR 2154 - Design Project Lab (2) *
CEGR 3141 - Introduction to Environmental Engineering (3) *
CEGR 3143 - Hydraulics and Hydrology (3) *
CEGR 3155 - Environmental Laboratory (2)
CEGR 4142 - Water Treatment Engineering (3) *
CEGR 4144 - Engineering Hydrology (3) *
CEGR 4146 - Advanced Engineering Hydraulics (3) *
CEGR 4149 - Environmental Engineering Principles and Practices (3) *
CEGR 4153 - Fundamentals of Environmental Microbiology (3) *
CEGR 4242 - Wastewater Treatment Design (3) *
ENVE 3111 - Construction Engineering (2) *
ENVE 3145 - Hydraulics Engineering Lab (2)
ENVE 3202 - Environmental Systems and Design (2)
ENGR 3295 - Multidisciplinary Professional Development (1)
MEGR 2141 - Engineering Mechanics I (3) *
MEGR 3111 - Thermodynamics I (3) *

* A grade of C or above is required.

Earth Science Elective (4 credit hours)

Select one of the two Earth Science Electives:

ESCI 4233 - Geoenvironmental Site Characterization (4)

Subsurface Flow Elective (4 credit hours)

Select one of the courses shown below:

CEGR 4145 - Groundwater Resources Engineering (3)
CEGR 4264 - Landfill Design (3)

CEGR Elective (3 credit hours)

Select one course from any CEGR course from 3000 to 4999.

Technical Electives (6 credit hours)

Select two technical elective courses from the list below. Any course not appearing on this list requires written permission from the Undergraduate Director prior to registering for the course. Any non-listed courses must be at the 3000-level or above and must come from one of the departments listed below.

Accounting

ACCT 3330 - Managerial Cost Accounting (3)

Biology

BIOL 2259 - Fundamentals of Microbiology (3)
BIOL 4144 - Advanced Ecology (4)
BIOL 4250 - Microbiology (3)
BIOL 3000-4999

Business Administration

BLAW 3150 - Business Law I (3)
BLAW 3250 - Business Law II (3)
COMM 3160 - Business Communications (3)
FINN 3120 - Financial Management (3)
MKTG 3110 - Principles of Marketing (3)

Chemistry

CHEM 2000-4999
CHEM 3111 - Quantitative Analysis (4)

Computer Science

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours**Progression Requirements**

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors**Civil Engineering Technology**

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters

- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year Courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Early Entry: Master of Science in Civil Engineering

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements**Current UNC Charlotte Undergraduate Students**

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is required that 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.20 overall undergraduate GPA
- Minimum 3.20 GPA in the major
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents

- Recommendation by the Department of Civil and Environmental Engineering and approved by the Graduate School

Progression Requirements

- Upon admission, meeting with the graduate advisor is required every semester prior to registering for coursework each semester.
- Approved academic petitions every semester in order to register for double counted or graduate only coursework are required, confirming the approval of the Graduate Academic Advisor and Coordinator, Graduate Program Director, and Graduate School prior to registration each semester.
- Maintain a minimum 3.00 overall undergraduate GPA
- Students are expected to achieve a commendable or satisfactory grade (A or B) in all coursework attempted for graduate credit. Students who fail to maintain satisfactory progress toward their degree or who do not achieve commendable or satisfactory grades in all their graduate coursework are subject to suspension and/or termination from their program of study and/or the Graduate School.
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 9 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 9 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees). For details, see the "Double Counted Coursework" section of this program.

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Accelerated Master's Program (for High School Seniors and UNC Charlotte Undergraduate First-Year Students)

Academically talented high school Seniors and UNC Charlotte undergraduate First-Year students are encouraged to apply to an Accelerated Master's Program to begin work toward both undergraduate and graduate degrees in their first year.

Admission Requirements

- See University Admission Requirements
- Minimum high school GPA of 3.75 (on a 4.00 scale)
- Minimum score of 1220 on the new SAT
- Online application for graduate admission
- Enrollment will be based on program capacity, and certain programs may have more stringent admission policies.

Progression Requirements

Students must maintain a strong academic record at both the undergraduate and graduate levels with a cumulative undergraduate GPA of 3.20 or higher and a cumulative graduate GPA of 3.00 or higher. Students accepted into the Accelerated Master's program are subject to the same policies that pertain to other matriculated graduate students.

Special Policies or Requirements

Up to 9 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 9 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on the Accelerated Master's Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/accelerated-masters.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

- Minor in Computer Engineering
- Minor in Electrical Engineering
- Early Entry: M.S. in Computer Engineering
- Early Entry: M.S. or Ph.D. in Electrical Engineering

The Department of Electrical and Computer Engineering (ECE) provides instruction and research in a wide range of areas that involve electronic devices, electrical systems, computer technology, and signal processing.

ECE majors include a common set of foundational courses to build basic math, science and engineering skills. Students gain experience through hands-on laboratory and design courses culminating in a Senior project that combines both theory and design.

Outstanding undergraduate students can also pursue graduate course credit through the Early-Entry graduate programs. The ECE M.S. and Ph.D. graduate programs are designed for graduates and professionals who wish to enhance their knowledge of a specialized body of theoretical and applied topics in ECE. These programs provide advanced knowledge and research experience in a chosen area of electrical and computer engineering.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Degree Programs

Electrical and Computer Engineering students can pursue the following degrees:

- Bachelor of Science in Electrical Engineering (B.S.E.E.)
- Bachelor of Science in Computer Engineering (B.S.CP.E.)
- Master of Science in Electrical Engineering (M.S.E.E.)
- Master of Science in Computer Engineering (M.S.CP.E.)
- Doctor of Philosophy in Electrical Engineering (Ph.D.)

Undergraduate students can focus on specific elective coursework to gain concentrations in Machine Learning (B.S.E.E. and B.S.CP.E.) and Power and Energy Systems (B.S.E.E. only). Undergraduates interested in post-graduate studies can qualify for the accelerated early-entry M.S. degree program. Early-entry students gain access to graduate courses during their undergraduate education whose credits double-count towards both B.S. and M.S. degrees.

Special curricula are provided for three multi-disciplinary double-major and dual-degree programs:

- Double-Major: Electrical Engineering and Computer Engineering
- Dual Degree: Electrical Engineering and Physics
- Dual Degree: Computer Engineering and Physics

Students following the curricula for these programs can graduate in only one additional semester of coursework.

Accreditation

The programs in Electrical and Computer Engineering are accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

B.S.CP.E./B.S.E.E. Program Educational Objectives

Our graduates are expected to achieve:

- 1) Successful careers in industry and/or success in post-baccalaureate studies as evidenced by:
 - Being valuable contributors to their employers
 - Career satisfaction
 - Professional visibility through publications, presentations, recognitions, and awards
 - Promotions in their chosen professions
 - Advanced degrees earned
- 2) Abilities that contribute to the betterment of society and the world as evidenced by:
 - Good citizenship by engaging in engineering practice that values integrity and ethical conduct
 - Useful inventions
 - Entrepreneurial activities
 - Active involvement in the education of others, locally or globally

B.S.CP.E./B.S.E.E. Student Outcomes

The B.S. in Computer Engineering and B.S. in Electrical Engineering programs have documented student outcomes that support the program educational objectives. Attainment of these outcomes prepares graduates to enter the professional practice of engineering. These student outcomes are evidenced by the ability to:

1. Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as

- well as global, cultural, social, environmental, and economic factors.
- 3. Communicate effectively with a range of audiences.
- 4. Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- 5. Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- 6. Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- 7. Acquire and apply new knowledge as needed, using appropriate learning strategies.

Computer Engineering

Bachelor of Science in Computer Engineering (B.S.CP.E.)

A Major in Computer Engineering leading to the B.S.CP.E. degree consists of 120 credit hours.

The Bachelor of Science in Computer Engineering (B.S.CP.E.) degree covers fundamental concepts that are essential for the understanding of computer systems and its applications.

Emphasis is placed on the utilization of computers throughout the curriculum. Graduates have a wide range of job opportunities as communication engineers, digital design engineers, test engineers, embedded system developers, network engineers, project engineers, robotic system engineers, application engineers, medical product engineers, and process engineers

Admission Requirements

First-Year Students

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)

- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above
 - Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Currently Enrolled Students

Internal Change of Major

Internal change of majors within the College of Engineering must have a minimum GPA of 2.50 (2.80 for Mechanical Engineering). Students who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Change of Major Into a Program in the College of Engineering

First-time college students who seek eligibility for a change of major from a non-engineering major into an engineering program are required to:

- Complete the First-Year Curriculum.
- Have no more than two attempts per course, including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).

Students Seeking Eligibility for a Change of Major

- Should continue to be advised by their current advisor.
- Should focus on successfully completing courses that count towards the program of interest and not rely on grades in unrelated courses to elevate the GPA.
- Are not permitted to enroll in Sophomore engineering courses. May request authorization to enroll in ENGR 1300, ENGR 1301, ENGR 1302 or ENGR 1303 via a request to the College of Engineering Advising department at osds-advising@charlotte.edu.

Transfers Seeking Eligibility for a Change of Major

Students who transfer to Charlotte into a non-engineering major and have not met the Transfer Requirements for a given engineering program are not guaranteed to be considered for a change of major. Representatives of the program of interest make decisions on a student's eligibility to pursue a change of major based on a holistic review of a student's entire academic record, including grades earned at other institutions. A record of unsuccessful attempts in courses will weigh negatively on such decisions. If transfer students are allowed to pursue eligibility for a change of major to a given program, they will be required to:

- Complete the Common First-Year Curriculum.
- Have no more than two attempts per course including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).
- Complete at least 12 credits of courses at Charlotte, including at least four courses in math, science and/or engineering.

Common First-Year Curriculum (CFY)

The College of Engineering uses a Common First-Year Curriculum (CFY) for all Engineering students in order to:

- Provide a strong academic base of foundational knowledge and skills
- Facilitate changing majors within the first year
- Support students with lower math placement and increase access to all majors
- Allow students to explore different majors before committing
- Enhance learning with innovative pedagogies and activities

Common First-Year Courses

All new first year students are initially advised by a central office within the W.S. Lee College of Engineering. Students must complete the following classes that are common to all majors of the college (except Construction Management and Fire and Safety Engineering Technology) in order to progress and matriculate to their major department. *All First-Year Curriculum courses require a grade of C or better.*

ENGR 1300 Exploring Engineering & Technology with Success(2)

ENGR 1301 Foundations of Math and Science for Engineering(3)

ENGR 1302 Logic and Computational Problem Solving(3)

ENGR 1303 Engineering Visualization and Graphical Communication(3)

PHYS 2101(3)

PHYS 2101L(1)

Two MATH courses: MATH 1103* or MATH 1241* or MATH 1242* (3 each)

See Notes 1 and 2 below

* All students should consult their advisor to select the math courses that match their planned major.

Note 1

Progression into Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Mechanical Engineering, and Systems Engineering Major Courses after completing the Common First Year Curriculum requires that students also complete MATH 1241, MATH 1242, PHYS 2101, and PHYS 2101L.

Note 2

Progression into Civil Engineering Technology, Electromechanical Engineering Technology, and Mechanical Engineering Technology Major Courses after completing the Common First Year Curriculum requires that students complete MATH 1241, PHYS 2101, and PHYS 2101L with a C or better (except for Electromechanical Engineering Technology).

Note 3

Students must earn at least a 2.0 GPA in the first semester to continue into the second semester.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

First-Year Courses (21 credit hours)

See Common First-Year Curriculum (CFY) for details.

Major Courses (44 credit hours)

ECGR 2105 - Computer Programming(3)

ECGR 2111 - Network Theory I(3)

ECGR 2112 - Network Theory II(3)
 ECGR 2112L - Networks Laboratory(1)
 ECGR 2181 - Logic Systems Design(3)
 ECGR 2181L - Logic System Design Laboratory(1)
 ECGR 2254 - Analytical Foundations of Electrical and Computer Engineering(3)
 ECGR 3101 - Embedded Systems(3)
 ECGR 3101L - Embedded Systems Laboratory(1)
 ECGR 3111 - Signals and Systems(3)
 ECGR 3123 - Data Communications and Networking(3)
 ECGR 3130 - Fundamentals of Electronics and Semiconductors(3)
 ECGR 3130L - Electronics Laboratory(1)
 ECGR 3157 - ECE Junior Design(3)
 ECGR 3180 - Data Structures and Algorithms in C++(3)
 ECGR 3183 - Computer Organization(3)
 ECGR 4251 - Computer Engineering Senior Design I(2)
 ECGR 4252 - Computer Engineering Senior Design II(2)

Related Courses (16 credit hours)

ENGR 3295 - Multidisciplinary Professional Development(1)

MATH 2165 - Introduction to Discrete Structures(3)

MATH 2164 - Matrices and Linear Algebra(3)

MATH 2171 - Differential Equations(3)

PHYS 2102 - Physics for Science and Engineering II(3)

Either:

STAT 2122 - Introduction to Probability and Statistics(3)

or STAT 3128 - Probability and Statistics for Engineers(3)

Technical Elective Courses (21 credit hours)

1) Select **five** ECGR 4000-level courses that are not required as part of the curriculum.

2) The remaining two technical elective courses may be chosen from any of the following that are not part of the degree requirements:

CEGR 3000-level courses

CEGR 4000-level courses

ECGR 3000-level courses

ECGR 4000-level courses

ITCS 3000-level courses

ITCS 4000-level courses

MATH 3000-level courses

MATH 4000-level courses

MEGR 3000-level courses

MEGR 4000-level courses

PHYS 3000-level courses

PHYS 4000-level courses

SEGR 3000-level courses

SEGR 4000-level courses

Or any of these specific courses can be used for the two technical elective courses:

ITSC 3146 Introduction to Operating Systems and Networking

ITSC 3155 Software Engineering

MATH 2241 Calculus III

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year Courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Bachelor of Science in Computer Engineering (B.S.CP.E.) with Concentration in Machine Learning

The Bachelor of Science in Computer Engineering (B.S.CP.E.) with Concentration in Machine Learning is intended for students interested in extra training in topics related to the theory, design, and synthesis of intelligent machines with an emphasis on design of machines capable of autonomously learning rules that enable these machines to adapt their behavior from observed measurements. The plan of study for the B.S.CP.E. with Concentration in Machine Learning is similar to the B.S.CP.E. plan of study with the following primary exception:

Students pursuing the B.S.CP.E. with Concentration in Machine Learning are required to enroll in approved Machine Learning Technical Electives, usually during the Junior and Senior year, to complete their degree requirements.

Through careful course selection and scheduling, students can obtain the Concentration in Machine Learning within the required 120 credit hour B.S.CP.E. curriculum. Students completing the requirements described in this program receive a special designation on their transcripts showing they have completed the Concentration in Machine Learning.

Admission Requirements

First-Year Students

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)
- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above
 - Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Currently Enrolled Students

In order to remain in the concentration, students must maintain a minimum (overall and program) GPA of 2.50. A GPA in the major and overall GPA of 2.50 or above is also required to graduate.

Internal Change of Major

Internal change of majors within the College of Engineering must have a minimum GPA of 2.50 (2.80 for Mechanical Engineering). Students who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Change of Major Into a Program in the College of Engineering

First-time college students who seek eligibility for a change of major from a non-engineering major into an engineering program are required to:

- Complete the First-Year Curriculum.
- Have no more than two attempts per course, including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).

Students Seeking Eligibility for a Change of Major

- Should continue to be advised by their current advisor.
- Should focus on successfully completing courses that count towards the program of interest and not rely on grades in unrelated courses to elevate the GPA.
- Are not permitted to enroll in Sophomore engineering courses. May request authorization to enroll in ENGR 1300, ENGR 1301, ENGR 1302 or ENGR 1303 via a request to the College of Engineering Advising department at osds-advising@charlotte.edu.

Transfers Seeking Eligibility for a Change of Major

Students who transfer to Charlotte into a non-engineering major and have not met the Transfer Requirements for a given engineering program are not guaranteed to be considered for a change of major. Representatives of the program of interest make decisions on a student's eligibility to pursue a change of major based on a holistic review of a student's entire academic record, including grades earned at other institutions. A record of unsuccessful attempts in courses will weigh negatively on such decisions. If transfer students are allowed to pursue

eligibility for a change of major to a given program, they will be required to:

- Complete the Common First-Year Curriculum.
- Have no more than two attempts per course including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).
- Complete at least 12 credits of courses at Charlotte, including at least four courses in math, science and/or engineering.

Common First-Year Curriculum (CFY)

The College of Engineering uses a Common First-Year Curriculum (CFY) for all Engineering students in order to:

- Provide a strong academic base of foundational knowledge and skills
- Facilitate changing majors within the first year
- Support students with lower math placement and increase access to all majors
- Allow students to explore different majors before committing
- Enhance learning with innovative pedagogies and activities

Common First-Year Courses

All new first year students are initially advised by a central office within the W.S. Lee College of Engineering. Students must complete the following classes that are common to all majors of the college (except Construction Management and Fire and Safety Engineering Technology) in order to progress and matriculate to their major department. *All First-Year Curriculum courses require a grade of C or better.*

ENGR 1300 Exploring Engineering & Technology with Success(2)

ENGR 1301 Foundations of Math and Science for Engineering(3)

ENGR 1302 Logic and Computational Problem Solving(3)

ENGR 1303 Engineering Visualization and Graphical Communication(3)

PHYS 2101(3)

PHYS 2101L(1)

Two MATH courses: MATH 1103* or MATH 1241* or MATH 1242* (3 each)

See Notes 1 and 2 below

* All students should consult their advisor to select the math courses that match their planned major.

Note 1

Progression into Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Mechanical Engineering, and Systems Engineering Major Courses after completing the Common First Year Curriculum requires that students also complete MATH 1241, MATH 1242, PHYS 2101, and PHYS 2101L.

Note 2

Progression into Civil Engineering Technology, Electromechanical Engineering Technology, and Mechanical Engineering Technology Major Courses after completing the Common First Year Curriculum requires that students complete MATH 1241, PHYS 2101, and PHYS 2101L with a C or better (except for Electromechanical Engineering Technology).

Note 3

Students must earn at least a 2.0 GPA in the first semester to continue into the second semester.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

First-Year Courses (21 credit hours)

See Common First-Year Curriculum (CFY) for details.

Major Courses (44 credit hours)

- ECGR 2105 - Computer Programming (3)
- ECGR 2111 - Network Theory I (3)
- ECGR 2112 - Network Theory II (3)
- ECGR 2112L - Networks Laboratory (1)
- ECGR 2181 - Logic Systems Design (3)
- ECGR 2181L - Logic System Design Laboratory (1)
- ECGR 2254 - Analytical Foundations of Electrical and Computer Engineering (3)
- ECGR 3101 - Embedded Systems (3)
- ECGR 3101L - Embedded Systems Laboratory (1)
- ECGR 3111 - Signals and Systems (3)
- ECGR 3123 - Data Communications and Networking (3)
- ECGR 3130 - Fundamentals of Electronics and Semiconductors (3)
- ECGR 3130L - Electronics Laboratory (1)
- ECGR 3157 - ECE Junior Design (3)
- ECGR 3180 - Data Structures and Algorithms in C++ (3)
- ECGR 3183 - Computer Organization (3)
- ECGR 4251 - Computer Engineering Senior Design I (2)
- ECGR 4252 - Computer Engineering Senior Design II (2)

Concentration Courses (9 credit hours)

Concentration Required Course (3 credit hours)

ECGR 4105 - Introduction to Machine Learning (3)

Concentration Elective Courses (6 credit hours)

Select two of the following:

- ECGR 4106 - Real-Time Machine Learning (3)
- ECGR 4115 - Convex Optimization and AI Applications (3)
- ECGR 4116 - Artificial Intelligence for Biomedical Applications (3)
- ECGR 4117 - AI for Robotics and Automation (3)
- ECGR 4127 - Machine Learning for the Internet of Things (3)
- ECGR 4090 - Special Topics in Electrical Engineering (1 to 4) (*requires department approval*)

Related Courses (16 credit hours)

- ENGR 3295 - Multidisciplinary Professional Development (1)
- MATH 2165 - Introduction to Discrete Structures (3)
- MATH 2164 - Matrices and Linear Algebra (3)
- MATH 2171 - Differential Equations (3)
- PHYS 2102 - Physics for Science and Engineering II (3)

Either:

- STAT 2122 - Introduction to Probability and Statistics (3)
- or STAT 3128 - Probability and Statistics for Engineers (3)

Technical Elective Courses (6 credit hours)

- 1) Select two additional ECGR 4000-level courses that are not required as a part of the curriculum and have not been used as the

Concentration Required Course or as a Concentration Elective Course.

- 2) Select two technical elective courses from any of the following that are not part of the degree or concentration requirements:

- CEGR 3000-level courses
- CEGR 4000-level courses
- ECGR 3000-level courses
- ECGR 4000-level courses
- ITCS 3000-level courses
- ITCS 4000-level courses
- MATH 3000-level courses
- MATH 4000-level courses
- MEGR 3000-level courses
- MEGR 4000-level courses
- PHYS 3000-level courses
- PHYS 4000-level courses
- SEGR 3000-level courses
- SEGR 4000-level courses

Or any of these specific courses can be used for the two technical elective courses:

- ITSC 3146 Introduction to Operating Systems and Networking
- ITSC 3155 Software Engineering
- MATH 2241 Calculus III

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above

- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year Courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Bachelor of Science in Physics and Bachelor of Science in Computer Engineering Dual Degree

*****Applications are no longer being accepted for this program.*****

The Department of Physics and Optical Science offers two dual degree

opportunities with the Department of Electrical and Computer Engineering. These dual degrees are designed to broaden and enhance the education of students in engineering degree programs. Students can obtain a B.S. Physics and B.S. Electrical Engineering dual degree or a B.S. Physics and B.S. Computer Engineering dual degree.

Admission Requirements

First-Year Students and Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.00 (cumulative and Physics)
- *Pre-Major/Prerequisite Courses:* Complete the following with grades of C or above and no more than 2 attempts per course:
 - PHYS 2101
 - PHYS 2102
 - MATH 2241

Currently Enrolled Students

- *Declaration of Major:* Engineering majors wishing to declare the B.S. in Physics degree are eligible to do so after meeting the above requirements.

Internal Change of Major

Internal change of majors within the College of Engineering must have a minimum GPA of 2.50 (2.80 for Mechanical Engineering). Students who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Degree Requirements

To obtain a dual B.S. degree in Computer Engineering and Physics, undergraduate students must complete all requirements for the B.S.Cp.E. degree as established by the Department of Electrical and Computer Engineering. In addition, students must complete 12 credit hours of upper-division PHYS courses specified by the Department of Physics and Optical Science with an average grade of C or above. A B.S. in Physics under this program is awarded at the same time as or after the B.S.Cp.E.; the B.S. in Physics degree will not be awarded in advance of the engineering degree.

Students in this dual degree program are not required to fulfill the College of Science Foreign Language Requirement.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Pre-Major Courses (14 credit hours)

- ENGR 1201 - Introduction to Engineering Practices and Principles I (2)
- ENGR 1202 - Introduction to Engineering Practices and Principles II (2)
- MATH 1241 - Calculus I (3)
- MATH 1242 - Calculus II (3)
- PHYS 2101 - Physics for Science and Engineering I (3)
- PHYS 2101L - Physics for Science and Engineering I Lab (1)

Major Courses (53 credit hours)

- ECGR 2103 - Computer Utilization in C++ (3)
- ECGR 2104 - Computer Engineering Programming II (3)
- ECGR 2111 - Network Theory I (3)

ECGR 2112 - Network Theory II (3)
ECGR 2155 - Instrumentation and Networks Laboratory (1)
ECGR 2156 - Logic and Networks Laboratory (1)
ECGR 2181 - Logic Systems Design (3)
ECGR 2254 - Analytical Foundations of Electrical and Computer Engineering (3)
ECGR 3101 - Embedded Systems (3)
ECGR 3111 - Signals and Systems (3)
ECGR 3123 - Data Communications and Networking (3)
ECGR 3131 - Fundamentals of Electronics and Semiconductors (3)
ECGR 3155 - Systems and Electronics Laboratory (1)
ECGR 3157 - ECE Junior Design (3)
ECGR 3159 - Professional Practice (1)
ECGR 3180 - Data Structures and Algorithms in C++ (3)
ECGR 3183 - Computer Organization (3)
ECGR 4124 - Digital Signal Processing (3)
ECGR 4251 - Computer Engineering Senior Design I (2)
ECGR 4252 - Computer Engineering Senior Design II (2)
ECGR 4333 - VLSI Systems Design (3)

Related Courses (20 credit hours)

ENGR 3295 - Multidisciplinary Professional Development (1)
MATH 1165 - Introduction to Discrete Structures (3)
MATH 2164 - Matrices and Linear Algebra (3)
MATH 2171 - Differential Equations (3)
MATH 2241 - Calculus III (3)
PHYS 2102 - Physics for Science and Engineering II (3)
PHYS 2102L - Physics for Science and Engineering I Lab (1)
STAT 3128 - Probability and Statistics for Engineers (3)

Technical Elective Courses (15 credit hours)

- 1) Select three ECGR 4000-level courses that are not required as part of the B.S.Cp.E. curriculum.
- 2) The remaining two technical elective courses may be chosen from any of the following that are not part of the B.S.Cp.E. degree requirements. A maximum of one PHYS 3000/4000 level course may be used to satisfy this elective requirement.

CEGR 3000-level courses
CEGR 4000-level courses
ECGR 3000-level courses
ECGR 4000-level courses
ITCS 3000-level courses
ITCS 4000-level courses
MATH 3000-level courses
MATH 4000-level courses
MEGR 3000-level courses
MEGR 4000-level courses
PHYS 3000-level courses
PHYS 4000-level courses
SEGR 3000-level courses
SEGR 4000-level courses

Physics Courses (12 credit hours)

PHYS 3121 - Classical Mechanics I (3)
PHYS 3141 - Introduction to Modern Physics (3)
PHYS 4231 - Electromagnetic Theory I (3)
PHYS 4241 - Quantum Mechanics I (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 129-132 credit hours

Progression Requirements

A GPA of 2.00 or above in PHYS and engineering courses and an overall GPA of 2.00 or above is required. A grade of C or above is required in most PHYS courses before students can progress to the next PHYS course.

Minor in Computer Engineering

The Department of Electrical and Computer Engineering offers a Minor in Computer Engineering for non-majors.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Prerequisite Courses

The minor assumes that students have a background in mathematics that is covered in the first year of the ECGR curriculum. In mathematics, this would cover Calculus (MATH 1120, MATH 1121, or MATH 1241). The totality of such courses is 3 or more credit hours.

Minor Requirements

The Minor in Computer Engineering consists of 17 additional credit hours and requires the following:

Required Courses (14 credit hours)

ECGR 2105 - Computer Programming (3)
ECGR 2181 - Logic Systems Design (3)
ECGR 2181L - Logic System Design Laboratory (1)
ECGR 3101 - Embedded Systems (3)
ECGR 3101L - Embedded Systems Laboratory (1)
ECGR 3183 - Computer Organization (3)

Elective Course (3 credit hours)

Select at least one of the following

ECGR 4100 - Research Tools and Techniques in Computer Engineering (3)
ECGR 4101 - Advanced Embedded Systems (3)
ECGR 4105 - Introduction to Machine Learning (3)
ECGR 4106 - Real-Time Machine Learning (3)
ECGR 4146 - Introduction to VHDL (3)
ECGR 4161 - Introduction to Robotics (3)
ECGR 4181 - Computer Architecture (3)

Minor Total = 17 Credit Hours

Progression Requirements

Students must achieve a minimum GPA of 2.00 in all courses.

Special Policies or Requirements

This minor is not available for a student who has a major in either Electrical Engineering or Computer Engineering.

Early Entry: M.S. in Computer Engineering

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.20 overall undergraduate GPA
- Minimum 3.20 GPA in the major
- Acceptable scores on the appropriate graduate standardized test (e.g., GRE) (*Students with a 3.25 GPA are eligible to waive the GRE requirement.*)
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.00 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 9 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 9 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions-info/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Electrical Engineering

Bachelor of Science in Electrical Engineering (B.S.E.E.)

A Major in Electrical Engineering leading to the B.S.E.E. degree consists of a total of 120 credit hours.

The Bachelor of Science in Electrical Engineering (B.S.E.E.) degree covers fundamental concepts that lead to an understanding of electrical and electronic systems and their applications.

Emphasis is placed on the utilization of computers throughout the curriculum. Graduates have a wide range of job opportunities as power engineers, communication engineers, test engineers, network engineers, control engineers, project engineers, robotic system engineers, optoelectronic engineers, application engineers, analog engineers, medical product engineers, and process engineers

Admission Requirements

First-Year Students

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)
- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above
 - Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Currently Enrolled Students

Internal Change of Major

Internal change of majors within the College of Engineering must have a minimum GPA of 2.50 (2.80 for Mechanical Engineering). Students who

do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Change of Major Into a Program in the College of Engineering

First-time college students who seek eligibility for a change of major from a non-engineering major into an engineering program are required to:

- Complete the First-Year Curriculum.
- Have no more than two attempts per course, including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).

Students Seeking Eligibility for a Change of Major

- Should continue to be advised by their current advisor.
- Should focus on successfully completing courses that count towards the program of interest and not rely on grades in unrelated courses to elevate the GPA.
- Are not permitted to enroll in Sophomore engineering courses. May request authorization to enroll in ENGR 1300, ENGR 1301, ENGR 1302 or ENGR 1303 via a request to the College of Engineering Advising department at osds-advising@charlotte.edu.

Transfers Seeking Eligibility for a Change of Major

Students who transfer to Charlotte into a non-engineering major and have not met the Transfer Requirements for a given engineering program are not guaranteed to be considered for a change of major. Representatives of the program of interest make decisions on a student's eligibility to pursue a change of major based on a holistic review of a student's entire academic record, including grades earned at other institutions. A record of unsuccessful attempts in courses will weigh negatively on such decisions. If transfer students are allowed to pursue eligibility for a change of major to a given program, they will be required to:

- Complete the Common First-Year Curriculum.
- Have no more than two attempts per course including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).
- Complete at least 12 credits of courses at Charlotte, including at least four courses in math, science and/or engineering.

Common First-Year Curriculum (CFY)

The College of Engineering uses a Common First-Year Curriculum (CFY) for all Engineering students in order to:

- Provide a strong academic base of foundational knowledge and skills
- Facilitate changing majors within the first year
- Support students with lower math placement and increase access to all majors
- Allow students to explore different majors before committing
- Enhance learning with innovative pedagogies and activities

Common First-Year Courses

All new first year students are initially advised by a central office within the W.S. Lee College of Engineering. Students must complete the following classes that are common to all majors of the college (except Construction Management and Fire and Safety Engineering Technology) in order to progress and matriculate to their major department. *All First-Year Curriculum courses require a grade of C or better.*

ENGR 1300 Exploring Engineering & Technology with Success(2)
ENGR 1301 Foundations of Math and Science for Engineering(3)
ENGR 1302 Logic and Computational Problem Solving(3)
ENGR 1303 Engineering Visualization and Graphical Communication(3)

PHYS 2101(3)

PHYS 2101L(1)

Two MATH courses: MATH 1103* or MATH 1241* or MATH 1242*(3 each)

See Notes 1 and 2 below

* All students should consult their advisor to select the math courses that match their planned major.

Note 1

Progression into Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Mechanical Engineering, and Systems Engineering Major Courses after completing the Common First Year Curriculum requires that students also complete MATH 1241, MATH 1242, PHYS 2101, and PHYS 2101L.

Note 2

Progression into Civil Engineering Technology, Electromechanical Engineering Technology, and Mechanical Engineering Technology Major Courses after completing the Common First Year Curriculum requires that students complete MATH 1241, PHYS 2101, and PHYS 2101L with a C or better (except for Electromechanical Engineering Technology).

Note 3

Students must earn at least a 2.0 GPA in the first semester to continue into the second semester.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

First-Year Courses (21 credit hours)

See Common First-Year Curriculum (CFY) for details.

Major Courses (41 credit hours)

ECGR 2105-Computer Programming(3)

ECGR 2111-Network Theory I(3)

ECGR 2112-Network Theory II(3)

ECGR 2112L-Networks Laboratory(1)

ECGR 2181-Logic Systems Design(3)

ECGR 2181L-Logic System Design Laboratory(1)

ECGR 2254-Analytical Foundations of Electrical and Computer Engineering(3)

ECGR 3111-Signals and Systems(3)

ECGR 3112-System Analysis II(3)

ECGR 3120-Electromagnetic Fields and Waves(3)

ECGR 3130-Fundamentals of Electronics and Semiconductors(3)

ECGR 3130L-Electronics Laboratory(1)

ECGR 3142-Electrical Energy Conversion(3)

ECGR 3142L-Electrical Energy Conversion Laboratory(1)

ECGR 3157-ECE Junior Design(3)

ECGR 4241-Electrical Engineering Senior Design I(2)

ECGR 4242-Electrical Engineering Senior Design II(2)

Related Courses (19 credit hours)

- ENGR 3295 - Multidisciplinary Professional Development (1)
- MATH 2164 - Matrices and Linear Algebra (3)
- MATH 2171 - Differential Equations (3)
- MATH 2241 - Calculus III (3)
- PHYS 2102 - Physics for Science and Engineering II (3)
- PHYS 3141 - Introduction to Modern Physics (3)
- STAT 3128 - Probability and Statistics for Engineers (3)

Technical Elective Courses (21 credit hours)

- 1) Select **five** ECGR 4000-level courses that are not required as part of the curriculum.
- 2) Select **two** courses from the following that are not already part of the curriculum:

CEGR 3000-level courses
CEGR 4000-level courses
ECGR 3000-level courses
ECGR 4000-level courses
ITCS 3000-level courses
ITCS 4000-level courses
MATH 3000-level courses
MATH 4000-level courses
MEGR 3000-level courses
MEGR 4000-level courses
PHYS 3000-level courses
PHYS 4000-level courses
SEGR 3000-level courses
SEGR 4000-level courses

Or any of these specific courses can be used for the two technical elective courses:

- ITSC 3146 Introduction to Operating Systems and Networking
- ITSC 3155 Software Engineering

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters

- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year Courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Bachelor of Science in Electrical Engineering (B.S.E.E.) with Concentration in Machine Learning

The Bachelor of Science in Electrical Engineering (B.S.E.E.) with Concentration in Machine Learning is intended for students interested in extra training in topics related to the theory, design and synthesis of intelligent machines with an emphasis on design of machines capable of autonomously learning rules that enable these machines to adapt their behavior from observed measurements. The plan of study for the B.S.E.E. with Concentration in Machine Learning is similar to the BSEE plan of study with the following primary exception:

Students pursuing the B.S.E.E. with Concentration in Machine Learning are required to enroll in approved Machine Learning Technical Electives, usually during the Junior and Senior year, to complete their degree requirements.

Through careful course selection and scheduling, students can obtain the Concentration in Machine Learning within the required 120 credit hour B.S.E.E. curriculum. Students completing the requirements described in this program receive a special designation on their transcripts showing they have completed the Concentration in Machine Learning.

Admission Requirements

First-Year Students

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)
- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above
 - Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Currently Enrolled Students

In order to remain in the concentration, students must maintain a minimum (overall and program) GPA of 2.50. A GPA in the major and overall GPA of 2.50 or above is also required to graduate.

Internal Change of Major

Internal change of majors within the College of Engineering must have a minimum GPA of 2.50 (2.80 for Mechanical Engineering). Students who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Change of Major Into a Program in the College of Engineering

First-time college students who seek eligibility for a change of major from a non-engineering major into an engineering program are required to:

- Complete the First-Year Curriculum.
- Have no more than two attempts per course, including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).

Students Seeking Eligibility for a Change of Major

- Should continue to be advised by their current advisor.
- Should focus on successfully completing courses that count towards the program of interest and not rely on grades in unrelated courses to elevate the GPA.
- Are not permitted to enroll in Sophomore engineering courses. May request authorization to enroll in ENGR 1300, ENGR 1301, ENGR 1302 or ENGR 1303 via a request to the College of Engineering Advising department at osds-advising@charlotte.edu.

Transfers Seeking Eligibility for a Change of Major

Students who transfer to Charlotte into a non-engineering major and have not met the Transfer Requirements for a given engineering program are not guaranteed to be considered for a change of major. Representatives of the program of interest make decisions on a student's eligibility to pursue a change of major based on a holistic review of a student's entire academic record, including grades earned at other institutions. A record of unsuccessful attempts in courses will weigh negatively on such decisions. If transfer students are allowed to pursue eligibility for a change of major to a given program, they will be required to:

- Complete the Common First-Year Curriculum.
- Have no more than two attempts per course including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).
- Complete at least 12 credits of courses at Charlotte, including at least four courses in math, science and/or engineering.

Common First-Year Curriculum (CFY)

The College of Engineering uses a Common First-Year Curriculum (CFY) for all Engineering students in order to:

- Provide a strong academic base of foundational knowledge and skills
- Facilitate changing majors within the first year

- Support students with lower math placement and increase access to all majors
- Allow students to explore different majors before committing
- Enhance learning with innovative pedagogies and activities

Common First-Year Courses

All new first year students are initially advised by a central office within the W.S. Lee College of Engineering. Students must complete the following classes that are common to all majors of the college (except Construction Management and Fire and Safety Engineering Technology) in order to progress and matriculate to their major department. *All First-Year Curriculum courses require a grade of C or better.*

ENGR 1300 Exploring Engineering & Technology with Success (2)
 ENGR 1301 Foundations of Math and Science for Engineering (3)
 ENGR 1302 Logic and Computational Problem Solving (3)
 ENGR 1303 Engineering Visualization and Graphical Communication (3)
 PHYS 2101 (3)
 PHYS 2101L (1)
 Two MATH courses: MATH 1103* or MATH 1241* or MATH 1242* (3 each)
See Notes 1 and 2 below

* All students should consult their advisor to select the math courses that match their planned major.

Note 1

Progression into Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Mechanical Engineering, and Systems Engineering Major Courses after completing the Common First Year Curriculum requires that students also complete MATH 1241, MATH 1242, PHYS 2101, and PHYS 2101L.

Note 2

Progression into Civil Engineering Technology, Electromechanical Engineering Technology, and Mechanical Engineering Technology Major Courses after completing the Common First Year Curriculum requires that students complete MATH 1241, PHYS 2101, and PHYS 2101L with a C or better (except for Electromechanical Engineering Technology).

Note 3

Students must earn at least a 2.0 GPA in the first semester to continue into the second semester.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

First-Year Courses (21 credit hours)

See Common First-Year Curriculum (CFY) for details.

Major Courses (41 credit hours)

ECGR 2105 - Computer Programming (3)
 ECGR 2111 - Network Theory I (3)
 ECGR 2112 - Network Theory II (3)
 ECGR 2112L - Networks Laboratory (1)

ECGR 2181 - Logic Systems Design (3)
 ECGR 2181L - Logic System Design Laboratory (1)
 ECGR 2254 - Analytical Foundations of Electrical and Computer Engineering (3)
 ECGR 3111 - Signals and Systems (3)
 ECGR 3112 - System Analysis II (3)
 ECGR 3120 - Electromagnetic Fields and Waves (3)
 ECGR 3130 - Fundamentals of Electronics and Semiconductors (3)
 ECGR 3130L - Electronics Laboratory (1)
 ECGR 3142 - Electrical Energy Conversion (3)
 ECGR 3142L - Electrical Energy Conversion Laboratory (1)
 ECGR 3157 - ECE Junior Design (3)
 ECGR 4241 - Electrical Engineering Senior Design I (2)
 ECGR 4242 - Electrical Engineering Senior Design II (2)

Concentration Courses (9 credit hours)

Concentration Required Course (3 credit hours)

ECGR 4105 - Introduction to Machine Learning (3)

Concentration Elective Courses (6 credit hours)

Select two of the following:

ECGR 4106 - Real-Time Machine Learning (3)
 ECGR 4115 - Convex Optimization and AI Applications (3)
 ECGR 4116 - Artificial Intelligence for Biomedical Applications (3)
 ECGR 4117 - AI for Robotics and Automation (3)
 ECGR 4127 - Machine Learning for the Internet of Things (3)
 ECGR 4090 - Special Topics in Electrical Engineering (1 to 4) (*requires department approval*)

Related Courses (19 credit hours)

ENGR 3295 - Multidisciplinary Professional Development (1)
 MATH 2164 - Matrices and Linear Algebra (3)
 MATH 2171 - Differential Equations (3)
 MATH 2241 - Calculus III (3)
 PHYS 2102 - Physics for Science and Engineering II (3)
 PHYS 3141 - Introduction to Modern Physics (3)
 STAT 3128 - Probability and Statistics for Engineers (3)

Technical Elective Courses (12 credit hours)

1. Select **two** additional ECGR 4000-level courses that are not required as part of the curriculum and have not been used as the Concentration Required Course or as a Concentration Elective Course.
2. Select **two** technical elective courses from any of the following that are not part of the degree or concentration requirements:

CEGR 3000-level courses
 CEGR 4000-level courses
 ECGR 3000-level courses
 ECGR 4000-level courses
 ITCS 3000-level courses
 ITCS 4000-level courses
 MATH 3000-level courses
 MATH 3000-level courses
 MEGR 3000-level courses
 MEGR 4000-level courses
 PHYS 3000-level courses
 PHYS 4000-level courses
 SEGR 3000-level courses

SEGR 4000-level courses

Or any of these specific courses can be used for the two technical elective courses:

ITSC 3146 Introduction to Operating Systems and Networking
ITSC 3155 Software Engineering

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters

- Earn a 2.2 cumulative GPA upon completion of the Common First Year Courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Bachelor of Science in Electrical Engineering (B.S.E.E.) with Concentration in Power and Energy Systems

Students pursuing the Bachelor of Science in Electrical Engineering (BSEE) degree may choose to add a Concentration in Power and Energy Systems. The plan of study for the BSEE with a Concentration in Power and Energy Systems is similar to the BSEE plan of study with three primary exceptions:

- 1) All BSEE students are required to complete Technical Elective courses, usually during the Junior and Senior year. Students pursuing the BSEE with a Concentration in Power and Energy Systems are required to enroll in approved Power and Energy Technical Electives only. *See required courses below.*
- 2) During the Senior year, Power and Energy Systems Concentration students must complete an intensive, two-semester energy-related Senior design project.
- 3) Students in the concentration are strongly encouraged to take the Fundamentals of Engineering (FE) exam prior to graduation.

Admission Requirements

First-Year Students

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)
- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above
 - Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Currently Enrolled Students

Students must apply for admission and may enter the Concentration in Power and Energy Systems program after successfully completing the first-year engineering curriculum. Additionally, an overall GPA of 2.50 is required for admission into the Concentration in Power and Energy Systems.

Internal Change of Major

Internal change of majors within the College of Engineering must have a minimum GPA of 2.50 (2.80 for Mechanical Engineering). Students who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Change of Major Into a Program in the College of Engineering

First-time college students who seek eligibility for a change of major from a non-engineering major into an engineering program are required to:

- Complete the First-Year Curriculum.
- Have no more than two attempts per course, including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).

Students Seeking Eligibility for a Change of Major

- Should continue to be advised by their current advisor.
- Should focus on successfully completing courses that count towards the program of interest and not rely on grades in unrelated courses to elevate the GPA.
- Are not permitted to enroll in Sophomore engineering courses.

May request authorization to enroll in ENGR 1300, ENGR 1301, ENGR 1302 or ENGR 1303 via a request to the College of Engineering Advising department at osds-advising@charlotte.edu.

Transfers Seeking Eligibility for a Change of Major

Students who transfer to Charlotte into a non-engineering major and have not met the Transfer Requirements for a given engineering program are not guaranteed to be considered for a change of major. Representatives of the program of interest make decisions on a student's eligibility to pursue a change of major based on a holistic review of a student's entire academic record, including grades earned at other institutions. A record of unsuccessful attempts in courses will weigh negatively on such decisions. If transfer students are allowed to pursue eligibility for a change of major to a given program, they will be required to:

- Complete the Common First-Year Curriculum.
- Have no more than two attempts per course including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).
- Complete at least 12 credits of courses at Charlotte, including at least four courses in math, science and/or engineering.

Common First-Year Curriculum (CFY)

The College of Engineering uses a Common First-Year Curriculum (CFY) for all Engineering students in order to:

- Provide a strong academic base of foundational knowledge and skills
- Facilitate changing majors within the first year
- Support students with lower math placement and increase access to all majors
- Allow students to explore different majors before committing
- Enhance learning with innovative pedagogies and activities

Common First-Year Courses

All new first year students are initially advised by a central office within the W.S. Lee College of Engineering. Students must complete the following classes that are common to all majors of the college (except Construction Management and Fire and Safety Engineering Technology) in order to progress and matriculate to their major department. *All First-Year Curriculum courses require a grade of C or better.*

ENGR 1300 Exploring Engineering & Technology with Success(2)

ENGR 1301 Foundations of Math and Science for Engineering(3)

ENGR 1302 Logic and Computational Problem Solving(3)

ENGR 1303 Engineering Visualization and Graphical Communication(3)

PHYS 2101(3)

PHYS 2101L(1)

Two MATH courses: MATH 1103* or MATH 1241* or MATH 1242* (3 each)

See Notes 1 and 2 below

* All students should consult their advisor to select the math courses that match their planned major.

Note 1

Progression into Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Mechanical Engineering, and Systems Engineering Major Courses after completing the Common First

Year Curriculum requires that students also complete MATH 1241, MATH 1242, PHYS 2101, and PHYS 2101L.

Note 2

Progression into Civil Engineering Technology, Electromechanical Engineering Technology, and Mechanical Engineering Technology Major Courses after completing the Common First Year Curriculum requires that students complete MATH 1241, PHYS 2101, and PHYS 2101L with a C or better (except for Electromechanical Engineering Technology).

Note 3

Students must earn at least a 2.0 GPA in the first semester to continue into the second semester.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

First-Year Courses (21 credit hours)

See Common First-Year Curriculum (CFY) for details.

Major Courses (41 credit hours)

ECGR 2105 - Computer Programming (3)
ECGR 2111 - Network Theory I (3)
ECGR 2112 - Network Theory II (3)
ECGR 2112L - Networks Laboratory (1)
ECGR 2181 - Logic Systems Design (3)
ECGR 2181L - Logic System Design Laboratory (1)
ECGR 2254 - Analytical Foundations of Electrical and Computer Engineering (3)
ECGR 3111 - Signals and Systems (3)
ECGR 3112 - System Analysis II (3)
ECGR 3120 - Electromagnetic Fields and Waves (3)
ECGR 3130 - Fundamentals of Electronics and Semiconductors (3)
ECGR 3130L - Electronics Laboratory (1)
ECGR 3142 - Electrical Energy Conversion (3)
ECGR 3142L - Electrical Energy Conversion Laboratory (1)
ECGR 3157 - ECE Junior Design (3)
ECGR 4241 - Electrical Engineering Senior Design I (2)
ECGR 4242 - Electrical Engineering Senior Design II (2)

Concentration Courses (9 credit hours)

Concentration Required Course (3 credit hours)

ECGR 4141 - Power System Analysis I (3)

Concentration Elective Courses (6 credit hours)

Select two of the following:

ECGR 4090 - Special Topics in Electrical Engineering (1 to 4)*
ECGR 4104 - Computational Methods in Power Systems (3)
ECGR 4111 - Control Systems Theory I (3)
ECGR 4123 - Analog and Digital Communication (3)
ECGR 4142 - Power System Analysis II (3)
ECGR 4143 - Electrical Machinery (3)
ECGR 4144 - Power Electronics I (3)
ECGR 4171 - Introduction to Energy Systems (3)
ECGR 4172 - Energy Markets (3)

ECGR 4190 - Power Generation: Operation and Control (3)
ECGR 4191 - Dynamic and Transient Analysis of Power Systems (3)
ECGR 4290 - Science and Technology of Photovoltaics (3)

*Requires department approval

Related Courses (19 credit hours)

ENGR 3295 - Multidisciplinary Professional Development (1)
MATH 2164 - Matrices and Linear Algebra (3)
MATH 2171 - Differential Equations (3)
MATH 2241 - Calculus III (3)
PHYS 2102 - Physics for Science and Engineering II (3)
PHYS 3141 - Introduction to Modern Physics (3)
STAT 3128 - Probability and Statistics for Engineers (3)

Technical Elective Courses (12 credit hours)

- 1) Select **two** additional ECGR 4000-level courses that are not required as part of the curriculum and have not been used as the Concentration Required Course or as a Concentration Elective Course.
- 2) Select **two** technical elective courses from any of the following that are not part of the degree or concentration requirements:

CEGR 3000-level courses
CEGR 4000-level courses
ECGR 3000-level courses
ECGR 4000-level courses
ITCS 3000-level courses
ITCS 4000-level courses
MATH 3000-level courses
MATH 3000-level courses
MEGR 3000-level courses
MEGR 4000-level courses
PHYS 3000-level courses
PHYS 4000-level courses
SEGR 3000-level courses
SEGR 4000-level courses

Or any of these specific courses can be used for the two technical elective courses:

ITSC 3146 Introduction to Operating Systems and Networking
ITSC 3155 Software Engineering

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering

courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year Courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH

1103, PSYC 1101 and STAT 1220

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Bachelor of Science in Electrical Engineering and Bachelor of Science in Physics Dual Degree

This program is under revision. Please contact the Department of Physics and Optical Science for further details and program options.

The Department of Physics and Optical Science offers two dual degree opportunities with the Department of Electrical and Computer Engineering. These dual degrees are designed to broaden and enhance the education of students in engineering degree programs. Students can obtain a B.S. Physics and B.S. Electrical Engineering dual degree or a B.S. Physics and B.S. Computer Engineering dual degree.

Admission Requirements

First-Year Students and Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.00 (cumulative and Physics)
- *Pre-Major/Prerequisite Courses:* Complete the following with grades of C or above and no more than 2 attempts per course:
 - PHYS 2101
 - PHYS 2102
 - MATH 2241

Currently Enrolled Students

- *Declaration of Major:* Engineering majors wishing to declare the B.S. in Physics degree are eligible to do so after meeting the above requirements.

Degree Requirements

To obtain a dual B.S. degree in Electrical Engineering and Physics, undergraduate students must complete all requirements for the B.S.E.E. degree as established by the Department of Electrical and Computer Engineering. In addition, students must complete 12 credit hours of upper-division PHYS courses specified by the Department of Physics and Optical Science with an average grade of C or above. A B.S. in Physics under this program is awarded at the same time as or after the B.S.E.E.; the B.S. in Physics degree will not be awarded in advance of the engineering degree.

Students in this dual degree program are not required to fulfill the College of Science Foreign Language Requirement.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major

with departmental approval. Please see your advisor for information.

Pre-Major Courses (14 credit hours)

- ENGR 1201 - Introduction to Engineering Practices and Principles I (2)
- ENGR 1202 - Introduction to Engineering Practices and Principles II (2)
- MATH 1241 - Calculus I (3)
- MATH 1242 - Calculus II (3)
- PHYS 2101 - Physics for Science and Engineering I (3)
- PHYS 2101L - Physics for Science and Engineering I Lab (1)

Major Courses (51 credit hours)

- ECGR 2103 - Computer Utilization in C++ (3)
- ECGR 2111 - Network Theory I (3)
- ECGR 2112 - Network Theory II (3)
- ECGR 2155 - Instrumentation and Networks Laboratory (1) *
- ECGR 2156 - Logic and Networks Laboratory (1)*
- ECGR 2181 - Logic Systems Design (3)
- ECGR 2254 - Analytical Foundations of Electrical and Computer Engineering (3)
- ECGR 3111 - Signals and Systems (3)
- ECGR 3112 - System Analysis II (3)
- ECGR 3121 - Introduction to Electromagnetic Fields (3)
- ECGR 3122 - Electromagnetic Waves (3)
- ECGR 3131 - Fundamentals of Electronics and Semiconductors (3)
- ECGR 3132 - Electronics (3)
- ECGR 3142 - Electrical Energy Conversion (3)
- ECGR 3155 - Systems and Electronics Laboratory (1)*
- ECGR 3156 - Electromagnetic and Electronic Devices Laboratory (1)*
- ECGR 3157 - ECE Junior Design (3)
- ECGR 3159 - Professional Practice (1)
- ECGR 4123 - Analog and Digital Communication (3)
or ECGR 4124 - Digital Signal Processing (3)
- ECGR 4241 - Electrical Engineering Senior Design I (2)
- ECGR 4242 - Electrical Engineering Senior Design II (2)

**The laboratory courses are designed to: (1) teach the basic techniques of instrumentation; (2) develop skills in communications; and (3) relate the analytical methods developed in the classroom to the performance of real physical systems.*

Related Courses (19 credit hours)

- ENGR 3295 - Multidisciplinary Professional Development (1)
- MATH 2164 - Matrices and Linear Algebra (3)
- MATH 2171 - Differential Equations (3)
- MATH 2241 - Calculus III (3)
- PHYS 2102 - Physics for Science and Engineering II (3)
- PHYS 3141 - Introduction to Modern Physics (3)
- STAT 3128 - Probability and Statistics for Engineers (3)

Restricted Elective Courses (18 credit hours)

Technical Elective Courses (12 credit hours)

Select four ECGR 4000-level courses that are not required as part of the B.S.E.E. curriculum.

Elective Courses (6 credit hours)

Select two courses from the following that are not already part of the B.S.E.E. curriculum. A maximum of one PHYS 3000/4000 level course may be used to satisfy this elective requirement.

CEGR 3000-level courses

- CEGR 4000-level courses
- ECGR 3000-level courses
- ECGR 4000-level courses
- ITCS 3000-level courses
- ITCS 4000-level courses
- MATH 3000-level courses
- MATH 4000-level courses
- MEGR 3000-level courses
- MEGR 4000-level courses
- PHYS 3000-level courses
- PHYS 4000-level courses
- SEGR 3000-level courses
- SEGR 4000-level courses

Physics Courses (12 credit hours)

Required Physics Courses (6 credit hours)

- PHYS 3121 - Classical Mechanics I (3)
- PHYS 4241 - Quantum Mechanics I (3)

Elective Physics Courses (6 credit hours)

Select two of the following:

- PHYS 3160 - Stellar Astrophysics (3)
- PHYS 3220 - Mathematical Methods in Physics (3)
- PHYS 3900 - Undergraduate Research (1 to 3) (*requires permission of Department of Physics and Optical Science*)
- PHYS 4110 - Introduction to Biomedical Optics (3)
- PHYS 4140 - Nuclear Physics (3)
- PHYS 4181 - Solid State Physics (3)
- PHYS 4222 - Classical Mechanics II (3)
- PHYS 4242 - Quantum Mechanics II (3)
- PHYS 4271 - Waves and Optics (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 129-132 credit hours

Progression Requirements

A GPA of 2.00 or above in PHYS and engineering courses and an overall GPA of 2.00 or above is required. A grade of C or above is required in most PHYS courses before students can progress to the next PHYS course.

Minor in Electrical Engineering

The Department of Electrical and Computer Engineering offers a Minor in Electrical Engineering (ECGR) for non-ECGR majors.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Prerequisite Courses

The Minor in Electrical Engineering assumes that students have a background in mathematics and physics equivalent to that covered in the first two years of the ECGR curriculum, which includes the following courses:

MATH 1241 - Calculus I (3)

MATH 1242 - Calculus II (3)
MATH 2171 - Differential Equations (3)
PHYS 2101 - Physics for Science and Engineering I (3)
PHYS 2101L - Physics for Science and Engineering I Laboratory (1)
PHYS 2102 - Physics for Science and Engineering II (3)

Minor Requirements

A Minor in Electrical Engineering consists of 18 credit hours and requires the following:

Core Courses (9 credit hours)

ECGR 2111 - Network Theory I (3)
or ECGR 2161 - Basic Electrical Engineering I (3)
ECGR 2112 - Network Theory II (3)
ECGR 2254 - Analytical Foundations of Electrical and Computer Engineering (3)

Advanced Courses (6 credit hours)

Select at least two of the following. If all three listed courses are taken, one of the courses may count toward the elective course requirement below.

ECGR 3111 - Signals and Systems (3)
ECGR 3120 - Electromagnetic Fields and Waves (3)
ECGR 3130 - Fundamentals of Electronics and Semiconductors (3)

Elective Course (3 credit hours)

If only two advanced courses were selected above, select an elective course from the following. All prerequisites for the selected elective courses must be satisfied.

ECGR 3XXX - Electrical and Computer Engineering Elective (3)
ECGR 4XXX - Electrical and Computer Engineering Elective (3)

Minor Total = 18 Credit Hours

Progression Requirements

Students must achieve a minimum GPA of 2.00 in all Minor courses.

Special Policies or Requirements

This minor is not available for a student who has a major in either Electrical Engineering or Computer Engineering.

Early Entry: M.S. or Ph.D. in Electrical Engineering

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.20 overall undergraduate GPA
- Minimum 3.20 GPA in the major

- Acceptable scores on the appropriate graduate standardized test (e.g., GRE) (*Students with a 3.50 GPA are eligible to waive the GRE requirement.*)
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.00 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree

Special Policies or Requirements

Up to 9 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 9 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Department of Engineering Technology and Construction Management

et.charlotte.edu

Undergraduate Programs

- **B.S. in Construction Management (BSCM)**
 - Applied Energy and Sustainable Systems
- **B.S.E.T. in Civil Engineering Technology**
 - Applied Energy and Sustainable Systems
- **B.S.E.T. in Electromechanical Engineering Technology**
 - Applied Energy
- **B.S.E.T. in Fire and Safety Engineering Technology**
 - Fire Safety
 - Occupational Safety
- **B.S.E.T. in Mechanical Engineering Technology**
 - Applied Energy
 - Electromechanical Systems
- **Early Entry: M.S. in Applied Energy and Electromechanical Engineering**
- **Early Entry: M.S. in Construction and Facilities Engineering**
- **Early Entry: M.S. in Fire Protection and Safety Management**
- **Minor in Fire Science**
- **Minor in Occupational Safety**

Engineering and technical education have undergone considerable change in the last 40 years. The complexities of space exploration, power generation, communications systems, environmental control, information processing, transportation systems, fire protection, construction management, and manufacturing have demanded a great increase in the involvement of professional engineers in theoretical and analytical work. This has resulted in a much greater emphasis upon research and development, science, and mathematics in professional engineering curricula. At the same time, after the more complex devices and systems have been engineered, their design, development, and operation require the sophisticated knowledge and skills of what might be called the "applied engineering sciences." Programs dedicated to filling this need exist all over the United States. The aim and content of these programs are distinctly different from professional engineering curricula.

To provide the appropriate distinction from both theoretical-professional engineers and from engineering technicians who are graduated from two-year community and technical colleges, the designation "engineering

technologist" is employed to describe the graduates of four-year applied engineering or "engineering technology" curricula. The Department of Engineering Technology and Construction Management is committed to producing competent graduates that satisfy the needs of employers in North Carolina and throughout the United States.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Degree Programs

The Department of Engineering Technology and Construction Management offers curricula leading to the Bachelor of Science in Construction Management (BSCM) and the Bachelor of Science in Engineering Technology (BSET) degrees. In addition to the BSCM, four disciplines of study are available in Engineering Technology: Civil Engineering Technology, Electromechanical Engineering Technology, Fire and Safety Engineering Technology, and Mechanical Engineering Technology.

Students may enroll in the programs in several ways: 1) as First-Year students; 2) as transfers without an approved Associate of Applied Science (A.A.S.) degree in engineering technology, construction management, or fire safety; as a transfer after completing an Associate of Science (A.S.) or Associate in Engineering (A.E.) in a relevant engineering technology, construction management, or fire safety degree; or 4) as upper-division 2+2 transfers after completing a two-year A.A.S. degree in a relevant engineering technology, construction management, or fire safety curriculum at a community or technical college. Incoming students with an A.A.S. degree generally receive Junior class standing, with up to 64 credit hours applied toward the BSET or BSCM degree.

Construction Management and Engineering Technology students learn through applied technical courses and hands-on laboratories where they interact with experienced professors with many years of real-world engineering, design, project management, and product development experience. Graduation with a B.S. degree in Construction Management (BSCM) or Engineering Technology (BSET) opens the door to many exciting and challenging professional careers. Graduates choose from a variety of exciting career options where they enjoy productive professional careers with exceptional employment rates and excellent salaries.

Accreditation

The Civil, Electrical, and Mechanical Engineering Technology programs are accredited by the Engineering Technology Accreditation Commission (ETAC) of ABET. The Construction Management program is accredited by the Engineering Technology Accreditation Commission (ETAC) and the Applied and Natural Science Accreditation Commission (ANSAC) of ABET, www.abet.org.

Employment Opportunities for Graduates

Graduates of our programs can be found in every sector of the global economy. Examples of employment opportunities and examples of recent job titles are provided below for each program.

Civil Engineering Technology

Civil Engineering Technology (CIET) graduates find employment in a wide range of positions in construction, surveying, engineering and architectural firms; local, state and national government; environmental and public health agencies; state departments of transportation and highways; and private business and industry. Specific job titles of recent graduates include transportation technician, highway technician, engineer-in-training, materials supervisor, surveying crew chief, civil engineering detailer/designer, office engineer, construction estimator or planner, engineering assistant, project engineer and assistant project manager.

Construction Management

Construction Management (CM) graduates plan, direct, and coordinate a wide variety of construction projects, including the building of all types of residential, commercial, and industrial structures, roads, bridges, wastewater treatment plants, and schools and hospitals. Construction managers may oversee an entire project or just part of a project. They often work with or for owners, engineers, architects, and others who are involved in the construction process. Construction managers evaluate and help determine appropriate construction delivery systems and the most cost-effective plan and schedule for completing the project.

Electromechanical Engineering Technology

Electromechanical Engineering Technology (ETEL) graduates find employment in many sectors of industry. Graduates can expect careers in robotics and automated systems, aerospace, automotive manufacturing, medical equipment and technology, electric power generation, power distribution, sustainable and renewable power, test and quality engineering, instrumentation and data acquisition, technical sales, and field engineering.

Fire and Safety Engineering Technology

Fire Safety graduates find employment in numerous areas associated with fire safety and protection to include prevention, suppression, building design and fire investigation and re-creation, emergency preparedness, safety analysis, and mitigation. The program stresses the importance of personal communication skills and the ability to function in a team environment. Some typical job titles of recent graduates include firefighter, fire investigator, fire prevention officer, fire inspector, fire captain, and safety coordinator.

Occupational Safety graduates find employment in various industries such as construction, industrial/manufacturing plants, academic/university EHS, government offices (regulatory and non-regulatory), and military bases as safety professionals or Environmental Health & Safety (EHS) professionals. Students in the program will learn how to recognize, evaluate, and control the workplace hazards that are found in many different industries.

Mechanical Engineering Technology

Mechanical Engineering Technology (MET) graduates use the principles of energy, materials, and mechanics to design, build, test and maintain a wide variety of machines, processes, and systems with employment in the automotive, aerospace, energy, and other high-tech industries. METs work in areas such as computer-aided design, plant production or maintenance, research and development, or as laboratory technicians, production assistants, manufacturing or quality control engineers, product and materials testing technologists, or applications engineers.

Engineering Technology and Construction Management Program Educational Objectives and Outcomes

Program Educational Objectives

These are statements that describe the expected accomplishments of graduates during the first few years *after* graduation.

The Department of Engineering Technology and Construction Management at UNC Charlotte is committed to providing the environment and expertise to ensure that its graduates make substantive contributions in their professional endeavors after graduation, both in the areas of technical proficiency and community involvement.

Accordingly, graduates of the BSET Civil, Electrical, Fire and Safety, and Mechanical Engineering Technology programs and BSCM Construction Management program contribute to society as productive technologists and engaged citizens by:

- 1.) Applying general and discipline-specific concepts and methodologies to identify, analyze, and solve technical problems.
- 2.) Articulating technical material in a professional manner to potentially diverse audiences and in a variety of circumstances.
- 3.) Assuming leadership roles and contributing within team environments while modeling ethical, respectful, and professional behavior at all times.
- 4.) Recognizing and appreciating the environmental, societal, and fiscal impact of the technical professions in a local, national, and global context.
- 5.) Demonstrating an individual desire and commitment to pursue continuous self-improvement and lifelong learning.

Student Outcomes

The Construction Management and Engineering Technology programs identify, measure, and improve student competencies through assessment and continuous improvement of student learning outcomes, which are mapped to the ETAC of ABET Criterion 3 Outcomes listed below:

ETAC of ABET Criterion 3 Outcomes

For baccalaureate degree programs, these student outcomes must include, but are not limited to, the following:

- 1) An ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve broadly-defined engineering problems appropriate to the discipline;
- 2) An ability to design systems, components, or processes meeting specified needs for broadly-defined engineering problems appropriate to the discipline;
- 3) An ability to apply written, oral, and graphical communication in broadly defined technical and non-technical environments; and an

- 4) ability to identify and use appropriate technical literature;
- 4) An ability to conduct standard tests, measurements, and experiments and to analyze and interpret the results to improve processes; and
- 5) An ability to function effectively as a member as well as a leader on technical teams.

The Construction Management program's student outcomes are also mapped to the ANSAC of ABET Criterion 3 Outcomes listed below:

ANSAC of ABET Criterion 3 Skills

Baccalaureate degree program student outcomes must include, but are not limited to, the following:

- 1) An ability to identify, formulate, and solve broadly defined technical or scientific problems by applying knowledge of mathematics and science and/or technical topics to areas relevant to the discipline.
- 2) An ability to formulate or design a system, process, procedure or program to meet desired needs.
- 3) An ability to develop and conduct experiments or test hypotheses, analyze and interpret data and use scientific judgment to draw conclusions.
- 4) An ability to communicate effectively with a range of audiences.
- 5) An ability to understand ethical and professional responsibilities and the impact of technical and/or scientific solutions in global, economic, environmental, and societal contexts.
- 6) An ability to function effectively on teams that establish goals, plan tasks, meet deadlines, and analyze risk and uncertainty.

Additional Programs and Opportunities

Distance Education

In addition to the on-campus programs, the upper division of the BSET program in Fire and Safety Engineering Technology (Fire Safety concentration) is offered online to part-time students. This allows students who already hold an approved degree to complete their Junior and Senior years of the BSET program at a distance. Estimated completion time for the distance delivery of the Junior and Senior years is approximately four-years, including summers, since students generally take two courses per semester.

Construction Management

Bachelor of Science in Construction Management (B.S.C.M.)

The Bachelor of Science in Construction Management (BSCM) degree program is designed to provide the construction education necessary for entry into the construction industry (residential, commercial, industrial sectors, and heavy horizontal construction) and related careers, including, but not limited to, real estate and land development, infrastructure development, code enforcement, and insurance, among others.

The Construction Management program has been crafted to provide the student with extensive experience and practicum in the fundamentals of Construction Management (Plan Reading, Means and Methods, Cost Estimating, Project Planning and Scheduling and Construction

Administration and Risk).

The program is further enhanced by business / management core courses in statistics, computer applications, economics, accounting, organization and supply chain management, and construction law which allows the student to pursue a minor in Business (Operations and Supply Chain Management).

Admission Requirements

Students for this degree may enter degree programs in the Department of Engineering Technology and Construction Management as First-Year students or as transfer students.

First-Year Students

Applicants entering as First-Year students must meet the general University admission requirements. See University Admission Requirements.

Transfers

See University Admission Requirements.

Transfer admission into the department occurs in one of two situations:

1. Transfer applicants who do not have the Associate in Applied Science (AAS) degree or its equivalent must meet general University admission requirements.
2. Transfer applicants with an Associate of Applied Science (AAS) degree must:
 - Hold an Associate of Applied Science (AAS) degree in a field appropriate to the option they plan to enter. . Acceptable AAS degrees may include Architectural, Automation, Building Construction, Civil, Construction, Design and Drafting, Surveying or similar title with curriculum acceptable to the department. A minimum GPA of 2.50 (out of 4.00) in the AAS degree is required.
 - Have completed satisfactorily the prerequisite background courses for the option they plan to enter. Missing background courses may be taken at UNC Charlotte.

Currently Enrolled Students

Current UNC Charlotte students who wish to change or declare their major to Construction Management must first satisfy the following requirements in order to be considered eligible for admission:

- Complete MATH 1103 or higher with a grade of C or better.
- Complete PHYS 1101 and PHYS 1101L or higher Physics course with a grade of C or better.
- Achieve a GPA between 2.2 - 4.0.
- Pass all currently attempted required courses within three attempts including withdrawing from a course with a grade of W.
- Students currently enrolled in a required course for a second time must wait until grades are posted before declaring an ETCM major. A student will not be admitted to the major unless the course is passed within three attempts.
- Complete at least one the following courses for their desired major:
 - ETCE 1222, or CMET 1400 or CMET 1680 with a grade of C or better

Upon satisfying all of the above requirements, students may request admission to an ETCM program by submitting the Change of Major form. Completion of the minimum requirements does not guarantee acceptance into a program.

Course Requirements

Course requirements correspond to the mode of admission for each student as outlined hereafter.

- **Entering First-Year Students:** Students admitted as First-Year students complete the appropriate four-year curriculum for the program into which they were admitted.
- **Transfer students not holding an appropriate AAS degree:** Transfer students not holding an appropriate AAS degree must complete the remaining coursework outlined for the respective four-year curriculum into which they were admitted after evaluation and application of any transfer credit.
- **Transfer students holding an appropriate AAS degree:** Transfer students with an appropriate Associate of Applied Science (AAS) degree as defined previously under Admission Requirements may begin the program in the Junior year with up to 64 transfer credit hours awarded. Prerequisites for students holding an AAS degree from a community or technical college are listed below.

Course Prerequisites

Students must have satisfactorily completed the following subjects in their two-year Associate degree program:

- Accounting (6 credit hours)
- Business Computing (3 credit hours)
- Building Information Modeling (3 credit hours)
- Calculus (3 credit hours)
- Construction Materials (3 credit hours)
- Construction Methods (3 credit hours)
- Construction Surveying (4 credit hours)
- English Composition and Technical Writing (6 credit hours)
- Macro Economics (3 credit hours)
- Physics with Lab (3 credit hours)
- Plan Reading (3 credit hours)
- Precalculus (3 credit hours)
- Statics (3 credit hours)
- Statistics (3 credit hours)

Remediation of Academic Entrance Requirements for AAS Transfer Students

In addition to University and College of Engineering requirements, an AAS transfer student who is admitted to any BSET program without meeting ALL published admission requirements is expected to remove all admission deficiencies within one year. Violators are subject to discontinuance and enrollment in Senior-level coursework is prohibited until all deficiencies are removed.

Degree Requirements (4-Year Program)

The Bachelor of Science in Construction Management (BSCM) 4-year degree program consists of 120 credit hours.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program.

Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

One of the required theme courses is satisfied through ECON 2101 as noted in the Business and Management Foundation Courses section below.

Mathematics and Science Foundation Courses (13 credit hours)

Required Mathematics/Science Courses

- MATH 1103 - Precalculus Mathematics for Science and Engineering (3)
MATH 1121 - Calculus for Engineering Technology (3)
PHYS 1101 - Introductory Physics I (3)
PHYS 1101L - Introductory Physics I Laboratory (1)
STAT 1220 - Elements of Statistics I (BUSN) (3)

Business and Management Foundation Courses (24 credit hours)

- ACCT 2121 - Principles of Accounting I (3)
ACCT 2122 - Principles of Accounting II (3)
ECON 2101 - Principles of Economics - Macro (3)
ECON 2102 - Principles of Economics - Micro (3)
INFO 2130 - Introduction to Business Computing (3)
MGMT 3140 - Management and Organizational Behavior (3)
OPER 3100 - Operations Management (3)
OPER 3208 - Supply Chain Management (3)

Major Courses (62 credit hours)

- CMET 1400 - Introduction to Construction Management (3)
CMET 1680 - Professional Development I: Construction Safety (1)
CMET 2105 - Plan Reading (2)
CMET 2105L - Plan Reading Lab (1)
CMET 2135 - Building Information Modeling (BIM) (3)
CMET 2175 - Survey of Structures (3)
CMET 2221 - Construction Means and Methods (3)
CMET 3123 - Cost Estimating (3)
CMET 3124 - Cost Estimating II (3)
CMET 3126 - Project Planning and Scheduling (3)
CMET 3150 - Construction Law and Contracts (3)
CMET 3224 - Construction Project Administration (3)
CMET 4126 - Project Scheduling and Control (3)
CMET 4272 - Capstone Project (3)
CMET 4401 - Construction Internship (1)
ETCE 1211 - Construction Surveying I (3)
ETCE 1211L - Construction Surveying I Laboratory (1)
ETCE 1222 - Construction Materials (3)
ETCE 2163L - Construction Materials and Structures Lab (1)
ETCE 3131 - Soil Mechanics and Earthwork (3)
ETCE 3131L - Soil Testing Laboratory (1)
ETCE 3271 - Building Systems (3)
ETCE 4350 - Construction Geotechnics and Foundations (3)
ETGR 2101 - Applied Mechanics I (3)

* Must be completed with a grade of C or above.

Restricted Elective Courses (6 credit hours)

Select two of the following from departmental and non-departmental courses:

Departmental Courses

Two courses may be selected from the following:

CMET 4073 - Special Topics - Construction Management (1 to 4)

CMET 4125 - Construction Codes, Permits, Compliance and Sustainability (3)

CMET 4130 - Infrastructure Systems (3)

CMET 4290 - Temporary Structures in Construction (3)

ETCE 3242 - Hydraulics and Hydrology (3)

ETCE 4251 - Highway Design and Construction (3)

Degree Total = 120 Credit Hours

Progression Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year Courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Special Policies or Requirements

Acceptance of a completed AAS degree indicates the acceptance of up to 64 credit hours toward the Bachelor of Science in Engineering Technology degree program only. These hours may not be valid toward other degree programs at UNC Charlotte.

Residence Requirements

A student must earn the last 30 credit hours toward the BSET degree and the last 12 credit hours in the major at UNC Charlotte to satisfy residence requirements.

Experiential Learning Requirements

All students must complete an experiential learning course. Experiential courses are practice-oriented courses such as cooperative education, internships, Senior design projects, or undergraduate research.

Internships, or 49erships, involve paid or unpaid work in a career-related position for professional experience. A minimum of 80 work hours and 5 weeks for one semester is required to complete the program. Fall and Spring 49erships are part-time. Summer 49erships may be full- or part-time. Full-time students who are in good University standing, have completed 30 credit hours, and have a 2.00 minimum cumulative GPA are eligible. Internships do not offer academic credit, but are noted on the student's transcript; students pay a course registration fee. Approval for enrollment must be arranged before the student begins a work experience. Students may begin this program during their Sophomore year. Transfer students must complete 12 credit hours at UNC Charlotte before applying to the program. For more information, contact the College of Engineering Office of Student Development and Success or the University Career Center.

Degree Requirements (2+2-Year Program)

The Bachelor of Science in Construction Management (BSCM) 2+2-year degree program consists of 120 credit hours which may include up to 60 credit hours of approved courses from an approved A.A.S. degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

A.A.S. Degree (60 credit hours)

A.A.S. transfer students from approved programs may receive up to 60 credit hours for approved courses in the A.A.S. degree; thus, A.A.S. students need only to complete the upper-division portion of the courses listed below and remediate any entrance deficiencies noted upon matriculation.

General Education Courses (12 credit hours)

Students must take four courses from the general education list of courses. For further details on required courses, refer to the General Education Program.

Business and Management Foundation Courses (24 credit hours)

1000- and 2000-level courses can be evaluated as part of the 60 credit hours through the NCCC Articulation Agreement.

ACCT 2121 - Principles of Accounting I(3)

ACCT 2122 - Principles of Accounting II(3)

ECON 2101 - Principles of Economics - Macro(3)

ECON 2102 - Principles of Economics - Micro(3)

INFO 2130 - Introduction to Business Computing (3)

MGMT 3140 - Management and Organizational Behavior (3)

OPER 3100 - Operations Management(3)

OPER 3208 - Supply Chain Management(3)

Major Courses (35 credit hours)

1000- and 2000-level courses can be evaluated as part of the 60 credit hours through the NCCC Articulation Agreement.

CMET 3123 - Cost Estimating(3)

CMET 3124 - Cost Estimating II(3)

CMET 3126 - Project Planning and Scheduling(3)

CMET 3150 - Construction Law and Contracts(3)

CMET 3224 - Construction Project Administration(3)

CMET 4126 - Project Scheduling and Control(3)

CMET 4272 - Capstone Project(3)

CMET 4401 - Construction Internship (1)

ETCE 3131 - Soil Mechanics and Earthwork (3)

ETCE 3131L - Soil Testing Laboratory(1)

ETCE 3271 - Building Systems(3)

ETCE 4350 - Construction Geotechnics and Foundations(3)

Restricted Elective Courses (6 credit hours)

Select two of the following from departmental and non-departmental courses:

Departmental Courses

Two courses may be selected from the following:

CMET 4073 - Special Topics - Construction Management(1 to 4)

CMET 4125 - Construction Codes, Permits, Compliance and Sustainability(3)

CMET 4135 - Construction Technologies and Innovation(3)

CMET 4290 - Temporary Structures in Construction(3)

ETCE 3242 - Hydraulics and Hydrology(3)

ETCE 4251 - Highway Design and Construction(3)

Non-Departmental Courses

A maximum of one course may be selected from the following:

GEOG 3115 - Urban Transportation Problems (3)

GEOG 3120 - Fundamentals of Geographic Information Systems (4)

GEOG 3200 - Land Use Planning (3)

GEOG 3210 - Regional Planning (3)

GEOG 3215 - Environmental Planning (3)

GEOG 4040 - Transportation Topics (3)

GEOL 3190 - Environmental Geology (3)

GEOL 4145 - Hydrogeology (4)

CHEM 1252 - General Chemistry II (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Bachelor of Science in Construction Management (BSCM) with Concentration in Applied Energy and Sustainable Systems

A Concentration in Applied Energy and Sustainable Systems is available to B.S. in Construction Management students. The Bachelor of Science in Construction Management (BSCM) degree program is designed to provide the construction education necessary for entry into the construction industry (residential, commercial, industrial sectors, and heavy horizontal construction) and related careers, including, but not limited to, real estate and land development, infrastructure development, code enforcement, and insurance, among others.

The Construction Management program has been crafted to provide the student with extensive experience and practicum in the fundamentals of Construction Management (Plan Reading, Means and Methods, Cost Estimating, Project Planning and Scheduling and Construction Administration and Risk).

The program is further enhanced by business / management core courses in statistics, computer applications, economics, accounting, organization and supply chain management, and construction law which allows the student to pursue a minor in Business (Operations and Supply Chain Management).

Admission Requirements

Students for this degree may enter degree programs in the Department of Engineering Technology and Construction Management as First-Year students or as transfer students.

First-Year Students

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)
- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above
 - Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Currently Enrolled Students

Current UNC Charlotte students who wish to change or declare their major to Construction Management must first satisfy the following requirements in order to be considered eligible for admission:

- Complete MATH 1103 or higher with a grade of C or better.
- Complete PHYS 1101 and PHYS 1101L or higher Physics course with a grade of C or better.
- Achieve a GPA between 2.2 - 4.0.
- Pass all currently attempted required courses within three attempts including withdrawing from a course with a grade of W.
- Students currently enrolled in a required course for a second time must wait until grades are posted before declaring an ETCM major. A student will not be admitted to the major unless the course is passed within three attempts.
- Complete at least one the following courses for their desired major:
 - ETCE 1222, or CMET 1400 or CMET 1680 with a grade of C or better

Upon satisfying all of the above requirements, students may request admission to an ETCM program by submitting the Change of Major form. Completion of the minimum requirements does not guarantee acceptance into a program.

Course Requirements

Course requirements correspond to the mode of admission for each student as outlined hereafter.

- **Entering First-Year Students:** Students admitted as First-Year students complete the appropriate four-year curriculum for the program into which they were admitted.
- **Transfer students not holding an appropriate AAS degree:** Transfer students not holding an appropriate AAS degree must complete the remaining coursework outlined for the respective four-year curriculum into which they were admitted after evaluation and application of any transfer credit.
- **Transfer students holding an appropriate AAS degree:** Transfer students with an appropriate Associate of Applied Science (AAS) degree as defined previously under Admission Requirements may begin the program in the Junior year with up to 64 transfer credit hours awarded. Prerequisites for students holding an AAS degree from a community or technical college are listed below.

Course Prerequisites

Students must have satisfactorily completed the following subjects in their two-year Associate degree program:

- Accounting (6 credit hours)
- Business Computing (3 credit hours)
- Building Information Modeling (3 credit hours)
- Calculus (3 credit hours)
- Construction Materials (3 credit hours)
- Construction Methods (3 credit hours)
- Construction Surveying (4 credit hours)
- English Composition and Technical Writing (6 credit hours)
- Macro Economics (3 credit hours)
- Physics with Lab (3 credit hours)
- Plan Reading (3 credit hours)
- Precalculus (3 credit hours)
- Statics (3 credit hours)
- Statistics (3 credit hours)

Remediation of Academic Entrance Requirements for AAS Transfer Students

In addition to University and College of Engineering requirements, an AAS transfer student who is admitted to any BSET program without meeting ALL published admission requirements is expected to remove all admission deficiencies within one year. Violators are subject to discontinuance and enrollment in Senior-level coursework is prohibited until all deficiencies are removed.

Degree Requirements

The Bachelor of Science in Construction Management (BSCM) with Concentration in Applied Energy and Sustainable Systems 4-year degree program consists of 120 credit hours.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major

with departmental approval. Please see your advisor for information.

One of the required themed courses is satisfied through ECON 2101 as noted in the Business and Management Foundation Courses section below.

Mathematics and Science Foundation Courses (13 credit hours)

Required Mathematics/Science Courses

- MATH 1103 - Precalculus Mathematics for Science and Engineering (3)
- MATH 1121 - Calculus for Engineering Technology (3)
- PHYS 1101 - Introductory Physics I (3)
- PHYS 1101L - Introductory Physics I Laboratory (1)
- STAT 1220 - Elements of Statistics I (BUSN) (3)

Elective Mathematics/Science Course

Select one of the following:

- CHEM 1251 - General Chemistry I (3)
- CHEM 1252 - General Chemistry II (3)
- GEOG 1103 - Spatial Thinking (4)
- GEOG 1110 - Introduction to Urban and Regional Planning (3)
- GEOG 2103 - Elements of GIScience and Technologies (4)
- MATH 2164 - Matrices and Linear Algebra (3)
- MATH 2342 - Data Analysis and Probability (3)

Business and Management Foundation Courses (9 credit hours)

- ACCT 2121 - Principles of Accounting I (3)
- BLAW 3150 - Business Law I (3)
- ECON 2101 - Principles of Economics - Macro (3)

Major Courses (65 credit hours)

- CMET 1680 - Professional Development I: Construction Safety (1) *
- CMET 2105 - Plan Reading (2)
- CMET 2135 - Building Information Modeling (BIM) (3)
- CMET 2221 - Construction Means and Methods (3)
- CMET 3123 - Cost Estimating (3)
- CMET 3224 - Construction Project Administration (3)
- CMET 3680 - Professional Development III: Professional Ethics (1)
- CMET 4126 - Project Scheduling and Control (3)
- CMET 4130 - Infrastructure Systems (3)
- CMET 4272 - Capstone Project (3)
- ETCE 1104 - Civil/Construction CAD Applications (3) *
- ETCE 1211 - Construction Surveying I (3) *
- ETCE 1211L - Construction Surveying I Laboratory (1) *
- ETCE 1222 - Construction Materials (3) *
- ETCE 2163L - Construction Materials and Structures Lab (1)
- ETCE 2410 - Introduction to Environmental Engineering Technology (3)
- ETCE 3131 - Soil Mechanics and Earthwork (3)
- ETCE 3131L - Soil Testing Laboratory (1)
- ETCE 3163 - Structural Analysis and Design I (3)
- ETCE 3271 - Building Systems (3)
- ETCE 4350 - Construction Geotechnics and Foundations (3)
- ETGR 1100L - Engineering Technology Computer Applications Laboratory (1) *
- ETGR 1101 - Introduction to Engineering Technology and Construction Management (1) *
- ETGR 2101 - Applied Mechanics I (3) *
- ETGR 2102 - Applied Mechanics II (3)
- ETGR 3222 - Engineering Economics (3)
- ETGR 3295 - Multidisciplinary Professional Development (1)

*Must be completed with a grade of C or above.

Concentration Courses (15 credit hours)

In addition to required courses ETCE 2410 and ETCE 3242 or ETCE 3271, select three of the following:

- AEEE 4140 - Energy Management (3)
- AEEE 4250 - Analysis of Renewable Energy Systems (3)
- SEGR 4961 - Introduction to Energy Systems (3)
- SEGR 4962 - Energy Markets (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a

course with a grade of W

- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year Courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Special Policies or Requirements

Acceptance of a completed AAS degree indicates the acceptance of up to 64 credit hours toward the Bachelor of Science in Engineering Technology degree program only. These hours may not be valid toward other degree programs at UNC Charlotte.

Residence Requirements

A student must earn the last 30 credit hours toward the BSET degree and the last 12 credit hours in the major at UNC Charlotte to satisfy residence requirements.

Experiential Learning Requirements

All students must complete an experiential learning course. Experiential courses are practice-oriented courses such as cooperative education, internships, Senior design projects, or undergraduate research.

Internships, or 49erships, involve paid or unpaid work in a career-related position for professional experience. A minimum of 80 work hours and 5 weeks for one semester is required to complete the program. Fall and Spring 49erships are part-time. Summer 49erships may be full- or part-time. Full-time students who are in good University standing, have completed 30 credit hours, and have a 2.00 minimum cumulative GPA are eligible. Internships do not offer academic credit, but are noted on the student's transcript; students pay a course registration fee. Approval for enrollment must be arranged before the student begins a work experience. Students may begin this program during their Sophomore

year. Transfer students must complete 12 credit hours at UNC Charlotte before applying to the program. For more information, contact the College of Engineering Office of Student Development and Success or the University Career Center.

Early Entry: Master of Science in Construction and Facilities Engineering

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.20 overall undergraduate GPA
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.00 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Civil Engineering Technology

Civil Engineering Technology includes computer-aided drafting (CAD); structures (analysis, design of structural steel and reinforced concrete); construction (cost estimating, construction planning and

administration); transportation (surveying, highway design and construction); water resources (hydraulics, hydrology, and environmental); and geotechnical (soil mechanics, foundations, and earthwork).

The Civil Engineering Technology program shares a common curriculum with the Construction Management program for the first two years. Students may move between the common programs until the Junior year when the curricula diverge. At the end of the Sophomore year, students must select either the analysis and design-oriented Civil Engineering Technology BSET degree or the management-oriented BSCM program.

BSET in Civil Engineering Technology

Admission Requirements

Students for this degree may enter degree programs in the Department of Engineering Technology and Construction Management as First-Year students or as transfer students.

First-Year Students

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)
- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above
 - Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Currently Enrolled Students

Current UNC Charlotte students who wish to change or declare their major to Civil Engineering Technology must:

- Complete the College of Engineering Common First Year (or equivalent courses) in order to be considered eligible for admission. See **Common First-Year Courses** below.
- Achieve a GPA between 2.2 - 4.0.
- Pass all currently attempted required courses within three attempts including withdrawing from a course with a grade of W.

Upon satisfying all of the above requirements, students may request admission to an ETCM program by submitting the Change of Major form. Completion of the minimum requirements does not guarantee acceptance into a program.

Course Requirements

Course requirements correspond to the mode of admission for each student as outlined hereafter.

- **Entering First-Year Students:** Students admitted as First-Year students complete the appropriate four-year curriculum for the program into which they were admitted.
- **Transfer students not holding an appropriate AAS degree:** Transfer students not holding an appropriate AAS degree must complete the remaining coursework outlined for the respective four-year curriculum into which they were admitted after evaluation and application of any transfer credit.
- **Transfer students holding an appropriate AAS degree:** Transfer students with an appropriate Associate of Applied Science (AAS) degree as defined previously under Admission Requirements may begin the program in the Junior year with up to 64 transfer credit hours awarded. Prerequisites for students holding an AAS degree from a community or technical college are listed below.

Prerequisite Courses for AAS Transfers

Students transferring with an AAS degree must have satisfactorily completed the following subjects in their two-year program:

- English Composition, Technical Writing, and/or Public Speaking (3 credit hours)
- Pre-calculus (3 credit hours)
- Differential and Integral Calculus (6 credit hours)
- General Physics (with lab) (4 credit hours)
- Additional Physics (with lab) or Geology (3-4 credit hours)
- Technical Courses in Major Area (up to 41 credit hours)
 - ET Computer Applications
 - Computer-Aided Drafting
 - Construction Surveying
 - Statics
 - Strength of Materials
 - Construction Materials with Lab
 - Construction Methods
 - Hydraulics or hydrology or environmental technology
 - Building Information Modeling
 - Plan Reading and Quantity Takeoffs

Remediation of Academic Entrance Requirements for AAS Transfer Students

In addition to University and College of Engineering requirements, an AAS transfer student who is admitted to any BSET program without meeting

ALL published admission requirements is expected to remove all admission deficiencies within one year. Violators are subject to discontinuance and enrollment in Senior-level coursework is prohibited until all deficiencies are removed.

Common First-Year Curriculum (CFY)

The College of Engineering uses a Common First-Year Curriculum (CFY) for all Engineering students in order to:

- Provide a strong academic base of foundational knowledge and skills
- Facilitate changing majors within the first year
- Support students with lower math placement and increase access to all majors
- Allow students to explore different majors before committing
- Enhance learning with innovative pedagogies and activities

Common First-Year Courses

All new first year students are initially advised by a central office within the W.S. Lee College of Engineering. Students must complete the following classes that are common to all majors of the college (except Construction Management and Fire and Safety Engineering Technology) in order to progress and matriculate to their major department. *All First-Year Curriculum courses require a grade of C or better.*

ENGR 1300 Exploring Engineering & Technology with Success (2)

ENGR 1301 Foundations of Math and Science for Engineering (3)

ENGR 1302 Logic and Computational Problem Solving (3)

ENGR 1303 Engineering Visualization and Graphical Communication (3)

PHYS 2101 (3)

PHYS 2101L (1)

Two MATH courses: MATH 1103* or MATH 1241* or MATH 1242* (3 each)

See Notes 1 and 2 below

* All students should consult their advisor to select the math courses that match their planned major.

Note 1

Progression into Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Mechanical Engineering, and Systems Engineering Major Courses after completing the Common First Year Curriculum requires that students also complete MATH 1241, MATH 1242, PHYS 2101, and PHYS 2101L.

Note 2

Progression into Civil Engineering Technology, Electromechanical Engineering Technology, and Mechanical Engineering Technology Major Courses after completing the Common First Year Curriculum requires that students complete MATH 1241, PHYS 2101, and PHYS 2101L with a C or better (except for Electromechanical Engineering Technology).

Note 3

Students must earn at least a 2.0 GPA in the first semester to continue into the second semester.

Degree Requirements (4-Year Program)

The BSET in Civil Engineering Technology program consists of 120 credit hours.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

First-Year Courses (21 credit hours)

See Common First-Year Curriculum (CFY) for details.

Mathematics and Science Foundation Courses (12 credit hours)

ETGR 2272 - Engineering Analysis II (3)

GEOl 1200 - Physical Geology (3)

PHYS 2102 - Physics for Science and Engineering II (3)

STAT 1220 - Elements of Statistics I (BUSN) (3)

Major Courses (66 credit hours)

CMET 1680 - Professional Development I: Construction Safety (1) *

CMET 2105 - Plan Reading (3)

CMET 2135 - Building Information Modeling (BIM) (3)

CMET 2221 - Construction Means and Methods (3)

CMET 3123 - Cost Estimating (3)

CMET 3224 - Construction Project Administration (3)

CMET 3680 - Professional Development III: Professional Ethics (1)

ETCE 1104 - Civil/Construction CAD Applications (3)*

ETCE 1211 - Construction Surveying I (3)*

ETCE 1211L - Construction Surveying I Lab (1)*

ETCE 1222 - Construction Materials (3)*

ETCE 2163L - Construction Materials and Structures Lab (1)

ETCE 2410 - Introduction to Environmental Engineering Technology (3)

ETCE 3131 - Soil Mechanics and Earthwork (3)

ETCE 3131L - Soil Testing Lab (1)

ETCE 3242 - Hydraulics and Hydrology (3)

ETCE 3264 - Structural Analysis (3)

ETCE 4165 - Structural Steel Design (3)

ETCE 4251 - Highway Design and Construction (3)

ETCE 4266 - Reinforced Concrete Design (3)

ETCE 4272 - Capstone Project (3)

ETCE 4350 - Construction Geotechnics and Foundations (3)

ETGR 2101 - Applied Mechanics I (3)

ETGR 2102 - Applied Mechanics II (3)

ETGR 3222 - Engineering Economics (3)

ETGR 3295 - Multidisciplinary Professional Development (1)

**Course must be completed with a grade of C or above.*

Restricted Elective Course (3 credit hours)

Select one of the following:

ETGR 2106 - Electronic Circuits and Devices (3)

ETGR 4272 - Engineering Analysis IV (3)

CMET 4073 - Special Topics - Construction Management (1 to 4)

CMET 4126 - Project Scheduling and Control (3)

CMET 4130 - Infrastructure Systems (3)

CMET 4135 - Construction Technologies and Innovation (3)

CMET 4290 - Temporary Structures in Construction (3)

ELET 2241 - Instrumentation and Controls (3) -

ETCE 3271 - Building Systems (3)

ETCE 4073 - Special Topics - Civil Engineering Technology (1 to 4)

ETCE 4344 - Applied Hydrology and Storm Water Management (3)

ETME 3113 - Dynamics (3)

ETME 3143 - Thermodynamics (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year Courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W

- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Special Policies or Requirements

Acceptance of a completed AAS degree indicates the acceptance of up to 64 credit hours toward the Bachelor of Science in Engineering Technology degree program only. These hours may not be valid toward other degree programs at UNC Charlotte.

Residence Requirements

A student must earn the last 30 credit hours toward the BSET degree and the last 12 credit hours in the major at UNC Charlotte to satisfy residence requirements.

Experiential Learning Requirements

All students must complete an experiential learning course. Experiential courses are practice-oriented courses such as cooperative education, internships, senior design projects, or undergraduate research. Internships, or 49erships, involve paid or unpaid work in a career-related position for professional experience. A minimum of 80 work hours and 5 weeks for one semester is required to complete the program. Fall and Spring 49erships are part-time. Summer 49erships may be full- or part-time. Full-time students who are in good University standing, have completed 30 credit hours, and have a 2.0 minimum cumulative GPA are eligible. Internships do not offer academic credit, but are noted on the student's transcript; students pay a course registration fee. Approval for enrollment must be arranged before the student begins a work experience. Students may begin this program during their Sophomore year. Transfer students must complete 12 credit hours at UNC Charlotte before applying to the program. For more information, contact the College of Engineering Office of Student Development and Success or the University Career Center.

Degree Requirements (2+2-Year Program)

The B.S. in Civil Engineering Technology (BSET) 2+2-year degree program consists of 120 credit hours, which may include up to 64 credit hours of approved courses from an approved A.A.S. degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

A.A.S. Degree (60 credit hours)

A.A.S. transfer students from approved programs may receive up to 60 credit hours for approved courses in the A.A.S. degree; thus, A.A.S. students need only to complete the upper-division portion of the courses listed below and remediate any entrance deficiencies noted upon matriculation.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Students must select three courses from the General Education program. For further details, refer to the General Education Program.

Mathematics and Science Foundation Courses (9 credit hours)

ETGR 3171 - Engineering Analysis III (3)

or ETGR 4272 - Engineering Analysis IV (3)

GEOL 1200 - Physical Geology (3)

Math/Science Elective Course

Select one of the following:

CHEM 1251 - General Chemistry I (3)

CHEM 1252 - General Chemistry II (3)

GEOG 1103 - Spatial Thinking (4)

GEOG 1110 - Introduction to Urban and Regional Planning (3)

GEOG 2103 - Elements of GIScience and Technologies (4)

MATH 2164 - Matrices and Linear Algebra (3)

MATH 2342 - Data Analysis and Probability (3)

Major Courses (36 credit hours)

CMET 3123 - Cost Estimating (3)

CMET 3224 - Construction Project Administration (3)

CMET 3680 - Professional Development III: Professional Ethics (1)

ETCE 3131 - Soil Mechanics and Earthwork (3)

ETCE 3131L - Soil Testing Lab (1)

ETCE 3242 - Hydraulics and Hydrology (3)

ETCE 3264 - Structural Analysis (3)

ETCE 4165 - Structural Steel Design (3)

ETCE 4251 - Highway Design and Construction (3)

ETCE 4266 - Reinforced Concrete Design (3)

ETCE 4272 - Capstone Project (3)

ETCE 4350 - Construction Geotechnics and Foundations (3)

ETGR 3222 - Engineering Economics (3)

ETGR 3295 - Multidisciplinary Professional Development (1)

Restricted Elective Courses (6 credit hours)

Select two of the following. Only one course may be non-departmental.

Departmental Courses

Two courses may be selected from this list:

ETGR 2106 - Electronic Circuits and Devices (3)

ETGR 4272 - Engineering Analysis IV (3)

CMET 4073 - Special Topics - Construction Management (1 to 4)

CMET 4126 - Project Scheduling and Control (3)

CMET 4130 - Infrastructure Systems (3)

CMET 4135 - Construction Technologies and Innovation (3)

CMET 4290 - Temporary Structures in Construction (3)

ELET 2241 - Instrumentation and Controls (3)

ETCE 3271 - Building Systems (3)

ETCE 4073 - Special Topics - Civil Engineering Technology (1 to 4)

ETCE 4344 - Applied Hydrology and Storm Water Management (3)

ETME 3113 - Dynamics (3)

ETME 3143 - Thermodynamics (3)

Non-Departmental Courses

Maximum of one course may be selected from this list:

GEOG 3115 - Urban Transportation Problems (3)

GEOG 3120 - Fundamentals of Geographic Information Systems (4)

GEOG 3200 - Land Use Planning (3)

GEOG 3210 - Regional Planning (3)

GEOG 3215 - Environmental Planning (3)

GEOL 3190 - Environmental Geology (3)

GEOL 4145 - Hydrogeology (4)

CHEM 1252 - General Chemistry II (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

BSET in Civil Engineering Technology with Concentration in Applied Energy and Sustainable Systems

A Concentration in Applied Energy and Sustainable Systems is available to BSET in Civil Engineering Technology students.

Admission Requirements

Students for this degree may enter degree programs in the Department of Engineering Technology and Construction Management as First-Year students or as transfer students.

First-Year Students

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called

the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)
- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above
 - Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Currently Enrolled Students

Current UNC Charlotte students who wish to change or declare their major to Civil Engineering Technology must:

- Complete the College of Engineering Common First Year (or equivalent courses) in order to be considered eligible for admission. See **Common First-Year Courses** below.
- Achieve a GPA between 2.2 - 4.0.
- Pass all currently attempted required courses within three attempts including withdrawing from a course with a grade of W.

Upon satisfying all of the above requirements, students may request admission to an ETCM program by submitting the Change of Major form. Completion of the minimum requirements does not guarantee acceptance into a program.

Course Requirements

Course requirements correspond to the mode of admission for each student as outlined hereafter.

- **Entering First-Year Students:** Students admitted as First-Year students complete the appropriate four-year curriculum for the program into which they were admitted.
- **Transfer students not holding an appropriate AAS degree:** Transfer students not holding an appropriate AAS degree must complete the remaining coursework outlined for the respective four-year curriculum into which they were admitted after evaluation and application of any transfer credit.
- **Transfer students holding an appropriate AAS degree:** Transfer students with an appropriate Associate of Applied Science (AAS) degree as defined previously under Admission Requirements may begin the program in the Junior year with up to 64 transfer credit hours awarded. Prerequisites for students holding an AAS degree

from a community or technical college are listed below.

Prerequisite Courses for AAS Transfers

Students transferring with an AAS degree must have satisfactorily completed the following subjects in their two-year program:

- English Composition, Technical Writing, and/or Public Speaking (3 credit hours)
- Precalculus (3 credit hours)
- General Physics (with lab) (4 credit hours)
- Additional Physics (with lab) or Geology (3-4 credit hours)
- Technical Courses in Major Area (up to 41 credit hours)
 - ET Computer Applications
 - Computer Aided Drafting
 - Construction Surveying
 - Statics
 - Strength of Materials
 - Construction Materials with Lab
 - Construction Methods
 - Hydraulics or hydrology or environmental technology
 - Building Information Modeling
 - Plan Reading and Quantity Takeoff

Remediation of Academic Entrance Requirements for AAS Transfer Students

In addition to University and College of Engineering requirements, an AAS transfer student who is admitted to any BSET program without meeting ALL published admission requirements is expected to remove all admission deficiencies within one year. Violators are subject to discontinuance and enrollment in Senior-level coursework is prohibited until all deficiencies are removed.

Common First-Year Curriculum (CFY)

The College of Engineering uses a Common First-Year Curriculum (CFY) for all Engineering students in order to:

- Provide a strong academic base of foundational knowledge and skills
- Facilitate changing majors within the first year
- Support students with lower math placement and increase access to all majors
- Allow students to explore different majors before committing
- Enhance learning with innovative pedagogies and activities

Common First-Year Courses

All new first year students are initially advised by a central office within the W.S. Lee College of Engineering. Students must complete the following classes that are common to all majors of the college (except Construction Management and Fire and Safety Engineering Technology) in order to progress and matriculate to their major department. *All First-Year Curriculum courses require a grade of C or better.*

ENGR 1300 Exploring Engineering & Technology with Success(2)

ENGR 1301 Foundations of Math and Science for Engineering(3)

ENGR 1302 Logic and Computational Problem Solving(3)

ENGR 1303 Engineering Visualization and Graphical Communication(3)

PHYS 2101(3)

PHYS 2101L(1)

Two MATH courses: MATH 1103* or MATH 1241* or MATH 1242* (3 each)

See Notes 1 and 2 below

* All students should consult their advisor to select the math courses that match their planned major.

Note 1

Progression into Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Mechanical Engineering, and Systems Engineering Major Courses after completing the Common First Year Curriculum requires that students also complete MATH 1241, MATH 1242, PHYS 2101, and PHYS 2101L.

Note 2

Progression into Civil Engineering Technology, Electromechanical Engineering Technology, and Mechanical Engineering Technology Major Courses after completing the Common First Year Curriculum requires that students complete MATH 1241, PHYS 2101, and PHYS 2101L with a C or better (except for Electromechanical Engineering Technology).

Note 3

Students must earn at least a 2.0 GPA in the first semester to continue into the second semester.

Degree Requirements

The BSET in Civil Engineering Technology with Concentration in Applied Energy and Sustainable Systems consists of 120 credit hours.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Mathematics and Science Foundation Courses (28 credit hours)

ETGR 2272 - Engineering Analysis II (3)
ETGR 3171 - Engineering Analysis III (3)
or ETGR 4272 - Engineering Analysis IV (3)
GEOL 1200 - Physical Geography (3)
MATH 1103 - Precalculus Mathematics for Science and Engineering (3)*
MATH 1121 - Calculus for Engineering Technology (3)*
PHYS 1101 - Introductory Physics I (3)*
PHYS 1101L - Introductory Physics I Lab (1)*
PHYS 1102 - Introductory Physics II (3)
STAT 1220 - Elements of Statistics I (BUSN) (3)

Math/Science Elective Course

Select one of the following:

CHEM 1251 - General Chemistry I (3)
CHEM 1252 - General Chemistry II (3)
GEOG 1103 - Spatial Thinking (4)
GEOG 1110 - Introduction to Urban and Regional Planning (3)
GEOG 2103 - Elements of GIScience and Technologies (4)
MATH 2164 - Matrices and Linear Algebra (3)
MATH 2342 - Data Analysis and Probability (3)

Major Courses (68 credit hours)

CMET 1680 - Professional Development I: Construction Safety (1)*
CMET 2105 - Plan Reading (3)
CMET 2135 - Building Information Modeling (BIM) (3)
CMET 2221 - Construction Means and Methods (3)

CMET 3123 - Cost Estimating (3)
CMET 3224 - Construction Project Administration (3)
CMET 3680 - Professional Development III: Professional Ethics (1)
ETCE 1104 - Civil/Construction CAD Applications (3)*
ETCE 1211 - Construction Surveying I (3)*
ETCE 1211L - Construction Surveying I Laboratory (1)*
ETCE 1222 - Construction Materials (3)*
ETCE 2163L - Construction Materials and Structures Lab (1)
ETCE 2410 - Introduction to Environmental Engineering Technology (3)
ETCE 3131 - Soil Mechanics and Earthwork (3)
ETCE 3131L - Soil Testing Laboratory (1)
ETCE 3242 - Hydraulics and Hydrology (3)
ETCE 3264 - Structural Analysis (3)
ETCE 4165 - Structural Steel Design (3)
ETCE 4251 - Highway Design and Construction (3)
ETCE 4266 - Reinforced Concrete Design (3)
ETCE 4272 - Capstone Project (3)
ETCE 4350 - Construction Geotechnics and Foundations (3)
ETGR 1100L - Engineering Technology Computer Applications Laboratory (1)*
ETGR 1101 - Introduction to Engineering Technology and Construction Management (1)*
ETGR 2101 - Applied Mechanics I (3)*
ETGR 2102 - Applied Mechanics II (3)
ETGR 3222 - Engineering Economics (3)
ETGR 3295 - Multidisciplinary Professional Development (1)

**Course must be completed with a grade of C or above.*

Concentration Courses (12 credit hours)

In addition to required courses ETCE 2410 and ETCE 3242, select two of the following:

AEEE 4140 - Energy Management (3)
AEEE 4250 - Analysis of Renewable Energy Systems (3)
ETCE 3271 - Building Systems (3)
SEGR 4961 - Introduction to Energy Systems (3)
SEGR 4962 - Energy Markets (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

F After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above

- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year Courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core

courses

Special Policies or Requirements

Acceptance of a completed AAS degree indicates the acceptance of up to 64 credit hours toward the Bachelor of Science in Engineering Technology degree program only. These hours may not be valid toward other degree programs at UNC Charlotte.

Residence Requirements

A student must earn the last 30 credit hours toward the BSET degree and the last 12 credit hours in the major at UNC Charlotte to satisfy residence requirements.

Experiential Learning Requirements

All students must complete an experiential learning course. Experiential courses are practice-oriented courses such as cooperative education, internships, senior design projects, or undergraduate research. Internships, or 49erships, involve paid or unpaid work in a career-related position for professional experience. A minimum of 80 work hours and 5 weeks for one semester is required to complete the program. Fall and Spring 49erships are part-time. Summer 49erships may be full- or part-time. Full-time students who are in good University standing, have completed 30 credit hours, and have a 2.0 minimum cumulative GPA are eligible. Internships do not offer academic credit, but are noted on the student's transcript; students pay a course registration fee. Approval for enrollment must be arranged before the student begins a work experience. Students may begin this program during their Sophomore year. Transfer students must complete 12 credit hours at UNC Charlotte before applying to the program. For more information, contact the College of Engineering Office of Student Development and Success or the University Career Center.

Electromechanical Engineering Technology

The Bachelor of Science in Electromechanical Engineering Technology (B.S.E.T.) is designed to equip students with the knowledge, skills, and expertise needed to thrive in the dynamic field of electromechanical systems. This interdisciplinary program integrates principles of both electrical and mechanical engineering, preparing students to work at the intersection of these two critical disciplines.

Graduates can expect technical and professional careers in areas such as instrumentation and control, manufacturing, robotics, automation, electrical power operations, energy, data acquisition, technical sales, or related field services.

The major program of study is arranged in a logical 6-semester sequence, with study moving from basic concepts through highly technical applied principles. A special focus is given to "learning while doing" with several courses held in advanced laboratories, and several professional courses are offered to assist in the development of managerial skills. Students also have direct access to a Master of Science degree in Applied Energy and Electromechanical Engineering (AEEE), with as little as one additional year of study.

All program-level Admissions and Progression Requirements are in addition to the University of North Carolina at Charlotte Admission Requirements.

BSET in Electromechanical Engineering Technology

The Bachelor of Science in Electromechanical Engineering Technology (B.S.E.T.) is designed to equip students with the knowledge, skills, and expertise needed to thrive in the dynamic field of electromechanical systems. This interdisciplinary program integrates principles of both electrical and mechanical engineering, preparing students to work at the intersection of these two critical disciplines.

Graduates can expect technical and professional careers in areas such as instrumentation and control, manufacturing, robotics, automation, electrical power operations, energy, data acquisition, technical sales, or related field services.

The major program of study is arranged in a logical 6-semester sequence, with study moving from basic concepts through highly technical applied principles. A special focus is given to "learning while doing" with several courses held in advanced laboratories, and several professional courses are offered to assist in the development of managerial skills. Students also have direct access to a Master of Science degree in Applied Energy and Electromechanical Engineering (AEEE), with as little as one additional year of study.

Admission Requirements

Students for this degree may enter degree programs in the Department of Engineering Technology and Construction Management as First-Year students or as transfer students.

First-Year Students

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)
- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above
 - Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Currently Enrolled Students

Current UNC Charlotte students who wish to change or declare their major to Electromechanical Engineering Technology must:

- Complete the College of Engineering Common First Year (or equivalent courses) in order to be considered eligible for admission. See **Common First-Year Courses** below.
- Achieve a GPA between 2.2 - 4.0.
- Pass all currently attempted required courses within three attempts including withdrawing from a course with a grade of W.

Upon satisfying all of the above requirements, students may request admission to an ETCM program by submitting the Change of Major form. Completion of the minimum requirements does not guarantee acceptance into a program.

Common First-Year Curriculum (CFY)

The College of Engineering uses a Common First-Year Curriculum (CFY) for all Engineering students in order to:

- Provide a strong academic base of foundational knowledge and skills
- Facilitate changing majors within the first year
- Support students with lower math placement and increase access to all majors
- Allow students to explore different majors before committing

- Enhance learning with innovative pedagogies and activities

Common First-Year Courses

All new first year students are initially advised by a central office within the W.S. Lee College of Engineering. Students must complete the following classes that are common to all majors of the college (except Construction Management and Fire and Safety Engineering Technology) in order to progress and matriculate to their major department. *All First-Year Curriculum courses require a grade of C or better.*

ENGR 1300 Exploring Engineering & Technology with Success (2)

ENGR 1301 Foundations of Math and Science for Engineering (3)

ENGR 1302 Logic and Computational Problem Solving (3)

ENGR 1303 Engineering Visualization and Graphical Communication (3)

PHYS 2101 (3)

PHYS 2101L (1)

Two MATH courses: MATH 1103* or MATH 1241* or MATH 1242* (3 each)

See Notes 1 and 2 below

* All students should consult their advisor to select the math courses that match their planned major.

Note 1

Progression into Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Mechanical Engineering, and Systems Engineering Major Courses after completing the Common First Year Curriculum requires that students also complete MATH 1241, MATH 1242, PHYS 2101, and PHYS 2101L.

Note 2

Progression into Civil Engineering Technology, Electromechanical Engineering Technology, and Mechanical Engineering Technology Major Courses after completing the Common First Year Curriculum requires that students complete MATH 1241, PHYS 2101, and PHYS 2101L with a C or better (except for Electromechanical Engineering Technology).

Note 3

Students must earn at least a 2.0 GPA in the first semester to continue into the second semester.

Degree Requirements

A major in Electromechanical Engineering Technology leading to the B.S.E.T. degree consists of a total of 120 credit hours. For details on progression, see the Progression Requirements section.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

First-Year Courses (21 credit hours)

See Common First-Year Curriculum (CFY) for details.

Additional Math Courses (3 credit hours)

MATH 1242 - Calculus II (3)

or ETGR 2272 - Engineering Analysis II (3)

Major Courses (25 credit hours)

ETEM 2101 - Circuit Fundamentals (3)

ETEM 2161 - Foundations of Mechanics (3)

ETEM 2171 - Algorithms and Programming (3)

ETEM 2181 - Circuits and Machines in Action (2)

ETEM 2271 - Digital Fundamentals (3)

ETEM 2281 - Doing and Making (3)

ETEM 2291 - Practical System Design (3)

ETEM 3101 - Principles of Control (3)

ETEM 3131 - Electromechanical Devices (3)

ETEM 3171 - Digital Devices (3)

ETEM 3181 - Exploring Devices (1)

ETEM 3191 - From Concept to Product (3)

ETEM 3231 - Power, Machines, and Energy (3)

ETEM 3261 - Applied Control Systems (3)

ETEM 3281 - More Doing and Making (3)

ETEM 4100 - Electromechanical Capstone Design I (2)

ETEM 4131 - Intelligent Industrial Systems (3)

ETEM 4141 - Digital Manufacturing Methods (3)

ETEM 4161 - Elements of Automation (3)

ETEM 4200 - Electromechanical Capstone Design II (2)

ETEM 4261 - Robotics and Cyber-Physical Systems (3)

ETEM 4600 - Technology Seminar (1)

ETGR 3295 - Multidisciplinary Professional Development (1)

ETME 2111 - CAD Fundamentals (3)

Restricted Elective Courses (12 credit hours)

From the following, choose four courses that are not already required in the curriculum:

AEEE 4xxx - AEEE 4000-level courses

ELET 4123 - Active Filters (3)

ELET 4133 - Embedded Systems (3)

ELET 4243 - Power Networks (3)

ETEM 3271 - Digital Signals (3)

ETEM 4000 - Special Topics in Electromechanical Engineering Technology (3)

ETEM 40xx - ETEM courses beginning with 40

ETEM 43xx - ETEM courses beginning with 43

ETGR 2101 - Applied Mechanics I (3)

ETGR 3000 - Special Topics in Engineering Technology (1 to 4)

ETGR 4272 - Engineering Analysis IV (3)

ETME xxxx - All ETME courses

MATH 2000-level courses

MATH 3000-level courses

MATH 4000-level courses

Other courses as approved by your advisor

Degree Total = 120 Credit Hours

Degree Requirements (2+2-Degree Completion Program)

A major in Electromechanical Engineering Technology leading to the B.S.E.T. degree consists of a total of 120 credit hours which may include up to 64 credit hours transferred in from North Carolina Community Colleges. 2+2 students are exempt from the General Education requirements. Students must have satisfactorily completed an applicable A.A.S. degree (see 2+2 Admission Requirements section).

2+2 Admission Requirements

Transfer admission into the 2+2 degree completion program requires transfer applicants hold an Associate of Applied Science (AAS) degree in a related field. Acceptable AAS degrees include Engineering Technology degrees of the following disciplines: Automation, Computer, Electrical, Electrical Systems, Electronics, Industrial Systems, and Mechatronics. A minimum GPA of 2.50 (out of 4.00) in the AAS degree is required.

It is recommended, but not required, that students requesting entry into the 2+2 program have completed all equivalent Math, Physics, and Lower-Level Major courses before entry into the program. Any required courses not completed at an NCCC can be completed at Charlotte after entry into the 2+2 program.

Transferring Courses from NCCC (64 credit hours)

General Education Requirements (31-32 credit hours)

Students enrolled in a 2+2 Program are exempted from General Education requirements.

Math and Physics Courses (13 credit hours)

MATH 1103 - Precalculus Mathematics for Science and Engineering (3)

MATH 1241 - Calculus I (3)

MATH 1242 - Calculus II (3)

or ETGR 2272 - Engineering Analysis II (3)

PHYS 1101 - Introductory Physics I (3)

or PHYS 2101 - Physics for Science and Engineering I (3)

PHYS 1101L - Introductory Physics I Laboratory (1)

or PHYS 2101L - Physics for Science and Engineering I Laboratory (1)

Lower-Level Major Courses (15 credit hours)

ETEM 2101 - Circuit Fundamentals (3)

ETEM 2161 - Foundations of Mechanics (3)

ETEM 2171 - Algorithms and Programming (3)

ETEM 2271 - Digital Fundamentals (3)

ETME 2111 - CAD Fundamentals (3)

Resident Courses

Major Courses (43 credit hours)

ETEM 2291 - Practical System Design (3)

ETEM 3101 - Principles of Control (3)

ETEM 3131 - Electromechanical Devices (3)

ETEM 3171 - Digital Devices (3)

ETEM 3181 - Exploring Devices (1)

ETEM 3191 - From Concept to Product (3)

ETEM 3231 - Power, Machines, and Energy (3)

ETEM 3261 - Applied Control Systems (3)

ETEM 3281 - More Doing and Making (3)

ETEM 4100 - Electromechanical Capstone Design I (2)

ETEM 4131 - Intelligent Industrial Systems (3)

ETEM 4141 - Digital Manufacturing Methods (3)

ETEM 4161 - Elements of Automation (3)

ETEM 4200 - Electromechanical Capstone Design II (2)

ETEM 4261 - Robotics and Cyber-Physical Systems (3)

ETEM 4600 - Technology Seminar (1)

ETGR 3295 - Multidisciplinary Professional Development (1)

Restricted Elective Courses (12 credit hours)

From the following, choose four courses that are not already required in the curriculum:

AEEE 4xxx - AEEE 4000-level courses

ETEL 43xx - ETEL 4300-level courses

ELET 4123 - Active Filters (3)

ELET 4133 - Embedded Systems (3)

ELET 4243 - Power Networks (3)

ETEM 40xx - ETEM courses beginning with 40

ETGR 3000 - Special Topics in Engineering Technology (1 to 4)

ETGR 4272 - Engineering Analysis IV (3)

ETME xxxx - All ETME courses

MATH 2000-level courses

MATH 3000-level courses

MATH 4000-level courses

Other courses as approved by your advisor

Degree Total = 120 Credit Hours

Progression Requirements

First-Year Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum including MATH 1241 with grade of C or above and PHYS

2101 and PHYS 2101L

- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Special Policies or Requirements

Acceptance of a completed AAS degree indicates the acceptance of up to 64 credit hours toward the Bachelor of Science in Engineering Technology degree program only. These hours may not be valid toward other degree programs at UNC Charlotte.

BSET in Electromechanical Engineering Technology *with Concentration in Applied Energy*

A Concentration in Applied Energy is available to BSET in Electromechanical Engineering Technology students.

Admission Requirements

Students for this degree may enter degree programs in the Department of Engineering Technology and Construction Management as First-Year students or as transfer students.

First-Year Students

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)
- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above
 - Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Currently Enrolled Students

Current UNC Charlotte students who wish to change or declare their major to Electromechanical Engineering Technology must:

- Complete the College of Engineering Common First Year (or equivalent courses) in order to be considered eligible for admission. See **Common First-Year Courses** below.
- Achieve a GPA between 2.2 - 4.0.
- Pass all currently attempted required courses within three attempts including withdrawing from a course with a grade of W.

Upon satisfying all of the above requirements, students may request admission to an ETCM program by submitting the Change of Major form. Completion of the minimum requirements does not guarantee acceptance into a program.

Common First-Year Curriculum

The College of Engineering uses a Common First-Year Curriculum (CFY) for all Engineering students in order to:

- Provide a strong academic base of foundational knowledge and skills

- Facilitate changing majors within the first year
- Support students with lower math placement and increase access to all majors
- Allow students to explore different majors before committing
- Enhance learning with innovative pedagogies and activities

Common First-Year Courses

All new first year students are initially advised by a central office within the W.S. Lee College of Engineering. Students must complete the following classes that are common to all majors of the college (except Construction Management and Fire and Safety Engineering Technology) in order to progress and matriculate to their major department. *All First-Year Curriculum courses require a grade of C or better.*

ENGR 1300 Exploring Engineering & Technology with Success (2)

ETGR 3000 - Special Topics in Engineering Technology(1 to 4)
ETGR 4272 - Engineering Analysis IV(3)
MATH 2000-level courses
MATH 3000-level courses
MATH 4000-level courses
Other courses as approved by your advisor

Degree Total = 120 Credit Hours

Progression Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First

Year courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Special Policies or Requirements

Acceptance of a completed AAS degree indicates the acceptance of up to 64 credit hours toward the Bachelor of Science in Engineering Technology degree program only. These hours may not be valid toward other degree programs at UNC Charlotte.

Fire and Safety Engineering Technology

The Fire and Safety Engineering Technology (FSET) program at UNC Charlotte prepares graduates of the BSET program for careers across a broad spectrum of technologies. The program has emphasis on both technical and non-technical aspects in the fields of fire and safety.

Concentrations within the program include Fire Safety and Occupational Safety. Many of the lower division courses are common between the concentrations, while the upper division allows specialization within the chosen concentration area.

BSET in Fire and Safety Engineering Technology *with Concentration in Fire Safety*

The Concentration in Fire Safety is intended for students who seek a career within the fire service. The curriculum is designed to prepare students for increasingly responsible roles in leadership and management. In addition, the program provides comprehensive classes dealing with fire behavior, active and passive protection systems as well as the foundational principles of research investigation. Students completing the requirements identified for this concentration will receive a special designation on their transcripts showing they have completed the Fire Safety concentration.

Admission Requirements

Students for this degree may enter degree programs in the Department of Engineering Technology and Construction Management as First-Year students or as transfer students.

First-Year Students

Applicants entering as First-Year students must meet the general University admission requirements. See University Admission Requirements.

Transfers

See University Admission Requirements.

Transfer admission into the department occurs in one of two situations:

1. Transfer applicants who do not have the Associate in Applied Science (AAS) degree or its equivalent must meet general University admission requirements.
2. Transfer applicants with an Associate of Applied Science (AAS) degree must:
 - Hold an Associate of Applied Science (AAS) degree in a field appropriate to the option they plan to enter. Acceptable AAS degrees may include: Fire Protection, Fire Science, or similar title with curriculum acceptable to the department. A minimum GPA of 2.50 (out of 4.00) in the AAS degree is required.
 - Have completed satisfactorily the prerequisite background courses for the option they plan to enter. Missing background courses may be taken at UNC Charlotte.

Currently Enrolled Students

Current UNC Charlotte students who wish to change or declare their major to Fire and Safety Engineering Technology must first satisfy the following requirements in order to be considered eligible for admission:

- Complete MATH 1100 or higher with a grade of C or better.
- Achieve a GPA between 2.2 - 4.0.
- Pass all currently attempted required courses within three attempts including withdrawing from a course with a grade of W.
- Students currently enrolled in a required course for a second time must wait until grades are posted before declaring an ETCM major. A student will not be admitted to the major unless the course is passed within three attempts.
- Complete at least one ETFS course from the curriculum courses listed below.

- ETFS 1120 Introduction to Fire Protection
- ETFS 1152 Fire Protection Law
- ETFS 2124 Introduction to Fire Prevention
- ETFS 2132 Building Construction for the Fire Service
- ETFS 2256 Fire Service Community Relations

Upon satisfying all of the above requirements, students may request admission to an ETCM program by submitting the Change of Major form. Completion of the minimum requirements does not guarantee acceptance into a program.

Course Requirements

Course requirements correspond to the mode of admission for each student as outlined hereafter. All ETFS courses require a grade of C or better. Other courses required may also have this requirement since they may serve as a prerequisite.

- **Entering First-Year Students:** Students admitted as First-Year students complete the appropriate four-year curriculum for the program into which they were admitted.
- **Transfer students not holding an appropriate AAS degree:** Transfer students not holding an appropriate AAS degree must complete the remaining coursework outlined for the respective four-year curriculum into which they were admitted after evaluation and application of any transfer credit.
- **Transfer students holding an appropriate AAS degree:** Transfer students with an appropriate Associate of Applied Science (AAS) in Fire Protection degree may begin the program in the Junior year with up to 64 transfer credit hours awarded. Prerequisites for students holding an AAS degree from a community or technical college are listed below.

Prerequisite Courses for AAS Transfers

Students transferring with an AAS degree must have satisfactorily completed the following subjects in their two-year program:

- College Algebra (3 credit hours) or higher
- STAT 1220 (3 credit hours) equivalent
- Approved transfer science with lab (4 hours) PHYS 1101 with lab equivalent
- Approved transfer science course (3 credit hours) Chemistry 12xx equivalent
- Introduction to Fire Prevention (3 hours)
- Introduction to Fire Protection (3 hours)
- Building Construction or equivalent (3 hours)
- Fire Protection and Safety Law (3 hours)
- Fire and Municipal Financial Ops (3 hours)
- Computer-Aided Drafting (3 hours) or equivalent

Remediation of Academic Entrance Requirements for AAS Transfer Students

In addition to University and College of Engineering requirements, an AAS transfer student who is admitted to any BSET program without meeting ALL published admission requirements is expected to remove all admission deficiencies within one year. Violators are subject to discontinuance and enrollment in Senior-level coursework is prohibited until all deficiencies are removed.

Degree Requirements (4-Year Program)

The BSET in Fire and Safety Engineering Technology with a Concentration in Fire Safety program consists of 120 credit hours.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Mathematics and Science Foundation Courses (13 credit hours)

CHEM 12XX - Chemistry (3)
MATH 1100 - College Algebra (3)
STAT 1220 - Elements of Statistics I (BUSN) (3)
PHYS 1101 - Introductory Physics I (3)
PHYS 1101L - Introductory Physics I Laboratory (1)

Major Courses (80 credit hours)

ETFS 1120 - Introduction to Fire Protection (3)
ETFS 1152 - Fire Protection and Safety Law (3)
ETFS 1201 - Introduction to Fire Safety and Occupational Safety Engineering Technology (2)
ETFS 1244 - Water-Based Fire Suppression (3)
ETFS 2124 - Introduction to Fire Prevention (3)
ETFS 2126 - Fire Investigation and Forensics (3)
ETFS 2128 - Fire and Municipal Financial Operations (3)
ETFS 2132 - Building Construction for Fire Protection (3)
ETFS 2220 - History of Fire in the US (3)
ETFS 2230L - Hazardous Materials Lab (1)
ETFS 2230 - Hazardous Materials (3)
ETFS 2256 - Fire Service Community Relations (3)
ETFS 3103 - Fire Behavior (3)
ETFS 3103L - Fire Behavior Lab (1)
ETFS 3123 - Industrial Hazards and Electricity (3)
ETFS 3124 - Risk Management (3)
ETFS 3141 - Fire Safety in Constructed Facilities (3)
ETFS 3144 - Active Fire Protection (3)
ETFS 3695 - Fire Safety Prof. Development Seminar (1)
ETFS 4123 - Community Threat Assessment and Mitigation (3)
ETFS 4272 - Fire and Safety Capstone (3)
ETFS 4280 - Wildland Fire in America (3)
ETFS 4323 - Advanced Fire Service Administration (3)
ETFS 4901 - Fire Safety Research & Data Analysis (3)
ETGR 1103 - Technical Drawing I (3)
ETGR 2230 - Occupational Safety (3)
ETGR 4301 - Environmental Pollution Control (3)
PSYC 1101 - General Psychology (3)
PSYC 2320 - Introduction to Industrial/Organizational Psychology (3)

Restricted Elective Courses (9 credit hours)

Select three 2000, 3000- or 4000-level courses within the Department of Engineering Technology and Construction Management with a minimum of 9 credit hours that are not already required for the major.
Select from the following:

CMET 2105 - Plan Reading (2)
CMET 2105L - Plan Reading Lab (1)
CMET 2221 - Construction Means and Methods (3)
ENGR 2800 - College of Engineering Ambassadors' Leadership Development (1 to 3)
ENGR 3095 - Leadership Academy Capstone (0)
ENGR 3790 - Engineering Honors Seminar I (1)
ENGR 3791 - Engineering Honors Seminar II (1)
ETCE 1222 - Construction Materials (3)
ETCE 2112L - Constructions Surveying and Layout Laboratory (0)
ETCE 2163L - Construction Materials and Structures Lab (1)
ETCE 3163 - Structural Analysis and Design I (3)
ETCE 3163L - Structures and Materials Laboratory (1)
ETCE 3242 - Hydraulics and Hydrology (3)
ETCE 3242L - Hydraulics Laboratory (1)
ETCE 3264 - Structural Analysis (3)
ETCE 3271 - Building Systems (3)
ETCE 3271L - Building Systems Laboratory (1)
ETCE 4266 - Reinforced Concrete Design (3)
ETEM 2101 - Circuit Fundamentals (3)
ETEM 2161 - Foundations of Mechanics (3)
ETEM 2171 - Algorithms and Programming (3)
ETEM 2271 - Digital Fundamentals (3)
ETEM 3131 - Electromechanical Devices (3)
ETFS 3183 - Fire Safety Engineering Problem Analysis (3)
ETFS 3400 - Fire Safety/Occupational Safety Practicum (1 to 4)
ETFS 3621 - Technology and Innovation in the Fire Service (3)
ETFS 3800 - Independent Study (1 to 3)
ETFS 4123 - Community Threat Assessment and Mitigation (3)
ETFS 4126 - Case Studies in Fire Forensics (1)
ETFS 4132 - Fireground Hydraulics (3)
ETFS 4283 - Fire Modeling (3)
ETFS 4285 - Fatalities in Wildland Fires (3)
ETGR 2101 - Applied Mechanics I (3)
ETGR 2102 - Applied Mechanics II (3)
ETGR 2106 - Electronic Circuits and Devices (3)
ETGR 3222 - Engineering Economics (3)
ETGR 4302 - Industrial Hygiene (3)
ETGR 4303 - Applied Ergonomics and Human Factors (3)
ETGR 4305 - System Safety Design and Management (3)
ETME 3113 - Dynamics (3)
ETME 3123 - Strength of Materials (3)
ETME 3123L - Stress Analysis Laboratory (1)
ETME 3133 - Fluid Mechanics (3)
ETME 3143 - Thermodynamics (3)
ETME 3250 - Principles of Thermal Engineering (3)
ETME 4244 - Applied Heat Transfer (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 credit hours

Degree Requirements (2+2-Year Program)

The BSET in Fire and Safety Engineering Technology with a Concentration in Fire Safety program consists of 120 credit hours.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

A.A.S. Degree (64 credit hours)

A.A.S. transfer students from approved programs receive up to 64 credit hours for the A.A.S. degree; thus, A.A.S. students need only to complete the upper-division portion of the courses listed below and remediate any entrance deficiencies noted upon matriculation.

Major Courses (48 credit hours)

ETFS 2220 - History of Fire in the US (3)

ETFS 2230 - Hazardous Materials (3)

ETFS 2230L - Hazardous Materials Lab (1)

ETFS 3103 - Fire Behavior (3)

ETFS 3103L - Fire Behavior Lab (1)

ETFS 3123 - Industrial Hazards and Electricity (3)

ETFS 3124 - Risk Management (3)

ETFS 3141 - Fire Safety in Constructed Facilities (3)

ETFS 3144 - Active Fire Protection (3)

ETFS 3695 - Fire Safety Prof. Development Seminar (1)

ETFS 4123 - Community Threat Assessment and Mitigation (3)

ETFS 4272 - Fire and Safety Capstone (3)

ETFS 4280 - Wildland Fire in America (3)

ETFS 4323 - Advanced Fire Service Administration (3)

ETFS 4901 - Fire Safety Research & Data Analysis (3)

ETGR 2230 - Occupational Safety (3)

ETGR 4301 - Environmental Pollution Control (3)

PSYC 2320 - Introduction to Industrial/Organizational Psychology (3)

Restricted Elective Courses (9 credit hours)

Select three 2000, 3000- or 4000-level courses within the Department of Engineering Technology and Construction Management with a minimum of 9 credit hours that are not already required for the major.

Select from the following:

CMET 2105 - Plan Reading (2)

CMET 2105L - Plan Reading Lab (1)

CMET 2175 - Survey of Structures (3)

CMET 2221 - Construction Means and Methods (3)

ENGR 2800 - College of Engineering Ambassadors' Leadership Development (1 to 3)

ENGR 3095 - Leadership Academy Capstone (0)

ENGR 3790 - Engineering Honors Seminar I (1)

ENGR 3791 - Engineering Honors Seminar II (1)

ETCE 1222 - Construction Materials (3)

ETCE 2163L - Construction Materials and Structures Lab (1)

ETCE 3163 - Structural Analysis and Design I (3)

ETCE 3163L - Structures and Materials Laboratory (1)

ETCE 3242 - Hydraulics and Hydrology (3)

ETCE 3242L - Hydraulics Laboratory (1)

ETCE 3264 - Structural Analysis (3)

ETCE 3271 - Building Systems (3)

ETCE 3271L - Building Systems Laboratory (1)

ETCE 4266 - Reinforced Concrete Design (3)

ETEM 2101 - Circuit Fundamentals (3)

ETEM 2161 - Foundations of Mechanics (3)

ETEM 2171 - Algorithms and Programming (3)

ETEM 2271 - Digital Fundamentals (3)

ETEM 3131 - Electromechanical Devices (3)

ETFS 3183 - Fire Safety Engineering Problem Analysis (3)

ETFS 3400 - Fire Safety/Occupational Safety Practicum (1 to 4)

ETFS 3621 - Technology and Innovation in the Fire Service (3)

ETFS 3800 - Independent Study (1 to 3)

ETFS 4123 - Community Threat Assessment and Mitigation (3)

ETFS 4126 - Case Studies in Fire Forensics (1)

ETFS 4132 - Fireground Hydraulics (3)

ETFS 4283 - Fire Modeling (3)

ETFS 4285 - Fatalities in Wildland Fires (3)

ETGR 2101 - Applied Mechanics I (3)

ETGR 2102 - Applied Mechanics II (3)

ETGR 2106 - Electronic Circuits and Devices (3)

ETGR 3222 - Engineering Economics (3)

ETGR 4302 - Industrial Hygiene (3)

ETGR 4303 - Applied Ergonomics and Human Factors (3)

ETGR 4305 - System Safety Design and Management (3)

ETME 3113 - Dynamics (3)

ETME 3123 - Strength of Materials (3)

ETME 3123L - Stress Analysis Laboratory (1)

ETME 3133 - Fluid Mechanics (3)

ETME 3143 - Thermodynamics (3)

ETME 3250 - Principles of Thermal Engineering (3)

ETME 4244 - Applied Heat Transfer (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 credit hours

Progression Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W

- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year Courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Special Policies or Requirements

Acceptance of a completed AAS degree indicates the acceptance of up to 64 credit hours toward the Bachelor of Science in Engineering Technology degree program only. These hours may not be valid toward other degree programs at UNC Charlotte.

Residence Requirements

A student must earn the last 30 credit hours toward the BSET degree and the last 12 credit hours in the major at UNC Charlotte to satisfy residence requirements.

Experiential Learning Requirements

All students must complete an experiential learning course. Experiential courses are practice-oriented courses such as cooperative education, internships, Senior design projects, or undergraduate research.

Internships, or 49erships, involve paid or unpaid work in a career-related position for professional experience. A minimum of 80 work hours and 5 weeks for one semester is required to complete the program. Fall and Spring 49erships are part-time. Summer 49erships may be full- or part-time. Full-time students who are in good University standing, have completed 30 credit hours, and have a 2.00 minimum cumulative GPA are eligible. Internships do not offer academic credit, but are noted on the student's transcript; students pay a course registration fee. Approval for enrollment must be arranged before the student begins a work experience. Students may begin this program during their Sophomore year. Transfer students must complete 12 credit hours at UNC Charlotte before applying to the program. For more information, contact the College of Engineering Office of Student Development and Success or the University Career Center.

BSET in Fire and Safety Engineering Technology *with Concentration in Occupational Safety*

Occupational safety is a career path where professionals recognize, evaluate, and control workplace hazards, which exist in almost every industry. Building on a strong background in the life and physical sciences, students learn about fire prevention/protection, environmental pollution control, industrial hazards, industrial hygiene (industrial health), and ergonomics in this multi-disciplinary program. An experiential capstone experience (internship, co-op, or a supervised directed project) is required. Students completing the requirements identified for this concentration will receive a special designation on their transcripts showing they have completed the Occupational Safety concentration.

Admission Requirements

Students for this degree may enter degree programs in the Department of Engineering Technology and Construction Management as First-Year students or as transfer students.

First-Year Students

Applicants entering as First-Year students must meet the general University admission requirements. See University Admission Requirements.

Transfers

See University Admission Requirements.

Transfer admission into the department occurs in one of two situations:

1. Transfer applicants who do not have the Associate in Applied Science (AAS) degree or its equivalent must meet general

- University admission requirements.
2. Transfer applicants with an Associate of Applied Science (AAS) degree must:
 - Hold an Associate of Applied Science (AAS) degree in a field appropriate to the option they plan to enter. Acceptable AAS degrees may include: Fire Protection, Fire Science, or similar title with curriculum acceptable to the department. A minimum GPA of 2.50 (out of 4.00) in the AAS degree is required.

Have completed satisfactorily the prerequisite background courses for the option they plan to enter. Missing background courses may be taken at UNC Charlotte.

Currently Enrolled Students

Current UNC Charlotte students who wish to change or declare their major to Occupational Safety must first satisfy the following requirements in order to be considered eligible for admission:

- Complete MATH 1103 or higher with a grade of C or better.
- Achieve a GPA between 2.2 - 4.0.
- Pass all currently attempted required courses within three attempts including withdrawing from a course with a grade of W.
- Students currently enrolled in a required course for a second time must wait until grades are posted before declaring an ETCM major. A student will not be admitted to the major unless the course is passed within three attempts.
- Complete at least one of the following Occupational Safety courses in the curriculum ETGR 2230, ETFS 2230 or ETFS 3123. Other courses may be approved by the Program Director and the Academic Advisor on a case-by-case basis.

Upon satisfying all of the above requirements, students may request admission by submitting the Change of Major form. Completion of the minimum requirements does not guarantee acceptance into a program.

Course Requirements

Course requirements correspond to the mode of admission for each student as outlined hereafter. All ETFS courses require a grade of C or better. Other courses required may also have this requirement since they may serve as a prerequisite.

- **Entering First-Year Students:** Students admitted as First-Year students complete the appropriate four-year curriculum for the program into which they were admitted.
- **Transfer students not holding an appropriate AAS degree:** Transfer students not holding an appropriate AAS degree must complete the remaining coursework outlined for the respective four-year curriculum into which they were admitted after evaluation and application of any transfer credit.
- **Transfer students holding an appropriate AAS degree:** Transfer students with an appropriate Associate of Applied Science (AAS) degree as defined previously under Admission Requirements may begin the program in the Junior year with up to 64 transfer credit hours awarded. Prerequisites for students holding an AAS degree from a community or technical college are listed below.

Prerequisite Courses for AAS Transfers

Students transferring with an AAS degree must have satisfactorily

completed the following subjects in their two-year program:

- English Composition, Technical Writing, and/or Public Speaking (3 credit hours)
- Precalculus (3 credit hours)
- Physics with lab (4 credit hours)
- Chemistry with Lab (4 credit hours)
- Principles of Biology (3 credit hours)
- Human Anatomy and Physiology (3 credit hours)
- Earth Science with lab (4 credit hours)
- Environmental Science (3 credit hours)
- Intro to Psychology (3 credit hours)
- Technical Courses in Major Area as listed below (up to 30 credit hours)
 - Introduction to Fire Protection and Prevention
 - Introduction to Fire Behavior
 - Hazardous Materials
 - Occupational Safety
 - Construction Safety
 - Computer-Aided Drafting
 - Electronic Circuits/DC Circuits
 - Fire and Municipal Financial Ops
 - Industrial/Organizational Psychology
 - Statistics

Remediation of Academic Entrance Requirements for AAS Transfer Students

In addition to University and College of Engineering requirements, an AAS transfer student who is admitted to any BSET program without meeting ALL published admission requirements is expected to remove all admission deficiencies within one year. Violators are subject to discontinuance and enrollment in Senior-level coursework is prohibited until all deficiencies are removed.

Degree Requirements (4-Year Program)

The BSET in Fire and Safety Engineering Technology with a Concentration in Occupational Safety program consists of 120 credit hours.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. For example, 13 credit hours of math/science coursework counts as both general education under the major's Math/Science requirements. Please see your advisor for information.

Mathematics and Science Foundation Courses (30 credit hours)

Foundational Math/Science coursework prepares students for coursework in the major and must be completed before taking upper level courses.

BIOL 1110 - Principles of Biology I (3)

BIOL 2273 - Human Anatomy and Physiology (3)
or EXER 2168 - Human Anatomy and Physiology for the Health Professions (3)

CHEM 1251- General Chemistry I(3)
CHEM 1251L- General Chemistry I Laboratory(1)
ESCI 1101- Earth Sciences-Geography(3)
ESCI 1101L- Earth Sciences-Geography Laboratory(1)
ESCI 2222- Environmental Science(3)
MATH 1103- Precalculus Mathematics for Science and Engineering(3)
PHYS 1101- Introductory Physics I(3)
PHYS 1101L- Introductory Physics I Laboratory(1)
PSYC 1101- General Psychology(3)
STAT 122x - Statistics (Choice of STAT 1220, STAT 1221, or STAT 1222)

Engineering/Engineering Technology Requirements (9 credit hours)

The following courses are college/department requirements:

ETEM 2101-Circuit Fundamentals(3)
ETGR 1103 - Technical Drawing I(3)
ETGR 3222 - Engineering Economics(3)

Occupational Safety and Fire Safety Courses (51 credit hours)

The following courses primarily represent the occupational safety field, with supporting coursework from fire safety, organizational psychology, and risk management.

CMET 1680-Professional Development I: Construction Safety(1)
ETFS 1201-Introduction to Fire Safety and Occupational Safety
Engineering Technology(2)
ETFS 2124-Introduction to Fire Prevention(3)
ETFS 2230-Hazardous Materials(3)
ETFS 3103-Fire Behavior(3)
ETFS 3103L-Fire Behavior Lab(1)
ETFS 3123-Industrial Hazards and Electricity(3)
ETFS 3141-Fire Safety in Constructed Facilities(3)
ETFS 3144-Active Fire Protection(3)
ETFS 3150-Adult Learning Theory in Safety(1)
ETFS 3695-Fire Safety Prof. Development Seminar(1)
ETFS 4123-Community Threat Assessment and Mitigation(3)
ETFS 4272-Fire and Safety Capstone(3)
ETGR 2230-Occupational Safety(3)
ETGR 4301-Environmental Pollution Control(3)
ETGR 4302-Industrial Hygiene(3)
ETGR 4303-Applied Ergonomics and Human Factors(3)
ETGR 4305-System Safety Design and Management(3)
FINN 3271-Principles of Risk Management and Insurance(3)
PSYC 2320-Introduction to Industrial/Organizational Psychology(3)

Directed Electives – Environmental Focus (3 credit hours)

Choose 3 credit hours from the following environmentally-focused courses:

CEGR 3141 - Introduction to Environmental Engineering(3)
CEGR 3155 - Environmental Laboratory(2)
ESCI 3170 - Environmental Quality Management(3)
ESCI 3205 - Water Resources(3)
ESCI 3220 - Air Quality(3)
ETCE 2410 - Introduction to Environmental Engineering Technology(3)
GEOG 3180 - Hazards and Disasters(3)
GEOG 3215 - Environmental Planning(3)
GEOG 4110 - GIS for Non-Majors(3)

Directed Electives – Social Science/Health Focus (3 credit hours)

Choose 3 credit hours from the list of courses below from psychosocial and health sciences:

EXER 2290 - Emergency Medical Response(3) *
HLTH 2102 - Foundations of Public Health(3)
PSYC 2160 - Introduction to Health Psychology(3)
PSYC 3001 - Topics in Psychology(1 to 3)
PSYC 3125 - Older Worker and Retirement(3)
SOCY 4112 - Sociology of Work(3)
SOCY 4168 - Sociology of Mental Health and Illness(3)
SPAN 1101 - Elementary Spanish I(3)

*Note: EXER 2290 may only be available to non-majors during the Summer term or as seats for non-majors become available.

Restricted Elective Courses (6 credit hours)

Select two 3000- or 4000-level courses from the ETFS Program or ETCM Department with a minimum of 6 credit hours that are not already required for the major. *Select from the following:*

CMET 3xxx or 4xxx
ETCE 3xxx or 4xxx
ETEM 3xxx or 4xxx
ETFS 3xxx or 4xxx
ETFS 3400-Fire Safety/Occupational Safety Practicum(1 to 4)
ETFS 3800-Independent Study(1 to 3)
ETFS 4243-Research Methodology for Fire Safety and Occupational Safety(3)
ETFS 4280-Wildland Fire in America(3)
ETFS 4285-Fatalities in Wildland Fires(3)
ETFS 4901-Fire Safety Research & Data Analysis(3)
ETGR 3xxx or 4xxx
ETME 3xxx or 4xxx
Additional courses from Environmental or Social Science Directed Electives above or Elective approved by advisor

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Degree Requirements (2+2-Year Program)

The BSET in Fire and Safety Engineering Technology with a Concentration in Occupational Safety program consists of 120 credit hours.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

AAS Degree (60 credit hours)

A.A.S. transfer students from approved programs may receive up to 60 credit hours for the A.A.S. degree; thus, A.A.S. students need only to complete the upper-division portion of the courses listed below and remediate any entrance deficiencies noted upon matriculation.

General Education Courses

For details on required courses, refer to the General Education Program.

Mathematics, Science, and Engineering Foundation Courses

If not taken as part of the AAS degree, transfer students may need to take one or more of the following courses, which act as pre-requisite courses for upper level courses and provide a general math/science background.

BIOL 1110-Principles of Biology I(3)

BIOL 2273-Human Anatomy and Physiology(3)

or EXER 2168-Human Anatomy and Physiology for the Health Professions(3)

CHEM 1251-General Chemistry I(3)

CHEM 1251L -General Chemistry I Laboratory(1)

ESCI 1101-Earth Sciences-Geography(3)

ESCI 1101L-Earth Sciences-Geography Laboratory(1)

ESCI 2222 -Environmental Science(3)

ETEM 2101-Circuit Fundamentals(3)

ETFS 2124-Introduction to Fire Prevention(3)

ETFS 2230-Hazardous Materials(3)

ETGR 1103-Technical Drawing I(3)

MATH 1103-Precalculus Mathematics for Science and Engineering(3)

PHYS 1101-Introductory Physics I(3)

PHYS 1101L-Introductory Physics I Laboratory(1)

PSYC 1101-General Psychology(3)

STAT 122x - Statistics (Choice of STAT 1220, STAT 1221, or STAT 1222)

Major Courses in Occupational Safety (48 credit hours)

The following courses primarily represent the occupational safety field, with supporting coursework from fire safety, organizational psychology, and risk management.

CMET 1680-Professional Development I: Construction Safety(1)

ETFS 3103-Fire Behavior(3)

ETFS 3103L-Fire Behavior Lab(1)

ETFS 3123-Industrial Hazards and Electricity(3)

ETFS 3144 -Active Fire Protection(3)

ETFS 3150 -Adult Learning Theory in Safety(1)

ETFS 4123 -Community Threat Assessment and Mitigation(3)

ETFS 4272 -Fire and Safety Capstone(3)

ETGR 3222-Engineering Economics(3)

ETGR 4301-Environmental Pollution Control(3)

ETGR 4302-Industrial Hygiene(3)

ETGR 4303-Applied Ergonomics and Human Factors(3)

ETGR 4305-System Safety Design and Management(3)

FINN 3271-Principles of Risk Management and Insurance(3)

ETFS 1201-Introduction to Fire Safety and Occupational Safety

Engineering Technology(2)

ETFS 3141-Fire Safety in Constructed Facilities(3)

ETFS 3695-Fire Safety Prof. Development Seminar(1)

ETGR 2230-Occupational Safety(3)

PSYC 2320-Introduction to Industrial/Organizational Psychology(3)

Directed Electives – Environmental Focus (3 credit hours)

Choose 3 credit hours from the following environmentally-focused courses:

CEGR 3141 - Introduction to Environmental Engineering(3)

CEGR 3155 - Environmental Laboratory(2)

ESCI 3170 - Environmental Quality Management(3)

ESCI 3205 - Water Resources(3)

ESCI 3220 - Air Quality(3)

ETCE 2410 - Introduction to Environmental Engineering Technology(3)

GEOG 3180 - Hazards and Disasters(3)

GEOG 3215 - Environmental Planning(3)

GEOG 4110 - GIS for Non-Majors(3)

Directed Electives – Social Science/Health Focus (3 credit hours)

Choose 3 credit hours from the list of courses below from psychosocial and health sciences:

EXER 2290 - Emergency Medical Response(3) *

HLTH 2102 - Foundations of Public Health(3)

PSYC 2160 - Introduction to Health Psychology(3)

PSYC 3001 - Topics in Psychology(1 to 3)

PSYC 3125 - Older Worker and Retirement(3)

SOCY 4112 - Sociology of Work(3)

SOCY 4168 - Sociology of Mental Health and Illness(3)

SPAN 1101 - Elementary Spanish I(3)

*Note: EXER 2290 may only be available to non-majors during the Summer term or as seats for non-majors become available.

Restricted Elective Courses (6 credit hours)

Select two 3000- or 4000-level courses from the ETCM Department with a minimum of 6 credit hours that are not already required for the major. *Select from the following:*

CMET 3xxx or 4xxx

ETCE 3xxx or 4xxx

ETEM 3xxx or 4xxx

ETFS 3xxx or 4xxx

ETFS 3400 -Fire Safety/Occupational Safety Practicum(1 to 4)

ETFS 3800 -Independent Study(1 to 3)

ETFS 4243 -Research Methodology for Fire Safety and Occupational Safety(3)

ETFS 4280 -Wildland Fire in America(3)

ETFS 4285 -Fatalities in Wildland Fires(3)

ETFS 4901 -Fire Safety Research & Data Analysis(3)

ETGR 3xxx or 4xxx

ETME 3xxx or 4xxx

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum,

- including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year Courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters

- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Special Policies or Requirements

Acceptance of a completed AAS degree indicates the acceptance of up to 64 credit hours toward the Bachelor of Science in Engineering Technology degree program only. These hours may not be valid toward other degree programs at UNC Charlotte.

Residence Requirements

A student must earn the last 30 credit hours toward the BSET degree and the last 12 credit hours in the major at UNC Charlotte to satisfy residence requirements.

Experiential Learning Requirements

All students must complete an experiential learning course. Experiential courses are practice-oriented courses such as cooperative education, internships, Senior design projects, or undergraduate research.

Internships, or 49erships, involve paid or unpaid work in a career-related position for professional experience. A minimum of 80 work hours and 5 weeks for one semester is required to complete the program. Fall and Spring 49erships are part-time. Summer 49erships may be full- or part-time. Full-time students who are in good University standing, have completed 30 credit hours, and have a 2.00 minimum cumulative GPA are eligible. Internships do not offer academic credit, but are noted on the student's transcript; students pay a course registration fee. Approval for enrollment must be arranged before the student begins a work experience. Students may begin this program during their Sophomore year. Transfer students must complete 12 credit hours at UNC Charlotte before applying to the program. For more information, contact the College of Engineering Office of Student Development and Success or the University Career Center.

Early Entry: Master of Science in Fire Protection and Safety Management

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.20 overall undergraduate GPA
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and

- Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.00 overall undergraduate GPA
 - Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Minor in Fire Safety

The Fire Science Minor is designed for students seeking an understanding in fire, its benefits and drawbacks. The minor emphasizes the technical aspects of fire, designed to prepare students for increasingly responsible roles in workplace safety and management. The program provides comprehensive classes dealing with fire behavior, investigation and hazardous materials.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University of North Carolina at Charlotte Admission Requirements

While not required for admission, please note that some upper level 3000 or 4000 courses may require prerequisites courses that include PHYS 1101(3) and/or CHEM 12XX – Chemistry (3)

Required Core Courses (12 Credit Hours)

Four Courses (12 credit hours) are required,
 ETFS 1244 - Water-Based Fire Suppression (3)
 ETFS 2126 - Fire Investigation and Forensics (3)
 ETFS 2230 - Hazardous Materials (3)
 ETFS 3103 - Fire Behavior (3)

Elective Courses (3 Credit Hours)

Select one of the following for 3 elective credit hours. Students are encouraged to take electives outside of their major department and college to gain a broader perspective. Please note that some courses may have prerequisites or other requirements.

CMET 1400 - Introduction to Construction Management (3)
 ESCI 3101 - Global Environmental Change (3)
 ETCE 1222 - Construction Materials (3)
 ETCE 3271 - Building Systems (3)
 ETEM 2101 - Circuit Fundamentals (3)
 ETFS 2230L - Hazardous Materials Lab (1)

ETFS 3103L - Fire Behavior Lab (1)
 ETFS 3123 - Industrial Hazards and Electricity (3)
 ETGR 2106 - Electronic Circuits and Devices (3)
 ETGR 2230 - Occupational Safety (3)
 ETGR 4301 - Environmental Pollution Control (3)
 ETME 2141 - Applied Engineering Materials (3)
 GEOG 3180 - Hazards and Disasters (3)

Minor Total = 15 Credit Hours

Progression Requirements

To qualify for the Minor in Fire Science upon Graduation, students must have earned a GPA of at least 2.0 in courses applied to the minor. Students are required to have a grade of C or above in the required Core Courses. Students are allowed to attempt * these Core Courses in which they earned grades lower than a C no more than two times.

* *Each of the following is considered an attempt: Withdrawing from the course after the drop deadline (may be appealed); grade replacement; Pass/No Credit; Incompletes that convert to grades of F; and grades of A,B,C,D,or F.*

Minor in Occupational Safety

The Occupational Safety minor is designed for students interested in the safety and environmental health professions. This minor emphasizes the technical and managerial aspects of occupational safety and health so that students will have sufficient technical skills to function in entry-level Workplace Safety/EHS roles. The minor is beneficial to majors in biology, chemistry, engineering, human resources management, organizational psychology, and public health by enabling graduates to work in safety-related roles in their professional careers.

All program-level Admissions and Progression Requirements are in addition to the University of North Carolina at Charlotte Admission Requirements.

Admission Requirements

See University of North Carolina at Charlotte Admission Requirements.

To declare a Minor in Occupational Safety, students must be at sophomore standing or higher.

While not required for admission, please note that 4000-level courses taken to complete the minor may have pre-requisite courses that include PHYS 1101 - Introductory Physics I (3) and/or CHEM 12XX - Chemistry (3).

Degree Requirements

Required Core Courses (12 credit hours)

Four courses (12 credit hours) are required.
 ETFS 3123 - Industrial Hazards and Electricity (3)
 ETGR 2230 - Occupational Safety (3)
 ETGR 4302 - Industrial Hygiene (3)
 ETGR 4303 - Applied Ergonomics and Human Factors (3)

Elective Courses (3 credit hours)

Select one of the following for 3 elective credit hours. Students are encouraged to take electives outside their major department and college to gain a broader perspective. Please note that some courses may have prerequisites or other requirements.

- CEGR 3141-Introduction to Environmental Engineering(3)
- ESCI 3170-Environmental Quality Management(3)
- ETCE 2410-Introduction to Environmental Engineering Technology(3)
- ETFS 2230-Hazardous Materials(3)
- ETFS 3103-Fire Behavior(3)
- ETFS 3400-Fire Safety/Occupational Safety Practicum(1 to 4)
- ETFS 3800-Independent Study(1 to 3)
- ETGR 4301-Environmental Pollution Control(3)
- ETGR 4305-System Safety Design and Management(3)
- GEOG 3180-Hazards and Disasters(3)
- HLTH 2102-Foundations of Public Health(3)
- PSYC 2320-Introduction to Industrial/Organizational Psychology(3)
- PSYC 3121-Organizational Psychology(3)
- SOCY 4112-Sociology of Work(3)
- SOCY 4168-Sociology of Mental Health and Illness(3)

Minor Total = 15 Credit Hours

Progression Requirements

To qualify for the Minor in Occupational Safety upon graduation, students must have earned a GPA of at least 2.0 in courses applied to the minor. Students are required to have a grade of C or above in Required Core Courses. Students are allowed to attempt these Core Courses in which they earned grades lower than a C no more than two times.*

** Each of the following is considered an attempt: Withdrawing from the course after the drop deadline (may be appealed); grade replacement; audits; Pass/No Credit; Incompletes that convert to grades of F; and grades of A, B, C, D, or F.*

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)
- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above
 - Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Currently Enrolled Students

Current UNC Charlotte students who wish to change or declare their major to Mechanical Engineering Technology must:

- Complete the College of Engineering Common First Year (or equivalent courses) in order to be considered eligible for admission. See **Common First-Year Courses** below.
- Achieve a GPA between 2.2 - 4.0.
- Pass all currently attempted required courses within three attempts including withdrawing from a course with a grade of W.

Upon satisfying all of the above requirements, students may request admission to an ETCM program by submitting the Change of Major form. Completion of the minimum requirements does not guarantee acceptance into a program.

Common First-Year Curriculum (CFY)

The College of Engineering uses a Common First-Year Curriculum (CFY) for all Engineering students in order to:

- Provide a strong academic base of foundational knowledge and skills
- Facilitate changing majors within the first year
- Support students with lower math placement and increase access to all majors
- Allow students to explore different majors before committing
- Enhance learning with innovative pedagogies and activities

Mechanical Engineering Technology

BSET in Mechanical Engineering Technology

Mechanical Engineering Technology includes technical and mechanical drawing, computer-aided design, machine design, manufacturing and machine processes, fluid power systems, statics and strength of materials, mechanisms, stress analysis, instrumentation and controls, thermodynamic systems, energy, heat transfer, dynamics, methods analysis, and engineering economics.

Admission Requirements

Students for this degree may enter degree programs in the Department of Engineering Technology and Construction Management as First-Year students or as transfer students.

First-Year Students

Common First-Year Courses

All new first year students are initially advised by a central office within the W.S. Lee College of Engineering. Students must complete the following classes that are common to all majors of the college (except Construction Management and Fire and Safety Engineering Technology) in order to progress and matriculate to their major department. *All First-Year Curriculum courses require a grade of C or better.*

ENGR 1300 Exploring Engineering & Technology with Success(2)

ENGR 1301 Foundations of Math and Science for Engineering(3)

ENGR 1302 Logic and Computational Problem Solving(3)

ENGR 1303 Engineering Visualization and Graphical Communication(3)

PHYS 2101(3)

PHYS 2101L(1)

Two MATH courses: MATH 1103* or MATH 1241* or MATH 1242* (3 each)

See Notes 1 and 2 below

* All students should consult their advisor to select the math courses that match their planned major.

Note 1

Progression into Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Mechanical Engineering, and Systems Engineering Major Courses after completing the Common First Year Curriculum requires that students also complete MATH 1241, MATH 1242, PHYS 2101, and PHYS 2101L.

Note 2

Progression into Civil Engineering Technology, Electromechanical Engineering Technology, and Mechanical Engineering Technology Major Courses after completing the Common First Year Curriculum requires that students complete MATH 1241, PHYS 2101, and PHYS 2101L with a C or better (except for Electromechanical Engineering Technology).

Note 3

Students must earn at least a 2.0 GPA in the first semester to continue into the second semester.

Degree Requirements (4-Year Program)

The BSET in Mechanical Engineering Technology program consists of 120 credit hours.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Common First-Year Courses (21 credit hours)

See Common First-Year Curriculum (CFY) for details.

Additional Math and Physics Courses (10 credit hours)

ETGR 2272-Engineering Analysis II(3)*

or MATH 1242-Calculus II(3)*

ETGR 3171-Engineering Analysis III(3)

or MATH 2171-Differential Equations(3)

PHYS 1102-Introductory Physics II(3)*

or PHYS 2102-Physics for Science and Engineering II(3)*

PHYS 1102L-Introductory Physics II Laboratory(1)*

or PHYS 2102L-Physics for Science and Engineering II Laboratory(1)*

Major Courses (59 credit hours)

ENGL 2116-Introduction to Technical Communication(3)

ETME 2101-Applied Mechanics I(3)*

ETME 2111-CAD Fundamentals(3)*

ETME 2141-Applied Engineering Materials(3)

ETME 2142-Applied Manufacturing(3)

ETME 2200-Project Design and Management(3)

ETME 2207-Kinematics(3)

ETME 2220-Circuit Fundamentals(3)

ETME 2222-Instrumentation and Measurements(3)

ETME 2290-Machining Laboratory(1)

ETME 2600-Professional Development Seminar for Engineering Technologists(1)

ETME 3107-Kinetics(3)

ETME 3123-Strength of Materials(3)

ETME 3123L-Stress Analysis Laboratory(1)

ETME 3133-Fluid Mechanics(3)

ETME 3150-Applied CAD Modeling and Simulation(3)

ETME 3200-Junior Design Practicum(3)

ETME 3213-Machine Design I(3)

ETME 3250-Principles of Thermal Engineering(3)

ETME 4100-Mechanical Capstone Design I(2)

ETME 4200-Mechanical Capstone Design II(2)

ETME 4250-Thermal Engineering Applications(3)

ETME 4250L-Thermal Fluids Laboratory(1)

Restricted Elective Courses (12 credit hours)

AEEE 4000-Special Topics(1 to 3)

AEEE 4140-Energy Management(3)

AEEE 4250-Analysis of Renewable Energy Systems(3)

AEEE 4290-Advanced Instrumentation(3)

CMET 3224-Construction Project Administration(3)

ETCE 3163-Structural Analysis and Design I(3)

ETCE 3264-Structural Analysis(3)

ETCE 3271-Building Systems(3)

ETEM 2171-Algorithms and Programming(3)

ETEM 2271-Digital Fundamentals(3)

ETEM 3101-Principles of Control(3)

ETEM 3131-Electromechanical Devices(3)

ETEM 3231-Power, Machines, and Energy(3)

ETEM 3261-Applied Control Systems(3)

ETEM 3171-Digital Devices(3)

ETEM 4141-Digital Manufacturing Methods(3)

ETEM 4161-Elements of Automation(3)

ETFS 3103-Fire Behavior(3)

ETFS 3113-Fire Safety in the Built Environment(3)

ETFS 3123-Industrial Hazards and Electricity(3)

ETGR 2230-Occupational Safety(3)

ETGR 4272-Engineering Analysis IV(3)

ETGR 4301-Environmental Pollution Control(3)

ETGR 4302-Industrial Hygiene(3)

ETGR 4303-Applied Ergonomics and Human Factors(3)

ETME 3223-Machine Design II(3)

ETME 4000-Special Topics in Mechanical Engineering Technology(3)

ETME 4010-Special Topics in Energy(3)

ETME 4020-Special Topics in Electromechanical(3)

ETME 4111-Advanced CAD Modeling(3)
ETME 4275-Heating, Ventilating, and Air Conditioning(3)
OPER 3100-Operations Management(3)
SEGR 4961-Introduction to Energy Systems(3)
SEGR 4962-Energy Markets(3)

Grade Requirements

*Note: Courses marked with * must be completed with a grade of C or above.

Degree Total = 120 Credit Hours

Degree Requirements (2+2-Year Program)

The BSET in Mechanical Engineering Technology program leading to B.S.E.T. degree consists of a total of 120 credit hours, which may include up to 64 credit hours transferred in from a North Carolina Community Colleges. Students in the 2+2 program are exempt from the General Education requirements. Students must have satisfactorily completed an applicable A.S. degree. (See the Admission Requirements section.)

2+2 Admission Requirements

Transfer admission into the 2+2 degree completion program requires transfer applicants hold an Associate of Applied Science (AAS) degree in a related field. Acceptable AAS degrees include Engineering Technology degrees Mechanical Engineering Technology. A minimum GPA of 2.50 (out of 4.00) in the AAS degree is required.

It is recommended, but not required, that students requesting entry into the 2+2 program have completed all equivalent Math, Physics, and Lower-Level Major courses before entry into the program. Any required courses not completed at an NCCC can be completed at Charlotte after entry into the 2+2 program.

Acceptance of a completed AAS degree indicates the acceptance of up to 64 credit hours toward the Bachelor of Science in Engineering Technology degree program only. These hours may not be valid toward other degree programs at UNC Charlotte.

Transferring Courses from NCCC (64 credit hours)

It is recommended that students transferring into the 2+2 Program have successfully complete NCCC courses equivalent to those listed below. For courses that have not been completed at an NCCC, transfer students may elect to complete these courses at UNC Charlotte after entry into the 2+2 program.

General Education Courses

Students enrolled in a 2+2 Program are exempted from the General Education Program requirements.

Mathematics and Science Foundation Courses (20 credit hours)

ENGR 1301- Foundations of Math and Science for Engineering(3)
MATH 1103- Precalculus Mathematics for Science and Engineering(3) *
MATH 1241-Calculus I(3) *
MATH 1242-Calculus II(3) *
or ETGR 2272-Engineering Analysis II(3) *
PHYS 1101-Introductory Physics I(3) *
or PHYS 2101-Physics for Science and Engineering I(3) *

PHYS 1101L-Introductory Physics I Laboratory(1) *

or PHYS 2101L -Physics for Science and Engineering I Laboratory(1) *
PHYS 1102-Introductory Physics II(3) *
or PHYS 2102-Physics for Science and Engineering II(3) *
PHYS 1102L-Introductory Physics II Laboratory(1) *
or PHYS 2102L -Physics for Science and Engineering II Laboratory(1) *

Lower Level Major Courses (18 credit hours)

ETME 2101- Applied Mechanics I(3) *
ETME 2111-CAD Fundamentals(3) *
ETME 2207-Kinematics(3)
ETME 2220-Circuit Fundamentals(3)
ETME 2141- Applied Engineering Materials(3)
ETME 2142- Applied Manufacturing(3)

Upper-Level Courses (56 credit hours)

Mathematics Foundation Course (3 credit hours)
ETGR 3171 - Engineering Analysis III(3)
or MATH 2171-Differential Equations(3)

Major Courses (41 credit hours)

ENGL 2116- Introduction to Technical Communication(3)
ETME 2200- Project Design and Management(3)
ETME 2222- Instrumentation and Measurements(3)
ETME 2290- Machining Laboratory(1)
ETME 2600- Professional Development Seminar for Engineering Technologists(1)
ETME 3107- Kinetics(3)
ETME 3123- Strength of Materials(3)
ETME 3123L- Stress Analysis Laboratory(1)
ETME 3133- Fluid Mechanics(3)
ETME 3150- Applied CAD Modeling and Simulation(3)
ETME 3213- Machine Design I(3)
ETME 3200- Junior Design Practicum(3)
ETME 3250- Principles of Thermal Engineering(3)
ETME 4100- Mechanical Capstone Design I(2)
ETME 4200- Mechanical Capstone Design II(2)
ETME 4250- Thermal Engineering Applications(3)
ETME 4250L- Thermal Fluids Laboratory(1)

Restricted Elective Courses (12 credit hours)

AEEE 4000- Special Topics(1 to 3)
AEEE 4140- Energy Management(3)
AEEE 4250- Analysis of Renewable Energy Systems(3)
AEEE 4275- Building Environmental Systems(3)
AEEE 4290- Advanced Instrumentation(3)
CMET 3224- Construction Project Administration(3)
ETCE 3163- Structural Analysis and Design I(3)
ETCE 3264- Structural Analysis(3)
ETCE 3271- Building Systems(3)
ETEM 2171- Algorithms and Programming(3)
ETEM 2271- Digital Fundamentals(3)
ETEM 3101- Principles of Control(3)
ETEM 3131- Electromechanical Devices(3)
ETFS 3103- Fire Behavior(3)
ETEM 3171- Digital Devices(3)
ETEM 3231- Power, Machines, and Energy(3)
ETEM 3261- Applied Control Systems(3)
ETEM 4141- Digital Manufacturing Methods(3)
ETEM 4161- Elements of Automation(3)

ETFS 3113 - Fire Safety in the Built Environment (3)
 ETFS 3123 - Industrial Hazards and Electricity (3)
 ETGR 2230 - Occupational Safety (3)
 ETGR 4272 - Engineering Analysis IV (3)
 ETGR 4301 - Environmental Pollution Control (3)
 ETGR 4302 - Industrial Hygiene (3)
 ETGR 4303 - Applied Ergonomics and Human Factors (3)
 ETME 3223 - Machine Design II (3)
 ETME 4000 - Special Topics in Mechanical Engineering Technology (3)
 ETME 4010 - Special Topics in Energy (3)
 ETME 4020 - Special Topics in Electromechanical (3)
 ETME 4111 - Advanced CAD Modeling (3)
 ETME 4275 - Heating, Ventilating, and Air Conditioning (3)
 OPER 3100 - Operations Management (3)
 SEGR 4961 - Introduction to Energy Systems (3)
 SEGR 4962 - Energy Markets (3)

Technical Elective Courses

If the combination of transfer credit and required upper level courses does not result in at least 120 credit hours, any course in CHEM, MATH, PHYS, STAT, or course offered by a department in the College of Engineering that is not already required for the degree may be used as a Technical Elective for degree completion.

Grade Requirements

*Note: Courses marked with * must be completed with a grade of C or above.

Degree Total = 120 Credit Hours

Progression Requirements

First-Year Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First

Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Subsequent Progression Requirements

Sophomore Through Senior Year

- Maintain an overall GPA of 2.00 in the University.
- Maintain a major cumulative GPA of 2.00 for all courses in the departmental curriculum. Failure to meet this requirement for two consecutive semesters will result in not being permitted to enroll in College of Engineering courses.
- Take courses in the curriculum a maximum of three times to achieve a satisfactory grade, including withdrawing from the course with a grade of W.

An undergraduate student who fails to satisfy one or more of the progression requirements stated above, but who nonetheless meets the conditions for continued enrollment in the University, will be ineligible to re-enroll in the College of Engineering unless an appeal is accepted by the College of Engineering. If an appeal is accepted, requirements for continued enrollment appropriate to the individual situation are specified in a "Continuation Agreement" that is mutually agreed upon and signed by the student and their appropriate advisor.

A student who has been suspended by the University must follow University guidelines for appeal. Re-admission to the College of Engineering after a University suspension is not automatic. An application for re-admission must be made by the student and approved by the College/department. Students who are re-admitted by the College of Engineering after suspension by the University must meet requirements for continued enrollment appropriate to their individual situation. These requirements are specified in a "Continuation Agreement" that is mutually agreed upon and signed by the student and their appropriate advisor. The consequences of failure to meet the requirements of the agreement may be articulated in the agreement itself. However, if these consequences are not included in the agreement, failure to meet the requirements will automatically result in the student not being permitted to continue to enroll in College of Engineering courses.

BSET in Mechanical Engineering Technology *with Concentration in Applied Energy*

A Concentration in Applied Energy is available to BSET in Mechanical Engineering Technology students.

Admission Requirements

Students for this degree may enter degree programs in the Department of Engineering Technology and Construction Management as First-Year students or as transfer students.

First-Year Students

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of

their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)
- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above
 - Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Currently Enrolled Students

Current UNC Charlotte students who wish to change or declare their major to Mechanical Engineering Technology must:

- Complete the College of Engineering Common First Year (or equivalent courses) in order to be considered eligible for admission. See Common First-Year Courses below.
- Achieve a GPA between 2.2 - 4.0.
- Pass all currently attempted required courses within three attempts including withdrawing from a course with a grade of W.

Upon satisfying all of the above requirements, students may request admission to an ETCM program by submitting the Change of Major form. Completion of the minimum requirements does not guarantee acceptance into a program.

Common First-Year Curriculum (CFY)

The College of Engineering uses a Common First-Year Curriculum (CFY) for all Engineering students in order to:

- Provide a strong academic base of foundational knowledge and skills
- Facilitate changing majors within the first year
- Support students with lower math placement and increase access to all majors
- Allow students to explore different majors before committing
- Enhance learning with innovative pedagogies and activities

Common First-Year Courses

All new first year students are initially advised by a central office within the W.S. Lee College of Engineering. Students must complete the following classes that are common to all majors of the college (except Construction Management and Fire and Safety Engineering Technology) in order to progress and matriculate to their major department. *All First-Year Curriculum courses require a grade of C or better.*

ENGR 1300 Exploring Engineering & Technology with Success (2)

ENGR 1301 Foundations of Math and Science for Engineering (3)

ENGR 1302 Logic and Computational Problem Solving (3)

ENGR 1303 Engineering Visualization and Graphical Communication (3)

PHYS 2101 (3)

PHYS 2101L (1)

Two MATH courses: MATH 1103* or MATH 1241* or MATH 1242* (3 each)

See Notes 1 and 2 below

* All students should consult their advisor to select the math courses that match their planned major.

Note 1

Progression into Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Mechanical Engineering, and Systems Engineering Major Courses after completing the Common First Year Curriculum requires that students also complete MATH 1241, MATH 1242, PHYS 2101, and PHYS 2101L.

Note 2

Progression into Civil Engineering Technology, Electromechanical Engineering Technology, and Mechanical Engineering Technology Major Courses after completing the Common First Year Curriculum requires that students complete MATH 1241, PHYS 2101, and PHYS 2101L with a C or better (except for Electromechanical Engineering Technology).

Note 3

Students must earn at least a 2.0 GPA in the first semester to continue into the second semester.

Degree Requirements

The BSET in Mechanical Engineering Technology with Concentration in Applied Energy program consists of 120 credit hours.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

First-Year Courses (21 credit hours)

See Common First-Year Curriculum (CFY) for details.

Additional Math and Physics Courses (21 credit hours)

MATH 1242-Calculus II(3)*

or ETGR 2272-Engineering Analysis II(3)*

MATH 2171-Differential Equations(3)

or ETGR 3171-Engineering Analysis III(3)

PHYS 1102-Introductory Physics II(3)*

or PHYS 2102-Physics for Science and Engineering II(3)*

PHYS 1102L-Introductory Physics II Laboratory(1)*

or PHYS 2102L-Physics for Science and Engineering II Laboratory(1)*

Major Courses (59 credit hours)

ENGL 2116-Introduction to Technical Communication(3)

ETME 2101-Applied Mechanics I(3)

ETME 2111-CAD Fundamentals(3)

ETME 2200-Project Design and Management(3)

ETME 2207-Kinematics(3)

ETME 2220-Circuit Fundamentals(3)

ETME 2222-Instrumentation and Measurements(3)

ETME 2141-Applied Engineering Materials(3)

ETME 2290-Machining Laboratory(1)

ETME 2142-Applied Manufacturing(3)

ETME 2600-Professional Development Seminar for Engineering Technologists(1)

ETME 3107-Kinetics(3)

ETME 3200-Junior Design Practicum(3)

ETME 4100-Mechanical Capstone Design I(2)

ETME 3123-Strength of Materials(3)

ETME 4200-Mechanical Capstone Design II(2)

ETME 3123L-Stress Analysis Laboratory(1)

ETME 3133-Fluid Mechanics(3)

ETME 3150-Applied CAD Modeling and Simulation(3)

ETME 3213-Machine Design I(3)

ETME 3250-Principles of Thermal Engineering(3)

ETME 4250-Thermal Engineering Applications(3)

ETME 4250L-Thermal Fluids Laboratory(1)

Concentration Courses (12 credit hours)

Select four of the following:

AEEE 4140-Energy Management(3)

AEEE 4250-Analysis of Renewable Energy Systems(3)

ETEM 3231-Power, Machines, and Energy(3)

ETME 4010-Special Topics in Energy(3)

SEGR 4961-Introduction to Energy Systems(3) (*with approval*)

SEGR 4962-Energy Markets(3) (*with approval*)

Grade Requirements

*Note: Courses marked with * must be completed with a grade of C or above.

Degree Total = 120 Credit Hours

Progression Requirements

First-Year Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Subsequent Progression Requirements

Sophomore Through Senior Year

- Maintain an overall GPA of 2.00 in the University.
- Maintain a major cumulative GPA of 2.00 for all courses in the departmental curriculum. Failure to meet this requirement for two consecutive semesters will result in not being permitted to enroll in College of Engineering courses.
- Take courses in the curriculum a maximum of three times to achieve a satisfactory grade, including withdrawing from the course with a grade of W.

An undergraduate student who fails to satisfy one or more of the progression requirements stated above, but who nonetheless meets the

conditions for continued enrollment in the University, will be ineligible to re-enroll in the College of Engineering unless an appeal is accepted by the College of Engineering. If an appeal is accepted, requirements for continued enrollment appropriate to the individual situation are specified in a "Continuation Agreement" that is mutually agreed upon and signed by the student and their appropriate advisor.

A student who has been suspended by the University must follow University guidelines for appeal. Re-admission to the College of Engineering after a University suspension is not automatic. An application for re-admission must be made by the student and approved by the College/department. Students who are re-admitted by the College of Engineering after suspension by the University must meet requirements for continued enrollment appropriate to their individual situation. These requirements are specified in a "Continuation Agreement" that is mutually agreed upon and signed by the student and their appropriate advisor. The consequences of failure to meet the requirements of the agreement may be articulated in the agreement itself. However, if these consequences are not included in the agreement, failure to meet the requirements will automatically result in the student not being permitted to continue to enroll in College of Engineering courses.

BSET in Mechanical Engineering Technology with Concentration in Electromechanical Systems

A Concentration in Electromechanical Systems is available to BSET in Mechanical Engineering Technology students.

Admission Requirements

Degree Total = 120 Credit Hours

Progression Requirements

First-Year Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters

- Earn a 2.2 cumulative GPA upon completion of the Common First Year courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Subsequent Progression Requirements

Sophomore Through Senior Year

- Maintain an overall GPA of 2.00 in the University.
- Maintain a major cumulative GPA of 2.00 for all courses in the departmental curriculum. Failure to meet this requirement for two consecutive semesters will result in not being permitted to enroll in College of Engineering courses.
- Take courses in the curriculum a maximum of three times to achieve a satisfactory grade, including withdrawing from the course with a grade of W.

An undergraduate student who fails to satisfy one or more of the progression requirements stated above, but who nonetheless meets the conditions for continued enrollment in the University, will be ineligible to re-enroll in the College of Engineering unless an appeal is accepted by the College of Engineering. If an appeal is accepted, requirements for continued enrollment appropriate to the individual situation are specified in a "Continuation Agreement" that is mutually agreed upon and signed by the student and their appropriate advisor.

A student who has been suspended by the University must follow University guidelines for appeal. Re-admission to the College of Engineering after a University suspension is not automatic. An application for re-admission must be made by the student and approved by the College/department. Students who are re-admitted by the College of Engineering after suspension by the University must meet requirements for continued enrollment appropriate to their individual situation. These requirements are specified in a "Continuation Agreement" that is mutually agreed upon and signed by the student and

their appropriate advisor. The consequences of failure to meet the requirements of the agreement may be articulated in the agreement itself. However, if these consequences are not included in the agreement, failure to meet the requirements will automatically result in the student not being permitted to continue to enroll in College of Engineering courses.

Early Entry: Master of Science in Applied Energy and Electromechanical Engineering

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.20 overall undergraduate GPA
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.00 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Department of Mechanical Engineering and Engineering Science

mees.charlotte.edu

Undergraduate Programs

- **B.S. in Mechanical Engineering (BSME)**
 - Aerospace Engineering
 - Biomedical Engineering
 - Energy Engineering
 - Motorsports Engineering
 - Precision Engineering and Metrology
- **B.S. in Mechanical Engineering and Physics Dual Degree** ***This program is under revision.***
- **Minor in Mechanical Engineering**
- **Early Entry: M.S. in Mechanical Engineering**

Mechanical engineering is possibly the broadest of the engineering disciplines. Mechanical engineers are involved in almost all aspects of the technological problems facing today's society. Among the major concerns of the mechanical engineer are problems related to conversion, utilization, and conservation of our limited energy resources. Additional important areas for the mechanical engineer include the design and analysis of machines, structures, and manufacturing processes related to the industrial output of the nation. Increasingly, this design and analysis is computer-based using the techniques of computer-aided design (CAD/CAM).

A sound understanding of engineering sciences is fundamental to the education of engineers in every discipline. Engineering sciences are generally identified as those areas of engineering that emphasize the application of the fundamental principles of the physical sciences, primarily physics and chemistry, to engineering problems. Some classical and emerging engineering areas that fall within this field include thermodynamics, fluid mechanics, engineering mechanics, engineering materials, nuclear and chemical sciences, microelectronics theory and fabrication, manufacturing, metrology, and the solid state sciences.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Degree Programs

The Department of Mechanical Engineering and Engineering Science offers an undergraduate program leading to a Bachelor of Science in Mechanical Engineering (B.S.M.E.) degree (with optional Concentrations in Biomedical Engineering, Energy Engineering, Motorsports Engineering, and Precision Engineering and Metrology) and graduate programs leading to Master of Science in Mechanical Engineering (M.S.M.E.), and Doctor of Philosophy (Ph.D.) degrees. Additionally, a dual bachelor's degree

program is offered in cooperation with the Department of Physics. Using the flexibility provided by the technical electives, and with engineering career counseling, a student can develop a variety of educational programs that would provide the background for professional engineering licensing and practice in any of the areas included within mechanical engineering and/or the engineering sciences. Students can also prepare for graduate study in mechanical engineering, materials science, or any of the recognized areas covered by the engineering sciences. Individualized study programs in one of the interdisciplinary fields involving the merger of engineering and the various science areas, such as bioengineering, microelectronics, or chemical engineering sciences, can be developed.

Program Educational Objectives

- Our graduates apply their knowledge to enable them to succeed as engineers in society, graduate or professional studies, and lifelong learning.
- Our graduates contribute to safety and make ethical engineering and societal decisions.
- Our graduates contribute to the design, manufacture, implementation and management of engineering systems.
- Our graduates are equipped with strong engineering fundamentals and have the flexibility and competence to adapt in a changing world.
- Our graduates innovate, develop and communicate ideas and solutions, as effective technical leaders, team leaders, or team members.

Student Outcomes

Upon graduation, students have:

- 1) An ability to apply knowledge of mathematics, science, and engineering to identify, formulate, and solve complex engineering problems.
- 2) An ability to apply the engineering design process to create thermal or mechanical systems that meet specified application goals with consideration for public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- 3) An ability to communicate effectively with a range of audiences through technical writing and oral presentations.
- 4) An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- 5) A record of productive participation as team members or in leadership roles on multidisciplinary teams which create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- 6) An ability to develop experimental protocols and perform experiments designed to test or verify mechanical principles, components, and properties; analyze results; interpret data; and use engineering judgment to draw conclusions.
- 7) An ability to obtain and apply new knowledge, using appropriate learning strategies.

Accreditation

The programs in Mechanical Engineering and Engineering Science are accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Bachelor of Science in Mechanical Engineering (B.S.M.E.)

A Major in Mechanical Engineering leading to the B.S.M.E. degree consists of a total of 120 credit hours.

Admission Requirements

First-Year Students

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)
- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above
 - Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Currently Enrolled Students

Internal Change of Major

Internal change of majors within the College of Engineering must have a minimum GPA of 2.50 (2.80 for Mechanical Engineering). Students who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Change of Major Into a Program in the College of Engineering

First-time college students who seek eligibility for a change of major from a non-engineering major into an engineering program are required to:

- Complete the First-Year Curriculum.
- Have no more than two attempts per course, including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).

Students Seeking Eligibility for a Change of Major

- Should continue to be advised by their current advisor.
- Should focus on successfully completing courses that count towards the program of interest and not rely on grades in unrelated courses to elevate the GPA.
- Are not permitted to enroll in Sophomore engineering courses.
- May request authorization to enroll in ENGR 1300, ENGR 1301, ENGR 1302 or ENGR 1303 via a request to the College of Engineering Advising department at osds-advising@charlotte.edu.

Transfers Seeking Eligibility for a Change of Major

Students who transfer to Charlotte into a non-engineering major and have not met the Transfer Requirements for a given engineering program are not guaranteed to be considered for a change of major. Representatives of the program of interest make decisions on a student's eligibility to pursue a change of major based on a holistic review of a student's entire academic record, including grades earned at other institutions. A record of unsuccessful attempts in courses will weigh negatively on such decisions. If transfer students are allowed to pursue eligibility for a change of major to a given program, they will be required to:

- Complete the Common First-Year Curriculum.
- Have no more than two attempts per course including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).
- Complete at least 12 credits of courses at Charlotte, including at least four courses in math, science and/or engineering.

Common First-Year Curriculum (CFY)

The College of Engineering uses a Common First-Year Curriculum (CFY) for all Engineering students in order to:

- Provide a strong academic base of foundational knowledge and skills
- Facilitate changing majors within the first year
- Support students with lower math placement and increase access to all majors
- Allow students to explore different majors before committing
- Enhance learning with innovative pedagogies and activities

Common First-Year Courses

All new first year students are initially advised by a central office within the W.S. Lee College of Engineering. Students must complete the following classes that are common to all majors of the college (except Construction Management and Fire and Safety Engineering Technology) in order to progress and matriculate to their major department. *All First-Year Curriculum courses require a grade of C or better.*

ENGR 1300 Exploring Engineering & Technology with Success(2)

ENGR 1301 Foundations of Math and Science for Engineering(3)

ENGR 1302 Logic and Computational Problem Solving(3)

ENGR 1303 Engineering Visualization and Graphical Communication(3)

PHYS 2101(3)

PHYS 2101L(1)

Two MATH courses: MATH 1103* or MATH 1241* or MATH 1242* (3 each)

See Notes 1 and 2 below

*All students should consult their advisor to select the math courses that match their planned major.

Note 1

Progression into Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Mechanical Engineering, and Systems Engineering Major Courses after completing the Common First Year Curriculum requires that students also complete MATH 1241, MATH 1242, PHYS 2101, and PHYS 2101L.

Note 2

Progression into Civil Engineering Technology, Electromechanical Engineering Technology, and Mechanical Engineering Technology Major Courses after completing the Common First Year Curriculum requires that students complete MATH 1241, PHYS 2101, and PHYS 2101L with a C or better (except for Electromechanical Engineering Technology).

Note 3

Students must earn at least a 2.0 GPA in the first semester to continue into the second semester.

Degree Requirements

The BSME requires courses in Math, Science, Engineering and General Education. Some Math and Physics courses also satisfy General Education Requirements.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

First- Year Courses (21 credit hours)

See Common First-Year Curriculum (CFY) for details.

Additional Math and Physics Courses (10 credit hours)

MATH 2171 - Differential Equations (3)
MATH 2241 - Calculus III (3)
PHYS 2102 - Physics for Science and Engineering II (3)
PHYS 2102L - Physics for Science and Engineering II Laboratory (1)

Major Courses (59 credit hours)

ENGR 3295 - Multidisciplinary Professional Development (1)
MEGR 2141 - Engineering Mechanics I (3)
MEGR 2144 - Introduction to Solid Mechanics (3)
MEGR 2152 - CAD for Mechanical Engineers (1)
MEGR 2157 - Design Projects I Laboratory (3)
MEGR 2174 - Mechatronics I Projects Laboratory (1)
MEGR 2180 - Manufacturing Systems (3)
MEGR 2233 - Math and Science for Engineers II (3)
MEGR 2234 - Math and Science for Engineers III (4)
MEGR 2242 - Computational Methods for Engineers (2)
MEGR 3111 - Thermodynamics I (3)
MEGR 3114 - Fluid Mechanics (3)
MEGR 3116 - Introduction to Heat Transfer (3)
MEGR 3121 - Dynamics Systems I (3)
MEGR 3152 - Mechanics and Materials Laboratory (2)
MEGR 3156 - Design Projects Lab II (2)
MEGR 3161 - Introduction to Engineering Materials (3)
MEGR 3173 - Mechatronics II (2)
MEGR 3174 - Mechatronics II Projects Laboratory (1)
MEGR 3251 - Thermal/Fluids Laboratory (2)

MEGR 3255 - Senior Design I (2)

MEGR 3256 - Senior Design II (2)

Design Elective: Thermal/Fluids Design or Machine Analysis and Design
MEGR 3216 - Thermal/Fluid Design (3)

or MEGR 3221 - Machine Analysis and Design I (3)

These courses require a grade of C or better for the Mechanical Engineering curriculum: ENGR 1300, ENGR 1301, ENGR 1302, ENGR 1303, MATH 1241, MATH 1242, MATH 2171, MATH 2241, PHYS 2101, PHYS 2101L, PHYS 2102, PHYS 2102L, MEGR 2141, MEGR 2144, MEGR 2152, MEGR 2157, MEGR 2180, MEGR 2173, MEGR 2174, MEGR 2233, MEGR 2234, MEGR 2242, MEGR 3111, MEGR 3114, MEGR 3121, MEGR 3156, MEGR 3161, and MEGR 3174. Additional courses may require a grade of C or better for Technical Electives.

Technical Elective Courses (12 credit hours)

Select four of the following. At least three of the four must be MEGR courses.

BIOL 3161 - Introduction to Biotechnology (3)
MATH 3171 - Applied Mathematics (3)
MEGR 3090 - Special Topics in Mechanical Engineering (3)
MEGR 3092 - Special Topics in Motorsports Engineering (3)
MEGR 3094 - Special Topics in Energy Engineering (3)
MEGR 3097 - Special Topics in Biomedical Engineering (3)
MEGR 3162 - Mechanical Behavior and Strengthening of Solids (3)
MEGR 3210 - Automotive Power Plants (3)
MEGR 3211 - Road Vehicle Dynamics (3)
MEGR 3214 - Refrigeration and Air/Conditioning (3)
MEGR 3221 - Machine Analysis and Design I (3) (*may count as a Technical Elective only if MEGR 3216 is completed to fulfill the Design Elective*)
MEGR 3225 - Introduction to Finite Element Analysis (3)
MEGR 3231 - Advanced CAD/CAM (3)
MEGR 3232 - Plastic Part Design (3)
MEGR 3233 - Introduction to Biomaterials (3)
MEGR 3234 - Introduction to Biodynamics (3)
MEGR 3235 - Waves and Optics (3)
MEGR 3236 - Introduction to Nanoscale Science and Engineering (3)
MEGR 3237 - Introduction to Control Systems (3)
MEGR 3238 - Microscopy for Engineering (3)
MEGR 3240 - Advanced Automotive Powerplants (3)
MEGR 3241 - Advanced Motorsports Instrumentation (3)
MEGR 3242 - Applied Vehicle Aerodynamics (3)
MEGR 3244 - Tire Mechanics (3)
MEGR 3245 - Advanced Experimental Methods (3)
MEGR 3260 - Clean Coal Technology (3)
MEGR 3261 - Sustainable Energy (3)
MEGR 3262 - Turbomachinery (3)
MEGR 3270 - Biomedical Fluidics: Microfluidics (3)
MEGR 3271 - Biomedical Manufacturing: 3D Biofabrication (3)
MEGR 3272 - Introduction to Bio-Polymers and Composites (3)
MEGR 3282 - Statistical Process Control and Metrology (3)
MEGR 3283 - Metrology and Precision Engineering (3)
MEGR 3310 - Flight Mechanics (3)
MEGR 3451 - Stationary Power Plant Systems (3)
MEGR 3452 - Introduction to Nuclear Engineering (3)
MEGR 4090 - Special Topics in Mechanical Engineering (3)
MEGR 4091 - Special Topics in Aerospace Engineering (3)
MEGR 4092 - Special Topics in Motorsports Engineering (3)

MEGR 4094 - Special Topics in Energy Engineering (3)
MEGR 4097 - Special Topics in Biomedical Engineering (3)
MEGR 4098 - Special Topics in Precision Engineering (3)
MEGR 4127 - Introduction to Robotics (3)
MEGR 4143 - Discrete Mechanical Vibrating Systems (3)
MEGR 4210 - Automotive Powerplants (3)
MEGR 4211 - Road Vehicle Dynamics (3)
MEGR 4235 - Waves and Optics (3)
MEGR 4237 - Introduction to Control Systems (3)
MEGR 4240 - Advanced Automotive Powerplants (3)
MEGR 4242 - Applied Vehicle Aerodynamics (3)
MEGR 4244 - Tire Mechanics (3)
MEGR 4271 - Orthopedic Biomechanics (3)
MEGR 4272 - Mechanics of the Human Locomotor System (3)
MEGR 4273 - Regenerative Neural Engineering (3)
MEGR 4274 - Bioelectronic Medicine (3)
MEGR 4280 - Advanced Manufacturing Processes (3)
MEGR 4290 - Introduction to Electric Vehicles and Batteries (3)
MEGR 4291 - Battery Performance and Testing (3)
MEGR 4292 - Materials Science in Battery Technology (3)
MEGR 4310 - Uncrewed Aerial Vehicles (3)
MEGR 4311 - Aerospace Materials (3)
MEGR 4312 - Aerospace Propulsion (3)
PHYS 3220 - Mathematical Methods in Physics (3)
PHYS 4110 - Introduction to Biomedical Optics (3)
PHYS 4140 - Nuclear Physics (3)
PHYS 4232 - Electromagnetic Theory II (3)
PHYS 4242 - Quantum Mechanics II (3)
PHYS 4271 - Waves and Optics (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 credit hours

Progression Requirements

First-Year Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W

- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Bachelor of Science in Mechanical Engineering (B.S.M.E.) with Concentration in Aerospace Engineering

The B.S.M.E. with a Concentration in Aerospace Engineering program is intended for students interested in specialized and systematic training and education in the area of aerospace engineering. Students completing the requirements described in this program will receive a designation on their transcripts showing that they have completed the Aerospace Engineering concentration.

All program-level Admissions and Progression Requirements are in addition to the University of North Carolina at Charlotte Admission Requirements.

Admission Requirements

First-Year Students

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)
- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above
 - Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Additional Admission Requirements for the Aerospace Concentration

- Minimum GPA: 3.00
- Prerequisite Courses (with grades of C or above):
 - PHYS 2101
 - PHYS 2101L
 - MATH 1242
 - ENGR 1202
 - WRDS 1103 or WRDS 1104
 - MEGR 2141

- *Declaration of Concentration:* BSME students who wish to be admitted to the concentration must apply for admission to the concentration.

Currently Enrolled Students

Internal Change of Major

Internal change of majors within the College of Engineering must have a minimum GPA of 2.50 (2.80 for Mechanical Engineering). Students who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Change of Major Into a Program in the College of Engineering

First-time college students who seek eligibility for a change of major from a non-engineering major into an engineering program are required to:

- Complete the First-Year Curriculum.
- Have no more than two attempts per course, including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).

Students Seeking Eligibility for a Change of Major

- Should continue to be advised by their current advisor.
- Should focus on successfully completing courses that count towards the program of interest and not rely on grades in unrelated courses to elevate the GPA.
- Are not permitted to enroll in Sophomore engineering courses. May request authorization to enroll in ENGR 1300, ENGR 1301, ENGR 1302 or ENGR 1303 via a request to the College of Engineering Advising department at osds-advising@charlotte.edu.

Transfers Seeking Eligibility for a Change of Major

Students who transfer to Charlotte into a non-engineering major and have not met the Transfer Requirements for a given engineering program are not guaranteed to be considered for a change of major. Representatives of the program of interest make decisions on a student's eligibility to pursue a change of major based on a holistic review of a student's entire academic record, including grades earned at other institutions. A record of unsuccessful attempts in courses will weigh negatively on such decisions. If transfer students are allowed to pursue eligibility for a change of major to a given program, they will be required to:

- Complete the Common First-Year Curriculum.
- Have no more than two attempts per course including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).
- Complete at least 12 credits of courses at Charlotte, including at least four courses in math, science and/or engineering.

Current UNC Charlotte Students Seeking Eligibility for a Change of Major

Current UNC Charlotte students who are interested in changing majors to Engineering Technology or Construction Management (ETCM) must meet major-specific requirements in order to declare a major. Please visit the ETCM department for more information on the change of major process. Upon satisfying all of the major-specific requirements, students may request admission to an ETCM program by scheduling an appointment with a departmental advisor of the given program.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foundation Courses (24 credit hours)

MATH 1241 - Calculus I(3)
MATH 1242 - Calculus II(3)
MATH 2171 - Differential Equations(3)
MATH 2241 - Calculus III(3)
MEGR 1100 - Foundations of Math and Science for Engineers(4)
or CHEM 1251 - General Chemistry I(3)
and CHEM 1251L - General Chemistry I Laboratory(1)
PHYS 2101 - Physics for Science and Engineering I(3)
PHYS 2101L - Physics for Science and Engineering I Laboratory(1)
PHYS 2102 - Physics for Science and Engineering II(3)
PHYS 2102L - Physics for Science and Engineering II Laboratory(1)

Major Courses (60 credit hours)

ECGR 2161 - Basic Electrical Engineering I(3)
ENGR 1201 - Introduction to Engineering Practices and Principles I(2)
ENGR 1202 - Introduction to Engineering Practices and Principles II(2)
ENGR 3295 - Multidisciplinary Professional Development(1)
MEGR 2141 - Engineering Mechanics I(3)
MEGR 2144 - Introduction to Solid Mechanics(3)
MEGR 2156 - Design Projects I Laboratory(2)
MEGR 2180 - Manufacturing Systems(3)
MEGR 2240 - Computational Methods for Engineers(3)
MEGR 3111 - Thermodynamics I(3)
MEGR 3112 - Thermodynamics II(3)
MEGR 3114 - Fluid Mechanics(3)
MEGR 3116 - Introduction to Heat Transfer(3)
MEGR 3121 - Dynamics Systems I(3)
MEGR 3122 - Dynamic Systems II(3)
MEGR 3152 - Mechanics and Materials Laboratory(2)
MEGR 3156 - Design Projects Lab II(2)
MEGR 3161 - Introduction to Engineering Materials(3)
MEGR 3171 - Introduction to Measurements and Instrumentation(2)
MEGR 3171L - Instrumentation Laboratory(2)

Design Elective: Thermal/Fluids Design or Machine Analysis and Design

MEGR 3216 - Thermal/Fluid Design(3)
or MEGR 3221 - Machine Analysis and Design I(3)

MEGR 3251 - Thermal/Fluids Laboratory(2)

MEGR 3315 - Aerospace Senior Design I(2) *

MEGR 3316 - Aerospace Senior Design II(2) *

*Must be an approved Aerospace-related project.

Math/Science Electives (6 credit hours)

Science Elective Course (3 credit hours)

Select one of the following:

BIOL 1110 - Principles of Biology I(3)
CHEM 1252 - General Chemistry II(3)
GEOL 1200 - Physical Geology(3)
PHYS 1130 - Introduction to Astronomy(3)

Mathematics and Statistics Elective Course (3 credit hours)

STAT 3128 - Probability and Statistics for Engineers(3)

Concentration in Aerospace Engineering (12-13 credit hours)

Required Introductory Course

MEGR 2319 - Introduction to Aerospace Engineering(1)

Required Aerospace Technical Elective

All students in the concentration are required to successfully complete
MEGR 3310.
MEGR 3310 - Flight Mechanics(3)

Additional Aerospace Technical Electives

Select three of the following:

MEGR 3021 - Special Topics in Aerospace Engineering(2)
MEGR 3221 - Machine Analysis and Design I(3)
(MEGR 3221 may count as an Aerospace Technical Elective only if MEGR 3216 is completed to fulfill the Design Elective.)
MEGR 3225 - Introduction to Finite Element Analysis(3)
MEGR 4091 - Special Topics in Aerospace Engineering(3)
MEGR 4237 - Introduction to Control Systems(3)
MEGR 4242 - Applied Vehicle Aerodynamics(3)
MEGR 4310 - Uncrewed Aerial Vehicles(3)
MEGR 4311 - Aerospace Materials(3)
MEGR 4312 - Aerospace Propulsion(3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 credit hours

Progression Requirements

In order to remain in the concentration, a minimum overall GPA of 3.0 must be maintained. A minimum GPA of 2.0 is required in courses in the concentration.

First-Year Requirements

All new First-Year students, early college students, and transfer students with only one semester at another institution are initially advised by a central office within the College of Engineering. Students must satisfy the following requirements in order to progress in the curriculum and matriculate to their major department.

- Follow the advice and recommendations of their faculty advisors.
- Follow all prerequisite, corequisite, and progression requirements of their program.
- Earn at least a 2.00 GPA in the first semester.
- Complete all core courses in the First-Year curriculum with grades of C or above. Core courses include: MATH 1241 and MATH 1242, PHYS 2101; CHEM 1251 or MEGR 1100 (MEGR majors); MATH 2164 and ECGR 2103 (CPGR/EEGR Majors); MATH 2164 (SEGR Majors).
- Pass all courses within two attempts, including withdrawing from a course with a grade of W.
- Complete the First-Year curriculum within four regular semesters.
- Earn a 2.50 cumulative GPA upon completion of the First-Year curriculum.

Sophomore Through Senior Year Requirements

- Maintain an overall GPA of 2.00 in the University.
- Maintain a major cumulative GPA of 2.00 for all courses in the

departmental curriculum. Failure to meet this requirement for two consecutive semesters will result in not being permitted to enroll in College of Engineering courses.

- Take courses in the curriculum a maximum of two times to achieve a satisfactory grade, including withdrawing from the course with a grade of W.

An undergraduate student who fails to satisfy one or more of the progression requirements stated above, but who nonetheless meets the conditions for continued enrollment in the University, will be ineligible to reenroll in the College of Engineering unless an appeal is accepted by the College of Engineering. If an appeal is accepted, requirements for continued enrollment appropriate to the individual situation are specified in a "Continuation Agreement" that is mutually agreed upon and signed by the student and their appropriate advisor.

A student who has been suspended by the University must follow University guidelines for appeal. Readmission to the College of Engineering after a University suspension is not automatic. An application for readmission must be made by the student and approved by the College/department. Students who are readmitted by the College of Engineering after suspension by the University must meet requirements for continued enrollment appropriate to their individual situation. These requirements are specified in a "Continuation Agreement" that is mutually agreed upon and signed by the student and their appropriate advisor. The consequences of failure to meet the requirements of the agreement may be articulated in the agreement itself. However, if these consequences are not included in the agreement, failure to meet the requirements will automatically result in the student not being permitted to continue to enroll in College of Engineering courses.

selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)
- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above
 - Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Additional Admission Requirements for the Concentration

- Minimum GPA: 3.0
- *Declaration of Concentration.* Students must apply for admission to and may enter the Biomedical Engineering concentration during their first year or second year.
- In order to remain in the concentration, a minimum overall GPA of 3.0 must be maintained.

Currently Enrolled Students

Internal Change of Major

Internal change of majors within the College of Engineering must have a minimum GPA of 2.50 (2.80 for Mechanical Engineering). Students who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Change of Major Into a Program in the College of Engineering

First-time college students who seek eligibility for a change of major from a non-engineering major into an engineering program are required to:

- Complete the First-Year Curriculum.
- Have no more than two attempts per course, including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).

Students Seeking Eligibility for a Change of Major

- Should continue to be advised by their current advisor.
- Should focus on successfully completing courses that count towards the program of interest and not rely on grades in unrelated courses to elevate the GPA.
- Are not permitted to enroll in Sophomore engineering courses.
- May request authorization to enroll in ENGR 1300, ENGR 1301, ENGR 1302 or ENGR 1303 via a request to the College of Engineering Advising department at osds-advising@charlotte.edu.

Transfers Seeking Eligibility for a Change of Major

Students who transfer to Charlotte into a non-engineering major and have not met the Transfer Requirements for a given engineering program are not guaranteed to be considered for a change of major.

Bachelor of Science in Mechanical Engineering (B.S.M.E.) with Concentration in Biomedical Engineering

The B.S.M.E. with a Concentration in Biomedical Engineering program is intended for students interested in specialized and systematic training and education in the area of Biomedical Engineering. Students completing the requirements described in this program receive a special designation on their transcripts showing that they have completed the Concentration in Biomedical Engineering.

Admission Requirements

First-Year Students

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This

Representatives of the program of interest make decisions on a student's eligibility to pursue a change of major based on a holistic review of a student's entire academic record, including grades earned at other institutions. A record of unsuccessful attempts in courses will weigh negatively on such decisions. If transfer students are allowed to pursue eligibility for a change of major to a given program, they will be required to:

- Complete the Common First-Year Curriculum.
- Have no more than two attempts per course including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).
- Complete at least 12 credits of courses at Charlotte, including at least four courses in math, science and/or engineering.

Common First-Year Curriculum (CFY)

The College of Engineering uses a Common First-Year Curriculum (CFY) for all Engineering students in order to:

- Provide a strong academic base of foundational knowledge and skills
- Facilitate changing majors within the first year
- Support students with lower math placement and increase access to all majors
- Allow students to explore different majors before committing
- Enhance learning with innovative pedagogies and activities

Common First-Year Courses

All new first year students are initially advised by a central office within the W.S. Lee College of Engineering. Students must complete the following classes that are common to all majors of the college (except Construction Management and Fire and Safety Engineering Technology) in order to progress and matriculate to their major department. *All First-Year Curriculum courses require a grade of C or better.*

ENGR 1300 Exploring Engineering & Technology with Success(2)

ENGR 1301 Foundations of Math and Science for Engineering(3)

ENGR 1302 Logic and Computational Problem Solving(3)

ENGR 1303 Engineering Visualization and Graphical Communication(3)

PHYS 2101(3)

PHYS 2101L(1)

Two MATH courses: MATH 1103* or MATH 1241* or MATH 1242* (3 each)

See Notes 1 and 2 below

* All students should consult their advisor to select the math courses that match their planned major.

Note 1

Progression into Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Mechanical Engineering, and Systems Engineering Major Courses after completing the Common First Year Curriculum requires that students also complete MATH 1241, MATH 1242, PHYS 2101, and PHYS 2101L.

Note 2

Progression into Civil Engineering Technology, Electromechanical Engineering Technology, and Mechanical Engineering Technology Major Courses after completing the Common First Year Curriculum requires that students complete MATH 1241, PHYS 2101, and PHYS 2101L with a C or better (except for Electromechanical Engineering Technology).

Note 3

Students must earn at least a 2.0 GPA in the first semester to continue into the second semester.

Degree Requirements

The BSME requires courses in Math, Science, Engineering and General Education. Some Math and Physics courses also satisfy General Education Requirements. The concentration in Biomedical Engineering requires a Biomedical-related senior design project as well as Biomedical Technical Electives.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

First-Year Courses (21 credit hours)

See Common First-Year Curriculum (CFY) for details.

Additional Math and Physics Courses (10 credit hours)

MATH 2171 - Differential Equations (3)

MATH 2241 - Calculus III (3)

PHYS 2102 - Physics for Science and Engineering II (3)

PHYS 2102L - Physics for Science and Engineering II Lab (1)

Major Courses (59 credit hours)

ENGR 3295 - Multidisciplinary Professional Development(1)

MEGR 2141 - Engineering Mechanics I(3)

MEGR 2144 - Introduction to Solid Mechanics(3)

MEGR 2157 - Design Projects I Laboratory(3)

MEGR 2173 - Mechatronics I(2)

MEGR 2174 - Mechatronics I Projects Laboratory(1)

MEGR 2233 - Math and Science for Engineers II(3)

MEGR 2234 - Math and Science for Engineers III(4)

MEGR 2242 - Computational Methods for Engineers(2)

MEGR 3114 - Fluid Mechanics(3)

MEGR 3111 - Thermodynamics I(3)

MEGR 3116 - Introduction to Heat Transfer(3)

MEGR 3121 - Dynamics Systems I(3)

MEGR 3123 - Dynamic Systems II(2)

MEGR 3152 - Mechanics and Materials Laboratory(2)

MEGR 3156 - Design Projects Lab II(2)

MEGR 3161 - Introduction to Engineering Materials(3)

MEGR 3173 - Mechatronics II(2)

MEGR 3174 - Mechatronics II Projects Laboratory(1)

MEGR 3251 - Thermal/Fluids Laboratory(2)

MEGR 3275 - Biomedical Engineering Senior Design I(2) *

MEGR 3276 - Biomedical Engineering Senior Design II(2) *

* Must be an approved Biomedical Engineering-related project.

Design Elective: Thermal/Fluids Design or Machine Analysis and Design

MEGR 3216 - Thermal/Fluid Design(3)

or MEGR 3221 - Machine Analysis and Design I(3)

These courses require a grade of C or better for the Mechanical Engineering curriculum: ENGR 1300, ENGR 1301, ENGR 1302, ENGR 1303, MATH 1241, MATH 1242, MATH 2171, MATH 2241, PHYS 2101, PHYS

2101L, PHYS 2102, PHYS 2102L, MEGR 2141, MEGR 2144, MEGR 2152, MEGR 2157, MEGR 2180, MEGR 2173, MEGR 2174, MEGR 2233, MEGR 2234, MEGR 2242, MEGR 3111, MEGR 3114, MEGR 3121, MEGR 3156, MEGR 3161, and MEGR 3174. Additional courses may require a grade of C or better for Technical Electives.

Concentration in Biomedical Engineering (12-13 credit hours)

Required Introductory Course

MEGR 2279 - Introduction to Biomedical Engineering (1)

Biomedical Technical Elective Courses

Select four technical elective courses from the following options.

- At least three of the four technical elective courses must be MEGR courses
- At least three elective courses are required to be selected from the Biomedical Technical Elective Courses options
- The fourth elective may be selected from the Biomedical Technical Elective Courses or from the Additional Technical Elective Courses options

BIOL 3161 - Introduction to Biotechnology (3)

MEGR 3027 - Special Topics in Biomedical Engineering (2)

MEGR 3097 - Special Topics in Biomedical Engineering (3)

MEGR 3221 - Machine Analysis and Design I (3) (*MEGR 3221 may count as a Technical Elective only if MEGR 3216 is completed to fulfill the Design Elective*)

MEGR 3225 - Introduction to Finite Element Analysis (3)

MEGR 3232 - Plastic Part Design (3)

MEGR 3233 - Introduction to Biomaterials (3)

MEGR 3234 - Introduction to Biodynamics (3)

MEGR 3236 - Introduction to Nanoscale Science and Engineering (3)

MEGR 3238 - Microscopy for Engineering (3)

MEGR 3270 - Biomedical Fluidics: Microfluidics (3)

MEGR 3271 - Biomedical Manufacturing: 3D Biofabrication (3)

MEGR 3272 - Introduction to Bio-Polymers and Composites (3)

MEGR 4097 - Special Topics in Biomedical Engineering (3)

MEGR 4271 - Orthopedic Biomechanics (3)

MEGR 4272 - Mechanics of the Human Locomotor System (3)

MEGR 4273 - Regenerative Neural Engineering (3)

MEGR 4274 - Bioelectronic Medicine (3)

PHYS 4110 - Introduction to Biomedical Optics (3)

Additional Technical Elective Courses

MEGR 3090 - Special Topics in Mechanical Engineering (3)

MEGR 3231 - Advanced CAD/CAM (3)

MEGR 3235 - Waves and Optics (3)

MEGR 3237 - Introduction to Control Systems (3)

MEGR 3242 - Applied Vehicle Aerodynamics (3)

MEGR 3283 - Metrology and Precision Engineering (3)

MEGR 4090 - Special Topics in Mechanical Engineering (3)

MEGR 4127 - Introduction to Robotics (3)

MEGR 4143 - Discrete Mechanical Vibrating Systems (3)

MEGR 4235 - Waves and Optics (3)

MEGR 4237 - Introduction to Control Systems (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 credit hours

Progression Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year Courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Bachelor of Science in Mechanical Engineering (B.S.M.E.) with Concentration in Energy Engineering

The B.S.M.E. with a Concentration in Energy Engineering program is intended for students interested in specialized and systematic training and education in the area of power generation. Students completing the requirements described in this program receive a special designation on their transcripts showing that they have completed the Concentration in Energy Engineering.

Admission Requirements

First-Year Students

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)
- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above

- Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Additional Admission Requirements for Concentration

- *Minimum GPA:* 3.0
- *Prerequisite Courses (with grades of C or above):*
 - PHYS 2101
 - PHYS 2101L
 - MATH 1242
 - ENGR 1300
 - ENGR 1301
 - ENGR 1302
 - ENGR 1303
 - WRDS 1103 or WRDS 1104
 - MEGR 2141
- *Declaration of Concentration:* Students must apply for admission to and may enter the concentration during their Sophomore or Junior year only.
- In order to remain in the concentration, a minimum overall GPA of 3.00 must be maintained.

Currently Enrolled Students

Internal Change of Major

Internal change of majors within the College of Engineering must have a minimum GPA of 2.50 (2.80 for Mechanical Engineering). Students who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Change of Major Into a Program in the College of Engineering

First-time college students who seek eligibility for a change of major from a non-engineering major into an engineering program are required to:

- Complete the First-Year Curriculum.
- Have no more than two attempts per course, including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).

Students Seeking Eligibility for a Change of Major

- Should continue to be advised by their current advisor.
- Should focus on successfully completing courses that count towards the program of interest and not rely on grades in unrelated courses to elevate the GPA.
- Are not permitted to enroll in Sophomore engineering courses.
- May request authorization to enroll in ENGR 1300, ENGR 1301, ENGR 1302 or ENGR 1303 via a request to the College of Engineering Advising department at osds-advising@charlotte.edu.

Transfers Seeking Eligibility for a Change of Major

Students who transfer to Charlotte into a non-engineering major and have not met the Transfer Requirements for a given engineering program are not guaranteed to be considered for a change of major. Representatives of the program of interest make decisions on a student's eligibility to pursue a change of major based on a holistic review of a

student's entire academic record, including grades earned at other institutions. A record of unsuccessful attempts in courses will weigh negatively on such decisions. If transfer students are allowed to pursue eligibility for a change of major to a given program, they will be required to:

- Complete the Common First-Year Curriculum.

Additional courses may require a grade of C or better for Technical Electives.

Concentration in Energy Engineering (12-13 credit hours)

Required Introductory Course

MEGR 2499 - Introduction to Energy Engineering (1)

Energy Technical Elective Courses (12 credit hours)

Select four of the following:

- MEGR 3024 - Special Topics in Energy Engineering (2)
- MEGR 3094 - Special Topics in Energy Engineering (3)
- MEGR 3214 - Refrigeration and Air/Conditioning (3)
- MEGR 3221 - Machine Analysis and Design I (3)
(MEGR 3221 may count as an Energy Technical Elective only if MEGR 3216 is completed to fulfill the Design Elective.)
- MEGR 3225 - Introduction to Finite Element Analysis (3)
- MEGR 3260 - Clean Coal Technology (3)
- MEGR 3261 - Sustainable Energy (3)
- MEGR 3262 - Turbomachinery (3)
- MEGR 3282 - Statistical Process Control and Metrology (3)
- MEGR 3451 - Stationary Power Plant Systems (3)
- MEGR 3452 - Introduction to Nuclear Engineering (3)
- MEGR 4094 - Special Topics in Energy Engineering (3)
- MEGR 4210 - Automotive Powerplants (3)
- MEGR 4237 - Introduction to Control Systems (3)
- MEGR 4290 - Introduction to Electric Vehicles and Batteries (3)
- MEGR 4291 - Battery Performance and Testing (3)
- MEGR 4292 - Materials Science in Battery Technology (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 credit hours

Progression Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year Courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Bachelor of Science in Mechanical Engineering (B.S.M.E.) with Concentration in Motorsports Engineering

The B.S.M.E. with a Concentration in Motorsports Engineering program is intended for students interested in specialized and systematic training and education in the area of automotive engineering as it pertains to motorsports. Students completing the requirements described in this program will receive a special designation on their transcripts showing that they have completed the Motorsports Engineering concentration.

Admission Requirements

First-Year Students

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)
- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above
 - Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Additional Admission Requirements for the Concentration

- *Minimum GPA:* 2.50
- *Prerequisite Courses (with grades of C or above):*
 - PHYS 2101
 - PHYS 2101L
 - MATH 1242
 - ENGR 1300
 - ENGR 1301
 - ENGR 1302
 - ENGR 1303
 - WRDS 1103 or WRDS 1104
- *Declaration of Concentration:* Students must apply for admission to and may enter the concentration during their Sophomore or Junior year only.

Currently Enrolled Students

Internal Change of Major

Internal change of majors within the College of Engineering must have a minimum GPA of 2.50 (2.80 for Mechanical Engineering). Students who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Change of Major Into a Program in the College of Engineering

First-time college students who seek eligibility for a change of major from a non-engineering major into an engineering program are required to:

- Complete the First-Year Curriculum.
- Have no more than two attempts per course, including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).

Students Seeking Eligibility for a Change of Major

- Should continue to be advised by their current advisor.
- Should focus on successfully completing courses that count towards the program of interest and not rely on grades in unrelated courses to elevate the GPA.
- Are not permitted to enroll in Sophomore engineering courses.
- May request authorization to enroll in ENGR 1300, ENGR 1301, ENGR 1302 or ENGR 1303 via a request to the College of Engineering Advising department at osds-advising@charlotte.edu.

Transfers Seeking Eligibility for a Change of Major

Students who transfer to Charlotte into a non-engineering major and have not met the Transfer Requirements for a given engineering program are not guaranteed to be considered for a change of major. Representatives of the program of interest make decisions on a student's eligibility to pursue a change of major based on a holistic review of a student's entire academic record, including grades earned at other institutions. A record of unsuccessful attempts in courses will weigh negatively on such decisions. If transfer students are allowed to pursue eligibility for a change of major to a given program, they will be required to:

- Complete the Common First-Year Curriculum.
- Have no more than two attempts per course including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).
- Complete at least 12 credits of courses at Charlotte, including at least

four courses in math, science and/or engineering.

Common First-Year Curriculum (CFY)

The College of Engineering uses a Common First-Year Curriculum (CFY) for all Engineering students in order to:

- Provide a strong academic base of foundational knowledge and skills
- Facilitate changing majors within the first year
- Support students with lower math placement and increase access to all majors
- Allow students to explore different majors before committing
- Enhance learning with innovative pedagogies and activities

Common First-Year Courses

All new first year students are initially advised by a central office within the W.S. Lee College of Engineering. Students must complete the following classes that are common to all majors of the college (except Construction Management and Fire and Safety Engineering Technology) in order to progress and matriculate to their major department. *All First-Year Curriculum courses require a grade of C or better.*

ENGR 1300 Exploring Engineering & Technology with Success(2)

ENGR 1301 Foundations of Math and Science for Engineering(3)

ENGR 1302 Logic and Computational Problem Solving(3)

ENGR 1303 Engineering Visualization and Graphical Communication(3)

PHYS 2101(3)

PHYS 2101L(1)

Two MATH courses: MATH 1103* or MATH 1241* or MATH 1242* (3 each)

See Notes 1 and 2 below

* All students should consult their advisor to select the math courses that match their planned major.

Note 1

Progression into Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Mechanical Engineering, and Systems Engineering Major Courses after completing the Common First Year Curriculum requires that students also complete MATH 1241, MATH 1242, PHYS 2101, and PHYS 2101L.

Note 2

Progression into Civil Engineering Technology, Electromechanical Engineering Technology, and Mechanical Engineering Technology Major Courses after completing the Common First Year Curriculum requires that students complete MATH 1241, PHYS 2101, and PHYS 2101L with a C or better (except for Electromechanical Engineering Technology).

Note 3

Students must earn at least a 2.0 GPA in the first semester to continue into the second semester.

Degree Requirements

The BSME requires courses in Math, Science, Engineering and General Education. Some Math and Physics courses also satisfy General Education Requirements. The concentration in Motorsports Engineering requires a Motorsports-related senior design project as well as Motorsports Technical Electives.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

First-Year Courses (21 credit hours)

See Common First-Year Curriculum (CFY) for details.

Additional Math and Physics Courses (10 credit hours)

MATH 2171 - Differential Equations (3)

MATH 2241 - Calculus III (3)

PHYS 2102 - Physics for Science and Engineering II (3)

PHYS 2102L - Physics for Science and Engineering II Lab (1)

Major Courses (59 credit hours)

ENGR 3295 - Multidisciplinary Professional Development(1)

MEGR 2141 - Engineering Mechanics I(3)

MEGR 2144 - Introduction to Solid Mechanics(3)

MEGR 2152 - CAD for Mechanical Engineers(1)

MEGR 2157 - Design Projects I Laboratory(3)

MEGR 2173 - Mechatronics I(2)

MEGR 2174 - Mechatronics I Projects Laboratory(1)

MEGR 2180 - Manufacturing Systems(3)

MEGR 2233 - Math and Science for Engineers II(3)

MEGR 2234 - Math and Science for Engineers III(4)

MEGR 2242 - Computational Methods for Engineers(2)

MEGR 3111 - Thermodynamics I(3)

MEGR 3114 - Fluid Mechanics(3)

MEGR 3116 - Introduction to Heat Transfer(3)

MEGR 3121 - Dynamics Systems I(3)

MEGR 3123 - Dynamic Systems II(2)

MEGR 3152 - Mechanics and Materials Laboratory(2)

MEGR 3156 - Design Projects Lab II(2)

MEGR 3161 - Introduction to Engineering Materials(3)

MEGR 3173 - Mechatronics II(2)

MEGR 3174 - Mechatronics II Projects Laboratory(1)

MEGR 3251 - Thermal/Fluids Laboratory(2)

MEGR 3355 - Motorsports Senior Design I(2) *

MEGR 3356 - Motorsports Senior Design II(2) *

* Must be an approved Motorsports-related project.

Design Elective: Thermal/Fluids Design or Machine Analysis and Design

MEGR 3216 - Thermal/Fluid Design(3)

or MEGR 3221 - Machine Analysis and Design I(3)

These courses require a grade of C or better for the Mechanical Engineering curriculum: ENGR 1300, ENGR 1301, ENGR 1302, ENGR 1303, MATH 1241, MATH 1242, MATH 2171, MATH 2241, PHYS 2101, PHYS 2101L, PHYS 2102, PHYS 2102L, MEGR 2141, MEGR 2144, MEGR 2152, MEGR 2157, MEGR 2180, MEGR 2173, MEGR 2174, MEGR 2233, MEGR 2234, MEGR 2242, MEGR 3111, MEGR 3114, MEGR 3121, MEGR 3156, MEGR 3161, and MEGR 3174. Additional courses may require a grade of C or better for Technical Electives.

Concentration in Motorsports Engineering (12-13 credit hours)

Required Introductory Course

MEGR 2299 - Introduction to Motorsports Engineering(1)

Motorsports Technical Elective Courses

Select four of the following:

- MEGR 3022 - Special Topics in Motorsports Engineering (2)
- MEGR 3092 - Special Topics in Motorsports Engineering (3)
- MEGR 3221 - Machine Analysis and Design I (3) (*MEGR 3221 may count as a Motorsports Technical Elective only if MEGR 3216 is completed to fulfill the Design Elective*)
- MEGR 3225 - Introduction to Finite Element Analysis (3)
- MEGR 3231 - Advanced CAD/CAM (3)
- MEGR 3241 - Advanced Motorsports Instrumentation (3)
- MEGR 3242 - Applied Vehicle Aerodynamics (3)
- MEGR 3244 - Tire Mechanics (3)
- MEGR 3245 - Advanced Experimental Methods (3)
- MEGR 3282 - Statistical Process Control and Metrology (3)
- MEGR 4092 - Special Topics in Motorsports Engineering (3)
- MEGR 4210 - Automotive Powerplants (3)
- MEGR 4211 - Road Vehicle Dynamics (3)
- MEGR 4237 - Introduction to Control Systems (3)
- MEGR 4240 - Advanced Automotive Powerplants (3)
- MEGR 4290 - Introduction to Electric Vehicles and Batteries (3)
- MEGR 4291 - Battery Performance and Testing (3)
- MEGR 4292 - Materials Science in Battery Technology (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 credit hours

Progression Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year Courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Bachelor of Science in Mechanical Engineering (B.S.M.E.) with Concentration in Precision Engineering and Metrology

The B.S.M.E. with a Concentration in Precision Engineering and Metrology program is intended for students interested in specialized and systematic training and education in the area of precision engineering. Students completing the requirements described in this program will receive a special designation on their transcripts showing that they have completed the Precision Engineering and Metrology concentration.

Admission Requirements

First-Year Students

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)
- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above
 - Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Additional Admission Requirements for the Concentration

- Minimum GPA: 3.00
- *Prerequisite Courses*(with grades of C or above):
PHYS 2101
PHYS 2101L
MATH 1242
ENGR 1300
ENGR 1301
ENGR 1302
ENGR 1303
WRDS 1103 or WRDS 1104
MEGR 2141
- *Declaration of Concentration*: Students must apply for admission to and may enter the concentration during their Sophomore or Junior year.
- In order to remain in the concentration, a minimum overall GPA of 3.00 must be maintained.

Currently Enrolled Students

Internal Change of Major

Internal change of majors within the College of Engineering must have a minimum GPA of 2.50 (2.80 for Mechanical Engineering). Students who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Change of Major Into a Program in the College of Engineering

First-time college students who seek eligibility for a change of major from a non-engineering major into an engineering program are required to:

- Complete the First-Year Curriculum.
- Have no more than two attempts per course, including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).

Students Seeking Eligibility for a Change of Major

- Should continue to be advised by their current advisor.
- Should focus on successfully completing courses that count towards the program of interest and not rely on grades in unrelated courses to elevate the GPA.
- Are not permitted to enroll in Sophomore engineering courses.
- May request authorization to enroll in ENGR 1300, ENGR 1301, ENGR 1302 or ENGR 1303 via a request to the College of Engineering Advising department at osds-advising@charlotte.edu..

Transfers Seeking Eligibility for a Change of Major

Students who transfer to Charlotte into a non-engineering major and have not met the Transfer Requirements for a given engineering program are not guaranteed to be considered for a change of major. Representatives of the program of interest make decisions on a student's eligibility to pursue a change of major based on a holistic review of a student's entire academic record, including grades earned at other institutions. A record of unsuccessful attempts in courses will weigh negatively on such decisions. If transfer students are allowed to pursue eligibility for a change of major to a given program, they will be required to:

- Complete the Common First-Year Curriculum.
- Have no more than two attempts per course including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).
- Complete at least 12 credits of courses at Charlotte, including at least four courses in math, science and/or engineering.

Common First-Year Curriculum (CFY)

The College of Engineering uses a Common First-Year Curriculum (CFY) for all Engineering students in order to:

First-Year Courses (21 credit hours)

See Common First-Year Curriculum (CFY) for details.

Additional Math and Physics Courses (10 credit hours)

MATH 2171 - Differential Equations (3)
MATH 2241 - Calculus III (3)
PHYS 2102 - Physics for Science and Engineering II (3)
PHYS 2102L - Physics for Science and Engineering II Laboratory (1)

Major Courses (59 credit hours)

ENGR 3295 - Multidisciplinary Professional Development (1)
MEGR 2141 - Engineering Mechanics I (3)
MEGR 2144 - Introduction to Solid Mechanics (3)
MEGR 2152 - CAD for Mechanical Engineers (1)

MEGR 2157 - Design Projects I Laboratory (3)
MEGR 2173 - Mechatronics I (2)
MEGR 2174 - Mechatronics I Projects Laboratory (1)
MEGR 2180 - Manufacturing Systems (3)
MEGR 2233 - Math and Science for Engineers II (3)
MEGR 2234 - Math and Science for Engineers III (4)
MEGR 2242 - Computational Methods for Engineers (2)
MEGR 3111 - Thermodynamics I (3)
MEGR 3114 - Fluid Mechanics (3)
MEGR 3116 - Introduction to Heat Transfer (3)
MEGR 3121 - Dynamics Systems I (3)
MEGR 3123 - Dynamic Systems II (2)
MEGR 3152 - Mechanics and Materials Laboratory (2)
MEGR 3156 - Design Projects Lab II (2)
MEGR 3161 - Introduction to Engineering Materials (3)
MEGR 3173 - Mechatronics II (2)
MEGR 3174 - Mechatronics II Projects Laboratory (1)
MEGR 3251 - Thermal/Fluids Laboratory (2)
MEGR 3285 - Precision Senior Design I (2)*
MEGR 3286 - Precision Senior Design II (2)*
**Must be an approved Precision Engineering/Metrology-related project.*

Design Elective: Thermal/Fluids Design or Machine Analysis and Design
MEGR 3216 - Thermal/Fluid Design (3)
or MEGR 3221 - Machine Analysis and Design I (3)

These courses require a grade of C or better for the Mechanical Engineering curriculum: ENGR 1300, ENGR 1301, ENGR 1302, ENGR 1303, MATH 1241, MATH 1242, MATH 2171, MATH 2241, PHYS 2101, PHYS 2101L, PHYS 2102, PHYS 2102L, MEGR 2141, MEGR 2144, MEGR 2152, MEGR 2157, MEGR 2180, MEGR 2173, MEGR 2174, MEGR 2233, MEGR 2234, MEGR 2242, MEGR 3111, MEGR 3114, MEGR 3121, MEGR 3156, MEGR 3161, and MEGR 3174. Additional courses may require a grade of C or better for Technical Electives.

Concentration in Precision Engineering and Metrology (12-13 credit hours)

Required Introductory Course

MEGR 2289 – Introduction to Precision Engineering and Metrology (1)

Required Precision Technical Elective

All students in the concentration are required to successfully complete MEGR 3282.

MEGR 3282 – Statistical Process Control and Metrology (3)

Additional Precision Technical Electives

Select three of the following:

MEGR 3028 - Special Topics in Precision Engineering (2)
MEGR 3221 - Machine Analysis and Design I (3) (MEGR 3221 may count as a Precision Technical Elective only if MEGR 3216 is completed to fulfill the Design Elective)
MEGR 3225 - Introduction to Finite Element Analysis (3)
MEGR 3231 - Advanced CAD/CAM (3)
MEGR 3283 - Metrology and Precision Engineering (3)
MEGR 4235 - Waves and Optics (3)
MEGR 4237 - Introduction to Control Systems (3)
MEGR 4143 - Discrete Mechanical Vibrating Systems (3)
MEGR 4280 - Advanced Manufacturing Processes (3)
MEGR 4098 - Special Topics in Precision Engineering (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 credit hours

Progression Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year Courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a

course with a grade of W

- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Bachelor of Science in Mechanical Engineering and Bachelor of Science in Physics Dual Degree

This program is under revision. Please contact the Department of Physics and Optical Science for further details and program options.

The Department of Mechanical Engineering and Engineering Science and Department of Physics and Optical Science offer a dual degree designed to broaden and enhance the education of students in the mechanical engineering and physics degree programs. Students can obtain a B.S. in Mechanical Engineering and a B.S. in Physics dual degree.

Admission Requirements

First-Year Students and Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.00 (cumulative and Physics)
- *Pre-Major/Prerequisite Courses:* Complete the following with grades of C or above and no more than 2 attempts per course:
 - PHYS 2101
 - PHYS 2102
 - MATH 2241

Currently Enrolled Students

- *Declaration of Major:* Engineering majors wishing to declare the B.S. in Physics degree are eligible to do so after meeting the above requirements.

Degree Requirements

To obtain a dual B.S. degree in both Physics and Mechanical Engineering,

undergraduate students must complete all requirements for the B.S.M.E. degree as established by the Department of Mechanical Engineering and Engineering Science. In addition, students must complete 12 credit hours of upper-division PHYS courses specified by the Department of Physics and Optical Science with an average grade C or above. A B.S. in Physics under this program will be awarded at the same time as or after the B.S.M.E. The B.S. in Physics degree will not be awarded in advance of the B.S. in Mechanical Engineering degree.

Students in this dual degree program are not required to fulfill the College of Science Foreign Language Requirement.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foundation Courses (24 credit hours)

MEGR 1100 - Foundations of Math and Science for Engineers (4)

or

CHEM 1251 - General Chemistry I (3)

and CHEM 1251L - General Chemistry I Lab (1)

MATH 1241 - Calculus I (3)

MATH 1242 - Calculus II (3)

MATH 2171 - Differential Equations (3)

MATH 2241 - Calculus III (3)

PHYS 2101 - Physics for Science and Engineering I (3)

PHYS 2101L - Physics for Science and Engineering I Lab (1)

PHYS 2102 - Physics for Science and Engineering II (3)

PHYS 2102L - Physics for Science and Engineering II Lab (1)

Major Courses (57 credit hours)

ECGR 2161 - Basic Electrical Engineering I (3)

ENGR 1201 - Introduction to Engineering Practices and Principles I (2)

ENGR 1202 - Introduction to Engineering Practices and Principles II (2)

ENGR 3295 - Multidisciplinary Professional Development (1)

MEGR 2141 - Engineering Mechanics I (3)

MEGR 2144 - Introduction to Solid Mechanics (3)

MEGR 2156 - Design Projects I Lab (2)

MEGR 2180 - Manufacturing Systems (3)

MEGR 2240 - Computational Methods for Engineers (3)

MEGR 3111 - Thermodynamics I (3)

MEGR 3112 - Thermodynamics II (3)

MEGR 3114 - Fluid Mechanics (3)

MEGR 3116 - Introduction to Heat Transfer (3)

MEGR 3121 - Dynamic Systems I (3)

MEGR 3122 - Dynamic Systems II (3)

MEGR 3152 - Mechanics and Materials Lab (2)

MEGR 3156 - Design Project Lab II (2)

MEGR 3161 - Introduction to Engineering Materials (3)

MEGR 3171 - Introduction to Measurements and Instrumentation (2)

MEGR 3171L - Instrumentation Lab (2)

MEGR 3251 - Thermals/Fluids Lab (2)

MEGR 3255 - Senior Design I (2)

MEGR 3256 - Senior Design II (2)

Restricted Elective Courses (21 credit hours)

Design Elective Course (3 credit hours)

Select one of the following:

MEGR 3216 - Thermal/Fluid Design (3)

MEGR 3221 - Machine Analysis and Design I (3)

Note: Students are required to satisfy the Design Elective with either MEGR 3216 or MEGR 3221. Students may take MEGR 3216 and MEGR 3221 in order to satisfy the Design Elective and one Technical Elective (in which case MEGR 3216 satisfies the Design Elective and MEGR 3221 satisfies a Technical Elective or Concentration Elective for any concentration).

Science Elective Course (3 credit hours)

Select one of the following:

BIOL 1110 - Principles of Biology I (3)

CHEM 1252 - General Chemistry II (3)

GEOL 1200 - Physical Geology (3)

PHYS 1130 - Introduction to Astronomy (3)

Mathematics and Statistics Elective Course (3 credit hours)

Select one of the following options:

Option 1: -

STAT 3128 - Probability and Statistics for Engineers (3)

Option 2: -

MEGR 3282 - Statistical Process Control and Metrology (3) (*also counts as one Technical Elective*)

and

MATH 2164 - Matrices and Linear Algebra (3)

or MATH 3171 - Applied Mathematics (3) (*may count as a Math Elective or a Technical Elective, but not both*)

Technical Elective Courses (12 credit hours)

Select four of the following. At least three of the four must be MEGR courses.

MEGR 3090 - Special Topics in Mechanical Engineering (1 to 4) (*if the topic is relevant*)

MEGR 3092 - Special Topics in Motorsports Engineering (1 to 4) (*if the topic is relevant*)

MEGR 3094 - Special Topics in Energy Engineering (1 to 4) (*if the topic is relevant*)

MEGR 3097 - Special Topics in Biomedical Engineering (3) (*if the topic is relevant*)

MEGR 3162 - Mechanical Behavior and Strengthening of Solids (3)

MEGR 3210 - Automotive Power Plants (3)

MEGR 3211 - Road Vehicle Dynamics (3)

MEGR 3214 - Refrigeration and Air/Conditioning (3)

MEGR 3221 - Machine Analysis and Design I (3) (*may count as a Technical Elective only if MEGR 3216 is completed to fulfill the Design Elective*)

MEGR 3225 - Introduction to Finite Element Analysis (3)

MEGR 3231 - Advanced CAD/CAM (3)

MEGR 3232 - Plastic Part Design (3)

MEGR 3233 - Introduction to Biomaterials (3)

MEGR 3234 - Introduction to Biodynamics (3)

MEGR 3235 - Waves and Optics (3)

MEGR 3236 - Introduction to Nanoscale Science and Engineering (3)

MEGR 3237 - Introduction to Control Systems (3)

MEGR 3238 - Microscopy for Engineering (3)

MEGR 3240 - Advanced Automotive Powerplants (3)

MEGR 3241 - Advanced Motorsports Instrumentation (3)
MEGR 3242 - Applied Vehicle Aerodynamics (3)
MEGR 3244 - Tire Mechanics (3)
MEGR 3245 - Advanced Experimental Methods (3)
MEGR 3260 - Clean Coal Technology (3)
MEGR 3261 - Sustainable Energy (3)
MEGR 3262 - Turbomachinery (3)
MEGR 3270 - Biomedical Fluidics: Microfluidics (3)
MEGR 3271 - Biomedical Manufacturing: 3D Biofabrication (3)
MEGR 3272 - Introduction to Bio-Polymers and Composites (3)
MEGR 3282 - Statistical Process Control and Metrology (3)
MEGR 3283 - Metrology and Precision Engineering (3)
MEGR 3451 - Stationary Power Plant Systems (3)
MEGR 3452 - Introduction to Nuclear Engineering (3)
MEGR 4090 - Special Topics in Mechanical Engineering (3)
MEGR 4092 - Special Topics in Motorsports Engineering (3)
MEGR 4094 - Special Topics in Energy Engineering (3)
MEGR 4097 - Special Topics in Biomedical Engineering (3)
MEGR 4098 - Special Topics in Precision Engineering (3)
MEGR 4127 - Introduction to Robotics (3)
MEGR 4143 - Discrete Mechanical Vibrating Systems (3)
MEGR 4210 - Automotive Powerplants (3)
MEGR 4211 - Road Vehicle Dynamics (3)
MEGR 4235 - Waves and Optics (3)
MEGR 4237 - Introduction to Control Systems (3)
MEGR 4240 - Advanced Automotive Powerplants (3)
MEGR 4242 - Applied Vehicle Aerodynamics (3)
MEGR 4244 - Tire Mechanics (3)
MEGR 4271 - Orthopedic Biomechanics (3)
MEGR 4272 - Mechanics of the Human Locomotor System (3)
MEGR 4273 - Regenerative Neural Engineering (3)
MEGR 4274 - Bioelectronic Medicine (3)
MEGR 4280 - Advanced Manufacturing Processes (3)

BIOL 3161 - Introduction to Biotechnology (3)
MATH 3171 - Applied Mathematics (3) (*may count as a Math Elective or a Technical Elective, but not both*)
PHYS 3220 - Mathematical Methods in Physics (3)
PHYS 4110 - Introduction to Biomedical Optics (3)
PHYS 4140 - Nuclear Physics (3)
PHYS 4232 - Electromagnetic Theory II (3)
PHYS 4242 - Quantum Mechanics II (3)
PHYS 4271 - Waves and Optics (3)

Physics Courses (12 credit hours)

Required Physics Courses (9 credit hours)

PHYS 3141 - Introduction to Modern Physics (3)
PHYS 4231 - Electromagnetic Theory I (3)
PHYS 4241 - Quantum Mechanics I (3)

Elective Physics Course (3 credit hours)

Select one of the following. PHYS 3220 is strongly suggested unless a student is also a Mathematics major or minor:

PHYS 3160 - Stellar Astrophysics (3)
PHYS 3220 - Mathematical Methods in Physics (3)
PHYS 3900 - Undergraduate Research (1 to 3)
PHYS 4110 - Introduction to Biomedical Optics (3)
PHYS 4140 - Nuclear Physics (3)
PHYS 4181 - Solid State Physics (3)
PHYS 4232 - Electromagnetic Theory II (3)

PHYS 4242 - Quantum Mechanics II (3)
PHYS 4271 - Waves and Optics (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 129-132 credit hours

Progression Requirements

Students must have a 2.00 or above GPA in PHYS courses in order to graduate. A grade of C or above is required in most PHYS courses before students can progress to the next PHYS course. Students must also have a 2.00 overall GPA in engineering courses.

Minor in Mechanical Engineering

The Department of Mechanical Engineering offers a minor in Mechanical Engineering (MEGR) for non-MEGR majors.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Overall GPA of 2.80 or higher
- Completion of MATH 1242 and PHYS 2101, both with a grade of C or better
- A major other than Mechanical Engineering (MEGR)

Minor Requirements

A minor in Mechanical Engineering consists of 15 credit hours and requires the following:

Core Courses (12 credit hours)

The following four courses are required. All prerequisites for the courses must be satisfied prior to course enrollment.

MEGR 2141 – Engineering Mechanics I (3)
MEGR 2144 – Introduction to Solid Mechanics (3)
MEGR 3111 – Thermodynamics I (3)
MEGR 3121 – Dynamics Systems I (3)

Elective Course (3 credit hours)

Students are required to complete at least one elective course from the courses listed below. All prerequisites for the selected elective course(s) must be satisfied prior to course enrollment.

MEGR 2240 - Computational Methods for Engineers (3)
MEGR 3090 - Special Topics in Mechanical Engineering (3)
MEGR 3092 - Special Topics in Motorsports Engineering (3)
MEGR 3094 - Special Topics in Energy Engineering (3)
MEGR 3097 - Special Topics in Biomedical Engineering (3)
MEGR 3112 - Thermodynamics II (3)
MEGR 3114 - Fluid Mechanics (3)
MEGR 3116 - Introduction to Heat Transfer (3)
MEGR 3121 - Dynamics Systems I (3)
MEGR 3122 - Dynamic Systems II (3)
MEGR 3161 - Introduction to Engineering Materials (3)
MEGR 3210 - Automotive Power Plants (3)
MEGR 3211 - Road Vehicle Dynamics (3)

- MEGR 3214 - Refrigeration and Air/Conditioning (3)
MEGR 3216 - Thermal/Fluid Design (3)
MEGR 3221 - Machine Analysis and Design I (3)
MEGR 3225 - Introduction to Finite Element Analysis (3)
MEGR 3231 - Advanced CAD/CAM (3)
MEGR 3232 - Plastic Part Design (3)
MEGR 3233 - Introduction to Biomaterials (3)
MEGR 3234 - Introduction to Biodynamics (3)
MEGR 3235 - Waves and Optics (3)
MEGR 3236 - Introduction to Nanoscale Science and Engineering (3)
MEGR 3237 - Introduction to Control Systems (3)
MEGR 3238 - Microscopy for Engineering(3)
MEGR 3241 - Advanced Motorsports Instrumentation (3)
MEGR 3242 - Applied Vehicle Aerodynamics (3)
MEGR 3244 - Tire Mechanics (3)
MEGR 3260 - Clean Coal Technology (3)
MEGR 3261 - Sustainable Energy (3)
MEGR 3262 - Turbomachinery (3)
MEGR 3272 - Introduction to Bio-Polymers and Composites (3)
MEGR 3282 - Statistical Process Control and Metrology (3)
MEGR 3283 - Metrology and Precision Engineering (3)
MEGR 3451 - Stationary Power Plant Systems (3)
MEGR 3452 - Introduction to Nuclear Engineering (3)
MEGR 4090 - Special Topics in Mechanical Engineering (3)
MEGR 4092 - Special Topics in Motorsports Engineering (3)
MEGR 4094 - Special Topics in Energy Engineering (3)
MEGR 4097 - Special Topics in Biomedical Engineering (3)
MEGR 4098 - Special Topics in Precision Engineering (3)
MEGR 4127 - Introduction to Robotics (3)
MEGR 4143 - Discrete Mechanical Vibrating Systems (3)
MEGR 4210 - Automotive Powerplants (3)
MEGR 4211 - Road Vehicle Dynamics (3)
MEGR 4235 - Waves and Optics (3)
MEGR 4237 - Introduction to Control Systems (3)
MEGR 4242 - Applied Vehicle Aerodynamics (3)
MEGR 4244 - Tire Mechanics (3)
MEGR 4271 - Orthopedic Biomechanics (3)
MEGR 4272 - Mechanics of the Human Locomotor System (3)
MEGR 4273 - Regenerative Neural Engineering (3)
MEGR 4274 - Bioelectronic Medicine (3)
MEGR 4280 - Advanced Manufacturing Processes (3)

Minor Total = 15 Credit Hours

Progression Requirements

Students in the minor are required to:

- Achieve a minimum GPA of 2.00 in all minor courses
- Successfully complete all courses within two attempts
- Complete MATH 2171 with a grade of C or better in order to be eligible to register for MEGR 3111 and any other courses in the minor that have MATH 2171 as a prerequisite

Special Policies or Requirements

This minor is not available for students with a major in Mechanical Engineering.

Early Entry: Master of Science in Mechanical Engineering

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 earned undergraduate credit hours applicable to the B.S.M.E. degree
- Minimum 3.20 overall undergraduate GPA
- Acceptable scores on the GRE (*Exceptional undergraduate students with a cumulative GPA of 3.20 or above may receive an automatic waiver of the GRE requirement.*)
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approval by The Graduate School

Progression Requirements

- Completion of Early Entry Program Form prior to registering for graduate coursework each semester
- Maintain a minimum 3.00 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Department of Industrial and Systems Engineering

seem.charlotte.edu

Undergraduate Programs

- **B.S. in Systems Engineering (BSSE)**
 - Energy Systems
- **Early Entry: M.S. in Engineering Management**

The main objective of the Department of Industrial and Systems Engineering is to equip graduates with the essential Systems Engineering skills that are needed in industry to enable them to perform in a global engineering environment. These skills include:

- Decision and Risk Analysis
- Systems Modeling and Optimization
- Systems Design, Planning, and Analysis
- Supply Chain and Logistics Engineering
- Quality Engineering
- Engineering Management
- Energy Systems Design and Planning
- Communication and Presentation
- Understanding of Global Business Dynamics

These objectives are accomplished through a flexible curriculum and through interactions with other departments and colleges of the University and with the professional community.

"Systems Engineering is an engineering discipline whose responsibility is creating and executing an interdisciplinary process to ensure that the customers' and stakeholders' needs are satisfied in a high quality, trustworthy, cost-efficient and schedule-compliant manner throughout a system's entire life cycle." (INCOSE, 2007)

Systems Engineering as an engineering field has very broad applications in a wide variety of industries including energy, telecommunications, construction, manufacturing, transportation and distribution, information technology, financial services, automotive, retail, healthcare and airlines, at all levels from an entry position to top management. This wide applicability, along with a very strong focus to model, analyze and manage complex engineered systems with proven tools and techniques are the primary strengths of SE. Practically every organization requires Systems Engineers to identify, characterize, and solve the right problems and to eliminate inefficiencies and root-causes that generate these problems.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Degree Programs

The department offers a Bachelor of Science in Systems Engineering (BSSE) degree and a Master of Science in Engineering Management (MSEM) degree. For information about the master's program, see the *UNC Charlotte Graduate Catalog*.

Concentrations and technical and liberal studies electives allow flexibility for study in specific areas. Each student may design a technical elective program with his or her advisor's approval in order to achieve individual goals and follow a desired track.

Qualified students may apply for Early Entry into the graduate program in Engineering Management during their Junior or Senior year. If accepted, students may take optional courses for graduate credit and begin work on their master's degree while completing their undergraduate degree.

Student Outcomes

Upon graduation, our students will have:

- 1) An ability to apply knowledge of mathematics, science, and engineering to identify, formulate, and solve complex engineering problems.
- 2) An ability to apply the engineering design process to create thermal or mechanical systems that meet specified application goals with consideration for public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
- 3) An ability to communicate effectively with a range of audiences through oral and technical writing.
- 4) An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
- 5) A record of productive participation as team members or in leadership roles on multidisciplinary teams which create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
- 6) An ability to develop experimental protocols and perform experiments designed to test or verify mechanical principles, components, and properties; analyze results; interpret data; and use engineering judgment to draw conclusions.
- 7) An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Accreditation

The Bachelor of Science in Systems Engineering (BSSE) degree program within the Industrial and Systems Engineering Department at The University of North Carolina at Charlotte is accredited by the Engineering Accreditation Commission of ABET, www.abet.org.

Bachelor of Science in Systems Engineering (B.S.S.E.)

Admission Requirements

First-Year Students

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)
- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above
 - Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Currently Enrolled Students

Internal Change of Major

Internal change of majors within the College of Engineering must have a minimum GPA of 2.50 (2.80 for Mechanical Engineering). Students who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Change of Major Into a Program in the College of Engineering

First-time college students who seek eligibility for a change of major from a non-engineering major into an engineering program are required to:

- Complete the First-Year Curriculum.
- Have no more than two attempts per course, including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).

Students Seeking Eligibility for a Change of Major

- Should continue to be advised by their current advisor.
- Should focus on successfully completing courses that count towards the program of interest and not rely on grades in unrelated courses

to elevate the GPA.

- Are not permitted to enroll in Sophomore engineering courses.
- May request authorization to enroll in ENGR 1300, ENGR 1301, ENGR 1302 or ENGR 1303 via a request to the College of Engineering Advising department at osds-advising@charlotte.edu.

Transfers Seeking Eligibility for a Change of Major

Students who transfer to Charlotte into a non-engineering major and have not met the Transfer Requirements for a given engineering program are not guaranteed to be considered for a change of major. Representatives of the program of interest make decisions on a student's eligibility to pursue a change of major based on a holistic review of a student's entire academic record, including grades earned at other institutions. A record of unsuccessful attempts in courses will weigh negatively on such decisions. If transfer students are allowed to pursue eligibility for a change of major to a given program, they will be required to:

- Complete the Common First-Year Curriculum.
- Have no more than two attempts per course including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).
- Complete at least 12 credits of courses at Charlotte, including at least four courses in math, science and/or engineering.

Common First-Year Curriculum (CFY)

The College of Engineering uses a Common First-Year Curriculum (CFY) for all Engineering students in order to:

- Provide a strong academic base of foundational knowledge and skills
- Facilitate changing majors within the first year
- Support students with lower math placement and increase access to all majors
- Allow students to explore different majors before committing
- Enhance learning with innovative pedagogies and activities

Common First-Year Courses

All new first year students are initially advised by a central office within the W.S. Lee College of Engineering. Students must complete the following classes that are common to all majors of the college (except Construction Management and Fire and Safety Engineering Technology) in order to progress and matriculate to their major department. *All First-Year Curriculum courses require a grade of C or better.*

ENGR 1300 Exploring Engineering & Technology with Success (2)

ENGR 1301 Foundations of Math and Science for Engineering (3)

ENGR 1302 Logic and Computational Problem Solving (3)

ENGR 1303 Engineering Visualization and Graphical Communication (3)

PHYS 2101(3)

PHYS 2101L(1)

Two MATH courses: MATH 1103* or MATH 1241* or MATH 1242* (3 each)

See Notes 1 and 2 below

* All students should consult their advisor to select the math courses that match their planned major.

Note 1

Progression into Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Mechanical Engineering, and Systems Engineering Major Courses after completing the Common First Year Curriculum requires that students also complete MATH 1241, MATH 1242, PHYS 2101, and PHYS 2101L.

Note 2

Progression into Civil Engineering Technology, Electromechanical Engineering Technology, and Mechanical Engineering Technology Major Courses after completing the Common First Year Curriculum requires that students complete MATH 1241, PHYS 2101, and PHYS 2101L with a C or better (except for Electromechanical Engineering Technology).

Note 3

Students must earn at least a 2.0 GPA in the first semester to continue into the second semester.

Degree Requirements

A Major in Systems Engineering leading to the BSSE degree consists of 120 credit hours.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

First-Year Courses (21 credit hours)

See Common First-Year Curriculum (CFY) for details.

Major Courses (44 credit hours)

ENGR 3295 - Multidisciplinary Professional Development (1)
SEGR 2105 - Computational Methods for Systems Engineering I (3)
SEGR 2106 - Engineering Economic Analysis (3)
SEGR 2110 - Systems Engineering Concepts (3)
SEGR 3102 - System Simulation, Modeling, and Analysis (3)
SEGR 3105 - Computational Methods for Systems Engineering II (3)
SEGR 3107 - Decision and Risk Analysis (3)
SEGR 3110 - System Design and Deployment (3)
SEGR 3111 - Project Management (3)
SEGR 3201 - Operations Research I: Deterministic Models (3)
SEGR 3202 - Operations Research II: Stochastic Models (3)
SEGR 3290 - Systems Design Project I (2)
SEGR 3291 - Systems Design Project II (2)
SEGR 4114 - Production Control Systems (3)
SEGR 4141 - Engineering Experimental Design (3)
SEGR 4170 - Total Quality Systems (3)

Foundation Courses (16 credit hours)

MATH 2241 - Calculus III (3)
MATH 2164 - Matrices and Linear Algebra (3)
MATH 2171 - Differential Equations (3)
PHYS 2102 - Physics for Science and Engineering II (3)
PHYS 2102L - Physics for Science and Engineering II Lab (1)
STAT 3128 - Probability and Statistics for Engineers (3)

Restricted Elective Courses (21 credit hours)

Physical Science Elective Course (3 credit hours)

Students must select one of the following physical science courses to fulfill the requirements for the First-Year engineering curriculum. It must complement the student's overall educational plan. Other courses with significant physical science content that are not listed may fulfill the requirement, but require the approval of the Undergraduate Program Director.

BIOL 1110 - Principles of Biology I (3)
BIOL 2120 - General Biology I (3)
CHEM 1200 - Fundamentals of Chemistry (3)
ESCI 1101 - Earth Sciences-Geography (3)
GEOL 1200 - Physical Geology (3)
PHYS 1102 - Introductory Physics II (3)
PHYS 1130 - Introduction to Astronomy (3)
PHYS 1201 - Sports and Physics (3)
PHYS 1202 - Introduction to Physics in Medicine (3)
PHYS 1203 - Physics of Music (3)

Systems Engineering Technical Elective Courses (18 credit hours)

Technical Elective Courses (6 credit hours)

BSSE students must complete 6 credit hours of technical elective courses approved by their advisor to fulfill the requirements for their BSSE degree. The technical electives are meant to both broaden the student's technical capabilities and complement the student's core BSSE course requirements. Technical elective courses cannot be used to fulfill both the Technical Elective requirements and the Additional Technical Elective requirements (i.e., no double counting of course credit hours toward the BSSE degree). In addition to SEGR courses, the courses below from outside the Department of Industrial and Systems Engineering are approved as technical elective courses. Please note that many of these courses may also have prerequisites.

SEGR 2XXX - Systems Engineering Elective (3)
SEGR 3XXX - Systems Engineering Elective (3)
SEGR 4XXX - Systems Engineering Elective (3)
ACCT 2121 - Principles of Accounting I (3)
ACCT 2122 - Principles of Accounting II (3)
CEGR 3122 - Structural Analysis (3)
CEGR 3141 - Introduction to Environmental Engineering (3)
CEGR 3153 - Transportation Laboratory (2)
CEGR 3155 - Environmental Laboratory (2)
CEGR 3161 - Transportation Engineering I (3)
CEGR 4108 - Finite Element Analysis and Applications (3)
CEGR 4161 - Advanced Traffic Engineering (3)
CEGR 4162 - Transportation Planning (3)
CEGR 4171 - Urban Public Transportation (3)
CEGR 4181 - Human Factors in Traffic Engineering (3)
CEGR 4262 - Traffic Engineering (3)
ECGR 2111 - Network Theory I (3)
ECGR 2112 - Network Theory II (3)
ECGR 2155 - Instrumentation and Networks Laboratory (1)
ECGR 2156 - Logic and Networks Laboratory (1)
ECGR 2161 - Basic Electrical Engineering I (3)
ECGR 2181 - Logic Systems Design (3)
ECGR 3123 - Data Communications and Networking (3)
ECGR 3131 - Fundamentals of Electronics and Semiconductors (3)
ECON 2102 - Principles of Economics - Micro (3)
ECON 3125 - Managerial Economics (3)
ECON 4181 - Energy and Environmental Economics (3)

ESCI 3180 - Environmental Impact Analysis (3)
FINN 3120 - Financial Management (3)
FINN 3220 - Financial Analysis (3)
FINN 3223 - International Financial Management (3)
FINN 3271 - Principles of Risk Management and Insurance (3)
FINN 4275 - Corporate Risk Management (3)
GEOG 4103 - Computer Programming for GIS Applications (3)
GEOG 4110 - GIS for Non-Majors (3)
GEOG 4130 - Advanced Geographic Information Systems (4)

STAT 4116 - Statistical Computing (3)

Additional Technical Elective Courses (12 credit hours)

BSSE students can pursue an optional Concentration in Energy Systems. Students who are not enrolled in a concentration are considered undeclared and select four additional Systems Engineering Technical Elective courses from the list above to fulfill their BSSE degree requirements. Any elective course listed above at the 3000- or 4000-level may be taken. However, these elective courses cannot be used to fulfill both the Technical Elective requirements and the Additional Technical Elective requirements (i.e., no double counting of course credit hours toward the BSSE degree). Please note that many of these courses may also have prerequisites.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 credit hours

Progression Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.5 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Bachelor of Science in Systems Engineering (B.S.S.E.) with Concentration in Energy Systems

Admission Requirements

First-Year Students

First-year admission is competitive, based upon an overall evaluation of the high school record, with particular emphasis on advanced courses in math and science. See University Admission Requirements for a detailed description of the criteria.

First-Year students may either select a major at the time of their application or may choose to be Engineering-undeclared. All First-Year College of Engineering students will take a common set of courses called the Common First Year. Towards the end of their first year, having completed all progression requirements, students will declare or confirm their Engineering Major for the second through fourth years. This selection may be the major they initially indicated or any other engineering major for which they meet the progression requirements.

Transfers

All transfer students will be evaluated for placement into a departmental Program or the Common First Year program based on the evaluation of their transfer credits (consistent with the North Carolina articulation agreements).

- See University Admission Requirements
- Minimum GPA: 2.50 (2.80 for Mechanical Engineering)
- Pre-Major/Prerequisite Courses:
 - Engineering Programs: Calculus I course (equivalent to MATH 1241), with a grade of C or above
 - Engineering Technology Programs: Pre-calculus course (equivalent to MATH 1103) or higher, with a grade of C or above
- Transferable Credit Hours: Minimum of 24

Transfers from an ABET-accredited engineering program who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Currently Enrolled Students

Internal Change of Major

Internal change of majors within the College of Engineering must have a minimum GPA of 2.50 (2.80 for Mechanical Engineering). Students who do not meet the GPA requirement may be admitted upon the recommendation of the chair of the major department.

Change of Major Into a Program in the College of Engineering

First-time college students who seek eligibility for a change of major from a non-engineering major into an engineering program are required to:

- Complete the First-Year Curriculum.
- Have no more than two attempts per course, including withdrawing from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).

Students Seeking Eligibility for a Change of Major

- Should continue to be advised by their current advisor.
- Should focus on successfully completing courses that count towards the program of interest and not rely on grades in unrelated courses to elevate the GPA.
- Are not permitted to enroll in Sophomore engineering courses.
- May request authorization to enroll in ENGR 1300, ENGR 1301, ENGR 1302 or ENGR 1303 via a request to the College of Engineering Advising department at osds-advising@charlotte.edu.

Transfers Seeking Eligibility for a Change of Major

Students who transfer to Charlotte into a non-engineering major and have not met the Transfer Requirements for a given engineering program are not guaranteed to be considered for a change of major. Representatives of the program of interest make decisions on a student's eligibility to pursue a change of major based on a holistic review of a student's entire academic record, including grades earned at other institutions. A record of unsuccessful attempts in courses will weigh negatively on such decisions. If transfer students are allowed to pursue eligibility for a change of major to a given program, they will be required to:

- Complete the Common First-Year Curriculum.
- Have no more than two attempts per course including withdrawing

- from a course with a grade of W.
- Achieve an overall GPA of 2.50 (2.80 for Mechanical Engineering).
 - Complete at least 12 credits of courses at Charlotte, including at least four courses in math, science and/or engineering.

Common First-Year Curriculum (CFY)

The College of Engineering uses a Common First-Year Curriculum (CFY) for all Engineering students in order to:

- Provide a strong academic base of foundational knowledge and skills
- Facilitate changing majors within the first year
- Support students with lower math placement and increase access to all majors
- Allow students to explore different majors before committing
- Enhance learning with innovative pedagogies and activities

Common First-Year Courses

All new first year students are initially advised by a central office within the W.S. Lee College of Engineering. Students must complete the following classes that are common to all majors of the college (except Construction Management and Fire and Safety Engineering Technology) in order to progress and matriculate to their major department. *All First-Year Curriculum courses require a grade of C or better.*

ENGR 1300 Exploring Engineering & Technology with Success (2)
 ENGR 1301 Foundations of Math and Science for Engineering (3)
 ENGR 1302 Logic and Computational Problem Solving (3)
 ENGR 1303 Engineering Visualization and Graphical Communication (3)
 PHYS 2101 (3)
 PHYS 2101L (1)
 Two MATH courses: MATH 1103* or MATH 1241* or MATH 1242* (3 each)
See Notes 1 and 2 below

* All students should consult their advisor to select the math courses that match their planned major.

Note 1

Progression into Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Mechanical Engineering, and Systems Engineering Major Courses after completing the Common First Year Curriculum requires that students also complete MATH 1241, MATH 1242, PHYS 2101, and PHYS 2101L.

Note 2

Progression into Civil Engineering Technology, Electromechanical Engineering Technology, and Mechanical Engineering Technology Major Courses after completing the Common First Year Curriculum requires that students complete MATH 1241, PHYS 2101, and PHYS 2101L with a C or better (except for Electromechanical Engineering Technology).

Note 3

Students must earn at least a 2.0 GPA in the first semester to continue into the second semester.

Degree Requirements

A Major in Systems Engineering leading to the BSSE degree consists of 120 credit hours. BSSE students can select this optional concentration by the end of their Sophomore year.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

First-Year Courses (21 credit hours)

See Common First-Year Curriculum (CFY) for details.

Major Courses (44 credit hours)

ENGR 3295 – Multidisciplinary Professional Development (1)
 SEGR 2105 - Computational Methods for Systems Engineering I (3)
 SEGR 2106 - Engineering Economics Analysis (3)
 SEGR 2110 - Systems Engineering Concepts (3)
 SEGR 3102 - Systems Stimulation, Modeling, and Analysis (3)
 SEGR 3105 - Computational Methods for Systems Engineering II (3)
 SEGR 3107 - Decision and Risk Analysis (3)
 SEGR 3110 - System Design and Deployment (3)
 SEGR 3111 - Project Management (3)
 SEGR 3201 - Operations Research I: Deterministic Models (3)
 SEGR 3202 - Operations Research II: Stochastic Models (3)
 SEGR 3290 - Systems Design Project I (2)
 SEGR 3291 - Systems Design Project II (2)
 SEGR 4114 - Production Control Systems (3)
 SEGR 4141 - Engineering Experimental Design (3)
 SEGR 4170 - Total Quality Systems (3)

Foundation Courses (16 credit hours)

MATH 2241 – Calculus III (3)
 MATH 2164 - Matrices and Linear Algebra (3)
 MATH 2171 - Differential Equations (3)
 PHYS 2102 - Physics for Science and Engineering II (3)
 PHYS 2102L - Physics for Science and Engineering II Lab (1)
 STAT 3128 - Probability and Statistics for Engineers (3)

Restricted Elective Courses (9 credit hours)

Physical Science Elective Course (3 credit hours)

Students must select one of the following physical science courses to fulfill the requirements for the First-Year engineering curriculum. It must complement the student's overall educational plan. Other courses with significant physical science content that are not listed may fulfill the requirement, but require the approval of the Undergraduate Program Director.

Biol 1110 - Principles of Biology I (3)
 Biol 2120 - General Biology I (3)
 Chem 1200 - Fundamentals of Chemistry (3)
 Esci 1101 - Earth Sciences-Geography (3)
 Geol 1200 - Physical Geology (3)
 Phys 1101 - Introductory Physics I (3)
 Phys 1102 - Introductory Physics II (3)
 Phys 1130 - Introduction to Astronomy (3)
 Phys 1201 - Sports and Physics (3)
 Phys 1202 - Introduction to Physics in Medicine (3)
 Phys 1203 - Physics of Music (3)

Technical Elective Courses (6 credit hours)

BSSE students must complete 6 credit hours of technical elective courses approved by their advisor to fulfill the requirements for their BSSE degree.

The technical electives are meant to both broaden the student's technical capabilities and complement the student's core BSSE course requirements. Technical elective courses cannot be used to fulfill both the Technical Elective requirements and the Additional Technical Elective requirements (i.e., no double counting of course credit hours toward the BSSE degree). In addition to SEGR courses, the courses below from outside the Department of Industrial and Systems Engineering are approved as technical elective courses. Please note that many of these courses may also have prerequisites.

Any SEGR course at the 2000-, 3000-, or 4000- level
 ACCT 2121 - Principles of Accounting I (3)
 ACCT 2122 - Principles of Accounting II (3)
 CEGR 3122 - Structural Analysis (3)
 CEGR 3141 - Introduction to Environmental Engineering (3)
 CEGR 3153 - Transportation Laboratory (2)
 CEGR 3155 - Environmental Laboratory (2)
 CEGR 3161 - Transportation Engineering I (3)
 CEGR 4108 - Finite Element Analysis and Applications (3)
 CEGR 4161 - Advanced Traffic Engineering (3)
 CEGR 4162 - Transportation Planning (3)
 CEGR 4171 - Urban Public Transportation (3)
 CEGR 4181 - Human Factors in Traffic Engineering (3)
 CEGR 4262 - Traffic Engineering (3)
 ECGR 2111 - Network Theory I (3)
 ECGR 2112 - Network Theory II (3)
 ECGR 2155 - Instrumentation and Networks Laboratory (1)
 ECGR 2156 - Logic and Networks Laboratory (1)
 ECGR 2161 - Basic Electrical Engineering I (3)
 ECGR 2181 - Logic Systems Design (3)
 ECGR 3123 - Data Communications and Networking (3)
 ECGR 3131 - Fundamentals of Electronics and Semiconductors (3)
 ECON 2102 - Principles of Economics - Micro (3)
 ECON 3125 - Managerial Economics (3)
 ECON 4181 - Energy and Environmental Economics (3)
 ESCI 3180 - Environmental Impact Analysis (3)
 FINN 3120 - Financial Management (3)
 FINN 3220 - Financial Analysis (3)
 FINN 3223 - International Financial Management (3)
 FINN 3271 - Principles of Risk Management and Insurance (3)
 FINN 4275 - Corporate Risk Management (3)
 GEOG 4103 - Computer Programming for GIS Applications (3)
 GEOG 4110 - GIS for Non-Majors (3)
 GEOG 4130 - Advanced Geographic Information Systems (4)
 GEOG 4140 - Geographic Information Techniques for Community Planning (4)
 GEOG 4155 - Retail Location (3)
 GEOG 4210 - Urban Planning Methods (3)
 GEOG 4255 - Applied Population Analysis (3)
 GEOG 4260 - Transportation Policy Formulation (3)

 ITCS 4122 - Visual Analytics (3)
 ITCS 4156 - Introduction to Machine Learning (3)
 MATH 2342 - Data Analysis and Probability (3)
 MATH 3116 - Graph Theory (3)

MATH 3166 - Combinatorics (3)
 MATH 3176 - Numerical Analysis (3)
 MATH 3228 - Actuarial Science IB (3)
 MATH 3229 - Actuarial Science IIA (3)
 MATH 4128 - Risk Theory (3)
 MEGR 2141 - Engineering Mechanics I (3)
 MEGR 2144 - Introduction to Solid Mechanics (3)
 MEGR 2180 - Manufacturing Systems (3)
 MEGR 3111 - Thermodynamics I (3)
 MEGR 3112 - Thermodynamics II (3)
 MEGR 3116 - Introduction to Heat Transfer (3)
 MEGR 3121 - Dynamics Systems I (3)
 MEGR 3122 - Dynamic Systems II (3)
 MEGR 3161 - Introduction to Engineering Materials (3)
 MEGR 3162 - Mechanical Behavior and Strengthening of Solids (3)
 MEGR 3171 - Introduction to Measurements and Instrumentation (2)
 MEGR 3171L - Instrumentation Laboratory (2)
 MEGR 3225 - Introduction to Finite Element Analysis (3)
 MEGR 3282 - Statistical Process Control and Metrology (3)
 MEGR 4127 - Introduction to Robotics (3)
 MGMT 3140 - Management and Organizational Behavior (3)
 MGMT 3241 - Acquiring and Maintaining Talent (3)
 MGMT 3260 - Managerial Communication (3)
 MGMT 3274 - International Business Processes and Problems (3)
 MKTG 3110 - Marketing Concepts (3)
 OPER 3100 - Operations Management (3)
 OPER 3204 - Management of Service and Project Operations (3)
 OPER 3208 - Supply Chain Management (3)
 OPRS 4113 - Game Theory (3)
 OPRS 4114 - Dynamic Programming (3)
 STAT 3150 - Time Series Analysis (3)
 STAT 3160 - Applied Multivariate Analysis (3)
 STAT 4116 - Statistical Computing (3)

Concentration Courses (12 credit hours)

Elective Courses (9 credit hours)

Select three of the following:

SEGR 4961 - Introduction to Energy Systems (3)
 SEGR 4962 - Energy Markets (3)
 SEGR 4963 - Energy Systems Planning (3)
 SEGR 4964 - Case Studies in the Energy Industry (3)

Elective Course (3 credit hours)

Select one of the following not already taken from above list:
 SEGR 4201 - Fundamentals of Deterministic System Analysis (3)
 SEGR 4202 - Fundamentals of Stochastic System Analysis (3)
 SEGR 4203 - Fundamentals of Engineering Management (3)
 SEGR 4961 - Introduction to Energy Systems (3)
 SEGR 4962 - Energy Markets (3)
 SEGR 4963 - Energy Systems Planning (3)
 SEGR 4964 - Case Studies in the Energy Industry (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 credit hours

Progression Requirements

After completing the Common First Year Curriculum (CFY) courses, students will decide on their engineering major for their second through fourth years, which may be the major they initially indicated or any other engineering major. Students must meet the following requirements in order to register for major courses:

Engineering Majors

Engineering majors must complete all of the below requirements before enrolling in W.S. Lee College of Engineering sophomore-year engineering courses.

- Pass all courses within two attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1242, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year Curriculum courses (2.80 for Mechanical Engineering majors)

Engineering Technology and Construction Management Majors

Civil Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum, including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Electromechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum including MATH 1241 with grade of C or above and PHYS 2101 and PHYS 2101L
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the Common First Year courses

Mechanical Engineering Technology

- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete all courses in the Common First Year Curriculum including MATH 1241, PHYS 2101, and PHYS 2101L, with grades of C or above
- Complete the Common First Year Curriculum within four semesters
- Earn a 2.2 cumulative GPA upon completion of the Common First Year courses

Construction Management

- Complete CMET 1400, ETCE 1222, ETCE 1211L, and MATH 1103
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Fire & Safety)

- Complete ETFS 1152, ETFS 1201, ETFS 1220, ETFS 1244, and MATH 1100
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Fire & Safety Engineering Technology (Occupational Safety)

- Complete BIOL 1110, ETFS 1201, ETFS 1220, ETGR 2230, MATH 1103, PSYC 1101 and STAT 1220
- Pass all courses within three attempts, including withdrawing from a course with a grade of W
- Complete the Common First Year curriculum within four semesters
- Earn a 2.0 cumulative GPA upon completion of the First Year core courses

Early Entry: Master of Science in Engineering Management

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.20 overall undergraduate GPA
- Minimum 3.20 GPA in the major
- Acceptable scores on the appropriate graduate standardized test (GRE) (*The GRE test requirement may be waived for applicants from an engineering program that is accredited by ABET-Engineering*)
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Department of Industrial and Systems Engineering and The Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.00 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

College of **Health and Human Services**

College of Health and Human Services

health.charlotte.edu

The College of Health and Human Services (CHHS) offers professionally recognized and accessible undergraduate and graduate degree programs that are nationally and globally relevant, and responsive to changing health care and human service needs in the state and region. The College achieves excellence through informed and effective teaching in its degree programs, community partnerships, and professional activities and research to advance science and practice in the health and human services professions.

In addition to program-specific special accreditations maintained by most of the College's programs, the College as a whole is an applicant for school-level accreditation by the Council on Education for Public Health. As part of this school-level accreditation, students in all programs housed within the College's academic units will receive foundation public health training prior to graduation.

The College of Health and Human Services consists of these academic units:

- **Department of Applied Physiology, Health, and Clinical Sciences**
- **Department of Epidemiology and Community Health**
- **Department of Health Management and Policy**
- **School of Nursing**
- **School of Social Work**

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Degree Programs

Majors

- Bachelor of Science in Exercise Science (B.S.)
- Bachelor of Science in Health Systems Management (B.S.)
- Bachelor of Science in Nursing (B.S.N.)
- Bachelor of Science in Public Health (B.S.P.H.)
- Bachelor of Science in Respiratory Therapy (B.S.R.T.)
- Bachelor of Social Work (B.S.W.)

Minors

- Gerontology
- Outdoor Adventure Leadership
- Public Health

Certificates

- Undergraduate Certificate in Clinical Research Management
- Undergraduate Certificate in Nutrition
- Undergraduate Certificate in Sports Analytics

Accreditation

See the "Academic Programs" section of this Catalog for details about program accreditation.

Technical Standards

Technical standards define the attributes that are considered necessary for nursing students to possess in order to complete their education and training, and subsequently enter clinical practice. These technical standards are prerequisites for entrance to, continuation in, and graduation from a student's chosen program in the College of Health and Human Services at the University of North Carolina at Charlotte.

Students must possess aptitude, ability, and skills in four areas: Psychomotor (coordination/mobility); Senses (visual, auditory, tactile, olfactory); Communication (verbal, nonverbal, written); and Behavioral/Social Attributes.

The technical standards described by the student's chosen program are critically important to the student and must be performed by the student. Contact specific programs for detailed technical standards. Documentation of any disability is accomplished through the University Office of Disability Services.

Foreign Language Requirement

There is no foreign language requirement for undergraduate students enrolled as majors within the College of Health and Human Services, although it is highly recommended for students to become proficient in a second language.

Department of Applied Physiology, Health, and Clinical Sciences

aphcs.charlotte.edu

Undergraduate Programs

- **B.S. in Exercise Science**
 - Health and Fitness
 - Pre-Professional
 - Strength and Conditioning
 - Honors Program
- **B.S.R.T. in Respiratory Therapy**
 - Honors Program
- **Minor in Outdoor Adventure Leadership**
- **Undergraduate Certificate in Clinical Research Management**
- **Undergraduate Certificate in Nutrition**
- **Undergraduate Certificate in Sports Analytics**
- **Early Entry: M.S. in Athletic Training**
- **Early Entry: M.S. in Kinesiology**
- **Early Entry: M.S. in Respiratory Care**

The mission of the Department of Applied Physiology, Health, and Clinical Sciences is to promote optimal health and well-being by encouraging life-long movement and activity in a variety of populations through scholarly research, teaching, and service. The department offers both undergraduate majors and minors, graduate programs, and multiple courses emphasizing lifetime physical activity and physical fitness.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Science in Exercise Science with Concentration in Health and Fitness

The Exercise Science degree program offers preparation for employment as Exercise Science practitioners in business and industry, healthcare agencies, hospitals, fitness centers, sports performance centers, schools, and other settings which utilize exercise and physical activity to promote healthy active lifestyles and outcomes.

Exercise Science majors have the option to declare the Health and Fitness Concentration. The curriculum prepares students to apply industry standard, evidence-based guidelines to the roles and responsibilities of an exercise science practitioner, including: pre-activity screening, health and fitness assessment, exercise prescription, and risk management. Students are encouraged to sit for the American College of Sports

Medicine Certified Exercise Physiologist Credentialing Exam.

The Exercise Science Health and Fitness concentration is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) and the Committee on Accreditation of the Exercise Science (CoAES).

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- *Minimum Prerequisite GPA:* 2.5
- *Pre-Major/Prerequisite Courses:* Completion of 36 credit hours of coursework. Grade of C or above in all Pre-Exercise Science courses. The prerequisite GPA includes the following courses:
 - EXER 2101
 - EXER 2150
 - EXER 2168
 - EXER 2168L
 - EXER 2169
 - EXER 2169L
 - CHEM 1203 or CHEM 1251
 - CHEM 1203L or CHEM 1251L
 - STAT 1220, STAT 1221, or STAT 1222
- All Pre-Exercise Science majors are subject to a Conduct Check facilitated by the Dean of Students Office. The result may impact acceptance into the Exercise Science program.
- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Declaration of Major:* All incoming students are initially classified as Pre- Exercise Science (PEXE) majors until the requirements above are met in order to apply to the upper-division Exercise Science (EXER) major.
- *Declaration of Concentration:* Students must be an Exercise Science major and complete a Concentration Application.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Prerequisite Courses (21 credit hours)

- EXER 2101 - Foundations of Physical Conditioning (3)
- EXER 2150 - Introduction to Exercise Science (3)
- EXER 2168 - Human Anatomy and Physiology for the Health Professions (3)
- EXER 2168L - Human Anatomy and Physiology Laboratory for the Health Professions (1)
- EXER 2169 - Human Anatomy and Physiology for the Health Professions II (3)
- EXER 2169L - Human Anatomy and Physiology for the Health Professions II Laboratory (1)
- CHEM 1203 - Introduction to General, Organic, and Biochemistry I (3) or CHEM 1251 - General Chemistry I (3)
- CHEM 1203L - Introduction to General, Organic, and Biochemistry I Laboratory (1) or CHEM 1251L - General Chemistry I Laboratory (1)

STAT 1220 - Elements of Statistics I (BUSN) (3)
or STAT 1221 - Elements of Statistics I (3)
or STAT 1222 - Introduction to Statistics (3)

Major Courses (27 credit hours)

EXER 3198 - Applied Kinesiology (3)
EXER 3260 - Nutrition for the Physically Active (3)
EXER 3280 - Exercise Physiology: Foundation and Theory (3)
EXER 3285 - Principles of Strength and Conditioning (3)
EXER 3286 - Exercise Testing: Foundation and Theory (3)
EXER 3287 - Exercise Testing: Principles and Applications (3)
EXER 4121 - Pharmacology for the Physically Active (3)
EXER 4286 - Exercise Prescription (3)
EXER 4293 - Biomechanics (3)

Concentration Courses (19 credit hours)

Required Courses (10 credit hours)

EXER 2290 - Emergency Medical Response (3)
EXER 3100 - Organization and Administration of Exercise Science (3)
EXER 3660 - Practitioner Seminar (1)
EXER 4132 - Lifetime Weight Management and Behavior Change (3)
or EXER 4333 - Sport and Exercise Psychology (3)

Internship (9 credit hours)

EXER 4490 is taken during the last semester in the major. All required major courses (except EXER 4132) must be completed with a grade of C or above prior to the internship.

EXER 4490 - Exercise Science Internship (9)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

All of the required courses for the Pre-Exercise Science major, Exercise Science major, and Health and Fitness concentration must be completed with a grade of C or above. Students may repeat each required Pre-Exercise Science or Exercise Science course once, for a total of 2 attempts. Withdrawals are not counted towards the repeat limits, but students are limited to 16 credit hours of self-withdrawals during their academic career. If a student does not earn a grade of C or higher within the two allowed attempts, he/she/they will be dismissed from the major. If a student feels he/she/they have grounds to appeal this policy, an appeal may be submitted for review by the Program Director and Exercise Science Committee.

Honors Program

For details about the Honors Program in the Department of Applied Physiology, Health, and Clinical Sciences, see the Honors Programs section below.

Bachelor of Science in Exercise Science with Pre-Professional Concentration

The Exercise Science major with a Pre-Professional Concentration prepares students to pursue professional graduate health care programs

including, but not limited to, athletic training, occupational therapy, physical therapy, and physician assistant.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- *Minimum Prerequisite GPA: 2.5*
- *Pre-Major/Prerequisite Courses:* Completion of 36 credit hours of coursework. Grade of C or above in all Pre-Exercise Science courses. The prerequisite GPA includes the following courses:
 - EXER 2101
 - EXER 2150
 - EXER 2168
 - EXER 2168L
 - EXER 2169
 - EXER 2169L
 - CHEM 1251 or CHEM 1203
 - CHEM 1251L or CHEM 1203L
 - STAT 1222
- All Pre-Exercise Science majors are subject to a Conduct Check facilitated by the Dean of Students Office. The result may impact acceptance into the Exercise Science program.

Currently Enrolled Students

- *Declaration of Major:* Students are initially classified as Pre-Exercise Science (PEXE) majors until the requirements above are met in order to apply to the upper-division Exercise Science major.

Currently Enrolled Students from Another Major

- Students who wish to declare the Pre-Exercise Science major will register for and attend a Change of Major Orientation through the CHHS Advising Center.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foundation Courses (21 credit hours)

EXER 2101 - Foundations of Physical Conditioning (3)
EXER 2150 - Introduction to Exercise Science (3)
EXER 2168 - Human Anatomy and Physiology for the Health Professions (3)
EXER 2168L - Human Anatomy and Physiology Laboratory for the Health Professions (1)
EXER 2169 - Human Anatomy and Physiology for the Health Professions II (3)
EXER 2169L - Human Anatomy and Physiology for the Health Professions II Laboratory (1)
CHEM 1203 - Introduction to General, Organic, and Biochemistry I (3)
or CHEM 1251 - General Chemistry I (3)
CHEM 1203L - Introduction to General, Organic, and Biochemistry I Laboratory (1)
or CHEM 1251L - General Chemistry I Laboratory (1)
STAT 1220 - Elements of Statistics I (BUSN) (3)
or STAT 1221 - Elements of Statistics I (3)
or STAT 1222 - Introduction to Statistics (3)

Major Courses (27 credit hours)

- EXER 3198 - Applied Kinesiology (3)
- EXER 3260 - Nutrition for the Physically Active (3)
- EXER 3280 - Exercise Physiology: Foundation and Theory (3)
- EXER 3285 - Principles of Strength and Conditioning (3)
- EXER 3286 - Exercise Testing: Foundation and Theory (3)
- EXER 3287 - Exercise Testing: Principles and Applications (3)
- EXER 4121 - Pharmacology for the Physically Active (3)
- EXER 4286 - Exercise Prescription (3)
- EXER 4293 - Biomechanics (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation. Suggested courses for majors include:

- EXER 2290 - Emergency Medical Response (3)
- EXER 3100 - Organization and Administration of Exercise Science (3)
- EXER 3490 - Exercise Science Internship (3) (*may be repeated for credit one time*)
- EXER 3660 - Practitioner Seminar (1)
- EXER 4132 - Lifetime Weight Management and Behavior Change (3)

Degree Total = 120 Credit Hours

Progression Requirements

All of the required courses for the Pre-Exercise Science major, Exercise Science major, and Health and Fitness concentration must be completed with a grade of C or above. Students may repeat each required Pre-Exercise Science or Exercise Science course once, for a total of 2 attempts. Withdrawals are not counted towards the repeat limits, but students are limited to 16 credit hours of self-withdrawals during their academic career. If a student does not earn a grade of C or higher within the two allowed attempts, he/she/they will be dismissed from the major. If a student feels he/she/they have grounds to appeal this policy, an appeal may be submitted for review by the Program Director and Exercise Science Committee.

Admission to Upper Division

All pre-Exercise Science majors must complete the following courses with a grade of C or higher to be considered for admission to the Exercise Science degree program:

- EXER 2150 Introduction to Exercise Science
- EXER 2168/EXER 2168L Anatomy and Physiology I and lab (or BIOL 2273 and BIOL 2273L)
- EXER 2169/EXER 2169L Anatomy and Physiology II and lab (or BIOL 2274 and BIOL 2274L)
- CHEM 1251/CHEM 1251L General Chemistry and lab (or CHEM 1203 and CHEM 1203L)
- STAT 1220 Statistics (or STAT 1221 or 1222)

Applicants must have a minimum cumulative GPA of 2.5 and submit the online application.

Once admitted to the upper division, students can select the "Pre-Professional" Concentration.

Special Policies or Requirements

Exercise Science majors cannot earn more than 2 grades of D, F, or W in all required courses (PEXE and EXER). Exceeding the minimum number of D, F, W grades results in dismissal from the major.

Honors Program

For details about the Honors Program in the Department of Applied Physiology, Health, and Clinical Sciences, see the Honors Programs section below.

Bachelor of Science in Exercise Science with Concentration in Strength and Conditioning

The CASCE accredited Strength and Conditioning Concentration is accredited by the *Council on Accreditation of Strength and Conditioning Education* and prepares students with the knowledge and skills essential for the Strength and Conditioning Specialist. Students apply industry standard, evidence-based guidelines to the administration of fitness assessments, the development and implementation of strength and conditioning programs, and the management and oversight of such programs. The culminating experience of the concentration is a robust internship under the supervision of a Certified Strength and Conditioning Specialist. Students are encouraged to take the National Strength and Conditioning Association Certified Strength and Conditioning Specialist exam.

Admission Requirements

Freshmen and Transfers

Students who meet the following criteria may submit a declaration form for the Strength and Conditioning Concentration:

- See University Admission Requirements
- Exercise Science major
- Minimum 2.5 GPA

Currently Enrolled Students from Another Major

- Students who wish to declare the Pre-Exercise Science major will register for and attend a Change of Major Orientation through the CHHS Advising Center. The declaration form is found on the Exercise Science website. Academic advising prior to declaration is strongly encouraged. Please contact the Exercise Science Program Director for more information.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foundation Courses (21 credit hours)

- EXER 2101 - Foundations of Physical Conditioning (3)
- EXER 2150 - Introduction to Exercise Science (3)
- EXER 2168 - Human Anatomy and Physiology for the Health Professions (3)
or BIOL 2273 - Human Anatomy and Physiology (3)
- EXER 2168L - Human Anatomy and Physiology Laboratory for the Health Professions (1)

or BIOL 2273L - Human Anatomy and Physiology Laboratory (1)
EXER 2169 - Human Anatomy and Physiology for the Health Professions II (3)
or BIOL 2274 - Human Anatomy and Physiology II (3)
EXER 2169L - Human Anatomy and Physiology for the Health Professions II Laboratory (1)
or BIOL 2274L - Human Anatomy and Physiology II Laboratory (1)
CHEM 1251 - General Chemistry I (3)
or CHEM 1203 - Introduction to General, Organic, and Biochemistry I (3)
CHEM 1251L - General Chemistry I Laboratory (1)
or CHEM 1203L - Introduction to General, Organic, and Biochemistry I Laboratory (1)

Plus one of the following:

STAT 1220 - Elements of Statistics I (BUSN) (3)
or STAT 1221 - Elements of Statistics I (3)
or STAT 1222 - Introduction to Statistics (3)

Major Courses (27 credit hours)

EXER 3198 - Applied Kinesiology (3)
EXER 3260 - Nutrition for the Physically Active (3)
EXER 3280 - Exercise Physiology: Foundation and Theory (3)
EXER 3285 - Principles of Strength and Conditioning (3)
EXER 3286 - Exercise Testing: Foundation and Theory (3)
EXER 3287 - Exercise Testing: Principles and Applications (3)
EXER 4121 - Pharmacology for the Physically Active (3)
EXER 4286 - Exercise Prescription (3)
EXER 4293 - Biomechanics (3)

Concentration Courses (22 credit hours)

Required Courses (16 credit hours)

EXER 2290 - Emergency Medical Response (3)
EXER 4100 - Organization and Administration of Strength and Conditioning (3)
EXER 4285 - Advanced Strength and Conditioning Theory and Techniques (3)
EXER 4333 - Sport and Exercise Psychology (3)
EXER 2294 - Care and Prevention of Athletic Injuries (3)
EXER 3660 - Practitioner Seminar (1)

Internship (6 credit hours)

EXER 4440 - Strength and Conditioning Internship

Note: EXER 4440 is taken during the last semester in the major. All required major courses (except EXER 4100) must be completed with a grade of C or above prior to the internship.

Unrestricted Elective Courses (3)

As needed to complete the credit hours required for graduation.

Other Requirements (3 credit hours)

Students are encouraged to sit for the National Strength and Conditioning Association's Certified Strength and Conditioning Specialist Exam.

Degree Total = 120 Credit Hours

Progression Requirements

All of the required courses for the Pre-Exercise Science major, Exercise Science major, and Health and Fitness concentration must be completed with a grade of C or above. Students may repeat each required Pre-Exercise Science or Exercise Science course once, for a total of 2 attempts. Withdrawals are not counted towards the repeat limits, but students are limited to 16 credit hours of self-withdrawals during their academic career. If a student does not earn a grade of C or higher within the two allowed attempts, he/she/they will be dismissed from the major. If a student feels he/she/they have grounds to appeal this policy, an appeal may be submitted for review by the Program Director and Exercise Science Committee.

Admission to Upper Division

All pre-Exercise Science majors must complete the following courses with a grade of C or higher to be considered for admission to the Exercise Science degree program:

- EXER 2150 Introduction to Exercise Science
- EXER 2168/EXER 2168L Anatomy and Physiology I and lab (or BIOL 2273 and BIOL 2273L)
- EXER 2169/EXER 2169L Anatomy and Physiology II and lab (or BIOL 2274 and BIOL 2274L)
- CHEM 1251/CHEM 1251L General Chemistry and lab (or CHEM 1203 and CHEM 1203L)
- STAT 1220 Statistics (or STAT 1221 or 1222)

Applicants must have a minimum cumulative GPA of 2.5 and submit the online application.

Once admitted to the upper division, students can declare the "Strength & Conditioning" Concentration.

Special Policies or Requirements

Exercise Science majors must earn grades of C or higher in all required courses. Students can attempt each required course once. Withdrawals do not count towards total attempts at a course.

Honors Program

For details about the Honors Program in the Department of Applied Physiology, Health, and Clinical Sciences, see the Honors Programs section below.

Bachelor of Science in Respiratory Therapy

The Respiratory Therapy major prepares graduates of associate-level programs in respiratory therapy who have achieved the RRT credential with the expanded knowledge, critical thinking ability, and communication skills necessary to become leaders in respiratory education, management, research, and advanced clinical practice.

The emphasis of the curriculum is to enhance and advance the student's professional career in respiratory therapy with additional education in professional writing, teaching strategies, healthcare administration, evidence-based research, critical appraisal skills, and advanced critical care management. This degree program is offered completely online through the Office of Distance Education and the Department of Applied Physiology, Health, and Clinical Sciences. Students seeking admission into this program will already be licensed respiratory therapists who have

the RRT credential from the National Board of Respiratory Care. The program culminates in a capstone experience that is developed around the students' specific professional interest area. Students learn the detailed research process and have the opportunity to present their finalized clinical, educational, administrative, or population-based project prior to graduation. The accomplished faculty are committed to preparing students to become that "next generation" respiratory therapist.

Admission Requirements

Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.0 from an Associate Degree program that is a CoARC-accredited respiratory therapy program from a college or university accredited by an accepted accrediting body
- *Pre-Major/Prerequisite Courses:* A minimum grade of a C in all coursework taken by the end of the semester prior to the semester for which application is made
- Current unencumbered state license as a Registered Respiratory Therapist, up-to-date Basic Life Support certification, transcript completion of an Associate Degree program in respiratory therapy
- *Declaration of Major:* Students will be accepted directly into the program as a BSRT major
- *Transferable Credit Hours:* 64

Students must first apply for admission to the University, and then make a second application to the UNC Charlotte Distance Education Office. The final program admission decision is made by the BSRT program faculty. Applicants are competitively reviewed for admission based on their cumulative GPA in all college transferable coursework, as well as their personal statement and letters of recommendation. Satisfactorily completing the minimum requirements does not guarantee admission into the program. After evaluating the credentials of all applicants meeting the minimum academic requirements, the selection committee offers admission to students whose credentials demonstrate the highest level of academic achievement. Students are admitted in one cohort in the Fall semester, in which applications are accepted from November 15 to March 15. Students will be accepted directly into the program as a BSRT major. Applications are available from the Distance Education Office. Admission decisions are communicated in writing from the Department of Applied Physiology, Health, and Clinical Sciences. Applicants who are denied may reapply.

Degree Requirements

Transfer Credit (64 credit hours)

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. Students with an acceptable AAS degree are granted a general education waiver.

Credit by Exam (26 credit hours)

Students receive 26 credits by exam for having passed the RRT exam after completion of RESP 3101.

Major Courses (24 credit hours)

RESP 3101 - Leadership Practices and Professional Writing for Respiratory Therapists (3) (W)

RESP 3102 - Extended Services in Respiratory Therapy (3)

RESP 3205 - Cardiopulmonary Pharmacotherapy (3)

RESP 3206 - Critical Care Monitoring and Mechanical Ventilation (3)

RESP 4103 - Evidence-Based Practice in Respiratory Care (3)

RESP 4107 - Teaching Fundamentals and Clinical Education (3)

RESP 4108 - Healthcare Outcomes and Quality Assessment: A

Management Perspective (3) (O)

RESP 4208 - Critical Care Pathophysiological Concepts for Respiratory Therapy (3)

Restricted Elective Courses (6 credit hours)

Students are required to choose two of the following RESP electives.

RESP 3108 - Introduction to Research Methods in Respiratory Therapy (3)

RESP 4205 - Information Technology in Respiratory Care (3)

RESP 4206 - Health Communications: Ethical and Legal Implications (3)

RESP 4410 - Respiratory Therapy Practicum (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

For all required courses for the Respiratory Therapy major, students must receive a grade of C or above to be considered successful.

Honors Program

For details about the Honors Program in the Department of Applied Physiology, Health, and Clinical Sciences, see the Honors Programs section below.

Honors Programs

Honors Programs are available for all majors within the Department of Applied Physiology, Health, and Clinical Sciences. The honors notation will appear on a student's official transcript.

Admission Requirements

Current UNC Charlotte Undergraduate Students

Students are eligible to participate in the Honors Program in their Sophomore or Junior year of study. Consideration for admission to the Honors Program may be initiated by the student or by any faculty member in the Department of Applied Physiology, Health, and Clinical Sciences.

- See University Admission Requirements
- Cumulative GPA of 3.5 recommended
- Submit a typed statement (maximum length of 500 words) explaining:
 - The student's academic/career goals in their respective major within the Department of Applied Physiology, Health, and Clinical Sciences
 - How the Department of Applied Physiology, Health, and Clinical Sciences' Honors Program is relevant to the student's academic and/or career interests

The Department of Applied Physiology, Health, and Clinical Sciences Honors Program Committee reviews the materials of all eligible student applicants on an ad hoc basis and recommends to the Department of Applied Physiology, Health, and Clinical Sciences Chair those individuals who should be admitted into the program.

Students may be removed from the Honors Program at any time upon their own request or upon recommendation of the Honors Program Committee in consultation with the Department of Applied Physiology, Health, and Clinical Sciences Chair. There is no penalty for discontinuing the Honors Program.

Course Requirements

EXER 3900 - Undergraduate Research (1 to 3) (*Honors section*)
EXER 4115 - Undergraduate Research Methods in Applied Physiology, Health, and Clinical Sciences (3) (*Honors section*)
EXER 4700 - Honors Research I (3)

Progression and Certification Requirements

To obtain Honors in their respective major in the Department of Applied Physiology, Health, and Clinical Sciences, students must:

- Receive grades of A in EXER 3900, EXER 4115, and EXER 4700
- Achieve a minimum GPA of 3.2 for all coursework at UNC Charlotte
- Achieve a minimum GPA of 3.5 in Department of Applied Physiology, Health, and Clinical Sciences major
- Complete at least 6 credit hours of honors coursework (not including the thesis)
- Write an honors thesis in EXER 4700 under the supervision of a single faculty member, and publicly present the results of that research to the department faculty
- Explain, in writing, how their course of study in the department developed a focused inquiry into the student of a Kinesiology major (Exercise Science, or Respiratory Therapy) to the satisfaction of the Department of Applied Physiology, Health, and Clinical Sciences Honors Committee
- Complete the Application to Candidacy process for graduating with honors, as directed by the Honors College

Minor in Outdoor Adventure Leadership

The Minor in Outdoor Adventure Leadership is designed to allow students to acquire the knowledge, skills, and abilities to work (and recreate) in a variety of adventure activities, while fulfilling the requirements for one of the approved degree programs at the University. The courses that satisfy the minor are primarily housed within the Department of Applied Physiology, Health, and Clinical Sciences and represent different aspects of the outdoor adventure field.

The Minor in Outdoor Adventure Leadership consists of a minimum of 18 credit hours of approved coursework, plus an "Intensive Experience" class (chosen from 3 options), an "Outdoor Leadership-based" class (chosen from 2 options), and approved electives.

The final practicum course involves playing an active leadership role either with Venture or another (approved) outdoor program. Options could include: planning and leading a wilderness trip for Venture, leading groups at the Venture Challenge Courses, serving as a teaching assistant for one of the Outdoor Adventure Leadership courses, working at another local program (e.g., the U.S. National Whitewater Center) delivering adventure programming, summer work in the adventure field, etc. A journal and regular check-in with the course instructor is included in this capstone experience.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Students matriculated at UNC Charlotte and planning to declare Outdoor Adventure Education as their minor must have an overall GPA of at least 2.0. To apply, students must submit, with a Change of Minor Form, a typed letter of application to the Venture Director, indicating why they are interested in the Minor, how they hope to use the experiences and skills gained through the Minor in their future, and what prior relevant experience they have that they believe will help them be successful in this Minor. The Venture Director recommends to the Department of Applied Physiology, Health, and Clinical Sciences Chair those individuals who should be admitted into the program.

Minor Requirements

The Minor in Outdoor Adventure Leadership requires the completion of 18 credit hours of approved courses as follows:

Introductory Course (2 credit hours)
KNES 1231 - Introduction to Outdoor Adventure (2)

Intensive Experience Courses (2 credit hours minimum)

Select at least one of the following:

- KNES 2230 - Wilderness Experience (2)
- KNES 2233 - Rock Climbing (2)
- KNES 2236 - Challenge Course Activities (2)

Outdoor Leadership-Based Courses (3 credit hours minimum)

Select at least one of the following:

- KNES 3230 - Wilderness Trip Leading (3)
- KNES 3235 - Challenge Course Facilitation (3)

Other Required Courses (2-4 credit hours)

- KNES 3236 - Theory and Foundations of Adventure Education (3)
- KNES 4431 - Outdoor Adventure Leadership Practicum (2 to 4)

Elective Courses (4-6 credit hours minimum)

Approved elective options include any of the above classes not already taken (e.g., a student may take KNES 3230 and KNES 3235. One of these classes would count towards the 5 elective credit hours. The same applies to KNES 2230, KNES 2233, and KNES 2236.).

Additional approved courses include the following:

- KNES 2237 - River Management (2)
- KNES 2238 - Whitewater Kayaking (2)
- KNES 2239 - Rock Climbing Management (2)
- KNES 2290 - Emergency Medical Response (3)
- BIOL 3144 - Ecology (3)*
- BIOL 3229 - Field Botany (3)*
- COMM 2105 - Small Group Communication (3)**
- COMM 2107 - Interpersonal Communication (3)**
- COMM 3135 - Leadership, Communication, and Group Dynamics (3)
- COMM 3136 - Leadership, Service, and Ethics (3)
- EDUC 2100 - Introduction to Education and Diversity in Schools (3)
or EDUC 1100 - Foundations of Education and Diversity in Schools -
Prospect Curriculum (4)
- ESCI 2010 - National Parks: Science Behind the Scenery (3)
- ESCI 3150 - Natural Environments of North America (3)*
- MDSK 3160 - Learning and Development: Birth through Adolescence
(3)*
- PSYC 3130 - Social Psychology (3)*
- PSYC 3131 - Psychology of Learning (3)*
- SOCY 4263 - Sociology of Small Groups (3) *
- SOWK 2182 - Human Behavior in the Social Environment I (3)*
- SOWK 2183 - Human Behavior in the Social Environment II (3)*

Special Policies or Requirements

*These courses have prerequisites.

**These courses are currently restricted to certain majors.

Students may petition for other classes to count toward elective credits. Furthermore, credit for Independent Study in First Aid could be given for completing a certification in Wilderness First Responder (3 credit hours), or Wilderness Advanced First Aid (2 credit hours) or Wilderness First Aid (1 credit hour). This needs to be arranged through an approved provider. Additionally, credit for Independent Study in Outdoor Adventure could be given by taking one of the courses offered by Outward Bound, National

Outdoor Leadership School, or similar program.

Minor Total = 18 Credit Hours

Progression Requirements

Students must attain an overall GPA of 3.0 in all coursework within the minor.

Undergraduate Certificate in Clinical Research Management

The Undergraduate Certificate in Clinical Research Management prepares students for careers as Clinical Research Administrators or Coordinators who organize and manage clinical research trials under the supervision of a Principal Investigator.

Admission Requirements

Current UNC Charlotte Undergraduate Students

The Undergraduate Certificate in Clinical Research Management program is open to currently enrolled UNC Charlotte undergraduate students.

See University Admission Requirements.

Certificate Requirements

Required Courses (15 credit hours)

- STAT 1221 - Elements of Statistics I (3)
or STAT 1222 - Introduction to Statistics (3)

STAT 1322 - Introduction to Statistics II (3)

EXER 2299 - Medical Terminology (3)

EXER 4115 - Undergraduate Research Methods in Applied Physiology, Health, and Clinical Sciences (3)

EXER 4240 - Clinical Research Management (3)

Optional Internship

Students are encouraged to complete a Clinical Research Management internship where they may practice and apply new knowledge and skills. The one (1) credit EXER 3660 Practitioner Seminar course helps students prepare for the internship. EXER 3660 is the pre-requisite for the three (3) credit internship EXER 3490.

EXER 3660 - Practitioner Seminar (1)

EXER 3490 - Exercise Science Internship (3)

Progression Requirements

A grade of C or higher is required for each of the Required Courses.

Certificate Total = 15 Credit Hours

Undergraduate Certificate in Nutrition

The Undergraduate Certificate in Nutrition is designed for students who wish to develop practical knowledge of nutrition and its role in health, disease, and human performance. It may be earned in conjunction with

the major in Exercise Science or as a stand-alone certificate. The certificate prepares students for jobs in health, fitness, wellness, and sports performance. This certificate does not prepare students for jobs requiring licensure as a Registered Dietician.

Admission Requirements

Current UNC Charlotte Undergraduate Students

The Undergraduate Certificate in Nutrition program is open to currently enrolled UNC Charlotte undergraduate students.

See University Admission Requirements.

Certificate Requirements

Required Courses (12 credit hours)

- EXER 2299 - Medical Terminology (3)
- EXER 3260 - Nutrition for the Physically Active (3)
- EXER 4130 - Applied Nutrition (3)
- EXER 4132 - Lifetime Weight Management and Behavior Change (3)

Elective Courses (3-4 Credit Hours)

Choose at least one (1) from the following electives. Note: KNES 3660 Practitioner Seminar is the pre-requisite for KNES 3490 Internship.

INTL 3125 - Food and Globalization (3)

or

EXER 3660 - Practitioner Seminar (1) and
EXER 3490 - Exercise Science Internship (3)

Progression Requirements

A grade of C or higher is required for each of the Required Courses. Each required course may be attempted twice.

Certificate Total = 15 Credit Hours

Undergraduate Certificate in Sports Analytics

The Undergraduate Certificate in Sports Analytics is open to students who are interested in applying data analysis and collection strategies within the field of sports. The purpose of the certificate is to allow the students to gain knowledge and pursue a path in the sports analytics field along with their existing major.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

To be eligible for admission to the certificate program, students must have completed the following:

- Statistics Course - STAT 1220, STAT 1221, or STAT 1222 with grade of C or above
- Basic Programming Course - INFO 2130, INFO 3221, or ITSC 1110 with grade of C or above

Other courses may be accepted upon review. Students from all majors on campus are welcome to apply for admission.

Certificate Requirements

Analytics Courses (9 credit hours)

- DTSC 1110 - Sports Analytics (3)
- EXER 3900 - Undergraduate Research (1 to 3) (*must be taken for 3 credit hours*)
or DTSC 3400 - Data Science Practicum (1 to 3)
- EXER 4115 - Undergraduate Research Methods in Applied Physiology, Health, and Clinical Sciences (3)

Elective Course (3 credit hours)

Select one of the following:

- DTSC 2110 - Sport Business Analytics (3)
- EXER 2333 - Baseball Through History and Playing I (1800s-1947) (3)
- EXER 2334 - Baseball Through History and Playing II (1947-Present) (3)
- EXER 3100 - Organization and Administration of Exercise Science (3)
- SPOA 2130 - Introduction to Baseball Statistics (3)
- SPOA 4210 - Advanced Baseball Analytics (3)

Certificate Total = 12 Credit Hours

Progression Requirements

All courses in the certificate program require a grade of C or above.

Early Entry: Master of Science in Athletic Training

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Minimum 3.5 GPA in Exercise Science courses
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School
- Grades of C or above in the following prerequisite courses:
 - Human Anatomy with laboratory
 - Human Physiology with laboratory
 - Chemistry with laboratory
 - Physics with laboratory*
 - Statistics
 - Exercise Physiology
 - Psychology
 - Nutrition
 - Biomechanics
 - Medical Terminology*
 - Introduction to Biology*
- 50 hours of observational experience with a Certified Athletic Trainer

*These courses are currently not required for the General Education program or for the B.S. in Exercise Science program.

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 10 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 10 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees). Those courses are:

Undergraduate Course	Graduate Substitute
EXER 3099	ATRN 6100
EXER 3800	ATRN 6101
EXER 2294	ATRN 6102
EXER 3800	ATRN 6103

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Early Entry: Master of Science in Kinesiology

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree. The Early Entry Program leads to completion of all requirements for the B.S. and M.S. degrees in only five academic years and one or two summers. Students should consult with the M.S. in Kinesiology Graduate Program Director about their eligibility for this program and to discuss requirements for selection of a research advisor during their Junior year.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.25 overall undergraduate GPA
- Minimum 3.25 GPA in the major
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

by the Graduate School

Note: GRE scores are not required.

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees). Students may leave the program after four years with the B.S. degree, or they may complete an additional academic year and summer of full-time study and research to earn both the B.S. and M.S. degrees in Kinesiology.

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Early Entry: Master of Science in Respiratory Care

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Note: GRE scores are not required.

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester

- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees). The graduate courses are:

RESP 5101 - Health Outcomes and Quality Assessment (3)

RESP 6101 - Respiratory Care Leadership (3)

RESP 6105 - Pulmonary Function Testing and Cardiopulmonary Rehabilitation (3)

RESP 6115 - Respiratory Care Research Methods (3)

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Department of Epidemiology and Community Health

ech.charlotte.edu

Undergraduate Programs

- **B.S. in Public Health (BSPH)**
 - Honors Program
- **Minor in Public Health**
- **Early Entry: Master in Public Health (MPH)**

The Department of Epidemiology and Community Health envisions "A culturally responsive workforce partnered with communities to prevent and address inequities and complex health issues." Its mission is to advance health and well-being for all individuals by collaborating with all populations in changing landscapes. The department is a premier academic unit providing collaborative and integrated approaches to improve population health.

The department offers baccalaureate, master's, and doctoral degree programs accredited by the Council on Education for Public Health (CEPH). The department is a member of the Association of Schools and Programs of Public Health and the American Public Health Association.

At the undergraduate level, the department offers the Bachelor of Science in Public Health and a Minor in Public Health and participates in an interdepartmental honors program.

At the graduate level, the department offers the Master of Public Health (MPH) degree and doctoral degrees (Ph.D.) in Public Health Sciences and Epidemiology. Additionally, the department collaborates in a Master of Science (M.S.) degree in Health Informatics and Analytics. See the *Graduate Catalog* for details about the graduate programs, including early entry and dual degree options.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Science in Public Health (BSPH)

Public health is the science and art of promoting health, preventing disease and injury, and prolonging life through organized efforts of society. Public health activities focus on entire populations rather than on individual patients, and public health professionals monitor and diagnose the health concerns of entire communities and promote healthy practices and behaviors to assure our populations stay healthy.

The Bachelor of Science in Public Health (BSPH) prepares students through didactic and practice experiences to apply core principles of public health education within a variety of community settings and to advance the public health profession. The BSPH program seeks to fulfill

the Department of Epidemiology and Community Health's vision: "Healthy communities partnered with responsive population health systems." To support the department's mission, "Advancing health and well-being in an urbanizing world," the BSPH program develops leaders in evidence-based practice who advance the public's health. The program values collaboration, community engagement, innovation, professionalism, and healthcare access in its pursuit of attaining the highest possible standards of health and well-being.

The BSPH program is designed to prepare scholar-practitioners with knowledge and skills in the core concepts of public health, including health behavior, research and statistics in health, environmental health, epidemiology, and health administration, as well as in the planning, evaluation, organization, and conduct of community and public health services. The planned course of study adopts an interdisciplinary focus and includes the development of tailored skills through the successful completion of a minor, electives, and experiential learning. The degree program prepares students who are interested in pursuing health-related careers in health promotion, program delivery, health communication, community organization, and behavior change for entry level to mid-level positions in service and research in health departments, public health agencies, community-based organizations, outreach education programs, hospitals, private health organizations, and corporate wellness settings. The program is designed to appeal to students with interests in "population" rather than "clinical" health. Continued study in the Department of Epidemiology and Community Health is also an option for those interested in graduate degrees in Public Health or Health Administration. For details on these programs, see the *UNC Charlotte Graduate Catalog*.

Admission Requirements

Freshmen

- See University Admission Requirements
- Minimum GPA: 2.5
- Students must apply for admission to the upper-division Bachelor of Science in Public Health (BSPH) major through a competitive application process.
- *Pre-Major/Prerequisite Courses:* Completion of 60 credit hours prior to matriculation into BSPH program. This includes General Education courses and successful completion of PRPH courses as outlined below.
- Applications for admission are accepted by the stated deadline each Spring, and include academic transcripts, application, and a statement of future career goals.

Currently Enrolled Students

Declaration of Major: Students wishing to pursue the BSPH program initially begin as Pre-Public Health (PRPH) majors. Students changing to Pre-Public Health from another major must attend a Change of Major workshop in CHHS Advising Center.

Transfers

- See University Admission Requirements
- Minimum GPA: 2.0
- *Pre-Major/Prerequisite Courses:* All incoming students begin as Pre-Public Health and apply to upper division once eligible
- *Transferable Credit Hours:* 24

Degree Requirements

A minimum of 120 total earned credit hours is required for the degree. The Bachelor of Science in Public Health requires 21 credit hours of coursework in the Pre-Public Health major, 33 credit hours of coursework in the BSPH major, plus completion of a minor or second major, and other requirements as listed below.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education program. Students majoring in Public Health should plan on taking the following courses that meet general education and major requirements:

- BIOL 1110 - Principles of Biology I (3)*
or BIOL 1115 - Principles of Biology II (3)*
STAT 1222 - Introduction to Statistics (3)

Pre-Public Health Foundation Courses (21 credit hours)

Prerequisite Core Courses (15 credit hours)

- HLTH 2101 - Healthy Lifestyles (3)
HLTH 2102 - Foundations of Public Health (3)
HLTH 2103 - Foundations of Global Health (3)
BIOL 1110 - Principles of Biology I (3)*
or BIOL 1115 - Principles of Biology II (3)*
STAT 1222 - Introduction to Statistics (3)

*BIOL 1110L is not required for the Pre-Major, but may be required if taking BIOL 1110 or BIOL 1115 to fulfill the Natural Sciences with Lab requirement of the General Education Program.

Health-Related Communication Courses (6 credit hours)

Select two of the following:

- COMM 1101 - Public Speaking (3)
COMM 2100 - Introduction to Communication Theory (3)
COMM 2105 - Small Group Communication (3)
COMM 2107 - Interpersonal Communication (3)
COMM 3115 - Health Communication (3)
COMM 3130 - Communication and Public Advocacy (3)
COMM 3135 - Leadership, Communication, and Group Dynamics (3)
COMM 3141 - Organizational Communication (3)

Public Health Major Core Courses (33 credit hours)

- HLTH 3102 - Comparative Healthcare Systems (3)
HLTH 3103 - Behavior Change Theories and Practice (3)
HLTH 3104 - Research and Statistics in Health (3)
HLTH 3105 - Public Health Education and Promotion (3)
HLTH 3106 - Determinants of Health (3)
HLTH 3400 - Public Health Internship Preparation (3)
HLTH 4102 - Healthcare Administration (3)
HLTH 4104 - Epidemiology (3)
HLTH 4105 - Program Planning and Evaluation (3)
HLTH 4400 - Public Health Internship (3)
HLTH 4600 - Public Health Capstone (3)

Additional Coursework (15 credit hours)

Students pursuing the BSPH degree are expected to complete coursework complementary to Public Health. Students may select from one of the following options below in consultation with the BSPH Program Director.

Option 1: Minor or Second Major

Choose any minor on campus except the Minor in Public Health, or choose a second major. The choice of minor or second major should be considered in terms of individual educational and professional aspirations.

Option 2: Health-Related Elective Coursework

Complete 15 credit hours of health-related elective courses selected from any unrestricted HLTH 3000- or 4000-level course not fulfilling a PRPH or BSPH requirement. Other courses may be approved by the BSPH Program Director.

Option 3: Pre-Health/Clinical Coursework

Complete 15 credit hours towards pre-health/pre-clinical program prerequisites.

Notes:

- *This option is limited to students electing NOT to complete a minor/second major.*
- *Labs are not required in this option; however, they may be required for the programs in which students intend to apply.*

Basic Sciences Courses (6 credit hours)

Select two of the following:

- CHEM 1251 - General Chemistry I (3)
CHEM 1252 - General Chemistry II (3)
PHYS 1101 - Introductory Physics I (3)
PHYS 1102 - Introductory Physics II (3)
PSYC 1101 - General Psychology (3)

Advanced Sciences Courses (9 credit hours)

Select three of the following:

- BIOL 3111 - Cell Biology (3)
CHEM 2131 - Organic Chemistry I (3)
CHEM 2132 - Organic Chemistry II (3)
CHEM 4165 - Principles of Biochemistry I (3)
PHYS 2101 - Physics for Science and Engineering I (3)
PHYS 2102 - Physics for Science and Engineering II (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation. Study abroad courses are included.

Degree Total = 120 Credit Hours

Progression Requirements

To graduate with a BSPH degree, students must complete 120 credit hours including General Education, Pre-Public Health, Public Health, and minor or second major requirements. The cumulative GPA and the GPA in the Public Health major courses must a minimum of 2.5.

HLTH 2101, HLTH 2102, HLTH 2103, and HLTH 4104 may only be repeated with original grade of D, F, or W; and may not be attempted* more than twice.

*Each of the following is considered an attempt: Withdrawing from the course after the drop deadline (may be appealed); grade replacement; audits; Pass/No Credit; Incompletes that convert to grades of F; and grades of A, B, C, D, or F.

Minor in Public Health

The Minor in Public Health supports students interested in health-related careers or those seeking a health dimension within other career choices. Students in the minor come from biological, social, and behavioral sciences, as well as from health-related academic majors. The minor extends students' working knowledge of health applications that prepares them to be competitive in the job market and to make advanced degree choices.

Students seeking entry-level positions in health services or non-clinical health agencies and organizations after graduation will find this minor helpful in broadening their understanding of contemporary public health issues. Students in the minor are well positioned for graduate work in specific disciplines like psychology, sociology, social work, public health, health communication, or adult development and aging. The program also provides applied health content and added value to academic degrees of students seeking admission to dental, nursing, medical, pharmacy, physical therapy and other professional schools.

The Minor in Public Health fosters an interdisciplinary perspective of individual and population health. National health priorities in the first decade of the 21st century emphasize interdisciplinary training. As students develop specific healthcare competencies, undergraduate interdisciplinary experiences provide students better flexibility in working across disciplines as well as within their own major.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Students must have completed one Natural Sciences course from the list of the approved courses provided below to declare the Minor in Public Health. The course can be taken as part of the General Education Program requirements.

BINF 1101 - Introduction to Bioinformatics and Genomics (4)

BIOL 1110 - Principles of Biology I (3)

BIOL 1115 - Principles of Biology II (3)

BIOL 2273 - Human Anatomy and Physiology (3)

BIOL 2274 - Human Anatomy and Physiology II (3)

ESCI 1101 - Earth Sciences-Geography (3)

EXER 2168 - Human Anatomy and Physiology for the Health Professions (3)

EXER 2169 - Human Anatomy and Physiology for the Health Professions II (3)

Minor Requirements

The Minor in Public Health is awarded only to students completing an undergraduate major at UNC Charlotte. The minor consists of 21 credit hours: 15 credit hours must come from a set of required courses and 6 credit hours must come from the set of elective courses.

Required Natural Science Course (3 credit hours)

Choose a Natural Science course from listed above in the Admissions Requirements section. This is a prerequisite for declaring the Minor in Public Health. The course can be taken as part of the General Education Program requirements.

Required Core Courses (12 credit hours)

- HLTH 2101 - Healthy Lifestyles (3)
- HLTH 2102 - Foundations of Public Health (3)
- HLTH 2103 - Foundations of Global Health (3)
- HLTH 4104 - Epidemiology (3)

Elective Courses (6 credit hours)

Select two of the following. Students are encouraged to take electives outside their major department and college to gain a broader health perspective. Please note that some courses may have prerequisites or other requirements. Students are not allowed to "double count" the elective courses; i.e., students cannot use the elective course to fulfill their major or another minor requirement. Because additions and deletions of courses may be made to correspond to current University offerings, students are encouraged to consult with the Program Coordinator as they plan their schedules.

- AFRS 3261 - Psychology of the Black Experience (3)
- AFRS 4630 - Environmental and Public Health in Africa (3)
- ANTH 3122 - Culture, Health, and Disease (3)
- ANTH 3222 - Culture, Health, and Disease (3)
- ANTH 4131 - Culture, Pregnancy, and Birth (3)
- COMM 3115 - Health Communication (3)
- ECON 4141 - Health Economics (3)
- FINN 3271 - Principles of Risk Management and Insurance (3)
- GRNT 3115 - Health and the Aging Process (3)
- PHIL 2220 - Healthcare Ethics (3)
- POLS 3125 - Healthcare Policy (3)
- SOCY 4168 - Sociology of Mental Health and Illness (3)
- Any unrestricted HLTH 3000- or 4000-level course

Minor Total = 21 Credit Hours

Progression Requirements

To qualify for the Minor in Public Health upon graduation, students must have earned a GPA of at least 2.0 in courses applied to the minor. Students are required to have a grade of C or above in Required Core Courses. Students are allowed to attempt* these Core Courses in which they earned grades lower than a C no more than two times.

**Each of the following is considered an attempt: Withdrawing from the course after the drop deadline (may be appealed); grade replacement; audits; Pass/No Credit; Incompletes that convert to grades of F; and grades of A, B, C, D, or F.*

Early Entry: Master of Public Health

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.5 overall undergraduate GPA

- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees). Students may leave the program with their baccalaureate degree, or they may complete the remaining coursework required to earn the MPH. Students pursuing the Early Entry option can reduce the time needed to earn both degrees by one semester.

This Early Entry Program is open to students from any major. Interested students should consult with the MPH Graduate Program Director about their eligibility and competitiveness for this program before applying.

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Honors Program in Public Health and Health Systems Management

The Public Health and Health Systems Management Honors Program is an academic honors program that encourages best practices aligning with the focus of the disciplinary areas.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Students in the BS in Public Health (BSPH) and BS in Health Systems Management (HSMT) programs are eligible to participate in the Honors Program during their upper division years of study. Consideration for admission to the Honors Program may be initiated by the student or by any faculty member in the Departments of Epidemiology and Community Health or Health Management and Policy.

Application criteria are as follows:

- Completion of 60 hours of coursework
- Health Systems Management majors must have completed at least 9 hours of coursework in the major
- Recommended overall GPA of 3.3 for all coursework

- completed at UNC Charlotte
- Submission of Public Health and Health Systems Management Honors application

The Disciplinary Honors Program Committee reviews the materials of all eligible student applicants and recommends to the Honors Program Director those individuals who should be admitted into the program.

Course Requirements

Successful Honors Program candidates will complete at least 9 credit hours of Honors coursework (which count toward the 120 credit hours required for graduation). Specific requirements are:

1. HLTH 3790 in which the student does a literature review and develops a capstone project proposal
2. HLTH 3791 in which the student completes the project. The student must do an oral defense of the project in front of a committee that includes the topic advisor and two other faculty members.
3. Complete at least one additional Honors course (3 credit hours) and earn a grade of B or above for the course. The course may be HLTH Honors course or any other Honors course that is open to departmental honors students.
 - HLTH 3790 Honors Proposal Seminar
 - HLTH 3791 Honors Capstone Seminar

Progression Requirements

To be awarded honors in Public Health and Health Systems Management, a student must:

- Complete the Honors Capstone Project (HLTH 3791) with a grade of A,* including certification by the student's honors committee that the project is of honors quality and deserves that grade.
- Earn a minimum GPA of 3.25 in major courses
- Earn a minimum overall GPA of 3.25 at UNC Charlotte
- Complete the Application to Candidacy process for graduating with honors, as directed by the Honors College

Students may be removed without penalty from the Honors Program at any time upon their own request or upon recommendation of the Honors Program Director.

**In accordance with the policies of the Honors College, A is the required grade for the Honors Capstone Course.*

Following successful completion of these requirements, the honors notation will appear on the student's official transcript.

Department of Health Management and Policy

hmp.charlotte.edu

Undergraduate Programs

- **B.S. in Health Systems Management**
 - Honors Program
- **Early Entry: Master of Health Administration (MHA)**

The Department of Health Management and Policy envisions "Health systems serving all populations experiencing urbanization." Its mission is to "Advance health and health systems by developing knowledge and future leaders in management, policy, and research for the benefit of all."

At the undergraduate level, the department offers the Bachelor of Science in Health Systems Management, in both residential and distance education formats. An interdisciplinary Public Health and Health Systems Management, Honors Program is available to students in the residential program.

At the graduate level, the Department offers the Master of Health Administration (MHA) degree, which is accredited by the Commission on Accreditation of Healthcare Management Education (CAHME). The department is a full graduate member of the Association of University Programs in Health Administration (AUPHA).

The Department also delivers the MPH Concentration in Health Policy, which is part of the College's accreditation by the Council on Education for Public Health (CEPH). Additionally, the department collaborates on a Master of Science (M.S.) degree in Health Informatics and Analytics.

See the Graduate Catalog for details about the graduate programs, including early entry and dual degree options.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Science in Health Systems Management

Health systems management consists of any and all administrative/management functions of the overall health system that support the delivery of products and services to improve population health. Health systems managers plan, direct, or coordinate business activities in hospitals, clinics, managed care organizations, nursing homes and assisted living facilities, health departments, pharmaceutical companies, medical device companies, non-profit agencies, or similar organizations.

The Bachelor of Science in Health Systems Management (HSMT) prepares students as entry-level generalists in the health systems

management field through interdisciplinary approaches guided by culturally relevant perspectives. HSMT students complete general education requirements and 33 credit hours of study within the major.

The carefully sequenced HSMT curriculum is informed by the skills desired in all health system managers outlined by the American College of Healthcare Executives (see www.ache.org/-/media/ache/career-resource-center/competencies/booklet.pdf). Students complete courses in the critical domains of communication and relationship management, leadership, professionalism, knowledge of the health system care environment, and business skills and knowledge.

Continued study in the Department of Health Management and Policy is also an option for those interested in graduate degrees in Public Health (MPH) or Health Administration (MHA). The department also offers early-entry programs for exceptional students to both the MPH and MHA programs. For details on these programs, and other related graduate programs in health informatics, public administration, and public policy, see the *UNC Charlotte Graduate Catalog*.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- Minimum GPA: 2.0
- Transferable Credit Hours: 24

Currently Enrolled Students

- *Declaration of Major:* Students may declare the major at any time if they are in good academic standing. Current UNC Charlotte students may declare the Health Systems Management (HSMT) major at any time, as long as they have a cumulative GPA of 2.0 and are in good academic standing. First-time freshmen and new transfer students who do not yet have a UNC Charlotte GPA may declare the major during their first semester at UNC Charlotte.
- To change their major to Health Systems Management (HSMT), students must attend a CHHS Change of Major Orientation.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Major Courses (33 credit hours)

- HSMT 2101 - Introduction to the Health Systems Management (3)
- HSMT 2103 - Introduction to Human Resources Management (3)
- HSMT 2104 - Introduction to the U.S. Healthcare System (3)
- HSMT 3104 - Health Information Systems (3)
- HSMT 3201 - Health System Leadership, Ethics, and Inter-Professional Communication (3)
- HSMT 3203 - Introduction to Healthcare Accounting and Finance (3)
- HSMT 3204 - Health System Organization Development and Behavior (3)
- HSMT 4201 - Health Policy and Law (3)
- HSMT 4202 - Quality Management and Improvement (3)
- HSMT 4600 - Health Systems Management Capstone (3)
- HLTH 2102 - Foundations of Public Health (3)
or HLTH 4090 - International Comparative Health Systems (3)

or HSMT 3301 - Health Insurance and Managed Care (3)
or UCOL 3410 - Career Development Internship (1 to 3) (*taken for 3 credit hours*)

Elective Courses (47-53 credit hours)

Students in the Health Systems Management major may wish to combine their major field of study with a related minor. UNC Charlotte offers a wide range of minors - although not required for the major - to complement and otherwise enrich student readiness for workplace settings that demand effective communication, critical thinking and problem solving skills, digital literacy, and effective teamwork. Students are encouraged to consider completing a minor and a large number of options exist on campus that would serve to complement the Health Systems Management major including: biology, communication studies, gerontology, international studies, management information systems, political science, and public health.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

A grade of C or above in HSMT 2101, HSMT 2103, and HSMT 2104 within two attempts* is required to progress in the major. Furthermore, students are limited to two attempts* to achieve a grade of D or above in HSMT 3104, HSMT 3201, HSMT 3203, HSMT 3204, HSMT 4201, HSMT 4202, and HSMT 4600. A minimum GPA of 2.0 in the major and a cumulative GPA of 2.0 at the University are required in order to graduate. Health Systems Management majors who accumulate more than three grades of D, F, or W in required HSMT courses will be terminated from the program. Health Systems Management majors who fall below a GPA of 2.0 in the major will be placed on probation. A student on probation whose GPA in the major remains below 2.0 at the next evaluation will be terminated from the program.

*Each of the following is considered an attempt: Withdrawing from the course after the drop deadline (may be appealed); grade replacement; Incompletes that convert to grades of F; and grades of A, B, C, D, or F.

*Each of the following is considered an attempt: Withdrawing from the course after the drop deadline (may be appealed); grade replacement; Incompletes that convert to grades of F; and grades of A, B, C, D, or F.

Honors Program in Public Health and Health Systems Management

The Public Health and Health Systems Management Honors Program is an academic honors program that encourages best practices aligning with the focus of the disciplinary areas.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Students in the BS in Public Health (BSPH) and BS in Health Systems Management (HSMT) programs are eligible to participate in the Honors Program during their upper division years of study. Consideration for admission to the Honors Program may be initiated by the student or by

any faculty member in the Departments of Epidemiology and Community Health or Health Management and Policy.

Application criteria are as follows:

- Completion of 60 hours of coursework
- Health Systems Management majors must have completed at least 9 hours of coursework in the major
- Recommended overall GPA of 3.3 for all coursework completed at UNC Charlotte
- Submission of Public Health and Health Systems Management Honors application

The Disciplinary Honors Program Committee reviews the materials of all eligible student applicants and recommends to the Honors Program Director those individuals who should be admitted into the program.

Course Requirements

Successful Honors Program candidates will complete at least 9 credit hours of Honors coursework (which count toward the 120 credit hours required for graduation). Specific requirements are:

4. HLTH 3790 in which the student does a literature review and develops a capstone project proposal
5. HLTH 3791 in which the student completes the project. The student must do an oral defense of the project in front of a committee that includes the topic advisor and two other faculty members.
6. Complete at least one additional Honors course (3 credit hours) and earn a grade of B or above for the course. The course may be HLTH Honors course or any other Honors course that is open to departmental honors students.
 - HLTH 3790 Honors Proposal Seminar
 - HLTH 3791 Honors Capstone Seminar

Progression Requirements

To be awarded honors in Public Health and Health Systems Management, a student must:

- Complete the Honors Capstone Project ([HLTH 3791](#)) with a grade of A,* including certification by the student's honors committee that the project is of honors quality and deserves that grade.
- Earn a minimum GPA of 3.25 in major courses
- Earn a minimum overall GPA of 3.25 at UNC Charlotte
- Complete the Application to Candidacy process for graduating with honors, as directed by the Honors College

Students may be removed without penalty from the Honors Program at any time upon their own request or upon recommendation of the Honors Program Director.

**In accordance with the policies of the Honors College, A is the required grade for the Honors Capstone Course.*

Following successful completion of these requirements, the honors notation will appear on the student's official transcript.

Early Entry: Master of Health Administration

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.5 overall undergraduate GPA
- Submit application online at [gradadmissions.charlotte.edu/apply](#) and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Note: The GRE is NOT required of Early Entry applicants to the Health Administration program. Instead, applicants must meet with the Graduate Program Director prior to submitting an application. Applicants must submit all other elements of a standard graduate application to the program.

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees). Students may leave the program with their baccalaureate degree, or they may complete the remaining coursework required to earn the MPH. Students pursuing the Early Entry option can reduce the time needed to earn both degrees by one semester.

While admission is open to students pursuing any undergraduate major, students from health/health administration-related majors are this program's focus. Interested students should consult with the MPH Graduate Program Director about their eligibility and competitiveness for this program before applying.

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at [gradadmissions.charlotte.edu/admissions/early-entry](#).

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

School of Nursing

nursing.charlotte.edu

Undergraduate Programs

- **B.S. in Nursing (BSN)**
 - Upper Division Pre-Licensure Option
 - Advanced Transfer/Accelerated Option
 - Honors Program
- **B.S. in Nursing, RN-to-BSN**
- **Early Entry: M.S. in Nursing (MSN)**

The UNC Charlotte School of Nursing prepares nursing professionals to serve as leaders, clinicians, and scholars through innovative educational programs designed to meet the healthcare needs of an evolving and diverse society.

The School of Nursing offers both undergraduate and graduate programs. The undergraduate program provides two pathways to earning the Bachelor of Science in Nursing (BSN) degree – (1) the online BSN completion program for Registered Nurses and (2) Pre-licensure nursing major options that include a traditional upper-division pre-licensure program option and an Advanced transfer/Accelerated program option. The BSN degree is offered at both the Upper-Division Pre-Licensure level, Advanced transfer/Accelerated level, and the RN-to-BSN completion level. Graduate programs include the Master of Science in Nursing (MSN) in various specialty concentrations, the Doctor of Nursing Practice (DNP) degree, post-graduate APRN certificate programs, and certificates in Nursing Informatics, Community Public/Health Nursing, and Nursing Education.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Science in Nursing

Admission Requirements

Freshmen

- See University Admission Requirements

- Freshmen admission is competitive. Students who are admissible will be admitted as Pre-Nursing majors.
- *Minimum Pre-Major GPA:* n/a
- *Minimum Upper Division GPA:* To be eligible for admission to the upper-division Pre-Licensure Nursing major, students must have a minimum prerequisite GPA of minimum of 3.3.
- *Pre-Major/Prerequisite Courses:* Completion of prerequisite courses with a minimum grade of a C. Completion of prerequisite science and NURS courses with a minimum grade of a B. Completion of at least three (3) of the prerequisite science courses and their respective labs prior to applying to the Nursing Major options (Upper-Division Pre-Licensure or Accelerated).

To be considered for admission to the upper-division major, students must meet the following criteria:

- Grade of C (2.0) or higher in:
 - WRDS 1103 - Writing and Inquiry in Academic Contexts I and II (3)
or WRDS 1104 - Writing and Inquiry in Academic Contexts I and II with Studio (4)
 - MATH 1100 - College Algebra and Probability (3)
or MATH 1101 - College Algebra with Workshop (4)
 - STAT 1222 (or STAT 1220 or STAT 1221) (Introduction to Statistics)
 - PSYC 1101 (General Psychology)
- Grade of B (3.0) or higher in:
 - CHEM 1203 and CHEM 1203L or CHEM 1251 or CHEM 1251L
 - CHEM 1204 and CHEM 1204L or CHEM 1252 and CHEM 1252L
 - BIOL 2273 and BIOL 2273L or EXER 2168 and EXER 2168L
 - BIOL 2274 and BIOL 2274L or EXER 2169 and EXER 2169L
 - BIOL 2259 and BIOL 2259L
 - NURS 2100 (Nutrition courses taken outside of UNC Charlotte will be reviewed on an individual basis)
 - NURS 2200 (An equivalent growth and development and/or developmental psychology course may be substituted)
- For the prerequisite science courses and respective labs and for NURS 2100 and NURS 2200, all of which require a grade of B or above, Pre-Nursing students can only repeat each course once to earn a B or above prior to applying to Upper Division. If a student does not earn a B or above in those courses, then they will be ineligible for admission to the Upper-Division Nursing major and will need to change their major. Students applying for Spring admission must complete required prerequisite courses by the end of the Fall semester preceding their admission. Students applying for Fall admission must complete required prerequisite courses by the end of the Spring semester preceding their admission.
- Students admitted to the Nursing Major options (Upper-Division Pre-Licensure or Accelerated) must be certified as a Nurse Aide I (CNA I) and listed in the North Carolina Nurse Aide Registry.

Transfers

- See University Admission Requirements
- *Minimum Pre-Major GPA:* 3.0.
- To be eligible for admission to the upper-division Pre-Licensure

Nursing major, students must have a minimum prerequisite GPA of minimum of 3.3.

- *Pre-Major/Prerequisite Courses:* Same as Freshmen listed above
- *Other:* Same as Freshmen listed above
- *Transferable Credit Hours:* 24
- *Declaration of Major:* Transfer students who have not completed all prerequisites may be admitted to UNC Charlotte as Pre-Nursing. In order to declare Pre-Nursing, transfer students admitted to the University must have an overall GPA of 3.0 based on all university/college coursework. Transfer students who do not meet the criteria or have never applied for admission as Pre-Nursing may request a change of major to Pre-Nursing after completion of the first full semester at UNC Charlotte (at least 15 credit hours; Summer not included) with an overall GPA of 3.0 or above. Application to the Nursing Major options (Upper-Division Pre-Licensure or Accelerated) is online. Information about progression for pre-nursing majors and the online application process and deadlines is available on the School of Nursing website.
- Students must have earned at least 24 transferable credits from a prior institution with at least a 3.0 cumulative GPA as calculated by the Office of Undergraduate Admissions. There are no specific courses required for admission. However, students who complete any nursing prerequisite coursework prior to transfer must earn a grade of B or higher in selected courses. These courses include: Introduction to General, Organic and Biochemistry I & II or General Chemistry I & II, Human Anatomy and Physiology I & II, Microbiology, Nutrition and Human Growth and Development. If the student has not earned a B but is eligible to repeat the course, the student may be admitted to pre-nursing in order to repeat the course to earn the required grade. Students who are admissible will be admitted as Pre-Nursing majors.

Advanced Transfer/Accelerated Option

- See University Admission Requirements
- *Minimum GPA:* 3.0
- *Pre-Major/Prerequisite Courses:* Same as Freshmen listed above.
- *Other:* Same as Freshmen listed above. In addition, to be considered for the Accelerated option, students must have earned a previous bachelor's degree, associate in arts, or an associate in science degree. Associate in Applied Science degree does not apply.
- *Declaration of Major:* Transfer students who have not completed all prerequisites may be admitted to UNC Charlotte as Pre-Nursing. In order to declare Pre-Nursing, transfer students admitted to the University must have an overall GPA of 3.0 based on all university/college coursework. Transfer students who do not meet the criteria or have never applied for admission as Pre-Nursing may request a change of major to Pre-Nursing after completion of the first full semester at UNC Charlotte (at least 15 credit hours; Summer not included) with an overall GPA of 3.0 or above. Application to the Nursing Major options (Upper-Division Pre-Licensure or Accelerated) is online. Information about progression for pre-nursing majors, program options, and the online application process and deadlines is available on the School of Nursing website.
- Students must have earned at least 24 transferable credits from a prior institution with at least a 3.0 cumulative GPA as calculated by the Office of Undergraduate Admissions. There are no specific courses required for admission. However, students who complete any nursing prerequisite coursework prior to transfer must earn a

grade of B or higher in selected courses. These courses include: Introduction to General, Organic and Biochemistry I & II or General Chemistry I & II, Human Anatomy and Physiology I & II, Microbiology, Nutrition and Human Growth and Development. If the student has not earned a B but is eligible to repeat the course, the student may be admitted to pre-nursing in order to repeat the course to earn the required grade. Students who are admissible will be admitted as Pre-Nursing majors.

Currently Enrolled Students

- *Declaration of Major.* Freshmen seeking admission to the Upper Division Pre-Licensure Nursing Major may be admitted as Pre-Nursing. All students begin as Pre-Nursing majors and apply to Upper-Division once eligible. Freshmen who do not meet the criteria or have never applied for admission to Pre-Nursing may request a change of major to Pre-Nursing after completion of 30 credit hours at UNC Charlotte with an overall GPA of 3.0 or above. An advising session is required prior to declaration. Application to the Nursing Major options (Upper-Division Pre-Licensure or Accelerated) is online. Information about progression for Pre-Nursing majors and the online application process and deadlines is available on the School of Nursing website.

Degree Requirements

The Bachelor of Science in Nursing degree (BSN) requires 120 credit hours for the Upper-Division Pre-Licensure and Accelerated Nursing curriculum options and the RN-to-BSN completion curriculum. Students must earn the last 25% of baccalaureate degree requirements at UNC Charlotte.

General Education Courses (31-32 credit hours)

Some required Prerequisite Courses (listed above) and Major Courses (listed below) meet General Education requirements. Also required are critical thinking, local theme, and global theme courses. For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Prerequisite Course Requirements (21 credit hours)

See above list under Admission Requirements.

Pre-Licensure Upper-Division & ABSN Nursing Major Courses (61 credit hours)

- NURS 3102 - Introduction to Nursing Science (3)
- NURS 3105 - Concepts of Professional Nursing (3)
- NURS 3107 - Pathophysiology: Clinical Concepts of Illness and Disease (3)
- NURS 3108 - Health Assessment and Application (3)
- NURS 3205 - Pharmacology in Health and Illness (3)
- NURS 3230 - Illness and Disease Management (3)
- NURS 3250 - Nursing Care of the Childbearing Family (2)
- NURS 3260 - Nursing Care of Children (2)
- NURS 3425 - Practicum in Concepts of Professional Nursing (2)
- NURS 3430 - Practicum in Illness and Disease Management (3)
- NURS 3440 - Practicum in Nursing Care of Children and the Childbearing Family (3)
- NURS 4100 - Nursing Care of the Aging Adult (3)
- NURS 4120 - Psychiatric Mental Health Nursing (3)

- NURS 4130 - Complex Illness and Disease Management (3)
- NURS 4203 - Leadership and Informatics for Nursing Practice (3)
- NURS 4240 - Population Focused Nursing (3)
- NURS 4420 - Practicum in Psychiatric Mental Health Nursing (3)
- NURS 4430 - Practicum in Complex Illness and Disease Management (3)
- NURS 4440 - Practicum in Population Focused Nursing (2)
- NURS 4450 - Design and Coordination of Care (3)
- NURS 4600 - Professional Nursing: Trends, Issues, and Licensure (3)
- NURS 4900 - Research in Nursing Practice (2)

Unrestricted Elective Courses (6-7 credit hours)

As needed to meet course prerequisites or complete the credit hours required for graduation.

Licensure Exam Review Course

Students must complete a nursing licensure exam (NCLEX) review course prior to graduation.

Degree Total = 120 credit hours

Progression Requirements

All Nursing major courses must be completed with a grade of C or above. Students must also have a minimum GPA of 2.0 overall. Information about progression for Pre-Nursing majors and the online application process and deadlines is available on the School of Nursing website.

Admission to Nursing Major Options

- All students begin as Pre-Nursing majors and apply to Nursing Major options (Upper Division and Accelerated) once eligible. Information about progression for pre-nursing majors and the online application process and deadlines is available on the School of Nursing website.
- The Upper Division option admits in the Fall and Spring semesters. The Accelerated option only admits in the Fall semester.
- Students applying for Spring admission must complete required prerequisite courses by the end of the Fall semester preceding their admission. Students applying for Fall admission must complete required prerequisite courses by the end of the Spring semester preceding their admission.
- Students admitted to the upper-division Pre-Licensure Nursing major must be certified as a Nurse Aide I (CNA I) and listed in the North Carolina Nurse Aide Registry.

Special Policies or Requirements

Students must complete a nursing licensure exam (NCLEX) review course prior to graduation.

Bachelor of Science in Nursing, RN-to-BSN

Registered nurses seeking admission to the RN-to-BSN curriculum who need to complete nursing prerequisites and/or General Education courses may apply for admission as a Pre-RN-to-BSN student. Applicants must have a cumulative GPA of at least 2.0 on all college work attempted. Admission as a Pre-RN-to-BSN student does not automatically admit an applicant to the RN-to-BSN Program.

Admission Requirements

Freshmen

- First year students are not eligible for this major.

Transfers

- See University Admission Requirements
- Minimum GPA: 2.0
- Completion of all General Education requirements
- *Pre-Major/Prerequisite Courses:* Applicants must complete nursing prerequisite courses with a minimum grade of C and General Education requirements by the end of the semester of application to the RN-to-BSN Completion program.
- Transferable Credit Hours: 24

Degree Requirements

All General Education and nursing prerequisite courses must be completed by the end of the semester preceding the semester for which the application is made.

General Education & Prerequisite Courses (31-32 credit hours)

Some required Prerequisite Courses meet General Education requirements. Also required are critical thinking, local theme, and global theme courses. For details on required courses, refer to the General Education Program and review transfer policies. Students in this major should plan on taking the following courses that meet general education, prerequisite, and major requirements.

WRDS 1103 - Writing and Inquiry in Academic Contexts I and II (3)
or WRDS 1104 - Writing and Inquiry in Academic Contexts I and II with Studio (4)

CHEM 1203 - Introduction to General, Organic, and Biochemistry I (3)
or CHEM 1251 - General Chemistry I (3)

CHEM 1203L - General, Organic, and Biochemistry I Lab (1)
or CHEM 1251L - General Chemistry I Lab (1)

MATH 1100 - College Algebra (3)
or MATH 1101 - College Algebra with Workshop (4)

PSYC 1101 - General Psychology (3)

STAT 1222 - Introduction to Statistics (3)
or STAT 1220 - Elements of Statistics I (BUSN) (3)
or STAT 1221 - Elements of Statistics I (3)

BIOL 2259 - Fundamentals of Microbiology (3)

BIOL 2259L - Fundamentals of Microbiology Lab (1)

BIOL 2273 - Human Anatomy and Physiology (3)
or EXER 2168 - Human Anatomy and Physiology for the Health Professions (3)

BIOL 2273L - Human Anatomy and Physiology Lab (1)
or EXER 2168L - Human Anatomy and Physiology for the Health Professions Lab (1)

BIOL 2274 - Human Anatomy and Physiology II (3)
or EXER 2169 - Human Anatomy and Physiology for the Health Professions II (3)

BIOL 2274L - Human Anatomy and Physiology II Lab (1)
or EXER 2169L - Human Anatomy and Physiology for the Health Professions II Lab (1)

Note: Registered nurses seeking admission to the RN-to-BSN curriculum who need to complete nursing prerequisites and/or General Education

courses may apply for admission as a Pre-RN-to-BSN student. Applicants must have a cumulative GPA of at least 2.0 on all college work attempted. Admission as a Pre-RN-to-BSN student does not automatically admit an applicant to the RN-to-BSN Program.

Prerequisites for Participation in Clinical Experiences

Immunization and Health Status

All RN-to-BSN students must meet the University's immunization and health status requirements.

Professional Liability Insurance

All students must show proof of professional liability insurance for a Registered Nurse (RN).

Universal Precautions

All students must successfully complete a College computer-based exam on universal precautions each year of the professional program.

Drug Testing and Criminal Background Checks

To comply with clinical agency requirements, students in the nursing program may be required to undergo drug testing and have a criminal background check before being allowed to participate in clinical experiences. Students are responsible for the cost of drug testing and criminal background checks.

Requirements for Progression in the Nursing Program

- 1) The Progression Policy for upper-division nursing students is included in the School of Nursing handbooks, which are available online at nursing.charlotte.edu under "Student Resources."
- 2) No course in the Nursing major can be taken as transient study. Transfer credit for nursing courses will be considered on an individual basis.

Major Courses (28 credit hours)

NURN 3103 - Concepts of Professional Nursing Science (3)

NURN 3104 - Issues in Cultural Health (1)

NURN 3108 - Health Assessment for Nurses (3)

NURN 4100 - Aging and Health (3)

NURN 4201 - Information Technology: Application in Health Care (2)

NURN 4203 - Leadership in Nursing Practice (2)

NURN 4440 - Community Health Nursing (6)

NURN 4450 - Design and Coordination of Care for Nurses (6)

NURN 4900 - Research in Nursing Practice (2)

Restricted Elective Course (3 credit hours)

Select one nursing elective course approved by the School of Nursing. The following course meets this requirement. To request another course to fulfill this requirement, contact the RN-to-BSN Coordinator for approval.

NURN 4192 - Enhancing Clinical Judgment (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 credit hours

Admission to Upper Division

Students seeking admission to the RN-to-BSN Completion program must have completed a nursing program and be licensed as a Registered Nurse with an unencumbered license.

Special Policies or Requirements

Once admitted to the RN-to-BSN completion curriculum:

- Students must have prerequisite computer knowledge in using e-mail, word processing (create/save/open/retrieve), file management, editing, formatting, and using an internet browser (search and navigate). The RN-to-BSN nursing curriculum is currently offered through a totally web-based format (through Distance Education). The format is 10 courses and 31 credit hours in length.
- All students must meet the University's immunization and health status requirements.
- All students must show proof of professional liability insurance for a Registered Nurse (RN).

North Carolina Articulation Agreement

The University of North Carolina RN-to-BSN programs and the NC Community college system have approved an articulation agreement for nursing students to complete their degrees. The agreement is available online at: northcarolina.edu/college-transferarticulation-agreements/uniform-articulation-agreement-rn-bsn.

Honors Program in Nursing

The School of Nursing academic honors program emphasizes scholarship and leadership activities, such as identifying key issues impacting the nursing profession at the microsystem level.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

All students who meet the admission criteria for the School of Nursing (SON) Honors Program, and who are unconditionally admitted to the upper division major, are eligible to apply for admission to the School of Nursing Honors Program. Through a competitive process, interested students may apply to the SON Honors Program during their first semester of upper division. To be eligible for admission to the SON Honors Program, students must:

- Receive unconditional admission to the upper division major
- Have a nursing prerequisite minimum GPA of 3.7
- Submit an application that includes a typed statement (500 words or less) which addresses the following:
 - What are your academic/career goals specifically related to nursing?
 - How will participation in the School of Nursing Honors Program impact your academic/career goals?
 - What key issues do you think are impacting the nursing profession?
 - What role do nurses play in shaping the future of healthcare?

Applications are reviewed by the SON Honors Committee. Recommendations for admission are made to the SON Director and are based on academic achievement (GPA) and scoring of statement. Students with questions related to the admission decision to the SON

Honors Program may direct them to the SON Honors Committee. Upon acceptance, the student must sign the Honors College Student Code form.

Special Policies or Requirements

Course Requirements

NURS 3700 - Creating and Sustaining Change in Nursing (2) (*taken during Junior year*)

NURS 4203 - Leadership and Informatics for Nursing Practice (3) (*Honors section; taken during Senior year*)

Progression Requirements

Students must complete the Application to Candidacy process with the Honors College in order to graduate with honors.

To remain in the School of Nursing Undergraduate Honors program, students must meet SON progression criteria, receive no grade less than a B in NURS courses with an allowance of one earned C, and maintain a preferred GPA of 3.7 or above.

All Honors students must adhere to SON and Honors College policies and procedures.

- Maintain a preferred GPA of 3.7 or above
- Grades of B or above for NURS courses. One grade of C will be allowed.
- Grade of A in NURS 4203 honors section test of change, research, quality improvement, or health promotion project

Early Entry: Master of Science in Nursing

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree. Students graduate with a BSN and then a MSN.

Note: Early Entry is only available for Advanced Clinical Nursing and Systems/Populations Nursing, Nurse Anesthesia Across the Lifespan, Family Nurse Practitioner, and Adult-Gerontology Acute Care Nurse Practitioner do not admit Early Entry students.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Completion of all criteria for admission to the RN-to-BSN Program (all prerequisites taken)
- One year of professional nursing practice is recommended
- Minimum 3.2 overall undergraduate GPA
- Acceptable scores on the appropriate graduate standardized test (e.g., GRE)
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Successful completion of the BSN with a GPA of 3.0 in the RN-to-BSN program
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 10 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 10 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

Required Undergraduate Courses	Graduate Course Substitutions
NURN 3103 Concepts of Professional Nursing Science (3)*	NURS 6101 Theoretical Basis for Nursing Practice (3)
NURN 4201 Information Technology: Applications in Healthcare (2)	NURS 6115 Health Policy and Planning in the U.S. (3)
NURN 4900 Research in Nursing Practice (2)	NURS 6160 Research in Nursing and the Health Professions (3)
Nursing Elective	Additional Graduate Course

Credit hours for NURN 3103 are awarded upon successful completion of NURN 4450.

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

School of Social Work

socialwork.charlotte.edu

Undergraduate Programs

- **Bachelor of Social Work (BSW)**
 - Honors Program

The School of Social Work offers a major in Social Work leading to the Bachelor of Social Work (BSW) degree. On the graduate level, the Department offers the Master of Social Work (MSW) degree. See the *UNC Charlotte Graduate Catalog* for details on the MSW.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Social Work (BSW)

Social work is a profession devoted to helping people function as effectively as possible within their environment, be it a context such as a family, a group, an organization such as a job, or a community. The UNC Charlotte BSW Program is accredited by the Council on Social Work Education, the accrediting body for social work education programs. The BSW degree prepares students for generalist social work practice with individuals, families, groups, organizations, and communities. Generalist practice relates to utilizing multiple types of interventions that would be useful for different types of social systems and client populations. BSW graduates provide services such as assessment and intervention, counseling, crisis intervention, referral, mediation, and advocacy with diverse populations across all age groups. BSW graduates work in a broad array of settings including: hospitals; group homes; mental health, substance abuse, child welfare, youth and family service agencies; nursing homes; and schools. The degree is centered in professional social work values and ethics within an increasingly global environment and is designed to affirm the human rights of diverse groups of people, especially populations-at-risk and groups which have historically been oppressed due to race, ethnicity, socioeconomic status, gender, sexual orientation, age, and ability. BSW education also provides an excellent foundation for those who wish to pursue graduate study in social work.

Admission Requirements

Freshmen

- See University Admission Requirements
- *Minimum GPA:* Declaring the Major (Lower Division): 2.0 GPA; Upper Division Admission: 2.5 GPA
- *Pre-Major/Prerequisite Courses:* Students changing to the lower-division Social Work major from another major must attend a Change of Major workshop. Students entering the B.S.W. program upper-division sequence must apply and be accepted into the B.S.W. program to progress to the upper-division sequence. The application process is competitive. To apply, students must

demonstrate that they are on track for completing the following by the time of program entrance:

- 60 credit hours
- Completion of all General Education requirements
- A grade of C or above in SOWK 2182, SOWK 2183, BIOL 1110, BIOL 1110L, POLS 1110, PSYC 1101, STAT 1222, and SOCY 1101

Transfers

- See University Admission Requirements
- *Minimum GPA*: Declaring the Major (Lower Division): 2.0 GPA; Upper Division Admission: 2.5 GPA
- *Pre-Major/Prerequisite Courses*: All incoming students begin as Pre-Social Work and apply to the Upper Division once eligible.
- *Transferable Credit Hours*: 24

Degree Requirements

The Major in Social Work leading to the BSW degree consists of 120 credit hours.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information. Students majoring in Social Work should take the following courses that meet general education and major requirements:

- BIOL 1110 - Principles of Biology I (3)
- BIOL 1110L - Principles of Biology I Laboratory (1)
- POLS 1110 - American Politics (3)
- PSYC 1101 - General Psychology (3)
- SOCY 1101 - Introduction to Sociology (3)
- STAT 1222 - Introduction to Statistics (3)

Major SOWK Courses (52 to 57 credit hours)

Students must receive a grade of C or better in every Major SOWK course, including Abnormal Psychology. Students who receive two grades of D or F during matriculation in the Upper Division will be dismissed from the major.

- PSYC 2341 - Introduction to Abnormal Psychology (3)
- SOWK 1511 - Local Social Science: Issues of Health and Quality of Life (3)
- SOWK 2182 - Human Behavior in the Social Environment I (3)
- SOWK 2183 - Human Behavior in the Social Environment II (3)
- SOWK 2184 - Writing for the Social Work Profession (1)
- SOWK 3120 - Diversity and Populations-at-Risk (3)
- SOWK 3133 - Community Engagement and Outreach (3)
- SOWK 3180 - Case Management (3)
- SOWK 3181 - Practice Methods I (3)
- SOWK 3182 - Practice Methods II (3)
- SOWK 3184 - Practice Methods III (3)
- SOWK 3199 - Professional Behaviors, Ethics, and Communication (3)
- SOWK 3201 - Foundations of Social Welfare (3)
- SOWK 3202 - Social Welfare Policy (3)
- SOWK 3482 - Social Work Practicum I (3 or 5)
- SOWK 3484 - Social Work Practicum II (3 or 6)
- SOWK 3900 - Social Work Research I (3)
- SOWK 3988 - Social Work Research II (3)

Population Group Courses (12 credit hours)

Select four of the following courses examining diverse and vulnerable population groups of interest to social work. The following courses are pre-approved as population group courses. Only the courses on the list of preapproved population group courses can be used to meet this requirement.

- AFRS 1100 - Introduction to Africana Studies (3)
- AFRS 2120 - African American Women (3)
- AFRS 2170 - Introduction to Health and Environmental Issues in the Africana World (3)
- AFRS 2215 - Black Families in the United States (3)
- ANTH 1101 - Introduction to Anthropology (3)
- ANTH 2117 - Cultures of the Caribbean (3)
- ANTH 2122 - Beliefs, Symbols, and Rituals (3)
- ANTH 2123 - Women in Cross-Cultural Perspective (3)
- CJUS 2350 - Introduction to Corrections (3)
- CJUS 2361 - Juvenile Justice (3)
- GRNT 2100 - Aging and the Lifecourse (3) (SL)
- GRNT 2124 - Psychology of Adult Development and Aging (3)
- GRNT 3115 - Health and the Aging Process (3)
- GRNT 3267 - Sociology of Dying, Death and Bereavement (3)
- GRNT 4110 - Sociology of Aging (3)
- GRNT 4134 - Families and Aging (3)
- GRNT 4250 - Aging Programs and Services (3)
- GRNT 4365 - Grief and Loss Across the Lifespan (3)
- LTAM 1100 - Introduction to Latin America (3)
- LTAM 2116 - Contemporary Latin America (3)
- LTAM 2117 - Cultures of the Caribbean (3)
- LTAM 3110 - Black Families in the Diaspora (3)
- PSYC 2370 - Child Development (3)
- PSYC 2371 - Adolescent Development (3)
- PSYC 2372 - Adult Development and Aging (3)
- PSYC 3356 - Introduction to the Psychology of Women and Gender (3)
- RELS 1200 - World Religions (3)
- RELS 2101 - Introduction to Western Religions (3)
- RELS 2102 - Introduction to Asian Religions (3)
- RELS 2107 - Native American Religions (3)
- RELS 2108 - Religion in American Culture (3)
- RELS 2131 - Islam (3)
- SOCY 2100 - Aging and the Lifecourse (3) (SL)
- SOCY 3110 - American Minority Groups (3)
- SOCY 3261 - Human Sexuality (3)
- SOCY 4165 - Sociology of Women (3)
- SOCY 4168 - Sociology of Mental Health and Illness (3)
- SOWK 3090 - Topics in Social Work (3)
- SOWK 4090 - Topics in Social Work (1 to 3)
- SOWK 4101 - Social Work Practice with Older Adults (3)
- SOWK 4102 - School Social Work (3)
- SOWK 4103 - Child Welfare (3)
- SOWK 4105 - Mental Health and Substance Use (3)
- SOWK 4106 - Social Work Practice with Latino Communities (3)
- SOWK 4109 - Systems of Care for Vulnerable Populations (3)
- SOWK 4125 - Social Development in Malawi (3)
- SOWK 4365 - Grief and Loss Across the Lifespan (3)
- WGST 1101 - Introduction to Women's Studies (3)
- WGST 2120 - African American Women (3)
- WGST 2130 - Masculinity and Manhood (3)
- WGST 2160 - Introduction to LGBTQ+ Studies (3)

WGST 3050 - Topics in Women's Studies (3)

WGST 3051 - Topics in Women's Studies (3)

WGST 3140 - Domestic Violence (3)

WGST 3152 - Modern Gay America (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

Students must receive a grade of C or better in every Major SOWK course, including Abnormal Psychology. Students who receive two grades of D or F during matriculation in the Upper Division will be dismissed from the major.

Honors Program in Social Work

The Social Work Honors Program is an academic honors program that emphasizes research, practice, and policy activities that align with the focus of the profession.

Admission Requirements

Current UNC Charlotte Undergraduate Students

Students may apply for admission to the undergraduate Social Work Honors Program during the Fall semester of their first year of upper-division matriculation. The undergraduate admissions committee will determine the process for review of applications.

Admission criteria are as follows:

- See University Admission Requirements
- Overall GPA of 3.4
- Submit a social work honors application which includes an essay
- Submit a completed recommendation form
- Upon acceptance, the student must sign the Honors College Student Code form

Course Requirements

Social Work Honors students must submit a capstone project during the last year of their progression in the undergraduate social work program. This project demonstrates the collection, selection, and reflection of high-quality course assignments, research activities, and/or projects. This project is carried out in conjunction with the senior field education

course (SOWK 3484). The information below provides further details regarding the capstone project.

- The capstone project must align with the Council on Social Work Education (CSWE) Educational Policy and Accreditation Standards and the student's preferred target population for social work practice.
- Students prepare a proposal in the Fall semester of their last year in the program based on their preferred target population and detailing the methodology for their project which includes the following:
 - A literature review
 - A theoretical framework
 - Selection of three selected EPAS standards and detail regarding proposed artifacts that demonstrate proficiency including assignments, projects, and/or activities
 - The drafted proposal for the planned contents for the capstone project must be provided to the committee in the Fall semester of the final year of the program
- In the Spring semester of their last year in the program, honors students will ensure they have collected and selected high-quality content to demonstrate a high level of proficiency. They complete the following:
 - Provide a written paper which includes a literature review, theoretical framework, selection of EPAS standards, detailed explanation of artifacts utilized for the capstone project, and a synthesis of findings
 - The capstone project is orally defended before the committee in the Spring semester of the final year of the program

Progression Requirements

To remain in the Social Work Honors program, students must:

- Maintain a minimum of a 3.4 overall grade point average
- Maintain a minimum of a 3.4 cumulative grade point average in all Social Work courses counted toward the major

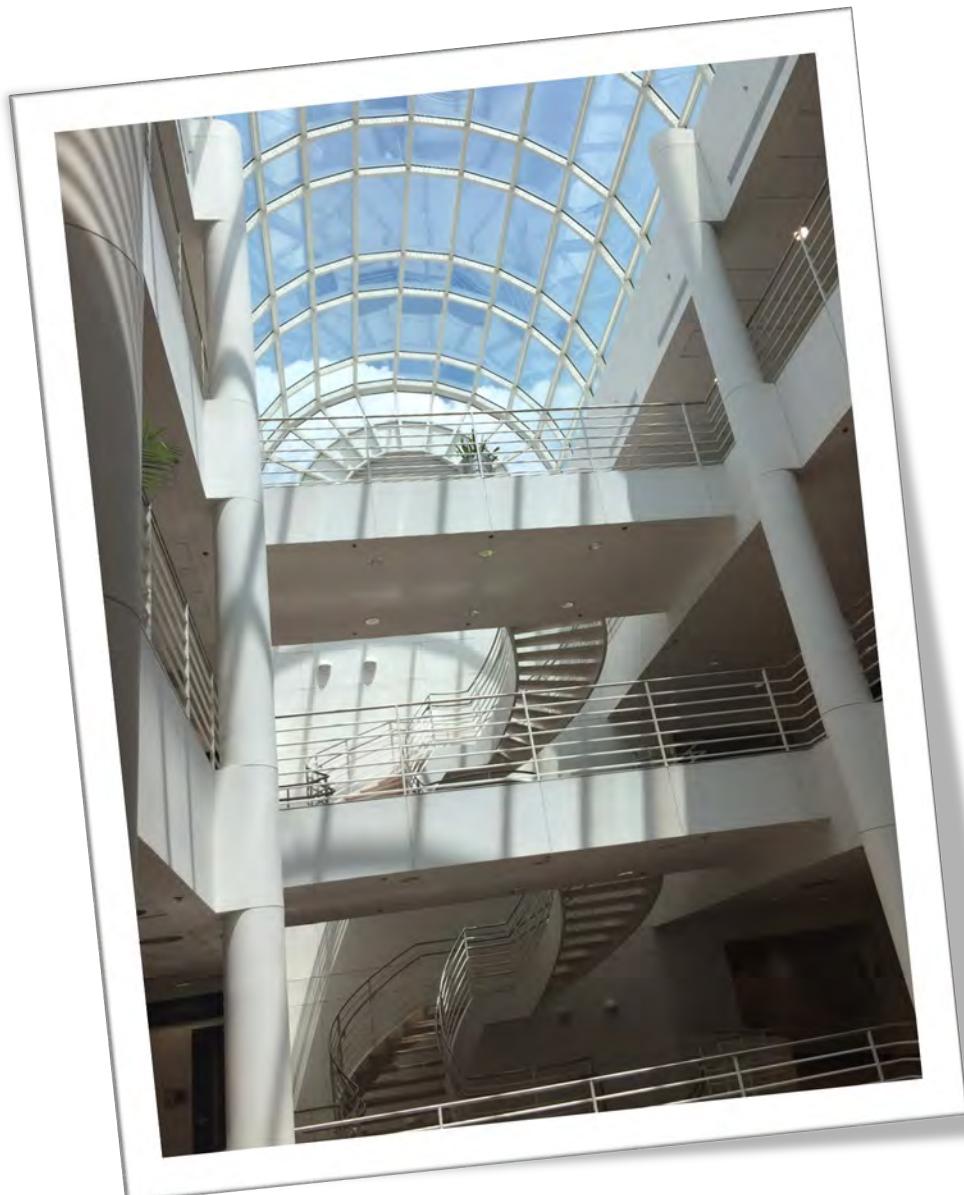

To graduate with Honors in Social Work, students must:

- Produce a written capstone project proposal in the Fall semester. It must be judged by a committee of readers and pass.
- Provide an oral defense of the capstone project before a committee. It must be judged by a committee of readers as "A" quality to pass.
- Comply with all procedural requirements established by the Honors College for graduating with honors in a department
- Have a minimum cumulative GPA of 3.4
- Earn a grade of A in the culminating senior field education course (SOWK 3484)
- Complete the Application to Candidacy process for graduating with honors, as directed by the Honors College. This is a two-semester process, and students must apply in both the Fall and Spring.

The Honors notation will appear on a student's official transcript and noted on the commencement program.

If all requirements are not met, students can still progress through the B.S.W. program and complete degree requirements, but they will not graduate with designated honors.

College of **Humanities & Earth and Social Sciences**

College of Humanities & Earth and Social Sciences

chess.charlotte.edu

The College of Humanities & Earth and Social Sciences (CHESS) is an academic community engaged in advancing the discovery, dissemination, and application of knowledge in the traditional areas of liberal arts and the earth and social sciences as well as in emerging areas of study. As a community focused on learning and teaching, the College is guided by an unshakeable commitment to humanistic values and ethical conduct, by a creative and entrepreneurial frame of mind, and by an awareness of the global context in which the University exists.

The liberal arts are the core of the University's educational program, both for students majoring in liberal arts and for students majoring in all other degree programs. As a result, courses offered within the College of Humanities & Earth and Social Sciences are frequently those designated to satisfy University General Education requirements (see *General Education Requirements* in the *Degree Requirements and Academic Policies* section of this Catalog).

Departments

The College of Humanities & Earth and Social Sciences consists of these departments/offices:

- Department of Aerospace Studies (Air Force ROTC)
- Department of Africana Studies
- Department of Anthropology
- Department of Communication Studies
- Department of Criminal Justice and Criminology
- Department of English
- Department of Earth, Environmental, and Geographical Sciences
- Department of Global Studies
- Department of History
- Office of Interdisciplinary Studies
- Department of Languages, Cultures, and Translation
- Department of Military Science (Army ROTC)
- Department of Philosophy
- Department of Political Science and Public Administration
- Department of Psychological Science
- Department of Religious Studies
- Department of Sociology
- Department of Writing, Rhetoric, and Digital Studies

Degree Programs

Majors

- Bachelor of Arts in Africana Studies
- Bachelor of Arts in Anthropology
- Bachelor of Arts in Communication Studies
- Bachelor of Arts in Criminal Justice
- Bachelor of Science in Earth and Environmental Sciences
- Bachelor of Arts in English
- Bachelor of Arts in Environmental Sciences
- Bachelor of Arts in French
- Bachelor of Arts in Geography
- Bachelor of Science in Geography
- Bachelor of Science in Geology
- Bachelor of Arts in German
- Bachelor of Arts in Global Studies
- Bachelor of Arts in History
- Bachelor of Arts in Interdisciplinary Studies
- Bachelor of Arts in Japanese
- Bachelor of Arts in Latin American Studies
- Bachelor of Arts in Meteorology
- Bachelor of Arts in Philosophy
- Bachelor of Arts in Political Science
- Bachelor of Science in Psychology
- Bachelor of Arts in Religious Studies
- Bachelor of Arts in Sociology
- Bachelor of Arts in Spanish
- Bachelor of Arts in Writing, Rhetoric, and Digital Studies

Minors

- Aerospace Studies
- Africana Studies
- American Studies
- Arabic Studies
- Anthropology
- Capitalism Studies
- Children's Literature and Childhood Studies
- Chinese
- Cognitive Science
- Communication Studies
- Comparative Literature and Cultural Studies
- Criminal Justice
- Earth and Environmental Sciences

- Legal Studies
- Linguistics
- Military Science
- Philosophy
- Political Science
- Psychology
- Public Administration
- Religious Studies

- Russian
- Security and Intelligence Studies
- Sociology
- Spanish
- Statistics
- Technical and Professional Writing
- Urban Studies
- Women's and Gender Studies
- Writing, Rhetoric, and Digital Studies

Undergraduate Certificates

- LANG: Business French
- LANG: Business German
- LANG: Business Japanese
- LANG : Business Language: Spanish
- LANG: German for Engineering
- LANG: Hispanic Literary Studies
- LANG: Translating French-English
- LANG: Translating German-English
- LANG: Translating Japanese-English
- LANG: Translating Russian-English
- LANG: Translating Spanish-English
- Leadership, Innovation, Technology, and Diversity
- Leadership Studies
- Video Production

Although faculty within the College are committed to departmentally based programs, increased emphasis is being placed on providing strong interdisciplinary programs. The College also strives to promote intercultural understanding through its curriculum, as well as through student exchanges and travel opportunities.

Degree Requirements

General Education Requirements

Since all students entering the University must meet the same General Education requirements regardless of major, it is appropriate to concentrate on the completion of those requirements before committing to a specific major. Undeclared students have time to enroll in courses in several disciplines, which allows them to make a more informed judgment about future career decisions. Advisors have a broad working experience with the requirements for majors and offer assistance as students search for the education choice best suited to their individual needs.

Degree Programs/Majors and Minors Requirements

Students in the College of Humanities & Earth and Social Sciences must satisfy the requirements for the degree program(s) in which they are enrolled. Students should consult with their chosen department to make certain they fully understand all degree requirements. Many students also pursue a second degree or even a minor(s) in conjunction with their major degree program. Students should be familiar with the requirements of any minor program of study they attempt to complete.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Foreign Language Requirement

All students who earn a degree within the College of Humanities & Earth and Social Sciences are required to demonstrate proficiency in the language of their choice through the 1202 level. Proficiency can be demonstrated in one of the following ways:

- Completing the required coursework at UNC Charlotte
- Completing three years of the same foreign language in high school through level three
- Achieving a satisfactory score on the foreign languages placement test in Chinese (Mandarin), French, German, Italian, Japanese or Spanish
- Through approved transfer or transient credit earned at a college or university accredited by an accepted accrediting body
- By transferring in with an A.A., A.S. or A.F.A. degree
- A combination of the above methods (e.g., placing out of or earning transfer or transient credit for 1201 and completing the 1202 course, completing 1201 and placing out of or earning transfer or transient credit for 1202)

The following courses offered at UNC Charlotte meet the College of Humanities & Earth and Social Sciences' foreign language requirement. *Please note that the below courses also have prerequisites that students must meet prior to enrolling in the courses.*

- ARBC 1202 - Elementary Arabic II (3)
- CHNS 1202 - Elementary Chinese II (3)
- FREN 1202 - Elementary French II (3)
- GERM 1202 - Elementary German II (3)
- ITLN 1202 - Elementary Italian II (3)
- JAPN 1202 - Elementary Japanese II (3)
- RUSS 1202 - Elementary Russian II (3)
- SPAN 1202 - Elementary Spanish II (4)

If students wish to fulfill their requirement with a language not taught at UNC Charlotte they must follow the guidelines for Certification of Proficiency by contacting the Department of Languages, Cultures, and Translation.

This requirement applies to all students entering any degree program within the College of Humanities & Earth and Social Sciences except those students whose primary major is in the College of Engineering and are enrolled in one of the Dual Degree Programs with Physics.

Additionally, students in select departments have to satisfy a proficiency requirement through the intermediate (2000) or advanced (3000) level for their major. All students in the College of Humanities & Earth and Social Sciences should consult with their major department to determine whether or not they are required to complete the intermediate or advanced proficiency requirement as part of their major or related coursework.

Advising

The College of Humanities & Earth and Social Sciences administers the Office of Advising and Student Services, an advising center for freshmen and transfer students who have enrolled in a major or pre-major within the college. Professional advisors are available to provide guidance on both first-year and/or pre-major requirements, as well as General Education requirements. The Student Services area of the College of Humanities & Earth and Social Sciences oversees all student services functions for the college, which includes the review of student appeals and requests, as well as academic-related issues that arise among students within CHESS.

The advising team is dedicated to establishing relationships with all CHESS freshmen and pre-major transfer students that help them achieve their academic, personal, and professional goals. The advisors are also dedicated to connecting students to enrichment opportunities in the departments as well as across campus and beyond..

Experiential Learning and Service Opportunities

The college aims to inspire innovative thinking in undergraduate students and contribute to the development of creative problem solvers, innovative leaders, and engaged citizens. Students are also encouraged to participate in professional work experiences in support of their academic and career development through cooperative education, 49ership, departmental undergraduate research, community-engaged research and service, and internship programs offered to them. The partnership with the University Career Center expands experiential learning offerings so more students graduate with career-related experience. For more information about experiential learning opportunities, please see the University Career Center section of this *Catalog*.

Department of Africana Studies

africana.charlotte.edu

Undergraduate Programs

- **B.A. in Africana Studies**
 - Health and Environment
 - Popular Culture and Digital Media
 - Social Justice and the Law
 - Honors Program
- **Minor in Africana Studies**

The Department of Africana Studies curriculum focuses on four critical areas: history, culture, social policy (especially health and environment), and entrepreneurship, as these relate to the experiences of the peoples of African descent globally. The department offers a comprehensive liberal arts curriculum that enhances global awareness, engages social policies, fosters entrepreneurial skills in regional and transnational contexts, and develops the skills needed for success in the 21st century. Its interdisciplinary approach presents a stimulating diversity of perspectives integrated into a totality not available in other disciplines, programs, or departments. The curriculum is designed to provide a useful educational experience and academic skills for students who wish to consider graduate study or professional school and pursue careers in entrepreneurship; community development agencies; federal, state, and city civil service; business; museums and archives; health and environment fields; diplomatic and foreign service; as well as research, journalism, international organizations, and teaching.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

The goals of the Department of Africana Studies are:

- a) To disseminate knowledge about the aggregate experience of peoples of African descent by offering a wide range of Africana courses to the University community and the public.
- b) To generate new knowledge and paradigms about the experiences of peoples of African descent through research, publication, and teaching that are interdisciplinary, transnational, and intercultural.

- c) To dispel myths and stereotypes about Blackness and Africa-derived cultures and practices through critical course content, programs, exchanges of ideas, and inter-cultural interaction.
- d) To promote transnational perspectives that foster Sociocultural and political awareness to meet the critical challenges posed by globalization, professional careers, as well as the demands of the work world through exposure to relevant experiences and course requirements.
- e) To provide general and specific academic skills to majors and non-majors through courses and activities that promote research, writing, reading, critical thinking, effective communication, and problem solving.
- f) To advance the intellectual development and personal growth of students through the acquisition, synthesis, dissemination, and application of a multicultural liberal arts education.
- g) To serve and contribute to local, national, and international civic institutions.

Bachelor of Arts in Africana Studies

The Major in Africana Studies leading to a B.A. degree requires the completion of a minimum 30 credit hours in Africana Studies courses.

The major is ideal for students who want to work in a field where a background in liberal arts education is desirable, such as social and community services, media, teaching, entrepreneurship, business, government service, international organizations, museums and archives, corporate and organization diversity, and not-for-profit agencies. The major is also relevant for students who are interested in graduate study or professional school.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- Minimum GPA: 2.0
- Transferable Credit Hours: 24

Currently Enrolled Students

AFRS 3262 - Philosophy and Race (3)

AFRS 3265 - African Economic Development (3)

AFRS 4100 - African Diaspora Theory (3)

Restricted Elective Courses (12 credit hours)

Three to four courses (9-12 credits) from the following and other AFRS courses approved by the Department Chair:

AFRS Elective Courses

AFRS 2172 - Black Sexuality and Health (3)

AFRS 3155 - Health and Healing in Africa (3)

or HIST 3155 - Health and Healing in Africa (3)

AFRS 3250 - African Americans and Health Communication (3)

AFRS 3261 - Psychology of the Black Experience (3)

AFRS 3895 - Independent Study (1 to 3)

AFRS 4630 - Environmental and Public Health in Africa (3)

AFRS 4640 - Environment, State, and Society in the Caribbean and Latin America (3)

AFRS 4652 - Race, Health, and the African Diaspora (3)

Other Elective Courses

One elective course (3 credit hours) MAY be taken from the following or any other related course approved by the Department Chair:

AFRS 1501 – Global Social Science: Africana Studies (3)

AFRS 1512 – Local Arts/Humanities: Africana Studies (3)

- ANTH 2126 - World Population Problems (3)
- ANTH 3122 - Culture, Health and Disease (3)
- ANTH 3124 - Food, Nutrition and Culture (3)
- ANTH 4131 - Culture, Pregnancy and Birth (3)
- COMM 3051 - Topics in Health Communication (3)
- COMM 3115 - Health Communication (3)
- ESCI 2101 - The Environmental Dilemma (3)
- GEOG 2103 - Elements of GIScience and Technologies (4)
- GEOG 3215 - Environmental Planning (3)
- GRNT 3115 - Health and the Aging Process (3)
or HLTH 3115 - Health and the Aging Process (3)
- HIST 2140 - Disease and Medicine in History (3)
- HLTH 2101 - Healthy Lifestyles (3)
- HLTH 3102 - Comparative Healthcare Systems (3)
- HLTH 3103 - Behavior Change Theories and Practice (3)
- HLTH 4090 - International Comparative Health Systems: Western Europe (3)
- HLTH 4103 - Environmental Health: - A Global Perspective (3)
- HLTH 4104 - Epidemiology (3)
- HLTH 4280 - Global Health Issues (3)
- POLS 3125 - Health Care Policy (3)
- SOCY 2169 - Sociology of Health and Illness (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

A minimum 2.0 grade point average is required in the 30 credit hours of the Major in Africana Studies.

Research Project/Professional Internship

During their Junior or Senior year, students may design and work on a major research project or enroll in a professional internship program at places such as the Harvey B. Gantt Center for African American Arts + Culture; Charlotte City Hall; International House; Levine Museum of the New South; Planned Parenthood; Latibah Collard Green Museum; Neighborhood Good Samaritan Center, Inc.; Juneteenth Festival of the Carolinas; the *Charlotte Observer*, and the *Charlotte Post*.

Study Abroad

Students may take advantage of the opportunity to travel, work, and study abroad in an exchange program, especially in Africa, the Caribbean, and Europe, as well as with the Peace Corps and Operation Crossroads. For more information, visit the Office of Education Abroad at edabroad.charlotte.edu.

Bachelor of Arts in Africana Studies with Concentration in Popular Culture and Digital Media

Students may, if desired, complete a Concentration in Popular Culture and Digital Media as part of the B.A. in Africana Studies. The concentration focuses on the cultural, social, ethical, psychological, historical, and policy dimensions of the pertinent popular culture and digital media issues in the global Africana World. The concentration

requires the completion of 30 credit hours in Africana Studies courses as follows.

Admission Requirements

Freshmen and Transfers

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

The Africana Studies department offers the Global Social Science (AFRS 1501) and the Local Humanities (AFRS 1512) general education courses. These are open to all students within and outside the department. Majors may apply 3 credits from general education courses to their degree requirements.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirement.

Major Courses (18 credit hours)

- AFRS 1100 - Introduction to Africana Studies (3)
- AFRS 2105 - Black Images in the Media in the U.S. (3)
- AFRS 3290 - Research Methods (3)
- AFRS 4600 - Senior Seminar in African Studies (3)

Select one of the following:

- AFRS 2156 - African Civilization (3)
- AFRS 2160 - African American Experience through Civil War (3)
- AFRS 2161 - African American Experience: - Civil War to Civil Rights (3)

Select one of the following:

- AFRS 2172 - Black Sexuality and Health (3)
- AFRS 2207 - Pan-Africanism (3)
- AFRS 2215 - Black Families in the United States (3)
- AFRS 3101 - Perspectives on Race and Ethnicity in the US (3)
- AFRS 3179 - African American Political Philosophy (3)
- AFRS 3190 - Political Economy of the Caribbean (3)
- AFRS 3200 - Folklore of Africa and the African Diaspora (3)
- AFRS 3218 - Racial Violence, Colonial Times to Present (3)
- AFRS 3240 - Race and the Law (3)
- AFRS 3261 - Psychology of the Black Experience (3)
- AFRS 3262 - Philosophy and Race (3)
- AFRS 3265 - African Economic Development (3)
- AFRS 4100 - African Diaspora Theory (3)

Restricted Elective Courses (12 credit hours)

Three to four courses (9-12 credits) from the following and other AFRS courses. All topics courses, independent studies, internships, and colloquia must be approved by the Department Chair.

AFRS Elective Courses

- AFRS 2050 -Topics in Africana Studies (3)
- AFRS 2103 - Introduction to Hip Hop (3)
- AFRS 2107 - Global Hip Hop (3)
- AFRS 2206 - African Literature, Music, and Art (3)
- AFRS 3050 - Topics in Africana Studies (3)
- AFRS 3192 - African Cinema (3)
- AFRS 3200 - Folklore of Africa and the African Diaspora (3)
- AFRS 3692 - Colloquium (3)
- AFRS 3895 - Independent Study (3)
- AFRS 4050 - Topics in Africana Studies (3)
- AFRS 4401 - Professional Internship in Africana Studies (3)

Other Elective Courses

One elective course (3 credit hours) MAY be taken from the following or any other related course approved by the Department Chair:

- COMM 3125 - New Media for Communications (3)
- COMM 3126 - Globalization and Digital Media (3)
- ENGL 2106 - Film Criticism (3)
- ENGL 3180 - Language and Digital Technology (3)
- ENGL 4267 - Language and Culture in Digital Spaces (3)
- SOCY 2112 - Popular Culture (3)
- WRDS 3211 - Online Writing: Ethics, Appropriation, and Social Media (3)
- WRDS 3215 - Information Literacy and Digital Composing (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

A minimum 2.0 grade point average is required in the 30 credit hours of the Major in Africana Studies.

Bachelor of Arts in Africana Studies with Concentration in Social Justice and the Law

Students may, if desired, complete a Concentration in Social Justice and the Law as part of the B.A. in Africana Studies. The concentration focuses on the cultural, social, ethical, psychological, historical, and policy dimensions of the pertinent social justice and legal issues in the global Africana World. The concentration requires the completion of 30 credit hours in Africana Studies courses as follows.

AFRS 2xxx - Africana Studies Elective (3)
AFRS 3xxx-4xxx - Africana Studies Elective (3)
AFRS 3xxx-4xxx - Africana Studies Elective (3)

Progression Requirements

A minimum of 2.0 GPA is required for the 18 credit hours of the Minor in Africana Studies.

Total = 18 Credit Hours

Honors Program in Africana Studies

The Honors Program in Africana Studies provides opportunities for exceptional achievement in the Africana Studies major. The goal is to deepen the understanding of high-achieving and self-motivated students in the interdisciplinary field of Africana Studies. Students admitted into the Africana Studies honors program are required to successfully complete a research, creative, and/or community engagement project/thesis in the field of Africana Studies. The final product must demonstrate evidence of scholarly rigor, intellectual curiosity, and creative problem-solving.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- A declared Africana Studies major
- Completion of a minimum of 6 credit hours of AFRS courses with at least a B grade in each
- GPA of at least 3.25 in all Africana Studies courses counted toward the major and taken at UNC Charlotte
- GPA of at least 3.0 for all coursework at UNC Charlotte

Course Requirements

Research or Theory Course (3 credit hours)

Select one of the following:

AFRS 3290 - Research Methods (3) (*Honors section*)

AFRS 4100 - African Diaspora Theory (3) (*Honors section*)

Project/Thesis Course (3 credit hours)

AFRS 4790 - Africana Studies Senior Honors Project/Thesis (3)

The honors project/thesis leads to a research, creative, and/or community engagement project/thesis. The honors project/thesis product may be in the form of digital (e.g., web-based), textual (a minimum of 20-page paper), database development, or a creative work. The product must show evidence that the honors project/thesis is driven by the quest to solve an applied problem, or develop a better understanding of a theoretical or practical issue.

Progression Requirements

To graduate with honors in Africana Studies, students must:

- Comply with all of the requirements for a Major in Africana Studies
- Complete the Research or Theory course with grade of B or above
- Complete the Honors Project/Thesis with a grade of A
- Earn a minimum GPA of 3.25 in all Africana Studies courses counted toward the major and taken at UNC Charlotte
- Earn a minimum GPA of 3.0 for all coursework at UNC Charlotte
- Complete the Application to Candidacy process for graduating with honors, as directed by the Honors College

The honors notation will appear on a student's official transcript.

Department of Anthropology

anthropology.charlotte.edu

Undergraduate Programs

- **B.A. in Anthropology**
 - Applied Anthropology
 - Honors Program
- **Minor in Anthropology**
- **Early Entry: M.A. in Anthropology**

Anthropology is the study of humans and their cultures, and the exploration of human diversity in time and space. It is organized into four subfields: cultural anthropology, archaeology, biological anthropology, and linguistics. It emphasizes the comparative study of humans and the cross-cultural analysis of their social and cultural responses to fundamental human needs.

The study of anthropology is relevant for people whose goal is graduate study, as well as for people whose occupations and endeavors require a cross-cultural understanding of human nature and biology, human history and prehistory, and the variety of cultures humans have developed. It is particularly useful for teachers, medical personnel, social workers, and persons seeking careers in business and communications, as well as persons who plan to work in or with foreign countries. It provides competencies needed for employment in such organizations as museums, government agencies, school systems, corporations, police departments, the Park Service, and healthcare institutions.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Arts in Anthropology

A Major in Anthropology leading to the B.A. degree requires completion of 33-34 credit hours of anthropology coursework.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.0. Students with a GPA below 2.0 should consult with departmental advisor.
- *Transferable Credit Hours:* 24 (a minimum of 12 credit hours of ANTH courses must be completed at UNC Charlotte)

Currently Enrolled Students

- *Declaration of Major:* Change of Major form accepted year-round, except during pre-registration periods; orientation/advising session required after declaration

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

The Anthropology department offers the Global Social Science (ANTH 1501) and the Local Social Science (ANTH 1511) general education courses. These are open to all students within and outside the department. ANTH 1501 is required of all Anthropology Majors and Minors. ANTH 1511 may be counted as an elective.

Foreign Language Requirement (0-4 credit hours)

Students with a Major in Anthropology must complete either a 2000-level course in a foreign language that uses the Latin alphabet or a 1202-level course in a language that is not written in the Latin alphabet, or demonstrate proficiency at that level. Non-native speakers of English may complete the foreign language requirement by passing WRDS 1103, WRDS 1104, or the equivalent.

Latin Alphabet Courses

- FREN 2200 - French for Reading Knowledge (3)
- FREN 2201 - Intermediate French I (3)
- GERM 2201 - Intermediate German I (3)
- ITLN 2201 - Intermediate Italian I (3)
- LATN 2201 - Latin Prose (3)
- PORT 2201 - Intermediate Portuguese I (3)
- SPAN 2105 - Spanish Communication Skills Development I (3)
- SPAN 2106 - Spanish Communication Skills Development II (3)
- SPAN 2200 - Spanish for Reading Knowledge (3)
- SPAN 2201 - Intermediate Spanish I (3)
- SPAN 2210 - Introduction to Spanish for Commerce (3)
- SPAN 3221 - Spanish for Criminal Justice (3)
- SPAN 3222 - Spanish for Medical and Healthcare (3)

Non-Latin Alphabet Courses

- ARBC 1202 - Elementary Arabic II (4)
- CHNS 1202 - Elementary Chinese II (4)
- FARS 1202 - Elementary Farsi II (4)
- JAPN 1202 - Elementary Japanese II (4)

RUSS 1202 - Elementary Russian II (4)

Major Courses (33-34 credit hours)

Required Courses (12 credit hours)

- ANTH 1501 - Global Social Science: An Introduction to Anthropology (3)
ANTH 2171 - Engaging the Human Experience: Applying Anthropology in Life and Work (3)
ANTH 3601 - Foundations of Anthropological Theory (3)
ANTH 4601 - Seminar in General Anthropology (3)

Biological Anthropology or Archaeology Course (3-4 credit hours)

Select one of the following:

- ANTH 2141 - Our Place in Nature: Introduction to Biological Anthropology (4)
and ANTH 2141L - Our Place in Nature: Introduction to Biological Anthropology Lab (0)
ANTH 2151 - Introduction to Archaeology (3)

Sociocultural or Linguistic Anthropology Course (3 credit hours)

Select one of the following:

- ANTH 2121 - The Development of Topics and Themes in Sociocultural Anthropology (3)
ANTH 2161 - Introduction to Linguistic Anthropology (3)

Anthropological Methods Course (3 credit hours)

Select one of the following:

- ANTH 3141 - Human Osteology (3)
ANTH 3153 - Archaeological Analysis (3)
ANTH 4122 - Ethnographic Methods (3)
ANTH 4140 - Field Biology of the Primates (3)
ANTH 4141 - Forensic Anthropology (3)
ANTH 4453 - Field Project in Archaeology (1 to 4)

Other Elective Courses (12 credit hours)

Select 12 credit hours of the following ANTH elective courses, including at least one elective at the 3000 level and one at the 4000 level. A second major course in each group above can count as an elective if not already taken above.

Cultural Anthropology Courses

- ANTH 2010 - Topics in Ethnography (3)
ANTH 2020 - Topics in Cultural Anthropology (3)
ANTH 2111 - Peoples of Africa (3)
ANTH 2112 - North American Indians (3)
ANTH 2114 - Indians of the Southeastern United States (3)
ANTH 2115 - Culture and Society in the Middle East (3)
ANTH 2116 - Contemporary Latin America (3)
ANTH 2117 - Cultures of the Caribbean (3)
ANTH 2121 - The Development of Topics and Themes in Sociocultural Anthropology (3)
ANTH 2122 - Beliefs, Symbols, and Rituals (3)
ANTH 2123 - Women in Cross-Cultural Perspective (3)
ANTH 2125 - Urban Anthropology (3)
ANTH 2126 - World Population Problems (3)
ANTH 2127 - Environmental Anthropology (3)
ANTH 2131 - Introduction to Peace, Conflict, and Identity Studies (3)
ANTH 3020 - Topics in Cultural Anthropology (3)
ANTH 3112 - Globalization and Culture (3)
ANTH 3113 - Economic Anthropology (3)
ANTH 3116 - Cultures and Conflicts (3)

ANTH 3117 - Narratives and Conflicts (3)

- ANTH 3122 - Culture, Health, and Disease (3)
ANTH 3124 - Food, Nutrition, and Culture (3)
ANTH 3125 - Food and Globalization (3)
ANTH 3126 - Anthropology of Vampires, Ghosts, and Witchcraft (3)
ANTH 3127 - Anthropology of Violence (3)
ANTH 3135 - Origins of Globalization (3)
ANTH 3136 - Globalization and Resistance (3)
ANTH 3222 - Culture, Health, and Disease (3)
ANTH 4020 - Topics in Cultural Anthropology (3)
ANTH 4611 - Senior Seminar in Applied Anthropology (3) (SL)
ANTH 4122 - Ethnographic Methods (3)
ANTH 4131 - Culture, Pregnancy, and Birth (3)
ANTH 4615 - Readings in Middle East Ethnography (3)
ANTH 4622 - Readings in the Anthropology of Religion (3)

Biological Anthropology Courses

- ANTH 2040 - Topics in Biological Anthropology (3)
ANTH 2142 - Primate Behavioral Ecology (3)
ANTH 2143 - The Fossil Evidence for Human Evolution (3)
ANTH 2144 - Neanderthals and Us (3)
ANTH 3040 - Topics in Biological Anthropology (3)
ANTH 3141 - Human Osteology (3)
ANTH 3143 - Race and Anthropology (3)
ANTH 3144 - Evolutionary Anthropology (3)
ANTH 3145 - Anthropological Genetics (3)
ANTH 4040 - Topics in Biological Anthropology (3)
ANTH 4140 - Field Biology of the Primates (3)
ANTH 4141 - Forensic Anthropology (3)

Archaeological Anthropology Courses

- ANTH 2050 - Topics in Archaeology (3)
ANTH 2151 - Introduction to Archaeology (3)
ANTH 2152 - New World Archaeology (3)
ANTH 2153 - Historic Archaeology (3)
ANTH 2156 - African Civilization (3)
ANTH 3050 - Topics in Archaeology (3)
ANTH 3152 - Early Civilizations (3)
ANTH 3153 - Archaeological Analysis (3)
ANTH 3154 - European Prehistory (3)
ANTH 3157 - South American Prehistory (3)
ANTH 4050 - Topics in Archaeology
ANTH 4453 - Field Project in Archaeology (1 to 4)

Linguistic Anthropology Courses

- ANTH 2161 - Introduction to Linguistic Anthropology (3)
ANTH 3160 - Gender, Culture, and Communication (3)
ANTH 4120 - Intercultural Communications (3)

General Anthropology Courses

- ANTH 2090 - Topics in Anthropology (1 to 3)
ANTH 3090 - Topics in Anthropology (1 to 3)
ANTH 3895 - Directed Individual Study (1 to 4)
ANTH 4090 - Topics in Anthropology (1 to 3)
ANTH 4480 - Internship in Anthropology (3)
ANTH 4482 - Teaching Internship in Anthropology (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

A GPA of at least 2.0 is required in the 33-34 credit hours of anthropology required for the major. ANTH 3601 and ANTH 4601 must be completed with a grade of C or above.

Internships

Students should consult the department concerning internships and field schools in anthropology.

Bachelor of Arts in Anthropology with Concentration in Applied Anthropology

The Concentration in Applied Anthropology is designed to equip anthropology majors with the skills needed for a career in applied anthropology, an area with growing employment opportunities. Applied anthropologists work in educational institutions, museums, zoos, health care organizations, non-profits, the business world, and elsewhere. Preparation for a career in applied anthropology involves developing a special set of job skills, in addition to a breadth of anthropological knowledge. Students who pursue a Concentration in Applied Anthropology complete coursework that will help them develop these skills.

The Concentration in Applied Anthropology does not require more coursework than the traditional major. Instead, it requires specific coursework. Both options require a total of 33-34 credit hours in anthropology.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- **Minimum GPA:** 2.0. Students with a GPA below 2.0 should consult with departmental advisor.
- **Transferable Credit Hours:** 24 (a minimum of 12 credit hours of ANTH courses must be completed at UNC Charlotte)

ANTH 2152 - New World Archaeology (3)

ANTH 2153 - Historic Archaeology (3)

ANTH 2156 - African Civilization (3)

ANTH 3050 - Topics in Archaeology (3)

ANTH 3152 - Early Civilizations (3)

ANTH 3153 - Archaeological Analysis (3)

ANTH 3154 - European Prehistory (3)

ANTH 3157 - South American Prehistory (3)

ANTH 4050 - Topics in Archaeology

ANTH 4453 - Field Project in Archaeology (1 to 4)

Linguistic Anthropology Courses

ANTH 2161 - Introduction to Linguistic Anthropology (3)

ANTH 3160 - Gender, Culture, and Communication (3)

ANTH 4120 - Intercultural Communications (3)

General Anthropology Courses

ANTH 2090 - Topics in Anthropology (1 to 3)

ANTH 3090 - Topics in Anthropology (1 to 3)

ANTH 3895 - Directed Individual Study (1 to 4)

ANTH 4090 - Topics in Anthropology (1 to 3)

ANTH 4480 - Internship in Anthropology (3)

ANTH 4482 - Teaching Internship in Anthropology (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

A GPA of at least 2.0 is required in the 33-34 hours of anthropology for the major. ANTH 3601 and ANTH 4611 must be completed with a grade of C or above.

Special Policies or Requirements

Students must be in their Junior or Senior year to enroll in ANTH 3601.

Minor in Anthropology

The Minor in Anthropology requires the completion of 18 credit hours of anthropology courses.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

Foundation Courses (6 credit hours)

ANTH 1501 - Global Social Science: An Introduction to Anthropology (3)
ANTH 2171 - Engaging the Human Experience: Applying Anthropology in Life and Work (3)

Elective Courses (12 credit hours)

Select four of the following, with at least one course from the Cultural or Linguistic subfields, and one course from the Biological or Archaeological subfields:

Cultural Anthropology Courses

ANTH 2010 - Topics in Ethnography (3)
ANTH 2020 - Topics in Cultural Anthropology (3)
ANTH 2111 - Peoples of Africa (3)
ANTH 2112 - North American Indians (3)
ANTH 2114 - Indians of the Southeastern United States (3)
ANTH 2115 - Culture and Society in the Middle East (3)
ANTH 2116 - Contemporary Latin America (3)
ANTH 2117 - Cultures of the Caribbean (3)
ANTH 2121 - The Development of Topics and Themes in Sociocultural Anthropology (3)
ANTH 2122 - Beliefs, Symbols, and Rituals (3)
ANTH 2123 - Women in Cross-Cultural Perspective (3)
ANTH 2125 - Urban Anthropology (3)
ANTH 2126 - World Population Problems (3)
ANTH 2127 - Environmental Anthropology (3)
ANTH 2131 - Introduction to Peace, Conflict, and Identity Studies (3)
ANTH 2151 - Introduction to Archaeology (3)
ANTH 2156 - African Civilization (3)
ANTH 3020 - Topics in Cultural Anthropology (3)
ANTH 3112 - Globalization and Culture (3)
ANTH 3113 - Economic Anthropology (3)
ANTH 3116 - Cultures and Conflicts (3)
ANTH 3117 - Narratives and Conflicts (3)
ANTH 3122 - Culture, Health, and Disease (3)
ANTH 3124 - Food, Nutrition, and Culture (3)
ANTH 3125 - Food and Globalization (3)
ANTH 3126 - Anthropology of Vampires, Ghosts, and Witchcraft (3)
ANTH 3127 - Anthropology of Violence (3)
ANTH 3135 - Origins of Globalization (3)
ANTH 3136 - Globalization and Resistance (3)
ANTH 3160 - Gender, Culture, and Communication (3)
ANTH 3222 - Culture, Health, and Disease (3)
ANTH 4020 - Topics in Cultural Anthropology (3)
ANTH 4122 - Ethnographic Methods (3)
ANTH 4131 - Culture, Pregnancy, and Birth (3)
ANTH 4611 - Senior Seminar in Applied Anthropology (3) (SL)
ANTH 4615 - Readings in Middle East Ethnography (3)

ANTH 4622 - Readings in the Anthropology of Religion (3)

Linguistic Anthropology Courses

ANTH 2161 - Introduction to Linguistic Anthropology (3)
ANTH 4120 - Intercultural Communications (3)

Biological Anthropology Courses

ANTH 2040 - Topics in Biological Anthropology (3)
ANTH 2141 - Our Place in Nature: Introduction to Biological Anthropology (4)
ANTH 2142 - Primate Behavioral Ecology (3)
ANTH 2143 - The Fossil Evidence for Human Evolution (3)
ANTH 2144 - Neanderthals and Us (3)
ANTH 3040 - Topics in Biological Anthropology (3)
ANTH 3141 - Human Osteology (3)
ANTH 3143 - Race and Anthropology (3)
ANTH 3144 - Evolutionary Anthropology (3)
ANTH 3145 - Anthropological Genetics (3)
ANTH 4040 - Topics in Biological Anthropology (3)
ANTH 4140 - Field Biology of the Primates (3)
ANTH 4141 - Forensic Anthropology (3)

Archaeological Anthropology Courses

ANTH 2050 - Topics in Archaeology (3)
ANTH 2151 - Introduction to Archaeology (3)
ANTH 2152 - New World Archaeology (3)
ANTH 2153 - Historic Archaeology (3)
ANTH 2156 - African Civilization (3)
ANTH 3050 - Topics in Archaeology (3)
ANTH 3152 - Early Civilizations (3)
ANTH 3153 - Archaeological Analysis (3)
ANTH 3154 - European Prehistory (3)
ANTH 3157 - South American Prehistory (3)
ANTH 4050 - Topics in Archaeology
ANTH 4453 - Field Project in Archaeology (1 to 4)

General Anthropology Courses

ANTH 2090 - Topics in Anthropology (1 to 3)
ANTH 3090 - Topics in Anthropology (1 to 3)

ANTH 4090 - Topics in Anthropology (1 to 3)
ANTH 4480 - Internship in Anthropology (3)
ANTH 4482 - Teaching Internship in Anthropology (3)

Minor Total = 18 Credit Hours

Progression Requirements

A GPA of at least 2.0 is required for the 18 credit hours of anthropology courses.

Honors Program in Anthropology

The Department of Anthropology offers an honors program in Anthropology which provides opportunities for exceptional achievement in the Anthropology major.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements

- Declared Anthropology major
- Preferred minimum GPA of 3.5 in Anthropology courses
- Preferred minimum GPA of 3.2 overall

For further information, interested students should consult with the Department Honors Coordinator.

Course Requirements (9 credit hours)

- ANTH 4701 - Honors Research in Anthropology (3)
 or ANTH 4611 - Senior Seminar in Applied Anthropology (3) (SL)
 ANTH 4702 - Honors Writing in Anthropology (3)
 One Honors College course

Experiential Learning Requirement (3 credit hours)

An internship, field school, or semester-long study abroad program approved by the Departmental Honors Coordinator.

Progression Requirements

To graduate with honors in Anthropology, students must:

- Satisfy all requirements for the B.A. degree with a major in Anthropology.
- Satisfy all general requirements for honors programs, as established in the document governing honors programs at UNC Charlotte.
- Complete at least 18 hours of the major at UNC Charlotte.
- Complete at least 3 hours of designated Honors courses. These courses may be taken in the University Honors program or in Anthropology or any other department (but not including ANTH 4701 or ANTH 4702). In practice, this means taking one course designated HONR, as well as the required anthropology courses.
- Maintain an overall GPA of at least 3.2 and a GPA of at least 3.5 in all Anthropology courses taken at UNC Charlotte.
- In addition to any Honors courses, also complete at least one of the following (or an alternative approved in advance by the Honors Coordinator in Anthropology):
 - A semester-long study-abroad program approved by UNC Charlotte
 - ANTH 4453 - Field Project in Archaeology
 - ANTH 4480 - Internship in Anthropology
 - ANTH 4482 - Teaching Internship in Anthropology
- Complete either ANTH 4701 or ANTH 4611 in the semester prior to taking ANTH 4702.
- ANTH 4701, Honors Research in Anthropology, is a 3-credit course during which the student plans and begins an independent research project. By the end of this course, the student will present a thesis proposal to the Anthropology honors committee. The thesis proposal will outline the research question, the basic theoretical background, and a plan of data collection for a thesis to be completed in ANTH 4702.
- In exceptional cases, a student may use a paper prepared for another anthropology course as the preparation for further research to be completed in ANTH 4702. In this case, the requirement for ANTH 4701/ANTH 4611 will be waived by the Anthropology honors committee. The student must take responsibility for providing appropriate documentation to request waiver of this requirement. A student who wishes to take this route must submit the paper and a two-page proposal for continuation of the research by the end of the semester prior to

taking ANTH 4702.

- Complete ANTH 4702 by completing a senior thesis containing original research and demonstrating excellent scholarship. All students in ANTH 4702 will have an ad-hoc thesis committee consisting of three people, including the honors thesis chair, the Anthropology honors coordinator, and one other faculty member. The committee makes the final decision about whether or not to confer Honors designation and will so inform the chair of the department and the University Honors Council.
- Students must submit an official Application for Admission to Candidacy for all honors programs. There is a standard form for this. For students who are enrolled only for departmental Honors in Anthropology, the application for candidacy is approved by the student's committee in the department, and then forwarded to the Honors College. The required date is usually Reading Day of each semester for graduation in the following semester. The form, instructions for students and for faculty, and the due date can be found on the website of the Honors College.

Upon completion of all program requirements above, the Honors notation will appear on the student's official transcript.

Early Entry: Master of Arts in Anthropology

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 90 undergraduate credit hours and 18 credit hours of Anthropology courses (Students may apply with 80 credit hours completed and 10 credit hours in progress; however, they must have completed at least 90 credit hours prior to the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Minimum 3.5 GPA in Anthropology courses
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and

graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Department of **Communication Studies**

communication.charlotte.edu

Undergraduate Programs

- **B.A. in Communication Studies**
 - Communication Studies
 - Rhetoric, Culture and Social Change
 - Health Communication
 - Media & Technology Studies
 - Organizational Communication
 - Public Relations
 - Honors Program
 - **Minor in Communication Studies**
 - **Minor in Journalism**
 - **Undergraduate Certificate in Leadership Studies**
 - **Early Entry: M.A. in Communication Studies**

Communication Studies is one of the largest majors in the College of Humanities & Earth and Social Sciences at UNC Charlotte. The Communication Studies discipline focuses on the theoretical, critical, and scientific study of human communication across diverse cultures.

The undergraduate program provides students with an examination of communication theories, practices, and processes in a variety of contexts, including media technology, public relations, health, organizations, and public culture.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Undergraduate Program

The undergraduate program offers concentrations in Health Communication, Media & Technology Studies, Organizational Communication, Rhetoric, Culture, and Social Change, and Public Relations. In addition to the core requirements for the Communication Studies major, students must also complete coursework in their chosen concentration of study. Courses that are required within a particular concentration or used as electives within the concentration cannot simultaneously be used to fulfill major course requirements. The concentrations are designed to provide students with the opportunity to pursue more extensive study in the communication context most relevant to their professional and social goals.

Students majoring in Communication Studies may pursue careers in areas such as public relations, marketing, personnel, nonprofit

organization, social media management, and health administration. Coupled with another social science major, Communication Studies provides extra capital for careers in areas such as social work, counseling, politics, and management. This major is also excellent preparation for law school, usually combined with a concentration in Rhetoric, Culture, and Social Change, a second major in Political Science, and a minor in Legal Studies. The program also offers a minor in Communication Studies and a minor in Journalism.

Graduate Program

Students can pursue graduate work in Communication Studies. For details, see the *UNC Charlotte Graduate Catalog* regarding the M.A. in Communication Studies program.

Bachelor of Arts in Communication Studies

Students may complete the B.A. in Communication Studies without selecting a concentration or, if desired, complete a concentration in one of five areas of study as part of the B.A. in Communication Studies degree:

- Health Communication
 - Media & Technology Studies
 - Organizational Communication
 - Public Relations
 - Rhetoric, Culture, and Social Change

The concentration is optional. Courses taken for a concentration will not add to the total number of credit hours required for the major, but will count toward the elective hours already required for the major.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
 - Minimum GPA: 2.0
 - Transferable Credit Hours: 24

Currently Enrolled Students

- Overall GPA of at least 2.0

Degree Requirements

The program leading to the Bachelor of Arts degree in Communication Studies requires 120 credit hours. In addition to the requirements for the Communication Studies major (21 credit hours), students must also complete 18 credit hours Restricted Electives.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details, refer to the College of Liberal Arts and Sciences Foreign Language Requirement.

Communication Studies Courses (21 credit hours)

The Communication Studies Core Courses are designed to provide a thorough understanding of fundamental communication processes and are structured into two categories:

General Theory/Skills Courses (15 credit hours)

- COMM 1101 - Public Speaking (3)
- COMM 2100 - Introduction to Communication Theory (3)
- COMM 2101 - Introduction to Rhetorical Theory (3)
- COMM 2104 - Communication Studies Foundations (3)
- COMM 3101 - Persuasion (3)

Research Methodology Courses (6 credit hours)

- COMM 3100 - Communication Research Methods (3)
- STAT 1222 - Introduction to Statistics (3)

Restricted Electives (18 credit hours)

Students must complete 18 credit hours of Restricted Electives taken at the 2000 level and above. At least 9 credit hours must be completed in COMM courses, with at least 6 of those hours at the 3000 level and above. The remaining 9 credit hours may be completed in COMM or JOUR courses. No more than 9 credit hours of 2000 level courses may be counted towards the Restricted Electives requirement. Minors in Journalism may only count 6 credit hours towards both the Communication Studies major and the Journalism minor.

- COMM 2xxx-3xxx Communication Studies Elective
- COMM 3xxx-4xxx Communication Studies Elective
- COMM 3xxx-4xxx Communication Studies Elective
- COMM 2xxx-4xxx Communication Studies Elective
or JOUR 2xxx-4xxx Journalism Elective
- COMM 2xxx-4xxx Communication Studies Elective
or JOUR 2xxx-4xxx Journalism Elective
- COMM 3xxx-4xxx Communication Studies Elective
or JOUR 3xxx-4xxx Journalism Elective

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Progression Requirements

Students must earn a grade of C or better in COMM 1101, COMM 2100, COMM 2104 and STAT 1222, and a 2.0 GPA overall in their major courses.

Honors Program

For details about the Honors Program in Communications, visit the program page.

Degree Total = 120 Credit Hours

Bachelor of Arts in Communication Studies with Concentration in Rhetoric, Culture, and Social Change

The Rhetoric, Culture, and Social Change concentration is designed for those students desiring a well-developed background in the use, theory, construction, and analysis of public messages. The course of study provides training in individual public communication skills and provides a foundation for the analysis and evaluation of advocacy discourse.

Admission Requirements

- Overall GPA of at least 2.0

Degree Requirements

The program leading to the Bachelor of Arts degree in Communication Studies requires 120 credit hours. In addition to the requirements for the Communication Studies major, students may also complete coursework in a specific concentration of study, or electives as specified for those students who are completing the major without a concentration. Courses that are required within a particular concentration or used as electives within the concentration cannot simultaneously be used to fulfill Major Course requirements. The concentrations are designed to provide students with the opportunity to pursue more extensive study in the communication context most relevant to their professional and social goals.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details, refer to the College of Liberal Arts and Sciences Foreign Language Requirement.

Communication Studies Core Courses (21 credit hours)

The Communication Studies Core Courses are designed to provide a thorough understanding of fundamental communication processes and are structured into two categories:

General Theory/Skills Courses (15 credit hours)

- COMM 1101 - Public Speaking (3)
- COMM 2100 - Introduction to Communication Theory (3)
- COMM 2101 - Introduction to Rhetorical Theory (3)
- COMM 2104 - Communication Studies Foundations (3)
- COMM 3101 - Persuasion (3)

Research Methodology Courses (6 credit hours)

- COMM 3100 - Communication Research Methods (3)
- STAT 1222 - Introduction to Statistics (3)

Concentration Courses (18 credit hours)

Required Concentration Courses (9 credit hours)

- COMM 3120 - Media, Technology & Communication (3)
- COMM 3052 - Topics in Media & Technology Studies (3)
- COMM 4652 - Advanced Seminar in Media & Technology Studies (3)

Elective Concentration Courses (9 credit hours)

Select from the following:

- AMST 3090 - Topics in American Film (3)
- COMM 2120 - Black Images in the Media in the U.S. (3)
- COMM 3052 - Topics in Media & Technology Studies (3)
- COMM 3121 - Mass Communication and Society (3)
- COMM 3125 - New Media for Communications (3)

- COMM 3126 - Globalization and Digital Media (3)
- COMM 3880 - Independent Study (1 to 3)*
- COMM 4410 - Professional Internship (3 or 6)*
- ENGL 2106 - Film Criticism (4)
- ENGL 4267 - Language and Culture in Digital Spaces (3)
- FILM 3050 - Topics in Film (3)
- FILM 3051 - Topics in Film (3)
- JAPN 3060 - Topics in Japanese Film (3)
- JOUR 2160 - Introduction to Journalism (3)
- JOUR 3160 - Advanced News Reporting and Writing (3)
- JOUR 3161 - News Editing (3)
- POLS 3128 - Politics and Film (3)
- RELS 3210 - Religion and Popular Culture (3)
- RELS 3212 - Religion, Media, and Film (3)

*Requires advisor approval.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Progression Requirements

Students must earn a grade of C or better in COMM 1101, COMM 2100, COMM 2104 and STAT 1222, and a 2.0 GPA overall in their major courses.

Honors Program

For details about the Honors Program in Communications, visit the program page.

Degree Total = 120 Credit Hours

Bachelor of Arts in Communication Studies with Concentration in Organizational Communication

The Organizational Communication concentration is designed for students whose careers will benefit from an understanding of the communication processes that occur within organizational contexts. Students explore both the theory and practice of organizational communication.

Admission Requirements

Degree Total = 120 Credit Hours

Honors Program in Communication Studies

The B.A. in Communication Studies with Communication Studies Honors is the highest distinction the Department of Communication Studies offers. Earning this accolade from the Honors College attests to a candidate's exemplary grade point average in their major, completion of honors coursework, and successful defense of a distinguished undergraduate honors thesis. Graduating with Honors in Communication Studies prepares students for graduate school and is a wonderful addition to a student's resume.

The Honors Program in the Department of Communication Studies aims to identify, encourage, nurture, and recognize students with exceptional analytical, creative, and communicative skills potential. The program stresses guided but self-directed independent study, and each Honors Student will be evaluated by a faculty committee based upon uniquely developed criteria for each Honors Student.

Admission Requirements

Current UNC Charlotte Undergraduate

- See University Admission Requirements
- Petition for admission to the Honors Program may be initiated by the

student or by a full-time faculty member of the Department of Communication Studies on behalf of the student. Students must have at minimum a 3.3 or above overall GPA and a 3.3 or above GPA in all Communication Studies and Journalism courses. They must have completed at least 30 credit hours at UNC Charlotte but not more than 90 credit hours at the time participation in the Honors Program will begin. Admission to the Communication Studies Honors Program is determined through a three step process: completion and submission of the Honors Program application form, review of the application by the Honors Director and Department Honors Committee, and approval for admission by that Committee.

Course Requirements

One three credit hour course chosen by the student from University Honors Program courses (not including experiential or project-based courses).

COMM 3890 - Honors Thesis I (3)

COMM 3891 - Honors Thesis II (3)

Progression Requirements

To graduate with honors, students must:

- Earn a minimum cumulative GPA of 3.3
- Earn a minimum GPA of 3.3 in Communication Studies and Journalism courses
- Complete an honors thesis and present the results of the project in an appropriate forum
- Complete the Application to Candidacy process for graduating with honors, as directed by the Honors College

The honors notation will appear on a student's official transcript.

Minor in Communication Studies

The Minor in Communication Studies consists of 18 credit hours of COMM courses.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Students matriculated at UNC Charlotte and planning to declare Communication Studies as their minor must have an overall GPA of at least 2.0.

Minor Requirements

Required Courses (6 credit hours)

COMM 1101 - Public Speaking (3)

COMM 2100 - Introduction to Communication Theory (3)

Elective Courses (12 credit hours)

COMM 1xxx-4xxx - Communication Studies Elective (3)

COMM 1xxx-4xxx - Communication Studies Elective (3)

COMM 3xxx-4xxx - Communication Studies Elective (3)

COMM 3xxx-4xxx - Communication Studies Elective (3)

Progression Requirements

Students must attain an overall GPA of 2.0 in all coursework within the minor.

Minor Total = 18 Credit Hours

Minor in Journalism

The Minor in Journalism provides an introduction to journalism areas such as writing, editing, feature writing, and related communication and media issues. The minor consists of 18 credit hours of coursework.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

Required Courses (12 credit hours)

- JOUR 2100 - Writing Foundations in Communication Studies (0)
JOUR 2160 - Introduction to Journalism (3)

COMM 3880 - Independent Study (1 to 3)*
POLS 3103 - Public Opinion (3)
POLS 3104 - Mass Media (3)

*with approval of advisor

Special Policies or Requirements

With their advisor's approval, students in the Communication Studies major may count as related coursework any course used to fulfill requirements for the Minor in Journalism as long as that course is not simultaneously being used to fulfill either core or concentration requirements of the major.

Minor Total = 18 Credit Hours

Undergraduate Certificate in Leadership Studies

Students electing the Certificate in Leadership Studies may be enrolled in any undergraduate major. In addition to completing the standard core and required track courses for their majors, students must complete 18 credit hours of coursework as listed:

Required Courses (9 credit hours)

- COMM 3135 - Leadership Theory and Group Dynamics (3)
COMM 3136 - Leadership, Service and Ethics (3)
COMM 4410 - Professional Internship (3 or 6)

Ethics Courses (3 credit hours)

- One course from the following:*
POLS 3175 - Philosophy of Law (3)
PHIL 3221 - Ethical Theory (3)

Elective Courses (6 credit hours)

- AERO 3101 - Leadership and Management (3)
AERO 3102 - Defense Administration and Military Management (3)
COMM 2105 - Small Group Communication (3)
COMM 2107 - Interpersonal Communication (3)
KNES 1231 - Introduction to Outdoor Adventure (2)
KNES 2236 - Challenge Course Activities (2)
KNES 3230 - Wilderness Trip Leading (3)
KNES 3235 - Challenge Course Facilitation (3)
MGMT 3140 - Management and Organizational Behavior (3)
MGMT 3287 - Managerial Leadership (3)
PSYC 2320 - Introduction to Industrial/Organizational Psychology (3)
POLS 3112 - The Presidency (3)
POLC 4110 - North Carolina Student Legislature (3)

Certificate Total = 18 Credit Hours

Early Entry: Master of Arts in Communication Studies

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 6 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 6 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 6 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Department of Criminal Justice and Criminology

criminaljustice.charlotte.edu

Undergraduate Programs

- **B.A. in Criminal Justice**
 - Crime Analytics
 - Honors Program
- **Minor in Criminal Justice**
- **Early Entry: M.S. in Criminal Justice**
- **Early Entry: Graduate Certificate in Crime Analysis**

The undergraduate program in Criminal Justice and Criminology addresses issues confronting the entire criminal justice system, from the nature of crime and delinquency, to society's varied responses to it. A Major in Criminal Justice provides a broad educational background emphasizing social science and qualitative/quantitative research skills to develop and critique basic knowledge regarding crime and social control. Students at UNC Charlotte learn about crime as a social problem, develop a critical understanding of the criminal justice system, and study the principles involved in achieving planned change. Several students majoring in criminal justice also pursue a Concentration in Crime Analytics, providing depth in knowledge related to the use of data to solve crime problems.

Students majoring in Criminal Justice may pursue careers in areas within the justice system including, but not limited to, law enforcement, courts, and corrections. Subsequent to graduation, several students pursue master's and doctoral degrees in criminal justice creating opportunities for them to engage in teaching and research careers. This major is also excellent preparation for law school as many students combine their academic work with a second Major in Political Science and/or a Minor in Legal Studies.

The department also offers a Minor in Criminal Justice and a Master of Science degree program in Criminal Justice. Please see the *UNC Charlotte Graduate Catalog* for details on the M.S. degree.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Arts in Criminal Justice

Undergraduate students pursuing the academic study of the criminal justice system, a career in the criminal justice field, or preparation for graduate study may select the criminal justice curriculum leading to a Bachelor of Arts degree.

Admission Requirements

Incoming Freshmen

- See University Admission Requirements

Transfers

- See University Admission Requirements
- Transfer students who have an A.A.S. degree in Criminal Justice or who have an A.A. degree receive General Education exemption and may be awarded up to 15 credit hours for criminal justice coursework completed with a grade of C or above. Transfer courses from four-year institutions or out-of-state community colleges will be evaluated on a case-by-case basis.

Currently Enrolled Students

- See University Admission Requirements
- *Minimum GPA: 2.0*
- Completion of CJUS 1511 with a grade of C or above, within two attempts
- *Declaration of Major:* See the Department of Criminal Justice website for specific instructions.

Degree Requirements

A Major in Criminal Justice requires 40 credit hours of coursework.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirements at the beginning of this section.

Major Courses (40 credit hours)

Foundation Courses (10 credit hours)

- CJUS 1511 - Local Social Science: Foundations of Criminal Justice (3)
CJUS 1200 - Professionalism in Criminal Justice and Criminology (1)
CJUS 2340 - Criminological Theory (3)
CJUS 2370 - Research Methods in Criminal Justice (3)*

**Note: In lieu of CJUS 2370, students may also take one of the following options:*

- POLS 2220 - Political Science Methods (4)
PSYC 2391 - Research Methodology I (3)
and PSYC 3292 - Research Methodology II (3)
PSYC 3291 - Critical Thinking About Research (3)

SOCY 3155 - Sociological Research Methods (4)

Statistics Course (3 credit hours)

Select one of the following:

- STAT 1220 - Elements of Statistics I (BUSN) (3)
STAT 1221 - Elements of Statistics I (3)
STAT 1222 - Introduction to Statistics (3)

Crime Analytics Course (3 credit hours)

Select one of the following:

- CJUS 4000 - Topics in Crime Analytics (3)
CJUS 4370 - Data Analytics and Crime (3)
CJUS 4371 - Criminal Data Sources, Data Management, and Cleaning (3)
CJUS 4372 - Drug Analytics (3)
CJUS 4373 - Intelligence Analysis and Security Analytics (3)
CJUS 4374 - Geospatial Analytics and Crime (3)
CJUS 4375 - Community-Oriented Policing, Problem-Solving, and Crime Analysis (3)
CJUS 4376 - Social Network Analysis (3)
CJUS 4377 - Crime Measurement and Data Visualization (3)
CJUS 4378 - Causes and Consequences of Crime (3)
CJUS 4379 - Qualitative Research and Analysis in Criminal Justice (3)

Intercultural/Engagement Across Perspectives Course (3 credit hours)

- CJUS 4361 - International Criminal Justice (3)
CJUS 4363 - Gender, Race, and Justice (3)
CJUS 4365 - Criminal Justice and Social Diversity (3)
CJUS 4366 - Street Gangs (3)

Major Elective Courses (21 credit hours)

Select seven of the following not already taken:

- CJUS 2320 - Introduction to Courts (3)
CJUS 2350 - Introduction to Corrections (3)
CJUS 2360 - Ethics and the Criminal Justice System (3)
CJUS 2361 - Juvenile Justice (3)
CJUS 2380 - Introduction to Law Enforcement (3)
CJUS 3000 - Topics in Criminal Justice (3)
CJUS 3320 - Criminal Justice and the Law (3)
CJUS 3321 - Criminal Procedure (3)
CJUS 3323 - Correctional Law (3)
CJUS 3340 - The Juvenile Offender (3)
CJUS 3341 - The Criminal Offender (3)
CJUS 3351 - Community Corrections (3)
CJUS 3352 - Institutional Corrections (3)
CJUS 3353 - Juvenile Corrections (3)
CJUS 3354 - Punishment and Freedom (3)
CJUS 3362 - Famous Criminal Trials of the Twentieth Century (3)
CJUS 3363 - Mediation and Conflict Resolution (3)
CJUS 3364 - The Administration of Criminal Justice (3)
CJUS 3365 - Interviewing in Criminal Justice (3)
CJUS 3366 - Domestic Violence (3)
CJUS 3367 - Problems and Decisions in Criminal Justice (3)
CJUS 3380 - Law Enforcement Behavioral Systems (3)
CJUS 3382 - Community-Oriented Policing and Problem-Solving (3)
CJUS 3400 - Criminal Justice Internship (3 to 6)
CJUS 3800 - Directed Individual Study (1 to 4)
CJUS 4320 - Evidence (3)
CJUS 4350 - Victims and the Criminal Justice System (3)
CJUS 4351 - Violence and the Violent Offender (3)

- CJUS 4352 - Serial Murder (3)
- CJUS 4360 - Drugs, Crime, and the Criminal Justice System (3)
- CJUS 4361 - International Criminal Justice (3)
- CJUS 4363 - Gender, Race, and Justice (3)
- CJUS 4364 - Aging and Criminal Justice: An Interdisciplinary Understanding (3)
- CJUS 4365 - Criminal Justice and Social Diversity (3)
- CJUS 4366 - Street Gangs (3)
- CJUS 4370 - Data Analytics and Crime (3)
- CJUS 4371 - Criminal Data Sources, Data Management, and Cleaning (3)
- CJUS 4372 - Drug Analytics (3)
- CJUS 4373 - Intelligence Analysis and Security Analytics (3)
- CJUS 4374 - Geospatial Analytics and Crime (3)
- CJUS 4375 - Community-Oriented Policing, Problem-Solving, and Crime Analysis (3)
- CJUS 4376 - Social Network Analysis (3)
- CJUS 4377 - Crime Measurement and Data Visualization (3)
- CJUS 4378 - Causes and Consequences of Crime (3)
- CJUS 4379 - Qualitative Research and Analysis in Criminal Justice (3)
- CJUS 4400 - Research Practicum (3)
- CJUS 4700 - Honors Capstone Project in Criminal Justice (3)
- CJUS 4701 - Honors Thesis in Criminal Justice II (3)
- SPAN 3221 - Spanish for Criminal Justice (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

A GPA (overall and CJUS-specific) of 2.0 or above must be maintained for the major. A grade of C or above in CJUS 1511 and CJUS 2340 (each within two attempts*), and a grade of C or above in CJUS 1200 and CJUS 2370 (or approved equivalent), and a grade of C or above in an approved Statistics Course (STAT 1220, STAT 1221, or STAT 1222) are required to complete the major.

*Grades of D, F, and W all count as attempts.

Internship

While not required, students are encouraged to participate in internship programs available through the department. Internships provide opportunities to combine theory and practice in a realistic setting, and to make more judicious career decisions.

Bachelor of Arts in Criminal Justice with Concentration in Crime Analytics

This concentration provides students with an in-depth and deeper understanding of how data is used to address issues related to crime and the criminal justice system. Students seeking to earn the B.A. in Criminal Justice with a Concentration in Crime Analytics must complete 12 credit hours in analytically based courses.

Admission Requirements

Freshmen

- See University Admission Requirements

Transfers

- See University Admission Requirements
- Transfer students who have an A.A.S. degree in Criminal Justice or who have an A.A. degree receive General Education exemption and may be awarded up to 15 credit hours for criminal justice coursework completed with a grade of C or above. CJUS 4701 - Honors Thesis in Criminal Justice II (3)
SPAN 3221 - Spanish for Criminal Justice (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

To progress from Pre-Criminal Justice status to the Criminal Justice major, a minimum of a C average in all criminal justice coursework and a minimum grade of C in CJUS 1511, CJUS 1200, CJUS 2340, CJUS 2370 (or POLS 2220; PSYC 2391 and PSYC 3292; PSYC 3291; or SOCY 3155; and STAT 1222 (or STAT 1220 or STAT 1221) are required.

Internship

While not required, students are encouraged to participate in internship programs available through the department. Internships provide opportunities to combine theory and practice in a realistic setting, and to make more judicious career decisions.

Honors Program in Criminal Justice

The Honors Program in Criminal Justice identifies the creative, imaginative, and/or exceptional student and encourages and recognizes the development of this student's potential. The Honors Program in Criminal Justice encourages independent study and shall evaluate each student's achievement in terms of her or his ability to proceed as a self-directed learner.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Admission to program during Sophomore or Junior year
- Overall GPA of 3.2
- GPA of 3.5 in the Criminal Justice major

Course Requirements

- CJUS 4700 and CJUS 4701 with application to candidacy completed the semester before
- 6 additional credit hours of honors coursework, either in HONR courses or in designated Honors sections

Progression Requirements

A GPA (overall and CJUS-specific) of 2.0 or above must be maintained for the major. A grade of C or above in CJUS 1511 and CJUS 2340 (each within two attempts*), and a grade of C or above in CJUS 1200 and CJUS 2370 (or approved equivalent), and a grade of C or above in an approved Statistics Course (STAT 1220, STAT 1221, or STAT 1222) are required to

complete the major.

*Grades of D, F, and W all count as attempts.

Minor in Criminal Justice

A Minor in Criminal Justice is available to all undergraduates except Criminal Justice majors, and requires 18 approved credit hours.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Minimum GPA (cumulative): 2.0
- Completion of CJUS 1511 with grade of C or above, with students allowed no more than two attempts at the class (grades of D, F or W count as attempts)
- Must have a declared major (cannot be Criminal Justice major)

Minor Requirements

Required Courses (6 credit hours)

CJUS 1511 - Local Social Science: Foundations of Criminal Justice (3)

CJUS 2340 - Criminological Theory (3)

Elective Courses (12 credit hours)

Select four of the following courses. At least 6 of the 12 elective credit hours must be completed at the 3000- or 4000-levels.

CJUS 2320 - Introduction to Courts (3)

CJUS 2350 - Introduction to Corrections (3)

CJUS 2360 - Ethics and the Criminal Justice System (3)

CJUS 2361 - Juvenile Justice (3)

CJUS 2380 - Introduction to Law Enforcement (3)

CJUS 3000 - Topics in Criminal Justice (3)

CJUS 3320 - Criminal Justice and the Law (3)

CJUS 3321 - Criminal Procedure (3)

CJUS 3323 - Correctional Law (3)

CJUS 3340 - The Juvenile Offender (3)

CJUS 3341 - The Criminal Offender (3)

CJUS 3351 - Community Corrections (3)

CJUS 3352 - Institutional Corrections (3)

CJUS 3353 - Juvenile Corrections (3)

CJUS 3354 - Punishment and Freedom (3)

CJUS 3362 - Famous Criminal Trials of the Twentieth Century (3)

CJUS 3363 - Mediation and Conflict Resolution (3)

CJUS 3364 - The Administration of Criminal Justice (3)

CJUS 3365 - Interviewing in Criminal Justice (3)

CJUS 3366 - Domestic Violence (3)

CJUS 3367 - Problems and Decisions in Criminal Justice (3)

CJUS 3380 - Law Enforcement Behavioral Systems (3)

CJUS 3382 - Community-Oriented Policing and Problem-Solving (3)

CJUS 3800 - Directed Individual Study (1 to 4)

CJUS 4320 - Evidence (3)

CJUS 4350 - Victims and the Criminal Justice System (3)

CJUS 4351 - Violence and the Violent Offender (3)

CJUS 4352 - Serial Murder (3)

CJUS 4360 - Drugs, Crime, and the Criminal Justice System (3)

CJUS 4364 - Aging and Criminal Justice: An Interdisciplinary Understanding (3)

CJUS 4701 - Honors Thesis in Criminal Justice II (3)

SPAN 3221 - Spanish for Criminal Justice (3)

Total = 18 Credit Hours

Progression Requirements

A GPA (overall and CJUS-specific) of 2.0 or above must be maintained for the minor. A grade of C or above in CJUS 1511 and CJUS 2340 (each within two attempts*) is required to remain and progress in the minor.

*Grades of D, F, and W all count as attempts.

Early Entry: Master of Science in Criminal Justice

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Three letters of recommendation
- Completed online application at gradadmissions.charlotte.edu/apply

Progression Requirements

- Maintain a minimum 3.0 overall undergraduate GPA

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Early Entry: Graduate Certificate in Crime Analysis

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

All program-level Admissions and Progression Requirements are in addition to the University of North Carolina at Charlotte Admission Requirements.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Unofficial transcripts
- Statement of purpose
- Submit application online at mygradschool.uncc.edu and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the Graduate Catalog and the Graduate Admissions website (gradadmissions.charlotte.edu/admissions/early-entry).

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Department of English

english.charlotte.edu

Undergraduate Programs

- **B.A. in English**
 - Creative Writing
 - Language and Digital Technology
 - Literature and Culture
 - Pedagogy
 - Honors Program
- **Minor in Children's Literature and Childhood Studies**
- **Minor in Comparative Literature and Cultural Studies**
- **Minor in English**
- **Minor in Linguistics**
- **Minor in Technical/Professional Writing**
- **Early Entry: M.A. in English**

The Department of English fosters students' abilities to think critically, to read analytically, and to communicate effectively in oral and written form. A Major in English helps students develop an "advanced literacy" that enables them to excel in analytical argumentation, problem-solving, and understanding diverse cultural perspectives.

Specifically, English classes teach students to engage critically with various kinds of "texts": from daily language use to technical manuals, from Shakespearean drama to film, from lyric poetry to children's literature. As a result, English majors learn:

- How to work critically and creatively with a diverse array of complex ideas and texts
- How to construct effective written texts of various kinds
- How to think flexibly about the world we occupy and to adapt written and oral communication accordingly
- How to move easily and confidently between the realms of written, spoken, visual, and electronic communication
- How to operate and communicate effectively across disciplines in the humanities and sciences
- How to understand the complex interactions between written texts and social worlds (real and virtual)
- How to locate, critically analyze, and make use of research materials
- How to engage with a variety of writing and digital technologies

Because advanced literacy skills are in high demand, students find careers in fields such as teaching, technical/professional writing, creative writing, editing, publishing, advertising, public relations, and nonprofits, as well as in business, financial services, and banking. Others pursue advanced degrees in literature, law, medicine, teaching, and business administration.

English graduate students often go on to pursue similar careers, but their advanced degrees give them additional opportunities for professional achievement. Master's students are successful in their pursuit of Ph.D.

degrees, as well as positions in professional writing, teaching, and administration. Please see the *UNC Charlotte Graduate Catalog* for details on graduate programs.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Bachelor of Arts in English

A Major in English leading to the B.A. degree consists of 36 credit hours of coursework at the 1000-level or above. Students may also elect an optional concentration from one of four areas:

- 1) Creative Writing
- 2) Language and Digital Technology
- 3) Literature and Culture
- 4) Pedagogy

Admission Requirements

New Freshmen and Transfers

- See University Admission Requirements
- Minimum GPA: 2.0
- Transferable Credit Hours: 24

Currently Enrolled Students

Change of major form accepted year-round. Students must make an advising appointment during SOAR and when declaring the major.

Degree Requirements

Students in the major must complete a minimum of 36 credit hours in English courses, including 12 credit hours at the 4000-level. No more than 12 credit hours in ENGL at the 1000- or 2000-level may be counted toward the major, with no more than 6 credit hours at the 1000-level. English majors not electing a specific concentration must complete the following:

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirements at the beginning of this section.

Foundation Course (3 credit hours)

COMM 1101 - Public Speaking (3)

Major Courses (36 credit hours)

Creative Writing Courses

Select two of the following:

- ENGL 2126 - Introduction to Creative Writing (3)
ENGL 2127 - Introduction to Poetry Writing (3)
ENGL 2128 - Introduction to Fiction Writing (3)
ENGL 2201 - Contemporary Poetry (3)
ENGL 2202 - Contemporary Fiction (3)

- ENGL 3201 - Intermediate Poetry Writing (3)
ENGL 3202 - Intermediate Fiction Writing (3)
ENGL 3203 - Intermediate Creative Nonfiction Writing (3)
ENGL 4078 - Special Topics in Poetry Writing (3)
ENGL 4079 - Special Topics in Fiction Writing (3)
ENGL 4202 - Advanced Poetry Writing (3)
ENGL 4203 - Advanced Fiction Writing (3)
ENGL 4206 - Advanced Creative Nonfiction Writing (3)
ENGL 4207 - Writing Young Adult Fiction (3)

Language and Digital Technology Courses

Select two of the following:

- ENGL 2116 - Introduction to Technical Communication (3)
ENGL 2161 - Grammar for Writing (3)
ENGL 3132 - Introduction to Contemporary American English (3)
ENGL 3162 - Language and the Virtual World (3)
ENGL 3180 - Language and Digital Technology (3)
ENGL 4008 - Topics in Advanced Technical Communication (3)
ENGL 4160 - Origins of Language (3)
ENGL 4161 - Modern English Grammar (3)
ENGL 4165 - Multiculturalism and Language (3)
ENGL 4167 - The Mind and Language (3)
ENGL 4168 - Multimodality and Text Description (3)
ENGL 4181 - Writing and Designing User Documents (3)
ENGL 4182 - Information Design and Digital Publishing (3)
ENGL 4183 - Editing with Digital Technologies (3)
ENGL 4204 - Expository Writing (3)
ENGL 4235 - History of the Book (3)
ENGL 4260 - History of Global Englishes (3)
ENGL 4262 - Language and Diversity (3)
ENGL 4267 - Language and Culture in Digital Spaces (3)
ENGL 4270 - Studies in Writing, Rhetoric, and Literacy (3)
ENGL 4271 - Studies in Writing, Rhetoric, and New Media (3)
ENGL 4272 - Studies in the Politics of Language and Writing (3)
ENGL 4273 - Studies in Writing, Rhetoric, and Identity (3)
ENGL 4274 - Visual Rhetoric (3)
ENGL 4275 - Rhetoric and Technology (3)
ENGL 4277 - Digital Literacies (3)
ENGL 4400 - Research, Theory, and Practice of Tutoring Writing (3)
ENGL 4410 - Professional Internship (3 or 6)

Literature and Culture Courses

Select two of the following:

- ENGL 2072 - Topics in Literature and Film (3)
ENGL 2074 - Topics in Children's Literature, Media, and Culture (3)
ENGL 2081 - Topics in Author, Pop Culture, and Genre Studies (3)
ENGL 2082 - Topics in Film, Performance, and Print & Digital Culture (3)
ENGL 2083 - Topics in Genders, Sexualities, and Literature (3)
ENGL 2084 - Topics in Global Cultures, Identities, and Diverse Literatures (3)
ENGL 2085 - Topics in Literature, Science, and the Environment (3)
ENGL 2100 - Writing About Literature (3)
ENGL 2106 - Film Criticism (3)
ENGL 2108 - Introduction to Drama (3)
ENGL 2301 - Introduction to African American Literature (3)
ENGL 2400 - American Literature Survey (3)
ENGL 2401 - British Literature Survey I (3)
ENGL 2402 - British Literature Survey II (3)
ENGL 3072 - Topics in Literature and Film (3)
ENGL 3074 - Topics in Children's Literature, Media, and Culture (3)

ENGL 3081 - Topics in Author, Pop Culture, and Genre Studies (3)
ENGL 3082 - Topics in Film, Performance, and Print & Digital Culture (3)
ENGL 3083 - Topics in Genders, Sexualities, and Literature (3)
ENGL 3084 - Topics in Global Cultures, Identities, and Diverse Literatures (3)
ENGL 3085 - Topics in Literature, Science, and the Environment (3)
ENGL 3100 - Approaches to Literature and Culture (3)
ENGL 3102 - Literature for Young Children (3)
ENGL 3103 - Children's Literature (3)
ENGL 3104 - Literature for Adolescents (3)
ENGL 3125 - Introduction to U.S. Latinx Literature (3)
ENGL 3158 - Gender and African American Literature (3)
ENGL 3159 - African American Poetry (3)
ENGL 3211 - Medieval Literature (3)
ENGL 3212 - British Renaissance Literature (3)
ENGL 3213 - British Literature of the Restoration and 18th Century (3)
ENGL 3214 - Romantic British Literature, 1785 1832 (3)
ENGL 3215 - British Victorian Literature (3)
ENGL 3216 - British Literature in Transition, 1870 1914 (3)
ENGL 3217 - Modern British Literature (3)
ENGL 3231 - Early African American Literature (3)
ENGL 3233 - American Literature of the Romantic Period (3)

COMM 1101 – Public Speaking (3)

Major Course (3 credit hours)

ENGL 3100 - Approaches to Literature and Culture (3)

Concentration Required Courses (12 credit hours)

Students choose four courses from two of the following thematic clusters, taking two courses in each of those clusters: Author, Pop Culture, and Genre Studies; Children's & Young Adult Literature and Culture; Film, Performance, and Print & Digital Culture; Genders, Sexualities, and Literature; Global Cultures, Identities, and Comparative Literature; and Literature, Science, and the Environment. Transfer courses will be considered, but only two courses at the 2000-level will be credited toward these requirements. Approved alternatives at the 4000-level can be used to satisfy this requirement.

Author, Pop Culture, and Genre Studies

- ENGL 2081 - Topics in Author, Pop Culture, and Genre Studies (3)
ENGL 2106 - Film Criticism (3)
ENGL 2108 - Introduction to Drama (3)
ENGL 2201 - Contemporary Poetry (3)
ENGL 2202 - Contemporary Fiction (3)
ENGL 3081 - Topics in Author, Pop Culture, and Genre Studies (3)
ENGL 3159 - African American Poetry (3)
ENGL 4081 - Topics in Author, Pop Culture, and Genre Studies (3)
ENGL 4116 - Shakespeare's Early Plays (3)
ENGL 4117 - Shakespeare's Late Plays (3)
ENGL 4132 - British Drama to 1642 (3)
ENGL 4145 - Literature of the American South (3)
ENGL 4151 - Drama (3)

Children's & Young Adult Literature and Culture

- ENGL 2074 - Topics in Children's Literature, Media, and Culture (3)
ENGL 3074 - Topics in Children's Literature, Media, and Culture (3)
ENGL 3102 - Literature for Young Children (3)
ENGL 3103 - Children's Literature (3)
ENGL 3104 - Literature for Adolescents (3)
ENGL 4074 - Topics in Children's Literature, Media, and Culture (3)
ENGL 4102 - British Children's Literature (3)
ENGL 4103 - American Children's Literature (3)
ENGL 4104 - Multiculturalism and Children's Literature (3)

Film, Performance, and Print & Digital Culture

- ENGL 2082 - Topics in Film, Performance, and Print & Digital Culture (3)
ENGL 2106 - Film Criticism (3)
ENGL 2108 - Introduction to Drama (3)
ENGL 3082 - Topics in Film, Performance, and Print & Digital Culture (3)
ENGL 4082 - Topics in Film, Performance, and Print & Digital Culture (3)
ENGL 4116 - Shakespeare's Early Plays (3)
ENGL 4117 - Shakespeare's Late Plays (3)
ENGL 4132 - British Drama to 1642 (3)
ENGL 4151 - Drama (3)
ENGL 4235 - History of the Book (3)

Genders, Sexualities, and Literature

- ENGL 2083 - Topics in Genders, Sexualities, and Literature (3)
ENGL 3083 - Topics in Genders, Sexualities, and Literature (3)
ENGL 3158 - Gender and African American Literature (3)
ENGL 4002 - Women and Literature (3)
ENGL 4083 - Topics in Genders, Sexualities, and Literature (3)

Global Cultures, Identities, and Comparative Literature

- ENGL 2084 - Topics in Global Cultures, Identities, and Diverse Literatures (3)
ENGL 2301 - Introduction to African American Literature (3)
ENGL 3084 - Topics in Global Cultures, Identities, and Diverse Literatures (3)
ENGL 3125 - Introduction to U.S. Latinx Literature (3)
ENGL 3158 - Gender and African American Literature (3)
ENGL 3159 - African American Poetry (3)
ENGL 3231 - Early African American Literature (3)

- ENGL 3236 - African American Literature, Harlem Renaissance to Present (3)
ENGL 3237 - Modern and Recent U.S. Multiethnic Literature (3)
ENGL 4084 - Topics in Global Cultures, Identities, and Diverse Literatures (3)
ENGL 4104 - Multiculturalism and Children's Literature (3)
ENGL 4111 - Ancient World Literature (3)
ENGL 4112 - Modern World Literature (3)
ENGL 4325 - Trauma and Memory in Contemporary American Literature (3)

Literature, Science, and the Environment

- ENGL 2085 - Topics in Literature, Science, and the Environment (3)
ENGL 3085 - Topics in Literature, Science, and the Environment (3)
ENGL 4085 - Topics in Literature, Science, and the Environment (3)

Concentration Elective Courses (12 credit hours)

Select four of the following:

- ENGL 2072 - Topics in Literature and Film (3)
ENGL 2074 - Topics in Children's Literature, Media, and Culture (3)
ENGL 2100 - Writing About Literature (3)
ENGL 2106 - Film Criticism (3)
ENGL 2108 - Introduction to Drama (3)
ENGL 2201 - Contemporary Poetry (3)
ENGL 2202 - Contemporary Fiction (3)
ENGL 2301 - Introduction to African American Literature (3)
ENGL 2400 - American Literature Survey (3)
ENGL 2401 - British Literature Survey I (3)
ENGL 2402 - British Literature Survey II (3)
ENGL 3072 - Topics in Literature and Film (3)
ENGL 3074 - Topics in Children's Literature, Media, and Culture (3)
ENGL 3100 - Approaches to Literature and Culture (3)
ENGL 3102 - Literature for Young Children (3)
ENGL 3103 - Children's Literature (3)
ENGL 3104 - Literature for Adolescents (3)
ENGL 3158 - Gender and African American Literature (3)
ENGL 3159 - African American Poetry (3)
ENGL 3211 - Medieval Literature (3)
ENGL 3212 - British Renaissance Literature (3)
ENGL 3213 - British Literature of the Restoration and 18th Century (3)
ENGL 3214 - Romantic British Literature, 1785-1832 (3)
ENGL 3215 - British Victorian Literature (3)
ENGL 3216 - British Literature in Transition, 1870-1914 (3)
ENGL 3217 - Modern British Literature (3)
ENGL 3231 - Early African American Literature (3)
ENGL 3233 - American Literature of the Romantic Period (3)
ENGL 3234 - American Literature of the Realist and Naturalist Periods (3)
ENGL 3235 - Modern American Literature (3)
ENGL 3236 - African American Literature, Harlem Renaissance to Present (3)
ENGL 3237 - Modern and Recent U.S. Multiethnic Literature (3)
ENGL 4002 - Women and Literature (3)
ENGL 4072 - Topics in Literature and Film (3)
ENGL 4074 - Topics in Children's Literature, Media, and Culture (3)
ENGL 4102 - British Children's Literature (3)
ENGL 4103 - American Children's Literature (3)
ENGL 4104 - Multiculturalism and Children's Literature (3)
ENGL 4111 - Ancient World Literature (3)
ENGL 4112 - Modern World Literature (3)

- ENGL 4116 - Shakespeare's Early Plays (3)
 ENGL 4117 - Shakespeare's Late Plays (3)
 ENGL 4120 - Romantic British Literature, 1785-1832 (3)
 ENGL 4132 - British Drama to 1642, Excluding Shakespeare (3)
 ENGL 4141 - American Literature of the Realist and Naturalist Periods (3)
 ENGL 4145 - Literature of the American South (3)
 ENGL 4151 - Drama (3)
 ENGL 4235 - History of the Book (3)

Restricted Elective Courses (9 credit hours)

Select nine additional credit hours in ENGL courses at the 1000- or 2000-level or above, with no more than 6 credit hours at the 1000-level.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

A GPA of 2.0 or above in all English courses above the 1000-level is required for graduation.

Bachelor of Arts in English with Concentration in Pedagogy

Admission Requirements

New Freshmen and Transfers

- See University Admission Requirements
- Minimum GPA: 2.0
- Transferable Credit Hours: 24

Currently Enrolled Students

Change of major form accepted year-round. Students must make an advising appointment during SOAR and when declaring the major.

Degree Requirements

Students in the major must complete a minimum of 36 credit hours in English courses, including 12 credit hours at the 4000-level. No more than 12 credit hours in ENGL at the 1000- or 2000-level may be counted toward the major, with no more than 6 credit hours at the 1000-level.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirements at the beginning of this section.

Major Courses (36 credit hours)

Required Major Courses (15 credit hours)

- ENGL 3100 - Approaches to Literature and Culture (3)

- ENGL 3190 - Teaching Academic English to Adolescent Learners (3)
 ENGL 4200 - Teaching of Writing (3)
 ENGL 4201 - Teaching of Multiethnic Literature (3) (*or an approved course in multiethnic literature**)
 ENGL 4254 - Teaching English/Communication Skills to Middle and Secondary School Learners (3)

Elective Major Courses (21 credit hours)

Literature Survey Courses (12 credit hours)

American Literature Survey Course (6 credit hours)

Select two of the following:

- ENGL 3125 - Introduction to U.S. Latinx Literature (3)
 ENGL 3231 - Early African American Literature (3)
 ENGL 3233 - American Literature of the Romantic Period (3)
 ENGL 3234 - American Literature of the Realist and Naturalist Periods (3)
 ENGL 3235 - Modern American Literature (3)
 ENGL 3236 - African American Literature, Harlem Renaissance to Present (3)
 ENGL 3237 - Modern and Recent U.S. Multiethnic Literature (3)
 ENGL 4325 - Trauma and Memory in Contemporary American Literature (3)

British Literature Survey Course (3 credit hours)

Select one of the following:

- ENGL 3211 - Medieval Literature (3)
 ENGL 3212 - British Renaissance Literature (3)
 ENGL 3213 - British Literature of the Restoration and 18th Century (3)
 ENGL 3214 - Romantic British Literature, 1785-1832 (3)
 ENGL 3215 - British Victorian Literature (3)
 ENGL 3216 - British Literature in Transition, 1870-1914 (3)
 ENGL 3217 - Modern British Literature (3)

American Literature or British Literature Survey Course (3 credit hours)

Select one additional course from the list of American Literature or British Literature Survey Courses above.

Linguistics Course (3 credit hours)

Consult your advisor to help select a linguistics course.

World Literature Course (3 credit hours)

Select one of the following:

- ENGL 4111 - Ancient World Literature (3) *
 ENGL 4112 - Modern World Literature (3) *

**or an approved course in World Literature at the 2000-level or above*

Shakespeare Course (3 credit hours)

Select one of the following:

- ENGL 4116 - Shakespeare's Early Plays (3)
 ENGL 4117 - Shakespeare's Late Plays (3)
 or an approved alternative

Restricted Elective Course (3 credit hours)

Select one additional ENGL course at the 1000-level or above.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

A GPA of 2.0 or above in all English courses above the 1000-level is required for graduation.

Sophomore Year: ENGL 3190 in Spring semester

Junior Year: ENGL 4201 in Fall semester and ENGL 4200 in Spring semester

Senior Year: ENGL 4254 in either Fall or Spring semester

Minor in English

Students who do not major in English but plan to take courses in English, for pleasure or in order to build their skills with language, should consult the department about the possibility of a Minor in English, Children's Literature and Childhood Studies, Comparative Literature and Cultural Studies, Linguistics, or Technical/Professional Writing.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

New Transfer

See University Admission Requirements

Minor Requirements

A Minor in English consists of 18 credit hours in English courses at the 2000-level or above.

Required Courses (6 credit hours)

ENGL 2100 - Writing About Literature (3)

ENGL 3100 - Approaches to Literature and Culture (3)

Elective Courses (12 credit hours)

Select four ENGL courses, of which at least six credit hours are at the 3000-level or above.

Minor Total = 18 Credit Hours

Progression Requirements

A GPA of 2.0 or above in all English courses taken is required for graduation.

Special Policies or Requirements

The Department of English allows English majors who minor in Children's Literature and Childhood Studies, Comparative Literature and Cultural Studies, Linguistics, or Technical/Professional Writing to count only two courses from the minor toward fulfillment of the major degree requirements.

Minor in Children's Literature and Childhood Studies

The Minor in Children's Literature and Childhood Studies (CLCS) provides students with an opportunity to study children's literature within the context of the interdisciplinary field of childhood studies.

The minor recognizes that the academic study of children's literature is intrinsically linked to other disciplines that focus on particular aspects of childhood. In addition to taking courses in children's literature, students participating in this minor select courses pertaining to such child-related topics as language acquisition, child psychology, education, juvenile law, pediatric nursing, and the history and culture of childhood.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

New Transfer

See University Admission Requirements

Minor Requirements

The Minor in Children's Literature and Childhood Studies consists of 18 credit hours at the 2000-level and above.

Required Core Course (3 credit hours)

ENGL 3103 - Children's Literature (3)

Elective Courses (15 credit hours)

Children's Literature Courses (6 credit hours)

Select two of the following:

ENGL 2074 - Topics in Children's Literature, Media, and Culture (3)

ENGL 3074 - Topics in Children's Literature, Media, and Culture (3)

ENGL 3102 - Literature for Young Children (3)

ENGL 3104 - Literature for Adolescents (3)

ENGL 4074 - Topics in Children's Literature, Media, and Culture (3)

ENGL 4102 - British Children's Literature (3)

ENGL 4103 - American Children's Literature (3)

ENGL 4104 - Multiculturalism and Children's Literature (3)

ENGL 4207 - Writing Young Adult Fiction (3)

Child-Related Courses (6 credit hours)

Select two of the following:

ANTH 2090 - Topics in Anthropology (1 to 3) (*related to CLCS*)

CHFD 2111 - Foundations in Child and Family Development (3)

CJUS 2361 - Juvenile Justice (3)

CJUS 3353 - Juvenile Corrections (3)

EDUC 2100 - Foundations of Education and Diversity in Schools (3)
or EDUC 1100 - Foundations of Education and Diversity in Schools - Prospect Curriculum (4)

MUSC 2191 - Incorporating Music Into the Elementary Classroom (3)

NURS 2200 - Human Growth and Development (3)

- PHIL 3274 - Philosophy of Education (3)
- PSYC 2370 - Child Development (3)
- PSYC 2371 - Adolescent Development (3)
- SOCY 2132 - Sociology of Marriage and the Family (3)
- SPED 2100 - Introduction to Students with Special Needs (3)
- THEA 4360 - Theatre for Young Audiences (3)
- WGST 3130 - Perspectives on Motherhood (3)

Children's Literature or Child-Related Course (3 credit hours)

Select one additional Children's Literature or Child-Related Course not already taken from the above lists.

Minor Total = 18 Credit Hours

Progression Requirements

A GPA of 2.0 or above in all English courses taken is required for graduation.

Special Policies or Requirements

The Department of English allows English majors who minor in Children's Literature and Childhood Studies, Comparative Literature and Cultural Studies, Linguistics, or Technical/Professional Writing to count only two courses from the minor toward fulfillment of the major degree requirements.

Minor in Comparative Literature and Cultural Studies

The Minor in Comparative Literature and Cultural Studies provides students with an opportunity to study literature and culture in more comparative contexts and forms. Students explore the ways in which the academic study of literature and culture is linked to other disciplines. Students may select from a wide range of courses in African American Literature and Culture, Africana Studies, American Indian Literature and Culture, Anthropology, Latino/Latina Literature and Culture, Women's and Gender Studies, and History.

Admission Requirements

Current UNC Charlotte Undergraduate Students

WGST 3131 - History of Sexuality (3)
WGST 3160 - Gender and Education (3)
WGST 3180 - Gender in Hip Hop Culture (3)
WGST 3215 - Religion and Sexuality (3)
WGST 3310 - Gender and Sexuality (3)
WGST 4140 - African American Feminism (3)
WGST 4150 - Gender, Science, and Technology (3)
WGST 4160 - Race, Sexuality, and the Body (3)
WGST 4170 - Queer Theory (3)

Minor Total = 18 Credit Hours

Progression Requirements

A GPA of 2.0 or above in all English courses taken is required for graduation.

Special Policies or Requirements

The Department of English allows English majors who minor in Children's Literature and Childhood Studies, Comparative Literature and Cultural Studies, Linguistics, or Technical/Professional Writing to count only two courses from the minor toward fulfillment of the major degree requirements.

Minor in Linguistics

An interdisciplinary Minor in Linguistics provides students with an opportunity to study linguistics within an interdisciplinary context. This minor recognizes that the academic study of linguistics is linked to other disciplines that focus on particular aspects of language as the object of study. Students participating in this minor select from a range of courses in Anthropology, English, Computer Sciences, Communication Studies, Cognitive Science, Languages, Cultures and Translation, Philosophy, and Teaching English as a Second Language.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

New Transfer

See University Admission Requirements

Minor Requirements

The Minor in Linguistics consists of 18 credit hours of coursework at the 2000-level and above.

Foundation Course (3 hours)

ENGL 3132 - Introduction to Contemporary American English (3)

English Elective Courses (9 hours)

Select three of the following:

ENGL 2161 - Grammar for Writing (3)
ENGL 3162 - Language and the Virtual World (3)
ENGL 4160 - Origins of Language (3)
ENGL 4161 - Modern English Grammar (3)
ENGL 4165 - Multiculturalism and Language (3)
ENGL 4167 - The Mind and Language (3)
ENGL 4168 - Multimodality and Text Description (3)
ENGL 4260 - History of Global Englishes (3)
ENGL 4262 - Language and Diversity (3)
ENGL 4267 - Language and Culture in Digital Spaces (3)

Other courses that do not appear on the above list, especially special topics courses and independent study courses, may be approved by the Applied Linguistics coordinator if they pertain to language study.

Language Study Elective Courses (6 hours)

Select two courses from other departments approved for the minor pertaining to language study:

ANTH 2161 - Introduction to Linguistic Anthropology (3)

ANTH 4120 - Intercultural Communications (3)

ITSC 3688 - Computers and their Impact on Society (3)

PHIL 3242 - Philosophy of Mind (3)

PHIL 3251 - Advanced Logic (3)

PHIL 3252 - Philosophy of Language (3)

PSYC 3216 - Introduction to Cognitive Science (3)

PSYC 3316 - Language and Cognition (3)

PSYC 4116 - Cognitive Neuroscience (3)

SPAN 4231 - Spanish Phonetics (3)

SPAN 4232 - Spanish Linguistics (3)

SPAN 4233 - History of the Spanish Language (3)

TESL 4204 - Inclusive Classrooms for Immigrant Students (3)

TESL 4300 - Second Language Development in K-12 Classrooms

TESL 4600 - Literacy Development for Second Language Learners (3)

TR AN 3601 - Introduction to Translation and Interpreting Studies (3)

Minor Total = 18 Credit Hours

Progression Requirements

A GPA of 2.0 or above in all English courses taken is required for graduation.

Special Policies or Requirements

The Department of English allows English majors who minor in Children's Literature and Childhood Studies, Comparative Literature and Cultural Studies, Linguistics, or Technical/Professional Writing to count only two courses from the minor toward fulfillment of the major degree requirements.

Minor in Technical/Professional Writing

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

New Transfer

See University Admission Requirements

Minor Requirements

The Minor in Technical/Professional Writing consists of 21 credit hours of coursework.

Required Courses (9 credit hours)

ENGL 2116 - Introduction to Technical Communication (3)

ENGL 3180 - Language and Digital Technology (3)

ENGL 4410 - Professional Internship (3)

Elective English Courses (9 credit hours)

Select three of the following:

ENGL 3162 - Language and the Virtual World (3)

ENGL 4008 - Topics in Advanced Technical Communication (3)

ENGL 4181 - Writing and Designing User Documents (3)

ENGL 4182 - Information Design and Digital Publishing (3)

ENGL 4183 - Editing with Digital Technologies (3)

Note: ENGL 2116 is a prerequisite for some courses in the minor. Students should declare the minor before trying to enroll in ENGL 2116 to assure a place in the course.

Minor Total = 18 Credit Hours

Progression Requirements

A GPA of 2.0 or above in all English courses taken is required for graduation.

Special Policies or Requirements

The Department of English allows English majors who minor in Children's Literature and Childhood Studies, Comparative Literature and Cultural Studies, Linguistics, or Technical/Professional Writing to count only two courses from the minor toward fulfillment of the major degree requirements.

Honors Program in English

The Department of English offers an Honors Program that consists of three courses.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Entry into all honors courses is by permission of the department only and requires a GPA of 3.0 in ENGL courses and 3.0 overall. Though English Honors requirements are normally completed in their final year, qualified students are urged to discuss the English Honors

Program with the Department's Honors Coordinator early in their career.

New Transfer

See University Admission Requirements

Course Requirements

Currently Enrolled Students

Any or all of these three required courses may also be used toward a student's electives in a concentration within the English major, applied as appropriate depending on the course content.

ENGL 4750 - English Honors Seminar (3)

ENGL 4751 - English Honors Thesis Seminar (3)

ENGL 4752 - English Honors Thesis (3)

Progression Requirements

To continue in the Honors Program, candidates must:

- Maintain a 4.0 GPA in honors courses

To be awarded honors in English, candidates must:

- Write an honors capstone thesis of "A" quality (i.e., a grade of A for either ENGL 4751 or ENGL 4752) as judged by a committee of three readers
- Receive a grade of A in ENGL 4750
- Achieve a minimum GPA of 3.50 in all ENGL courses
- Achieve a minimum overall GPA of 3.0
- In the semester before graduation, candidates must either present their capstone thesis at an undergraduate colloquium or submit the thesis to an undergraduate journal
- Formally apply and be approved for Honors Candidacy by the Honors College, a process that will be initiated as part of either ENGL 4751 or ENGL 4752

The honors notation will appear on a student's official transcript.

Early Entry: Master of Arts in English

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Note: Standardized test scores (e.g., GRE, MAT) are not required.

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 6 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 6 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

- **Early Entry: M.S. in Earth Science**
- **Early Entry: M.A. in Geography**

The Department of Earth, Environmental, and Geographical Sciences is a cross-disciplinary unit offering different but related programs of study. Earth and Environmental Sciences include the study of the hydrosphere, atmosphere, biosphere, and surficial materials, and the influence of humans on those systems. Environmental Studies is concerned with the intersection of human activities and the environment with particular focus on policy and planning. Geography emphasizes the locational aspects of human activities as they are distributed over the Earth. Geology examines the composition, history, and structure of the whole Earth. Meteorology provides a rigorous study of the fundamental atmospheric processes that lead to weather and climate. A unique advantage of the department's interdisciplinary curriculum is that all five programs of study are inter-related in many ways. For example, a geography student interested in land use planning might gain important experience and knowledge from coursework in soil science or hydrology. An Earth and Environmental Sciences major might better understand soil formation and chemical weathering with courses in petrology and optical mineralogy. Emphasis in one area should not preclude class work or interest in another. In fact, this type of interdisciplinary work is often critical to the student's program of study.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Facilities

The Department of Earth, Environmental, and Geographical Sciences is housed in the McEniry building. Supported Geography and Earth Science teaching and research activities include the areas of geographic information science and technology, urban and community planning, regional analysis, geography, hydrology, fluvial processes, hydrogeology, geochemistry, soils, petrology, mineralogy, sedimentology, geomorphology, structural geology, meteorology, and atmospheric science.

Numerous classrooms and laboratories are available for instructional and research purposes. An extensive collection of rock, mineral and fossil samples are available for use in teaching. Laboratory analytical capabilities present within the department include: ion chromatography, total carbon and nitrogen analysis, flow injection analysis, ICP-MS, atomic absorption spectroscopy, X-ray diffraction (XRD), laser particle size analysis, gas chromatography and water isotope analysis. Rock cutting and thin-sectioning equipment along with petrographic microscopes are available for studies in mineralogy and petrology. Field studies are supported with deployable equipment such as total stations, GPS, surface and groundwater sampling and monitoring devices, data loggers, soil boring equipment and ground penetrating radar. The Department has vans and a four-wheel drive truck available for transportation to field research sites and for class field trips.

The meteorology program includes a wide variety of resources for our students and faculty, including the meteorology computer lab (Linux with all standard packages, Matlab, and other analysis software), access to campus High Performance Computing resources, broadcast meteorology studio, rooftop weather station, additional weather stations for field deployment, a rooftop lightning sensor, weather balloon launch system, hand-held and laboratory-grade air quality monitoring equipment, hand-held Kestral weather monitors, solar flux monitors, and skew-T charts. Graduate and undergraduate researchers working with faculty enjoy a shared office space, and a conference room with touch-screen presentation display and video conferencing capability.

Students have access to four Departmental computer labs, three PC labs and one Linux lab, three of which have pay-for-print printers. The three PC labs contain geographic information system (GIS) and remote sensing software, including ArcGIS and ENVI software packages. These workstations are used to support courses in GIS, remote sensing and image processing, and spatial decision support systems, as well as other classes in the department. The Linux lab is used for our Meteorology classes and includes Matlab and other software.

Currently Enrolled Students

- *Declaration of Major:* Students may declare the major at any time before graduation.

Degree Requirements

A Major in Earth and Environmental Sciences leading to a B.S. degree consists of a minimum of 70 credit hours of required and elective coursework. The B.S. Degree allows students to self-concentrate in areas of Hydrologic, Atmospheric, Geologic, or Environmental Sciences.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirement.

Major Courses (26 credit hours)

- ESCI 1101 - Earth Science-Geography - (3)
- ESCI 1101L - Earth Science-Geography Lab (1)
- ESCI 1501 - Global Social Science: Environment, Society, and Sustainability (3)
- ESCI 2210 - Field Methods in the Earth and Environmental Sciences (3)
- ESCI 2222 - Environmental Science (3)
- ESCI 3101 - Global Environmental Change (3)
- ESCI 3205 - Water Resources (3)
- GEOL 1200 - Physical Geology (3)
- GEOL 1200L - Physical Geology Lab (1)
- GEOL 3105 - Mineral Resources (3)

Related Courses (17 credit hours)

- BIOL 1110 - Principles of Biology (3)
- CHEM 1251 - Principles of Chemistry (3)
- CHEM 1251L - Principles of Chemistry Lab (1)
- MATH 1241 - Calculus I (3)
- PHYS 1101 - Introductory Physics I (3)
- PHYS 1101L - Introductory Physics I Lab (1)

Second Mathematics and Statistics Course

Select one of the following:

- MATH 1242 - Calculus II (3)
 - or STAT 1220 - Elements of Statistics I (BUSN) (3)
 - or STAT 1221 - Elements of Statistics I (3)
 - or STAT 1222 - Introduction to Statistics (3)

Earth Systems (6 credit hours)

Select 6 credits from the following:

- BIOL 3144 - Ecology (3)
- BIOL 3244 - Field Ecology (3)
- BIOL 4144 - Advanced Ecology (4)
- ESCI 3105 - Oceanography (3)
- ESCI 4140 - Hydrologic Processes (4)
- ESCI 4145 - Groundwater (4)

- ESCI 4155 - Fluvial Processes (4)
- ESCI 4160 - Contaminant Transport (3)
- ESCI 4201 - Hydroclimatology (3)
- ESCI 4210 - Soil Science (4)
- ESCI 4220 - Atmospheric Chemistry (3)
- ESCI 4222 - Watershed Science (3)
- GEOL 3124 - Sedimentology (4)
- GEOL 4105 - Geomorphology (4)
- GEOL 4140 - Coastal Geology (3)
- GEOL 4145 - Hydrogeology (4)
- GEOL 4165 - Aqueous and Environmental Geochemistry (3)
- GEOL 4175 - Geochemistry (3)
- GEOL 4310 - Applied Soil Science (4)
- METR 3140 - Fundamentals of Meteorology (3)
- METR 3210 - Atmospheric Thermodynamics (3)
- METR 3220 - Physical Meteorology (3)
- METR 3245 - Synoptic Meteorology (4)
- METR 3250 - Dynamic Meteorology (3)
- METR 4205 - Climate Dynamics (3)
- METR 4240 - Boundary-Layer Meteorology (3)

Environmental/Human Interactions (6 credit hours)

Select 6 credits from the following:

- BIOL 4244 - Conservation Biology (3)
- ESCI 3170 - Environmental Quality Management (3)
- ESCI 3220 - Air Quality (3)
- ESCI 3310 - National Parks: The Science Behind the Scenery (3)
- ESCI 4146 - The Business of Ecological Restoration (3)
- ESCI 4190 - Contemporary Environmental Issues (3)
- GEOG 3102 - Plant Geography (3)
- GEOG 3180 - Hazards and Disasters (3)
- GEOG 3190 - Biogeography (3)
- GEOG 3215 - Environmental Planning (3)
- GEOG 3220 - Renewable Energy and Regional Energy Markets (3)
- GEOG 3250 - World Food Problems (3)
- GEOG 3260 - Medical Geography (3)
- GEOG 3280 - Sustainability Field Study in the Peruvian Amazon (3)
- GEOG 4215 - Urban Ecology (3)
- GEOG 4250 - Food, Migration, and Place (3)
- GEOL 3190 - Environmental Geology (3)
- GEOL 3190L - Environmental Geology Laboratory (1)

Technical (3 or 4 credit hours)

Select 1 of the following:

- ESCI 4122 - Statistics and Data Analysis in Earth Sciences (3)
- ESCI 4170 - Fundamentals of Remote Sensing (4)
- ESCI 4180 - Digital Image Processing in Remote Sensing (4)
- GEOG 3120 - Fundamentals of Geographic Information Systems (4)
- GEOG 4131 - Environmental Modeling with GIS (4)
- GEOG 4255 - Applied Population Analysis (3)
- GEOL 4115 - Applied Geophysics (4)
- METR 4110 - Atmospheric Instrumentation (3)

Earth Systems or Environmental/Human Interactions Major Electives (12 credit hours)

Choose 12 additional credits that may come from any combination of courses from the Earth Systems or Environment/Human Interactions subgroups. ESCI 3000 and ESCI 4000 special topics courses, as well as ESCI 4400, ESCI 4800, or ESCI 4600 may also be counted toward this total.

Note: Only 6 credits of 3000 and above major electives can be double counted between this degree and degrees in METR, GEOL, EVST, and GEOG degrees.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Minor in Earth and Environmental Sciences

The Minor in Earth and Environmental Sciences is an interdisciplinary program in the College of Humanities & Earth and Social Sciences that is designed for students pursuing any UNC Charlotte degree who are interested in careers related to studying or managing the environment.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

To obtain a Minor in Earth and Environmental Sciences, students must complete 22 credit hours offered from the Department of Earth, Environmental, and Geographical Sciences and the Department of Biological Sciences. Participating students have some flexibility in choosing elective courses that reflect their specific area of interest within the environmental field. If students are majoring in the departments of Earth, Environmental, and Geographical Sciences or Biological Sciences, they must take at least 12 credits outside of their major subject area (that is, outside of BIOL, ESCI, GEOG, GEOL, or METR, depending on the student's major). Likewise, Environmental Studies majors must take the 12 elective credits outside of GEOG.

Students may not double count major requirements or electives for elective courses in the minor.

Foundation Courses (10 credit hours)

ESCI 1101 - Earth Sciences - Geography (3)

ESCI 1101L - Earth Sciences - Geography Lab (1)

ESCI 1501 - Global Social Science: Environment, Society, and Sustainability (3)

ESCI 2222 - Environmental Science (3)

Elective Courses (12 credit hours)

Select from the following:

Biological Sciences

BIOL 3144 - Ecology (3)

BIOL 3202 - Horticulture (3)

BIOL 3222 - General Botany (3)

BIOL 3229 - Field Botany (3)

BIOL 3231 - Invertebrate Zoology (4)

BIOL 3233 - Vertebrate Zoology (4)

BIOL 3235 - Biology of Insects (3)

BIOL 3236 - General Zoology (3)

BIOL 4111 - Evolution (3)

BIOL 4144 - Advanced Ecology (4)

BIOL 4162 - Advanced Biotechnology I (3)

BIOL 4235 - Mammalogy (4)

BIOL 4242 - Biology of Birds (3)

BIOL 4243 - Animal Behavior (3)

Earth Sciences

Any ESCI course 2000-level or above

- ESCI 2xxx, 3xxx, 4xxx - Earth Science

Geography

GEOG 3102 - Plant Geography (3)

GEOG 3120 - Fundamentals of Geographic Information Systems (4)

GEOG 3180 - Hazards and Disasters (3)

GEOG 3215 - Environmental Planning (3)

GEOG 3220 - Renewable Energy and Regional Energy Markets (3)

GEOG 3250 - World Food Problems (3)

GEOG 3260 - Medical Geography (3)

GEOG 4131 - Environmental Modeling with GIS (4)

GEOG 4215 - Urban Ecology (3)

Geology

Any GEOL course 2000-level or above

- GEOL 2xxx, 3xxx, 4xxx - Geology

Meteorology

Any METR course 2000-level or above

- METR 2xxx, 3xxx, 4xxx - Meteorology

Total = 22 Credit Hours

Progression Requirements

Students must have and maintain a GPA of at least 2.50 to participate in the program.

Early Entry: Master of Science in Earth Sciences

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements

- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- GRE is not required
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents, which includes a Statement of Purpose, Resume/CV, 3 Letters of Recommendation, and Unofficial Transcript(s)

Special Policies or Requirements

Up to 9 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 9 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Environmental Studies

The Environmental Studies program focuses on human interactions with the environment. Areas of study are broad, but focus on the natural and built environments and the relationship between them. Coursework covers areas such as environmental and land use planning, climate change, resource distribution and management, environmental policy, population dynamics, environmental health, food security, and conservation.

Students majoring in Environmental Studies pursue careers in environmental consulting, environmental planning, land development planning, public policy, environmental law and advocacy, park services, and teaching. This degree also prepares students for graduate studies in environmental studies, public policy, and resource management. There are employment opportunities in both government and private industry with the greatest range of positions available to students who earn graduate degrees. For details, see the *UNC Charlotte Graduate Catalog* regarding the M.A. in Geography and M.S. in Earth Sciences program.

Bachelor of Arts in Environmental Studies

All program-level Admissions and Progression Requirements are in addition to the University of North Carolina at Charlotte Admission Requirements.

Admission Requirements

Freshmen

- See University Admission Requirements
- *Minimum GPA:* n/a

Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.0

- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Declaration of Major:* Students may declare the major at any time before graduation.

Degree Requirements

A Major in Environmental Studies leading to a B.A. degree consists of a minimum of 55 credit hours of Geography and Earth Sciences and extra-departmental courses in three subgroups: Health and Development, Resources and Conservation, and Planning, Policy, and Society. Students can focus their major elective credits in any of the subgroup areas, tailoring the degree to specific interests and careers. Students are responsible for meeting the course prerequisites for all extra-departmental coursework.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirement.

Major Courses (22 credit hours)

- ESCI 1101 - Earth Science-Geography - (3)
- ESCI 1101L - Earth Science-Geography Lab (1)
- ESCI 1501 - Global Social Science: Environment, Society, and Sustainability (3)
- ESCI 2222 - Environmental Science (3)
- ESCI 3101 - Global Environmental Change (3)
- ESCI 4190 - Contemporary Environmental Issues (3)
- GEOG 1105 - Introduction to Human Geography (3)

Statistics Course

Select one of the following:

- STAT 1220 - Elements of Statistics I (BUSN) (3)
- STAT 1221 - Elements of Statistics I (3)
- STAT 1222 - Introduction to Statistics (3)

Resources and Conservation (9 credit hours)

Choose 9 credit hours from the following:

- BIOL 3144 - Ecology (3)
- BIOL 3144L - Ecology Laboratory (1)
- BIOL 3244 - Field Ecology (3)
- BIOL 4244 - Conservation Biology (3)
- BIOL 4244L - Conservation Biology Laboratory (1)
- ECON 4181 - Energy and Environmental Economics (3)
- ESCI 3190 - Biogeography (3)
- ESCI 3205 - Water Resources (3)
- ESCI 3220 - Air Quality (3)
- ESCI 3310 - National Parks: The Science Behind the Scenery (3)
- ESCI 4145 - Groundwater (4)
- ESCI 4146 - The Business of Ecological Restoration (3)
- ESCI 4214 - Global Ecosystems: Human Dimensions and Environmental

Dynamics (3)
GEOG 3102 - Plant Geography (3)
GEOG 3220 - Renewable Energy and Regional Energy Markets (3)
GEOG 4215 - Urban Ecology (3)
GEOG 4216 - Landscape Ecology (3)
GEOL 3105 - Mineral Resources (3)
GEOL 3190 - Environmental Geology (3)

Health and Development (9 credit hours)

Choose 9 credit hours from the following:

(Note: Some extradepartmental courses may have additional prerequisites.)

AFRS 2170 - Introduction to Health and Environmental Issues in the Africana World (3)
AFRS 2174 - Environmental Literature in Africa and the Caribbean (3)
AFRS 4630 - Environmental and Public Health in Africa (3)
AFRS 4640 - Environment, State, and Society in the Caribbean and Latin America (3)
ANTH 2127 - Environmental Anthropology (3)
ANTH 3122 - Culture, Health, and Disease (3)
ANTH 3124 - Food, Nutrition, and Culture (3)
ANTH 3135 - Origins of Globalization (3)
BIOL 4258 - Epidemics and Plagues (3)
BIOL 4274 - Environmental Toxicology and Health (3)
COMM 3115 - Health Communication (3)
COMM 3130 - Rhetoric and Public Culture (3)
ECON 4181 - Energy and Environmental Economics (3)
GEOG 2121 - Introduction to Development Studies (3)
GEOG 3180 - Hazards and Disasters (3)
GEOG 3250 - World Food Problems (3)
GEOG 3260 - Medical Geography (3)
GEOG 4255 - Applied Population Analysis (3)
HLTH 4103 - Environmental Health: A Global Perspective (3)
HLTH 4104 - Epidemiology (3)
HLTH 4290 - Health Management Information Systems (3)
INTL 3001 - Topics In Development and Sustainability Studies (3)
INTL 3125 - Food and Globalization (3)
SOCY 2126 - World Population Problems (3)
SOCY 4121 - Globalization and Development (3)

Planning, Policy, and Society (6 credit hours)

Choose 6 credit hours from the following:

AFRS 4640 - Environment, State, and Society in the Caribbean and Latin

America (3)
ESCI 3170 - Environmental Quality Management (3)
GEOG 3106 - Sustainable Cities (3)
GEOG 3200 - Land Use Planning (3)
GEOG 3205 - City Regions and Systems (3)
GEOG 3215 - Environmental Planning (3)
GEOG 3280 - Sustainability Field Study in the Peruvian Amazon (3)
GEOG 4160 - The Geography of Transportation Systems (3)
GEOG 4200 - Environmental Justice, Injustice, and Planning (3)
GEOG 4209 - Small Town and Community Planning (3)
GEOG 4210 - Urban Planning Methods (3)
GEOG 4220 - Housing Policy and Planning (3)
GEOG 4315 - The Urban Form (3)
GEOG 4340 - Urban Analytics (3)
POLS 2120 - Introduction to Public Policy (3)

Major Electives (9 credit hours)

Choose 9 additional credit hours from the Resources and Conservation, Health and Development, and Planning, Policy, and Society subgroups. In addition, ESCI and GEOG 3000 and 4000 level topics courses, as well as ESCI 4600 or 4800 may count toward these elective credits.

Note: Only 6 credits of 3xx and 4xx level coursework can be double counted between the EVST and EVSI and GEOG degrees.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Bachelor of Arts in Environmental Studies, *Secondary Teaching Option*

Students preparing to teach high school earth science may become licensed by earning the B.A. in Environmental Studies degree including the Secondary Teaching Option.

Admission Requirements

Freshmen

- See University Admission Requirements
- *Minimum GPA:* n/a

Transfers

- See University Admission Requirements

- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Declaration of Major:* Students may declare the major at any time before graduation.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirement.

Major Courses (30 credit hours)

- ESCI 1101 - Earth Sciences-Geography (3)
- ESCI 1101L - Earth Sciences-Geography Lab (1)
- ESCI 2101 - The Environmental Dilemma (3)
- ESCI 3105 - Oceanography (3)
- GEOL 1200 - Physical Geology (3)
- GEOL 1200L - Physical Geology Lab (1)
- GEOL 1210 - Earth History (3)
- GEOL 1210L - Earth History Lab (1)
- GEOL 3115 - Mineralogy (4)
- GEOL 3190 - Environmental Geology (3)
- GEOL 3190L - Environmental Geology Lab (1)
- GEOG 2103 - Elements of GIScience and Technologies (4)

Restricted Elective Courses (11 credit hours)

Select 11 elective credit hours from ESCI courses, of which at least 4 credit hours are at the 3000 level or above.

Related Courses (20 credit hours)

- CHEM 1251 - General Chemistry I (3)
- CHEM 1251L - General Chemistry I Lab (1)
- MATH 1241 - Calculus I (3)
- PHYS 1101 - Introductory Physics I (3)
- PHYS 1101L - Introductory Physics I Lab (1)
- PHYS 1130 - Introduction to Astronomy (3)
- PHYS 1130L - Introduction to Astronomy (1)
- Plus one additional physical or life science elective

Minor in Secondary Education (33 credit hours)

Students must have a Minor in Secondary Education to obtain teaching licensure. See the College of Education section of this *Catalog* for details on the requirements for the minor.

Licensure applications are the responsibility of the student and the Office of Teacher Education Advising and Licensure (TEAL) in the College of Education.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Geography

The Geography program is oriented toward the concepts and methodologies of social science that stress the importance of location. Geography is the study of spatial variation – of how things vary from place to place on the surface of the earth; how places are connected to each other, and the factors that shape how places interact and change over time.

Geography is studied at many levels, from the local to the global, and from many perspectives (i.e., social, cultural, political, economic, and environmental). Conceptual treatment of geographic issues deal with

urbanization; globalization; migration; sustainability; patterns of land use; transportation systems; the flow of goods, services, and information; business location; planning for the natural and built environment; and human-environmental interaction in both urban and rural settings. Special emphasis is placed on how these factors shape our world, the places where we live and work, and the ways in which we interact. Geographic analysis involves information technology; mapping and statistical analysis; social area analysis; remote sensing and satellite imagery; and especially the use of Geographic Information Systems (GIS). A host of courses prepare students in both the concepts and methods of contemporary spatial analysis. The department also leads the interdisciplinary Minor in Urban Studies. Geography majors find careers in urban and regional planning, cartography, GIS applications and development, marketing research, transportation planning, real estate development, and teaching. While a wide range of career options are available to undergraduate geography majors, graduate studies provide additional options. For details, see the *UNC Charlotte Graduate Catalog* regarding the M.A. in Geography program.

Bachelor of Arts in Geography

A Major in Geography leading to a B.A. degree consists of 54 hours in Geography and Earth Sciences coursework.

Admission Requirements

Freshmen and Transfers

Major Courses (33 credit hours)

- ESCI 1101 - Earth Science-Geography (3)
- ESCI 1101L - Earth Science-Geography Lab (1)
- ESCI 1501 - Global Social Science: Environment, Society, and Sustainability (3)
- GEOG 1103 - Spatial Thinking (4)
- GEOG 1105 - Introduction to Human Geography (3)
- GEOG 1501 - Global Social Science: Global Geography (3)
- GEOG 1511 - Local Social Science: Urban and Regional Planning (3)
- GEOG 2200 - Introduction to Urban Studies (3)
or URBS 2200 - Introduction to Urban Studies (3)
- GEOG 2110 - Introduction to Geographic Research (3)
- GEOG 3120 - Fundamentals of Geographic Information Systems (4)

GEOG 4600 - Geography Professional Development Seminar (3)

Urban Studies and Planning (12 credit hours)

Choose up to 12 credits from the following:

GEOG 2111 - Social Inequality and Planning (3)

GEOG 2165 - Patterns of World Urbanization (3)

GEOG 3100 - Geography of Cities (3)

GEOG 3106 - Sustainable Cities (3)

GEOG 3115 - Urban Transportation Problems (3)

GEOG 3200 - Land Use Planning (3)

GEOG 3205 - City Regions and Systems (3)

GEOG 3210 - Regional Planning (3)

GEOG 3215 - Environmental Planning (3)

GEOG 4160 - The Geography of Transportation Systems (3)

GEOG 4200 - Environmental Justice, Injustice, and Planning (3)

GEOG 4209 - Small Town and Community Planning (3)

GEOG 4210 - Urban Planning Methods (3)

GEOG 4215 - Urban Ecology (3)

GEOG 4220 - Housing Policy and Planning (3)

GEOG 4305 - Urban Field and Research Methods (3)

GEOG 4310 - Urban Social Geography (3)

GEOG 4315 - The Urban Form (3)

GEOG 4340 - Urban Analytics (3)

URBS 3801 - Independent Study in Urban Studies (1 to 3)

URBS 4401 - Internship in Urban Studies (3)

Geography Electives (9 credit hours)

Choose 9 credit hours from any 2xxx, 3xxx, or 4xxx GEOG or from the following list of extra-departmental courses:

ANTH 2125 - Urban Anthropology (3)

HIST 3280 - Blacks in Urban America (3)

HIST 3281 - American Cities (3)

POLS 3121 - Urban Politics and Policy (3)

Recommended Courses:

GEOG 2102 - Intro to Cartographic Design (4)

GEOG 2105 - Intro to Economic Geography (3)

GEOG 2121 - Intro to Development Studies (3)

GEOG 3180 - Hazards and Disasters (3)

GEOG 3250 - World Food Problems (3)

GEOG 3220 - Renewable Energy and Regional Energy Markets (3)

GEOG 3280 - Sustainability Field Study in the Peruvian Amazon (3)

GEOG 4250 - Food, Migration, and Place (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Bachelor of Arts in Geography with Teacher Licensure in Comprehensive Social Studies

The Department of Earth, Environmental, and Geographical Sciences , in collaboration with the College of Education and the Department of Middle, Secondary, and K-12 Education, offers a program of geography and professional education courses to prepare students for a North Carolina (9-12) teaching license. Students interested in teaching social studies in the public schools should declare this interest during the first

semester of the Sophomore year to obtain appropriate advising and prepare for formal admission to the Minor in Secondary Education. Students should contact the advisor for teacher education within the Department, as well as the Office of Teacher Education Advising and Licensure (TEAL) in the College of Education, for information about the requirements for admission to teacher education, coursework, and the culminating student teaching experience. Additional information about teacher education may be found in the College of Education section of this Catalog.

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- Minimum GPA: 2.0
- Transferable Credit Hours: 24

Currently Enrolled Students

- Declaration of Major: Major can be declared on a rolling basis throughout the year. Students may declare the major at any time before graduation.

Degree Requirements

Students seeking teacher licensure in Comprehensive Social Studies must complete the requirements for the B.A. in Geography including 17 credit hours in required coursework and 19 elective credit hours.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirement.

Major Courses (17 credit hours)

GEOG 1103 - Spatial Thinking (4)

GEOG 1105 - Introduction to Human Geography (3)

GEOG 1501 - Global Social Science: Global Geography (3)

GEOG 1511 - Local Social Science: Urban and Regional Planning (3)

GEOG 2110 - Introduction to Geographic Research (3)

GEOG 4600 - Geography Professional Development Seminar (3)

Comprehensive Social Studies Courses (18 credit hours)

HIST 1502 - Global Arts/Humanities: Issues in Global History (3)

HIST 1575 - American Democracy's Past and Promise (3)

HIST 2000 - Topics in U.S. History (3) or above (one Topics Course: Africa, Asia, or Latin America)

POLS 1501 - Global Social Science: Introduction to Comparative Politics (3)

or POLS 1150 - International Politics (3)

POLS 1575 - American Politics (3)

Restricted Elective Courses (19 credit hours)

Except for required courses, the B.A. degree requires 19 hours of elective coursework numbered 2000 or above, with at least six hours in coursework at the 4000-level. Up to three elective courses may be selected from courses with the ESCI, GEOL, and METR prefix. Students

are encouraged to take additional coursework in related disciplines or to select a second major.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Progression Requirements

In addition to requirements set by the College of Education, students must have earned a GPA of 2.5 or above in all social studies courses for admission to student teaching and ultimately for licensure.

Bachelor of Science in Geography

Admission Requirements

Freshmen and Transfers

- See University Admission Requirements
- Minimum GPA: 2.0

Degree Requirements

A Major in Geography leading to a B. S. degree consists of 57 credit hours of Geography and Earth Sciences courses.

Students pursuing a B. S. in Geography should contact their advisors to develop a program of study that matches their career objectives. Students should work closely with their academic advisors to ensure that their program of study is tailored to their career goals.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirement.

Major Courses (30 credit hours)

- ESCI 1101 - Earth Science-Geography (3)
ESCI 1101L - Earth Science-Geography Lab (1)
GEOG 1103 - Spatial Thinking (4)
GEOG 1105 - Introduction to Human Geography (3)
GEOG 1501 - Global Social Science: Global Geography (3)
GEOG 1511 - Local Social Science: Urban and Regional Planning (3)
GEOG 2110 - Introduction to Geographic Research (3)
GEOG 3120 - Fundamentals of Geographic Information Systems (4)
GEOG 4600 - Geography Professional Development Seminar (3)
STAT 1220 - Elements of Statistics I (BUSN) (3)
or STAT 1222 - Introduction to Statistics (3)

Planning (3 credit hours)

Choose one course from the following:

- GEOG 2111 - Social Inequality and Planning (3)
GEOG 3200 - Land Use Planning (3)
GEOG 3210 - Regional Planning (3)
GEOG 3215 - Environmental Planning (3)

- GEOG 4200 - Environmental Justice, Injustice, and Planning (3)
GEOG 4209 - Small Town and Community Planning (3)
GEOG 4210 - Urban Planning Methods (3)

Human/Environment Interaction (3 credit hours)

Choose one course from the following:

- ESCI 3101 - Global Environmental Change (3)
ESCI 3170 - Environmental Quality Management (3)
ESCI 4146 - The Business of Ecological Restoration (3)
ESCI 4190 - Contemporary Environmental Issues (3)
GEOG 2140 - Geography of North Carolina (3)
GEOG 2160 - The South (3)
GEOG 3102 - Plant Geography (3)
GEOG 3180 - Hazards and Disasters (3)
GEOG 3250 - World Food Problems (3)
GEOG 3260 - Medical Geography (3)
GEOG 3280 - Sustainability Field Study in the Peruvian Amazon (3)
GEOG 4215 - Urban Ecology (3)

GIS and T (6-8 credit hours)

Choose two courses from the following:

- ESCI 4170 - Fundamentals of Remote Sensing (4)
ESCI 4180 - Digital Image Processing in Remote Sensing (4)
GEOG 2102 - Introduction to Cartographic Design (4)
GEOG 4103 - Computer Programming for GIS Applications (3)
GEOG 4131 - Environmental Modeling with GIS (4)
GEOG 4132 - Spatial Modeling for Social and Economical Applications (3)
GEOG 4140 - Geographic Information Techniques for Community Planning (4)
GEOG 4150 - Spatial Database Development with GPS and GIS (3)
GEOG 4155 - Retail Location (3)
GEOG 4180 - Web GIS (3)
GEOG 4340 - Urban Analytics (3)

Urban, Social, and Economic (6 credit hours)

Choose two courses from the following:

- GEOG 2105 - Introduction to Economic Geography (3)
GEOG 2165 - Patterns of World Urbanization (3)
GEOG 2200 - Introduction to Urban Studies (3)
GEOG 3100 - Geography of Cities (3)
GEOG 3105 - Geography of the Global Economy (3)
GEOG 3106 - Sustainable Cities (3)
GEOG 3115 - Urban Transportation Problems (3)
GEOG 3205 - City Regions and Systems (3)
GEOG 3220 - Renewable Energy and Regional Energy Markets (3)
GEOG 4108 - Sport, Place, and Development (3)
GEOG 4160 - The Geography of Transportation Systems (3)
GEOG 4220 - Housing Policy and Planning (3)
GEOG 4250 - Food, Migration, and Place (3)
GEOG 4255 - Applied Population Analysis (3)
GEOG 4305 - Urban Field and Research Methods (3)
GEOG 4310 - Urban Social Geography (3)
GEOG 4315 - The Urban Form (3)

Major Electives (9 credit hours)

Select 9 additional credit hours from the Planning, GIS and T, or Urban, Social and Economic focus areas.

Note: Only 6 credits of 3xxx and 4xxx Major electives can be double

counted between EVSI, EVST, and GEOG degrees.

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Minor in Geography

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

The Minor in Geography may be tailored to support a number of majors, such as architecture, business, computer science, and political science. A Minor in Geography consists of 20 credit hours.

Required Courses (11 credit hours)

- GEOG 1501 - Global Social Science: Global Geography (3)
or GEOG 1105 - Introduction to Human Geography (3)
GEOG 1103 - Spatial Thinking (4)
ESCI 1101 - Earth Science-Geography (3)
ESCI 1101L - Earth Science-Geography Lab (1)

Elective Courses (9 credit hours)

Select 9 credit hours from any 2xxx, 3xxx, or 4xxx GEOG course. Environmental Studies students cannot double count major requirements or electives as the 9 elective credits in this minor.

GEOG 2xxx Any 2000 level GEOG course
GEOG 3xxx Any 3000 level GEOG course
GEOG 4xxx Any 4000 level GEOG course

Total = 20 Credit Hours

Minor in Urban Studies

For details on the Minor in Urban Studies, please refer to the Urban Studies heading later in the College of Humanities & Earth and Social Sciences section of this *Catalog*.

Early Entry: Master of Arts in Geography

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA

- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Note: Standardized test scores (e.g., GRE, GMAT, MAT) are not required.

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 9 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 9 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Cooperative Education Program

Students in the Geography and Earth Sciences programs may obtain practical work experience while pursuing their degrees by participating in the Cooperative Education program. The work experience is approved by the department and is closely related to the student's field of study. The Cooperative Education Program allows qualified students either to alternate semesters of academic study with semesters of full-time work experience or to combine part-time academic study and part-time work during the same semester. Students who are in good standing with the University, have a minimum overall GPA of 2.5, and have completed 30 credit hours are eligible to apply. Transfer students are required to complete 12 credit hours at the University prior to application. Students interested in learning more about participating in this program should contact the Department of Earth, Environmental, and Geographical Sciences or the University Career Center.

Honors Program

For details about the Honors Program in Earth Sciences, Geography, Geology, or Metrology, visit the program page.

Geology

The Geology program provides students with a framework of geologic fundamentals integrated with applied chemistry, physics, biology, and mathematics. Elective courses allow students to tailor the degree toward specific interests or skills, and internships and independent research opportunities further enhance students' preparedness. Geology

graduates find employment in environmental consulting, drilling or mining, and the public sector as well as pursue graduate degrees. For details, see the *Graduate Catalog* regarding the M.S. in Earth Sciences program.

Bachelor of Science in Geology

All program-level Admissions and Progression Requirements are in addition to the University of North Carolina at Charlotte Admission Requirements.

Degree Requirements

A Major in Geology leading to a B.S. degree consists of a minimum of 49 credit hours in geology and earth sciences and 18 credit hours of extra-departmental courses in chemistry, physics, and mathematics.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirement.

Major Courses (28 credit hours)

- ESCI 1101 - Earth Sciences – Geography (3)
- ESCI 1101L - Earth Sciences – Geography Lab (1)
- GEOL 1200 - Physical Geology (3)
- GEOL 1200L - Physical Geology Lab (1)
- GEOL 1210 - Earth History (3)
- GEOL 1210L - Earth History Laboratory (1)
- GEOL 3115 - Mineralogy (4)
- GEOL 3124 - Sedimentology (4)
- GEOL 3130 - Structural Geology (4)
- GEOL 4100 - Igneous and Metamorphic Petrology (4)

Related Courses (18 credit hours)

- CHEM 1251 - General Chemistry I (3)
- CHEM 1251L - General Chemistry I Lab (1)
- PHYS 1101 - Introductory Physics I (3)
 - or PHYS 2101 - Physics for Science and Engineering I (3)
- PHYS 1101L - Introductory Physics I Lab (1)
 - or PHYS 2101L - Physics for Science and Engineering I Laboratory

(1)
MATH 1241 - Calculus I (3)

Second Math

Choose one of the following:
MATH 1242 - Calculus II (3)
or STAT 1222 - Introduction to Statistics (3)

Second Science and Lab

CHEM 1252 - Principles of Chemistry (3)
CHEM 1252L Principles of Chemistry Lab (1)
or
PHYS 1102 - Introductory Physics II (3)
PHYS 1102L - Introductory Physics II Lab (1)
or
PHYS 2102 - Physics for Science and Engineering II (3)
PHYS 2102L - Physics for Science and Engineering II Laboratory (3)

GEOL Electives (12 credit hours)

Select 12 credit from this core group of elective courses:

- ESCI 4145 - Groundwater (4)
- ESCI 4210 - Soil Science (4)
- GEOL 3140 - Paleontology (3)
- GEOL 3190 - Environmental Geology (3)
- GEOL 3190L - Environmental Geology Laboratory (1)
- GEOL 4105 - Geomorphology (4)
- GEOL 4110 - Stratigraphy (4)
- GEOL 4115 - Applied Geophysics (4)
- GEOL 4135 - Tectonics (4)
- GEOL 4140 - Coastal Geology (3)
- GEOL 4145 - Hydrogeology (4)
- GEOL 4165 - Aqueous and Environmental Geochemistry (3)
- GEOL 4175 - Geochemistry (3)

Restricted Elective Courses (9 credit hours)

Select from the following:

- GEOL 3xxx - Geology Electives (3)
- GEOL 4xxx - Geology Electives (3)
- ESCI 3101 - Global Environmental Change (3)
- ESCI 3105 - Oceanography (3)
- ESCI 3310 - National Parks: The Science Behind the Scenery (3)
- ESCI 3205 - Water Resources (3)
- ESCI 4122 - Statistics and Data Analysis in Earth Sciences (3)
- ESCI 4140 - Hydrologic Processes (4)
- ESCI 4155 - Fluvial Processes (4)
- ESCI 4160 - Contaminant Transport (3)
- ESCI 4170 - Fundamentals of Remote Sensing (4)
- ESCI 4180 - Digital Image Processing in Remote Sensing (4)
- ESCI 4201 - Hydroclimatology (3)
- ESCI 4222 - Watershed Science (3)
- GEOG 3120 - Fundamentals of Geographic Information Systems (4)

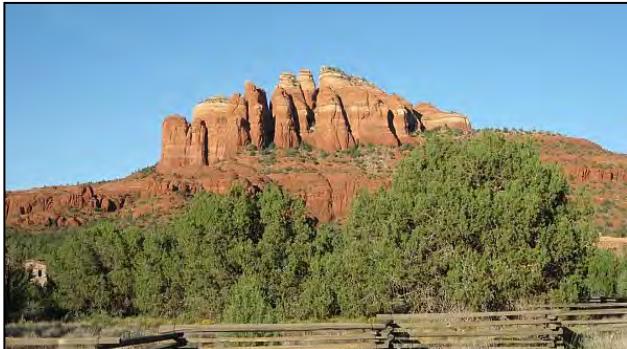

One of the following may be counted as a Restricted Elective for the Geology Major:

- GEOG 4131 - Tectonics (4)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Minor in Geology

A minor in Geology consists of 20 semester hours in Geology courses and approved Earth science courses. The minor can be tailored to support a number of majors, such as engineering, biology, chemistry, or physics. At most, eight (8) credit hours may be double-counted toward a major in Earth and Environmental Sciences, Environmental Studies, Geography, or Meteorology.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

Required Courses (8 hours)

GEOL 1200 - Physical Geology (3)

GEOL 1200L - Physical Geology Lab (1)

GEOL 1210 - Earth History (3)

GEOL 1210L - Earth History Laboratory (1)

Elective Courses (Select 12 hours)

Students may choose any 3000 or 4000-level GEOL course or from the approved list of ESCI courses.

GEOL 3xxx – Any 3000-level GEOL course

GEOL 4xxx – Any 4000-level GEOL course

ESCI 3105 - Oceanography (3)

ESCI 3310 - National Parks : The Science Behind the Scenery (3)

ESCI 4210 - Soil Science (3)

Total = 20 Credit Hours

Meteorology

The Meteorology program provides students with an understanding of the atmosphere and the development of methods for applying that knowledge to practical problems. Meteorology is an applied science that combines the fields of physics, chemistry, mathematics, and computer science into an application of understanding the atmosphere. The program exposes students to all of these disciplines, while in parallel applying these science concepts to mesoscale, synoptic, and global scale phenomena.

Students graduate with the skills and experience they need for professional employment within industry, private consulting firms,

television, government, and the armed forces or for further study toward graduate degrees. Meteorology also has significant ties to environmental, agricultural, oceanic, and hydrological sciences and, being in an interdisciplinary Geography and Earth Sciences department, allows students to explore these classes and possible minors.

Bachelor of Science in Meteorology

The primary goal of the Bachelor of Science in Meteorology is to advance our understanding of the atmospheric processes that influence weather and climate. This pursuit inherently involves an interdisciplinary approach through the combination of advanced coursework in mathematics, chemistry, physics, statistics, computer science, geology, earth sciences, and meteorology with emphasis on recent basic and applied research. The program is designed to provide the next generation of meteorologists with sufficient knowledge and skills to: (1) effectively monitor and analyze the atmospheric state across a spectrum of temporal and geospatial scales; (2) provide accurate and timely forecasts of ordinary and severe weather; and (3) address relevant contemporary challenges such as global and region climate change, human interactions with the natural environment, and the development of resilient and sustainable communities. To this end, the core meteorological curriculum is composed of courses that collectively provide a broad treatment of multi-scale atmospheric processes, including atmospheric thermodynamics and physics as well as synoptic, dynamic, and mesoscale meteorology.

As needed to complete the credit hours required for graduation.

Degree Total = 120 Credit Hours

Urban Studies

Urban Studies is an interdisciplinary program that prepares students to better understand and be able to effectively address, as both professionals and citizens, the many challenges presented by the rapid pace of urban change in the 21st century.

Minor in Urban Studies

The Minor in Urban Studies provides an excellent foundation for students interested in pursuing careers such as architecture, land-use or community planning, law, public policy and administration, education, law enforcement, community organizing, transportation, housing and commercial development, real estate, political service, social work, journalism and research.

Coursework in urban history, sociology, and anthropology introduces students to theory development and evaluation and builds skills of critical thinking and analysis. Coursework in architecture, political science, and geography additionally emphasizes the ways in which urban practitioners identify and work to solve urban problems and challenges.

Admission Requirements

Current UNC Charlotte Undergraduate Students
See University Admission Requirements

Minor Requirements

A Minor in Urban Studies requires completion of 18 credit hours. A Minor in Urban Studies requires completion of 18 credit hours. All students in the Minor are required to take *Introduction to Urban Studies* as a foundational course:

Required Courses (3 credit hours)

All students are required to take *Introduction to Urban Studies*.
GEOG 2200 - Introduction to Urban Studies (3)
or URBS 2200 - Introduction to Urban Studies (3)

Elective Courses (15 credit hours)

The remaining 15 credit hours may be selected from the following course options:

ANTH 2125 - Urban Anthropology (3)
ARCH 4201 - Architectural History I: Prehistory-1750 (3)
ECON 4150 - Urban and Regional Economics (3)
GEOG 1110 - Introduction to Urban and Regional Planning (3)
GEOG 2111 - Social Inequality and Planning (3) (SL)
GEOG 2165 - Patterns of World Urbanization (3)
GEOG 3100 - Geography of Cities (3)
GEOG 3106 - Sustainable Cities (3)
GEOG 3115 - Urban Transportation Problems (3)
GEOG 3200 - Land Use Planning (3)
GEOG 3205 - City Regions and Systems (3)
GEOG 3210 - Regional Planning (3)
GEOG 4200 - Environmental Justice, Injustice, and Planning (3)
GEOG 4209 - Small Town and Community Planning (3)
GEOG 4210 - Urban Planning Methods (3)
GEOG 4215 - Urban Ecology (3)
GEOG 4220 - Housing Policy and Planning (3)
GEOG 4310 - Urban Social Geography (3)
GEOG 4315 - The Urban Form (3)
GEOG 4340 - Urban Analytics (3)
HIST 3281 - American Cities (3)
POLS 3121 - Urban Politics and Policy (3)
or GEOG 3110 - Urban Political Geography (3)
SOCY 3325 - Community and Identity (3) (SL)
SOCY 4125 - Urban Sociology (3)
URBS 3050 - Topics in Urban Studies (3)

Additional Course Options

With prior permission from the Urban Studies Director, students may also select from:

URBS 3801 - Independent Study in Urban Studies (3)
URBS 4401 - Internship in Urban Studies (3)

Students may also count up to 9 credit hours of other courses that have a significant urban focus with the prior permission of the Director of the Minor in Urban Studies in the Department of Earth, Environmental, and Geographical Sciences.

Of their total 18 hours, students are expected to take no more than 6 credit hours of coursework in any one disciplinary area.

Minor Total = 18 Credit Hours

Other Programs

Honors Program in Geography, Geology, Earth and Environmental Sciences, Environmental Studies, or Meteorology

To graduate with Honors in Geography, Geology, Earth and Environmental Sciences, Environmental Studies, or Meteorology, students must meet the following requirements:

- 1) Satisfy all the requirements for the degree sought and for the major in Geography, Geology, Earth and Environmental Sciences, Environmental Studies, or Meteorology.
- 2) Maintain at least a 3.2 GPA overall and a 3.2 GPA in all geography, geology, earth sciences, and meteorology courses taken at UNC Charlotte to satisfy major requirements.
- 3) As part of the final 15 hours of coursework, students must: (a) register for at least 3 hours of the Honors section of GEOG 4800, GEOL 4800, ESCI 4800, or METR 4800 (Individual Study in Geography/Geology/Earth Sciences/Meteorology), and (b) complete a research project and an Honors thesis to be submitted to the Department Honors Committee composed of department faculty that certifies that the project merits Honors distinction. Candidates must earn a grade of A on the thesis research (Honors section of 4800) and present the results in a public forum. To be certified as Honors quality, projects must contain original research and demonstrate a high degree of scholarship.

Progression Requirements

Students seeking the Honors designation must notify the Department Honors Committee of their proposed research plan during the semester prior to undertaking the research project and must submit an Application for Admission to Candidacy to the Honors Council. Both the Department Honors Committee and the Honors Council must approve the proposed research plan before the student can be admitted to candidacy as an Honors student.

Special Policies or Requirements

Faculty members who serve on the Department Honors Committee will not evaluate projects completed under their supervision. Instead, another faculty member will be asked to evaluate the project in question along with the other members of the Department Honors Committee. Should the Department Honors Committee agree to confer Honors on the student's project, it will certify this to the Department Chair and to the Honors Council. Should the Department Honors Committee decide that the project does not warrant Honors, students will still receive whatever grade the faculty member supervising the project assigns.

The honors notation will appear on a student's official transcript.

Cooperative Education Program

Students in the Geography and Earth Sciences programs may obtain practical work experience while pursuing their degrees by participating in the Cooperative Education program. The work experience is approved by the department and is closely related to the student's field of study. The Cooperative Education Program allows qualified students either to alternate semesters of academic study with semesters of full-time work experience or to combine part-time academic study and part-time work during the same semester. Students who are in good standing with the University, have a minimum overall GPA of 2.5, and have completed 30 credit hours are eligible to apply. Transfer students are required to complete 12 credit hours at the University prior to application. Students interested in learning more about participating in this program should contact the Department of Earth, Environmental, and Geographical Sciences or the University Career Center.

Department of Global Studies

globalstudies.charlotte.edu

Undergraduate Programs

- **B.A. in Global Studies**
 - Development and Sustainability
 - Global Cultural Studies
 - Holocaust, Genocide, and Human Rights
 - Peace, Conflict, and Identity
 - Honors Program
- **Minor in Holocaust, Genocide, and Human Rights Studies**
- **Minor in Global Studies**

The Department of Global Studies brings together perspectives from the social sciences and the humanities to study cultural, economic, political and geographic issues from around the world. It provides a truly interdisciplinary worldview to address the most pressing global challenges of the 21st century. An undergraduate major (B.A.) in Global Studies, as well as minors in Global Studies and Holocaust, Genocide, and Human Rights are offered. The Global Studies major encourages students to concentrate on critical issues of a global nature – peace and conflict, development and sustainability, comparative genocide and human rights. Advanced foreign language competency is also emphasized to enhance a student's research and communication. Finally, students are encouraged to participate in an international experience which can take the form of experiential learning (e.g., an internship abroad), an exchange program at a foreign university, or a study abroad experience. These experiences are intended to broaden students' appreciation of the distinctiveness of other environments and cultures while augmenting their preparation for future study or participation in an increasingly globalized workforce.

Bachelor of Arts in Global Studies with Concentration in Development and Sustainability

The Global Studies major draws upon the faculty and courses of the Department of Global Studies, as well as a number of other departments,

and is structured to give students skills and knowledge to understand and analyze societies outside the United States in the context of the rapidly changing and increasingly interdependent world. By integrating courses on world affairs from a variety of disciplines, the program allows students interested in studying other cultures and societies to focus attention across traditional disciplinary boundaries. Global Studies is of particular value to those with career objectives in government, law, journalism, teaching, business, trade, or military service. It also serves those who will seek employment with international organizations such as the United Nations or with non-governmental agencies with an international or cross-cultural focus.

Global Studies graduates work for employers such as local, state, and federal governments; international organizations; private sector businesses; nonprofit organizations; colleges and universities; elementary and secondary schools; think tanks; the military; newspapers and magazines; law firms; financial institutions; public relations firms; and the travel industry. They also find careers as foreign service officers, policy analysts, international trade specialists, diplomats, United Nations staffers, lobbyists, intelligence specialists, translators/interpreters, US Customs officers, cultural liaisons, journalists, business managers, government or business consultants, ESL administrators/instructors, professors, teachers, travel/tourism promoters, military officers, and missionaries.

Admission Requirements

Freshmen

- See University Admission Requirements
- *Minimum GPA:* 2.0. Students with GPA below 2.0 should consult with departmental advisor.

Transfers

- See University Admission Requirements
- *Minimum GPA:* 2.0
- *Transferable Credit Hours:* 24

Currently Enrolled Students

- *Declaration of Major:* Change of Major form accepted year-round; orientation/advising session required after declaration.

Degree Requirements

A Major in Global Studies requires a minimum of 30 credit hours in courses approved for Global Studies credit. Majors must also complete related work in foreign language and an international experience as stipulated in the core curriculum. Each student, in consultation with an advisor, will prepare a Plan of Study for completion of these requirements upon declaration of the major.

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

The Department of Global Studies offers a Global Social Science (INTL 1501) general education course, which is open to all students within and outside the department. INTL 1501 is required of all Global Studies Majors and Minors.

Foreign Language Courses

Students are expected to demonstrate competency in a foreign language appropriate to their selected concentration by completing the equivalent of two courses at the 3000-level or above or demonstrating proficiency at the 4000-level. Language courses at the 3000-level offered in English do not apply to the foreign language requirement.

Core Course (6 credit hours)

- INTL 1501 - Global Social Science: Globalization and Interdependence (3)
INTL 2112 – Problems in Globalization (3)

Concentration Courses (12 credit hours)

Foundation Concentration Course (3 credit hours)

- INTL 2121 - Introduction to Development Studies (3)

Elective Concentration Courses (9 credit hours)

Select three of the following, two of which must be INTL courses:

- AFRS 3155 - Health and Healing in Africa (3)
or HIST 3155 - Health and Healing in Africa (3)
AFRS 3190 - Political Economy of the Caribbean (3)
or LTAM 3190 - Political Economy of the Caribbean (3)
AFRS 3265 - African Economic Development (3)
AFRS 4630 - Environmental and Public Health in Africa (3)
ANTH 3222 - Culture, Health, and Disease (3)
ECON 2101 - Principles of Economics - Macro (3)
GEOG 2165 - Patterns of World Urbanization (3)
GEOG 3105 - Geography of the Global Economy (3)
GEOG 3250 - World Food Problems (3)
HLTH 4280 - Global Health Issues (3)
HONR 1702 - Economic Welfare and International Communities (3)
or LBST 2102 - Global and Intercultural Connections (3) (*equivalent Honors Section*)
INTL 3000 - Topics in International Studies (1 to 3) (*if designated for concentration*)
INTL 3001 - Topics In Development and Sustainability Studies (3)
INTL 3114 - Cultures of the Caribbean (3)
INTL 3118 - Thinking Globally, Reading Deeply: Earth Matters (3)
INTL 3125 - Food and Globalization (3)
or ANTH 3125 - Food and Globalization (3)
INTL 3127 - Global Media (3)
INTL 3135 - Origins of Globalization (3)
or ANTH 3135 - Origins of Globalization (3)
INTL 3151 - International Political Economy (3)
or POLS 3151 - International Political Economy (3)
INTL 3161 - Migration and Borders in a Global World (3)
or GEOG 3161 - Migration and Borders in a Global World (3)
INTL 3138 - Environment and Societies (3)
INTL 3139 - Global Environmental Justice (3)
LTAM 3154 - Political Economy of Latin America (3)
or POLS 3155 - Latin American Political Economy (3)

Restricted Elective Courses (9 credit hours)

Select three elective courses outside of the above selected concentration.

- INTL xxxx - International Studies Elective (3)
INTL xxxx - International Studies Elective (3)
INTL xxxx - International Studies Elective (3)

Seminar Course (3 credit hours)

- INTL 4601 - International Studies Seminar (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

International Experience

Students are required to complete an international experience related to the area studies concentration they have selected. This may be fulfilled through participation in a formal education abroad program or through foreign-based work, service, or internship activities. This experience must be specified and approved by an advisor. Academic credit hours earned may be applied to the requirements of the major. A U.S.-based experience of an international nature or prior international experience may be considered in certain circumstances, subject to the approval of an advisor.

Second Majors

Students pursuing a second major may apply up to 9 credit hours from courses in that major toward requirements for the major in Global Studies. Exceptions may be approved by an advisor upon consultation with the other program in question. Without exception, courses that are used to fulfill the foreign language requirement for Global Studies cannot be used to fulfill other requirements for the major.

Degree Total = 120 Credit Hours

Progression Requirements

A GPA of 2.0 is required.

Bachelor of Arts in Global Studies with Concentration in Global Cultural Studies

The Global Studies major draws upon the faculty and courses of the Department of Global Studies, as well as a number of other departments, and is structured to give students skills and knowledge to understand and analyze societies outside the United States in the context of the rapidly changing and increasingly interdependent world. By integrating courses on world affairs from a variety of disciplines, the program allows students interested in studying other cultures and societies to focus attention across traditional disciplinary boundaries. Global Studies is of particular value to those with career objectives in government, law, journalism, teaching, business, trade, or military service. It also serves those who will seek employment with international organizations such as the United Nations or with non-governmental agencies with an international or cross-cultural focus.

Global Studies graduates work for employers such as local, state, and federal governments; international organizations; private sector businesses; nonprofit organizations; colleges and universities; elementary and secondary schools; think tanks; the military; newspapers and magazines; law firms; financial institutions; public relations firms; and the travel industry. They also find careers as foreign service officers, policy analysts, international trade specialists, diplomats, United Nations staffers, lobbyists, intelligence specialists, translators/interpreters, US Customs officers, cultural liaisons, journalists, business managers, government or business consultants, ESL administrators/instructors,

professors, teachers, travel/tourism promoters, military officers, and missionaries.

All program-level Admissions and Progression Requirements are in addition to the University of North Carolina at Charlotte Admission Requirements.

Progression Requirements

A GPA of 2.0 is required.

Honors Program in Global Studies

The Honors Program in Global Studies provides select Global Studies majors with the opportunity to deepen their understanding of the field. Upon successful completion of the program will graduate with an honors notation on their official transcript. Students admitted to the program will conduct intensive research on a topic relevant to Global Studies and their concentration within the major, produce a thesis paper that demonstrates a high level of academic rigor and creative thinking, and present and defend it to a committee of Global Studies faculty for final evaluation.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Global Studies majors are eligible to apply for departmental honors if they meet the following requirements:

- Minimum 3.5 GPA in Global Studies courses
- Minimum overall GPA of 3.25
- Completed the International Experience requirement

Admission to the Honors Program is by permission of the Department of Global Studies. Eligible students should submit a letter of intent and one-page research proposal to the Director of Undergraduate Studies by Week 6 of the semester in which they are taking the Senior Seminar. The Director of Undergraduate Studies will review applications and determine admission to the Honors Program.

Course Requirements

In order to graduate with departmental honors, students must:

- Complete the course requirements for the Global Studies major
- Complete INTL 4601 by producing a detailed research proposal and literature review; this will serve as a prerequisite for advancement to INTL 4701
- Complete INTL 4701 by writing an original research/thesis paper focused on their major concentration and successfully defending the thesis before a three-person Honors Committee of Global Studies faculty

The Honors project should produce a final paper of at least 20-25 pages and address a well-defined problem or research question with the goal of developing greater understanding of a theoretical or practical global issue.

Students must formally apply for Honors Candidacy through the Honors College by Reading Day the semester prior to graduation.

Progression Requirements

In order to graduate with Honors in Global Studies, students must:

- Maintain a minimum GPA of 3.5 in the Global Studies major
- Maintain a minimum GPA of 3.25 overall
- Achieve a grade of A in INTL 4601
- Pass the thesis defense and achieve a grade of A in INTL 4701

Minor in Holocaust, Genocide, and Human Rights Studies

The interdisciplinary Minor in Holocaust, Genocide, and Human Rights Studies (HGHR) consists of a minimum of 18 credit hours, including a 3-hour introductory course and 15 hours divided among subjects in Holocaust Studies and subjects in Genocide and Human Rights Studies. Students must take at least two courses from each subject area.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

Introductory Course (3 credit hours)

HGHR 2100 - Introduction to Holocaust, Genocide, and Human Rights Studies (3)

Holocaust Studies Courses (minimum 6 credit hours)

Students may choose from the following courses to satisfy the requirement of subjects in this area. An advisor for the Minor in HGHR may give permission for other courses to count toward fulfilling this requirement.

HGHR 3050 - Topics in Holocaust, Genocide, and Human Rights (3)
(appropriate sections)

HGHR 3110 - Resistance During the Holocaust (3)

GERM 3150 - The Holocaust Through German Literature and Film (3)

HIST 3147 - The Third Reich (3)

HIST 3148 - The Holocaust (3)

Genocide and Human Rights Studies Courses (minimum 6 credit hours)

Select courses from the following to satisfy requirements of subjects in this area. An advisor for the Minor in HGHR may give permission for other courses to count toward fulfilling this requirement.

HGHR 3050 - Topics in Holocaust, Genocide, and Human Rights (3)
(appropriate sections)

HGHR 3220 - The U.S.-Vietnam War and the Global Upheaval of the 1960s-1970s (3)

INTL 3000 - Topics in International Studies (3) (appropriate sections)

INTL 3137 - International Human Rights (3)

or POLS 3137 International Human Rights (3)

INTL 3171 - Comparative Genocide (3)

Foundation Course (3 credit hours)

INTL 1501 - Global Social Science: Globalization and Interdependence (3)

Foreign Language Courses (6-8 credit hours)

Select 6-8 credit hours of foreign language courses at the 2000-level, typically the 2201 and 2202 courses. If 2201 and 2202 courses are not available, 1201 and 1202 courses in a second appropriate language may be considered, if approved by a departmental advisor.

Elective Courses (15 credit hours)

Select from the following:

INTL 2100 - Introduction to Holocaust, Genocide, and Human Rights Studies (3)
or HGHR 2100 - Introduction to Holocaust, Genocide, and Human Rights Studies (3)

INTL 2121 - Introduction to Development Studies (3)

INTL 2131 - Introduction to Peace and Conflict Studies (3)
or ANTH 2131 - Peace, Conflict, and Identity (3)

INTL 2201 - Introduction to Asian Studies (3)

INTL 2301 - Introduction to European Studies (3)

INTL 3000 - Topics in International Studies (3)

INTL 3111 Politics and Culture in Literature (3)

INTL 3112 - Globalization and Culture (3)
or ANTH 3112 Globalization and Culture (3)

INTL 3115 - Globalization and Digital Media (3)
or COMM 3126 - Globalization and Digital Media (3)

INTL 3116 - Cultures and Conflicts (3)
or ANTH 3116 - Cultures and Conflicts (3)

INTL 3117 - Narratives and Conflicts (3)
or ANTH 3117 - Narratives and Conflicts (3)

INTL 3125 - Food and Globalization (3)
or ANTH 3125 - Food and Globalization (3)

INTL 3127 - Global Media (3)

INTL 3131 - Diplomacy in a Changing World (3)
or POLS 3159 - Diplomacy in a Changing World (3)

INTL 3135 - Origins of Globalization (3)
ANTH 3135 - Origins of Globalization (3)

INTL 3136 - Globalization and Resistance (3)
or ANTH 3136 - Globalization and Resistance (3)
INTL 3137 - International Human Rights (3)
or POLS 3137 - International Human Rights (3)
INTL 3151 - International Political Economy (3)
or POLS 3151 - International Political Economy (3)
INTL 3161 - Migration and Borders in a Global World (3)
GEOG 3161 - Migration and Borders in a Global World (3)

INTL 3162 - Europe and the World (3)
or GEOG 3162 - Europe and the World (3)

INTL 3171 - Comparative Genocide (3)
or HIST 3171 - Comparative Genocide (3)
INTL 3172 - Political Repression and Rebellion in the Contemporary World (3)
or HIST 3172 - Political Repression and Rebellion in the Contemporary World (3)

Note: Lists are subject to additions and deletions. Other courses may be considered, subject to approval of an advisor.

Minor Total = 18 Credit Hours

Education Abroad

Although not required for the minor, education abroad is encouraged and recommended. The Office of International Programs offers a range of programs of varying duration. Academic credit hours earned may be applied to the requirements of the minor, subject to approval by an advisor.

Progression Requirements

A GPA of 2.0 is required.

Department of History

history.charlotte.edu

Undergraduate Programs

- **B.A. in History**
 - History, Comprehensive Secondary Social Studies Teacher Licensure
 - Honors Program
- **Minor in History**
- **Early Entry: M.A. in History**

History is the broadest and most integrative of all disciplines concerned with human beings and society. Today's historians use the research tools of the social sciences to understand and explain major events and changes in human experience over time. Yet history has always been considered one of the humanities, and it remains so because historians are concerned with issues of value and meaning, with the significance that historical events had for the lives of individuals and groups. Students of history gain an understanding of people, groups, and society and a sensitivity both to detailed research and the "big picture." Through the study of history, students can become better prepared for life in a rapidly changing world and a rapidly evolving economy.

Professions like law and medicine have always considered history an ideal undergraduate major because it emphasizes the essential intellectual skills: critical thinking, research, writing, and speaking. For these reasons history also remains a sound preparation for almost any undergraduate and a good choice for the typical student in America, who graduates with a basic education rather than specific job training. Whether students plan to teach, work in archives or museums, or pursue a career in government, law, international organizations, or business, the skills learned as a historian will prove invaluable. The Department of History offers majors the premier track in Comprehensive Social Studies Teacher Licensure. Through the master's program, history majors can pursue their interests at the graduate level. (See the *UNC Charlotte Graduate Catalog*.)

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

Study Abroad

Arrangements can be made for study abroad in Asia, Africa, Canada, Europe, Latin America, or the Middle East.

Bachelor of Arts in History

A Major in History leading to the B.A. degree requires a minimum of 30 credit hours of history courses.

Admission Requirements

Freshmen and Transfers

See University Admission Requirements

- *Minimum GPA:* 2.0
- *Declaration of Major:* Advising session required when declaring major
- Transfer students are required to take at least 15 credit hours of History major coursework at UNC Charlotte

Currently Enrolled Students

- See University Admission Requirements
- To declare the History major, please visit the Department of History Undergraduate Advising.
- Overall GPA must be 2.0 in order to change majors. An advisor will contact you for a meeting.

Degree Requirements

General Education Courses (31-32 credit hours)

For details on required courses, refer to the General Education Program. Total hours to satisfy General Education Requirements may vary as some general education requirements may be double-counted in the major with departmental approval. Please see your advisor for information.

The History Department offers the Issues in Global History (HIST 1502) and the Issues in United States History (HIST 1575) general education courses. These are open to all students within and outside the department. Majors may apply 6 credits from general education courses to their degree requirements.

Foreign Language Requirement (0-8 credit hours)

For details on required courses, refer to the College of Humanities & Earth and Social Sciences Foreign Language Requirement.

Introductory Courses (6 credit hours)

HIST 1502 - Global Arts/Humanities: Issues in Global History (3)
HIST 1575 - American Democracy's Past and Promise (3)

History Methodology Sequence Courses (9 credit hours)

The courses in this sequence cannot be taken at the same time. A grade of C or above in HIST 3600 is required to progress to HIST 400x. A grade of C or above in HIST 400x is required to progress to HIST 4600.

History Skills Seminar (3 credit hours)

HIST 3600 - History Skills Seminar (3)

Historiography Seminar (3 credit hours)

Select one of the following:

HIST 4000 - Topics in American Historiography (3)
HIST 4001 - Topics in European Historiography (3)

HIST 4002 - Topics in Non-Western Historiography (3)
HIST 4003 - Topics in Transnational Historiography (3)
HIST 4797 - Topics in Honors Historiography and Methodology (3)
(permission required)

Senior Seminar (3 credit hours)

Select one of the following:

HIST 4600 - Senior Research Seminar (3)
HIST 4799 - Honors Research and Thesis (3)

Restricted Elective Courses (15 credit hours)

History 1000/2000/3000 Level Course (3 credit hours)

HIST 1xxx/2xxx/3xxx - History Elective (3)

History 2000/3000 Level Courses (6 credit hours)

HIST 2xxx/3xxx - History Elective (3)

HIST 2xxx/3xxx - History Elective (3)

History 3000 Level Courses (6 credit hours)

HIST 3xxx - History Elective (3)

HIST 3xxx - History Elective (3)

Non-Western History Requirements

These courses also fulfill requirements in the History Methodology Sequence and/or Restrictive Elective requirements. Select two of the following:

HIST 2002 - Topics in Non-Western History (3)
HIST 2092 - Topics in Non-Western History (3)
HIST 2201 - History of Modern Asia (3)
HIST 2206 - Colonial Latin America (3)
HIST 2207 - Modern Latin America (3)
HIST 2208 - Privateers, Buccaneers, and Pirates of the Caribbean, 1523-1726 (3)
HIST 2209 - Cultures, Contacts, and Conflicts in the Colonial Caribbean, 1492-1898 (3)
HIST 2210 - Pre-Colonial Africa (3)
HIST 2211 - Modern Africa (3)
HIST 2215 - A History of Muslim Societies (3)
HIST 2216 - The Modern Middle East (3)
HIST 3002 - Topics in Non-Western History (3)
HIST 3010 - Non-Western History and Culture through Film (3)
HIST 3092 - Topics in Non-Western History (3)
HIST 3154 - Globalization in African History (3)
HIST 3155 - Health and Healing in Africa (3)
HIST 3165 - History of Modern Japan (3)
HIST 3168 - Gandhi and Radical Dissent in the Modern World (3)
HIST 3169 - Central Asia from 1800 to the Present (3)
HIST 3176 - History of Mexico (3)
HIST 3178 - History of Brazil (3)
HIST 3179 - Authoritarianism in Latin America (3)
HIST 3180 - Caribbean History (3)
HIST 3181 - Afro-Latin American History (3)
HIST 3190 - Slavery, Racism, and Colonialism in the African Diaspora (3)
HIST 4002 - Topics in Non-Western Historiography (3)

Unrestricted Elective Courses

As needed to complete the credit hours required for graduation.

Senior Seminar Course (3 credit hours)
HIST 4600 - Senior Research Seminar (3)

Degree Total = 120 Credit Hours

Progression Requirements

Students must achieve a cumulative GPA of 2.0 in all history courses. Grades of C or above are required in HIST 3600 and either HIST 4000, HIST 4001, HIST 4002, or HIST 4003.

Bachelor of Arts in History with Comprehensive Secondary Social Studies Teacher Licensure

The Department of History, in collaboration with the College of Education, offers the premier track to a North Carolina Professional Licensure III status in History and Social Studies. The coursework for this licensure includes nearly equal numbers of content area courses in history and affiliated social studies supervised by the Department of History, and education courses supervised by the Department of Middle, Secondary, and K-12 Education. Students interested in teacher licensure should declare their intent with the Department of History as soon as possible to prevent unnecessary delays.

Admission Requirements

Pedagogical Theory and Praxis

Minor in Secondary Education (32 credit hours)

Students must have a Minor in Secondary Education to obtain teaching licensure.

Admission Requirements

- 30 earned credit hours with 2.7 overall GPA
- Complete MDSK 2100 and the Praxis Core test

Graduation Requirements

- 2.75 overall GPA and in content background/licensure courses (with grades of C or above)

See the Minor in Secondary Education in the College of Education section of this *Catalog* for more details. Licensure applications are the responsibility of the student and the Office of Teacher Education Advising and Licensure (TEAL) in the College of Education.

Degree Total = 120 Credit Hours

Progression Requirements

Students must achieve a cumulative GPA of 2.0 in all History courses. Grades of C or above are required in HIST 3600 and either HIST 4000, HIST 4001, HIST 4002, or HIST 4003. To be eligible for licensure, students must obtain a grade of C or above for all History, Social Studies, and Education courses, as well as a cumulative GPA of 2.7 or above for admission to the College of Education, and a 2.75 GPA in History and Social Studies coursework.

Honors Program in History

The B.A. in History with History Honors is the highest distinction the Department of History offers. This Honors College-sanctioned accolade attests to a candidate's exemplary grade point average in their major, the completion of honors coursework; as well as the successful defense of a distinguished undergraduate thesis. Honors in History is a great preparation for graduate school, and/or a stellar addition to a student's resume.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Entry into the History Honors Program and/or its courses is by permission of the Director of Honors in the Department of History. Majors who have completed HIST 3600 with a grade of A, and who have a GPA of 3.5 in History and a 3.0 overall at the time of application are welcome to apply. The Honors Committee will consider applications of majors who received a B in HIST 3600 and/or have an overall and History GPA of 3.0 or above, upon recommendation of their HIST 3600 instructor.

Because HIST 4797 is taught only in the Fall semester, students must complete their application to the History Honors Program well before their expected graduation. For this reason, qualified students are urged to discuss the History Honors Program with the Department's Honors Director early in their career.

New Transfer

See University Admission Requirements

Currently Enrolled Students

HIST 4797 - Topics in Honors Historiography and Methodology (3)

HIST 4799 - Honors Research and Thesis (3)

Note: HIST 4799 is normally taken in the semester before graduation. Students considering Honors in History should note that HIST 4797 will

fulfill the requirement for HIST 4000, HIST 4001, HIST 4002, or HIST 4003; and completion of HIST 4799 will fulfill the requirement for HIST 4600.

Progression Requirements

To be awarded Honors in History, candidates must write an honors thesis of A quality (and thus a grade of A for HIST 4799) as judged by a committee of readers. In addition, the student must complete HIST 4797 and HIST 4799 with a 3.50 GPA or above, obtain a GPA of 3.50 or above in History courses, and an overall GPA of at least 3.0. Finally, students must formally apply and be approved for Honors Candidacy by the Honors College, a process which will be initiated as part of HIST 4797.

The honors notation will appear on a student's official transcript.

Minor in History

A Minor in History consists of 18 credit hours.

- HIST 3190 - Slavery, Racism, and Colonialism in the African Diaspora (3)
- HIST 4002 - Topics in Non-Western Historiography (3)

Progression Requirements

Students must obtain a minimum GPA of 2.0 in HIST courses counted toward the minor. Before taking HIST 3600, students must have completed 9 credit hours of HIST courses. Transfer students are required to take at least 6 credit hours of Minor in History coursework at UNC Charlotte.

Minor Total = 18 Credit Hours

Early Entry: Master of Arts in History

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate degree before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

Accelerated Master's Program

(for High School Seniors and UNC Charlotte Undergraduate Freshmen)

Academically talented high school seniors and UNC Charlotte undergraduate freshmen are encouraged to apply to an Accelerated Master's Program to begin work toward both undergraduate and graduate degrees in their Freshman year.

Admission Requirements

- See University Admission Requirements
- Minimum high school GPA of 3.75 (on a 4.0 scale)
- Minimum score of 1220 on SAT

Progression Requirements

Students must maintain a strong academic record at both the undergraduate and graduate levels with a cumulative GPA of 3.0 or above.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of graduate coursework may be double-counted toward both the undergraduate and graduate degrees).

For additional details on the Accelerated Master's Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/accelerated-masters.

For details about the full requirements for this degree program, see the program listing in the *Graduate Catalog*.

- **Early Entry: M.A. in Latin American Studies**
- **Early Entry: Graduate Certificate in Gender, Sexuality, and Women's Studies**
- **Early Entry: Graduate Certificate in Gerontology**

From global health and climate change to social discrimination and economic inequality, the challenges we face in the world today require examination from diverse perspectives. Increasingly, scholars and policymakers are adopting interdisciplinary approaches that integrate data, methods, concepts, and theories from multiple fields to enhance our understanding of complex issues and develop effective solutions.

The Office of Interdisciplinary Studies collectively offers multiple undergraduate majors, minors, and certificates, along with early entry graduate programs. Interdisciplinary courses of study enable students to navigate across disciplines, create new connections, and innovate original solutions tailored for the modern workforce. Students customize their educational experiences by combining interdisciplinary interests with more traditional disciplinary programs. Interdisciplinary Studies offers a flexible path to accommodate your personal and professional goals.

All program-level Admission and Progression Requirements are in addition to the University of North Carolina at Charlotte Admissions Requirements.

American Studies

Minor in American Studies

American Studies is an interdisciplinary program designed to develop in-depth knowledge of American society, past and present. Drawing its curriculum from approved courses in other departments and its own core courses, the program weaves traditionally divergent disciplines together so that students gain a broad understanding of American life and culture. The Minor in American Studies is open to students of all majors. Students may complete the program by fulfilling requirements for the minor.

A Minor in American Studies consists of 18 credit hours: 6 credit hours of American Studies courses and 12 credit hours of American Studies courses or approved American-content courses from other departments.

Admission Requirements

Current UNC Charlotte

Undergraduate Students

See University Admission Requirements

Minor Requirements

Required Courses (6 credit hours)

AMST 3100 - Introduction to American Studies (3)

AMST 2xxx-4xxx - American Studies (3)*

**AMST 3100 may be repeated for credit, as decades vary.*

Elective Courses (12 credit hours)

The following American-content courses have been approved for the minor. Because additions and deletions are made to correspond to current University offerings, students are advised to consult with the Program Director. Other courses that do not appear on the list, especially topics and independent study courses, may be approved if they are pertinent to the student's program and deal with an American topic. A maximum of 6 credit hours of American-content courses may also be in the student's major. If the student has additional majors or minors, no more than 6 credit hours of American-content courses from each of these may apply to the Minor in American Studies. These stipulations include cross-listed courses regardless of the program designation under which the course was taken. Exceptions may be approved by the Program Director and, if necessary, upon consultation with the other program in question. *Note: Students exercising this option should be aware that the accuracy of the online degree audit may be affected.*

Minor Total = 18 Credit Hours

Progression Requirements

All students must have a GPA of at least 2.0 in courses applied to the minor.

Capitalism Studies

Minor in Capitalism Studies

Capitalism Studies is an interdisciplinary approach to the study of the history and present-day workings of the modern global economy. The Minor in Capitalism Studies encourages students to gain a broad, well-rounded understanding of business, labor, government, and economics, by considering those subjects from multiple disciplines, across the social sciences and humanities. By demanding an interdisciplinary perspective, the minor requires students to combine quantitative and qualitative analysis; it encourages not only numeracy and financial literacy, but also historical, institutional, ethical, and cultural perspectives. It is designed to prepare students to work in a wide range of occupations in business,

government, and the non-profit sector, and for the obligations of state, national, and global citizenship, in the 21st century.

Admission Requirements

Current UNC Charlotte Undergraduate Students

The minor is open to all students at UNC Charlotte.
See University Admissions Requirements.

New Transfer

See University Admissions Requirements

Minor Requirements

Introductory Courses (6 credit hours)

- CAPI 1501 - Global Social Science: Capitalism in Global Context (3)
or CAPI 1575 - Capitalism and Democracy (3)
ECON 1501 - Global Social Science: Economics of Global Issues (3)
or ECON 2101 Principles of Economics Macro (3)

Elective Courses (12 credit hours)

Select from the following approved elective courses. Other courses not on this list, such as topics courses directly related to the minor, courses cross-listed with those on the list, and independent study courses, may be approved by the Program Director. Students may count toward the minor a maximum of 6 credit hours from any one major. In addition, students cannot take more than 6 credit hours from any one major area, such as AFRS, ANTH, ECON, GEOG, INTL, HIST, POLS, and SOCY.

- AFRS 3190 - Political Economy of the Caribbean (3)

WGST 3230 - Gender, Work, and Money (3)

Minor Total = 18 Credit Hours

Progression Requirements

Students are required to complete the Introductory courses (CAPI 1501 or CAPI 1575; and ECON 1501 or ECON 2101) with grades of C or above. An overall GPA of 2.0 in all courses that are counted toward the minor is also required, and no courses counted toward the minor may be taken as pass/no credit.

Film Studies

Minor in Film Studies

The interdisciplinary Minor in Film Studies allows students to develop knowledge of film and video as an art form while fulfilling the requirements for one of the approved degree programs at the University. The Film Studies Minor offers courses that focus directly or implicitly on cinema. The program is designed for students who wish to understand film better as an art form, as popular culture, and as a major medium of communication. The courses that satisfy the minor represent different aspects of film and video art: (1) Culture, (2) History, (3) Theory, and (4) Production. Students have the option to also earn a Certificate in Video Production with the Minor in Film Studies by completing additional coursework in production.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor Requirements

The Minor in Film Studies requires the completion of 18 credit hours of approved courses.

Required Courses (3 credit hours)

- FILM 1502 - Global Arts/Humanities: Introduction to Film and Media Art (3)

Elective History/Theory Courses (15 credit hours)

Select five of the following:

- AFRS 2105 - Black Images in the Media in the U.S. (3)
COMM 3050 - Topics in Communication Studies (3) (*Film topic*)
COMM 3052 - Topics in Media & Technology Studies (3)
COMM 3125 - New Media for Communications (3)
ENGL 2106 - Film Criticism (3)
ENGL 3050 - Topics in English (3) (*Film topic*)
FILM 3050 - Topics in Film (3) (*Includes screenwriting*)

- FILM 3051 - Topics in Film (3) (*Includes video production*)
 FILM 3120 - The Fundamentals of Video/Film Production (3)
 FILM 3121 - Cinematic Storytelling (3)
 FILM 3220 - Introduction to Screenwriting (3)
 FILM 3221 - Advanced Screenwriting (3)
 FILM 3800 - Directed Project in Film or Video (1 to 3)
 FILM 4120 - Production and Directing (3)
 FILM 4122 - Music Video Production (3)
 FILM 4220 - Film Festivals & Impact Production (3)
 FILM 4320 - Acting & Directing for Film (3)
 FILM 4410 - Professional Internship in Film Studies (1 to 6)
 GERM 3660 - Survey of German Film (3)
 HIST 3010 - Non-Western History and Culture through Film (3)
 HIST 3011 - History and Culture through Film (3)
 JAPN 3060 - Topics in Japanese Film (3)
 JAPN 4040 - Advanced Topics in Japanese Media and Culture (3)
 LANG 3050 - Topics in Language, Literature, and Culture (3) (*French, German, Italian, Japanese, etc. film topic*)
 LANG 3160 - European Cinema (3)
 RELS 2246 - Jesus at the Movies (3)
 RELS 3212 - Religion, Media, and Film (3)
 THEA 2320 - Playwriting I (3)
 THEA 4001 - Topics in Theatre (1 to 6) (*Fundamentals of Film Production and other topics*)

Minor Total = 18 Credit Hours

Progression Requirements

- Students are required to complete FILM 1502: Introduction to Film and Media as a foundational course which counts toward the Minor.
- Students may take both Interdisciplinary and Production Electives for the 5 courses (15 credits) required for the Minor.

Special Policies or Requirements

- Students are able to count both FILM and FILM cross-listed courses toward their Minor courses. If a course is cross-listed with another program or department (i.e. AMST, ENGL). Students may sign up for either section and receive credit toward the Minor.
- Students are able to take multiple Topics in Film courses to count toward their Minor and/or Undergraduate Certificate (i.e. FILM 3050, FILM 3051). DegreeWorks recognizes up to two (2) Topics in Film courses automatically. Additional courses should receive Program approval prior to enrolling, and may require a waiver request to be recognized via DegreeWorks.
- Should a different program or department offer a film-based course which is not cross-listed with FILM, students will need to receive special approval from the Program to count toward the Minor and/or Undergraduate Certificate.

Minor in Film Studies with an Undergraduate Certificate in Video Production

Students have the option to earn a Certificate in Video Production alongside the Minor in Film Studies.

Admission Requirements

Current UNC Charlotte Undergraduate Students

See University Admission Requirements

Minor/Certificate Requirements

The Minor in Film Studies with a Certificate in Video Production requires the completion of 21 credit hours of approved courses.

Required Courses (9 credit hours)

- FILM 1502 - Global Arts/Humanities: Introduction to Film and Media Art (3)
 FILM 3120 - The Fundamentals of Video/Film Production (3)
 FILM 3220 - Introduction to Screenwriting (3)

Elective Production Courses (6 credit hours)

Select two of the following:

- FILM 3121 - Cinematic Storytelling (3)
 FILM 3221 - Advanced Screenwriting (3)
 FILM 3800 - Directed Project in Film or Video (1 to 3)
 FILM 4120 - Production and Directing (3)
 FILM 4220 - Film Festivals & Impact Production (3)
 FILM 4410 - Professional Internship in Film Studies (1 to 6) (*No more than 3 credit hours may count toward the minor*)

Elective History/Theory Courses (3 credit hours)

Select one of the following:

- FILM 3050 - Topics in Film (3) (*Screenwriting topics*)
 FILM 3051 - Topics in Film (3) (*Video production topics*)
 AMST 3090 - Topics in American Film (3)
 AFRS 2105 - Black Images in the Media in the U.S. (3)
 AFRS 3192 - African Cinema (3)
 COMM 3050 - Topics in Communication Studies (1 to 3) (*Film topic*)
 COMM 3052 - Topics in Media & Technology Studies (3)
 COMM 3125 - New Media for Communications (3)
 ENGL 2106 - Film Criticism (3)
 ENGL 3050 - Topics in English (3) (*Film topic*)
 ENGL 3072 - Topics in Literature and Film (3)
 GERM 3660 - Survey of German Film (3)
 HIST 3010 - Non-Western History and Culture through Film (3)

- HIST 3011 - History and Culture through Film (3)
 JAPN 3060 - Topics in Japanese Film (3)
 JAPN 3140 - Anime: Genres, Themes and History (3)
 JAPN 4040 - Advanced Topics in Japanese Media and Culture (3)
 LANG 3050 - Topics in Language, Literature, and Culture (3) (*French, German, Italian, Japanese, etc. film topic*)
 LANG 3160 - European Cinema (3)
 LBST 1102 - The Arts and Society: Film (3)
 POLS 3128 - Politics and Film (3)
 RELS 3212 - Religion, Media, and Film (3)
 RELS 2246 - Jesus at the Movies (3)
 SPAN 3160 - Studies in Hispanic Film (3)
 THEA 2290 - Acting on Camera I (3)
 THEA 2320 - Playwriting I (3)
 THEA 4001 - Topics in Theatre (1 to 6) (*Fundamentals of Film Production and other topics*)

Capstone in Film & Media Production (3 credit hours)

Participation in a preliminary orientation session a semester in advance is required to receive a permit for this course. Students must be enrolled in the Undergraduate Certificate in Video Production and should take this course as close to graduation as possible. Students must have completed all or the large majority of Minor and Certificate course to receive a permit for this course. Transfer credit is not accepted for this course.

The course is designed as a pre-professional launching pad and exploratory survey of career options for Film Studies Minor and Undergraduate Certificate in Video Production students through the development of a concentrated thesis project and ancillary materials to complete a professional portfolio package.

FILM 4690 Capstone in Film Studies (3)

Total = 21 Credit Hours

Progression Requirements

- Students are required to complete FILM 1502: Introduction to Film and Media as a foundational course which counts toward the Minor.
- Students must successfully complete FILM 3120: Fundamentals of Film/Video Production as a prerequisite before enrolling in additional production courses.
- Upon successful completion of FILM 1502, production and interdisciplinary electives, students should conclude their Program studies with FILM 4690: Capstone in Film Studies to successfully complete their Minor and Undergraduate Certificate.

Special Policies or Requirements

- Students are able to count both FILM and FILM cross-listed courses toward their Minor courses. If a course is cross-listed with another program or department (i.e. AMST, ENGL). Students may sign up for either section and receive credit toward the Minor.
- Students must receive Program approval to allow production courses offered outside FILM at the University count toward their Undergraduate Certificate.
- Students may receive Program approval for transfer credits in film studies and/or production courses so long as they represent consistent areas of focus and developmental levels.
- Students are able to take multiple Topics in Film courses to count

toward their Minor and/or Undergraduate Certificate (i.e. FILM 3050, FILM 3051). DegreeWorks recognizes up to two (2) Topics in Film courses automatically. Additional courses should receive Program approval prior to enrolling, and may require a waiver request to be recognized via DegreeWorks.

- Should a different program or department offer a film-based course which is not cross-listed with FILM, students will need to receive special approval from the Program to count toward the Minor and/or Undergraduate Certificate.

Undergraduate Certificate in Video Production

The Certificate in Video Production is designed for students who wish to develop practical skills in the art of filmmaking. It can be earned in conjunction with the Minor in Film Studies or as a stand-alone certificate. The courses that lead to a Certificate in Video Production represent different technical and aesthetic aspects of filmmaking, including screenwriting, directing, producing, acting, and cinematography using video.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Students must be enrolled as a full-time student pursuing a major in their selected field of study in order to sign up for the Undergraduate Certificate. The Certificate cannot be pursued separately from a degree program.
- Students who also wish to pursue the Minor in Film Studies may sign up for both at the time of application.

Certificate Requirements

The Certificate in Video Production requires the completion of 18 credit hours of approved courses.

Required Courses (6 credit hours)

- FILM 1502 - Global Arts/Humanities: Introduction to Film and Media Art (3)
 FILM 4690 - Capstone in Film Studies (3)

Elective Productive Courses (12 credit hours)

Select four of the following:

- FILM 3120 - The Fundamentals of Video/Film Production (3)
 FILM 3121 - Cinematic Storytelling (3)
 FILM 3220 - Introduction to Screenwriting (3)
 FILM 3221 - Advanced Screenwriting (3)
 FILM 4120 - Production and Directing (3)
 FILM 4121 - Creative Nonfiction Production (3)
 FILM 4220 - Film Festivals & Impact Production (3)
 FILM 4221 - Community-Based Film Production (3)
 FILM 4410 - Professional Internship in Film Studies (1 to 6) (*No more than 3 credit hours may count toward the minor*)

Certificate Total = 18 Credit Hours

Gerontology

- Minor in Gerontology
- Early Entry: Graduate Certificate in Gerontology

The interdisciplinary program in Gerontology is designed to provide students with academic and field experiences in the area of aging. An understanding of the basic processes of aging and of its social consequences is valuable not only for students who wish to pursue careers directly related to gerontology but also for students interested in careers in other areas and interested in their own aging. As the number of older persons in our society continues to increase, it will be important for people in every occupation and profession to have a basic understanding of the aging process. The goal of the program is to provide students with that basic understanding.

Gerontology is both an interdisciplinary and a multidisciplinary field. Invariably, the best research, training, and service programs in gerontology have developed when professionals from a variety of traditional academic disciplines have been afforded the opportunity to work together, each contributing a unique expertise while benefiting from the expertise of others.

Minor in Gerontology

The Minor in Gerontology is built around a core sequence of interdisciplinary and multidisciplinary courses that are taught from a variety of different academic disciplines. This approach is designed to bring together information from multidisciplinary sources, integrate theoretical and applied concepts in gerontology, and communicate to students the need for an integrated approach to meeting the needs of all of us as we age.

A Minor in Gerontology can be useful in combination with a broad range of majors. With the aging population growing rapidly in the U.S. and globally, there are consequences that translate into diverse career options. Projections indicate opportunities in city planning, administration, management, recreation, counseling, physical therapy, social work, program development, research, long-term care administration, and healthcare, for example.

Admissions Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements

New Transfer

- See University Admission Requirements

Currently Enrolled Students

Declaration of Major: Change of Major forms accepted year-round. Students must make an advising appointment during SOAR and when declaring the major.

Minor Requirements

The Minor in Gerontology is awarded only to students completing an undergraduate major at UNC Charlotte. A total of 18 credit hours in gerontology courses is required.

Foundation Course (3 credit hours)

GRNT 2100 - Aging and the Lifecourse (3) (SL)
or SOCY 2100 - Aging and the Lifecourse (3) (SL)

Note: Transfer credit is not accepted for these courses.

Primary Elective Courses (6 credit hours)

Select at least two of the following:

GRNT 2124 - Psychology of Aging (3)
or PSYC 2372 - Psychology of Aging (3)
GRNT 3115 - Health and the Aging Process (3)
or HLTH 3115 - Health and the Aging Process (3)
or NURN 4100 - Aging and Health (3)
or NURS 4100 - Nursing Care of the Aging Adult (3)
GRNT 4110 - Sociology of Aging (3)
or SOCY 4110 - Sociology of Aging (3)
GRNT 4250 - Aging Programs and Services (3)
GRNT 4366 - Minorities and Aging (3)
or SOCY 4366 - Minorities and Aging (3)

Secondary Elective Courses (6 credit hours)

Secondary elective courses may be chosen from the following list of approved courses related to gerontology in consultation with the Gerontology Undergraduate Coordinator. Additional primary elective courses may also count toward this requirement. Other appropriate courses may be chosen as electives in consultation with the Gerontology Undergraduate Coordinator.

GRNT 3125 - Older Worker and Retirement (3)
or PSYC 3125 - Older Worker and Retirement (3)
or SOCY 3125 - Older Worker and Retirement (3)
GRNT 3134 - Families and Aging (3)
or SOCY 3134 - Families and Aging (3)
GRNT 3267 - Sociology of Dying, Death and Bereavement (3)
or SOCY 3267 - Sociology of Dying, Death and Bereavement (3)
GRNT 3800 - Independent Study in Gerontology (1 to 8) (*a total of 3 credit hours may be counted toward the minor requirements*)
GRNT 4050 - Topics in Gerontology (1 to 4)
GRNT 4260 - Women: Middle Age and Beyond (3)
or HLTH 4260 - Women: Middle Age and Beyond (3)
or WGST 4260 - Women: Middle Age and Beyond (3)
GRNT 4280 - The Experience of Dementia (3)
or SOWK 4280 - The Experience of Dementia (3)
GRNT 4290 - The Experience of Loneliness (3)
or SOCY 4290 - The Experience of Loneliness (3)
GRNT 4353 - Environments for Aging (3)
or SOWK 4353 - Environments for Aging (3)
GRNT 4364 - Aging and Criminal Justice: An Interdisciplinary Understanding (3)

or CJUS 4364 - Aging and Criminal Justice: An Interdisciplinary Understanding (3)
GRNT 4365 - Grief and Loss Across the Lifespan (3)
or SOWK 4365 - Grief and Loss Across the Lifespan (3)
GRNT 4366 - Minorities and Aging (3)
or SOCY 4366 - Minorities and Aging (3)
PHIL 2220 - Healthcare Ethics (3)
POLS 3125 - Healthcare Policy (3)
SOCY 2169 - Sociology of Health and Illness (3)
SOWK 4101 - Social Work Practice with Elderly (3)

Senior Seminar (3 credit hours)

Participation in a preliminary orientation session a semester in advance is required to receive a permit for this course. Students must be declared minors who have completed GRNT 2100, two primary elective courses, and one secondary elective courses (preferably two), and should take this course as close to graduation as possible. Transfer credit is not accepted for this course.

GRNT 3600 - Senior Seminar and Field Experience in Aging (3)

Minor Total = 18 Credit Hours

Progression Requirements

An overall GPA of 2.5 in GRNT courses is required. Students must earn a C or above in courses that are counted toward the minor.

Special Policies or Requirements

Because this is designed to be an interdisciplinary minor, no more than three courses in the student's major may count toward the minor.

Students who have earned a bachelor's degree from UNC Charlotte may be readmitted to pursue a Minor in Gerontology, just as they may be readmitted to pursue a second major. (For further information on readmission, see the Admission to the University section of this *Catalog*.)

Students who have earned a bachelor's degree from an institution other than UNC Charlotte may not receive a Minor in Gerontology from UNC Charlotte (unless they earn a second baccalaureate degree from UNC Charlotte). Such students may request a letter from the program and/or a transcript notation that acknowledges completion of courses specified for the minor but indicates that the minor can only be awarded upon completion of a degree.

Early Entry: Graduate Certificate in Gerontology

Exceptional undergraduate students at UNC Charlotte may apply to this Early Entry Program to begin work toward a graduate certificate before completion of the baccalaureate degree.

Admission Requirements

Current UNC Charlotte Undergraduate Students

- See University Admission Requirements
- Completion of at least 75 undergraduate credit hours (although it is expected that close to 90 credit hours will have been earned by the time the first graduate course is taken)
- Minimum 3.2 overall undergraduate GPA
- Submit application online at gradadmissions.charlotte.edu/apply and provide supporting documents
- Recommendation by the Graduate Program Director and approved by the Graduate School

Note: GRE scores are not required.

Progression Requirements

- Completion of Early Entry Program Form, and approved by the Undergraduate Coordinator, Graduate Program Director, and Graduate School, prior to registering for graduate coursework each semester
- Maintain a minimum 3.0 overall undergraduate GPA
- Undergraduate students are allowed to take only 15 hours of graduate credit before they have completed their baccalaureate degree.

Special Policies or Requirements

Up to 12 credit hours earned at the graduate level may be substituted for required undergraduate hours (i.e., up to 12 credit hours of undesignated elective coursework may be double-counted toward both the undergraduate and graduate degrees). Graduate courses may not double count toward the Minor in Gerontology.

For additional details on Early Entry to Graduate Programs, see the "Degree Requirements and Academic Policies" section of the *Graduate Catalog* and the Graduate Admissions website at gradadmissions.charlotte.edu/admissions/early-entry.

For details about the full requirements for this certificate program, see the program listing in the *Graduate Catalog*.
